

Guide to Obtaining Quotes for Electric Vehicle Charging Stations

Under the Oregon Department of Transportation's Community Charging Rebates (CCR) program, applicants are required to obtain one quote for electric vehicle (EV) charging station equipment and installation. An applicant can obtain a quote for their EV charging project from their electric utility, local electricians, charging equipment manufacturers or network providers.

Electric Utilities

Contact your electric utility early in the planning process, regardless of if you obtain a quote from the utility. Notifying the utility as soon as planning begins saves time down the line in a project. Many Oregon utilities offer technical assistance or can connect you with installers.

Finding Local Electricians

Applicants can contact local electricians in their area. A licensed electrician is authorized to install level 2 (L2) charging stations. The following resources can help locate a licensed electrician near you:

Charging Equipment Manufacturers

Applicants can contact charging equipment manufacturers to obtain a quote and/or hire an installer. Below is a list of charging equipment manufacturers from ODOT's List of Eligible Chargers.

ATG Electronics

Autel

Blink

BTC Power

ChargePoint

ChargeSmart EV

ChargeTronix

Chargie

Cyber Switching

Eaton

Elinta Charge, UAB

Emporia

ENERGY5

Epic Charging

Espen

EV Bolt

EVBox

EVChron

EverCharge

EVGateway

EVPassport

EVSE LLC

FLO

Ford Pro Charging

FractalEV

Free2Move

Gateway International 360

Generac Power Systems

ICAPIA

InCharge

Integra Energy

IoTecha

Legrand

LITE-ON

Loop Global

Lynkwell

Noodoe

OpConnect

PowerFlex Systems

PowerPump

QCharge123

RAB Lighting Inc.

Siemens

StarCharge

SWTCH Energy

TurnOnGreen

Wallbox

Xeal

Xiamen Topstar CO, LTD

Zerova

Online Quotes

If located in a remote area, applicants may opt for an **online quote**:

- **Qmerit** can provide a Digital Commercial Assessment. Applicants can complete the brief online form providing information about the property, the charging project and a few photos.

Guide to Obtaining Quotes for Electric Vehicle Charging Stations

Service Level Agreement and Maintenance Contracts

Applicants must provide a **Maintenance Contract or Service Level Agreement (SLA)** along with **proof of upfront payment for five (5) years of maintenance services**. If the Electric Vehicle Service Provider (EVSP) you are working with does not offer an SLA, you can contact the electrician involved in your project to see if they provide one.

Additionally, here are two resources for third-party maintenance contracts:
