

# OR 141: Hall Blvd. at SW Hemlock St.

## Washington County

### Project Description

Increase pedestrian safety and connectivity on SW Hall Boulevard at SW Hemlock Street in Tigard/Metzger by building an enhanced pedestrian crossing at the intersection, along with new sidewalk, lighting and sidewalk curb ramps.

### Purpose And Need

This high pedestrian segment of Hall Boulevard lacks connected sidewalks, has a long distance between signalized pedestrian crossings, and a curve in the road decreasing visibility. A 2022 pedestrian fatality nearby highlighted the need for more frequent and safe crossing opportunities.

### Proposed Solutions

Install a rectangular rapid flashing beacon (RRFB) at the intersection of SW Hall Boulevard and SW Hemlock Street along with a median pedestrian island, add 300 feet of sidewalk along SW Hall Boulevard, upgrade sidewalk curb ramps, add new street lighting, signing and striping.

### Anticipated Benefits

- Provides enhanced pedestrian crosswalks at regular intervals along Hall Boulevard, improving the visibility of pedestrians crossing the street and encouraging people to use these crossings.
- Enhances the crosswalk and safely connects neighborhoods on both sides of Hall Boulevard, providing access to Metzger Park, Metzger Elementary School and transit.
- Fills sidewalk gaps along Hall Boulevard with sidewalk curb ramps up to ADA standards for connected and safe pedestrian routes.

### Estimated Project Cost

Estimated total project cost	\$2.868,000
