

I-84: Graham Road Bridges

Construction Starts February 2019

ODOT is constructing a project to replace two aging Interstate 84 bridges over Graham Road near downtown Troutdale.

Construction begins in early February and will continue through 2020.

During construction, I-84 travelers will be shifted onto a temporary bridge, then onto a new bridge once construction is complete. Travelers should be alert and watch for traffic changes occurring throughout construction. Construction will include widening Graham Road to include three travel lanes, a bike lane, and a new sidewalk.

Closures and Detours

Replacing the I-84 bridges and widening Graham Road will require periodic daytime and nighttime closures and detours of I-84, Exit 17 ramps and Graham Road. These lane, ramp and full closures will impact drivers as well as people who walk and ride bicycles. **(See inside for more information.)**

Construction Impacts and Noise

Nighttime work will involve bright lights and noisy activities such as cutting, drilling and moving construction equipment. Concerns about noise may be reported by using the **project 24/7 noise hotline (503-294-1326)**.

About the Project

The existing I-84 bridges over Graham Road are aging and the bridge surfaces are deteriorating. Where Graham Road passes under I-84 there are narrow shoulders, no sidewalks, and the vertical clearance is too short to safely accommodate large vehicles. Also, the two existing lanes under the bridges do not accommodate increased northbound traffic volumes caused by new development north of I-84.

This project will replace the I-84 bridges, widen Graham Road to three lanes, provide more vertical clearance for trucks, and improve walking and biking access under the bridges by adding a new sidewalk and bike lane.

Schedule

Construction Start: February 2019

Westbound I-84 Bridge Complete: Fall 2019

Eastbound I-84 Bridge Complete: Summer 2020

Graham Road Improvements Complete: Fall 2020

All Work Complete: Winter 2020

(Schedule is subject to change.)

Closures

All travelers should watch for flaggers and traffic pattern changes. Detour signs will be posted during roadway closures. ODOT will provide advance notice about closures and impacts to travelers and adjacent businesses through the website (i-84troutdale.org) and the interested parties email list. Sign up for alerts on the website or by emailing i-84troutdale@ODOT.state.or.us.

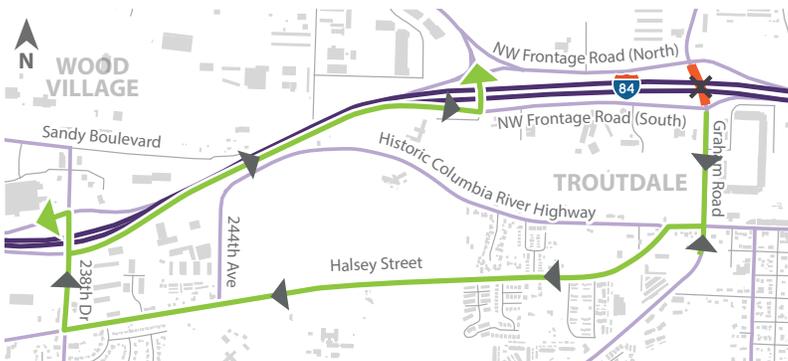

All businesses and recreational accesses are expected to be open during construction.

Travel Impacts

- **Walking access on Graham Road** under I-84 may be closed for up to six weekends to allow for the removal and construction of the new bridges and sidewalk.
 - **TriMet bus service** (lines 77 and 81) may require temporary rerouting during closures. Visit trimet.org/alerts for more information.
 - **Graham Road** will require daytime and nighttime single-lane closures between South Frontage Road and North Frontage Road. Graham Road may be fully closed for up to six full weekends.
 - **South Frontage Road** will require single-lane daytime and nighttime closures of the north (far left) lane.
 - **I-84** travelers will experience daytime single-lane closures for westbound travelers in spring 2019 and nighttime single-lane closures in both directions with related slowdowns, traffic control devices, and lane shifts at various times during the project. Brief, full closures of I-84 at night may be needed during construction of the temporary detour bridge. Speed limits in the work zone will be reduced to 50 mph during construction.
 - **I-84 entrance and exit ramps** at Graham Road will require occasional nighttime closures.
- I-84 lane and ramp closures** will last from 10 p.m. to 5:30 a.m. on weeknights and 10 p.m. to 8 a.m. on weekends. In spring 2019, daytime single-lane closures for westbound I-84 will last from 9 a.m. to 6 p.m.

