For FY 2025 and 2026, OHA is voluntarily reporting the following data regarding separations. Although not required by DAS, it is an important metric to understand our progress in creating an equitable and inclusive workplace that retains a diverse workforce.

The number and percentage of all separations have fluctuated over the previous biennium (Table 2). Fiscal year 2025 included 411 total separations (313 voluntary; 98 involuntary) and fiscal year 2026 included 410 total separations (321 voluntary; 89 involuntary).

Figure 5 provides a visual of the trends between voluntary⁵ and involuntary⁶ separations over the last two years. There was a peak in voluntary separations during FY 2026 Q1 and a peak in involuntary separations during FY 2025 Q3 .

Figure 5. Trends in Separations Over Time

Table 2. Separation Types by Fiscal Year

Separation Type	FY 2025			FY 2026		
	N	% of seps	% (of all employees)	N	% of seps	% (of all employees)
Voluntary	313	76.2	4.9	321	78.3	4.9
Involuntary	98	23.8	1.5	89	21.7	1.4
Total Separations	N	% of seps	% (of all employees)	N	% of seps	% (of all employees)
	411	50.06	6.4	410	49.94	6.2

Separations by Race and Ethnicity: Voluntary & Involuntary separations

Appendix [Table D-10.4](#) provides comparisons in terms of workforce percentages to percentage of voluntary and involuntary separations for different demographics. We list the groups (by race and ethnicity and gender) experiencing disproportionality by year

⁵ For purposes of this report, voluntary separation is defined as resignation, voluntary transfer, voluntary end of a limited duration position and retirement. Excludes deaths and unknown separations.

⁶ For purposes of this report, involuntary separation is defined as dismissal, dismissal during trial service, or layoff. Excludes deaths and unknown separations.

and type of separation; we have defined disproportionality as equal to or greater than a 1% difference.

2025: **Voluntary** separations:

- 6.4% of voluntary separations during FY 2025 were Black & African American and African American employees (compared to 5.3% at the end of FY 2025 of all Black & African American and African American employees in the entire workforce).

2025: **Involuntary** separations:

- 4.1% of involuntary separations during FY 2025 were American Indian & Alaska Native employees (compared to 2% at the end of FY 2025 of all American Indian & Alaska Native in the entire workforce).
- 7.2% of involuntary separations during FY 2025 were Black & African American and African American employees (compared to 5.3% at the end of FY 2025 of all Black & African American and African American employees in entire workforce).
- 16.5% of involuntary separations during FY 2025 were Hispanic or Latinx employees (compared to 11.3% at the end of FY 2025 of all Hispanic or Latinx employees in the entire workforce).
- 2.1% of involuntary separations during FY 2025 were Native Hawaiian & Pacific Islander employees (compared to 1.1% at the end of FY 2025 of all Native Hawaiian & Pacific Islander employees in the entire workforce).

2026: **Voluntary** separations:

- 8.3% of voluntary separations during FY 2026 were Black & African American and African American employees (compared to 6.2% at the end of FY 2026 of all Black & African American and African American employees in entire workforce).
- 67.5% of voluntary separations during FY 2026 were White employees (compared to 62.3% at the end of FY 2026 of all White employees in entire workforce).

2026: **Involuntary** separations:

- 10.1% of involuntary separations during FY 2026 were Black & African American and African American employees (compared to 6.2% at the end of FY 2026 of all Black & African American and African American employees in entire workforce).
- 12.4% of involuntary separations during FY 2026 were Hispanic or Latinx employees (compared to 11.8% at the end of FY 2026 of all Hispanic or Latinx employees in the entire workforce).
- 3.4% of involuntary separations during FY 2026 were Native Hawaiian & Pacific Islander employees (compared to 1.2% at the end of FY 2026 of all Native Hawaiian & Pacific Islander employees in the entire workforce).
- 5.6% of involuntary separations during FY 2026 were Multiracial employees (compared to 3.5% at the end of FY 2026 of all Multiracial employees in the entire workforce).

2027-2029 OHA Affirmative Action Goals & Strategies

The 2027-2029 Affirmative Action Plan reaffirms OHA's strategic plan goal of eliminating health inequity in Oregon by 2030. The strategies and actions discussed in this section are pulled directly from OHA's 2024-2027 strategic plan and the more recent focus area action (FAA) work happening across the agency.

During the 2027-2029 biennium, OHA will focus on the following affirmative action strategies and projects.

Strategic Objective: Employee Lifecycle

Advance equity and belonging in the employee experience. Embed equity and diversity strategies throughout the employee lifecycle — from recruitment and onboarding to retention and advancement — to cultivate a workforce where all staff feel valued, supported, and meaningfully connected to the agency's mission. OHA's workforce should be reflective of the Oregonians we serve. Success for this focus area

is tracked through workforce data and employee belonging data as measured through the Gallup survey.

The following projects are included as part of this objective.

Project 1: Equitable Hiring Policy Implementation

The Equitable Hiring Policy (EHP) has been written and approved. During the 2027-2029 biennium, the agency will engage in implementation of the policy. A detailed process document and accompanying list of approved recruitment tools will be created through consultation and collaboration with the advisory committee, which is comprised of representatives from each division. After the process document and tools are finalized, an agency wide socialization campaign will include training on the new policy, process, and tools. Target date for completion of implementation is December 2027. After implementation is complete, the project will be transitioned to staff responsible for ongoing responsibility and continuous process improvement for the policy and process.

Project 2: Mentorship Program

The Mentorship Program has rolled out agency wide. In the next biennium, the agency will continue to offer the program and continue to expand participation and enrollment. In the next biennium, OHA will increase standardization and automation of the program through procurement and process development of a mentorship software and launching one cohort a year.

Project 3: Manager Essentials Training

The Manager Essentials Training is focused on preparing and orienting new supervisory managers to their role, responsibilities, and the various processes that they will be in charge of at OHA. This training series is offered in addition to the DAS manager training. In the next biennium, OHA will move towards completion of the curriculum, launching a pilot, data review from the pilot for continuous process improvement, and launching the training agency wide.

Project 4: Exit Surveys

Currently, participation rates in the Workday exit survey process are too low for OHA to draw broad or statistically meaningful conclusions across the agency. However, the

agency recognizes the value of the information being collected and has initiated work to improve both participation and usability of the data.

An Exit Survey Improvement Project is currently underway to:

- Increase employee participation in the survey process
- Improve leadership access to exit survey data through dashboards and reporting tools (power BI)
- Better identify trends related to retention, workplace culture, and employee experience

Implementation

The director of the Equity and Inclusion division serves as one of the sponsors for this strategic objective; his co-sponsor is the Human Resources director. The sponsors are responsible for oversight, providing guidance, appropriate resources, and approval of project structure and work. The organizing structure for this strategic objective includes two co-leads (one being an affirmative action representative and the second an HR manager) and the individual projects included in the objective that are assigned to project leads across the agency. The project leads are implementing the work and the strategic objective co-leads are engaging in project management oversight of the work to ensure accountability of progress, expertise, coordination, collaboration, monitoring and evaluation, and a clear line of communication with sponsors and the director's office.

Further oversight is through the agency's director's office which introduced this strategic objective and its organizing structure, including the requirement to charter (define the work, scope, projects, etc.), define measures, and a work breakdown structure. All these items were approved by sponsors and the director's office. There is a clear path of communication of project definition, outcomes, and progress between the strategic objective leads, sponsors, and the director's office.

Alignment Across Organizational Plans

Oregon Health Authority participates in multiple planning processes each biennium. These include the Affirmative Action Plan, the Diversity, Equity, and Inclusion (DEI) Plan, and the Strategic Plan. The focus of this report is affirmative action and workforce. It is important to note that there is an essential and unbreakable connection and overlap between the three plans. Some goals, strategies, and actions are directly tied to affirmative action goals, such as the ones articulated above and were pulled directly from the Strategic Plan and the agency's developing focus area action work.

Further, many of the goals that are found in the DEI Plan directly impact workforce such as culture, retention, and promotion. The same is true for the Strategic Plan and the more recent focus area action work. The strategic objectives and projects articulated in the section above are agency wide projects, some of which are in the Strategic Plan, and all impact well-being, belonging, and equity within our workforce.

Supporting Affirmative Action

Complaint Options

OHA is unique among Oregon state agencies in how it responds to complaints or reports of potential discrimination, harassment including sexual harassment, intimidation and retaliation based on or because of protected class status. That responsibility rests with experienced civil rights strategists in the Equity and Inclusion Division who investigate and respond to concerns as they arise. The strategists regularly collaborate with managers, staff and Human Resources to ensure the agency responds in a prompt and appropriate manner. The OHA Executive Leadership Team is apprised of systemic issues, trends and opportunities for proactive measures to ensure OHA employees are valued, respected and treated equitably.

The Office of Human Resources oversees issues unrelated to protected class status. The Equity and Inclusion Division's Civil Rights, Learning and Inclusion (CRLI) Section coordinates the OHA Discrimination and Harassment Complaint Procedure ([Appendix D-3](#)). HR and Equity and Inclusion Division staff work collaboratively to address workplace issues and to identify training gaps. These teams also meet with and

present to managers and staff to enhance their understanding of workplace expectations, cultural responsiveness, unconscious bias and other relevant topics.

The Equity and Inclusion division manages data related to the Discrimination Policy issues and compiles and submits that information to the OHA Executive Leadership Team monthly. Additionally, OHA provides and makes available posters and other printed matter featuring this information throughout its workspaces, including locations where the public can easily access them.

Equity and Inclusion, Human Resources, managers and staff provide staff who may have experienced a violation of the Discrimination policy with a complaint packet that includes an annual letter from the OHA director with information about complaint procedures and resources available to staff. OHA creates the electronic and printed matter integrating meaningful accessibility to ensure people with disabilities and people with Limited English Proficiency (LEP) can request the information in a format or language of their choice at no cost to them.

Complaint Contact information

Complaint process

The complaint process includes:

- Anyone who suspects they have experienced or witnessed discrimination, harassment including sexual harassment, intimidation or retaliation based on or because of protected class status may contact the Equity and Inclusion Division. The Equity and Inclusion Division accepts all reports whether made verbally, in writing, on the OHA Discrimination and

Harassment Complaint Form ([Appendix D-4](#)) or the State of Oregon Complaint form .

- Upon receipt of a complaint or concern, the civil rights manager will review the information and assign a civil rights strategist to the matter. The investigator will assess the information and develop a response plan in consultation with the civil rights manager. The response plan may include a intake meeting to gather additional information to determine jurisdiction, the development and implementation of a formal or informal investigative plan, or an informal consultation with the reporter or other involved parties to identify alternate resolution paths, including collaborative and restorative justice responses between staff, managers, Office of Human Resources and the Equity and Inclusion Division.
- The agency's CASPER database system captures all reports, complaints, and respective responses. Additionally, OHA retains all paper and electronic information in compliance with state government retention requirements. The CASPER system allows for data reporting (not REALD+SOGI) to assist OHA in identifying trends, hotspots and other emerging issues. The agency and the Equity and Inclusion Division continue to work with the Office of Information Services professionals to identify and implement system enhancements to assist with more nimble data systems use.

The agency strives to respond to and resolve matters within 120 days of report. OHA continues to work toward achieving that timeline goal. Resource limitations including staffing shortages and workload issues present ongoing challenges to meeting this goal.

Succession Plan

OHA has a succession plan that was provided to the Governor's office in late 2023.

OHA contracts and grants

OHA's economic footprint is significant and disbursed throughout communities across the state because of current regulatory measures in place that direct OHA to provide funding to Tribes, counties, cities, public health entities, coordinated care organizations

(CCO), educational and medical facilities, as well as community-based organizations (CBO) and for-profit businesses. Within this large range of entities, only for-profit businesses meet Business Oregon's Certification Office for Business Inclusion and Diversity (COBID) eligibility criteria, and not all eligible firms choose to apply. Additionally, OHA is only able to track use of COBID-certified firms that are prime contractors; there is not currently functionality to capture subcontractors who may be COBID-certified. This means the agency does not currently capture the significant contributions toward supplier diversity that Tribes, counties, CCOs and others achieve. Given this context, OHA is working on multiple levels to expand the number of vendors and potential business partners, regardless of COBID eligibility, that do business with the agency; this includes vendors who originate from communities most impacted by inequities.

From July 1, 2022 to June 30, 2026, **OHA awarded \$32,594,537.25 in contacts, price agreements, purchase orders, and grants to fifty-five Minority Business Enterprise or Women Business Enterprise COBID-certified firms.** Of these firms, twenty-seven were Minority Business Enterprise (MBE) with a total of \$13,597,636.49 in awards. Twenty-nine of these firms were Women Business Enterprise (WBE) with a total of \$18,997,441.08 in awards. Some firms were both MBE and WBE.

Management

Leadership Evaluation

As of August 2019, performance management system functionality in Workday was operational at OHA, designed to complete and track all employee performance reviews. Workday has business processes established to provide a framework for performance accountability and feedback for employees and managers. There are tools and training aids to help move OHA toward a consistent evaluation process for all employees. Workday sends annual notification to each employee via the Workday inbox within 60 days of their work anniversary date, to help ensure employees receive timely reviews. Workday also provides managers with reports on where employees are in the performance evaluation process.

We do not have a leadership evaluation specific to the Affirmative Action Plan and responsibilities. With an agency as large as OHA but without a central and standardized performance feedback template, it was challenging to determine the most meaningful and impactful way to engage in this type of assessment. While OHA does well with completing performance and accountability feedback (PAF) check ins, due to a wide array of methodology to completing a PAF, we continue to evaluate the best way forward and so we are working on determining what approach to use.

Appendix D-4. OHA ADA Centralized Accommodation Budget Process

Oregon Health Authority ADA Accommodation Centralized Budget Process

Manager Responsibilities

Managers must notify the Office of Human Resources if they:

- Know, or have reason to know, that their employee is experiencing workplace problems because of a known disability, and/or
- Know, or have reason to know, that the disability prevents the employee from requesting a reasonable accommodation
- Employee has requested an accommodation
- Employee has indicated that they are experiencing difficulty performing the essential functions of their job due to a medical condition
- If an employee already has an approved accommodation in place and needs additional accommodations

Accommodation requests do not require any particular words used like, “reasonable accommodation” or “disability”

Budget

OHA has a central budget to manage and track expenses related to providing reasonable accommodations for OHA employees and applicants under the Americans with Disabilities Act (ADA).

What the budget covers

The costs to provide one-time or recurring expenses associated with providing a reasonable accommodation to employees or job applicants.

These may include: adaptive software, sign language interpretation, captioning services, modification to office equipment for a wheelchair user or other adjustments that may not be resolved through ergonomic assessment.

What the budget does not cover

- Costs for providing accommodation or modification for a member of the public, e.g. captioning at a public listening session
- Personal durable equipment that an employee would use away from work, e.g., a wheelchair or an electric scooter
- A sit-stand desk that is recommended from an ergonomic assessment that can be approved regardless of the employee's medical situation, ergonomic keyboards, mice or standard issue chairs

Invoice submission and payment processing

- An approved accommodation letter from Human Resources must be provided and attached to the invoice(s) before the funds can be utilized.
- Submit invoice(s) to Sr. HR Manager for approval.

*EEO-4 job category definitions:

Administrative Support

Occupations in which workers are responsible for internal and external communication, recording and retrieval of data and/or information and other paperwork required in an office. Includes: bookkeepers, messengers, clerk-typist, stenographers, court transcribers, hearing reporters, statistical clerks, dispatchers, license distributors, payroll clerks and kindred workers.

Officials and Administrators

Occupations in which employees set broad policies, exercise overall responsibility for execution of these policies, or direct individual departments or special phases of the agency's operations, or provide specialized consultation on a regional, district or area basis. Includes: department heads, bureau chiefs, division chiefs, directors, deputy directors, controllers, wardens, superintendents, inspectors and kindred workers.

Paraprofessionals

Occupations in which workers perform some of the duties of a professional or technician in a supportive role, which usually require less formal training and/or experience normally required for professional or technical status. Such positions may fall within an identified pattern of staff development and promotion under a "New Careers" concept. Includes: research assistants, medical aides, child support workers, policy auxiliary, welfare service aides, recreation assistants, homemakers aides, home health aides and kindred workers.

Professionals

Occupations which require specialized and theoretical knowledge which is usually acquired through college training or through work experience and other training which provides comparable knowledge. Includes personnel and labor relations workers, social workers, doctors, psychologists, registered nurses, economists, dietitians, lawyers, systems analysts, accountants, employment and vocational rehabilitation counselors, teachers or instructors and kindred workers.

Service/Maintenance

Occupations in which workers perform duties which result in or contribute to the comfort, convenience, hygiene or safety of the general public or which contribute to the upkeep and care of buildings, facilities or grounds of public property. Workers in this group may operate machinery. Includes chauffeurs, laundry and dry cleaning operatives, truck drivers, bus drivers, garage laborers, custodial employees, gardeners and groundkeepers, refuse collectors, construction laborers and kindred workers.

Skilled Craft Workers

Occupations in which workers perform jobs which require special manual skill and a thorough and comprehensive knowledge of the process involved in the work which is acquired through on-the-job training and experience or through apprenticeship or other formal training programs. Includes mechanics and repairers, electricians, heavy equipment operators, stationary engineers, skilled machining occupations, carpenters, compositors and typesetters and kindred workers.

Technicians

Occupations which require a combination of basic scientific or technical knowledge and manual skill which can be obtained through specialized post-secondary school education or through equivalent on-the-job training. Includes computer programmers, drafters, survey and mapping technicians, licensed practical nurses, photographers, radio operators, technical illustrators, highway technicians, technicians (medical, dental, electronic, physical sciences), police and fire sergeants, inspectors and kindred worker.

Executive Summary

Introduction

The Oregon Health Authority (OHA) is one of the state's largest executive agencies with a single overarching strategic goal: **eliminate health inequities in Oregon by 2030**. Our work is guided by the definition that the Oregon Health Policy Board (OHPB) and OHA adopted in 2020¹:

Oregon will have established a health system that creates health equity when all people can reach their full health potential and well-being and are not disadvantaged by their race, ethnicity, language, disability, age, gender, gender identity, sexual orientation, social class, intersections among these communities or identities, or other socially determined circumstances.

Achieving health equity requires the ongoing collaboration of all regions and sectors of the state, including Tribal governments to address:

- *The equitable distribution or redistribution of resources and power; and*
- *Recognizing, reconciling and rectifying historical and contemporary injustices.*

The OHPB-adopted Health Equity definition directs OHA to leverage our policies, practices and programs to address the historic and contemporary social injustices and other upstream factors that produce health inequity, including racism, oppression, colonization and additional structural bias and dehumanizing factors embedded in the system.

This Diversity, Equity, and Inclusion (DEI) Plan serves as an update and continuation of OHA's previously reported Equity Advancement Plan² — also referred to as the Affirmative Action Plan. OHA develops an Equity Advancement Plan every biennium that communicates the agency's efforts toward related goals, monitors progress and recommends corrective action.

Progress on 2021-2023 equity advancement goals and strategies

During the 2021-2023 biennium, OHA focused on three major equity advancement strategies. Below is a list of those strategies along with an update on progress made:

I. Continue Strategic Planning Efforts

Anti-racism is a core component of OHA's strategic planning efforts.

During the 2021-2023 biennium, OHA's leadership participated in 78 hours of equity-focused facilitated discussion, practice, application, coaching, consultation and education led by Engage to Change. Additionally, and concurrently, approximately 775 employees throughout the agency participated in foundational antiracism training and conversation

¹ Oregon Health Policy Board Health Equity Committee, <https://www.oregon.gov/oha/EI/Pages/Health-Equity-Committee.aspx>

² Equity Advancement Plan, <https://sharedsystems.dhs.ohs.state.or.us/DHSForms/Served/1e9813.pdf>

series. Finally, to complement the foundational antiracism training, the Agency supported optional Community of Practice sessions to allow employees to delve deeper into topics covered in the foundational antiracism series with Engage to Change. These sessions provided ongoing learning opportunities for people who had completed the Foundational Series.

OHA plans to continue and expand on this work over the next biennium. Accordingly, OHA is in the final stages of an RFP (Request for Proposal) that is titled Equity & Inclusion; Antiracism; and Health Equity Services. This will allow the agency to have a pool of contractors available to fill the various training and facilitation needs in this space to help us move towards achieving our strategic goal.

In addition to internal anti-racism work, **community engagement** is a critical aspect of developing the next strategic plan. Robust community engagement was conducted in 2019, via 22 in-person events in 11 counties with more than 400 Oregonians.

OHA was intentional in how it undertook community engagement by integrating equity and working to ensure meaningful access. Specifically, the sessions were conducted in English and six additional primary languages; there were three remote participation options: one statewide webinar conducted in Spanish, one statewide survey in both Spanish and English, and a weekly radio call-in show in Spanish. Each event was led by either culturally specific community-based organizations or grassroots community members and was customized to be culturally and linguistically appropriate.

This integration of respecting and honoring communities in Oregon included having culturally responsive meeting formats, serving culturally appropriate food, and having known and respected community leaders facilitate discussions in the communities' preferred languages. The final report on those engagements was finalized in May of 2023, and recommendations from that will inform the current strategic planning efforts. The final report can be found in the [Appendix: Community Engagement Process with Diverse Communities: Input on OHA's Strategic Plan, October 2019](#).

II. Develop an Equity Action Plan.

OHA has taken this opportunity to update the previous Equity Action Plan with the OHA Equity Advancement Leadership Team (EALT) recommendations for the 2023-2025 biennium. The recommendations can be found in detail at the [Diversifying workforce and Internal Culture](#) section of this document and we have listed the actions as measurable outcomes in [Table 1: OHA Summary DEI Goals 2023-2035 Biennium](#).

OHA is currently in the process of updating its strategic plan and committed to ensuring that this DEI plan is in alignment as those updates are made. This DEI plan represents an update to our previous plan to align with the governor's office template for these plans moving forward. As noted above, strategic planning efforts for the agency remain ongoing. OHA is committed to ensuring our DEI plan is embedded in that strategic plan and that workforce equity initiatives remain at the forefront of prioritized work.

III. Integrate equity, inclusion, anti-racism and accessibility into existing systems and processes

OHA has made advancements in recognizing the systemic racism that exists within organization processes and policies. The work to dismantle these systems is ongoing, but progress has been made. Specific examples are listed below with additional details presented later in the document.

- [GARE Survey](#); the Government Alliance on Race & Equity, or GARE, survey was rolled out in Spring 2023 to help OHA leadership understand:
 - What staff know about health inequities, specifically racial inequities.
 - How staff incorporate addressing racial inequity into their daily work.
 - How well employees think OHA is doing to eliminate racial inequities.
 - The survey also will help identify gaps where education or training is needed to help OHA reach our 2030 goal and become an anti-racist organization.
- [COVID-19 Accessibility and Language](#); extensive work to improve accessibility for people with disabilities and language access for people who communicate in languages other than English with regards to pandemic information, treatment, and vaccines occurred during the pandemic.
- [Agency Performance System](#); the agency proposed updates to legislatively approved Key Performance Metrics for those outcome and process measures identified in our performance system that most reflect our strategic goal of eliminating health inequities by 2030.
- [Internal Audits – ADA and Wellness](#); OHA conducted internal audits on both the employee process for requesting and receiving ADA reasonable accommodations as well as employee wellness. Findings from these audits spurred widespread process changes to improve employee experiences and steward supportive and inclusive workplace culture and practices.
- [Legislative Pricing Pilot](#); OHA rolled out an initial training to budget administrators to underscore the critical role budget and finance professionals play in ensuring that the agency's fiscal endeavors integrate equity analysis procedures in legislative pricing.
- [ODHS-OHA Auxiliary Aids, Alternate Formats and Language Access \(AAFLAS\) Policy](#); In 2023 ODHS and OHA updated their joint policy on Alternate Formats and Language Access to clarify the expectations and process for ensuring that communication services are provided to people who have different communication needs.

Workforce Parity – March 31, 2023

OHA currently tracks five measures focused on workforce diversity and parity. The data used to populate these metrics come from Workday reporting data. Demographic data collected in Workday are limited compared to REALD | SOGI standards. In particular, the current data masks considerable diversity according to Race/Ethnicity, Gender identity, and Disability. E&I is working internally on the development of a REALD&SOGI employee survey that would collect detailed race/ethnicity data (allowing for 38+ Race/ethnicity categories compared to the limited OMB standards), detailed disability data (allowing us to move beyond the simple yes/no binary of current disability data to 9+ categories), and detailed gender identity data (giving the

OHA Equity and Inclusion Division

opportunities for employees to identify outside of the simple groupings of male, female, and non-binary currently available in Workday). E&I seeks to have this data will be used to allow OHA to better understand the intersectional identities of our workforce.

The first measure (**1AM005A**) is a comparison of the OHA workforce to the potential labor market. The most recent quarterly data indicates that the racial/ethnic composition of the OHA workforce is:

- At or above parity for Black & African Americans, Asians, and Whites
- Near parity for Native Hawaiian & Pacific Islanders
- Below parity for both American Indian & Alaska Natives and Hispanic or Latino, Latina or Latinx persons.

FIGURE 1: 1AM005A COMPARISON OF THE OHA WORKFORCE TO THE POTENTIAL LABOR MARKET. PARITY SNAPSHOT OF THE MOST RECENT QUARTER, FY 2023 Q3.

The second measure (**1AOM005B**) is a comparison of OHA non-supervisory managers to the potential labor market. The most recent quarterly data indicates that the racial/ethnic composition of the OHA non-supervisory managers workforce is:

- At or above parity for Black & African Americans, Asians, and Whites,
- Below parity for American Indian & Alaska Native persons, Hispanic or Latino, Latina or Latinx persons, and Native Hawaiian & Pacific Islanders.

OHA Equity and Inclusion Division

FIGURE 2: 1AOM005B COMPARISON OF THE OHA WORKFORCE TO THE POTENTIAL LABOR MARKET. PARITY SNAPSHOT OF THE MOST RECENT QUARTER, FY 2023 Q3.

The third measure (**1AOM005C**) is a comparison of OHA supervisory managers to the potential labor market. The most recent quarterly data indicates that the racial/ethnic composition of the OHA supervisory managers workforce is at parity for only Whites, meaning that American Indian & Alaska Native persons, Hispanic or Latino, Latina or Latinx persons, Native Hawaiian & Pacific Islanders, Asians, and Black & African Americans are *underrepresented* in supervisory positions compared to the potential labor market.

FIGURE 3: 1AOM005C COMPARISON OF THE OHA WORKFORCE TO THE POTENTIAL LABOR MARKET. PARITY SNAPSHOT OF THE MOST RECENT QUARTER, FY 2023 Q3.

The fourth measure (**1AOM005D**) is a comparison of voluntary separations to all agency separations.

The most recent quarterly data for **1AOM005D** (voluntary separations) indicates that only the Hispanic or Latino, Latina or Latinx group is at or above parity, meaning that the voluntary separations of all other racial/ethnic groups was higher than expected given the overall counts of *all* separations.

Specific to gender and disability status, the new quarter data shows OHA is near parity for men and below parity for women, and that persons with disabilities are at parity.

OHA Equity and Inclusion Division

FIGURE 4: 1AOM005D COMPARISON OF VOLUNTARY SEPARATIONS TO ALL AGENCY SEPARATIONS. PARITY SNAPSHOT OF THE MOST RECENT QUARTER, FY 2023 Q3.

The fifth measure (**1AOM005E**) is a comparison of involuntary separations to all agency separations.

The most recent quarterly data for **1AOM005E** (involuntary separations) indicates that only the White population for involuntarily separated persons is at or above parity, meaning that the involuntary separations of all other racial/ethnic groups were higher than expected given the overall counts of *all* separations. Specifically, American Indian & Alaska Native persons, Hispanic or Latino, Latina or Latinx persons, Native Hawaiian & Pacific Islanders, Asians, and Black & African Americans are *overrepresented* among the involuntarily separated workforce.

Specific to gender and disability status, the new quarter data shows OHA is near parity for men and below parity for women, and that persons with disabilities are below parity. As noted above, current Workday data does not align with REALD|SOGI disaggregated categories due to Workday data limitations.

FIGURE 5: COMPARISON OF INVOLUNTARY SEPARATIONS TO ALL AGENCY SEPARATIONS. PARITY SNAPSHOT OF THE MOST RECENT QUARTER, FY 2023 Q3.

Goals for the 2023-2025 biennium

The table below outlines the strategy areas, challenges, actions, and timelines OHA is focused on during the upcoming biennium.³ Each strategy area is discussed in more detail in the corresponding section following this summary.

TABLE 1: OHA SUMMARY DEI GOALS 2023-2035 BIENNIUM

Strategy/Focus Area	Challenge	Action	Timeline
Government to Government Relations with the Nine Federally Recognized Tribes of Oregon	There is a lack of understanding of the unique relationship between these government entities.	- Develop enhanced foundational training on tribal affairs to OHA staff - Develop and deliver advanced Tribal Consultation and Urban Indian Health Confer Policy training to OHA staff and partners - Expansion of THW Program to include Tribal THW programming, partnership and representation	- By December 2024 - Begin planning and conferral in 2024 - Ongoing
Community Engagement	Communities need a clear and cohesive engagement framework in place.	Create an internal framework for community engagement	By December 2024
Communications	Communications need to be accessible, culturally appropriate, and written in a way that all can understand.	- Implement Digital Accessibility Policies - Creation of Language Access Plan - Publications and Creative Services	- December 2023 - June 2024
Data	Systems need to be able to disaggregate data in compliance with REALD and SOGI so that inequities can be identified.	- Finalize planning for REALD and SOGI data collection system, including design of the eventual HB 3159 data registry (front end) and repository (back end). - Future Rules Advisory Committees for HB 3159 specific to the registry and how providers need to submit the data.	- December 2023 - June 2024

³ OHA included "Government to Government Relations with the Nine Federally Recognized Tribes in Oregon" as one of the Strategy/Focus Areas.

OHA Equity and Inclusion Division

Decision Making and Budgets	Structural racism exists in current decision making and budgeting frameworks.	Eliminating Health Inequities POP Objectives	By June 2025
Diversifying workforce and Internal Culture	The workforce is not representative of the diverse communities living in Oregon.	- Achieve workforce parity goal (OM5) - Implement proposals of the EALT - Implement Organizational Healing and Resilience Policy	June 2030
Contracting and Procurement	Barriers exist in the contracting process that perpetuate white supremacy.	- Hire the OHA Business Outreach Coordinator - Finalize the State Business Outreach Plan - CBO Contracting Workgroup	- August 2024 - September 2024
Service Delivery	Health outcomes for communities and people have been disproportionately affected by health inequities in our state.	1115 Implementation demonstration period activities - Improve the staffing capacity at OSH - Invest in an equity focused infrastructure at OSH - Work towards the full implementation of REALD and SOGI data collection standards at OSH - Stabilize the BRHNS created through Measure 110	June 2025

Agency Overview

Overview of the Oregon Health Authority

The Oregon Health Authority (OHA) includes most of the state's health delivery and policy programs. Leading OHA is the OHA Director's Office which includes Tribal Affairs. Additionally, OHA has eight divisions: Agency Operations (AO), Equity and Inclusion (E&I), External Relations Division (ERD), Fiscal Operations (FO), Health Policy and Analytics (HPA), Health Systems Division (HSD), Oregon State Hospital (OSH) and Public Health Division (PHD).

The Oregon Health Policy Board⁴ (OHPB) serves as OHA's policymaking and oversight body. OHPB works toward comprehensive health reform in our state. The nine-member board includes community members from across the state with an interest in health and health care. Board members have strong relationships with the communities they represent.

It is OHA's concentration of health responsibilities that has enabled the agency to be an engine for innovative health transformation in Oregon and gains in health equity. Through its health care, public health and behavioral health programs, OHA affects the lives of everyone who lives in Oregon. OHA administers the Oregon Health Plan ("OHP" or Medicaid), which provides health coverage to nearly one (1) in three (3) people in Oregon (and nearly four (4) in ten (10) people who live in rural and frontier counties).⁵

OHA's Public Health Division (PHD) protects every state resident from communicable diseases (such as COVID-19) and other public health threats, ensures that every person in Oregon has clean water to drink and tackles the causes of chronic disease, from reducing tobacco consumption to addressing upstream factors that affect the social determinants of health (SDOH) such as food insecurity and environmental health.

OHA operates the Oregon State Hospital (OSH) and funds behavioral health programs that serve thousands of Oregonians in counties across the state. With a biennial budget of more than \$34.3 billion, including more than \$24.2 billion in funds for the Oregon Health Plan (OHP), OHA is the largest payer in Oregon's health care system.

The scale and scope of OHA's combined regulatory, purchasing and policy-making responsibilities have given state health officials the tools and leverage necessary to transform the way health care is delivered in Oregon to achieve better outcomes and slow the growth in health care costs. In recent years, OHA has:

- Administered policies and programs that have enabled Oregon to achieve 95 percent health care coverage.

⁴ Oregon Health Policy Board, <https://www.oregon.gov/oha/OHPB/Pages/index.aspx>

⁵ "Frontier" as used in this report is based upon OHSU's Oregon Office of Rural Health's (ORH) definition to mean "any county with six or fewer people per square mile. ORH has identified 10 of Oregon's 36 counties as frontier. See <https://www.ohsu.edu/oregon-office-of-rural-health/about-rural-and-frontier-data> (last accessed 5/30/2023)

- Successfully transitioned hundreds of thousands of OHP members to new coordinated care organizations (CCO) following CCO 2.0, the largest contracting process in state history.
- Won federal approval for innovative new Medicaid waivers, including the most recent Section 1115 waiver. Under this agreement, Oregon is the first state in the nation approved to provide Medicaid coverage for medically necessary, short-term rent payments for people who are homeless, as well as food for people with inadequate nutrition and coverage for housing and other supports for people experiencing the effects of climate change.
- Protected Oregonians throughout the COVID-19 pandemic. According to the Commonwealth Fund, Oregon ranked 5th among all states in the effectiveness of its COVID-19 response. Oregon has had the 2nd lowest case COVID-19 case rate in the nation since the start of the pandemic and the 7th lowest COVID-19 death rate. Oregon's rate of all residents who are fully vaccinated against COVID-19 ranks 18th in the nation. Oregon's COVID-19 response has saved more than 5,000 lives (based on a comparison of Oregon's COVID-19 deaths per million residents to the national COVID-19 death rate per million people).

OHA's combined capabilities have enabled our agency to make important gains in eliminating health inequities. For example, today in Oregon, more than 8 in 10 people (81 percent) in the Hispanic or Latino, Latina, Latinx community are vaccinated against COVID-19. Gains in COVID-19 vaccination rates for Black, African American and African Immigrants have been even more dramatic. Today, 95 percent of Black people in Oregon are vaccinated. No state in the nation has posted a higher COVID-19 vaccination rate for the Black community.

Vision

A healthy Oregon.

Mission

Ensuring all people and communities can achieve optimum physical, mental and social well-being through partnerships, prevention and access to quality, affordable health care.

Goals

In service to this mission, OHA has adopted a single overarching goal: to eliminate health inequities in Oregon by 2030. The primary objectives of OHA remain unchanged from the 2021-2023 biennium:

- Reduce barriers to health and advance health equity in our communities
- Improve access and quality of behavioral health services and decrease behavioral health inequities
- Reduce health inequities in the health care system and realize better care, better health, and lower costs.

2021-2023 Progress Report

The following is a summary of OHA's progress on goals and strategies presented in the 2021-2023 Equity Advancement Plan.

Strategy 1: Continue Strategic Planning Efforts

During the last biennium, OHA focused efforts extensively on anti-racism training. The following antiracism education was provided between 2021 and 2023

- Engage to Change provided approximately 78 hours of equity focused facilitated discussion, practice, application, coaching, consultation and education to OHA's leadership team.
- Our foundational antiracism training and conversation series was provided to approximately 775 employees.
 - This training included
 - OHA Tribal Affairs presentation on the History and the Government to Government Relationship between the State of Oregon and the Nine Federally Recognized Tribes of Oregon
 - Health Equity and Racism with the Equity and Inclusion Division
 - 2030 strategic goal and OHA's role with the Director or Deputy Director or both
 - 16 Hours with Engage to Change covering topics such as key concepts of antiracism, impact vs intent, antiracist vs non-racist vs racist, de-centering whiteness, white dominant culture, edges of learning, understanding internalized racism, invisible(ized) labor, dynamics of power and access to power, interrupting racism, US and Oregon History.
 - This training was taken by:
 - COVID-19 Vaccine and planning unit
 - HSD managers
 - Human Resources
 - ODHS|OHA Audit team
 - Fiscal Division
 - OIS leadership
 - Team implementing REALD and SOGI
 - Organizational Healing and Resilience Policy workgroup
 - Representatives from OSH leadership
 - External Relations Division
 - Equity Advancement Leadership Team (EALT) members
 - Employee Resource Group (ERG) members
 - Volunteers from across the agency
 - Additional invited partners from DOJ and ODHS
 - Public Health Division managers and individuals responsible for committees

- Optional Community of Practice sessions to delve deeper into topics covered in the foundational antiracism series with Engage to Change. These sessions were provided as ongoing learning opportunities for individuals who had completed the Foundational Series. Topics included:
 - Divide and Conquer: how the system pits us against one another and how to disrupt that
 - Self-care
 - Responding to Trauma
 - Restorative Justice
 - Loving Accountability

To continue this work in the next biennium, OHA is in the final stages of an RFP (Request for Proposal) that is titled Equity & Inclusion; Antiracism; and Health Equity Services. The RFP seeks vendors to provide services to OHA in six services areas including:

- Organizational Transformation
- Training and Development
- Coaching and Technical Assistance
- Facilitation
- Oregon State Hospital Specific Services
- Sustainability Plan

Once contracts are established OHA will have price agreements with vendors who will then be available to provide services in these six areas.

Additionally, during the next biennium, OHA will be completing a Strategic Plan in support of the defined strategic goal of eliminating health inequities in Oregon by 2030. The strategic planning process began in May 2023, and is estimated to be completed by June 1, 2024. The strategic planning process will be sponsored by the Agency Interim Director, Deputy Director, Director of the Equity and Inclusion Division, Director of Tribal Affairs, and Deputy Chief of Staff for Strategic Operations, in addition to additional support from a Senior Advisor to the Governor.

OHA will be seeking consultation and facilitation throughout the strategic planning process from the contractors selected to provide Equity & Inclusion, Antiracism, and Health Equity services to maintain focus and practice of equity, inclusion, and antiracist principles throughout the strategic planning process. The planning process will focus on five distinct workstreams to build the plan:

- Development and Implementation of an inclusive and thorough planning process
- Internal and External Engagement
- Tribal Consultation
- Establishment of Systems of Accountability
- Documentation

Strategy 2: Develop an Equity Action Plan

In recognition that it takes leadership and participation from across the organization to make meaningful progress towards operationalizing health equity and anti-racism, OHA has convened an Equity Advancement Leadership Team (EALT). Sponsored by the Agency Director and Equity and Inclusion Director, the EALT engages staff from across the agency to develop recommendations and advise the agency on actions related to the Strategic Plan, Equity Advancement Plan and Performance System.

The purpose of the EALT is to catalyze an organizational culture change at OHA that operationalizes health equity and anti-racism. The group does this by leveraging the lived and learned experience of OHA employees to assist the agency to better recruit, retain, promote and advance a workforce that reflects--at minimum--Oregon's population demographics. The EALT also advises OHA executive and division leadership teams on innovative and inclusive strategies to operationalize the OHA Strategic and Equity Advancement Plans.

This DEI plan serves as the updated Equity Action Plan that incorporates the Equity Advancement Leadership Team (EALT) recommendations. The EALT has proposed four topic areas of focus for the agency going into the next biennium. Along with these topic areas are specific actions recommended by the group to address the outstanding needs in these areas. The list of topics is included below as a summary, while the full list can be found in the [Diversifying workforce and Internal Culture](#) section of this document.

1. Agency Accountability to operationalize the OHA Strategic Plan and the Equity Advancement Plan
2. Implement the Equitable Hiring Toolkit as a mandatory process for all hiring managers in OHA.
3. Implement a mentorship program within OHA.
4. Address disproportionate rates of involuntary separations of employees of color.

OHA is currently in the process of updating its strategic plan and committed to ensuring that this DEI plan is in alignment as those updates are made. Relatedly, this DEI plan is an update to our previous plan to align with the Governor's Office template for these plans moving forward. As noted above, strategic planning efforts for the agency are ongoing. OHA is committed to ensuring our DEI plan is embedded in that strategic plan. Workforce equity initiatives remain at the forefront of OHA's prioritized work.

Strategy 3: Integrate equity, inclusion, anti-racism and accessibility into existing systems and processes.

In the 2021-2023 biennium, OHA focused on ensuring that equity, inclusion, anti-racism and accessibility (disability and language) were incorporated into existing systems and processes whether absent or lacking. The below section is a representative list of OHA systems and policies centering equity. It is intended to highlight the work done during the biennium to update those systems and policies where white supremacy and historic inequities had not previously been addressed.

GARE Survey

In an effort to assess OHA's readiness to achieve our transformational 2030 health equity goal, all employees were invited to complete an anonymous survey in Spring of 2023. The purpose of this survey was to establish a baseline understanding around staff awareness, skills, and experiences about doing health equity and anti-racism work in our externally and internally facing work. The survey results will inform strategic planning, training, operational efforts and the development of supports and resources for staff.

The delivery of the GARE Survey was timely as we transition in the state's COVID-19 work. While no longer a public health emergency, COVID-19 continues to harm the lives and livelihoods of countless people and has underscored systemic racism and health inequities disproportionately experienced by Tribes, Tribal communities, communities of color and other communities in Oregon and across the country that have been most harmed by health inequities and racism. As Oregon continues to grapple with a national reckoning over systemic racism and inequity, we at OHA cannot ignore the many lives lost and diminished due to racism's legacy in our health care and public health systems.

COVID-19 Accessibility – Disability and Language

The COVID-19 pandemic made clear the wide gaps in accessibility and language access that prevented people across Oregon from obtaining information, vaccines, and treatment. Major initiatives and efforts were untaken by the agency during this time to address these disparities. The sections below highlight the systems and structures OHA put in place to reduce harm and begin to address systemic barriers.

Accessibility Team

The Accessibility Team (also known as the A-Team) formed in June 2021, to increase accessibility across all aspects of Oregon's COVID-19 response. OHA resourced this team very intentionally, partnering in the recruitment with community organizations and advocacy groups dedicated to disability justice. The resulting team composition reflected these efforts with several team members who had lifelong lived, learned and professional experience. The team's vision was an integrated public health system without barriers or judgement. The team initiated and supported the efforts listed below in addition to providing extensive education and resource development to the agency.

The Accessibility Team developed three guides to assist COVID-19 Response and Recovery Unit (CRRU) staff and others in facilitating accessible and inclusive (virtual) meetings, creating and remediating documents and digital content to be accessible and modeling and training others on conducting accessible PowerPoint presentations.

The team also collaborated with PHD to develop a page on OHA's Work Link (OWL) that links to frequently referenced accessibility resources, such as how-to guides and agency-approved accessibility statements for documents and meetings. OHA also launched an Accessibility Team page on the OWL to highlight team trainings and other accessibility events and information.

In addition to creating and sharing resources, the Accessibility Team offered focused trainings to support the implementation of inclusive practices and delivered these trainings throughout OHA including:

- CRRU Field Operations staff
- Vaccination contractors
- PHD Policy and Modernization team
- PHD administrative support staff
- PHD new employee orientation staff
- CRRU data visualization teams
- All CRRU staff via 10-minute topic presentations at CRRU Leadership and Partnership meetings

Accessibility kits

Oregon was among the leaders in operationalizing accessibility in its COVID-response through the use of vaccination-site accessibility kits. The funding and process to source and create the kits, as well as a system for ordering and delivering kits to partners, were set up quickly as part of the FEMA vaccine project. The kits were initially stored in the Department of Administrative Services (DAS) warehouse and shipped as part of the same process for shipping pandemic response supplies to partners statewide. This accessibility aid was amplified and made available to community partners to leverage partners' proximity to the pandemic medical supply distribution process.

Communication Access Realtime Translation (CART)

Providing CART for internal meetings and community listening sessions was possible due to the captioner contract (which was secured quickly due to the COVID-19 state of emergency) and the secure funding source as part of the pandemic response. Historically, not knowing how to arrange captioning and how to pay for it have been barriers to providing this service. CRRU was able to respond quickly and nimbly to get this service included in standard meeting logistics to enhance general accessibility and inclusion.

Data visualization

The need for accessibility of data visualization on CRRU websites was widely recognized because of regular information sharing and opportunities to work across functional teams in CRRU. The recognized need resulted in a four-part series done in consultation with a deeply experienced digital accessibility consultant who educates and provides resources to CRRU and OHA about best practices and accessibility integration related to data visualization. This educational series led to the development of a remediation plan for the public facing COVID-19 dashboards to ensure data was accessible to assistive technology users. This effort also identified to OHA the need to prioritize and integrate digital accessibility resulting in the ongoing development of an agency-specific Digital Accessibility Policy and the Policy Option Package to resource a digital accessibility team as part of a larger universal accessibility unit in OHA's Equity and Inclusion Division.

Support for in-home vaccinations

The A-Team worked with Field Operations to learn more about the process for in-home vaccination and discuss how accessibility must be integrated into the process. This conversation was possible because of transparency among CRRU teams and encouragement from managers to work together on processes.

SB 1606 / hospital support person education and case work

The A-Team worked intensively with the COVID-19 Feedback Team, the hospital capacity Incident Management Team, and the OHA Healthcare Regulation and Quality Improvement program to create resources, communicate with hospitals, and provide information to the community and individuals about the rights of people with disabilities under Senate Bill 1606. The COVID-19 Feedback Team was created as part of CRRU with pandemic resources. Its responsive structure and collaborative work style facilitated rapid action that resulted in better outcomes for patients.

Get Vaccinated Oregon (GVO)

OHA launched the Get Vaccinated Oregon (GVO) tool on February 8, 2021, so that people in Oregon could check their vaccine eligibility and get connected to vaccine appointment opportunities. Over the subsequent 15 months (until May 2022), the GVO continued to enhance its functionality and served as a central repository and the source of truth for testing and vaccination information throughout the state. During its program period (June 2021 – May 2022) the GVO represented a successful integration of equity and inclusion via meaningful access and usability related to digital accessibility and language access.

ACCESSIBILITY

The root of accessibility issues on the GVO was the result of a rapid launch and lack of accessibility focus incorporated into the original design. In Spring of 2021, the project brought in an accessibility consultant who completed an initial review of the website. The initial accessibility reviews identified conformance and best practice gaps that were addressed by the development team in June 2021.

LANGUAGE ACCESS

The GVO website was published in 12 different languages end to end – from registration to text and email notifications. However, in the initial phases of vaccine roll out, providers sending notifications opted to send information in only English. After the phased vaccine approach concluded, the GVO team proactively initiated contact to providers to collect translated materials that could be shared with specific language users. That renewed commitment to language access in June of 2021, is represented by 8,388 language-specific ad hoc notifications that promoted vaccine events through partnerships with the following providers/organizers: CANN, Virginia Garcia Clinic, Lincoln County, Latino Community Association, Clackamas County, VPU Pharmacy Branch, VPU Communications Branch. During the program period (June 2021 through May 2022), a total of 51,570,000 messages were sent out to GVO subscribers with 610,844 of those messages being in a non-English language (Table 1).

TABLE 2: GVO NOTIFICATIONS BY LANGUAGE AND TYPE. JUNE 2021 - MAY 2022.

Language	Email	Phone	Grand Total
Arabic	6,607	3,701	10,308
Chuukese	1,965	1,644	3,609
English	38,468,838	12,490,318	50,959,156
Hmong	3,373	2,863	6,236
Korean	27,607	6,812	34,419
Marshallese	264	493	757
Russian	5,237	3,293	8,530
Simplified Chinese	62,226	15,646	77,872
Somali	1,316	2,559	3,875
Spanish	235,955	160,610	396,565
Traditional Chinese	11,379	2,893	14,272
Vietnamese	38,105	16,296	54,401
Grand Total	38,862,872	12,707,128	51,570,000

My Electronic Vaccine Card

Oregon's My Electronic Vaccine Card is a web application that received information from ALERT IIS to provide people (upon request) with a voluntary digital copy of their COVID-19 vaccinations. The digital copy is represented by a QR code and can be scanned/verified by requiring entities.

OHA intentionally worked on this project differently than other IT projects based on a request from leadership that we lead with equity. We defined that as our intent, and it included the following:

- Provide access in 13 languages
 - 13 languages go-live simultaneously
 - Translations completed and reviewed by native language users (not autogenerated)
- Accessible web platform
 - Built to conform with WCAG 2.1 AA
 - Tested by a team of native assistive tech users
- Center community voices
 - Continuous engagement with community
 - User acceptance testing by community prior to go-live

The above-listed accomplishments are noteworthy and represent initial examples of OHA honoring our commitment to equity and inclusion as a pathway to eliminate health inequities. OHA rolled out the platform on April 25, 2022, in all 13 languages with a completed Accessibility Conformance Report ([Appendix: My Electronic Vaccine Card ACR](#)). Positive feedback was received from community and partners. In the weeks and months since go-live, OHA has shared this work in national forums including the American Immunization Registry Association

Conference,⁶ and with the Vaccine Credentials Initiative Membership Group⁷, at the Northwest Immunization Conference in 2022⁸, and at the Qualitative Report Conference in 2023⁹.

Having a demonstrable example of government centering equity by requiring that the product be accessible, usable and effective for Oregon's priority populations, in this case people with limited English proficiency (LEP) or whose primary language is something other than spoken English.

This report identifies opportunities for improvement and reflections for how to build on this work moving forward. In summary, the team highlighted 5 key lessons learned that are listed below:

- Equitable IT design is a conscious decision at the beginning of a project, i.e., it is part of the plan and purpose in all phases and not an afterthought
- Community engagement takes time, stewardship and respect. "Change moves at the speed of trust"
- Additional organizational resources and expertise are needed for sustained accessibility and community engagement work
- Language access work would benefit from shifting from translation to transcreation
- Leadership support for leading with equity is paramount to project success

Agency Performance System

In 2018, the OHA Leadership team embarked on developing a performance system centered on the agency's mission, vision, and values. It took about a year to bring the performance system to fruition, which includes in one graphic, the agency's mission, vision, values, key goals, outcome measures, core processes, supporting processes, and process measures. See [Appendix: OHA Fundamentals Map](#) for the current map.

From 2019 to present, agency leaders, outcome/process owners, data stewards, and invited guests have met quarterly (with a pause in 2020 due to the pandemic) to review the data and information related to the outcome and process measures. These quarterly performance reviews (QPR) allow participants to understand the positive trends and work the agency does that affect the measures, as well as identify where action plans are needed to address areas not meeting the targeted results.

OHA had hoped when the 2021-2023 budget development cycle began, the agency could make recommended changes to the key performance measures reported to policymakers. The goal

⁶ AIRA National Conference 2021, "Plenary: Vaccine Credentialing Vaccination Verification with SMART Health Cards." <https://repository.immregistries.org/resource/plenary-vaccine-credentialing-vaccination-verification-with-smart-health-cards/from/type:national-meeting-presentations>

⁸ Northwest Immunization Conference: My Electronic Vaccine Card: An Equity and Community Focused Approach to IT Development. Virtual conference, August 2022. Presented August 4, 2022. S

⁹ The Qualitative Report 14th Annual Conference: Living in a Post-Covid World. Virtual Conference; February 17, 2023. *10 Lessons Learned from Testing for Accessibility and Usability on a Public Health Website During the COVID-19 Pandemic.*

was to exchange the current legislatively approved KPMs for those outcome and process measures identified in our performance system that most reflect our strategic goal of eliminating health inequities by 2030. That did not happen. The time for the agency to submit KPM changes is in April of even numbered years. With the COVID-19 pandemic beginning in early 2020 and OHA's strategic role in the state's COVID-19 response, there was not leadership capacity or staff resources to make the recommended changes at that time.

During the 2021 Legislative Session, OHA and other policymakers renewed the commitment to prioritize the needs of Oregonians from a health equity framework, including a recognition of the health equity definition identified and adopted by OHPB and OHA. This led to a discussion between the agency and legislative staff about whether the current KPMs effectively address the agency's strategic goal of eliminating health inequities and the investments being made to address health inequities within OHA systems.

Since there was not an opportunity to fully address the KPMs in the 2021 Legislative Session, the agency was asked to come back to the 2022 Legislative Session with recommendations on changes to the key performance measures that better reflect the agency's strategic goal of eliminating health inequities and reflect OHA's health equity work. OHA responded accordingly and during the 2023 session, those KPM changes were brought to committee for official vote and approval.

Specific changes that are anticipated to be added to the legislative KPMs related to health equity include:

- Comparison of OHA Workforce to Potential Labor Market
- Comparison of OHA Non-Supervisory Managers to Potential Labor Market
- Comparison of OHA Supervisory Managers to Potential Labor Market
- Comparison of OHA Voluntary separations to all agency separations
- Comparison of OHA Non-voluntary separations to all agency separations
- Quality of Life – Poor physical health
- Quality of Life – Poor mental health
- Premature death
- Mortality from drug overdose
- Tobacco use teens
- Obesity – Teens
- Statewide sustainable cost of care
- OHA Sustainable Cost of Care
- Critical Events Meeting the 14-calendar day timeline to provide correspondence to Tribal Leaders
- Tribal Consultations meeting the 30-calendar day timeline for reporting of outcome of consultation
- Timeliness of translation during emerging public health events
- Health Equity Measure: Meaningful language access to culturally responsive health care services for CCO Members – Component #1
- Health Equity Measure: Meaningful language access to culturally responsive health care services for CCO Members – Component #2

- Infant Mortality Rate
- Reduction of Severe Maternal Morbidity

In addition to adding these metrics to the Legislative KPMs, OHA Leadership also revised the performance system's fundamentals map to ensure inclusion of these measures within the agency's key focus areas. The synchronization of the agency performance system and legislative KPMs with the strategic goal forms the foundation for the strategic planning work OHA is starting to complete now.

Internal Audits – Wellness and ADA

In December 2021, OHA surveyed our staff on two distinct and related topics: (1) well-being and (2) our agency's ADA processes and resources for employees. The agency shared widely the audit findings from both the Wellness and ADA surveys in January of 2023. Acting upon the audit findings, OHA established Implementation teams in both areas, each charged with implementing actionable changes in the 2023-2025 biennium.

OHA Employee Well-Being Audit

OHA's workforce has been under increased stress and workload demands for the past two years due to the COVID-19 pandemic, workforce shortages, and other pressures that strain agency resources and employee well-being. Increased turnover in some departments and heavy workload demands have led to widespread fatigue and concern about how employees are handling the added stressors. This topic was selected to audit because employee burnout was a major concern identified in our 2021-22 risk assessment and was identified by OHA leadership as a priority.

The purpose of this audit was to identify agency well-being initiatives currently in place and well-being practices that the agency could implement to further boost employees' well-being and help them transition to a better work-life balance as the immediate pandemic response subsided.

Despite the increased demands caused by the pandemic, the agency was able to improve well-being practices by revising and initiating wellness work policies, developing an organizational healing and resilience workgroup that drafted an agency organizational healing and resilience policy, implementing a virtual work health manual, creating an Office of Health, Safety, and Employee Well-being (OHSE) Dispatch newsletter, updating Public Employees Benefit Board (PEBB) wellness programs, and improving efforts to address violence and safety at Oregon State Hospital (OSH).

OHA leadership accepted the nine recommendations made by the audit team and will be moving this work forward during the 2023-2025 biennium.

OHA Americans with Disability Act (ADA) Audit

This audit of OHA's ADA accommodation process and resources related to employment was requested by OHA leadership based upon a recommendation from the Equity and Inclusion division and addressed the following objectives:

1. Assess whether the ADA accommodation request process ensures outcomes are compliant, appropriate, timely, equitable, and consistent.
2. Evaluate the agency's understanding of disabilities and the ADA.

The audit included an examination of requests, outcomes, and agency policies and procedures related to ADA accommodations for calendar years 2019, 2020 and the first quarter of 2021. The audit focused on internally raised accommodation requests and compliance with Title I of the ADA.

The audit concluded that there are numerous barriers that prevent or delay employees from receiving ADA accommodations within OHA. Generally, these barriers are related to a lack of structured and managed business processes and perceptions that prevent employees from seeking reasonable accommodations.

OHA leadership accepted the audit's five findings and committed to enact the audit's eight recommendations including instituting a quality assurance review process that covers ADA requests from intake through fulfillment or complaint resolution (Rec 1.2); communicate ADA Accommodation request process, complaint process and OHA Budget to all employees during the onboarding process (Rec 3.1); create a centralized online location for ADA accommodation resources (Rec 3.2); and increase employee awareness of and sensitivity to disability in the workplace (Rec 5).

Legislative Pricing Pilot

During the 2023 legislative session, OHA rolled out a training to budget administrators known as the 'Legislative Pricing Pilot' with the following objectives:

- Getting legislation budgeted in a way that accounts for equity-related costs
- Reframe for all staff that integrating equity and equity analysis is standard operating procedure for OHA, not an extra
- Network of knowledge, in that budget admins can share this information with people who come to them
- Build a repository of info/data that people can use when pricing (typical costs for line items, requirements to build programs or services that are universally accessible, etc.)

This training focused on providing budget administrators and legislative staff with the knowledge and skills necessary to identify equity-related costs that should be included in fiscal analyses for bills. The pilot emphasized the importance of intentional pricing to include costs to ensure meaningful access to priority populations including people of color, people with disabilities, immigrants and refugees, LGBTQ2S+ communities, and people who are homeless. By pricing legislation to reach people in priority populations, Oregon's statutory and regulatory framework could contribute to eliminating health inequities and begin to address systemic barriers.

ODHS-OHA Auxiliary Aids, Alternate Formats and Language Access (AAFLAS) Policy

In 2023, ODHS and OHA updated their joint policy on Alternate Formats and Language Access.¹⁰ While the policy requirements remained largely unchanged, the updated policy clarifies the expectations and process for ensuring that ODHS's and OHA's communication services are provided to people who have different communication needs. Specifically, this means providing communication services to a wide spectrum of people including but not limited to people who primarily communicate in a language other than English, people who are Deaf, DeafBlind, Hard of Hearing, people who are neurodivergent, and people with communication, intellectual, cognitive, developmental or learning disabilities.

This policy update provided the specific steps for staff and agency programs to ensure people's communication needs are being met as well as establishing guidelines for each agency to create a language access plan.

Partnering with Community-Based Organizations

OHA recognizes the essential role of community-based organizations (CBOs) in community-driven, culturally and linguistically responsive public health service. Our commitment to eliminating health inequities by 2030 relies upon building authentic trusting relationships with CBOs from every county and supporting their efforts to uplift community health priorities that are grounded in equity and accessibility.

As part of the COVID-19 Response, OHA through PHD and the CRRU funded CBOs across Oregon for work specifically related to COVID-19. This model was broadened by PHD to partner with CBOs to advance the goals of Public Health Modernization.

2023-2025 Key Strategy and Focus Areas

Government to Government Relations with the Nine Federally Recognized Tribes of Oregon

Integral to OHA is Tribal Affairs, housed in the Director's Office. They work with staff across the agency to uphold the government-to-government relationship with the Nine Federally Recognized Tribes of Oregon. The Oregon Tribal Governments are:

- Burns Paiute Tribe
- Confederated Tribes of Coos, Lower Umpqua and Siuslaw Indians
- Confederated Tribes of Grand Ronde
- Confederated Tribes of Siletz Indians
- Confederated Tribes of the Umatilla Indian Reservation
- Confederated Tribes of Warm Springs
- Coquille Indian Tribe
- Cow Creek Band of Umpqua Tribe of Indians
- Klamath Tribes

¹⁰ ODHS-OHA Auxiliary Aids, Alternate Formats and Language Access (AAFLAS) Policy, <https://sharedsystems.dhsoha.state.or.us/DHSForms/Served/dhsoha010-013.pdf>

The Oregon Indian population includes 177,769 American Indians/Alaska Natives (alone or in combination, ACS 2021 data) with 58,951 residing in the Portland metro area.

To work towards achieving our strategic goal to eliminate health inequities, OHA considers it a priority to ensure staff and programs across the agency are educated and understand the historical and inter-generational trauma that has occurred, along with recognizing the current day trauma that continues to affect American Indians and Alaska Natives health and wellness.

Tribal Affairs Responsibilities

The responsibilities of Tribal Affairs include:

- Implementing the Tribal Consultation Policy.
- Identifying individuals at OHA who are responsible for developing and implementing programs that affect tribes.
- Utilizes a process to identify the programs that affect tribes.
- Coordinates communication between OHA and tribes.
- Promotes positive government-to-government relations between OHA and tribes.
- Provides training to staff on the policy, process and ongoing relationship.

As required by SB770-2001 ([ORS 182.162](#) to [182.168](#))

Tribal Health Programs and Priorities

OHA Tribal Liaisons are vital to this work in specific areas, including Medicaid, Behavioral Health, Health Policy, Public Health and at the State Hospital.

Tribal Affairs, liaisons and other OHA staff work regularly with elected tribal officials, tribal health directors and staff, Indian Health Service, Urban Indian Health Program, Northwest Portland Area Indian Health Board, as well as other agencies and organizations focusing on tribal health priorities.

OHA supports Tribal Health Programs by providing resources for improving programs and services to best meet their needs. A few priorities include:

- Support the creation of Indian Managed Care Entities to improve tribal care coordination in tribal communities
- Increase access and quality of Behavioral Health Services and supporting the Tribal Behavioral Health workforce
- Create and sustain a Tribal Traditional Health Worker program
- Develop and receive authorization of Medicaid reimbursement for the Community Health Aid Program-Behavioral Health Aid Therapists, Community Health Aid's, and Dental Health Aid Therapists.
- Modernize the public health system with support from OHA.

Training on Tribal Affairs and Consultation Policy for OHA Employees

Tribal Affairs has developed training required for new staff and as requested for new managers, units/divisions and as a part of the anti-racism work. The purpose of this training includes:

- Understanding the government-government relationship between the state and the Tribes. This relationship is derived from the political and legal relationship that Indian Tribes have with the federal/state government and is not based on race.
- The “why” of tribal affairs work including - Federal law, state law, agency policy/process and roles of tribal liaison staff
- Historical and inter-generational trauma
- Tribal consultation: what, why, how

Community Engagement

OHA has strengthened its capacity to conduct meaningful, authentic and culturally responsive community engagement, which has been effective in shaping OHA’s CCO 2.0 transition, 1115 Medicaid waiver application and approval and the COVID-19 response. The below sections describe various frameworks and plans OHA staff use to engage communities and partners. In the 2023-2025 biennium, OHA plans to develop a cohesive internal framework for community engagement that will be inclusive of the various pathways and components outlined below.

Community Partner Outreach Program

The Community Partner Outreach Program (CPOP) has a mission to: Engage communities across Oregon to advance an equitable, responsive health system. What they do is:

- Develop and maintain partnerships to address barriers to health coverage access, and system navigation for Oregon’s most vulnerable and underserved populations
- Train, certify and provide on-going support to organizations that employ OHP-certified community partners (a.k.a. Application Assistors)
- Serve as the bridge between the community and the state of Oregon to support OHP eligibility and enrollment system improvement

CPOP has shifted from solely focusing on medical application enrollments to health system navigation and access to improve the long-term health outcomes of Oregonians. Additional support for CPOP is outlined in the section: [Health Equity and Health Emergency Response](#).

Regional Health Equity Coalitions (RHEC)

Regional Health Equity Coalitions (RHEC) are autonomous, community-driven, cross-sector groups whose backbone organizations are non-governmental in nature. The work of these coalitions--to identify and address health equity issues--covers a wide range of underserved communities, including communities of color, immigrants, refugees, migrant and seasonal farmworkers, low-income populations, persons with disabilities and lesbian, gay, bisexual, transgender and questioning communities. Communities of color are the leading priority because communities of color often experience the greatest health inequities, both in Oregon and nationally. The work of the RHECs addresses social determinants of health that have persisted for generations in sectors such as health, education, housing, employment and

transportation. Ultimately, the coalitions are working to improve the overall state of health equity in Oregon.

The root causes of health inequities have persisted for centuries because systems and institutions have been created to benefit a select group of people over time. Meaningfully impacting health equity issues requires redistribution of resources, and in the context of the RHEC program, sustained, long-term efforts with dedicated fiscal investment is critical for success.

OHA has requested additional resources for the 2023-2025 biennium to support expansion of the RHEC program to add five more coalitions in additional regions across the state. The RHECs receive funding from several sources, but primary support comes from OHA. This foundational or base funding provides necessary nimble infrastructure support allowing the RHECs to focus their priorities on work that communities indicate are most important, rather than categorical funding which can be too narrowly focused on issues that may not be critical in some regions.

Capacity building grants are used to develop new RHECs by supporting coalitions to pilot the RHEC model with the health equity work they are doing and offers an opportunity to complete foundational RHEC activities. These activities include, but are not limited to: coalition building, developing and solidifying governance structures via charters, conducting community needs assessments, etc. After one biennium, the capacity building grantees are assessed for readiness to move into the implementation phase of their work, and whether the RHEC model aligns with the grantee's vision for their health equity work. Capacity building would take place from 2023 to 2025, with implementation anticipated in subsequent years.

There are several benefits to growing the RHEC model statewide through sustained and expanded funding, including:

- Increasing opportunities for coordinated care organizations (CCOs) to partner with RHECs, offer technical assistance and training to build CCO's capacity around health equity and the social determinants of health.
- Allowing coalitions the level of autonomy needed to improve health equity in meaningful and appropriate ways that ensures anti-racist priorities are not compromised.
- Continuing to grow the necessary capacity of Oregon to address health equity issues in culturally specific and effective ways.
- Creating additional opportunities to sustainably address issues related to avoidable policy and system barriers which may help lower costs to health and other related systems.

Healthier Together Oregon

Healthier Together Oregon (HTO) is the 2020–2024 State Health Improvement Plan for Oregon. HTO is a five-year plan that identifies our state's health priorities. It includes strategies that will lead to better health outcomes. HTO is a tool for anyone wanting to improve their community's health. It is meant to inform community health improvement plans and state agency policies,

partnerships and investments. HTO's primary goal is to achieve health equity. Its vision reads: Grounded in data and community voice, HTO identifies strategies to advance equity for these priority populations: Black, Indigenous, people of color, and American Indian/Alaska Native people (BIPOC-A I/A N), people with low incomes, people who identify as LGBTQ+, people with disabilities, and people living in rural areas. In early 2019, the PartnerSHIP identified five priorities:

- Institutional bias
- Adversity, trauma and toxic stress
- Behavioral health
- Economic drivers of health, and
- Access to equitable preventive health care

COVID-19 has worsened the trend in each of these priorities. The pandemic has exacerbated unjust racial disparities. HTO is a tool for our state to recover from COVID-19. More than 100 partners gathered to identify goals, strategies and measures for the priorities. They identified 62 strategies and wove them across an implementation framework that speaks to the interconnectedness of our health priorities. HTO will report key indicators and short-term measures each year to help track and communicate our progress. HTO is a key initiative of the Oregon Health Authority (OHA). However, OHA is not alone in this effort. We are all responsible for health. HTO welcomes new and existing partners to collectively and equitably improve Oregonians' health.

During the 2023-2025 biennium, OHA will continue the work outlined in the Healthier Together Oregon plan, including practices to engage community in the current and future plans. ([Appendix: Healthier Together Oregon: Full Plan](#))

Community Engagement Team

OHA created the community engagement team (CET) in July 2020, in response to the COVID-19 pandemic. OHA awarded approximately \$4,719,720, across 173 community-based organizations (CBO) to respond alongside the state in delivering contact-tracing, outreach and education, and wraparound support to Oregonians.

OHA, including the CET utilized data to organize the state's COVID-19 efforts. That data identified communities that experienced the highest infection rates. OHA partnered with people and organization within those communities to provide culturally- and linguistically-responsive support and resources for better health outcomes. While all counties were represented, there remain equity gaps in services and resources, due in part to the statewide scope of some CBOs.

 CT Centered Community Engagement Values and Principles that include: Outreach, Consult, Involve, Collaborate and Shared Leadership to steward meaningful relationships and trust with community. Culturally-specific engagement spaces were created for connection and cross collaboration across the state among various partners, such as local public health authorities (LPHAs) and CBOs. By amplifying people's lived experiences, partners could trust that everyone

would be respected and their feedback and ideas valued. This framework supported real-time feedback about what was happening and what people were experiencing.

CTE shared this feedback, ideas, and data with the COVID-19 response teams and OHA/ODHS Leadership allowing for new opportunities for regional, systematic engagement and systems' change within the Public Health Division. This direct response to community has allowed important community insight into public health prioritizations, leading to the success of the state's pandemic response. A highlight of accomplishments is listed below.

Outreach and Education

- Total people reached at in-person events: 746,626
- Services offered in 62 languages other than English
- Majority of outreach and education events focused on COVID-19 vaccination education and prevention and safety messaging

Wraparound Support

- Total people assisted: 128,136
- Wraparound support assisted positive COVID-19-tested people during their quarantine and isolation period. Examples of this support included food, rent, and utility assistance.

Supplementary Program Elements

- Food boxes were established from June 2021 to March 2023. Food support included:
 - 2,957,948 total meals served
 - 121,525 food boxes and 21,791 hot meals delivered to vaccination events
 - 10,127 food boxes picked up at food hubs
(each food box contained 21 meals and each hot meal is an individual meal)
 - approximately 49% of food boxes were culturally specific
 - The food box program evolved to include culturally specific food boxes in the second half of program, underscoring popularity and necessity
 - Boxes that were offered: Hispanic or Latino, Latina or Latinx persons, Halal, Asian, and Columbia River Intertribal Fish Commission
- Educational bags were offered starting June 2021, alongside Safe+Strong campaign to increase COVID-19 awareness at health fairs, vaccination clinics and community events
 - Items in bags included Personal Protective Equipment (PPE), COVID-19 test kits and COVID-19 information
 - 70,000 bags have been distributed as of May 2023

Internal Framework

For Oregon Health Authority (OHA) to be successful in its efforts, we must meaningfully involve the people of Oregon to ensure the agency is appropriately identifying and prioritizing issues and implementing solutions that get to the desired outcomes of improving health equity as known and experienced by the people who are and have been living it.

OHA is working toward building the infrastructure needed to support and sustain meaningful and respectful community engagement through intentional actions that institutionalize the feedback received via new ways of doing the agency's work. This not only helps build necessary relationships and trust with community partners for future work, but also takes the guess work out of the agency's efforts to address health inequities among Oregonians- making OHA's work more equitable, effective, and efficient.

There is need to establish an agency framework for community engagement so all divisions within OHA have clear direction around best practices for high-quality, inclusive, and equitable outreach and engagement standards. By shifting away from transactional and extractive engagement methods and centering on building relationships and trust with the people the agency serves, OHA will be able to accomplish initiative-specific goals, and engagement will be more comprehensive and inclusive of all the state's populations. When communities have opportunities to engage in respectful ways and feel that they can trust OHA, they are more willing to openly share the barriers and challenges they experience; this helps the agency to better understand population-specific inequities. This can begin future dialogues about creative and sustainable solutions to uplift health equity in all communities across the state. Creating and fostering authentic trusting relationships, especially with priority populations¹¹, lay the groundwork for people to be respected and have opportunities to share candidly about their experiences and needs. This allows OHA to better understand the full context of population-specific health inequities and to learn directly from communities about how to address health equity most responsively, meaningfully, strategically and sustainably in Oregon.

To achieve this goal, OHA has begun establishing an agency-wide workgroup to leverage the work already established, develop a shared framework for community engagement, creating recommendations for staff capacity building opportunities, identifying comprehensive infrastructure elements needed to fully support community engagement without minimizing organic and necessarily fluid and flexible responses required, and preparing a preliminary budget for leadership approval to ensure investment of resources to support these efforts.

Communications

Digital Accessibility

OHA and ODHS discovered during COVID that our agencies' IT solutions are not accessible to people who have disabilities (e.g. people who use screen readers, alt text, or audio captions). While Oregon has a general statewide policy, OHA and ODHS do not have that policy operationalized at the agency level to make IT solutions accessible.

To close this gap, OHA and ODHS have convened a workgroup to draft and implement Shared Services policies for digital accessibility. These policies would enable ODHS and OHA to plan for

¹¹ Priority populations include: Communities of color; Tribal communities including the nine federally recognized tribes of Oregon and other American Indians and Alaska Natives people; Immigrants; Refugees; Migrant and seasonal farmworkers; Low-income individuals and families; Persons with disabilities; and Individuals who identify as lesbian, gay, bisexual, transgender, or queer, or who question their sexual or gender

and require accessibility in IT solutions to make available to staff or the public, whether those IT solutions are acquired, procured, developed, modified, or enhanced.

The scoping on this policy is split into two main areas – (1) technology procurements and development, and (2) content creation. We are moving forward with the procurement policy first in 2023, and plan to have the content creation policy in place in early 2024. Each policy will have an implementation plan and timeline that is agreed upon by all involved collaborators.

The technology procurement policy will improve processes and practices throughout all phases of IT projects and solutions, bringing them toward compliance with Section 508 of the Rehabilitation Act (Section 508). The policy establishes a source of authority so we can start to build program improvements. It is tied to the OHA's 2023 Eliminating Health Inequities Policy Option Package under Universal Accessibility that was partially sustained in the GAB and intended to enable program development.

In late 2022, the Oregon Department of Human Services (ODHS) and the Oregon Health Authority (OHA) engaged in a joint policy workgroup to ensure equitable and meaningful access to information and services. The workgroup stemmed from the agencies' commitment to effective communications that are culturally and linguistically appropriate and accessible for people who have different communication needs or abilities.

This policy unambiguously (re)affirms that ODHS and OHA are using information and communications technology (ICT) solutions that fully comply with accessibility standards, whether those solutions are developed in-house or acquired from a third party. This includes providing ICT solutions that that give people experiencing equity barriers the opportunity to acquire the same information, engage in the same interactions, and enjoy the same services in an equally integrated and effective manner, and with equivalent ease as someone without that barrier. This includes people who primarily communicate in a language other than English, people who are Deaf, DeafBlind, Hard of Hearing, people who are blind or have low vision, people with color blindness, people with motor disabilities, people who are neurodivergent, people with communication, intellectual, cognitive, developmental or learning disabilities, and people who use assistive technology.

During the 2023-2025 biennium, OHA and ODHS will roll out policies that: (1) outline and clarify each agency's expectations for technology procurements and WCAG (Web Content Accessibility Guidelines) assessments and (2) address creating services and content standards for the agencies.

Language Access Plan

At the Oregon Department of Human Services (ODHS) and the Oregon Health Authority (OHA) we are committed to providing effective culturally and linguistically appropriate communication services. Everyone has the right to access ODHS and OHA resources and meetings, and through a recently updated policy, this now includes internal meetings as well. The updated Auxiliary Aids, Alternate Formats and Language Access Services Policy demonstrates our commitment to providing full access to our meetings, surveys and materials.

In April 2023, accessibility statements started auto populating at the top of all Outlook Calendar appointments. The statement is not editable and ensures that meeting attendees are getting the information they need. The statement reads:

For people who speak or use a language other than English, people with disabilities or people who need additional support, we can provide free help to participate in this meeting. Please call or email the meeting organizer. We accept all relay calls. ODHS and OHA staff can click on this link if they need help with a request.

Language Access Services Resources for both ODHS and OHA can now be found within one shared Language Access Services OWL (intranet) site. Additionally, OHA recently launched a Language Access Desktop Icon to make it easier for OHA staff to access information and resources. Finally, OHA has committed to creating a language access plan that includes processes for how we will provide auxiliary aids, alternate formats and language access services.

Publications and Creative Services

Publications and Creative Services (PCS) is responsible for multiple bodies of work across OHA and ODHS. This includes translations, forms design and maintenance, creative design, editing, ensuring accessibility of all products, brand integrity, etc. PCS has had a growing level of work demands from both OHA and ODHS over the last few years due to increased commitment to language access, the COVID-19 response, other emergency events such as wildfires and heat dome, the implementation of the ONE system, contributed to an overall increase in requests for support.

In 2020 to 2021, requests for changes and new forms increased greatly while staffing and resources within PCS remained the same. Staffing and several other factors including how requests were received and prioritized, developed into a long workload backlog. The buildup of requests, the issue of capacity and demand, request process, tracking, communication, and prioritization all reached a tipping point where both agencies realized the need to support and provide additional resources to PCS if business needs are to be met.

OHA and ODHS programs/divisions work with PCS to produce communications materials that are required by state or federal law. These fall under three primary workstreams: (1) creative design, (2) translations/transcreations, and (3) systems administration and operations which includes physical warehouse operations. Additionally, both agencies utilize PCS for translation and accessibility of materials. Rollout of the ONE system alone has led to translation needs for ONE notices at a pace that outstrips the two translation coordinators currently handling all translation requests for both agencies. The process and staffing challenges within PCS have highlighted the inequitable impacts of delays for communities of color and disability communities. Some people, depending on their language needs must wait to receive critical information in a language they understand or a format they can access.

During the 2023 – 2025 biennium, OHA and ODHS will continue a multi phased project to address these challenges. The first phase focuses on stabilization. The second phase is to build a sustainable state-of-the art publication and creative services unit that is equity centered, aligned with agency communications units, and engaged with community needs. Completion of this project will create a system that helps our agencies meet our requirements in an efficient, effective and culturally responsive way.

Data

REALD/SOGI Repository

Using more complete demographic data to measure systems performance towards achieving OHA's goal of eliminating health inequities by 2030, is the primary motivation for the initial Race/Ethnicity, Language, Disability, and Sexual Orientation, and Gender identity (REALD&SOGI) repository. The repository represents the first effort by any state government to develop a relational database containing the most complete demographic information possible to inform policy-development and implementation aimed at reducing health inequities. A major shortcoming of nearly all existing efforts to monitor health inequity is a lack of quality demographic data necessary to produce accurate estimates of impacts of inequities by REALD&SOGI categories.

The initial repository draws on approximately seven different sources of data to ultimately produce a detailed REALD & SOGI demographic history for all persons observed in the source data. All of these data sources (see below) are REALD-compliant, and all provide a mixture of Race/Ethnicity, Language, Disability, Sexual Orientation, and Gender Identity data.

These sources include:

- ORPHEUS (ACDP: communicable diseases; case mgmt. system for case investigators)
- MORBIUS (ACDP: communicable diseases)
- ARIAS (ACDP: Contact tracing for COVID, no longer active)
- OCRP (ACDP: Covid online data portal)
- OPERA (ACDP: Covid case mgmt. system for case investigators)
- CSV data (ACDP: Covid CSV batch uploads from Providers)
- ONE/IE (OHP, TANF, SNAP, TADVS, CC from ONE/IE data system)

The repository contains approximately 19.4 million unique records. Roughly 90% of the records come from ONE, with 10% coming from Acute and Communicable Disease Prevention (ACDP) sources (ARIAS, MORBIUS, OCRP, OPERA, CSV, and ORPHEUS).

Conceptually, the repository is based on automating complex person-matching and data transformation processes to synthesize data from the above-mentioned sources to produce customizable outputs of more complete REALD&SOGI-compliant data. Preliminary data from the initial repository is already being leveraged by internal partners to produce legislatively mandated reports, model health plan payment rates to reduce inequities in health care outcomes as well as produce dashboards to inform agency and state-wide policy decision making.

During the 2023-2025 biennium, OHA and partners will work to ingest additional data sources from birth certificate data from OVERS to further enhance data completeness of the repository. In addition, we will continue efforts to ingest additional data streams, prioritizing those data streams with REALD & SOGI information to continue to improve on the level of completeness of the demographic data profile for all OHP members.

Decision Making and Budgets

This section outlines roles, responsibilities and expectations in OHA for implementing the Equity Advancement Plan (also known as the DEI or Affirmative Action Plan) and ensuring the agency complies with affirmative action/EEO and related laws, rules and policies.

Accountability mechanisms within the agency include the OHA Performance System, employee development plans and performance management of all agency executives, managers and staff. Additionally, the Oregon Management Project outlines performance expectations for executives who supervise managers and management service employees, to ensure that manager performance evaluations address duties and responsibilities for advancing Equity Advancement Plan goals and strategies.¹²

Agency director

- Sets strategic direction and expectations for the agency concerning development and implementation of goals in the Strategic Plan, Equity Advancement Plan, and other equity and inclusion initiatives and programs.
- Ensures Executive Leadership Team members understand their work performance is evaluated based on their efforts and results around implementing Strategic Plan and Equity Advancement Plan goals and strategies, in conjunction with other leadership responsibilities.
- Ensures the appropriate review and follow-up on findings including:
 - The agency director or deputy director reviews all investigation reports completed under the OHA Discrimination and Harassment Complaint procedure.
 - Appropriate staff coordinate with investigators about the findings, and
 - The agency deputy director responds to requests for reconsideration.
- Receives ongoing professional development related to health equity, equity and inclusion, anti-racism and other topics relevant to advancing the Strategic Plan and Equity Advancement Plan.
- Ensures executive leadership team members:
 - Receive ongoing professional development related to health equity, equity and inclusion, anti-racism and other topics relevant to advancing the Strategic Plan and Equity Advancement Plan.
 - Review management implementation of equity advancement strategies in performance appraisals.
 - Provide reports to the Legislature and public regarding the agency's status and progress on Equity Advancement Plan goals and strategies, and

¹² The Oregon Management Project (TOMP), <https://www.oregon.gov/das/HR/pages/TOMP.aspx>

OHA Equity and Inclusion Division

- Evaluate members of their divisional management team for effectiveness in creating the workplace conditions and results outlined in the Strategic Plan and Equity Advancement Plan.
- Meets as needed with the OHA Equity and Inclusion Division, Office of Human Resources and division and program directors to review progress and challenges with Equity Advancement Plan goals and strategies.

Executive Leadership Team

- Leads the agency in setting the direction and expectations around strategic planning efforts, as well as leadership in implementing the Strategic Plan and Equity Advancement Plan.
- Receives ongoing professional development related to health equity, equity and inclusion, anti-racism and other topics relevant to advancing the Strategic Plan and Equity Advancement Plan.
- Ensures divisional leadership and management teams:
 - Receive ongoing professional development related to health equity, equity and inclusion, anti-racism and other topics relevant to advancing the Strategic Plan and Equity Advancement Plan
 - Review management implementation of equity advancement strategies in performance appraisals, and
 - Evaluate management team members for their effectiveness in creating the workplace conditions and results expected by the agency's affirmative action policy.

Equity Advancement Leadership Team

- Makes recommendations to the Agency Director and Equity and Inclusion Division director to inform and implement the OHA Strategic Plan, Performance System and the Equity Advancement Plan
- Provides oversight to monitor the agency's progress on Equity Advancement Plan goals and strategies. Advises the agency on the development of the OHA Equity Action Plan.
- Receives ongoing professional development related to health equity, equity and inclusion, anti-racism, and other topics relevant to advancing the Strategic Plan and Equity Advancement Plan.

Equity and Inclusion Division

- Develops and communicates agency policies and procedures related to AA/ EEO, Equity, Inclusion and compliance matters and prepares and disseminates equity advancement information.
- Provides strategic, health equity leadership for the most ambitious health systems transformation in the nation.
- Coordinates activities in concert with the Strategic Plan, Performance System and Equity Advancement Plan; monitors progress toward agency identified goals and strategies.

- Documents and communicates to the Executive Leadership Team barriers preventing the agency's achievement of OHA Equity Advancement Plan goals; recommends to Executive Leadership potential solutions on removing barriers.
- Provides guidance and technical assistance to agency executive leaders and management on strategies to incorporate health equity, anti-racism and equity, inclusion and accessibility into the hiring process.
- Ensures the agency is complying with affirmative action/EEO and other relevant laws and policies; documents and communicates to Executive Leadership barriers that are preventing agency compliance with affirmative action/EEO and related laws and policies.
- Receives and investigates discrimination, harassment and retaliation complaints.
- Receives ongoing professional development related to health equity, equity and inclusion, anti-racism, ADA and other topics relevant to advancing the Strategic Plan and Equity Advancement Plan. Develops and maintains knowledge and skills for advancing health equity external and internal to the agency.

Management

- Promotes and fosters a nondiscriminatory, safe and welcoming climate and work environment — both in physical worksites and in the remote work environment — in which all employees are valued and respected in accordance with state policy and agency values.
- Ensures all new and current employees:
 - Are aware of the agency's strategic plan goal, health equity definition and core values, and
 - Understand OHA's priority initiatives and resources for advancing health equity.
- Periodically reviews training programs, hiring and promotion patterns to remove barriers to achieving the agency's Strategic Plan and Equity Advancement Plan goals.
- Implements recommended strategies to incorporate health equity, anti-racism and equity, inclusion and accessibility into the hiring process.
- Conducts periodic reviews by staff authorized to act to ensure the following:
 - EEO, ADA and Discrimination and Harassment Policy information is properly displayed.
 - All facilities for the use and benefit of employees and clients are accessible both in policy and use.
 - People of color, people with disabilities and other protected class identities have full opportunity and encouragement to participate in agency-sponsored education, training, recreational and social activities.
 - Employees learn about the need for ADA compliance, alternate format and language access, and that requests are appropriately processed and accommodated and
 - Problem areas in equity, inclusion and accessibility practices and procedures are identified and solutions sought.

- Receives ongoing professional development related to health equity, equity and inclusion, anti-racism and other topics relevant to advancing the Strategic Plan and Equity Advancement Plan.

Eliminating Health Inequities Policy Package

A critical piece of OHA's plan for the 2023-2025 biennium involves increased funding and resources to support the necessary infrastructure to carry out those activities. The following excerpts are from OHA's POP submissions provided as context for the agency's diversity, equity and inclusion strategies and priorities.

The Oregon Health Authority and its Equity and Inclusion Division are leading the state's effort to accomplish the largest and most ambitious transformation in health care and health delivery in the nation. The equity work charged to and led by the OHA Equity and Inclusion Division has agency-wide, state and national scope and impact. All divisions of the agency must be prepared and equipped to support equity and inclusion at every level of their work as well. It is critical to the success of this work that the agency hire additional subject matter expertise in the discipline of equity and inclusion and anti-racism. The work requires practitioners with career and lived experience, well versed in the research, theory and practical application of equity and inclusion. This policy package represents the next phase of assets necessary to achieve the state's and agency's imperative for health systems transformation and close the gap on health inequities that prevent the opportunity for all people in Oregon to attain optimal health, per a gap analysis related to additional capacity necessary to achieve the strategic goal of eliminating health inequities in Oregon by 2030.

Diversity, Inclusion, Training, Civil Rights, and Universal Accessibility

This initiative supports bringing on additional experienced and knowledgeable equity and inclusion professionals who are subject matter experts in stewarding supportive, respectful, and healthful work cultures for OHA staff, including disciplines such as training/adult learning, civil rights, disability access, language access and equity and inclusion generally. By providing proactive, restorative and cost-effective resources necessary to support the growing and ever-diverse OHA workforce and the varied needs of the people who live and work in Oregon.

One example based on a painful lesson learned from Oregon's COVID-19 response: many people who live and work in Oregon communicate in a language other than English. To provide information that is useful to people, we must invest in resources to produce and deliver information in languages other than English. It takes expertise to know how to do that effectively and efficiently. A second lesson learned is that not everyone can access and use information that is produced and delivered on a website. Even assuming you had a device and internet access, if you are blind you need the information on the website to be formatted so that your screen reader can read the information to you. That planning and doing does not happen automatically.

OHA Equity and Inclusion Division

This [POP] proposal buys justice, liberty and life for the people of Oregon, especially the people who have been most harmed by injustice and health inequities, people who are experiencing the most harm, including racism, disenfranchisement and marginalization.

This investment represents OHA's commitment to not only ensure compliance with statutory and regulatory requirements. It is a sound investment enabling the agency to develop internal capacity support a thriving workforce who are key to eliminating health inequities for the people of Oregon.

Health Equity and Health Emergency Response

This proposal allows the Community Partner Outreach Program (CPOP) to expand the scope of their external reach to populations most harmed by health inequities, lead OHA overall around community-centered outreach, engagement, and co-creation within all programs, amplify the work of the OHA Equity and Inclusion Division and bring this feedback and community voice to inform, shape and influence OHA programs, policies and practices.

Strategic Action Team (SAT)

This initiative would fund positions as part of a Strategic Action Team (SAT), including project management and change management expertise, to create systems and processes that add capacity and enhance work on key initiatives across the agency that get us closer to our strategic goal to eliminate health inequities in Oregon by 2030. This team would amplify and support the work that has been led and is underway via the Equity and Inclusion Division, Tribal Affairs, the Community Partner Outreach Program, and broaden the agency's capacity across all divisions to achieve our strategic goal.

The Strategic Action Team would provide an array of operational supports and resources to strengthen the ability of our agency to apply health equity and anti-racism principles and practices in our everyday work.

For key initiatives in the agency, the Strategic Action Team would:

- Provide coaching and change management support to ensure it has been designed or adapted with health equity and anti-racism principles and practices at the forefront.
- Assist with scoping, planning, mapping out and communicating an implementation plan that is centered in health equity and anti-racism.
- Ensure that initiatives follow OHA's Tribal Consultation and Urban Indian Program Confer Policy in coordination with OHA's Office of Tribal Affairs and divisional tribal liaisons.
- Elevate and synthesize applicable best practices, policies, or processes for the program team that redistribute power and resources, centers community in achieving change, and disrupts white supremacy culture practices
- Document and
- Provide project metrics and a project dashboard or scorecard for a variety of views throughout the organization.

- Support cross-divisional program teams in addressing resistance to anti-racism and change.
- Identify and share when policy, practice, decisions, outputs, and documentation is in tension with our strategic goal, indicating the potential need for work to pause.

In addition to the support provided on key agency initiatives or programs, the Strategic Action Team would provide broader agency supports while following the lead and subject matter expertise already established in OHA, including agency-wide supports such as providing:

- Project management tools and templates to assist OHA teams in centering health equity in their work, including forms and templates to facilitate the development of project estimates, project plans, project schedules, issues management, change management and project reporting
- Project tracking tools and example project metrics and dashboards
- Coaching resources to support divisions and program staff to create, adapt and manage initiatives with health equity at the core of change management and project management

Fiscal Equity

This portion of the policy package would establish a new position, i.e., the start of a team, in OHA's fiscal division who would be fully dedicated to analyzing the agency's investment in health equity and anti-racism, including return on investment in health equity spending at OHA and in OHA-funded programs. This position would work with OHA subject matter experts and community partners to analyze the fiscal impact of OHA-funded health equity work and how those investments are contributing to OHA's strategic goal to eliminate health inequities. This highly-skilled and experienced professional would be better able to analyze, understand and quantify the costs of institutional racism within OHA programs and the effects of OHA's and the state's investments to address those institutional costs(harms). This position would make evidenced-based recommendations for future budget structure and budgetary levels needed for the elimination of health inequities.

The position would work closely with the Equity and Inclusion Division and Tribal Affairs to ensure that their work is inclusive, collaborative, and in alignment with the direction of agency initiatives.

Equity and Inclusion Business and Programmatic Support

This policy package further develops an infrastructure necessary to support equity and inclusion initiatives within the Equity and Inclusion Division and across the agency. It buys one position to provide essential administrative support to build the infrastructure necessary to support the physical and programmatic expansion of the Equity and Inclusion Division, and a second position to administer and lead strategic alignment of the expanding and statutorily mandated health care interpreter (HCI) program.

OHA Equity and Inclusion Division

Organizational Resilience and Healing (ORHP)

This policy package includes one full-time Operations & Policy Analyst 4 position to work with OHA leadership and employees to develop project management plans, assess policy impacts, and make recommendations for resources needed to fully implement the Organizational Healing and Resilience Policy (ORHP). This position will also conduct an environmental scan to create a compendium of culturally appropriate staff resources and conduct a gaps analysis to assess what supports are still needed. This effort will also make recommendations to support implementation, including staffing supports and training.

Meaningfully impacting these workforce inequities requires fiscal investment. Specific benefits of these resources include:

- Increased morale, a sense of belonging, general wellness and an overall quality of workplace interactions for OHA staff.
- Decreased staff turnover
- Increased staff retention which can especially contribute to fostering a more diverse workforce
- Allows employees the level of autonomy needed to improve equity in meaningful and appropriate ways that ensures anti-racist priorities are not compromised.
- Continues to grow the necessary capacity of OHA to address equity issues in culturally specific and effective ways.

Diversifying workforce and Internal Culture

The Equity Advancement Leadership Team (EALT) and OHA leadership have committed to a cadence of quarterly meetings with Division Directors and the EALT, relating to equity work, goals and workforce demographics. These meetings aim to provide a clear structure and direction for accountability and feedback as it relates to agency equity goals.

The current equity goals of focus stem from the top priorities identified by the EALT in a memorandum to the OHA Executive Leadership Team from August 18, 2022. These priorities stemmed from several discussions with OHA leadership and among its own members. Below is a summary of the recommendations that outlined each proposal, which are of equal priority, and a framework for the respective action steps for each initiative, including the role of the EALT. These priorities outline the actions OHA intends to focus on during the 2023-2025 biennium to improve workforce parity.

Agency Accountability to operationalize the OHA Strategic Plan and the Equity Advancement Plan

- 1) Create and implement feedback loop for division directors to report out to the EALT regarding equity activities within the divisions.
- 2) Continue to promote agency Equity Advancement Plan to division directors.
- 3) Create accountability system to review agency implementation of the Equity Advancement Plan.
 - a) The system will include metrics that will allow us to track implementation.
 - b) Leverage the already established Performance System Metrics.

- 4) Provide workforce data quarterly to EALT members.
- 5) Implement mandatory exit interviews when staff move to other positions, both internal AND external. An intentional structure and protocols should be put in place to ensure that staff feel safe in this process and that they will not be retaliated against if they share critical feedback about their experience. Anonymity of the staff as request and objectivity in the process are critical. This process should also include a data collection, analysis, and process improvement
- 6) Include ERGs at new employee orientation to connect staff from communities most impacted by health inequities with internal resources to boost retention rates.
- 7) Require managers to notify staff, especially staff of color of professional development opportunities.

Implement the Equitable Hiring Toolkit as a mandatory process for all hiring managers in OHA.

- 1) Use of the toolkit shall be mandatory for ALL OHA recruitments. This requirement should be linked to the accountability system for the Equity Advancement Plan.
- 2) Adequate training and other resources should be dedicated to support the adoption of the toolkit. Assessment of current adoption across the agency and barriers/success to adoptions should be done, including assessment of training and other resource needs.
- 3) In terms of prioritization for implementation a greater emphasis may be placed on management positions and promotions. However, ideally all hiring would use the toolkit.
- 4) Establish a minimum diversity requirement for hiring panels that does not tokenize staff of color.
 - a) Prioritize staff who have taken the search advocate training and prioritize training new staff who have the highest rates of inequity within our hiring/promotion practices.
- 5) Create process and outcome measures that will allow us to track implementation and to the degree possible connect the use of the toolkit with hiring outcomes.
 - a) Examples may include:
 - i) Assessing which divisions and offices are currently using the toolkit and when the toolkit is being used for all hiring.
 - ii) Track the number of staff by division that have been trained to use the toolkit.
 - iii) Establish goals for percentage of managers completing the training with a set period.
 - iv) To the degree possible assess how use of the toolkit impacted the hiring process and outcome.
 - v) Creating an opportunity for continuous quality improvement/feedback as the toolkit is used across the agency.
- 6) Create an auditing plan for toolkit implementation. This should be linked to the measures above.

