

I-405: Fremont Bridge (Willamette River) West Ramps

Multnomah County

Project Description

Repaint the steel portions on the underside of the west ramps to the Interstate 405 Fremont Bridge.

Anticipated Benefits

- Restores and extends the life of the bridge steel parts.
- Reduces need for costly repairs later by addressing maintenance in a timely manner.

The west side of the I-405 Fremont Bridge

Purpose And Need

Paint on the bridge protects and preserves the steel structure from the elements. Repairs now prevent corrosion and costly future repairs.

Proposed Solutions

In addition to repainting the steel portions of the structures, the project includes cleaning, removing rust, and repairing and replacing bridge fasteners.

Estimated Total Project Cost

Estimated total project cost \$115,494,000.

Rust on the underside of the Fremont Bridge ramp.
