

OR 99E at Maple Street Pedestrian Improvements

SUMMER 2024

About

We are building an enhanced crossing on OR 99E at SE Maple Street. The project installs an overhead RRFB, a pedestrian refuge island median, ADA compliant curb ramps with push buttons, illumination and speed feedback signs (one mile north).

Pedestrian activated beacons can reduce crashes between vehicles and pedestrians by up to 47% according to the Federal Highway Administration.

Project Need

ODOT worked with community to get input and identify this location as a priority site for pedestrian safety improvements. As it is now, pedestrians have to travel nearly a half-mile out-of-direction just to use the nearest marked crossing.

ABOVE: ODOT ranked this location in our highest priority group for pedestrian crash risk factors.

Learn more about other ODOT Rapid Flashing Beacon projects!

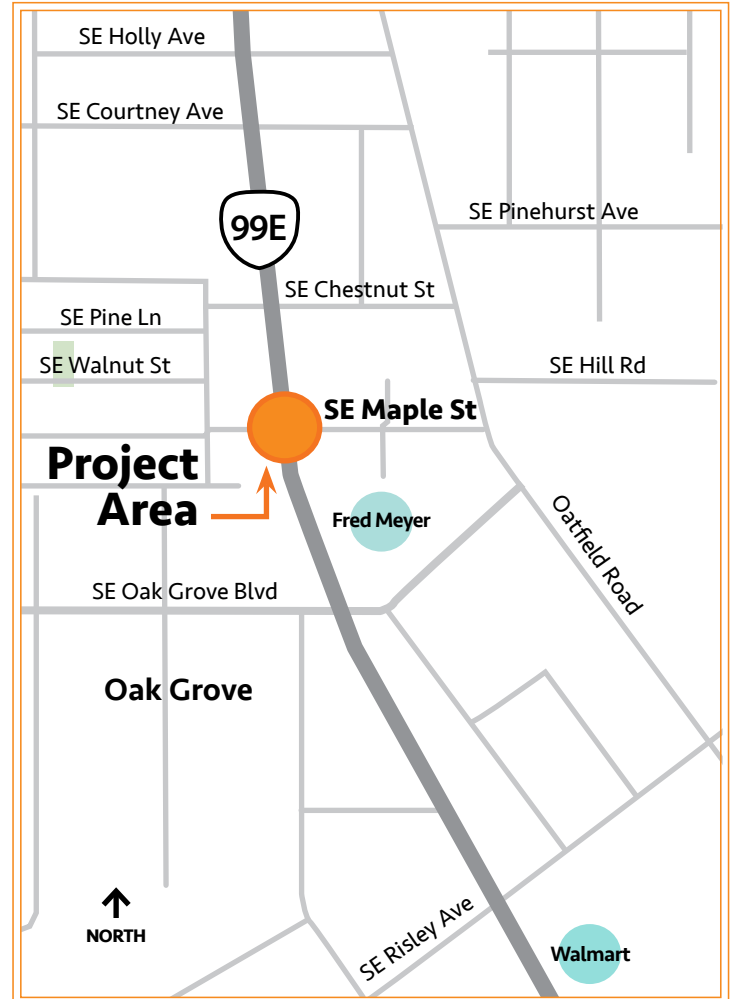

We are preparing to install over 20 other RRFBs to improve safety for people crossing highways in Portland and many other places in the metro area in the next several years.

Project Area Map

OR 99E at SE Maple Street in Oak Grove.

Project Benefit

This project improves pedestrian safety on OR 99E by installing a pedestrian activated beacon.

Project Cost

Project cost is being developed and is being paid for by Statewide Pedestrian and Bicycle Program Funds.

Project Schedule

Construction expected October - December 2024. During construction, travelers can expect lane closures on OR 99E and impacts to SE Maple and Chestnut Streets including turning restrictions and detours.
