Amtrak Cascades Ridership in the Eugene – Portland Corridor Trains Operated Under Contract for the Oregon Department of Transportation

Jan to Mar 2021

Ridership continues to recover month over month, with a significant increase from February to March, at 42%.

Oct to Dec 2020

October to December 2020 ridership decreased year-over-year as compared to the same period in 2019. Ridership decreased 77.3% for October 2020, 79.8% for November 2020, and 82.4% for December 2020 compared to the same time period in 2019. Ridership was beginning to recover in October and November until a two-week freeze was issued to slow the spread of COVID, followed by an additional two-week restriction in December, both of which led to reductions in ridership. The reduced level of service will continue with a single roundtrip at 50% until conditions allow for increased frequency of service.

Jul to Sept 2020 - July to September 2020 ridership decreased year-over-year as compared to the same period in 2019. Ridership decreased 83.8% for July 2020, 83.1% for August 2020, and 80.7% for September 2020 compared to this same time period in 2019 due to the impacts of COVID-19. In May, ridership began to increase, and continued to steadily climb through July and August 2020, with a decrease in September. Decreases in ridership in September are typical with the end of summer. The service is anticipated to continue with the single roundtrip at 50% capacity to provide our passengers with safe and reliable services.

Apr to Jun 2020 - Ridership decreased year-over-year as compared to April and June 2019. Ridership decreased 94.4% for April 2020 and 90.8% for May 2020, and 84.0% for June 2020 compared to June 2019 due to the impacts of COVID-19. As a result of this decline in ridership, ODOT and WSDOT agreed to reduce service to one daily roundtrip between Eugene and Seattle. In May, ridership began to increase slightly.
