☐ Legislatively Adopted

☐ Governor's Budget

Tina Kotek, Governor

August 28, 2026

Dear Governor Kotek:

I am pleased to submit the Oregon Health Authority's (OHA) agency request budget for the 2027-2029 biennium. This budget submission aligns with your priorities to continue the expansion of behavioral health treatment capacity, maintain the sustainability of OHA's core services, and best position Oregon's health care system for the coming impacts from federal funding cuts.

The 2027-2029 biennium will be particularly consequential for OHA. The impacts of H.R.1 will be felt in every community in Oregon and across our health care system. Similarly, changes to the Healthier Oregon program and transition to a state-based marketplace will shift where, when, and how OHP members seek care. Plainly put, OHA, our partners, our leaders, and those we serve must now contend with the greatest threat to health care access and affordability that our state has ever faced.

That said, OHA is not standing by idly. We cannot control federal policy or the national landscape, but what we can control is how we respond in these critical moments. These challenges present us with real opportunities to modernize our agency, activate our partner networks, build sustainability into our workflows, and strengthen our current capabilities so that OHA can continue to serve the people of Oregon for generations to come. The staff and leadership of OHA are committed to doing all we can to preserve our core programs, remain responsive to communities, and stay true to our goal of eliminating health inequities in Oregon.

This is the moment for OHA and our partners to continue building on the successes of the past biennium. Successes like:

- **Behavioral Health expansion** in prevention and treatment capacity to improve system continuity from crisis prevention through recovery supports for adults and children. This includes:

- Projected total of 1,285 additional licensed residential beds by the third quarter of 2028 for the adult mental health system.
- Increased access and utilization of intensive/in-home behavioral health treatment (IIBHT) for children and families, improving timely community-based care.
 - Capacity for young-adult treatment homes has doubled with new programs opening statewide, creating more residential/step-down options for transition-age youth.
- **West Coast Health Alliance (WCHA) vaccine rollout** to uphold integrity of effective public health strategies and protect the health of our communities. Through this partnership, WCHA collaborates on the review of the best available science and evidence to make unified recommendations that support safety, efficacy, transparency, access, and trust.
 - OHA Public Health Division leadership worked with health officials from California, Hawaii, and Washington to establish the structure of WCHA with a charter, received foundation resources to support the WCHA, and hired a project manager and communications firm to facilitate the work of the alliance.
 - WCHA issued joint immunization recommendations for COVID-19, influenza, and RSV in fall 2025 with OHA working across multiple state agencies to preserve access to these immunizations for people in Oregon.
 - WCHA worked collaboratively across the four states to issue statements affirming a grounding in evidence for prevention activities in response to contrary actions from the federal government regarding vaccine safety and changes to the childhood vaccine safety.
- **Rural Health Transformation Program**
 - OHA Health Policy and Analytics (HPA) Division successfully applied to the federal Rural Health Transformation Program and was awarded \$197.3M for its first budget year of the five-year program, through a cooperative agreement with CMS.
 - As of early July, OHA has awarded \$175M through over 300 grant agreements, which is a substantial body of work. The remaining funds have identified uses and will be obligated prior to the end of the budget year (Sept 30, 2026). The speed of distribution and

the inclusion of so many partners and entities has outpaced most other states.

- Funds have been awarded within every county of the state for the purposes of supporting rural health care transformation and stability.
- While these dollars will not offset the federal Medicaid cuts, OHA has heard how deeply impactful these dollars will be within our critical care delivery systems.

With this in mind, our budget reflects both our enduring commitment to mindful stewardship of taxpayer dollars and our goal of maintaining or improving core services for the people we serve. OHA's 2027-2029 budget for the biennium request is \$42.3 billion in total funds (\$7.4 billion in state general funds).

The Policy Option Packages (POPs) included in OHA's Agency Request Budget represent targeted investments that support the agency's mission to eliminate health inequities by 2030. Together, these proposals strengthen core operations, preserve essential services, modernize critical infrastructure, and position OHA to meet the evolving needs of the people of Oregon. The POP proposals include:

- **Advancing Health System Priorities and State Commitments:** Proposals to fulfill legislative direction, federal requirements, and previously established agency obligations to advance statewide priorities in behavioral health, Medicaid, workforce, and public health.
- **Improving Stewardship of Public Resources:** Proposals to reflect OHA's commitment to responsible fiscal management through efficiencies, cost savings, and budget-neutral strategies. By reinvesting existing resources, OHA maximizes the impact of available funding while maintaining essential services.
- **Modernizing Oregon's Health Infrastructure:** Proposals to strengthen the technology, data, and operational infrastructure that support Oregon's health system. Modernizing critical systems improves reliability, security, accessibility, and interoperability to better serve the people of Oregon.
- **Maintaining Safe, Reliable State Facilities:** Proposals to preserve critical state infrastructure and ensure Oregon State Hospital facilities remain safe, secure, and operational. Proactive maintenance and capital

improvements protect public assets, reduce long-term costs, and support safe environments for patients, staff, and visitors.

- **Preserving Core Public Health and Regulatory Services:** Proposals to sustain essential regulatory and public health programs by aligning fees with the cost of delivering services. Maintaining financially sustainable programs ensures OHA can continue meeting statutory responsibilities without reducing service levels.
- **Strengthening Government-to-Government Partnership with Tribes:** This proposal supports OHA's government-to-government relationship with Oregon's nine federally recognized Tribes and demonstrates OHA's ongoing commitment to Tribal partnership.

Thank you for your continued leadership and partnership as we navigate this pivotal time for Oregon's health system. OHA remains committed to working alongside your administration, the Legislature, Tribal governments, community partners, and health care providers to ensure Oregon continues to make meaningful progress toward a healthier, more equitable future. I appreciate your consideration of OHA's 2027–2029 Agency Request Budget and look forward to our continued collaboration in service to the people of Oregon.

Sincerely,

Fariborz Pakseresht
Interim Director

Oregon Health Authority: Agency Summary Narrative

Mission statement

The mission of the Oregon Health Authority (OHA) is helping people and communities achieve optimum physical, mental and social well-being through partnerships, prevention and access to quality, affordable health care.

Statutory Authority

Oregon Revised Statute (ORS) 413.006 establishes the Oregon Health Policy Board, and the Oregon Health Authority is established in ORS 413.032. Additional duties, functions and powers are enumerated in ORS 413.007 to 413.800.

Oregon Health Authority rules are enumerated in Oregon Administrative Rule Chapters 101, 111, 331, 332, 333, 338, 409, 410, 415, 431, 816, 817, 819, 824, 834, 853, 943, 944, 945, 950.

Strategic Plan

OHA's Strategic Plan, published in August 2024, sets out the agency's strategic goals, and related strategies and measures, that steer the agency towards its overall strategic goal to eliminate health inequities by 2030. Health equity is at the core of this plan. OHA is guided by the definition of health equity as established by the Oregon Health Policy Board. This definition and a summary of the plan are below, and the full plan is available on [the OHA website](#).

Health Equity Definition

Oregon will have established a health system that creates health equity when all people can reach their full health potential and well-being and are not disadvantaged by their race, ethnicity, language, disability, age, gender, gender identity, sexual orientation, social class, intersections among these communities or identifies, or other social determined circumstances.

Achieving health equity requires the ongoing collaboration of all regions and sectors of the state, including Tribal governments to address:

Oregon Health Authority: Agency Summary Narrative

- The equitable distribution or redistribution of resources and power; and
- Recognizing, reconciling and rectifying historical and contemporary injustices.

Strategic Plan Executive Summary

Our guiding mission

In 2019, OHA became the first health agency in the country to declare an ambitious statewide goal to eliminate health inequities, and to do so by 2030. In the simplest terms, that means establishing a health system where all people in Oregon can reach their full health potential and well-being, without facing disadvantages due to their race, ethnicity, language, disability, immigration status, age, gender, gender identity, sexual orientation, geography, or social class.

Health inequities are differences in health outcomes that stem from unfair social, economic and other factors, including racism and other forms of bias, discrimination and oppression, which cause people in some communities to have higher rates of health problems — such as infant mortality, chronic disease and shorter life spans — than people in other communities.

Naming our goal of eliminating health inequities by 2030 is bold and aspirational. It sets a daily intention for us as an agency: in our work, systems, policies and practices. We want every decision, every action, every allocation of resources to move us toward this goal every day. And we know that means shaking up entrenched ways of thinking and doing so that we can ensure Oregon becomes a place where everyone has a chance to thrive.

When people are prevented from accessing good health care by barriers such as high costs, bias, and a lack of trained providers or convenient services, it impacts the broader community. OHA will continue to focus on eliminating those barriers that prevent both individual people and the broader community from being healthy and accessing the care that every person in Oregon deserves.

Oregon Health Authority: Agency Summary Narrative

Our goal pillars

OHA has identified five principal goals to serve as pillars of progress toward achieving our 2030 vision:

- **Transforming behavioral health:** Build a behavioral health system that works for every child, teen, adult and family experiencing mental illness or harmful substance use by expanding integrated, coordinated and culturally responsive behavioral health services when and where people need them, guided by people with lived experience.
- **Strengthening access to affordable care for all:** Ensure 100 percent of people in Oregon have easy access to affordable health care, prioritizing communities most harmed by health inequities.
- **Fostering healthy families and environments:** Foster healthy families and environments that equitably promote health and well-being, especially among communities most harmed by health inequities. Do this by expanding access to: 1) preventive health services and supports, including for new parents and families before and after birth; 2) safe and accessible housing; 3) healthy food and nutrition; and 4) climate resilience.
- **Achieving healthy Tribal communities:** In honoring the relationships with the Nine Federally Recognized Tribes of Oregon, Urban Indian Health Program and other health partners, OHA commits to support the ultimate goal of achieving healthy Tribal communities. This empowers Tribal individuals, families and communities across Oregon to achieve optimal health and wellness through a fully funded continuum of health care rooted in traditional and culturally specific practices.
- **Building OHA's internal capacity and commitment to eliminate health inequities:** Establish, maintain and resource the internal infrastructure and accountability mechanisms necessary to acknowledge, reconcile and redress racism and other forms of discrimination and oppression that undermine the health, well-being and opportunities of people across Oregon.

Strategies and actions

Each of our strategies is focused on ensuring that we are able to achieve our overall goal and will be guided by individuals and communities with lived experience. Our work will:

- Strengthen access to affordable, quality health care and provide resources for healthier communities;
- Increase availability of culturally responsive clinics and providers;

Oregon Health Authority: Agency Summary Narrative

- Expand mental health and substance use services and clinics; and
- Bolster the workforce needed to deliver those services.

To accomplish these goals, OHA will work closely with partners, listen to and engage meaningfully with community, and practice transparency and accountability.

How we will measure success

OHA will measure progress made toward our goal of eliminating health inequities by 2030 based on the health outcomes within the communities we serve. We will track the prevalence of preventable disease, whether people at all income levels can access quality and affordable health care, and the degree to which communities experiencing systemic marginalization are able to access behavioral health services. We will review aggregated and disaggregated Race, Ethnicity, Language and Disability (REALD) and Sexual Orientation and Gender Identity (SOGI) data on health access and outcomes to analyze trends and inform our work. And we will monitor how specific factors such as racism, bias and oppression affect access to care.

Criteria for Budget Development

OHA is responsible for improving the lifelong health of Oregonians by expanding access to high-quality, affordable health care, strengthening public health, and advancing the agency's mission to eliminate health inequities by 2030. OHA administers most of the state's health programs, including the Oregon Health Plan and public health services that millions of Oregonians rely on each year. The Agency Request Budget primarily represents the resources necessary to sustain these essential services while making targeted investments to address emerging priorities, improve health outcomes, and respond to the evolving needs of Oregon communities.

The 2027–29 Agency Request Budget was developed within a constrained fiscal environment characterized by limited available state resources, ongoing uncertainty surrounding federal funding, and increasing demand for core health services. In response, OHA adopted a disciplined approach that prioritized preserving essential programs and services while carefully evaluating opportunities to improve outcomes, strengthen operational effectiveness, and advance the agency's mission to eliminate health inequities by 2030.

Oregon Health Authority: Agency Summary Narrative

Budget decisions were guided by OHA's strategic plan, statutory responsibilities, and the Governor's priorities. Throughout budget development, proposed investments were evaluated alongside potential offsets to ensure that limited resources were directed toward the agency's highest priorities. This approach emphasized fiscal stewardship by balancing new investments with efficiencies, reductions, or other funding strategies wherever possible.

Should additional funding become available, OHA would continue to support investments that sustain ongoing and continuing priorities for the State of Oregon. These include investments in information technology initiatives that are already underway but are not formally included as policy option packages in the 2027–29 ARB; investments that support programs implemented in partnership with other state agencies. Examples include permanent supportive housing in partnership with Oregon Housing and Community Services and staffing support for H.R. 1 implementation at the Oregon Department of Human Services; and sufficient funding to support the state's continued response to the opioid crisis, including meeting the state share of associated Medicaid claims.

Development of the Agency Request Budget began more than a year before submission and engaged staff across the agency. Proposed policy options, fiscal estimates, and program narratives were reviewed and refined through multiple stages of agency leadership, the Department of Administrative Services, and the Governor's Office. Program narratives and racial equity impact statements were developed concurrently to demonstrate how proposed investments support measurable outcomes, advance equitable access to services, and align with statewide priorities. The resulting Agency Request Budget reflects OHA's commitment to protecting core health services and making targeted investments that position Oregon's health system to meet current needs and future challenges.

Oregon Health Authority: Agency Summary Narrative

Budget Summary Graphics

Oregon Health Authority's (OHA) 2027-29 Agency Request Budget (ARB) represents a \$1.0 billion General Funds/ \$0.8 billion Total Funds increase over its 2025-27 Legislatively Approved Budget (LAB). The graphics below illustrate the 2025-27 LAB by program and by fund type, as well as the 2027-29 ARB by program and by fund type.

When comparing the 2025-27 LAB to the 2027-29 ARB, there are several factors to note. General Fund increased significantly due to a combination of inflationary adjustments, caseload increases, and fund shifts related to decreases in Other Funds revenue. Increases in Federal Funds are primarily driven by continued implementation of the Medicaid 1115 waivers and the Basic Health Program.

Oregon Health Authority: 10 Percent Reduction Options

As supplemental information to the Agency Request Budget, Oregon law requires each state agency to include reduction options of 10 percent from the estimate of projected costs of continuing currently authorized activities and programs for the next biennium.

For the 2027–29 Agency Request Budget, the Oregon Health Authority (OHA) approached this exercise as part of a broader effort to strategically realign existing resources with the state's highest priorities. OHA evaluated opportunities to improve efficiency, reduce administrative costs, moderate expenditure growth, eliminate lower-priority investments, and redirect existing resources toward targeted Policy Option Packages which improve health outcomes and advance the Governor's priorities.

OHA evaluated programs using the following guiding principles:

- Avoid reductions that have a negative impact on populations already disproportionately impacted by health inequities and health disparities.
- Identifying reductions that do the least harm to the fewest number of clients.
- Applying the OHA goals of containing costs, improving quality and increasing access to health care.
- Avoiding reductions that shift people to more costly service models within OHA or ODHS.
- Minimizing impact on the statewide health care cost growth target.

Any necessary reductions would potentially affect OHA programs in the following areas:

Central Office and Shared Services

Reduction options include agency administrative efficiencies through vacancy savings, facility consolidation, and reductions to administrative expenditures. These actions are intended to reduce operating costs while minimizing impacts to direct service delivery.

Medicaid

The majority of Medicaid reductions focus on slowing both expenditure and cost growth, improving program

Oregon Health Authority: 10 Percent Reduction Options

efficiency, and reprioritizing existing resources while preserving core Oregon Health Plan services. Strategies include targeted payment adjustments, utilization management, operational efficiencies, and elimination of selected lower-priority investments.

Behavioral Health

Behavioral Health reductions preserve the highest-priority behavioral health services. Proposed reductions target reductions to inflation adjustments, discontinuation of selected pilot programs and contracts, consolidation of Peer Respite Centers, and formula-based reductions to Community Mental Health Block Grant allocations.

Health Policy & Analytics

Reduction options include targeted reductions to the Health Care Provider Incentive Program while maintaining the program's core objectives of supporting Oregon's health care workforce.

PEBB and OEBB

Reduction options include Other Funds limitation reductions for both PEBB and OEBB.

Public Health

Public Health reduction options include targeted reductions to modernization investments, school-based health programs, telehealth initiatives, and other discretionary investments while preserving core public health functions.

Oregon State Hospital

The reduction option for Oregon State Hospital would reduce available bed capacity. While identified as a potential reduction option, this proposal would have significant implications for behavioral health capacity and the state's ability to meet statutory and court-ordered obligations.

Oregon Health Authority
Reduction Options: 2027-29 Agency Request Budget

10% General Fund / 10% Other & Federal Fund Reduction Options for the 2027-2029 Biennium
(Limited Other and Federal Funds only - does not include Non-Limited Funds)

Current Service Level Budget (OHA LEVEL)	7,331,956,555	11,706,286,109	22,688,700,921	41,726,943,585
10% Target	(733,195,656)	(1,170,628,611)	(2,268,870,092)	(4,172,694,359)

OHA Current Service Level Budget includes a 5% vacancy savings reduction

Accumulative % Reduction of CSL GF	Agency Priority	Program Area	Reduction Description	Federal Approval required? (Y/N)	General & Lottery Funds	Other Funds	Federal Funds	Total Funds	Budgeted Positions	Budgeted FTE	Impact of Reduction on Services and Outcomes (include other program areas, number of clients affected, etc.)
-0.77%	1	Medicaid	Healthier Oregon Program (HOP) shift from CCO to FFS (net Medicaid Admin)	N	(56,460,000)	(3,950,000)	(8,782,100)	(69,192,100)	-	-	This aligns with changes for the program that are scheduled to begin January 2027. The savings is net of the administrative needs.
-0.78%	2	SAEC - Facilities	Office of Information Services will move out of their current office locations to consolidate. This will lead to a rent reduction.	N	(400,000)	(50,000)	(150,000)	(600,000)	-	-	The Office of Facilities Management has negotiated with Department of Administrative Services (DAS) to consolidate the Human Services building (HSB) to two floors for ODHS, one floor for the Oregon Health Authority (OHA) out of five floors of lease. This reduction to the Facilities rent budget will align it to a closer usage basis for this building. The Office of Information Services (OIS) will be moving to HSB during the 27-29 Biennium.
-0.86%	3	Medicaid	Reduce avoidable neonatal intensive care unit (NICU) days, through clinical efficiencies/implementation of a Perinatal Care Overlay.	Y	(6,500,000)		(15,800,000)	(22,300,000)			Intent is to focus on avoidable NICU days. As part of the clinical efficiency analysis, Mercer identified an increased number of NICU admissions in Oregon compared to neighboring states (WA and ID).
-0.92%	4	Medicaid	Facilitate statewide expansion of the Health Share of Oregon (HSO) High Acuity Behavioral Health (HABH) strategy to generate an estimated 1% - 3% savings, compared to current spending.	N	(4,000,000)		(11,000,000)	(15,000,000)			If all CCOs, with potential supportive action from the state, replicate the HSO program statewide, it could result in significant savings. Possible state actions to facilitate expanding the HSO model statewide: preserve the behavioral health directed payment, add Contingency Management in physical health settings to SUD waiver, develop sustainable funding model and regulatory framework for Transition Recovery Housing (TRH), create med surge hospital-level access for civilly committed individuals, and statewide replication of capacity simulation model to identify throughput for residential beds, etc. Add Contingency Management in physical health settings to SUD waiver, develop sustainable funding model and regulatory framework for TRH, create med surge hospital-level access for civilly committed individuals and statewide replication of capacity simulation model to identify throughput for residential beds, etc.
-1.01%	5	Medicaid	Service adjustments and utilization management in Applied Behavior Analysis (ABA) services.	Y	(6,450,000)		(9,550,000)	(16,000,000)			A utilization review identified outlier utilization trends for ABA services, a treatment for youth with Autism Spectrum Disorder (ASD). The number of members receiving ABA services more than doubled from 2023 to 2024 and included prolonged high-intensity ABA services. The HERC has reviewed ABA clinical guidance and recommended the following coverage changes: covering ABA services for children with ASD ages 1-12, including Early Intensive Behavioral Intervention (EIBI), typically 15 – 40 hours weekly. This option would make authorization changes congruent with clinical evidence and review.
-1.07%	6	Behavioral Health	Intensive In-home Behavioral Health Treatment (IIBHT) - removing 2 pilots	N	(5,000,000)	-	-	(5,000,000)	-	-	Reduction of funds to support expansion of IIBHT and SUD/MH pilot. IIBHT has been identified by the System of Care Advisory Council (SOCAC), Ombuds and ODHS as a priority model to support children. Impact may slow reduction of Emergency Department (ED) visits, Boarding, Temporary Lodging, and Suicide Rates. Additionally, impacts trust with community and key partners by using funds outside of legislative intent. Impacts response to children and young adults impacted by MH and SUD.
-1.20%	7	Medicaid	Modify psychotherapy utilization management guidance.		(8,900,000)		(22,900,000)	(31,800,000)			Psychotherapy utilization in OHP has increased significantly. Outpatient psychotherapy is an important behavioral health support; an increase in utilization reflects better access and is not necessarily a factor of concern. The focus of this reduction is on high-frequency, long-duration visits that do not satisfy medical necessity or provide meaningful clinical outcomes. This includes long-term, high-frequency utilizers. This option would review potential data and guidance to CCOs to support utilization management.
-1.23%	8	Medicaid	Implement Non-Emergency Medical Transportation (NEMT) efficiency adjustments in statewide brokerage model	Y	(2,300,000)		(6,200,000)	(8,500,000)			NEMT is a valued and critical service to facilitate equitable member access to OHP care. As part of the clinical efficiency review, Mercer identified an estimated 2%–10% of NEMT spend within the current CCO model can be avoided through strengthened oversight and monitoring of the NEMT benefit.
-1.46%	9	Medicaid	Reduce outpatient psychotherapy rates by 4%.	Y	(17,400,000)		(45,500,000)	(62,900,000)			Outpatient psychotherapy is the highest driver of increased spending in the Medicaid BH system, and utilization has grown rapidly. Medicaid rates have increased to promote access, but in some cases, OHP outpatient psychotherapy rates now outpace other programs. This reduction will normalize the FFS rate by 4% where the rate is significantly higher than both Medicare and commercial rates. This rate reduction would be tied to utilization management guidance for outpatient psychotherapy for most effective results, particularly focusing on long-term and high-frequency therapy which will result in additional savings and promote telehealth services integrity with both the rate changes and utilization management guidance given claims data on psychotherapy codes billed.
-1.51%	10	Behavioral Health	Peer Respite Centers - reduce from 4 to 2 centers	N	(3,147,000)	-	-	(3,147,000)	-	-	This means that only 2 peer respite centers will remain open. The funding for the other 2 centers that have not yet launched, would be reallocated to other priority areas.
-2.49%	11	Medicaid	Reduce Oregon Health Plan inflation for managed care and fee-for-service from 5.5% to 5.0% per year.		(72,200,000)	-	(181,600,000)	(253,800,000)	-	-	Service costs will not be able to keep up with inflation, effectively lowering the amount available for services and payments to providers in the 2027-29 biennium. Some inflation is needed to ensure OHA can comply with federal requirements for provider rates in comparison to federal rates. In addition, service costs may impact pay for direct care staff, and could lead to workforce shortages and/or member access limitations. CCOs could also decline to continue serving OHP if capitation rates were too low to support their business needs.
-2.72%	12	Medicaid	Coordinated Care Organization (CCO) 1 year Incentive Pool reduction from 4.25% to 3.50%	N	(17,000,000)		(45,000,000)	(62,000,000)			The CCO Quality Incentive Program (QIP) provides financial incentives to CCOs for year-over-year performance improvements on a set of quality metrics. Over its ten-year history, the QIP has incentivized 32 different metrics, most of which are incentivized for several years. This reduction option would decrease the incentive funds by a cumulative total of 18% compared with 2024, which would reduce the intended effect of the program. Many CCOs use these incentive payments to reinvest in resources and programs that facilitate achievement of the quality metrics, including funds passed forward to their providers through value-based payments. So fewer incentive dollars may also impact the scale, scope or effectiveness of the efforts that CCOs have in place for pursuing these quality outcomes.

Accumulative % Reduction of CSL GF	Agency Priority	Program Area	Reduction Description	Federal Approval required? (Y/N)	General & Lottery Funds	Other Funds	Federal Funds	Total Funds	Budgeted Positions	Budgeted FTE	Impact of Reduction on Services and Outcomes (include other program areas, number of clients affected, etc.)
-2.80%	13	All	Agency admin reductions equivalent to an additional ~2.5% vacancy savings	N	(5,650,000)	-	(6,150,000)	(11,800,000)	-	-	For the past biennium and throughout various funding exercises, agency admin and central services have absorbed extensive funding cuts with minimal investment to offset. Further cuts represent a critical threat to OHA's staff retention, public trust, and operational readiness at a time when federal policy changes and compounding crises will demand even more from staff across the agency, particularly among Communications and Finance teams. If these cuts are taken, OHA will need to engage in significant risk planning to address expected staff churn and impacts to the agency's responsiveness to communities and partners across the state. The legislature and advisory committees have repeatedly pointed to the importance of stronger communications and engagement to help the people of Oregon navigate the changes to come during what is the most significant threat to Medicaid in our state's history. It must be noted that if these services are further cut and remain critically under resourced for another biennium, the level of communications and engagement proposed by the legislature simply will not be possible.
-2.88%	14	Public Health	Public Health Modernization - 5% cut	N	(6,050,000)	-	-	(6,050,000)	(2)	(2.00)	Reduces support to Local Public Health Authorities (LPHAs) by 6%. This reduction will greatly impact the critical work both state and local partners are completing including decreasing workforce for both Public Health Division and LPHAs. A focus area of public health modernization is to transform governmental public health in the area of health equity and cultural responsiveness through internal and community policy and program change. This reduction would impact local public health work with the BIPOC community. The LPHAs will have to significantly reduce staff and will be unable to address emerging events, provide critical support to Oregonians and will impact the work done to modernize the public health system. At the state level, reductions will also reduce staffing and impact equity work with various communities and data collection. Public Health is a critical component in ensuring Oregonians are healthy, safe and informed. Reducing any portion of these funds will greatly impact the ability of Public Health to be effective in Oregon.
-3.87%	15	Medicaid	Reduce Oregon Health Plan inflation for managed care and fee-for-service from 5.0% to 4.5% per year.		(72,000,000)	-	(181,300,000)	(253,300,000)	-	-	Service costs will not be able to keep up with inflation, effectively lowering the amount available for services and payments to providers in the 2027-29 biennium. Some inflation is needed to ensure OHA can comply with federal requirements for provider rates in comparison to federal rates. In addition, service costs may impact pay for direct care staff, and could lead to workforce shortages and/or member access limitations. CCOs could also decline to continue serving OHP if capitation rates were too low to support their business needs.
-5.09%	16	Medicaid	Oregon Health & Science University (OHSU) reimbursement at 84%	N	(90,000,000)	90,000,000	-	-	-	-	HB2010 (2019) required OHA to reimburse OHSU up to a minimum of 87% of OHSU's costs for providing Medicaid services. The impact of HR1 will likely make maintaining a reimbursement level of 87% of OHSU's costs unsustainable.
Separation between first and second 5% reduction option lists											
-5.28%	17	Behavioral Health	Community Mental Health 50% reduction of Inflation	N	(14,000,000)	-	-	(14,000,000)	-	-	The impact of this reduction would prevent Behavioral Health from covering any costs that emerge throughout the biennium, such as cost overruns on capital investments, Mink fines, provider emergencies (natural disasters), workforce stability. Due to increased need with static funding, OHA has not passed inflation along to providers. Some providers have not received any inflation increases for several years creating an unsustainable model.
-5.30%	18	Behavioral Health	Substance Use Disorder 50% reduction of inflation	N	(1,050,000)	-	-	(1,050,000)	-	-	The impact of this reduction would prevent Behavioral Health from covering any costs that emerge throughout the biennium, such as cost overruns on capital investments, Mink fines, provider emergencies (natural disasters), and workforce stability.
-5.38%	19	Public Health	Public Health Modernization Additional 5% cut, for a total of 10%	N	(6,050,000)	-	-	(6,050,000)	(1)	(1.00)	Reduces support to Local Public Health Authorities (LPHAs) by 12%. This reduction will greatly impact the critical work both state and local partners are completing including decreasing workforce for both Public Health Division and LPHAs. A focus area of public health modernization is to transform governmental public health in the area of health equity and cultural responsiveness through internal and community policy and program change. This reduction would impact local public health work with the BIPOC community. The LPHAs will have to significantly reduce staff and will be unable to address emerging events, provide critical support to Oregonians and will impact the work done to modernize the public health system. At the state level, reductions will also reduce staffing and impact equity work with various communities and data collection. Public Health is a critical component in ensuring Oregonians are healthy, safe and informed. Reducing any portion of these funds will greatly impact the ability of Public Health to be effective in Oregon.
-5.39%	20	Public Health	School-Linked Telehealth	N	(524,500)	-	-	(524,500)	-	-	The School-linked Telehealth and Mobile Program took a one-time reduction of \$500,000 during the 2025-27 biennium. This cut to 2027-29 would continue that reduction. Taking this cut, would stop the planned release of additional Request for Proposals for school-linked telehealth and mobile grants. This funding allows for an additional 4 - 5 grant awards to Federally Qualified Health Centers (FQHCs), Local Public Health Authorities (LPHAs), school districts and/or other medical organizations. The reduction of this program would limit expansion of primary care and mental health care access points for students and community members.
-5.43%	21	Health Policy & Analytics	Reduce Health Care Provider Incentive Program (HCPIF) funding by 13%	N	(3,300,000)	(3,300,000)	-	(6,600,000)	-	-	The Health Care Provider Incentive Program provides financial and non-financial supports to bring more primary care, oral health, and behavioral health providers to rural and underserved communities. It does this by offering financial help—like loan repayment, loan forgiveness, scholarships, and malpractice insurance subsidies, and other supports that help students build their careers. The program has a strong track record. More than 90% of providers who receive loan repayment and forgiveness stay in their rural communities for up to five years after their service commitment ends. The program also supports a more diverse workforce: based on available data, nearly 40% of participating students and providers identify as people of color or Tribal members. A 13% budget reduction (\$3.3 million) would affect about 150 students and providers. A 27% reduction (\$7.9 million) would affect about 350 students and providers. Altogether, a 40% reduction (\$11.2 million) would greatly limit the program's ability to maintain these outcomes and support rural and underserved communities.

Accumulative % Reduction of CSL GF	Agency Priority	Program Area	Reduction Description	Federal Approval required? (Y/N)	General & Lottery Funds	Other Funds	Federal Funds	Total Funds	Budgeted Positions	Budgeted FTE	Impact of Reduction on Services and Outcomes (include other program areas, number of clients affected, etc.)
-5.62%	22	Behavioral Health	Community Mental Health remaining inflation reduction	N	(14,000,000)	-	-	(14,000,000)	-	-	The impact of this reduction would prevent Behavioral Health from covering any costs that emerge throughout the biennium, such as cost overruns on capital investments, Mink fines, provider emergencies (natural disasters), workforce stability. Due to increased need with static funding, OHA has not passed inflation along to providers. Some providers have not received any inflation increases for several years creating an unsustainable model.
-5.64%	23	Behavioral Health	Substance Use Disorder remaining inflation reduction	N	(1,050,000)	-	-	(1,050,000)	-	-	The impact of this reduction would prevent Behavioral Health from covering any costs that emerge throughout the biennium, such as cost overruns on capital investments, Mink fines, provider emergencies (natural disasters), and workforce stability.
-6.62%	24	Medicaid	Reduce Oregon Health Plan inflation for managed care and fee-for-service from 4.5% to 4.0% per year.	N	(71,600,000)	-	(180,400,000)	(252,000,000)	-	-	Service costs will not be able to keep up with inflation, effectively lowering the amount available for services and payments to providers in the 27-29 biennium. Some inflation is needed to ensure OHA can comply with federal requirements for provider rates in comparison to federal rates. In addition, service costs may impact pay for direct care staff, and could lead to workforce shortages and/or member access limitations. CCOs could also decline to continue serving OHP if capitation rates were too low to support their business needs.
-6.72%	25	Health Policy & Analytics	Reduce Health Care Provider Incentive Program (HCPiF) funding by 27% (40% total)	N	(7,900,000)	(7,900,000)	-	(15,800,000)	-	-	The Health Care Provider Incentive Program provides financial and non-financial supports to bring more primary care, oral health, and behavioral health providers to rural and underserved communities. It does this by offering financial help—like loan repayment, loan forgiveness, scholarships, and malpractice insurance subsidies, and other supports that help students build their careers. The program has a strong track record. More than 90% of providers who receive loan repayment and forgiveness stay in their rural communities for up to five years after their service commitment ends. The program also supports a more diverse workforce: based on available data, nearly 40% of participating students and providers identify as people of color or Tribal members. A 13% budget reduction (\$3.3 million) would affect about 150 students and providers. A 27% reduction (\$7.9 million) would affect about 350 students and providers. Altogether, a 40% reduction (\$11.2 million) would greatly limit the program's ability to maintain these outcomes and support rural and underserved communities.
-7.21%	26	Medicaid	Eliminate the Graduate Medical Education (GME) program	Y	(35,400,000)	-	(53,000,000)	(88,400,000)	-	-	Oregon's teaching hospitals depend on these payments to supplement their teaching programs. Discontinuing payments would be a hardship on the ten teaching facilities and would de-incentivize hospitals from training new physicians. Discontinuing GME payments will also impact the physician workforce as there is already a shortage in the primary care specialty, which is one of the largest specialties in a teaching program. A reduction of trained providers may limit access to quality healthcare.
-7.41%	27	Behavioral Health	County Financial Assistance Agreements (CFAA) reductions (by a formula)	N	(15,000,000)	-	-	(15,000,000)	-	-	Reducing funding to the CFAAs by \$15 million from Community Mental Health Programs (CMHP) across the state. Reductions will result in cuts to services. Because prevention and early intervention are typically the first programs reduced when budgets tighten, the immediate impact will be fewer community-based supports that keep individuals stable and connected to treatment. When these front-end services are curtailed, demand predictably shifts to higher-acuity, higher-cost, and legally mandated care, including civil commitment evaluations and placements, competency restoration ("Aid and Assist") orders, emergency department boarding, acute inpatient admissions, and child welfare or juvenile justice involvement. In effect, near-term budget savings are offset by growth in the state's mandated populations, longer waitlists for mandated services, and higher per-client expenditures.
-7.45%	28	Public Health	10% reduction in School Based Health Centers Program	N	(3,240,000)	-	-	(3,240,000)			A reduction in this budget negatively impacts access to clinical preventative services, communicable disease control, community partnership development, assessment and epidemiology, health equity and cultural responsiveness and organizational public health modernization competencies via cuts to the School Based Health Center Program (SBHC). This would likely lead to the closing of 28 SBHCs, impacting access to youth-centered clinical preventive physical and mental/behavioral health services for more than 24,000 students across Oregon. This reduction is almost one third of the currently certified SBHCs (total = 89). In addition to likely eliminating access to these key primary care and mental/behavioral health access points, closures would result in lack of access for students to youth engagement activities including youth-led project grants, a primary prevention activity supported by the program. As all SBHCs are Vaccine for Children Providers, this will reduce vaccine access points in the community. As many SBHCs are Reproductive Healthcare (RHCare) and Contraceptive Care (CCare) sites, this would reduce access to those services as well.
-8.43%	29	Medicaid	Reduce Oregon Health Plan inflation for managed care and fee-for-service from 4.0% to 3.5% per year.		(71,300,000)	-	(179,500,000)	(250,800,000)	-	-	Service costs will not be able to keep up with inflation, effectively lowering the amount available for services and payments to providers in the 2027-29 biennium. Some inflation is needed to ensure OHA can comply with federal requirements for provider rates in comparison to federal rates. In addition, service costs may impact pay for direct care staff, and could lead to workforce shortages and/or member access limitations. CCOs could also decline to continue serving OHP if capitation rates were too low to support their business needs.
-8.50%	30	All	Agency admin reductions - equivalent to an additional ~2.5% vacancy savings	N	(5,650,000)	-	(6,150,000)	(11,800,000)	-	-	For the past biennium and throughout various funding exercises, agency admin and central services have absorbed extensive funding cuts with minimal investment to offset. Further cuts represent a critical threat to OHA's staff retention, public trust, and operational readiness at a time when federal policy changes and compounding crises will demand even more from staff across the agency, particularly among Communications and Finance teams. If these cuts are taken, OHA will need to engage in significant risk planning to address expected staff churn and impacts to the agency's responsiveness to communities and partners across the state. The legislature and advisory committees have repeatedly pointed to the importance of stronger communications and engagement to help the people of Oregon navigate the changes to come during what is the most significant threat to Medicaid in our state's history. It must be noted that if these services are further cut and remain critically under resourced for another biennium, the level of communications and engagement proposed by the legislature simply will not be possible.

Accumulative % Reduction of CSL GF	Agency Priority	Program Area	Reduction Description	Federal Approval required? (Y/N)	General & Lottery Funds	Other Funds	Federal Funds	Total Funds	Budgeted Positions	Budgeted FTE	Impact of Reduction on Services and Outcomes (include other program areas, number of clients affected, etc.)
-9.07%	31	Medicaid	Reduce Oregon Health Plan inflation for managed care and fee-for-service from 3.5% to 3.2% per year.		(41,680,147)	-	(107,160,000)	(148,840,147)	-	-	Service costs will not be able to keep up with inflation, effectively lowering the amount available for services and payments to providers in the 2027-29 biennium. Some inflation is needed to ensure OHA can comply with federal requirements for provider rates in comparison to federal rates. In addition, service costs may impact pay for direct care staff, and could lead to workforce shortages and/or member access limitations. CCOs could also decline to continue serving OHP if capitation rates were too low to support their business needs.
-9.07%	32	Medicaid	Reduce Other and Federal Funds limitation	Y	-	(654,818,811)	(1,208,727,992)	(1,863,546,803)	-	-	There will be revenue or federal funding for programs but without the limitation the state will be unable fully spend the revenues.
-9.07%	33	PEBB	Public Employees Benefit Board (PEBB) fully insured and self-insured plan limitation reduction	N	-	(340,000,000)	-	(340,000,000)	-	-	PEBB contracts with insurance carriers for employee benefit plans. PEBB program budget is dedicated funding for payment of self-insured and fully insured benefit plans. Taking reductions at any level may potentially default PEBB in its contractual obligations with carriers. Major plan design changes could possibly hit the reduction targets, but it would take a major reduction in medical plan coverage and would jeopardize the stabilization of the statewide risk pool. A major shift in cost sharing between employee and employer could also potentially hit the reduction target but the reductions would have to be taken at the state agency budget level, as it passes employee benefit dedicated dollars through to PEBB.
-9.07%	34	OEBB	Oregon Educators Benefit Board (OEBB) plan limitation reduction	N	-	(250,000,000)	-	(250,000,000)	-	-	OEBB contracts with insurance carriers for Entity and Self-Pay member benefit plans. OEBB budget is dedicated funds for payment of fully insured benefit plans that OEBB is contractually obligated to pass-through to carriers. The pass-through premiums include other taxes and fees at the state and federal level. Taking reductions at any level may potentially default OEBB in its contractual obligations with carriers. Premium shifts to members will not change the pass-through budget dollars needed to meet contractual obligations with carriers.
-10.00%	35	Oregon State Hospital	Bed capacity reduction	N	(67,994,009)	(609,800)	-	(68,603,809)	(222)	(166.50)	This option reduces the Oregon State Hospital system bed capacity by 165 Secured Residential Treatment Facility (SRTF) beds. This would reduce total system capacity from 743 beds to 578 beds (a 22.2% bed capacity reduction). This reduction places OHA at greater risk of non-compliance of admission timelines for persons under Aid and Assist (.370) orders and those under Guilty Except for Insanity (GEI) and negatively limits capacity for all other patient commitment types. This reduction places additional strain on the greater behavioral health continuum of care and the ability to provide service at the right time, in the right place and the appropriate level of care. This will likely result in increased litigation and subsequent fines for the Oregon State Hospital (OSH) and OHA. This option means that OSH facilities will not be running at capacity which creates inefficiencies in support operations. The reduction does include both direct care staff for the beds being closed as well as positions in other departments that directly support that reduced bed capacity. Unavailability of appropriate levels of alternate treatment facilities for the patients that would be transitioned out of OSH bed space at the time of implementation of this option may reduce total savings amount. Estimate reflects 18 months of reduced capacity savings, which may not be achievable if there is no alternate capacity for displaced patients. Reducing OSH bed capacity will result in indeterminate Other and Federal Funds revenue impact, as revenue is dependent upon the benefit eligibility of the specific patients admitted.
			Total		\$ (733,195,656)	\$ (1,170,628,611)	\$ (2,268,870,092)	\$ (4,172,694,359)	(225)	(169.50)

1	Health Programs	Health Programs Medicaid	No	This budget includes the Oregon Health Plan, which provides medical coverage for Medicaid under Title XIX of the Social Security Act, and Children's Health Insurance Program (CHIP) under Title XXI of the Social Security Act. Medicaid has traditionally provided medical coverage to low-income seniors, people with disabilities, children, and pregnant women. Since January 2014, the Oregon Health Plan has also covered all Oregon adults with income at or below 138 percent of the federal poverty level.	Preventive services for OHP youth and adults, Preventive services for OHP children, Appropriate prenatal care for OHP clients, PQI Hospitalizations of OHP clients	12	4,584,198,498	3,637,734	4,723,439,225	0	21,134,123,721	0	30,445,399,178	0	0.00	N	Y	FM	ORS 414, Title XIX, XXI
2	Health Programs	Substance Use Disorder Programs	No	Behavioral Health administers contracts and agreements with local mental health authorities such as LMHAs, CMHPs, non-profit providers, and tribes to develop and administer community-based behavioral health services and supports that are not covered by Oregon's Medicaid program. Culturally specific statewide and regional programs provide services for Native American, Hispanic/Latino and African American populations. These programs are designed to deliver evidence-based services that restore individuals and their families to the highest level of functioning possible. These programs employ peer support specialists, qualified mental health associates (QMHA's), qualified mental health professionals (QMHPs), psychiatrists, psychiatric nurse practitioners, qualified health services (QHS) providers, psychologists, and other independently licensed providers. Individual consumers and their families also are key partners. These partnerships are critical to successfully treating behavioral health conditions. Oregon Health Authority Revenue Narrative

2027-29 Agency Request Budget

Oregon Health Authority (OHA) revenues include state General Fund, Other Funds, Lottery Funds and Federal Funds. Most General Fund revenue is used to match Federal Funds, particularly for the Oregon Health Plan (OHP), Oregon's Medicaid program and to support programs not eligible for federal match. General Fund is also the primary funding source for the Oregon State Hospital. In addition, Federal Funds support a variety of grant programs across OHA. Lottery Funds finance gambling addiction, prevention, and treatment services, along with behavioral health and dental services for veterans. Other Funds include hospital and insurer assessments, tobacco taxes, Tobacco Master Settlement Agreement funding, retail marijuana taxes, beer and wine taxes, licensing fees, grants, estate collections, health care premiums, third-party recoveries, pharmaceutical rebates, and charges for services.

Forecast methods and assumptions

OHA uses several methodologies to project revenue:

For Medicaid and the Children's Health Insurance Program (CHIP), projections are based on caseload forecasts, cost per person, match rates, and state and federal policy changes. For federal block grants, OHA evaluates how grant cycles align within the state's biennial budget, historical federal grant award amounts, and recent or anticipated federal budget changes. For Other Funds, historical receipt trends are used, such as collections of overpayments and fees, unless specific program information, such as anticipated special projects, would impact revenue. Forecasts also incorporate external analyses, including Office of Economic Analysis reports (for Tobacco Tax and Lottery Funds, for example) and revenue projections from partner state agencies that collect revenues that are distributed to OHA, such as beer and wine tax revenues.

OHA revenue estimates consider:

- Essential packages that adjust the existing base budget to the 2027-29 modified current service level (MCSL).

These include phasing in or out program changes, one-time costs, Department of Administrative Services inflation factors, mandated caseload changes, and any needed fund shifts.

- Applicable federal funding limits and requirements, including the availability of state funds to meet matching or maintenance of effort (MOE) requirements.
- Federal policy changes that affect available revenue.
- Policy packages that generate new or increased revenue.
- Expected non-mandated program caseload changes.
- Recent state or federal statutory or regulatory changes that may alter revenue timing or availability.

Fee schedules and proposed changes

OHA uses many fees as funding sources. Most of these fees are in Public Health. See the Detail of Fee, License, or Assessment Revenue Report and Fee Change Detail form for details on proposed changes.

Significant revenue changes or risk factors

The 2027–29 biennium includes several significant revenue shifts and emerging risks that affect OHA’s financial outlook. These changes reflect federal actions, state-level policy decisions, and long-term structural trends across major revenue sources.

Federal policy changes

In July 2025, the U.S. Congress passed H.R.1, a bill that creates the largest near-term risk to OHA revenues. Several provisions reduce federal match rates or reduce other funding streams beginning in 2025–27, with the majority of impacts occurring in 2027–29. Key changes include:

- Reducing the amount Oregon will collect in provider assessments beginning in federal fiscal year 2028, which decreases revenues that support the Oregon Health Plan.

- Limiting state-directed payments to Medicaid providers, which reduces Other Funds received through the Oregon Health and Science University (OHSU) intergovernmental transfer program, which decreases the revenues that support the Oregon Health Plan.
- Reducing enrollment in the Oregon Health Plan, resulting in less federal funding coming to Oregon that supports providers.
- Reducing the match rate for emergency medical care for non-citizen Healthier Oregon members beginning October 2026.

These changes increase pressure on state matching funds and create uncertainty around future federal participation in Medicaid financing.

At a smaller scale than the reductions described above, H.R. 1 also establishes the Rural Health Transformation Program, which invests in rural health care system improvement.

Outside of H.R. 1, federal policy changes have or may further reduce federal resources available to OHA. For example, the Centers for Medicare and Medicaid Services (CMS) will not renew states' Designated State Health Programs (DSHP), which provides federal financial participation for previously approved state-only expenditures. Oregon's DSHP will end by October 2027. Federal policy changes related to grant terms and conditions may cause Oregon to decline participation in federal funding opportunities if those terms and conditions conflict with Oregon values and/or law.

Other Risks

Other risks include volatility in tobacco tax revenue, which supports the Oregon Health Plan and tobacco use prevention programs, and fluctuations in marijuana tax revenue, which fund Behavioral Health Resource Networks (BHRNs) and community-based substance use disorder services.

Major funding sources

The following section identifies OHA's major funding sources. All references to a grant "Title" indicate the applicable chapter of the federal Social Security Act (SSA).

Federal Funds

Medicaid (Title XIX)

Medicaid reimburses states for medical care and related services for people with lower incomes and other medically needy individuals. Federal Medicaid funding supports:

- Health care and flexible services provided under the Oregon Health Plan
- Private insurance premiums
- Long-term care in institutional and community settings
- Some client care provided in state hospitals
- Residential treatment services for adults and youth
- Central administration of alcohol and drug programs
- Family planning services for individuals not enrolled in the Oregon Health Plan
- Uncompensated care provided by hospitals serving a high proportion of Medicaid and people without health insurance.

Medicaid requires state General Fund or Other Funds to match federal dollars for both administrative costs and direct service payments. The match rate for Medicaid staffing and administrative expenditures is generally 50 percent, but higher rates apply to specific functions: 75 percent for eligibility determinations and enrollment activities, skilled professional medical personnel, nursing facility certification activities, and related information systems activities, such as Medicaid Management Information System (MMIS) system support and Preadmission Screening and Resident Review (PASRR) activities.

Health Policy & Analytics also receives federal match for health information technology efforts. Match rates vary by project phase, with planning and implementation commonly funded at 90 percent federal match, and maintenance and operations stages funded at 75 percent or 50 percent. In the 2027-29 biennium, the Office of Health Information Technology & Analytics Infrastructure (OHITAI) expects projects to qualify for both planning/implementation and maintenance/operations match rates.

The federal Title XIX match rate or “FMAP” (Federal Medical Assistance Percentage) for service payments to providers is estimated to average 58.13 percent for the 2027-29 biennium, a slight increase from 58.07 percent in the 2025-27 biennium. The Title XIX match rate applies to non-CHIP, non-ACA expansion OHP members, including Qualified Medicare Beneficiary (QMB) caseloads, except that the cost ~~for~~ for family planning is matched at 90 percent. Beginning October 1, 2026, emergency medical care for members who do not meet Medicaid citizenship or residency requirements (Healthier Oregon, formerly CWM) will receive the Title XIX match rate due to changes required by H.R. 1 (2025). Prior to that, ACA expansion Healthier Oregon individuals received a 90 percent match rate on emergency medical care.

Since January 1, 2020, the match rate for the Affordable Care Act (ACA) expansion population has been 90 percent. However, due to Continuous Eligibility (CE), which started in July 2023, the effective ACA rate was reduced. Continuous eligibility allows OHP members up to age six to stay continuously eligible without annual redetermination. For members aged six and older, redetermination occurs every 2 years. As a condition of continuous eligibility, OHA is required to apply the Title XIX match rate to 2.6 percent of ACA expenditures. Continuous eligibility is ending October 2027 to be in compliance with H.R. 1 (2025). As a result, ACA expenditures will receive a 90 percent match rate starting in November 2027, resulting in an estimated effective ACA rate for 2027-29 of 89.90 percent.

Effective September 28, 2022, the Centers for Medicare & Medicaid Services (CMS) approved temporary federal funding available through the Designated State Health Program (DSHP). Starting in 2023-25, federal financial participation became available on approved, previously state-funded only expenditures. This financial participation is

only available on approved expenditures with dates-of-service prior to October 1, 2027, with this revenue source ending after that date. The DSHP funds are reinvested primarily in new innovative services that address Health-Related Social Needs (HRSN), such as housing and nutrition.

Effective April 8, 2021, CMS approved additional federal revenue for the Medicaid Division by allowing federal financial participation for substance use disorder (SUD) services provided in SUD residential settings that have been designated as Institutions for Mental Disease (IMD), which were previously paid with General Fund dollars only.

Medicaid currently funds services in all OHA program areas. The projection method used to calculate funding is expenditure-based on caseload forecasts, cost per person, match rates, and state and federal policy changes.

Children's Health Insurance Program (Title XXI)

The Children's Health Insurance Program (CHIP) provides federal matching funds for medical care and related services for children through age 18 who do not have insurance, but whose family income is too high to qualify for traditional Medicaid. These services are covered through the Oregon Health Plan. Individuals in the Breast and Cervical Cancer Treatment program also receive the Title XXI match rate. The average CHIP Title XXI match rate for the 2027-29 biennium is estimated to be 70.69 percent, an increase from 70.65 percent in the 2025-27 biennium.

Revenue projections for CHIP follow the same methodology used for Medicaid, relying on caseload forecasts, cost per person, match rates, and applicable policy changes.

Basic Health Program

Oregon established the Basic Health Program (BHP) in July 2024. The program is 100 percent federally funded and provides a limited-benefit plan to qualified individuals. Section 1331 of the Affordable Care Act provides states with an option to establish a BHP. It makes affordable health benefits coverage available for individuals under the age of 65 with household incomes between 138 percent and 200 percent of the Federal Poverty Level (FPL) who are not

otherwise eligible for Medicaid, CHIP, or affordable employer-sponsored coverage, or for individuals whose income is below these levels but are lawfully present non-citizens ineligible for Medicaid.

Under section 1331(d)(3)(A) of the ACA, federal funding for the BHP equals 95 percent of the value of the premium tax credits allowed that would have been provided to eligible individuals (adjusted for certain factors) if they had enrolled in a qualified health plan through the Health Insurance Exchange. These funds are deposited into a state-established trust dedicated to the BHP. The state uses this trust to make payments to standard health plans within the BHP.

The federal BHP funding is determined quarterly based on the state's projected enrollment for the upcoming quarter. Payment rates vary by enrollee based on age, geographic rating area, coverage status, household size, and income. Because the BHP is not an entitlement program and federal funding is limited, Oregon has opted to provide limited benefit coverage to ensure costs remain within available federal funding.

HHS Office of Population Affairs Family Planning Service Grant (Title X Program)

Oregon's Reproductive Health Program within the Public Health Division re-entered the federal Title X Program in 2022, receiving \$3.4 million annually for five years. The US Department of Health and Human Services Title X Program funds comprehensive reproductive health services through fee-for-service reimbursement to the Reproductive Health Program's network of certified clinics.

Temporary Assistance for Needy Families (TANF; Title IV-A)

Under the Personal Responsibility and Work Act of 1996 (PRWOA), Oregon is eligible to receive an annual Temporary Assistance for Needy Families (TANF) federal block grant. OHA uses TANF revenue to fund non-Medicaid programs in the Behavioral Health Division such as alcohol and drug treatment services.

To receive federal TANF block grant funding, states must meet federal maintenance of effort (MOE) requirements by spending a minimum amount of state and local revenues on TANF-related services. The block grant structure

also imposes limitations on service delivery. Federal funding is capped, meaning no federal revenue is available to cover increases in program costs. As a result, Oregon must use state resources to fund any program expansions or cost increases. Revenue projections for the TANF program are based on the federal grant cycle.

Center for Mental Health Services block grant (CMHS)

Federal CMHS block grants support comprehensive community mental health services. This funding is administered by the Behavioral Health Division to help adults with serious mental illness and children with serious emotional disturbances. Funds for children are contracted in all counties throughout the state. At least ten percent of the funding must support evidence-based programs that address the needs of individuals with early serious mental illness, and five percent of the funding is designated for Community Crisis Services for adults and children. Revenue projections for CMHS are based on the federal grant cycle.

Maternal and Child Health Grant (MCHG; Title V)

The MCHG supports state efforts to plan, promote, coordinate, and evaluate health care for pregnant women, mothers, infants, and children, including children with special health care needs. The grant also helps states provide services to mothers and children who lack adequate access to health care. MCHG is a federal formula grant with funding levels partially based on each state's population of children living in poverty. States are required to contribute \$3 in non-Federal Funds for every \$4 in Federal Funds received.

In Oregon, the grant currently supports programs administered by the Public Health Division. For the 2027-29 biennium, PHD expects to request approximately \$12.6 million Federal Funds. Of this amount, 30 percent (\$3.79 million) is earmarked for the Oregon Health & Science University Institute on Development and Disability to provide services for children with special health care needs, as required by federal guidelines.

Nutrition and Health Screening (NHS) – Women, Infants and Children (WIC) program

The Nutrition and Health Screening Section within the Public Health Division Center for Prevention and Health Promotion administers the WIC program, WIC Breastfeeding Peer Counseling (BFPC) program, and Senior Farm

Direct Programs. WIC is primarily federally funded with additional revenue from infant formula rebates. The WIC program provides individualized assessments of growth and health, along with education and counseling on nutrition and physical activity. Services include breastfeeding education and support, referrals to other preventive health and social services, and efforts to promote a healthy lifestyle and prevent chronic disease. The BFPC program is fully federally funded and provides enhanced breastfeeding support using peer counselors. The Senior Farm Direct Nutrition Program, also federally funded but with required state matching funds, provide vouchers to purchase fresh fruits and vegetables at Oregon farmers markets.

Other Public Health federal grants

The Public Health Division administers more than 100 categorical federal grants supporting activities such as cancer prevention, immunization, HIV prevention and care, drinking water safety, environmental health monitoring and assessment, climate and health initiatives, health facility surveys and certification, EMS for children, diabetes reduction, Alzheimer's and dementia prevention, and disaster preparedness.

The division projects federal grant revenues using applicable federal funding limits and requirements, including the availability of state funds to meet matching or maintenance of effort (MOE) requirements.

Substance Use Prevention Treatment Recovery Services (SUPTRS) grant

The SUPTRS grant, formerly the Substance Abuse Prevention and Treatment (SAPT) grant, supports alcohol and drug programs and related administrative costs in both the Behavioral Health Division and the Public Health Division. It also funds county-level overdose prevention and infrastructure. States must meet the maintenance of effort requirement by spending a minimum amount of state and local revenues on substance-use related services. Additionally, 20 percent of the grant must be allocated to prevention activities, and service levels must be maintained for specific populations, including women and women with children. Revenue projections are based on the federal grant cycle.

Rural Health Transformation Program (RHTP) grant

The RHTP grant established by H.R. 1 (2025), was awarded to Oregon by the Centers for Medicare and Medicaid Services (CMS) beginning December 2025. RHTP is a 5-year program meant to strengthen health care access, workforce capacity, and sustainability across Oregon's rural and frontier communities. For the first year of the program, Oregon was awarded \$197.3 million dollars. The program supports program initiatives and related administrative costs in the Health Policy and Analytics Division.

Other Health Policy and Analytics Federal Grants

Health Policy and Analytics has received two federal grants from the U.S. Department of Health and Human Services' Health Resources and Services Administration (HRSA) to support health reform and transformation efforts across multiple areas of OHA. These include:

- A cooperative agreement with HRSA's Primary Care Office to expand access to primary care by helping communities recruit providers and sustain clinical resources
- The HRSA Oral Health Grant, which supports the expansion of dental services throughout Oregon.

Oregon State Hospital – Federal Funding

The primary source of federal funding for the Oregon State Hospital is the Behavioral Health component of the Disproportionate Share Hospital (DSH) entitlement. This program provides Federal Funds to hospitals that serve a high proportion of patients who are unable to pay for their care. OSH receives an annual entitlement of approximately \$19 to \$20 million. These payments are matched at the current FMAP rate, meaning the hospital receives federal revenue in the amount of the FMAP percentage of the total annual entitlement. Any change in the FMAP rate results in a corresponding adjustment to General Fund need.

The state hospital also receives Medicaid revenue, primarily from the Pendleton campus. As a 16-bed secure residential treatment facility, the Pendleton campus is not subject to the federal Institute for Mental Disease exclusion, which limits Medicaid reimbursement for services provided at the Salem and Junction City campuses.

Other Funds

Hospital Assessment

The hospital assessment provides funding for the Oregon Health Plan, enhanced reimbursement, and qualified directed payments to hospitals to maintain quality and access to care. House Bill 2010 (2025) extended the hospital assessment program through December 31, 2032. The Agency Request Budget includes a continuation of assessments for Type A and Type B rural hospitals, as well as diagnostic related group (DRG) hospitals. The bill also authorizes OHA to assess inpatient and outpatient revenues separately. This flexibility allows for increased revenue from DRG hospitals by enabling the collection of an effective 6 percent assessment across all hospital revenues. Previously, hospitals were assessed individually based on total net patient revenue. As required by Oregon law, the OHA Director sets the hospital assessment rate in consultation with hospital representatives. The rate is reviewed regularly and adjusted as needed to meet funding targets.

At the federal level, H.R.1 introduces new constraints on provider tax assessments that will narrow state flexibility over time. Beginning in federal fiscal year 2028, Oregon will need to reduce the current 6 percent assessment by 0.5 percentage points annually, reaching 3.5 percent in federal fiscal year 2032. Oregon's hospital assessment currently collects over \$1 billion annually and is used to support higher payments for Medicaid services to Oregon hospitals and provide funding for the Oregon Health Plan. H.R. 1 also reduces the amount Oregon may distribute through directed payment programs, which is how Oregon makes higher payments to hospitals, with a 10 percent decrease beginning January 1, 2028.

Oregon Health & Science University (OHSU) Intergovernmental Transfer Program (IGT)

House Bill 2391 (2017) exempted OHSU from participating in the hospital assessment program. In place of the assessment, OHA and OHSU established a separate intergovernmental transfer funding program (IGT) during the 2019-21 biennium. OHSU and OHA's partnership in the IGT program allow OHSU to provide the non-federal share for increased payments to OHSU. The IGTs made to OHA by OHSU also support the Oregon Health Plan.

Although the OHSU IGT remains operationally separate from the hospital assessment program, it is directly affected by the reductions to directed payments required under H.R. 1. As federal restrictions phase in beginning

January 1, 2028, directed-payment cuts will limit the amount of Medicaid reimbursement that can be made to OHSU which will reduce payments made by OHSU to OHA through the IGT mechanism. This constraint to OHSU's ability to leverage its transfers and reduce associated funding available to the Oregon Health Plan. While reductions begin January 1, 2028, negative impacts are already being experienced due to the size of the program being frozen. OHA and OHSU are currently unable to grow the program proportionally with OHSU's growth in providing Medicaid services.

Tobacco Tax

Oregon imposes several tobacco-related taxes, including a per pack cigarette tax, a percentage-based tax on the wholesale price of other tobacco products and cigars, and a per-ounce tax on moist snuff. These rates are subject to legislative adjustment and are collected by the Department of Revenue. A portion of the revenue supports the Oregon Health Plan, as well as community mental health and public health programs.

The Office of Economic Analysis forecasts tobacco tax revenue using a 12-month moving average of consumption, based on Department of Revenue distribution data. Revenue forecasting also accounts for price effects, per capita consumption trends, and the projected population age 21 and older.

In November 2020, voters approved Measure 108 to increase the state's cigarette tax by \$2.00 per pack, extended the existing wholesale tax to vaping products, and raised taxes on other non-cigarette tobacco products, effective January 1, 2021. In June 2026, SB 1571 expanded the definition of tobacco products to oral synthetic nicotine. After administrative costs, 90 percent of the revenue supports the Oregon Health Plan, and 10 percent supports tobacco use prevention and cessation programs.

Tobacco Master Settlement Agreement (TMSA)

On November 23, 1998, Oregon and 45 other states, and the four largest domestic tobacco manufacturers (referred to as the Original Participating Manufacturers or OPMs) ended a four-year legal battle over past, present, and future smoking-related claims made by the states by executing the Tobacco Master Settlement Agreement (TMSA). In

exchange, the OPMs agreed to make annual payments (due each April) to the settling states in perpetuity beginning with the year 2000. Funds are deposited to the Tobacco Settlement Funds Account, administered by the Department of Administrative Services. Although not dedicated to medical assistance programs, OHA receives a portion of the settlement to fund programs in the Medicaid Division and Behavioral Health Division. In the 2023 Legislative Session, House Bill 2128 passed, which also allocated payments from non-participating manufacturers (NPMs) to OHA.

Vaping Settlement

In September 2022, Oregon and 34 other states and territories resolved a two-year bipartisan investigation into JUUL Labs marketing and sales practices. That agreement recommends payments are used for vaping prevention, cessation, research, enforcement, and schools and school districts. JUUL Labs is required to pay Oregon \$18.8 million over 7-10 years. The Public Health Division is expected to receive \$8.4 million in payments by the end of 2027-2029 to complete this work.

Retail Recreational Marijuana Tax

Measure 110, approved by voters in November 2020 and later modified by Senate Bill 755 (2021) and House Bill 4002 (2024), redirected a significant portion of marijuana tax revenue to the Drug Treatment and Recovery Services Fund. These funds support the operation of Behavioral Health Resource Networks (BHRNs), which expand access to treatment and recovery services across Oregon. The Behavioral Health Division continues to receive marijuana revenue each biennium for community-based substance use disorder (SUD) services, like treatment, housing and the additional supports needed to help individuals access and engage services. Under House Bill 4056 (2022), these allocations are adjusted annually based on the change in the Consumer Price Index (CPI).

Opioid Settlements

In July 2021, Oregon reached agreement on national settlements with several opioid manufacturers, distributors, and retailers for their role in the opioid crisis. Several lawsuits are still pending, which may provide additional funding

to address opioid-related harms, including settlements with Purdue Pharma and the Sackler family, Safeway/Albertsons, and others.

House Bill 4098 (2022) established the Opioid Settlement Prevention, Treatment, and Recovery Fund to receive revenue from these settlements. The bill also created the Opioid Settlement Prevention, Treatment and Recovery Board, which is responsible for determining how the funds are allocated. Allocations must be for statewide and regional programs identified in the settlement agreements or court judgments, including evidence-based programs for opioid use disorder and other behavioral health needs.

Insurers Assessment

House Bill 2391 (2017) established the Health System Fund within the Department of Consumer and Business Services (DCBS) to administer the Oregon Reinsurance Program and transfer funds to OHA. The bill also created a 1.5 percent assessment on insurer and managed care premiums, effective from January 1, 2018, through December 31, 2019.

House Bill 2010 (2019) increased the assessment rate to 2.0 percent and broadened the tax base to include stop-loss coverage, effective January 1, 2020. A portion of the revenue funds the reinsurance program for eligible health benefit plans, while the remainder supports the Oregon Health Plan. House Bill 2010 (2025) extended the insurers assessment in its current form through December 31, 2032.

OHA projects the revenue from coordinated care organizations serving Oregon Health Plan members, as well as from health plans administered by the Oregon Educators' Benefit Board health plans, and self-insured and contracted health plans administered by the Public Employers' Benefit Board. These projections are based on enrollment forecasts and cost trends. DCBS projects revenue from the assessment on commercial insurers.

Beer and Wine Taxes

The Oregon Liquor and Cannabis Commission (OLCC) collects beer and wine revenue based on a percentage of tax revenues. The Behavioral Health Division uses the revenue for alcohol and drug programs. The Department of Administrative Services Office of Economic Analysis provides projections for beer and wine tax revenues.

Public Employees' Benefit Board (PEBB) Administrative Assessment and Revolving Fund

PEBB administrative expenses are paid through a 1.30 percent administrative assessment added to medical and insurance premiums and premium equivalents. Per ORS 243.185, the assessment amount cannot exceed 2 percent of the monthly employer and employee contributions to benefits and is appropriated to the Public Employees' Benefit Account. Revenue projections are based on a per employee per month actuarial projection of a premium composite rate.

ORS 243.167 continuously appropriates to the Public Employees' Revolving Fund balances to cover expenses incurred for the administration of employee benefits. Revenues from this account are used to control costs, subsidize premiums, self-insure, and pay premiums and premium equivalents for medical, dental, and optional benefits. In addition, the assessment pays for the development of a new Benefit Management System (BMS). Once the BMS project is complete, the administrative fee is likely to decrease.

Oregon Educators Benefit Board (OEBB) Administrative Assessment and Revolving Fund

OEBB has two statutory revenue sources to support operating expenses and maintain a stabilization fund. Under ORS 243.880, the Oregon Educators Benefit Account is used to fund administrative expenses. Revenue for this account is generated through a 1.30 percent administrative assessment on member premiums. The assessment rate is capped at 2 percent of total monthly premiums. Per ORS 243.882, the account balance may not exceed 5 percent of the monthly total of employer and employee contributions for more than 120 days.

ORS 243.884 establishes the Oregon Educators Revolving Fund, which is used to pay premiums, control expenditures, and support self-insurance and subsidize premiums. Revenue comes from monthly premium

collections, which are reconciled and passed through to insurance carriers. Interest earnings retained on these pass-through funds allow OEBC to build a reserve to help stabilize premiums. In addition, the assessment pays for the development of a new Benefit Management System (BMS). Once the BMS project is complete, the administrative fee is likely to decrease.

Health Care Provider Incentive Fund

ORS 676.450 establishes and continuously appropriates to the Health Care Provider Incentive Fund to fund the Health Care Provider Incentive Program. The program assists qualified health care providers who commit to serving Oregon Health Plan (Medicaid) and Medicare enrollees in rural or medically underserved areas of this state. In addition to state appropriations, the fund also receives contributions to expand program reach and impact.

Drug Rebates

The Medicaid Drug Rebate Program includes CMS, state Medicaid agencies, and participating drug manufacturers. It helps to offset federal and state costs for most outpatient prescription drugs provided to Medicaid members. Nearly 800 drug manufacturers participate in this program. To qualify, manufacturers must enter into a national rebate agreement with the U.S. Department of Health and Human Services, which requires them to pay rebates on covered drugs in exchange for Medicaid coverage.

Drug rebate revenue offsets General Fund support for the Oregon Health Plan within the Medicaid Division. In January 2024, Oregon transitioned from a separate CHIP (S-CHIP) designation to a Medicaid expansion (M-CHIP) designation. This change allows OHA to claim drug rebates on CHIP expenditures, which were previously ineligible.

The Medicaid Division projects drug rebate revenue based on historical expenditure patterns and anticipated trends. Rebates are collected monthly using rates provided by CMS and tied to OHP drug expenditures forecasts, applying historical rebate-to-expenditure ratios.

988 Crisis Intervention

House Bill 2757 (2023) established a \$0.40 per line, per month assessment on phone lines to support the 988 suicide prevention & behavioral health crisis lifeline. The assessment began January 1, 2024, and is scheduled to continue until January 1, 2030. Revenue from this assessment is deposited into the 988 Trust Fund which is continuously appropriated to OHA. These funds support the operations of the 988-suicide prevention & behavioral health crisis lifeline, and when resources allow, expanding mobile crisis intervention services statewide.

Health Policy and Analytics Fees

The Health Policy and Analytics Division collects Other Funds revenue through various fees. As of January 1, 2023, OHA began collecting fees for the Health Care Market Oversight Program. House Bill 2365 (2021) requires OHA to review proposed transactions involving health care entities, such as mergers and acquisitions of hospitals, health insurance companies, and provider groups. Other fee-supported programs include the Conrad J-1 Visa Program (ORS 409.745), Oregon Prescription Drug Program ArrayRx, Healthcare Workforce Data Collection and Reporting and Health Care Data Reporting Program.

Health Insurance Marketplace (HIM)

The Oregon Health Insurance Marketplace is funded through a per-member-per-month (PMPM) fee charged to insurance companies for medical plans and dental plans purchased through the marketplace. This funding supports program administration. The Health Insurance Marketplace was transferred from the Department of Consumer and Business Services to the Oregon Health Authority during the 2021-23 biennium.

Intoxicated Driver Program Fund (IDPF)

Court fines, fees, and assessments related to driving under the influence of intoxicants are deposited to the state's Criminal Fine Account (CFA) and in the past, the Legislature has distributed some of the funds into OHA's Intoxicated Driver Prevention Fund (IDPF) to provide education, treatment, and financial assistance to intoxicated driving offenders. The Behavioral Health Division (BHD) has used these funds to support county DUI service programs and to administer contracts for Ignition Interlock Device (IDD) services for eligible indigent individuals.

OHA did not receive IDPF revenue in 2025-27 and is not expected to receive any in 2027-29.

Law Enforcement Medical Liability Account (LEMLA)

LEMLA is funded with Other Funds revenue from assessments added to fines and bail forfeitures paid into the court system. This account is used to pay medical providers for services to people injured as a result of law enforcement efforts. A small portion of this fund is used for program administration. Projections are based on estimates from Department of Revenue and Department of Justice.

Community Housing Trust Account

This trust fund was established with the proceeds from the sale of the Dammasch hospital property (ORS 413.101). Interest earned from the fund is dedicated to new housing and facility for people with mental illness. These funds are budgeted in the Behavioral Health Division.

Third-Party Liability Recoveries

The Third-Party Recovery Program collects medical-related recoveries from insurance companies, providers, and clients, and cash assistance by filing liens on personal injury settlements involving clients. The state's share of these recoveries becomes Other Funds revenue used to offset Medicaid expenditures.

Efforts to increase cost avoidance through provider education and an emphasis on up-front payment accuracy and coordination of benefits will affect recoveries in the coming biennium. Early identification of clients with third-party insurance coverage is expected to increase cost avoidance, reduce program expenditures, and directly impact the expected amount of recovery.

Public Health Other Funds Sources

The Public Health Division receives Other Funds from more than 126 sources. These include negotiated service agreements, lab and inspection fees, certification fees, grant awards, client co-pays, and other charges. The wide range of revenue streams reflects the diversity of Public Health programs and services, including Tobacco

Prevention, Juvenile Violence Prevention, Medical Marijuana Certification, Environmental Laboratory Accreditation, Coordinated School Health, Reproductive Health and Adolescent Health, Psilocybin Services, the Prescription Drug Monitoring Program, Radiation Control, Water System regulation, Drinking Water Operator Certification, Health Records and Statistics, Emergency Medical Services providers and ambulance services, Newborn Screening, and Cross Connection, and Backflow Inspection.

The division also generates revenue from fees from licensing activities in such areas as licensing hospitals and special inpatient care facilities; registering, inspecting and testing X-ray equipment; and testing and certifying Emergency Medical Technicians. The Health Licensing Office (HLO), which regulates over 80,000 authorizations among 20 boards and councils—including 6,100 facilities—collects fees for applications, exams, license and registration issuance and renewals, disciplinary actions, and other administrative fees. Each board, council, and program has its own statutory fee structure, which supports both its operations and HLO. Collectively the boards are expected to generate more than \$12 million in fees in 2027-29, with revenue increasing as new boards, programs or license types are added.

The Health Licensing Office recent additions include a new Sign Language Interpreters Board (HB 2696, 2023), establishing a criminal history predetermination fee (SB 1552, 2024), and a new Dental Laboratory Program (HB 2594, 2025). The largest Other Funds revenue source supporting Public Health programs is the non-limited Women, Infants, and Children (WIC) infant formula rebate. Public Health projects Other Funds revenue based on historical data, contract terms, anticipated service levels, and fee changes.

Medicare Revenue

Medicare revenue is based on submitted claims for services provided to Oregon State Hospital patients. Claims are submitted upon patient discharge or when insurance benefits are exhausted, whichever occurs first. Medicare Part A provides a limited number of lifetime coverage days per patient, regardless of the number of admissions or lengths of stay for each covered person. These revenues depend on patient eligibility for those benefits and vary

with the payor mix and applicable Medicare rules. Changes in the number of patients with available benefits will directly affect hospital revenue.

Local Revenue

The Oregon State Hospital receives Local Revenue from several sources, which make up a small portion of Other Funds revenue. These include patient-supported employment programs—such as wood product fabrication and bench work—as well as patient stores, campus cafeterias, and coffee shops.

Bond Sale Revenue

The Oregon State Legislature appropriated \$20 million in funds for House Bill 2316 (2021) to OHA for the purpose of providing grants for the development of community-based housing, including licensed residential treatment facilities, for individuals with mental illness and individuals with substance use disorder. These grants will be administered by the Behavioral Health Division, and as funds will not be fully expended in the 2025-27 biennium, they will be carried forward into the 2027-29 biennium to allow community partners and providers time to acquire, construct, or remodel facilities as needed.

Bond sale revenue also supports capital construction projects and equipment replacement at the Oregon State Hospital, along with initial planning for replacement of the Electronic Health Record.

Lottery Funds

Under ORS 461.549, one percent of Oregon's lottery proceeds is allocated to the Behavioral Health Division to support problem gambling treatment and prevention services. The Oregon Constitution also allocates 1.5 percent of lottery proceeds to the Veterans' Services Fund, which supports veterans' access to housing, health care, and mental health services. Beginning in the 2019-21 biennium, OHA began receiving an allocation from this fund to support veteran's behavioral health services. In the 2021-23 biennium, additional funds were allocated to OHA to support veteran's dental care in Medicaid. The Department of Administrative Services Office of Economic Analysis provides the projection of lottery fund revenue.

Agency Request Budget

Oregon Health Authority: Central Services

Executive Summary

Program Contact: Kris Kautz, Agency Operations Director
503-383-5147

Oregon Health Authority: Central Services

Executive Summary

Division overview

Central Services supports the Oregon Health Authority's (OHA) mission by providing leadership in key policy and business areas. It includes:

- Director's Office, including the Office of Tribal Affairs
- Fiscal Division
- Agency Operations Division
- Equity and Inclusion Division
- External Relations Division

Funding request

OHA's 2027-29 Agency Request Budget of \$184.3 million Total Funds for Central Services continues funding at the current service level for the upcoming biennium. The budget includes policy packages to continue funding priority programs and initiatives and to build out OHA capacity in areas that directly support the agency's strategic plan.

These include:

- POP 405: Digital Accessibility Initiative
- POP 410: Health Systems Integration Platform
- POP 411: Human Resources Workforce Capacity
- POP 414: OHA Data Management Platform
- POP 417: OSH Electronic Health Record Modernization
- POP 418: OSH Human Resources Workforce Capacity
- POP 420: Prior Authorization Modernization
- POP 426: Tribal Traditional Health Workers

Executive Summary

Program description

The **Director's Office** is responsible for overall leadership, policy and development, and administrative oversight for OHA. This office coordinates with the Governor's Office, the Legislature, other state and federal agencies, Tribes, partners, local governments, advocacy and client groups, and the private sector.

The Director's Office provides leadership in achieving the agency's mission. In developing OHA's strategic plan, the agency has centered around the strategic goal of eliminating health inequities by 2030. Under the strategic plan, OHA has committed to the following five goals:

1. Transforming behavioral health;
2. Strengthening access to affordable care for all;
3. Fostering healthy families and environments;
4. Achieving healthy Tribal communities; and
5. Building OHA's internal capacity and commitment to eliminate health inequities.

The Office of Tribal Affairs is responsible for ensuring that the relationship between OHA and the Nine Federally Recognized Tribes of Oregon is built on trust and mutual respect. It is important that the agency understands and follows the requirements in Federal Law, including the Federal Trust Responsibility to provide health care to Indian people, State Law requirements in ORS 182.162-182.168 (SB 770, 2001), relating to government-to-government relations between the State of Oregon and American Indian tribes in Oregon and the OHA-ODHS Tribal Consultation and Urban Indian Health Program Confer Policy

The Office of Tribal Affairs supports Tribal Governments and the Urban Indian Health Program to successfully deliver health care services including physical, oral, behavioral and public health, so that the triple aim objectives of better care, better health, and lower costs are met. This includes implementing programs, policies, legislation and coordinating funding opportunities for Tribes to better serve their communities. This office provides training for various levels of staff in the agency and outside partners to enhance knowledge and understanding of tribal issues

Oregon Health Authority: Central Services

Executive Summary

and federal mandates. The Office of Tribal Affairs provides leadership on agency-wide efforts to improve access, service equity, and outcomes for American Indian and Alaska Native people.

OHA has embedded a health equity framework approach into the work of all programs in order to bring equity into the forefront of the agency's work innovating, improving and transforming the state's health care system.

The **Agency Operations Division** provides operational support and human resources services to OHA. The division includes the following functional areas:

- Central Operations – Supports agency operations including public records requests, facility coordination, strategic planning and performance system management, Shared Services engagement with the Oregon Department of Human Services is also coordinated through Central Operations. The Office of Information Services also reports up through Central Operations as a shared service between OHA and ODHS.
- Human Resources – Provides recruitment, classification and compensation, employee relations, labor relations, organizational development and business operational support across the agency.

The **Equity and Inclusion (E&I) Division**, on behalf of OHA and the state of Oregon, is leading the most ambitious, equity centered health system transformation in the nation, working in partnership with priority populations, all OHA divisions, and the statewide health delivery system to eliminate health inequities in Oregon by 2030. In alignment with the agency's [health equity definition](#) and the state's goal to develop policy, program and practice that promotes optimal health for all people in Oregon, the E&I Division provides expertise and technical assistance on equity, inclusion, anti-racism, anti-oppression, inclusive accessibility and social justice topics. The work of the division links to all five OHA strategic plan goals by building organizational equity infrastructure and creating equitable health services delivery system across the full health spectrum.

OHA's E&I Division is structured into four sections:

- The Civil Rights, Learning and Inclusion (CRLI) Section has a leading role in advising agency executives, health system partners—including Coordinated Care Organizations (CCOs), workforce partners, policymakers,

Executive Summary

and federal, state and municipal entities—to eliminate avoidable health inequities, improve health outcomes for all people in Oregon, and remove institutional and historic barriers experienced most deeply by people in priority populations, while also managing significant internal and external civil rights responsibilities. The Section’s work is primarily governed by Federal, State and DAS statutes, regulations and policies, including U.S. Department of Justice’s (DOJ) requirement for comprehensive digital accessibility and U.S. Health and Human Services’ regulations on non-discrimination and language access.

- The Equity and Policy Section works from an anti-racism framework to develop, implement, coordinate, monitor and evaluate strategies to promote and advance health equity. This includes efforts to identify policy, programs, systems, and environmental solutions that are community-centered, community-led and community-driven. The section’s programs and initiatives, many of which are legislatively mandated, require extensive collaboration across all OHA divisions, the Governor’s Office, legislators, CCOs, other state and federal partners.
- The READ & SOGI Section is legislatively mandated per ORS 413.161 – 413.167 and is charged with implementing data collection standards building a centralized and integrated registry and repository system, monitoring performance on implementation and working with programs to implement workplans for remediating implementation challenges. Additionally, the section leads the development, maintenance and operations of the Registry and Repository Project and administers a grant program for community health organizations and community-based groups to provide culturally responsive, trauma-informed trainings. The section also supports agency-wide capacity to analyze READ & SOGI data and use results to inform policy and program level decisions agency-wide.
- The Operations Section is responsible for diversified and multi-functional processes to support the Division in leading health systems transformation on behalf of OHA, as the interface for: project management, change management and quality improvement support to division leadership, staff and business partners; workforce development support; centralized administrative services; legislative operational support and administrative rulemaking; communications; contracts, grants and invoicing management; and facilities, safety and wellness planning and implementation.

Oregon Health Authority: Central Services

Executive Summary

The **Fiscal Division** within OHA Central Services provides enterprise fiscal leadership for the agency by overseeing budget development and execution, advancing financial strategy, strengthening accountability, and supporting the integrity of OHA's financial operations. The division works across OHA to ensure fiscal decisions align with agency priorities, statutory requirements, and the responsible stewardship of public resources. The Fiscal Division includes four functional areas:

- **Budget:** Develops, coordinates, executes, monitors, and manages OHA budgets across divisions and throughout the statewide budget process.
- **Financial Investments and Outcomes:** Provides agency-wide fiscal strategy by integrating policy, budget, and performance to strengthen decision-making and improve the connection between public investments and intended results.
- **Actuarial Services:** Provides actuarial analysis and financial forecasting to support Medicaid financing, rate development, and long-term fiscal planning.
- **Program Integrity:** Protects the integrity of OHA programs by preventing, detecting, and addressing fraud, waste, and abuse while promoting compliance with state and federal requirements.

While the Office of Actuarial and Financial Analytics and the Office of Program Integrity are functionally housed within the Fiscal Division, they are budgeted within the Medicaid Division Program Support and Administrative Unit.

The **External Relations Division (ERD)** enhances and facilitates communications and community and partner engagement to audiences inside and outside OHA. The division's work touches all areas of OHA across all divisions. External audiences include people receiving OHA services, legislators, community partners, nonprofits, contractors, service providers, local and federal government, other state agencies, and media. To advance OHA's goal to end health inequities in Oregon by 2030, the ERD:

- Works closely with the OHA Director's Office on strategic initiatives and shared services.
- Promotes transparency, community engagement and community voice through leading the agency community engagement and feedback work. .

Executive Summary

- Advises and works across all OHA as experts in communication, government relations and community engagement to inform and improve the experience of those receiving OHA services.

The External Relations Division has four sub-divisions: Communications, Government Relations, Office of Community Health and Engagement, and the Member and Partner Engagement and Support Office which includes the Ombuds Program, Innovator Agent Team and the Relationship Engagement and Management Application Team. Together, these teams are responsible for developing systems for gathering and responding to input from members of the public and partners, building strong relationships with the public, community partners, media, the Legislature, and other agencies at the state and federal levels, as well as creating a broad understanding of the many ways in which OHA contributes to the health and well-being of Oregonians.

Within OHA's commitment to partner directly with community to eliminate health inequities, each ERD team carries the voice and feedback from community, with a focus on communities and individuals in Oregon facing health inequities, through all agency operations, policies and programs to integrate community voice into agency work.

- The Office of Community Health and Engagement includes the Community Partner Outreach Program (CPOP). CPOP has built a one-of-a-kind network of Community Partner Organizations serving all people in Oregon. The work CPOP and Community Partners do on behalf of OHA is essential to support health system transformation and adequately serve Oregonians to eliminate health inequities, ensure access to quality health care, contain costs of health care, and improve overall health for Oregonians. CPOP is the backbone and network from which individuals enroll in the Oregon Health Plan (OHP), understand how to use services and support equity-centered, transformative care.
- The Member and Partner Engagement and Support Office includes the following programs:
 - The Ombuds Program advocates for OHP member access to care and quality of care provided through OHP; uses learnings from individual member issues to elevate OHP member voices throughout OHA so Medicaid programs, policies, and operations are based on member experience; and elevates identified issues for system improvement. As required by legislation the program reports data and

Executive Summary

recommendations for improvement to the OHA Director, the Oregon Health Policy Board, and the Governor.

- The Innovator Agents work closely with Oregon's 16 coordinated care organizations (CCOs) as required by legislation and Oregon's Medicaid Waiver to coordinate between OHA, the community, and CCOs to ensure local adaptation and implementation of statewide health priorities. They understand the health needs of the region, the strengths and gaps of the health resources in the CCO and articulate these needs and gaps to OHA to ensure statewide and local coordination. They prioritize elevating OHP member voice within CCO operations and across OHA to ensure CCOs and OHA are working together to prioritize health equity, Tribal relationships, behavioral health, and emerging statewide priorities.
- The Relationship Engagement and Management Application (REMA) Team elevates partner and community input into OHA operations, policies, communications, and programs. The Feedback Team collects partner and member feedback from customer service data, partner engagement events and other areas across OHA to track concerns impacting health equity. The team identifies gaps in service or delivery based on emerging issues reported through the feedback system. The team ensures that critical loops are in place to act upon and report back on partner insights and member experiences.
- Communications provides accurate and accessible information about OHA's mission and programs, responds to requests for information from the public and media, and produces content for a wide range of agency publications, websites and other channels for keeping the public informed on pressing healthcare topics. The team elevates content through English and Spanish social media and other media channels and communications pathways to best reach populations in Oregon most impacted by health inequities.
- Government Relations provides timely health data and analysis to the Legislature, federal partners, and local elected officials to inform evidence-based health policies and legislation. It also develops and advances OHA legislative concepts to ensure access to quality health care, contain costs of health care, ensure legislative concepts center OHA's goal to eliminating health inequities, and improve overall health for Oregonians.

Division initiative-specific work includes communications, policy support, as well as coordinating and advocating for priority populations and member experiences related to the following agency-wide priorities:

Executive Summary

- HR 1 implementation and impacts to members and providers
- Healthier Oregon transition and impacts to members and providers
- Behavioral health
 - Measure 110 program/HB 4002 implementation, fentanyl and methamphetamine substance use disorder crisis.
 - 988 and mobile crisis/capacity/investments.
 - Prevention, treatment and recovery including behavioral health residential capacity expansion.
- Protecting and expanding health coverage: OHP renewals, Healthier Oregon, OHP 1115 Medicaid waiver implementation and the Basic Health Program.
- 1915(i) Home- and Community-Based Services.
- Lower Umatilla Basin Groundwater Management Area communications and supporting community outreach for well testing and mitigation.
- Oregon State Hospital operations.
- Health care system mergers, finances, facility closures, and workforce challenges.
- CCO performance, rates and finances.
- Public health strategy and response to existing and emerging health issues to improve health outcomes, as well as promote and protect safe, healthy, and resilient environments to improve quality of life and prevent disease.

Within OHA Central Services, **Human Resources** (HR) activities include carrying out recruitment, retention, learning and development, classification and compensation, and employee and labor relations services with an emphasis on antiracism, equity, and belonging that promotes a vital, prepared, and talented workforce that reflects and truly benefits the Oregonians' that OHA serves.

The Office of Human Resources serves as a business partner and provides proactive, comprehensive human resource services that furthers the agency in achieving its mission and goals. HR works closely with internal

Oregon Health Authority: Central Services

Executive Summary

partners on workforce initiatives and strategies at the program and agency level. It promotes a healthy workplace culture of ongoing development and feedback to ensure that the workforce has the needed skills to be successful and engaged. HR is committed to the vision of a healthy Oregon and eliminating health inequities by 2030.

HR serves a growing and complex agency in OHA. HR's strategic focus is on ensuring equity, antiracism, inclusion, and belonging principles in all our that we do – programs, policies, processes, and service delivery. HR's work impacts all OHA staff, every day. It is imperative that HR model, embody, and carry-out organizational values in order to delivery on the agency's goal of eliminating health inequities. Below are metrics and data that begin to describe HR's scope of work (data time frames are July 1, 2025 to June 30, 2026):

- 36,490 applications for positions, each of which HR manually grades to determine minimum qualifications
- 587 hires
- 188 promotions and 535 transfers
- 559 HR investigations that required corrective action
- 7 manager fact finding that required corrective action
- 45 grievances responded to at Step 2
- 78 managers trained on Performance Accountability & Feedback Module 1, 77 on Module 2, 76 on Module 3
- 400 classification reviews
- 1,464 employee pay assessments completed
- 57 unscheduled review requests completed

Program justification and link to long-term outcomes

OHA Central Services provides critical business support necessary to achieve the agency's strategic plan, both directly through program activities as well as through essential services provided to other areas of OHA.

Executive Summary

Outcomes from investments made within the E&I Division demonstrate innovative approaches and collectively align with all five of the agency's strategic goals. Long-term, the programmatic and policy work of E&I represents essential levers to achieve the 2030 goal to eliminate health inequities in Oregon. Outcomes of this work include but are not limited to:

- Regional Health Equity Coalitions (RHECs) empower priority populations to participate in policy and systems change efforts to address structural and institutional racism and discrimination for the purpose of improving health equity across the social determinants of health. RHECs have informed legislation and policy development including Cover All Kids, Healthier Oregon, 1115 Medicaid waiver, behavioral health services for gender-diverse communities and have contributed to OHA's consultation with and feedback from community.
- A Health Equity Impact Assessment A suite of Health Equity Impact Assessment tools and trainings designed to build internal capacity and support equity-centered decision-making.
- Behavioral Health Equity Learning Collaborative to disseminate our behavioral health equity framework across OHA divisions to improve cross-agency coordination on behavioral health initiatives as well as ensure alignment around accountability in behavioral health equity across the agency. A data map and behavioral health data policy brief to improve data literacy among behavioral health staff and to improve the use of data to guide policy and improve service delivery.
- Traditional Health Workers (THWs) Program is a legislatively mandated program that certifies, trains, and supports all Eight Traditional Health Worker types and subtypes: Community Health Workers, Peer Support and Peer Wellness Specialists, Family Support Specialists, Youth Supports Specialist, Personal Health Navigators, Birth Doula- (Postpartum), and Tribal Traditional Health Workers. The program certification has grown from 900 to 9000 + people (as of 2026). The program provides technical assistance to organizations and collaborates with coordinated care entities to advance the integration and use of THW providers across Oregon. THW program supports and Ensure CCO accountability to improving Member Care Coordination and Network Adequacy. Oversight of THW deliverables of CCO contract, providing technical support to CCOs, THW employers and THW providers, responding to matters to support providers and OHP members.

Executive Summary

- The Health Care Interpreter (HCI) Program is a legislatively mandated program. Revised Statute (ORS) 413.550, which mandates that the state implement a certification and qualification program to ensure accurate and effective communication in health care for people with limited English proficiency. Continued certification and qualifications of both spoken and sign language interpreters, assessment and work to remove barriers for working as an HCI. The program has conducted webinars and plans to make it a biennium goal to provide health care provider webinars and HCIs to better understand the need of providers and HCIs. The program continues to fund free or low-cost trainings to new and continue education units (CEUs) for renewing HCIs; assuring a broad range of languages represented in OHA central registry, especially language of lesser diffusion. The program host an accurate database of qualified and certified HCIs on OHA Central Registry. The program continuous improvement in central registry in response to CCOs, HCIs and user feedback.
- Based on REALD& SOGI compliant data sources, the REALD & SOGI Repository can now share quality disaggregated demographic data as appropriate and approved via REALD &SOGI governance, including several agency-wide priorities such as the Medicaid members and CCO incentivized metrics dashboards.
- CRLI supports the agency's workforce to equip them to do their jobs in alignment with the agency's objective to ensure that equity is practiced consistently, leading to increased workforce satisfaction, productivity and engagement and that OHA (and the state) meets state and federal statutory and regulatory requirements.
- Through strategic and proactive investment in the CRLI Section's work, there is foreseeable cost savings in less turnover and effective internal investigations that addresses issues sooner and more effectively than resource-intensive litigation.

The **Fiscal Division** continues to modernize budget development and financial management practices by standardizing processes, enhancing enterprise budget reporting, and strengthening coordination across OHA divisions. Together, these efforts are improving OHA's ability to demonstrate responsible stewardship of public resources, support informed investment decisions, and more clearly communicate the value and impact of state and federal funding.

Oregon Health Authority: Central Services

Executive Summary

Program performance

Within the **Fiscal Division**, budget staff implement and monitor the OHA budget of over \$40 billion Total Funds and nearly \$6.4 billion in General Fund dollars. The Health Care Finance staff provide financial oversight of coordinated care organizations and Medicaid fee-for-service costs, which total over \$10 billion annually.

Accomplishments from **Equity and Inclusion Division** include:

- CRLI Section developed and delivered numerous trainings and presentations on compliance-based or equity-centered or both topics to OHA employees, managers, and volunteers (board and commission members) as well as other state executive agencies and regional and national workgroups.
 - These presentations include: (1) civil rights requirements and resources; (2) foundational equity principles and practices; (3) language access principles and processes; (4) equitable recruitment; (5) organizational resilience and healing; (6) integrating equity into legislative processes; (7) digital accessibility considerations and requirements; and (8) integrating meaningful access and inclusion; in addition to providing general technical assistance. The activities listed in numbers two to eight were primarily completed by the Accessibility, Inclusion and Education (AIE) unit which became fully operational in April 2024. AIE has provided 310 hours of ADA-related consultation, 404 Language Access related technical assistance requests, 45 equity trainings or training series, 500 hours of workforce equity consultation and policy development, and processed 210 Digital Accessibility requests for usability testing, remediation, SME consultation, and produced three Enterprise-wide trainings. Additionally, the Civil Rights Unit (CRU) has completed approximately 230 investigations from 2023 to present related to civil rights concerns in addition to providing numerous coaching and technical assistance to OHA managers and staff and approximately 25 trainings/presentations in that same period.

Executive Summary

- CRLI uses an inclusive and accessible ticketing platform which enables more accurate tracking of requests and deliverables to help capture performance measures to quantitative data about number of trainings developed and delivered, number of people completing trainings; and qualitative (and quantitative) data to include training evaluation.
- Traditional Health Workers (THWs) Program is a legislatively mandated program that certifies, trains, and supports all Eight Traditional Health Worker types and subtypes: Community Health Workers, Peer Support and Peer Wellness Specialists, Family Support Specialists, Youth Supports Specialist, Personal Health Navigators, Birth Doula- (Postpartum), and Tribal Traditional Health Workers.
 - Through CCO contracts, implemented 16 THW integration and utilization plans, payment models, and data.
 - Expanded approved training programs: OHA-approved THW trainings rose 33% since 2020; culturally and linguistically specific trainings grew from 2 to 14.
 - Tribal collaboration: all nine federally recognized Tribes and the Urban Indian Health Program helped develop the 80-hour Tribal THW training
 - Expanded THW Provider Network Access beyond Medicaid to OEB and PEBB members
 - Launched an online portal for THW and HCIs to submit applications online, effective July 2024, reducing errors and increasing efficiency for HCI credentialing. The registry currently has about 2,018 HCIs, as compared to only 538 in 2019.
- Regional Health Equity Coalitions (RHECs) empower priority populations to participate in policy and systems change efforts to address structural and institutional racism and discrimination for the purpose of improving health equity across the social determinants of health.
 - There are currently nine RHECs serving 22 counties. During the first half of the 25-27 biennium, RHEC memberships include over 1,000 individual members and 53 member organizations. RHEC engagement resulted in meeting 10 policy and system change goals, 38 community education events which reached 46 organizations and over 800 individuals.

Executive Summary

- The Health Equity Innovation and Implementation (HEII) unit advances systems transformation across OHA by helping teams embed equity into policies, programs, operations, and decision-making through capacity building, the development of equity tools, implementation support, and accountability structures.
 - Develop, maintain infrastructure supporting agency wide implementation of the Health Equity Impact Assessment tool suite, including: multiple touch points and technical assistance to any projects using tool, year-long learning collaborative, virtual, on-demand Workday facilitator training, forthcoming recorded tool introductory presentations, live Facilitator trainings for groups of 10 or more and regular capacity building activities, including presentations to teams across divisions.
 - Continuation of the implementation of Health Equity Impact Assessment tool and application of critical agency projects: such as Coverage Analytical Frameworks (CAF) Development (HPA), Equitable Hiring Policy (EHP) Development (Cross-Divisional, E&I and HR), Children, Youth and Your Adults Medicaid Reports (Medicaid), Temporary Health Care Staff Rate Setting Program (HPA) and Community Capacity Building Grant Program (an 1115 Waiver project) and application of the HEIA tool in the Language Access Visioning Project (Cross-divisional) that is currently in progress.
 - Development of a suite of trainings to support Healthier Oregon Program (HOP) such as Complaints and Grievances training to CCOs to support HOP members.
 - Support the implementation across divisions of the OHA Community Engagement Framework with collaboration with External Relations Division.
 - Development and implementation of contract and guidance documents in collaboration with CCO staff for the Final CCO Health Equity Plan reports due in September and December 2026 and the evaluations and provision of technical assistance to CCOs after their 2025 submission in the second half of 2025.
 - Support of cross-divisional efforts on Gender Affirming Care (GAC) policy and program development.
- The REALD SOGI section supports OHA's strategic plan goal pillar five -- building internal capacity and commitment to eliminate health inequities by leading data analysis, visualization and tracking of five OHA workforce diversity metrics.
 - Leading inter-agency efforts to increase capacity to effectively collect, analyze, and use REALD & SOGI data.

Executive Summary

- Leading the Oregon Health Equity and Services Study (OHESS) to recruit, interview, and track three hundred people living across Oregon overtime to measure exposure to systems, including oppressive systems that create and exacerbate health inequities. OHESS will also evaluate the validity of REALD & SOGI questions for measuring exposure to systems that create inequities.
- By the end of this biennium the program will have disaggregated 2024 REALD denominators for all Oregon counties including state-wide estimates for agency-wide metrics development and comparison of performance across counties. This work is in partnership with our contractor
- The Operations Section completed a reorganization to develop a centralized administrative team of 6 FTE to support changing business needs of the division's leadership, sections and programs to provide responsive administrative support.
 - Based on assessments completed by NW ADA Center and with support from OHA leadership, the division relocated offices to the Portland State Office Building, to facilitate improved accessibility supports for employees and to improve customer service with community members.
 - The Operations section Rulemaking coordinator facilitated two rules processes for the Regional Health Equity Coalition program and the Traditional Health Worker program. We hosted a total of 5 Rules Advisory Committee sessions.

Enabling legislation/program authorization

The Oregon Legislature created and authorized OHA under House Bill 2009 during the 2009 legislative session. All OHA program areas have accompanying federal and state legislative authority for the operations of their respective programs. See program unit summaries for specific enabling legislation. OHA's Central Services provides essential leadership and administrative oversight and support to ensure successful delivery of statutorily authorized programs and services.

Executive Summary

Funding streams

OHA's Central Services receives funding through a federally-approved cost allocation plan. A grant allocation module aggregates costs on a monthly basis and charges those costs, as outlined in the federally approved plan, to the various state and federal funding sources.

Significant proposed program changes from 2025-27

Digital Accessibility Initiative, POP 405: This POP would support a coordinated digital accessibility program staffed by permanent as opposed to limited duration subject matter experts at the Oregon Health Authority that advances adoption of WCAG 2.2 standards across public-facing and internal digital and IT systems. The program would fund stable capacity for accessibility implementation, technical guidance, training, and remediation of the backlog of inaccessible documents. Integrating accessibility standards into IT investments, procurement, and program operations will allow OHA to ensure health information and services are usable by all Oregonians, including people with disabilities. This approach improves equitable access to care and benefits, reduces legal risk and manual accommodations, and strengthens the efficiency, compliance, and long-term sustainability of OHA's digital health infrastructure.

OHA Data Management Platform, POP 414: A core part of OHA's continued effort to modernize data related operations and tools, this POP supports meeting the critical operational needs relating to the establishment of the OHA Data Office, achieving meaningful Enterprise Data Governance and Data Modernization across OHA, as outlined in the Improving Medicaid Data Implementation (IMED) Advanced Planning Document (APD), used to request Federal match funding for Oregon's Medicaid IT projects. This is an active and ongoing Transparency, Accountability, and Belonging Initiative (TABI) which requires investments in positions and technology to support OHA's achievement of critical data modernization goals.

Executive Summary

This POP funds the implementation of an Enterprise Data Management Platform with data cataloging capabilities, integrated data-sharing agreement and request management functionality, Data Indexing and Entity Resolution, priority data source ingestion into the OHA Data Environments, and the staff needed to operate and sustain these capabilities. These investments will enable staff and partners across OHA to find, understand, govern, trust, and appropriately share data. This will reduce duplication of effort and data, strengthen stewardship and accountability, improve transparency, support consistent privacy and security decision, and improve OHA's ability to identify and respond to health inequities across Agency programs.

Human Resources Workforce Capacity, POP 411: Human Resources works as critical infrastructure to ensure that candidates who will best serve populations most harmed by health inequities have no barriers to entry into our organization and upon entry have a more meaningful, mission centered, value aligned onboarding experience and supported learning through professional development courses, reflecting our commitment to equity and anti-racism. It is also imperative that the workforce receive all the benefits and supportive services needed in a timely and culturally responsive manner.

With the growth of OHA's workforce over the past 4 years, it was necessary to increase HR services through responsive staffing levels. The resulting use of non-budgeted positions to respond to customer services demands places HR in a position to ask for 19 permanent positions to maintain base customer service levels that are relied upon for day-to-day operations.

There are important expectations set out by our Governor's Office that include 50-day time to fill for vacancies, timely New Employee Orientation participation, timely management training, and completion of employee performance and accountability feedback sessions, among others. To ensure that we are meeting or exceeding these foundational and critical expectations, HR needs the appropriate staffing levels to shoulder the work in a responsive, accurate, and consistent way.

Executive Summary

OSH Human Resources Workforce Capacity, POP 418: Provides greater HR service levels to the Oregon State Hospital. HR's Employee & Labor Relations (ELR) program serving OSH requires (15) additional positions to fulfill the ELR needs of OSH. The demands on OSH's workforce as they respond to external scrutiny and internal drivers to improve, results in increased workplace tension, behavior implications, and morale concerns. Outgrowths include an increase in investigations into workplace conduct, use of leave, increase in ADA requests, and supporting managers in managing concerns around unauthorized leave use, call outs, staffing levels, and employee engagement. The additional positions requested here are to directly serve OSH and positively impact workplace outcomes, engagement, attendance, and improve customer service.

Prior Authorization Modernization, POP 420: Improves Medicaid services and achieves compliance with CMS-mandated Application Programming Interfaces (API) to enable member, provider and payer access and improved interoperability to records. Streamlines Prior Authorization processes and funds both staff and contractors to support additional CMS interoperability requirements in the future.

Improves system flexibility, data interoperability, and healthcare access, improving health outcomes and reducing inequities among Medicaid populations. Without funding OHA risks non-compliance; this would both jeopardize enhanced federal funding, and hinder provider and member access to health information, thus exacerbating health disparities.

Tribal Traditional Health Workers, POP 426: In honoring the government-to-government relationship between OHA and the Nine Federally Recognized Tribes in Oregon, together we partnered on HB 2088 (2021), which created the sixth THW worker type, the Tribal THW. To support this sixth category, we need to continue to partner with Tribal Representatives to support this new worker type. We are proposing the development of a grants program to distribute to the Nine Tribes and the Urban Indian Health Program to support the implementation of the Tribal THW within their Tribal Health Systems. Full implementation of the Tribal THW worker type will create:

Executive Summary

- Increased capacity for the Tribal Health workforce, as they will be trained in multiple sectors of health topics identified by the Tribes
- Increase the proficiency of staff trained in areas of overall health, behavioral health, public health, and Tribal-Based Practices (TBPs)
- This worker will link community members with health services including Traditional Health Care Practices, a demonstration project approved in the 1115 waiver
- More employment and training opportunities for those with lived experience serving Tribal communities
- More sustainability through established billing pathways.

Oregon Health Authority: Shared Services & State Assessments & Enterprise-wide Costs

Executive Summary

Program Contact: Sara Singer, ODHS | OHA Shared Services Budget Administrator
503-385-7537

Oregon Health Authority: Shared Services & State Assessments & Enterprise-wide Costs

Executive Summary

Division overview

Shared Services supports the Oregon Department of Human Services (ODHS) and Oregon Health Authority (OHA) by providing leadership in the delivery of efficient, consistent, and coordinated infrastructure services to all programs in both departments.

State government service charges (SGSC), price list

The Department of Administrative Services (DAS) charges a mandatory assessment to all state agencies (SGSC) and an estimated fee-for-service charge provided by the following programs and others not listed here:

- DAS — Chief Financial Office (CFO)
- DAS — Capitol Planning Comm.
- DAS — Enterprise Asset Management Offices
- DAS — Chief Operating Office
- DAS — Chief Human Resources Office
- DAS — Enterprise Information Services
- Secretary of State Audits & Archives Divisions
- State Controllers Division
- Enterprise Goods and Services (EGS)
- State Library of Oregon
- All others

Risk Management Program, price list

Under ORS 278.405, DAS manages state government risk management and insurance programs. It has responsibility to:

- Provide insurance coverage for tort liability, state property, and workers' compensation.
- Purchase insurance policies, develop, and administer self-insurance programs.
- Purchase risk management, actuarial, and other required professional services.
- Provide technical services in risk management and insurance.
- Adopt rules and policies governing the administration of the state's insurance and risk management activities.

Oregon Health Authority: Shared Services & State Assessments & Enterprise-wide Costs

Executive Summary

Enterprise Information Services (EIS), price list

Enterprise Information Services, formerly known as the State Data Center, provides and manages a common computing and network infrastructure for state agencies and local governments. EIS provides services in the following service areas:

- Mainframe
- Distributed services
- Midrange
- Disaster recovery
- Storage
- Network
- Voice

Telecom, price list and usage based

The telecommunications budget is the cost per IBM headset budget and DAS financing charges for the IBM telecommunications system. Expenditures for work contracted to IBM for phone system adjustments are paid out of this budget as well.

Facilities

Facilities provides coordination for ODHS and OHA offices. Expenditures include:

- Rent or lease workspace for staff (includes escalations and reconciliation costs).
- Lease building maintenance management (janitorial, repair, and maintenance).
- Fuels and utilities (includes rate increases).
- DAS leasing fees and building rent.
- Copier maintenance.
- Professional services for furniture movers, installers, and emergency repairs.
- Attorney General cost for legal sufficiency reviews for leases, negotiations related to legal issues for facility related matters and legal opinions.
- Inventory replenishment.
- Costs of systems furniture reconfigurations, building remodels, facilities relocations and staff moves.

Oregon Health Authority: Shared Services & State Assessments & Enterprise-wide Costs

Executive Summary

IT direct – internal computer replacement

Lifecycle replacement, repairs, and new computers for new positions. If the agency requests an upgrade or purchase that is not considered replacement, repair or a new computer for an existing employee, the purchase is charged to the program.

Shared Services funding

Funding is based on cost allocation statistics as applied to Shared Services office expenditures. The allocation method determines distribution of expenditures between OHA and ODHS and the revenue distribution by General Fund, Lottery Funds, Other Funds or Federal Funds.

Debt service

Debt service is the obligation to repay principal and interest on funds borrowed through the sale of certificates of participation (COPs) and bonds. The state uses proceeds of COPs and bonds to build and improve its facilities. They also are used to provide staff support for related activities including project management, community development coordination and fiscal services support. Repayment periods range from 6 to 26 years depending on the nature and value of the project. The Department of Administrative Services Capital Finance Section provides schedules of debt service obligations for each sale; these are the values used to develop the budget. Occasionally, the Capital Finance Section can refinance existing debt, which can reduce or delay debt obligations.

Mass transit

Transit taxes are employer taxes used to fund a mass transit district. These are not deducted from employee pay. The transit tax is imposed directly on the employer. The tax is figured only on the amount of gross payroll for services performed within the TriMet or Lane Transit Districts. This includes traveling sales representatives and employees working from home. The Oregon Department of Revenue administers tax programs. Nearly every employer who pays wages for services performed in these districts must pay transit payroll tax. It is based on state-only (General Fund) funding.

Oregon Health Authority: Shared Services & State Assessments & Enterprise-wide Costs

Executive Summary

Unemployment insurance

Benefits provide temporary financial assistance to workers unemployed through no fault of their own who meet Oregon's eligibility requirements. Invoiced and paid quarterly.

Office of Administrative Hearings

The Employment Department bills all state agencies for actual expenses incurred due to utilization of Administrative Hearings.

Funding request

OHA Shared Services contains the Office of Information Services (OIS). The Agency Request Budget of \$664.8 million Total Funds continues funding for the Office of Information Services for 2027-29 at the current service level, as well as the following policy packages:

- POP 410 Health Systems Integration Platform
- POP 414 OHA Data Management Platform
- POP 417 OSH Electronic Health Record Modernation

OHA State Assessments and Enterprise-wide Costs (SA&EC) includes the budget for costs that affect the entire agency. The Agency Request Budget is \$519.5 million Total Funds. This budget continues funding at the current service level as well as the following policy packages in support of the rest of the agency:

- POP 410 Health Systems Integration Platform
- POP 414 OHA Data Management Platform
- POP 415 OHA Savings and Reductions
- POP 416 OSH Capital Improvement and Deferred Maintenance
- POP 419 OSH Safety and Security
- POP 423 State School Nurse Realignment

Oregon Health Authority: Shared Services & State Assessments & Enterprise-wide Costs

Executive Summary

Program description

Office of Information Services (OIS) is a shared service providing information technology (IT) systems and services that help ODHS and OHA to:

- Determine client eligibility.
- Provide medical, housing, food and job assistance.
- Provide addiction, mental health, and vocational and rehabilitative services.
- Protect children, seniors and people with physical and developmental disabilities.
- Process claims and benefits.
- Manage provider licensing and state hospital facilities.
- Promote and protect public health.
- Support internal administrative functions, including human resources, finance, and procurement programs.

OIS supports more than 250 business-facing applications that are used by approximately 17,000 agency and partner staff at 140+ locations throughout Oregon.

OIS provides management support for ODHS and OHA IT projects, systems architecture and databases, IT asset and change management, and coordinates network and computing operations with the Oregon State Data Center.

Program justification and link to long-term outcomes

OHA Shared Services provides critical business supports necessary for OHA programs to achieve the agency's overarching mission to eliminate health inequities by 2030. OHA Shared Services – Office of Information Services (OIS) – performs Quarterly Target Review (QTR) meetings where managers review metrics and outcomes that align with OHA's Health Equity goals. In addition, OIS reports to the ODHS/OHA Shared Services Budget Committee (SSBC), which is made up of OHA and ODHS leaders, on the OIS metrics and Service Level Agreement (SLA) components. Its budget is structured and administered according to the following principles:

Oregon Health Authority: Shared Services & State Assessments & Enterprise-wide Costs

Executive Summary

Control over major costs. OHA centrally manages many major costs. Some, such as many DAS charges, are essentially fixed to the agency. Others, such as facility rents, are managed centrally to control the costs. OHA Shared Services supports both ODHS and OHA by providing leadership in the delivery of efficient, consistent, and coordinated administrative services to all programs within both departments.

Customer-driven shared services. With the creation of separate agencies, ODHS and OHA agreed to maintain many infrastructure functions as shared services to minimize costs, avoid duplication of effort, maintain centers of excellence, and preserve standards that help the agencies work together.

ODHS and OHA govern their shared services through a board of the two agencies' operational leaders. This approach ensures that shared services are prioritized and managed to support program needs. The board and its chartered subgroups have:

- Established service-level agreements and performance measures for each service.
- Selectively implemented mandated budget cuts and budget investments.
- Managed staff within the shared services to deliver services in a rational way.
- Started implementing more integrated systems to support the performance of all our employees.

Program performance

OIS performance measures focus on customer service, system performance, responsiveness, and information security. Other support areas have their own performance measures based on their systems and the services they provide.

Enabling legislation/program authorization

House Bill 2009 created the Oregon Health Authority in 2009.

Oregon Health Authority: Shared Services & State Assessments & Enterprise-wide Costs

Executive Summary

Funding streams

Funding streams in support of Shared Services are billed through a federally approved cost allocation plan. The model contains a billing allocation module and a grant allocation module. The billing allocation module first allocates Shared Services costs to the two agencies. The billing module then allocates the costs to customers within each agency. The grant allocation module allocates those costs to their respective state and federal funding sources. Both modules allocate aggregated costs monthly as outlined in the federally approved plan.

Significant proposed program changes from 2025-27

OHA is proposing to increase current service level funding for Shared Services and SAEC to resource strategic and prioritizes initiatives in support of the Oregon State Hospital system, and Data and systems management. POP numbers and titles are listed in the Funding section.

Oregon Health Authority: Health Policy and Analytics

Executive Summary

Program Contact: Clare Pierce-Wrobel, Director of Health Policy & Analytics (503) 979-8775

Executive Summary

Division overview

OHA's Health Policy and Analytics division develops and implements innovative approaches to achieving health equity by lowering health care costs and achieving better health and better health care for all people in Oregon, with a particular focus on communities that face health inequities due to factors such as systemic racism. This is accomplished by providing expertise in agency-wide policy development, strategic planning, program design, clinical leadership, delivery system technology tools to support care coordination, health system transformation, and health care workforce supports. The division also leads programs that provide critical insights into health system performance and accountability, providing oversight of Oregon's health care market and cost growth. HPA serves as an analytics resource, informing data-driven policy decisions across the agency and is the dedicated analytics hub for OHA's Medicaid and Behavioral Health divisions. The division is also home to the Public Employees' Benefit Board, the Oregon Educators Benefit Board, and the Oregon Health Insurance Marketplace. This scope puts HPA at the intersection of the public and private sector, holding a systemwide view of market dynamics, system performance, and health care affordability and access.

Funding request

The Agency Request Budget of \$821.7 million Total Funds continues funding for the Health Policy and Analytics division at the current service level for 2027-29. This budget also includes policy packages to do the following:

- Requesting General Fund to cover the Health Care Market Oversight Program costs that cannot be covered by fee revenue
- Implementing the OEGB and PEBB benefits management system replacement project

Executive Summary

Program description

OHA's Health Policy and Analytics division is accountable for leading the next phase of health system transformation and achieving OHA's 2030 goal to eliminate health inequities by:

- Advancing health care affordability and access through major initiatives: hospital financial assistance programs, the sustainable cost growth target program, implementing the no-cost coverage option, OHP Bridge, and managing funding needed to support the next generation of Oregon's health workforce.
- Leading health policy analysis, design and development for emerging cross-market topics.
- Supporting and incentivizing payments for value, moving away from paying for service volume and incentivizing care delivery that promotes better health for all communities.
- Focusing on addressing upstream social determinants of health in addition to the delivery of medical care.
- Driving toward universal health care coverage in Oregon through initiatives to ease transitions between public and commercial coverage.
- Innovating and implementing integration across behavioral health, oral health, physical health and social services using health information technology.
- Implementing legislative directives to align metrics and supporting new and innovative metrics for equity and social determinants of health.
- Facilitating multi-payer alignment to stabilize critical provider services and build a health care system capable of achieving health equity.
- Supporting the Oregon Health Policy Board's work, including its plans to operationalize OHA's health equity definition and reimagine a health care system capable of achieving health equity.

The division's **Director of Health Policy and Analytics** coordinates with the Governor's office, the Legislature, other state and federal agencies, partners, local governments, advocacy and client groups, and the private sector to achieve health equity, universal coverage and a stable health care system while remaining focused on the triple aim of better health, better care, and lower costs.

Oregon Health Authority: Health Policy and Analytics

Executive Summary

The **Office of Delivery System Innovation** (DSI) aligns and integrates clinical resources and policies to support implementation of the Medicaid coordinated care model throughout OHA and provider and payer organizations across the state. The Delivery System Innovation Office includes the Transformation Center (with a focus on primary care and value-based payment) and quality improvement activities; the Clinical Supports, Integration and Workforce Units' workforce initiatives; the Patient Centered Primary Care Home program, the Primary Care Office, and the Health Care Provider Incentive Program; the Health Evidence Review Commission; and the Pharmacy Policy & Programs team.

The **Office of Health Policy** analyzes and develops policy options, facilitates partner discussions, coordinates strategic and implementation planning efforts, and evaluates health services research and policy for the Governor's Office, the Legislature, the Oregon Health Policy Board (OHPB), OHA, and other participants in Oregon's health system transformation. These services help OHA identify opportunities, articulate program options, implement policy, and assess its progress toward achieving the triple aim. The Office of Health Policy serves three key functions:

- Research, analysis, and policy development
- Strategic policy coordination, monitoring and tracking
- Partnership and engagement

Current priority areas for the Office of Health Policy are the Rural Health Transformation Program (RHTP), health care costs, children's health care, and health care coverage.

The **Office of Health Analytics** is organized into six interconnected work units: Behavioral Health Analytics, Behavioral Health Quality Metrics, Quality Metrics Surveys and Reporting, Research and Data, Coverage Analytics, and Monitoring and Evaluation units. These units are complemented by four analytics work units under the Office of Health Information Technology & Analytics Infrastructure (OHITAI). Together the ten health analytics teams serve these overall functions:

Oregon Health Authority: Health Policy and Analytics

Executive Summary

- Ensure the availability of high-quality, reliable data through data system integration and transparent reporting;
- Analyze data and develop strategies and tools to assess the performance of OHA programs; and
- Support OHA policy development, implementation, and evaluation.

Staff in each unit collaborate closely with analytic, policy and program colleagues across the Health Policy & Analytics Division. They also work closely with all OHA divisions, as well as other state agencies such as Oregon Department of Human Services and Department of Consumer and Business Services.

The **Office of Health Information Technology & Analytics Infrastructure** is responsible for providing policy, program, partnerships, data system infrastructure, and analytics supports, including:

- Accelerating state and federal health reform goals through organized support for adoption, implementation, and integration of health information technologies, such as electronic health records, health information exchange, and community information exchange. This includes supporting patients and organizations with better access to patient information leading to better care coordination across organizations and improving quality of care. OHITAI units include the Health IT Policy & Programs unit and the Community Information Exchange Policy & Program unit.
- Working with the Office of Health Analytics to collect and analyze data on the performance of Oregon's health care system to support and inform sound policy development and decision making. OHITAI four analytics teams include the Medicaid Analytics and Data Integration, Social Health Needs and Analytics Projects, Infrastructure for Data Engagement and Access, and Analytics Technology and Data Equity units. These analytics teams are responsible for several functions:
 - Analyzing and reporting on the Medicaid program and Health-Related Social Needs benefits;
 - Hosting HPA's analytics data warehouse;
 - Maintaining and supporting Health Analytics' data request database and information system;
 - Supporting disaggregated demographic analyses and the use of Oregon's specific Race, Ethnicity, Language and Disability (REALD) and Sexual Orientation and Gender Identity (SOGI) standards; and

Executive Summary

- Providing other critical supports for modernizing HPA's health analytics products and processes and improving customer service.

The **Public Employees' Benefit Board (PEBB)** and the **Oregon Educators Benefit Board (OEBB)** have made a priority of transforming the health care delivery system, advancing health care transformation with plans that coordinate care, and managing the cost of care. They accomplish this through offering value-added plans that provide high quality care and services, implementing measurable programs that support member health status improvement, encourage members to take responsibility for their own health outcomes, and capping annual per-member-per-month cost increases at 3.4 percent.

Both boards offer core benefit plans that include medical, dental, vision and life insurance. Additional benefits include short-term and long-term disability, flexible spending accounts, commuter savings accounts and supplemental life insurance.

PEBB and OEBB operating budgets are included in HPA's budget while the program budgets are kept separate.

The **Oregon Health Insurance Marketplace** empowers Oregonians to improve their lives through local support, education, and access to affordable, high-quality health coverage by:

- Overseeing the health insurance products sold to Oregonians through HealthCare.gov.
- Providing free, local enrollment assistance to Oregonians.
- Raising awareness among consumers about health insurance options available in Oregon.
- Working with carriers, agents, community partners, and other stakeholders to get more people enrolled.
- Training and certifying community partners to be able to provide choice counseling services to Oregonians.

Following Oregon's transition to a state-based marketplace, the Marketplace will assume responsibility for:

- Facilitating and managing applications submitted through the state-based marketplace platform.

Oregon Health Authority: Health Policy and Analytics

Executive Summary

- Training and certifying insurance agents to guide Oregonians through the application and enrollment process.
- Providing constituent services for escalated case issues, problem solving, and handling appeals.
- Assessing enrollment data to inform health coverage policy decisions, systemic improvements, and outreach strategy.
- Training for, managing and facilitating consumer support through the state consumer assistance center.

The **Office of Business Operations** is responsible for all the division's operational functions. The office partners closely with various Shared Services, Agency Central Services, and DAS offices and acts as a liaison to internal and external stakeholders related to operational functions. These operational functions include:

- Contracts management
- Position management and recruitment
- Program grants management
- Division budget management
- Facilities management
- Rulemaking coordination
- Administrative and executive support
- Program technical support
- Project management and continuous improvement
- Risk management and continuity of operations planning

Program justification and link to long-term outcomes

OHA's Health Policy and Analytics programs directly support the long-term outcomes of healthy people and health equity. Together, the seven offices help to administer health insurance programs, develop the health care workforce, promote health care competition, measure fiscal accountability, measure the effects of investment in various health care strategies, and inform all aspects of Oregon's health care decision- and policy-making efforts. These offices

Oregon Health Authority: Health Policy and Analytics

Executive Summary

recommend the policy direction, measure the results, and suggest strategies for improving all health-related outcomes. Recently, Health Policy and Analytics has focused on monitoring and developing strategies around:

- Strengthening health care access, workforce capacity, and sustainability across Oregon's rural and frontier communities through the 5-year Rural Health Transformation Program.
- Reducing per capita costs.
- Leveraging public purchasing power to drive value-based payments and coordinated care models.
- Reducing the number of uninsured people in Oregon.
- Addressing social determinants of health, including individual health-related social needs.
- Improving specific health measures tracked by the CCOs.

Program performance

OHA's strategic plan includes five goal pillars that serve as areas of progress towards achieving OHA's strategic goal of eliminating health inequities in Oregon by 2030. HPA's offices contribute to these goal pillars (particularly pillars 1) transforming behavioral health, 2) strengthening access to affordable care for all, and 3) fostering health families and environments) by providing technical and subject matter expertise, analytic support, technical assistance, and securing funding and support of federal and national agency partners. HPA also serves 118,372 enrollees through the Oregon Health Insurance Marketplace, along with over 300,000 state employees and educators through the Public Employees Benefits Board and the Oregon Educators Benefits Board.

Enabling legislation/program authorization

Program authorization legislation and applicable federal and state mandates are listed by office in the Program Unit narratives.

Oregon Health Authority: Health Policy and Analytics

Executive Summary

Funding streams

OHA's Health Policy and Analytics division is supported primarily by General Fund matched when appropriate with Medicaid administrative and Medicaid health information technology Federal Funds. The match rates vary depending on the type of work being performed. The Primary Care Office also receives 100 percent Federal Funds from the Health Resources and Services Administration (HRSA) Primary Care Office grant and HRSA Oral Health Workforce grant. Health Policy and Analytics receives Other Funds from fees (workforce, inpatient data, ambulatory surgical data, All Payer All Claim, J1 Visa, Oregon Prescription Drug Program and Health Care Market Oversight), the Oregon Health Insurance Exchange, and the Health Care Incentive Fund. By statute (ORS 243.185), PEBB can collect an amount that equals up to two percent of total premiums to meet administrative and operational costs. Oregon Revised Statute (ORS) 243.880 established the Oregon Educators Benefit Account to cover administration expenses.

Through HPA's efforts, the Centers for Medicare and Medicaid Services approved Oregon's application to administer the Rural Health Transformation Program (RHTP) for Oregon. RHTP is a 5-year program meant to strengthen health care access, workforce capacity, and sustainability across Oregon's rural and frontier communities. For the first year of the program, Oregon was awarded \$197.3 million dollars. The program was established by H.R. 1 (2025), which also cut approximately \$15 billion across Oregon's public programs. Staff assigned to RHTP are funded through federal funds.

Significant proposed program changes from 2025-27

OHA is proposing to increase current service level funding for the Health Policy and Analytics Division to resource the following strategic and prioritizes initiatives:

Executive Summary

Policy Option Package #424 Benefits Management System Modernization: The current benefit management systems (BMS) used by the Oregon Educators Benefit Board (OEBB) and Public Employees' Benefit Board (PEBB) no longer support all current business needs since their respective introductions in 2008 and 2003. OEBB and PEBB are continuing the BMS replacement project to improve member experience and customer care. This policy package would fund the remaining implementation activities, including additional project staffing, vendor implementation costs, hosting and licensing fees, oversight fees for quality assurance, and contingency allowances. Under the revised implementation plan reflected in the pending contract amendment with Telus Health, OEBB-PEBB will launch a pilot in spring 2028, followed by a stabilization and evaluation period, with full go-live planned for spring 2029.

Policy Option Package #409 HPA – HCMO Program Restoration: Requests General Fund to support the OHA's administration of the Health Care Market Oversight (HCMO) program in the 2027-29 biennium. Through the HCMO program, OHA reviews and approves health care consolidation in Oregon, ensuring that health care mergers and acquisitions support statewide goals related to cost, quality, consumer access, and equity. This POP requests funds to cover HCMO program costs that are not covered by fee revenue, including staff, DOJ attorney costs, and required community engagement efforts. Without this policy package to support the HCMO program, health care in Oregon could become more consolidated, resulting in higher prices without improved quality, and reduced access to care, particularly for low-income communities, rural communities, and communities of color.

HPA is proposing the following legislative concepts:

Legislative Concept 451: HPA is proposing a streamlining and technical fix legislative concept. The concept includes nine components:

- Remove the statutory requirement to conduct a quadrennial study of impact of health care consolidation in the state; this body of work was not resourced by the legislature when the Health Care Market Oversight program was created in 2021 and not funded through POP requests in subsequent biennia. In the current budget environment, it is not possible to absorb this work with existing resources.

Oregon Health Authority: Health Policy and Analytics

Executive Summary

- In 2019, the legislature established Oregon's Sustainable Health Care Cost Growth Target Program. After evaluating feedback and attendance, LC 451 removes the requirement for OHA to hold an annual public hearing on health care cost growth. The Program will still publish an annual, comprehensive report on health care spending and spending growth, and the Program will continue to provide informational presentations to the Oregon Health Policy Board (OHPB) and the Legislature as requested.
- Remove from statute the requirement that OHPB approve of CSIW's Health Care Provide Incentive Program budget. Because OHA's full budget is already approved by the legislature, OHPB's approval of this portion of the budget is redundant. In addition, this change would allow staff to spend more time ensuring provider incentives—such as loan repayment and scholarships—go to providers who will work in areas of Oregon experiencing the greatest access needs.
- Remove the Palliative Care and Interdisciplinary Quality of Life Council (PCAC) from statute. Since its establishment in 2015, lack of regulatory authority, systemic federal barriers, and lack of resources have limited the ability of the PCAC to promote systemic change that could increase palliative care access. Sunsetting PCAC and the associated OHA website will allow the legislature and partners to reevaluate appropriate next steps, and free up staff resources to focus on other agency priorities.
- Remove the Health Plan Quality Metrics Committee (OAR 413.017(4)) from statute. Changes made in the 2023 legislative session mean that the work of this committee is no longer necessary.
- Streamline the composition of the Health Insurance Marketplace Advisory Committee (HIMAC) to help with recurring problems related to recruitment and consistently achieving quorum. The proposal would reduce the total number of committee members by combining two very similar categories of membership and eliminating one duplicate category of membership.
- Restore the second health policy or risk management position (from one to two) on the OEBC Board. HB 3383 (2023) removed one of the OEBC Board member positions assigned for members with a background in health policy or risk management to add a position for a member who is employed as classified staff at a public school or for an education service district. ORS 243.862(1) – Increase the total minimum number of OEBC Board positions from 10 to 11 to allow for the addition of a second position related to health policy or risk management positions from one to two.

Oregon Health Authority: Health Policy and Analytics

Executive Summary

- Add the confidentiality provisions currently in the Oregon Public Contracting Code to the PEBB and OEGB statute or expand the Contracting Code provisions to OEGB/PEBB, so that Request for Proposal responses are not subject to the public records and public meeting laws until after the notice of intent to award is announced. This will allow OEGB/PEBB the same procurement authority other state agencies are allowed to treat proposals received as exempt from disclosure until the notice of intent to award a contract is released and will reduce risk that procurements could be compromised if proposals cannot be retained as confidential during the entire procurement process. It will also permit the Boards to review proposals in executive session prior to the notice of intent to award.
- Repeal 243.105(b)(G) so that police officers and firefighters of local government entities eligible to enroll in PEBB are eligible to enroll in PEBB benefit plans. This will remove the potential risk of police and firefighters employed by the State from losing current and future coverage under PEBB. The change will also remove a participation barrier for local governments that contract for all employee benefits and assist PEBB in maintaining a healthy risk pool through increased local government participation. Increased participation will also provide greater access to health equity-oriented benefits, services and programs thereby assisting OHA in meeting its strategic goal of eliminating health inequities by 2030.

Legislative Concept 622 is a combined effort between the Public Health Division's School-Based Health Center (SBHC) Program and HPA's Office of Health Analytics. The LC proposes solutions to better protect the privacy of data OHA stewards and/or manages through contracted technology vendors. Health Analytics' component of LC 622 would strengthen data privacy and security and better protect sensitive patient and provider data by exempting data related to personal health records from public records requests, define conditions for data sharing, and remove data sharing provisions for law enforcement.

Legislative Concept 625 is a study bill directing the Oregon Health Authority to study the Public Employees Benefit Board (PEBB) and the Oregon Employees Benefit Board (OEGB) and submit a report to the Legislature by September 1, 2028.

Oregon Health Authority: Health Policy and Analytics

Health Policy and Delivery Systems Innovation

Expenditures by fund type, positions and full-time equivalents

Difference	\$6.18	\$3.10	\$135.89	\$145.17	-1	13.94
Percent	13%	7%	37%	32%	-1%	14%

Activities, programs and issues in the program unit base budget

The Delivery System Innovation (DSI) Office and Office of Health Policy (HP) provide a broad range of health system policy and program support, including policy analysis and development, technical assistance, and program development and implementation. DSI's and HP's work touches on a range of topics related to the OHA strategic plan from strengthening access to affordable care to addressing health inequities.

Office of Health Policy

The Office of Health Policy analyzes and develops policy options; facilitates partner discussions; coordinates strategic and implementation planning efforts; and evaluates health services research and policy for the Governor's Office, the Legislature, the Oregon Health Policy Board (OHPB), OHA, and other participants in Oregon's health system transformation. These services help OHA identify opportunities, articulate program options, implement policy, and assess its progress toward achieving the triple aim. The Office of Health Policy serves three key functions:

1. Research, analysis, and policy development

- Track emerging national and state health policy trends and issues, and their impacts in Oregon.
- Conduct research and analysis and develop cross-market policy.
- Provide senior-level policy advice to Health Policy and Analytics (HPA) and OHA leadership.
- Respond to priority incoming requests for research, analysis, presentations and talking points.

Oregon Health Authority: Health Policy and Analytics

Health Policy and Delivery Systems Innovation

- Lead agency-wide policy design and development on emerging topics.
2. Strategic policy coordination, monitoring and tracking
- Track and coordinate, when needed, policy development and implementation across HPA, OHA, and partner agencies to ensure alignment with strategic direction.
 - Coordinate and synthesize responses to proposed federal regulations and legislation, incorporating feedback from across HPA (and OHA when needed).
 - Coordinate development of legislative concepts, coordinate analysis on priority legislation, and track and support implementation of legislation.
 - Staff OHPB, coordinate committees of OHPB, and provide staff and policy leadership to OHPB committees to ensure committee work is connected to OHPB vision and direction.
 - Help maintain consistent strategic direction and vision between OHPB, HPA, and OHA.
3. Partnership and engagement
- Support external partnerships and engagement, including developing and giving presentations and staffing convenings of health care leaders and other partners.
 - Develop presentations or policy documents that help HPA and OHA leaders inform the public, media, and partners about health policy.
 - Partner with analysts across HPA to help translate technical information into clear, concise summaries of trends and their meaning to the public and policy makers.

The Office of Health Policy includes the Sustainable Health Care Cost Growth Target Program; the Health Care Market Oversight (HCMO) Program; child, youth & family health policy; and health care insurance coverage, including policy and engagement for the Oregon Health Plan Bridge program:

- The Health Care Market Oversight (HCMO) program is a legislatively mandated program charged with reviewing proposed mergers and acquisitions that involve health care entities, including hospitals, health

Health Policy and Delivery Systems Innovation

insurance companies, and provider groups, to see how they could affect market consolidation and competition, access to care, quality of care, health care costs, and health equity. The HCMO program aims to ensure that health care consolidation in Oregon supports statewide goals related to health equity, lower costs, increased access, and better quality.

- In 2019, the Oregon Legislature established the Sustainable Health Care Cost Growth Target Program, which sets a statewide target for the annual per person growth rate of total health care spending in the state. The cost growth target helps ensure that health care costs are not growing faster than wages, inflation, and other economic indicators so that people continue to have access to high quality, affordable care. This program is the culmination of years of collaboration with multiple health system partners and legislators to address the rising cost of health care.
- The Health Care Policy and Coverage Teams nimbly respond to emerging policy development needs whether that be supporting 1115 Waiver policy development and implementation, HR 1 and federal policy response, developing and administering the Rural Health Transformation Program, or implementing legislative priorities like the Oregon Health Plan Bridge Program.
 - The Rural Health Transformation Program, established through H.R.1, is a five-year program to support rural health system transformation across the United States. Office of Health Policy staff collaborate closely with Tribal Governments, partners, and community members to develop and administer the program, which will distribute \$197.3 million during FFY26.
 - The Oregon Health Plan Bridge Program is a newer health coverage benefit for adults with income just above the traditional OHP Plus limit. Adults with annual income between 133 and 200 percent of the federal poverty level (FPL) will have access to quality health insurance through OHP Bridge. In addition to supporting program implementation and maintenance, the Coverage Team manages and supports the OHP Bridge Advisory Committee (OBAC), which meets quarterly to make recommendations related to the OHP Bridge benefit, OHP Bridge – Basic Health Program (BHP) Trust Fund spending, member outreach and communications.

Health Policy and Delivery Systems Innovation

- The Office of Health Policy also staffs and supports the Oregon Health Policy Board (OHPB), which is a nine-member citizen board that oversees policy at OHA. Staff support OHPB with organizational planning, policy research, development of materials, and administrative support at their monthly meetings and regular educational webinars.
- The Child, Youth, and Families Team coordinates and collaborates with internal and external partners to develop, elevate, and promote the latest innovative thinking to support this population. They convene and coordinate the OHA Child, Youth and Family Governance Group, an internal cross-divisional team charged with supporting agency alignment and coordination, and provide research, analysis, policy development, relationship-building, coordination and tracking related to child and family health policy work across the agency. This team also provides subject matter expertise and project management for key child and family health initiatives that cross multiple divisions.

Office of Delivery System Innovation

The purpose of the Office of Delivery System Innovation is to align and coordinate health delivery system policies and practices across Oregon's health system, including coordinated care organizations (CCOs), the fee-for-service population, PEBB and OEBB, commercial plans and payers, and Oregon's providers. The goals of the Office of Delivery System Innovation are to:

- Integrate policies and resources focused on both clinical care and addressing health-related social needs to support the coordinated care model.
- Develop, support, implement, and coordinate strategies that ensure Oregon's delivery system is designed to eliminate health inequities.
- Align and coordinate strategies to improve health care delivery and systems throughout OHA.
- Support innovation and quality improvement within Oregon's health system transformation efforts and across OHA's health system partners, including payers and providers.

Health Policy and Delivery Systems Innovation

- Focus the agency's clinical and delivery system knowledge and expertise on achieving transformation, quality, and cost-containment goals.

Significant cross-agency collaboration is involved in the work within the Office of Delivery System Innovation. For example, the Health Evidence Review Commission (HERC) partners with the Medicaid Division and Fiscal and Operations Division to implement coverage decisions. The Transformation Center coordinates with the Public Health, Medicaid, and Equity and Inclusion divisions to support innovation and health equity through OHA's delivery system policies and program strategies. The Clinical Supports, Integration and Workforce Unit partners with the Behavioral Health Division to support the behavioral health workforce. Further details about the units of the Office of Delivery System Innovation are included below:

- The HERC conducts research into comparative effectiveness and benefit design to inform public and private sector transformation efforts; performs medical technology reviews; develops clinical and coverage guidelines; maintains the Oregon Health Plan's Prioritized List of Health Services; and disseminates information on the clinical- and cost-effectiveness of medical treatments and technologies. A key strategy for the Office of Delivery System Innovation is applying HERC research to policy development, implementation, and evaluation for OHA, the CCOs, and PEBB- and OEGBB-contracted plans.
- The Palliative Care and Quality of Life Interdisciplinary Advisory Council (PCAC) is also housed within the Office of Delivery System Innovation. One component of the OHA technical fix and streamlining bill for the 2027 legislative session is to remove the PCAC from statute; the reasoning is explained in the Revenue Streams and Changes section.
- The Office of Delivery System Innovation also sponsors performance improvement projects overseen by the Quality Improvement Director and houses the Transformation Center to coordinate and support health system transformation and quality improvement across Oregon's health system. The Transformation Center is a key lever in OHA's efforts to support and spread Oregon's health reform progress by sharing innovation at the

Health Policy and Delivery Systems Innovation

system, community and practice levels. Since its inception in 2013, the Transformation Center has provided capacity-building support to thousands of representatives of CCOs and other payers, providers, and community partners through hundreds of individual technical assistance sessions and large convenings across the entire range of OHA key health priorities, including social determinants of health, behavioral health, health equity, and value-based payment, and primary care, along with providing technical assistance on the CCO Quality Incentive Metrics.

- The Clinical Supports, Integration and Workforce Unit brings together the Patient-centered Primary Care Home Program, the Primary Care Office, and other Health Care Workforce Incentives, supporting high-quality care that minimizes health inequities through a robust primary care system and health workforce that meets patients' needs. In 2023, through House Bill 2665, the Temporary Health Care Staff Rate Setting Program was established to set the maximum reimbursement rates for temporary health care staff who provide direct care on behalf of qualifying facilities.
- Pharmacy Policy & Programs houses the Pharmacy and Therapeutics Committee, Mental Health Clinical Advisory Group and Oregon Prescription Drug Program (providing staff support for ArrayRx). The Office of Delivery System Innovation pharmacy role also includes but is not limited to evaluating and monitoring pharmacy benefits across Medicaid populations covered via CCOs and traditional fee-for-service. The office also leads development of strategies for fiscally sustainable administration of pharmacy benefits, including multi-state consortia and multi-agency collaboration.

Background information

During the 2025-27 biennium, the Office of Delivery System Innovation (DSI) and Office of Health Policy (HP) supported or implemented numerous high-priority policy and program initiatives.

Oregon Health Authority: Health Policy and Analytics

Health Policy and Delivery Systems Innovation

Office of Health Policy Accomplishments:

- The Office of Health Policy is the agency lead for design and implementation of the federal Rural Health Transformation Program, administered by the Centers for Medicare & Medicaid Services (CMS). Oregon received \$197.3M for the first budget year and if awarded similarly in the future, the state would receive \$1B over the five years of the program. These funds are intended to support stabilization of the rural health care system and provide the foundation for innovative transformation in the future. Since being approved, the Oregon team has awarded \$175.3 million in total to support health in rural communities. Funding has gone to over 300 new projects across all counties in the state, including every Rural Health Clinic, every rural Type A/B hospital, and every local Public Health Authority.
- The Office established the Committee on Health Care Affordability in 2025, a committee of the Oregon Health Policy Board, to develop and recommend cost reduction and cost growth reduction policies and initiatives that address the primary drivers of health care costs, and amplify the voice of patients, consumers, and purchasers in health care policy decisions. The Committee aims to challenge the status quo and promote innovative solutions for more affordable health care.
- The Office convened and continues to coordinate the OHA Child, Youth and Family Governance Group, an internal cross-divisional team charged with supporting agency alignment and coordination.

Office of Delivery System Innovation Accomplishments:

- Transformation Center and Clinical Supports, Integration and Workforce Unit: In late 2025, the Oregon Health Policy Board identified primary care as a new board priority, and created a new committee, the Primary Care Strategy Committee (PCSC), which the board created to strengthen access to equitable, affordable, high-quality patient care. The PCSC is charged with promoting innovative legislative and programmatic solutions for a strong primary care system that focuses on three areas: payment and affordability, workforce, and the delivery system. The Transformation Center and the Clinical Supports, Integration and Workforce Unit are

Health Policy and Delivery Systems Innovation

staffing PCSC, which meets monthly and recommended language for OHPB's 2027 legislative session primary care placeholder.

- Pharmacy Policy & Programs Team: One of the CCO sustainability measures identified at the OHA-convened fall 2025 CCO tables was establishing a High-Cost Drug Carve-Out (HCDCO), which removes high-cost drugs from CCOs' global budgets. The Pharmacy Policy & Program Team and the Medicaid Division collaborated to successfully launch HCDCO in January 2026, with 48 drugs and biologics carved out from CCO capitation.
- Health Evidence Review Commission: As part of the Prioritized List Benefits Update Project (BUP), HERC staff conducted a review of all currently unfunded conditions on the Prioritized List (PL). After reviewing evidence and consulting with Oregon-based experts in various medical specialties, HERC staff created proposals for adding coverage for treatment of these conditions, which were discussed by HERC throughout 2025. As a result, a large number of changes were made to the PL for OHP coverage, ensuring that all medically necessary services will be covered as required by law after Oregon's 1115 Waiver ends.

Revenue sources and changes

OHA's Health Policy and Delivery System Innovation Offices leverage Medicaid administrative match for eligible programs and activities, including Medicaid-related health system transformation, research and evaluation, and staffing. These federal funds are matched at the state level with General Fund. The office receives Federal Funds from the Health Resources and Services Administration (HRSA) Primary Care grant and the HRSA Oral Health Workforce grant. The office also receives Federal Funds from the Centers for Medicare & Medicaid Services (CMS) Rural Health Transformation Program Grant. Other Funds include a fee-supported program for the Conrad J-1 Visa Program (ORS 409.745) and the Health Care Provider Incentive Fund established January 2018 (House Bill 3396; ORS 676.450 and House Bill 3261) and Health Care Market Oversight fees (House Bill 2362; ORS 415.500) and an OHSU-funded partnership for the Healthy Oregon Workforce Training Opportunity Grant Program to administer a

Health Policy and Delivery Systems Innovation

community-based funding program that aims to expand the supply of health care workforce providers in the state. The Oregon Prescription Drug Program generates nominal revenue from the ArrayRx discount card program, which is collected and purposed according to ORS 414.314 & 414.318.

HCMO is currently unfunded other than fee revenue. OHA is submitting a policy package to request General Fund in the 2027-2029 biennium to cover HCMO program costs that will not be covered by fee revenue, including staff, DOJ costs, and required community engagement efforts. The program has already been implemented; the POP provides funding for ongoing work.

Legislative Concept 451:

HPA is proposing a streamlining and technical fix legislative concept. The concept includes four components from the Health Policy and Delivery Systems Innovation:

- Remove the statutory requirement to conduct a quadrennial study of impact of health care consolidation in the state; this body of work was not resourced by the legislature when the Health Care Market Oversight program was created in 2021 and not funded through POP requests in subsequent biennia. In the current budget environment, it is not possible to absorb this work with existing resources.
- Remove the statutory requirement to hold an annual public hearing on the growth in total health expenditures in relation to the health care cost growth in the previous calendar year. While OHA is committed to publishing an annual Cost Growth Target public report and ensuring that the information is presented for public discussion, an annual public hearing is not an agency priority at this time of limited resources.
- Remove from statute the requirement that OHPB approve of CSIW's Health Care Provide Incentive Program budget. Because OHA's full budget is already approved by the legislature, OHPB's approval of this portion of the budget is redundant. In addition, this change would allow staff to spend more time ensuring provider

Health Policy and Delivery Systems Innovation

incentives—such as loan repayment and scholarships—go to providers who will work in areas of Oregon experiencing the greatest access needs.

- Remove the PCAC from statute. Since its establishment in 2015, lack of regulatory authority, systemic federal barriers, and lack of resources have limited the ability of the Palliative Care and Interdisciplinary Quality of Life Council (PCAC) to promote systemic change that could increase palliative care access. Sunsetting PCAC and the associated OHA website will allow the legislature and partners to reevaluate appropriate next steps, and free up staff resources to focus on other agency priorities.

Oregon Health Authority: Health Policy and Analytics

Office of Health Information Technology and Analytics Infrastructure

Expenditures by fund type, positions and full-time equivalents

Office of Health Information Technology	General Fund	Other Funds	Federal Funds	Total Funds	Positions	FTE
2025-27 LAB	\$12.62	\$1.26	\$17.84	\$31.72	45	44.63
2027-29 ARB	\$14.03	\$0.56	\$18.88	\$33.47	45	45.00

OHA's Office of Health Information Technology & Analytics Infrastructure (OHITAI) combines HPA's health IT, data systems, and analytics infrastructure work under one reporting structure. All units play important roles in broader OHA work related to technology, data, analytics, and systems, and are integral in contributing to Oregon's 2030 goal of eliminating health inequities.

- In terms of Analytics Infrastructure, OHITAI works with the Office of Health Analytics to collect and analyze data on the performance of Oregon's health care system to support and inform sound policy development and decision making. OHITAI's analytics teams are responsible for several functions including analyzing and reporting on the Medicaid program and Health-Related Social Needs benefits; hosting HPA's analytics data warehouse; maintaining and supporting Health Analytics' data request database and information system; supporting disaggregated demographic analyses and the use of Oregon's specific Race, Ethnicity, Language and Disability (REALD) and Sexual Orientation and Gender Identity (SOGI) standards; and providing other critical supports for modernizing HPA's health analytics products and processes and improving customer service.
- In terms of health IT, OHITAI teams work to ensure that Oregon's health care system is supported by the right health IT: that patients and organizations have better access to patient information leading to better care coordination across organizations and improving quality of care. These teams work to fulfill the vision that health IT empowers individuals and communities to reach their full health potential and well-being.¹ OHITAI's

¹ Strategic Plan for Health IT (2024-2028), Oregon's Health Information Technology Oversight Council. <https://www.oregon.gov/oha/HPA/OHIT-HITOC/Documents/OregonStrategicPlanforHealthIT2024-2028.pdf>

Oregon Health Authority: Health Policy and Analytics

Office of Health Information Technology and Analytics Infrastructure

health IT teams are responsible for policies, programs, partnerships, committees, partner engagement, and more.

The Office of Health Information Technology & Analytics Infrastructure is organized into six work units – two focused on health IT-related policy and programs and four related to analytics and analytics infrastructure and supports. OHITAI's teams are complemented by six analytics work units under the Office of Health Analytics: Behavioral Health Analytics, Behavioral Health Metrics, Quality Metrics Surveys and Reporting, Research and Data, Coverage Analytics, and Monitoring and Evaluation units. These Office of Health Analytics teams are matrixed with OHITAI – the full group of ten analytics teams serve the overall functions:

- Ensure the availability of high-quality, reliable data through data system integration and transparent reporting;
- Analyze data and develop strategies and tools to assess the performance of OHA programs; and
- Support OHA policy development, implementation, and evaluation.

Staff in each unit collaborate closely with analytic, policy, and program colleagues across OHITAI and the Office of Health Analytics, and within the Health Policy & Analytics Division. They also work closely with other OHA divisions as well as other state agencies such as Oregon Department of Human Services (ODHS) and the Oregon Housing and Community Services.

The Health IT Policy & Program Unit is working with Oregon's health care partners, communities, and consumers to improve health, support health system transformation efforts, and address health inequities by supporting policies, programs, and public/private partnerships that bring tools for securely sharing individuals' information across providers, health plans, individuals, and other partners. These tools and programs provide critical infrastructure to make care more efficient and effective. Health IT includes:

- Electronic health records (EHRs), which are used by hospitals and health care providers including physical, behavioral, and oral health providers and others.

Oregon Health Authority: Health Policy and Analytics

Office of Health Information Technology and Analytics Infrastructure

- Health information exchange (HIE), which is the electronic sharing of health information among health care providers, patients, health plans, or other users of health IT systems. Health information exchange may also sometimes refer to an organization that provides HIE technology services.
- EHR patient portals and apps that patients can use to help manage their health conditions.

The Health IT Policy and Program unit's work is organized into three main areas:

1. Health IT policy work, which includes staffing for the legislatively mandated **Health IT Oversight Council (HITOC)**.² HITOC reports to the Oregon Health Policy Board, and is responsible for policy, oversight, and recommendations related to health IT to support health system transformation and health equity. This biennium, HITOC is implementing components of its **Strategic Plan for Health IT (2024-2028)**,³ which includes strategies focused on patients and consumers, EHRs, HIE, CIE, interoperability, and governance. Specific priorities this biennium include Health IT for behavioral health, interoperability and artificial intelligence healthcare tools.
2. HIE programs and partnerships, which includes the **HIT Commons**,⁴ a public/private partnership co-sponsored by OHA and the Oregon Health Leadership Council and jointly funded by OHA, all Oregon hospitals, all major health plans and CCOs. The HIT Commons governs two initiatives:
 - **PointClickCare (PCC) platform** (also known as EDIE/PreManage/Collective Medical) connects all Oregon hospitals and provides emergency rooms with critical, concise information about patients who are high utilizers of emergency department (ED) services and patients with complex care needs, so that care can be coordinated, and individuals receive appropriate care and follow up. PCC brings real-time hospital event notifications to CCOs, health plans, providers, and OHA/ODHS programs who subscribe to receive real-time information when their patient, member, or client has a hospital event in any hospital in Oregon or Washington. Oregon has broad adoption of PCC across hospitals, Skilled Nursing Facilities, CCOs, health

³ <https://www.oregon.gov/oha/HPA/OHIT-HITOC/Documents/OregonStrategicPlanforHealthIT2024-2028.pdf>

⁴ <https://ohlc.org/partner-initiatives/hit-commons/>

Office of Health Information Technology and Analytics Infrastructure

plans, primary care, behavioral health, and other clinics. OHA supports the Medicaid PCC program, which supports CCOs, dental care organizations, Tribal clinics, Indian Managed Care Entities, Medicaid fee-for-service contractors and others. OHA/ODHS programs also use PCC— including Medicaid and behavioral health staff coordinating care, Oregon State Hospital teams, ODHS long-term services and supports program staff including all Type B Area Agencies on Aging and Aging & People with Disability District offices, and ODHS Intellectual & Developmental Disability program staff and contractors.

- **The Oregon Prescription Drug Monitoring Program (PDMP) Integration Initiative** provides all Oregon prescribers, pharmacists, and their eligible delegates electronic access to PDMP data within their electronic workflows, to better inform prescribing of controlled substances including opioids. This HIT Commons program is managed in partnership with OHA's Public Health Division, which oversees the PDMP program.
- 3. CCO health IT compliance and technical assistance, which includes:
 - **CCO Health IT Roadmaps** and subsequent OHA-produced CCO Health IT Roadmap summaries. All CCOs have OHA-approved Health IT Roadmaps and annually update Roadmaps and report on progress. CCO Health IT Roadmaps and other CCO contractual health IT requirements help ensure CCO support of physical, behavioral, and oral health providers' health IT needs for EHR adoption and use, Health information exchange for care coordination including hospital event notifications (e.g., through PCC), and health IT to support social determinants of health (e.g., Community Information Exchange).
 - **CCO annual health IT data reporting** on EHR and HIE adoption for their contracted providers is used for health IT landscape monitoring, progress tracking, and Roadmap summaries.
 - Convening quarterly **CCO Health IT Advisory Group (HITAG)**⁵ meetings with all CCOs, providing technical assistance and cross-CCO learning opportunities.

The Community Information Exchange (CIE) Policy & Program Unit is responsible for setting strategic direction for the use of CIE statewide and supporting Medicaid programmatic and administrative functions. This includes

⁵ <https://www.oregon.gov/oha/HPA/OHIT/Pages/HITAG.aspx>

Oregon Health Authority: Health Policy and Analytics

Office of Health Information Technology and Analytics Infrastructure

managing CIE policy, partner engagement, as well as the development, implementation, and operations of the CIE program. In particular, the unit provides new CIE technology services to support Oregon's Medicaid program. The work of this unit impacts partners, including consumers, community organizations, social services, health care, government agencies, and policy makers.

- CIE⁶ is a network of partners using technology to search for resources, make closed loop referrals, and document and share information to connect people with the services and supports they need. CIE adoption has grown rapidly in Oregon, with a focus on referrals to help address social needs.
- CIE supports OHA's goal of eliminating health inequities by 2030 by connecting health care organizations and social service providers to help people in Oregon when they need safety net programs and other supports.
- This unit focuses on the use of CIE tools to help connect Medicaid members to Health Related Social Needs (HRSN) services and HR1 workforce requirements.

The Social Health Needs and Analytics Projects (SHNAP) Unit is responsible for providing technical and data support for OHA's work to implement Oregon's 1115 Medicaid Waiver (2022-2027), Medicaid children's services such as the Early Periodic Screening Diagnosis and Treatment benefit, and for other Medicaid special projects, such as HR1 work or activity rules and data integration and reporting for new Community Information Exchange data once available.

This unit develops, implements, and operates new data collection, analysis, and community collaboration related to data and reporting programs in emerging and evolving areas of the Medicaid program. This includes developing and publicly reporting HRSN services, child & youth Medicaid, and Medicaid special projects utilization and related data to community groups, policy makers, program leadership, health care and social service partners, partner agency

⁶ <https://www.oregon.gov/oha/HPA/OHIT/Pages/CIE-Overview.aspx>

Office of Health Information Technology and Analytics Infrastructure

leadership, and consumers. Staff analyze and evaluate these data along with information from other sources (including data from other agencies) to inform and advance programs and policies.

The Medicaid Analytics and Data Integration (MADI) Unit⁷ analyzes and reports Medicaid health care claims and program data to other agency partners and interested parties to support Medicaid programs, decision-making and policy. This unit also provides technology, system, and infrastructure support for health analytics teams in HPA and OHA. Specific functions include:

- Analysis, reporting, interpretation, and development of analysis for OHA's Medicaid programs
- Data governance, privacy, and security
- Cross-agency data strategy, integration, and coordination
- Data systems and infrastructure, including data warehousing, server management, and documentation

The Analytics Technology and Data Equity Unit supports several functions across HPA:

- The Data Equity team works in partnership with the Equity and Inclusion Division and various agency partners to support the collection, analysis and reporting of REALD and SOGI data. Collecting and reporting REALD and SOGI data is vital in supporting OHA's goals of eliminating health inequities by 2030.
- This unit also provides project leadership and contract management services for select Health Analytics-related technology projects and initiatives.
- The team supports broader agency-wide data governance and implementation work led by the Equity & Inclusion Division and the Office of Information Services, in partnership with other OHA units.

The **Infrastructure for Data Engagement and Access (IDEA) team** works to strengthen the connection between data and policy/decision makers by advancing the use of business intelligence tools and data visualization methods across HPA. Their work includes setting standards for reporting, providing technical guidance on reporting tools,

⁷ <https://www.oregon.gov/oha/HPA/ANALYTICS/Pages/medicaid.aspx>

Office of Health Information Technology and Analytics Infrastructure

managing processes and infrastructure for data sharing and reporting and maintaining the Data Request Tracking System (DRTS), which logs, tracks, and archives all data, reports, and analytics requests fulfilled by Health Analytics teams.

Background information

During the 2025-27 biennium, OHITAI supported or implemented numerous high-priority policy, program, or analytics initiatives, including:

Rural Health Transformation Program: Technology and Data Modernization

The Rural Health Transformation Program is a federal initiative administered by the Centers for Medicare & Medicaid Services (CMS). Oregon received federal funding to support innovative projects that strengthen rural health systems and improve access to care in rural communities. OHITAI's Health IT team leads the RHTP Technology and Data Modernization Initiative which focuses on expanding and connecting rural health systems to needed technologies and data infrastructure. Examples of allowable use of funds include health IT system investments, AI-enabled tech solutions, community information exchange and closed-loop referrals, and technical assistance for IT implementation.

Health Information Exchange

- **Reduced emergency department visits for high utilizers.** Broad use of PCC across Oregon has led to some astounding results. Emergency department visits by high utilizers decreased by 30 percent in the 90 days following the initial creation of a care guideline in PCC for 2025 compared to 2024⁸. This program allows

⁸ <https://ohlc.org/wp-content/uploads/2026/06/Q4-2025-EDIE-Quarterly-Report.pdf>

Office of Health Information Technology and Analytics Infrastructure

everyone working with a patient to know when they have been in the ED or hospital and coordinate their care across providers.

- **Improved emergency care for people in Oregon with hemoglobinopathies**, a group of inherited blood disorders including sickle cell disease. This effort was required by HB 2940 (2025) and is intended to address health inequities related to racism. Nationally, more than 90% of people living with sickle cell disease are Black, and patients often report experiencing bias, undertreatment of pain, stigma, and delayed care in emergency rooms. This program leverages PCC to send real-time alerts to clinicians when a patient with one of these conditions arrives in the emergency room, helping providers respond faster with appropriate treatment and support.⁹
- **Connecting Department of Corrections:** OHITAI and HIT Commons have consulted with the Oregon Department of Correction (DoC) team working to implement DoC's first electronic health record, which will integrate with multiple health information exchanges and statewide solutions in Oregon including PCC.
- **Connecting emergency medical services (EMS) data to hospital electronic health records.** HIT Commons is piloting health data exchange with three health systems to reduce administrative burden in the emergency department where EMS records are still shared via printer or fax machine, and to improve clinical outcome data flowing back to EMS providers for training and performance improvement.
- **Helped reduce risky prescribing of opiates** by connecting Oregon prescribers to data on controlled substance prescriptions, through their EHR. The Prescription Drug Monitoring Program (PDMP) Integration initiative has been an important factor in sustained reduction of risky opioid prescribing patterns, including prescribing of high quantities or multiple types of controlled substances. More than 24,000 prescribers at more than 2,000 health care facilities in Oregon benefit from "one-click" access to controlled substance prescription data in Oregon's PDMP.¹⁰

Office of Health Information Technology and Analytics Infrastructure

Health Related Social Needs (housing, nutrition, climate) and 1115 Medicaid Waiver (2022-2027) Recent accomplishments include:

- OHITAI's CIE team continues to provide support related to contract and OAR language, and processes in the areas of closed loop referrals and CIE. OHA expects to launch CIE services to support HRSN benefits for Medicaid Open Card (fee for service) members in late 2026/early 2027. OHA received CMS approval for the use of federal 90% Medicaid Enterprise Systems match to implement CIE. OHA contractors currently support CCO and CBO technical assistance for CIE.
- Reporting on HRSN services requires knitting together a complex web of health and social services data sources, including building and maintaining strong cross-agency partnerships and data use agreements. OHA's SHNAP team has built a robust system to promote data-informed policy change and program improvement, including a comprehensive internal dashboard and an interactive public dashboard refreshed on a quarterly basis.¹¹ The team's data resources and supports have contributed to major data-informed policy changes and improvements, such as changes in eligibility and administrative streamlining. In 2025 and 2026 the team developed a small grant program to provide two Regional Health Equity Coalitions resources to support community-led efforts around HRSN data collection and reporting.

Medicaid Program Analytics: OHITAI teams supported improved and revamped interactive Medicaid membership dashboards, including the Medicaid enrollment dashboard¹² and Medicaid demographic dashboard¹³ which includes granular REALD data on Medicaid members served by CCOs and Open Card (fee for service). The enrollment dashboard now includes trends by age and eligibility group, as well as updated eligibility groupings to better reflect the ever-changing health policy landscape. For example, users can now view all MAGI Adults (also known as the

¹¹ <https://www.oregon.gov/oha/HPA/ANALYTICS/Pages/HRSN-data.aspx>

¹² <https://www.oregon.gov/oha/HPA/ANALYTICS/Pages/medicaid-enrollment.aspx>

¹³ <https://www.oregon.gov/oha/HPA/ANALYTICS/pages/medicaid-demographics.aspx>

Oregon Health Authority: Health Policy and Analytics

Office of Health Information Technology and Analytics Infrastructure

ACA expansion population). In 2027, OHITAI teams will assume responsibility for maintaining and enhancing Medicaid Work or Activity Rules dashboards to monitor major policy changes under HR1.

Implementing HB 4088 (2026): this bill provides legal protections for patients and providers who engage in reproductive or gender-affirming health care activities (RH/GAH). The bill sets strict limitations on sharing RH/GAH data with external entities and researchers. OHITAI is coordinating closely with Health Analytics in HPA, as well as the Public Health Division, to develop methods to ensure that data sharing subsequent to the bill's passage abides by these new limitations.

REALD/SOGI Implementation and Analytics: OHITAI's Data Equity team provided critical supports to HPA's health analytics staff to implement and support training and effective use of REALD data in HPA data products. By the end of 2025, HPA data requests accounted for more than 70% of all REALD & SOGI Repository data requests fulfilled to date, significantly contributing to OHA's efforts to identify and eliminate health inequities. With the support of OHITAI's Data Equity team, some of HPA's recent REALD/ SOGI accomplishments include:

- Embedding questions aligned with REALD and SOGI standards in several HPA data collection efforts, including:
 - Licensed Health Care Provider Survey¹⁴
 - OEGB and PEBB Wellness Surveys¹⁵
- Incorporating full REALD data in major HPA dashboards, reports, data products, and analyses, including:
 - Mental Health Statistics Improvement Program (MHSIP) Survey¹⁶
 - 2024 CCO Metrics Demographic Disparities Dashboard¹⁷
 - Oregon Health Plan Demographic Report Dashboard¹⁸

Oregon Health Authority: Health Policy and Analytics

Office of Health Information Technology and Analytics Infrastructure

- Health-Related Social Needs Benefits Dashboard 2025¹⁹
 - HealthCare Provider Incentive Program²⁰
- Providing Data Equity training for 51 staff through the HPA Data Equity Learning Collaborative training program.

Revenue sources and changes

OHA's Office of Health Information Technology & Analytics Infrastructure leverages Medicaid administrative match for eligible programs and activities, including Medicaid-related health system transformation, technology, analytics, and staffing.

Health IT and CIE policy and program work leverage a combination of federal Medicaid Enterprise Systems (MES) Medicaid match (90 percent Federal Funds, 10 percent state funds for design, development and implementation work and 75 percent Federal Funds, 25 percent state funds for ongoing work), Medicaid Designated State Health Program (DSHP), and Medicaid administrative match (50 percent Federal Funds/state funds).

Federal MES match rates depend on several factors, including whether the money is spent on health IT system planning, implementation, or operations, and how much of the work directly supports the Medicaid enterprise. OHA's health IT policy, CCO compliance, program development, and data analysis work are not eligible for MES funds and instead utilize a 50/50 (for Medicaid specific work) or a blended statewide match rate.

Activities, programs and issues in the program unit base budget

OHA's Office of Health Analytics collects and analyzes data on the performance of Oregon's health care system to support and inform sound policy development and decision making. Examples include hospital utilization, costs, financial and community benefit data; licensed health care workforce data; data about health insurance coverage; administrative health insurance claims through the All Payer All Claims (APAC) database; the Oregon Data Environment; Behavioral Health Resource Network (BHRN) data; Race, Ethnicity, Language and Disability (REALD) data; and many others. The office also collects and analyzes OHA program performance data, including behavioral health services evaluation and coordinated care organization (CCO) incentive metrics.

The Office of Health Analytics is organized into six interconnected work units – further described below – and is complemented by an additional four analytics work units under the Office of Health Information Technology & Analytics Infrastructure (OHITAI). OHITAI analytics teams include Medicaid Analytics and Data Integration, Social Health Needs and Analytics Projects, Infrastructure for Data Engagement and Access, and Analytics Technology and Data Equity. These OHITAI teams are matrixed with Health Analytics – the full group of ten analytics teams serve these overall functions:

- Ensure the availability of high-quality, reliable data through data system integration and transparent reporting;
- Analyze data and develop strategies and tools to assess the performance of OHA programs; and
- Support OHA policy development, implementation, and evaluation.

Oregon Health Authority: Health Policy and Analytics

Office of Health Analytics

Staff in each unit collaborate closely with analytic, policy and program colleagues across the Office of Health Analytics and OHITAI, and within the Health Policy & Analytics Division. They also work closely with other OHA divisions as well as other state agencies such as Oregon Department of Human Services and Department of Consumer and Business Services.

The Behavioral Health Analytics team collects, analyzes and reports behavioral health data to other OHA programs, as well as state and national funders by:

- Analyzing and reporting CCO behavioral health metrics to Quality Metrics and Reporting.
- Operationalizing, calculating, and reporting quarterly and annual metrics for the Substance Use Disorder 1115 Demonstration Waiver.
- Analyzing, reporting, interpreting, and developing dashboards and other reports based on behavioral health program needs. This includes expertise around drafting and implementing interactive dashboards for internal customers and the public.
- Providing ongoing intensive support of mandated populations, particularly related to Aid & Assist and civil commitment, with a focus on improving underlying data collection and dashboard data visualization.
- Performing studies involving data integration around linking datasets together for further insights. Examples include linking crisis services data with civil commitment data, linking Medicaid high utilizers to aid and assist and civil commitment, and linking to multiple outcomes for persons under residential care.
- Providing ongoing technical consultation to behavioral health programs around their data needs. Analyzing, reporting, and interpreting data from the Oregon Health Authority Data Environment (ODE) for the Behavioral Health Division and the Medicaid Systems Division.
- Administering and overseeing the contract for the MHSIP survey.
- Providing data stewardship around data from the Oregon Judicial Department.
- Extracting and submitting client-level treatment episode data (TEDS) for the Substance Abuse and Mental Health Services Administrations' Behavioral Health Services Information System.

Office of Health Analytics

- Extracting data and conducting aggregate analyses for external research and evaluations.
- Supporting the analytic needs of Oregon's System of Care, which is a cross-system collaboration supporting youth and families who have complex and significant behavioral and mental health needs.

The Behavioral Health Quality Metrics team supports the development of behavioral health quality metrics through:

- Planning and supporting calculation of behavioral health metrics including new metric concept development in alignment with strategic efforts and legislative directive related to behavioral health.
- Project managing and supporting measure concept development, piloting, and implementing new behavioral health related measures for the Agency and Agency committees, boards, and other commissions.
- Developing concepts for and implementing behavioral health strategic outcome and process measures for the OHA Strategic Plan – Transforming Behavioral Health pillar.
- Supporting all aspects of the behavioral health related Key Performance Measures for the OHA Performance System.
- Researching nationally recognized metrics for behavioral health outcomes.
- Refining and validating metric concepts into measurable, reportable outcome metrics and developing a reporting program for CCOs, counties, and other behavioral health providers.
- Supporting the Behavioral Health Committee to explore behavioral health metrics both existing and concept development and implementation for new “upstream” metrics as part of the HB 2086 (2021) directive.
- Analyzing and reporting state and clinic-led metrics for Certified Community Behavioral Health Clinics.
- Compiling, analyzing, reporting, and providing technical assistance for efforts related to Community Mental Health Programs, including HB 4092 (2023) cost-study and 2025 County Financial Assistance Agreements.
- Measure concept development and implementation, bill revision to data requirements implementation, and analysis and reporting on data from the M110/BHRN program.

Office of Health Analytics

- Data collection consultation and project management support, data compilation, analysis, reporting, and technical assistance for efforts related to Behavioral Health Workforce Initiatives.
- Support concept development, data exploration, and data analysis and reporting on behavioral health service costs, comparison with commercial claims and costs, and support with cost projection modeling and impact for behavioral health service increases and maintenance.
- Support, technical assistance, and advanced analysis of the Mental Health Services Improvement Program survey for Medicaid members receiving mental health services to ensure connection to the OHA Strategic Plan – Transforming Behavioral Health pillar and other behavioral health goals and objectives related to understanding access and member experience.

The Quality Metrics, Surveys and Reporting team facilitates using quality metrics in Oregon’s health system through:

- Measuring CCOs’ performance using the CCO incentive metrics, state quality metrics and CMS Adult and Child Core set metrics, including disaggregating by REALD to assess disparities and health inequities.
- Developing interactive data displays to showcase CCO performance on the metrics.
- Coordinating and facilitating the Metrics & Scoring Committee, which is a public committee charged with selecting the CCO incentive metrics and making design decisions about the program structure.
- Assessing member experience by conducting and analyzing data from the Consumer Assessment of Health Providers and Systems Survey of Medicaid members. Collaborating with partners to develop upstream metrics to track the most innovative aspects of the health care transformation, including health equity, social determinants of health, meaningful language access to culturally responsive care, and health-aspect of kindergarten readiness social-emotional health.
- Collaborating with external data stewards to understand and apply changes to metrics specifications.

Office of Health Analytics

The Coverage Analytics team analyzes data about health care coverage to support coverage policy development, program operations and quality improvement for programs such as OHP Bridge by:

- Managing, analyzing, and publicly reporting data from the Oregon Health Insurance Survey, which collects data about health insurance among all people living in Oregon.
- Analyzing data pertaining to health insurance coverage in Oregon from multiple data sources, including the American Community Survey, the National Health Interview Survey, the Current Population Survey, and other national and local surveys.
- Creating, implementing, and maintaining a health care coverage analytical plan, conducting and bringing together research, reporting, and analyses that inform policy decisions and program operations related to increasing access to health insurance coverage.
- Assessing the feasibility of creating a quality incentive program for OHP Bridge Basic Health Program.
- Leading and conducting analytical work for the OHP Bridge Basic Health Program, including the production and management of required federal reporting, such as the annual report, quarterly enrollment estimates, monthly enrollment reporting, and quarterly enrollment reconciliation.
- Creating, implementing, and maintaining the OHP Bridge monitoring plan.

The Research and Data team produces data and analyses for state government and external partners by:

- Collecting, managing, analyzing and reporting on Oregon's APAC database, which includes health insurance claims and member information for approximately 92 percent of Oregon residents; providing APAC data for analysis by state agency partners and external researchers.
- Collecting, analyzing, reporting, and interpreting data, and developing dashboards, presentations and reports featuring health care workforce data from licensees of 17 health care licensing boards.
- Analyzing, reporting and interpreting data, and developing dashboards, presentations and reports featuring hospital inpatient, outpatient and emergency department data, hospital financial data including community benefit reporting, and other critical hospital information.

Office of Health Analytics

- Maintaining the Hospital Community Benefit Minimum Spending Floor program.
- Implementing HB 3320 (2023), which makes hospital financial assistance more accessible to patients, including collecting new data about financial assistance applications and denials from hospitals.
- Providing data support for House Bill 2665 (2023), which requires OHA to adopt rules and set maximum rates for some types of providers (generally related to nursing) employed by temporary staffing agencies operating in Oregon hospitals, Long Term Care facilities, and other specific facilities.

The Monitoring and Evaluation (M&E) team is responsible for:

- Overseeing and managing the independent contractor accountable for implementing the 2017-2022 1115 Oregon Health Plan (OHP) Demonstration Waiver evaluation.
- Overseeing and managing the independent contractor(s) responsible for the evaluation design and the implementation of the approved evaluation design for the 2022-2027 1115 OHP Demonstration Waiver.
- Working with waiver leadership to coordinate the approval and submission of evaluation reports.
- Working with program teams to develop monitoring plans and supporting data analysis.
- Coordinating quarterly and annual analysis and reporting of waiver measures outlined in the Waiver monitoring protocol.
- Leading and managing evaluations that are not contracted externally.
- Providing support to qualitative and quantitative data analysis support for ad hoc evaluations/projects.
- Managing evaluation services price agreement process as a resource to meet HPA's evaluation needs.
- Supporting 1115 OHP waiver renewal efforts by providing utilization and enrollment data.

The M&E team has also supported the Rural Health Transformation Program (RHTP) by:

- Leading and managing the data strategy for RHTP program
- Creating an interim data and reporting team to support program monitoring
- Developing surveys and internal reports for the annual report development and submission to CMS
- Hiring and establishing the data and reporting team

Office of Health Analytics

- Working with RHTP leadership on the long-term strategy for program monitoring
- Supporting ad hoc analysis and data needs for RHTP program

Background information

During the 2025-27 biennium, new Health Analytics high-priority work included:

Supporting the Behavioral Health Division by providing analytic framework to describe impact of HB 2005 (2025): this bill instituted changes to the timing of aid and assist orders and changed how civil commitments are processed. It is anticipated that the bill will impact counts of aid and assist orders and civil commitments among other impacts. BHA is providing structure to design and implement an analytic framework to describe the bill's impact. A preliminary report is due to the Legislature and other interested parties in November 2026.

Implementing HB 4088 (2026): this bill provides legal protections for patients and providers who engage in reproductive or gender-affirming health care activities (RH/GAH). The bill sets strict limitations on sharing RH/GAH data with external entities and researchers. Health Analytics is coordinating closely with OHITAI in HPA, as well as the Public Health Division, to develop methods to ensure that data sharing subsequent to the bill's passage abides by these new limitations.

Health Analytics reports reflecting work in the 2025-27 biennium include:

Office of Health Analytics

Revenue sources and changes

OHA's Office of Health Analytics leverages Medicaid administrative match for eligible programs and activities, including Medicaid-related health system transformation, research and evaluation, and staffing.

Several programs within Health Analytics, including the health care workforce reporting program, hospital reporting program, APAC and TEDS BHSIS data submissions are partially supported by Other Funds revenues.

Legislative Concept 451: The Office of Health Analytics has introduced one component of HPA's housekeeping Legislative Concept for the 2027 session (LC 451). The requested change would remove the Health Plan Quality Metrics Committee (OAR 413.017(4)) from statute. Changes made in the 2023 legislative session mean that the work of this committee is no longer necessary.

Legislative Concept 622 is a combined effort between the Public Health Division's School-Based Health Center (SBHC) Program and HPA's Office of Health Analytics. The LC proposes solutions to better protect the privacy of data OHA stewards and/or manages through contracted technology vendors. Health Analytics' component of LC 622 would strengthen data privacy and security and better protect sensitive patient and provider data by exempting data related to personal health records from public records requests, define conditions for data sharing, and remove data sharing provisions for law enforcement.

Oregon Health Authority: Health Policy and Analytics

Office of Business Operations

Expenditures by fund type, positions and full-time equivalents

Percent	21%	-14%	31%	21%	5%	6%

Activities, programs and issues in the program unit base budget

OHA's Health Policy and Analytics (HPA) Office of Business Operations develops and maintains operational processes and procedures on behalf of the HPA division. It acts as liaison with other parts of OHA, including business operations offices in other divisions, Central Services, the Director's Office, and the Shared Services offices.

HPA's business operations are organized into three program units: Contracts and Project Management; Budget, Grants Management and Technology; and Staffing and Administrative Support.

Contracts and Project Management:

- Manages the division's portfolio of contracts.
- Administers the process of contract initiation, amendments and renewal including the use of interagency agreements the memos of understanding.
- Manages the division's operational project portfolio and provides project management assistance to the division's programs.
- Manages the division's risk management function.

Office of Business Operations

Budget, Grants Management and Technology Management:

- Leads the initial biennial budget build and projections process for the division and each of its offices.
- Provides rebalance and reshoot budget tracking for the division budget.
- Builds and maintains active operating budgets for each program area in the division.
- Builds, monitors and maintains project budgets for the division's high-level projects.
- Provides all accounts payable and receivable services for the division.
- Supports the division's technology including SharePoint, Web development, deskside support, asset management etc.
- Provides rule making and policy writing services for the division and tracks legislation during legislative sessions.
- Provides grant maintenance services including documentation and version control, carry-over process, operational setup and maintenance, and closeout.

Staffing and Administrative Support:

- Manages the hiring process for the human resources in the division.
- Manages HR issues related to position management concerns.
- Establishes and maintains a workforce strategy, succession plan and training plan for the division aligning with the agency diversity recruitment policy.
- Provides administrative support to the division's programs and executive support for the directors of each office.
- Provides support for all the division programs' committees.
- Manages and supports all inter-office moves.
- Maintains the division's record keeping and archiving.

Office of Business Operations

Background information

The Office of Business Operations has focused on consolidating, identifying, documenting and maintaining the division's operational processes. The office is identifying meaningful metrics for each process, benchmarking the current state of the measures for those processes and setting goals for improvement. The focus will be incremental improvements using a maturity model and pinpointing the processes deemed to be of most importance by the collective input of the division.

As the Office of Business Operations provides the foundational operating process structure, the office's workload mirrors the demands of the division's programs. As the workload of individual programs grows, the demands of the operational support structure expand as well requiring an increase in positions to meet that need.

Revenue sources and changes

Funding streams in support of the Office of Business Operations are allocated through a federally approved cost allocation plan. A grant allocation module aggregates costs monthly, as outlined in the federally approved plan, to its respective state and federal funding sources. In addition, the Administrative Support team leverages Medicaid administrative match for eligible programs and activities that they support.

Activities, programs and issues in the program unit base budget

OHA administers the Oregon Health Insurance Marketplace (Marketplace), which supports (1) achieving the triple aim of better health, better care, and lower costs; and (2) helping to ensure Oregonians who purchase commercial health insurance in the individual market have easy access to high quality, affordable health care by helping Oregonians leverage federal subsidies and enroll in private health insurance plans that best fit their health and financial goals and needs. Through targeted, equity-centered outreach (described below) to communities that have been disproportionately affected by health and social inequities, including the Nine Federally Recognized Tribes of Oregon, the Marketplace is supporting OHA's efforts to end health inequities by 2030 and to build healthy Tribal communities.

Policy Option Package 424, provided to OHA in the 2025-27 biennium, allows OHA to fund the second stage of Oregon's transition away from the federally facilitated marketplace (FFM) to a state-based eligibility and enrollment platform and consumer assistance center for operation and administration of Oregon's health insurance exchange. Moving away from the FFM will create new opportunities for Oregon to pursue state priorities to advance health equity, enroll more people in affordable, high-quality health coverage, and improve the experience of current enrollees. Real-time access to race, ethnicity, language, and disability (REALD) and sexual orientation and gender identity (SOGI) data will help the Marketplace tailor outreach and be more intentional about efforts to enroll disproportionately uninsured people, including people of color and rural residents in upcoming open enrollment periods and special enrollment periods.

Oregon Health Insurance Marketplace

OHA executed a contract with Vimo, Inc. dba GetInsured in August 2025 to provide enrollment platform and consumer assistance center services through 2031. The project is currently in the execution phase with startup activities in progress and is on track to launch on the target date of November 1, 2026, for open enrollment for the 2027 plan year.

Programs

Program Administration:

- Works with federal partners to ensure eligibility and enrollment systems are available and accessible to Oregonians. Beginning on November 1, 2026, Programs will oversee the state's own eligibility and enrollment system but will continue to work with the Marketplace's federal partners on policy matters.
- Creates equity-centered outreach and education strategies to drive enrollment of individuals within communities of focus.
- Develops rules and policies to help eliminate health inequities and monitors the market for emerging trends.
- Engages partners from diverse communities to gather feedback when establishing and implementing policy.
- Approves carriers and certifies qualified health plans to be offered through the Marketplace.
- Certifies on- and off-exchange and stand-alone dental plans for compliance with federal pediatric dental requirements.
- Provides data, information, and analyses to policymakers.
- Ensures compliance with federal and state regulations.

Outreach and Education:

- Conducts equity-centered outreach and education to Oregonians eligible for Marketplace coverage.
- Provides free, accessible, and objective local enrollment assistance.
- Connects consumers with insurance agents and community partners for one-on-one assistance.

Oregon Health Insurance Marketplace

- Educates consumers who have Marketplace coverage on post-enrollment health insurance literacy and plan utilization.
- Provides competitive grants for outreach and enrollment activities to community partners and insurance agents.
- Cultivates relationships with Oregon Tribal communities and provides outreach, education, Tribal health insurance policy, and operational direction services. Provides grants to support Tribal outreach events.
- Cultivates relationships and provides subject matter expertise support to Marketplace partners and community-based organizations.
- Provides English and Spanish training and certifies more than 1,800 community partners on Marketplace application assistance.
- Assists Oregonians with complex case resolution.
- Manages a call center dedicated to answering questions from individuals seeking enrollment in a qualified health plan. Beginning on November 1, 2026, the Marketplace will oversee operation of a much larger state-based call center as part of the transition to a state-based marketplace.

Additional Responsibilities with State-based Marketplace Implementation:

- Assesses enrollment data to inform health coverage policy decisions, systemic improvements, and outreach strategy.
- Facilitates and manages applications submitted through the state-based marketplace platform.
- Trains and certifies insurance agents to guide Oregonians through the application and enrollment process.
- Manages a consumer assistance center to assist customers with questions, enrollments, and resolution of common Tier 1 and Tier 2 issues. Provides constituent services for escalated case issues, problem solving, and handling appeals.

Oregon Health Insurance Marketplace

Activities

During the 2023-25 biennium and the start of the 2025-2027 biennium, the Oregon Health Insurance Marketplace had numerous accomplishments, including the following:

- Achieved enrollment of 139,688 individuals for the 2025 plan year and 118,372 enrollees for 2026.
- Facilitated a competitive marketplace in the 2025 plan year with six medical carriers and six dental carriers. Four medical carriers and four dental carriers offered statewide coverage. Every Oregonian was offered at least 37 medical plans and 14 dental plans in 2025. Most Oregonians have access to at least 46 medical plans and 20 dental plans this year.
- Deployed an effective statewide mass education campaign through radio, television, digital, and social media, including year-round organic social media and email communications.
- Processed 6,847 calls through the Marketplace's outreach center from July 1, 2025-present
- Responded to 744 consumer emails and 449 emails from community partners from July 1, 2025, to the present.
- Attended 1,041 outreach events and meetings in 2025 and 330 from January 1 to May 31, 2025. These were both in-person and virtual formats for a variety of audiences such as Tribes; LGBTQIA2S+; faith-based communities; Hispanic, Latina, Latino, or Latinx; and Rapid Response recipients. Provided grant and policy support to partner agents who enrolled more than 11,000 Oregonians into Marketplace plans for 2025 and approximately 6,000 for plan year 2026. For coverage year 2026, Oregonians made 43,181 total plan selections with an agent. Provided outreach, education, and private plan application assistance to the Nine Federally Recognized Tribes of Oregon.
- Provided comprehensive Marketplace certification training to more than 1,373 community partners and certified application assisters to ensure they are equipped with the necessary knowledge and skills to assist individuals in navigating the marketplace. Many of these community partners are experts in providing equity-centered outreach to communities that have been disproportionately affected by health and social inequities. They are trained to assist individuals in special situations, such as survivors of domestic violence or spousal

Oregon Health Insurance Marketplace

abandonment, refugees and immigrant communities, Tribal communities, veterans, and people with disabilities. These trainings were provided in English and Spanish, offered closed captioning and an accessibility menu to assist individuals with hearing and visual barriers, and were available via webinars, in-person classroom settings, and on-demand.

- Partnered with 13 community-based organizations across Oregon to expand the Marketplace's presence in communities where English is not the primary language resulting in 346 enrollments and 2,048 instances of Marketplace application assistance.
- Continue to provide subject matter expertise and coordination in the ongoing operations of the OHP Bridge program and its interactions with Marketplace operations.
- Continue to operate Marketplace Window Shopping site, which includes OHP Bridge eligibility, enabling Oregon to provide consumers with accurate information when HealthCare.gov cannot.
- Pursuant to SB 972 (2023), the State-based Marketplace Project:
 - Completed gates one, two, and three of Enterprise Information Services Stage Gate review to verify the corresponding project planning artifacts and requirements for acquisition of a technology platform to transition away from the federally facilitated marketplace.
 - Scheduled and began quarterly external partner engagement sessions with insurance agents, insurance carriers, and community organization enrollment assisters to gather input on requirements, experiences, preferences, and potential health equity considerations related the planned technology platform and call center vendor procurement.
 - The legislature approved a policy option package to fund Phase II of the transition to a state-based marketplace. Phase II is underway and involves obtaining the internal, external, and contracted sources for specialized expertise in the fields of project management, technology integration and implementation, procurement, quality assurance, data, legal, security, privacy, community outreach and education, training, and transition to ongoing operations.
 - Executed a contract with Vimo, Inc. dba GetInsured in August 2025 to provide enrollment platform and consumer assistance center services through 2031. The Marketplace has completed the initial

Oregon Health Insurance Marketplace

configuration sessions to ensure the services conform to Oregon's specific Affordable Care Act rules and statutes.

- Continued to conduct external partner engagement sessions to incorporate feedback throughout implementation.
- The project is currently in the implementation phase with startup activities in progress and additional staff onboarded and is on track to launch on the target date of November 1, 2026, for open enrollment for the 2027 plan year.

Background information

The Oregon Health Insurance Marketplace is the state's health insurance exchange established in 2015 as part of Oregon Senate Bill 1 and under the Affordable Care Act (2010). The Marketplace contributes towards the state's goal of eliminating health inequities by 2030 by helping Oregonians understand their health coverage options, connecting people to free local assistance from trained health coverage experts who act as Marketplace subject matter experts for the community, and certifying the health plans sold to Oregonians through HealthCare.gov.

The Marketplace is a state-based marketplace which currently uses the federal platform (HealthCare.gov) for application and enrollment processing. Senate Bill 972 (2023) transitions the Marketplace away from the federally facilitated marketplace to a state-based enrollment and eligibility platform and call center for operation and administration of Oregon's health insurance exchange. The transition is required to be completed by November 1, 2026, in time for open enrollment for the 2027 plan year. The legislature approved the funding limitation in two phases. Phase I funds were used for research and planning purposes through the request for proposals stage, completion of the Department of Administrative Services' (DAS) Stage Gate process and drafting of the required federal blueprint to transition from a state-based marketplace on the federal platform to a full state-based

Oregon Health Insurance Marketplace

marketplace. Phase II funds are being used for the purchase and operation of the platform, call center implementation, and any additional staff necessary for operation of the new platform.

Enabling legislation/program authorization

The Oregon Health Insurance Marketplace is governed by Oregon Revised Statute Chapter 741.

Revenue sources and changes

The Oregon Health Insurance Marketplace is funded through a per-member-per-month (PMPM) fee charged to participating commercial health insurance companies that issue medical plans or dental plans purchased through the Marketplace. Statute provides that the assessment rates be set annually by the director of OHA after consultation with the Health Insurance Marketplace Advisory Committee (HIMAC) and a public hearing. The PMPM rate is included in the health insurance premiums of individuals and is set in the spring of the year prior to its implementation.

The PMPM rate for plan year 2026 has been established at \$6.85 and \$0.45 for the six participating medical plan and six participating dental plan issuers respectively. Majority of the HIMAC has supported increasing the 2027 PMPM to \$35.60 and \$1.70. An increase in the assessment for 2027 is necessary because of the loss of enrollment resulting from federal policy changes and to cover the costs of operating a state-based marketplace as required by SB 972 (2023). However, Marketplace insurer partners will no longer pay exchange user fees to the federal government, offsetting most of this increase.

As part of a larger administrative streamlining/technical fix legislative concept (LC 451), the Marketplace is working to streamline the composition of the Health Insurance Marketplace Advisory Committee (HIMAC) to help with

Oregon Health Insurance Marketplace

recurring problems related to recruitment and consistently achieving quorum. The proposal would reduce the total number of committee members by combining two very similar categories of membership and eliminating one duplicate category of membership.

Oregon Health Authority: Public Employees' Benefit Board

Executive Summary

Division overview

The Public Employees' Benefit Board (PEBB) is a division of the Oregon Health Authority (OHA). PEBB supports the goals of transforming the health care system in Oregon and fundamentally improving how care is paid for and delivered. The PEBB board's mission is to provide high-quality health plans and other benefits for state employees at a cost that is affordable to both the employees and the state.

Funding request

The PEBB requests funding for the 2027-29 biennium to continue current service levels, which includes cost growth for PEBB medical premiums, both self-insured and fully insured, at 3.4 percent. All PEBB expenditures are categorized as Other Funds.

Program description

PEBB designs, contracts for and administers medical, dental, vision, life, disability, and accidental death and dismemberment plans and flexible spending accounts for PEBB members. More than 149,500 members are enrolled in PEBB coverage. They include active employees, retirees, spouse and domestic partner dependents, child dependents up to age 26, and adult children with disabilities over age 26. They are drawn from state agencies, universities, Lottery and semi-independent agencies, and local governments and special districts.

PEBB's major cost driver is rising health care costs, which is mainly driven by unit health care cost inflation. This makes controlling premium costs a major challenge. PEBB has always sought ways to manage costs through innovative plan designs and payment strategies. PEBB has incorporated "value-based" payments (VBP) into plan design and aligned VBP targets with Coordinated Care Organization (CCO) goals to drive use of high-value services with aspirational goals.

Oregon Health Authority: Public Employees' Benefit Board

Executive Summary

Program justification and link to long-term outcomes

Transforming health care and advancing health equity

The PEBB board has made transforming the health care delivery system a priority and advances transformation with plans that coordinate care. PEBB has partnered with its “sister program” the Oregon Educators Benefit Board (OEBB) in the shared innovation strategy referred to as “Coordinated Care Model” plans. Both boards are continuing to expand these systems of care throughout the state with a focus on integrated care and reducing health care costs and identifying and addressing health disparities. In 2021, PEBB and OEBB formed a joint subgroup of the boards focused on advancing and ensuring health equity called the “Joint Subcommittee on Health Equity”. The committee consists of two board members from each board, expert consultants, and staff. The committee supports OHA’s goal of eliminating health inequities by 2030.

PEBB and OEBB are fully committed to working together to leverage their purchasing power across the state and have started working with the Insurance Marketplace to further leverage the state’s healthcare purchasing power. The “Joint PEBB and OEBB Innovation Workgroup” was formed in 2018. The workgroup is made up of PEBB and OEBB board members and legislators. The workgroup:

- develops strategies on cost containment,
- identifies ways to best leverage claims data stores for analysis of quality and cost performance, and
- develops payment initiatives to ensure the programs meet the 3.4 percent cap every year.

Value-based benefits

Traditional fee-for-service models provide payment for each health care visit, service, or test. Value-based payments shift focus from volume to value by rewarding providers for delivering high-quality care that supports improved outcomes and slower cost growth. As shown in the table below, OEBB and PEBB health plans currently incorporate a variety of value-based payment strategies to incentivize provider quality and efficiency. Many of the general strategies

Oregon Health Authority: Public Employees' Benefit Board

Executive Summary

used align with value-based payment approaches also used by coordinated care organizations (CCOs) serving Oregon's Medicaid population.

Many of the strategies used by PEBB & OEBC align with value-based payment approaches also used by Coordinated Care Organizations (CCOs) serving Oregon's Medicaid population.

PEBB and OEBC continue to work toward increasing the percentage of total health care payments that use value-based approaches and have identified future year targets that closely align with those established for CCOs, consistent with the goals defined in CCO 2.0.

	OEBC	PEBB	CCO
Infrastructure payments			
Pay for reporting			
Pay for performance			
Shared savings with upside risk			
Shared savings upside and downside risk			
Condition-specific population-based payment			
Comprehensive population-based payment			
Integrated finance and delivery system			

Wellness initiatives and promoting health

In 2020 many PEBB members began working remotely due to the COVID-19 pandemic. Flexible work schedules continue to be the norm. As a result, PEBB's employee wellness efforts shifted away from a focus on environmental approaches and toward increasing communications directly to members to promote PEBB wellness programs, and to help them understand and access their benefits.

The Worksite Wellness Coordinating Council and the PEBB Member Advisory Committee (PMAC) developed and are implementing a Member Wellbeing Strategy aimed at addressing needs identified by both groups. Specifically,

Oregon Health Authority: Public Employees' Benefit Board

Executive Summary

- Supporting employees across remote, hybrid and in-person work settings
- Defining “worksite” wellness in the future
- Supporting employees with current resources in the meantime, while developing a long-term well-being strategy

The goals include:

- Improving awareness and promoting utilization of existing well-being resources
- Specifying Council and PMAC well-being roles
- Developing a multi-year well-being strategy
- Executing strategy in concert with appropriate partner groups (PMAC, Uplift Oregon, etc.)

PEBB supports prevention and member wellness by offering members access to no-cost wellness programs. Wellness programs help members living with chronic conditions build self-management skills; provide emotional, social and financial health services; support development of healthier behaviors; help members overcome tobacco use; and help members develop healthy eating habits and achieve weight-loss goals.

Oregon Health Authority: Public Employees' Benefit Board

Executive Summary

Effective January 1, 2026, PEBB discontinued the Health Engagement Model (HEM) program. Rather than tying a financial incentive to completion of a health assessment, PEBB kept lower medical plan deductibles for all members, including those who had not previously participated in HEM. PEBB also launched Garner, a program that helps Providence Health Plan and Moda Health members identify high-quality, cost-effective providers and reimburses members for eligible out-of-pocket costs when they see a Garner-approved Top Provider.

Over the past several years increasing numbers of PEBB members have moved from less-coordinated PPO medical coverage to Coordinated Care Model plans.

Oregon Health Authority: Public Employees' Benefit Board

Executive Summary

PEBB quality measures and fees-at-risk

In the 2027-29 biennium, PEBB will continue to add quality measures and performance targets in health plan contracts to support movement toward better health, better care, and lower costs. The specific quality measures selected will be based on the Statewide Aligned Quality Measures menu developed by the Health Plan Quality Metrics Committee for coordinated care organizations (CCO), PEBB and OEBC plans, and the Oregon Health Insurance Marketplace.

Program performance

PEBB has met the 3.4 percent overall expenditure increase and annual premium increase “test” nearly every year since 2012 (see below). Fulfilling the growth cap has been done by executing cost containment strategies and promoting program efficiencies. PEBB face challenges in meeting the 3.4 percent tests as a payer in the commercial market, battling trend, provider market leveraging and the annual growth cap timing. Pharmacy costs, in particular, continue to outpace medical trend overall, and the Board continues to evaluate strategies, including updated pharmacy benefit manager contracts and formulary management, to address this driver heading into the 2027-29 biennium.

PEBB offers members in every Oregon county a choice between the statewide Preferred Provider Organization (PPO) plan and at least one regional CCM plan. CCM plan choices are available at a lower cost to both members and the state. PEBB’s core medical benefit design has remained consistent in recent years. PEBB continues to cover:

- The first four visits to primary care, with no deductible
- The full cost of certain chronic condition and substance abuse visits, with no deductible, copayment or coinsurance
- Nationally recommended preventive services
- No-cost in network outpatient mental health services

Oregon Health Authority: Public Employees' Benefit Board

Executive Summary

- Alternative care including massage therapy

PEBB added:

- Infertility benefits in 2022, and
- Doula benefits in 2025, and
- A 90-day mail and retail pharmacy benefit for maintenance medications and the Garner provider comparison and reimbursement program in 2026

Oregon Health Authority: Public Employees' Benefit Board

Oregon Health Authority: Public Employees' Benefit Board

Executive Summary

PEBB also offers non-traditional and culturally responsive benefits and services, e.g., the use of doulas and other traditional health workers, Christian Science and Native American healers and alternative care such as acupuncture, massage, naturopathic and spinal manipulation services.

Enabling legislation/program authorization

The Public Employees' Benefit Board authority lies in ORS 243.061 through ORS 243.302.

Funding streams

- **Stabilization Account:** PEBB has authority to use this account to control costs, subsidize premiums and self-insure. The primary source of Other Funds revenue is unused employer contributions for employee benefits. This account also holds proceeds generated when PEBB's life insurance carrier changed from a mutual organization to a public corporation.
- **Flexible Spending Account:** PEBB operates two flexible-spending-account programs and two commuter programs for employees and maintains an account for their administrative costs. The primary Other Funds revenue source for these programs is forfeitures from participants.

Significant proposed program changes from 2025-27

- The Board has completed the medical and Rx RFP and has selected new Carriers for the upcoming 2027 plan year. The Board completed the medical and pharmacy RFP and, in April 2026, selected Moda Health and Kaiser Permanente as medical plan carriers and Capital Rx as the Pharmacy Benefit Manager for Moda Health plans, effective for the 2027 plan year. Providence Health Plan withdrew from the procurement process and will not be offered as a PEBB medical plan option beginning in 2027. Plan designs, pharmacy formulary and provider networks for 2027 are still being finalized; PEBB's goal is to ensure robust provider networks for

Oregon Health Authority: Public Employees' Benefit Board

Executive Summary

all members, including members transitioning from Providence Health Plan. This carrier transition is the most significant change to PEBB's medical program in recent biennia and will require substantial administrative and communication effort to ensure a smooth transition for members.

- New Local Governments, of various size, are voluntarily joining PEBB. This increases the number of covered lives participating in PEBB plans. Local Governments have the option to participate in all PEBB plan offerings.

Activities, programs and issues in the program unit base budget

The Public Employees' Benefit Board (PEBB) is a division of the Oregon Health Authority (OHA). PEBB supports the goal of transforming the health care system in Oregon and fundamentally improving how care is paid for and delivered and achieving OHA's strategic goal to end health inequities in Oregon by 2030. PEBB's mission is to provide high-quality health plans and other benefits for state and university employees at a cost that is affordable to both the employees and the state. Oregon Revised Statutes create an eight-member board whose members are appointed by the Governor and confirmed by the Senate. PEBB serves broadly diverse constituencies including the State of Oregon (as an employer), public universities, employees who live and work in every county of the state, the Legislature, taxpayers, labor unions and health policy groups.

PEBB designs, contracts for and administers health plans, group policies and flexible spending accounts for PEBB members. Approximately 149,500 Oregonians are enrolled as PEBB members. They include active and retired employees, spouse and domestic partner dependents, child dependents up to age 26, and adult children with disabilities over age 26, from state agencies, universities, Lottery and semi-independent agencies, and local governments and special districts.

Public Employees' Benefit Board

The PEBB Board serves diverse populations and provides a critical public service to Oregonians. The board offers medical, dental, vision, life, disability and accidental death and dismemberment benefit plans. PEBB is a federal IRS Section 125 Cafeteria Plan benefits program that is required to offer the same benefits to all members to enable pretax benefit payment.

Transforming health care

The Public Employees' Benefit Board (PEBB) is mandated to redesign the health care delivery system so public employees have access to high-quality plans at a lower price, defined in Senate Bill 1067 (2017) as no more than 3.4 percent growth annually. How to stay at or under a 3.4 percent annual growth trend when the Oregon commercial insurance market trend averages 8-9 percent is without a doubt PEBB's biggest challenge and consumes most of the board's attention.

The PEBB Board has made transforming the health care delivery system a key priority and advances transformation with plans that coordinate care. PEBB has partnered with its "sister program" the Oregon Educators Benefit Board (OEBB) to mostly offer "Coordinated Care Model" plans and have developed incentives to increase enrollment in the more efficient, managed plans. Both boards believe the coordinated care model (CCM) is essential for achieving a sustainable 3.4% budget target and in managing overall costs. PEBB offers coordinated care model health plans that use patient-centered medical homes to improve quality, enhance member experience, and contain costs. Both boards continue to add these systems of care throughout the state with a focus on integrated care and reducing health care costs and health disparities. The boards would like to further pursue plans and providers that use creative and innovative evidence-based practices that contribute value.

Oregon Health Authority: Health Policy and Analytics

Public Employees' Benefit Board

PEBB's coordinated care model plans enable the board to execute on strategies such as:

- Promoting alternative payment methodologies such as risk sharing and global value-based payments.
- Integrating behavioral and physical health delivery.
- Supporting the use of medical homes.
- Increasing payments for primary care.
- Putting fees at risk in contracts for meeting agreed-upon administrative and clinical performance metrics.
- Managing costs to a 3.4 percent annual increase.

The Board completed the medical and pharmacy RFP and, in April 2026, selected Moda Health and Kaiser Permanente as medical plan carriers and Capital Rx as the Pharmacy Benefit Manager for Moda Health plans,

Public Employees' Benefit Board

effective for the 2027 plan year. Providence Health Plan withdrew from the procurement process and will not be offered as a PEBB medical plan option beginning in 2027. Plan designs, pharmacy formulary and provider networks for 2027 are still being finalized; PEBB's goal is to ensure robust provider networks for all members, including members transitioning from Providence Health Plan. This carrier transition is the most significant change to PEBB's medical program in recent biennia and will require substantial administrative and communication effort to ensure a smooth transition for members.

New Local Governments, of various size, are voluntarily joining PEBB. This increases the number of covered lives participating in PEBB plans. Local Governments have the option to participate in all PEBB plan offerings

PEBB cost containment programs

Premium costs are affected by external drivers such as member utilization; lack of care coordination; inflation in health care costs, such as high prescriptions costs; and sedentary occupations that lead to long-term health risks and chronic conditions.

The traditional method of controlling premium increases is to increase costs to members through higher deductibles, higher copayment or coinsurance, or increased premium share. PEBB has always sought ways to reduce costs through innovative plan designs. Both PEBB and OEBB have incorporated "value-based" benefit attributes into plan design to encourage use of high-value services including:

- Value prescription drug formularies
- Waived copayments for office visits related to certain chronic conditions
- Self-management programs for weight and diabetes prevention available at no out-of-pocket cost to members
- No-cost tobacco use cessation support

Public Employees' Benefit Board

Value-based benefits

Both OEBB and PEBB have implemented value-based benefit plans. Services that have been shown to reduce health care costs have a lower copayment or coinsurance. Members pay more for services that have less-expensive alternatives. Members are encouraged to talk to their medical providers about alternatives to these higher-cost options. Examples of these benefits include:

- No or lowered costs for visits for diabetes, coronary artery disease, asthma and chronic obstructive pulmonary disease. Regular office visits keep people with these diagnoses out of the emergency room and hospital.
- No or lowered costs for medications that help prevent or manage chronic diseases such as statins for cholesterol, asthma inhalers and depression medications.
- Additional copayment for endoscopies, sleep studies and advanced imaging technologies (CT, MRI, PET scans).
- Additional copayment for shoulder and knee arthroscopic surgery, total knee and total hip joint replacement surgery.
- PEBB and OEBB continue to work toward increasing the percentage of total health care payments that use value-based approaches and have identified future year targets that generally align with those established for Coordinated Care Organizations.

PEBB also launched Garner, a program that helps Providence Health Plan and Moda Health members identify high-quality, cost-effective providers and reimburses members for eligible out-of-pocket costs when they see a Garner-approved Top Provider.

Public Employees' Benefit Board

Wellness initiatives and promoting member health

Effective January 1, 2026, PEBB discontinued the Health Engagement Model (HEM) program. Rather than tying a financial incentive to completion of a health assessment, PEBB kept lower medical plan deductibles for all members, including those who had not previously participated in HEM.

PEBB supports prevention and member wellness by offering members access to no-cost wellness programs. Wellness programs help members living with chronic conditions build self-management skills; provide emotional, social and financial health services; support development of healthier behaviors; help members overcome tobacco use; and help members develop healthy eating habits and achieve weight-loss goals.

The Worksite Wellness Coordinating Council and the PEBB Member Advisory Committee (PMAC) developed and are implementing a Member Wellbeing Strategy aimed at addressing needs identified by both groups. Specifically,

- Supporting employees across remote, hybrid and in-person work settings
- Defining “worksite” wellness in the future
- Supporting employees with current resources in the meantime, while developing a long-term well-being strategy

The goals include:

- Improving awareness and promoting utilization of existing well-being resources
- Specifying Council and PMAC well-being roles
- Developing a multi-year well-being strategy
- Executing strategy in concert with appropriate partner groups (PMAC, Uplift Oregon, etc.)

Oregon Health Authority: Health Policy and Analytics

Public Employees' Benefit Board

Wellness programs include:

- Canopy is the Employee Assistance Program (EAP) for PEBB members, providing confidential support for emotional, social and financial wellbeing; Oregon State University employees access these services through Lyra Health.
- Kaia Health offers a no-cost, app-based pain management program for Providence Health members, using motion analysis to guide personalized movement and recovery.
- The Moda Health Coaching Program provides Moda Health members no-cost, one-on-one phone coaching to set health goals and manage chronic conditions.
- Omada is a digital diabetes prevention program available to Kaiser Permanente and Providence Health members to help build lasting healthy habits.
- No-cost 24/7 telehealth is available to all PEBB members and dependents through their medical plan, providing virtual access to care anytime.
- Preventive care services are covered at no cost to members under all PEBB medical plans when delivered by an in-network provider.
- Quit For Life and other tobacco cessation resources help members overcome tobacco use.
- WeightWatchers is available at no cost to members age 18 and older enrolled in a PEBB medical plan to support weight-loss and wellness goals.
- Garner is a new program added for 2026 that helps Providence and Moda members find and use high-quality, in-network providers. Members who choose a Garner-approved provider can be repaid for eligible out-of-pocket costs, up to \$1,000 for individual coverage and \$2,000 for family coverage annually.

PEBB quality measures and fees-at-risk

PEBB has made significant progress on the implementation of quality and cost performance measures with fees at risk in benefit contracts. PEBB continues to include quality measures and performance targets in health plan contracts to support better health, better care, and lower cost. The specific quality measures selected are based on

Public Employees' Benefit Board

the Statewide Aligned Quality Measures menu developed by the Health Plan Quality Metrics Committee for CCOs, PEBB and OEGB plans, and the Oregon Health Insurance Marketplace. PEBB and OEGB contracts now include performance improvement targets on each measure and require that health plans put at risk a portion of administrative fees or premiums paid to them, with retention of at-risk dollars contingent on the plan achieving its targets. Performance improvement targets established for each measure considers the health plan's current performance in comparison to national benchmarks, gold standard performance rates, and organizational priorities to achieve identified rates of improvement in specific areas of health care quality. The categories of Performance Guarantees are: Administrative/Operational, Financial Trend, Clinical Quality, Clinical Management programs, Account Management, and Transparency.

Additional budget drivers

- Legislative cap on premium rate increases: The PEBB Board will continue to work with carriers to explore strategies to keep renewal rate increases at or below the Legislature's 3.4 percent growth cap.
- Implementing benefit mandates as required.

Joint PEBB and OEGB Innovation Workgroup

PEBB and OEGB formed the joint Innovation Workgroup (IWG), made up of PEBB and OEGB board members and legislators to analyze cost drivers, measure access and quality, and explore joint alternative payment models that bring true value and the potential for tremendous savings. The IWG looks to leverage the purchasing power and data to its maximum value and will look to include joint ventures with other OHA programs in the future such as the Marketplace to further leverage purchasing power. Key initiatives the IWG has worked on most recently include:

- Development of a Centers of Excellence program across the state
- Addressing Behavioral Health provider access issues and payment strategies
- Advancing Value-based payments in PEBB and OEGB

Oregon Health Authority: Health Policy and Analytics

Public Employees' Benefit Board

Joint PEBB and OEGB Health Equity Workgroup

In 2021, the boards determined that to fully engage in advancing health equity in all aspects of their benefit programs, a special workgroup must be formed that focused on this goal. The Joint PEBB OEGB Health Equity Workgroup has set five initial goals:

- To intentionally increase the diversity on the boards
- Develop and apply a health equity lens tool to all board policy decisions
- Develop a Diversity Equity and Inclusion assessment tool that audited PEBB and OEGB benefit vendors and ensured their business practices met the standards the boards have set
- Amplify the commitment to Health Equity by the boards and communicate it in all areas
- Incorporate Health Equity into governance, quality metrics and clinical protocols

The workgroup has developed a health equity lens tool and has incorporated it in several policy decisions. It has also developed a DEI tool and used it to audit PEBB and OEGB business partners, providing reports for areas needed for improvement. The workgroup continues to move this work forward.

Revenue sources and changes

PEBB maintains two accounts in its **Revolving Fund**.

- Stabilization Account: PEBB has authority to use this account to control costs, subsidize premiums and self-insure. The primary source of Other Funds revenue is unused employer contributions for employee benefits. This account also holds proceeds generated when PEBB's life insurance carrier changed from a mutual organization to a public corporation.

Public Employees' Benefit Board

- Flexible Spending Account: PEBB operates two flexible-spending-account programs and two commuter programs for employees and maintains an account for their administrative costs. The primary Other Funds revenue source for these programs is forfeitures from participants.

Oregon Health Authority: Health Policy & Analytics

Difference	\$0.00	\$4.47	\$0.00	\$4.47	2	2.00
Percent	0%	19%	0%	19%	10%	10%

The Agency Request Budget covers the Public Employees' Benefit Board's (PEBB) current service level for the 2027-29 biennium. It also includes policy package #424 for PEBB's portion of replacement costs for both the OEBB and PEBB benefits management system.

Activities, programs and issues in the program unit base budget

PEBB's authority lies in ORS 243.061 through ORS 243.302. House Bill 2279 (2013) expanded eligibility to include local governments and special districts. As directed by the 1997 Legislature, PEBB was established in 1998 to merge the State Employees' Benefit Board (SEBB) and the Bargaining Unit Benefits Board (BUBB) programs into one program. PEBB's mission is to provide a high-quality health plan and other state employee benefits at an affordable cost to both the employees and the state. Its statutes create an eight-member board whose members are appointed by the Governor and confirmed by the Senate. PEBB serves broadly diverse constituencies, including the State of Oregon (as an employer), employees who live and work in every county of Oregon and in every state across the nation, the Legislature, taxpayers, labor unions and health policy groups.

The PEBB Board works to achieve its goals by adhering to the following values:

- Offering employee choice among high quality plans
- Creating a competitive marketplace
- Closely managing plan performance and monitoring quality data
- Innovative, flexible plan designs
- Delivering high quality customer service

Public Employees' Benefit Board

- Advancing health equity and eliminating disparities in priority populations
- Commitment to improving employee health

Background information

The Public Employees' Benefit Board (PEBB) designs, contracts for, and administers health plans, group insurance policies, and flexible spending accounts for state and university employees and their dependents. The board provides medical and dental insurance programs representing about 149,500 Oregonians. The board also selects and administers life and disability insurance coverage for eligible state and university employees. A major part of the board's responsibility is developing benefit packages to meet the needs of state government and its employees, preparing benefits information for communication materials, and answering inquiries from employees and their dependents about coverage.

PEBB members include active agency and university employees and their dependents; active semi-independent agency employers and their employees; early retirees and other self-pay members and their dependents; and COBRA subscribers. The program is administered by staff, with actuarial services and third-party administrator services provided through contract.

PEBB Operations is funded entirely with Other Funds. PEBB collects premiums for all insured individuals, and then purchases insurance with those revenues. The resources to pay for employee health insurance are budgeted in each state agency for that agency's employees. The resources may be General Fund, Lottery Funds, Other Funds, or Federal Funds. Once the resources are transferred to PEBB, they are shown as Other Funds.

For fully insured plans, the premiums PEBB collects are passed through to the appropriate insurance carrier who carry the risk on those plans. For self-insured plans, PEBB carries the risk and must maintain a Stabilization Fund, which requires a sufficient balance to cover large claims risk.

Oregon Health Authority: Health Policy & Analytics

Public Employees' Benefit Board

Operational costs are funded through an administrative charge (assessment) added to medical and dental insurance premiums and premium equivalents. By statute, the assessment cannot exceed 2 percent of monthly contributions from employees and employers.

The Operations Budget is approximately 1 percent of the Total Funds budget for PEBB. The core functions of PEBB Operations include administrative areas: communications, financial services, contracts, health policy, employee wellness, regulatory, IT systems and data management, and member services. In 2017, Senate Bill 1067 directed the merger of the administrative functions of PEBB and the Oregon Educators Benefit Board (OEBB) under one executive director and leadership team. The boards have engaged in many joint initiatives since then and are currently building a joint eligibility and enrollment system. The board delegates many important functions to operations staff including:

- Operational and administrative actions required to administer services to members and implement benefits (for example, rule-making authority)
- Activities determined by the chair and vice-chair
- Directing rate negotiations with vendors through PEBB's contracted consultant
- Directing contract negotiations for implementation and renewal of PEBB programs and benefits. Negotiations occur once the board has awarded contracts to successful vendors or has approved renewals of existing program contracts
- Authority to initiate contracts for specific services that fall under the not-to-exceed dollar amount threshold. This is established in state procurement laws for direct contracting and informal procurements
- Authority to initiate transfer of excess reserve funds held by contracted carriers or refunds from contracted vendors to PEBB Stabilization Fund
- Authority to pay claims, invoices, purchase orders, travel expenses, maintenance agreements and personal service agreements

Public Employees' Benefit Board

Annual Renewal Process

Each year, the board begins an annual plan renewal process. During this process the board examines benefit offerings, renegotiates, premium rates with carriers, projects administrative fees, and makes final decisions for the following plan year. Once the board finalizes renewal decisions and they are captured in renewal letters to carriers, the PEBB administrative team gets to work operationalizing their decisions:

- The Contracts team begins updating contracts
- IT Systems staff begin work with contractors to implement changes in the PEBB benefits system (PDB)
- The Communications team begins updating open enrollment materials with rates and benefit changes
- Member Services staff readies for Open Enrollment Oct. 1 – Oct. 30

Operating expenditures are mainly driven by personal services, consultant actuary costs, IT consultant/programming costs, attorney general costs and open enrollment and wellness costs.

Revenue sources and changes

Other Funds revenue pays for PEBB administration through an administrative assessment added to medical and dental insurance premiums and premium equivalents. By statute (ORS 243.185), PEBB can collect an amount that equals up to 2 percent of total premiums to meet administrative and operational costs.

Oregon Health Authority: Health Policy & Analytics

Public Employees' Benefit Board

In recent years, the administrative fee was not an adequate source of revenue to cover the development of the Benefit Management System (BMS) project and the increase in system programming costs. A main goal of the boards was to construct the new BMS without having to borrow the funds to do it. As the new system development project ends and the old system is phased out, the administrative fee is likely to decrease..

Oregon Health Authority: Oregon Educators Benefit Board

Executive Summary

Program Contact: Ali Hassoun, Director
503-378-2798

Division overview

The Oregon Educators Benefit Board (OEBB) is a division of the Oregon Health Authority (OHA). OEBB supports the goals of transforming the health care system in Oregon and fundamentally improving how care is paid for and delivered. The OEBB board's mission is to provide a comprehensive selection of benefit plan options for most of Oregon's K-12 school districts, education service districts and community colleges, as well as a number of charter

Oregon Health Authority: Oregon Educators Benefit Board

Executive Summary

schools and some special districts and local governments. OEGB's benefit plans are designed to be flexible and accommodate the needs of employers and members.

Funding request

The OEGB requests funding for the 2027-29 biennium to continue current service levels, which includes cost growth for OEGB medical premiums, both self-insured and fully insured, at 3.4 percent. All OEGB expenditures are categorized as Other Funds.

Program description

OEGB serves entity employees, early retirees, COBRA enrollees and their family members, in more than 267 publicly funded entities throughout Oregon. OEGB serves its members and entities year-round.

The OEGB board designs and maintains a full range of benefit plans for eligible publicly funded entities to offer to their employees, early retirees and COBRA enrollees. Plans include medical, dental, vision, life, disability, accidental death and dismemberment, long term care, an employee assistance program, a health savings account and flexible spending accounts.

Rising health care costs are a primary cost driver for OEGB. OEGB has recognized and taken steps to provide incentives for appropriate care and condition management through benefit plan design with the goal of containing costs and using alternative payment models to control costs. OEGB strives to keep benefit plans affordable and stable while providing quality care to members. OEGB has managed benefit costs to well below national trend throughout its history and continues to meet a legislatively capped annual 3.4 percent increase on premiums and costs on behalf of members.

Executive Summary

Program justification and link to long-term outcomes

OEBB was established to eliminate the wide-ranging disparities among health plans offered by educational entities and for responding to the rapidly rising costs of health care. A statewide pool such as OEBB creates purchasing power and avoids unstable premium swings. Streamlining administration and eliminating third-party fees and duplication of work were also large cost savers upon the formation of OEBB. Educational entities benefit from cost predictability and controlling of expenditures year-over-year.

Transforming health care and advancing health equity

The OEBB board has made transforming the health care delivery system a priority and envisions advancing health care transformation with plans that coordinate care. OEBB has partnered with its “sister program” the Public Employees’ Benefit Board (PEBB) in the shared innovation strategy referred to as the “Coordinated Care Model” (CCM). Both boards are continuing to add these systems of care throughout the state with a focus on integrated care and reducing health care costs and health disparities. In 2021, PEBB and OEBB formed a joint subgroup of the boards focused on ensuring health equity, called the “Joint Subcommittee on Health Equity.” The committee consists of two board members from each board, expert consultants, and staff. The committee supports OHA’s goal of eliminating health inequities by 2030.

OEBB and PEBB are fully committed to working together to leverage their purchasing power across the state and have started working with the Insurance Marketplace to further leverage the state’s healthcare purchasing power. The “Joint PEBB and OEBB Innovation Workgroup” was formed in 2018 with board members from each board and legislators to develop strategies on cost containment, how to best leverage claims data stores for analysis of quality and cost performance, and developing payment initiatives to ensure meeting the 3.4 percent cap every year.

Oregon Health Authority: Oregon Educators Benefit Board

Executive Summary

**Moda CCM counts for 2023 are pending. March 2023 Moda CCM is estimated based on September 2023 CCM percentage reported in Board Meeting.

Value-based benefits

Traditional fee-for-service models provide payment for each health care visit, service, or test. Value-based payments shift focus from volume to value by rewarding providers for delivering high quality care that supports improved outcomes and slower cost growth. As shown in the table below, OEBB and PEBB health plans currently incorporate a variety of value-based payment strategies to incentivize provider quality and efficiency. Many of the general strategies used align with value-based payment approaches also used by coordinated care organizations (CCOs) serving Oregon's Medicaid population.

Oregon Health Authority: Oregon Educators Benefit Board

Executive Summary

Many of the strategies used by PEBB & OEGB align with value-based payment approaches also used by coordinated care organizations (CCOs) serving Oregon's Medicaid population.

OEGB and PEBB continue to work toward increasing the percentage of total health care payments that use value-based approaches and have identified future year targets that closely align with those established for CCOs.

	OEGB	PEBB	CCO
Infrastructure payments			
Pay for reporting			
Pay for performance			
Shared savings with upside risk			
Shared savings upside and downside risk			
Condition-specific population-based payment			
Comprehensive population-based payment			
Integrated finance and delivery system			

OEGB quality measures and fees at risk

In the 2027-29 biennium, OEGB will continue to include quality measures and performance targets in health plan contracts to support better health, better care, and lower cost. The specific quality measures selected will be based on the Statewide Aligned Quality Measures menu developed by the Health Plan Quality Metrics Committee for coordinated care organizations (CCOs), PEBB and OEGB plans, and the Oregon Health Insurance Marketplace.

Wellness initiatives and promoting member health

OEGB supports prevention and member wellness by offering members access to no-cost wellness programs. Wellness programs help members in a variety of ways, including helping people with chronic conditions live healthier lives, helping prevent the onset of diabetes, providing emotional, social and financial health services, helping overcome tobacco use, and helping achieve and maintain weight loss goals. OEGB members also have

Executive Summary

access to an interactive benefit education tool, Explore Your Benefits, available in English and Spanish, and to monthly newsletters and webinars covering benefit topics and wellbeing resources.

Program performance

OEBB has met the 3.4 percent overall expenditure increase and annual premium increase “test” nearly every year since 2012 (see below). Fulfilling the growth cap has been done by executing on cost containment strategies and promoting program efficiencies. OEBB faces challenges in meeting the 3.4 percent tests as a payer in the commercial market in battling provider shortages, high inflation, trend, provider market leveraging and the timing of the annual growth cap. From 2020-2022, the global pandemic heavily impacted utilization levels. The “bounce-back” of deferred care and provider revenue losses, and quantifying the impact on the health of OEBB members will be better understood in upcoming claims cycles.

Actual and projected per employee per month (PEPM) premium increases

Annual increase in medical, dental, and vision premium PEPM, excluding the change in taxes/fees

- Note that these increases do not reflect taxes / fees, but do reflect enrollment migration year over year so may not tie to the renewal increase in that year
- The projected increase for 2026-27 is based on enrollment through December 2025.

Oregon Health Authority: Oregon Educators Benefit Board

Executive Summary

Strategies for success

OEBB is incorporating key elements of the coordinated care model into all OEBB medical plans. The elements are particularly evident in the structure of the Moda Health PCP 360 plans, as well as the fully integrated health care delivery system inherent in the Kaiser Permanente plans.

The OEBB board and staff are committed to our mission and guiding principles and have developed strategies to achieve long-term results:

- Offer high-quality, affordable health plans.
- Support member wellness and population health.
- Create streamlined operations and organization effectiveness.
- Provide enhanced member outreach and communications.
- Create a financially sustainable organization.

Benefit highlights for the 2026-2027 plan year

- OEBB continues to offer medical, dental and vision plans through Moda Health, Kaiser Permanente, Willamette Dental and VSP.
- All medical plans include an enhanced virtual telehealth service.
- Moda plans continue to offer the Moda360 member concierge service, providing OEBB members with specialized service navigators to assist with finding quality providers, resolving claims or billing issues, scheduling appointments, and locating health care resources, along with expanded telemedicine, diabetes care programs and enhanced behavioral health services.
- Life and disability benefits are administered through The Standard, and employee assistance program services are provided through Canopy.

Executive Summary

- Garner is also available to OEBB members through Moda Health, connecting them with high-quality, in-network "Top Providers" and reimbursing eligible out-of-pocket medical costs. Reimbursement amounts vary by OEBB plan, ranging up to \$700–\$1,000 for individual coverage and \$1,400–\$2,000 for family coverage annually.

Oregon Health Authority: Oregon Educators Benefit Board

Executive Summary

*drop in enrollments in plan year 2011-12 was due to a recession.

Executive Summary

Enabling legislation/program authorization

OEBB was established by Senate Bill 426 (2007). House Bill 2279 (2013) expanded participation eligibility to include local governments and special districts. The OEBB board functions and responsibilities are authorized by ORS 243.860 to 243.886.

Funding streams

ORS 243.884 authorizes the Oregon Educators Revolving Fund to pay premiums, control expenditures, provide self-insurance and stabilize premiums.

Significant proposed program changes from 2025-27

Entities receiving benefits through OEBB include Oregon public school districts, education service districts, community colleges, charter schools, and eligible local governments that participate in OEBB-administered benefit programs. New Entities, of various sizes, are voluntarily joining OEBB. This increases the number of covered lives participating in OEBB plans. New Entities have the option to participate in all OEBB plan offerings.

Percent	0%	13%	0%	13%	0%	0%

The Agency Request Budget includes funding for the 2027-29 biennium to continue current service levels, which includes cost growth for OEGB medical premiums, both self-insured and fully insured, at 3.4 percent.

Activities, programs and issues in the program unit base budget

The Oregon Educators Benefit Board (OEGB) was established by the 2007 Legislature. OEGB provides a comprehensive selection of benefit plan options for most of Oregon's K-12 school districts, education service districts and community colleges, as well as a number of charter schools and local governments across the state. OEGB offers a multitude of plans that resemble an "exchange." OEGB started offering medical, dental, and vision coverage in 2008 and has since added a broad range of additional benefits including life, accidental death and dismemberment (AD&D), short-term and long-term disability and long-term care insurance, as well as an employee assistance program (EAP), a health savings account (HSA), flexible spending accounts (FSAs), and commuter savings accounts. Each of the 267 employer entities OEGB serves maintains a unique service area, eligibility requirements, cost sharing with employees, and diverse populations. The law prohibits those entities, with certain exceptions, from offering benefit plans other than those offered by the Board. Unlike PEBB, all plans are fully insured. OEGB has prioritized choice in plan options for employers and employees, and consequently offer a large number of different plans.

OEGB was created to eliminate the wide-ranging disparities between health plans offered by school districts and to respond to the rapidly rising costs of health care. House Bill 2279 (2013) expanded participation eligibility to include

Oregon Educators Benefit Board

local governments and special districts. A statewide pool, such as OEBB, creates purchasing power and avoids unstable premium swings experienced by school districts with volatile claims experience. Streamlining administration and eliminating third-party fees and duplication of work were also large cost savers upon the formation of OEBB. School districts benefit from cost predictability and controlling of expenditures year-over-year. In addition to OEBB's cost goals, OEBB plans emphasize coordinated care model features. Coordinated care means the member's primary care physician works with specialists, hospitals and other providers in a coordinated fashion to ensure optimal and efficient care for members. All the plan design changes implemented since the 2020-21 Plan Year have focused on advancing preventive care and coordinated care principles.

Key components of the OEBB program include:

- Value-added plans that provide high-quality care and services at an affordable cost to members.
- Collaboration with districts, members, carriers and providers that ensures a focused approach on the design and delivery of benefit plans and services.
- Support of improvement in members' health status through a variety of measurable programs and services.
- Implementing measurable goals and programs that hold carriers and providers accountable for health outcomes.
- Encouraging members to take responsibility for their own health outcomes.
- Top-of-class customer service.

Transforming Health Care

The OEBB board has made transforming the health care delivery system a priority and envisions advancing health care transformation with plans that coordinate care. OEBB has partnered with its "sister program" the Public Employees' Benefit Board (PEBB) in the shared innovation strategy referred to as "Coordinated Care Model" plans. OEBB and PEBB believe the coordinated care model (CCM) is essential for achieving success in managing overall costs. For the 2024-25 plan year, OEBB continued further enhancement of CCM plan offerings with additional duties for health navigators. Health navigators are personal health coaches that provide members with assistance in

Oregon Educators Benefit Board

scheduling appointments, billing questions, claims and appeals, care programs and prior authorizations allowing members to better coordinate their health care. Both PEBB and OEGB continue to add these systems of care throughout Oregon with a focus on integrated care and reducing health care costs and eliminating health disparities. The boards would like to further pursue plans and providers that use creative and innovative evidence-based practices, specifically in social determinants of health.

As the board evaluates plan offerings in an annual contract renewal with plans, it focuses on maintaining sustainable, affordable, equitable and high-quality benefit plan options across the entire state. Strategies include:

- Engage employers regularly to ensure the affordability definition remains relevant to all participating entities.
- Monitor and audit utilization and plan performance to ensure high quality benefits.
- Incorporate criteria specific to legislative cost requirements (3.4 percent renewal increase cap) into carrier contracts.
- Require proposers to outline their plans and specific steps they will take to promote these criteria in medical offices and care locations around the state.
- Incentivize coordinated care plans and improve access to culturally specific services across the state.
- Integrate coordinated, patient-centered care – physical, mental and dental.
- Demonstrate improved health outcomes.
- Embrace alternative payment models.

The board is dedicated to moving away from a “fee-for-service” model and incentivizes members to enroll in a Coordinated care model plan. The following graphic illustrates OEGB members moving from a preferred provider organization (PPO) plan to a coordinated care model (CCM) plan with a lower cost shares.

Oregon Health Authority: Health Policy and Analytics

Oregon Educators Benefit Board

**Moda CCM counts for 2023 are pending. March 2023 Moda CCM is estimated based on September 2023 CCM percentage reported in Board Meeting.

OEBB cost containment programs

OEBB has recognized and taken steps to provide incentives for appropriate care and management of chronic conditions through benefit plan design with the goal of containing costs:

- Members have no copayment, coinsurance, or deductible for office visits associated with management of certain chronic conditions (asthma, diabetes, cardiovascular disease and congestive heart failure).
- Value pharmacy benefit provides medications used to manage common chronic conditions with no copayment.

Oregon Educators Benefit Board

- Condition management and prevention programs offered at no out-of-pocket cost to members under OEBB and PEBB medical plans, including evidence-based programs for members living with a chronic condition and prevention programs that specifically target members at risk of developing diabetes.
- Additional copays were included to discourage the use of certain procedures and treatments that had less-invasive options that were equally effective.
- Garner is also available to OEBB members through Moda Health, connecting them with high-quality, in-network "Top Providers" and reimbursing eligible out-of-pocket medical costs. Reimbursement amounts vary by OEBB plan, ranging up to \$700–\$1,000 for individual coverage and \$1,400–\$2,000 for family coverage annually.

OEBB has also used alternative payment models to control cost including:

- Reference pricing for joint replacement and gastric bypass services.
- Shared risk payment models for its Moda PCP 360 medical plans.

OEBB quality measures and fees at risk

In the 2027-29 biennium, OEBB will continue to include quality measures and performance targets in health plan contracts to support better health, better care, and lower cost. The specific quality measures selected will be based on the Statewide Aligned Quality Measures menu developed by the Health Plan Quality Metrics Committee for coordinated care organizations (CCOs), PEBB and OEBB plans, and the Oregon Health Insurance Marketplace.

Wellness initiatives and promoting member health

OEBB supports prevention and member wellness by offering members access to no-cost wellness programs. Wellness programs help members in a variety of ways, including helping people with chronic conditions live healthier lives, helping prevent the onset of diabetes; providing emotional, social and financial health services; helping overcome tobacco use; and helping achieve and maintain weight loss goals.

The Agency Request Budget covers the Oregon Educators Benefits Board's current service level for the 2027-29 biennium. It also includes policy package #424 for OEBB's portion of replacement costs for both the OEBB and PEBB benefits management system.

Activities, programs and issues in the program unit base budget

The Oregon Educators Benefit Board (OEBB) was established by the 2007 Legislature. OEBB provides a comprehensive selection of benefit plan options for most of Oregon's K-12 school districts, education service districts and community colleges, as well as a number of charter schools and local governments across the state. OEBB offers a multitude of plans that resemble an "exchange." OEBB started offering medical, dental, and vision coverage in 2008 and has since added a broad range of additional benefits including life, accidental death and dismemberment (AD&D), short-term and long-term disability and long-term care insurance, as well as an employee assistance program (EAP), and a health savings account (HSA),. Each of the 267 employer entities OEBB serves maintains a unique service area, eligibility requirements, cost sharing with employees, and diverse populations. The law prohibits those entities, with certain exceptions, from offering benefit plans other than those offered by the Board. Unlike PEBB, all plans are fully insured. OEBB has prioritized choice in plan options for employers and employees, and consequently offers a large number of different plans.

Oregon Health Authority: Health Policy and Analytics

Oregon Educators Benefit Board

The board and staff have been focused on recovering from the pandemic with an improved overall health status of its members and a moderate impact to cost trends. The Oregon Health Policy Board has worked on coordinated care model alignment, looking for ways to utilize a model with coordinated care attributes in programs such as OEGB. Over the last few years, OEGB has implemented a number of programs that fit within this model. This includes:

- Increasing the percentage of OEGB members in patient-centered primary care homes,
- Implementing additional cost tiers to promote value-based benefits,
- Full coverage for preventive services,
- Coverage for weight management and tobacco cessation programs, and
- Designing benefits that reduce barriers to care for members with chronic diseases

Background information

OEGB Operational costs are funded entirely with Other Funds revenue through an administrative charge (assessment) added to medical and dental insurance premiums and premium equivalents. By statute, the assessment cannot exceed 2 percent of monthly contributions from employees and employers. Each month OEGB invoices its participating entities after reconciling eligibility, and collecting premiums for all insured individuals. OEGB withholds the administrative assessment revenue and then purchases insurance with the remaining premium revenues. The resources to pay for employee health insurance is included in the State School Fund distribution. Once the premiums are collected by OEGB, they are shown as 100 percent Other Funds in OEGB's budget.

The Operations Budget is approximately 1 percent of the Total Funds budget for OEGB. The core functions of OEGB Operations include administrative areas: communications, financial services, contracts, health policy, employee wellness, regulatory, IT systems and data management, and member services. In 2017, Senate Bill 1067 directed the merger of the administrative functions of OEGB and the Public Employees' Benefit Board (PEBB) under

Oregon Health Authority: Health Policy and Analytics

Oregon Educators Benefit Board

one executive director and leadership team. The boards have engaged in many joint initiatives since then and are currently building a joint eligibility and enrollment system. The board delegates many important functions to operations staff including:

- Operational and administrative actions required to administer services to members and implement benefits (for example, rule-making authority)
- Activities determined by the chair and vice-chair
- Directing rate negotiations with vendors through OEGB's contracted consultant
- Directing contract negotiations for implementation and renewal of OEGB programs and benefits. Negotiations occur once the board has awarded contracts to successful vendors or has approved renewals of existing program contracts
- Authority to initiate contracts for specific services that fall under the not-to-exceed dollar amount threshold. This is established in state procurement laws for direct contracting and informal procurements
- Authority to initiate transfer of excess reserve funds held by contracted carriers or refunds from contracted vendors to the OEGB Stabilization Fund
- Authority to pay claims, invoices, purchase orders, travel expenses, maintenance agreements and personal service agreements

Annual Renewal Process

Each year, the board begins an annual plan renewal process. During this process the board examines benefit offerings, renegotiates premium rates with carriers, projects administrative fees, and makes final decisions for the following plan year. Once the board finalizes renewal decisions and they are captured in renewal letters to carriers, the OEGB administrative team gets to work operationalizing their decisions:

- The Contracts team starts updating contracts.

Oregon Health Authority: Health Policy and Analytics

Oregon Educators Benefit Board

- IT Systems staff begin work with contractors to implement changes in the OEBB benefits system (MyOEBB).
- The Communications team begins updating open enrollment materials with rates and benefit changes.
- Member Services staff readies for Open Enrollment, Aug. 15 - Sept. 30.

Operating expenditures are mainly driven by personal services, consultant actuary costs, IT consultant/programming costs, attorney general costs and open enrollment and other costs.

Revenue sources and changes

Oregon Revised Statute (ORS) 243.880 established the Oregon Educators Benefit Account to cover administration expenses. The account's revenue is generated through an administrative fee included in premiums for OEBB medical, dental and vision benefits, which is considered Other Funds revenue. By statute, the administrative fee cannot exceed 2 percent of total monthly premiums. ORS 243.882 prohibits the balance in the account from exceeding 5 percent of the monthly total of employer and employee contributions for more

than 120 days.

Legislatively Approved Budget

2027-29

Agency Request Budget

Oregon Health Authority: Public Health Division

Executive Summary

Program Contact: Naomi Adeline-Biggs, Public Health Director
Phone: 971-673-1222

Executive Summary

Division overview

Public health uses equity practice, data, science and community wisdom to achieve better health outcomes by preventing the leading causes of death, disease, and injury in Oregon. The OHA Public Health Division (OHA-PHD) works in partnership with local public health authorities (LPHAs), the Nine Federally Recognized Tribes of Oregon, community-based organizations (CBOs), health systems and other partners. OHA-PHD supports implementation of the OHA Strategic Plan, providing leadership for OHA's work to foster healthy families and environments by ensuring every person in Oregon has a healthy start, stabilizing and aligning family supports starting in early childhood and leveraging the West Coast Health Alliance to address the upstream and public health factors that determine family resilience.

OHA-PHD's 2027-29 Agency Request Budget includes critical supports to public health regulatory structures that are necessary to continue progress toward eliminating health inequities. OHA-PHD's Agency Request Budget includes increases in fees to maintain safe health care facilities, sustain environmental health regulation and ensure the state laboratory continues to provide comprehensive licensing. In addition, the Agency Request Budget includes investments to sustain vaccine access in Oregon, carry out statutory obligations to maintain data systems and consolidates positions and programs to reduce expenditures.

Funding request

OHA-PHD has included eight Policy Option Packages that represent crucial investments to maintain key public health services in the state.

Package #406- Enhancing Vaccine Access and Financing: requests additional General Fund over current service level to keep broad access to vaccines sustained in the state.

Oregon Health Authority: Public Health Division

Executive Summary

Package #422 – Public Health - Data Program Restoration: Data System Fees to Maintain Mission-Critical Public Health Functions requests data system fee increases to maintain critical public health functions that provide timely access to birth and death records, screen newborns for certain conditions, support safe prescribing practices, and help ensure drinking water and air is free of chemicals, toxins and other substances that negatively impact health.

Package #402- ALERT Immunization System Replacement: requests General Fund for start-up costs and ongoing costs to support maintenance of the ALERT Immunization Information System.

Package #421 - PH – Environmental Health Program Restoration: requests fee increases to prevent program insolvency and ensure people in Oregon are safe from radiation exposure, foodborne illness, and other hazards where they live, work, and play.

Package #408 – PH – Health Care Facility Program Restoration: requests fee increases to ensure that OHA has sufficient resources to keep people in Oregon seeking health care through the operation and oversight of multiple health-related licensing programs: ambulatory surgery centers, outpatient renal dialysis facilities, in-home care agencies, caregiver registries and non-transplant anatomical research and recovery organizations.

Package #413 Medical Marijuana Program Modernization: proposes moving part of the Oregon Medical Marijuana Program from OHA to Oregon Liquor and Cannabis Commission to ensure program sustainability.

Package #407- Gender Affirming Care: requests \$579K General Fund to carry out directives under HB 2002 which requires access to gender affirming services statewide.

Executive Summary

Package #423 - State School Nurse Realignment: Moving the State School Nursing Consultant from OHA to Oregon Department of Education, requests moving the position from OHA to ODE to house school nursing positions in one agency and support strategic goals of state school nursing work.

Program description

The mission of OHA-PHD is to promote health and prevent the leading causes of death, disease, and injury in Oregon. OHA-PHD implements the 2025-29 State Health Improvement Plan (SHIP) through more than sixty strategies across four priority areas: healthy environments; individual, family and community well-being; disease prevention and health promotion; and emergency preparedness.

Public health modernization remains a priority for Oregon's governmental public health system, which, in addition to OHA-PHD, includes local public health authorities and the Nine Federally Recognized Tribes of Oregon. In the current biennium, the governmental public health system continues its focus on reducing syphilis and preventing congenital syphilis, increasing vaccination rates, and reducing negative health effects of extreme heat and wildfire smoke. The public health infrastructure developed as a result of public health modernization has been essential to Oregon's response to emerging public health threats, including opioids, domestic well contamination, and disease outbreaks.

Program justification and link to long-term outcomes

Public health programs and interventions contribute to reductions in health care costs and improved health outcomes, such as:

- A 40% decline in the percentage of Oregon adults who smoke cigarettes and an 80% decline in youth tobacco use since 2001.

Executive Summary

- Up-to-date immunizations for 91% of children served by the Nurse Family Partnership Program at 6 months of age in 2023.
- Decreased prescription opioid dispensing from retail pharmacies from a high of 3.6 million prescriptions in 2013 to a low of 2.2 million in 2021.
- A total of 129,181 visits at 85 school-based health centers during the 2022-2023 school year for 38,188 clients.
- Decline in youth alcohol use by nearly 50% since 2009.

Program performance

OHA-PHD has a system of performance management and quality improvement to inform program implementation. Specifically, OHA-PHD collects and reports annually on SHIP health outcome measures and public health accountability metrics. OHA-PHD has included several public health accountability metrics in the OHA Performance System and the OHA Strategic Plan. OHA-PHD was reaccredited by the national Public Health Accreditation Board in November 2025.

In addition to the SHIP, OHA-PHD monitors three plans that include measures to track program performance: 1) Strategic; 2) Quality Improvement, and 3) Public Health System Workforce. All of these plans are described in the Program Unit Narrative of the Office of the State Public Health Director.

Enabling legislation/program authorization

Chapters 431 and 433 of Oregon Revised Statutes set forth hundreds of code sections enabling a wide range of public health activities carried out by state public health and its partners. Federally funded public health programs are implemented according to federal laws.

Executive Summary

Funding streams

For the 2027-29 biennium, the OHA-PHD Agency Request Budget comprises General Fund, Federal Funds and Other Funds. Federal revenue includes entitlement grants and more than 150 categorical grants. As a part of COVID-19 response, since 2020, OHA-PHD has received over \$700 million in funding from federal grants, CARES Act, Consolidated Appropriations Act of 2021, and the American Rescue Plan Act funds to address both the immediate pandemic and long-term strategic planning to address pandemic and any other future outbreaks. These funds are anticipated to end by 2027. OHA-PHD's Other Funds revenue sources include fees for activities in such areas as newborn screening tests; licensing of facilities including hospitals; and statutorily dedicated funds from the Tobacco Use Reduction Account.

General statement about federal funding:

Changes in federal requirements and funding structures have led to funding uncertainty for the Division. The Division has had cuts to some federal grants as well as changes to terms and conditions that have required extensive analysis to understand program impacts. Due to this, substantial OHA-PHD staff time and resources have been spent responding to changes. In addition to OHA-PHD staff resources, the Division has had significant new and unanticipated costs seeking counsel from the Oregon Department of Justice in order to respond to changes from the federal administration. OHA-PHD expects continued uncertainty in the coming biennium.

Significant proposed program changes from 2027-29

In order to sustain the costs of service delivery in fee-based programs, the 2027-29 OHA-PHD Agency Request Budget includes fee increases for regulation of healthcare facilities, regulatory environmental health programs, vital records, state laboratory testing and accreditation and prescription drug monitoring. In addition, OHA-PHD will request funds to reform vaccine finance to ensure vaccine access in the state is not reduced.

Executive Summary

Additionally, OHA-PHD will implement several healthcare regulation laws including SB 1161, SB 842 and HB 3942 (2025) and SB 1575 and HB 4047 (2026) which created several new and modified licensing programs and responsibilities that are funded by fees.

Activities, programs and issues in the program unit base budget

The Office of the State Public Health Director (OSPHD) guides the strategy, operations, science, communication, and policy of public health programs and ensures that Oregon's public health system is effective, efficient and aligned with the OHA goal to eliminate health inequities by 2030. The office sets public health priorities in collaboration with state and local government agencies, the Nine Federally Recognized Tribes of Oregon and the Oregon Public Health Advisory Board (PHAB). OSPHD routinely engages with partners, including community-based organizations, to ensure that the work of the office advances community health priorities. With support from OSPHD, the Public Health Division (OHA-PHD) is organized into three centers: Center for Public Health Practice, Center for Prevention and Health Promotion, and Center for Health Protection. OSPHD provides equity, science and epidemiology, fiscal, policy and operations leadership to all public health programs and is organized into five units: Finance, Operations, Partnerships for Community Health, Policy and Partnerships, and Science and Evaluation.

The Partnerships for Community Health Program (PCH, formerly the Equity Unit) provides overall coordination and leadership for division-wide strategic initiatives and systems change, including capacity building related to antiracism and decolonization within public health practice. PCH mobilizes internal and external partners to advance health equity and address social determinants of health among underserved populations through statewide community- and culturally-specific strategies including outreach, engagement and equitable service delivery. PCH's programming includes collaborative health equity support for other OHA-PHD programs, equity strategists to

Oregon Health Authority: Public Health Division

Office of the State Public Health Director

support Oregonians with disproportionate barriers to accessing OHA-PHD services, and a health equity grant program that supports 100+ community-based organizations.

The PCH Program works with the OHA Equity & Inclusion Division, Office of Community Health and Engagement, regional health equity coalitions, and affected communities in health equity strategy. PCH leads efforts to achieve OHA and PHD's health equity goals, by partnering with communities to determine culturally-specific priorities and invest public health resources in them.

The Finance Unit manages the OHA-PHD budget process, provides fiscal management, and manages contracts with local public health authorities, the Nine Federally Recognized Tribes of Oregon and community-based organizations. It monitors and tracks all funding sources moving into or out of the Division to ensure appropriate resource allocation and responsible fiscal stewardship.

The Science and Evaluation Unit leads population health data collection and reporting, program evaluation, clinical aspects of state public health service delivery, and ethical review of public health studies involving human subjects through the OHA-PHD Institutional Review Board. The Science and Evaluation Unit aligns public health data and collection reporting around race, ethnicity, language, and disability (REALD) as well as sexual orientation and gender identity (SOGI) data. The unit also supports community-based approaches to public health data collection by working directly with communities of color and Tribal communities to collect, analyze, interpret and report disaggregated public health data that is important to community.

The Operations Unit manages OHA-PHD human resources, position management, building operations, risk, employee safety and wellness, internal communications, business continuity, quality improvement activities and workforce development. The Operations Unit facilitates optimal public health employee engagement to inform the OHA strategic plan and performance system, leads the implementation of the OHA-PHD Strategic Plan, workforce

Oregon Health Authority: Public Health Division

Office of the State Public Health Director

recruitment, retention and professional development, and quality improvement initiatives. The Operations Unit also directs and implements OHA-PHD's Continuity of Operations Plan, safety procedures and practices.

The Policy and Partnerships Unit leads the development and implementation of strategic initiatives that advance an equitable, prevention-focused public health system that is prepared to address current and emerging health threats. The unit is responsible for leading legislative policy strategy and administrative rulemaking across the division. The unit develops and implements statewide plans, which support OHA-PHD's nationally-accredited status, including Oregon's State Health Improvement Plan (SHIP). The unit manages cross-division funding programs for other governmental agencies with public health authority, including 33 local public health authorities and the Nine Federally Recognized Tribes of Oregon, and the unit ensures statutory requirements are met in two counties, Curry and Wallowa, that do not have a local public health authority. The unit cultivates strategic partnerships for a cohesive public health system across OHA divisions and through multiple external steering committees and advisory groups. The unit staffs the PHAB, which provides guidance and direction for public health priorities and supports the public health system's commitment to health equity through implementation of public health modernization.

In addition to the five units described above, OSPHD supports the Search Advocate program, which leads organizational change for hiring processes to ensure recruitments are equitable, inclusive, anti-racist and culturally responsive.

As part of national accreditation, OSPHD is responsible for maintaining five prerequisites on five-year cycles: a state health assessment, a state health improvement plan, an organizational strategic plan, a quality improvement plan and a workforce development plan. The OHA Public Health Division achieved reaccreditation in November 2025

State Health Assessment and Improvement Plan: OSPHD conducted a state health assessment (SHA) in 2024. The SHA includes a review of health data, health improvement initiatives and public health capacity, and includes a

Oregon Health Authority: Public Health Division

Office of the State Public Health Director

set of more than thirty priority health indicators. It is a critical document for understanding the health, strengths and needs of Oregon communities and the public health system's capacity to respond.

In January 2026 OSPHD launched the 2025-2029 state health improvement plan (SHIP). OSPHD worked with an external steering committee of community members, partners and people with expertise in community health planning to develop the SHIP. Using information from the SHA and feedback collected through extensive community and partner engagement, Oregon's SHIP includes the following four priorities: healthy environments; individual, family and community well-being; health promotion and disease prevention; and emergency preparedness. The plan includes more than sixty strategies showing the breadth of work performed by the public health system to make progress in the priorities by 2029.

OHA Public Health Division Strategic Plan:

The Oregon Public Health Division Strategic Plan identifies and describes the division's role in advancing the vision of public health modernization, the commitments of the State Health Improvement Plan and OHA's Strategic Plan. This plan focuses on the OHA-PHD workforce and strategic impacts that address internal inequities and builds organizational infrastructure through four strategic priorities: recruitment; retention; promotion and development; and organizational culture.

OHA-PHD will use data from the Performance System, the Public Health Workforce Interests and Needs Survey (PH WINS) and measures written into the plan to assess progress toward the plan's short, medium and long-term goals. This plan closely aligns with the PHD Workforce Development Plan and the PHD Quality Improvement Plan.

Public Health Division's Quality Improvement Plan:

The Quality Improvement (QI) Plan for OHA-PHD provides a framework for staff to align quality improvement efforts with the division's mission, vision and strategic priorities. The QI Plan defines the roles and responsibilities of OHA-

Oregon Health Authority: Public Health Division

Office of the State Public Health Director

PHD employees related to QI, describes the learning opportunities offered to staff and describes the process for identifying, prioritizing and initiating QI projects. This plan outlines QI goals and objectives for the division, provides communication strategies and ongoing evaluation processes to support the progression and maintenance of a culture of quality improvement in the division. The QI plan outlines a systematic approach that allows staff and the division to reflect on how work is done in the division and how PHD continues to assess and improve processes towards eliminating health inequities by 2030.

Public Health System Workforce Plan:

The Public Health System Workforce Development Plan was developed as a guiding force to hold OHA-PHD accountable for maintaining a prepared and capable workforce to support the achievement of optimal health for all people in Oregon. The plan is the state's first comprehensive, system-wide Public Health Workforce Plan.

This plan establishes a coordinated strategy to strengthen recruitment, retention, training, and system infrastructure across Oregon's public health ecosystem. It includes workforce needs, perspectives and data from the state, local public health authorities, Tribal health authorities, community-based organizations, and academic institutions. This plan aims to build a diverse, well-trained, and stable workforce; strengthen leadership and organizational capacity; improve equity, cultural responsiveness, and community engagement; create sustainable pipelines for future public health workers; and ensure the system can respond effectively to emergencies and long-term health needs.

OSPHD measures the plan's objectives annually to assess progress. This plan is currently in implementation phase and OSPHD is working closely with partners across the system, including the PHAB to ensure this plan is both a strategic roadmap and a commitment to long-term investment in Oregon's public health workforce to meet current and future challenges while advancing health equity statewide.

Oregon Health Authority: Public Health Division

Office of the State Public Health Director

Public Health Modernization:

Since 2013, OSPHD has provided leadership for Oregon’s public health modernization initiative, which advances a system that is equitable, prevention-focused and prepared to address current and emerging threats. This effort began with House Bill 2348 (2013), which established the Task Force on the Future of Public Health Services. Task Force recommendations were codified into law in 2015 through House Bill 3100. Since then, OSPHD has worked to implement statutes governing public health modernization.

The Legislature has increased funding for public health modernization in most biennia since an initial investment of \$5 million was made in 2017. This critical funding has begun to close gaps in capacity and resources that were identified in the initial assessment of foundational capabilities and programs in 2016 and affirmed in a 2024 assessment. Additional funding provided by the Legislature is as follows:

- 2017-19: \$5 million (Initial funding)
- 2019-21: \$10 million
- 2021-23: \$45 million
- 2023-25: \$50 million
- 2025-27: no additional investment

The budget for 2025-27 totals \$121.6 million, which includes legislative investments as well as inflation and other adjustments.

Most investments are allocated to local public health authorities, the Nine Federally Recognized Tribes of Oregon, and community-based organizations to conduct local programming for communicable disease control and prevention, climate and health resilience and planning, and emergency preparedness. During the first half of the 2025-27 biennium, nearly all local public health authorities developed a modernization plan and a climate and health adaptation plan. These plans ensure localities across Oregon have an action plan to scale up implementation of

Oregon Health Authority: Public Health Division

Office of the State Public Health Director

foundational public health programs and capabilities over time. Legislative investments supported nearly 300 new and existing LPHA staff, who bolster community partnerships and enable LPHAs to advance local interventions to improve immunization rates, decrease rates of syphilis, and ensure communities are resilient to climate change.

In addition to local programming, recent system-wide actions include the following:

- (2024) OHA-PHD and local public health authorities conducted a capacity and cost assessment to evaluate system-wide progress toward meeting statutory requirements and continued gaps in capacity and funding.
- (2025) OHA-PHD awarded first-ever incentive payments to local public health authorities that met accountability metrics, as required in ORS 431.380.
- (2025) OHA-PHD wrapped up the first two cohorts of public health equity grant funding to community-based organizations that work alongside governmental public health to address community health priorities. OSPHD conducted a grant application process for cohort three, funding more than one hundred community-based organizations in the 2025-27 biennium.
- (2025) OHA-PHD led a system-wide visioning process to re-commit to a shared understanding of the overall vision, purpose and long-term sustainability of public health modernization. The updated vision was approved by the PHAB in March 2026. OHA-PHD is now working with PHAB and LPHAs on actions to implement this vision, including making updates to Oregon's public health modernization framework and manual.

Revenue sources and changes

The 2025-27 budget for OSPHD is composed of 20 percent Federal Funds (primarily through the agency's federally approved cost allocation plan), 75 percent General Fund, and 5 percent Other Funds.

A portion of the General Fund is pass-through funding to local public health authorities to support local communicable disease outbreak surveillance. The remaining General Fund is used to fund new positions to support

Oregon Health Authority: Public Health Division

Office of the State Public Health Director

the implementation work of modernization, data and collection, and enhancements to critical data systems at the state.

The Legislature appropriated a total of \$112.5 million General Fund to support the ongoing implementation of public health modernization. Of this investment, \$90 million has been allocated to Local public health authorities, community-based organizations, reproductive health providers, the Nine Federally Recognized Tribes of Oregon and the Urban Indian Health Program, NARA, to carry out local and Tribal public health modernization strategies. The remainder has funded positions and contracts at the state level that are essential for the effective and efficient delivery of public health protections and coordination across the public health system and to ensure accountability for these funds.

OSPHD administers the State Support for Public Health investment in communicable disease prevention. In the 2025-27 biennium, \$10.5 million was allocated to continue support for local communicable disease outbreak response at the current service level.

The office also receives federal funding from the Centers for Disease Control for the National Initiative to Address COVID-19 Health Disparities, which ends in May 2027, the Preventive Health and Health Services Block Grant, and Public Health Infrastructure Grant to address state-determined public health priorities.

Activities, programs and issues in the program unit base budget

The Center for Health Protection (CHP) protects the health of individuals and communities by establishing, implementing, and ensuring compliance with regulatory and health-based standards, and identifying risks from environmental exposures. CHP protects people in Oregon from environmental health hazards including, but not limited to, those that may occur in drinking water, through exposure to radiation, and through food. The center also ensures compliance with critical areas of health care. The center's seven sections partner with local public health authorities, communities affected by environmental health hazards, the Nine Federally Recognized Tribes of Oregon, private practitioners, and medical experts. CHP also ensures that communities experiencing health inequities have safe and equitable access to health care facilities, emergency services, and to health-related services and professions.

Drinking Water Services (DWS) ensures the safety of drinking water provided by all (3,318) public water systems in Oregon. The program administers and enforces state and federal safe drinking water quality standards, inspects public water systems, advises operators on response to contaminant detections, assesses treatment efficacy, and provides regulatory and technical assistance to public water suppliers. DWS assists public water systems and communities with protecting their sources of drinking water from contamination. DWS also provides low-cost financing to communities to construct safe drinking water infrastructure, including funding assistance to underserved and disadvantaged communities.

Oregon Health Authority: Public Health Division

Center for Health Protection

Environmental Public Health (EPH) identifies, assesses, and reports on threats to human health from exposure to environmental hazards. EPH is called upon by local, state, federal and Tribal natural resource management, occupational safety, environmental and other agencies to assess risks to human health posed by changing conditions, policies and practices, and recommends interventions to address those risks. To address environmental health equity, EPH prioritizes its work accordingly to address inequities in exposure to environmental health hazards. EPH includes oversight of food, pool, lodging health and safety activities across the state, providing direct environmental health services in Curry and Wallowa Counties (both transferred local public health authority to OHA), and certain aquatic facility regulatory requirements for multiple counties in the state.

Health Care Regulatory and Quality Improvement (HCRQI) ensures safe and high-quality health care through assessment, education and regulation of health facilities and providers through three major program areas: Health Facility Licensing and Certification, Emergency Medical Services, and Health Facilities Planning and Safety. HCRQI licenses and certifies health care facilities, providers and suppliers in acute care and community-based programs; ensures the effectiveness and coordination of the state's emergency medical response system for illness and injury and licenses 138 ambulance service agencies, 903 ambulances, and 13,624 Emergency Medical Services Providers (EMSPs); oversees approximately 45 trauma centers, 91 ambulatory surgical centers, 14 birthing centers, 69 dialysis facilities, 760 hemodialysis technicians, 65 home health agencies, 74 hospice agencies, 62 hospitals and hospital nurse staffing programs, 228 in-home care agencies, 99 rural health clinics, and 10 other provider types; ensures that facilities are safe and effective and meet nationally accepted building standards for approximately 200 health facility projects annually; and evaluates whether a proposed health service or facility is needed. In addition to its EMS regulation responsibilities, HCRQI operates the Oregon Trauma Registry and the Oregon EMS Information System data systems as well as supports the establishment, monitoring, quality improvement, and partner engagement on a variety of statewide, regional, and local EMS system and emergency response issues.

Oregon Health Authority: Public Health Division

Center for Health Protection

Health Licensing Office (HLO) is a central licensing and regulatory office that oversees 20 health and health-related professions and businesses. HLO protects the health, safety, and rights of Oregon consumers by ensuring that only qualified applicants are authorized to practice. HLO reviews and approves applicant qualifications; conducts examinations; inspects thousands of licensed facilities and independent contractors; responds to and investigates consumer complaints; and disciplines licensees who violate state requirements.

Oregon Medical Marijuana Program (OMMP) administers the Oregon Medical Marijuana Act (OMMA). The OMMP oversees the medical marijuana cardholder registry for 11,645 patients and 4,650 caregivers and regulates 2,385 growers at 2,173 grow sites. The program ensures compliance with tracking and reporting requirements and regulates medical marijuana dispensaries and processing sites. This section also oversees all compliance testing of cannabis and hemp-derived vapor items in Oregon and administers the Oregon Cannabis Commission, an advisory body tasked with advising OHA and the Oregon Liquor and Cannabis Commission on the administration of medical and recreational cannabis regulations. In an ongoing effort to reduce costs and further streamline work (pending 2027 legislative session outcomes), OMMP and Oregon Psilocybin Services (OPS) are merging into one section in September 2026.

Oregon Psilocybin Services (OPS) administers the Oregon Psilocybin Services Act, the nation's first regulatory framework for the production of psilocybin products and provision of psilocybin services. OPS licenses and regulates more than 400 facilitators, service centers, manufacturers, and laboratories; approves curriculum for psilocybin facilitator training programs; regulates over 950 permitted workers; and publishes the OPS Data Dashboard. In addition to licensing and regulation, OPS partners with state agencies, organizations, and communities across the state to share information about the regulated model. In an ongoing effort to reduce costs and further streamline work (pending 2027 legislative session outcomes), OPS and OMMP are merging into one section in September 2026.

Oregon Health Authority: Public Health Division

Center for Health Protection

Radiation Protection Services (RPS) protects workers, patients, and the public from unnecessary and unhealthy radiation exposure through over 955 on-site facility inspections annually, licensing of radioactive materials, registration of 12,471 X-Ray and 1,101 tanning devices, environmental monitoring, radiological preparedness training and emergency response, and radio analytical laboratory services. RPS is Oregon's sole public resource for radiation-related incidents.

Revenue sources and changes

The 2025-2027 Center for Health Protection budget comprises 52 percent Other Funds, primarily in the form of fees for services, 31 percent Federal Funds, and 17 percent General Fund. Funding for each program is described below.

Drinking Water Services (DWS) receives funding from federal grants, fees, and the General Fund. DWS collects fee revenue from four programs: Backflow Prevention and Tester/Specialist Certification, Water System Operator Certification, Water System Plan Review fees and Water System Annual Fees. Revenue from fees and General Funds contribute to the required state match for federal grants. DWS receives two federal grants from the Environmental Protection Agency (EPA), the Drinking Water Primacy grant and the Drinking Water State Revolving Fund (DWSRF) capitalization grant. The DWSRF base funding includes support for infrastructure project financing and set asides for specific program functions. From 2022 to 2026, DWS's annual allocation from the Bipartisan Infrastructure Law (BIL) is about \$38 million for infrastructure projects, and \$10 million for treatment of emerging contaminants such as PFAS, cyanotoxins, and manganese. Disadvantaged communities are priority recipients for all grants.

