

I-84: Roadway Illumination Project

Umatilla County

Project Description

Project funded for design only. Additional funding will be needed for project construction.

Install lighting on existing foundations to improve truck and passenger safety during inclement weather.

Purpose and Need

The challenging terrain on these two sections of Interstate 84 contributes to truck and passenger vehicle crashes during inclement weather.

Previous projects have provided the infrastructure for additional illumination but were not installed due to limited funds.

Proposed Solutions

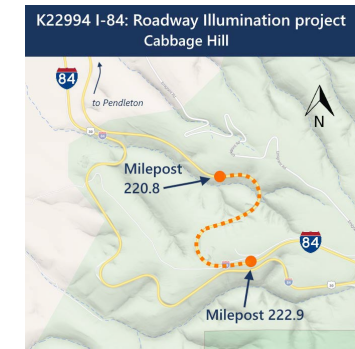

- Add approximately 10 light poles on Cabbage Hill, between mileposts 220.8- 222.9, westbound.
- Add approximately 40 light poles on Ladd Canyon, between mileposts 270.7-272.3, east and westbound.

Anticipated Benefits

- Improve safety by lighting the highway during nighttime and limited visibility conditions.
- Reduce serious and fatal crashes.
- Reduce frequency of interstate closures.

Estimated Project Cost

Cost for Design only \$130,500
