

# Upcoming Utility Work

The **Outer Powell Transportation Safety Project** is expected to begin Phase 2 construction in late summer/early fall 2023. When completed, the project will help people travel Outer SE Powell Boulevard more safely by adding a center turn lane, sidewalks and bike lanes, among other safety improvements.

Before construction begins, pre-construction activities, including utility work, need to occur. Between **April 2023** and the end of this summer, you will be visited by a representative from [placeholder] utility company to detail the necessary utility-related work needed at your property. In general, this work consists of pole relocation and fence removal.

These activities are occurring Monday through Saturday, from 7 a.m. to 6 p.m.

We appreciate your cooperation on this important safety improvement project, and please contact [placeholder] with any utility-related questions.

## Staying Informed

Visit the project website for more information and to sign up for project updates.

## Pre-Construction Impacts

This work will include **periodic travel lane, bike lane, sidewalk and parking closures with detours and temporary pedestrian access routes.**

## Noise Impacts

Those working or living in the area may hear **noise** from demolition equipment, construction trucks and beeping noises when vehicles are in reverse.