Environmental Public Health (EPH) receives Federal Funds revenue from Centers for Disease Control and Prevention (CDC) grants for Climate and Health, Environmental Health Data and Capacity improvement, Childhood

Oregon Health Authority: Public Health Division

Center for Health Protection

Lead Poisoning Prevention, Environmental Health Assessment (toxicology) and Environmental Public Health Tracking. EPH also receives federal funding from the EPA for radon monitoring and public outreach and to enforce lead-based paint best practices. EPH receives Other Funds revenues through agreements with local public health authorities that assess license fees to support food, public pool, and tourist facility health and safety activities, and uses limited General Funds for this work in Wallowa and Curry Counties where statutory fee revenue is insufficient. OHA is proposing a Legislative Concept and corresponding Policy Option Package to address the funding gap and stabilize the program budget. Other Funds revenue also supports the Clandestine Drug Lab Program and some lead-based paint activities. Additionally, OHA's health risk assessment work supporting the Department of Environmental Quality's (DEQ) Cleaner Air Oregon program is funded through an interagency agreement. The Pesticide Exposure Safety and Tracking Program is funded through an interagency agreement with Oregon Department of Agriculture. EPH receives General Funds to support the Healthy Homes Grant Program; toxicology, epidemiology, climate, built environment and emerging environmental threats staff; to support staff developing an Environmental Justice Mapping Tool. In 2025-27 EPH received an additional \$0.725 million in 2025-27 to add to the \$3 million that was received in 2023-25 in General Funds to test and treat domestic well water of people exposed to nitrate-contaminated groundwater in the Lower Umatilla Basin Groundwater Management Area (LUBGWMA) and to support local partners to conduct outreach as well as an additional one-time \$1.5 million General Funds appropriate for this work.

General Funds also support the Toxic Free Kids program and a new Toxic Free Cosmetics Program; the development of fish consumption advisories related to the risks of exposure to PCBs and other toxic substances in Oregon's rivers; and implementation of a statewide strategy to identify and alert the public to risks of harmful algal blooms (HABs) in freshwater bodies. Beginning in late 2026, EPH will also begin receiving Other Funds allocated via an anticipated September Emergency Board request from the new Oregon Environmental Restoration Fund to

Oregon Health Authority: Public Health Division

Center for Health Protection

expand the geographic scope of healthy fish consumption work, and provide capacity to support, with DEQ, contaminated brownfield site investigation, remediation and reuse.

Health Care Regulation and Quality Improvement (HCRQI) section receives federal funding from the Centers for Medicare and Medicaid Services (CMS) to perform health facility surveys and certification. Some regulatory work such as hospital staffing and in-home care agencies is supported with General Funds. The Health Facility Licensing and Certification program funding sources include fees for licensing and inspection of health care facilities. Emergency Medical Services (EMS) program receives federal funding from the Health Resources & Services Administration to administer the Oregon EMS for Children program. Additionally, fees support the licensing and oversight of emergency medical services providers and ambulance services. EMS also received about \$4.9 million General Fund. The Hospital Staffing Program received about \$6 million General Fund. SB 537 (2025) directs HCRQI to oversee new workplace violence prevention requirements in licensed hospitals, home health agencies and hospices, and provided \$418,000 in 2025-2027 for this work. SB 1161, SB 842 and HB 3942 (2025) and SB 1575 and HB 4047 (2026) created several new and modified licensing programs and responsibilities that are funded by fees.

The Health Licensing Office (HLO) collects over \$7 million in fees for applications, examinations, licenses and renewals, registrations, disciplinary actions, and other administrative fees. Each board, council and program assesses fees, which are used to cover their administrative costs. House Bill 2696 (2023) directed HLO to license and regulate Sign Language Interpreters. Senate Bill 217 (2023) directed the Board of Cosmetology to establish the cosmetology curriculum taught by schools. SB 1552 (2024) directed HLO and licensing boards and commissions to provide predeterminations to persons as to whether a criminal conviction will prevent the person from receiving an occupational or professional license.

Center for Health Protection

Oregon Medical Marijuana Program (OMMP) section collects fees for issuing medical marijuana cards to qualifying patients and maintains a registry of those patients. The program also collects fees for the registration of grow sites, dispensaries and processing sites. Since the legalization of recreational marijuana in 2015, medical marijuana program fee revenue continues to decline. The program's budget balance is projected to be negative by the end of the 2025-2027 biennium. The section also receives some General Funds to support the Oregon Cannabis Commission. OHA, in partnership with the Oregon Liquor and Cannabis Commission, is proposing a Legislative Concept and corresponding Policy Option Package to address the funding gap and stabilize the program budget.

Oregon Psilocybin Services (OPS) received both General Funds and Other Fund limitation to support one year of the 2023-25 biennium. On January 2, 2023, OPS began accepting applications for licensure of psilocybin services. OPS continues to see an increase in facilitator licenses, specifically dual licensed facilitators, and a decrease in other license types. OPS fully transitioned to Other Funds in the 2025-27 biennium.

Radiation Protection Services (RPS) receives funding from three fee-based regulatory programs: the X-Ray Machine Program, Radioactive Material Licensing Program, and the Tanning Device Program. All three collect fees by licensing or registering devices that produce or contain radiation sources. In addition, RPS has a fee for service contract with the Food and Drug Administration to inspect all Oregon facilities performing mammography examinations. Gross RPS program fees total approximately \$6.2 million per biennium.

The Center for Prevention and Health Promotion's (CP&HP) mission is to help Oregonians achieve and sustain lifelong health, wellness and safety through partnership, science and policy. The center's work is essential to achieving the OHA ten-year goal of eliminating health inequities. The center promotes population and community-based strategies to increase capacity for K-12 schools to provide school health services, health education, and foster safe and supportive environments; increase stability and safety for pregnant people, children and their families; increase equitable access to healthy options and preventive health services; decrease disproportionate impacts of health inequities; increase access to healthy food and physical activity for all people in Oregon; reduce harms related to tobacco, alcohol, opioids and other drugs while promoting protective factors that prevent substance use disorders; reduce suicide and other intentional and unintentional injuries and deaths; reduce tobacco, alcohol and other drug use; and prevent and reduce secondary impacts of COVID-19 and support recovery.

CP&HP includes five sections and a total of 254 staff:

Family and Child Health Section administers home visiting programs, early childhood education and family supports, maternal/perinatal health and oral health initiatives, Maternal Mortality Review Committee and data and Maternal and Child Health (MCH) surveillance systems, including Pregnancy Risk Assessment Monitoring System (PRAMS) and Early Childhood Health in Oregon (ECHO).

Oregon Health Authority: Public Health Division

Center for Prevention & Health Promotion

Health Promotion & Chronic Disease Prevention Section includes tobacco prevention, cessation and control, tobacco retail licensing, excessive alcohol use prevention, and cross-systems efforts to increase physical activity, improve access to nutritious, affordable, culturally relevant food, and manage chronic conditions.

Adolescent, ScreenWise, and Reproductive Health Section offers Adolescent Prevention and Health Education, school-based health services, including oversight of School Based Health Centers, Reproductive and Sexual Health services, Breast and Cervical Cancer Screening, and Youth Engagement through PHD's Youth Advisory Council and youth Participatory Action Research (YPAR) activities.

Nutritional Health/WIC Program administers Oregon's Women, Infants and Children (WIC) Program, WIC Farm Direct Program, and Senior Farm Direct Program.

Injury and Violence Prevention Section oversees overdose prevention and state/local response planning, the Prescription Drug Monitoring Program, youth and adult suicide prevention, sexual & domestic violence prevention, older adult falls-traumatic brain injury, transportation safety, firearm/community violence prevention and the National Violent Death Reporting System, along with other core injury & violence epidemiology. IVPP also provides administration support to the Opioid Settlement Funds Prevention, Treatment, Recovery (OSPTR) Advisory Board.

Revenue sources and changes

The Center for Prevention and Health Promotion's budget in AY26-27 is \$516,042,175. This revenue includes 19 percent General Fund, 32 percent Federal Funds Limited, 23 percent Federal Funds Non-Limited, 18 percent Other Funds Limited, and 8 percent Other Funds Non-Limited. General Fund revenue supports the Perinatal Services

Oregon Health Authority: Public Health Division

Center for Prevention & Health Promotion

Access Fund, access to universally offered nurse home visiting including Family Connects Oregon, adolescent health promotion and school health service programs such as School-Based Health Centers, school-linked mobile and telehealth programs and school nursing, Oregon Contraceptive Care program (federal 1115 family planning Medicaid demonstration waiver), the Oregon Reproductive Health Equity Act (RHEA) to provide coverage for a full range of reproductive health services, and the breast and cervical cancer program ScreenWise. General Fund also supports the Youth Suicide Prevention Program, HB 4045 (2022) Hospital-based Violence Intervention Program (HVIP) grants, the School Dental Sealant program, and the WIC Farm Direct Nutrition Program food vouchers.

The center receives Federal Funds through the following federal grants and programs:

- The Centers for Disease Control and Prevention (CDC) grants for prevention of Alzheimer's and dementia, arthritis, breast and cervical cancers, colorectal and other cancers, diabetes, cardiovascular disease, use of menthol and other flavored tobacco products; tobacco control, alcohol epidemiology, and Oregon State Cancer Registry.
- CDC grants for the Early Hearing Detection and Intervention (EHDI) program, the Pregnancy Risk Assessment and Monitoring System (PRAMS) and the Maternal Mortality and Severe Morbidity Review Committee (MMRC) program.
- CDC grants for the Core State Injury Prevention Program, National Violent Death Reporting System, Addressing Violence Epidemiology in Real Time, Comprehensive Suicide Prevention, Overdose Data to Action in States and Rape Prevention and Education.
- The Substance Abuse and Mental Health Services Administration (SAMHSA) grants for the Garrett Lee Smith State/Tribal Youth Suicide Prevention and Early Intervention Grant Program, Strategic Prevention Framework – Partnerships for Success, and 20% of Oregon's Substance Use Prevention, Treatment and Recovery Supports (SUPTRS) Block Grant.
- U.S. Department of Agriculture Special Supplemental Nutrition Program for Women, Infants, and Children (WIC).

Oregon Health Authority: Public Health Division

Center for Prevention & Health Promotion

- Health Resources & Services Administration (HRSA) grants for Maternal & Child Health Title V, Early Hearing Detection and Intervention (EHDl), and the Maternal, Infant and Early Childhood Home Visiting (MIECHV) programs.
- Medicaid 1115 family planning waiver, Oregon Contraceptive Care which receives 90 percent federal match through the Centers for Medicare and Medicaid Services.
- Office of Population Affairs' Title X Program, which supports the provision of culturally and linguistically responsive reproductive health services.
- Administration for Children and Families for Personal Responsibility Education Program.
- Funding to support opioid overdose prevention by means of grants awarded to other programs within the Oregon Health Authority via the SAMHSA State Opioid Response and Substance Use and Prevention, Treatment and Services grants (OHA Behavioral Health Division).

The Center's Other Funds revenues include statutorily dedicated funds under the Tobacco Use Reduction Account (TURA), Ballot Measure 108 tobacco taxes, Tobacco Retail Licensing fees, HB 2726 Indoor Clean Air Act, the Electronic Prescription Monitoring Fund, as well as marijuana tax revenues for alcohol and other drug prevention. CP&HP programs also receive a portion of the state Opioid Settlement Prevention, Treatment and Recovery (OSPTR) Fund and funds from a settlement with JUUL Labs, Inc. to support youth cessation and prevention of electronic nicotine delivery system use.

Activities, programs and issues in the program unit base budget

The Center for Public Health Practice (CPHP) safeguards community health by preventing and controlling infectious diseases, supporting people living with HIV, managing Oregon's vital records, monitoring population health, and providing emergency public health services. It plays a critical role in the state's Continuity of Operations Plan and was central to Oregon's COVID-19 response. CPHP partners with communities to reduce health inequities, particularly those affecting groups harmed by systemic and historic discrimination. Its work advances Oregon's health system transformation and the Oregon Health Authority's goal to eliminate health inequities by 2030.

In collaboration with partners, CPHP invests resources to reduce the burden of disease and health inequities across the state. CPHP's programs work with local and Tribal governments, a wide range of community partners, health care providers, and affected communities to prevent, investigate and control infectious diseases. CPHP coordinates interventions to control disease outbreaks; screens all newborn infants for biochemical disorders to prevent disability or death; and collects and analyzes vital record data needed to understand and plan for health trends. As part of public health emergency preparedness, CPHP conducts testing for biological agents of mass destruction, such as anthrax and plague, along with emerging public health events and diseases such as the COVID-19 pandemic.

Oregon Health Authority: Public Health Division

Center for Public Health Practice

The Center has six sections:

- Center for Health Statistics (CHS), also called vital records
- Acute and Communicable Disease Prevention (ACDP)
- Oregon State Public Health Laboratory (OSPHL)
- HIV, Sexually Transmitted Diseases and Tuberculosis (HST)
- Oregon Immunization Program (OIP)
- Health Security, Preparedness and Response (HSPR)

CHS serves as Oregon’s official vital records and statistics program. Under Oregon law (ORS 432), every vital event—such as a birth, marriage, divorce, fetal death, or death—that occurs in the state must be recorded and permanently preserved. These records are legal documents essential for Oregonians to conduct many aspects of daily life. Beyond their legal importance, vital records data are foundational for understanding population health. The program has over 6.5 million records permanently stored, registers 130,000 vital events, completes 42,000 legal changes to records, and issues 170,000 certificates annually.

ACDP identifies and prevents the spread of communicable diseases that cause illness and death, including food- and water-borne diseases, meningococcal disease, viral respiratory infections, including influenza and measles, hepatitis, antibiotic-resistant bacterial infections, healthcare-associated infections, and vector-borne diseases. ACDP collaborates with partners to reduce disease transmission associated with food, water, animals, insects, human contact, and health care. ACDP implements genomic surveillance, wastewater surveillance, data systems, clinical expertise, infection control capacity, and regional epidemiology capacity. ACDP investigates disease reports to identify potential public health risks, prevent further transmission, and support timely public health response. During the 2025 reporting period 14,217 reportable conditions were investigated, with 161 gastrointestinal and 441 respiratory outbreaks reported.

Oregon Health Authority: Public Health Division

Center for Public Health Practice

OSPHL performs 11.2 million tests on 401,435 human specimens biennially. This includes clinical testing for communicable diseases and newborn bloodspot screening, which performs 2 screening panels for over 44 medical conditions for all infants born in Oregon. OSPHL is responsible for coordinating emergency laboratory responses to emerging pathogens and biological or chemical threats throughout Oregon. Its regulatory section oversees certification of clinical laboratories and accredits environmental laboratories that monitor the safety of drinking water, cannabis, psilocybin, and air, water and land in Oregon.

HST programs work with local partners and the community to prevent and eliminate the transmission of HIV, Syphilis, Chlamydia, Gonorrhea, and Tuberculosis and improve health outcomes. In 2025, HST recorded over 18,000 reportable cases across these conditions. HST works closely with all local public health departments and community-based partners to provide an array of prevention and care services. HST also provides direct client services to approximately 4,000 people living with HIV through Oregon's AIDS Drug Assistance Program and HIV housing programs.

OIP provides life-saving vaccines to ensure that children, families and individuals are healthy and able to participate in school, work and daily living. The program is responsible for ordering and distributing \$120M of publicly funded vaccines (e.g., doses purchased using funds for the Vaccines for Children (VFC) program, 317 program, Vaccine Access Program), ensuring enrolled vaccine provider clinics properly store and administer vaccines, reporting on vaccine uptake in Oregon, maintaining a robust immunization information system, and supporting local public health and schools to ensure that children are up to date on vaccines for childcare and school entry. In addition to supporting the 33 local public health authorities (LPHAs) throughout Oregon, OIP also ensures that statutorily required immunization services are available at the local level for Curry and Wallowa Counties, as they transferred public health authority to the state.

Oregon Health Authority: Public Health Division

Center for Public Health Practice

HSPR programs track the surge capacity of hospitals and public health agencies to respond to public health emergencies, such as respiratory illness, heat events, wildfires and earthquakes. Duty officers are on call 24/7 to triage and direct initial reports of incidents that may have public health implications, averaging 106 calls per month. HSPR manages the State Emergency Registry of Volunteers in Oregon (SERV-OR), which maintains and trains a roster of approximately 4,800 health care providers. In 2026 OHA is adding non-licensed support and administrative personnel after the passage of SB 837 in 2025. To support community priorities for public health emergency, HSPR provides funding to LPHAs and the Nine Federally Recognized Tribes of Oregon each year.

Revenue sources and changes

The 2025-27 Legislatively Adopted Budget for the Center for Public Health Practice (CPHP) is comprised of 54 percent Federal Funds, 40 percent Other Funds, and 6 percent General Fund.

In response to the COVID-19 pandemic, in the 2021-23 biennium CPHP received over \$600 million of federal funding for a broad range of response activities, including case investigation and contact tracing, laboratory testing, healthcare system infection control capacity, and vaccine distribution. These federal funds supported the staff and contracts based within the COVID-19 Response and Recovery Unit as well as the Public Health Division. CPHP continues to use the remaining funding during the 2025-27 biennium. Much of the funding is categorical, finite and directed toward federal priorities. CPHP programs respond creatively to address state priorities while continuing to meet federal grant objectives. This is particularly true in the areas of communicable disease prevention and immunization, which require a base level of infrastructure to operate effectively. For example, ACDP supports 24/7 on-call for communicable disease reporting from medical professionals and the public, along with outbreak investigations for diseases where the program does not have dedicated federal funding or sufficient general funding to support these core capacities.

Oregon Health Authority: Public Health Division

Center for Public Health Practice

CPHP General Fund is used to pay for staff, supplies and equipment necessary to coordinate and deliver services to people in Oregon. In addition, CPHP funds LPHAs to deliver the Vaccines for Children program, using a combination of General Fund and Medicaid matching funds.

The HST section budget is supported by state general funds, federal grants, and program income. Federal Health Resources Services Administration (HRSA) funds support medication access and adherence through Oregon's AIDS Drug Assistance Program (CAREAssist), with more than 80% of its budget coming from 340B Drug Pricing Program income. The program obligates the full amount of these restricted Other Funds carryover balance to pay for medical services and medications for persons living with HIV and for projects that expand and support Oregon's initiative to eliminate new HIV infections, End HIV Oregon, as allowed by HRSA.

HIV and TB Community Services provide HIV case management, housing support, and TB services. HST administers its HIV housing program using three federal Housing and Urban Development (HUD)-Housing Opportunities for Persons With AIDS (HOPWA) grants to support client rental and utility assistance. Oregon did not receive FY26 HOPWA Formula funding due to a federal formula change, resulting in a loss of funds impacting people living with HIV in 31 counties. To help offset this loss, HST partnered with Oregon Housing and Community Services to secure a one-time Long-term Rent Assistance allocation for FY 2025–2027 for seven eligible counties. HST also received a new HOPWA Special Projects of National Significance (SPNS) grant to support a three-year re-entry housing and care initiative for people with HIV who are exiting carceral settings.

The HIV/STI Prevention and Surveillance Program provides funds to local health departments for statewide HIV/STI prevention and care linkages, testing, condom distribution, lab services, contracts, outbreak response, and administration. Centers for Disease Control and Prevention (CDC) funding for HIV, STI, and TB programs has been

Oregon Health Authority: Public Health Division

Center for Public Health Practice

flat for more than a decade and is no longer keeping pace with growing needs. Future funding for these core public health services remains uncertain.

The ACDP section primarily relies on federal funding which comes from the CDC through the Emerging Infections Program (EIP), the Epidemiology and Laboratory Capacity (ELC), and Integrated Viral Hepatitis Surveillance Prevention grants. These grants, along with General Fund, support communicable disease monitoring, outbreak investigation, interventions and evaluation activities. The program maintains Orpheus, a statewide case reporting and outbreak information system, as well as ESSENCE, a statewide syndromic surveillance system that monitors all emergency department visits.

The OIP section promotes the health of all people in Oregon by investing in activities that ensure access to vaccine and immunization services for all. OIP supports LPHAs, public and private immunization providers, the Nine Federally Recognized Tribes of Oregon, schools, childcare facilities, higher education, community-based organizations, and coalitions to increase equity in access to care to meet Oregon's vaccination needs and to reduce the incidence of vaccine-preventable disease in Oregon.

OIP relies on state funding to support pass-through dollars to LPHAs; a contract for ALERT IIS; and staff and infrastructure support. Additional Federal Funds to support COVID-19 pandemic activities over the course of 2020-2025 ended on 6/30/2025 The CDC's Immunization Base Grant provides a majority of the annual operating funds for OIP to support staff, infrastructure and the purchasing of public vaccines (i.e., VFC and 317 Programs). State general funding qualifies for 1:1 Medicaid match, effectively doubling that amount. The program also benefits from a smaller bolus of federal preparedness funds (CDC, Public Health Emergency Preparedness CoAg). As with many other programs, the demands on OIP have increased since the pandemic without dedicated funding. As a result, the program is not sufficiently staffed to execute the scope of work with which it is tasked.

Oregon Health Authority: Public Health Division

Center for Public Health Practice

The OSPHL provides essential testing, regulates clinical labs, and accredits environmental labs. OSPHL's fee-supported programs include Newborn Bloodspot Screening, and Environmental Lab Accreditation with smaller fee programs for Health Screen Testing and Substance of Abuse screening. OSPHL also administers federally funded clinical lab regulation through the Clinical Laboratory Improvement Amendments of 1988. OSPHL conducts required testing for communicable diseases such as foodborne illnesses, respiratory infections, sexually transmitted infections, and emerging pathogens. OSPHL has a role in Public Health Preparedness and is a part of the Federal Select Agent Program which is jointly comprised of the Centers for Disease Control and Prevention/Division of Regulatory Science and Compliance and the Animal and Plant Health Inspection Service/Division of Agricultural Select Agents and Toxins. OSPHL maintains the capacity to identify [select](#) agents and toxins that pose a severe threat to human life. It serves as a hub for the Laboratory Response Network of sentinel laboratories across the state that can respond to biological or chemical threats and receives federal funding for preparedness work.

Communicable disease testing is funded through a mix of fees, state funds, and substantial federal support. OSPHL faces rising operating costs, strict facility and technology requirements, and significant administrative and workforce demands. Its fee and state revenues do not cover full expenses, and the lab has long relied on federal funding, which is now declining post-pandemic. These pressures make it challenging to sustain essential testing and preparedness services without future fee increases or cost reductions.

The CHS (Vital Records) section revenues include Other Funds (mostly fees for services) and some Federal Funds, in the form of deliverable-based contracts for timely and accurate birth and death data. Other Funds also include payments from state agencies that use vital records information. Fees from the sale of birth certificates comprise most of the fee revenue. The remaining revenue comes from sales of other types of certificates and extra fees for expedited processing and amendments. The Center for Health Statistics received CARES Act funding to develop and implement standard interoperability with the state's electronic death and birth system and the National Center for Health Statistics to provide more timely death and birth data. The Center for Health Statistics faces rising

Oregon Health Authority: Public Health Division

Center for Public Health Practice

operating and personnel costs, and current fee and government agency revenues are no longer sufficient to cover its full operating expenses. A fee increase, currently proposed through a Policy Option Package (POP), is needed to maintain current operations.

The HSPR section is primarily funded through two federal grants, the Public Health Emergency Preparedness and Hospital Preparedness Program cooperative agreements. These funds support state and local health department preparedness staff and activities, regional health care coalitions, and grants to partners for innovative community planning and response. Fifty percent of this funding is passed through to local, tribal and other partners.

HSPR received short-term grants which are ending and will end support for two statewide hospital and patient care support systems. The grant that funds national connectivity and expansion for Oregon's hospital capacity system tracking platform ends on July 31, 2027, and funding to support the Oregon Medical Coordination Center at OHSU already ended on June 30, 2026. Alternative funding has not been identified for these critical emergency response functions.

The Corporation for National and Community Service provides grant funding to support OHA's AmeriCorps VISTA Partnership Project, which places 20-30 AmeriCorps VISTA members for one year of national service to build capacity related to poverty and health in community organizations. HSPR also receives General Fund to support one position from Senate Bill 762 (2021) related to wildfires and one position from House Bill 3409 (2023) related to community disaster resilience hubs.

Oregon Health Authority: Oregon State Hospital

Executive Summary

Program Contact: Jim Diegel, Interim OSH Superintendent
503-945-2800

Executive Summary

Division overview

Oregon State Hospital (OSH) is an essential part of the statewide behavioral health system, providing the highest level of psychiatric care for adults from all 36 counties. The hospital's primary goal is to help people recover from their mental illness and return to life in the community, contributing to healthy and safe communities for all people in Oregon. Oregon State Hospital promotes public safety by treating people who are dangerous to themselves or others in a secure, therapeutic setting. The hospital works in partnership with various programs within the Oregon Health Authority (OHA) – behavioral health programs, the Psychiatric Security Review Board (PSRB), regional hospitals, community mental health programs (CMHP), advocacy groups and other community partners to ensure people with mental illness get the right care, at the right time, in the right place.

OSH operates two campuses with a total of 743 licensed beds, with 592 beds in Salem and 151 beds in Junction City. OSH services are provided 24 hours per day, seven days a week. Pendleton Cottage, Oregon's only state-operated secure residential treatment facility, is part of OSH and under the supervision of the superintendent of OSH. This is a 16-bed facility, located on the grounds of the former Eastern Oregon Training Center in Pendleton, Oregon. The secure mental health treatment program provides a community treatment setting for people who need a secure level of care as their first step out of the state hospital.

Oregon State Hospital (OSH) is an essential component of Oregon's statewide behavioral health continuum, providing hospital-level forensic psychiatric care for adults who require secure, 24-hour psychiatric treatment and supervision that cannot be safely or effectively provided in a community setting. OSH also operates Secure Residential Treatment Facility level units for patients who no longer require hospital-level care but continue to need a secure, structured setting as they prepare for transition. The hospital serves adults from across Oregon through legal pathways that include Aid and Assist, Guilty Except for Insanity, and Civil commitment. These pathways establish different legal obligations, timelines, service constraints, and discharge criteria within the overall OSH care model.

Executive Summary

OSH's success depends first on reliable internal operations that create a safe environment, provide consistent clinical and support services, and prepare patients for discharge as soon as they are clinically and legally ready. This requires a fixed operating base budget capable of supporting 24-hour nursing, psychiatric care, treatment planning, pharmacy, laboratory, food and nutritional services, security, facilities, and other hospital operations. It also requires the ability to respond to variable resource demands associated with patient acuity, enhanced supervision, length of stay, staffing backfill, and changes in population mix. Because admissions and many length-of-stay parameters are established through court orders and legal processes, and the availability of appropriate community placements, OSH must be able to respond to changes in demand that are not fully within the hospital's control.

The hospital's long-term success is also dependent on the system outside the hospital. OSH can stabilize patients, mitigate risk, provide legally required treatment and evaluation services, and develop discharge plans; however, sustained stability after discharge depends on the availability and coordination of courts, the Psychiatric Security Review Board, Community Mental Health Programs, community providers, secure residential and residential treatment capacity, housing and placement resources, regional hospitals, and OHA behavioral health partners. OSH's role is therefore both clinical and system-facing: to provide specialized forensic psychiatric care while supporting a reliable handoff to the next appropriate setting.

Funding request

The 2027-29 Agency Request budget for the Oregon State Hospital includes \$1.1 billion General Fund, \$51.2 million Other Funds, and \$32.6 million Federal Funds to support continuing operations and policy package requests, including capital improvement and XI-Q Bond-financed proposals. It includes position authority for 3,001 positions (3,000.04 FTE).

Executive Summary

Program description

Oregon State Hospital's role is to provide services and treatment to individuals that will prepare them for discharge when they no longer require hospital level of care. Services include 24-hour on-site nursing, psychiatric and other credentialed professional services, treatment planning, pharmacy, laboratory, food and nutritional services, and vocational and educational services. The hospital is accredited by the Joint Commission on the Accreditation of Health Organizations and all 24 hospital-licensed units (21 on the Salem Campus and 3 in Junction City) are certified by the Centers for Medicare & Medicaid Services (CMS). Services are provided by psychiatrists, nurses and mental health professionals. Upon discharge, people transition to the community with improved skills to better understand and manage their symptoms, fully participate and live in their local community in a variety of community-based settings, and when able, hold a job.

Services are delivered through Interdisciplinary Treatment Teams of which patients and designated family members are team members. Treatment teams collaborate with patients to develop individualized treatment care plans to identify and achieve short- and long-term goals. These goals address potential safety risks, mitigate illness and promote recovery. Treatment care plans indicate which treatments a patient needs such as individual therapy, treatment therapy groups, medications, activities of daily living (cooking, personal finance), community integration and vocational rehabilitation or paid work. Treatment teams also work with each patient to ensure their individual needs are met, including but not limited to, culture, language, religion, LGBTQ+ status, or disability. If the need cannot immediately be met within the hospital's existing resources, the team will find a contractor, such as an interpreter or faith practitioner, to deliver these services for the patient.

Personal Services costs make up the largest portion of the budget for the Oregon State Hospital. Salaries, taxes and benefits for staff comprise 89 percent of OSH's 2027-29 Agency Request Budget. Of the 3,001 positions currently budgeted for the Oregon State Hospital, approximately 73 percent are non-managerial, patient care staff such as nurses, psychiatrists, psychologists, therapists, etc. OSH follows the Oregon hospital staffing law requirements set forth in ORS 441.760–441.795, including provisions that apply to hospitals generally and those specific to psychiatric hospitals. The Hospital Nurse Staffing Committee, composed of nurse management and nursing direct

Oregon Health Authority: Oregon State Hospital

Executive Summary

care staff—Registered Nurses (RNs), including members represented by AFSCME-RN, and Licensed Practical Nurses (LPNs) represented by SEIU—adopts and implements the nurse staffing plan, while a multidisciplinary subcommittee, composed of other professional disciplines and patient facing staff from the psychiatric unit, develops and adopts the staffing plan for the psychiatric unit in accordance with regulatory requirements, workforce considerations, and patient care needs. The number of staff the hospital needs is based on a base minimum number plus an acuity adjustment, when necessary, based on the severity of symptoms, and direct care needs. Sufficient staffing is key to OSH's ability to provide adequate mental health care treatment and services to its patient population in the most effective and efficient manner possible. Timely delivery of effective treatment including patient progression through OSH levels of care and timely discharge are critical to the ability of OSH to comply with legal requirements.

The Mink Order of 2003 requires OSH to admit individuals under Aid and Assist orders within seven days of the signed judge's order. The December 2021 Interim Settlement Agreement with OHA, OSH, Metropolitan Public Defenders and Disability Rights Oregon consolidated two related cases and appointed a neutral expert in both matters, to make recommendations to address capacity issues at OSH. Dr. Pinals, the neutral expert, has submitted eleven reports to the Federal Court that include recommendations to address OSH capacity issues in support of the seven-day admission requirement for individuals under aid and assist orders. In a June 2025 filing, the Federal Courts changed the role of Dr. Pinals from neutral expert to court monitor to address the behavioral health continuum needs that support the right care, in the right time and the right place, to improve behavioral health service access to the people of Oregon while relieving the pressure of over-reliance on OSH. Remedies to be reviewed by the court monitor are to include a limit to community restoration timelines, an increase in OHA's authority to discharge patients, increase efficiency in discharging patients under GEI orders, establish sufficient forensic evaluator capacity to meet the demand, and review the necessary capacity for treatment within the state.

For budget purposes, OSH's care model is best understood as a hospital-level forensic psychiatric care model that also operates Secure Residential Treatment Facility level units and admits a limited number of Civil patients who meet expedited criteria. The model requires the fixed resources necessary to operate a secure, 24-hour psychiatric hospital and the variable resources required to meet the needs of a changing patient population. Variable resource

Executive Summary

needs are driven primarily by patient acuity, enhanced supervision, length of stay, staffing backfill, and population mix. Legal status, including Aid and Assist, Guilty Except for Insanity, and Civil commitment, defines important constraints, timelines, service scope, and milestones within a patient's pathway, but does not by itself determine the full cost or service intensity required, which is patient-specific and determined by clinicians.

Patients enter OSH through different legal pathways. Individuals under Aid and Assist orders receive competency restoration services intended to help them understand the criminal charges against them and assist in their own defense. This status creates specific legal requirements and constraints, including limits on length of stay and the scope of services OSH may provide. Individuals under Guilty Except for Insanity jurisdiction receive treatment, risk mitigation, and discharge planning in coordination with the Psychiatric Security Review Board. Individuals under Civil commitment receive hospital-level psychiatric care when they require 24-hour treatment and supervision that is not available through community programs. Across all pathways, OSH provides individualized treatment planning, psychiatric and nursing care, medication management, symptom stabilization, legal skills education where appropriate, treatment groups, activities of daily living support, cultural and spiritual supports, substance use education, vocational and educational services, and discharge planning.

Program justification and link to long-term outcomes

As the only public psychiatric hospital in Oregon, OSH is devoted to the diagnosis and treatment of people experiencing mental illness. Like any hospital, patients are admitted to OSH for an episode of care. Unlike other hospitals, OSH has most services a patient might need in one location with 24-hour, on-site psychiatric and nursing care in a secure and safe environment. This establishes OSH as a key contributor to OHA's 2030 goal of creating health equity and allowing all patients to achieve full health potential and well-being. The contribution and progress of OSH along this path are measured and monitored through OSH's key goals. OSH's key goals identify our core business, what we strive to do each day as we live our mission, vision and values.

Executive Summary

OSH's key goals are:

- Excelling in recovery-oriented care and treatment.
- Ensuring safety in all environments.
- Improving processes and performance.
- Recruiting and engaging outstanding staff.
- Employing resources effectively.

OSH is a specialized resource for patients whose clinical, legal, behavioral, or safety needs cannot be met in the community. Like other hospitals, OSH provides treatment for an episode of care, but the forensic and civil commitment pathways served by OSH create unique responsibilities. Patients may require competency restoration, complex psychiatric stabilization, risk mitigation, specialized assessment, medication management, treatment planning, and coordination with legal and community systems before they can safely transition. OSH's value is not only the treatment provided during hospitalization, but also the development of treatment, risk, and discharge plans that allow the next provider or placement to continue care successfully.

This model supports the hospital's strategic priorities: maintaining a safe environment and consistent operations; creating a predictable patient journey through the hospital; supporting a skilled and supported workforce; and strengthening effective governance and accountability structures. These priorities recognize that reliable hospital operations are necessary for patient progress. When units are consistently staffed, clinical services are delivered reliably, treatment expectations are clear, and discharge planning begins early, patients are more likely to move through the hospital in a timely and clinically appropriate way. Conversely, instability in staffing, operations, placement availability, or external system capacity can extend length of stay and increase resource needs even after a patient is clinically ready to leave OSH.

The hospital's Quality Strategy, known as the Quality Assurance and Performance Improvement plan, or QAPI, is a central engine for continuous improvement in quality and safe clinical care. The plan provides an iterative structure

Executive Summary

for refining priorities, establishing thresholds for measurement, identifying risks, and improving clinical processes over time. It does not replace the hospital's full performance management structure; rather, it focuses specifically on quality, safety, and clinical care improvement, and allows OSH to assess whether clinical processes are reliable, whether care is safe, whether risks are identified and addressed, and whether improvements are sustained.

The immediate outcome of successful treatment at OSH is timely discharge when a patient is clinically and legally ready to transition. The long-term outcome depends on continuity with the behavioral health, legal, residential, and community placement systems. Patients must be able to maintain the stability achieved at OSH in the next appropriate setting. OSH's success is therefore measured by its ability to provide safe and effective hospital-level care, prepare patients for transition, and complete reliable handoffs. The broader continuum succeeds when patients maintain stability outside OSH custody and do not require avoidable return to the hospital.

Program performance

OSH uses Lean methodology as the primary foundation for continuous improvement and organizational performance. Through Lean, OSH has a robust system to align and link all the services it provides with organizational goals and desired outcomes.

The hospital's organizing principles provide the strategic framework for improving performance across the hospital. These principles focus on the conditions necessary for reliable care delivery: a safe environment and consistent operations; a predictable patient journey through the hospital; a skilled and supported workforce; and effective governance and accountability structures. These priorities connect the hospital's operating model to the outcomes expected of a state forensic psychiatric hospital. A safe and consistent environment supports stabilization. A predictable patient journey supports timely treatment, evaluation, discharge planning, and transition. A skilled and

Oregon Health Authority: Oregon State Hospital

Executive Summary

supported workforce supports quality care and reduces operational instability. Effective governance and accountability structures support decision-making, risk identification, and sustained improvement.

QAPI supports program performance by creating an iterative process for improving quality and safe clinical care. As OSH refines its QAPI priorities and thresholds for measurement, the hospital will be able to better identify where clinical processes are performing as intended and where improvement is needed. This includes the ability to assess whether treatment and safety practices are reliable, whether clinical risks are being identified and mitigated, whether quality concerns are addressed through structured improvement work, and whether changes are sustained over time. Performance under this model is not limited to counting services delivered; it is focused on whether OSH's care model is operating safely, consistently, and effectively enough to support patient stabilization and timely transition.

Enabling legislation/program authorization

Funding streams

Oregon State Hospital funding at the time of Agency Request Budget, and excluding Capital Improvements, consists of 95% General Funds, or \$1.1 billion. OSH generates Other Funds revenue through billing of services to Medicare for eligible patients that comprise 2% of the total budget, or \$21.1 million. This Other Funds amount also includes policy package requests for XI-Q Bond financing. Medicaid funds make up the remaining 3% of the OSH budget at \$32.6 million.

Significant proposed program changes from 2025-27

OSH is a critical component of the behavioral health system in Oregon and strives to meet the needs of each patient while remaining nimble and responsive to the demands for beds and services across the patient populations. OSH

Executive Summary

internally reconfigures services to meet the demand for hospital level of care services across the continuum realizing the interplay of service needs across our continuum partners.

Within the OSH 2027-29 Agency Request Budget are three policy packages to ensure the hospital can continue to evolve and adapt to the needs of the people placed within the hospital to receive care. This includes a Policy Option Package (POP) to begin the process of replacing the Electronic Health Record, which was identified as a high-priority safety initiative by the January 2026 Joint Technology Council and will eventually result in a system that provides greater functionality and interoperability with the hospital's healthcare partners. A second POP introduced demonstrates compliance with ORS 291.215 by bringing forward the Capital Improvement and Deferred Maintenance projects necessary to address current needs and develop more robust planning for future state. And a third POP to address the evolving clinical programming changes and facility/infrastructure modernization needs. Portions of the last two policy packages are requesting XI-Q Bond financing represented within the Other Funds funding stream as mentioned in the prior section.

Peter Courtney Salem Campus of the Oregon State Hospital detail:

- Capacity: 24 units (592 beds)
- Operating: 24 units (558 beds)
- Population served: aid and assist, guilty except for insanity (GEI), neuropsychiatric (high medical need), and civil commitment (includes voluntary commitments by guardian).
- Census: 553.3 (Daily average population for 2025)
- Square feet: 1.3 million

The Peter Courtney Salem Campus of the Oregon State Hospital

Background information

Populations served

Oregon State Hospital serves adults who need intensive psychiatric treatment for severe and persistent mental illness. With 24-hour on-site nursing and psychiatric care, the hospital helps patients gain the skills they need to successfully transition back to the community.

The Peter Courtney Salem Campus of the Oregon State Hospital serves individuals under three different commitment types:

- **Aid & Assist** – People who come to Oregon State Hospital through a court order under Oregon law (ORS 161.370) for treatment that will help them understand the criminal charges against them and to assist in their own defense.
- **Guilty Except for Insanity (GEI)** – People who come to Oregon State Hospital who have successfully pleaded Guilty Except for Insanity (GEI) for crimes related to their mental illness. These patients are under the jurisdiction of the Psychiatric Security Review Board.
- **Civil Commitment (Civil)** – People who come to Oregon State Hospital through a civil commitment require 24-hour care that is not available through community programs. These patients have been found by the court to be a danger to themselves or others, or unable to provide for their own basic needs – such as health and safety – because of a mental disorder.

Levels of care and patient pathways

OSH's treatment model is organized around levels of care and patient pathways. Patients receive services based on clinical need, legal status, acuity, risk, and discharge readiness. This approach supports a predictable patient

The Peter Courtney Salem Campus of the Oregon State Hospital

journey through the hospital while allowing resources to be matched to the level of treatment, supervision, and transition support each patient requires.

Levels of Care

Hospital-level forensic psychiatric care

Most patient units at OSH are hospital-level forensic psychiatric care. This level of care is provided to patients who require secure, 24-hour psychiatric treatment and supervision that cannot be safely or effectively provided in a community setting. Patients may require this level of care because of acute psychiatric symptoms, treatment resistance, complex co-occurring conditions, behavioral risk, medical or neuropsychiatric complexity, legal restoration needs, or unresolved barriers to safe transition. Services include psychiatric assessment and treatment, nursing care, medication management, symptom stabilization, individualized treatment planning, risk assessment and mitigation, treatment groups, skills development, and discharge planning.

Patients participate in individualized treatment care planning with interdisciplinary teams. Treatment may include symptom management, medication education and management, anger management, coping skills, substance use education, physical wellness activities, activities of daily living, vocational and educational services, cultural and spiritual supports, and other individualized services. For patients whose legal pathway requires competency restoration, treatment may also include psychoeducational groups focused on legal skills, access to law library resources, legal assistance, and periodic forensic evaluation.

Secure Residential Treatment Facility level care

OSH also operates Secure Residential Treatment Facility level units for patients who no longer require hospital-level care but continue to need a secure and structured treatment setting. This level of care supports patients who are preparing for transition to a less restrictive community placement but still require supervision,

The Peter Courtney Salem Campus of the Oregon State Hospital

treatment structure, and coordinated discharge planning. Services emphasize stability, independence, daily living skills, treatment engagement, community integration, and preparation for discharge.

Secure Residential Treatment Facility level care is an important part of the OSH care model because it creates step-down capacity within a secure setting. It allows patients to continue progressing after hospital-level needs have decreased, while supporting the development of skills and supports necessary for successful transition. This level of care also helps align resources with need by reserving hospital-level capacity for patients who continue to require more intensive treatment and supervision.

Patient Pathways

Aid and Assist pathway

Individuals under Aid and Assist orders are admitted to OSH through a court order for services related to competency restoration. The purpose of this pathway is to provide treatment and education that help the individual understand the criminal charges against them and assist in their own defense. Aid and Assist status creates specific legal constraints, including constraints on length of stay and scope of services. These constraints affect treatment planning, discharge planning and the resources available to address broader long-term behavioral health needs.

Patients in the Aid and Assist pathway may receive psychiatric stabilization, medication management, symptom education, legal skills education, treatment groups, and individualized treatment planning. Treatment teams also assess whether the patient continues to require hospital-level care for competency restoration. When appropriate, OSH coordinates with the committing court, Community Mental Health Program, county partners, and forensic evaluators regarding restoration status, hospital-level care needs, and transition planning.

The Peter Courtney Salem Campus of the Oregon State Hospital

Guilty Except for Insanity pathway

Individuals under Guilty Except for Insanity jurisdiction receive forensic psychiatric treatment, risk assessment, and discharge planning in coordination with the Psychiatric Security Review Board (PSRB). Services focus on psychiatric stabilization, risk mitigation, treatment engagement, development of safe behavior, medication management, coping skills, substance use education, and preparation for conditional release or transition to the next appropriate setting when clinically and legally appropriate.

The GEI pathway requires coordination between OSH, the PSRB, community providers, secure residential and residential treatment providers, and other system partners. Patient progress depends on clinical stabilization and risk reduction, as well as the availability of appropriate placements and community supports. OSH's role is to provide treatment and risk mitigation planning that supports transition at the earliest clinically and legally appropriate point.

Civil commitment (Civil) pathway

Individuals under Civil commitment receive hospital-level psychiatric care when they require 24-hour treatment and supervision that is not available through community programs. Patients may be admitted because they present a danger to themselves or others, or because they are unable to meet basic health and safety needs due to a mental disorder. Services focus on stabilization, treatment engagement, medication management, symptom management, activities of daily living, individualized care planning, and discharge preparation.

The Civil pathway often requires close coordination with guardians, Community Mental Health Programs, hospitals, residential providers, and community treatment partners. Discharge readiness depends on clinical stabilization and the availability of an appropriate setting that can maintain the patient's stability after discharge. OSH's role is to provide the hospital-level care necessary to stabilize the patient and prepare for transition; sustained success depends on the receiving system's ability to continue treatment and support.

The Peter Courtney Salem Campus of the Oregon State Hospital

Discharge planning and community transition

Discharge planning is a core function across all OSH pathways. The goal is to discharge patients as soon as they are clinically and legally ready to transition to the next appropriate setting. Effective discharge planning begins during hospitalization and requires coordination among treatment teams, courts, PSRB, Community Mental Health Programs, counties, guardians, residential providers, secure residential providers, hospitals, housing resources, and OHA behavioral health partners.

The hospital's responsibility is to stabilize patients, mitigate risk, identify ongoing treatment needs, and provide a reliable handoff to the next provider or placement. The broader system's responsibility is to maintain that stability after discharge. When community capacity, placement availability, legal processes, or other external dependencies are not aligned, patients may remain at OSH longer than clinically necessary or may be at higher risk of returning to OSH custody. The base budget must therefore support both the internal operations necessary to prepare people for discharge and the coordination work required to transition them safely.

Increased Aid and Assist population

The number of people sent to OSH to be restored to competency along the Aid and Assist pathway has grown substantially since 2012, stabilizing in 2024 as the largest portion of OSH's patient population. The increase in Aid and Assist patients has increased the overall acuteness of patients under OSH's care and has required OSH to alter the hospital units and program structure to serve people under Aid and Assist orders that are waiting in jail to receive psychiatric care and competency restoration services.

The hospital now receives, on average, just under 100 Aid and Assist orders per month with court defined timelines for admissions and discharges within as few as 90 days. The orders are accompanied with daily fines per person for those patients that are designated to be admitted to the hospital if the wait time is greater than seven days from the time of the order. The OSH mission is to treat the most acute of these individuals, who often require an initial stabilization period for effective treatment to begin, the compressed timeline can require greater treatment intensity to meet the needs of the patient within the available time.

Oregon Health Authority: Oregon State Hospital

The Peter Courtney Salem Campus of the Oregon State Hospital

Key to addressing the overall quantity of Aid and Assist orders within Oregon is developing a robust array of community services, including crisis interventions – such as mobile crisis teams and assertive community teams – that enable law enforcement and other community partners to connect people with mental health services, rather than arrest them. Additionally, community capacity for competency restoration must expand via diversion pre-hospitalization and post-hospitalization for those who do not require hospital level of care. The Oregon Health Authority (OHA) is working with community partners to strengthen and expand these services.

Oregon Health Authority: Oregon State Hospital

The Peter Courtney Salem Campus of the Oregon State Hospital

OSH Staffing Committees and Staffing Plans

The Nurse Staffing Committee is comprised of nurse management, Registered Nurses and Licensed Practical Nurses as required by Oregon Revised Statute 441.760 - 441.795. This committee is responsible for adopting the nurse staffing plan and reviewing it annually.

The Multidisciplinary Subcommittee is established as a subcommittee of the Hospital Nurse Staffing Committee and is composed of staff from the psychiatric unit, as required by ORS 441.767(2) of the Oregon hospital staffing law (ORS 441.760–441.795). The areas governed by this committee are ultimately determined by hospital leadership and include areas that directly support patient care including Clinical and Treatment staff, Medical and Psychiatric Providers and Operations staff. The subcommittee is structured to include management and staff representatives. This subcommittee is responsible for adopting the multidisciplinary staffing plan and reviewing the plan annually.

OSH's current staffing plans were updated in June 2024. In addition to meeting the requirements of the law regarding the length of shifts, lunch-break coverage, mandatory overtime, etc., the staffing plans also ensure the hospital meets the standards needed to maintain Centers for Medicare & Medicaid Services (CMS) certification. As of July 2026, the OSH Nurse Staffing Committee and the Multidisciplinary Subcommittee are actively working on adopting new, revised staffing plans that OSH will need to implement. Analysis to determine the staffing and financial impact of these modified staffing plans are currently being performed.

Nurse Staffing Challenges

Adequate nurse staffing is fundamental for effective treatment and patient and staff safety at OSH. On average over the last year, from July 2025 to June 2026, about 26.2 percent of the OSH direct-care staff (registered nurses, licensed practical nurses, and mental health technicians) are absent each day. OSH has continued to experience an

The Peter Courtney Salem Campus of the Oregon State Hospital

increase in its rate of staff absences since the pandemic. This number includes planned absences such as vacation or personal business.

OSH must adequately meet the minimum staffing requirements of the staffing plan, historically OSH has been required to heavily rely on voluntary overtime and mandated overtime to meet these requirements. This heavy reliance on overtime has historically led to Secretary of State Audit findings and unmet standards with The Joint Commissions (TJC). To meet the staffing plan's minimum staffing requirements, the hospital must retain a true posting factor for non-delivered staff. Currently, the hospital utilizes a system of voluntary overtime opportunities for employees to cover for other staff absences. If not enough people volunteer, the hospital must mandate staff to work overtime. However, even with overtime shifts and nursing agency contracted staffing, the hospital's staffing needs are not always met.

In addition to back-filling unplanned absences, OSH nursing staffing requirements are affected by:

- Acuity – The hospital needs a greater number of staff to maintain a safe environment for a patient-centric and effective treatment to occur due to the severity of illness in the patient population.
- Enhanced supervision – The hospital needs additional staff to carry out physician-ordered patient enhanced supervision, which is when staff are specifically assigned to monitor and engage an individual patient who the physician has assessed as having a medical risk or behavioral risk (risk of harming themselves or others.)

The prevalence of unplanned staff absences and physician-ordered patient enhanced supervisions continues to drive staffing needs well beyond the resources within OSH's budget and the minimum staffing requirements of the Nurse Staffing Committee's staffing plan. Historically and currently, OSH has relied on overtime as the primary means to meet staffing needs when direct-care staff are absent and to staff patient acuity/precaution needs. Over the past 11 months, Nursing at OSH has averaged 25,010 hours and \$1,685,655 in monthly employee overtime to fill planned and unplanned direct-care staff vacancies, in addition to an increased reliance on contract agency staffing.

The reliance on overtime to meet staffing needs is not sustainable in the long run.

The Peter Courtney Salem Campus of the Oregon State Hospital

Revenue sources and changes

The Oregon State Hospital receives 95 percent of its funding from the state General Fund. Other Funds revenues consisting of service revenues generated through the billing of Medicare and third-party insurance and local revenue from the hospital café, coffee shop, and patient made wood products sales account for 2 percent of the budget. Finally, Federal Funds from Medicaid and Disproportionate Share Hospital (DSH) payments make up the remaining 3 percent.

One of the financial impacts of a shifting population at Oregon State Hospital is lower numbers of billable days for patients with Medicare coverage due to shorter length of stays. This has reduced the collection of Medicare revenue necessitating fund shift adjustments that occurred most notably in 2021-23. DSH payments have also declined due to adjustments in the FMAP rate.

The Peter Courtney Salem Campus of the Oregon State Hospital is impacted by two policy package requests.

1. POP #417: OSH Electronic Health Record Modernization is to replace the Electronic Health Record (EHR) used at the hospital. This need was identified in the January 2026 Joint Technology Council update as a high-priority safety initiative. The policy package funds the analysis and planning for a new EHR focused on patient safety in a psychiatric hospital setting addressing patient safety and quality outcomes at OSH while integrating whole system improvements, enhancing health equity, and improving coordination of care standards.
2. POP #416: OSH Capital Improvement and Deferred Maintenance is to provide the support OSH needs to ensure business continuity with investments to reduce long-term escalation in needed capital outlay as building systems are added to the deferred maintenance backlog, and the need to modernize outdated building systems, infrastructure, and related equipment. It is legislatively required, per ORS 291.215. While most of this package is XI-Q bond financed and is present within the Capital Construction Narrative, the components that are deferred maintenance and the requested position support will reside within the Salem budget.

Percent Change	47%	0%	-42%	6%	0%	0%

Activities, programs and issues in the program unit base budget

Pendleton Cottage (PC) is a state-operated secure residential treatment facility in Pendleton, Oregon. The facility has capacity to serve up to 16 patients and provides 24-hour mental health treatment services for adults in a secure residential setting. In the 2025-27 biennium, Pendleton Cottage averaged a 98 percent occupancy rate, with an average daily population of 15.7.

Consistent with the Oregon Health Authority's strategic priority to transform the behavioral health system and improve access to coordinated, person-centered services, Pendleton Cottage supports individuals in their recovery by focusing on positive life experiences, self-confidence, skill development and community integration. Pendleton Cottage often serves as an important step for patients transitioning from the state hospital to life in the community. As Oregon continues to strengthen the behavioral health continuum of care, Pendleton Cottage remains a necessary step on the path to recovery for individuals who would otherwise not have any options.

Pendleton Cottage

Background information

People served

Pendleton Cottage serves people who are under the jurisdiction of the Psychiatric Security Review Board (PSRB). Residents no longer require hospital level of care and still need 24-hour care and a higher level of supervision due to the status of their mental illness, safety and security concerns, and/or the severity of their offense.

Pendleton Cottage also accepts placement of individuals who are under competency restoration (.370) and individuals who are guardian committed when there are no PSRB individuals on our waitlist.

Treatment philosophy

Pendleton Cottage uses a recovery model for person-centered treatment planning. Under this model, residents are actively involved in directing their own treatment. Residents and their treatment teams work together to develop an integrated service and support plan that incorporates the resident's residential service plan, treatment care plan, and self-stated dreams, desires and goals.

Residents under the jurisdiction of the PSRB must also meet the expectations outlined in their conditional release plans. To align with Pendleton Cottage's self-directed treatment approach, residents are encouraged to identify how they will meet their conditional release requirements and are offered opportunities for choice whenever appropriate.

Pendleton Cottage services

Pendleton Cottage provides a range of residential treatment and support services, including:

- On-site and telemedicine psychiatric services (primarily telemedicine)
- Individual therapy
- Vocational services including on-site paid employment opportunities
- Recreational services, both on- and off-site
- In-house case management

Oregon Health Authority: Oregon State Hospital

Pendleton Cottage

- Medication administration, monitoring and teaching
- Some nursing services for individuals who have significant medical needs, such as diabetes, chronic obstructive pulmonary disease, or physical disabilities. (PC does not have 24-hour or 7/day a week nursing coverage)

Facility

Opened in 2009, Pendleton Cottage consists of two separate houses, allowing the facility to serve people of different genders in different spaces. The property also includes a greenhouse and park area for residents to use.

In October 2016, Pendleton Cottage opened the Lane Activity Center, a treatment space where residents participate in leisure, skill-building and therapeutic group activities. The center strengthens the facility's ability to provide active treatment and helps residents develop the skills needed to successfully transition to a lower level of care.

Staffing

To meet the residents' complex behavioral and medical needs, the Agency Request Budget maintains current Pendleton Cottage staffing of 45 budgeted positions. The average staffing ratio is three staff to eight patients, with at least three direct-care staff on every shift. Staff provide:

- Resident supervision
- Therapeutic interventions
- Medical assistance
- Clinical work
- Case management
- Liaison to Psychiatric Security Review Board, including monthly progress reports

Pendleton Cottage

- Liaison with county mental health staff to complete competency reports for courts located throughout Oregon. (County providers complete assessments, PC staff facilitate)

Revenue sources and changes

Revenue sources for Pendleton Cottage in the 2027-29 Agency Request Budget include 74.5% percent General Fund. Other Funds revenues consisting primarily of private payment Room and Board, with additional revenues for service reimbursement and meal tickets, account for 1.4% percent of the budget. Federal Funds revenue makes up the remaining 24.1% percent and consist of the federal match of Medicaid claim billing. Like all other State Residential Treatment Facilities, Pendleton Cottage saw a reduction in federal funding within the 2025-27 biennium.

There are no policy packages that are requested to be placed in the Pendleton budget. However, there are projects within POP #416: OSH Capital Improvement and Deferred Maintenance policy package that would be performed that are discussed within the Capital Construction narrative.

- Census – 140.7 (Daily average population for 2025)
- Square Feet – 227,000

Background information

Populations Served

Oregon State Hospital serves adults who need intensive, psychiatric treatment for severe and persistent mental illness. With 24-hour, on-site nursing and psychiatric care, the hospital helps patients gain the skills they need to successfully transition back to the community.

Oregon Health Authority: Oregon State Hospital

Junction City Campus

There are two types of commitment served at the Junction City campus:

- **Civil** – People who come to Oregon State Hospital through a civil commitment require 24-hour care that is not available through community programs. They have been found by the court to be a danger to themselves or others, or unable to provide for their own basic needs – such as health and safety – because of a mental disorder. A subset of this population is called *Voluntary by Guardian*. Working through the court system, legal guardians may commit their wards who meet civil commitment criteria to the hospital.
- **Guilty Except for Insanity (GEI)** – Oregon State Hospital serves patients who have successfully pleaded Guilty Except for Insanity (GEI) for crimes related to their mental illness. These patients are under the jurisdiction of the Psychiatric Security Review Board.

Levels of care and patient pathways

OSH's treatment model is organized around levels of care and patient pathways. Patients receive services based on clinical need, legal status, acuity, risk, and discharge readiness. This approach supports a predictable patient journey through the hospital while allowing resources to be matched to the level of treatment, supervision, and transition support each patient requires.

Levels of Care

Hospital-level forensic psychiatric care

Most patient units at OSH are hospital-level forensic psychiatric care. This level of care is provided to patients who require secure, 24-hour psychiatric treatment and supervision that cannot be safely or effectively provided in a community setting. Patients may require this level of care because of acute psychiatric symptoms, treatment resistance, complex co-occurring conditions, behavioral risk, medical or neuropsychiatric complexity, legal restoration needs, or unresolved barriers to safe transition. Services include psychiatric assessment and treatment, nursing care, medication management, symptom stabilization, individualized

Junction City Campus

treatment planning, risk assessment and mitigation, treatment groups, skills development, and discharge planning.

Patients participate in individualized treatment care planning with interdisciplinary teams. Treatment may include symptom management, medication education and management, anger management, coping skills, substance use education, physical wellness activities, activities of daily living, vocational and educational services, cultural and spiritual supports, and other individualized services.

Secure Residential Treatment Facility level care

OSH also operates Secure Residential Treatment Facility level units for patients who no longer require hospital-level care but continue to need a secure and structured treatment setting. This level of care supports patients who are preparing for transition to a less restrictive community placement but still require supervision, treatment structure, and coordinated discharge planning. Services emphasize stability, independence, daily living skills, treatment engagement, community integration, and preparation for discharge.

Secure Residential Treatment Facility level care is an important part of the OSH care model because it creates step-down capacity within a secure setting. It allows patients to continue progressing after hospital-level needs have decreased, while supporting the development of skills and supports necessary for successful transition. This level of care also helps align resources with need by reserving hospital-level capacity for patients who continue to require more intensive treatment and supervision.

Patient Pathways

Civil commitment pathway

Individuals under Civil commitment receive hospital-level psychiatric care when they require 24-hour treatment and supervision that is not available through community programs. Patients may be admitted because they

Junction City Campus

present a danger to themselves or others, or because they are unable to meet basic health and safety needs due to a mental disorder. Services focus on stabilization, treatment engagement, medication management, symptom management, activities of daily living, individualized care planning, and discharge preparation.

The Civil pathway often requires close coordination with guardians, Community Mental Health Programs, hospitals, residential providers, and community treatment partners. Discharge readiness depends on clinical stabilization and the availability of an appropriate setting that can maintain the patient's stability after discharge. OSH's role is to provide the hospital-level care necessary to stabilize the patient and prepare for transition; sustained success depends on the receiving system's ability to continue treatment and support.

Guilty Except for Insanity pathway

Individuals under Guilty Except for Insanity (GEI) jurisdiction receive forensic psychiatric treatment, risk assessment, and discharge planning in coordination with the Psychiatric Security Review Board. Services focus on psychiatric stabilization, risk mitigation, treatment engagement, development of safe behavior, medication management, coping skills, substance use education, and preparation for conditional release or transition to the next appropriate setting when clinically and legally appropriate.

The GEI pathway requires coordination between OSH, the PSRB, community providers, secure residential and residential treatment providers, and other system partners. Patient progress depends on clinical stabilization and risk reduction, as well as the availability of appropriate placements and community supports. OSH's role is to provide treatment and risk mitigation planning that supports transition at the earliest clinically and legally appropriate point.

Junction City Treatment

The Junction City campus has a single treatment program which provides varied group therapy offerings in the treatment mall according to the individual pathway of the patient and combines both the Hospital-level forensic

Oregon Health Authority: Oregon State Hospital

Junction City Campus

psychiatric care and Secure Residential Treatment Facility level care into a single program. The program's intent is to help patients achieve their highest level of health, safety and independence as they prepare for discharge or conditional release to a less-restrictive community setting. Individuals work on living skills through daily treatment mall activities, classes and approved outings. Patients also participate in discharge planning with their treatment team.

Although the campus admits people from all 36 counties, an emphasis is put on serving seven southern counties – Lane, Curry, Klamath, Douglas, Jackson, Coos and Lake.

Nurse Staffing

The Junction City campus staffing continues to present complexities. This campus does not have an adequate posting factor and struggles to reach staffing levels approved by their Nurse Staffing Committee. Junction City Nursing experienced average monthly overtime utilization of approximately 2,718 hours and \$166,138 per month between the months of January to May 2026. The absence rate for the same 2026 period was 22.63%, which includes both planned and unplanned leave.

Revenue sources and changes

The Agency Request Budget for Junction City campus of the Oregon State Hospital is almost exclusively funded by General Fund. Other Funds revenues from service revenues generated through the billing of Medicare and third-party insurance as well as local revenues derived from the hospital café and coffee shop contribute slightly (less than 1%) to the budget profile. The Junction City campus receives no Federal Funds revenue.

There are no policy packages directly requested within the Junction City budget, although there are several XI-Q Bond-financed requests that will impact the campus within the Capital Construction Narrative.

Activities, programs and issues in the program unit base budget

The Oregon State Hospital's Agency Request Budget includes multiple capital construction projects for the 2027-2029 biennium. These projects are combined into two Policy Option Packages (POP) and consist of XI-Q bond financed investments in hospital infrastructure, equipment and overall facility planning and assessments.

The complete Oregon State Hospital facilities portfolio totals \$885M. The Peter Courtney Salem Campus of the Oregon State Hospital consists of 1.2M sq. ft. of buildings and interior secure perimeter courtyards, and 23 cottages with a Current Replacement Value (CRV) as reported to the Capital Projects Advisory Board (CPAB) of \$713M. This makes the Oregon State Hospital amongst the highest replacement value of any single facility owned by the state. The Junction City campus is 226 thousand sq. ft. with a CRV of \$163M. The Pendleton Cottages facility consists of several older buildings with a total of 39 thousand sq. ft. and a CRV of \$9M. OSH is at a crossroads where its facilities have reached an age where a robust long-term investment strategy is needed to ensure that it can

Oregon Health Authority: Capital Budgeting

Oregon State Hospital Capital Projects

effectively meet OHA's strategic plan to support all Oregonians in need of mental health treatment. The 2027-29 POPs provide the initial support OSH needs to ensure business continuity, and to reduce long term escalation in capital outlay as building systems are added to the deferred maintenance backlog.

Project Costs and purpose

The costs described below are for the 2027-29 biennium. Project funding includes investments that directly support the Oregon State Hospital facility infrastructure needs. The objective is to ensure that all Oregon State Hospital facilities meet programmatic needs, promote a safe and healthy workplace, are functional and nimble to accommodate program changes, and resilient during emergency declarations (e.g., climate change, wildfires, power outages, etc.). OSH has a considerable volume of equipment at or near the end of useful lifecycle, this equipment must be replaced. This equipment supports critical 24/7 care to patients needing intensive psychiatric treatment for severe, acute, and persistent mental illness.

The two POPs contain a total of \$29.65M in XI-Q bond-financed Other Funds projects and related costs of issuance, as well as \$5.55M in General Fund Debt Services.

To be bond eligible and within the Capital Construction structure, these projects are all considered capital outlay, which has two different categories that depend upon total cost of the project. The first, capital improvement projects, are smaller projects with total costs under \$1 million, including any future phases. These projects must create or sufficiently revitalize an asset enough that it is considered new, such as building a facility or acquiring land, or improving an existing asset in a way that increases its value, extends its useful life, or allows it to be used for a different purpose. The second, major construction or acquisition projects, are larger efforts with total costs of \$1 million or more, for all phases of work. These projects involve building, acquiring, replacing, or significantly changing the use or function of a facility or group of facilities. They typically occur in two phases, beginning with planning and design, followed by construction.

Oregon Health Authority: Capital Budgeting

Oregon State Hospital Capital Projects

OSH strives to achieve the highest standards and outcomes in all aspects of our work. Good stewardship of the public dollar includes maintaining the facility to the highest standards and making regulatory and infrastructure improvements to meet the needs of patients and staff. All of the identified infrastructure needs and are critical to providing patient care and ensuring the health and safety of patients, staff, and the public.

Revenue sources and changes

These two POPs request \$29.65M Other Funds in the form of XI-Q bonds and represent a total fund request of \$35.2M for the 2027-29 biennium. The elements of the POPs that are not bond financed are outside of this Capital Construction budget structure and include General Fund in the amount of \$5.55M which consists of 2027-29 Debt Services. Included within the bond-financing are three limited duration support positions to provide the hospital with ongoing support for timely completion of projects of this magnitude and complexity as well as providing vendor escorts within the hospital secure perimeter while work is performed.

Agency Request Budget

Oregon Health Authority: Medicaid Division

Executive Summary

Program Contact: Emma Sandoe, PhD, Medicaid Director
503-302-5396
Vivian Levy, Interim Medicaid Director (ongoing, Deputy Medicaid Director)
503- 400-1976

Note: The Medicaid Division was not separated from the overall Health Systems Division Budget until the 2025-27 biennium, so no data prior to that period is represented in the above graph.