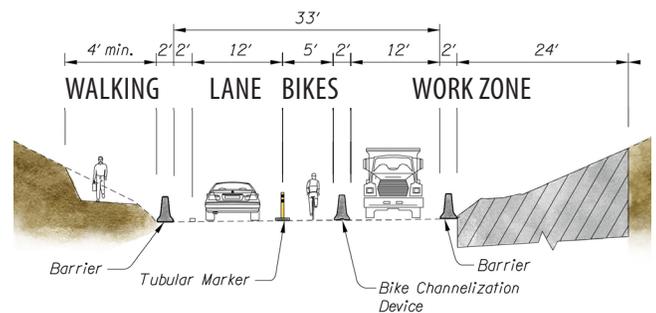

Detours: Graham Road Closures

GRAHAM ROAD DETOUR ON NIGHTS AND WEEKENDS

TRAVEL IMPACTS

- When Graham Road is **closed**, northbound traffic will detour at Halsey Street to NE 238th Drive.

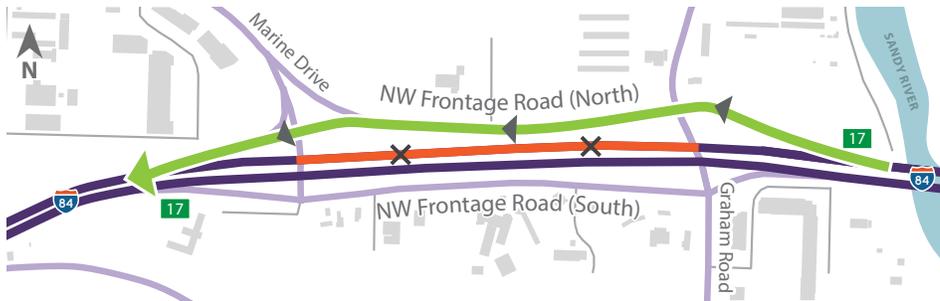

- **Pedestrian access will be allowed throughout the project, except during weekend closures when people walking or biking can follow signed detours using Harlow Road.**
- **Pedestrian access may shift between the right and left sides of Graham Road to accommodate construction.**

Detours: I-84 Closures

A detour bridge will allow travel during the day. Occasional nighttime closures will require the following posted detours:

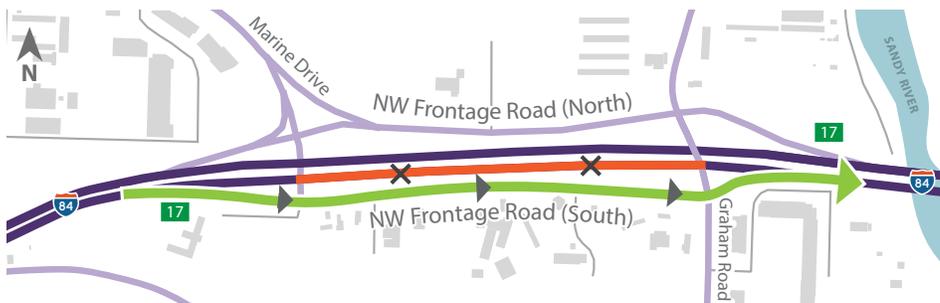

I-84 WESTBOUND DETOUR (NIGHT WORK)

TRAVEL IMPACTS

- When westbound I-84 is **closed**, traffic will be routed onto NW Frontage Road (North)

I-84 EASTBOUND DETOUR (NIGHT WORK)

TRAVEL IMPACTS

- When eastbound I-84 is **closed**, traffic will be routed onto NW Frontage Road (South)

Detours: I-84 Ramp Closures

I-84 WESTBOUND EXIT 17 RAMP DETOUR

TRAVEL IMPACTS

- When the westbound Exit 17 ramp is **closed**, traffic will turn around at NE 238th Drive (Exit 16)

I-84 EASTBOUND ENTRANCE RAMP DETOUR

TRAVEL IMPACTS

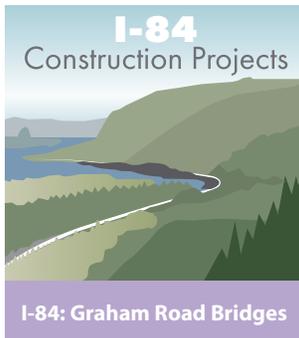

- When the eastbound entrance ramp is **closed**, traffic will turn around at NE 238th Drive (Exit 16)

I-84: Graham Road Bridges

Construction starts in February. Sign up for updates and learn more at:
