

About the project

The Oregon Department of Transportation will begin construction soon on a project to increase safety on **the N Lombard Street (U.S. 30BY) bridge over I-5**. The project will install a new protective screening and a new bridge railing on the Lombard Street bridge.

This work is part of a larger project that includes installing new protective screening on twelve bridges over ODOT highways in the Portland area, and new railings on four of the twelve bridges. Work began in 2021 and we expect it to continue through early 2022.

Project benefits

New protective screening on the bridge will improve safety by reducing the ability for objects to fall or be thrown off the bridge onto the highway below. New railing will bring the bridge rail up to current standards.

Project schedule

We expect construction to begin in the next few weeks and take about two months. Work will happen in two stages, one side of the bridge at a time.

The project schedule is subject to change. To get updates on schedule and traffic impacts, you can check out our project website or visit [TripCheck.com](https://www.tripcheck.com).

Protective screening will help improve safety on and below the Lombard St. bridge over I-5. We will also install new railing on both sides of the bridge.

Construction hours

- Work shifts for this project will mostly happen at night, but **lane closures on Lombard will be 24/7** for the duration of the project because crews have to remove the existing bridge rail to install the new rail. The hours for nighttime work will be **8 p.m. to 5 a.m.**

24/7 N Lombard St. impacts

- 24/7 right lane closures for about two months, one side of the bridge at a time.

I-5 traffic impacts

- Nighttime single lane closures on I-5 from 8 p.m. to 5 a.m.
- Nighttime two-lane closures on I-5 in one or both directions beginning at 10 p.m. All lanes will reopen at 5 a.m.
- Nighttime closures of I-5 north Exit 308B toward U.S. 30 Bypass/Lombard St. west during one stage of construction.

Impacts for people walking, rolling and biking

- There will be accessible detours while the sidewalk is closed during construction. People biking will continue to share the road with cars.

Construction noise

- Residents in the area may hear some noise at night from typical construction equipment. For nighttime noise concerns, please call our **24/7 noise hotline at 503-412-2349**.

December 2021

Portland Area Bridge Screening & Rail Retrofit

Lane closures begin soon on N Lombard St and I-5

New bridge railing and protective screening coming to the N Lombard St bridge over I-5; Expect 24/7 traffic impacts on Lombard for about two months.

Find more information inside.

About the project

ODOT will increase safety on twelve bridges over state highways in the Portland area in 2021 and 2022 by installing protective screening to reduce the ability for objects to fall or be thrown off the bridge. ODOT will also install new railings on four bridges to reduce the ability for vehicles to crash through the railing onto the highway below.
