### Project Description
Design for a future project to repaint the Oregon 99E (McLoughlin Boulevard) bridge over the Clackamas River in the City of Gladstone.

### Purpose and Need
The bridge is a steel structure. New paint will protect the steel from corrosion and extend its lifespan.

### Proposed Solutions
- Design a future construction project to paint the structure.

### Anticipated Benefits
- The design phase will determine how to repaint the structure to protect the steel from corrosion and extend the lifespan of the bridge.

### Cost
