

OR 62 at OR 234 Roundabout

Jackson County

Project Description

Construct a single lane roundabout at a high crash intersection north of Eagle Point at the intersection of Oregon 62 and Oregon 234, from MP 13.4 to 13.82.

Purpose And Need

Improve safety and mobility on at this high crash intersection.

Proposed Solutions

Construct a single lane roundabout and safety improvements at high crash intersection in Jackson County.

Anticipated Benefits

Improved safety and mobility for all users.

The OR 234 at OR 62 intersection is a top 10% crash location. The safety problems at this unsignalized rural intersection are associated with relatively high speeds on OR 62 in combination with significant turning volumes from OR 234, especially during peak travel times.

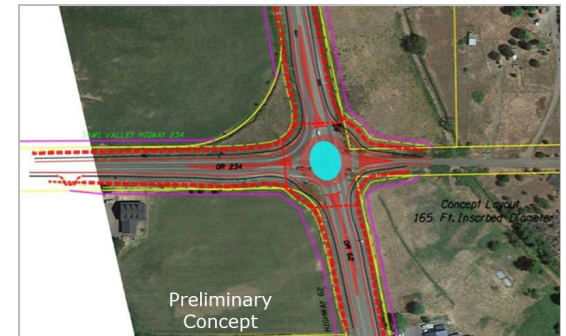

Roundabouts are a proven safety feature for rural, high-speed intersections with a history of crashes.

Estimated Project Cost

Total estimated cost	\$8.2 million