Implement a mentorship program within OHA.

- 1) Create a project plan for a mentorship program within OHA that draws on historical plans and learns and connects to the agency Strategic Goal and Equity Advancement Plan.
- 2) Create a mentorship policy with the involvement and feedback from the EALT and ERGs as key partners.
 - a) Policy should establish an amount of time that the agency is willing to support mentorship directly and will not come out of ERG hours.
- 3) Look to pilot the mentoring program with ERGs that are already doing this work naturally.
- 4) While mentorship is not a promise for promotion, there should be a clear infrastructure and opportunities embedded into the mentorship and as a supplement to the program for building the skills and experience necessary for advancement, particularly to management roles.
- 5) Create a pathway for mentees and mentors to utilize the mentorship program for succession planning.

Involuntary Separations

- 1) Create a requirement for mandatory exit interviews.
- 2) Create a method to track data as to why staff are leaving OHA voluntarily or involuntarily.
- 3) Determine if an independent entity would be best to collect this information from staff leaving the agency.

Contracting and Procurement

In Fall of 2022, the Deputy Director of OHA formed a Business Equity and Inclusion Collaboration Workgroup within OHA. This group formed in response to Executive Order 22-15¹³, which directs state agencies to take specific steps, over several years, to improve equity in state procurement and contracting. The Executive Order is a result of proposals from the Racial Justice Council's (RJC) Procurement and Contracting Equity Workgroup, aimed at embedding equity into state procurement and contracting processes.

"Despite previous work to promote diversity and inclusion in state procurement practices, there continues to be gaps and barriers for businesses owned by people of color, women, and veterans, as well as emerging small businesses," said Governor Brown. "With this order, we will take further steps to promote greater equity in state contracting. I'd like to thank the members of the RJC for their work on developing thoughtful proposals to help us root equity in state procurement and create economic prosperity for all Oregonians."

"The RJC Procurement and Contracting Equity Workgroup proposals push state procurement of goods and services beyond spending by supporting opportunities to narrow the racial wealth gap," said Jan Mason, co-chair of the workgroup. "This Executive Order is a tremendous step towards ensuring our state investments enable equitable opportunities towards wealth mobility, particularly for economically disadvantaged and underrepresented minority-owned businesses."

Executive Order 22-15 includes directives to all state agencies regarding:

¹³ Executive Order 22-15, https://www.oregon.gov/gov/eo/eo_22-15.pdf

- Embedding an equity lens in all aspects of state procurement processes;
- Improving data collection and data transparency;
- Proactive outreach and engagement;
- Staff training; and
- Accountability.

In addition, the Executive Order includes directives to specific state agencies, including Business Oregon, regarding business support and capacity building; the Oregon Department of Transportation, regarding public works project planning, procurement equity, and contract compliance; and the Department of Administrative Services, regarding an agency-led Procurement Equity Workgroup.

The workgroup serves the following purposes:

- Serves as the central source of coordination for groups and individuals across OHA with regards to equity and inclusion in business engagement and procurement contracting processes. Including specifically the following,
 - Guiding processes/procedures around integrating anti-racism, accessibility, and equity into our procurement evaluation and selection efforts (to mirror OHA's equity in hiring toolkit and efforts to implement that with hiring panels).
 - Guiding trainings and resources for contract administrators in OHA doing inclusive procurement and business engagement work
- Create a community around good business engagement practices. This includes providing consistent tools and resources in addition to education across the agency.
- Acts as the OHA counterpart to the shared services Business Outreach Coordinator and serves as the point of contact (POC) for partnership with OHA
- Is responsible for administration of OHA specific pieces related to the Business Partnership program (see Core Functions)
- Ensures effective working relationships that
 - Achieve results,
 - Steward tax dollars, and
 - Promote cost effective, strategic solutions to meeting the short and long term needs of Oregonians in their communities.
 - Create ease of administration for both the agency and partners
- Responsible for oversight of audit deliverables

The workgroup has identified two actions of focus for the upcoming biennium – (1) Hire an OHA focused Business Outreach Coordinator and (2) Develop a state outreach plan in conjunction with ODHS that includes data-informed outcomes and metrics to track and monitor progress.

During the 2023-2025 biennium, OHA and ODHS will hire an OHA specific Business Outreach Coordinator to support the existing ODHS focused coordinator in providing statewide outreach. Subsequently, they will complete the Business Outreach Plan.

Service Delivery

1115 Waiver Policy Option Package

Oregon recently received approval for its 2022-2027 Medicaid 1115 Demonstration Waiver from the Centers for Medicare and Medicaid Services (CMS). The overarching goal of Oregon's 1115(a) Medicaid Waiver Demonstration renewal is to advance health equity in alignment with the Oregon Health Authority's strategic goal of eliminating health inequities in the state by 2030. Focusing our waiver work on making meaningful progress towards health equity, aligning with other health policy initiatives and integrating with other systems in our state such as housing, will allow us to:

- Make significant improvements for individuals who face historic and contemporary injustices;
- Increase individual, family and community resilience; and
- Reduce health disparities for groups disproportionately affected.

The waiver makes significant advancements in coverage by maintaining enrollment in the Oregon Health Plan (OHP) for kids, from birth until their sixth birthday, and for two-years enrollment for people age six and up even if their eligibility status changes. In addition, the waiver provides authority to cover certain health related social needs (HRSN) services (housing, nutrition, and climate services) to address HRSN for individuals experiencing life transitions. When people go through major life transitions, like losing housing or being impacted by extreme weather, they often lose access to their health care providers, leading to worse health outcomes. To help members keep their coverage, stay in touch with their health care providers, and stay healthy, Oregon will provide social supports to members as they experience these types of events in a package of services known as health-related social needs. Services will depend on the nature of the transition.

During the 2023-2025 biennium, OHA will be in the first part of the 5-year demonstration period and will implement significant changes to Coordinated Care Organization (CCO) contract requirements, revision of Oregon Administrative Rules (OARS) that impact all providers, substantial changes to IT systems to support financial disbursement, claims activity, and data submission, and managing the adoption and utilization of statewide community information exchange (CIE) platforms for referrals.

Oregon State Hospital Treatment Services Supports Policy Option Package

The Oregon State Hospital (OSH) is the largest workforce division of the Oregon Health Authority (OHA) and provides services to some of the most vulnerable Oregonians, who have both historically and currently, been harmed by inequities in systems of care. OSH experiences chronic systemic capacity limitations that have prevented it from carrying out strategies to address inequities in the system for both the people served and the service providers. Health equity work has been historically undervalued and deprioritized, and resources required for transformational change at OSH are lacking. Resources are required to facilitate diversity and equity programs and initiatives, foster the implementation of culturally appropriate policies and practices consistent with state and federal requirements, coordinate implementation of laws and regulations such as Section 1557 of the Affordable Care Act and the Americans with

Disabilities Act, and promote an increased understanding of the relevance of cultural responsiveness, culturally appropriate care, and diversity to building an organization that effectively meets the needs of its diverse patient population and workforce. There is currently one position to support this work for nearly 3,000 OSH employees and up to 675 clients between the two hospital campuses, and Pendleton Cottages.

In the current state of resource deficiency, OSH will not be able to meet OHA's mission of eliminating health inequities in Oregon, meet the Governor's State of Oregon DEI Action Plan, or provide care that aligns with the National Standards for Culturally and Linguistically Appropriate Services (National CLAS Standards) as outlined by the U.S. Department of Health and Human Services (HHS). Current investments are focused on responding to emergency situations and restabilizing the division to a pre-pandemic operational state. Simply operating at the historic institutional level is not sufficient for the provision of patient and staff services that address the diversity of the community, are equitable and inclusive to all community members, and meet a qualitative standard of excellence for addressing health inequity.

This policy package invests in resources dedicated to building an infrastructure that supports culture change necessary for meeting the goals of eliminating health inequities and the provision of national CLAS standards of care. Recognizing, reconciling, and rectifying historical and contemporary injustices for patients and staff require funding for resources including but not limited to:

- Dedicated professionals trained at the intersection of equity and mental health
- Patient-specific cultural, linguistic, and identity-affirming needs and supports
- Extensive workforce training related to equity, inclusion, diversity, anti-racism, and social determinants of health
- Clinical training related to the identification and facilitation of culturally and linguistically responsive treatment services
- Treatment resources required for the implementation of culturally and linguistically responsive treatment services
- Professionals who can work with frontline staff, patients, and managers to create inclusive and welcoming units

Additional dedicated OSH staffing resources are needed for the full implementation, tracking, and integration of Race, Ethnicity, Language, Disability (REALD) and Sexual Orientation and Gender Identity (SOGI) standards of data collection to drive decision-making processes at all levels of operations. This would include policy and practice implementation, provision of culturally and linguistically responsive and trauma-informed services, service quality improvement initiatives, and staff training for working with diverse populations. These resources are requested in the OSH policy package as OSH is moving towards utilizing REALD data to align treatment services with treatment needs specific to patients at OSH.

Contingent on the funding from this policy option package, during the 2023-2025 biennium, OHA will improve the staffing capacity at the OSH, invest in an infrastructure that recognizes, reconciles, and rectifies historical and contemporary injustices for patients and staff (outlined

above), and work towards the full implementation of REALD and SOGI data collection standards.

Measure 110

In response to the drug addiction and overdose rates in the state, Oregon voters passed Measure 110, which decriminalized the possession of substances for personal use and instituted a health-based approach to addiction and overdose. Senate Bill 755 ensured an equitable approach to implementation by mandating creation of an Oversight and Accountability Council (OAC), comprised of community members with lived experience, substance use disorder treatment providers, policy, and subject matter experts. The OAC has the sole authority to award BHRN funding or amend grant agreements. The OAC, in consultation with OHA, also supervises program implementation. This legislation created a paradigm shift in decision-making (external partners are decision-makers and OHA is in a supporting role) that required building new relationships and developing trust with community partners and the Council. This paradigm shift, coupled with ambitious implementation timelines and stretched OHA staffing resources due to the pandemic, led to an initial 8-month delay in implementation.

During the 2023-2025 biennium, OHA will continue this important work to support the 42 Behavioral Health Resource Networks (BHRNS) (spanning 36 Oregon counties consisting of 234 grant agreements, including 11 Tribal partners). Work will focus on extensions and revisions to current BHRN grant agreements (in progress) and aim to provide program and fiscal stability through 23-25 biennium.

Conclusion

The Oregon Health Authority along with the rest of the state of Oregon has experienced tremendous change, challenges and achievements. We acknowledge that we have experienced challenges with holding accountability around developing and supporting a culture of inclusion. That said, OHA is in the midst of our pursuit of our strategic goal to eliminate health inequities in Oregon by 2030, and doing so from a foundation of anti-racism. What we have done, are doing and will be doing to reach this goal are reflected in the strategies and focus areas described in this report. What we have presented here is representative of our efforts and commitment to diversity, equity and inclusion.

We value the support and investments from the Executive and Legislative branches of Oregon in recognition of the essential nature of this work. We welcome your questions and comments as we continue our work to serve the people of Oregon.

Background

Why a culturally specific approach is significant

The Oregon Health Authority (OHA) is embarking on a strategic planning process to identify the agency's goals for the next five to 10 years to continue to move toward improving the health of all people living in Oregon. As part of that effort, the agency has engaged culturally and linguistically diverse communities. OHA reached out to priority populations* who are most harmed by health inequities. These groups were selected specifically because the agency acknowledges the disproportionate harm of health inequities they face, as well as the historical and contemporary effects of structural and institutional racism and discrimination. To acknowledge and address this, the agency paused strategic planning efforts to ensure community engagement was respectful, meaningful and ultimately working toward building long-term relationships and trust.

These efforts are meaningful because OHA is deliberately planning, investing in and using new processes and strategies to ensure that engagement is meaningful, respectful, and culturally and linguistically appropriate. Creating and fostering trusting relationships with historically disenfranchised communities lays the groundwork for people to feel comfortable and have opportunities to share candidly about their experiences and needs. This allows OHA to better understand the full context of population-specific health inequities and to learn directly from communities about how to most meaningfully, strategically and sustainably address health equity in Oregon.

This process began by asking communities if they wanted to be engaged in providing feedback on the OHA strategic plan, and if so, how. It is important to note that these efforts were possible due to existing relationships and trust the Office of Equity and Inclusion (OEI) and the Community Partner Outreach Program (CPOP)[†] have fostered with diverse communities for many years. Also, the key to this effort was the resource investment and commitment made by OHA leadership to provide the support and resources communities needed to lead their own input sessions across the state.

* Priority populations include communities of color; Tribal communities including the nine federally recognized tribes of Oregon and other American Indians and Alaska Natives people; Immigrants; Refugees; Migrant and seasonal farmworkers; Low-income individuals and families; Persons with disabilities; and Individuals who identify as lesbian, gay, bisexual, transgender, or queer, or who question their sexual or gender identity. (ORS 413.042, OAR 943-021-0005)

[†] For more information about CPOP, please go to: <https://oregoncpop.org>

There were 22 in-person events in 11 counties with more than 400 participants. These events were conducted in seven primary languages (see Appendix A for details). Additionally, there were three remote participation options: one statewide webinar conducted in Spanish, one statewide survey in both Spanish and English, and a weekly radio call-in show in Spanish. Each event was led by either culturally specific community-based organizations or grassroots community members and was customized to be culturally and linguistically appropriate. This included having appropriate meeting formats, serving culturally appropriate food, and having known community leaders facilitate discussions in communities' preferred languages.

For OHA to meaningfully address health equity, the agency needs to adjust its strategies. By approaching community engagement in ongoing, culturally and linguistically appropriate ways, OHA is building trust and relationships to better understand communities, health inequities and what is needed to support the health and wellness of all Oregonians.

Lessons learned and logistical supports

These are the lessons learned highlights. More specific details about engagement events are available in Appendix C.

- Some communities did not want OHA present for their events. This reflects the distrust some feel toward government agencies due to historical and present-day injustices, and the need to invest time and resources in building relationships with communities. Despite this, many communities expressed the desire to get to know and have ongoing engagement with OHA.
- OHA needs more staff solely devoted to this work, to dedicate the time and capacity necessary for the full engagement process, including outreach, engagement and follow-up.
- More time is needed for community outreach. There were missed opportunities to engage some groups because the timeline for completing the outreach events was too aggressive. Some community leaders did not feel they had enough time for planning and outreach to do as good of a job as they wanted, so they declined altogether. Especially summertime, a high season for many Farmworkers and migrant communities working extra-long hours on evening and weekend, timing was a challenge for recruitment.
- Never assume all communities know who OHA is or what the agency does. There is not visibility of physical OHA offices in the community and unless someone from their own community explains OHA's function, the agency may get dismissed. There are great opportunities to create and strengthen agency visibility to marginalized communities by creating appropriate linguistically and culturally marketing materials.

- Every engagement is an opportunity to build new relationships by asking what communities need and how OHA can help; however, follow-through is key to building trust.
- Each engagement is also an opportunity to share information and resources, and to build the capacity of community members around key concepts related to health and wellness (health equity, social determinants of health, what are coordinated care organizations (CCOs), etc.). However, for input or feedback events, ensure OHA staff do not monopolize time by talking to participants for long periods.
- Always ask what formats for engagement are most appropriate and be creative with additional formats for people who cannot attend on a specific day or time.

The following were helpful logistical supports at the engagement events:

- Having a facilitator guide that was developed to explain the details and objectives of community engagement. This included a popular education toolkit to help facilitate communications and trust.
- Having at least two trained notetakers at each event.
- Before beginning, ask broad questions such as, “Define what health is to you?” “What do you think of when you think of health?” and “What are the social determinants of health?”
- Using audio recordings (when appropriate and the group agrees) and having the audio transcribed and translated for analysis after the event. This alleviated the need for detailed notes, and you don’t lose the tone of comments made.
- Having multiple OHA staff attend to help with logistics and answering questions, but not so many staff that it becomes intimidating to the group.
- Taking time to explain OHA’s purpose, role and key functions.
- Having easy-to-read materials and visuals to explain who OHA is.
- Depending on how familiar participants are with social determinants of health, time spent to explain this concept (see facilitator guide for more info).
- Writing each question on the chart paper, including the delta/plus feedback chart at the end. This helps participants refocus on the questions.
- Simplifying questions for participants by using plain language.
- Taking time to thoroughly explain the media consent form, as well as what audio, photos, and video would be used for.
- Using short videos to help explain key concepts.
- Using visual aids helps explain the social determinants of health to participants and to reference examples (see figure 1).

Figure 1. Economic, Cultural, and Social Conditions

Figura 1. Condiciones socioeconómico y culturales

Limitations

It is important to mention there were limitations on collecting feedback from these priority communities.

- Time constraint: There was six weeks to collect feedback and coordinate logistics for the community engagement events. Most community organizations already had events scheduled throughout the summer. Although they were willing to participate and collaborate with us, it was additional work for them.
- Evaluators had a short time frame to analyze all the data from the over 20 community engagement events.
- Some communities did not want to be recorded or to have large group discussions. Therefore, notetaking in a way that reflected all the details of these discussions was especially challenging.
- Notetaking is a specific skillset that requires training and practice.
- Higher quality audio recorders are needed for data collection clarity.
- Access to timely and quality translation services was a challenge, and ultimately affected the quality of the data.

Recommendations

Utilizing a continuous community engagement model

OHA should shift away from engagement models in which interactions with communities are transactional and largely occur when the agency needs input, information or feedback for specific initiatives. Instead, the agency should consider a continuous community engagement model that values building long-term trust and relationships with communities.

By doing engagement work in this way, the agency will still be able to accomplish initiative-specific goals, but engagement will be more comprehensive and inclusive of all the state's populations. When communities have opportunities to engage in respectful ways and feel that they can trust OHA, they are more willing to openly share the barriers and challenges they experience; this helps the agency to better understand population-specific inequities. This can begin future dialogues about creative and sustainable solutions to uplift health equity in all communities across the state.

Figure 2. Continuous Community Engagement Model

Two keys to carrying out this model are: ensuring adequate time is allocated for engagement efforts; and ensuring there is the capacity for follow-up and timely feedback. As the agency begins to shift to a model of building trust and relationships, it will need adequate time to navigate sensitive dynamics such as distrust of government, and cultural and linguistic differences. Workforce diversity and non-defensive active listening strategies can help to mitigate some of these challenges. Engagement activities must be open to hearing community feedback, even when it does not appear to “fit” within the current frameworks the agency is using. There is endless wisdom in community experience, and it is key to be open to many ways of communicating, learning, and understanding.

Additionally, each time the agency engages the community it should develop a plan to set expectations around feedback and follow-up. For example:

1. How will OHA use the input or feedback? It is important to note that not every bit of feedback may be reflected and if not, why (feasibility, only using most common themes, etc.).
2. What will be the timeline to incorporate or carry out input or feedback?

3. How will communities know or become aware of new documents, processes, initiatives, etc., that they were providing input on?
4. Will there be an opportunity for the community to provide feedback on draft versions of the work they are commenting on?

Develop a community engagement team

OHA should develop an agency-wide team to focus solely on community engagement of priority populations* across the state. This team should accomplish its work via a community engagement-specific strategic plan that uses respectful, long-term strategies. Such a team could help coordinate efforts to lessen and eventually eliminate silos and duplication of work. It could also decrease input or feedback fatigue communities experience when asked similar things from multiple places within the agency. This approach would ultimately:

- Establish with these communities the trust and relationships needed to improve health outcomes and achieve health equity.
- Advance coordination and communication to ensure more strategic use of OHA capacity.
- Improve outreach and engagement so the agency is better informed to serve all Oregonians.

Team members would be stationed in the agency's various divisions but meet frequently as a team. While each team member would focus on division-specific work, those efforts will be braided into the agency-wide community engagement strategic plan and align with the agency's mission, vision and values. This effort must include the building of internal capacity around this work in each division so that staff outside this team understands and know the value of meaningful, culturally and linguistically appropriate community engagement, and how it applies to their own work.

To accomplish this OHA will need the following:

- An internal OHA steering committee to develop the community engagement team. The committee should be comprised of staff with demonstrated community engagement expertise.

* Priority populations include communities of color; Tribal communities including the nine federally recognized tribes of Oregon and other American Indians and Alaska Natives people; Immigrants; Refugees; Migrant and seasonal farmworkers; Low-income individuals and families; Persons with disabilities; and Individuals who identify as lesbian, gay, bisexual, transgender, or queer, or who question their sexual or gender identity. (ORS 413.042, OAR 943-021-0005)

- A team of staff located in each division solely devoted to accomplishing the agency's community engagement goals carrying out community engagement efforts. This would include the External Relations Division, Health Policy and Analytics Division, Health Systems Division, Equity and Inclusion Division, Oregon State Hospital, and Public Health Division. Depending on relevance and interest, it would also be critical to have a touchpoint with Tribal Affairs.
- Staff should have the following experience and competencies: bilingual or multilingual; bicultural or multicultural; demonstrated expertise in carrying out meaningful community engagement strategies; the ability to work respectfully with many diverse communities; understanding anti-racism, unconscious bias, health equity, social determinants of health equity; and lived experience.
- This team should have dedicated support from agency research analysts to assist with research and evaluation related to community engagement efforts.
- This team must have access to timely and high-quality translation services to succeed. Shared services do not have the necessary capacity for this. It must be included in the budget.
- Dedicated funding to support community engagement efforts, which should include line items referenced in the "Budget" section below.
- Administrative support is needed to assist with the logistics of completing, submitting, and tracking paperwork related to processing community engagement supports.

Social determinants of health equity liaisons

Barriers related to the social determinants of health equity (SDoHE) were frequently mentioned in feedback from engagement events. In addition to access to quality, affordable and appropriate health care, major themes included housing, nutrition, education, transportation, and recreation. Communities frequently highlighted the challenges of systems not communicating or coordinating efforts.

Staff recommends the creation of SDoHE liaison positions. This will allow OHA to begin to identify opportunities for coordination and collaboration to more strategically use resources and ultimately better serve Oregonians. The SDoHE liaisons should work closely with the community engagement team to understand and prioritize population-specific challenges that require stronger partnerships and focused efforts between OHA and other sectors.

Figure 3. Agency connections to community engagement

Communications materials

OHA should have a core set of easily understandable resources in various formats (for example, written, video) readily available for community engagement purposes. They should also be available in multiple languages and ADA-accessible formats. This should include the following topics:

1. What is OHA and what is its role?
2. An organization chart with a brief description of each division's functions.
3. Materials defining and describing (with examples) key concepts that come up often in community engagement efforts (health equity, social determinants of health, etc.)

Investment in language access

Publications and Creative Services, part of ODHS|OHA Shared Services needs adequate resources to provide timely, accurate, complete, and consistent translations. They should follow the tenets of plain language and be culturally responsive. The translation process should include back translation* and plain language review. Staff should follow up with the source (community member or another partner) to confirm accuracy. All core communication materials listed above should be available in Oregon's 15 most commonly spoken languages, as well as all others upon request.

Staff recommends that OHA create an OHA staff translation team for greater internal capacity for this key support as well as a greater ability to manage timeliness and quality control for translations on any community engagement, community partners and community members materials.

Agency policies, procedures and fiscal management

In carrying out community engagement efforts, opportunities to address internal systemic barriers become apparent. Agency policies, procedures, contracts and agreements and fiscal management play a key role in determining what is allowable and feasible. These policies can either support or hinder meaningful community engagement work, and it is important to identify and analyze barriers and consider what potential solutions could be.

For example, as a result of community engagement efforts for the OHA strategic plan, the need for a policy that supports the use of childcare at community engagement events was identified and efforts are underway to develop this policy

* The process of back translation is when a translated document is converted back into the original language to ensure completeness, accuracy and readability.

for OHA. Relatedly, there is also the need to communicate policies and procedures that support community engagement work to internal staff and external partners to ensure clarity and consistent practices.

Decision-maker engagement with community

It is important to have OHA decisionmakers in attendance at engagement events. This demonstrates that the agency's leaders are investing time to hear from the community because they value community members' lived experiences and expertise. It is also an opportunity for OHA leaders to hear people's powerful stories firsthand, build relationships directly with community members, and better understand the context of people's lives and how it affects their health and wellness. Having staff with decision making authority attending community events can help lessen system challenges and support OHA in being more nimble and efficient when addressing community barriers to achieving health equity.

Budget

Having sufficient resources to support meaningful community engagement often makes the difference in people's ability to participate. It was critical that leadership allocated over \$100,000 to supporting this effort. This ensured that communities had the resources they needed to conduct successful community engagement events.

Staff recommend that agency encourage divisions and units conducting community engagement to build necessary supports into budgets. The following line items should be included in future community engagement budgets:

- Agencywide training to build necessary competencies around understanding the need, value and purpose of meaningful and appropriate community engagement.
- Supporting technology and tools for collecting and analyzing qualitative and quantitative data.
- Research and evaluation support.
- Culturally appropriate catering.
- Childcare.
- Translation.
- Interpretation.
- Outreach and marketing.
- Participation stipends or gift cards.*
- Facilitation.
- Transportation and lodging.
- Administrative or indirect support for community-based organizations' outreach, coordination and payment processing work. This should generally be 10-12 percent, although the agency should consider budgeting at least 18 percent for Tribes as an equity consideration due to a lack of proportionate infrastructure support.

* Offering compensation for community members' labor to guide OHA efforts is important. It demonstrates gratitude for and value of the expertise provided and works to mitigate potential barriers to participation such as loss of wages from missing work. Compensation also works as an effective incentive to increase participation from community members.

Appendix A

Table of specific community engagement events

#	Lead organization or person	Location	Population(s)	Language(s)	Role of OHA
1	CPOP Community Partners: Mano a Mano, Interface, Northwest Human Services	Woodburn	Latino	Spanish	OHA facilitated, organized
2	CPOP Team	Virtual (statewide webinar)	Latino application assisters	Spanish	Regular OHA-facilitated webinar and discussion opportunity
3	Mid-Columbia Health Equity Advocates [a Regional Health Equity Coalition, (RHEC)]	Hood River	Latino	Spanish	Provide intro, help facilitate, answer questions
4	Eugene/Springfield NAACP	Eugene	African American, Latino, mixed race	English	Requested no OHA presence
5	Mid-Columbia Health Equity Advocates [a Regional Health Equity Coalition, (RHEC)]	Hood River, Radio Tierra: Entérate with Alejandro Aguilera Cano	Latino	Spanish	None requested
6	Olalla Center	Newport	Guatemalan and Latino	Mam Spanish	Set up and clean up, answer questions, help facilitate and provided visuals.
7	Eric Richardson, Eugene	Springfield	African American, Latino, mixed race	English	Requested no OHA presence
8	Eastern Oregon Health Equity Alliance/Euvalcree [a Regional Health Equity Coalition, (RHEC)]	Hermiston	Latino, Guatemalan indigenous	K'iche Mam Spanish	Set up/clean up, answer questions, help facilitate if needed, etc.

#	Lead organization or person	Location	Population(s)	Language(s)	Role of OHA
9	Mid-Columbia Health Equity Advocates [a Regional Health Equity Coalition, (RHEC)]	The Dalles	Latino	Spanish	Provide intro, help facilitate, answer questions
10	Oregon Health Equity Alliance [a Regional Health Equity Coalition, (RHEC)]	Portland	People of color	English	Help if needed, listen if not
11	Eugene/Springfield NAACP	Springfield	African American, Latino, mixed race	English	Requested no OHA presence
12	Oregon Health Equity Alliance [a Regional Health Equity Coalition, (RHEC)]	Portland	African immigrant	Swahili English	Requested no OHA presence
13	Eastern Oregon Health Equity Alliance/ Euvalcree [a Regional Health Equity Coalition, (RHEC)]	Ontario	Latino, Somali, Arabic speaking	Arabic Somali	Set up and clean up, answer questions, help facilitate if needed, etc.
14	Natives of One Wind Indigenous Alliance (NOWIA) Unete, Center for Farm Worker Advocacy	Medford	People with disabilities	English	Set up and clean up, answer questions, help facilitate and provided visuals
15	NOWIA Unete, Center for Farm Worker Advocacy	Phoenix	Latino, migrant, Farmworkers	English Spanish	Provide intro, took notes and answer questions
16	Eugene/Springfield NAACP	Springfield	African American, Latino, mixed race	English	Requested no OHA presence
17	Mid-Columbia Health Equity Advocates [a regional health equity coalition, (RHEC)]	Hood River	LGBTQIA2S+	English	Provide intro, help facilitate, answer questions
18	Mid-Columbia Health Equity Advocates [a regional health equity coalition, (RHEC)]	Celilo	Native American	English	Provide intro, help facilitate, answer questions

#	Lead organization or person	Location	Population(s)	Language(s)	Role of OHA
19	COFA Alliance National Network (CANN) and Marshallese Oregon Community Association	Salem	Compacts of Free Association (COFA): the Republic of the Marshall Islands	Marshallese	Provide intro, answer questions, help facilitate and took notes with the help of interpreter from their community.
20	Mid-Columbia Health Equity Advocates [a regional health equity coalition, (RHEC)]	Hood River	Community Health Workers	English	Provide intro, help facilitate, answer questions
21	Linn Benton Health Equity Alliance [a regional health equity coalition, (RHEC)]	Corvallis	Latino, African American, Arabic speaking	Arabic English Spanish	Set up and clean up, answer questions, help facilitate if needed, etc.
22	Asian Health and Service Center	Portland	Asian	Cantonese	Set up and clean up, answer questions, help facilitate if needed, etc.
23	Asian Health and Service Center	Portland	Asian	Vietnamese	Set up and clean up, answer questions, help facilitate if needed, etc.
24	Asian Health and Service Center	Beaverton	Asian	Korean	Set up and clean up, answer questions, help facilitate if needed, etc.

Appendix B

Community engagement event questions

Questions were intentionally developed, went through plain language review, reviewed by community members, translated, back-translated, and reviewed for plain language again after translation. The following questions were asked at each event.

English

1. What types of services help you, your family and your community to have better health?
2. What can OHA do to have a positive impact on your health, your family's health, and your communities' health?
3. What negative things affect your health, your family's health, and your communities' health? What can OHA do to help change these?
4. What are some situations that might affect your health, your family's health, and your communities' health in the next five to 10 years?
5. Which organizations or communities should OHA work with to improve your health, your family's health, and your communities' health?

Spanish

1. ¿Qué servicios ayudan a mejorar la salud de usted, su familia y su comunidad?
2. ¿Qué puede hacer OHA para tener un impacto positivo en la salud de usted, su familia y su comunidad?
3. ¿Qué cosas negativas afectan la salud de usted, su familia y su comunidad? ¿Y qué podemos hacer para cambiar esto?
4. ¿Cuáles podrían ser algunas situaciones que pueden afectar la salud de usted, su familia y su comunidad en los próximos 5 a 10 años?
5. ¿Con que agencias es necesario que se asocie OHA, para mejorar la salud de usted, su familia y su comunidad?

Appendix C

Facilitation guide

Spanish and English Facilitators Instructions Guide: This guide was created to help facilitators know how to lead community forums and present the objectives of community engagements effectively to collect feedback from unrepresented Oregon communities.

Why OHA needs public comments:

Introduction:

The Oregon Health Authority's strategic plan will determine where OHA will focus its time and resources over the next five to 10 years.

Our strategic plan will focus on transforming health and health care over the next five to 10 years, so OHA is achieving better health outcomes, making health care more affordable, and improving the quality of care. This strategic plan will help us guide what our priorities are in the long term, so it is important to think “big picture” about where OHA wants to go in terms of health in our state. Before OHA makes these decisions, OHA wants to learn from you about what you consider important to you and your communities.

OHA's Office of Equity and Inclusion (OEI) and the Community Partner Outreach Program (CPOP) have partnered to work on this project. Therefore, OHA is creating a statewide plan to engage and hear from communities across Oregon, especially for those who have historically not been involved as often.

- Good strategic planning occurs when OHA is fully informed of communities' concerns and needs, and about what is happening in communities.

Expectations for facilitators

Preferences:

- Discussions in people's native languages rather than using interpreters is preferred.
- Community groups should be facilitated under the guidelines of Popular Education. (Resource: <https://multco.us/file/16372/download>)
- Keep track of comments.

- Note-taking vs. audio recording (considerations for each method):
 - » Note-taking is recommended if:
 - Participants do not feel comfortable with audio recording.
 - The meeting space cannot facilitate a high-quality audio recording.
 - » Audio recording – (OHA prefers this method)
 - Ability to fully and accurately transcribe the discussion.
 - It allows for the discussion to flow naturally.
 - Facilitators and participants are always engaged

Before the events:

List of items to bring to events:

- Easel
- Markers
- Chart paper (write the definitions, questions, strengths and areas for improvement of this event)
- Notepads and pens and pencils
- Name tags
- Audio recorders (at least one per group)
- Media consents
- Confidentiality agreements

During the event:

- Either record or take notes of the discussion.
- Provide background information about what the purpose of the event is and why OHA is asking for input (for input on the OHA strategic plan).
- Ask the group the key questions provided by OHA, or similar questions so people can share their ideas and input.

After the event:

- Turn in any notes taken during the event and audio to OHA. If you need to follow up with someone after the event is over, please contact [Monica Juarez](mailto:MONICA.JUAREZ@oha.oregon.gov) MONICA.JUAREZ@oha.oregon.gov or Allison Varga, ALLISON.VARGA@oha.oregon.gov
- Once notes and recordings are transcribed and translated, they will be sent to the facilitators to review accuracy. OHA will send back a basic “what OHA heard” summary after all notes are compiled to facilitators.

Plan for the community event: Guide for participants:

Define what is the Oregon Health Authority (OHA) and its main purpose:

1. Define social determinants of health and make a connection to the strategic plan.
2. What is a strategic plan and why does OHA need your help to create one?
3. What is OHA’s role and needs from you?
4. Five key questions (modifiable based on community needs)
5. What will OHA do with the information you provide to us?
6. Follow up plan
7. Strengths and areas for improvement for the event

Details, script and how to lead conversations:

1. Does anyone know what OHA is? And what is the role of the agency?

OHA isn’t just OHP — it has more to do with health and wellness in general in Oregon.

The Oregon Health Authority (OHA) is the state agency responsible for making sure people in Oregon are as healthy as possible. OHA includes most of the state’s health care programs, including [Public Health](#) and the Oregon Health Plan.

In other words, because OHA works for the people of Oregon, OHA is interested in meeting people’s needs.

Now, let’s talk about the Social Determinants of Health.

2. Does anyone know what is the definition of social determinants of health (SDOH)? Or what are some ideas?

The social determinants of health (SDOH) are the conditions in which people are born, live, work and age. They are shaped by the distribution of money, power and resources at global, national and local levels. SDOH account for approximately 60 percent of people's health and are largely responsible for health inequities. These factors have an impact on both an individual's physical environment and health behaviors. To achieve health equity, where everyone has a fair and just opportunity to be as healthy as possible, it is essential to address the social determinants of health. It could include factors like transportation, housing, racism, and education, and really, the list is almost endless.

Wellness is a more holistic approach that includes our environment, so to achieve our best health. Our mental, emotional and physical health needs to be in balance.

The Connection to Social Determinants

3. What is a five- to 10-year strategic plan and what is the goal of having a strategic plan?

OHA is preparing to decide where OHA focuses time and money over the next five to 10 years. OHA's Strategic Plan will help guide what priorities are in the long term, so it is important to think “big picture” about where to go in terms of health for ourselves and our communities. Before OHA makes these decisions, OHA wants to hear from you about what is important to you and your communities.

Effective strategic planning will occur when OHA is fully informed of the current concerns, needs, and realities in our communities.

4. What does OHA need from you (the community)?

As an agency dedicated to serving people, OHA needs to hear and learn from all the people OHA strives to serve, especially those OHA hasn't done a good job of serving in the past.

OHA is interested in knowing your thoughts, ideas, and opinions on what OHA could do to support and help improve the health of people in Oregon. It is important to make sure we're hearing and including all voices and views that represent all of Oregon's diverse communities – and are responsive to your community's needs.

OHA is responding to community feedback that asked for increased community influence when OHA makes decisions. OHA especially wants to make sure we are truly listening to historically underrepresented communities.

5. What will OHA be doing with the information once OHA receives it?

Each suggestion OHA hears will be carefully reviewed and considered for our Strategic Plan, and for other OHA efforts. Even if OHA is not able to immediately act on all of what OHA hears from communities, your ideas will help us know whom to partner with to improve the health of Oregonians. OHA is working on ways to keep you in the loop about how your feedback will be included, and OHA is committed to truly listening to you and your communities and being honest and open about how OHA does that.

Your input will be considered by OHA's leaders as they develop the agency's plan. OHA will share the final plan with you, so you can see how your input helped shape it.

6. Five key questions

These are the questions OHA wants to hear from you about for our strategic plan.

Plain language English and Spanish questions to ask for the community engagement events summer of 2019.

English:

Health for you, your family, and your community!

For reference, use the Social Determinants of Health visual guide for each question, to help expand the ideas of the participants.

1. What types of services help you, your family and your community to have better health?
2. What can OHA do to have a positive impact on your health, your family's health, and your communities' health?
3. What negative things affect your health, your family's health, and your communities' health? What can OHA do to help change these?
4. What are some situations that might affect your health, your family's health, and your communities' health in the next five to 10 years?
5. Which organizations or communities should OHA work with to improve your health, your family's health, and your communities' health?

Spanish:

¡La salud de usted, su familia y su comunidad!

Usando la guía visual de los determinantes sociales de salud en cada pregunta, para ayudar a expandir las ideas de las personas presentes.

1. ¿Qué servicios ayudan a mejorar la salud de usted, su familia y su comunidad?
2. ¿Qué puede hacer OHA para tener un impacto positivo en la salud de usted, su familia y su comunidad?
3. ¿Qué cosas negativas afectan la salud de usted, su familia y su comunidad? ¿Y qué podemos hacer para cambiar esto?
4. ¿Cuáles podrían ser algunas situaciones que pueden afectar la salud de usted, su familia y su comunidad en los próximos 5 a 10 años?
5. ¿Con que agencias es necesario que se asocie OHA, para mejorar la salud de usted, su familia y su comunidad?

7. Follow-up plan:

OHA will gather your comments and suggestions and send them to OHA leadership. They will read what you have to say and use comments like yours from all across Oregon to help create the Oregon Health Authority's Strategic Plan. If you would like to read this plan once it is completed, please contact Allison Varga, ALLISON.VARGA@state.or.us

Strengths and areas for improvement for the event:

- What did you like about this event?
- What would you improve?

Thank you! ¡Gracias!

Appendix D

Staff observations

The following are observations written by staff who attended the events and kept as an ongoing record of lessons learned. Staff often verbally debriefed and shared these observations following each event. Note there are no observations available for all events or from all staff who attended each event. Some communities requested there be no government or OHA presence.

Location: Woodburn

Populations: Latino

Date: June 25, 2019

Participants: 23

What went well and general observations:

- Lots of enthusiasm for the event; participants were promoting it on their own time.
- Good discussion about questions.
- More than double the expected attendance! (10 vs. 23)
- Participants would like there to be another larger event in Woodburn; go more in-depth with questions and try to create solutions as a community in partnership with OHA.
- People felt comfortable expressing challenging issues and opinions.
- Enough time built in for people to arrive late; important to expect that people won't arrive exactly on time from work.
- Everyone who attended spoke at least once.

Areas for improvement:

- Need childcare and a place for kids to be during the event.
- Need child-friendly activities and materials available.
- Need to include children in the headcount for food.
- “What is OHA” flyer did not work for people — lots of confusion.
- Very difficult to explain what OHA is or why it is important that OHA is hearing from people.

- Modify Question 4: add “what will the consequences be if things stay the same as they are now?” (community suggestion for clarity)
- Needed more food, drinks, and space; more than double expected attendance.
- More staff available to deal with unexpected situations (running out of food, etc.).
- Make sure the address is correct when sending out invitations.
- Not enough incentive cards. Needed to mail two, and one person left before they could get theirs.
- Consider having a multi-generational listening session where children can be with their family members during the discussion. Strongly recommend having a youth voice in the process.

Location: Hood River

Lead Organization: Mid-Columbia Health Equity Coalition (MCHEA), a Regional Health Equity Coalition (RHEC)

Populations: Latino

Date: Aug. 8, 2019

Participants: 12

What went well and general observations:

- Enthusiastic and engaged group, felt more like a group of friends having a conversation than a meeting.
- Good diversity of people in the community — a mix of ages, professions, and length of time in the valley.
- People were aware the audio recorders were there — not necessarily uncomfortable. However, there were multiple times that people stopped the discussion to interact with the recorder directly (“did you catch that?”, etc.).
- Participants wanted OHA staff to take part in the discussion and show OHA is equal and not just there to “observe.”

Areas for improvement:

- Better time of year — in the middle of harvest so everyone is working.
- Different parts of the valley so that OHA is meeting people where they are most comfortable and most accessible (Odell, Parkdale, etc.), especially since there are more Latinos outside of Hood River than in town.
- More advertising for bigger events. Participants think there is a lot of interest in the community for things like this, but there is a lack of awareness.

- Don't get there too early. A couple of The Next Door, Inc. (TNDI) staff members were anxious that no one had shown up to our event because staff was waiting around. Half an hour was plenty of time to help set up.

Cultural observations:

This was the first community engagement event and there was no visual aid for support. Additionally, questions were difficult to understand and therefore staff revised questions for clarity.

- This was the first community engagement event and there was no a visual aid for support. Additionally, questions were difficult to understand and therefore staff revised questions for clarity.
- Participants are part of a strong Latino advocates group.
- Participants felt comfortable sharing their thoughts and ideas.
- Participants have many more ideas for doing more community engagement and creating forums for families to know about OHP.

Location: Newport

Populations: Guatemalan community

Date: Aug. 11, 2019

Participants: 35

What worked well for this community engagement event?

- Good food and tamales
- The leaders and organizers
- Mam interpretation

What are some suggestions, lessons learned or areas for improvement in the future?

- There wasn't an opportunity to translate from Spanish to Mam. There also wasn't a Mam notetaker because Mam is a spoken and not written language.

Cultural observations:

- Families from Guatemala are considered new immigrants in Newport. They are mostly applying for asylum, so there are a lot of questions about status and benefits.
- Halfway through the meeting, OHA learned four adults spoke different Guatemalan dialects and were not understanding the conversation.

Location: Hermiston

Lead Organization: Euvalcree/Eastern Oregon Health Equity Alliance (EOHEA), a Regional Health Equity Coalition (RHEC)

Populations: Latino and Guatamalan

Date: Aug. 17, 2019

Participants: 12

What worked well for this community engagement event?

- Conversation was very rich. People gave good, honest feedback. The small group was ideal for a more dialogue-oriented conversation rather than simply answering questions.
- Euvalcree did a wonderful job with logistical preparation. Food, materials, etc.
- Participants were thoughtful and engaged despite it being a small group.
- Food was good but had tons of leftovers.
- Having sticky notes helped people get their thoughts in order.
- People liked the questions OHA was asking.
- Catering person was so enthusiastic about the event she showed up and participated despite not speaking Spanish!
- Participants got more outspoken as time went on — the first questions only had a few responses, while later ones had more.

What are some suggestions, lessons learned or areas for improvement in the future?

- Location: Good Shepherd hospital's location is kind of inconvenient. The event would have done better closer to the center of town. The conference rooms are also hard to find and not an intuitive entrance to the hospital.
- Date and time: Hermiston is a farming community and during the late summer months, many Latino families work on weekends or use that time to attend social functions. A better time to do this would be spring or right after harvest in October or November.
- OHA can simplify for next time and have OEI work directly with partners rather than have CPOP involved. Seemed to be too many layers of communication.
- Venue was confusing and not welcoming even though Good Shepard donated the space, hosting at a hospital isn't a good idea, especially after business hours.
- People had to enter through the Emergency Room doors, which was very intimidating.

- After more staff arrived, people could enter closer to the room. However, people had to know where to go to get there, which was confusing. (It was not the usual entrance and it wasn't clear that the other doors were open once it got darker).
- Hospitals in general are intimidating and stressful. This isn't a community where people usually go to hospitals for meetings regularly (for some communities it might be okay, but not for this one).
- Both a wedding and a quinceañera were happening at the same time as the meeting so most people were at one or both other events.
- The room was hard to set up and staff eventually needed to call tech support because staff couldn't figure it out.
- Needed to do more outreach (radio, hand out flyers, etc.).
- Sticky notes might not be the best for all audiences. Participants were very highly educated so might be more inclined to write vs. speak than other groups.
- Need to tweak the facilitation guide so people don't feel like they need to read the document word for word. It felt too formal when the facilitator was reading from the "script."
- Incentives for participants and facilitators were not clear, especially since there were a lot of Euvalcree staff members there to help out.
- OHA staff should be attending events outside the metro perimeter. It felt a bit frustrating that there was no interest from people who didn't have experience doing outreach in Eastern Oregon to attend this event.

Location: The Dalles

Lead Organization: Mid-Columbia Health Equity Advocates (MCHEA), a Regional Health Equity Coalition (RHEC)

Populations: Latino

Date: Aug. 20, 2019

Participants: 15

What worked well for this community engagement event?

- Participants indicated they felt heard.
- Participants liked the questions asked.
- Participants liked the Dinamica (ice-breaker activity) in the beginning.
- The discussion was good.
- Participants indicated this is the first time this kind of engagement has happened, and it felt helpful and not too tense.
- It felt like a safe place for participants.
- The facilitators were great.

- Participants said they liked getting meeting reminders over text messages.
- People expressed that they felt very comfortable in the meeting.
- People shared very openly about their experiences.
- Food was good.

What are some suggestions, lessons learned or areas for improvement in the future?

- Participants said they wanted reminders about meetings a week in advance.
- Participants indicated the announcement about the meeting could improve.
- People said they want to have a follow-up meeting about this and bring information back about the changes made.
- Better containers for taking food with them.
- More clear signs for people who haven't been to that room before.
- Holding events during harvest is always hard.

Location: Ontario

Lead Organization: Euvalcree/ Eastern Oregon Health Equity Alliance (EOHEA), a Regional Health Equity Coalition (RHEC)

Populations: Latino, Somali, and Arabic speaking community

Date: Aug. 24, 2019

Participants: 22

Logistics:

Great meeting location, time and time frame. Supplies and materials could have been coordinated a little better. I brought a box of miscellaneous supplies and they came in handy —scissors, duct tape, markers, etc.

Culturally specific needs: excellent food and language needs were met. Possibly more signage could have helped since there was another event happening at the same time. One community member reported they got confused and couldn't find the event, so they left.

What worked well for this community engagement event?

- Community Partner Outreach Program (CPOP) staff.
- Time frame.
- Location.
- Food.
- Multi-media.

- Comforting environment.
- Food was delicious! It felt very inviting.
- There were quite a few “youth council” members present which was great and provided some challenges. Some youth participants didn’t feel comfortable responding in Spanish so some side conversations in English needed to be redirected. Some Spanish-only speakers were visibly uncomfortable with this but once they were re-integrated that seemed to dissipate. The people who understand both (not necessarily speaking both) ended up having a bi-lingual conversation that was really great but also had the potential to exclude some people. Something to keep in mind for next time is that a lot of younger people don’t feel comfortable expressing themselves in Spanish even though they understand what is being said.
- A lot of attendees were repeats from the meeting last year—good to see so many familiar faces! Starting to feel like I am getting to know the community.
- Strong interest in follow up and wanting to stay involved — people want OHA to have a presence in the community.

What are some suggestions, lessons learned or areas for improvement in the future?

- Supplies on hand.
- Signage guiding people to an event.
- Have a separate “youth group” so younger people can express themselves in “Spanglish” without worrying about being out of place with the adults. There were some really important perspectives, especially around the future that there was some hesitation around sharing in the large group.
- More clear signs about where to go, especially if multiple events are going on.
- Higher-level OHA person should attend next time. It is good to be able to keep the meeting more casual. However, some people were not feeling prioritized.
- More consistent interactions with OHA are needed. The last engagement was almost a year ago.
- Recorders didn’t really work very well. The tables were too close together and people were speaking softly to avoid having the room get too loud. Especially with having written sticky notes, OHA might not have any useful recordings from the meeting.
- There was another event going on in the same building at the same time (Anglo community auction or fundraiser?) which was confusing. People were accidentally going in the wrong door. Could hear music and announcements from another event even with the door closed which was disruptive at times, but not enough to stop the meeting.

Location: Medford

Lead Organization: Unete

Populations: Parent and advocates for children with disabilities

Date: Aug. 26, 2019

Participants: 19

What worked well for this community engagement event?

- Excellent facilitating.
- People from different sectors were represented in this meeting.
- People felt comfortable and happy.

What are some suggestions, lessons learned or areas for improvement in the future?

- Communities want more meetings; this is proof OHA needs them.
- Participants want a report copy showing how their input was included.
- Participants wanted representation from law enforcement.
- Need bigger visual aids (bigger pictures).
- Participants want to have an email on the next steps.

Cultural observations:

- Families and advocates felt trusting enough to share their thoughts openly without hesitation.
- An interpreter was translating simultaneously to a family member, and the family member was able to share her comments; thanks for the facilitation of the interpreter present.
- Family members were motivated to be there and have OHA presence in the room.
- Participants are very strong advocates and truly looking for more coordination and support from state, county and city to better serve their children.

Location: Phoenix
Lead Organization: Unete
Populations: Migrant Latino school parents
Date: Aug. 26, 2019
Participants: 20

What worked well for this community engagement event?

- The time the meeting was scheduled.
- Childcare provided.
- A local event and close to people (usually these types of meetings are held in Medford).
- It was in a location people trust, at a school where community members are familiar.
- The facilitators.
- The information provided.
- Participants indicated they feel trust and safe to share their comments.
- Food (next time they want something healthier, pizza is not healthy).

What are some suggestions, lessons learned or areas for improvement in the future?

- Participants want transportation to attend these types of events.
- The room was too hot.

Cultural observations:

- Most participants were the family members of school children.
- Participants felt comfortable.

Location: Celilo Village

Lead Organization: Mid-Columbia Health Equity Advocates (MCHEA), a Regional Health Equity Coalition (RHEC)

Populations: Native American

Date: Aug. 30, 2019

Participants: 22

What went well and general observations:

- Very engaged group, strongly wanting to discuss issues and what is happening in their communities.
- Food was good and there was a lot of it. Remember Canton Wok for next time.
- People liked the room setup, food and childcare — felt like it flowed well.
- Quite a few community leaders there. It was clear these were admired people with whom the community felt comfortable.
- Able to experience a community problem for ourselves. Staff had to wait for the train to go by before staff could leave.
- Situations are extremely complicated, and people are often looking for resources, understanding or solutions immediately because they needed it, ideally several years ago.
- Lots of “doorknob” comments — things people thought of last minute as they were about to leave. Indicates the need for more conversations.
- Everyone was very friendly and welcoming but could feel the isolation and precariousness. The fact that people still came out to talk about these issues after so many years of frustration and broken promises speak to the participants resilience and work ethic.
- Got to learn more about the connections with some more isolated, rural or frontier parts of the region — in a lot of ways they are more connected to Dufur and Biggs than The Dalles (which they are not happy about).

Areas for improvement:

- More outreach — people didn’t feel that event was as well publicized in the village as it should have been.
- More door-to-door to make sure people know who aren’t well connected.
- Someone from Tribal Affairs or OHA leadership should have been there.
- Lots of people from Washington or with stronger connections to Washington than Oregon felt left out of the discussion and like they should not be participating. They would like to balance this out by having a Washington-specific discussion, or even some sort of joint meeting because the issues they are experiencing do not stop just because state lines do.

- There was a miscommunication about the event location. About half the participants went to the preschool and waited almost an hour before making their way over to the longhouse to find out if it was the correct location.
- Tables and seating arrangement needs to be rethought — the original table space was OK for a small initial group of participants. However, once more people started to show up more tables were added in a way that made it difficult for newcomers to participate in the whole group discussion.
- Need to bring resources to these types of events — the needs are so great, even having the ability to do navigation or referrals would start to make a difference. Physical help (coats, etc.) would also be appreciated. Be responsive to the community. This will help build trust and relationships.
- Remember the “month cycle” — payday is usually the first of the month, and this event was on August 30

Location: Salem

Lead Organization: Oregon Marshallese Community Association

Populations: Marshallese Community

Date: Aug. 30, 2019

Participants: 16

What worked well for this community engagement event?

- Demos on how to make fresh juices.
- Small sandwiches and salads.
- Childcare providers.
- Very small groups (more intimate).

What are some suggestions, lessons learned or areas for improvement in the future?

- Large room with sink to wash the vegetables.
- More presentations on health topics:
 - » Tells more details on the health benefit on vegetables.
- OHA needs transportation because many families didn't have a car and OHA staff had to drive people to and from the event today.

Cultural observations:

- This specific group of Marshallese community members was very gentle with the way they approach. They don't come forward and ask many questions. They said, "We are very polite and don't remind. We sometimes don't know how to articulate our ideas."
- They are very close with each other and their cultural community.
- They expressed not having access to health knowledge (maybe need health education classes?).
- They expressed it is important to do something with the information they shared.
- They want the consistency of engagement.
- This was the first time this group had a meeting with the state where the state comes to their community this way. The people were very friendly and accepting.

Location: Corvallis

Lead Organization: Linn Benton Health Equity Alliance (LBHEA), a Regional Health Equity Coalition (RHEC)

Populations: Latino and African American

Date: Sept. 10, 2019

Participants: 20

What worked well:

- Having food at the meeting.
- Having an interpreter on hand if needed.
- Pre-prepping facilitators and event leads.
- Providing background on who OHA is and what the social determinants of health are.
- Breaking into groups based on preferred language and having people discuss in their preferred language versus having interpreters.
- Recording the audio of the event versus the distraction of taking notes or losing the participation of a person to take notes.
- Having OHA leadership attend. This demonstrates the importance of community voice to the agency, as well as leadership hearing community input and needs first-hand to inform future efforts.

Areas for improvement:

- More time for outreach to the community. OHA didn't have the representation from Arabic speaking community that OHA was hoping for.
- Arabic sign-in sheet was incorrectly translated via Shared Services.
- Hold an event at a site where there's sufficient free parking.
- Have an event in the evening or on the weekends to accommodate more people's schedules.
- Have one facilitator, it works better than two or more.
- Need to be better prepared to explain what CCOs are in plain language.

Location: Portland**Lead Organization: Asian Health and Services Center (AHSC)****Populations: Chinese (Cantonese)****Date: Sept. 11, 2019****Participants: 15****What went well and general observations:**

- Super enthusiastic and engaged group! Very lively conversation.
- Participants expressed to the facilitators that they would like to see a repeat of this meeting with more participants — they meet regularly with a larger group and would like those people to have an opportunity to participate as well.
- Good to have the OHA flyer translated ahead of time — people liked having the reference during the meeting, even though they didn't want to hold onto it after they were done.
- Good to have elders' perspective — only had one younger couple who just moved from Hong Kong, the rest were seniors.
- Transportation was important — regular transport back to the senior housing was arranged in conjunction with the regular senior meals program at AHSC.
- Facilitators did a great job — there was a lot to keep track of and they managed to keep the conversation on track despite the relative chaos.

Areas for improvement:

- Group didn't like that I was there without understanding what they were saying — facilitators started questions in just Cantonese, then switched to interpreting when someone said they felt uncomfortable with me “just sitting there” — so I started taking notes on the interpretation.
- Conversation style is that a lot of people are talking at once — not sure staff was able to capture the full conversation in English, but it seems participants and facilitators understood what was going on.

- Plan better for media consent and explain why OHA wants to take photos — people weren't happy to sign something they couldn't read.
- More lead time in the future — facilitators were excited about the opportunity but also felt somewhat caught off guard about the timeline speed.

Location: Portland

Lead Organization: Asian Health and Services Center (AHSC)

Populations: Vietnamese

Date: Sept. 12, 2019

Participants: 11

What worked well:

- Providing background on who OHA is and our role.
- Taking the lead from the community event point person to be in more of an observation role as OHA staff.
- Sticking to the agenda as requested by the community lead, Cang.

Areas for improvement:

- Would be great to have been able to send bi-lingual and bi-cultural staff who could speak Vietnamese to this event.
- Need materials about what the social determinants of health are in the top 14 languages, and specifically for this event, in Vietnamese.
- Needed more time to plan this event, but still got a lot of helpful input. OHA could have had a huge turnout of participants if OHA had more time.
- More time before the event to discuss with facilitators what they prefer or need from OHA staff during the event in more detail.

Location: Beaverton

Lead Organization: Asian Health and Services Center (AHSC)

Populations: Korean

Date: Sept. 12, 2019

Participants: 9

What went well and general observations:

- Facilitators (Maria) were the ones who had been wanting AHSC to host from the beginning, so it was nice to come full circle, and to know that the facilitators wanted to do this and didn't feel pressured.
- Modified format so the majority of time was available for people to write their comments instead of speaking to them. This was identified by facilitators as the most culturally appropriate format.

- A couple of participants came early so they could share their comments without having to single themselves out.
- Participants were not comfortable with photos, recording, etc. All but one declined the consent form outright.
- Participants asked some really difficult and interesting questions about the budget process that I wasn't sure how to answer, but people were understanding and curious about learning more.
- Facilitators anticipated a quiet group, so they grouped the discussion questions all together at the end of the writing period to avoid pressuring people to speak to all questions.
- Facilitators pulled me aside before the meeting to give a “cultural briefing” as part of the run-of-show discussion which was very helpful in understanding some dynamics and modifying my behavior and strategies as a result.
- Facilitators thought the “What is OHA” document translation was really good quality.

Areas for improvement:

- More accessible room — had to have a key to get into the bathroom.
- Re-think sign-in sheets and make sure they are translated. Participants strongly preferred to be anonymous on sign-in sheets (initials only) and several identified that they don't want to be contacted, which is pretty different from the other populations, where that is uncommon.
- A lot of confusion about OHA vs. OHP — even one facilitator kept having to catch herself from saying OHP when she meant to say OHA.
- Have snacks available? Only tea was available which worked fine, but small snacks might have been nice to have as well.

You can get this document in other languages, large print, braille or a format you prefer. Contact Danielle Droppers at 971-219-7445 or email danielle.a.droppers@oha.oregon.gov. We accept all relay calls or you can dial 711.

OPERATING PROCESSES

SUPPORTING PROCESSES

Healthier Together Oregon

2020–2024 State Health Improvement Plan

September 2020

Acknowledgments

- OHA acknowledges there are institutional, systemic and structural barriers that perpetuate inequity and have silenced the voices of communities over time.
- OHA is committed to partnerships, co-creation and co-ownership of solutions with communities disproportionately affected by health issues so they can actively participate in planning, implementing and evaluating efforts to address health issues.
- OHA recognizes community-engaged health improvement is a long-term and dynamic process.
- OHA is striving to engage with communities through deliberate, structured, emerging and best practice processes.
- OHA is striving to make engagement with public health effective for communities, especially those communities that experience institutional, systemic and structural barriers.

Healthier Together Oregon reflects the contributions of countless people in our state. The Oregon Health Authority (OHA) is humbled by the hundreds of partners who shared their lived and learned experiences by serving on the PartnerSHIP and related subcommittees. OHA is grateful to members of the public who responded to surveys, raised their voices at meetings and shared thoughts via email. Finally, OHA recognizes the colleagues across the agency who responded to requests for help.

Dear Colleagues,

OHA is launching Healthier Together Oregon (HTO), the 2020–2024 [State Health Improvement Plan \(SHIP\)](#), during extraordinary times. COVID-19 has shined a bright spotlight on the impacts of [structural racism](#) in our society. Black, Indigenous, people of color and American Indian/Alaska Native people ([BIPOC-AI/AN](#)) have lived with the effects of discrimination, bias and oppression for centuries. Their disproportionate experience of disease and death during the COVID-19 pandemic is a painful reminder of institutional failure to address historical and current racism.

The impacts of COVID-19 will be with us for years to come. HTO is a timely tool to ensure an equitable recovery from this pandemic. HTO is a tool for individuals, organizations and communities working to achieve [health equity](#). The priorities and strategies contained within this plan get at the root causes of poor health. While the 2015-2019 SHIP addressed traditional public health concerns such as tobacco and immunizations, the priorities of HTO go further upstream to address the [social determinants of health](#) and inequities. These root causes of health include racism, economic stability, and access to quality education, healthy foods, and transportation options. These root causes of health are complex and require the focused attention of a number of sectors, including public health.

HTO is the outcome of a modernized public health system. OHA took a very different approach for developing this plan. Through relationship with trusted community partners, OHA put community in the driver's seat. The PartnerSHIP, a community-based steering committee, made the final decisions for the priorities and strategies. Those decisions were informed by public health data and qualitative stories from affected communities to add critical information to our data gaps.

While these have been trying times, the pandemic is highlighting the resilience of communities. Oregon is making national news for our efforts to undo systemic racism. OHA is committed to building off these strengths and to the strategies identified in this plan. While improving health is the work of OHA, it is not our work alone, and we look to strengthened partnerships with others who are already doing this work.

Respectfully,

Pat Allen
Director
Oregon Health Authority

Lillian Shirley
Public Health Director
Oregon Health Authority Public Health Division

Executive summary

Healthier Together Oregon (HTO) is the 2020–2024 [State Health Improvement Plan](#) for Oregon. HTO is a five-year plan that identifies our state's health priorities. It includes strategies that will lead to better health outcomes.

HTO is a tool for anyone wanting to improve their community's health. It is meant to inform community health improvement plans and state agency policies, partnerships and investments.

HTO's primary goal is to achieve [health equity](#). Its vision reads:

Oregon will be a place where health and well-being are achieved across the lifespan for people of all races, ethnicities, disabilities, genders, sexual orientations, socioeconomic status, nationalities and geographic locations.

Grounded in data and community voice, HTO identifies strategies to advance [equity](#) for these [priority populations](#): Black, Indigenous, people of color, and American Indian/Alaska Native people ([BIPOC-AI/AN](#)), people with low incomes, people who identify as LGBTQ+, people with disabilities, and people living in rural areas.

In early 2019, the PartnerSHIP identified five priorities:

- [Institutional bias](#)
- [Adversity, trauma and toxic stress](#)
- [Behavioral health](#)
- [Economic drivers of health](#), and
- [Access to equitable preventive health care](#)

COVID-19 has worsened the trend in each of these priorities. The pandemic has exacerbated unjust racial disparities. HTO is a tool for our state to recover from COVID-19.

More than 100 partners gathered to identify goals, strategies and measures for the priorities. They identified 62 strategies and wove them across an [implementation](#)

[framework](#) that speaks to the interconnectedness of our health priorities. HTO will report key indicators and short-term measures each year to help track and communicate our progress.

HTO is a key initiative of the Oregon Health Authority (OHA). However, OHA is not alone in this effort. We are all responsible for health. HTO welcomes new and existing partners to collectively and equitably improve Oregonians' health.

For more information about HTO and how to get involved, visit healthiertogetherOregon.org.

Introduction and background

Healthier Together Oregon (HTO) is Oregon's 2020–2024 [State Health Improvement Plan](#). The five-year plan identifies our state's health priorities with strategies that will lead to improved outcomes. HTO's primary goal is to achieve [health equity](#). It is a tool for anyone wanting to improve their community's health. HTO informs community health improvement plans and state agency policies, partnerships and investments.

HTO identifies strategies to advance [health equity](#) in five priorities:

- [Institutional bias](#)
- [Adversity, trauma and toxic stress](#)
- [Behavioral health](#)
- [Economic drivers of health](#), and
- [Access to equitable preventive health care](#).

In early 2019, HTO named these priorities because they:

- Are upstream determinants of health
- Affect some communities more than others, and
- Have a major effect on our health.

The COVID-19 pandemic has worsened the short- and long-term trajectory for health in vulnerable communities. The pandemic highlights the unjust racial disparities in each of these five priority areas. It also underscores the need for connecting, collaborating and taking care of one another. HTO is a timely tool for our state's recovery from COVID-19.

The Oregon Health Authority Public Health Division (OHA-PHD) provides backbone support and coordination for HTO. As part of requirements for [public health accreditation](#), OHA-PHD completes a State Health Assessment and [State Health Improvement Plan](#) every five years.

Healthier Together Oregon

Vision

Oregon will be a place where health and well-being are achieved across the lifespan for people of all races, ethnicities, disabilities, genders, sexual orientations, socioeconomic status, nationalities and geographic locations.

Values

- Equity and social justice
- Empowerment
- Strengths-based
- Authentic community input
- Accountability

HTO is a key initiative of the Oregon Health Authority (OHA). However, OHA is not alone in this effort. We are all responsible for health. HTO welcomes new and existing partners to collectively and equitably improve Oregonians' health.

According to America's Health Rankings, Oregon's state of health is declining. Since 2012, our national ranking in health has dropped, and we currently sit 22nd of 50 states for overall health.

Figure 1: Oregon health ranking among U.S. states

OHA has developed a clearer understanding of how the agency can affect change to the social determinants of health and [equity](#). Quality education, safe homes and neighborhoods, living wage jobs, and access to health care are examples of social determinants of health. They are the primary drivers for people's good or poor health. Significantly changing people's access to these social determinants can increase all Oregonians' health and especially for the [priority populations](#) in this plan. These groups face major barriers because of systemic racism, oppression, discrimination and bias. These barriers create great health disparities across Oregon, especially in rural areas. More must be done to reduce the health inequities affected communities experience. Improving the health of everyone in Oregon is complex and takes time. No single sector or agency can do this work on its own.

Priority populations **for HTO:**

- Black, Indigenous, people of color, and American Indian/ Alaska Native people (BIPOC-AI/AN)
- People with low incomes
- People who identify as lesbian, gay, bisexual, transgender, queer and questioning (LGBTQ+)
- People with disabilities
- People living in rural areas of the state

OHA's investment in modernizing the public health system will bolster Healthier Together Oregon. Developing and carrying out the SHIP is a core public health function of policy and planning. It will rely heavily on public health's other foundational capabilities. The 2020–2024 SHIP planning process is a primary example of a modernized approach to our work.

Health equity framework

HTO's primary goal is to achieve [health equity](#) for [BIPOC-AI/AN](#), people with low incomes, people with disabilities, people who identify as LGBTQ+ and people who live in rural areas. These groups experience major health inequities because Oregon and U.S. systems that determine access to these resources are designed for people who typically identify as white, straight, English-speaking, able-bodied, cis-gendered and male. People at the intersection of more than one affected community, e.g., people who are Black and transgender, find these systems especially oppressive and hard to navigate. People in power positions may not be intentionally racist. However, our systems are racist because of implicit and [institutional bias](#).

Health equity:

Oregon will have established a health system that creates health equity when all people can reach their full health potential and well-being and are not disadvantaged by their race, ethnicity, language, disability, gender, gender identity, sexual orientation, social class or the intersections among these communities or identities or other socially determined circumstances.

Achieving health equity requires the ongoing collaboration of all regions and sectors of the state, including tribal governments, to address:

- The equitable distribution or redistributing of resources and power, and
- Recognizing, reconciling and rectifying historical and contemporary injustices.

(Oregon Health Policy Board – Health Equity Committee, 2019)

In Figure 2, the fence illustrates [structural racism](#) and discrimination. The fence was erected centuries ago, with our national and state history of genocide, slavery and exclusion. Although these overtly racist actions are now a part of our past, this fence is still standing today as seen in countless examples of modern-day racism and discrimination. As shown in the “Equality” section, the fence continues to make it impossible for some of us to see the field, which contains the social determinants of health. The social determinants of health are the primary drivers of our health. To ensure everyone’s access to the field, we can take two steps. The first is “Equity,” or equitable action, which redirects resources to oppressed communities as seen in the shifting of boxes to uplift the most marginalized.

Figure 2: [Equality](#), [equity](#) and liberation

Second, we need to tear down the fence, or dismantle the [institutional bias](#) that has created these barriers in the first place, leading to liberation for us all. It is only when we remove the fence that everyone can see the field or access the social determinants of health.

Figure 3 illustrates how the upstream social and institutional inequities (the fence) lead to impacts on our living conditions (ability to see the field), and downstream behaviors and health outcomes. The strategies of HTO will enact change in partnerships, policy and investment to affect improvement in inequities and living conditions. Enacting equitable change in the social determinants of health will lead to improvements in downstream health outcomes. These improvements will come from increased access to the personal and community resources needed for health as well as changes in health behaviors used to cope with the trauma and toxic stress of oppression, discrimination and inequities. These changes will ultimately lead to flattening disparities in disease, injury and death, and to improving life for us all.

The COVID-19 pandemic has reminded us of the urgent need to end race and other identity-based inequities. While the road to liberation is our ultimate destination, undoing and redressing centuries of oppressive systems will take time. The equitable strategies and actions provided in this plan provide immediate solutions for the next five years to ensure an equitable recovery from COVID-19.

Figure 3: Public health framework for reducing health inequities

(Reproduced with permission from the Bay Area Regional Health Inequities Initiative)

Process of development

The Oregon Health Authority designed HTO as a community-driven strategic planning process for improving health, using the [Mobilizing for Action through Planning and Partnerships \(MAPP\) framework](#). The MAPP framework informed the 2018 [State Health Assessment \(SHA\)](#) and the planning process for HTO. The PartnerSHIP, a community-based steering committee, formed in 2018 to provide guidance, direction and decision-making for Healthier Together Oregon. The PartnerSHIP is made up of agencies serving [priority populations](#) and potential implementers of the plan. The PartnerSHIP set the vision and values, and identified the five priorities for the plan based on State Health Assessment and Indicators data and extensive community feedback.

In fall 2019, subcommittees formed with people from more than 68 organizations representing public health, health care, social services, education, academia, transportation, housing and the business community. Subcommittees were charged with identifying goals, key indicators, strategies, short-term measures and activities to inform implementation.

Finally, a core group of staff within OHA-PHD provided overall coordination support to the planning process, staffing the PartnerSHIP and subcommittee meetings and ensuring alignment with the MAPP process.

HTO included significant community input. Two community feedback processes occurred during development: the [first identified priorities](#) and the second informed strategy development. Community-based organizations that work in and with affected communities received funding to amplify their voices. OHA also disseminated surveys in English and Spanish through partners around the state.

Implementation and accountability

HTO aims to affect change in complicated, persistent social problems. The Oregon Health Authority, under direction of the PartnerSHIP, will provide overall coordination for this work. However, HTO will only make progress in partnership with others. This plan aims to be a tool for agencies and organizations to work together, align efforts, and share what's working and not working to improve health.

The PartnerSHIP will provide oversight and direction throughout HTO's implementation. As the advisory body to OHA-PHD, the [Public Health Advisory Board](#) will also support implementing the strategies and advising on funding to implement HTO.

HTO will broadly share annual progress reports. This will provide:

- A summary of actions undertaken in strategy implementation
- Updates to measures and indicators, and
- Revisions to annual work plans.

OHA hopes this annual reporting will provide effective and meaningful accountability for partners engaged in this work. OHA also hopes this reporting will ensure transparency for affected communities to whom this work is ultimately accountable.

Priorities

The PartnerSHIP identified five priorities for HTO:

- Institutional bias
- Adversity, trauma and toxic stress
- Behavioral health
- Economic drivers of health, and
- Access to equitable preventive health care.

These priorities, which affect many people with often serious consequences, are upstream determinants of downstream health outcomes and affect some communities more than others. Subcommittees identified the goals for each of the priority areas.

Institutional bias

Institutional bias is defined as the tendency for resources, policies and practices of institutions to operate in ways that advantage white, heterosexual, cis-gendered, able-bodied individuals and communities. This discrimination results in adverse health consequences for underrepresented groups, such as people of color, people with low incomes, people with disabilities and people who identify as LGBTQ+.

Goals:

- Expose and reduce the impact of institutional biases that influence health, by
- Identifying and championing work across systems, structures, policies, communities and generations, so that
- All people in Oregon are empowered and have the opportunity to participate fully in decisions to achieve optimal health.

Adversity, trauma and toxic stress

Conditions that cause adversity, trauma and toxic stress include abuse and neglect, living in poverty, incarceration, family separation, and exposure to racism and discrimination. These events have a lifelong effect on health and are correlated with things such as substance use, suicide and heart disease.

Goals:

- Prevent trauma, toxic stress and adversity through data-driven policy, system and environmental change.
- Increase resilience by promoting safe, connected and strengths-based individuals, families, caregivers and communities.
- Mitigate trauma by promoting [trauma-informed systems and services](#) that assure safety and equitable access to services and avoid re-traumatization.

Behavioral health

Behavioral health includes mental health and substance use. Oregon has one of the highest rates of mental illness in the country. Mental distress can lead to lower quality of life, unemployment and increased rates of suicide. Use of alcohol, opioids, methamphetamine and other substances have a significant impact on many families. Although described as behavioral health, these strategies are specific to mental health. While all of the priorities impact substance use, strategies related to alcohol and drug use can be found in the [Alcohol and Drug Policy Commission Strategic Plan](#).

Goals:

- Reduce stigma and increase community awareness that behavioral health issues are common and widely experienced.
- Increase individual, community and systemic resilience for behavioral health through a coordinated system of prevention, treatment and recovery.

Economic drivers of health, such as housing, transportation and living wage jobs

Economic drivers of health include housing, living wage, food security and transportation. Poverty is a strong predictor of poor health. Many people who have a job are struggling to get out of poverty due to the high cost of living or raising a family. People living in poverty experience higher rates of premature death, houselessness, mental distress and food insecurity.

Goals:

- Increase the percentage of Oregonians earning a livable wage by raising public awareness of the correlation between health and economic sufficiency and advocating for [evidence-based](#) policies to improve economic sufficiency.

-
- Ensure that all people in Oregon live, work and play in a safe and healthy environment and have equitable access to stable, safe, [affordable housing](#), transportation and other essential infrastructure so that they may live a healthy resilient life.
 - Increase equitable access to culturally appropriate nutritious food regardless of social or structural barriers by addressing the underlying issues in food availability.

Access to equitable preventive health care

Despite an increasing number of people with health insurance, many are challenged to get to a health care provider or see a dentist due to provider shortages, transportation barriers or health care costs. They also may not feel comfortable with their provider due to language or other cultural difference.

Goals:

- Increase equitable access to and uptake of community-based [preventive services](#).
- Increase equitable access to and uptake of clinical [preventive services](#).
- Implement systemic and cross-collaborative changes to clinical and community-based health-related service delivery to improve quality, [equity](#), efficiency and effectiveness of services and intervention.

Implementation framework

To achieve the goals, subcommittees identified 62 strategies across the five priorities. Subcommittees identified strategies within three levels of intervention:

- Individual health-related factors
- Daily living conditions, and
- The broader social, economic, political, environmental and cultural context that affects our health.

To determine strategies, subcommittees aligned with other state agency strategic plans, community health improvement plans, other [state health improvement plans](#), and technical guidance documents provided by partners and subject matter experts.

The implementation framework weaves the strategies across eight areas. This implementation framework attends to the intersectionality of the priority areas, reduces redundancies in strategies, and provides a framework for communicating about the plan to a broad audience. This framework will also help make progress on strategies while partnering with others. Annually updated implementation plans will provide more details about the supporting activities, short-term measures and accountable partners.

The eight implementation areas are:

- [Equity and justice](#)
- [Healthy communities](#)
- [Healthy families](#)
- [Healthy youth](#)
- [Behavioral health](#)
- [Housing and food](#)
- [Workforce development](#), and
- [Technology and innovation](#).

Figure 4: Implementation framework

Figure 4 illustrates how the strategies, indicators, implementation areas and priorities drive toward the HTO vision of health equity.

Equity and justice

Oregon has a unique history of [white supremacy](#). This history and current institutional racism has created disadvantages for communities that are real, unjust and unacceptable. COVID-19 has shined a spotlight on the impacts of systemic racism; COVID-19 has disproportionately affected [BIPOC-AI/AN](#) communities in infections and death. All people in Oregon feel the stress of COVID-19, but non-white communities have the most burden. To increase health and reduce inequities for affected communities, institutions need to change how they do business. We will only reach our [equity](#) goals through co-creation and power-sharing with communities.

Racial [equity](#) needs to be built into everything state agencies do. Policies and initiatives need to rectify past injustices while honoring the resilience of communities of color. Until historically marginalized populations share decision-making authority in our state, decisions will favor the dominant culture, reinforcing [institutional bias](#) and contributing to disparities. Funding needs to reflect greater investment in communities that have been affected. [BIPOC-AI/AN](#)-led committees should be funded to inform state agency plans, policies and budgets. Agencies need to collect and analyze data to understand the unique needs of communities. The following strategies have been identified to advance [equity](#) and justice:

- Declare institutional racism as a public health crisis.
- Ensure [state health indicators](#) are reported by race and ethnicity, disability, gender, age, sexual orientation, socioeconomic status, nationality and geographic location.
- Require state agencies to commit to racial [equity](#) for [BIPOC-AI/AN](#) in planning, policy, agency performance metrics and investment.
- Ensure state agencies engage [priority populations](#) to co-create investments, policies, projects and agency initiatives.
- Build upon and create [BIPOC-AI/AN](#)-led community solutions for education, criminal justice, housing, social services, public health and health care to address systemic [bias](#) and inequities.
- Require all [public-facing](#) state agencies and state contractors to implement trauma-informed policy and procedure.
- Reduce legal and system barriers for immigrant and refugee communities, including people without documentation.
- Ensure accountability for implementation of anti-racist and anti-oppression policies and cross-system initiatives.

Healthy communities

Everyone wants to live in a healthy and vibrant community where people can thrive, feel safe and supported, and have opportunities for financial well-being. Healthy neighborhoods include access to healthy foods, [active transportation](#) options, safe housing, and safe places to be physically active, play and relax. Resilient communities increase social connection, especially for those affected by gentrification and in preparation for a changing climate. We will feel the economic impacts of COVID-19 for many years. We need to address barriers to higher education, finding jobs and earning a livable wage in order to create more equitable employment opportunities.

Built environment

- Center [BIPOC-AI/AN](#) communities in decision-making about land use planning and zoning in an effort to create safer, more accessible, affordable and healthy [neighborhoods](#).
- Provide safe, accessible and high-quality community gathering places, such as parks and community buildings.
- Increase affordable access to high-speed internet in rural Oregon.
- Co-locate [support services](#) for low-income people and families at or near health clinics.

Community resilience

- Enhance community resilience through promotion of art and cultural events for [priority populations](#).
- Build [climate resilience](#) among [priority populations](#).
- Expand culturally responsive community-based mentoring, especially intergenerational programs and peer-delivered services.
- Expand programs that address loneliness and increase social connection in older adults.
- Develop community awareness of toxic stress, its impact on health and the importance of [protective factors](#).

Economic wellness

- Invest in [workforce development and higher education](#) opportunities for [priority populations](#).
- Strengthen economic development, employment and small business growth in underserved communities.
- Enhance [financial literacy](#) and access to financial supports among [priority populations](#).

Healthy families

Raising a family is challenging. Families with young children know the childcare system is in crisis; high-quality day care and preschool experiences are unaffordable and often unavailable. There are other families who take on caregiving for older adults or for family members with disabilities, often without pay or adequate support. Despite Oregon's aspirational approach to health care delivery that includes coordinated care organizations, many families still face barriers in accessing [preventive services](#).

We need to ease families' challenges to ensure they are supported and thriving. These strategies seek to build on family strengths, help families feel closer and more supported, and build skills in communication. These strategies also build on the gains in our health care system and seek to expand access to immunizations, harm reduction services and routine screenings provided in and outside of a doctor's office. Patients need linguistically appropriate information about their health conditions, medications and self-management of chronic conditions.

Supporting families

- Expand [evidence-based](#) and culturally responsive early childhood, home visiting programs.
- Ensure access to and resources for affordable, high-quality, culturally responsive childcare and caregiving.
- Build family resiliency through trainings and other interventions.
- Use [health care payment reforms](#) to support the social needs of patients.

Access to health care

- Increase patient [health literacy](#).
- Expand reach of preventive health services through [evidence-based](#) and [promising practices](#).
- Improve access to sexual and reproductive health services.
- Ensure access to culturally responsive prenatal and postnatal care for low-income and undocumented people.
- Support Medicare enrollment for older adults through expansion of the Senior Health Insurance Benefits Assistance (SHIBA) program.

Healthy youth

Educational outcomes are a critical determinant of health. Young people need opportunities for healthy upbringing and supportive learning environments. Existing structures, especially in schools, offer inconsistent access to these opportunities; COVID-19 has reinforced these school-based inequities. Addressing [structural racism](#) in the school system will have a positive impact on student well-being. Black students are twice as likely to be disciplined for disruptive behavior and more than twice as likely to be suspended or expelled. When used in place of suspension or other traditional discipline approaches, [restorative justice](#) and mediation can improve outcomes and graduation rates.

Health-related issues are a major cause of student absenteeism. Increasing school-based health services helps. Health-related screenings include asking students about their social needs, disabilities, mental health and chronic diseases. By identifying and addressing these barriers to learning, schools can help youth get to and stay in school every day. Oregon also has some of the most comprehensive health education laws in the country. These laws provide important information about preventing pregnancy, healthy relationships, preventing sexual violence, and preventing suicide. School districts need support to implement these standards.

Racial equity

- End school-related disparities for [BIPOC-AI/AN](#) children and youth through teacher training, data monitoring and follow-up with teachers, administrators and schools.
- Increase use of mediation and [restorative justice](#) in schools to address conflict, bullying and racial harassment.

Health care and education

- Ensure all school districts are implementing K-12 comprehensive health education according to state standards.
- Expand recommended [preventive health-related screenings](#) in schools.
- Ensure schools offer access to oral health care such as dental sealants and fluoride varnish.
- Provide culturally and linguistically responsive, trauma-informed, multi-tiered behavioral health services and supports to all children and families.

Housing and food

Safe and [affordable housing](#) is a primary concern for many people in Oregon. One in two Oregon households pays more than one-third of its income toward rent, and one in three pays more than half of its income toward rent. Despite legal protections from evictions, many households have less financial stability and, thus, less secure housing and food. [BIPOC-AI/AN](#) communities, in particular, face a greater housing-cost burden than other communities in Oregon. Home ownership is a major contributor to the wealth disparity seen between white families and [BIPOC-AI/AN](#) families. Convenient ability to safely walk, bike and use public transportation near home is also important for health.

Many households also struggle to afford healthy food. Oregon has one of the highest rates of food insecurity in the country, especially in families with children. Some people, especially in rural areas of the state, must travel long distances to get to a grocery store. Other people live in [neighborhoods](#) with a lot of fast-food and convenience stores, but few places to buy fresh fruits and vegetables. A [resilient food system](#) provides enough food to meet current needs while maintaining healthy systems that ensure food for future generations.

Housing and transportation

- Increase [affordable housing](#) with close access to active and public transportation options.
- Increase home ownership among [BIPOC-AI/AN](#) through existing and innovative programs.
- Require [Housing First](#) principles be adopted in all housing programs.

Food security

- Increase access to affordable, healthy and culturally appropriate foods for [BIPOC-AI/AN](#) and low-income communities.
- Maximize investments and collaboration for food-related interventions.
- Build a [resilient food system](#) that provides access to healthy, affordable and culturally appropriate food for all communities.

Behavioral health

Behavioral health describes the relationship between behaviors, physical health and overall well-being. Behavioral health includes, but is not limited to, mental health, substance use and gambling. Oregon has the highest prevalence of mental health conditions among youth and adults in the nation. Access to behavioral health care is a challenge. Communities describe many barriers related to provider shortages, long wait times, transportation challenges, and difficulty finding a culturally and linguistically responsive provider. The following strategies are specific to mental health. For strategies specific to alcohol and substance use, please see the [Alcohol and Drug Policy Commission 2020-2025 Statewide Strategic Plan](#).

- Conduct behavioral health system assessments at state, tribal and local levels.
- Enable community-based organizations to destigmatize behavioral health by providing culturally responsive information to people they serve.
- Implement public awareness campaigns to reduce the stigma of seeking behavioral health services.
- Create state agency partnerships in education, criminal justice, housing, social services, public health and health care to improve behavioral health outcomes among [BIPOC-AI/AN](#).
- Improve integration between behavioral health and other types of care.
- Incentivize culturally responsive behavioral health treatments rooted in [evidence-based](#) and [promising practices](#).
- Reduce systemic barriers to receiving behavioral health services, such as transportation, language and assessment.
- Use [health care payment reform](#) to ensure [comprehensive behavioral health services](#) are reimbursed.
- Continue to strengthen enforcement of the [Mental Health Parity and Addictions Law](#).
- Increase resources for culturally responsive suicide prevention programs for communities most at risk.

Workforce development

Oregon's demographics are changing. Our population is growing and becoming more diverse. To meet this growing [diversity](#), we need a workforce that provides culturally and linguistically responsive services. This is especially important for those providing health and human services. Policies, standards and trainings can help to create a workforce better equipped to meet the needs of our community, especially for [BIPOC-AI/AN](#) communities. [Traditional health workers](#) are also a valuable part of Oregon's health and social support system. They often come from the community they serve and provide a critical link to services.

- Expand [human resource practices](#) that promote [equity](#).
- Implement standards for workforce development that address [bias](#) and improve delivery of equitable, trauma-informed, and culturally and linguistically responsive services.
- Support [alternative health care delivery models](#) in rural areas.
- Create a behavioral health workforce that is culturally and linguistically reflective of the communities served.
- Ensure [cultural responsiveness](#) among health care providers through increased use of [traditional health workers](#) and trainings.
- Require all [public-facing](#) state agencies and state contractors receive training about trauma and toxic stress.
- Require sexual orientation and gender identity training for all health and social service providers.

Technology and innovation

Modernizing the health care system includes adoption of emerging technology. This includes use of electronic medical record technology, centralized referral systems that address social needs and expansion of [telehealth](#). [Telehealth](#) can be used to address barriers to health care, including transportation, provider capacity and access to specialty care. It has proven to be a critical tool in the response to COVID-19. Most health care providers use [electronic health record](#) systems; however, it is difficult for health care providers to share data with each other. [Electronic health record](#) reminders can also prompt providers to ask questions or order tests to prevent illness or diseases. Referral and information systems such as 211 exist to address social needs such as housing, food and childcare. However, a comprehensive referral system doesn't exist. Once a referral is made, it's also challenging to follow up to ensure the person received the service they needed.

- Expand use of telehealth, especially in rural areas and for behavioral health.
- Use [electronic health records](#) to promote delivery of preventive services.
- Improve exchange of [electronic health record](#) information and data sharing among providers.
- Support statewide [community information exchange](#) to facilitate referrals between health care and social services.

Key indicators

Key indicators have been identified to indicate progress across the five priority areas. Visit the data dashboard at healthiertogetheroregon.org for definitions, baseline data, analysis by race/ethnicity and other demographic data.

Priority area	Indicator and data source
Institutional bias	Disciplinary Action (Department of Education) Premature death/years of potential life lost (Center for Health Statistics)
Adversity, trauma and toxic stress	Adverse childhood experiences (National Survey of Children's Health) Chronic absenteeism (Department of Education) Concentrated disadvantage (American Community Survey)
Behavioral health	Unmet emotional or mental health care need among youth (Student Health Survey) Suicide rate (Oregon Vital Statistics) Adults with poor mental health in past month (Behavioral Risk Factor Surveillance Survey)
Economic drivers of health	Third-grade reading proficiency (Department of Education) Opportunity Index economy dimension (Opportunity Index) Childcare cost burden (OSU Oregon Child Care Market Price Study , and American Community Survey) Food insecurity (Map the meal gap) Housing cost burden among renters (American Community Survey)
Access to equitable preventive health care	Childhood immunizations (ALERT IIS) Colorectal cancer screening (Behavioral Risk Factor Surveillance Survey) Adults with a dental visit in past year (Behavioral Risk Factor Surveillance Survey)

Conclusion and next steps

HTO is an ambitious plan. While some of the identified strategies are already in progress, much of this work is new and innovative. Certainly, the long-term impacts of COVID-19 are difficult to predict and the related economic downturn may threaten some of these ideas. The good news is that many of these strategies can happen even in the absence of funding. An equitable future is within reach by working together, aligning our goals and measures, and co-creating with affected communities. The work ahead will require brave conversations, moments of discomfort and mistakes. It will also offer opportunities for new relationships, trust building and easy wins. We will use our gains to keep pushing toward improved health for everyone. As the state agency with primary responsibility for health, OHA is poised to offer backbone support for overall coordination. But we know we won't get this right unless others join us in this effort. We look forward to your partnership as we work together to eliminate the disparities that will lift us all to better health.

Appendix

Definitions

Active transportation means walking, biking and use of public transportation.

Affordable housing is housing (rent or mortgage) that costs equal to or less than 30% of the gross household income.

Alternative health care delivery model means allowing providers such as nurses, dentists and pharmacists to deliver services that doctors typically provide.

Bias means prejudice in favor of or against one thing, person or group compared with another, usually in a way considered to be unfair. Bias happens within individuals (e.g., implicit) or institutions. Institutional bias is defined as the tendency for resources, policies and practices of institutions to operate in ways which advantage white, heterosexual, cis-gendered, able-bodied individuals and communities.

BIPOC-AI/AN is an acronym that stands for Black people, Indigenous people, people of color and American Indian/Alaska Native people. It is used to emphasize the particular racism they and their communities in the United States experience. American Indians/Alaska Native people in Oregon are citizens of the nine federally recognized tribes in Oregon or from other tribal nations outside Oregon. The PartnerSHIP approved this term in consultation with the Northwest Portland Area Indian Health Board.

Climate resilience is the ability to cope with the stress and changes created by climate change.

A **community information exchange** is a centralized referral and information system, such as 211.

Comprehensive behavioral health services mean all services provided to someone being treated for a behavioral health issue, including outreach and care coordination.

Cultural responsiveness is the ability to learn from and relate respectfully with people of your own culture as well as those from other cultures.

Diversity is the appreciation and prioritization of different backgrounds, identities and experiences collectively and as individuals. It emphasizes the need for

representation of communities that are systemically underrepresented and under-resourced. (Oregon Governor’s definition)

An **electronic health record** is a software platform where your medical information is stored.

Equality is the state of being equal, especially in status, rights and opportunities

Equity is the effort to provide different levels of support based on an individual’s or group’s needs in order to achieve fairness in outcomes. Equity acknowledges that not all people, or all communities, are starting from the same place due to historic and current systems of oppression. Equity empowers communities most affected by systemic oppression and requires the redistribution of resources, power and opportunity to those communities. (Oregon Governor’s definition)

Evidence-based means a practice that is based in scientific evidence.

Financial literacy means ability to effectively manage one’s money.

Financial services include financial planning, tax services, paid family leave, debt management, savings and investment, and SSI/SSDI enrollment assistance.

Health care payment reform means changing the way health care is paid for to improve the quality of care a person receives.

Health equity: Oregon will have established a health system that creates **health equity** when all people can reach their full health potential and well-being and are not disadvantaged by their race, ethnicity, language, disability, gender, gender identity, sexual orientation, social class or the intersections among these communities or identities or other socially determined circumstances.

Achieving health equity requires the ongoing collaboration of all regions and sectors of the state, including tribal governments to address:

- The equitable distribution or redistributing of resources and power, and
- Recognizing, reconciling and rectifying historical and contemporary injustices.

(Oregon Health Policy Board – Health Equity Committee)

Health literacy is the degree to which individuals can access and understand health information needed to make decisions about their health.

Housing First is a recovery-oriented approach that quickly moves people from houselessness into independent and permanent housing and provides additional supports and services as needed.

Human resource practices include hiring, recruitment and retention.

Inclusion is a state of belonging when persons of different backgrounds, experiences and identities are valued, integrated and welcomed equitably as decision makers, collaborators and colleagues. Ultimately, inclusion is the environment that organizations create to allow these differences to thrive. (Oregon Governor's definition)

Intersectionality is normalization and legitimization of an array of dynamics – historical, cultural, institutional and interpersonal – that routinely advantage whites while producing cumulative and chronic adverse outcomes for people of color. (Miriam-Webster Dictionary)

The **Mental Health Parity Act (1996) and the Mental Health Parity and Addiction Equity Act (2008)** require that health plans and insurers offer mental health and substance use disorder benefits comparable to their coverage for general medical and surgical care.

Neighborhoods are the physical communities in which we live and that provide housing, transportation, childcare, education, employment opportunities, healthy foods and health care services.

Preventive health-related screenings include social determinants of health, disabilities, mental health, oral health, vision, hearing and other chronic conditions.

Preventive services are health care services that prevent illness or disease. They include vaccination, contraception, harm reduction, overdose prevention, screenings and chronic disease self-management programs.

Priority populations for the [State Health Improvement Plan](#) are BIPOC-AI/AN, people with low incomes, people who identify as LGBTQ+, people with disabilities and people living in rural areas.

Public-facing means an agency (OHA, OYA, ODE, DHS, etc.) provides a direct service to people.

Promising practice means a practice that reports positive outcomes but may not have yet been studied scientifically.

Protective factors include family resilience, social connections, social and cultural supports, parenting support, and social and emotional development in children.

Resilient food system means the ability to produce and access nutritious and culturally acceptable food in the face of disturbance and change.

Restorative justice repairs the harm done by conflict or crime by organizing a meeting for the victim, the offender and the wider community.

Social determinants of health are the conditions in which people are born, grow, live, work and age. They include factors such as socioeconomic status, education, neighborhood and physical environment, employment, and social support networks. They also include access to health care. (Kaiser Family Foundation)

State Health Improvement Plan (SHIP) is a five-year plan that identifies the state's health priorities with strategies to advance improvement and measures to monitor progress.

Structural racism is the normalization and legitimization of historical, cultural, institutional and interpersonal dynamics that routinely advantage whites while producing cumulative and chronic adverse outcomes for people of color.

Support services include housing and food assistance, health care, child care, and employment, education and financial supports.

Targeted universalism means setting universal goals pursued by targeted processes to achieve those goals.

Telehealth means using information and communication technologies, such as video calls, to provide health care services.

Traditional health workers is an umbrella term that refers to health care workers who are usually from the community they serve, and have knowledge of language and culture that other providers don't have. Includes health navigators, community health workers, peer specialists and doulas.

Trauma-informed approaches acknowledge the impact of trauma and promote a culture of safety, empowerment and healing.

Trauma-informed system and services ensure safety, consistency, transparency, peer support, collaboration, empowerment, choice and [cultural responsiveness](#).

White supremacy is the belief that white people are superior to those of all other races and should dominate society.

Workforce development and higher education includes job training, vocational programs, community college, universities and continuing education.

OHA Accessibility Conformance Report

WCAG Edition

(Based on VPAT® Version 2.4)

Name of Product/Version:

Oregon Electronic Vaccine Card / myelectronicvaccinecard.oregon.gov

Report Date:

April 22, 2022

Product Description:

From the FDD v3.0: “The Oregon Health Authority (OHA) intends to launch Digital Vaccine Record (DVR) Portal [title later changed to Oregon Electronic Vaccine Card] for COVID-19 vaccination, implementing the SMART Health Card framework. A Digital Vaccine Record will be an electronic vaccination record drawn from the data stored in the Oregon’s immunization registry (Alert IIS). The digital record will show the same information as a User’s paper Centers for Disease Control and Prevention (CDC) vaccination card: name, date of birth, vaccination dates, and type of vaccine received. The digital record will also include a Quick Response (QR) code that, when scanned by a SMART Health Card reader, will display to the reader the name, date of birth, vaccine dates, and vaccine type of the User. The QR code also confirms the vaccine record as an official record of the State of Oregon.”

The Oregon Electronic Vaccine Card site comprises the following elements:

1. Header (SS_S00)
2. Footer (SS-S01)

3. Maintenance Page (SS_S10)
4. Home Page & Vaccine Form (SS_S02 & SS_S03)
5. Received Page (SS_S04)
6. PIN Page (SS_S09)
7. QR Page (SS_S05)
8. Request Processing Page (SS_S06)
9. Email Thank You Page (SS_S07)
10. Link SMS (M01)
11. No Match SMS (M02)
12. Link Email (E01)
13. No Match Email (E02)
14. QR Code Email (E03) [This can also be reached via “Download Accessible PDF” button].
15. QR Code Template for DL Paper (E04)
16. FAQ Page (SS-S0x [sic]): <https://www.oregon.gov/oha/covid19/Pages/Electronic-Vaccine-Card-FAQ.aspx>
17. How To Video [on YouTube]: <https://www.youtube.com/watch?v=T5t-fzjH3ug>
18. Customer Voice Record Request Form: <https://gcv.microsoft.us/purq67eH4I>

Contact Information:

Prepared by Adam McBride-Smith (Independent Accessibility Consultant)

adam.mcbride-smith@dhsosha.state.or.us

503-812-5123

Notes:

The Oregon Electronic Vaccine Card site was found to be in conformance with WCAG 2.1 level AA at the time of launch.

Evaluation Methods Used:

Accessibility testing started before development with an initial testing phase conducted on the waverify app, <https://waverify.doh.wa.gov/>, which served as the model for Oregon's Digital Vaccine Record. This testing helped to identify some areas of concern and led to the inclusion of 114 accessibility user stories to Oregon's FDD (Functional Design Document).

Testing on Oregon's Digital Vaccine Record included automated testing. Initially, this testing was conducted with WAVE and Axe DevTools. Later in the SDLC, Site Improve was integrated into testing. Manual testing was also conducted continuously throughout development. Manual testing was conducted by Adam McBride-Smith (CPACC) and by two native assistive technology users: Flori Tello (JAWS and VoiceOver screen readers), and Katelyn Truax (Switch Control with Auto-Scan).

Testing for this report followed the [Deque WCAG Conformance Testing, Detailed Methodology](#) (Deque Way 3.2.2). Testing was conducted on the following Assistive Technologies:

- NVDA (Screen Reader)
- JAWS (Screen Reader)
- VoiceOver (Screen Reader)
- Apple Switch Control with Auto-Scan
- Able Net Blue 2 (Universal Switch)
- Keyboard Access
- Dragon Naturally Speaking (Text-to-Speech Software)
- ZoomText (Magnification Software)

The following browser/OS combinations were used during testing:

- Chrome on Windows 10
- Chrome on Windows 11
- Firefox on Windows 11
- Edge on Windows 11
- Chrome on macOS 10.13.6
- Safari on macOS 10.13.6
- Chrome on iPad OS 15.3.1

- Safari on iPad OS 15.3.1
- Chrome on Android 9
- Chrome on iPhone OS 15.2 (later updated to 15.4)

The following devices/screen specs were used during testing:

- Dell XPS 15 9510: 15.6 inches, 16:10 aspect ratio
- Lenovo ThinkPad T480: 14 inches, 16:9 aspect ratio
- MacBook Air 1.4: 13.3 inches, 16:10 aspect ratio
- iPad Pro (2nd Gen): 12.9 inches
- Samsung Galaxy S8: 5.8 inches
- iPhone SE: 4.7 inches

In addition, the following tools were used during testing:

- [Web Developer Extension for Chrome](#)
- [Web Developer Extension for Firefox](#)
- [Dylan Barrell's Bookmarklets](#)
- [Paul Adam Bookmarklets](#)
- [ANDI Bookmarklet](#)
- [WCAG 2.1 parsing error bookmarklet](#)
- [Colour Contrast Analyser](#)
- [PEAT](#)
- [W3C Markup Validation Service](#)
- [Nu Html Checker](#)
- [44 x 44 Pixel Bookmarklet](#)
- [Bookmarklet to make the text between 45 and 75 characters turn red](#)
- [Fount Bookmarklet](#)

Applicable Standards/Guidelines

This report covers the degree of conformance for the following accessibility standard/guidelines:

Standard/Guideline	Included In Report
Web Content Accessibility Guidelines 2.0	Level A (Yes) Level AA (Yes) Level AAA (Yes)
Web Content Accessibility Guidelines 2.1	Level A (Yes) Level AA (Yes) Level AAA (Yes)

Terms

The terms used in the Conformance Level information are defined as follows:

- **Supports:** The functionality of the product has at least one method that meets the criterion without known defects or meets with equivalent facilitation.
- **Partially Supports:** Some functionality of the product does not meet the criterion.
- **Does Not Support:** The majority of product functionality does not meet the criterion.
- **Not Applicable:** The criterion is not relevant to the product.
- **Not Evaluated:** The product has not been evaluated against the criterion. This can be used only in WCAG 2.0 Level AAA.

WCAG 2.1 Report

Note: When reporting on conformance with the WCAG 2.1 Success Criteria, they are scoped for full pages, complete processes, and accessibility-supported ways of using technology as documented in the [WCAG 2.0 Conformance Requirements](#).

Table 1: Success Criteria, Level A

Notes:

Criteria	Conformance Level	Remarks and Explanations
1.1.1 Non-text Content (Level A)	Supports	PDFs for direct download and email options are auto-tagged and remediated to meet the w3c's PDF Techniques for WCAG 2.0 criteria using pdfHTML by iText. The same method was applied to PDFs in English and in all translated languages except Arabic. The team determined there was a great deal of complexity involved in implementing Arabic script in addition to the RTL vs. LTR reading order in a tagged PDF. Estimated time to completion was 47 hours and there were concerns that the solution would not work and would negatively impact the production of remediated PDFs in other languages. The decision was made to offer an accommodation model (manual remediation) to Arabic-speakers who are screen reader users and a screen-reader-only text note was added to SS_S05 for these users, informing them of the process.
1.2.1 Audio-only and Video-only (Prerecorded) (Level A)	Not Applicable	There is no audio-only or video-only content.
1.2.2 Captions (Prerecorded) (Level A)	Supports	Captions are provided in YouTube for the “how to” video.
1.2.3 Audio Description or Media Alternative (Prerecorded) (Level A)	Supports	A transcript is provided in YouTube for the “how to” video.

Criteria	Conformance Level	Remarks and Explanations
1.3.1 Info and Relationships (Level A)	Supports	Information, structure, and relationships conveyed through presentation can be programmatically determined.
1.3.2 Meaningful Sequence (Level A)	Supports	The reading and navigation order is logical and intuitive.
1.3.3 Sensory Characteristics (Level A)	Supports	Instructions do not rely on shape, size, visual location, or sound.
1.4.1 Use of Color (Level A)	Supports	Color is not used as the sole method of conveying content or distinguishing visual elements. Color alone is not used to distinguish links from surrounding text (all links have underlines).
1.4.2 Audio Control (Level A)	Supports	The “how to” video on YouTube automatically plays and is over 3 seconds in length, but it has mechanisms to stop, mute, and adjust the volume.
2.1.1 Keyboard (Level A)	Supports	All page functionality is available using the keyboard.
2.1.2 No Keyboard Trap (Level A)	Supports	Keyboard focus is never locked or trapped at one particular page element.
2.1.4 Character Key Shortcuts (Level A 2.1 only)	Not Applicable	There are no character key shortcuts.
2.2.1 Timing Adjustable (Level A)	Supports	There are no maximum time limits for any of the processes on the site or associated pages.
2.2.2 Pause, Stop, Hide (Level A)	Not Applicable	There is no automatically moving, blinking, scrolling, or updating content.
2.3.1 Three Flashes or Below Threshold (Level A)	Supports	There is no flashing content.

Criteria	Conformance Level	Remarks and Explanations
2.4.1 Bypass Blocks (Level A)	Supports	A skip navigation link is provided in SS_S01 . In addition, a proper heading structure is used on all pages, and all pages on the main site also have a proper landmark structure.
2.4.2 Page Titled (Level A)	Partially Supports	Both the Form page and the Thank you page of the Record Research Request Form have the same title: <title>My Electronic Vaccine Card Record Research Request Form</title> See WCAG 2.1 - Failure of Success Criterion 2.4.2 due to the title of a Web page not identifying the contents / "Example 2: A site generated using templates includes the same title for each page on the site. So the title cannot be used to distinguish among the pages." The team determined that it was not possible in Customer Voice to add unique titles to pages and has referred the problem to Microsoft. This issue is tracked in User Story 123273.
2.4.3 Focus Order (Level A)	Supports	The navigation order of focusable elements is logical and intuitive.
2.4.4 Link Purpose (In Context) (Level A)	Supports	Link purpose is determinable from the link title itself.
2.5.1 Pointer Gestures (Level A 2.1 only)	Not Applicable	There are no multi-point or path-based gestures.
2.5.2 Pointer Cancellation (Level A 2.1 only)	Supports	Selector boxes open on down-event. This is true of the Month, Day, and Year boxes on SS_S03 , the Choose Here selector box on SS_S05 , and the State

Criteria	Conformance Level	Remarks and Explanations
		selector box (“Don’t have access to a printer” path) on SS_S05. However, this behavior described here is native combo box behavior. In addition, WCAG SC 2.5.2 notes: “In other interactions, the down-event may trigger a behaviour which can be reversed when the up-event concludes.” The behavior in question, the expansion of the combo box, can be reversed after the up-event concludes. Therefore, it was decided that the behavior described here supports this success criterion.
2.5.3 Label in Name (Level A 2.1 only)	Supports	All interface components that present text have accessible names that include the visible text.
2.5.4 Motion Actuation (Level A 2.1 only)	Not applicable	There is no functionality triggered by moving the device or by user movement.
3.1.1 Language of Page (Level A)	Supports	The lang attribute is contained in the <html> element. It defaults to en on the English version of the page, and resets appropriately when the page language is changed.
3.2.1 On Focus (Level A)	Supports	As components receive focus, they do not initiate a change of context or any other change that could disorient the user.
3.2.2 On Input (Level A)	Supports	On SS_S05, a small shift in focus occurs when an option is chosen from the “Choose Here” combo box. When the selection is made, focus shifts to a line of text inserted just below the selector box. This design decision was made to provide a better

Criteria	Conformance Level	Remarks and Explanations
		user experience for screen reader users. Testing demonstrated that these users might easily be unaware that new content was being inserted below the combo box – or that there were often multiple options to choose from. The complexity of the injected content, and doubts from the development team that an aria-alert region would function well in this environment, led us to implement this solution. According to the w3c, “Opening a new window, moving focus to a different component, going to a new page (including anything that would look to a user as if they had moved to a new page) or significantly re-arranging the content of a page are examples of changes of context.” Understanding SC 3.2.2 [emphasis added]. The shift in focus that occurs on this page is <i>not</i> to a different component (“a part of the content that is perceived by users as a single control for a distinct function” per the w3c). In addition, even at high levels of magnification (400%+) the two elements retain enough proximity (1rem/16px) for the shift in focus to be easy for a user to track visually.
3.3.1 Error Identification (Level A)	Supports	Form validation errors are efficient, intuitive, and accessible. Required fields are indicated both visually (with an asterisk) and using aria-required. When errors are detected, the form is re-displayed with an error summary and focus is forced to the

Criteria	Conformance Level	Remarks and Explanations
		error summary. The error summary is provided as a semantic list, in plain language, with links that allow users to jump to the relevant field. The errors are flagged inline through the use of color (red) and aria-invalid.
3.3.2 Labels or Instructions (Level A)	Supports	Text labels are provided for all inputs, and labels are linked programmatically to the appropriate inputs.
4.1.1 Parsing (Level A)	Supports	Significant validation/parsing errors are avoided.
4.1.2 Name, Role, Value (Level A)	Supports	Markup is used according to HTML specifications and ARIA is used to enhance accessibility when HTML is not sufficient.

Table 2: Success Criteria, Level AA

Criteria	Conformance Level	Remarks and Explanations
1.2.4 Captions (Live) (Level AA)	Not applicable	There is no live multimedia content.
1.2.5 Audio Description (Prerecorded) (Level AA)	Supports	There is no visual content presented in the video that is not also presented in the audio.
1.3.4 Orientation (Level AA 2.1 only)	Supports	Orientation of web content is not restricted to only portrait or landscape.
1.3.5 Identify Input Purpose (Level AA 2.1 only)	Not applicable	The form fields on SS_S03 and on SS_S05 (both the Email option and the Send me a Paper Copy option) do not have autocomplete values. Personas and user stories related to the site have always included pathways for users who are

Criteria	Conformance Level	Remarks and Explanations
		filling out the form for another person. According to the w3c's documentation on autocomplete techniques, "For the autocomplete attribute: This technique should only be used when asking for data about the user who is filling the form in, not for other people." https://www.w3.org/WAI/WCAG21/Techniques/html/H98) Therefore, it was decided not to include autocomplete attributes for these fields.
1.4.3 Contrast (Minimum) (Level AA)	Supports	Text and images of text have a contrast ratio of at least 4.5:1. Large text (18pt / 24px or 14pt / 18.66px and bold) has a contrast ratio of at least 3:1.
1.4.4 Resize text (Level AA)	Supports	The page is readable and functional when the page is zoomed to 200%.
1.4.5 Images of Text (Level AA)	Supports	The only example of an image used as text is the Oregon Health Authority logo, which is covered as an exception to this criterion.
1.4.10 Reflow (Level AA 2.1 only)	Supports	No loss of content or functionality occurs, and horizontal scrolling is avoided when content is presented at a width of 320 pixels / 400% zoom.
1.4.11 Non-text Contrast (Level AA 2.1 only)	Supports	A contrast ratio of at least 3:1 is present for differentiating interface components (such as buttons, form controls, and focus indicators/outlines) in all their various states (focus, hover, active, etc.)
1.4.12 Text Spacing (Level AA 2.1 only)	Supports	No loss of content or functionality occurs when the user adapts paragraph spacing to 2 times the font size, text line height/spacing to 1.5 times the font size, word spacing to

Criteria	Conformance Level	Remarks and Explanations
		.16 times the font size, and letter spacing to .12 times the font size.
1.4.13 Content on Hover or Focus (Level AA 2.1 only)	Not Applicable	No additional content is presented on hover or keyboard focus.
2.4.5 Multiple Ways (Level AA)	Not Applicable	The main site represents a process and is not subject to this success criterion. The same is true of the request form. The FAQ page is a single page and therefore is also not subject to this criterion (other pages linked to the FAQ page are out-of-scope).
2.4.6 Headings and Labels (Level AA)	Supports	Page headings and labels for form and interactive controls are informative and unique.
2.4.7 Focus Visible (Level AA)	Supports	Keyboard focus is visually apparent.
3.1.2 Language of Parts (Level AA)	Supports	The language of page content that is in a different language from the main content is identified using the lang attribute. This applies only to the language options available in the nav bar on SS_S01 and in the dropdown options under the “More” combo box.
3.2.3 Consistent Navigation (Level AA)	Supports	Navigation links that are repeated on web pages do not change order when navigating through the site.
3.2.4 Consistent Identification (Level AA)	Supports	Elements that have the same functionality across multiple web pages are consistently identified.
3.3.3 Error Suggestion (Level AA)	Supports	If an input error is automatically detected and suggestions for correction are known, then the suggestions are provided to the user.

Criteria	Conformance Level	Remarks and Explanations
3.3.4 Error Prevention (Legal, Financial, Data) (Level AA)	Not Applicable	Changes to legal, financial, or personal data are not a part of the site's user flow. (The site allows a user to request and receive data but not to change it).
4.1.3 Status Messages (Level AA 2.1 only)	Supports	When important status messages are presented, either focus is set to the message, or the message is otherwise read to screen reader users.

Table 3: Success Criteria, Level AAA

Notes: Level AAA criteria can be understood as best practice recommendations. **None of these criteria are required for Section 508 compliance.** When following a AAA criterion would negatively affect user experience in a significant way, it is advisable to overlook that criterion. According to the w3c: "It is not recommended that Level AAA conformance be required as a general policy for entire sites because it is not possible to satisfy all Level AAA Success Criteria for some content." (<https://www.w3.org/TR/WCAG21/#conformance>)

Criteria	Conformance Level	Remarks and Explanations
1.2.6 Sign Language (Prerecorded) (Level AAA)	Does Not Support	No sign language interpretation is present in how-to video. Like all level AAA criteria this is a best practice recommendation – however, it is not required for Section 508 compliance.
1.2.7 Extended Audio Description (Prerecorded) (Level AAA)	Not Applicable	There is no relevant visual content in the "how to" video that is not also described in the audio narration.
1.2.8 Media Alternative (Prerecorded) (Level AAA)	Supports	A transcript is provided.
1.2.9 Audio-only (Live) (Level AAA)	Not Applicable	There is no audio-only content.

Criteria	Conformance Level	Remarks and Explanations
1.3.6 Identify Purpose (Level AAA 2.1 only)	Not Evaluated	This product has not been tested for conformance to this criterion.
1.4.6 Contrast (Enhanced) (Level AAA)	Does Not Support	Some areas do not meet the standard of 7:1 color contrast. Meeting this standard would require more significant design changes than are practical at this time. Like all level AAA criteria this is a best practice recommendation – however, it is not required for Section 508 compliance.
1.4.7 Low or No Background Audio (Level AAA)	Not Evaluated	Background music in the “how-to” video is significantly quieter than the narration. We will test post-launch to ensure that music is at least four times (20 decibels) quieter than the narration. Like all level AAA criteria this is a best practice recommendation – however, it is not required for Section 508 compliance.
1.4.8 Visual Presentation (Level AAA)	Partially Supports	Blocks of text are more than 80 characters wide. Adopting this criterion on SS_S02 would have a negative impact on UX because it would push form elements on SS_S03 “below the fold.” Furthermore, it is not required for Section 508 compliance, like all level AAA criteria.
1.4.9 Images of Text (No Exception) (Level AAA)	Supports	The only example of an image used as text is the Oregon Health Authority logo, which is covered as an exception to this criterion.
2.1.3 Keyboard (No Exception) (Level AAA)	Supports	All page functionality is available using the keyboard.

Criteria	Conformance Level	Remarks and Explanations
2.2.3 No Timing (Level AAA)	Supports	There are no maximum time limits for any of the processes on the site.
2.2.4 Interruptions (Level AAA)	Not Applicable	The site pages do not support author/server generated updates.
2.2.5 Re-authenticating (Level AAA)	Not Applicable	There is no inactivity time limit on any page.
2.2.6 Timeouts (Level AAA 2.1 only)	Not Applicable	There is no inactivity time limit on any page.
2.3.2 Three Flashes (Level AAA)	Not Applicable	There is no flashing content on any page.
2.3.3 Animation from Interactions (Level AAA 2.1 only)	Not Applicable	There is no animation or moving content triggered by user actions.
2.4.8 Location (Level AAA)	Does Not Support	No breadcrumb trail, site map, or other extra navigation aid is present. Like all level AAA criteria this is a best practice recommendation – however, it is not required for Section 508 compliance.
2.4.9 Link Purpose (Link Only) (Level AAA)	Supports	Link purpose is determinable from the link title itself.
2.4.10 Section Headings (Level AAA)	Not Evaluated	This product has not been tested for conformance to this criterion.
2.5.5 Target Size (Level AAA 2.1 only)	Partially Supports	All target areas are a minimum of 44px by 44px, except the options in the combo boxes on pages SS_S03 and SS_S05 which are approximately 38px by 38px. The size of combo box options was increased by zooming the text for the options. As this also created incongruity with surrounding font sizes, 38px by 38px was determined to be sufficient for these items following native switch user testing.

Criteria	Conformance Level	Remarks and Explanations
3.5.6 Concurrent Input Mechanisms (Level AAA 2.1 only)	Supports	Content does not restrict input to a specific modality, such as touch-only or keyboard-only.
3.1.3 Unusual Words (Level AAA)	Does Not Support	No dictionary, glossary, or footnote definitions are provided for any vocabulary items. Like all level AAA criteria this is a best practice recommendation – however, it is not required for Section 508 compliance.
3.1.4 Abbreviations (Level AAA)	Supports	The expanded form of abbreviations is provided at first use.
3.1.5 Reading Level (Level AAA)	Supports	This criterion was tested using the main text on the SS_S02 with proper nouns and titles removed. The text was fed into readabilityformulas.com . The consensus of the site's seven readability formulas was that this text is at an 8 th grade reading level. This meets the success criterion for reading level.
3.1.6 Pronunciation (Level AAA)	Does Not Support	Pronunciation guidance is not provided for words with common homonyms, like the word "record." Like all level AAA criteria this is a best practice recommendation – however, it is not required for Section 508 compliance.
3.2.5 Change on Request (Level AAA)	Not Evaluated	This product has not been tested for conformance to this criterion.
3.3.5 Help (Level AAA)	Partially Supports	More context-sensitive help could be provided, such as a clear statement of the input restraints for PIN number creation. Like all level AAA criteria this is a best practice recommendation – however, it is not required for Section 508 compliance.

Criteria	Conformance Level	Remarks and Explanations
3.3.6 Error Prevention (All) (Level AAA)	Does Not Support	There is no mechanism that allows users to review and confirm inputs before submission. Like all level AAA criteria this is a best practice recommendation – however, it is not required for Section 508 compliance.

**Oregon Health Authority
AUDIT RESPONSE REPORT**

1. ODHS and OHA: Statewide Single Audit Including Selected Financial Accounts and Federal Awards for the Year Ended June 30, 2023, audit #2024-14 (dated April 2024).

- Recommend department management update accounting and review procedures to ensure entries prepared to address issues originating in prior fiscal years do not incorrectly impact the current year financial statements.

The Office of Financial Services (OFS) is reviewing documentation from prior audits and direction from the Department of Administrative Services (DAS), Statewide Accounting and Reporting, to identify the most effective and efficient process going forward for refinancing prior year activity in the current fiscal year. As mentioned in the audit, the complexity of deferred revenue reimbursement, across multiple fiscal years, from Federal Emergency Management Administration (FEMA) during the pandemic increased the complexity of these accounting transactions. The office will write up a new process and train relevant staff the new methodology.

- Recommend department management ensure recipients of federal funds are appropriately identified as subrecipients or contractors and the corresponding disbursement of federal funds are appropriately reported as direct or passthrough expenditures. We further recommend department management comply with subrecipient monitoring requirements, develop and implement internal controls to ensure risk assessments are performed and documented for each subrecipient, and monitoring activities are completed and documented according to risk assessment results.

Behavioral Health Division (BHD) has implemented and strengthened controls substantially. The information presented below shows how BHD “implemented and strengthened controls to properly identify subrecipients or contractors” when federal funds are involved.

1. Workday Training created for using the BHD Federal Subrecipient Determination tools;
2. Once the tools were implemented in June 2025, we demonstrated how each contract is evaluated (5 questions);

3. The system-generated determination document must be printed and attached to all requests in CLM;
4. If Subrecipient is identified, the Grantee Self-Risk Assessment must be completed by the contractor;
5. The Monitoring Plan, also a system generated document resulting from the contractor's completion of the assessment, must be downloaded and attached to the CLM request;
6. The documentation of the completed Grantee Self-Risk Assessment and the Monitoring Plan is required for all CLM requests but only if the determination is Subrecipient;
7. The record for each completed determination, assessment, monitoring is recorded in Smartsheet and saved as back-up. Continued disagreements in the determination outcome (i.e. OHA says Contractor, SOS says Subrecipient) should not result in a finding because 2 CFR 200.331 specifically states, "No single factor or any combination of factors is necessarily determinative. The pass-through entity must use judgment in classifying each agreement as a subaward or a procurement contract." It's too subjective to say who is right and wrong. As long as we show compliance with Federal Regulations, by completing the steps referenced above along with the CA keeping a folder for each contract with the documents filed, should suffice.

- Recommend department management implement controls to ensure applicable expenditures are adequately tracked and reviewed for compliance with federal Earmarking requirements.

Oregon Health Authority (OHA) has already taken corrective actions to ensure controls are in place for tracking applicable expenditures in SFMA to ensure compliance with federal Earmarking requirements. The Office of Financial Services, OHA Budget Unit, and block grant planners meet at least once a month to review budgeted earmarked requirements and expenditures to ensure compliance. Block grant planners meet at least once a month with the crisis team and children and family team to review required earmark budgets and expenditures.

- Recommend management ensure compliance with federal program requirements by prioritizing the completion and documentation of hospital audits.

The Oregon Health Authority (the authority) agrees with this finding and has completed the work to reconstitute the required tools necessary to perform these audits. As of January 2024, the authority has sent cost statements to

the hospitals for review and response and is working to collect other reports required for completing the audits from actuaries and intermediaries. The authority will begin processing full audits starting April 2024 for outstanding Fiscal Year 2016 forward. The authority anticipates that the audits through Fiscal year 2020 will be completed by Dec. 31, 2024. The authority also affirms that the corrective action for finding 2021-17 has been implemented and resolved.

- Recommend department and authority management strengthen controls over review to ensure documentation supporting a provider's eligibility determination and revalidation is complete. Additionally, we recommend the authority reimburse the federal agency for questioned costs related to ineligible providers including ineligible providers identified in prior year findings.

The authority provided two separate training modules to enrollment staff and staff responsible for the CCO enrollment and validation regarding complete ownership and disclosure documents. We performed the trainings on April 18, 2024, during our monthly staff meeting and a separate ownership form training was held on May 30, 2024.

The Office of Developmental Disability Services has implemented new contractual language for our fiscal intermediary to review I-9 for providers with stricter criteria. This was added earlier this year and is already in place in the contract and implemented. Further, upon enrollment, state staff are validating older I-9s for providers who have submitted their I-9 historically.

The Office of Aging and People with Disabilities is committed to ensuring Provider Enrollment Agreements and accurate I-9 forms are on file and ensuring records are stored and retained properly for all Home Care Workers. The Oregon Department of Human Services (The department) will reinforce the requirements concerning the collection and storage of agreements at both the Quarterly Home Care Coordinators meeting on May 30, 2024, and at the AAA/APD Local Line Leadership meeting on May 16, 2024. The department will also create a reference guide in the new ODHS Field Business Procedure Manual implemented in February 2024. The department will make provider enrollment agreements and I-9 forms available statewide via DocuSign as an optional tool for state staff that guides them through accurately completing information on the form and capturing

electronic signatures. This will ensure that all required fields in forms are filled out correctly including ensuring the presence of required documentation to mitigate human error.

Additionally, we will continue to explore developing a training module for front office staff and office managers as well as a peer review process on business procedures and exploring ways that we can leverage technology such as the replacement Electronic Data Management System (EDMS) "Laserfiche" implemented by Imaging and Records Management Services (IRMS) to store provider records electronically.

The Office of Aging and People with Disabilities released updated guidance and clarification on I-9 forms through an Information Memorandum transmittal on January 24, 2024 (APD-AR-23-099) During the February 19, 2024, at the Home Care Coordinators quarterly convening meeting the revisions from the prior transmittal were discussed along with the importance of ensuring timely renewals and accurate documentation and retention of PEA/I-9's. During the May 30, 2024, at Home Care Coordinators Quarterly convening, Laserfiche project team shared information on status of new system implementation and timing of transition from EDMS along with Q&A. Laserfiche implementation began on July 15, 2024. The DocuSign contract administrator has provided an update noting that the DocuSign contract to go from pilot to statewide is currently behind schedule due to the Office of contracts and Procurement backlog, once available. During the July APD/AAA Local Line managers meeting, APD leadership discussed with line managers the results of the audit, reinforced the importance of accurate documentation and retention of records and discussed ways we are looking to strengthen the process such as leveraging new software and solicited ideas or best practices they have. We will continue to explore training options for onboarding front office staff, develop procedures for the Field Business procedures manual.

Questioned costs of \$1,786 were reported on the FFY24 Q4 CMS64 on line 10A (along with \$680 in other funding sources totaling \$2,466).

- Recommend department management strengthen controls over review to ensure transactions are adequately supported and reviewed. Additionally, we recommend the department reimburse the federal agency for unallowable costs.

The Oregon Department of Human Services (ODHS or the department) Office of Facilities Management coordinates care of a 168-building portfolio. Part of this work is coordination of furniture reconfiguration, minor and major remodels of office spaces and other building maintenance work. For these projects we rely on program staff with understanding of their funding sources to provide us with accurate coding to support the project related costs. Our office does not work directly with funding source management only coding and billing.

To better track who is providing us the coding and maintain a record of payment approval we have revised our workorder form to include who from the program is providing the coding and what authority they have to provide the coding. This will allow us to ensure that important details are captured regarding funding application and coding for billing and protect from funds being drawn from sources that do not support and/or are not appropriate for a given project.

The questioned costs of \$3,849 were corrected and refunded to CMS using document BTCL1485 with an April 17, 2024, effective date. The refund was reported on Q3 FFY 2024 CMS 64 which was submitted by June 30, 2024.

- Recommend program management implement additional internal controls over payroll related costs to ensure all costs charged to the program are related to employees who work directly on the award.

WIC Leadership is dedicated to reviewing and integrating existing reports into their time review process and will also ensure that staff responsible for employee time approval have been adequately trained on how to use those reports and features in Workday to review time.

Questioned costs were calculated at \$121,953. Refund was made via wire with document AW002490 on August 28, 2024.

2. ODHS and OHA: The Oregon Eligibility System Appropriately Determines Eligibility, but Input Errors Continue to Occur, audit #2024-27 (dated October 2024).

- Recommend evaluation of opportunities to improve input accuracy through automation and propose changes to ONE system to enforce them.

Based on current functionality of ONE, we do have controls in place for income and authorizing benefits when new or modified information is entered. Currently, the ONE system does require data entry into income data fields for eligibility determination. In addition, ONE requires authorization of eligibility when information is updated/changed. If an eligibility worker does not authorize in this scenario, an abandoned task is created which is then worked. In addition to considering system changes, OEP is currently conducting regional sessions with eligibility staff across Oregon to highlight income related eligibility data entry and questions to ask an Oregonian applying/renewing in ONE. Lastly, we implemented Periodic Report Automation in August 2024 to streamline no change reported by Oregonian.

We do want to explore additional automation to improve income data input. System changes that will be evaluated in 2024-2025 for possible implementation:

- Self-Employment pilot with USDS for a self-employment reporting and verification tool is occurring now. Will continue to evaluate use of this tool for ongoing use.
 - Quality Review Check screen to assist Eligibility staff in ensuring all necessary information has been entered into the system and prompt an eligibility worker if there is missing/discrepant data entry.
 - Income simplification automation to simplify data entry of income.
- Recommend override process to ensure overrides are restricted to authorized personnel, consistently documented, and monitored.

Currently, the ONE system does require a case note for an override. In addition, there is an Eligibility Guide for Overrides that clearly identifies when an override is appropriate/valid. If override for another reason, the override must be approved by Central Office Policy or OEP. The system also generates a task for leadership every time eligibility runs on a case in ONE with an active override.

Override case notes are a topic being discussed with eligibility staff during OEP regionals this year. Regionals are across the state of Oregon for all eligibility and leadership.

Actions moving forward to address overrides:

- A change request to the ONE system to limit override actions in ONE to leads and/or managers. The CR has not been scheduled at this time pending governance prioritization of CRs.
 - OEP-LET will update the Take Time for Training video and OEP-SEDD will communicate to staff on correct override reasons and clear case notes on override reason. Take Time for Training expected in last quarter of 2024.
 - Create and implement a formal, documented process that defines how often overrides should be reviewed, by whom; and a tool for reviewing of the override task. Including how to correct override errors found during the review.
- Recommend development of a test plan for user acceptance testing to formalize priorities and required scenarios for different types of changes. The plan should address ODHS's decisions in a formal document that includes risk assessment and evaluation of coverage and resources.

We appreciate the recommendation to develop a formal test plan for user acceptance testing (UAT) to better ensure stable and consistent quality control methods related to various changes within our IT system. We fully agree that a comprehensive, documented approach will enhance our current practices.

In response to this recommendation, we will initiate the development of an overarching UAT test plan that will:

- Consolidate Existing Practices: We will integrate our current testing artifacts and practices into a cohesive framework, ensuring that we leverage existing knowledge, standards, and resources effectively.
- Define Test Types, Priorities and Scenarios: The test plan will outline specific test types, priorities and scenarios tailored to the different types of changes anticipated in our system. This will help us systematically address each change and its impact.
- Include Risk Assessment: Standard ONE program risk management tools and practice will be leveraged as part of the test plan. This will allow us to identify potential risks associated with each change and to formulate appropriate test strategies as mitigations.
- Evaluate Coverage and Resources: We will assess the adequacy of our testing coverage and the resources required to effectively implement test cycles. This will ensure we are effectively informed and empowered to make result-based promotion decisions for system changes.
- Documentation of Decisions: The plan will formalize ODHS's decisions regarding UAT processes and outcomes, ensuring transparency and accountability in our testing procedures.

We anticipate that establishment of this test plan will promote reliable process standards in our UAT processes and also contribute to overall stability and reliability of our IT systems. We are committed to completing this plan by September 30, 2025.

3. ODHS and OHA: Without Federal Action, States Will Continue to Pay Millions of Dollars in Duplicate Medicaid Payments, audit #2024-29 (dated October 2024).

- Recommend submittal of a budget request for an additional 4 FTE to the Data Matching Unit.

The Office of Payment Accuracy and Recovery (OPAR) will be submitting a Policy Option Package (POP) for 4 additional FTE's in the next legislative session for approval and funding.

- Recommend that the Data Matching Unit should develop a process to triage PARIS matches.

The Data Match Unit (DMU) will relook at how PARIS matches are done and prioritized. The team will research and work towards completing cases in a more efficient way by working the oldest cases on the report as well as processing low-effort cases first.

- Recommend working with the U.S. Treasury's Do Not Pay Business Center on a joint WA/OR pilot project for concurrent enrollment.

The Data Match Unit (DMU) is open to working with U.S. Treasury's Do Not Pay Business Center on a joint WA/OR pilot project for concurrent enrollment. Data sharing agreements, policy and procedures will need to be developed by both states. Once the data sharing agreements are executed, and matching is completed, OPAR will know more specifics on how this work will be completed.

- Recommend that by 2026 the implementation of a process to recoup duplicate enrollment payments from CCOs for recipients who live out of state.

OPAR Data Match Unit will develop and implement a process for identifying CCO members who live out-of-state. The process will include the recoupment of capitation payments made to a CCO for these out-of-state CCO members where it has been validated that the member was living out-of-state at the time of Oregon CCO enrollment.

4. ODHS and OHA: Statewide Single Audit Including Selected Financial Accounts and Federal Awards for the Year Ended June 30, 2024, audit #2025-10 (dated April 2025)

- Recommend strengthening internal controls over the ONE system.

ODHS will continue to work with our vendor to secure a SOC 2 Type II audit of our processes and oversight of the ONE system in 2025.

Performance expectations of an initial SOC 2 assessment and subsequent annual performance of SOC 2 Type II audits, to be performed by the vendor through independent assessors, have been included in drafts of the current

ODHS/Deloitte ONE contract as optional services. Execution of final amendment language will be subject to standard review and approvals by State and Federal entities including Oregon EIS and DOJ, and Federal CMS and FNS agencies.

- Recommend agency continue to implement and strengthen controls to ensure subrecipients are appropriately identified and monitored.

The division recognizes that there are opportunities to strengthen the controls for subrecipient contractor determination, risk assessments and monitoring activities are accurate, complete, and documented and will refine these tools. The division also recognizes the opportunity to continue to improve controls that ensure that corresponding disbursements of federal funds are appropriately reported. The division will collaborate with agency financial services to develop enhanced controls that will ensure prevention, detecting, and correction of payment reporting.

BHD has implemented and strengthened controls substantially. The information presented below shows how BHD implemented and strengthened controls to properly identify subrecipients or contractors when federal funds are involved. This is to further support the status "implemented"

1. Workday Training created for using the BHD Federal Subrecipient Determination tools;
2. Once the tools were implemented in June 2025, we demonstrated how each contract is evaluated (5 questions);
3. The system-generated determination document is printed and attached to all requests in CLM;
4. If Subrecipient is identified, the Self-Risk Assessment must be completed by the contractor;
5. The Monitoring Plan, also a system generated document resulting from the contractor's completion of the assessment is downloaded;
6. The documentation of Self-Risk Assessment (completed) and the Monitoring Plan is required for all CLM requests; and

7. The record for each completed determination was recorded in Smartsheet and saved as back-up. The language in 2 CFR 200.331 specifically states, “No single factor or any combination of factors is necessarily determinative. The pass-through entity must use judgment in classifying each agreement as a subaward or a procurement contract.. As long as we show compliance with Federal Regulations, by completing the steps referenced above along with the CA keeping a folder for each contract with the documents filed, we cannot really be found wrong. Otherwise, our determination is valid. Federal regulation is very clear about the recipient’s judgement. We supported this through training classes, visual aids, and other resources.

- Recommend the submittal of required Federal Funding Accountability and Transparency Act reports.

As of March 12, 2026, 2,965 out of 2,966 FFATA Reports have been submitted to Sam.gov for years 2021 through March of 2026. Moving forward, OC&P will continue to stay on top of new FFATA Reports being submitted to Sam.gov and working with ODHS and OHA contract administrators when information is missing or has errors. OC&P is still waiting for the implementation of the API that will allow OC&P to submit bulk reports to Sam.gov. This API, once available, will be a large improvement, since we currently have to upload each FFATA report one by one. The ability to submit bulk reports to Sam.gov will save considerable time and allow us to stay in compliance more easily. OC&P is in the process of updating the FFATA Form to be able to collect some additional information that is needed for the report, such as FAIN and Federal Reporting Amount. OC&P is submitting the form update request to Publications and Creative Services for official updates and approvals, before we connect the updated form to the OC&P 0118 Form (Contract Request Form). In 2026, OC&P will look at the possibility of cross training additional OC&P employees on FFATA reporting, so that there is continuity of operations if the FFATA Coordinator is out of the office or is promoted.

- Recommend strengthening existing controls to ensure only those costs incurred during the period of performance are charged to the grant.

While the appropriate internal controls are in place to review the period of performance, a mistake was made while following the procedures. Secondary reviews will be performed going forward to ensure all expenditures are appropriately captured. The expenditures in question were moved to the correct phase 22 on January 23, 2025 with document BTCG3186.

- Recommend agency to ensure that MMIS rates are accurate and updated timely.

The conversion factor (CF) for Calendar Year (CY) 2023 was not properly updated in December 2022. The proposed CMS CF values of 86.7850 was incorrectly applied to the Medicaid Management Information System (MMIS) instead of the finalized CMS CF value of 85.585. This error occurred due to confusion surrounding an earlier final rule announcement related to the outpatient prospective payment system (OPPS).

Recent CMS OPPS publications have simplified the process of identifying the correct final conversion factor. For CY 2023, payments were processed using the proposed CF of 86.7850 rather than the finalized CF of 85.585, as it was the only rate available at the time. No adjustments have been made to date.

To address this issue, we are partnering with our software vendor Gainwell to identify the total number of outpatient claims affected by the incorrect CF. We will then develop a timeline, communicate to impacted parties and prepare to implement a Standard Mass Adjustment Process (SMAP) to correct all impacted outpatient claims identified by Gainwell, which were processed with the wrong CF for CY 2023. Please see the timeline below for OHA actions:

- Identify all CY 2023 outpatient claims that are impacted by the wrong conversion factor by May 20, 2025.
- Change rate from 86.7850 to 85.585 by May 20, 2025.
- Communicate with providers about the changes and next steps by May 20, 2025.
- Implement a verification and validation process to confirm rates are accurately and delivered on time, completion deadline December 31, 2025.

As of March 2026, the impacted claims have been identified and the rate in MMIS has been corrected. Claims are in the queue to run the System Mass Adjustment.

- Recommend improvement of documentation and controls over client eligibility.

A specific case was discovered where the state failed to obtain a signature from an SSI individual. Due to the individual's SSI status and being continuously on benefits, the ONE system attempts to passively approve renewals without requiring worker interaction, leading to potential gaps where signatures are not on file for cases that converted into the new system in 2020 and 2021. The operation lapse occurred because the SSI individual converted into the new system on continuous benefits going through passive renewal processes that do not require direct worker interaction. The State of Oregon is working with the local branch to obtain a verbal signature from the identified individual. Additionally, the State conducted a thorough review of current policies and procedures related to passive renewals for SSI individuals to ensure compliance with federal requirements.

- Call center software recordings and verbal signatures has been updated as recently as February 2025 providing staff with clear direction on how to capture the verbal signatures and which recordings to play.
- Establishing DOR/Filing Date Eligibility Guide was updated as recently as March 31, 2025, including a chart itemizing the signature types (electronic and paper forms), programs that accept each type, and the corresponding option to select in ONE.
- Rights and Responsibilities Eligibility Guide was enhanced on October 7, 2024, to add detailed direction to staff on how to capture the signature in ONE, when rights and responsibilities are not issued automatically, the appropriate Rights and Responsibilities to provide for each program and where to find a current signature record on file.
- Finally, the Case Action Eligibility Guide has been updated to include specific guidance and examples of when it's appropriate to extend processing timeframes for RFI's.

- Recommend the implementation of controls procedures around cost allocation system inputs.

The Office of Financial Services (OFS) will review the existing controls in Cost Allocation system and identify areas that need additional or new control procedures to ensure system inputs are appropriately identified and processed.

Questioned costs of \$32,522 were refunded in FFY 2026 Q1. The Cost Allocation unit continues to perform quality assurance and quality control procedures before and after each monthly cost allocation run. The procedures have been reviewed and will continue to be reviewed for possible improvements on an ongoing basis.

- Recommend strengthening the review over direct costs charged to the program.

The agency will ensure that future contracts that include any incentive funds for surveys will be structured such that incentives are billed under separate coding that will be charged to general funds only. Questioned costs \$73,850 were corrected using document BTCL2286 with an effective date of April 11, 2025.

The agency has modified its contract management spreadsheets used to track budget, deliverables, and payments. There is a specific incentive payments section for each contract that has those deliverables that directs the expenditures to General Funds. Communication has been sent to contract administrators, the contracts unit, and invoice processors to ensure incentives are handled separately from other items in the contract and coded to General Funds only when paying invoices

Recommend the improvement of documentation for provider eligibility determinations and revalidations.

At the Provider Enrollment meeting on April 17, 2025, we conducted training on the ownership and disclosure form, particularly the requirement around managing employee disclosure. We will also work with our CCO contract administrator, unit lead worker and staff that process the annual CCO ownership disclosure forms to ensure all disclosures and attachments are obtained.

The Office of Aging and People with Disabilities (APD) is committed to ensuring the Provider Enrollment Agreements and I-9 forms are on accurate and records are stored and retained properly.

APD provided and assessed multiple corrective action options to strengthen HCW Provider enrollment, eligibility verification and record retention controls. While some solutions pursued, like E-verify, could not be implemented as originally anticipated, APD refocused and implemented enhanced procedural controls such as timeliness requirements on uploading records and providing standardized templates such as Docu-sign in an *effort to ensure*

proper fields were populated in provider enrollment applications. In addition to prior actions, over the last quarter APD implemented recent front -end verification, and is implementing routine standardized internal audit mechanisms to mitigate risk and ensure compliance.

- APD-AR-25-035 now requires that, as part of HCW enrollment and onboarding, and prior to issuance of a provider number, each HCW must schedule an appointment with a designated HCW Coordinator or other appropriate APD staff member. During this appointment, staff verify that the Form I-9 is accurate, complete, and finalized in accordance with federal requirements. Staff also confirm that enrollment records are stored timely and appropriately in accordance with record retention requirements. This control ensures eligibility is verified before an HCW is authorized to provide services or receive payment.
- APD-AR-25-026 requires all APD offices to participate in Quarterly Business Reviews (QBRs) in alignment with self-sufficiency programs beginning in 2026. QBRs function as a standardized internal audit process and are conducted quarterly to assess alignment with APD business policies and procedures. The QBR process now includes an updated DHS 219H form to support consistent review of HCW enrollment documentation, eligibility verification, and record retention practices.

We believe these corrective actions help establish and provide assurance that HCW employment eligibility is verified prior to service delivery and that required records are maintained in compliance with applicable standards.

5. OHA: Oregon Faces Challenges in Addressing Gaps in the Behavioral Health Crisis System, audit #2025-14 (dated May 2025)

- Collaborate with behavioral health crisis partners, such as CMHPs and contractors, to better understand the nature and extent of system data, and pursue measures needed for consistent implementation.

The 988 & Behavioral Health Crisis System unit has been in close coordination with our behavioral health crisis system partners since before the launch of 988 in July 2022. Examples of coordination include Community Mental Health Program meetings, technical assistance, and ongoing contract administration with 988 call centers.

OHA agrees with the need to improve data. The unit will continue to convene discussions and/or listening sessions with behavioral health crisis system partners to better understand the nature and extent of system data, and pursue measures needed for consistent implementation of data collection and analysis for 988 call centers, mobile crisis intervention services, mobile response and stabilization services, and crisis stabilization centers.

- Examine and document fragmented internal coordination between Behavioral Health, Fiscal and Operations, and Health Policy and Analytics divisions with respect to data necessary for informed decision making and determine if resources are available for a data analyst embedded within the 988 and Behavioral Health Crisis unit.

OHA will take a multi-pronged approach to address gaps and fragmentation in data collection and analytics:

1. Through its Office of Data Strategy and Operations (ODSO), OHA will continue work to improve data governance and the integrity of data submission by external partners.
 2. OHA will work with the Health Policy and Analytics (HPA) team to understand how we can leverage 988/crisis-specific data, in addition to other data sources – such as Medicaid claims data, All Payer All Claims data and CCO utilization and quality data – to better track unmet needs and outcomes.
 3. OHA will assess current staff resources allocated within ODSO, HPA and the Behavioral Health Division units to identify and address unmet staffing needs.
- Develop procedures to aggregate and analyze 988 lifeline call data.

OHA will design an internal-facing dashboard to aggregate and analyze data from call lines by the middle of 2026. The dashboard will help guide the data that needs to be collected in order to highlight data trends of interest. The dashboard will outline needed data collection and then further visualize insights once the data collection is completed.

- Develop a comprehensive funding strategy for all components of the Crisis Now framework

The 988 & Behavioral Health Crisis System unit will develop a funding sustainability plan for 988 call centers, mobile crisis intervention services, mobile response and stabilization services, and crisis stabilization centers by the middle of 2027. This plan will take into consideration Medicaid claims, the 988 tax refunds, general fund, and federal funding sources. Within this plan we will include the true funding needs for all parts of the system through the outcome of the HB4092 cost study. The Certified Community Behavioral Health Clinic team will work closely with the 988 & Behavioral Health Crisis System unit to incorporate CCBHCs within the sustainability plan. Additionally, the CCBHC team and the 988 & Behavioral Health Crisis System unit will collaboratively review and approve written agreements between non-CMHP CCBHCs and CMHPs regarding shared requirements to provide crisis services. This review will ensure funding resources are effectively leveraged to ensure sustainable crisis services across the provider types.

- Review funding parity for the children and family’s crisis system, including Mobile Response and Stabilization Services, and develop plans to address gaps where necessary.

The 988 & Behavioral Health Crisis System and Child and Family Behavioral Health units will use the outcome of HB4092 to reduce administrative burden to CMHPs to quantify funding gaps and develop a plan (including but not limited to Mental Health Block Grant and Policy Option Package development for the 2027 Legislative Session) to achieve parity of funding for children and families services and supports for each component of the crisis system, including mobile crisis intervention services, mobile response and stabilization services, and crisis stabilization centers.

- Coordinate with the Legislature as necessary to provide funding for lapsed behavioral health workforce incentive programs.

The HB2235 Workgroup has provided recommendations to inform a legislative report due January 15, 2025. Several recommendations within the report directly indicate the need for funding “lapsed behavioral health workforce incentive programs” that were implemented by OHA’s Behavioral Health Workforce Incentives (BHWI) team. Furthermore, BHWI has submitted a Policy Option Package (POP 550) to include continued funding of BHWI programs. These programs include tuition assistance, loan repayment, bonus and housing stipend grants, recruitment and retention grants for peers, and the provision of no-cost registrations for

behavioral health credentials through an agreement with the Mental Health and Addiction Counselor Board of Oregon (MHACBO).

- Collaborate with the Legislature, Coordinated Care Organizations, Department of Consumer and Business Services, and insurance providers to develop a comprehensive model that ensures private insurers cover mobile crisis response and stabilization services like leading models from other states.

The 988 & Behavioral Health Crisis System unit will develop a plan to collaborate with the Legislature, Coordinated Care Organizations, Department of Consumer and Business Services, and insurance providers pending the introduced legislation House Bill 2203 that would direct the Department of Consumer and Business Services to study options to require a carrier to include mobile crisis intervention as a covered service that is not subject to coinsurance, copayments, deductibles or other out-of-pocket expenses.

- Develop a behavioral health division strategy aligned with the August 2024 agency strategic plan.

The Behavioral Health Division (BHD) began developing a strategic framework to guide the division's work in fall 2023. The development and finalization of the BHD Strategic Framework was paused for the OHA Strategic Plan development in order to ensure alignment, capacity and resourcing that was in concert and not competition of broader agency strategic needs. As the OHA Strategic Plan has been launched, BHD is aligning the division-based Strategic Framework with the plan. Additionally, programmatic areas and units have developed their own strategic workplans to collate and align to the BHD Strategic Framework and OHA Strategic Plan. A finalized framework with accompanying planning documents will be available by the listed target date.

- Assess the resources needed to appropriately coordinate the developed strategy and communicate unmet need in future funding requests.

The 988 & Behavioral Health Crisis System unit is completing its mission, vision, values, and strategy workplan that forms the basis of determining the existing and needed resources. This plan aligns with the OHA Strategic Plan and forms the basis for understanding unmet programmatic and funding needs. Additionally, HB4092 requires OHA to conduct an ongoing Cost Study for services that CMHPs are legally required to provide such as

mobile crisis, and create a workgroup through Oregon Council of Behavioral Health to study redundancies, contradictions, outdated language within ORS 414 and 430 (which impact crisis services including mobile crisis), and better define and clarify roles and responsibilities for major health systems partners such as CMHPs, CCOs, and hospitals and provide a list of recommendations. This work will be leveraged to develop a summary of the strategy, funding gaps and recommendations will be developed and submitted to executive leadership.

- Monitor, evaluate, and report progress to interested parties, such as the Behavioral Health Crisis System Advisory Committee.

House Bill 2757 (2023) requires a Behavioral Health Crisis System Advisory Committee (BHCSAC) to advise OHA on implementation and operation of the statewide coordinated crisis system and feedback and recommendations on the 988 Suicide & Crisis Lifeline. BHCSAC held its first meeting in March 2024 and continues to meet monthly where the 988 & Behavioral Health Crisis System unit provides regular standing updates and facilitates presentations to the committee on a variety of crisis system-related topics as requested. The 988 & Behavioral Health Crisis System Unit also responds to requests about the progress of Oregon's crisis system to a wide range of interested parties, including community partners, research entities, and the media.

- Continue to work with OHA Tribal Affairs to explore culturally responsive services to American Indian or Alaskan Natives living in Oregon and collaborate on any legislative barriers that may hinder services.

The 988 & Behavioral Health Crisis System unit will continue to collaborate with the OHA Tribal Affairs team to explore and identify culturally responsive services for American Indian or Alaskan Natives living in Oregon. The unit will also work with the OHA Tribal Affairs team on elevating any legislative barriers that hinder behavioral health crisis services through legislative concepts or other appropriate means.

- Incorporate Tribal inclusivity into the behavioral crisis framework, such as support for Tribal members who dial the 988 Lifeline, mobile crisis stabilization services, and collaborating with Tribes on high acuity mobile crisis cases that may lead to civil commitment investigations.

The 988 & Behavioral Health Crisis System unit will continue to explore and implement opportunities to further support Tribal members who are connecting to Oregon’s behavioral health crisis system. The unit will collaborate with Tribes, CMHPs, and OHA program staff on high acuity mobile crisis cases that may lead to civil commitment investigations.

6. OHA: Measure 110 Lacks Stability, Coordination, and Clear Results, audit #2025-29 (dated December 2025)

- Develop an implementation roadmap with timelines, assigned accountability, and key deliverables for program integration, evaluation, and outreach.

OHA has already implemented a project management structure to guide and track the work of the M110/BHRN team. The project manager, in collaboration with the M110/BHRN executive director, manager, and lead implementation staff, has already developed timelines, workstreams, and deliverables for primary projects, including clarified roles and responsibilities. Additionally, the project manager sits within the division strategy office as a matrix-supervised role to ensure integration across all behavioral health priorities.

- Communicate updated operational definitions for “culturally and linguistically specific services” and “culturally responsive services” to BHRN grant developers and evaluators, and M110-funded providers in future grant cycles.

In the 2029 BHRN-funding cycle – the next available funding cycle and the first opportunity to implement the audit recommendation – OHA will strengthen the application of its agency-wide and statutory definitions, as applicable, for “culturally and linguistically specific services” and “culturally responsive services.” This will be achieved by ensuring the definitions are clearly articulated in all funding-related materials provided to applicants and evaluators. Additionally, OHA will continue to support BHRN providers in assessing their own service delivery through the consistent and rigorous application of statutory definitions, ensuring alignment with the program’s equity and inclusion goals. Additional clarity for BHRN providers is currently documented in Submittable, which describes these definitions for M110. OHA notes the M110 Oregon Administrative Rule

(944-001-0010) is narrower than the Health Systems Division Chapter 309 Oregon Administrative Rules. In the 2029 funding process, OHA will ensure consistency in rule language.

- Require all M110-funded providers to begin participating in standardized interim data and reporting using established systems.

OHA is actively implementing the 2024 Strategic Data Plan to strengthen data collection and reporting. As part of this effort, all BHRN-funded providers are required to report data through two systems: ROADS and Submittable.

- Submittable, which captures person-level encounter data, is currently operational and used for grant reporting, expenditure tracking, and aggregate program data.
- ROADS, which collects BHRN client-level data, was launched in October 2025. Its implementation is underway and will follow a phased timeline for use by BHRN-funded providers. The timeline is driven by configuration with Electronic Health Records and an extensive on-boarding process. All providers will be required to use ROADS by July 1, 2026, with a grace period extending to November 1, 2026, to accommodate any Electronic Health Record (EHR) configuration problems.

For interim reporting, providers not yet using ROADS are required to track and submit client counts through Submittable beginning in Quarter 2 of the 2025-2029 grant cycle, with the second reporting period concluding January 1, 2026. As data are reported, the public BHRN data dashboard will be updated on the BHRN website.

- Complete a baseline analysis using available or proxy data. This analysis should be used to set future performance targets, identify service gaps, and address key questions in law including whether, since December 3, 2020:
 - Overdoes rates declined;
 - The number of drug and alcohol treatment service providers increased;
 - The number of culturally specific providers increased;
 - Access to harm reduction services has increased;
 - More individuals are accessing treatment than they were before December 3, 2020, and;
 - Access to housing for individuals with substance use has increased.

OHA acknowledges the audit finding but the audit recommendation’s approach is not feasible because baseline data is unavailable. As outlined in HB4002 (2024), reporting requirements are contingent upon the availability of data. Given the absence of a valid retrospective baseline, OHA cannot accurately measure program outcomes against historical trends.

As established in the 2024 Strategic Data Plan, OHA will report quarterly on the number of BHRN-funded services, program metrics, and client-level data through a publicly available dashboard during the 2025-2029 BHRN grant cycle. This prospective approach aligns with HB4002’s recognition of data limitations and enables accurate tracking of current and future BHRN activities and client progress. This evaluative framework provides a more meaningful representation of the BHRN program’s intent and impact on Oregon’s behavioral health system than any proxy data.

- Publish a yearly performance report with standardized measures of M110 program outcomes against retrospective baseline and statutory goals.

OHA acknowledges the audit finding but the audit recommendation’s approach is not feasible. Baseline data is unavailable.

While OHA recognizes the value of annual performance reporting against a retrospective baseline and statutory goals, the unique circumstances between 2019 and 2023 – such as the COVID 19 pandemic, emergency executive orders, and significant shifts in behavioral health funding – render retrospective or proxy data unsuitable for accurately measuring program outcomes.

As described previously, through implementation of the Strategic Data Plan, OHA is already charting a forward-looking evaluative approach that emphasizes ongoing performance measures and BHRN provider-reported indicators. This method better captures program outcomes through programmatic and client-level metrics collected quarterly. These metrics will be publicly available via the BHRN program quarterly dashboard, which will provide aggregate data on program activities and service level metrics. The updated metrics introduced in the second grant cycle enable more precise tracking of BHRN activities and client progress, offering a clearer view of program-specific outcomes and their influence on the broader behavioral healthcare system. By focusing on

prospective data collection and analysis, OHA can more accurately assess the intent and impact of the BHRN program, rather than relying on a retrospective baseline that does not reflect historic realities.

- Implement data-sharing infrastructure to support integrated care pathways and monitor the continuity of treatment and recovery services for people with substance use disorders engaging with the M110 program.

OHA agrees with the audit finding; however, OHA respectfully disagrees with the associated recommendation.

Developing infrastructure to support integrated “care pathways” for monitoring continuity of treatment and recovery services falls outside the scope of the BHRN program. The necessary functionality and the associated costs of implementation also are not included in the program’s budget. The concept of care pathways – commonly used in medical settings or other areas to coordinate an individual’s services – relies on coordinated service delivery supported by data sharing via Electronic Health Record (EHR) systems connected via Health Information Exchange (HIE) platforms. While similar functionality and data sharing may be allowed under appropriate Federal statutes, many BHRN-funded providers do not use EHR systems or have access to HIE connectivity. Additionally, OHA does not currently have the infrastructure, staffing, or legislative appropriations required for this level of data integration.

Furthermore, the recommendation does not fully account for regulatory complexities involved in sharing person-level data across a diverse provider network. The BHRN-funded services encompass a combination of non-healthcare providers, healthcare providers, and substance use disorder (SUD) treatment providers. Sharing person-level data across these provider types would potentially violate the Health Insurance Portability and Accountability Act (HIPPA) and 42 CFR Part 2, which establish strict limitations on the disclosure of SUD treatment information.

7. ODHS and OHA: Statewide Single Audit Including Selected Financial Accounts and Federal Awards for the Year Ended June 30, 2025, audit #2026-10 (dated March 2026)

- Ensure the BHP is refunded for the payments made on behalf of ineligible individuals and ensure benefits are ended for ineligible individuals. Continue to monitor the ONE system to ensure it is working as intended.

OHA has already taken steps to implement upon identifying the defect prior to this audit. OHA's existing controls enabled the agency to identify the system defect that led to individuals with annual income <133% FPL being determined eligible for Oregon's Basic Health Program. Upon identifying the system defect, OHA followed procedure in federal regulation (42 CFR 600.715) to alert BHP Trustees of the defect, to initiate processes in coordination with the department to address ONE System operation, and to end BHP benefits for ineligible individuals. The department implemented system fixes to prevent new enrollment of individuals with income <133% FPL in June 2025, and the majority of affected individuals had coverage extended in, or before, July 2025. The department fully completed all necessary data fixes to end enrollment for all ineligible individuals by December 2025.

OHA has also been working with the BHP Trustees to ensure the state provides financial restitution to the Trust Fund for any non-permissible spending in compliance with federal regulatory provisions governing the manner and timeline of required restitution. Based on timelines in federal regulation, Oregon must provide financial restitution to the Trust Fund by February 28, 2027; OHA is on track to comply with this timeline.

The state has also established a proactive, continuous monitoring approach to ensure the system operates as intended and to identify and address issues early.

The approach includes:

- Statewide Operation Support Team access for all eligibility workers and leads to submit requests for assistance with any eligibility, process or system related questions for analysis, assistance or escalation of system issues.
- Ongoing weekly defect review meetings to proactively identify, track, and resolve system issues.
- Cross-functional design sessions with all relevant stakeholders to anticipate impacts and ensure solutions meet business needs.
- Structured User Acceptance Testing (UAT) to validate system changes prior to implementation.
- Formal go/no-go decision-making processes to assess readiness and mitigate risk before deployment.
- Governance board oversight to provide strategic direction, accountability, and continuous evaluation of system performance.

These efforts support early detection of issues, informed decision-making, and continuous system improvement. OHA and the department will continue to refine our monitoring practices to ensure the ONE system remains stable, effective, and responsive to program needs.

- Refund BHP for all errors identified. In addition, the department should identify all individuals impacted by the ONE system error and refund BHP. We also recommend the department continue to provide training to eligibility workers for errors identified. Finally, we recommend the department submit a change request to fix the ONE system.

OHA has already taken implementation steps to correct the issue upon identifying it prior to this audit. OHA's existing controls enabled the agency to identify a manual fix and training necessary to respond to correct the issue in 2025. The state does not agree with the SOS's questioned costs because those costs do not line up with the estimated number of members impacted or the length of time that payments may need to be reallocated to the trust fund. While the state understands that the extrapolation of the SOS sample might indicate a higher number of impacted individuals, the state's analysis did not align with the SOS estimates.

OHA will continue to address these recommendations via the corrective action steps identified below:

- OHA has identified all individuals impacted by these errors and will work with the BHP Trustees to ensure the state provides financial restitution to the Trust Fund for any non-permissible spending in compliance with federal regulatory provisions governing the manner and timeline of required restitution, as described above.
- OHA has identified the issue identified in the first two bullets and updated necessary staff training materials in August 2025. Additionally, in February 2026, the Income Eligibility Guide was updated to provide additional clarity on this process. The revised guidance is intended to support eligibility workers in applying policy consistently and accurately. The state has also already submitted a change request to update the logic used by the ONE system to ensure coverage is ended when a response to a request for information indicates the individual is over income and ineligible. To ensure additional individuals impacted by this issue have eligibility corrected, the state will continue to work on

identifying additional measures that can be performed while waiting for the change request to be implemented.

- The Oregon Eligibility Partnership (OEP) will continue to evaluate training needs and provide additional guidance or reinforcement, as appropriate, to ensure staff are fully equipped to carry out their responsibilities effectively.
 - OHA will continue to reinforce the BHP training materials that have been utilized since June 2024, making any needed adjustments by December 31, 2026.
- Strengthen existing controls to ensure invoices are coded to the correct federal program. Department management should implement controls to ensure invoice coding is updated as employee job duties change.

OHA will strengthen existing controls to ensure invoices are coded to the correct federal program and ensure invoice coding is updated as employee job duties change:

- Agency processes and procedures will be followed.
 - Administrative staff will parse cell phone charges and code invoices according to employee payroll
 - Approving manager will review coding for accuracy prior to approval
 - Quarterly review of cell phone charges will be completed by division management and adjustments made as indicated
- Implement internal controls to ensure risk assessments are performed, documented, and retained for each subrecipient.

OHA is implementing a process to coordinate subrecipients risk assessment monitoring throughout the division to ensure risk assessments are performed, documented, and retained for each subrecipient.

- Implement controls to ensure all subawards related to a contract are appropriately identified, tracked, and reported.

OHA and ODHS are working with the Office of Contracts & Procurement to implement a process to ensure that all subawards related to a contract are appropriately identified, tracked, and reported throughout the division.

- Strengthen controls to ensure recipients of federal funds are appropriately classified as subrecipients or contractors and the corresponding expenditures are appropriately reported as direct or pass-through on the SEFA. Ensure monitoring activities are completed and documented according to the monitoring plans.

Management agrees with the finding that inconsistencies in classifying recipients as subrecipients or contractors created uncertainty regarding whether expenditures were accurately reported and whether required post award monitoring occurred in all cases. Under Uniform Guidance, passthrough entities must make case by case determinations and document whether each agreement constitutes a subaward or a procurement contract, based on the substance of the relationship rather than the title or format of the agreement.

Consistent with the Oregon Department of Justice’s September 2025 analysis, we acknowledge that Oregon’s Public Contracting Code (PCC) and state procurement guidance use the term “grant” differently from federal regulations. Under ORS 279A.010, a grant is a subcategory of public contracting and may be exempt from PCC procurement requirements; assistance that federal regulations classify as a procurement contract may still be categorized as a grant under Oregon law. As a result, the same agreement may be labeled a “grant” under state law but treated as a procurement contract under federal law—or vice versa. Our processes will reflect that federal classification governs federal compliance requirements under Subpart D of 2 CFR part 200, while state characterization governs state procedural requirements.

In alignment with 2 CFR §200.331, we will continue to determine subrecipient versus contractor status by applying federal characteristics and the substance-over-form principle. For monitoring, we will meet §200.332 requirements for passthrough entities, including risk assessments, required subaward data elements (FAIN, ALN, UEI), and ongoing financial and performance oversight. We will also apply federal definitions of “contract” and “subaward” and will treat agreements accordingly for federal purposes regardless of titles used under Oregon law.

Corrective Actions for Subrecipient Determinations: To remediate this condition, the department will strengthen and formalize existing controls through the following actions:

1. Dual Analysis and Documentation Addendum: Complete a Dual Classification & Documentation Addendum (Federal vs. State) for every federally funded agreement, documenting: a. The federal classification (subaward vs. procurement contract) under 2 CFR §200.331 (substance-over-form). b. The state characterization under ORS 279A.010 and applicable PCC/DAS guidance. c. Any differences in naming or labeling, with an explanation of how federal and state requirements will both be met.
2. Required Review Points: The determination and addendum will be reviewed at the time of: a. Coding issuance b. FFATA reporting c. Payments d. SEFA reporting
3. Staff Training: Provide training to ensure staff can consistently complete and review the Dual Classification & Documentation Addendum.

Corrective Actions for Monitoring: Management agrees with the recommendations related to monitoring. We acknowledge that monitoring plans were not consistently developed, documented, or completed for certain federally funded agreements, resulting in gaps in demonstrating compliance with federal subrecipient monitoring requirements. The absence of formally established monitoring plans contributed to inconsistent execution and documentation of required oversight activities.

To address this issue, the department is implementing a standardized monitoring framework aligned with federal expectations, including 2 CFR §200.332 requirements for pass-through entities. The framework includes:

1. Monitoring plans developed at the time of award, proportionate to the assessed level of risk.
2. A standardized risk assessment process to determine the type and frequency of monitoring activities (performance reporting, financial review, site visits, audit reviews, etc.).
3. Completion and documentation of monitoring activities within the contract or award period, including supervisory review to ensure consistent documentation and closure of any findings or corrective actions.

4. Staff training and ongoing oversight to ensure consistent understanding and application of federal monitoring standards and expectations.
- Improve controls to ensure all subawards related to a contract are appropriately identified, tracked, and reported.

The department acknowledges that during the audit period, not all required Federal Funding Accountability and Transparency Act (FFATA) reports were submitted in accordance with federal guidelines and that the FFATA tracking sheet did not include a complete listing of all subawards and amendments by Federal Award Identification Number (FAIN) and associated dollar amounts. This gap was due in part to a vacancy in the FFATA Reporting Coordinator position, which limited the department's ability to maintain timely reporting and ensure complete data capture. The position was filled in April 2025, enabling the department to develop and implement updated internal procedures and process improvements.

As of March 2026, the department is current on all FFATA reporting. To strengthen internal controls and prevent recurrence, the department will continue improving FFATA processes and procedures through the following actions:

1. Update FFATA Form: The department has submitted a request to the Publications and Creative Services (PCS) team to add FAIN and Federal Reporting Amount fields to the FFATA Form, ensuring complete data collection at the outset of the process.
2. Update the FFATA Tracking Sheet: The tracking sheet will be revised to ensure all subawards and amendments are captured, including fields for Contract Number, Unique Entity Identifier (UEI) (formerly Data Universal Numbering System (DUNS) Number), FAIN, OregonBuys Number, Contractor, Working Title, Execution Date, Amendment Amount, Not to Exceed (NTE) amount, Federal Reporting Amount, Assistance Listing Number (ALN) (formerly Catalog of Federal Domestic Assistance (CFDA) Number), Status, Contract Administrator, Requestor, and Primary Writer.
3. Secure Application Programming Interface (API) Bulk Reporting Tool: The department submitted a request in 2025 to obtain an API enabling bulk FFATA submissions to SAM.gov and will continue working with the Office of Information Services to improve reporting efficiency.

4. Implement Verification Controls for Subrecipient Determinations: Subrecipient determinations will be reviewed and verified before entering agreements into the FFATA tracking process to ensure federally defined subawards are correctly flagged for reporting. This verification will include cross-checking determinations against federal definitions in the Uniform Guidance.
5. Ensure All Uniform Guidance Required Information Is Recorded: The tracking sheet will be updated to include all FFATA and Uniform Guidance required data elements (DUNS/UEI, FAIN, CFDA/ALN, subaward amount, obligation date, and required executive compensation information). Missing elements identified during backlog cleanup will be obtained from source documentation or from subrecipients.
6. Ongoing Monitoring and Monthly Reconciliation: The FFATA Coordinator will conduct monthly reconciliations between the tracking sheet, subaward records, and accounting data to ensure completeness, accuracy, and compliance with federal reporting requirements.
7. Cross Training for Continuity: Staff will be cross trained to ensure continuity of FFATA operations and prevent reporting lapses during periods of staff turnover or absence.

The department anticipates completing remediation of the tracking sheet and fully implementing the new verification and coding controls by December 31, 2027. Progress will be monitored and documented through reconciliation logs and periodic supervisory review.

- Obtain an annual SOC 2 Type II report over the service organization's internal controls for the ONE application or perform other alternative procedures to ensure internal controls over the ONE system at the external service provider are sufficient to meet the business needs of the Medicaid program.

OHA agrees with the recommendation but requires additional funding to implement the additional audits of the vendor. ODHS has done SOC audits for our processes but are requesting the vendor to have an external entity do SOC audits and provide them to us. The language and deliverables have been added to our contract with the vendor and we expect federal approval of these updates in the next couple of months. Once approved the agency can authorize, if funded, for these additional reviews.

- Continue to work to ensure public access to provide fraud referrals is not limited, and that a referral tracking mechanism is created to ensure all referrals are given preliminary investigations.

The Department and the Authority continue to work on improvements to the referral processes and the Hotline. Hotline scripts have been updated. Web Portal changes have been approved and are moving forward on the three areas of focus from the audit. Web portal improvements are in process. External website changes have been completed. Updated phone script/recording is in place. Fraud referral review processes have been updated, and the new fraud referral system is being built by our OIS with an estimated completion date of July 31, 2026.

OHA/OPI is updating the external website to include the updated OHA-OPI phone line and a transcription software to record the phone messages in text form. Expected completion date is June 2026. A new CCO reporting tool for online submission of referrals in place of email reporting is in the final stages of development. Testing of the new form is currently underway with OHA Publications and Creative Services. OPI is awaiting confirmation from OIS on the security and reliability through Microsoft Forms before posting a public facing fraud referral form to the OPI website. The public can make a referral to OHA/OPI in any format, including emailing the OPI Certified Fraud Examiner at opi.referrals@oha.oregon.gov.

The OPI phone message is as follows:

“Thank you for contacting the Fraud, Waste and Abuse reporting hotline for the Oregon Health Authority Office of Program Integrity. If this is an emergency, please hang up and dial 9 -1 -1. This hotline is dedicated to the reporting of Oregon Medicaid providers only. If you need to report abuse or neglect involving a child or vulnerable adult, please call 1-855-503-7233. If you need to report fraud, waste, or abuse involving a Medicaid recipient please visit the Oregon Department of Human Services “How to Report Fraud” webpage to submit an online referral. If you are calling regarding the status of an investigation or hotline report previously submitted, please be advised that we are unable to share the status of investigations or reviews.

To report an Oregon Medicaid provider, you believe is committing fraud, waste, or abuse, please leave a detailed message, including services rendered, relevant dates, and provider names. If you would like to

remain anonymous, please state your request to remain anonymous in your voicemail. If you do provide your contact information our offices may reach out if follow up is needed. Your personal contact information will remain confidential.

- Ensure compliance with federal program requirements by continuing to prioritize the completion and documentation of hospital audits.

OHA continues to work diligently to complete these settlements. While we are still behind, due to staffing constraints and federal coding changes, these settlements will always be delayed a few years because we need a finalized Medicare Cost Report (MCR) before we can complete the settlement calculations. The team has added an additional FTE to focus solely on this process and is prioritizing it.

- Strengthen and document controls to ensure all employee timesheets are reviewed for cost coding and accuracy and are approved timely.

The authority and department have taken initial steps to strengthen controls to ensure that all employee timesheets are reviewed for cost coding and accuracy and are approved timely. We have initiated regular time approval reminders and have added a post-approval attestation of review for those managers that missed the time approval deadlines. We have developed supplemental training for managers on how to appropriately review and approve time. We have posted tools on the OWL so that managers can review any employees with cost coding changes. We have asked the Department of Administrative Services about options to add an additional field on the Workday time approval screen that will show the employees default costing codes. The managers should be prepping plans (reminders on calendars, reminders to staff, delegating authority if out while due dates are scheduled for payroll processing, etc.) and sharing those plans with their managers if they missed the mark. The plans may be reviewed in quarterly PAFs, as well.

- Strengthen existing processes and controls to ensure all employee timesheets are reviewed and approved timely. Document monthly review of payroll costs charged to the DWSRF program.

In addition to our normal review and approval of OHA Drinking Water Services (OHA-DWS) staff time within the Workday application, OHA-DWS management team has added a formal agenda to our existing monthly financial review meetings, and there is now a specific agenda item for managers to review each OHA-DWS employee's time submittal, inclusive of their use of appropriate work charge codes each month. This review also includes any corrections needed for miscoded entries by OHA-DWS staff, along with any other agency staff inadvertently using OHA-DWS funding codes without authorization. Finally, we document our review and any relevant corrective actions needed in the minutes of this meeting each month.

The corrective actions were implemented in February 2026 and will continue monthly and for all subsequent financial review meetings.

- Strengthen existing controls to ensure recipients of grant agreements funded by set-aside monies are not suspended or debarred.

OHA-DWS staff routinely perform suspension and debarment checks for loan program recipients but had not been performing these checks as required for grant recipients of the source water protection program (SWP), which are funded with DWSRF set-aside monies. OHA-DWS staff had noted this deficiency at the end of the last grant award process and provided guidance to SWP program staff to implement these checks with all subsequent funding periods. Additionally, the suspension and debarment check requirement is now also incorporated within the internal SWP ranking and rating documents, so all future grant review processes will include this requirement in writing.

The corrective action was implemented in November 2025 and will continue for all subsequent DWSRF funding activities, inclusive of grants funded via DWSRF set asides. OHA-DWS staff will also verify compliance with this requirement at the end of each application review period.

2025-2027 Mandatory Special Report on Community Mental Health

Treasury Account Report

July 2024 to June 2026

Per ORS 426.506 Community Mental Housing Fund; Community Housing Trust Account

TOTAL PROJECT SCORE (0-100)			100	85	100	95	93
CRITERIA	WEIGHT	SCORING GUIDE					
Strategic Alignment	25%	WEIGHTED SUBTOTAL	7.50	7.50	7.50	7.50	7.50
Alignment to Strategic Plans - Does this investment align with and support the vision, goals, and guiding principles outlined in the EIS Strategic Framework? - Does this investment align with and support the agency's IT and business strategic plans, including strategies for modernizing legacy systems?			3	3	3	3	3
3 - Explicitly aligned and measurable impacts							
2 - Somewhat aligned but no measurable impact							
1 - Partially aligned but no measurable impact							
0 - No alignment or measurable impact							
Technology Best Practices	25%	WEIGHTED SUBTOTAL	7.50	5.00	7.50	7.50	7.50
Align with Technology Best Practices and Priorities - Does this investment align with and support the following enterprise information technology priorities? - Information Security Does this investment improve the security and resilience of the state's systems? - Modernization Playbook: Optimizing service delivery through resilient, adaptive, secure, and customer-centered digital transformation. Does this investment optimize service delivery to the public and/or internally by modernizing agency-specific and cross-agency systems? Does this investment involve or promote the use of shared systems? Does this investment use commercially available systems or software? - Oregon's Data Strategy: Unlocking Oregon's Potential. Leveraging data as a strategic asset. Does the investment improve data analysis, data quality, information-sharing, decision-making, and ethical use? For system modernizations that include data or data systems, has the agency evaluated the current data being collected, its overall quality, and a migration approach if relevant? Has there been evaluation of the data contained within the system to see if changes need to be made to the data collection itself? - Cloud Forward: A Framework for Embracing the Cloud in Oregon. Enabling Oregon to conduct 75% of its business via cloud-based services and			3	2	3	3	3
3 - Fully aligned; strongly enhances position (all applicable criteria addressed)							
2 - Mostly aligned; greatly enhances position (most applicable criteria addressed)							
1 - Partially aligned; somewhat enhances position (some applicable criteria addressed)							
0 - Not aligned; no change (no or very few applicable criteria addressed)							
People and Business-Centered Approach	25%	WEIGHTED SUBTOTAL	7.50	6.67	7.50	6.67	6.67
People-Centered Approach Supporting Diversity, Equity and Inclusion - Does this investment align with and support the State of Oregon, Diversity, Equity, and Inclusion (DEI) Action Plan: A Roadmap to Racial Equity and Belonging, the sponsor's agency-specific Racial Equity Plan, and ethical use of data—investing in data justice and representation, visibility, and ethics to serve all Oregonians? Prompting questions to consider are: - Does this investment put people first—the people who rely on essential services and those working to provide those services? - Does this investment improve equitable access to services, programs, and resources, or make the agency's overall service portfolio more accessible or usable for diverse populations? - Does the agency intend to strengthen public involvement through transformational community engagement, access to information, and decision-making opportunities? - Does this investment reduce or eliminate administrative burdens* that have created barriers to access or reinforced existing inequalities for historically underserved and underrepresented communities? - Does this investment reduces system redundancies within an agency, a program area or the state - If the investment is for agency use, does it improve the agency users'			3	3	3	3	3
3 - Fully Aligned (all applicable criteria addressed)							
2 - Mostly Aligned (most applicable criteria addressed)							
1 - Partially Aligned (some applicable criteria addressed)							
0 - Not Aligned (no or very few applicable criteria addressed)							
N/A - Not Applicable (the project does not present a direct opportunity to put people first, an example is an infrastructure replacement project)							

Enterprise IT Project Prioritization 2027-29			Example Project	OCMIS Resource Parent Respite Provider Inquiry and Application (PRIPCT)	ODDS Case Management System	ODDS Provider Enrollment Maintenance Systems	Case Management Legal and Records Software
TOTAL PROJECT SCORE (0-100)			100	85	100	95	93
CRITERIA	WEIGHT	SCORING GUIDE					
Business Process Transformation - Does this investment contribute to business process improvement/transformation? - Does this investment improve service delivery to customers, partners, or other stakeholders? - Has the agency done public engagement, outreach, or an internal evaluation to identify which populations are most highly impacted (positively and negatively) by these business process changes (e.g., considering populations without home internet in creating a digital application process)? - Have measurable business outcomes and benefits been established, including the return on investment if applicable?		3 - Complete transformation of the business 2 - Major changes to enable growth 1 - Efficiency, cost or productivity changes 0 - No change to business processes	3	2	3	3	2
Investment Risk Impact - Would inaction impact systems or solutions that support critical business functions? - Would inaction increase risk to continuity of services to customers, particularly vulnerable or underserved populations? - Is there increased risk if investment is not addressed during this budget cycle (e.g., security, safety, legal, funding source, or any other related risk)? - Does the investment address non-compliance of federal or state requirement, audit finding, or mandate? - Does this investment address an identified and documented highly probable agency risk?		3 - Significant lowering of agency or enterprise risk 2 - Mostly Aligned (most applicable criteria addressed) 1 - Partially Aligned (some applicable criteria addressed) 0 - No change or increase to agency or enterprise risk	3	3	3	2	3
Agency Readiness and Solution Appropriateness	25%	WEIGHTED SUBTOTAL	7.50	6.25	7.50	6.88	6.25
Organizational Change Management (OCM) - Does the agency have, or intend to acquire, OCM resources with the skillsets and experience for the size and complexity of the project? - Does the agency plan to address and mitigate impact or adoption risks through a change management plan or intend to follow a formal OCM methodology? - Has the agency identified community engagement or community involvement as a component of the change management process? - Is external outreach or training planned to implement this change with constituents? - Will the agency continue to engage customers and communities to inform design, approach, and usability of the solution?		3 - Fully Aligned (all applicable criteria addressed) 2 - Mostly Aligned (most applicable criteria addressed) 1 - Partially Aligned (some applicable criteria addressed) 0 - Not Aligned (no or very few applicable criteria addressed)	3	3	3	2	2
Solution Scale and Approach - Has the agency engaged customers, partners, and communities to understand and structure the business problem, benefits, and outcomes? - Does the investment address the agency’s business problem, benefits and outcomes? - Is the solution of the appropriate size and scale? - Does the solution allow flexibility to cope with changing business processes?		3 - Fully Aligned (all applicable criteria addressed) 2 - Mostly Aligned (most applicable criteria addressed) 1 - Partially Aligned (some applicable criteria addressed) 0 - Not Aligned (no or very few applicable criteria addressed)	3	3	3	3	2
Capacity (Capacity should consider both technical and non-technical resources, including organizational change management, project management, business analysis, testing, communication and community engagement activities.) - Has the agency considered skillsets and capacity requirements needed to effectively resource this initiative? - Does the agency have resources with the necessary skillsets and knowledge, or can the agency acquire the resources? - Will this investment impact the agency’s ability to deliver on its core business functions?		3 - Capacity can be fully met 2 - Capacity can be mostly met 1 - Capacity can be partially met 0 - Capacity cannot be met	3	2	3	3	3

Health Authority, Oregon	Human Services	MES Modularity	P80014	MES Mod System Integration Project	None	The System Integration (SI) Project is a strategic initiative to modernize Oregon's Medicaid technology infrastructure by replacing the legacy MMIS with a modular, scalable integration platform. This platform will enable more agile, efficient, and coordinated service delivery across OHA and ODHS, while meeting CMS and state policy requirements. Following a strong response to the Request for Information (RFI), OHA/ODHS recommends moving forward with a competitive Request for Proposals (RFP) to procure a best-in-class System Integration Platform. The RFP will be designed to attract vendors with proven capabilities in platform development, integration, and long-term support. Upon investment approval, the project will enter the procurement planning phase, including submission of required CMS Advanced Planning Documents (APDs). Key procurement milestones include: •Requirements definition •RFP development and CMS review •Vendor selection and contract execution	Continuing	2025-08-25	2032-03-31	Yes	OIS-1 (27-29)	Implementation	2027-29	Other Funds	3XXX - Personnel Services		3,239,269

Health Authority, Oregon	Human Services	MES Modularity	P80014	MES Mod System Integration Project	None	The System Integration (SI) Project is a strategic initiative to modernize Oregon’s Medicaid technology infrastructure by replacing the legacy MMIS with a modular, scalable integration platform. This platform will enable more agile, efficient, and coordinated service delivery across OHA and ODHS, while meeting CMS and state policy requirements. Following a strong response to the Request for Information (RFI), OHA/ODHS recommends moving forward with a competitive Request for Proposals (RFP) to procure a best-in-class System Integration Platform. The RFP will be designed to attract vendors with proven capabilities in platform development, integration, and long-term support. Upon investment approval, the project will enter the procurement planning phase, including submission of required CMS Advanced Planning Documents (APDs). Key procurement milestones include: •Requirements definition •RFP development and CMS review •Vendor selection and contract execution	Continuing	2025-08-25	2032-03-31	Yes	OIS-1 (27-29)	Implementation	2027-29	Other Funds	4XXX Other Services and Supplies		186,251

Health Authority, Oregon	Human Services	HCIP - Health Care Interpreter Portal - SB 1578	P80044	Health Care Interpreter Scheduling Portal	Legislature	In 2024, the Oregon Legislature passed Senate Bill 1578, mandating the Oregon Health Authority (OHA) to acquire, build, and maintain a Health Care Interpreter (HCI) Scheduling Portal. This centralized portal is designed to enable healthcare providers and Oregon’s system of managed care entities, Coordinated Care Organizations (CCOs), to schedule Certified or Qualified HCIs (spoken and sign language) for Oregon Health Plan (OHP) members with Limited English Proficiency (LEP) or who are Deaf or hard of hearing. Additionally, the legislation transitions reimbursement from flat fees paid to providers for interpreter services to a model where HCIs are paid directly for their services. The project seeks to address long-standing challenges in providing language access, including interpreter shortages, inefficiencies in scheduling, and administrative burdens on providers and HCIs. By centralizing scheduling and transitioning to direct payments, the portal will improve compliance with state and federal language access requirements while fostering trust and quality care for OHP members.	Continuing	2025-02-19	2028-10-10	Yes	MED-5 (27-29)	Implementation	2027-29	Federal Funds	3XXX - Personnel Services	Based on current spend plan build that runs to June 2028. Health Authority, Oregon	Human Services	Public Private Provider	P80034	MMIS Private Public Providers	None	This effort is an enhancement to the MMIS system that would adjust the prior period logic to consider whether a provider is public or private when determining match rate or when classifying the additional payment as a current expenditure or prior period increasing adjustment. The MMIS system contractor, Gainwell, will be responsible to lead and conduct this work, and minimal agency resources will be required.	Continuing	2021-08-02	2028-05-31	No	Budget	Implementation	2029-31	General Fund	3XXX - Personnel Services		30,206

CRITERIA		WEIGHT	SCORING GUIDE																
Strategic Alignment		25%	WEIGHTED SUBTOTAL	7.50	5.00	7.50	0.00	7.50	7.50	7.50	7.50	7.50	7.50	7.50	7.50	7.50	7.50	7.50	7.50
Alignment to Strategic Plans • Does this investment align with and support the vision, goals, and guiding principles outlined in the EIS Strategic Framework ? • Does this investment align with and support the agency's IT and business strategic plans , including strategies for modernizing legacy systems?		3 - Explicitly aligned and measurable impacts																	
		2 - Somewhat aligned but no measurable impact																	
		1 - Partially aligned but no measurable impact		3	2	3		3	3	3	3	3	3	3	3	3	3	3	3
		0 - No alignment or measurable impact																	
Technology Best Practices		25%	WEIGHTED SUBTOTAL	7.50	7.50	7.50	0.00	7.50	7.50	7.50	7.50	7.50	7.50	7.50	7.50	7.50	7.50	7.50	5.00
Align with Technology Best Practices and Priorities • Does this investment align with and support the following enterprise information technology priorities? - Information Security Does this investment improve the security and resilience of the state's systems? - Modernization Playbook: Optimizing service delivery through resilient, adaptive, secure, and customer-centered digital transformation. Does this investment optimize service delivery to the public and/or internally by modernizing agency-specific and cross-agency systems? Does this investment involve or promote the use of shared systems? Does this investment use commercially available systems or software? - Oregon's Data Strategy: Unlocking Oregon's Potential. Leveraging data as a strategic asset. Does the investment improve data analysis, data quality, information-sharing, decision-making, and ethical use? For system modernizations that include data or data systems, has the agency evaluated the current data being collected, its overall quality, and a migration approach if relevant? Has there been evaluation of the data contained within the system to see if changes need to be made to the data collection itself? - Cloud Forward: A Framework for Embracing the Cloud in Oregon. Enabling Oregon to conduct 75% of its business via cloud-based services and infrastructure		3 - Fully aligned; strongly enhances position (all applicable criteria addressed)																	
		2 - Mostly aligned; greatly enhances position (most applicable criteria addressed)		3	3	3		3	3	3	3	3	3	3	3	3	3	3	2
		1 - Partially aligned; somewhat enhances position (some applicable criteria addressed)																	
		0 - Not aligned; no change (no or very few applicable criteria addressed)																	
People and Business-Centered Approach		25%	WEIGHTED SUBTOTAL	7.50	5.83	7.50	0.00	6.67	6.67	6.67	4.17	3.33	7.50	5.83	6.67	6.67	7.50	6.67	6.67
People-Centered Approach Supporting Diversity, Equity and Inclusion •Does this investment align with and support the State of Oregon, Diversity, Equity, and Inclusion (DEI) Action Plan: A Roadmap to Racial Equity and Belonging, the sponsor's agency-specific Racial Equity Plan, and ethical use of data—investing in data justice and representation, visibility, and ethics to serve all Oregonians? Prompting questions to consider are: ◦Does this investment put people first—the people who rely on essential services and those working to provide those services? ◦Does this investment improve equitable access to services, programs, and resources, or make the agency's overall service portfolio more accessible or usable for diverse populations? ◦Does the agency intend to strengthen public involvement through transformational community engagement, access to information, and decision-making opportunities? ◦Does this investment reduce or eliminate administrative burdens* that have created barriers to access or reinforced existing inequalities for historically underserved and underrepresented communities? ◦Does this investment reduces system redundancies within an agency, a program area or the state ◦If the investment is for agency use, does it improve the agency users' experience?		3 - Fully Aligned (all applicable criteria addressed)																	
		2 - Mostly Aligned (most applicable criteria addressed)																	
		1 - Partially Aligned (some applicable criteria addressed)		3	3	3		2	3	3	3	1	3	2	2	2	3	2	3
		0 - Not Aligned (no or very few applicable criteria addressed)																	
N/A - Not Applicable (the project does not present a direct opportunity to put people first, an example is an infrastructure replacement project)																			
Business Process Transformation • Does this investment contribute to business process improvement/transformation? • Does this investment improve service delivery to customers, partners, or other stakeholders? • Has the agency done public engagement, outreach, or an internal evaluation to identify which populations are most highly impacted (positively and negatively) by these business process changes (e.g., considering populations without home internet in creating a digital application process)? • Have measurable business outcomes and benefits been established, including the return on investment if applicable?		3 - Complete transformation of the business																	
		2 - Major changes to enable growth		3	2	3		3	3	2	1	2	3	2	3	3	3	3	2
		1 - Efficiency, cost or productivity changes																	
		0 - No change to business processes																	
Investment Risk Impact • Would inaction impact systems or solutions that support critical business functions? • Would inaction increase risk to continuity of services to customers, particularly vulnerable or underserved populations? • Is there increased risk if investment is not addressed during this budget cycle (e.g., security, safety, legal, funding source, or any other related risk)? • Does the investment address non-compliance of federal or state requirement, audit finding, or mandate? • Does this investment address an identified and documented highly probable agency risk?		3 - Significant lowering of agency or enterprise risk																	
		2 - Mostly Aligned (most applicable criteria addressed)		3	2	3		3	2	3	1	1	3	3	3	3	3	3	3
		1 - Partially Aligned (some applicable criteria addressed)																	
		0 - No change or increase to agency or enterprise risk																	
Agency Readiness and Solution Appropriateness		25%	WEIGHTED SUBTOTAL	7.50	6.25	7.50	0.00	6.88	6.88	7.50	5.63	5.00	6.25	6.25	7.50	7.50	7.50	7.50	6.88
Organizational Change Management (OCM) • Does the agency have, or intend to acquire, OCM resources with the skillsets and experience for the size and complexity of the project? • Does the agency plan to address and mitigate impact or adoption risks through a change management plan or intend to follow a formal OCM methodology? • Has the agency identified community engagement or community involvement as a component of the change management process? • Is external outreach or training planned to implement this change with constituents? • Will the agency continue to engage customers and communities to inform design, approach, and usability of the solution?		3 - Fully Aligned (all applicable criteria addressed)																	
		2 - Mostly Aligned (most applicable criteria addressed)																	
		1 - Partially Aligned (some applicable criteria addressed)		3	2	3		3	3	3	1	2	2	3	3	3	3	3	3
		0 - Not Aligned (no or very few applicable criteria addressed)

OIS QUARTERLY TARGET REVIEW QUARTER 2

July 23, 2026

OIS welcomes all participants. If you have any questions about accommodations or need any assistance to participate, please call or email: savannah.selander@odhsoha.oregon.gov, or 503-979-5896. All relay calls are accepted.

AGENDA

- Welcome
- Measures Presentation
- Break
- Strategic Technology Plan
Actions Status
- Questions & Closing
Remarks

BEST PRACTICES DURING A VIRTUAL MEETING

- Remain **MUTED** unless speaking
- Actively engage and participate
- Questions or comments?
Please raise your virtual hand and the presenter will call on you

WHY MEASURE?

- Opportunity to identify improvements
- Adjust to changing realities
- Make decisions based on facts and data
- Know where to focus in

OM 2.1A

System Uptime - Network

Last 27 Months
4/25/2024 - 7/24/2026

Target Met

System Uptime - Network

Henne Darren

Percent of time Network is available for our customers (via ETS)

Considerations & Reflections for Achieving Next Target

Last Value Comment

Q1 2026 Summary Total Network Hours Interruption/Instability - 314 Hours

OM 2.1C

System Uptime - MMIS

Last 27 Months
4/25/2024 - 7/24/2026

Target Met

System Uptime - MMIS

KRUMMEL Richard

Percent of time MMIS is available for our customers (contractual)

Considerations & Reflections for Achieving Next Target

Last Value Comment

There were no instances of unscheduled downtime for the quarter. January was up 734.50 out of 734.50 hours. February was up 663.38 out of 663.38 hours. March was up 734.85 out of 734.85 hours.

OM 2.2C

System Response Time - MMIS

Last 27 Months
4/25/2024 - 7/24/2026

Target Met

System Response Time - MMIS

KRUMMEL Richard

Percent of response time SLAs met (within 2% of SLA Target) (contractual)

Considerations & Reflections for Achieving Next Target

Last Value Comment

All 18 of 18 response time SLAs were met.

OM 2.1D

System Uptime - Mainframe Environment

Last 27 Months
4/25/2024 - 7/24/2026

Target Met

System Uptime - Mainframe Environment

Bill Williams

System availability of Mainframe Environment (List of top business apps)

Considerations & Reflections for Achieving Next Target

Last Value Comment

Q1 2026 Mainframe Systems Incidents - None. Q1 2026 Non-Mainframe Systems Incidents - One - 2/17/2026 - Sd00 command is not functioning in DHR. A CICS transaction, SD00, became unresponsive when users tried to reset their passwords. SD00 is routed from GCICS to HCICS. This region has been having difficulty with the journal files. OIS incident #3383567 linked to DCS Ivanti incident #7038394 indicates that a workaround was done but a permanent resolution will require z/OS maintenance which will take some time to apply. This same issue was encountered on 9/8/25 and resolved with DCS Ivanti Request #5054779.

OM 2.1E

System Uptime - ORKids

Last 27 Months
4/25/2024 - 7/24/2026

Target Met

System Uptime - ORKids

Bryant Ripley

System availability of OR-Kids

Considerations & Reflections for Achieving Next Target

Last Value Comment

No unscheduled downtime this quarter. We deployed 16 application and 13 report releases this quarter.

OM 2.1F

System Uptime - eXPRS

Last 27 Months
4/25/2024 - 7/24/2026

Target Not Met

System Uptime - eXPRS

Holland Tom S

System availability of eXPRS

Considerations & Reflections for Achieving Next Target

Last Value Comment

eXPRS Proxy Server outages due to Log file filling storage, runaway backup process, and 3 separate events of buffer exceeding its threshold.

OM 2.1H

System Uptime - ONE

Last 27 Months
4/25/2024 - 7/24/2026

Target Met

System Uptime - ONE

Neuschwanger Janice A

Total time of unplanned system outages 24/7 uptime totals calculated as percentage.

Considerations & Reflections for Achieving Next Target

Last Value Comment

The ONE system has continued to be stable and available since steps were taken in Fall 2025 to improve database and application issues.

OM 2.2H

System Response Time - ONE

Last 27 Months
4/25/2024 - 7/24/2026

Target Met

System Response Time - ONE

Neuschwanger Janice A

Percent of all SLA response time met (within 2% of SLA target)

Considerations & Reflections for Achieving Next Target

Last Value Comment

ONE system response continues to meet or exceed SLAs since the system was migrated to Azure in July 2025 and additional steps were taken to improve database performance. Teams are also in the process of refreshing all of the ONE application servers in 2026, "replacing" two application servers per month. The goal is to refresh all of the 27 ONE Worker Portal servers by the end of 2026.

OM 2.3C

System Performance – MMIS Pharmacy POS Avail... ▾

Last ▾ 27 Months ▾
4/25/2024 - 7/24/2026

Target Met

System Performance – MMIS Pharmacy POS Availability

KRUMMEL Richard

(Count of weekends POS services restored by 8 a.m.) / (Total weekends in period)

Considerations & Reflections for Achieving Next Target

Last Value Comment

Quarterly target met! Post-cloud migration, services consistently restored between 2:37am and 2:53am, regardless of volume. Work to rearchitect the process that will remove the need for downtime is falling behind other priority work.

OM 2.4C

System Performance – MMIS Delivery of Enrollment...

Last 27 Months
4/25/2024 - 7/24/2026

Target Met

System Performance – MMIS Delivery of Enrollment Files

KRUMMEL Richard

(Count of days 834 files delivered by 8 a.m.) / (Total days 834 files expected to be delivered)

Considerations & Reflections for Achieving Next Target

Last Value Comment

Deliveries were before 8am 64 out of 64 days. Times ranged from 1:27am to as early as 8:16pm the night before.

OM 3.1A

Oregon Health Authority

Annual Performance Progress Report

Reporting Year 2025

Published: 12/4/2025 4:42:43 PM

KPM #	Approved Key Performance Measures (KPMs)
1	INITIATION OF ALCOHOL AND OTHER DRUG DEPENDENCE TREATMENT - Percentage of members with a new episode of alcohol or other drug dependence who received initiation of AOD treatment within 14 days of diagnosis.
2	ENGAGEMENT OF ALCOHOL AND OTHER DRUG DEPENDENCE TREATMENT - Percentage of members with a new episode of alcohol or other drug dependence who received two or more services within 30 days of initiation visit.
3	FOLLOW-UP AFTER HOSPITALIZATION FOR MENTAL ILLNESS - Percentage of enrollees 6 years of age and older who were hospitalized for treatment of mental health disorders and who were seen on an outpatient basis or were in intermediate treatment within seven days of discharge.
4	MENTAL, PHYSICAL, AND DENTAL HEALTH ASSESSMENTS FOR CHILDREN IN DHS CUSTODY - Percentage of children in DHS custody who receive a mental, physical, and dental health assessment within 60 days of the state notifying CCOs that the children were placed into custody with DHS (foster care).
5	30 DAY ILLICIT DRUG USE AMONG 8TH GRADERS - Percentage of 8th graders who have used illicit drugs in the past 30 days.
6	30 DAY ALCOHOL USE AMONG 8TH GRADERS - Percentage of 8th graders who have used alcohol in the past 30 days.
7	ACCESS TO CARE - Percentage of members who responded "always" or "usually" to getting care quickly.
8	MEMBER SATISFACTION OF CARE - Composite measurement: how well doctors communicate; health plan information and customer service (Medicaid population).
9	RATE OF TOBACCO USE (POPULATION) - Rate of tobacco use among adults.
10	RATE OF OBESITY (POPULATION) - Percentage of adults who are obese among Oregonians.
11	CUSTOMER SERVICE - Percentage of OHA customers rating their satisfaction with the agency's customer service as "good" or "excellent" overall, timeliness, accuracy, helpfulness, expertise, availability of information.
12	HEALTH EQUITY MEASURE – COMPONENT #1: MEANINGFUL LANGUAGE ACCESS TO CULTURALLY RESPONSIVE HEALTH CARE SERVICES FOR CCO MEMBERS - Component 1 is based on an annual language access self-assessment survey and designed to evaluate the development of structures and workflow processes to provide quality and consistent interpreter services.
13	HEALTH EQUITY MEASURE - COMPONENT #2: MEANINGFUL LANGUAGE ACCESS TO CULTURALLY RESPONSIVE HEALTH CARE SERVICES FOR CCO MEMBERS - Component 2 is based on the reporting of quarterly utilization data on interpreter services and designed to measure quality of interpreter services.
14	INFANT MORTALITY RATE - Numerator: # of deaths of infants <365 days of age in specified time period Denominator: # of live births in specified time period. Rate calculation: (Num/Denom)*1,000
15	REDUCTION OF SEVERE MATERNAL MORBIDITY - Numerator: # of cases of severe maternal morbidity* in specified time period Denominator: # of delivery hospitalizations in specified time period Rate calculation: (Num/Denom)*10,000 (read out as "[number] per 10,000 delivery hospitalizations") *Note: Severe maternal morbidity cases are determined by using a validated set of ICD-10 diagnosis and procedure codes to examine hospital data.
16	QUALITY OF LIFE - POOR PHYSICAL HEALTH - Average number of physically unhealthy days in the past 30 among adults. Measuring health-related quality of life helps build understanding around people's lived experience with disabilities and chronic diseases across the population. Self-report of days when physical health was not good is a reliable estimate of recent health status.
17	QUALITY OF LIFE - POOR MENTAL HEALTH - Average number of mentally unhealthy days in the past 30 days (age 18+). Measuring health-related quality of life helps build understanding around people's lived experience with disabilities and chronic diseases across the population. Self-report of days when mental health was not good is a reliable estimate of recent health status.
18	PREMATURE DEATH - Number of years of potential life lost (YPLL) per 100,000 before age 75. Premature death is measured by summing the years between age at death and age 75 across all people who died before reaching that age. It's a way of quantifying the societal impact of early deaths in a population. Causes of death that are more likely to affect younger people – such as congenital anomalies and accidental injuries – contribute to higher rates of premature death.
19	MORTALITY FROM DRUG OVERDOES - Number of deaths per 100,000 from drug overdoses excluding suicide. Drug overdose deaths account for a major proportion of all premature deaths and are largely preventable.
20	TOBACCO USE - TEENS - Percent of 11th graders who use tobacco (past 30 days). Cigarette smoking is the most common cause of preventable death and disease. It is identified as a cause of various cancers, cardiovascular disease, and respiratory conditions, as well as low birthweight and other adverse health outcomes. Many teen smokers become adult smokers. Measuring the prevalence of tobacco use in the youth population can alert communities to potential adverse health outcomes and can be valuable for assessing the need for prevention programs or the effectiveness of existing programs.
21	OBESITY - TEENS - Percent of 11th graders who are obese (BMI >= 95th percentile for age/sex). Obesity is the second leading cause of preventable death in Oregon. It is a major risk factor for high blood pressure, high cholesterol, diabetes, heart disease, and cancer. Obese teens are at an increased risk of becoming obese adults.
22	STATEWIDE SUSTAINABLE COST OF CARE - Comparison of health care cost changes to personal income changes. Any value 0 or higher is green because we want per capita income growth to equal or exceed per capita health care cost growth. By way of background, the statewide sustainable cost of care measure is a comparison between per person growth in income in Oregon and health care spending growth in Oregon. Historically, health care costs have grown faster than income and Oregon is trying to change that with the Cost Growth Target program and other initiatives. When the result from subtracting per person income growth minus per person health care cost growth is 0 or positive, it means income is growing at the same pace or faster than health care costs, which is good. When the measure is a negative number, it means health care costs are growing faster than income, which is not good.
23	OHA SUSTAINABLE COST OF CARE - Difference between real personal income and health care inflation. Any value 0 or higher is green because we want per capita income growth to equal or exceed OHA's per person spending on PEBB, OEBC, and OHP. By way of background, the OHA sustainable cost of care measure is a comparison between per person growth in income in Oregon and health care spending growth for OHA's three health programs: Oregon Health Plan, Public Employees Benefits and Oregon Educators Benefits. When the result from subtracting per person income growth in Oregon minus per person spending on PEBB, OEBC, and OHP is 0 or positive, it means income is growing at the same pace or faster than OHA's health care costs, which is good. When the measure is a negative number, it means the cost of OHA's three health care programs is growing faster than income, which is not good.
24	CRITICAL EVENTS MEETING THE 14-CALENDAR DAY TIMELINE TO PROVIDE CORRESPONDENCE TO TRIBAL LEADERS - To track compliance with the OHA Tribal Consultation Policy timelines, % of critical events meeting the timeline. Total number of critical events meeting the timeline/total number of identified critical events.
25	TRIBAL CONSULTATIONS MEETING THE 30-CALENDAR DAY TIMELINE FOR REPORTING OF OUTCOME OF CONSULTATION - To track compliance with the OHA Tribal Consultation Policy timelines, % of consultations reporting outcome within 30 calendar days. Total number of consultations meeting reporting timeline/total number of consultations

KPM #	Approved Key Performance Measures (KPMs)
26	TIMELINESS OF TRANSLATIONS DURING EMERGING PUBLIC HEALTH EVENTS - To allow for equitable access to important public health information during public health events. Meet Federal and state legal obligations to provide information in alternative languages and formats, including Title VI of the Civil Rights Act. Compliance with agency policies, including DHS OHA-010-013 Alternate Formats and Language Access Services. Number of hours from Incident Manager approval of an important (expedited) public information document for an identified public health event to the return of translated documents to the incident's Joint Information Center.

Performance Summary	Green	Yellow	Red
	= Target to -5%	= Target -5% to -15%	= Target > -15%
Summary Stats:	61.54%	7.69%	30.77%

KPM #1	INITIATION OF ALCOHOL AND OTHER DRUG DEPENDENCE TREATMENT - Percentage of members with a new episode of alcohol or other drug dependence who received initiation of AOD treatment within 14 days of diagnosis.
	Data Collection Period: Jan 01 - Dec 31

* Upward Trend = positive result

Report Year	2021	2022	2023	2024	2025
Initiation of alcohol and other drug dependence treatment					
Actual	39.30%	39.30%	42.40%	42.30%	41.70%
Target	40.20%	40.20%	40.20%	40.20%	40.20%

How Are We Doing

The percentage of members ages 18 and older newly diagnosed with alcohol or other drug dependencies who initiated treatment within 14 days stayed was 41.7% in 2024. This rate stayed steady from 2023 to 2024 and is above the 2019 pre-pandemic rate. Data prior to 2022 are not directly comparable due to a methodology change.

Factors Affecting Results

It is possible that the increased statewide emphasis on alcohol and drug use screening (SBIRT) due to the CCO incentive measure in 2020 resulted in an increase in initiation of alcohol and drug treatment, as more individuals with risky or problematic substance use are identified and referred to treatment services.

KPM #2	ENGAGEMENT OF ALCOHOL AND OTHER DRUG DEPENDENCE TREATMENT - Percentage of members with a new episode of alcohol or other drug dependence who received two or more services within 30 days of initiation visit.
	Data Collection Period: Jan 01 - Dec 31

* Upward Trend = positive result

Report Year	2021	2022	2023	2024	2025
Engagement of alcohol and other drug dependence treatment					
Actual	16.20%	15.40%	16.10%	16.60%	16.50%
Target	11%	11%	11%	17%	17%

How Are We Doing

The percentage of members who continued their treatment was 16.5% in 2024. This rate stayed steady from 2023 to 2024 and is still below the 2019 pre-pandemic rate. Data prior to 2022 is not directly comparable due to a methodology change.

Factors Affecting Results

This was selected to be an incentive measure beginning in 2020, which possibly brought increased focus on this measure.

KPM #3	FOLLOW-UP AFTER HOSPITALIZATION FOR MENTAL ILLNESS - Percentage of enrollees 6 years of age and older who were hospitalized for treatment of mental health disorders and who were seen on an outpatient basis or were in intermediate treatment within seven days of discharge.
	Data Collection Period: Jan 01 - Dec 31

* Upward Trend = positive result

Report Year	2021	2022	2023	2024	2025
Follow-up after hospitalization for mental illness					
Actual	74.90%	69.10%	39.30%	34.50%	35.20%
Target	72%	72%	72%	72%	72%

How Are We Doing

The percentage of members who received a follow-up visit within seven days after a mental illness-related hospitalization was 35.2%. This rate stayed steady from 2023 to 2024 but is below the 2019 pre-pandemic rate. Results prior to 2022 are not directly comparable to later years.

Factors Affecting Results

Starting in 2022, this measure now aligns with HEDIS specifications, which requires services be provided by mental health providers and not be on the same day as discharge.

KPM #4	MENTAL, PHYSICAL, AND DENTAL HEALTH ASSESSMENTS FOR CHILDREN IN DHS CUSTODY - Percentage of children in DHS custody who receive a mental, physical, and dental health assessment within 60 days of the state notifying CCOs that the children were placed into custody with DHS (foster care).
	Data Collection Period: Jan 01 - Dec 31

* Upward Trend = positive result

Report Year	2021	2022	2023	2024	2025
MENTAL, PHYSICAL, AND DENTAL HEALTH ASSESSMENTS FOR CHILDREN IN DHS CUSTODY					
Actual	79.90%	88.10%	88.30%	88.30%	88.90%
Target	90%	90%	90%	90%	90%

How Are We Doing

The statewide assessment rate increased slightly from 87.8% in CY2023 to 88.9% in CY2024, with the improvements seen in 10 CCOs.

Factors Affecting Results

CCOs continue to improve care coordination workflow and the appointment timeliness and availability for children newly entered foster care.

KPM #5	30 DAY ILLICIT DRUG USE AMONG 8TH GRADERS - Percentage of 8th graders who have used illicit drugs in the past 30 days.
	Data Collection Period: Jan 01 - Dec 31

* Upward Trend = negative result

Report Year	2021	2022	2023	2024	2025
30 day illicit drug use among 8th graders					
Actual	1.70%		1%		0.50%
Target	6%		6%		1%

How Are We Doing

The use of illicit drugs (excluding marijuana) among public school 8th graders has decreased since 2020. This decline is attributed to the exclusion of marijuana use and prescription opioid misuse from the measurement. To better reflect current drug use behaviors among Oregon youth, it is recommended to expand this Key Performance Measure (KPM). The new calculation should include the percentage of 8th graders who report using marijuana, misusing prescription opioids, or using other illicit drugs on one or more days in the past 30 days. The Student Health Survey will be administered annually starting in 2024.

Factors Affecting Results

This key performance measure does not account for lifetime marijuana use or prescription opioid misuse, which are more common than illicit substance uses among Oregon youth.

KPM #6	30 DAY ALCOHOL USE AMONG 8TH GRADERS - Percentage of 8th graders who have used alcohol in the past 30 days.
	Data Collection Period: Jan 01 - Dec 31

* Upward Trend = negative result

Report Year	2021	2022	2023	2024	2025
30 day alcohol use among 8th graders					
Actual	6.10%		6%		4.80%
Target	13%		13%		5%

How Are We Doing

Past 30-day alcohol use and binge drinking among Oregon youth has declined significantly over the last decade. However, adult use and alcohol-related deaths have been on the rise. Evidence tells us that people who start drinking earlier in life have a higher risk of using alcohol excessively or developing alcohol use disorder later in life. While identifying early patterns of alcohol use is important for the development and implementation of prevention and intervention strategies for youth, similar resources and strategies are needed across the lifespan to curb the increasing burden of alcohol-related harms in Oregon.

Factors Affecting Results

Alcohol use and binge drinking among youth has been declining over the past decade. The COVID-19 pandemic and subsequent stay-at-home policies contributed to further declines in more recent years. It is yet to be seen if this measure returns to pre-pandemic levels. Use of other substances such as cannabis or new nicotine products may also have an effect on these results.

KPM #7	ACCESS TO CARE - Percentage of members who responded "always" or "usually" to getting care quickly.
	Data Collection Period: Jan 01 - Dec 31

Report Year	2021	2022	2023	2024	2025
a. Adults					
Actual	81.80%	79.40%	76.50%	76.40%	77.50%
Target	88%	88%	88%	88%	88%
b. Children					
Actual	89.40%	85.70%	84.20%	85.40%	85.20%
Target	88%	88%	88%	88%	88%

How Are We Doing

The percentage of adult members who thought they received appointments and care when needed was 77.5% in 2024. This rate held steady from 2023 to 2024 but is still below the 2019 pre-pandemic rate. Data from 2022 onward are not directly comparable to previous years. Starting in 2020, OHA refined calculations for composite metrics. Starting in 2021, we began including the oversample of target race and ethnicity groups in our results.

The percentage of child members who received appointments and care when needed was 85.2% in 2024. This rate held steady from 2023 to 2024, below the 2019 pre-pandemic rate. Data from 2022 onward are not comparable to previous years. Starting in 2020, OHA refined calculations for composite metrics. Also in 2020, CAHPS stopped sampling children with chronic conditions separately from the general population. Starting in 2021, we began including the oversample of target race and ethnicity groups in our results.

Factors Affecting Results

The COVID-19 pandemic may have affected most recent performance. This measure is included in the state's Medicaid demonstration agreement with CMS.

KPM #8	MEMBER SATISFACTION OF CARE - Composite measurement: how well doctors communicate; health plan information and customer service (Medicaid population).
	Data Collection Period: Jan 01 - Dec 31

Report Year	2021	2022	2023	2024	2025
a. Adult					
Actual	88.90%	89.20%	90.10%	88.20%	89.40%
Target	90%	90%	90%	90%	90%
b. Children					
Actual	88%	86.40%	90.30%	89.70%	89.40%
Target	90%	90%	90%	90%	90%

How Are We Doing

The rate of adults who were satisfied with their experience of care was 89.4% in 2024. This rate held steady from 2023 to 2024 but is still below the 2019 pre-pandemic rate. Data from 2022 onward are not directly comparable to previous years. Starting in 2020, OHA refined calculations for composite metrics. Starting in 2021, we began including the oversample of target race and ethnicity groups in our results.

The percentage of adults who were satisfied with their child's experience of care was 89.4% in 2024. This rate held steady from 2023 to 2024 but is still below the 2019 pre-pandemic rate. Data from 2022 onward are not directly comparable to previous years. Starting in 2020, OHA refined calculations for composite metrics. Starting in 2021, we began including the oversample of target race and ethnicity groups in our results.

Factors Affecting Results

The COVID-19 pandemic may have affected most recent performance. This measure is included in the state's Medicaid demonstration agreement with CMS.

KPM #9	RATE OF TOBACCO USE (POPULATION) - Rate of tobacco use among adults.
	Data Collection Period: Jan 01 - Dec 31

* Upward Trend = negative result

Report Year	2021	2022	2023	2024	2025
Rate of tobacco use - adult population					
Actual	17.18%	15.80%	15.30%	13.90%	14%
Target	15%	15%	15%	15%	15%

How Are We Doing

Also though traditional tobacco products (cigarettes and chew) have seen significant reductions, new types of nicotine are increasing.

Factors Affecting Results

The current measure does not fully reflect tobaccos use. A new measure is recommended that stays current with a changing nicotine/tobacco commercial landscape.

KPM #10	RATE OF OBESITY (POPULATION) - Percentage of adults who are obese among Oregonians.
	Data Collection Period: Jan 01 - Dec 31

* Upward Trend = negative result

Report Year	2021	2022	2023	2024	2025
Rate of obesity - adult population					
Actual	29.47%	31.20%	31.70%	33.80%	33.90%
Target	27%	27%	27%	27%	27%

How Are We Doing

The obesity rate continues to increase (worsen) in Oregon.

Factors Affecting Results

The main factor affecting Oregonian’s results is limited funds for statewide initiatives that promote healthy environments where access to physical activity is improved and barriers to nutrition security are reduced.

KPM #11	CUSTOMER SERVICE - Percentage of OHA customers rating their satisfaction with the agency's customer service as "good" or "excellent" overall, timeliness, accuracy, helpfulness, expertise, availability of information.
	Data Collection Period: Jan 01 - Dec 31

Report Year	2021	2022	2023	2024	2025
Overall					
Actual	86%	86%	85%	85%	86%
Target	95%	95%	95%	95%	95%
Accuracy					
Actual	86%	87%	83%	83%	86%
Target	95%	95%	95%	95%	95%
Availability of Information					
Actual	82%	81%	80%	80%	81%
Target	95%	95%	95%	95%	95%
Expertise					
Actual	86%	88%	86%	88%	88%
Target	95%	95%	95%	95%	95%
Helpfulness					
Actual	86%	87%	86%	86%	87%
Target	95%	95%	95%	95%	95%
Timeliness					
Actual	86%	87%	86%	86%	90%
Target	95%	95%	95%	95%	95%

How Are We Doing

Overall - Results continue to be stable year over year, but we did see a slight increase from 2023 to 2024. 2024 and 2025 overall results are the same.

Accuracy - We saw a three percent increase from 2023 to 2024 results. 2024 and 2025 are the same.

Avail of Info - Results continue to be stable year over year, with a slight improvement over last year's results.

Expertise - We saw improved results in this category this year.

Helpfulness - Results continue to be stable year over year, with a slight improvement over last year's results.

Timeliness - We saw a four percent improvement in the timeliness category.

Factors Affecting Results

While we send the survey to the same audience (all PEBB members) each year, only about 20-25% of members respond. It's not always the same members, so it's difficult to really gauge improvement or lack thereof.

KPM #12	HEALTH EQUITY MEASURE – COMPONENT #1: MEANINGFUL LANGUAGE ACCESS TO CULTURALLY RESPONSIVE HEALTH CARE SERVICES FOR CCO MEMBERS - Component 1 is based on an annual language access self-assessment survey and designed to evaluate the development of structures and workflow processes to provide quality and consistent interpreter services.
	Data Collection Period: Jan 01 - Dec 31

* Upward Trend = positive result

Report Year	2021	2022	2023	2024	2025
Health Equity Measure – component #1: Meaningful language access to culturally responsive health care services for CCO members					
Actual			90.40%	75%	115%
Target				53%	63%

How Are We Doing

The total score for 2025 was 115 and the minimum score and percentage scores were 83%.

Factors Affecting Results

4 CCOs did not pass component 1 because they did not meet one or more of the following requirements for passing the metric component: answer all questions; pass all must pass questions in all 4 domains; meet the minimum points and percentage score; in the measurement year.What factors are contributing to the results:(1) There were more must pass questions and attestation requirements for 2025 compared to 2024. The increase in questions is part of the glidepath approach to implementing this metric.(2) OHA is aligning agency-wide work to address CCO needs for this metric, including hiring a consultant to work with CCOs to improve their capacity to collect required data for this metric.

KPM #13	HEALTH EQUITY MEASURE - COMPONENT #2: MEANINGFUL LANGUAGE ACCESS TO CULTURALLY RESPONSIVE HEALTH CARE SERVICES FOR CCO MEMBERS - Component 2 is based on the reporting of quarterly utilization data on interpreter services and designed to measure quality of interpreter services.
	Data Collection Period: Jan 01 - Dec 31

* Upward Trend = positive result

Report Year	2021	2022	2023	2024	2025
Health Equity Measure – component #2: Meaningful language access to culturally responsive health care services for CCO members					
Actual			6.10%		9.90%
Target			7.30%		7.30%

How Are We Doing

CCO performance is mixed. While all but 1 CCOs passed component 1, the overall average performance for providing quality interpretation for CCO members in component #2 is still low at 9.9, even though there has been a slight improvement compared to data from their last performance in 2022.

Factors Affecting Results

Most CCOs are unable to consistently identify members who need interpretation services, provide them the appropriate interpretation services, and capture and report.

KPM #14	INFANT MORTALITY RATE - Numerator: # of deaths of infants <365 days of age in specified time period Denominator: # of live births in specified time period. Rate calculation: (Num/Denom)*1,000
	Data Collection Period: Jan 01 - Dec 31

* Upward Trend = negative result

Report Year	2021	2022	2023	2024	2025
Infant Mortality Rate					
Actual			3.76	4.49	4.57
Target			3.86	3.86	3.86

How Are We Doing

Data reported is final from 2023. Entered in 2025. Overall infant mortality rate is for single year only.

The infant mortality rate increased slightly from 4.49 infant deaths per 1,000 live births in 2022, to 4.57 infant deaths per 1,000 live births in 2023. While the overall rate has remained steady, inequities by race and ethnicity persist, with the highest infant mortality rates among non-Hispanic Black infants, with a rate of 8.83, followed by non-Hispanic American Indian/Alaska Native infants, with a rate of 8.41. In contrast, the lowest infant mortality rates are among non-Hispanic Asian infants, with a rate of 2.51, and non-Hispanic White infants, with a rate of 3.88.

Factors Affecting Results

These inequities are reflected in national infant mortality statistics, with the highest rates among non-Hispanic Black and non-Hispanic American Indian/Alaska Native infants. Factors Affecting Results: Approximately two-thirds of infant deaths occur in the neonatal period (<1 month old) and one-third occur in the postneonatal period (1 month to <1 year). Neonatal mortality is predominantly related to prematurity, congenital anomalies, and other perinatal conditions. Postneonatal mortality is mostly attributable to sudden unexpected infant death (SUID), congenital anomalies, infection, and injury. Inequities in infant mortality by race and ethnicity are driven by institutional and systemic racism, which lead to inequities in access to both healthcare and social determinants of health, and contribute to lifelong toxic stress among marginalized communities.

KPM #15	REDUCTION OF SEVERE MATERNAL MORBIDITY - Numerator: # of cases of severe maternal morbidity* in specified time period Denominator: # of delivery hospitalizations in specified time period Rate calculation: (Num/Denom)*10,000 (read out as "[number] per 10,000 delivery hospitalizations") *Note: Severe maternal morbidity cases are determined by using a validated set of ICD-10 diagnosis and procedure codes to examine hospital data.
	Data Collection Period: Jan 01 - Dec 31

* Upward Trend = negative result

Report Year	2021	2022	2023	2024	2025
Reduction of Severe Maternal Morbidity					
Actual			8.18	81.80	118
Target				75	75

How Are We Doing

118.0 per 10,000 deliveries for calendar year 2024.

The rate of overall severe maternal morbidity (SMM), excluding cases of blood product transfusion only, has increased from 94 per 10,000 deliveries in 2023, to 118 per 10,000 deliveries in 2024. While the incidence of SMM in Oregon has been trending upwards for several years, this represents an increase of approximately 25% year over year.

Factors Affecting Results

SMM is a composite index that encompasses 21 separate unexpected outcomes of labor and delivery that result in significant short or long-term consequences to a woman’s health. Within the SMM composite measure, two indicators with the highest incidence rates, Acute Renal failure at 42 per 10,000 delivery hospitalizations and Disseminated Intravascular Coagulation 32 per 10,000 delivery hospitalizations also showed significant year over year increases. Additionally, the increase in SMM in Oregon follows national trends, where significant inequities exist by race and ethnicity. The most recent available data for Oregon by race and ethnicity show the highest incidence of SMM among Non-Hispanic Native Hawaiian/Pacific Islander populations (114 per 10,000 delivery hospitalizations in 2020-2023) and the lowest incidence among Non-Hispanic White populations (77 per 10,000 delivery hospitalizations in 2020-2023).

KPM #16	QUALITY OF LIFE - POOR PHYSICAL HEALTH - Average number of physically unhealthy days in the past 30 among adults. Measuring health-related quality of life helps build understanding around people’s lived experience with disabilities and chronic diseases across the population. Self-report of days when physical health was not good is a reliable estimate of recent health status.
	Data Collection Period: Jan 01 - Dec 31

* Upward Trend = negative result

Report Year	2021	2022	2023	2024	2025
Quality of Life - Poor Physical Health					
Actual			3.30		4.70
Target			3		3

How Are We Doing

The average number of physically unhealthy days reported by Oregonians has climbed steadily from a low in 2020 (2.9 days) to the highest level in 2024 since 2010 (4.7) days. The increase puts the measure in the red (> 4.4 days) for the second time since 2019. The target is 3.0 days.

Factors Affecting Results

- Quality of education
- Living wage jobs
- Safe homes and neighborhoods
- Access to health care
- Health behaviors such as poor nutrition that increase prevalence of chronic disease
- Access to quality physical and mental health care

KPM #17	QUALITY OF LIFE - POOR MENTAL HEALTH - Average number of mentally unhealthy days in the past 30 days (age 18+). Measuring health-related quality of life helps build understanding around people’s lived experience with disabilities and chronic diseases across the population. Self-report of days when mental health was not good is a reliable estimate of recent health status.
	Data Collection Period: Jan 01 - Dec 31

* Upward Trend = negative result

Report Year	2021	2022	2023	2024	2025
Quality of Life - Poor Mental Health					
Actual			5.30	5.70	6.10
Target			3	3	3

How Are We Doing

The average number of mentally unhealthy days reported by Oregonians was the highest in 2024 than it’s been since 2010 (6.1 days vs. 4.2 days). The measure has climbed steadily since 2020 and has been in the red since 2016. The target is 3.1 days.

Factors Affecting Results

- Poor physical health
- Alcohol and substance misuse
- Substance Use Disorder related stigma and discrimination
- Access to quality physical and mental health care
- Safe homes and neighborhoods
- Living wage jobs

- Quality Education

- Adverse childhood experiences

KPM #18	PREMATURE DEATH - Number of years of potential life lost (YPLL) per 100,000 before age 75. Premature death is measured by summing the years between age at death and age 75 across all people who died before reaching that age. It's a way of quantifying the societal impact of early deaths in a population. Causes of death that are more likely to affect younger people – such as congenital anomalies and accidental injuries – contribute to higher rates of premature death.
	Data Collection Period: Jan 01 - Dec 31

* Upward Trend = negative result

Report Year	2021	2022	2023	2024	2025
Premature Death					
Actual			7,333		6,824
Target			5,300		5,300

How Are We Doing

Rising drug deaths and COVID started to contribute to the increasing years of potential life lost (YPLL) in Oregon about the same time (2020). While COVID-related YPLL skyrocketed to 2021, it decreased to below the 2020 level by 2023. However, drug death-related YPLL continued to rise sharply until 2023. A decline occurred in 2024.

Factors Affecting Results

Leading causes of premature death in 2024

1. Accidents
2. Drug overdose
3. Cancer
4. Suicide
5. Heart disease
6. Chronic liver disease and cirrhosis
7. Perinatal conditions
8. Diabetes
9. Congenital conditions
10. Homicide

KPM #19	MORTALITY FROM DRUG OVERDOES - Number of deaths per 100,000 from drug overdoses excluding suicide. Drug overdose deaths account for a major proportion of all premature deaths and are largely preventable.
	Data Collection Period: Jan 01 - Dec 31

* Upward Trend = negative result

Report Year	2021	2022	2023	2024	2025
Mortality from Drug Overdose					
Actual			25.70		32.60
Target			7.70		7.70

How Are We Doing

Rates of overdose drug death in Oregon increased sharply from 2019 (12.4 per 100,000) to 2023 (40.6 per 100,000) putting this measure solidly in the red during that period. Although the rate was still in the red in 2024 it did decrease significantly to 32.6 per 100,000. The target is 7.7 deaths per 100,000.

Factors Affecting Results

- Increase in prescription controlled substance sales (including opioids), illicit and prescribed drug use, misuse, and dependency.
- Increase in polysubstance use
- Access to drug treatment programs and behavioral health care
- Unsafe household storage of unused medications
- Access to naloxone, the opioid reversal medication

KPM #20	TOBACCO USE - TEENS - Percent of 11th graders who use tobacco (past 30 days). Cigarette smoking is the most common cause of preventable death and disease. It is identified as a cause of various cancers, cardiovascular disease, and respiratory conditions, as well as low birthweight and other adverse health outcomes. Many teen smokers become adult smokers. Measuring the prevalence of tobacco use in the youth population can alert communities to potential adverse health outcomes and can be valuable for assessing the need for prevention programs or the effectiveness of existing programs.
	Data Collection Period: Jan 01 - Jan 01

* Upward Trend = negative result

Report Year	2021	2022	2023	2024	2025
Tobacco Use - Teens					
Actual			12.80%		9.80%
Target					21%

How Are We Doing

The SHS 2024 questions were significantly different from 2022 so no comparisons should be made with prior years data.

Factors Affecting Results

- Health-promoting practices in places where children spend time: communities, schools, and childcare
- Available neighborhood food choices and exercise opportunities
- Media, food and beverage industries and entertainment industries
- Stigmatizing language, images, attitudes, policies, and weight-based discrimination
- Parenting and feeding practices that promote healthy behaviors related to diet and physical activity

KPM #21	OBESITY - TEENS - Percent of 11th graders who are obese (BMI >= 95th percentile for age/sex). Obesity is the second leading cause of preventable death in Oregon. It is a major risk factor for high blood pressure, high cholesterol, diabetes, heart disease, and cancer. Obese teens are at an increased risk of becoming obese adults.
	Data Collection Period: Jan 01 - Dec 31

* Upward Trend = negative result

Report Year	2021	2022	2023	2024	2025
Obesity - Teens					
Actual			13.40%		12.40%
Target			12%		12%

How Are We Doing

We are slightly higher than out target. Please note, the SHS 2024 questions were significantly different from 2022 so no comparisons should be made with prior years data.

Factors Affecting Results

- Health-promoting practices in places where children spend time: communities, schools and childcare
- Available neighborhood food choices and exercise opportunities
- Media, food and beverage and entertainment industries
- Stigmatizing language, images, attitudes, policies and weight-based discrimination
- Parenting and eating practices that promote healthy behaviors related to diet and physical activity

KPM #22	STATEWIDE SUSTAINABLE COST OF CARE - Comparison of health care cost changes to personal income changes. Any value 0 or higher is green because we want per capita income growth to equal or exceed per capita health care cost growth. By way of background, the statewide sustainable cost of care measure is a comparison between per person growth in income in Oregon and health care spending growth in Oregon. Historically, health care costs have grown faster than income and Oregon is trying to change that with the Cost Growth Target program and other initiatives. When the result from subtracting per person income growth minus per person health care cost growth is 0 or positive, it means income is growing at the same pace or faster than health care costs, which is good. When the measure is a negative number, it means health care costs are growing faster than income, which is not good.
	Data Collection Period: Jan 01 - Dec 31

* Upward Trend = positive result

Report Year	2021	2022	2023	2024	2025
Statewide Sustainable Cost of Care					
Actual			-2.91	-4.07	0
Target			0	0	0

How Are We Doing

From 2022 to 2023, per person health care expenditures spending grew 5.2%.

Factors Affecting Results

Per capita income also grew by 5.2% over the same time period.

KPM #23	OHA SUSTAINABLE COST OF CARE - Difference between real personal income and health care inflation. Any value 0 or higher is green because we want per capita income growth to equal or exceed OHA's per person spending on PEBB, OEGB, and OHP. By way of background, the OHA sustainable cost of care measure is a comparison between per person growth in income in Oregon and health care spending growth for OHA's three health programs: Oregon Health Plan, Public Employees Benefits and Oregon Educators Benefits. When the result from subtracting per person income growth in Oregon minus per person spending on PEBB, OEGB, and OHP is 0 or positive, it means income is growing at the same pace or faster than OHA's health care costs, which is good. When the measure is a negative number, it means the cost of OHA's three health care programs is growing faster than income, which is not good.
	Data Collection Period: Jan 01 - Dec 31

* Upward Trend = positive result

Report Year	2021	2022	2023	2024	2025
OHA Sustainable Cost of Care					
Actual			8.80	-2	4.60
Target			0	0	0

How Are We Doing

This measure can be volatile because it reflects the relationship between two data points: the growth of personal income in Oregon and the growth of OHA's health program costs (OHP, PEBB, and OEGB). The most recent data point shows that personal income growth was higher than OHA's health program costs, which is good.

Factors Affecting Results

Oregon's economic condition is a major factor that affects the results of this measure. From 2023 to 2024, Oregon's personal income grew by 5.1%, which is large relative to previous years. The recent personal income growth was due to wage increases and inflationary pressures. OHA's health program cost growth was much lower, which allowed for this measure to meet our target.

KPM #24	CRITICAL EVENTS MEETING THE 14-CALENDAR DAY TIMELINE TO PROVIDE CORRESPONDENCE TO TRIBAL LEADERS - To track compliance with the OHA Tribal Consultation Policy timelines, % of critical events meeting the timeline. Total number of critical events meeting the timeline/total number of identified critical events.
	Data Collection Period: Jan 01 - Dec 31

* Upward Trend = positive result

Report Year	2021	2022	2023	2024	2025
Critical events meeting the 14-calendar day timeline to provide correspondence to Tribal Leaders					
Actual			100%	100%	100%
Target			100%	100%	100%

How Are We Doing

We continue to partner with the Tribes in relationship to all the measures. We continue to meet the target rate of 100%.

Factors Affecting Results

By measuring the time and distribution of Dear Tribal Leader Letters, we effectively support our Consultation and Confer Policy and uphold our Government to Government relationships with the nine Federally Recognized Tribes of Oregon and our Urban Indian Health Program.

KPM #25	TRIBAL CONSULTATIONS MEETING THE 30-CALENDAR DAY TIMELINE FOR REPORTING OF OUTCOME OF CONSULTATION - To track compliance with the OHA Tribal Consultation Policy timelines, % of consultations reporting outcome within 30 calendar days. Total number of consultations meeting reporting timeline/total number of consultations
	Data Collection Period: Jan 01 - Dec 31

* Upward Trend = positive result

Report Year	2021	2022	2023	2024	2025
Tribal consultations meeting the 30-calendar day timeline for reporting of outcome of consultation					
Actual			100%	100%	100%
Target			100%	100%	100%

How Are We Doing

We continue to partner with the Tribes in relationship to all the measures. We continue to meet the target rate of 100%.

Factors Affecting Results

By measuring the time and distribution of Dear Tribal Leader Letters, we effectively support our Consultation and Confer Policy and uphold our Government to Government relationships with the nine Federally Recognized Tribes of Oregon and our Urban Indian Health Program.

KPM #26	TIMELINESS OF TRANSLATIONS DURING EMERGING PUBLIC HEALTH EVENTS - To allow for equitable access to important public health information during public health events. Meet Federal and state legal obligations to provide information in alternative languages and formats, including Title VI of the Civil Rights Act. Compliance with agency policies, including DHSJOHA-010-013 Alternate Formats and Language Access Services. Number of hours from Incident Manager approval of an important (expedited) public information document for an identified public health event to the return of translated documents to the incident's Joint Information Center.
	Data Collection Period: Jan 01 - Dec 31

* Upward Trend = negative result

Report Year	2021	2022	2023	2024	2025
Timeliness of Translations During Emerging Public Health Events					
Actual			100.25		0
Target					2

How Are We Doing

While no incident management teams were stood up during this time, in Public Health programmatic work, there is an increasing emphasis on communicating with our communities in their chosen languages.

Factors Affecting Results

There were no public health emergencies during this time frame that warranted the formation of an incident management team.

Health and Human Services

Strategic Technology Plan: A Comprehensive Overview

Major Revision History

Jan. 2024	Agency Leadership and State CIO approvals complete
May 2025	Section 1.1, Health and Human Services Programs: Changed to reflect OHA Health Systems Division becoming two divisions - OHA Behavioral Health and OHA Medicaid
	Section 1.3, ODHS OHA Strategic Technology Plan: Added Actions and Primary Measures
	Section 2.2, ODHS Strategic Plan 2024-27: New Section
	Section 2.3, OHA Strategic Plan 2024-27: New Section
	Section 3.1, Technology Governance: Added Joint Governance Board priorities and new Joint Technology Governance Council
	Section 3.5, Mapping Projects to Strategic Goals and Drivers: Validated alignment with agency strategic plans
	Section 5.1, Digital Accessibility in Hardware, Software and Systems: Added references of two new policies and initiation of new technology project
	Section 5.5, Newer Artificial Intelligence Technologies: Updated to reflect the statewide interim AI guidance
	Section 6.4, Application Portfolio: Updated to reflect major refresh to portfolio in 2024/25
	Section 9.2 (in original plan), Technology Governance Prioritization: Removed as it changes on upon each council meeting
	Section 9.3, Continuous Modernization Action Plan Summary: 2025, 2026, and 2027 plans added
	Section 9.7, Federal Mandates: Accessibility DOJ Rule added
May 2026	Section 1.2, Office of Information Services: Updated to reflect OIS services in place of key OIS units
	Section 2.6, Federal Mandates: Updated to reflect US House Resolution (HR) 1 and SNAP Payment Error Rate mandates
	Section 3.3 Major IT Projects Underway: Updated to add new projects and remove completed projects
	Section 3.4, Major IT Projects Recently Completed: Updated to reflect projects completed since last plan update
	Section 3.5, Mapping Projects to Strategic Goals and Drivers: Added HR1, SNAP Payment Error Rate and validated current list alignment with drivers and agency strategic plans
	Section 7.3, Technical Policy Option Package Investments in 2023-2025 budget: Updated to reflect 2025-2027 investment information
	Section 9.6, Federal Mandates: Added HR1 and SNAP Payment Error Rate mandates, as well as updated DOJ Accessibility rule to reflect extension of time for compliance to April 26, 2027

1 Executive Overview

This Oregon Department of Human Services (ODHS) and Oregon Health Authority (OHA) Strategic Technology Plan 2024-27: A Comprehensive Overview document is intended to communicate the alignment between the vision, planning and execution of major technology initiatives.

This Executive Overview section is the heart of the plan, and no further reading is necessary to get a basic understanding of the technology goals and strategies. However, reading the subsequent sections will provide a deeper understanding of the drivers, priorities and frameworks within the ODHS|OHA's technology organization.

It represents priorities of the governor, Oregon Department of Human Services (ODHS), Oregon Health Authority (OHA), Enterprise Information Services (EIS), Office of Information Services (OIS) and many other organizations as noted below.

1.1 Health and Human Services Programs

The Oregon Health Authority (OHA) has nine core divisions. The Oregon Department of Human Services (ODHS) has eight core programs. Both agencies have Shared Services units that support the needs of both agencies.

Oregon Department of Human Services	Oregon Health Authority
• Aging and People with Disabilities • Child Welfare • Office of Developmental Disabilities Services • Oregon Eligibility Partnership • Self-Sufficiency Program • Vocational Rehabilitation • Central and Shared Services • Director's Office	• Behavioral Health • Health Policy and Analytics • Medicaid • Oregon State Hospital • Public Health • Agency Operations • Equity and Inclusion • External Relations • Fiscal and Operations

There are 15+ shared services areas, such as financial and facilities services between the two agencies. The combined Health and Human Services organization supports 1.5 million clients; 16,700 staff; more than 50,000 partners; and more than 140 office locations. The agencies have a combined 2025-2027 Legislatively Approved Budget (LAB) of \$65.19 billion.

1.2 Office of Information Services (OIS)

For the purposes of this document, we'll focus on the Office of Information Services (OIS). However, also, important to the agencies are other units with a strong focus on technology which we refer to as "local IT", and we'll lightly cover them in this document.

OIS exists to provide services in helping Oregonians achieve health, well-being, and independence. In support of this mission, OIS provides information technology systems and services that help ODHS|OHA to:

- Determine client eligibility
- Provide medical, housing, food and job assistance
- Provide addiction, mental health and vocational/rehabilitative services

- Protect children, seniors and people with physical and/or developmental disabilities
- Process claims and benefits
- Manage provider licensing and state hospital facilities
- Promote and protect the state public health
- Support internal ODHS|OHA administrative functions, including human resource, finance and procurement programs

OIS supports more than 75 core business applications that are used by approximately 16,700 agency and partner staff located at 140 locations throughout Oregon.

The OIS organizational structure consists of the Office of the chief information officer and 5 functional groups supporting the following vital services in achieving the agencies' mission:

- Technology Delivery, Operations, & Support - Provides reliable, secure platforms, applications, and end-user services that keep ODHS and OHA programs running every day.
- Program, Vendor, & Business Management - Ensures technology investments, projects, funding, and vendor partnerships deliver value and focus on improving customer experiences.
- Security, Privacy, & Risk Management - Protects people, data, and systems through proactive IT risk management, compliance, privacy, and security governance.
- Strategy, Governance, & Enterprise Architecture - Guides short- and long-range planning, policy, and architecture to ensure IT decisions align with agency priorities and future needs.

1.3 Strategic Goals, Strategies, Actions and Measures

OIS exists to provide services in helping Oregonians achieve health, well-being, and independence. To support this mission, the Strategic Technology Plan's goals, and strategies were developed with the purpose to strengthen the Office of Information Services' ability to deliver IT functions with greater perspective and effectiveness.

Goal 1: Cultivate IT Workforce

Cultivate a highly skilled, diverse, and customer-focused organization.

Strategies:

- ✓ Improve equitable hiring
- ✓ Increase recruitment cycle transparency
- ✓ Accelerate customer service and technical training
- ✓ Accelerate development opportunities

Action(s):

Action 1.1 - Implement and educate OIS on equity in hiring practices and share OIS demographics.

Primary Measure(s):

Comparison of OIS staff to potential labor market.

Comparison of OIS supervisory managers to potential labor market.

Goal 2: Strengthen Cybersecurity, Risk and Privacy

Strengthen cybersecurity and consider the risk in the decision-making process.

Strategies:

- ✓ Improve the security and privacy posture
- ✓ Prevent, monitor, and rapidly respond to emerging threats and vulnerabilities
- ✓ Prioritize initiatives through a risk-based approach

Action(s):

Action 2.1 - Create plan and approach around the implementation of the Center of Internet Security Controls (CIS) basic six security controls to reduce the highest critical security risks to the agencies.

Primary Measure(s):

Reduce cybersecurity risks by fixing the most critical system vulnerabilities first.

Goal 3: Accelerate Technology Modernization

Enhance and augment IT infrastructure, systems, cloud capabilities, and processes to address pressing human services and health care challenges.

Strategies:

- ✓ Align IT investments with business strategy
- ✓ Modernize legacy IT; include a specific evaluation for new AI technologies
- ✓ Share technology solutions
- ✓ Promote ADA accessibility, language access, and user experience

Action(s):

Action 3.1 - Communicate and document how program and cross-agency investment roadmaps connect to resource planning and technology investment decision making, resulting in alignment with business strategic goals.

Action 3.2 - Evaluate, pilot, and implement AI tools to automate key tasks and business processes—improving speed, accuracy, and reliability.

Action 3.3 - Create a roadmap for modernizing our portfolio of legacy, highest risk (20th century) applications that still provide essential services to people in Oregon.

Action 3.4 - Ensure applications we build or procure are accessible to our diverse staff and to the wide range of communities that we service. Accessibility includes multilanguage support and meeting the highest levels of web accessibility.

Primary Measure(s):

Core technology systems supporting services and benefits to Oregonians are modern, being updated, or have a written plan to be modernized.

