

PROJECT OVERVIEW

Oregon Department of Transportation (ODOT) is currently designing projects to improve the I-5 bridge at SW 26th Avenue and repair three ramps that access I-5 in SW Portland. These structural improvements will maintain and extend the life of our roadway system and give travelers a smoother ride.

CONSTRUCTION IMPACTS

We will share more detailed information about impacts as the design progresses.

SCHEDULE

Construction of the ramp repairs is expected to begin in summer 2021 and may take up to one year to complete. Construction of the bridge improvement is expected to begin in spring 2022 and may take up to two years to complete.

PROJECT BENEFITS

- **Maintain and extend the life of infrastructure:**

This work will extend the life of the transportation system. Ramp repairs increase capacity to handle daily traffic loads, while a bridge improvement will better sustain a major event, such as an earthquake.

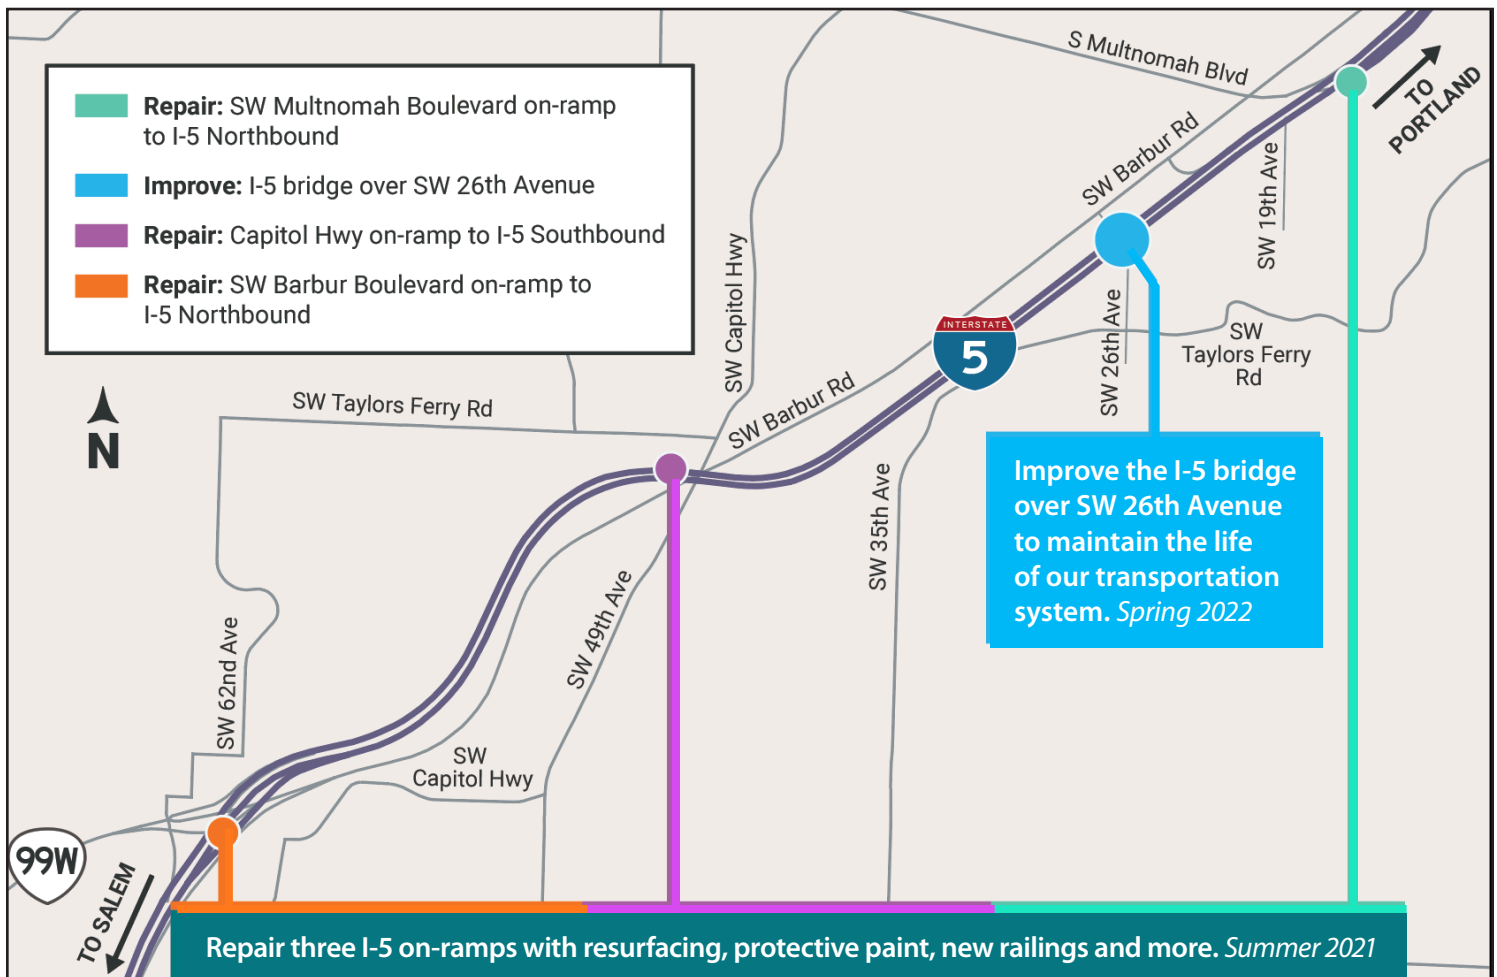

- **Smoother ride for travelers:**

An improved roadway will provide a smoother ride for 120,000 drivers who use this stretch of I-5 every day, causing less wear and tear on drivers' vehicles.
