Funding for operational improvements not already included in active projects to address traffic flow issues at various locations throughout ODOT Region 1, which includes all of Multnomah and Hood River Counties as well as most of Clackamas and Washington Counties. Projects identified for these funds might need further approval by the Oregon Transportation Commission.

There are needs for operational improvements and the locations are outside regular maintenance or project schedules, which makes funding difficult. This project will address operational improvements as needs are identified.

Operational improvements can include items such as signs, signal and lighting upgrades, rockfall hazard work or Intelligent Transportation System needs.

- Install traffic control signals, turn lanes and other operational improvements as needed.

**Anticipated Benefits**

- Increased safety and reduced congestion through operational improvements.

**Proposed Solutions**

**Funding**
