

MCLOUGHLIN INVESTMENTS STRATEGY

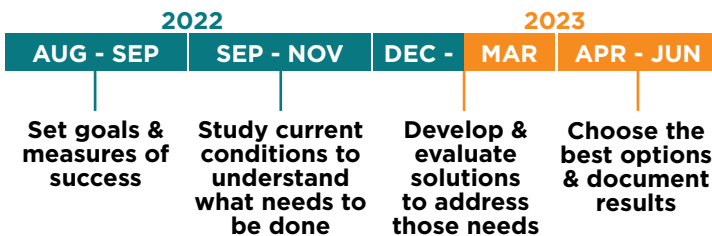

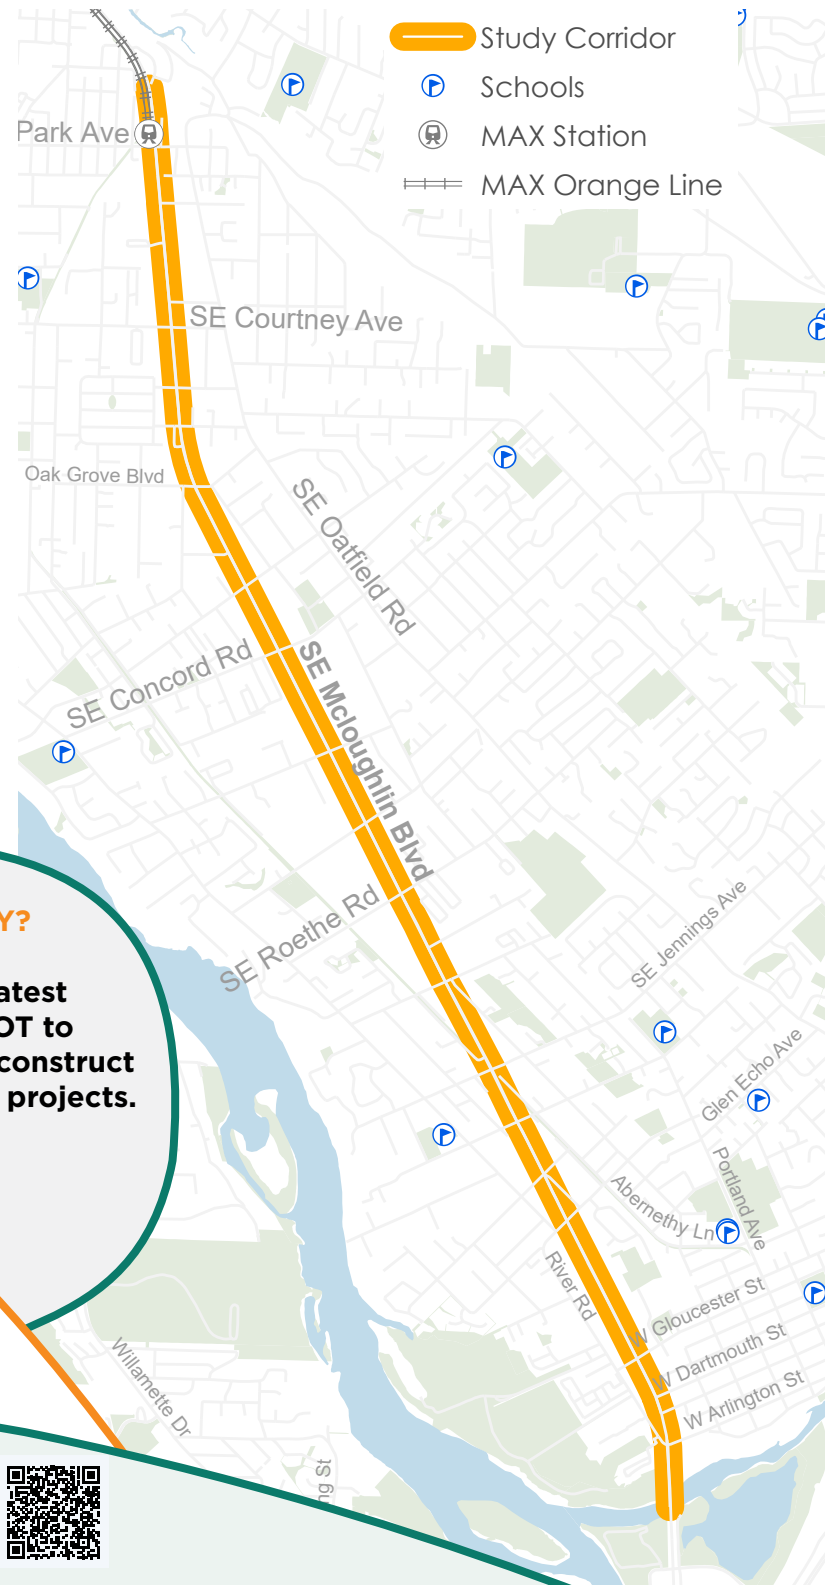

ODOT is looking into how to improve transportation safety along a 5-mile section of McLoughlin Boulevard, just south of Milwaukie to the Clackamas River.

Through this effort we will:

- Identify how to improve transportation safety for people walking, biking, and rolling and improve access to transit within the next 10 years
- Ask people who use the road and live in adjacent neighborhoods, what transportation solutions are most important to them
- Plan how to fit these projects into future planned work or identify other funding sources for their construction

After listening to those who live in the community along McLoughlin Boulevard, ODOT will decide which improvements to make and which improvements should be made soonest.

WHAT IS AN INVESTMENT STRATEGY?
 An effort to identify safety improvements that can make the greatest impact to the community and allow ODOT to identify future funding opportunities to construct these priority projects.

WE WELCOME YOUR INPUT THROUGHOUT THE PROJECT:
