

Overview

We are bringing sidewalk curb ramps into compliance with Americans with Disabilities Act (ADA) accessibility standards on highways throughout Oregon including OR 141 (SW Hall Boulevard) and 72nd Avenue. These upgrades create safer and more accessible highway connections for all sidewalk users.

We will upgrade over 120 sidewalk curb ramps at approximately 90 intersections in Tigard along SW Hall Boulevard between Oregon 99W and Durham Road, and on SW 72nd Avenue between Gonzaga Street and Varns Street, making them ADA compliant. Work includes:

Upgrading existing ADA curb ramps

- This improvement will allow all users, including people in wheelchairs and using mobility aids, to make a smooth transition from the street to the sidewalk.

Lowering crosswalk buttons and installing audible pedestrian signals

- These upgrades help all pedestrians cross the street safely by accessing the crosswalk button at signalized intersections and providing an audible cue for the crosswalk signal.

Restriping and realigning crosswalks

- These upgrades will improve visibility and create a direct path from curb-to-curb, increasing pedestrian safety while crossing the street.

The project is currently in design and is scheduled to start construction in 2025.

Safety improvements include installing curb ramps meeting ADA standards.

Safety improvements include lowering crosswalk buttons and installing audible pedestrian signals.

Traffic Impacts

- The work will require periodic single-lane and sidewalk closures in construction areas.
- We will provide signed ADA-accessible pedestrian detours around work zones.

Noise Impacts During Construction

To minimize traffic impacts during the day, some night work may be required. Those working or living in the area may hear the noise from heavy equipment, construction trucks, beeping noise when vehicles are in reverse (required by the Occupational Safety and Health Administration), and equipment such as concrete saws, drills and jackhammers.

More information will be shared with residents and businesses in the project area before construction begins, including a noise hotline you can call to help resolve noise-related concerns 24 hours a day.

The **ODOT ADA PROGRAM** is working to bring more than 25,000 curb ramps throughout Oregon into compliance with Americans with Disabilities Act (ADA) standards. The effort was launched in response to a formal complaint from the Association of Oregon Centers for Independent Living (AOCIL). Together we reached an agreement to improve curb ramps and pedestrian signals along all state highways. We are committed to new standards for accessible routes through work zones, outreach and addressing public concerns. Everyone who uses sidewalks along our highways will benefit from this commitment and the improvements we make to the curb ramps.
