

Umatilla County used payroll data from the State of Oregon to determine where payroll was generated by geographic area. This data was used as a starting point for project selection and prioritization. However, the other 7 criteria were also considered by the Qualifying Entity. STIF Committee members discussed and approved definitions and by-laws. Umatilla County then published a call for STIF Formula projects on September 19, 2018 with an October 5, 2018 deadline. A sub-allocation scoring/ranking form was developed and approved by the STIF Committee. After applications were received, each member of the committee used the forms to score/rank each project. STIF Committee members then approved the recommendation of projects to be presented to the Umatilla County Board of Commissioners. The recommendation was unanimously approved by the Umatilla County Board of Commissioners on October 25, 2018. All projects were on the 100% list.
