

The crosswalk closure barricades we currently use break when they are hit. Fixing them is expensive and take our crews away from other important safety jobs. So we're trying something new – testing crosswalk closure curbs instead of the usual barricades.

A large QR code with a central graphic of a web browser window displaying the text "Project Webpage". The QR code is framed by a decorative border of small blue squares. At the bottom of the page, there is a dark blue banner with a white smartphone icon and the text "SCAN ME" in white capital letters.

Visit a test site, see the curbs in action and share your feedback using your phone to scan the QR code or type in the case sensitive URL:
<https://www.oregon.gov/odot/Regions/Pages/closurecurbs.aspx>

If you have questions about the survey or the pilot project, contact us at projects@odot.oregon.gov.