Increase worker efficiency through use of newer technologies, including artificial intelligence.

Goal 4: Increase Data Insights

Consider community involvement in data that is collected, and used in a way that does not perpetuate or exacerbate existing inequities ensuring accuracy and completeness.

Strategies:

- ✓ Improve how we handle, organize and deliver information

- ✓ Connect systems through standardized approaches
- ✓ Make data easily available and accessible while respecting privacy

Action(s):

Action 4.1 - Define internal OIS roles and responsibilities from operational and strategic perspective to improve coordination, support, and partnerships to meet agency data needs.

Action 4.2 - Re-initiate and complete a data inventory¹, including lifecycle management, in partnership with ODHS and OHA.

Action 4.3 - Partner with ODHS, OHA, and EIS to execute actions identified in their strategic plans.

Primary Measure(s):

Continual IT improvement in coordination, support, and partnerships to meet agency data needs in support of the goal. (Foundational prerequisite)

Goal 5: Optimize Technology Management

Provide inclusive, customer-focused collaboration

Strategies:

- ✓ Center technology governance processes on equity and inclusion
- ✓ Improve customer service
- ✓ Enhance communication and partnerships

Action(s):

Action 5.1 - Increase diversity of technology governance council by refreshing membership, combining ODHS|OHA governance councils, and adding advisory roles with diverse backgrounds and more direct connection to the communities we serve.

Action 5.2 - Define and establish a common expectation and level of professional customer service for the staff and partners that we support.

¹ Office of Information Services (OIS) scope is a data asset which is a prerequisite to a data inventory.

Action 5.3 - Explore and optimize existing OWL site content to improve navigation of OIS services; and allow for earlier collaboration between OIS and business partners.

Primary Measure(s):

New Joint ODHS|OHA Technology Governance Council satisfied with equity, transparency, and outcomes of decision-making body.

Increased ODHS|OHA customer satisfaction from OIS (Service Desk ticket closure sentiment survey).

1.4 OIS Operating Principles

Operating principles have helped define the culture of OIS and provide guidance for decision making at all levels of the organization. Each decision we make can affect technology, process, and people. OIS uses these operating principles to guide our choices as we navigate the complex opportunities and challenges of our work.

- **Honor Business Drivers** – We use governance effectively, partnering with the business to prioritize investments.
- **Choose Wisely** – We consider diverse options and choose solutions by thoughtfully evaluating their benefits, costs, and risk. We consider the impact across the enterprise IT ecosystem and throughout the lifecycle.
- **Consider the Data** – We provide solutions that support keeping the data accurate, unduplicated, secure, and accessible for multiple uses.
- **Invest for Sustainability and Agility** – We seek and embrace opportunities to simplify, including reducing redundancy, promoting re-use, and embracing standards and modularity.
- **Deliver Incremental Value** – We deliver value efficiently and predictably, continuously learning and improving.

1.5 Challenges

While strategic plans create vision and excitement, a plan would not be complete without discussing known challenges. The list below includes the top challenges in implementing technology in Oregon state government that causes significant delays in modernization, maintenance and operations.

- **Lack of IT investment strategy to fund technology modernization** – While IT roadmaps exist for technology modernization, an IT investment plan does not exist. This puts technology groups in a reactive state, which is a catalyst for the technology to age beyond usefulness. The biennium budget policy option package process is too slow and siloed to be effective in providing funding to keep systems modernized and policy nimble.
- **Competitive IT market elongates the recruitment cycle to on-board staff** – A typical OIS recruitment averages 6-12 months from vacancy to job requisition to on boarding or 110 days from posting to first offer (depending on how it is measured).
 - Pay structures for large agencies affect IT professionals, who are paid significantly less (in most classifications) compared to other Oregon public sector entities.
 - Pay equity assessments capped at the step six have, also, lengthened the process and frustration for both candidates and hiring managers.
- **Heavy administrative processes** (IT, Human Resources, Procurement) slow down the delivery of services.
 - Backlog and cumbersome processes in DAS and agency human resource groups cause a delay in the hiring process.
 - Long procurement processes (agency, IT, agency procurement, Department of Administrative Services (DAS) procurement, DAS Enterprise Information Services, Department of Justice) for large technical projects take 12-18 months to get an executed contract.
- **Lack of shared vision, needs, schedules and workloads are barriers to accelerating technology modernization.**
 - These barriers continue to impact cross program, agency and IT organizations.
 - Centralized approaches take much longer than program specific approaches. Program specific approaches can cause re-work and significantly increase agency costs and increase IT risks.
 - Improved communication and collaboration will be needed to accelerate technology modernization.

2 Drivers

2.1 Governor

As Gov. Kotek took office in January 2023, she set clear direction on the top priorities, improving customer services in state agencies, and priorities for ODHS|OHA.

Priorities for Oregon	State Agencies & Customer Service
▪ Housing and Homelessness	▪ Increased accountability
▪ Behavior Health	▪ Prioritizing customer service
▪ Education and Early Learning	▪ Making things work efficiently as possible
	▪ Providing tools and not barriers
	▪ Improving access to services when and where people need them.

The governor provided direction to ODHS|OHA leadership that listed the following priorities.

- Transition of **Employment Related Day Care (ERDC)** to the new Department of Early Learning and Care (DELC) agency.
- Process **Medicaid Redeterminations**, which is the first time in three years (paused during the pandemic) that 1.5 million people on the Oregon Health Plan (OHP) must go through a benefit renewal process.
- Implement the 1115 **Medicaid Waiver** that has many new opportunities, including housing for up to six months for people at risk of homelessness and people at risk of extreme weather events due to climate change.
- Expand the **Healthier Oregon** to people who meet eligibility regardless of immigration/citizenship status.
- Provide a **Basic Health Program** which is initially focused on OHP members who will no longer be eligible after the redetermination.

2.2 Oregon Department of Human Services (ODHS) Strategic Plan 2024-2027

The Oregon Department of Human Services (ODHS) is the largest executive branch agency. The mission of the ODHS is to help Oregonians in their own communities achieve well-being and independence through opportunities that protect, empower, respect choice, and preserve dignity.

ODHS' Strategic Plan 2024-2027 goals, refreshed May 2026, are as follows:

Goal 1: Optimizing Core Service Operations

- ✓ Our organization makes the changes it needs to deliver services effectively.

Goal 2: Reducing Inequities in Key Metrics

- ✓ Reducing inequity is reflected in everything we do.

Goal 3: Enhancing Customer Service Excellence

- ✓ Our customers have the best experience of service we can offer.

Goal 4: Enhancing Safety Oversight and Compliance

- ✓ We ensure safety is at the forefront of agency efforts and demonstrate that commitment visibly.

Goal 5: Data-Informed Service Delivery

- ✓ Everyone within ODHS gets the data they need quickly and conveniently to make informed decisions.

2.3 Oregon Health Authority (OHA) Strategic Plan 2024-2027

The Oregon Health Authority (OHA) is one of the state's largest executive agencies with a single overarching strategic goal: eliminate health inequities in Oregon by 2030. OHA's work is guided by the definition that the Oregon Health Policy Board (OHPB) and OHA adopted in 2020.

To advance that goal, OHA's strategic priorities were selected to preserve access to critical services for the people of Oregon, sustain core agency operations, minimize disproportionate impacts on communities experiencing the greatest health inequities, and to steward public resources responsibly and advance systemwide, high-quality, cost-effective care.

OHA's Strategic Plan 2024-2027 has five goals. Each goal has a prioritized focus area as follows:

Goal 1: Transforming Behavioral Health - Improve behavioral health treatment for those with the greatest need: Build a coordinated, high-quality behavioral health system that meets the people of Oregon where they are, with special attention to those at highest acuity.

Goal 2: Strengthening Access to Affordable Care for All - Stay Covered and Healthy: Protect the people of Oregon's coverage, care and affordability in the face of new federal mandates.

Goal 3: Fostering Healthy Families and Environments - Make Oregon the best place in the country to start and raise a thriving family: Strengthen the foundations of family and community health, from birth through prevention, by aligning maternal, child and public health systems in every community.

Goal 4: Achieving Healthy Tribal Communities - OHA's work to advance the Tribal Health Strategic Plan will continue as previously planned, led by the Office of Tribal Affairs, in consultation with the Nine Federally Recognized Tribes of Oregon.

Goal 5: Building OHA's Internal Capacity and Commitment to Eliminate Health Disparities - Build OHA's internal capacity and commitment to eliminate health inequities by fostering accountability to embed equity, promote employee resiliency and meaningfully engage and place power in communities across Oregon.

2.4 Enterprise Information Services (EIS)

Enterprise Information Services led by State Chief Information Officer Terrence Woods has provided direction and guidance to Executive Branch Agency Leadership through several strategies and frameworks.

- [*EIS Strategic Framework 2023-2026, Version 2.0*](#) – EIS strategic plan including objectives, goals, and strategies for the EIS organization.
- [*Cloud Forward: A Framework for Embracing Cloud in Oregon Version 1.0*](#) – Define and communicate the EIS cloud vision and to enable state agencies to accelerate cloud adoption across the enterprise.
- [*EIS Modernization Playbook: An Agency Guide to Digital Transformation, Version 1.0*](#) – Recognizes the urgent need to modernize state IT systems and lay the foundation for digital transformation.
- [*Oregon's Data Strategy: Unlocking Oregon's Potential, 2021-2023*](#) – Oregon's Data Strategy establishes a central vision and critical actions to enable Oregon to better use, manage, and share its data to create information, knowledge, and insight. An update is outlined in [*Oregon Data Strategy 2023-25 Biennial Annual Plan*](#). For the context of this document and to provide an overview of alignment between various strategic plans to technology, we'll focus on the EIS Modernization Playbook for the next two sections. **The focus will continue to be on embracing and accelerating the move to cloud technology.**

2.5 EIS Guiding Principles

EIS crafted the following principles to align with the vision of the Enterprise Leadership Team, common goals, and outcomes, and shared with leadership across state government. They are derived from the [*EIS State of Oregon Modernization Playbook*](#) and abbreviated for inclusion here.

- **Put People First.** Successful modernization starts and ends with people – the experience of people who rely on the essential services provided by the State of Oregon, the ability of the state employees to effectively provide those services, and the ability of the agency leadership to drive digital transformation.
- **Aligned and Enabled.** Alignment with EIS vision for user-friendly, reliable, and secure IT systems between agency business and IT leadership that will enable agencies to fulfill their mission and strategic objectives; while continuing to deliver the core services that the people of Oregon rely on.
- **Data- and Privacy-Informed.** Modernization provides a unique opportunity to leverage data as a strategic asset across systems and programs, govern and manage that data through its lifecycle, enable data informed decision-

making, transparency by default, while considering personal and private information.

- **Secure by Design.** Secure by design embraces coding practices and the seamless integration of security policy and controls into the fabric of the IT system itself.
- **Agile and Continuous Improvement.** Modernization requires sustained investment in our people, the formation of empowered teams that embrace agile practices, and a culture of continuous improvement encompassing people, processes, and technology.

2.6 Federal Mandates

This section includes a short list from the volume of federal mandates we must adhere to. The mandates below were chosen as we have active technical projects to meet the relevant mandate(s).

- **US House Resolution 1 (HR1)/Medical** - HR1/Medical aka One Big Beautiful Bill Act - made significant changes to the Supplemental Nutrition Assistance Program (SNAP) and Medicaid. The law imposes major eligibility, funding, and administrative changes on Medicaid — including a nationwide requirement that adults ages 19–64 work, volunteer, attend school, or do community service at least 80 hours/month to receive benefits; more frequent (semi-annual) eligibility redeterminations for expansion populations; tighter state financing rules (e.g., limiting state “provider taxes” and constraining how states pay providers); and new cost-sharing or service fees for certain Medicaid enrollees.
- **US House Resolution 1 (HR1)/SNAP** - HR1/SNAP aka One Big Beautiful Bill Act - made significant changes to the Supplemental Nutrition Assistance Program (SNAP) and Medicaid. For SNAP, OB BBA sharply reduces federal spending on benefits and administration (nearly \$200 billion in cuts over 10 years), tightens eligibility and increases work requirements (expanding them to adults 55–64 and some with older dependents, narrowing waiver options), shifts greater share of administrative and error-cost onto states, and recalibrates how benefit amounts are calculated (e.g., limiting deductions for energy and internet costs, and constraining adjustments to the basic benefit formula).
- **CMS MES Modernization** – CMS has for the past eight years signaled its interest seeing states move to a modular architecture for their Medicaid

Management Information Systems (MMIS). In 2023, at the annual Medicaid Enterprise Services Conference, CMS announced that it will now focus on modernization as in “MES Modernization.” (Technical Project: Medicaid Enterprise Services Modernization)

- **Fair Labor Standards Act (FLSA)** – In context of ODHS Home Care Workers (HCW) and Personal Service Workers (PSW), the FLSA requires that the records include certain identifying information about the HCW/PSW and data about the hours worked. (Technical Project: Provider Time Capture)
- **Federal Department of Health and Human Services** – The Federal Department of Health and Human Services (HHS) rule on Comprehensive Child Welfare Information Systems (CCWIS) went into effect on Aug. 1, 2016. The rule governs the next generation of technology to support child welfare programs. The new rule focuses on modularity, interoperability, reusability, data sharing between programs, lifecycle data management, and data quality. ODHS Child Welfare declared that it would move towards a CCWIS environment. (Technical Project: Child Welfare CCWIS Project)

2.7 State Mandates

This section lists the states mandates with a significant technology effort, over \$1 million, and significant risks if not completed. It is not intended to be comprehensive and is focused on new legislation from 2023. A more detailed list is provided in Appendix A.

- **HB 2683 (2023)** – Directs the Early Learning Council to adopt rules to establish eligibility for certain children to participate in Employment Related Day Care subsidy programs.
- **SB 966 (2023)** – Requires OHA to adopt standards for types of data collected for all payers and that all claims’ databases are consistent with standards adopted for collection of data on race, ethnicity, language, disability, sexual orientation, and gender identity. (Technical Project: REALD/SOGI Registry-Repository)
- **SB 972 (2023)** – Requires OHA to transition from healthcare.gov to state-based marketplace by Nov. 1, 2026. (Technical Project: State Based Marketplace)

2.8 Negotiated Labor Union Commitments

Through the Collective Bargaining process, ODHS|OHA have made commitments to the labor unions. Many of the agreements include large and small technical work with any changes over 40 hours going through the technology governance process – See Section 3.1, Technology Governance. For the 2023-2025 Collective Bargaining Agreement there are 11 large effort commitments. An example of these changes include:

- **Compensation and Payroll System Design (Payroll Steps)** (3,000 development hours) – This request is to create multiple tiers of pay for ODHS/APD homecare workers (HCW), personal support workers (PSW) and OHA/HSD personal care attendants (PCA).
- **Holiday Pay** (450 development hours) – Homecare workers who work on a specific holiday get 1.5 times their hourly rate of pay. Anything up to 8 hours would be 1.5 times; beyond 8 hours on the holiday, would be paid at their current rate.
- **Carina Registry** (300 hours) – Development of a web service interface with the Carewell/Carina registry to verify the identity of in-home service Medicaid, State Plan Personal Care, and Oregon Project Independence in-home consumers.
- **PSW Legacy Pay Rates** (390 development hours) - A subset of workers was excluded from Payroll Steps calculations due to already receiving pay in excess of new rates due to other allowances and longevity.
- **Administrative Pay Allowance** (1,200 development hours) - Workers will receive 15 mins administrative pay per pay period to submit time and progress notes at the minimum base pay rate.

3 Large Technical Projects & Governance Model

3.1 Technology Governance

The current technology governance structure for ODHS|OHA has been intentionally evolving and maturing from as early as 2012. The technology governance process continuously matures and has received an EIS assessment score of 3 out of 4 for 2021 through 2025.

The agencies recognize a strong investment prioritization structure and processes are key to managing competing priorities where there are unlimited needs and limited resources.

Planning, coordination, and support for the overall governance structure and improvements is provided by Business Engagement Services, Business Relationship Management Team, in partnership with agency leaders. The visual below represents the evolving technology governance structure. A written description of the different governing groups and roles follows the visual representation.

ODHS|OHA Joint Governance Board:

Starting at the top of the visual above, the Joint Governance Board (JGB), formed September 2023, was established to provide strategic direction on ODHS|OHA individual/joint top priorities. See the joint top priorities below.

The priorities set by the board helps drive alignment with the agencies' goals of health equity and well-being. The board helps ensure the strategic direction is aligned with the governor's office initiatives, negotiated labor contracts, legislation, federal partners, as well as state and agencies goals. Priority setting at the Joint Technology Governance Council, Information Services Management Committees, and Work Prioritization Teams, described below, will be aligned to the top priorities of the JGB.

When lower-level governing body chairs/co-chairs are unable to resolve competing priorities, the board acts as a point of escalation.

Joint Technology Governance Council (JTGC):

The ODHS|OHA Joint Technology Governance Council provides strategic guidance and prioritization on larger more complex technology initiatives and projects. These projects generally involve the implementation of a new system, platform, service, component, or module offering new capabilities and meet thresholds for EIS oversight.

Projects that will have an impact on and/or require staffing resources across the two agencies are reviewed and prioritized by the JTGC. The individual and joint agencies capacity to support and accomplish the individual and collective projects are part of the prioritization decision. Projects prioritized at the council are vetted through a subordinate Information Services Management Committee (ISMC) prior

to council prioritization, with a few exceptions. Project level governance is established within each project and the council acts as a point of escalation and review of proposed project schedule extensions.

During the biennial budget cycle policy option packages, existing, and new projects meeting the criteria go through a scoring process that is reviewed and finalized at the council. After the council completes their review, the policy option packages and projects scores and supporting documentation go through a statewide scoring process through a workgroup appointed by the Governor's Office which includes EIS.

Information Service Management Committees (ISMCs):

Both ODHS|OHA have ISMCs which review all change requests, prioritize, and sequence small to medium efforts greater than 40 hours that do not require project management or oversight support. There are four ISMCs prioritizing change requests for systems that support more than one program/division. There are 11 ISMCs prioritizing change requests for systems supporting individual programs or divisions. Larger efforts requiring project management and/or oversight are prioritized at the appropriate ISMC and moved to the individual agency council or both councils, in some circumstances, for review and final prioritization.

Work Prioritization Groups:

For tasks or small requests that will take less than 40 hours, there are small informal groups that collaborate to plan and coordinate accomplishing the work. Efforts greater than 40 hours are moved to the ISMC for review and prioritization.

3.2 Large Technical Project Portfolio

ODHS|OHA maintain a large portfolio of IT projects. A short list of the most significant and largest in-flight projects is presented here. Most of these projects are under oversight by OSCIO and the Legislative Fiscal Office.

The project management office continuously matures and has consistently received high assessment scores from Enterprise Information Services. The project management assessment score for 2025 averaged a 3.5 out of 4 across the portfolio and program management and maturity, and project management experience scores.

3.3 Major IT Projects Underway

As of April 2026, there are 38 active technical projects with a project portfolio investment of \$394 million. Not all projects meet the EIS thresholds for oversight. However, any time a professional technical project manager is assigned, we apply the same project management methodologies as large projects (though adjusted for size and complexity). Highlighted below are some of the active projects.

- **Joint: US House Resolution 1 (HR1) and SNAP Payment Error Rate** – As of April 2026, six projects have been initiated around Medicaid eligibility, SNAP payment error rate, telecommunications, and leveraging artificial intelligence to assist in meeting goals. Additional projects are expected.
- **Joint: Department of Early Learning and Care (DELIC) Technology Initiatives** – Work associated to DELIC is being done with an interagency agreement via ODHS and activities are following project methodologies but is not an official designated project and is being managed through the technology governance processes. (Governor Priority)
- **Joint: Medicaid 1115 Waiver Technology-only Portfolio** – The Community Information Exchange (CIE) project is the final effort in this portfolio focused on procuring and implementing two CIE software-as-a service solutions to support Health-Related Social Needs Services. A CIE is a network of partners using multidirectional technology platform to connect people to the needed social services. le to the needed social services. (Governor Priority)
- **Joint: Mainframe Migration Provider & Client Payment Systems (aka Financial Systems Modernization)** – Planning project to move ODHS|OHA off the mainframe with the focus around replacing payment type IT applications as the first phase.
- **ODHS: Telecom Center OpenScape Contact Center to Amazon Web Services** – The Oregon Department of Human Services and the Oregon Eligibility Partnership plan to transition the ONE Program Contact Center from OpenScape to Amazon Web Services (AWS) using Amazon Connect. This transition will improve reliability and scalability while adding enhanced call recording and verbal signature capabilities to strengthen service delivery and compliance.

- **OHA: Marketplace Transition from Federal to State-based Platform –** Move from a federal marketplace to a state-based marketplace in increased flexibility; provide more control over operations, customer service, and service levels; and consumer cost savings.
- **ODHS: Case Management System –** Comprehensive Oregon Intellectual & Developmental Disability (I/DD) statewide case management system.
- **ODHS: Comprehensive Child Welfare Information System (CCWIS) Portfolio –** To satisfy federal partners requirements and favorable cost allocation, Oregon has elected to migrate from the current legacy system to CCWIS. This is a case management information system that state and Tribal title IV-E agencies developed for the Child Welfare Program with a focus on data management and quality.
- **OHA: Medicaid Enterprise Services (MES) Modernization - Systems Integration (SI) Platform –** Oregon Medicaid Enterprise System (MES) Modernization Program planning completed with a goal of moving away from a single, monolithic system to a modular MES environment facilitating more efficient administration of Oregon’s Medicaid program. The Systems Integration (SI) Platform project is the first project, under the program umbrella, which creates a centralized hub that provides a common framework for the interaction of OHA and ODHS systems.
- **OHA: OEBB/PEBB Benefit Management System Replacement –** Replacement of two legacy customized benefit systems with a solution that supports the delivery of required functionality, meets legislative mandates, and improves member experience.

3.4 Major IT Projects Recently Completed

There have been significant successes in project closures in recent years.

In the 2023-2025 biennium, 22 projects were completed for an investment of approximately \$74 million. All projects include one-time project costs and larger projects have 5-years of maintenance and operations included in the budget. Highlighted below are some of the completed projects.

- Joint: Department of Early Learning and Care (DELC) –Technology Initiatives including:
 - Employment Related Day Care Eligibility Rules

- Notices changes to align with new DELC Oregon administrative rules
- Joint: Medicaid 1115 Waiver Technology-only Portfolio including:
 - Continuous Eligibility
 - Basic Health Program
 - Young adults with special health care needs
- OHA: Medicaid Enterprise Services (MES) Modernization Program (Planning)
- ODHS: Summer 2024 Electronic Benefit Transfer (EBT) Program

In the current 2025-2027 biennium, as of April 2026, 7 projects have been completed for an investment of approximately \$72 million. All projects include one-time project costs and larger projects have 5-years of maintenance and operations included in the budget. Highlighted below are some of the completed projects.

- OHA: MES Interoperability - Claims & Provider Directory
- ODHS: ONE Program Cloud Migration
- Joint: MES Modernization Program Planning Only
- OHA: MMIS Infrastructure/Cloud Migration – in closing phase
- ODHS: Summer 2026 EBT Program – in closing phase

3.5 Mapping Projects to Strategic Goals and Drivers

The mapping criteria below is based on information from the Drivers section (2.0) and the Major IT Projects Underway section (3.3). Liberties have been taken to categorize the Drivers and IT Strategic Alignment criteria into three categories for document readability and simplification. The alignment assessment was done by the chief information officer in review with the deliverable workgroup and agency leadership.

Mapping Projects to Strategic Goals and Drivers

Mapping Projects to Strategic Goals and Drivers		Strategic Alignment	Operational: Efficiency, Risk Management, Maintenance	Compliance	Strengthen Cybersecurity & Privacy	Accelerate Technology Modernization	Increase Data Insights
		Drivers			IT Strategic Alignment		
Joint	US House Resolution 1 (HR1) and SNAP Payment Error Rate			X			
Joint	Department of Early Learning and Care (DELC) Technology Initiatives	X	X	X		X	X
Joint	Medicaid 1115 Waiver Technology- Community Information Exchange (CIE)	X	X	X	X	X	
Joint	Mainframe Migration Provider & Client Payment Systems	X	X	X	X	X	X
ODHS	Telecom Center OpenScape Contact Center to Amazon Web Services	X	X	X		X	
OHA	Marketplace Transition from Federal to State-based Platform	X	X	X		X	X
ODHS	Case Management System	X	X	X	X	X	X
ODHS	Comprehensive Child Welfare Information System (CCWIS) Portfolio	X	X	X	X	X	X
OHA	Medicaid Enterprise Services (MES) Modernization - Systems Integration (SI) Platform	X	X	X	X	X	X
OHA	OEGB/PEBB Benefit Management System Replacement	X	X	X	X	X	X

Incorporating strategic goals and drivers is part of our governance process – during Intake, and then validated as part of the Project Initiation phase.

4 Continuous Modernization

Our IT Modernization Framework aligns state level, business strategy and technical strategies. OIS works closely with agency programs to develop what we refer to as Business Outcome Statements (business strategy) and Investment Roadmaps.

The work results in identification of current and future state capabilities, fosters proactive planning through investment roadmap development, positions the agency to be more strategic in decision making around funding requests, helps identify common capability needs, and better informs decisions around prioritization of technology investment projects. The Outcome Statements and Investment Roadmaps will be refreshed and used to inform updates to the Strategic Technology Plan.

The approach is based on various leading frameworks with heavy influence by Gartner frameworks. Other key contributors included the Enterprise Information Services (EIS) Assistant State CIOs and EIS Senior IT Portfolio manager. In addition, the strategies and plans have been shared with the LFO IT analysts who help provide further guidance in the process.

4.1 Continuous Modernization Action Plan

The visual below depicts the Continuous Modernization Action Plan. The plan and resulting deliverables are led from a health and service equity perspective. The resulting deliverables drive and inform technology investments to meet the outcomes the agencies' desire. See Appendix A for a larger visual and the balance of the plan years 2025, 2026 and 2027.

4.2 Business Outcome Statements

The Business Outcome States are the heart of the Continuous Modernization Approach. Enterprise architects' partner with program leadership to understand and collaborate on the desired business outcomes, compare it to an Integrated Health and Humans Services Capability Model (see Appendix A) and map it to technology components.

There are four components in every Business Outcome Statement, including Disruptive Business & Technology Trends; Business Goals and Objectives; Current Business Outcomes; and Future Business Outcomes. The visual below is a small portion of OHA's Public Health Division's Business Outcome statement, reflecting the future business outcomes component. See Appendix A for a larger visual.

Future Business Outcomes

4.3 Investment Roadmaps

The current capability gaps or future capabilities identified in Business Outcomes are mapped to Investment Roadmaps. The work results in identification of current and future state capabilities, fosters proactive planning through investment roadmap development, positions the agency to be more strategic in decision making around funding requests, helps identify common capability needs and better informs decisions around prioritization of technology investment projects. The Outcome Statements and Investment Roadmaps will be refreshed and used to inform updates to the Strategic Technology plan.

The visual above is a small portion of the OHA's Public Health Division's Investment Roadmap. See Appendix A for a larger visual.

4.4 Business Outcome Statements and Investment Roadmap Status

Since 2022, the Enterprise Architecture group has been working with the programs and divisions on the development of the Business Outcome Statements and Investment Roadmaps. A list of core programs with completed investment roadmaps is shown below.

Agency	Program or Division	Status
ODHS	Self-Sufficiency (SSP)	Completed
	Aging and People with Disabilities (APD)	Completed
	Child Welfare (CW)	Completed
OHA	Health Policy and Analytics (HPA)	Completed
	Medicaid Division	Completed
	Oregon State Hospital (OSH)	Completed
	Behavioral Health Division (BHD)	Completed
	Public Health (PHD)	Completed

5 Strategic Focus Areas

5.1 Digital Accessibility in Hardware, Software and Systems

ODHS are committed to providing equitable access to information and services.

The agencies are committed to effective communications that are culturally and linguistically appropriate and accessible for a wide spectrum of people who have different communication needs or abilities.

In 2023, the agencies commissioned a workgroup to formalize a Digital Accessibility policy that define the expectations around scope and [Web Content Accessibility Guides \(WCAG\)](#) compliance. The EIS legislative and communications

coordinator has participated in the agency workgroup. In November 2024, two new accessibility policies were established in alignment with WCAG 2.2, level A and AA Guidelines:

[Digital Accessibility in Content Creation and Sharing](#) (ODHS|OHA 010-029)

[Digital Accessibility in Hardware, Software and Systems](#) (ODHS|OHA 010-030)

In 2025, an active technology project is being initiated to implement the policies noted above.

5.2 ODHS Office of Reporting, Research, Analytics, and Implementation (ORRAI)

The Office of Reporting, Research, Analytics, and Implementation (ORRAI) provides mission critical information to leadership and employees, legislators, partners, and the public. The office uses ODHS and inter-agency program data and tools such as predictive analytics, workload modeling and other quantitative and qualitative methods to improve outcomes for children and families. The office translates data into information and develops practitioner tools to ensure decisions are data informed.

ORRAI helps ensure our programs and services are accountable. ODHS reports to federal agencies, the Oregon state government, funders, and other community partners on an ongoing basis as well as in response to changes in policy or requirements. In addition to reporting, ORRAI staff conduct research and analytics to ensure ODHS programs and services are effective, efficient and best meet the needs of Oregonians. The implementation staff ensures that research and analysis are informed by workers, experts, and clients and that resultant changes are implemented through planned, consistent, and coordinated processes.

5.3 Cybersecurity, Risk and Privacy

Enterprise Information Services/Cyber Security Services (CSS) provides cybersecurity services for the executive branch. As such, this group is accountable for cybersecurity for ODHS|OHA. OIS is responsible for executing many cybersecurity activities and tasks in alignment with CSS. Examples of security activities that OIS handles include maintaining and adhering to the agency security plan; ensuring the security event and incident response plans are updated and adhered to; designing, developing, and procuring systems meeting statewide security requirements; implementation and adherence to the statewide standards and controls; and remediating known risks and vulnerabilities.

ODHS|OHA through the Office of Information Services has an Information Security and Privacy Office (ISPO) unit. ISPO has five primary functions – privacy; IT risk and compliance; information exchange; awareness and education; and e-discovery.

Due to the data protection obligations that originate from federal and state laws that include Health Insurance Portability and Accountability Act of 1996 (HIPAA), ODHS|OHA must have a Privacy Program and a dedicated Privacy Officer (PCO). The Privacy Program also supports privacy and security investigations for both ODHS and OHA including third party partnerships.

In addition, ISPO has a position for ONE (Oregon Eligibility) Security Advisement that supports federal compliance requirements with the Centers of Medicare and Medicaid Services (CMS).

ODHS Shared Services has a position for the Criminal Justice Information Services (CJIS) Local Agency Security Officer (LASO) in coordination with Oregon State Police CJIS Information Security Officer.

ODHS and OHA have state and federal requirements around regulated data sets including HIPAA (Protected Health Information); CJIS (Criminal Justice Information Systems); IRS (Federal Tax Information); SSA (Social Security Administration); MARS-E (Minimum Acceptable Risk Standards for Exchanges); PCI (Payment Card Data) and others.

5.4 Data Focus

In alignment with “Oregon’s Data Strategy” and in compliance with EIS policy, ODHS|OHA each have named a lead data officer. These two roles along with the IT Director/Enterprise Architect provide leadership on respective agency data strategies, data governance, and ongoing data management practices necessary to manage data as an asset as required by policy and statute.

Lead data officers for both agencies work with leaders in other domains including the OHA REALD/SOGI director; ODHS REALD/SOGI(E) director; ODHS|OHA Health & Service Equity IT director; and IT Director/Enterprise Architecture.

5.5 Newer Artificial Intelligence Technologies

Newer artificial intelligence capabilities have become a conversation topic from family dinner tables to boardrooms to federal, state, and local governments.

In October 2023, the federal government released a [Blueprint for an Artificial Intelligence Bill of Rights](#). The blueprint emphasizes the need for ethical and equitable principles, practices, and guidelines for government artificial intelligence adoption to protect individuals from harm.

In November 2023, State of Oregon Gov. Kotek signed [Executive Order No. 23-26: Establishing a State Government Artificial Intelligence Advisory Council](#). The Council will be convened to guide awareness, education, and usage of artificial intelligence in state government that aligns with the State's policies, goals, and values and supports public servants to deliver customer service more efficiently and effectively. The recommended action plan shall include concrete executive actions, policies, and investments needed to leverage artificial intelligence while honoring transparency, privacy, and diversity, equity, and inclusion.

The agencies are having many conversations around this new AI technology and especially Generative Artificial Intelligence (GenAI). Freely available tools such as ChatGPT are being used and experimented with use cases include summarizing publicly available documents, rephrasing public information at different reading levels, and getting an opinion (with precautions) on a wide range of subjects. Broader application use cases being discussed in health and human services include using chatbots to provide quick and efficient answers to the public and assisting case workers by summarizing case notes across multiple platforms.

The fast pace of GenAI has the potential to shape our business and technology processes. The Office of Information Services has drafted an interim guidance document that the agencies can use until further direction from state leadership is provided. "Guidance on the use of generative AI technologies in the workplace" is beginning to be socialized with technical and agency leadership and will be adjusted to meet the needs of the agencies.

In June 2024, Enterprise Information Services provided [Interim Guidance on Artificial Intelligence](#) and in April 2025 provided an [Updated Interim Generative AI Access and Usage Guidance](#). The two memos outlined guidance and expectations for executive branch agencies.

6 Operational Modernization

6.1 IT Infrastructure Overview

OIS supports the hardware and software that our staff, providers, and clients use.

As of Dec. 2024, on the client side, OIS is accountable for the infrastructure noted in the table below. This includes 32,100 computers and printers and 14,700 mobile devices geographically used across Oregon in 140 office locations.

People We Serve	
Clients	1,628,790
Staff	16,700
Partners	35,000
Medicaid providers	16,000
Locations We Support	
Office network devices	3,500
Web conferencing rooms	280
Offices around the state	140
Technology We Support	
Computers and printers	32,100
Mobile devices	14,700
Servers	1,800
Applications (Mission Critical)	75

On the server side, EIS is accountable for the state network, hardware infrastructure, server provisioning and operating system and virtual machine (VM). OIS is accountable for the applications that the agencies use in this infrastructure. Application development, patching, maintenance and operations all are under the responsibility of OIS.

There are 1,544 virtual machines allocated to ODHS|OHA which represents 37 percent of the total VMs in the state. All changes to these systems are managed

through OIS who ensures that change management processes are followed, including post-change testing and validation.

6.2 IT Infrastructure Modernization

In alignment with EIS, and a benefit to the agencies, the ONE & MMIS Infrastructure/Cloud Migration projects completed during 2023-2025 shifting infrastructure to cloud services. With the completion of these two large technical projects, VMs hosted in the cloud increased from <5 percent to 47% percent.

ODHS|OHA has, also, invested resources and funding in planning efforts to migrate applications off the mainframe.

6.3 Direct Customer Support Model

OIS has a presence in all 140 OHDS|OHA office locations throughout the state to the benefit of our staff, providers/partners, clients, and other agencies through our customer service and support field technicians support model. It's a support model that allows OIS to quickly provide in-person services; assistance to EIS on replacement of the 3,500 network devices in the agency's offices; and efficiently keep workstations reliable and updated through the workstation lifecycle replacement program (every four years.)

These field tech professionals are, also, the ones who respond to local needs in local or large scale disasters, such as relocating a majority of the workforce into remote working environments during the pandemic; handling infrastructure outages during severe weather events or fires; and providing support to other agencies in a disaster, such as assisting other call centers with setup during the pandemic or responding to urgent needs in recent local government security events that required workstations to be rebuilt.

6.4 Application Portfolio

The ODHS|OHA organization has a large and complex application portfolio. The holistic application portfolio includes roughly 900 applications with 80 considered mission/business critical.

The five largest and most complex applications include the Oregon Eligibility (ONE); Medicaid Management Information System (MMIS); OR-Kids Child Welfare System; Oregon State Hospital Electronic Health Records (Avatar); and COBOL-

Based Financial/Payment applications. OIS plays a variety of roles in each mission/business critical application ranging from technical oversight of a vendor-based systems to application development and support of on-premises systems.

Starting in 2024 and continuing through 2025 and beyond, the OIS Enterprise Architecture team is working on multiple steps to improve our application portfolio: checking and fixing data quality issues, keeping the information up to date and shared with others, putting rules in place to manage the data over time, and making regular improvements to help with reporting and decision-making. These steps help make the portfolio a useful tool for OIS and the whole organization.

6.5 Application Portfolio Modernization

In alignment with EIS strategy, cloud-based applications are the preferred replacement for core applications. Of the five largest and most complex applications noted in the section above, all have active cloud projects in the continuous modernization journey.

For applications that OIS is responsible for developing, major initiatives are underway to remove dependence on non-standard operating systems, database platforms, application stacks, and programming environments. For example, OIS has decommissioned Sybase entirely, and is working to modernize off AIX, DB2, PowerBuilder and the mainframe platform.

In support of in-house application modernization, a lot of work has been done with process, practice, and standards maturity. OIS continues to incorporate modern operational processes and toolsets including agile development which is a highly iterative and flexible development process; DevOps which is aimed at streamlining software development and delivery into production environments; and using software tools that aid with accessibility and vulnerability maturity.

For details around the holistic application portfolio modernization – See Continuous Modernization.

7 Investments

7.1 OIS Workforce

For the 2025-2027 biennium, OIS has 669 legislatively approved budget positions. Of these positions 6 percent are management/supervisory, 94 percent are staff

with a management to staff ratio of 1:10.7. As of April 2026, our current OIS vacancy rate is less than 6 percent.

OIS is a Shared Services organization and ODHS|OHA use a 64 percent/36 percent cost allocation model. Direct charge codes are used for project-based work. It's common for OIS units to be fully dedicated to business units in our software development and delivery as the nature of the work is around internally developed and supported products. For a few examples, the OIS OR-Kids (child welfare) unit comprised of software engineers; OIS ONE unit comprised of project managers, contract administrators, system administrators; OIS Health & Service Transformation unit in dedicated support of REALD/SOGI. Approximately 100 staff direct charge 100 percent of their time on a monthly average, approximately 75 staff direct charge a portion of less than 100 percent of their time on a monthly average.

7.2 OIS Budget

OIS has a \$304,200,000 budget for the 2025-2027 biennium, which is 0.47 percent of the combined ODHS|OHA budget. About 80 percent of the budget is for personnel services or labor, with the other software maintenance (10 percent), IT professional services (5 percent), and other services and supplies (5 percent).

Personnel services of local IT groups and product and solution business analysts are in agency budgets.

7.3 Technical Policy Option Package Investments in 2025-2027 Budget

In 2025-2027, there were two investments (over \$2 million) in technology through Policy Option Packages with descriptions in the Large Technical Project Portfolio – dollars are represented as total funds. The POPs below support the program and technology needed as outlined in the POP.

This includes:

- **Joint – Mainframe Modernization/Provider & Client Payments System (aka Financial Systems Modernization) (POP 201)** – \$13,141,853 - A prior planning policy package provided initial funding to start planning for a multi-biennia project to migrate the aging mainframe COBOL based payment & financial components to modern platforms. This policy package provides additional funding and staffing to realize the goal of getting off the

mainframe – supporting the planning, contracting and implementation necessary to move forward with the transition. During this phase moving payroll functions off the mainframe and continue to focus on development of new systems for financial costing, reporting, taxation, client benefit issuances and payments, will be considered.

- **OHA – State-Based Marketplace Eligibility and Enrollment Platform Phase II (POP 424)** – \$25 million – A prior planning policy package initiated funding Oregon’s transition away from the federal health insurance exchange and call center toward a state-based marketplace and state-run call center. This policy package provides Phase II transition funding for internal, external, and contracted specialized expertise. This includes project management, technology integration and implementation, procurement, quality assurance, data, legal, security, privacy, community outreach and education, training, and transition to ongoing operations.

8 Continuous Planning

8.1 Accountability

The ODHS|OHA chief information officer (CIO) and deputy CIO are accountable for the Office of Information Services. Key strategic documents such as this document, Strategic Technology Plan, and the Performance Management System will be a shared responsibility. Periodically, usually at year end and the end of the biennium, the materials are reviewed and refreshed.

8.2 Communication

IT progress and strategic artifacts are co-created, reviewed, and communicated to agency leadership. In recent years and going forward the leadership bodies for communication strategy includes agency directors and deputy directors; program/division directors; ODHS cabinet; OHA leadership team; agency technology councils; OIS and local IT technical directors, OIS all managers, and OIS all staff. Additionally, materials are co-created with and/or reviewed with the Healthy Policy assistant CIO; Senior Investment Program manager, and LFO IT analysts.

ODHS/OHA Business Process Reference Model

Top Federal Mandates
US House Resolution 1 (HR1)/Medical - HR1/Medical aka One Big Beautiful Bill Act - made significant changes to the Supplemental Nutrition Assistance Program (SNAP) and Medicaid. The law imposes major eligibility, funding, and administrative changes on Medicaid — including a nationwide requirement that adults ages 19–64 work, volunteer, attend school, or do community service at least 80 hours/month to receive benefits; more frequent (semi-annual) eligibility redeterminations for expansion populations; tighter state financing rules (e.g., limiting state “provider taxes” and constraining how states pay providers); and new cost-sharing or service fees for certain Medicaid enrollees.
US House Resolution 1 (HR1)/SNAP - HR1/SNAP aka One Big Beautiful Bill Act - made significant changes to the Supplemental Nutrition Assistance Program (SNAP) and Medicaid. For SNAP, OB BBA sharply reduces federal spending on benefits and administration (nearly \$200 billion in cuts over 10 years), tightens eligibility and increases work requirements (expanding them to adults 55–64 and some with older dependents, narrowing waiver options), shifts greater share of administrative and error-cost onto states, and recalibrates how benefit amounts are calculated (e.g., limiting deductions for energy and internet costs, and constraining adjustments to the basic benefit formula).
CMS MES Modernization – For the past eight years, CMS has signaled its interest seeing states move to a modular architecture for their Medicaid Management Information Systems (MMIS). In 2023, at the annual Medicaid Enterprise Services Conference, CMS announced that it will now focus on modernization as in “MES Modernization.” (Technical Project: Medicaid Enterprise Services Modernization)
Fair Labor Standards Act (FLSA) – In context of ODHS Home Care Workers (HCW) and Personal Service Workers (PSW), the FLSA requires that the records include certain identifying information about the HCW/PSW and data about the hours worked. (Technical Project: Provider Time Capture)

Federal Department of Health and Human Services – The Federal Department of Health and Human Services (HHS) rule on Comprehensive Child Welfare Information Systems (CCWIS) went into effect on Aug. 1, 2016. The rule governs the next generation of technology to support child welfare programs. The new rule focuses on modularity, interoperability, reusability, data sharing between programs, lifecycle data management, and data quality. ODHS Child Welfare declared that it would move towards a CCWIS environment. (Technical Project: Child Welfare CCWIS Project)
21st Century Cures Act – Requires HCW and PSW time entries to be accurate and attested to by both service recipients and providers. (Technical Project: Provider Time Capture)
Hospital Accreditation – Patient safety and hospital accreditation require that federally mandated electronic health management systems be highly available. (Technical Project: Hospital Application Survivability Platform 2)
CMS Interoperability and Patient Access Final rule – The rules advance the efforts to make health information more easily available to patients and improve coordination of care. (Technical Project: Medicaid Enterprise Services Interoperability)
CMS MARS-E mandate – Federal mandates around information security, privacy, and accountability are evolving rapidly. Of relevance is the Minimum Acceptable Risk Standards for Exchanges (MARS-E). MARS-E provides a single, integrated approach to security and privacy that addresses multiple federal requirements. (Technical approach – ONE maintenance and operations) Accessibility DOJ Final Rule - On April 24, 2024, the Federal Register published the U.S. Department of Justice’s final rule, “Nondiscrimination on the Basis of Disability; Accessibility of Web Information and Services of State and Local Government Entities,” which updated the regulations for Title II of the Americans with Disabilities Act (ADA). The rule has specific requirements about how to ensure that websites, mobile apps, and online documents are accessible to people with disabilities. Initially, all State of Oregon agencies were required by law to meet WCAG 2.1 AA web accessibility standards by April 24, 2026. On April 20, 2026, the U.S. Department of Justice published an Interim Final Rule that extended the deadline for large states to meet the standards to April 26, 2027.

Top State Mandates
HB 3361 (2017) – Established the statewide Chief Data Officer position and included data-management requirements for executive branch agencies. (Technical Project: Enterprise Data Management Platform and various data related initiatives.)
HB 2468 (2023) – Requires property owners to allow dwellings to be used as family childcare homes and sets rules around certification, other children on premises, and subsidy payments from DELC.
HB 2665 (2023) – Requires the Health Licensing Office to establish processes to receive and investigate complaints regarding temporary staffing agencies. Requires OHA to develop rules to establish maximum rates that temporary agencies may charge.
HB 2683 (2023) – Directs the Early Learning Council to adopt rules to establish eligibility for certain children to participate in Employment Related Day Care subsidy programs.
HB 2757 (2023) – Expands and provides funding for a coordinated crisis services system including 9-8-8 suicide prevention and behavioral health crisis hotline.
HB 3127 (2023) – Identifies certain covered vendors and prevents state agencies from downloading and installing covered products from those vendors. Requires OSCIO to adopt rules, policies, and standards for state agencies to implement the removals relating to the vendors, including definitions and timelines of agency notification.
SB 11 (2023) – Requires certain executive department boards or commissions that conduct public meetings through electronic means to record and promptly publish recordings on websites or hosting services so the public may observe or listen to meetings for free.
SB 231 (2023) – Directs ODHS to establish and maintain a centralized child abuse reporting system.

SB 966 (2023) – Requires OHA to adopt standards for types of data collected for all payers and that all claims’ databases are consistent with standards adopted for collection of data on race, ethnicity, language, disability, sexual orientation, and gender identity. (Technical Project: Enhanced Demographics)
SB 972 (2023) – Requires OHA to transition from healthcare.gov to state-based marketplace by Nov. 1, 2026. (Technical Project: State Based Marketplace)
SB 1089 (2023) – Establishes a Universal Health Plan Governance Board. (Note: Bill analysis stated need for single payer plan system)
HB 3159 (2021) – Getting to Data Equity - HB 3159 mandates a registry and repository for collection of Race, Ethnicity, Language, Disability (REALD) and Sexual Orientation, Gender Identity (SOGI) data from providers and insurers. REALD & SOGI data is OHA’s best tool to assess how racism, disablism, lack of language access, sexism and heteronormative dominance impact individual and community health. (Technical Project: Enhanced Demographics)
SB 855 (2019) – Directs professional licensing boards to study matter in which people who are immigrants or refugees become authorized to practice occupation or profession – Directs the Oregon Home Care Commission (part of ODHS) to develop and implement methods to reduce barriers to enrollment for applicants who may be immigrants or refugees. (Technical Project - Provider Enrollment Maintenance System)
SB 1067 (2017) – Relating to government cost containment; and declaring an emergency – Per the bill, SB 1067 Oregon Educators Benefit Board (OEBB) and Public Employees Benefit Board (PEBB) are seeking to integrate the administrative and support of the two IT systems, with improved user experience and customer care, into a single platform to drive cost reductions and operational improvements consistent with applicable law and administrative rule. (Technical Project – OEBB-PEBB Benefit Management Systems (BMS) Replacement)

SB 774 (2015) – Requires Home Care Commission to adopt statewide plan to expand home care worker workforce – Directs ODHS to implement a single online application and universal provider number for the agency provider workforce and increase the size of the workforce available to serve individuals receiving services. (Technical Project – Provider Enrollment Maintenance System)
