

OR 99W: (Barbur Blvd.) SW 26th Way - SW 26th Ave.

Multnomah County

Project Description

Improve safety and access for pedestrians and other road users by installing a new crosswalk with a rectangular rapid flashing beacon (RRFB), filling in sidewalk gaps, upgrading curb ramps and re-stripe existing bike lanes.

Purpose And Need

This project improves safety and access for people who walk and roll along this road. Barbur Blvd. is a priority location for an RRFB due to the surrounding conditions - four lanes, 40 mph posted speed and over 22,000 users daily and lengthy distances between signalized intersections.

Proposed Solutions

Build new sidewalks to fill in existing gaps on both sides of Barbur Blvd., add new rectangular rapid flashing beacon (RRFB) with a pedestrian refuge island, lighting, upgrade sidewalk curb ramps to make them ADA compliant.

Anticipated Benefits

- Increases safety and accessibility for pedestrians, bicyclists and people using mobility devices.
- Improves accessibility to area schools, grocery stores, health care, transit stops, and shops.
- Constructs ADA-compliant sidewalk curb ramps.
- Reduces pedestrian and bicycle crashes by building a safe pedestrian activated crossing with a new RRFB.
- Improves bike lane striping for bicyclists.
- Improves lighting at the new RRFB crossing for better visibility.

Estimated Project Cost

Estimated total project cost	\$4,240,00