Executive Summary

Division overview

The Medicaid Division manages the comprehensive lifecycle of publicly funded Medicaid programs and related health assistance programs which comprise the Oregon Health Plan (OHP), including design, development, implementation, monitoring, evaluation, and improvement of OHP. The Division oversees operational, policy and program activities on the Medicaid State Plan, 1115 waiver authorities, and the 1915(i) Home and Community-Based Services. This Division serves as the federally recognized Medicaid authority and provides administrative oversight for all Medicaid-funded programs, including those under the Oregon Department of Human Services (ODHS), including Long-Term Services and Supports and services for individuals with intellectual and developmental disabilities. The Division also administers and oversees a number of state-funded health coverage programs that have been established by the legislature, including Healthier Oregon and the Veteran Dental program.

The Division defines and manages the Oregon Administrative Rules that govern OHP-covered health care services, eligible fee for service health care providers and participating managed care plans, including Coordinated Care Organizations (CCOs), to ensure programs and services are delivered effectively, equitably, and in compliance with state and federal regulations.

By administering these programs, the Medicaid Division supports OHA's goals of strengthening access to affordable care for all, fostering healthy families and environments, transforming behavioral health, achieving healthy Tribal communities, and building OHA's capacity to eliminate health inequities by 2030.

Executive Summary

Funding request

OHA's Agency Request Budget of \$30,862.4 million Total Funds continues funding for Medicaid programs for the 2027-29 biennium, providing health care services for over 1.4 million OHP members.

Due to passage of H.R. 1 (119th Congress, 2025), the federal government will require changes to OHP, phasing in from late 2026 through 2028. These changes require more frequent eligibility renewals for many OHP members, end eligibility for full Medicaid coverage for certain non-citizens, impose new work or activity rules, reduce the retroactive coverage period for new members, and institute copayments for some adults on certain services beginning in October 2028. Members who have OHP through Healthier Oregon from coordinated care organizations (CCOs) will move to Open Card Fee for Service (FFS) in January 2027.

H.R. 1 also requires revenue policy changes that will affect financing of the Medicaid program, including a phase down from 6 percent to 3.5 percent on current provider assessments, no new provider assessments, and a phase down of State Directed Payments (SDPs) to 100 percent of published Medicare payment rates. Estimates as of July 7, 2026, for the 2027-29 biennium indicate a \$421 million gap created by H.R. 1. This is the estimated amount of funds needed to continue the current OHP Program. Implementation of H.R. 1 requirements will result in significant reductions in services and increases to administrative costs, including for information technology costs.

As OHA implements new federal requirements, OHA Medicaid proposes the following policy packages to support its continued commitment to eliminate health inequities, mitigate harm and stabilize core tenants of the Medicaid program.

POP #401 1115 SUD Waiver Contingency Management Svcs: This policy package would fund implementation of Contingency Management (CM) as a new covered service under Oregon's Substance Use Disorder (SUD) 1115

Oregon Health Authority: Medicaid Division

Executive Summary

Waiver, including the infrastructure necessary to support statewide implementation and federal compliance.

Contingency Management is an evidence-based intervention that improves treatment engagement and retention, which contributes to improved recovery outcomes.

OHA Medicaid's latest SUD 1115 Waiver submission includes the request to implement CM; without this investment, OHA would be unable to implement the CM authority if approved by the Centers for Medicare & Medicaid Services (CMS), limiting access to this intervention for Oregon Health Plan (OHP) members with SUD.

POP #404 Coordinated Care Contract Procurement: This request will provide staffing for project management and community engagement to support the next CCO contract procurement process. It will also provide contracted services for procurement-specific actuarial work for rate methodology reviews and rate development, as well as contracted interpretation and translation services. The CCO contract procurement process is a federally required process that begins in 2027.

Without this policy package, funding will not be available during the procurement process to create opportunities and resources for members, providers, health care professionals, and communities to provide input on how the CCO model is performing and identify areas in need of improvement. Without a unified process OHA cannot assess how issue-specific program changes affect the system overall or whether those changes have unintentionally left some regions or populations behind by creating uneven access, alignment or support across the state.

POP #403 Behavior Rehabilitation Services: This request will provide staffing for project management and community engagement to support the next CCO contract procurement process. It will also provide contracted services for procurement-specific actuarial work for rate methodology reviews and rate development, as well as contracted interpretation and translation services. The CCO contract procurement process is a federally required process that begins in 2027. Without this policy package, funding will not be available during the procurement process to create opportunities and resources for members, providers, health care professionals, and communities to

Oregon Health Authority: Medicaid Division

Executive Summary

provide input on how the CCO model is performing and identify areas in need of improvement. Without a unified process OHA cannot assess how issue-specific program changes affect the system overall or whether those changes have unintentionally left some regions or populations behind by creating uneven access, alignment or support across the state.

POP #413 Health Systems Integration Platform: Federal CMS guidance requires a modular approach to Medicaid IT modernization. This POP keeps Oregon aligned through acquisition of a System Integration Platform, a central transit hub for Medicaid system interfaces allowing OHA and ODHS to more rapidly modernize Medicaid systems. It also funds procurement planning for three future modules: an MMIS data warehouse, a care management module, and a provider enrollment module. In 2025, Oregon's federal partners opened an inquiry into the MES Modernization Program's lack of progress. Failure to comply risks losing enhanced federal funding, estimated at \$254 million per biennium.

Other POPs that impact Medicaid, but are sponsored by other divisions include:

- **POP #412:** Medicaid Match for Crisis Stabilization Centers Service Code Expansion
- **POP #414:** OHA Data Management Platform
- **POP #420:** Prior Authorization Modernization

Program description

Medicaid's mission is to build and advance a system of care to help all people in Oregon be healthier. The Medicaid division of OHA works collaboratively with the federal government, the Nine Federally Recognized Tribes of Oregon, health care providers, community partners, public health programs, community behavioral health programs, Urban Indian Health Programs, and other state agencies to maintain and improve access to physical, behavioral, and oral health care. Medicaid administers state and federal funds to deliver and pay for health care services to over 1.4

Oregon Health Authority: Medicaid Division

Executive Summary

million people in Oregon, primarily through the Oregon Health Plan (OHP).

Enrollment is expected to decrease during the 2027-29 biennium as the federal changes under H.R. 1 take effect, including more frequent renewals and work and activity requirements for many adults. OHA is planning for these changes while working to preserve coverage continuity. While the number of members will decline, and total costs will decrease, the average cost per remaining member is expected to increase.

Services are delivered through Tribal Health Systems, community mental health programs, safety net clinics, individual health care provider agreements, and coordinated care organizations (CCOs).

The scope of services provided, and the number of people enrolled play a significant role in determining the overall costs of the Oregon Health Plan (OHP). These factors are central to understanding and managing the financial aspects of Medicaid, as the quantity and types of services affect expenditure levels.

Program justification and link to long-term outcomes

People with health care coverage and access to care are more likely to receive preventive care and to seek care quickly when they are sick, both of which help avoid or minimize many serious health conditions. Losing that coverage contributes to poorer health and health inequities, from short-term acute health problems as well as long-term chronic ones, and to higher expenses for the individual and the entire health care system. A statewide, integrated system of care is essential to eliminate health inequities, drive down health care costs, and improve health outcomes. The Medicaid program incentivizes preventive practices and quality care through quality payments.

Medicaid works with community partners to develop and strengthen culturally and linguistically appropriate and

Oregon Health Authority: Medicaid Division

Executive Summary

responsive services aligned with social determinants of health.

With the passage of H.R. 1 (119th Congress, 2025), OHA is working closely with the Governor's Office, community partners, providers, coordinated care organizations and legislators to review the entire system, identify the greatest risks and develop strategies to preserve coverage wherever state authority allows.

Program performance

As of June 2026, approximately 1.4 million individuals are enrolled in the Oregon Health Plan (OHP). At the program level: OHP Medicaid has 1,266,773; OHP Bridge has 47,003; Healthier Oregon has 94,792.

Coordinated Care Organizations (CCOs) serve just over 93 percent of all OHP members and Open Card FFS covers the vast majority of the remaining people enrolled.

[<https://www.oregon.gov/oha/HPA/ANALYTICS/Pages/medicaid-enrollment.aspx>].

There are 36 counties in Oregon. Oregon Health Plan enrollment in the largest seven counties (>200,000 population) represents 67.8% of OHP members, with an average of 31.5% of the residents in those counties enrolled in OHP. Oregon Health Plan enrollment in the smallest eighteen counties (<50,000 population) represents 8.5% of OHP members, with an average of 37.3% of the residents in those counties enrolled in OHP. Four counties across the state have over 43% of their population enrolled: Malheur, Josephine, Jefferson, and Klamath.

As the federal authority on Medicaid, CMS requires and OHA adheres to extensive evaluative program reporting of qualitative and quantitative data to assess operational and funding structure, care and coordination outcomes, quality assurance activities, and regulatory compliance. In addition, as the State Medicaid Agency, OHA is responsible for providing full program oversight and ensuring compliance with federal and state Medicaid laws, as well as overseeing

Oregon Health Authority: Medicaid Division

Executive Summary

programs managed and implemented by other state agencies such as the Oregon Department of Human Services (ODHS), Oregon Youth Authority (OYA), and Oregon Department of Education (ODE). The Medicaid Division updates and maintains federal policy authorities (e.g., state plan amendments, 1115 demonstration waivers); leads relationships with federal partners; analyzes and advises on federal policy; supports federal reviews; coordinates state directed payments, ensures compliance with federal requirements; and submits federal reports and deliverables.

The Medicaid Division also works to ensure CCOs and FFS providers are compliant with federal regulations, state rules and statute, and contractual requirements for all Oregon Health Plan programs. The Medicaid Division continues to do immense work to mitigate risks, respond to federal inquiries, and prevent and mitigate federal financial penalties.

CCOs report on fifteen quality incentive program measures which seek to provide incentive and visibility to efforts that improve health care quality for OHP members.

[<https://www.oregon.gov/oha/HPA/ANALYTICS/pages/cco-metrics-incentive-payments.aspx>]

Enabling legislation/program authorization

The Oregon Health Authority is authorized by Oregon Revised Statutes in Titles 34, 35, and 36 (inclusive of chapters 411, 413-417, 426-428, 430, 431A, 433, and 441-443) to administer Oregon's medical assistance program. Federally funded programs, such as Medicaid, the Children's Health Insurance Program, and additional programs funded through federal grants, are implemented according to federal laws and requirements. Some programs administered by the Oregon Health Authority through ORS and Oregon Administrative Rule (OAR) also receive state dollars to ensure appropriate funding levels and compliance with state and federal regulation, for example, Healthier Oregon.

Executive Summary

Funding streams

For the 2027-29 biennium, Medicaid's budget comprises 70 percent Federal Funds, 15 percent General Fund, 15 percent Other Funds, and less than 1 percent of Lottery Funds. Federal revenue sources include Medicaid and the Children's Health Insurance Program for approximately 1.4 million OHP members. CMS operates on a cost-sharing basis; State General Fund or Other Funds must be used to match federal Medicaid dollars. This cost sharing rate is dependent upon the nature of the expenditure and determined by applying the appropriate Federal Medical Assistance Percentage (FMAP).

Medicaid's Other Funds include a State Directed Payment (SDP) hospital assessment, provider assessments, insurers' assessment, an intergovernmental transfer from Oregon Health & Sciences University, tobacco taxes, the Tobacco Master Settlement Agreement, recreational marijuana taxes, the Community Housing Trust Fund, beer and wine taxes, the Intoxicated Driver Program Fund and state lottery revenues.

Significant proposed program changes from 2025-27

Federal policy changes related to H.R. 1 (119th Congress, 2025), Executive Orders and other CMS-specific policy updates, require ongoing changes to the structure and funding of Medicaid programs to ensure continuity of care for communities across Oregon. Within this evolving environment, Medicaid is committed and will continue to assess how best to advance a comprehensive, equitable, and high-quality system of care that is culturally and linguistically appropriate. Significant changes include:

- Implement federal eligibility changes associated with H.R. 1 beginning October 1, 2026. Certain individuals who no longer qualify for federally funded Medicaid solely because of immigration-status eligibility changes will transition to Healthier Oregon, preserving access to comprehensive health coverage that is primarily state-funded.

Oregon Health Authority: Medicaid Division

Executive Summary

- Transfer members who have OHP through Healthier Oregon from coordinated care organizations (CCOs) to Open Card FFS in January 2027.
- Increase health care workforce investments and incentives to attract and retain workers, especially those who can meet a diversity of culturally and linguistically specific needs.
- Provide additional coordination of health services for individuals transitioning from institutional settings back to their communities.
- Continue to develop and expand partnerships with cross-sector community-based organizations and medical and non-medical providers, to facilitate the delivery of services focused on health-related social needs and achievement of new HR1 work and activity rules (e.g. bringing in volunteering, education, and employment partnerships).
- S.B. 296 (2025) continues the work of H.B. 3396 (2023) by improving hospital discharges and expanding the post-hospital extended care benefit from 20 days to 100 days.
- S.B. 692 (2025) establishes the Community-Based Perinatal Services Access Fund. S.B. 1568 (2026) clarifies S.B. 692 and adds postpartum doula and lactation counselor as new provider types to expand culturally specific and competent perinatal care.
- H.B. 2015 (2025) requires a report to the legislature with recommendations for critical reform for behavioral health residential system, with changes to the system expected in 2027-2029.
- Explore new CMS authorities for community-based behavioral health services for adults and children, as well as associated with the new standalone Home and Community-Based Services (HCBS) waiver authorized in H.R. 1.
- H.B. 2508 (2025) directs Oregon Department of Education to develop and implement a standardized method to be used by school districts, education service districts and the department to electronically create, collect, use, maintain, disclose, transfer and access student data that interoperates with Medicaid for effective administration of health and education services to children.

Executive Summary

- H.B. 4127 (2026) directs OHA to reimburse, using state-only funds, health care providers who under H.R. 1 are prohibited from receiving federal Medicaid funds, and unwind the process once the prohibition is no longer in place.

Percent	23%	-10%	-2%	0%	0%	0%

Activities, programs and issues in the program unit base budget

The Medicaid Division budget includes state and federal funds used to deliver and pay for health care services to over 1.4 million Oregon Health Plan (OHP) members. The Oregon Health Plan (OHP) is the Oregon Medicaid program. It provides access to health coverage for individuals with lower incomes and covers doctor appointments, hospital care, behavioral health services, oral health services, prescriptions, health-related social needs services, and additional benefits for children and pregnant people. Medicaid lowers the cost of health care by providing people with access to preventative care, which reduces the need for emergency services. This saves money, while ensuring access to care for people.

The Medicaid budget is determined based on caseload forecasts and cost estimates projected for the next two years. Due to the budget's scale, even minor deviations between forecasted and actual caseload numbers can lead to significant adjustments in the projected budget-resulting in either shortfalls or savings.

Capitation rates for the managed care plans, Coordinated Care Organizations (CCOs), are a significant budget driver. According to federal managed care regulations, capitation rates must be actuarial sound and cannot be budget driven.

Oregon Health Authority: Medicaid Division

Background information

The OHP includes Medicaid, the Children's Health Insurance Program (CHIP), the Medicaid 1115 OHP Demonstration Waiver, OHP Bridge, Reproductive Health Equity Act (RHEA), as well as the Healthier Oregon program, which is primarily state funded. Payments are made to individual health care providers as Fee for Service (FFS) and to coordinated care organizations (CCOs) in the form of a global budget. As of June 2026, CCOs serve just over 93 percent of all OHP members and Open Card FFS covers the vast majority of the remaining people enrolled [<https://www.oregon.gov/oha/HPA/ANALYTICS/Pages/medicaid-enrollment.aspx>]. This distribution will shift on January 1, 2027, when approximately 100,000 Healthier Oregon members will need to transition from CCO membership into Open Card FFS due to a new federal mandate.

Enrollment is expected to decrease during the 2027-29 biennium as the federal changes under H.R. 1 take effect, including more frequent renewals and work or activity rules for many adults. OHA is planning for these changes while working to preserve coverage continuity. While the number of members will decline, and total costs will decrease, the average cost per remaining member is expected to increase.

Oregon's current five-year 1115 OHP Demonstration Waiver was approved by Centers for Medicare & Medicaid Services (CMS) on September 28, 2022, for the timeframe of October 1, 2022, through September 30, 2027. The waiver provided Oregon with authority to expand Medicaid coverage through continuous OHP eligibility for children up to age six, two years of continuous enrollment for OHP members ages six and older, and coverage for young adults with special health care needs (YSHCN) up to age 26. The waiver also provided authority to expand Medicaid services and benefits including health-related social needs (HRSN). [OBJ] Further, through the waiver, Oregon received authority to leverage the Designated State Health Program (DSHP), which allows the state to draw federal match on certain previously only state-funded programs and to use the proceeds to cover the state-share portion of the majority of DSHP-funded initiatives, such as HRSN and YSHCN.

Oregon Health Authority: Medicaid Division

OHP Bridge is a combination of two federal authorities, the Basic Health Plan (OHP Bridge - BHP) and an amendment to our 1115 OHP Demonstration Waiver (OHP Bridge - Basic Medicaid). The OHP Bridge is a free Basic Health Program for Oregonians aged 19 to 64 with annual household incomes between 133%- 200% of the federal poverty level. OHP Bridge - Basic Medicaid is a specialized coverage tier for American Indian/Alaska Native (AI/AN) adults (19–64) with household incomes below 205% of the Federal Poverty Level. Unlike the standard Basic Health Program, it provides an "Open Card" option so members can see any provider without mandatory Coordinated Care Organization (CCO) enrollment.

OHP coverage includes the Healthier Oregon program, which serves members who would qualify for Medicaid if not for their immigration status.

Revenue sources and changes

Due to passage of H.R. 1 (119th Congress, 2025), the federal government will require changes to OHP. These changes will start in late 2026 through 2028. New federal rules will require more frequent renewals for many OHP members: most adults from age 19 through 64 will need to renew every six months, and everyone else, including children and adults age 65 and over, will renew once a year. Six-month renewals will not apply to members who are American Indian/Alaska Native, who have Medicare or have OHP based on a disability, or who are on OHP Bridge, which renews once per year.

On June 1, 2026, the federal Centers for Medicare & Medicaid Services (CMS) published an Interim Final Rule that provided more details about work and activity requirements and medical exemptions; the public comment period ends on July 31, 2026, which is also the date the rule will become active. Upon initial analysis, these rules differ significantly from the guidance that OHA had been operating under. This will require significant rework and reprogramming a number of OHA IT systems, setting our implementation progress back.

Oregon Health Authority: Medicaid Division

Starting January 1, 2027, OHP may cover recent medical bills for one or two months for new applicants, reduced from the current three months. OHA expects the change to six-month or annual renewals will start sometime in late 2027. Currently, OHP members can keep coverage between renewals even if some things change on their application, such as an income increase or a new job; these protections are ending due to federal changes. After the change, adults with OHP may lose benefits sooner if they report a change that means they no longer qualify, while children will still keep OHP for one year even if there are certain changes between renewals, and people who are pregnant will continue to keep OHP for one year after the pregnancy ends. Starting in October 2028, some adults will need to pay a small fee (a copayment) for certain types of health care.

In October 2026, some OHP members will move to Healthier Oregon, an OHP program with the same benefits; this will affect adults with certain immigration statuses, including refugees, asylees, survivors of domestic violence or human trafficking, and some humanitarian parolees and will not affect children or adults with these statuses who qualify for OHP Bridge. Members who have OHP through Healthier Oregon and are enrolled in coordinated care organizations (CCOs) will move to Open Card in January 2027.

H.R. 1 also requires revenue policy changes that will affect financing of the Medicaid program. These changes shrink access to certain financial strategies over time and prohibit access to these strategies in the future. Specifically, the maximum rate on provider assessments must phase down from 6 percent to 3.5 percent by lowering the maximum rate by 0.5 percent per year beginning October 1, 2027. New provider assessments are also prohibited. New State Directed Payments (SDPs) must limit the total payment rate to 100 percent of published Medicare payment rates. Oregon's current SDPs are maintained but will need to reduce payment rates by 10 percentage points per year, beginning in 2028, until they are no greater than 100 percent of Medicare payment levels. Estimates as of July 7, 2026, for the 2027-29 biennium indicate there will be a \$833 million General Fund deficit, with a net impact of \$421 million shortfall to the State after accounting for projected loss of coverage due to the changes required by H.R. 1. Additionally, implementation of H.R. 1 requirements will result in increases to administrative costs, including for information technology costs.

Oregon Health Authority: Medicaid Division

OHA's 2027-29 ARB Medicaid Programs budget is comprised of 70 percent Federal Funds, 16 percent Other Funds and 15 percent General Fund. The Medicaid program (OHP) receives Federal Funds for services provided to Medicaid-eligible individuals. State General Fund or Other Funds must be used to match federal Medicaid dollars for direct service payments.

- The Medicaid Title XIX entitlement provides a 59:41 match on health care services to Medicaid members. This means for every dollar OHA spends on health care services to Medicaid members, the federal Centers for Medicare & Medicaid Services (CMS) funds 59 cents and OHA funds the remaining 41 cents.
- The Children's Health Insurance Program (CHIP) Title XXI entitlement provides a 72:28 match on health care services to CHIP members.
- Medicaid Title XIX provides a 90:10 match for health services for low-income adults (expansion population).

Medicaid Programs

- Other Funds revenues include tobacco tax revenues, hospital assessments, an intergovernmental transfer agreement with the Oregon Health & Science University (OHSU), insurers assessments, grants, third party recoveries, pharmaceutical rebates, and the Tobacco Master Settlement Agreement (TMSA).

Proposed new laws that apply to the program unit

As federal policy evolves due to changes related to **H.R. 1 (119th Cong., 2025)**, Executive Orders and other CMS-specific policy updates, the structure and funding of Medicaid programs could shift over time. OHA will continue to assess how best to adapt to ensure continuity of care for communities across Oregon.

MED LC Placeholder for Medicaid Financial Sustainability: This is a placeholder for the Medical Advisory Group (MAG) recommendations.

MED LC Placeholder for Medicaid Behavioral Health Financial Sustainability: This is a placeholder for the Medical Advisory Group (MAG) recommendations.

PHD LC Universal Vaccines: If Oregon adopts a Universal Vaccine Program (UVP) Medicaid would participate. Medicaid would need to transition off of our current payment models; children's vaccines through Vaccines for Children (VFC) and adult vaccines through individual provider payments. Transition would require amending our state plan with CMS, amending CCO contracts, revising rules, setting up budget and financial workflows, configuring our claims system (MMIS), and communicating the Medicaid changes to our networks. Ongoing we would need to maintain the financial and claims workflows and keep our coverage policy aligned with the UVP vaccines and/or set up payment outside of UVP for vaccines not included non-routine vaccines such as OHP covered travel vaccines for example may need to be set up outside UVP. The fiscal impact on Medicaid for children's vaccines will likely remain the same under a UVP but Medicaid could see a small savings on adult vaccines.

Oregon Health Authority: Medicaid

Medicaid Administration and Support

Expenditures by fund type, positions and full-time equivalents

Percent	27%	9%	31%	28%	7%	8%

Activities, programs and issues in the program unit base budget

The Program Support and Administration budget includes funding for administrative support, services and oversight of the Medicaid program. Specialized units and teams support the division to ensure comprehensive health care delivery. This includes managing the Oregon Health Plan (OHP) through the Coordinated Care Organization (CCO) Operations section, which oversees policy implementation and quality assurance across managed care entities; the Medicaid Policy and Fee-for-Service (FFS) Operations section, which maintains policies and operations for over 95,000 OHP members through the Open Card health care system and informs and impacts OHP policies and rates at a systems level; and the 1115 Medicaid Waiver Strategic Operations section, which focuses on implementing innovative health-related social needs services and expanding benefits.

Administrative oversight extends to the OHP Community Engagement and Communications section, Federal Policy section, Integrated Eligibility Policy section, Provider Clinical Support Services section, Provider and Member Services section, and Strategy & Operations Improvement section; these teams support policy development, compliance with state and federal regulations, and operational guidance and support for members, providers, and partners. Within Medicaid Central Services, the Office of Actuarial and Financial Analytics (OAFA) ensures financial integrity through rate development and oversight; Office of Data Strategy and Operations (ODSO) managed data integration to enhance equitable service delivery; while Office of Program Integrity (OPI) safeguards against fraud and misuse of Medicaid resources. Together, these entities collaborate to support, monitor, and enhance the efficiency and effectiveness of the Oregon Health Plan, ensuring equitable access and quality care for all members.

Medicaid Admin

Oregon Health Plan (OHP) Medical Leadership team is comprised of the Medicaid Medical Director, with expertise in physical health and family medicine, the Behavioral Health Medical Director, and the Oral Health & Dental Director. Oregon Medicaid maintains a multidisciplinary Medical Leadership Team to provide clinical oversight across physical health, behavioral health, and oral health disciplines. This structure aims to ensure that agency policies, coverage approaches, quality strategies, and utilization management are informed by appropriate domain-specific expertise across the full continuum of member care. Because Medicaid members' needs often span these interrelated areas, this model strengthens the state's ability to support whole-person care, promote clinically sound decision-making, and maintain effective oversight of a complex and integrated delivery system.

Coordinated Care Organization (CCO) Operations section is responsible for implementing policy and program priorities for the Oregon Health Plan as delivered through managed care entities, known and operating in Oregon as Coordinated Care Organizations. Through contract administration and quality assurance, this unit provides operational and administrative oversight for Medicaid Division policies, programs and processes. Their development and implementation of Medicaid strategic priorities and initiatives ensures equitable access and quality of health services for OHP members served by CCOs. This unit ensures compliance with legal and contractual requirements, advocates for member needs, integrates and coordinates interdivision and interagency activities, and engages with CCOs and community partners to ensure the successful provision of quality health care services.

The CCO Operations section consists of four units that play crucial roles in managing Oregon's CCOs:

- **CCO Quality Assurance** unit oversees quality improvement efforts and regulatory compliance across CCOs through its two sub-teams: the CCO Quality of Care and Quality Assurance team focuses on federal regulations and quality management and the CCO Performance Analytics team develops data infrastructure for monitoring performance and process improvement.

Medicaid Administration and Support

- **CCO Contracts and Rules** unit manages contractual relationships between OHA and CCOs, including procurement and alignment with state and federal rules.
- **CCO Services** unit supports CCOs in service delivery by assisting with eligibility issues, member/provider complaints, and system improvements.
- **Claims and Encounter Data** unit handles encounter data submissions, provider enrollments, and electronic data interchange issues related to claims and remittance advices.

Medicaid Policy & Fee-For-Service (FFS) Operations section is responsible for developing and maintaining Medicaid policies that codify and clarify benefit design, delivery, and access to Oregon Health Plan services. The section also maintains Fee-for-Service (FFS) operations and the Open Card health care system for over 95,000 Medicaid members with an ongoing commitment to invest in transforming Open Card to create a statewide, person-centered system of care. Accordingly, the **FFS Quality Assurance and Operations** unit oversees healthcare rate standardization, access and quality for the Open Card system, managing care coordination contracts, and overseeing quality assurance strategies. As well, a small systems-focused **Strategy and Initiatives** team supports policy and operational initiatives, coordinating with OHA experts to improve FFS services statewide.

In addition, there are five policy and program units that are responsible to write Oregon Administrative Rules (OAR), direct coverage policy, direct provider enrollment and provider billing policy, issue guidance, lead rate setting and provide subject matter expertise:

- **Hospital & Professional Services Policy** unit focuses on hospital and pharmacy services, professional services including dental, vision, and durable medical equipment, transportation services, and interpretive services.
- **Children and Family Policy** unit focuses on School Based Health Services and Medicaid Administrative Claiming, Youth with Special Health Care Needs, Early and Periodic Screening, Diagnostic and Treatment (EPSDT), maternal health, and coordination with child welfare program.
- **Medicaid Behavioral Health Policy** unit focuses on the full continuum of behavioral health services, including

Medicaid Administration and Support

Behavior Rehabilitation Services, Mobile Crisis and Stabilization Services, Crisis Respite, Substance Use Disorder Services, clinical decisions regarding Medical Necessity and Medical Appropriateness of residential services, Secure Treatment/Inpatient Services, and Institutions for Mental Diseases.

- **Home and Community Based Services Policy** unit focuses on Home and Community Based Services 1915(i) State Plan Option and Personal Care Attendant and HCBS in home personal care programs (including Agency with Choice).

Safety Net Policy unit ensures compliance and supports operations for federally funded health safety net clinics, including Federally Qualified Health Centers (FQHCs), Rural Health Centers (RHCs), Indian Health Centers (IHCs), and Certified Community Behavioral Health Clinics (CCBHCs), with a focus on expanding CCBHCs statewide.

OHP Community Engagement & Communications section is focused on building and maintaining pathways to prioritize community and partner voice throughout Medicaid and Oregon Health Plan policy and operations, as well as supporting operational communications with member, providers, and other partners. This work includes close collaboration and interconnectivity with other OHA and state agency teams working daily in Community Engagement and Communications, particularly around Medicaid. The unit supports a broad portfolio that includes design, delivery, coordination, and consultation for Medicaid Community-driven Advisory Bodies, strategic project support for OHP Community Engagement, OHP Community Communications, Medicaid (chapter 410) Rules Coordination, and pilot Policy and Program areas that require intensive community input.

1115 Medicaid Waiver Strategic Operations section is responsible for implementing and operationalizing initiatives authorized in the five-year 1115 OHP Demonstration Waiver in order to further the goals of the Oregon Medicaid Program and advance health access and optimal health outcomes. Specifically, the team leads the implementation of the 1115 Health-Related Social Needs (HRSN) Services and expansion of OHP benefits to individuals experiencing critical life transitions, such as individuals being released from carceral settings. The team

Oregon Health Authority: Medicaid

Medicaid Administration and Support

leads policy development, contract, and rule development, facilitates system enhancements, and changes, and ensures operations are in compliance with state and federal regulations. In facilitating program and policy design, the team collaborates with community, CCOs, state agencies, federal partners, the Nine Federally Recognized Tribes in Oregon, and program governing bodies. In addition to implementation, the team focuses on identifying the need for strategic improvements in Oregon's Medicaid Program, ensuring these strategies are reflected in the planning and coordination of future 1115 OHP Demonstration Waivers.

- **Health-Related Social Needs** team develops Medicaid policies for housing, climate, nutrition, and outreach to aid members in critical transitions, including those released from incarceration or mental health facilities, involved in child welfare, transitioning to dual Medicaid-Medicare eligibility, experiencing houselessness or at risk, and young adults with special health needs, ensuring comprehensive service support and operational oversight.
- **Waiver Transition Populations** unit focuses on integrating Medicaid benefits as individuals transition from carceral settings, including care coordination, case management, clinical consultations, peer services, medication assistance, and ensuring medications upon release. They support the 2025 implementation of care coordination mandates for youth and former foster care under the Federal Consolidated Appropriations Act. Additionally, they address enhanced care coordination from Oregon State Hospital to community or jail transitions.

Federal Policy section is responsible for coordinating Oregon's Medicaid State plan, Health-Related Services including CCO policy and spending reviews, and Home and Community-Based Services Waivers operated by ODHS. This includes up-to-date knowledge of federal regulations, state statutes and administrative rules related to the Medicaid State plan, the 1115 OHP Waiver, HCBS Waivers and Selective Contracting Waivers. The team compiles Quarterly and Annual Reports required under the 1115 OHP waiver, State plan and 1915(c) waivers. Also, provides support as needed for CCO contracts and rulemaking, the Benefits Update Project, and Prioritized List Phase-Out Plan.

Integrated Eligibility Policy section is responsible for developing and maintaining policy, administrative rule, and ONE system functionality related to Oregon Health Plan/Medicaid eligibility. This includes the maintenance of

Medicaid Administration and Support

federal contracts, reporting, budget, IT system design, and federal and State compliance. Medical eligibility policy staff coordinate updates in state policies, programs, and information, payment, and eligibility systems when changes to Medicaid/CHIP eligibility policy occur due to changes in federal regulation, legislative session, and 1115 waiver initiatives. The eligibility policy team works closely with ODHS policy and operations units to ensure that OHA objectives are represented and met and provides subject matter expertise across OHA and ODHS.

Provider and Clinical Support Services section supports OHA Open Card FFS utilization management through the operationalization of prior authorization requirements, Medical Management Committee reviews, claim-denial appeal reviews, testimony in fair hearings, and active participation in OAR development. The unit also helps in-state and out-of-state FFS providers to identify prior authorization requirements, navigate prior authorization process, interpretate OARs, validate medical code pairing for requested services, and advocate for providers wishing to seek approvals for unique health service requests. Timely and accurate provider engagement and prior authorization responses enable OHA to partner with providers to support the health care needs of the Open Card FFS population and promote optimal health outcomes.

Provider and Member Services section includes several specialized units:

- **Provider Enrollment** unit handles screening, enrollment, maintenance, and revalidation of Medicaid providers, ensuring their access to Oregon Health Plan (OHP) members and the Medicaid Management Information System (MMIS). The unit manages provider sanctions, terminations, and audits.
- **Provider Services** unit offers support to health care providers, assisting with claims reviews, payment approvals, and technical inquiries via phone and email, while also addressing billing issues with Medicaid members.
- **Client and Enrollment Services** unit assists OHP members by facilitating access to care, explaining coverage, connecting members with their Coordinated Care Organizations (CCOs), and resolving billing concerns and complaints.

Medicaid Administration and Support

- **Hearings** team processes appeals for denied medical services, coordinating contested case hearings with members, CCOs, and administrative bodies to ensure fair representation and resolution under the Oregon Health Plan.

Strategic Operations & Improvement section focuses on three main areas to support the agency's mission.

- **Workforce Development, Equity and Administrative Services** unit within this division concentrates on design and delivery of workforce development (recruitment, onboarding, training) activities, workforce Culture and accountability strategies, and core administrative services such as facilities management, equipment procurement, and travel coordination.
- **Contracts and Fiscal Operations** unit oversees financial management and contractual aspects of the Medicaid program. Responsibilities include contract administration, financial oversight, compliance monitoring, and policy implementation to promote health equity and ensure efficient resource allocation. This unit plays a crucial role in maintaining the fiscal integrity and operational efficiency of Oregon's Medicaid program, supporting access to health care for all beneficiaries.
- **Governance & Process Improvement** team supports all Medicaid functions through audit management, performance metrics coordination, project management for complex initiatives, and process documentation to ensure operational continuity and efficiency across the division.

Medicaid Central Services

Office of Actuarial and Financial Analytics (OAFA), overseen by OHA's Fiscal Division of Central Services, plays a pivotal role in Oregon's health care financial landscape. OAFA is responsible for developing capitation rates for CCOs and Program of All-inclusive Care for the Elderly (PACE), ensuring these rates reflect the cost of care provided per member per month. They collaborate with external actuarial vendors to certify CCO rate development and oversee financial reporting, fiscal solvency, and risk-based capital measurement for CCOs under NAIC standards since 2020. OAFA also has the authority to design reinsurance programs for CCOs and monitors their contract

Medicaid Administration and Support

compliance. Beyond rate development, OAFA supports OHA and CCOs through data analysis, budgetary impact assessments, financial incentives calculation, cost-containment strategies, reimbursement rate reviews, and policy development to advance Oregon's health system transformation. They consolidate and publish CCOs' financial reports to ensure transparency and accountability in Medicaid managed care.

Office of Data Strategy and Operations (ODSO) The Office of Data Strategy and Operations (ODSO) under direction of (OHA) partners across OHA and Oregon Department of Human Services (ODHS) to enhance service delivery through modernized data and technological systems. It focuses on improving transparency and accountability of managed data, supporting data use, and promoting system integration and efficiency across OHA and ODHS divisions.

The Office is specifically focused on increasing the use of enterprise-wide (OHA and ODHS) data and technology solutions, improving cross-divisional collaboration, and promoting communication and transparency through the connection of agency systems and data. The office comprises five units:

- **Data Strategy and Partnerships** unit which focuses on advancement of a modernized data strategy and helps assess and plan for strategic data and system projects with the goal of minimizing silos, reducing duplication, and facilitating integration and efficiencies.
- **Medicaid Management Information Systems (MMIS) Business Services** unit (MMIS BSU) and the **MMIS Operations** unit. Both MMIS BSU and MMIS Operations unit encompass several facets around system implementation and management of Medicaid policies and programs. This work includes protecting the integrity of the data within MMIS. To carry out these functions, staff work with multiple state agencies and the contracted MMIS vendor, Gainwell Technologies (GWT) to make these changes.
 - MMIS BSU manages benefits, drug and pharmacy programs, enrollment, claim processing, provider portal, prior authorizations and plans of care issues, user training, MMIS security protocols, including system access agreements, third party liability functions, and payments for services delivered through the Oregon Health Plan.

Medicaid Administration and Support

- MMIS BSU staff coordinate system changes mandated by state and federal requirements, as well as system improvements. This work includes the design, planning, testing and implementation of enhancements.
- MMIS Operations Unit manages system changes and enhancements that cover a multitude of subsystems within the MMIS.
- MMIS Operations Unit provides oversight and management of Transformed Medicaid Statistical Information System (TMSIS) data that is contained in the MMIS data warehouse. This work includes all source systems that interface with the MMIS containing TMSIS data).
- **Community Outcome Management and Performance Accountability Support System (Compass) Data Systems Program and the Compass Systems Operations & Provider Support unit.**
 - Compass Data Systems Program manages the development and operations of the OHA Data Environment (ODE) and the Behavioral Health (BH) data collection systems that are expandable to collect non-BH data with aim to maintain and improve system function, assemble data to support outcomes-based reporting along with human-centered, data-informed decisions, and integrate records to advance a 360-degree view of client interactions.
 - Compass acts as a bridge between behavioral health programs and technical teams, coordinating IT design, development, testing, implementation, and operations. This team manages modernization projects that remove data silos, reduce duplicative reporting burden, and improve reporting on behavioral health program outcomes. Compass prioritizes new tools and system changes for improved data connection and reportability in ODE, partnering with Health Analytics to implement data analytics tools and source integrations in the data warehouse.
 - Compass Systems Operations & Provider Support Unit provides primary technical support for behavioral health providers in the Compass data collection systems. This team handles access, provider user training, data submission validation, and system enhancements.

Oregon Health Authority: Medicaid

Medicaid Administration and Support

Office of Program Integrity (OPI), housed within OHA's Fiscal and Operations Division, ensures the integrity of Oregon's Medicaid program by investigating, auditing, and reviewing services billed by providers in both Fee-for-Service (FFS) and Coordinated Care Organization (CCO) networks. OPI's efforts aim to detect and prevent Medicaid fraud, waste, and abuse (FWA) while ensuring compliance with federal and state regulations. The office is structured into four units:

- **Surveillance and Utilization Review Subsystem** unit (SURS) conducts data analytics to monitor service utilization and identify potential FWA patterns.
- **Special Investigations** unit (SIU) investigates fraud referrals and collaborates with law enforcement.
- **Policy** Unit provides policy direction and ensures regulatory compliance.
- **Program Integrity Audit** unit (PIAU) conducts provider audits to verify services and recover overpayments through various audit types. OPI's comprehensive approach enhances oversight, promotes fiscal responsibility, and safeguards Medicaid resources in Oregon.

The Innovator Agent team collaborates extensively with coordinated care organizations (CCOs), providers, community partners, and OHA programs to drive health system transformation in Oregon. Their mission is to facilitate local implementation of statewide health priorities. Innovator Agents are legislatively empowered to bridge communication between OHA, communities, and CCOs, advocating for regional health needs and resource gaps to inform statewide initiatives. They play a crucial role in advising Medicaid teams on policy and program development, enhancing access to care, amplifying OHP member voices within CCO operations, and supporting initiatives such as housing, behavioral health, language access, and shaping response to emergent issues.

The **Strategic Action Team (SAT)** was designed to provide high-level resources to complex priorities and initiatives requiring various parts of the agency or inter-agency collaboration. Since the inception of the office in 2022, the SAT has been leveraged for large-scale initiatives and improvement projects such as improving access to quality health coverage, 1115 waiver implementation, and development of the OHA strategic plan. SAT staff are

able to partner both in project management and change management, as well as be strategic partners in developing project scope, deliverables, and sustainability planning.

Background information

Several external factors shape the current and future strategic priorities and operations of the Oregon Health Authority (OHA), especially within the context of serving as the State Medicaid Agency. Federal mandates from entities like the Centers for Medicare & Medicaid Services (CMS) direct OHA's policies, regulations, and funding allocations. Moreover, changes in health care policies and legislative initiatives at the state and federal levels necessitate adjustments in OHA's operations and service delivery models. These changes include shifts in Medicaid eligibility, benefits coverage, and reimbursement rates, requiring OHA to adapt policies accordingly.

Community needs and feedback are pivotal in shaping OHA's initiatives. Engaging with Oregon Health Plan members, health care providers, partners, and advocacy groups allows OHA to gather insights that inform decision-making, program development, and practical efforts to address health care inequities and disparities across Oregon. Partnerships and collaborations with federal agencies, county entities and other partners in the health care ecosystem significantly impact OHA's strategies. These collaborations are crucial for assuring equitable access, improving care coordination, and addressing health care disparities effectively at a local level. In addition, OHA monitors emerging health care trends and innovations to adopt policy, programmatic, and technological advancements that could improve service delivery and patient outcomes.

Compliance with mandates such as the CMS Interoperability and Patient Access final rule drives initiatives to enhance data accessibility and transparency in health care delivery. Innovations in telehealth, data analytics, and integrated care models are of particular interest and influence OHA's approach to service delivery and system modernization.

Oregon Health Authority: Medicaid

Medicaid Administration and Support

By navigating these external influences, OHA can align its strategies and initiatives with evolving health care needs, advancing its mission to enhance health care access, quality, and equity throughout the state.

Revenue sources and changes

OHA's 2027-29 ARB Medicaid Administration and Support budget is comprised of 43 percent General Fund, 33 percent Other Funds Limited, 22 percent Federal Funds and 3 percent Lottery Funds.

General Fund is used for administrative support, staffing, services and supplies, and the maintenance and operations of the information technology systems for the Medicaid Division.

Program Support and Administration receives Federal Funds through Medicaid administrative match, and other federal grants to fulfill the grant obligations.

Medicaid provides a 50:50 match on staff and administrative expenditures that support the Medicaid program and a 75:25 match for administrative expenditures directly related to eligibility determinations and enrollment. Medicaid can also receive a 90:10 match for the design, development and implementation (DDI) work in Medicaid technology systems. The Medicaid program (OHP) receives Federal Funds for services provided to Medicaid-eligible individuals.

Medicaid's Other Funds include a State Directed Payment (SDP) hospital assessment, provider assessments, insurers' assessment, an intergovernmental transfer from Oregon Health & Sciences University, tobacco taxes, the Tobacco Master Settlement Agreement, recreational marijuana taxes, the Community Housing Trust Fund, beer and wine taxes, the Intoxicated Driver Program Fund and state lottery revenues.

Agency Request Budget

Oregon Health Authority: Behavioral Health Division

Executive Summary

Program Contact: Ebony Clarke, Director
503-428-7385

Note: The Behavioral Health Division was not separated from the overall Health Systems Division Budget until the 2025-27 biennium, so no data prior to that period is represented in the above graph.

Division overview

The Behavioral Health Division (BHD) provides oversight for Oregon's behavioral health system, drives policy, and operates as a single state authority in support of individuals, families, and communities, informed by community and lived experience. BHD is responsible for

Oregon Health Authority: Behavioral Health Division

Executive Summary

developing, maintaining, and overseeing a statewide system of integrated behavioral health care. This includes working with partners and individuals with lived experience across the state to provide funding, oversight, technical assistance, and expert guidance to facilitate a comprehensive, accessible, and integrated system of behavioral health.

Key Division activities include:

- Regulation and oversight of treatment facilities and providers; including complaint and critical incident reviews
- Policy direction for behavioral health across the agency
- Developing business and operational policies for behavioral health delivery systems including both mental health and substance use disorders
- Contracting with behavioral health programs and other partners to support community-based health services and oversee compliance with state and federal regulations
- Reducing behavioral health inequities and elevating quality and accountability
- Reducing stigma, the criminalization of behavioral health disorders, morbidity, and mortality from Behavioral Health disorders
- Ensuring a robust safety net
- Facilitating community-centered engagement and person-directed services; prioritizing high-risk populations including individuals transitioning from the Oregon State Hospital
- Increasing overall capacity and integration across settings and services
- Incentivizing trauma-informed, culturally responsive and linguistically specific services
- Improving workforce diversity and increasing staff retention

In support of Oregon Health Authority's (OHA) mission to eliminate health inequities in Oregon by 2030, BHD is committed to sustaining a behavioral health system that ensures all people can reach their full health potential and well-being and are not disadvantaged by their race, ethnicity, language, disability, gender, gender identity, sexual orientation, social class, intersections among these communities or identities, or other socially determined circumstances.

In application, this means that health equity is a central consideration in all BHD programs and administrative efforts. The Behavioral Health Division adheres to OHA's responsibility to uphold the government-to-government relationship with the Nine Federally Recognized Tribes of Oregon in service to health equity. Likewise, BHD collaborates with key system partners, such as peers, behavioral health providers, hospitals, Community Mental Health Programs, and coordinated care organizations to address the

Oregon Health Authority: Behavioral Health Division

Executive Summary

equitable distribution or redistribution of resources and power, as well as recognizing, reconciling, and rectifying historical and contemporary injustices.

Funding request

The Agency Request Budget of \$1,342.77 million Total Funds continues funding for the BHD programs at the current service level for the 2027-29 biennium and includes funding and positions to support several policy packages for Behavioral Health.

BHD proposes the following policy packages to decrease health inequities:

- **POP #412: Medicaid Match for Crisis Stabilization Centers** – OHA is seeking to amend the State Plan Agreement with the Centers for Medicare & Medicaid Services (CMS) to offer more suitable Medicaid service codes and sustainable reimbursement for Crisis Stabilization Center providers in Oregon. These centers will provide needed crisis care and avoid higher cost hospitalizations in service to OHA's 2030 health equity goal and health care access goals. Alternatives were carefully explored with internal OHA experts and with Oregon's crisis providers and community partners. Without this investment, Oregon cannot leverage federal Medicaid funding to sustain CSCs, limiting access to facility-based crisis care and increasing reliance on emergency departments, psychiatric hospitalization, and law enforcement response.
- **POP #425: Forensic Behavioral Health** – OHA aims to implement the statutory requirements established by HB 2005 (2025) and strengthen Oregon's civil commitment and forensic behavioral health system. The requested staffing will enable OHA to implement new community restoration forensic evaluations, oversee expanded civil commitment responsibilities, improve coordination with counties, courts, and providers, support timely transitions from OSH, and meet new statutory reporting and federal court compliance requirements. It represents the minimum staffing necessary to ensure OHA can implement HB 2005 safely, consistently, and equitably.

Program description

BHD is comprised of the Director's Office and three sections: Behavioral Health Service Delivery, Behavioral Health Operations and Strategy, and Behavioral Health Equity and Community Partnerships.

Oregon Health Authority: Behavioral Health Division

Executive Summary

The Behavioral Health Service Delivery section provides oversight to support accessible, effective, and equity-driven services across Oregon's behavioral health care continuum. These services support people across the lifespan, from children and families to adults and older adults, including communities that intersect with the criminal legal system and homelessness. These services also include support for the crisis system and oversight of the County Mental Health Programs through the County Financial Assistance Agreements.

The Behavioral Health Operations and Strategy section creates and maintains BHD's essential operations and strategy infrastructure, aligning service delivery with essential business, policy, project management, budget, contract and procurement, technology, and communication capabilities to achieve BHD's mission in an organized, efficient, and transparent manner. This unit also includes all licensing, certification, and regulation of behavioral health providers.

The Behavioral Health Equity and Community Partnerships section serves to amplify the voices of communities most affected by health inequities and build partnerships that enable everyone to achieve behavioral health and wellness. This is accomplished through leveraging community partnerships initiated and maintained by the Behavioral Health Equity and Community Partnerships unit. The Office of Recovery and Resilience is also housed in this section, consisting of policy and program analysts with lived experience in behavioral health, acting as a crucial link between the agency and consumers of the behavioral health system. This unit oversees the statewide growth and integration of peer-delivered services through funding, technical assistance, and support.

The Behavioral Health Director's Office oversees the Division's governance, strategic vision, and strategic plan, as well as employee engagement and satisfaction, communications, project management office, and administrative support. In addition, the office includes legislative coordination and policy direction, quality assurance and audit response, emergency preparedness, and administrative rule coordination.

The Behavioral Health Resource Network (BHRN) program (formerly known as Measure 110) also sits within the Director's Office and oversees the distribution of the Drug Treatment and Recovery Services community-based grant program to over 230 community organizations that deliver critical outreach, engagement, recovery support, and other services to reduce negative impacts from substance use.

In collaboration, these program units enable BHD to pursue its goal to build and advance a system of care to help all people in Oregon achieve optimal behavioral health. The Division conducts innovative programming and ambitious community-led efforts to improve the quality of and access to behavioral health services, including approaches that eliminate health inequities in Oregon and ensure the

Oregon Health Authority: Behavioral Health Division

Executive Summary

health system serves and respects diverse cultures and languages across Oregon communities. In the context of reduced funding and overall budgetary constraints, the BHD supports prioritization of investments to ensure services and supports for the most vulnerable are retained.

BHD works with the U.S. federal, state and local government, the Nine Federally Recognized Tribes in Oregon, health care providers, community partners, public health programs, community behavioral health programs, coordinated care organizations, and other state agencies to build, maintain, and improve access to behavioral health care. BHD primarily administers state general funds and federal block grant dollars to fund services through Community Mental Health Programs and other providers and community-based organizations across the state.

BHD partners closely with the Medicaid Division (MED), which administers state and federal funds to deliver and pay for behavioral health care services to over 1.4 million people in Oregon, primarily through the Oregon Health Plan (Medicaid). BHD sets the behavioral health policy direction for Medicaid and coordinated care organizations. BHD also works closely with the Public Health Division (PHD) to provide a comprehensive continuum of substance use services, combining population health strategies, such as harm reduction, prevention with treatment, recovery and long-term supports. BHD and PHD increasingly align policy, funding, data and community partnerships to reduce overdose deaths, improve health outcomes and increase access to evidence-based care.

BHD also guides transformational change in the behavioral health system through the implementation of legislative policy and investments. The 2025 legislative session brought several historic policies forward, targeted primarily at adults with serious mental illness. HB 2059 continued the previous biennium's investment in residential treatment capacity building, by appropriating \$65 million to increase the bed capacity for adult behavioral health residential treatment statewide. These strategic investments created an estimated 196 new beds, while also preserving over 100 existing beds through facility upgrades.

HB 2005, a forensic behavioral health omnibus bill, made broad updates to Oregon's behavioral health and criminal justice systems by expanding access to mental health and substance use treatment, especially for justice-involved individuals. The bill revises civil commitment laws, strengthens protections for individuals with a Declaration for Mental Health Treatment, and codifies prehearing treatment diversion. It clarifies timelines and procedures for determining fitness to proceed and managing hospital or community restoration, sets limits on commitment periods, and updates placement processes after commitment. The bill improves information sharing for continuity of care, removes some administrative hearing requirements for the state hospital, promotes collaboration with Tribal courts, and mandates that local governments allow siting of treatment facilities on qualifying properties without extensive land use

Oregon Health Authority: Behavioral Health Division

Executive Summary

approvals. This legislation required significant revisions to administrative rules, updates to training for civil commitment investigators, and additional staff, which are noted above in the policy option packages.

Also related to this population, HB 2015 directs OHA to study and adopt rules relating to behavioral health residential treatment programs including Secure Residential Treatment Facilities and Homes as well as transition-aged youth residential treatment homes. OHA must report on its findings on alternative reimbursement methodologies for residential facilities, direct discharge, and nurse staffing requirements. The bill has significant potential to advance health equity by improving access to care, supporting vulnerable populations, and addressing systemic barriers.

The Legislature also continued their commitment to increasing the behavioral health workforce with HB 2024. This bill establishes a grant program with about \$5 million to recruit and retain behavioral health providers in Oregon. Incentives may include scholarships, tuition assistance, loan forgiveness or repayments, and stipends for students enrolled in graduate behavioral health programs. It includes about \$1 million for the United We Heal Medicaid Payment Program that focuses on behavioral health workforce recruitment and retention strategies. It also creates new behavioral health workplace safety requirements and protections. The aim is to reduce barriers to entry for the behavioral health workforce and strategically prioritize historically underserved communities.

In the previous session, the Legislature also approved the following investments through the adoption of the 2025-27 budget, some of which is one time funding, and some is ongoing, rolling forward into the continuing service levels or CSL:

- Youth residential capacity - \$10 million one-time funds supporting the addition of PRTF capacity.
- Permanent Supportive Housing - \$5.2 million one-time funds
- Flexible Housing Fund for Patients leaving OSH - \$3 million
- Culturally specific youth suicide prevention - \$1 million - CSL
- Intensive in-home behavioral health treatment for youth with co-occurring disorders - \$7 million - CSL
- Funding to counties to support the Aid and Assist population - \$10 million – CSL
- Adult Mental Health residential rate increases - \$24 million - CSL
- Deflection and diversion funding for community mental health programs - \$13.2 million CSL
- Save Lives Oregon Harm Reduction Clearinghouse - \$10 million – one-time funds
- Certified Community Behavioral Health Centers - \$48 million – CSL The 2026 legislative session also included legislation related to behavioral health, but included no fiscal investments. HB 4070 made statutory updates to outdated language, including clarification to ensure unlicensed providers are physically present in Oregon when delivering services to Oregonians. HB 4099

Oregon Health Authority: Behavioral Health Division

Executive Summary

established the Task Force on Responding to Veterans in Crisis to develop recommendations for improving crisis response services for veterans across the state.

Several bills also passed in 2026 related to reducing administrative burden and increasing workforce safety. HB 4083 was a signature piece of legislation from the Behavioral Health Talent Council, directing the agency to establish a uniform credentialing process and system for behavioral health providers enrolled in the Oregon Health Plan. HB 4115 increased the validity period of background checks conducted by OHA and ODHS from 18 months to three years and prohibits requiring a new check solely due to an individual changing employers or care settings. HB 4069 establishes new requirements for behavioral health employers to develop, implement and maintain written worker safety plans.

Lastly, to support expanding the behavioral health workforce, SB 1547 establishes a new license for “behavioral health and wellness practitioners” under the Oregon Board of Psychology. This creates a regulatory framework for bachelor’s level practitioners to provide behavioral health promotion, prevention, and brief intervention services for children and youth.

BHD’s cost drivers can be understood through three primary lenses: sustaining operational infrastructure, ensuring compliance with new legislation and federal court orders, and responding to emerging issues and crises in behavioral health. These include:

- Need for expanded staffing capacity within BHD to address and meet the demands of a rapidly changing and more complex behavioral health landscape in Oregon, including increased data management, policy development and implementation, and stronger service coordination. For example, our annual volume of requests for certification for outpatient provider organizations increased from 2023 to present by 400% with no additional resources.
- High volume of general fund dollars being diverted to pay for non-medically necessary residential treatment ordered by the court for individuals under the jurisdiction of the Psychiatric Security Review Board (PSRB) and guardianships. In the 25-27 biennium this is expected to exceed \$50 million that was diverted from other critical investments. Without policy changes this trend could continue into the 27-29 biennium.
- The last several years of investments have successfully created additional capacity for services. This in turn requires continued investment in funding the provision of these treatment services, which is at risk due to budgetary constraints.
- To fully comply with HB 2005 and the aid and assist population and requirements for forensic evaluations. BHD currently anticipates the need to complete 1,000 forensic evaluations per year.
- Upcoming Medicaid eligibility changes due to federal policy will result in an increased number of people losing coverage and relying on crisis and safety net systems.

Executive Summary

Program justification and link to long-term outcomes

BHD sets strategy and vision for Oregon's behavioral health system, guiding alignment across the agency. Examples include efforts to redesign the adult mental health and substance use disorder residential system to increase, capacity, throughput and clinical outcomes while enhancing compliance with the federal Mink court order; development of the definitions and regulatory framework for a fully SAMHSA compliant crisis and safety net system; and regulatory changes to ensure that the workforce serving our most vulnerable residents is well-trained and supported. Residential system redesign efforts are intended to create a more responsive and coordinated continuum of care, ensuring individuals receive services at the level of support that best meets their needs, while also providing clear pathways to transition to less restrictive, community-based settings as they recover and stabilize.

A key component of this redesign is the partnership with Oregon Health & Science University's Oregon Behavioral Health Coordination Center (OBCC), which developed a transparent, statewide bed registry to improve visibility into residential and inpatient capacity. This tool supports providers, hospitals, Community Mental Health Programs, and care coordinators in identifying available placements more quickly and efficiently for individuals entering care or transitioning between levels of care, reducing delays and improving continuity of treatment.

In addition, the Behavioral Health Division has established a dedicated Residential Services Unit focused on supporting timely transitions from the Oregon State Hospital and acute care settings into community-based residential programs. The unit works collaboratively with providers, hospitals, local systems, and care teams to address barriers to placement, coordinate complex discharges, and strengthen pathways into appropriate long-term community supports.

BHD works with peers, people with lived experience, and community partners to develop and strengthen culturally and linguistically appropriate and responsive services aligned with social determinants of health. An example of this includes the Problem Gambling Program's partnership with Asian American and Latino advisory councils. Another example is the application of the Race, Ethnicity, Age, Language and Disability (REALD) and Sexual Orientation and Gender Identity (SOGI) data collection standards. These data help assess how racism, ableism, lack of language access, sexism impact individual and community health and help close the significant gaps in health inequities experienced by populations that remain invisible.

Executive Summary

Program performance

KPM 1: Initiation of opioid, alcohol, and other drug dependence treatment – Percentage of members with a new episode of opioid, alcohol, or other drug dependence who received initiation of AOD treatment within 14-days of diagnosis, 2020–2025

**Upward trend indicates positive results*

Oregon Health Authority: Behavioral Health Division

Executive Summary

KPM 2: Engagement of opioid, alcohol, and other drug dependence treatment
– Percentage of members with a new episode of opioid, alcohol, or other drug dependence who receive two or more services within 30-days of initiation visit, 2020–2025

**Upward trend indicates positive results*

Oregon Health Authority: Behavioral Health Division

Executive Summary

KPM 3: Follow-up after hospitalization for mental illness – Percentage of enrollees 6 years of age and older who were hospitalized for treatment of mental health disorders and seen on an outpatient basis or were in intermediate treatment within 7-days of discharge, 2020–2025

**Upward trend indicates positive results*

*** Performance on this measure cannot be compared to past years due to changes in specification requiring service is provided by a mental health professional*

Oregon Health Authority: Behavioral Health Division

Executive Summary

KPM 4: Mental, physical, and dental health assessments for children in DHS custody—
Percentage of children in DHS custody who receive a mental, physical, and dental health
assessment within 60 days of the state notifying CCOs that the children were placed into
custody with DHS (foster care), 2020–2025

**Upward trend indicates positive result*

Oregon Health Authority: Behavioral Health Division

Executive Summary

KPM 5: Quality of life — poor mental health—Average number of mentally unhealthy days in the past 30 days (age 18+), 2020–2024. Measuring health-related quality of life helps build understanding around people’s lived experiences with disabilities and chronic diseases across the population. Self-report of days when mental health was not good is a reliable estimate of recent health status

**Upward trend indicates negative result*

Executive Summary

Legislation/program authorization

The statutory framework for the programs BHD administers is included in the following state and federal statutes:

- Oregon Revised Statute (ORS) 430 provides OHA the statutory framework for the development, implementation, and continuous operation of community treatment programs to serve people with substance use and mental health disorders, subject to the availability of funds.
- Alcohol and Drug Programs operate under the authority of Oregon Revised Statute (ORS) 430.254 through 430.426 and ORS 430.450- 430.590 and Federal PL 102-321 (1992) Sections 202 and 1926.
- Problem gambling treatment and prevention services are mandated by Oregon Revised Statute (ORS) 413.520, which directs OHA to develop and administer statewide gambling addiction programs and ensure delivery of program services.

Funding streams

BHD receives funding through three major sources: Oregon General Fund, federal funds, and other assorted funding sources.

General Fund revenue supports administrative support, staffing, services and supplies, and the maintenance and operations of the information technology systems for the division's behavioral health programs.

Federal funding sources include:

- Community Mental Health Services Block Grant (MHBG)
- Substance Use Prevention, Treatment, and Recovery Services Block Grant (SUPTRS BG)
- Medicaid (Title XIX)
- Children's Health Insurance Program (Title XXI)
- 988 capacity grant
- 988 telecom tax state grant
- PATH grant
- State Opioid Response grant
- Other federal grants

Oregon Health Authority: Behavioral Health Division

Executive Summary

Other Funds include Lottery Funds and allocations from funding sources for administration, including:

- The Tobacco Master Settlement Agreement
- Tobacco taxes
- Lottery Funds/Bonds
- Marijuana taxes
- Drug Treatment and Recovery Services Fund (BHRN)
- Private agency certification fund
- Community Based Housing Registration Fee
- Law Enforcement Medical Liability Account (LEMLA)
- Beer and Wine Taxes
- American Rescue Plan Act (ARPA)
- Opioid Settlement funds
- A portion of court fines, fees and assessments related to ORS 813.270, for the Intoxicated Driver Program Fund

Significant proposed program changes from 2025-27

Following significant restructuring of the BHD that happened over the last two years, there is less change proposed for this biennium. One primary area is the development of the Community Restoration Evaluation Unit (CREU). This is a new unit that will be situated within the Service Delivery section. It will include program oversight, tracking, infrastructure, and contracted forensic evaluators. This is in order to be in compliance with HB 2005 (2025).

In addition, due to budgetary constraints and performance concerns, BHD terminated the contract for Assertive Community Treatment (ACT) fidelity monitoring and moved that work in-house, under the Service Delivery section. This change also relieves significant administrative burden from the ACT providers.

Activities, programs, and issues in the program unit base budget

The Behavioral Health Division's Program Support and Administration budget includes funding for administrative support, services, and oversight for the Behavioral Health Division. The division is supported by the Director's Office, which includes the Deputy Directors overseeing core functional areas, the Office of Strategic Operations, the policy director and chief of staff, the Quality Assurance unit, and the Behavioral Health Tribal Liaison as well as administration of the following areas:

- Equity and Community Partnerships, which includes the Equity and Community Partnerships unit, the Office of Recovery and Resilience unit, and the Behavioral Health Metrics and Committee unit.
- Business Operations and Strategy, which includes Business Operations, Contracts, Behavioral Health Investments, Behavioral Health Workforce Incentives, and Licensing and Certification.
- Behavioral Health Service Delivery, which includes Child, Family, and Lifespan Behavioral Health services and Adult Behavioral Health programs.

BEHAVIORAL HEALTH DIVISION DIRECTOR'S OFFICE

The Behavioral Health Director's Office consists of the Behavioral Health Division Deputy Directors, the Policy Director and Chief of Staff, the Office of Strategic Operations, the Quality Assurance unit, the Behavioral Health Resource Network program, and the Behavioral Health Tribal Affairs team. The Director's Office ensures coordinated administration and collaboration across the Behavioral Health Division to ensure the Equity and

Oregon Health Authority: Behavioral Health Division

Program Support and Administration

Community Partnerships, Operations and Strategy, and Service Delivery areas are strategically and operationally connected to best meet behavioral health needs for individuals in Oregon.

The Office of Strategic Operations serves as the Behavioral Health Division's central hub for strategic alignment and transformation management, setting standards and developing systems to optimize infrastructure support for the work of the division. The office collaborates internally with the division and across the agency to provide direction and coordination for behavioral health policy positioning, strategic governance, organizational development and communications strategy. In support of the division director, the office strengthens BHD's ability to plan, manage and implement high-impact priorities by aligning division work with agency-wide goals, legislative direction, and statewide behavioral health needs.

Its core functions include internal and external communications, policy and legislative coordination, workforce equity and development, employee experience, change management, governance, project management, and systems planning. By establishing clear standards and processes, strengthening decision-making structures, and coordinating across OHA divisions, the Office of Strategic Operations supports the organizational infrastructure BHD needs to operate effectively, communicate consistently, and remain accountable to staff, partners, providers, and communities. The office promotes the implementation of behavioral health strategies efficiently, equitably, and in alignment with OHA's mission to improve health outcomes for all Oregonians.

The Behavioral Health Quality Assurance (BHQA) unit collaborates across OHA programs, divisional teams, and community partners to ensure behavioral health services are safe, effective, inclusive, and compliant with state and federal requirements. The unit leads policy and rules coordination, supports compliance and quality improvement activities, and strengthens audit readiness through clear guidance and documentation assistance. BHQA also contributes to emergency preparedness and Medicaid alignment to reinforce Oregon's behavioral health system. Its work promotes equitable, trauma-informed, and healing-centered practices while ensuring policies and operations

Oregon Health Authority: Behavioral Health Division

Program Support and Administration

remain aligned with Behavioral Health Division priorities.

