<u>Last 24 Hours</u> (3)			
Fatalities in the Last 24 Hours	0		
Fatal Crashes in the Last 24 Hours	0		

(1) This report retrieves death and fatal crash information for a period from the date entered above back through January 1 of the same year. It also retrieves the same data for the same time period in the previous year. It then calculates and displays the difference between the years as a percent of change. Current Year data reported on this form is preliminary and subject to change pending cause of death determination or if death occurs after 30 days from date of crash. Prior year's figures are final.

(2) If previous year = "0", % change is not applicable (N/A) If current year = "0" and previous year is equal to or greater than "1", % change = "-100%"

(3) Fatalities and Fatal Crashes occurring in the last 24 hours are reflected in the Month and Year to Date numbers and are included in the percentage calculations.
