Anticipated Benefits
• Increased lifespan of the tunnel, reduced maintenance costs and a smoothed out ride for travelers, improving safety.

Purpose And Need
The concrete floor of the Toothrock Tunnel on I-84 eastbound has deteriorated and is rutting and cracking. The tunnel floor has required maintenance work in recent years to prevent excessive damage from vehicle use.

Proposed Solutions
• Repair the concrete slab floor of the tunnel.

Repair the concrete slab floor of the eastbound Interstate 84 (Columbia River Highway) Toothrock Tunnel.

Bridge
$4,879,362