The Behavioral Health Resource Network (BHRN) program, formerly known as Measure 110, administers grants to organizations across Oregon to support individuals experiencing substance use disorders (SUD) or harmful substance use.

The program funds Behavioral Health Resource Networks (BHRNs), which consist of one or more entities working together within a county to provide community-based services. Each BHRN is required to provide trauma-informed, culturally specific, and linguistically responsive services across six service areas: screening, assessments, peer counseling and support, harm reduction, low-barrier substance use treatment, and housing.

In honor of the government-to-government relationship between the State of Oregon and the Nine Federally Recognized Tribes of Oregon, funding is also provided to each of the Nine Tribes and to two Tribal partners.

The Oversight and Accountability Council (OAC) advises the BHRN Program. Effective January 1, 2026, the OAC transitioned from its role as a decision-making body to an advisory body that provides recommendations to OHA regarding BHRN funding priorities, funding distribution, and educational efforts to increase awareness of services available through the program.

During the 2027-29 biennium, the program will continue to administer 231 grants, monitor program performance, support provider reporting and compliance requirements, and improve the collection and use of data to better understand service delivery, client needs, outcomes, service gaps, and the impact of BHRN-funded services across Oregon.

Oregon Health Authority: Behavioral Health Division

Program Support and Administration

The Behavioral Health Tribal Affairs Team has three full-time tribal liaison positions that lead the work with the Nine Federally Recognized Tribes in Oregon throughout the Division. They monitor contracts, plans, and reports, advocate for funding, and ensure inclusion in programs and policies that impact Tribal Communities. The OHA Tribal Affairs Director matrix manages all three positions in partnership with the Behavioral Health Division. Together, they work regularly with elected Tribal officials, Tribal health directors and behavioral health staff across all Nine Federally Recognized Tribes in Oregon, as well as Indian Health Services, Oregon's Urban Indian Health Program (UIHP), NARA Northwest, the Northwest Portland Area Indian Health Board, and other state agencies focusing on Tribal health priorities.

EQUITY AND COMMUNITY PARTNERSHIPS

The Behavioral Health Equity and Community Partnerships area consists of the Behavioral Health Equity and Community Partnerships Unit, the Office of Recovery and Resilience, and the Behavioral Health Metrics and Committees Unit. These units focus on accountability to individuals in Oregon most impacted by behavioral health inequities through community engagement, partnerships, and quality management. The units in this area partner with culturally and linguistically specific service providers and organizations, peer-led and peer delivered service providers and organizations, and internal agency equity-focused teams to promote accountability through partnership and progress reporting. The area serves the whole Behavioral Health Division.

The Equity and Community Partnerships unit supports the Behavioral Health Division's strategic priority to transform Behavioral Health with special attention to those at highest acuity and with the greatest need. It leads efforts within the division to reduce disparities in behavioral health outcomes and aligns closely with OHA's commitment to eliminate health inequities. Its work centers the voices of communities most impacted by inequities and builds strong partnerships across state sectors to equitably distribute resources and address both historical and present-day injustice. The unit advances this priority through five core strategies:

Program Support and Administration

- Share and use agency-and community-identified data to illuminate systemic inequities to inform behavioral health policy, funding, and practice.
- Elevate and promote policy initiatives led or supported by communities most impacted by behavioral health inequities to build a coordinated, high-quality behavioral health system that meets people where they are.
- Promote workforce development to build a sustainable, high-quality network of culturally specific and culturally responsive providers across the full continuum of care.
- Provide technical assistance to build the capacity of community-based organizations to navigate the behavioral health system and provider structures and strengthen support for internal state partners by offering guidance on program development and best practices for equity and community engagement.
- Increase communication with communities most impacted by health inequities to ensure access to information about behavioral health, funding opportunities, and other available supports.

The Office of Recovery and Resilience (ORR) ensures people with lived and living experience of mental health and substance use challenges have a strong voice within the state behavioral health system through building a statewide network of peer-run programs and engagement with consumers of the publicly funded behavioral health system. ORR is staffed by certified peer support workers who apply lived experience and expertise to program and policy analysis, development, and implementation. In this application, the ORR identifies and implements necessary changes to create a more person-directed, equitable, and effective behavioral health system. To ensure the voices of lived experience across the state are elevated, the ORR facilitates meaningful involvement of individuals with lived experience at all levels of behavioral health policy creation, service delivery, and program evaluation. This includes supporting expansion of training and providing technical assistance to OHA colleagues and community partners, as well as the responsibility for oversight and coordination of behavioral health advisory groups including the Oregon Consumer Advisory Council.

Oregon Health Authority: Behavioral Health Division

Program Support and Administration

The ORR promotes continued growth and incorporation of Peer-Delivered Services (PDS) in Oregon's behavioral health system. Working towards expanding the capacity and ensuring the health and longevity of all peer-delivered services programming in Oregon, including youth support, family support, and adult peer support, the ORR provides technical assistance and support to members of the PDS workforce and other system partners. Additionally, the team collaborates with members of the PDS workforce and other partners for strategic planning related to peer services, workforce development, and identifying and promoting sustainable funding for PDS in Oregon. Direct investment into the PDS Workforce through community partners and peer run organizations to provide provisions of trainings, curriculum development, standards of practice, and workforce wellness initiatives is a critical function of the ORR.

The ORR serves to connect with and build meaningful partnerships between OHA behavioral health and the communities we serve. By building community, connection, and relationships across systems and the people those systems are intended to serve, the ORR contributes to the elimination of stigma and discrimination faced by individuals who experience mental health or addiction challenges, as well as their families. This work ensures the integrity of the behavioral health system, as well as the 20 contracts overseen directly by the ORR.

The Behavioral Health Metrics and Committees unit is a central partner in advancing Oregon's behavioral health system transformation and advances OHA's efforts to improve outcomes, reduce disparities, promote trauma-informed care, and advance equity in partnership with communities and individuals with lived experience. The unit provides staff support to the Oregon Health Policy Board's Behavioral Health Committee and ensures that its work is aligned with OHA's goals for equitable, effective, and coordinated behavioral health care. The unit facilitates the committee's goal to develop quality measures for behavioral health services delivered by coordinated care organizations (CCOs), health care providers, counties, and other government partners. It also supports the development of incentives that encourage improvements in care. These measures and incentives focus on:

Program Support and Administration

- Improving the integration of physical and behavioral health care
- Timely access to needed care
- Care in the least restrictive and most supportive settings
- Reducing hospitalizations
- Reducing overdose

To ensure alignment across the system, the unit reviews programmatic contracts between OHA, CCOs, counties and individual providers. These contracts are required to reflect the Behavioral Health Committee's quality metrics and incentives under ORS 413.017 and must ensure that:

- Individuals can easily access appropriate care
- Services are responsive to both individual and community needs
- Care leads to meaningful and measurable improvement in people's lives

The unit also provides program support and administration by coordinating policy alignment, facilitating committee operations, managing documentation and communication workflows, and supporting cross-division collaboration. This includes reviewing administrative rules, tracking system-level performance, and advising on policy changes needed to support OHA's mission, vision, values, and operational goals.

BUSINESS OPERATIONS AND STRATEGY

The Behavioral Health Operations and Strategy area encompasses several units: the Business Operations Office, the Contracts Strategy and Coordination Unit, the Behavioral Health Workforce Incentives Unit, the Behavioral Health Investments Unit, the Mental Health Licensing and Certification Unit, and the Behavioral Health Licensing and Certification Unit. This area provides oversight, governance, and operational support for mental health and SUD funding while promoting a collaborative, community-centered approach to addressing systemic and institutional

Oregon Health Authority: Behavioral Health Division

Program Support and Administration

health inequities. It supports community-based licensed residential services, supportive housing, treatment facilities, program contracts and grants, and workforce incentives. Additionally, this section anchors the division's operational integrity and provides workforce support, position management, expenditures, administrative services, and operational governance across the Behavioral Health Division.

The Business Operations Office serves as a central hub for the Behavioral Health Division, providing comprehensive operational strategy, administrative support, contracting administration, and fiscal and governance functions. Comprising the Business Office Unit, Contracts Strategy and Coordination Unit, Position and Expenditure Management, Behavioral Health Investments Unit, and Behavioral Health Workforce Incentives Unit, it ensures smooth, compliant, and strategically aligned operations across the division.

The Business Office and Administrative Support unit oversees essential operational functions including recruitment support, employee onboarding, facilities coordination, software and hardware provisioning, travel logistics, mail processing, security protocols, systems access and governance, equipment and supplies management, and records management. These functions uphold the division's operational integrity by ensuring staff and programs have the tools, information, and secure environment needed to meet their responsibilities.

The Position and Expenditure Management unit provides critical governance, fiscal stewardship, and technical support to Executive Leadership and managers. Responsibilities include managing workforce positions through platforms such as Workday, coordinating budget actions, administering payments including invoices and stipends, and supporting administrative budget development. Together, these functions ensure the division operates efficiently, consistently, and in alignment with federal and state requirements.

The Contracts Strategy and Coordination unit serves as the division's centralized contracting governance hub, processing more than 1,500 contract action requests annually and managing biennial contract renewals. Contract

Oregon Health Authority: Behavioral Health Division

Program Support and Administration

specialists guide the development of contracts, grants, solicitations, and agreements to ensure alignment with program expectations, service requirements, and regulatory mandates. This includes overseeing agreements that fund behavioral health services delivered by Community Mental Health Programs, the Nine Federally Recognized Tribes in Oregon, Tribal organizations, and local service providers.

The unit monitors utilization, actual versus budgeted expenditures, funding commitments, and trends that inform future service levels. It ensures operational integrity by standardizing processes, supporting clear and compliant Statements of Work, coordinating timely engagement among partners, and ensuring fair payment for services rendered.

The unit also oversees contracting systems, automated workflows, approvals, CLM-based retention processes, and compliance with Oregon Public Contracting Code and federal reporting requirements. Through centralized communication, governance, and process optimization, the unit minimizes administrative burden and maximizes outcomes for programs, providers, and communities.

The Behavioral Health Workforce Incentives unit, established under House Bill 2949 (2021), strengthens Oregon's behavioral health workforce by supporting recruitment and retention of diverse providers, Tribal members, and rural residents. The unit administers scholarships, loan repayment programs, and grants designed to grow a culturally responsive workforce and expand access to equity-centered behavioral health care.

It advances operational integrity through transparent governance of incentive funding, supports supervised clinical experience for licensure, and collaborates with communities in shared decision-making to improve access to training and workforce development. These investments help build a workforce that reflects Oregon's communities and supports culturally responsive, community-driven behavioral health services.

Program Support and Administration

The Behavioral Health Investments team leads community-centered efforts to expand licensed residential services and supportive housing capacity. Its work emphasizes shared leadership, operational governance, and equitable development of behavioral health infrastructure across Oregon. Responsibilities include developing policies and procedures for administering funding to community partners and supporting the creation or expansion of residential treatment and supportive housing services.

The unit manages the Community Mental Health Housing Fund—a multimillion-dollar trust fund—and oversees a portfolio of forgivable loans and grants to ensure compliance with program and occupancy requirements. Staff actively engage with communities to identify barriers, share funding opportunities, provide technical assistance, and support capacity-building initiatives. The unit also administers the Birth Certificate program to assist individuals experiencing or at risk of homelessness in accessing vital documentation needed for services and benefits.

The Mental Health Licensing and Certification Unit oversees licensing, certification, registration, and monitoring of more than 350 programs statewide. Programs include Behavioral Health Agency with Choice, Crisis Stabilization Centers, Adult Foster Homes (with labor management oversight), Residential Treatment Facilities, Residential Treatment Homes, Secure Residential Treatment Facilities, and services located on Oregon State Hospital campuses. The team also oversees hold rooms, five-day hold hospitals, inpatient psychiatric units, psychiatric emergency services, secure transport services, and community-based structured housing.

Regulatory responsibilities include application reviews, policy and procedure evaluations, personnel and client record audits, interviews with providers and partners, and on-site inspections. The team documents findings through Site Review Reports, approves Plans of Correction, provides technical assistance, and investigates complaints and critical incidents. Licensing actions follow statutory and labor requirements, ensuring safety, compliance, and high standards of care across the mental health system.

Oregon Health Authority: Behavioral Health Division

Program Support and Administration

The Behavioral Health Licensing and Certification Unit provides regulatory oversight for more than 400 programs across over 950 locations, including Community Mental Health Providers, civil commitment processes, civil commitment examiner training, Mobile Crisis Intervention Services, and Certified Community Behavioral Health Clinics. The unit also regulates intensive treatment programs such as Psychiatric Residential Treatment Facilities, sub-acute and integrated psychiatric residential care, the Secure Children's Inpatient Program, and psychiatric day treatment. Additional programs overseen include Children's Emergency Safety Intervention services, SUD residential treatment, withdrawal management, problem gambling residential services, sobering facilities, and a wide range of outpatient behavioral health programs.

Activities include application administration, policy review, chart audits, staff and client interviews, site inspections, Statement of Deficiency development, Plan of Correction approval, technical assistance, critical incident investigation, and the issuing or conditioning of licenses and certificates. These efforts safeguard operational integrity, ensure compliance, and uphold high standards of behavioral health care across Oregon.

Revenue sources and changes

OHA's 2027-29 Agency Requested Budget for Program Support and Administration is comprised of 55 percent General Funds, 32 percent Federal Funds, 11 percent Other Funds, and 2 percent Lottery Funds.

General Fund revenue funds administrative support, staffing, services and supplies, and the maintenance and operations of the information technology systems for the division's behavioral health programs.

Oregon Health Authority: Behavioral Health Division

Program Support and Administration

Program Support and Administration receives Federal Funds through Medicaid administrative match, small amounts of federal block grants to meet administrative requirements, and other federal grants to fulfill the grant obligations.

General Funds to support Behavioral Health Programs and Administrative Services, that support Behavioral Health, and Medicaid Services & Contracting.

Other Funds include Lottery Funds and allocations from funding sources for admin, including:

- The Tobacco Master Settlement Agreement
- Tobacco taxes
- Lottery Funds
- Marijuana taxes
- Drug Treatment and Recovery Services Fund (BHRN)
- Intoxicated Driver Program Fund
- Opioid Settlement Fund
- Private Agency Certification Fund
- Community Based Housing Registration Fee
- 988 State Grant
- 988 Telecom Tax

Federal Funds include:

- Community Mental Health Services Block Grant (MHBG)
- Substance Use Prevention, Treatment, and Recovery Services Block Grant (SUPTRS BG)
- Medicaid (Title XIX)
- Children's Health Insurance Program (Title XXI)

Program Support and Administration

- SAMHSA 988 Capacity Grant
- Projects for Assistance in Transition from Homelessness Grant (PATH)
- State Opioid Response Grant

Oregon Health Authority: Behavioral Health Division

System of Care Advisory Council

Expenditures by fund type, positions and full-time equivalents

System of Care Advisory Council	General Fund	Other Funds	Federal Funds	Total Funds	Positions	FTE
2025-27 LAB	\$7.23	\$0.00	\$1.04	\$8.26	5	4.25
2027-29 ARB	\$9.40	\$0.00	\$1.13	\$10.53	5	5.00
Difference	\$2.17	\$0.00	\$0.10	\$2.27	0	0.75
Percent	30%	0%	9%	27%	0%	18%

The Agency Request Budget of \$10.5 million Total Funds continues funding for the System of Care Advisory Council (SOCAC) at the current service level for the 2027-29 biennium.

Activities, programs and issues in the program unit base budget

The programs and services in this budget seek to improve the effectiveness and efficacy of state and local systems of care that provide services to youth by providing a centralized and impartial forum for statewide policy development and planning. SOCAC develops and maintains a comprehensive long-range plan for a coordinated state system of care that encompasses public health, health systems, child welfare, education, juvenile justice, and services and supports for people with mental and behavioral health diagnoses and people with intellectual or developmental disabilities. Given Oregon's high rate of unmet mental health care for children and youth, our low graduation rates, high acuity for youth and young adults, and lack of access to community-based services and supports for children and youth with complex needs, the need for a robust strategy and policy development for children's system of care services and supports continues into 2027-2029.

Overall, Policy Priorities seek to lay the foundation and create the financial conditions to:

- Increase access to coordinated, integrated, and community-based systems of care;
- Promote the co-creation of equitable policy and systems by providers and the youth and families they serve; and
- Create sustainable infrastructure that increases the system of care's capacity and credibility.

Oregon Health Authority: Behavioral Health Division

System of Care Advisory Council

The current SOCAC budget provides a level of staffing, with subject matter expertise, to support the four SOCAC participating state agencies, county partners, treatment and service providers, and people with lived expertise in navigating Oregon’s complex systems of care and to continue implementation of the 2026-29 System of Care Strategic Plan. This budget allows the SOCAC to continue ongoing community engagement, technical assistance, and grants to the Nine Federally Recognized Tribes of Oregon, NARA (Native American Rehabilitation Center Northwest), and Local Systems of Care governance structures to engage in data-informed decision making, system coordination and local barrier resolution, and evaluation of best and promising practices to make recommendations to the Governor, the Legislature, and state agencies.

Background information

The System of Care Advisory Council is an independent state agency created by the Legislature in 2019 to improve the effectiveness and efficiency of Oregon’s publicly funded child serving systems of care and support. SOCAC does this by working with the Governor’s office, partner state agencies, providers of children’s treatment and support services, people with lived experience, and others to develop and implement four-year Strategic Plans for Oregon to become a state where all children, youth and families – across all backgrounds – are safe, well, thriving in their homes and communities, and supported by responsive and affirming systems designed with and for them. The 2026-29 System of Care Strategic Plan is rooted in the System of Care philosophy and prioritizes the following values: centering children, youth, and families with lived and living experience; increasing awareness and reducing stigma; promoting sustainable change; prioritizing community care; and advancing equity by improving accessibility, affordability, and quality. This Plan led to the creation of a new committee structure for the SOCAC and built in partnership with lived experts, peer support providers, and local and regional structures to build a more sustainable children’s system of care.

Oregon Health Authority: Behavioral Health Division

System of Care Advisory Council

Ultimately, all of SOCAC's work is aimed at improving access to and outcomes from Oregon's publicly funded children's service system, reducing acuity in the adult mental health and correctional systems, and improving health equity by prioritizing a focus on children and youth involved in two or more child-serving systems. Implementation of the Strategic Plan relies on tracking statewide and regional metrics, engaging local and regional system leaders and providers, and aligning communication, funding, and policy across the four participating state agencies, while also meaningfully engaging lived experts in leading system transformation that results in improved outcomes for Oregon's most vulnerable children and youth.

Revenue sources and changes

The SOCAC budget is comprised of 88% General Fund and 12% Federal Funds.

The additional .75 position is simply the removal of vacancy savings from this position, which was legislatively created in 2025. SOCAC also enjoys a full-time Data Analyst position provided by the Health Policy and Analytics team, which functions as a full-time member of the SOCAC team, jointly supervised by the SOCAC Director and the HPA Program Manager.

Proposed new laws that apply to the program unit

SOCAC is proposing an update to the statutes governing our work to add a Governor-appointed seat for the Medicaid Director or their designee on the Council and to remove some outdated language describing our Data Dashboard. This policy is not expected to have any fiscal impact or any policy impact on any other agency or division.

Oregon Health Authority: Behavioral Health Division

Alcohol and Drug Policy Commission

Expenditures by fund type, positions and full-time equivalents

Alcohol and Drug Policy Commission	General Fund	Other Funds	Federal Funds	Total Funds	Positions	FTE
2025-27 LAB	\$3.77	\$0.00	\$0.37	\$4.13	10	7.00
2027-29 ARB	\$3.87	\$0.00	\$0.40	\$4.27	8	8.00
Difference	\$0.10	\$0.00	\$0.03	\$0.14	-2	1.00
Percent	3%	0%	9%	3%	-20%	14%

The Agency Request Budget of \$4.3 million Total Funds continues funding for the Alcohol and Drug Policy Commission (APDC) at the current service level for the 2027-29 biennium.

Activities, programs and issues in the program unit base budget

The programs and services in this budget seek to improve access to evidence-based, evidence-informed, and culturally informed substance use prevention, substance use disorder treatment, and recovery support services by establishing state policies and holding participating state agencies accountable for carrying out those policies. The ADPC develops, disseminates, and implements the comprehensive substance use prevention, substance use disorder treatment, and recovery supports service plan for the state. Given the state's prevalence of substance use disorders, rates of overdose, and other substance use-related deaths, the constantly evolving illicit drug market, and health disparities related to substance use disorder, the need for a robust strategy for substance use disorder (SUD) services and supports continues into 2027-2029.

Overall, Policy Priorities seek to lay the foundation and create the financial conditions to:

- Reduce the prevalence of SUDs in Oregon;
- Reduce deaths related to SUDs; and
- Reduce health disparities related to SUDs.

Oregon Health Authority: Behavioral Health Division

Alcohol and Drug Policy Commission

The current ADPC budget provides a level of staffing, with subject matter expertise, to support the ADPC 14 participating state agencies and to continue implementation of the 2026-30 Comprehensive Plan. The budget also allows the ADPC to continue ongoing community engagement, training and technical assistance, contracts to study emerging issues and treatments, and evaluation of best practices to make recommendations to the Governor, the Legislature, and state agencies.

Background information

The ADPC is an independent state agency created by the Legislature in 2009 to improve the effectiveness of substance use services for all Oregonians. ADPC does this by working with the Governor's office, partner state agencies, providers of substance use services, people with lived experience, and others to develop and implement five-year Comprehensive Plans for Oregon to address substance use disorder. The 2026-30 Comprehensive Plan adopted the Recovery Oriented System of Care framework and prioritized strategies related to primary prevention, treatment, recovery, youth, health & safety interventions (risk reduction), as well as infrastructure for a sustainable SUD prevention and care system.

Ultimately, all of ADPC's work is aimed at reducing Oregon's substance use disorder rate and reducing substance-use-related deaths and health disparities. Implementation of the Comprehensive Plan relies on tracking these metrics while also developing metrics and outcomes measures in order to evaluate current programs and spending for evaluation and system improvement that results in improved outcomes for Oregonians.

Oregon Health Authority: Behavioral Health Division

Alcohol and Drug Policy Commission

Revenue sources and changes

The ADPC budget is comprised of 91% General Fund and 9% Federal Funds.

The one additional position resulted from the transfer of one existing position from the Public Health Division to the Alcohol and Drug Policy Commission. This position was created within the Public Health Division to provide support to the ADPC. The position has functioned as a full-time member of the ADPC team, supervised by the ADPC Director, for three years. The Public Health Division and ADPC agreed in the past year to formalize the transfer of the position to the ADPC. This transfer is reflected in the ADPC Continuing Service Level.

Proposed new laws that apply to the program unit

ADPC proposed Legislative Concept 457 in collaboration with the Department of Corrections, Oregon Youth Authority, Youth Development Oregon and Oregon Health Authority. The proposal would update reporting requirements related behavioral health programs in carceral settings. The legislation has no fiscal impact.

Oregon Health Authority: Behavioral Health Division

Community Mental Health Programs

Expenditures by fund type, positions, and full-time equivalents

Percent	0%	0%	0%	0%	0%	0%

Activities, programs, and issues in the program unit base budget

The Behavioral Health Division (BHD) administers Oregon's comprehensive public behavioral health system by partnering with the Nine Federally Recognized Tribes of Oregon, Community Mental Health Programs (CMHPs), coordinated care organizations, local providers, and community-based organizations to ensure Oregonians have access to prevention, treatment, recovery, crisis, housing, and support services across the continuum of care. BHD oversees community mental health services for children, youth, adults, older adults, and individuals with complex behavioral health needs, including crisis response, civil commitment and Aid and Assist services, outpatient and residential treatment, supportive housing, suicide prevention, workforce development, peer-delivered services, school-based and early intervention programs, and specialized services for Tribal communities and veterans. The division also provides statewide system leadership through policy development, contracts, strategic investments, capital infrastructure, workforce initiatives, and administration of the County Financial Assistance Agreement (CFAA), strengthening Oregon's behavioral health system while advancing equitable, culturally responsive, and community-based care.

Tribal Behavioral Health: All behavioral health funding, unless stipulated differently by statute, are included in one comprehensive Tribal Behavioral Health agreement that includes funding for both mental health and alcohol and

Oregon Health Authority: Behavioral Health Division

Community Mental Health Programs

drug services. Tribes/UIHP prepare plans and budgets to fit the needs of their community, submit reports on strategies and outcomes. Below provides descriptions of the mental health programs:

- **Tribal Mental Health:** Improve the mental health of individuals and families, Tribe/UIHP can utilize the following strategies based on community need utilizing the following subject areas: Mental Health Promotion and Prevention, Crisis Services, Jail Diversion, Supportive Housing/ Peer Delivered Services, System of Care and Care Coordination and Missing Murdered Indigenous People.
- **Tribal Veterans Behavioral Health:** Increase the behavioral health, increase access to behavioral health services, and/or increase the availability of military specific behavioral healthcare services for the veteran and military population.
- **Tribal Youth Suicide Prevention:** Create wellness for Oregonian young people (ages 0-24) ensuring that young people can build connectedness, to cope well when life is hard, and to access help when needed.
- **Tribal Workforce Retention:** Support Oregon's behavioral health workforce by providing educational incentives that bolster recruitment and retention efforts. Grant funds may be used to offer educational incentives to staff whose training or credentialing enables them to provide direct behavioral health services, or to expand the behavioral health services they are able to deliver. Awarded entities must implement strategies that contribute to a more diverse, culturally and linguistically specific, and geographically distributed behavioral health workforce.
- **Tribal Residential and Housing:** Intent of the funding appropriation is to be an investment in Oregon's community-based behavioral health and substance abuse treatment systems. Specifically, for increasing statewide capacity of licensed residential facilities and housing serving people with behavioral health conditions.

Oregon Health Authority: Behavioral Health Division

Community Mental Health Programs

Community Mental Health Program Administration: Oregon's Local Mental Health Authorities are responsible for establishing or operating CMHPs across the state, subject to available funding. A Local Mental Health Authority (LMHA) is defined as:

- The Board of County Commissioners,
- The Tribal Council of a federally recognized tribe, or
- A group made up of two or more county governments working together as a regional mental health authority.

If an LMHA declines to establish or operate a CMHP, BHD may establish a grant agreement directly with another public agency or private corporation to operate the CMHP. BHD currently has seven such agreements:

- Adapt Integrated Health Care operates the CMHP for Curry County
- Adapt Integrated Health Care operates the CMHP for Douglas County
- Columbia Community Mental Health, Inc. operates the CMHP for Columbia County
- Klamath Basin Behavioral Health operates the CMHP for Klamath County
- Lifeways, Inc. operates the CMHP for Malheur County
- Symmetry Care, Inc. operates the CMHP for Harney County
- Wallowa Valley Center for Wellness operates the CMHP for Wallowa County

The CFAA is the grant agreement by which BHD partners with LMHAs and CMHPs to establish performance expectations, provide oversight and technical assistance, and coordinate delivery of a comprehensive continuum of community-based behavioral health services. The CFAA was recently rewritten, providing statewide direction to satisfy requirements and ensure minimum expectations across the state. The new structure emphasizes accountability while also allowing for variations to address local needs. The new CFAA went into effect January 1, 2026, and clearly focuses on mandated populations to be served, including individuals who have been civilly

Oregon Health Authority: Behavioral Health Division

Community Mental Health Programs

committed, those who are unable to aid and assist in their own defense, and those who have been found guilty except for insanity. The flexible service array is described within eight Core Service Areas listed below:

- System Management & Coordination
- Crisis Services
- Forensic & Involuntary Services
- Outpatient & Community-Based Services
- Residential & Housing Support Services
- Behavioral Health Promotion & Prevention
- Block Grant Funded Services
- Invoiced Services

Through the CFAA, BHD allocates state and federal funding to support the operation of the CMHP including funding for individuals who are not eligible for Medicaid or for behavioral health services and supports that are not reimbursable through Medicaid. The 2026-2027 CFAA includes new investments for Aid & Assist services (\$10 million) and Civil Commitment services (\$4.25 million) as well as support for additional liability insurance costs related to serving individuals under Aid & Assist orders.

ADULT BEHAVIORAL HEALTH

Adult Behavioral Health (ABH) serves as a core pillar within the Behavioral Health Division, responsible for shaping and coordinating Oregon's statewide continuum of care for adults with mental health needs. Its role is both strategic and operational, overseeing prevention, treatment, recovery, housing, residential care, and forensic services that must function cohesively to meet complex and evolving population needs. ABH works across every level of the behavioral health landscape, from community prevention programs and outpatient care to residential services and court-mandated civil and forensic processes, ensuring that adults receive timely, culturally responsive, and clinically

Oregon Health Authority: Behavioral Health Division

Community Mental Health Programs

appropriate supports. Through this expansive portfolio, ABH functions as a division integrator, aligning policy, funding, system design, and service delivery to build a behavioral health system capable of supporting adults with the highest levels of need.

ABH oversees a wide range of outpatient and community-based programs that support adults living with serious and persistent mental illness (SPMI), co-occurring disorders, trauma histories, chronic homelessness, or complex social needs. ABH advances evidence-based models such as Assertive Community Treatment (ACT), Individual Placement and Supports (IPS), and integrated co-occurring disorder services. Additionally, ABH advances wraparound supports including rental assistance, behavioral health housing models, and targeted services for individuals with complex needs, older adults, veterans, and pregnant and parenting individuals. And through the Older Adult Behavioral Health Initiative, ABH ensures geriatric behavioral health expertise is embedded across communities statewide.

ABH also plays a critical role in Oregon's residential and system-flow infrastructure. In partnership with Medicaid, ABH is leading a comprehensive redesign of the statewide mental health and substance use residential system, including a new strategic plan focused on access, quality, care transitions, workforce, and data modernization. The Extended Care Management Unit (ECMU), Northwest Regional Re-Entry Center (NWRRC), and Behavioral Health Coordination Center (OBCC) all operate under ABH's residential and capacity management work—helping counties resolve discharge barriers, supporting hospital step-downs, analyzing flow through residential levels of care, and improving visibility into bed availability. These efforts, in addition to a strong partnership with the Oregon State Hospital (OSH), are essential to reducing bottlenecks at OSH, increasing least-restrictive placements, and creating consistent statewide standards for admission and transition processes.

Finally, ABH anchors Oregon's forensic and civil behavioral health systems, areas where behavioral health intersects most directly with public safety and the courts. The Aid & Assist Unit coordinates statewide competency

Community Mental Health Programs

restoration under the Mink-Bowman mandate, ensuring timely admissions, compliance with court timelines, and collaboration across OSH, jails, courts, CMHPs, and community restoration providers. The Community Restoration Evaluation Unit (CREU) manages statewide competency reevaluations, evaluator workflows, quality assurance, and cross-system coordination. Meanwhile, the Civil Commitment Unit oversees ORS 426 rulemaking, statewide investigator training and certification, and implementation of HB 2005 reforms. The Psychiatric Security Review Board (PSRB) team manages conditional release oversight, quality monitoring, and transitions for individuals under PSRB jurisdiction. Together, these programs form the backbone of Oregon’s adult forensic behavioral health continuum—ensuring due process, system accountability, public safety, and access to clinically appropriate community-based care.

The Aid and Assist Unit plays a foundational role in Oregon’s forensic behavioral health system by providing statewide management, coordination, and performance oversight of competency restoration processes. The unit works across every level of government, including courts, jails, OSH, CCMHPs, CCOs, residential providers, law enforcement, and the Governor’s Office, to ensure that individuals under ORS 161 Aid and Assist orders receive timely evaluations, admissions, and restoration services. As a central hub of forensic system coordination, the unit analyzes statutes, develops legislative concepts, manages Oregon Administrative Rules, oversees contracts, provides technical assistance, and troubleshoots system barriers to promote continuity and accountability across the forensic continuum.

A critical part of the program’s work involves close collaboration with the Mink-Bowman Court Monitor and the judicial branch. The unit ensures compliance with court-ordered timelines for admission to OSH, supports the development of community-based restoration pathways, and provides weekly performance data to support state-level oversight. It engages in case-specific problem-solving, facilitates barrier removal, and coordinates care across multiple systems to prevent unnecessary hospitalizations and promote timely return to court competency.

Community Mental Health Programs

determinations. As the state continues to face financial penalties for non-compliance with Mink-Bowman mandates, the Aid and Assist program's work is central to Oregon's efforts to increase restoration capacity and reduce backlogs across the system.

Beyond operational oversight, the Aid and Assist program supports system transformation through policy leadership, cross-system planning, and development of standardized workflows that help align community restoration, hospital-based restoration, and judicial processes. Its functions are essential to ensuring that individuals with behavioral health needs involved in the criminal legal system receive appropriate services in the least-restrictive setting possible, while maintaining statewide consistency, transparency, and public safety.

Accomplishments: Major accomplishments include the successful implementation of House Bill 2005 (2025), which required emergency Oregon Administrative Rules updates, revised CMHP reporting requirements, and large-scale technical assistance to partners statewide. The Community Navigator Program expanded from five to nine sites, strengthening transitions for individuals returning from OSH and improving continuity of care. The unit improved coordination with courts and counties, established standardized workflows for barrier removal, and increased collaboration with key partners including the judicial branch, the Court Monitor, and statewide law enforcement entities. These achievements strengthened statewide consistency, improved data transparency, and supported progress toward meeting Mink-Bowman timelines.

Challenges: Persistent challenges include operational pressure from Mink-Bowman compliance requirements, limited system capacity for timely OSH admissions, and significant cross-system coordination demands. Variability in county resources and judicial practices creates inconsistent experiences for individuals navigating the Aid and Assist process. Workforce shortages across evaluation, treatment, and restoration providers contribute to delays, while complex, high-acuity cases require intensive care coordination. These

Community Mental Health Programs

barriers place ongoing strain on the system's ability to meet legal timelines, maintain statewide consistency, and ensure timely, clinically appropriate restoration services.

The Community Restoration Evaluation Unit (CREU) manages the statewide system of court-ordered competency reevaluations for individuals placed on community restoration under ORS 161. Its work ensures legal compliance, clinical quality, and timely case processing across a complex network of evaluators, courts, CMHPs, OSH, CCOs, Tribal partners, and community restoration providers. CREU's operational scope includes evaluator qualification standards, assignment protocols, report quality assurance, data analysis, policy alignment, and technical assistance to system partners. By maintaining statewide protocols, CREU strengthens consistency and reduces variability across Oregon's forensic evaluation system.

CREU plays a central role in supporting statewide compliance with Mink-Bowman mandates by enforcing court-driven timelines, implementing neutral expert recommendations, and ensuring that community restoration evaluations incorporate discharge planning and placement guidance. These elements accelerate movement to the least-restrictive setting appropriate for each individual and reduce unnecessary reliance on hospital-level care. CREU also maintains transparent data and reporting practices that support judicial decision-making, legislative oversight, and operational improvements within OHA.

The program supports evaluator workforce sustainability through targeted training, supervision, and compliance coaching, all of which help ensure consistent adherence to statewide standards. CREU also works closely with Aid and Assist to identify systemwide barriers, coordinate cross-agency responses, and strengthen the overall forensic evaluation infrastructure.

Accomplishments: CREU successfully standardized statewide evaluator protocols, implemented strengthened report quality expectations, and advanced compliance with Mink-Bowman requirements through integration of

Community Mental Health Programs

discharge planning into evaluations. CREU improved transparency by maintaining consistent data and reporting practices, supported workforce development through evaluator training and supervision, and increased alignment with statutory and court-ordered expectations. These accomplishments strengthened the quality and reliability of Oregon's community restoration system and improved collaboration across judicial and behavioral health partners.

Challenges: CREU faces challenges related to evaluator workforce shortages, rising caseloads, and increasing complexity of clinical and legal requirements. Continued pressure to meet mandated timelines under Mink-Bowman creates operational strain, particularly when evaluator capacity is insufficient to meet demand. Limited resources in rural areas and inconsistent community restoration options further complicate evaluation and placement processes. These challenges hinder the system's ability to deliver timely, high-quality evaluations and maintain statewide consistency.

The Outpatient Services and Strategic Initiatives Unit oversees a diverse portfolio of programs designed to support adults with complex behavioral health needs across Oregon. Its role spans mental health, substance use, co-occurring disorders, rental assistance and support services for permanent supportive housing, specialized populations, and statewide system development. The unit functions as a backbone for community-based care, providing technical assistance, contract oversight, evidence-based practice implementation, and program development that supports individuals with serious and persistent mental illness (SPMI), co-occurring disorders, housing instability, involvement with the criminal legal system, and other social and medical complexities. The unit's work is guided by OAR Chapter 309-019 Outpatient Behavioral Health Services.

A core area of this unit's work includes Assertive Community Treatment (ACT) and Individual Placement and Supports (IPS). ACT provides intensive, multidisciplinary services for individuals with SPMI, helping reduce reliance on inpatient care while promoting community stability. IPS integrates supported employment within behavioral health

Oregon Health Authority: Behavioral Health Division

Community Mental Health Programs

treatment, offering job readiness, placement, and follow-along supports that enhance long-term recovery. The unit also manages specialized programs for pregnant and parenting families impacted by substance use, including women's residential substance use disorder (SUD) programs and Nurture Oregon, which integrates perinatal care, peer support, contingency management, and transitional housing to support family stability and long-term recovery.

Additional program areas include services for older adults and veterans, such as the Older Adult Behavioral Health Initiative and the Veterans and Military Behavioral Health Program. These initiatives provide targeted consultation, workforce development, suicide prevention, and culturally specific services that strengthen statewide capacity. The Integrated Co-Occurring Disorders Program supports over 50 provider agencies through enhanced payment models, certification pathways, training, and technical assistance. Homelessness and housing support such as Projects for Assistance in Transition from Homelessness (PATH) and rental assistance programs provide long-term housing paired with behavioral health services, reducing chronic homelessness and supporting system flow.

Accomplishments: Successes across the unit include expansion of evidence-based practices like ACT, IPS, and Integrated Co-occurring Disorders, improved perinatal and family services through Nurture Oregon, national recognition for older adult initiatives, the launch of Oregon's first veteran-specific peer support program, and sustained reductions in chronic homelessness achieved through supportive housing approaches. These accomplishments strengthen community stability, expand culturally responsive care, and advance integrated service delivery across Oregon.

Challenges: Challenges include persistent workforce shortages, rising operational costs, and funding structures that lag behind current needs, particularly for women's residential programs and rural behavioral health providers. IPS remains vulnerable to budget reductions; ACT oversight capacity is limited; and programs like Nurture Oregon continue to face stigma, workforce burnout, and inadequate housing resources. Specialist positions supporting older adults are at risk due to CFAA restructuring, veterans' services lack a

Community Mental Health Programs

statewide military-service identifier, and statewide housing shortages restrict supportive housing options. These constraints place pressure on the full continuum of outpatient and community-based care.

The Extended Care Management Unit (ECMU) plays a vital operational role in improving the timely discharge of Ready-to-Place individuals from the Oregon State Hospital, SRTFs, and other high-acuity settings into appropriate community placements. With the end of the CHOICE Model, ECMU plays a critical role in ensuring timely care coordination. The unit supports eight participating counties through weekly or monthly coordination meetings, individualized case reviews, and ongoing communication via email and collaborative platforms. The unit works case-by-case to identify barriers, resolve system navigation issues, support funding and benefits access, clarify county-of-responsibility, and provide wraparound planning to ensure smooth transitions into stable community placements.

ECMU collaborates extensively with providers, CMHPs, residential programs, CCOs, and cross-agency partners to support complex discharges. The unit participates in Complex Discharge Meetings, helps onboard new providers, and provides technical assistance related to benefits coordination, documentation, care coordination, and system navigation. ECMU also tracks referrals, resource needs, barriers, progress, and backup plans to support counties in achieving timely discharge outcomes.

A major advancement underway is the transition of ECMU reporting to Smartsheet project management software, which will reduce administrative burden, streamline documentation, and improve real-time tracking of discharge barriers and progress. This increased efficiency will allow counties to focus more time on discharge planning and less on manual reporting, strengthening statewide capacity to reduce unnecessary hospital days and improve flow across the residential continuum.

Community Mental Health Programs

Accomplishments: ECMU has strengthened communication and collaboration across counties, improved discharge timelines by two (2) days for Ready-to-Place individuals and provided critical barrier-resolution support to reduce unnecessary hospital and SRTF stays. The program's coordination across multiple agencies, combined with its role in Complex Discharge Meetings, has improved placement outcomes. The ongoing transition to Smartsheet is expected to further streamline operations, enhance data consistency, and support more efficient statewide discharge processes.

Challenges: ECMU continues to face challenges related to the pace of new residential capacity coming online, and workforce shortages. Complex cases often require extensive coordination across numerous systems, leading to delays. Additionally, Medicaid coverage interruptions, inconsistent documentation practices, and variability in county engagement add to operational strain. As system needs grow, ECMU must balance high-acuity case complexity with limited local resources and statewide bottlenecks in placement availability.

The Civil Commitment Unit plays a central role in Oregon's behavioral health and legal systems by overseeing policy creation, refinement, and implementation related to the civil commitment process established in ORS 426. With the passage of House Bill 2005 (2025), the responsibilities of the Civil Commitment Unit expanded significantly, requiring substantial updates to Oregon Administrative Rules, revisions to statewide forms, and enhanced training and technical assistance for CMHPs. The unit ensures that civil commitment investigations, hearings, and placements align with statutory requirements, due process protections, and trauma-informed practices. It also directs partners back to statute and rule for guidance and collaborates with the Oregon Department of Justice when needed, as OHA cannot provide legal advice.

The unit is responsible for the initial certification and ongoing recertification of Mental Health Investigators and Examiners, roles essential to the functioning of Oregon's civil commitment system. Certification requirements have

Oregon Health Authority: Behavioral Health Division

Community Mental Health Programs

been strengthened to ensure these professionals have a deep understanding of the legal and procedural obligations associated with civil commitment. The Civil Commitment Unit also updates and disseminates forms statewide to ensure consistency and alignment with House Bill 2005 reforms. It provides technical assistance to CMHPs, community partners, and members of the public who have questions about the civil commitment process, helping to ensure that partners understand statutory expectations and system requirements.

In addition to policy oversight and training, the unit carries responsibility for tracking the placement of all individuals under civil commitment. This includes reviewing and analyzing quarterly data submitted by CMHPs and examining statewide trends. The unit monitors how House Bill 2005 is impacting the system and identifies emerging patterns or concerns, including potential disparities that may affect communities of color. By maintaining statewide visibility into civil commitment placements and outcomes, the unit supports accountability and informs system improvements across Oregon's behavioral health and legal continuum.

Accomplishments: The Civil Commitment Unit accomplished major system reforms through the implementation of House Bill 2005, which required emergency updates to Oregon Administrative Rules, extensive revisions to statewide forms, and expanded training and technical assistance for CMHP staff statewide. The unit strengthened certification processes for Mental Health Investigators and Examiners, ensuring consistent statewide standards and improved statutory alignment. By updating forms to match new legal requirements and offering ongoing technical assistance, the unit increased accuracy, uniformity, and compliance across the commitment process. Additionally, the unit ensured continuity of civil commitment operations statewide by maintaining clear communication channels with CMHPs and supporting their transition to new legal procedures and reporting requirements.

Challenges: Challenges for the Civil Commitment Unit include managing expanded responsibilities under HB 2005, supporting CMHPs in adopting new requirements, and maintaining consistency in investigation and

Community Mental Health Programs

hearing procedures across counties. Workforce capacity remains a concern, as investigators and examiners must meet higher training and certification standards while responding to increased complexity in civil commitment cases. Data collection gaps persist (particularly around the impact of civil commitment processes on communities of color) limiting the state's ability to fully assess outcomes and equity considerations. Additionally, CMHPs vary in resources and staffing, leading to inconsistent practices and uneven implementation of statutory expectations across Oregon's behavioral health system.

The Psychiatric Security Review Board (PSRB) program plays a critical role in Oregon's forensic behavioral health system by overseeing individuals under PSRB jurisdiction who are conditionally released to community settings or placed in secure residential facilities. The PSRB program ensures that individuals found Guilty Except for Insanity (GEI) receive appropriate supervision, treatment, and monitoring while supporting their gradual transition to less restrictive environments. The PSRB team serves as the operational arm of this system, coordinating with CMHPs, case monitors, residential providers, and Oregon State Hospital to maintain public safety while promoting individual recovery and stability.

The PSRB team provides system-wide support through quarterly CMHP meetings, twice monthly coordination sessions with PSRB and OSH, and ongoing technical assistance to providers. These touch points ensure that the complex requirements of community supervision—including adherence to treatment plans, risk management strategies, and conditional release terms—are consistently implemented. The PSRB program also manages critical reporting functions, including conditional release evaluations, monthly progress reports, and annual comprehensive reviews. These reports inform statewide oversight, identify risks early, and support safe and effective community placements.

As part of the County Financial Assistance Agreement (CFAA), OHA also manages invoiced services for individuals under PSRB jurisdiction. These services, such as additional licensed medical provider sessions or specialized

Oregon Health Authority: Behavioral Health Division

Community Mental Health Programs

supports linked to a client's risk profile, are reviewed monthly to ensure alignment with the program's goals and allowable cost structures. Through this oversight, the PSRB team maintains strong accountability, ensures continuity of care, and supports consistent standards statewide.

Accomplishments: The PSRB program has strengthened statewide supervision and monitoring through consistent audit practices, including timely review of conditional release evaluations, monthly progress reports, and annual comprehensive reviews. Coordination between OHA, PSRB staff, residential providers, and OSH has improved transition planning and reduced barriers to community placement. Regular consultation groups for Secure Residential Treatment Facility providers and case monitors have enhanced consistency, promoted shared problem-solving, and improved collaboration across agencies. These achievements have contributed to safer transitions, stronger accountability structures, and improved treatment continuity for individuals under PSRB jurisdiction.

Challenges: The PSRB program continues to face significant challenges, including growing supervision complexity as individuals present with higher acuity needs and co-occurring conditions. Workforce shortages impact residential providers, case monitors, and mental health professionals, creating strain across the system. Inconsistent resources among counties affect the quality and timeliness of evaluations and reports, while rising operational costs threaten the stability of secure residential placements. Increased coordination demands and limited capacity across partner agencies also pose ongoing challenges, making it difficult to maintain consistent oversight and ensure that individuals receive the level of care and supervision required for successful community placement.

CHILD, FAMILY & LIFESPAN BEHAVIORAL HEALTH SERVICES

The Child, Family and Lifespan Behavioral Health Services section provides statewide leadership, policy development, program oversight, and system coordination to ensure Oregonians across the lifespan have access to

Community Mental Health Programs

high-quality, equitable, and community-based behavioral health services. Through the Child & Family Behavioral Health and 988 & Behavioral Health Crisis System units, the section advances prevention, early intervention, crisis response, treatment, recovery, and suicide prevention initiatives that improve behavioral health outcomes while reducing disparities in access to care. These programs work collaboratively with Community Mental Health Programs (CMHPs), coordinated care organizations (CCOs), Tribal governments, schools, health systems, community-based organizations, and other state agency partners to strengthen Oregon's behavioral health continuum. Together, they oversee critical statewide programs, support implementation of evidence-based and culturally responsive practices, provide technical assistance and quality improvement, and advance strategic investments that improve access to timely behavioral health services for children, youth, young adults, adults, and families throughout Oregon.

The 988 & Behavioral Health Crisis System unit leads the development, oversight, and continuous improvement of Oregon's statewide behavioral health crisis system. Guided by the Crisis Now framework, the unit works to ensure every Oregonian has someone to contact, someone to respond, and a safe place to receive care during a behavioral health crisis. The unit oversees the statewide 988 Lifeline, Mental Health Crisis Services for Adults & Children, Mobile Response & Stabilization Services, Crisis Stabilization Center (CSC) development, and the Adult Suicide Prevention Coordinator. It also provides statewide policy leadership, quality improvement, data and performance monitoring, technical assistance, administrative rulemaking, budget oversight, training through the Crisis System Training Academy, and coordination with CMHPs, the Nine Federally Recognized Tribes in Oregon, CCOs, and other partners to strengthen Oregon's crisis continuum.

Established through HB 2417 (2021) and HB 2757 (2023), the unit is responsible for expanding access to high-quality, equitable crisis services while reducing barriers to care. Its work includes improving data transparency,

Oregon Health Authority: Behavioral Health Division

Community Mental Health Programs

supporting implementation of crisis services statewide, overseeing the County Financial Assistance Agreement (CFAA) crisis service area, developing sustainable funding strategies, and advancing Oregon's 2023-2027 Adult Suicide Intervention and Prevention Plan (ASIPP).

Accomplishments: The unit has made significant progress in strengthening Oregon's crisis system. Public awareness and use of 988 continue to grow following the statewide outreach campaign, while enhanced data dashboards and collaboration with crisis partners have improved quality assurance and data-driven decision-making. Mobile crisis services continue to expand through increased utilization, integration of Family Support Specialists, and stronger coordination with Tribal communities. The unit has also established temporary administrative rules for Crisis Stabilization Centers, supported the development of six centers statewide, and continues to provide technical assistance and community engagement to strengthen local crisis infrastructure. Adult Suicide Prevention efforts have advanced through implementation of the ASIPP and publication of its first statewide progress report.

Challenges: Despite these accomplishments, the unit faces ongoing workforce shortages that affect Mobile Crisis, Mobile Response & Stabilization Services, and Crisis Stabilization Centers, particularly the recruitment and retention of Qualified Mental Health Professionals (QMHPs). The unit continues collaborating with CMHPs and internal partners to develop workforce solutions and build on recommendations from the Behavioral Health Talent Council.

Long-term financial sustainability remains the unit's greatest challenge. Although the 988 telecommunications tax provides dedicated funding for the Lifeline, projected growth in service demand will outpace available revenues within the next several years. Mobile crisis services and Crisis Stabilization Centers continue to rely on braided funding, Medicaid reimbursement, and limited billing mechanisms that create administrative burden and do not fully support the crisis care model. Commercial insurance reimbursement remains limited, further

Community Mental Health Programs

constraining sustainable financing. The unit is working with OHA leadership and the Medicaid Division to develop more sustainable funding and reimbursement strategies while reducing administrative complexity.

Adult Suicide Prevention efforts also remain significantly underfunded. Although Oregon continues to experience one of the nation's highest suicide rates, most initiatives in the Adult Suicide Intervention and Prevention Plan rely on time-limited federal grant funding. Dedicated state investments remain limited, leaving many evidence-based prevention, training, and community engagement strategies without sustainable funding.

The Child & Family Behavioral Health Unit is dedicated to promoting effective and efficient behavioral health services for individuals aged 0-26 and their families. The unit employs a System of Care approach, integrating developmental science and trauma-informed practices to ensure statewide support and coordination with other state agencies. This approach emphasizes community-based services tailored to the needs of children and youth facing—or at risk of—mental health or substance misuse challenges, aiming to enhance their functioning across various life domains.

Key initiatives include policies to improve access to and quality of Oregon's behavioral health system. The unit provides oversight and program assistance for the continuum of services, oversees coordination of care across multiple systems like education, child welfare, and juvenile justice, and works to integrate peer-delivered services.

Suicide prevention is a significant focus for the unit, with efforts aligned with Oregon's Youth Suicide Intervention and Prevention Plan and inter- and cross-agency coordination. The unit manages contracts for prevention programs, collaborates with school districts, and evaluates intervention effectiveness. The unit also supports trainings and interventions for families and the youth behavioral health workforce. These efforts address parent-child

Oregon Health Authority: Behavioral Health Division

Community Mental Health Programs

relationship issues, behavioral concerns, and addiction using evidence-based and emerging best practices including Parent-Child Interaction Therapy (PCIT) and Collaborative Problem Solving.

The Child and Family team prioritizes community-based treatment and early intervention. This includes programs such as early childhood mental health supports, school-based mental health services that serve youth in familiar school settings, and Intensive In-home Behavioral Health Treatment (IIBHT) for youth who need a complex system response in their homes and communities.

For more intensive needs, the unit supports programs such as Fidelity Wraparound, the Early Assessment Support Alliance (EASA) and the Oregon Psychiatric Access Line (OPAL) to improve access to high-quality care. The unit also supports services for youth impacted by commercial sexual exploitation. Additionally, the unit provides Restorative Services (Juvenile Aid & Assist) to support youth involved in court proceedings, and psychiatric day treatment and residential programs for youth with the most acute mental health and substance use needs.

Young Adults have been elevated as a prioritized population within the Behavioral Health strategic priorities, and the Child and Family Behavioral Health team has worked to pull together a cross-divisional team to build a plan for young adult work. This group includes representatives from the Adult Behavioral Health team, Medicaid Division, System of Care Advisory Council, and a core of young adults with lived experience. The unit is also working to expand Young Adult Hubs across the state as a place where young adults can receive drop-in services such as substance use recovery supports, job training, group therapy, and homelessness referral needs.

Additionally, the unit actively engages youth and families in policy development and oversight through advisory groups such as the Children's System Advisory Council. Alignment with the strategic plans for the System of Care Advisory Councils and Alcohol and Drug Policy Commission is foundational in the Unit's work. Funding and technical assistance are provided to local communities for mental wellness, promotion, and stigma reduction,

Community Mental Health Programs

emphasizing the importance of social and emotional determinants of health. Overall, the unit's comprehensive approach aims to support children, youth, young adults, and their families throughout Oregon to navigate behavioral health challenges effectively.

Accomplishments: The Child and Family Behavioral Health Unit has achieved significant accomplishments and additional investments for the continuum of care. Investments include \$10 million to expand youth psychiatric residential programs across the state, and an additional \$1 million to enhance suicide prevention efforts for culturally specific youth programs.

The unit continues to innovate equity focused programs for youth and young adults, including development of culturally infused suicide prevention trainings, an early childhood program for Latine families, Tribal-specific substance use trainings in conjunction with the Alcohol and Drug Policy Commission, mental health provider training and technical assistance serving individuals with Intellectual or Developmental Disabilities (IDD) and young adult supports to address the needs of this unique developmental level.

The unit has formed a Governor's sponsored workgroup to bring together a broad group of interested groups to review statutes related to Restorative Services. This workgroup is discussing the inconsistencies in current statute, national best practices for youth aid and assist, and the different perspectives of judges, defense/prosecutors, advocates, families, and youth as they interact with the juvenile justice system. The workgroup aims to make some recommendations for the 2027 Legislative session and continue work into the 27-29 biennium.

Other successes include expanding the Expedited Assessment Services for Youth (EASY) program statewide and launching communities of practice for psychiatric residential and day treatment providers. The unit also partnered with the Oregon Department of Human Services (ODHS) to use federal Title IV-E (Family First)

Community Mental Health Programs

funding to expand new Parent-Child Interaction Therapy programs that support families and help prevent Child Welfare involvement. The unit's work across agencies to coordinate services and supports with Oregon Department of Education (ODE), Office of Developmental Disability Services (ODDS) and Child Welfare, Department of Early Learning and Care (DELC), and with the System of Care Advisory Council shows the complexity of the child-serving system and the necessity of policy makers to work together to meet the needs of Oregon's youth and families.

Challenges: Youth behavioral health continues to face significant financial pressure. Ongoing strain in the adult behavioral health system has diverted resources from youth services, while federal Medicaid reductions have added further stress. Programs across the youth behavioral health continuum remain underfunded, and workforce shortages continue to limit capacity to meet the needs of youth and families.

Communities continue to request school-based behavioral health services, and therapy provided in schools has proven successful across Oregon. The Child and Family Behavioral Health unit received funding for these services in the 2019–21 biennium but has not received additional funding to address the increase in need. The unit works closely with the Oregon Department of Education (ODE) to coordinate mental health services statewide and is prioritizing Medicaid billing across programs to serve as many youth as possible, although additional investments are still needed.

Access to services remains a primary concern for youth, families, and community partners across all levels of care. Although the unit aims to shift resources toward community-based services that support youth earlier and help them remain at home and in their communities, these services remain difficult to access. Waitlists for residential services remain long, and infrastructure across the continuum is not sufficient to meet the growing needs of youth and families statewide.

Community Mental Health Programs

Services for young adults ages 17–25 remain limited across the continuum of care. This developmental age group faces significant risk of suicidal ideation, substance overdose, and emergency department use and reuse, yet is less likely to seek behavioral health services. The Child and Family Behavioral Health team is working with a community-based organization to establish a young adult advisory group that will co-develop a mission and work plan aligned with OHA's strategic plan, review Oregon Administrative Rules for opportunities to build flexibility into the current system and help address the needs of this priority population.

Finally, Oregon continues to need a stronger youth substance use disorder continuum of care, particularly in rural areas. In alignment with the Alcohol and Drug Policy Commission, the unit is highlighting the need for co-occurring treatment for youth with mental health and substance use needs, youth substance use peer supports, and a full continuum of youth-focused prevention, community and residential treatment, and recovery supports.

BUSINESS OPERATIONS & STRATEGY

The Behavioral Health Workforce Incentives Unit, established under HB 2949 (2021), strengthens Oregon's behavioral health workforce by supporting the recruitment and retention of diverse individuals and those from low-resource areas, including people from disproportionately affected communities, Tribal members, American Indian and Alaska Native communities, and residents of rural regions. The unit supports policy implementation and administers a range of workforce incentive programs designed to equitably build workforce capacity and reduce barriers to entering the behavioral health field across multiple sectors of its career pathway.

These programs include educational incentive grants such as loan repayment, scholarships, tuition assistance, and graduate stipends for behavioral health providers. The unit also oversees Clinical Supervision Expansion to support

Community Mental Health Programs

individuals who must complete supervised experience to obtain licensure or certification. In addition, it manages the expansion of fellowship training in Child and Adolescent Psychiatry and Developmental Pediatrics to increase the supply of these providers in Oregon. The Workforce Unit also supports high school behavioral health career and technical education (CTE) initiatives that build early interest and establish clear pathways for students considering careers in the behavioral health field.

Collectively, these investments help cultivate a skilled workforce that reflects Oregon's communities and supports culturally responsive, community-driven behavioral health services. The unit works closely with divisions across OHA on workforce and equity initiatives and collaborates with key partners such as the Higher Education Coordinating Commission, the Oregon Department of Education, Oregon's behavioral health licensing boards, and other state agencies. Staff from the Behavioral Health Workforce Initiative (BHWI) have participated in statewide and national workgroups, including the Behavioral Health Talent Council and the National Academy for State Health Policy (NASHP) policy academy for behavioral health workforce, and contributed directly to several workforce strategies. The Workforce Unit also advances operational integrity through ongoing engagement with providers and community partners committed to strengthening behavioral health workforce recruitment and retention.

Accomplishments: BHWI has achieved major accomplishments along the path to reducing barriers to recruitment and retention of Oregon's behavioral health workforce. Since 2022, BHWI has successfully allocated nearly \$85 million to behavioral health workforce incentive programs.

In February 2022, BHWI began implementing HB 2949 which allocated \$80 million for behavioral health incentive programs like a loan repayment program for individuals, a tuition assistance and stipends program for Oregon behavioral health graduate programs, scholarships for behavioral health training programs including community colleges and apprenticeships, provider recruitment and retention bonuses, statewide licensing and certification fee and examination fee waivers, clinical supervision expansion programs, peer

Community Mental Health Programs

workforce development and training, dedicated set-asides for CMHPs and the Nine Federally Recognized Tribes in Oregon to customize and implement their own incentive programs. BHWI successfully implemented these strategies which led to nearly 400 grant agreements. A public-facing online dashboard has been created to increase transparency of the progress of these programs which end in December 2026. The dashboard indicates that these programs have led to increased recruitment and retention for providers from minoritized communities, providers with lived experience, and for clinicians that provide acute and complex care.

In December 2023, BHWI convened the HB 2235 workgroup which was created to study and make recommendations on reducing barriers to recruitment and retention of Oregon's publicly financed behavioral health workforce. The workgroup met for two years and as directed by HB 2235, BHWI successfully published two legislative reports from the workgroup's findings and recommendations with the first being focused on OHA's budget while the second focused on necessary legislative actions to add, remove, or modify policies. The reports have received national attention from the National Governor's Association and the National Academy on State and Health Policy. The reports have been cited in multiple settings including the Behavioral Health Talent Council's Final Report.

BHWI has allocated \$2.5 million in the current biennium authorized by Senate Bill 5525 to permanently expand Oregon's capacity for training and retaining Child and Adolescent Psychiatrists (CAP) and Developmental Pediatricians (Dev. Peds). Oregon faces wide gaps in child and adolescent care behavioral health care, and these highly specialized positions are crucial to bridging that gap. BHWI has collaborated with OHA's Child and Family Behavioral Health unit to create partnerships with the existing CAP and Dev. Peds programs to increase the possible number of fellows that enter these programs. To date, Oregon Health and Science University's (OHSU) CAP program has increased from three to five recruitments per year (with a plan of increasing to six in 2026-27 academic year) and the OHSU Dev. Peds program has increased from one to

Community Mental Health Programs

three recruitments per year. The funds have also expanded learning opportunities and service areas to include a higher number of rural and public Medicaid focused areas that they now serve.

BHWI has effectively analyzed and promoted policy changes aimed at reducing barriers to the behavioral health workforce. In partnership with the Mental Health and Addiction Counselor Board of Oregon (MHACBO), BHWI is implementing the Qualified Mental Health Associate (QMHA) pilot, which temporarily creates a new pathway that does not require a bachelor's degree to achieve eligibility for QMHA registration for students enrolled in participating applied behavioral health training programs. Students who complete these programs engage in applied training that directly relates to the QMHA role in a behavioral health care continuum. Since the Winter term of 2025, the pilot has grown to include 362 students across 11 participating schools and training programs. If the pilot continues to demonstrate strong outcomes through its conclusion in the Spring term of 2029, it could pave the way for a permanent administrative rule change that establishes a more affordable and accessible career pathway for individuals entering the behavioral health field.

In 2025, HB 2024 was passed, which included an appropriation of \$4.7 million for behavioral health workforce incentive grants. These grants were made available to provider organizations that hold a Certificate of Approval with OHA for behavioral health services, to the Tribes, and to organizations that provide acute behavioral health care to a majority Medicaid population. BHWI further prioritized funding for organizations offering mobile crisis services, Medication Assisted Treatment services, child and family services, carceral services, Culturally and Linguistically Specific Services, and for provider organizations located in rural areas. Through this prioritization, in February 2026, BHWI successfully awarded a cohort of 26 grantees representing all these priority areas. Additionally, \$500,000 was reserved for to incentivize providers who serve the Nine Federally Recognized Tribes in Oregon and the Native American Rehabilitation Association, and \$250,000 was designated for provider incentives supporting Oregon's 988 crisis hotline workforce.

Community Mental Health Programs

Challenges: BHWI faces significant systemic challenges in equitably expanding the capacity of Oregon's behavioral health workforce. A central obstacle is the absence of a dedicated budget and consistent legislative investment. Demand for workforce incentives continues to outpace available resources, and funding remains inconsistent. For example, the HB 2024 grant program received \$4.7 million in appropriations, while applicants collectively requested \$21 million. Both the January 2025 and December 2025 HB 2235 Workgroup Reports recommended establishing stable, ongoing funding for behavioral health incentive programs, noting that progress is too easily lost when programs are short-term. Intermittent funding also places strain on the state, which is often required to launch new programs before existing ones have been fully evaluated for effectiveness.

OHA's Health Care Provider Incentive Program (HCPIP), established in 2017 by HB 3261, manages the Healthcare Provider Incentive Fund and primarily serves primary care and dentistry, with limited eligibility for behavioral health providers. Establishing a comparable, dedicated account focused specifically on behavioral health workforce incentives would allow BHWI to continuously strengthen these programs and reduce the risk of misalignment across the multiple state agencies involved in developing workforce incentive programs.

Challenges at the federal level further threaten the progress and long-term viability of BHWI programs. This includes policies such as H.R. 1 which, among other changes, has eliminated opportunities for students to finance their education. Competing state priorities may also unintentionally diminish focus on sustaining these efforts. Beyond budget instability, federal decisions continue to affect both the workforce and the communities they serve, contributing to burnout and compassion fatigue as the cost of living rises and wages stagnate. These pressures jeopardize the gains made by BHWI and Oregon's behavioral health workforce.

Another major challenge is that BHWI programs represent only one part of a broader set of solutions needed to address behavioral health workforce shortages. Rising tuition costs make traditional education pathways

Community Mental Health Programs

less accessible, while work environments are strained by high caseloads, low pay, administrative burden, limited affordable housing, systemic racism, and safety concerns.

Despite these systemic barriers, BHWI remains committed to advocating for sustainable solutions and will continue partnering with OHA units, other state agencies, and community providers to advance strategies that strengthen Oregon's behavioral health workforce.

The **Behavioral Health Investments team** leads Oregon's investment in behavioral health housing and residential treatment infrastructure by administering legislatively appropriated capital funding to expand community-based housing, licensed residential treatment, and supportive housing for individuals with serious mental illness and substance use disorders. The team develops funding opportunities, provides technical assistance to grantees, oversees capital grant agreements, monitors project implementation, and manages data to ensure investments strengthen statewide behavioral health capacity and align with community needs.

