

Southwest Oregon Region  
**District 8 Preservation Project**  
*State Transportation Improvement Program 2018-'21*

**Oregon 140: Bear Creek-Agate Road**

Agency  
ODOT

Construction: 2019

Estimate:  
\$4.9 million

Mile Points -.6.7 to -1.16

**Problem:**  
Road surface is structurally deficient with extensive fatigue cracking.

Wheel track plug patch repairs have moderate and high severity fatigue cracking below chip seal.

The recent chip seal repair to the roadway is expected to have short life

**Scope:**  
This would provide a structural overlay after a deep base repair on this one time Jackson County road. It would repair the failed road base areas and provide a new wearing surface. The project must include striping and pavement markers and other improvements
