I-84: Corbett Interchange - East Hood River Interchange Phase 2 (Study Only)
ODOT - Multnomah and Hood River Counties

Project Description
Study to determine culvert repair or replacement needs along Interstate 84 (Columbia River Highway) between Corbett and Hood River.

Purpose And Need
Some culverts along I-84 have been identified for repairs or replacements. I-84 is an ODOT priority route and culvert failures could impact traveler safety and close the highway. This study would assess the repair replacements needs and determine priority work.

Proposed Solutions
• Assess the culvert repair and replacement needs along I-84 and determine priority for future projects.

Anticipated Benefits
• Increased knowledge of culvert repair and replacements needs on I-84, which will allow for a program to fund future projects on I-84 to retain the safety and usability of the highway for travelers.

Cost
