

OR 99E: American Drive to South City Limit

Halsey, OR

Project Description

This project will repair and replace damaged roadway on OR 99E through downtown Halsey. Safety and road improvements will increase pedestrian and bicycle accessibility, while repairing the road surface for better stormwater drainage and a smoother ride.

Purpose And Need

The current road is in poor condition. There is a lack of proper stormwater drainage. Sidewalks and crossings do not meet current ADA standards.

Proposed Solutions

This project will repair the road and provide safer pedestrian and bicycle access. Improvements include new sidewalks, new bike lanes, upgraded pedestrian crossings, water drainage and landscaping around the highway surface.

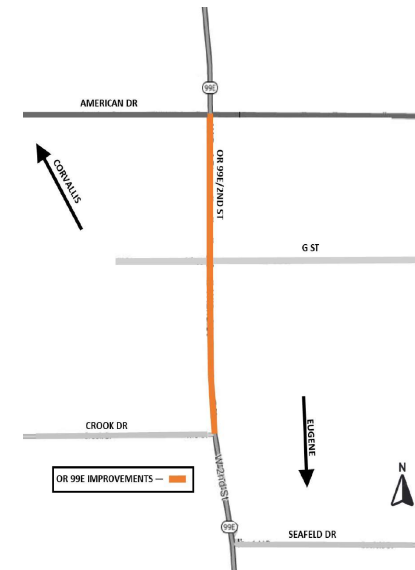

Anticipated Benefits

The improvements in this project will:

- Repair or replacement damaged concrete panels for a smoother ride.
- Upgrade existing sidewalks and crossings to current ADA standards.
- Provide additional features such as landscaping and streetscaping.
- Install stormwater treatment facilities.
