Heard there is a survey about tolls. Could not find it.  
NO TOLLS. Use your budget wisely.

Why don't you ask better questions, instead of just trying to get answers you want? How about telling us what you are doing with our current taxes and fees you are charging us. Plus federal funds you are receiving for roads. This tolling seems very redundant and double dipping. Why not put this to a vote of Oregonians? All of this tolling is going to drive people to use alternate routes to avoid the tolls. If you think otherwise, you are just sticking your head in the sand.

We do not need Toll Roads in Oregon. We have a way now to collect road taxes DMV. We do not need another expensive way to get more money for our roads. It is very costly especially for low income and disabled. Please stop this idea. Thank you for listening to me.

Due to the economy being so poor, higher cost of fuel, groceries, and the highest level of credit card default in over a decade. Is another tax on Oregonian drivers going to help or hurt us?

Tolling is an unjust punishment for those of us who are trying to make ends meet.

You are hurting us, and not helping us.
