Project Description

The pavement on this section of the Milwaukie Expressway is cracking and needs to be repaved to extend its lifespan and smooth out the ride for travelers.

Purpose And Need

The design phase will determine how to repave the highway to extend its lifespan and smooth out the ride for travelers. The design work supports the future project that will repair the driving surface, reduce maintenance costs, and improve accessibility to meet Americans with Disabilities Act requirements.

Proposed Solutions

• Design the repaving plan, including accessible sidewalk curb ramp improvements.

Anticipated Benefits

• The design phase will determine how to repave the highway to extend its lifespan and smooth out the ride for travelers.

Cost

- Pavement Preservation: $2,617,734
- Estimated Total Cost: $2,617,734