The team's largest investment portfolio began with HB 5024 (2021), which established the Behavioral Health Housing Regional Development & Innovation program. This initiative has invested approximately \$149 million to expand licensed residential treatment facilities and supportive housing, resulting in the development of hundreds of new treatment beds and housing units across Oregon. The team also administers the Behavioral Health Housing Incentive Fund (BHHIF) and the Community Mental Health Housing Trust Fund (CMHHTF), which provide grants and other financial assistance to increase behavioral health housing capacity and support long-term community-based housing solutions.

Additional investments include HB 5030 (2023), which funds expansion of Acute Psychiatric Residential Facilities and community-based behavioral health capacity, and HB 2059 (2025), which established the Residential Behavioral Health Capacity (RBHC) Program to create new residential treatment beds statewide. Together, these

Community Mental Health Programs

programs expand access to residential treatment, supportive housing, and community-based services while helping meet Oregon's growing behavioral health needs.

Accomplishments: The Behavioral Health Investments team has successfully managed one of the state's largest behavioral health capital investment portfolios, overseeing hundreds of millions of dollars in housing and residential treatment investments while supporting communities through every stage of project development. Through technical assistance, grant oversight, and collaboration with local partners, the team has helped expand licensed residential treatment capacity, supportive housing, and community-based behavioral health infrastructure across Oregon. These investments have increased access to care, strengthened local behavioral health systems, and created new opportunities for individuals to receive treatment and recovery services closer to home.

Challenges: The team's primary challenge is sustaining long-term funding for behavioral health housing and residential capacity. Much of its work has relied on one-time legislative appropriations, and the anticipated loss of continuing service level funding beginning in the 2027–29 biennium threatens the state's ability to continue expanding housing and treatment capacity. Rising construction costs, multi-year project timelines, and increasing demand for behavioral health services further underscore the need for stable, ongoing investment to complete existing projects and support future development.

Community Mental Health Programs

Revenue sources and changes

General Funds support Behavioral Health Programs. Other Funds include:

- Lottery Funds
- The Tobacco Master Settlement Agreement (TMSA)
- Tobacco taxes
- Lottery Funds/Bonds
- Law Enforcement Medical Liability Account (LEMLA)
- Marijuana funds
- Drug Treatment and Recovery Services (DTRS) Fund (M110)
- A portion of court fines, fees and assessments related to ORS 813.270, for the Intoxicated Driver Program Fund
- Beer and Wine Taxes
- American Rescue Plan Act-ARPA
- Opioid Settlement funds

Federal Funds include:

- Center for Mental Health Services block grant (CMHS) previously known as Mental Health Block Grant
- Substance Use Prevention Treatment Recovery Services (SUPTRS grant) previously known as Substance Abuse Prevention and Treatment (SAPT grant)

Activities, programs, and issues in the program unit base budget

The Behavioral Health Division (BHD) administers a comprehensive continuum of substance use disorder (SUD) prevention, treatment, recovery, and supportive services to improve the health and well-being of Oregonians. BHD oversees statewide programs that include residential and community-based treatment, recovery housing, peer-delivered services, housing assistance, problem gambling prevention and treatment, the Behavioral Health Resource Network (BHRN), opioid settlement investments, intoxicated driver programs, and strategic capital investments to expand alcohol and drug treatment capacity. In partnership with the Nine Federally Recognized Tribes in Oregon, Community Mental Health Programs (CMHPs), local providers, and community partners, BHD also administers contracts, grants, and funding that support behavioral health services across the state while advancing equitable access to culturally responsive care, strengthening Oregon's behavioral health workforce and infrastructure, and improving outcomes for individuals, families, and communities affected by substance use disorders.

The Behavioral Health Resource Network (BHRN) Program, formerly known as Measure 110, administers grants to organizations across Oregon to support individuals experiencing substance use disorders or harmful substance use. The program funds Behavioral Health Resource Networks (BHRNs), which consist of one or more entities working together within a county to provide community-based services. Each BHRN is required to provide trauma-informed, culturally specific, and linguistically responsive services across six service areas: screening, assessments, peer counseling and support, harm reduction, low-barrier substance use treatment, and housing.

Oregon Health Authority: Behavioral Health Division

Substance Use Disorder Programs

In honor of the government-to-government relationship between the State of Oregon and the Nine Federally Recognized Tribes in Oregon, funding is provided to each of the Nine Tribes and to two Tribal partners.

The Oversight and Accountability Council (OAC) advises the BHRN Program. Effective January 1, 2026, the OAC transitioned from its role as a decision-making body to an advisory body that provides recommendations to OHA regarding BHRN funding priorities, funding distribution, and educational efforts to increase awareness of services available through the program.

During the 2027-29 biennium, the program will continue to administer 231 grants, monitor program performance, support provider reporting and compliance requirements, and improve the collection and use of data to better understand service delivery, client needs, outcomes, service gaps, and the impact of BHRN-funded services across Oregon.

Accomplishments: The BHRN Program established and maintained a statewide network of providers delivering substance use disorder services in every Oregon county. Through BHRNs, individuals across Oregon have access to screening, assessments, peer support, harm reduction services, low-barrier treatment, and housing.

The program developed and implemented statewide grant administration, monitoring, reporting, and oversight processes to support accountability and stewardship of public funds. During the 2025-27 biennium, under new leadership and with a nearly fully staffed team, the program strengthened provider reporting and grant monitoring, implemented Secretary of State audit recommendations, launched new data reporting platforms, and increased performance management practices to improve consistency, transparency, and accountability across the statewide networks.

Oregon Health Authority: Behavioral Health Division

Substance Use Disorder Programs

The program also continued to support culturally specific providers. Including continued support of the Tribal Set-Aside supporting BHRNs in each of the Nine Federally Recognized Tribes in Oregon.

Challenges: The BHRN Program continues to operate in a changing fiscal environment. Ongoing cannabis tax revenue uncertainty, budget reductions, and the need to balance available resources with statewide service and reporting expectations create challenges for long-term program planning and sustainability. As of July 1, 2026, three BHRN grantees chose to leave the program due to budget reductions.

As the program has matured, expectations for accountability, performance measurement, and oversight have increased. The program continues to improve consistency, quality, and usefulness of information used to assess service delivery, outcomes, and the impact of BHRN-funded services across Oregon.

At the same time, the program administers a large statewide grant portfolio, requiring significant staff capacity to conduct monitoring, provider engagement, technical assistance, and oversight activities. Ensuring consistent oversight across Oregon's diverse provider network requires balancing available administrative resources with increasing expectations for accountability and stewardship of public funds.

The program also faces the challenge of maintaining equitable access to services across diverse geographic regions and communities while supporting a network of providers with varying capacity, infrastructure, and operational needs.

As Oregon approaches future funding decisions and procurement planning, the program must balance accountability and stewardship of public funds with maintaining access to the core services required through BHRNs.

Oregon Health Authority: Behavioral Health Division

Substance Use Disorder Programs

Tribal Behavioral Health: All behavioral health funding, unless stipulated differently by statute, are included in one comprehensive Tribal Behavioral Health agreement that includes funding for both mental health and alcohol and drug services. Tribes/UIHP prepare plans, budgets to fit the needs of their community, submit reports on strategies and outcomes. Below provides descriptions of the substance use disorder programs:

- **Alcohol & Other Drugs (AOD) Prevention:** To plan, implement and evaluate strategies that prevent substance abuse by reducing risk factors and increasing protective factors associated with alcohol and other drugs in Oregon Tribal Communities.
- **Tribal Tobacco Prevention:** Address commercial tobacco and nicotine use and reduce tobacco-related health inequities through the prevention and management of chronic disease related to commercial tobacco and nicotine.
- **Tribal Community Behavioral and SUD:** Build upon resilience, assist individuals; youth and adults, to make healthier lifestyle choices, and to promote recovery from substance use disorders.
- **Intoxicated Driver Program Fund:** Supports the delivery of eligible services to Oregon residents who have been adjudicated in an Oregon court for Driving Under the Influence of Intoxicants or Minor in Possession and who are indigent.
- **Housing Assistance:** To plan and implement strategies that reduce access to barriers in housing, by providing community education for available resources in local/tribal communities.
- **Tribal State Opioid Response Grant:** Address the opioid overdose crisis by providing resources for increasing access to FDA-approved medications for opioid use disorder (MOUD), and supporting the continuum of prevention, harm reduction, treatment, and recovery support services for OUD and other concurrent substance use disorders.

Oregon Health Authority: Behavioral Health Division

Substance Use Disorder Programs

Oregon's Community Mental Health Programs (CMHPs) serve as the local behavioral health authorities responsible for ensuring access to publicly funded mental health and substance use disorder (SUD) services in every county. Through the County Financial Assistance Agreement (CFAA), BHD partners with CMHPs to administer state and federal funding that supports prevention, treatment, recovery, harm reduction, and community-based SUD services. The CFAA establishes funding allocations, service expectations, performance measures, and reporting requirements while providing counties with the flexibility to address local community needs and expand access to evidence-based substance use disorder services.

In addition to administering the CFAA, BHD provides statewide system management, policy direction, technical assistance, fiscal oversight, and quality improvement to help ensure consistent, equitable, and accountable delivery of substance use disorder services across Oregon. Through its partnership with CMHPs, BHD coordinates implementation of statewide initiatives, supports collaboration with Tribal governments, community providers, and Coordinated Care Organizations, and works to strengthen Oregon's substance use disorder treatment and recovery system while improving access to culturally responsive, community-based care.

ADULT BEHAVIORAL HEALTH

Adult Behavioral Health (ABH) serves as a core pillar within the Behavioral Health Division, responsible for shaping and coordinating Oregon's statewide continuum of care for adults with substance use needs. Its role is both strategic and operational, overseeing prevention, treatment, recovery, housing, residential care, that must function cohesively to meet complex and evolving population needs.

The Addiction Treatment, Recovery, and Prevention (ATRP) Unit leads Oregon's statewide substance use disorder (SUD) system and plays an essential role in building an equitable, culturally responsive continuum of care. ATRP oversees statewide strategies addressing opioid and stimulant misuse, problem gambling, and DUII services,

Oregon Health Authority: Behavioral Health Division

Substance Use Disorder Programs

while managing multiple funding streams that support prevention, treatment, harm reduction, and recovery programs. The unit is a central convenor across OHA, ensuring that SUD policies, programming, and system design are aligned across divisions, counties, Tribal Nations, and community-based providers.

ATRP's responsibilities include oversight of licensed opioid treatment programs, expansion of medication-assisted treatment (MAT), provider training, public education, and implementation of evidence-based approaches aimed at reducing substance use and overdose-related harms.

The unit also administers the State Opioid Response (SOR) grants, now in their fifth iteration, which fund 38 contracts and 24 statewide programs focused on expanding treatment access, overdose prevention, youth-led prevention, peer-delivered services, and rural telemedicine. SOR initiatives such as the PATHS telemedicine model significantly improved access to infectious disease testing and HCV/HIV treatment for rural communities, while PRIME+ expanded peer outreach to more than 22,000 contacts in the past year.

Additionally, ATRP provides administrative and operational support to the Opioid Settlement Prevention, Treatment, and Recovery Board (OSPTRB), translating more than \$90 million in statewide opioid settlement investments into expanded treatment access, new recovery centers, naloxone distribution, culturally specific services, and primary prevention workforce development.

ATRP's Tribal partnerships are a cornerstone of its work. The unit collaborates closely with the Nine Federally Recognized Tribes in Oregon through support of culturally specific training for Certified Tribal prevention specialists, and Tribal-designed prevention and treatment initiatives. ATRP sponsors statewide Tribal opioid and fentanyl summits, encourages Tribal participation in national leadership academies, and develops culturally grounded prevention frameworks in partnership with the Tribes. Additional responsibilities include statewide oversight of problem gambling services (including prevention, treatment, and residential services), which recently implemented

Substance Use Disorder Programs

community readiness assessments in all 36 counties and advanced a transition to fee-for-service models to better meet emerging needs across Oregon's behavioral health landscape.

Accomplishments: ATRP achieved major statewide successes over the past year, including launching the second Tribal prevention specialist cohort in partnership with OHA's Tribal Affairs, funding more than \$90 million in opioid settlement investments, expanding opioid treatment programs across high-need regions, and strengthening naloxone distribution through Save Lives Oregon. These investments supported more than 581,000 naloxone doses distributed to over 420 community organizations and equipped 669 schools with opioid reversal kits. SOR-funded initiatives produced substantial outcomes—including HCV cures, reduced homelessness and anxiety among participants in contingency management programs, enhanced youth-led prevention efforts, and significant expansion of peer-delivered harm reduction. ATRP's leadership has reinforced statewide treatment access, advanced culturally specific prevention, strengthened rural telemedicine, and elevated evidence-based practice implementation.

Challenges: Despite considerable progress, ATRP faces significant challenges. Oregon's DUI system requires comprehensive reform due to outdated processes, inequities in outcomes, insufficient oversight, and lack of standard consumer protections. Federal funding reductions to SUD treatment and prevention capacity, especially in rural and frontier communities, limit access to life-saving services. Persistent gaps in methadone access, underfunding of contingency management, and limited resources within the Intoxicated Driver Program Fund further constrain system responsiveness. Rising operational costs, workforce shortages, and inconsistent statewide practices continue to place pressure on ATRP and its partners, threatening the stability and reach of Oregon's SUD continuum.

Oregon Health Authority: Behavioral Health Division

Substance Use Disorder Programs

BUSINESS OPERATIONS & EQUITY AND COMMUNITY PARTNERSHIPS

Both the Business Operations and Strategy area and the Equity and Community Partnerships area provide the operational infrastructure, strategic investments, workforce development, and community engagement necessary to strengthen Oregon's substance use disorder treatment and recovery systems of care.

The Behavioral Health Investments team expands alcohol and drug residential treatment capacity through capital investments in treatment facilities and recovery housing. ORR ensures people with lived experience help shape behavioral health policy, advances peer support, and strengthens community partnerships through engagement and systems improvement initiatives.

The **Behavioral Health Investments team** administers legislatively appropriated capital funding to expand Oregon's alcohol and drug residential treatment capacity by supporting the development, acquisition, renovation, and expansion of substance use disorder (SUD) treatment facilities and recovery housing. The team partners with community organizations to administer grant funding, provide technical assistance, oversee project implementation, and ensure investments increase access to residential treatment services throughout the state, particularly in underserved communities. These investments strengthen Oregon's continuum of care by expanding community-based residential treatment options for individuals with substance use disorders.

Accomplishments: The team has made significant investments to increase alcohol and drug residential capacity across Oregon. Funding provided through SB 1530 (2023) expanded recovery housing by creating 182 new non-licensed recovery beds, while SB 5525 (2023) increased the availability of substance use disorder treatment facilities for both children and adults. Additional capital investments through HB 2316

Substance Use Disorder Programs

(2021) are supporting the development of new licensed residential treatment facilities for individuals with substance use disorders, helping communities expand access to treatment and recovery services statewide.

Challenges: The team continues to face challenges in sustaining and expanding alcohol and drug residential treatment capacity. Rising construction costs, labor shortages, permitting delays, and the multi-year nature of capital projects increase the cost and complexity of developing new facilities. In addition, uncertainty surrounding future capital funding and limitations within the state's biennial budgeting process threaten the completion of projects already underway and make it more difficult to meet Oregon's growing demand for residential substance use disorder treatment services.

The Office of Recovery & Resiliency (ORR) promotes continued growth and incorporation of SUD-oriented Peer Delivered Services (PDS) in Oregon's behavioral health system. Working towards expanding the capacity and ensuring the health and longevity of all peer-delivered services programming in Oregon, including youth support, family support, and adult peer support, the ORR provides technical assistance and support to members of the PDS workforce and other system partners. Additionally, the team collaborates with members of the PDS workforce and other partners for strategic planning related to peer services, workforce development, and identifying and promoting sustainable funding for PDS in Oregon. Direct investment into the PDS Workforce through community partners and Peer Run Organizations (PRO's) to provide provisions of trainings, curriculum development, standards of practice, and workforce wellness initiatives is a critical function of the ORR.

Accomplishments: In the 2025-2027 biennium, the Office of Recovery and Resilience supported two listening sessions inside Oregon Department of Corrections prisons and in community settings with people who have lived experience of incarceration to better understand reentry needs and barriers, particularly those related to substance use disorder (SUD) recovery. The listening sessions provided ORR with a clearer understanding of

Substance Use Disorder Programs

the specific SUD-related barriers people face when transitioning from incarceration to the community, allowing the agency to identify priority gaps in recovery supports and inform future reentry-focused policy and program design. These sessions provided ORR with actionable insights that strengthened collaboration with CMHPs and informed system partners about gaps in treatment access, peer support, continuity of care, and transition planning. The information gathered is now being used to guide program improvements, refine peer-centered supports, and shape more responsive reentry strategies across Oregon's behavioral health system.

Additionally, the ORR funded and provided technical assistance for the first Forensic-specific Peer Fusion conference emphasizing peer education, networking, and discussion of behavioral health topics including the intersection between serious mental illness, SUD, and forensic systems. The ORR also led a 2025 workgroup of 90 attendees, with partners such as Oregon Department of Corrections, Oregon Department of Human Services, various OHA programs including the Traditional Health Worker Program, the Background Check Unit, and Oregon State Hospital, as well as peer leaders to identify barriers in peer background check processes and collaboratively develop solutions affecting both mental health and SUD peer services.

Finally, during the 2025-2027 biennium the ORR successfully completed two separate Requests for Information (RFIs) to explore and better understand the current state of Recovery Community Centers in Josephine and Klamath Counties and of culturally and linguistically specific and/or youth focused Recovery Community Centers, respectively. The completion of these RFIs resulted in a \$2.5 million investment in the establishment of a Recovery Community Center in Josephine County, a \$2.5 million investment in the establishment of a Recovery Community Center in Klamath County, and an investment of \$830,000 shared across three different culturally and linguistically specific and/or youth-focused Recovery community centers. This total investment of \$5,830,000 provided through the Opioid Settlement Prevention, Treatment, and Recovery (OSPTR) Board was coordinated by the ORR in collaboration with the Alcohol and Drug Policy

Substance Use Disorder Programs

Commission and the Behavioral Health Division's ATRP unit. The ORR continues to oversee 10 SUD specific grant agreements.

Challenges: Alongside these accomplishments, ORR faces notable financial challenges that limit the agency's ability to expand engagement activities and sustain peer-centered initiatives. Budget constraints restrict the scale and frequency of listening sessions, reduce capacity for follow-up with participants, and limit investment in enhanced collaboration with partners. These financial limitations also affect ORR's ability to grow workforce supports, strengthen peer pathways, and respond flexibly to emerging needs identified through community feedback.

Revenue sources and changes

General Funds support Behavioral Health Programs. Other Funds include Lottery Funds and allocations from non-Medicaid funding sources, including:

- The Tobacco Master Settlement Agreement
- Tobacco taxes
- Lottery Funds/Bonds
- Law Enforcement Medical Liability Account (LEMLA)

POP #	Title	Description	General Fund	Other Funds	Federal Funds	Total Funds	Positions	FTE
401	1115 SUD Waiver: Contingency Management Svcs	Funds implementation of Contingency Management as a covered service under Oregon’s Substance Use Disorder 1115 Waiver, including the infrastructure needed for statewide delivery and federal compliance. Contingency Management is an evidence-based service designed to improve treatment engagement and retention.	\$1,480,885	\$0	\$4,061,351	\$5,542,236	-	-
402	ALERT Immunization System Replacement	Funds replacement and modernization of Oregon’s ALERT Immunization Information System, including a new vendor contract and staffing support. The updated system will improve security, interoperability, public access, and statewide immunization tracking and vaccine management.	\$7,000,000	\$0	\$0	\$7,000,000	3	3.00
403	Behavior Rehabilitation Services	Expands Behavior Rehabilitation Services to eligible Oregon Health Plan members in accordance with federal Medicaid requirements and establishes MMIS oversight. The package supports implementation of a community-based Youth Enhanced Support Services program for eligible Oregon youth.	\$7,391,540	\$0	\$8,235,148	\$15,626,688	8	6.00
404	Coordinated Care Contract Procurement	Provides staffing and contracted services to support the next federally required Coordinated Care Organization contract procurement beginning in 2027. Funding supports project management, community engagement, actuarial services, and interpretation and translation during the procurement process.	\$0	\$0	\$0	\$0	8	6.00
405	Digital Accessibility Initiative	Establishes coordinated capacity to advance digital accessibility across OHA’s public-facing and internal digital systems consistent with WCAG 2.2 standards. Funding supports technical guidance, training, implementation, and remediation of inaccessible documents.	\$1,024,363	\$117,604	\$244,686	\$1,386,653	6	4.50
406	Enhancing Vaccine Access and Financing	Modernizes Oregon’s vaccine financing model through a universal vaccine purchase and distribution approach. The package is intended to stabilize vaccine financing, reduce administrative and cost barriers for providers, and improve access to vaccines across Oregon.	\$774,223	\$177,209	\$12	\$951,444	1	1.58
407	Gender Affirming Care	Supports stabilization and expansion of Oregon’s gender-affirming care provider network through dedicated program expertise and community-led workforce development. The package supports continued access to care and implementation of Oregon’s requirements under HB 2002.	\$560,609	\$0	\$0	\$560,609	1	0.88
408	PH – Health Care Facility Program Restoration	Increases fees to sustain OHA oversight and licensing of ambulatory surgery centers, outpatient renal dialysis facilities, in-home care agencies, caregiver registries, and non-transplant anatomical research and recovery organizations. Funding maintains licensing, surveys, complaint investigations, technical assistance, and related program operations.	\$0	\$675,000	\$0	\$675,000	-	-
409	HPA - HCMO Program Restoration	Provides General Fund support for OHA’s Health Care Market Oversight program to supplement fee revenue. Funding supports staff, Department of Justice costs, and required community engagement associated with OHA review of health care mergers and acquisitions.	\$1,932,126	\$700,933	\$0	\$2,633,059	4	4.00
410	Health Systems Integration Platform	Funds acquisition of a System Integration Platform to support Oregon’s modular modernization of Medicaid IT systems and planning for future Medicaid system modules. The platform will provide shared infrastructure for system interfaces and support continued alignment with federal CMS requirements.	\$2,436,382	\$3,425,520	\$21,927,826	\$27,789,728	12	9.00
411	Human Resources Workforce Capacity	Establishes permanent Human Resources positions that are currently supported as non-budgeted positions. The package maintains existing HR service capacity for recruitment, onboarding, employee benefits and support, and workforce development across OHA.	\$4,443,167	\$526,054	\$1,063,584	\$6,032,805	19	19.00
412	Medicaid Match for Crisis Stabilization Cntrs	Establishes the state funding structure needed to draw federal Medicaid matching funds for Crisis Stabilization Center services. The package supports a sustainable Medicaid reimbursement model for short-term, facility-based behavioral health crisis stabilization services.	\$1,300,000	\$0	\$3,000,000	\$4,300,000	-	-
413	Medical Marijuana Program Modernization	Reduces the Oregon Medical Marijuana Program current service level budget in alignment with proposed legislation transferring a portion of program responsibilities to the Oregon Liquor and Cannabis Commission. The change is intended to improve program efficiency and budget stability.	\$452,698	(\$4,678,750)	\$0	(\$4,226,052)	-	(12.18)
414	OHA Data Management Platform	Funds implementation of an enterprise data management platform and staffing to support OHA’s Data Office, enterprise data governance, and data modernization work. The platform will improve OHA’s ability to catalog, govern, connect, find, and appropriately share data across the agency.	\$454,234	\$248,850	\$4,088,045	\$4,791,129	10	7.50
415	OHA Savings and Reductions	Captures OHA’s agency-wide savings and reductions strategy to support a budget-neutral 2027–29 Agency Request Budget. The package consolidates reductions and offsets identified across the agency.	(\$26,675,017)	(\$679,898)	(\$1,204,532)	(\$28,559,447)	-	-

POP #	Title	Description	General Fund	Other Funds	Federal Funds	Total Funds	Positions	FTE
416	OSH Capital Improvement and Deferred Maint.	Funds capital improvements, deferred maintenance, building system modernization, and additional facility asset management and contract administration capacity at Oregon State Hospital. The package supports continued operation and long-term stewardship of OSH facilities in Salem, Junction City, and Pendleton.	\$7,333,792	\$13,495,000	\$0	\$20,828,792	3	2.76
417	OSH Electronic Health Record Modernization	Funds analysis and planning to replace Oregon State Hospital's existing Electronic Health Record system. The modernization effort will focus on patient safety, quality, care coordination, and the requirements of a psychiatric hospital environment.	\$1,802,055	\$595,459	\$0	\$2,397,514	5	3.38
418	OSH Human Resources Workforce Capacity	Adds Human Resources capacity dedicated to Oregon State Hospital, with a focus on employee and labor relations. Additional staffing will support workplace investigations, leave and accommodation needs, manager consultation, employee engagement, and other workforce issues affecting hospital operations.	\$2,345,883	\$272,414	\$560,402	\$3,178,699	15	9.32
419	OSH Safety and Security	Funds safety, security, patient care, and operational infrastructure improvements at Oregon State Hospital. The package supports evolving clinical program needs and facility modernization across OSH campuses.	\$3,068,775	\$16,099,331	\$0	\$19,168,106	-	-
420	Prior Authorization Modernization	Modernizes Oregon Medicaid prior authorization and data exchange capabilities to comply with federal CMS interoperability requirements. Funding supports required APIs, streamlined prior authorization processes, and staff and contractor capacity to implement and sustain the work.	\$1,245,397	\$0	\$5,325,397	\$6,570,794	2	1.50
421	PH – Environmental Health Program Restoration	Increases fees and provides authority for future fee adjustments to sustain OHA's Radiation Protection Services and Food, Pool and Lodging Health and Safety programs. The package maintains staffing and core public health protections related to radiation, food safety, pools, and lodging facilities.	\$0	\$4,572,273	\$0	\$4,572,273	-	-
422	Public Health – Data Program Restoration	Provides resources to sustain mission-critical public health data systems supported by insufficient fee revenue. The package supports systems for vital records, newborn screening, the Oregon Environmental Laboratory Accreditation Program, and the Prescription Drug Monitoring Program.	\$0	\$6,212,468	\$0	\$6,212,468	1	0.75
423	State School Nurse Realignment	Transfers the State School Nursing Consultant position from OHA to the Oregon Department of Education. The realignment places the position alongside ODE's other school nursing-focused capacity and better aligns responsibility for statewide school nursing work.	(\$416,384)	\$0	\$0	(\$416,384)	-	(0.87)
424	Benefits Management System Modernization	Continues modernization and replacement of the Oregon Educators Benefit Board and Public Employees' Benefit Board benefits management systems. Funding supports implementation of a new system with integrated financial functions, mobile and self-service tools, and automated eligibility capabilities, with full implementation planned for 2029.	\$0	\$11,129,067	\$0	\$11,129,067	4	4.00
425	Forensic Behavioral Health Capacity	Adds staffing to implement HB 2005 (2025) requirements and strengthen Oregon's civil commitment and forensic behavioral health system. The package supports community restoration evaluations, expanded civil commitment responsibilities, coordination with courts and counties, transitions from Oregon State Hospital, reporting, and federal court compliance.	\$5,882,815	\$0	\$5,538,723	\$11,421,538	20	19.25
426	Tribal Traditional Health Workers	Establishes dedicated grant funding for Oregon's newly created Tribal Traditional Health Worker type. The grants will support training and certification of Tribal Traditional Health Workers to meet health needs identified by Tribal communities in Oregon.	\$111,080	\$0	\$88,920	\$200,000	-	-
			\$23,948,623	\$52,888,534	\$52,929,562	\$129,766,719	122	89.37

Oregon Health Authority 2027-29 Policy Package

Division:	Medicaid Behavioral Health Fee for Service Policy/Behavioral Health Division
Program:	Substance Use Disorder (SUD) 1115 Waiver
Policy package title:	1115 SUD Waiver: Contingency Management Svcs
Policy package number:	401
Related legislation:	Not applicable

Summary statement:

This policy package would fund implementation of Contingency Management (CM) as a new covered service under Oregon's Substance Use Disorder (SUD) 1115 Waiver, including the infrastructure necessary to support statewide implementation and federal compliance. Contingency Management is an evidence-based intervention that improves treatment engagement and retention, which contributes to improved recovery outcomes.

OHA Medicaid's latest SUD 1115 Waiver submission includes the request to implement CM; without this investment, OHA would be unable to implement the CM authority if approved by the Centers for Medicare & Medicaid Services (CMS), limiting access to this intervention for Oregon Health Plan (OHP) members with SUD.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	\$1,480,855	\$0	\$4,061,351	\$5,542,236	0	0.00

Oregon Health Authority: 2027-29 Policy Package

Purpose

1. What problem is OHA trying to fix or solve?

OHA is seeking to address treatment engagement and retention among Oregon Health Plan (OHP) members with substance use disorders (SUD), particularly during the early stages of recovery when the risk of overdose and treatment dropout is highest. While effective treatment services are available, many members discontinue care before achieving stability, meaning that they are consistently engaged in treatment, experiencing reduced substance use and related risks, and connected to the clinical, social and recovery supports needed to sustain progress. This contributes to preventable overdoses, ongoing substance use, repeated crisis and emergency service utilization, and persistent health disparities. OHA is working to close this gap by improving engagement in treatment and supporting members in remaining connected to care long enough to achieve improved health outcomes.

2. What would this policy package buy and how and when would it be implemented?

This policy package would support implementation of Contingency Management (CM) as a new service within Oregon's 1115 SUD Waiver. This is an evidence-based behavioral intervention recognized by the Centers for Medicare & Medicaid Services (CMS), the Substance Abuse and Mental Health Services Administration (SAMHSA), and the National Institute on Drug Abuse (NIDA) for improving treatment engagement, retention, and recovery outcomes.

Oregon Health Authority: 2027-29 Policy Package

Using structured, small incentives tied to verified recovery behaviors to increase treatment participation during the highest-risk early recovery period, CM is particularly effective for stimulant use disorder^{1,2}, where few other treatment options exist, and has also demonstrated positive outcomes for individuals with opioid use disorder, especially when paired with medication-assisted treatment. Combined with its relatively low per-member cost, CM represents a cost-effective approach to strengthening engagement in evidence-based care through motivational items of nominal value for meeting the objectively verified recovery behaviors.

The funding would support member incentives, provider training and technical assistance, oversight and tracking mechanisms, phased implementation activities, and the infrastructure necessary to ensure program integrity and fidelity to the model.

Implementation of CM is contingent upon approval from the Centers for Medicare & Medicaid Services (CMS). CMS has approved contingency management initiatives in California, Washington, Montana, Delaware, and Hawaii, establishing precedents for Medicaid coverage. Oregon's CM programming, if approved, would also be subject to the availability of state funding, and completion of related operational activities. Following these approvals, OHA anticipates approximately four to six months to identify, recruit, train, and enroll participating provider and complete related operational activities before phased implementation begins.

² ASAM & AAAP. [The ASAM/AAAP Clinical Practice Guideline on the Management of Stimulant Use Disorder](#). 2024.

Oregon Health Authority: 2027-29 Policy Package

3. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity³ or equitable health outcomes? How does this policy package further OHA's mission and align with its strategic plan?

CM is expected to advance health equity by increasing access to and engagement with treatment services for populations disproportionately affected by SUD, overdose, and barriers to care.

Medicaid members, particularly those experiencing poverty, housing instability, rural residency, co-occurring conditions, involvement with the criminal legal system, and/or other social determinants of health inequities, often face challenges remaining connected to critical early stages of recovery treatment.

By improving treatment engagement and retention during the highest-risk period for return to use, overdose, and disengagement from care CM can help reduce disparities and health inequities in treatment outcomes and substance-related harm, advancing OHA's mission of ensuring all people and communities can achieve optimum physical, mental, and social well-being.

Furthering OHA's strategic plan, CM advances equitable access to behavioral health services, improving health outcomes and strengthening the system's ability to deliver person-centered care. This also supports OHA's goals of reducing preventable illness and death and promoting better health outcomes while helping individuals achieve greater stability, recovery, and wellness.

³ Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability, gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.**

Oregon Health Authority: 2027-29 Policy Package

Quantifying results

4. What are the long-term desired outcomes?

- Higher SUD treatment retention and completion rates.
- Lower rates of overdose-related events and utilization of crisis, emergency department, and residential services.
- Greater participation in evidence-based treatment among individuals with opioid and stimulant use disorders.
- Reduced variation in treatment engagement and outcomes across demographic and geographic populations.
- Statewide implementation of CM meeting OHA fidelity, quality, and provider participation standards.

5. What are the envisioned outputs of this investment? How will OHA measure the impacts on health inequities of this policy package?

The primary outputs of this investment include the availability of CM services, increased participation in treatment during the critical early recovery period, improved treatment retention, and greater access to evidence-based interventions for Oregon Health Plan (Medicaid) members with SUD.

OHA will measure implementation through waiver monitoring, utilization trends, and CMS-required reporting to assess uptake, performance, and effects across populations disproportionately affected by substance use disorders.

Oregon Health Authority: 2027-29 Policy Package

To assess impacts on health equity, OHA will stratify outcome measures using Race, Ethnicity, Language, and Disability (REALD) and Sexual Orientation and Gender Identity (SOGI) data, where available. Because many communities of color⁴ and LGBTQIA+⁵ individuals experience disproportionate barriers to SUD treatment, these analyses will help identify disparities, monitor equitable access to CM services, and inform ongoing program improvements.

How achieved

6. What actions have occurred to resolve the issue prior to requesting a policy package?

OHA has successfully used State Opioid Response (SOR) grant funding to implement CM as a strategy to improve treatment engagement and retention. However, SOR funding is awarded through time-limited grant cycles and is not intended to serve as a permanent funding source, having 14 providers participating over a three-year period statewide. Additionally, SOR funding does not cover the cost of incentives, which may also have contributed to lower provider participation.

Before requesting this policy package, OHA conducted planning and feasibility activities related to implementation of the CM authority for the Medicaid population, including assessment of operational, training, oversight, monitoring, and funding requirements. These efforts identified the need for sustainable funding to support statewide OHA implementation and ongoing administration if approved by CMS. Expanding CM through Medicaid would establish that mechanism, allowing OHA to maintain and expand access for OHP members with SUD.

⁴ Substance Abuse and Mental Health Services Administration. [Racial/Ethnic Differences in Substance Use, Substance Use Disorders, and Substance Use Treatment Utilization among People Aged 12 or Older](#). 2021

⁵ Krasnova et al. (2021). [Disparities in substance use disorder treatment among sexual minority adults](#). Journal of Substance Abuse Treatment.

Oregon Health Authority: 2027-29 Policy Package

7. What alternatives were considered and what were the reasons for rejecting them?

One option considered was maintaining existing Medicaid treatment services without CM and relying on providers to directly influence, promote, and optimize member engagement and retention through their existing service-delivery practices. Under this approach OHA would support providers through training and technical assistance, but no structured intervention or motivational incentives would be available to reinforce member participation and retention. Although provider education and technical assistance are valuable support, this approach would rely on provider-driven strategies and would not provide the evidence-based intervention demonstrated to improve member engagement and retention.

Another option was expanding other current engagement-focused services, such as outreach, peer delivered services, or other recovery supports. Although these services are important and may be evidence-based or evidence-informed, they do not provide the same targeted, structured reinforcement model or level of demonstrated effectiveness during the highest-risk period of recovery, particularly for individuals with stimulant use disorder.

CM was selected because it has demonstrated effectiveness in improving participation in treatment and recovery-related activities and, if approved by CMS, could be implemented within Oregon's 1115 SUD Waiver framework with federal Medicaid matching funds, supporting a more cost-effective and sustainable approach.

8. What other agencies, programs, community partners or interested parties are collaborating on this policy package?

Oregon Health Authority: 2027-29 Policy Package

OHA has conducted engagement across the behavioral health and SUD continuum regarding potential CM programming. This exploration has included CMS, Coordinated Care Organizations (CCOs), SUD treatment providers, the Alcohol and Drug Policy Commission (ADPC), and the University of Washington's Addictions, Drug & Alcohol Institute (ADAI), among other subject matter experts and system partners. Discussions have informed program design, implementation considerations, operational requirements, and strategies to support delivery.

9. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No, not applicable.

10. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

State, Tribal, and local government agencies involved in behavioral health, health care, housing, public safety, and social services may be positively affected by this policy package. By improving engagement and retention in treatment during the highest-risk period of recovery, CM has the potential to reduce downstream effects associated with untreated SUD, including crisis service utilization, emergency department use, overdose-related events, and other demands on publicly funded systems.

11. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No, not applicable.

Oregon Health Authority: 2027-29 Policy Package

Staffing and fiscal impact

Implementation date(s):	<u>3-6 months after confirmation of funding (2027) Through Demonstration (waiver) Year 10 (2031). Continuation beyond 2031 would be subject to</u>
End date (if applicable):	<u>future waiver approvals and available funding.</u>

12. What assumptions affect the pricing of this policy package?

The cost estimate is based on assumptions regarding provider participation, member uptake, and phased implementation over the new waiver period. Estimates assume that participating providers will implement CM within established program parameters, including the approved incentive structure and duration of services.

Cost projections are also dependent on the timing of CMS SUD 1115 Waiver approval of the authority, availability of state and federal funding, and sufficient provider capacity to deliver the service. Actual expenditures may vary based on utilization, enrollment, and implementation timelines.

13. Will there be new responsibilities for OHA and/or Shared Services? Specify which programs and describe their new responsibilities.

Yes. OHA's Medicaid Behavioral Health Policy team and the Behavioral Health Division would be responsible for implementing and administering the CM benefit, including rule development, provider recruitment, enrollment, guidance and technical assistance, fidelity and quality oversight, utilization and program integrity activities, CMS monitoring and reporting, performance measurement, and ongoing evaluation. The Health Policy & Analytics Division would provide analytical support, including

Oregon Health Authority: 2027-29 Policy Package

data collection, monitoring, outcomes evaluation, and federal reporting, while the Budget team would provide fiscal oversight, expenditure tracking, forecasting, and budget neutrality analysis required under the 1115 waiver.

14. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

Yes. Implementation is projected to occur through a phased expansion from four provider sites in demonstration year (DY) 6 to 24 provider sites in DY 10, with members being served increasing from approximately 9,600 in DY 6 to 57,600 in DY 10. No existing services would be reduced or eliminated because of this proposal.

15. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

Existing funded staff can be leveraged from the Medicaid Behavioral Health Policy team, Behavioral Health Division, Health Policy & Analytics Division, and Medicaid Budget team to implement this POP within their current set of duties.

16. What are the start-up and one-time costs?

- Initial provider training and technical assistance development
- Development of tracking, reporting, and monitoring processes
- Policy, operational, and implementation planning
- Initial fidelity review tools and guidance

Oregon Health Authority: 2027-29 Policy Package

17. What are the ongoing costs?

- Member incentives
- Ongoing training and technical assistance
- Ongoing monitoring and fidelity reviews
- Reporting and program administration
- Evaluation and CMS reporting

18. What reductions will you use to offset the costs of this work and maintain budget neutrality?

This POP maintains budget neutrality by fully offsetting the requested investment through the savings and reductions included in POP 415: OHA Savings and Reductions.

19. What are the sources of funding (revenue) and the funding split (GF/OF/FF) for each part of the investment as well as the offset/reduction?

Funding for this investment is anticipated to consist of a combination of state and federal Medicaid funds available through Oregon's 1115 SUD waiver. Detailed allocations by funding source and investment components will be determined through the budget development process.

The Federal Medical Assistance Percentage rate is broken out at 26% General Fund to 74% Federal Funding match.

Oregon Health Authority: 2027-29 Policy Package

20. What are the potential savings (above the offset to pay for the investment)?

Contingency Management (CM) is a relatively low-cost intervention, with total program costs estimated at approximately \$100–\$125 per member per month. Even at this level, the cost of several months of CM remains substantially lower than a short episode of higher-acuity services such as residential treatment, creating the potential for cost avoidance if improved treatment engagement and retention reduce utilization of more intensive services.

RACIAL EQUITY IMPACT STATEMENT (REIS) WORKSHEET: POLICY OPTION PACKAGE (POP) QUESTIONS

OHA POP 401: 1115 SUD WAIVER: CONTINGENCY MANAGEMENT SVCS

Program managers responsible for the POP: Please answer the questions below for every POP being proposed in your agency request budget. To fill out this worksheet, download a copy of this worksheet and type your answers below each question.

Medicaid Contingency Management POP Program Overview

1. Please describe the POP being proposed.

This policy package would support implementation of Contingency Management (CM) within Oregon's Substance Use Disorder (SUD) 1115 Waiver. CM is an evidence-based intervention that uses small incentives tied to verified recovery behaviors to improve treatment engagement and retention during the highest-risk period for overdose and treatment dropout. Funding would support member incentives, provider training and technical assistance, oversight, monitoring, and program integrity activities necessary for statewide implementation.

2. Why is the POP being proposed?

Without this investment, Oregon Health Plan (OHP) members with SUD would have reduced access to a proven intervention that improves treatment participation and recovery outcomes. OHA would be unable to operationalize the CM authority if approved by the Centers for Medicare & Medicaid Services (CMS), limiting opportunities to improve engagement in care, advance health equity, and reduce overdose-related harms.

Consultation

3. Who is completing this REIS?

SUD Systems of Care and Coordinated Supports Analyst and Interim Medicaid Behavioral Health Policy Manager

4. Who is responsible for tracking equity outcomes? What method(s) are they using to track outcomes?

OHA Medicaid Behavioral Health Policy Division's SUD team, in partnership with the Health Policy & Analytics (HPA) division and the Behavioral Health Division's SUD team, would be responsible for tracking equity outcomes associated with the Contingency Management benefit. OHA would utilize existing CMS-approved 1115 demonstration monitoring, performance measurement, and evaluation processes to assess access, utilization, retention, and outcomes across demographic and geographic populations.

Equity outcomes would be tracked through analysis of Medicaid claims, encounter, and enrollment data, stratified by factors such as race, ethnicity, age, language, geography, disability status, and other available demographic characteristics. OHA would use CMS-required monitoring metrics, waiver reporting, and program evaluation activities to identify disparities in service access, engagement, retention, and outcomes, and to inform ongoing quality improvement efforts. Findings would be incorporated into existing waiver monitoring reports, performance reviews, and evaluation activities to support continuous program improvement and equitable access to services.

5. Does your agency have a DEIB practitioner (Yes or no)? Yes

a. If yes, describe how you collaborated with them on this REIS.

The Equity & Inclusion Division was not formally consulted during the development of this proposal. A limited review of the REIS was completed prior to submission; however, there was not sufficient opportunity for substantive consultation. The program plans to partner with the Equity & Inclusion Division during implementation to obtain technical assistance and guidance, including support for the application of the Health Equity Impact Assessment (HEIA) tool, as appropriate.

6. If they were not involved in the development of this REIS, please explain why.

Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.). Did you collaborate with your agency's data analysts, community engagement managers, outreach managers, and/or others that regularly interact with underserved and marginalized communities on this REIS? (Yes, no, or not applicable) Yes

a. If yes, describe how you collaborated with them on this REIS.

Yes, our Oregon Health Plan Community Engagement & Communications Director has reviewed and provided input on this REIS.

- b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

Community Engagement and Data

- 7. Identify the specific racial groups and communities that may be impacted by this POP, both directly and indirectly. In your answer, include responses to the following questions:

- a. How did you identify these impacted groups?

These groups were identified through prior OHA SUD policy, planning, waiver development, and behavioral health equity work, including analyses of treatment access, retention, overdose outcomes, and engagement with behavioral health services. OHA has consistently identified disparities in behavioral health access and outcomes among historically underserved communities and populations experiencing social and economic barriers to care.

- b. What data are you using to validate your assessment? If possible, use outreach and engagement feedback to gather information and insight.

The assessment is informed by existing OHA Medicaid and behavioral health data sources, including claims, encounter, enrollment, utilization, and overdose-related data, as well as findings from prior SUD waiver planning activities, behavioral health needs assessments, Tribal consultation, provider engagement, community feedback, and discussions with individuals with lived experience. These sources have identified persistent disparities in treatment access, engagement, retention, and outcomes across populations.

- c. If possible, disaggregate the data by race, ethnicity, geography, income level, and other relevant characteristics. If disaggregated data is not available, please describe why.

OHA routinely analyzes available Medicaid and behavioral health data by race, ethnicity, geography, age, language, disability status, and other

demographic characteristics when feasible and appropriate. Geographic analyses may include urban, rural, and frontier communities. Because this proposal is for a new benefit, program-specific outcome data is not yet available. Data completeness may vary across demographic categories due to limitations in available enrollment, claims, or encounter data.

- d. How are communities impacted by this POP? What are the disproportionate impacts? Please be specific.

The CM benefit is intended to improve treatment engagement, retention, and recovery outcomes for individuals with substance use disorders.

Communities that currently experience barriers to accessing and remain engaged in treatment may experience the greatest benefit from an intervention that supports participation in care and reinforces recovery-oriented behaviors. Without CM, existing disparities in treatment engagement and retention may persist, particularly among populations that have historically experienced inequitable access to behavioral health services, resulting in continued differences in recovery outcomes and overall health and well-being.

8. How did you ensure multiple perspectives were part of the decision-making process for this POP? In your answer, include responses to the following questions:

- a. Identify how you have or are planning to engage multiple perspectives and impacted groups to provide feedback on this POP (e.g. program design, budget, policy decisions, etc.). Please give specific examples.
- b. If community engagement is not part of your approach, please explain why and what you did instead to incorporate community perspectives. In your response, describe the following: the decision-making process used to determine engagement was not feasible or appropriate, the specific barriers (beyond general time or capacity), and how you mitigated the risk of missing community input (e.g. using existing feedback, partnering with trusted organizations, review from advisory bodies, etc.).

OHA has engaged partners across the behavioral health and substance use disorder (SUD) continuum regarding the potential implementation of Contingency Management (CM) services. This work has included collaboration with Coordinated Care Organizations (CCOs), SUD treatment providers, the Alcohol and Drug Policy Commission (ADPC), and the

University of Washington's Addictions, Drug & Alcohol Institute (ADAI), among other subject matter experts and system partners.

These discussions have informed program design, implementation planning, operational requirements, and strategies to support successful service delivery. Many of these partners serve or represent individuals with lived experience, historically underserved populations, and communities that have experienced disparities in behavioral health outcomes. OHA intends to continue engaging these partners throughout implementation, monitoring, and evaluation efforts to ensure the program remains responsive to community needs and promotes equitable access to services.

Impacts and Accountability

9. If this POP is not funded, please describe the following:

a. Which racial or ethnic communities would be most impacted.

Communities that currently experience disparities in access SUD treatment, treatment engagement, retention, and recovery supports would likely be most impacted. These include Tribal/Alaska Native communities, Black communities, Hispanic/Latino/a/x communities, Native Hawaiian and Pacific Islander communities, and other populations that experience disproportionate barriers to behavioral health care. Rural communities, individuals with limited English proficiency, and individuals experiencing housing instability may also be disproportionately affected.

b. How disparities would likely persist or worsen.

By establishing CM as a statewide Medicaid benefit, Oregon expands equitable access to an evidence-based treatment approach which also reduces reliance on limited grant-funded options and helps address barriers to sustained participation in care by providing structured incentives that offset some of the practical challenges associated with remaining engaged in treatment. Communities that already face structural barriers to care may continue to experience lower rates of engagement in treatment and fewer opportunities to benefit from evidence-based recovery supports, potentially contributing to ongoing inequities in behavioral health outcomes.

10. Who will be monitoring racial equity outcomes over time for this POP?

OHA's Medicaid Behavioral Health Policy Division's SUD Team, Behavioral Health Division (BHD), and Health Policy & Analytics Division (HPA) will jointly monitor equity outcomes associated with the CM benefit. These divisions currently collaborate on Medicaid demonstration monitoring, quality improvement activities, performance measurement, evaluation, and federal reporting requirements.

a. How will progress be reported?

Progress will be reported through existing CMS-required 1115 demonstration monitoring and evaluation activities, including waiver monitoring reports, performance measure reporting, program evaluations, and internal quality improvement reviews. When feasible, measures will be stratified by race, ethnicity, language, geography, age, and other available demographic characteristics to identify disparities and monitor progress toward equitable access and outcomes.

b. How will leadership be informed of equity impacts?

Findings will be shared through established OHA governance and oversight structures, including leadership briefings, waiver monitoring activities, program performance reviews, and budget and policy reporting processes. Equity findings will help inform program improvements, implementation decisions, technical assistance priorities, and future policy development.

c. How will the community be involved in monitoring outcomes?

Community perspectives will be incorporated through existing partner engagement mechanisms, including consultation with Tribes, community-based organizations, providers, recovery organizations, individuals with lived experience, and other behavioral health partners. Feedback obtained through waiver implementation activities, public engagement opportunities, advisory groups, and evaluation processes will be used to inform ongoing program improvements and help identify potential disparities or unintended impacts.

Oregon Health Authority 2027-29 Policy Package

Division:	PHD
Program:	Immunization
Policy package title:	ALERT Immunization System Replacement
Policy package number:	402
Related legislation:	N/A

Summary statement:	Large IT systems need to be upgraded to meet technology requirements, security challenges, and business needs that change over time. The policy package funds a new vendor contract and staffing support to modernize the ALERT Immunization Information System (IIS). ALERT IIS is the state's immunization registry, which maintains information on the vaccines administered to people in Oregon, as well as vaccine supply and provisioning information. The modernization efforts will add features like a public records portal, improve interoperability and security, and reduce administrative burden for schools, providers, and public health partners. The updated system will better support immunization tracking, outbreak response, vaccine distribution, and health equity goals statewide. Collaboration with Office of Information Services (OIS), Department of Administrative Services (DAS), Oregon Department of Justice (DOJ), Local
---------------------------	---

Oregon Health Authority: 2027-29 Policy Package

Public Health Authorities (LPHAs), the Nine Federally Recognized Tribes of Oregon, schools, and clinical partners is already underway, and no statutory changes are required.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	\$7,000,000	\$0	\$0	\$7,000,000	0	0.00

Oregon Health Authority: 2027-29 Policy Package

Purpose

1. What problem is OHA trying to fix or solve?

Oregon's ALERT Immunization Information System (IIS) is a critical data system that maintains information about all people being vaccinated in Oregon, including vaccine type, date of administration, vaccine manufacturer, provider information, and much more. The system also contains information on vaccine supply in the state and is used to project annual vaccine ordering needs. ALERT IIS was created in 1994, and the current platform, implemented in 2008, has been operating under the same vendor contract for more than 10 years. To ensure ALERT IIS conforms to the Statewide Information Technology Control Standards established in 2024 and to meet contracting requirements, a new Request for Proposals (RFP) must be posted and a vendor selected. Additionally, although the system is robust, it is in need of important updates (e.g., a public access portal for people to obtain their vaccination records, improved system interoperability, enhanced information security, etc.) that will ensure Oregon's ability to monitor individual and population level vaccinations, maintain vaccine inventory/purchasing/distribution information, and implement school exclusions dictated by Oregon statute, among other administrative tasks. Finally, ORS 433.094 requires OHA to develop and maintain an immunization registry and tracking and recall system. To meet this requirement, ALERT IIS or its subsequent replacement must be continuously operational.

2. What would this policy package buy and how and when would it be implemented?

This POP would provide funding to initiate a contract with a new vendor to support the ALERT IIS replacement system, which would be the bulk of the cost (~\$4 million over the next biennium). The remaining \$3 million requested would fund OIS contracts with project managers, communications and marketing, IQMS (quality management and assurance contract required by OIS), indirect fees, and OHA

Oregon Health Authority: 2027-29 Policy Package

Oregon Immunization Program (OIP) staff required to maintain ALERT IIS and provide subject matter expertise to the vendor and OIS staff assigned to the project.

3. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity¹ or equitable health outcomes? How does this policy package further OHA's mission and align with its strategic plan?

This policy package supports OHA's strategic plan by helping to foster healthy families and environments by ensuring immunizations are available and properly tracked for families across Oregon who wish to immunize their families against vaccine-preventable diseases. ALERT IIS plays a central role in the vaccine procurement and distribution process, which underpins each provider's ability to serve their patients. ALERT IIS also plays a key role in helping OHA understand uptake and access issues at a population level as federal changes to immunization schedules threaten community immunity protections from diseases that previously caused significant injury and/or death. ALERT IIS data and functions support implementation of West Coast Health Alliance recommendations and actions to maintain or increase community protections in the current federal landscape.

This POP also supports the focus of the Rural Health Transformation Fund (RHTF) to protect and strengthen rural health care infrastructure, access, and patient outcomes for Oregonians across the lifespan, including:

- Establishing strong foundations for healthy families.
- Supporting rural residents with special health care needs.

¹ Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability, gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.**

Oregon Health Authority: 2027-29 Policy Package

- Ensuring access to vaccines that keep communities healthy and supports aging in place.
- Supporting health care interventions like immunizations across the entire life course.

Quantifying results

4. What are the long-term desired outcomes?

Long-term outcomes include transitioning current ALERT IIS into an accessible modernized system for all users in Oregon with no gaps in service. This new system will increase access to immunization data, helping families stay protected from vaccine preventable diseases by providing ready access to records and managing school exemptions all within one system. The new system will increase OHA's ability to monitor individual and population level vaccinations to make policy decisions; maintain vaccine inventory/purchasing/distribution information; and manage the needs during disease outbreak situations.

5. What are the envisioned outputs of this investment? How will OHA measure the impacts on health inequities of this policy package?

A modernized system is expected to reduce the administrative burden on LPHA and school partners due to the annual school exclusion process. The decommissioning of the current system used for this annual process will decrease OIS maintenance and operational needs. Specific outputs include implementation of a web portal, providing direct access to individual immunization records; enhanced information security; modernized system interoperability; and reduced burden on clinical providers, responsible for inputting immunization data into the system.

Oregon Health Authority: 2027-29 Policy Package

Expedited access to vaccine records will reduce the administrative burden for clinical staff and OHA help desk staff while enhancing customer service for individuals seeking their immunization records.

How achieved

6. What actions have occurred to resolve the issue prior to requesting a policy package?

OHA's Public Health Division (PHD) has devoted significant funds to initiating the ALERT IIS Replacement Project, actively collaborating with OIS, and establishing an Executive Steering Committee. The program completed development of an RFP that was just posted, June 19th, 2026. ral Fund, Public Health Modernization) dollars have been dedicated to this project, demonstrating the significance of the work and the Division's commitment to seeing the project to completion. A training needs assessment has been completed, system requirements have been written, and a scope of work is nearly finished. Program subject matter experts are prepared to engage as soon as a vendor is identified, and contracts are in place. PHD is working with the existing vendor to sustain the outdated system and maintain its functionality while we await a new system, but the vendor's support of the current product is waning, and PHD is not certain if the current platform will be functional beyond 2028.

7. What alternatives were considered and what were the reasons for rejecting them?

There are no viable alternatives. Maintaining the existing system is infeasible, both from a technical and contractual perspective. The current vendor contract has exceeded 10 years, and the system itself is out of compliance with OIS information security standards. A new immunization information system is the only way to address technological requirements and customer needs.

Oregon Health Authority: 2027-29 Policy Package

8. What other agencies, programs, community partners or stakeholders are collaborating on this policy package?

OHA's Office of Information Services (OIS) is a steadfast partner to the Oregon Immunization Program (OIP) in the pursuit of an immunization information system replacement. OIP and OIS have been closely collaborating on this work since 2022. The Department of Administrative Services (DAS) and Department of Justice (DOJ) have also provided substantial support while developing the RFP, which was posted to Oregon Buys on June 19, 2026. Representatives from Local Public Health Authority (LPHA), Tribal public health, schools, Educational Service Districts, Student Information Systems, health researchers, hospitals, FQHCs, and other medical clinics have participated in a Working Steering Committee (WSC) to provide insight and guide the development of system requirements for prospective vendors.

9. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No changes are required.

10. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

LPHAs and Tribal public health agencies, schools (including School Based Health Centers), Oregon Department of Education (ODE), Oregon Board of Pharmacy, Oregon Board of Dentistry, and other state agencies who currently exchange data with ALERT IIS. The ALERT IIS replacement system will provide an enhanced customer experience, making access to and submission of immunization administration data

Oregon Health Authority: 2027-29 Policy Package

more streamlined and less onerous. The adoption of a new system, however, will require users to undergo training and become accustomed to new workflows.

11. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Staffing and fiscal impact

Implementation date(s): July 1, 2027

End date (if applicable): June 30, 2029

12. What assumptions affect the pricing of this policy package?

The pricing of this policy package was based on estimates gathered during the 4th quarter of 2025.

Vendor pricing is subject to change. This estimate is also based on OIP staffing capacity, which may be subject to change if federal or state funds drop below expected levels.

13. Will there be new responsibilities for OHA and/or Shared Services? Specify which programs and describe their new responsibilities.

Change in responsibilities for OIS due to the elimination of a legacy system and awareness of new system, but no additional or new responsibilities anticipated.

Oregon Health Authority: 2027-29 Policy Package

14. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

Not applicable.

15. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

Replacing current system, no new staff or modifications to existing positions needed.

16. What are the start-up and one-time costs?

There are start-up costs of an estimated \$4,000,000 for the contractor selected on the ALERT IIS RFP.

17. What are the ongoing costs?

Ongoing costs support personnel and fringe benefits. Additional, \$1,109,950 for Covendis and IQMS contractors. As well as indirect costs of \$879,500.

18. What reductions will you use to offset the costs of this work and maintain budget neutrality?

It's not budget neutral.

19. What are the sources of funding (revenue) and the funding split (GF/OF/FF) for each part of the investment as well as the offset/reduction?

100% GF.

Oregon Health Authority: 2027-29 Policy Package

20. What are the potential savings (above the offset to pay for the investment)?

Not Applicable.

RACIAL EQUITY IMPACT STATEMENT (REIS) WORKSHEET: POLICY OPTION PACKAGE (POP) QUESTIONS

OHA POP #402: ALERT IMMUNIZATION SYSTEM REPLACEMENT

Program managers responsible for the POP: Please answer the questions below for every POP being proposed in your agency request budget. To fill out this worksheet, download a copy of this worksheet and type your answers below each question.

Program Overview

1. Please describe the POP being proposed:

Oregon's ALERT Immunization Information System was created in 1994, and the current platform was implemented in 2008 and has been operating under the same vendor contract for more than 10 years. To ensure information security standards are met and to meet contracting requirements, a new RFP must be posted and a vendor selected. Additionally, although the system is robust, it is in need of important updates (e.g., a public access portal for people to obtain their vaccination records, improved system interoperability, enhanced information security, etc.) that will ensure Oregon's ability to monitor individual and population level vaccinations, maintain vaccine inventory/purchasing/distribution information, and implement school exclusions dictated by Oregon statute, among other administrative tasks.

2. Why is the POP being proposed?

ORS 433.094 requires OHA to develop and maintain an immunization registry and tracking and recall system. To meet this requirement, ALERT or its subsequent replacement, must be continuously operational. This POP would provide funding to initiate a contract with a new vendor to support the ALERT IIS replacement system, which would be the bulk of the cost (~\$4 million over the next biennium). The remaining \$3 million requested would support OIS contracts with project managers, communications and marketing, IQMS (quality management and assurance contract required by OIS), indirect fees, and OIP program staff required to maintain the ALERT system and provide subject matter expertise to the vendor and OIS staff assigned to the project.

Consultation

3. Who is completing this REIS?

Interim Immunization Section Manager

4. Who is responsible for tracking equity outcomes? What method(s) are they using to track outcomes?

The Interim Immunization Section Manager is responsible for tracking equity outcomes.

5. Does your agency have a DEIB practitioner (Yes or no)? Yes.

- a. If yes, describe how you collaborated with them on this REIS.
- b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

Our program was unable to connect with a Public Health Division Equity practitioner prior to submission of this POP proposal. We are actively coordinating with the PHD Partnerships for Community Health to engage a practitioner to support review of this POP.

6. Did you collaborate with your agency's data analysts, community engagement managers, outreach managers, and/or others that regularly interact with underserved and marginalized communities on this REIS? (Yes, no, or not applicable)

- a. If yes, describe how you collaborated with them on this REIS.

Public Health Division program data analysts and subject matter experts have provided information on the equity impacts of this POP.
- b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

Community Engagement and Data

7. Identify the specific racial groups and communities that may be impacted by this POP, both directly and indirectly. In your answer, include responses to the following questions:

This POP consists primarily of an IT system enhancement, which is not anticipated to disproportionately impact any group of people in Oregon. The system will, ideally, improve the customer experience for individuals using the ALERT IIS replacement system to access their immunization records by making access directly available through a web portal. Not funding the POP would result in a loss of service, which would affect people seeking to obtain their personal health information, especially those needing rapid access for school or childcare entry. In this way, failure to support this POP would harm those individuals who are already socioeconomically disadvantaged.

8. How did you ensure multiple perspectives were part of the decision-making process for this POP? In your answer, include responses to the following questions:

- a. Identify how you have or are planning to engage multiple perspectives and impacted groups to provide feedback on this POP (e.g. program design, budget, policy decisions, etc.). Please give specific examples.

The respective Public Health programs will engage with community partners, work groups, and Advisory Boards as applicable.

- b. If community engagement is not part of your approach, please explain why and what you did instead to incorporate community perspectives. In your response, describe the following: the decision-making process used to determine engagement was not feasible or appropriate, the specific barriers (beyond general time or capacity), and how you mitigated the risk of missing community input (e.g. using existing feedback, partnering with trusted organizations, review from advisory bodies, etc.).

Impacts and Accountability

9. If this POP is not funded, please describe the following:

- a. Which racial or ethnic communities would be most impacted.

If this POP is not funded, all racial and ethnic communities will be impacted, and OHA will fail to fulfil its statutory mandate to maintain an immunization registry and tracking/recall system. Accessing proof of immunity is required for the majority of families seeking public school entry and group childcare

services. Families who do not have an established medical home, who are unable to contact medical providers during routine business hours, and those who speak languages other than English are less likely to access their immunization records directly from a provider; thus, this POP will support health equity across racial, ethnic, and socioeconomically diverse communities.

- b. How disparities would likely persist or worsen.

See above.

10. Who will be monitoring racial equity outcomes over time for this POP?

The Oregon Immunization Program.

- a. How will progress be reported?

Progress will be reported monthly to the ALERT IIS Executive Steering Committee, as well as the Public Health Division Director and the OHA Director.

- b. How will leadership be informed of equity impacts?

As this POP is an IT enhancement project, we do not anticipate any negative equity impacts.

- c. How will the community be involved in monitoring outcomes?

Users of the system across government and community organizations will have an opportunity to provide feedback during implementation of the new system.

Oregon Health Authority (OHA) 2027-29 Policy Package

Division:	Medicaid, Children and Family Policy Team
Program:	Early and Periodic Screening and Diagnostic Treatment (EPSDT) Program, Behavior Rehabilitation Services (BRS)
Policy package title:	Behavior Rehabilitation Services
Policy package number:	403
Related legislation:	Not applicable

Summary statement:

To comply with Center for Medicare & Medicaid Services (CMS) policy, OHA must make Behavior Rehabilitation Services (BRS) accessible to all eligible Oregon Health Plan (OHP) members and establish MMIS oversight to the BRS program. Currently BRS is only accessible to youth who are under the care of Child Welfare or Oregon Youth Authority. This POP would fully establish a community driven BRS program, designated as Youth Enhanced Support Services (YESS) for Oregon youth. If the POP is not approved, it will further delay OHA from providing services to eligible youth and getting into compliance with federal Medicaid policy.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	\$7,391,540	\$0	\$8,235,148	\$15,626,688	8	6.00

Oregon Health Authority: 2027-29 Policy Package

Purpose

1. What problem is OHA trying to fix or solve?

Currently, the Behavior Rehabilitation Services (BRS) program is not implemented in a way that meets federal Medicaid requirements as described in Oregon's Medicaid State Plan. BRS is a covered service in the Medicaid state plan; however, Oregon Health Plan youth and families have limited access to this service and support. To comply with Center for Medicare & Medicaid Services (CMS), BRS services need to be offered to all eligible youth.

The purpose of the BRS program is to support youth with psychosocial, emotional, and behavioral needs by providing supports and skills training. Services are required to be gender-responsive, culturally sensitive, trauma-informed, and age or developmentally appropriate. Types and combination of services should be based on the unique needs of each young person and family. Accordingly, the service array includes individualized assessment and service planning processes in partnership with families and youth to determine the intensity and combination of services and supports that would be most beneficial.

The BRS program has not been fully funded, and the current state budget only provides funding for youth in the care or custody of Oregon Department of Human Services (ODHS) Child Welfare (CW) or the Oregon Youth Authority (OYA). State funding is not available for county-based Juvenile Justice programs or for access to BRS for youth in the community. Accordingly, these services are not currently available to children and youth in their homes or schools as preventative measures when a child is first recognized as struggling.

Oregon Health Authority: 2027-29 Policy Package

This POP would fully establish a community driven BRS program, designated as Youth Enhanced Support Services (YESS) for Oregon youth. YESS development will be driven by these key values: family and youth driven, community connected, and culturally and linguistically competent. The lack of these services contributes to children, who are eligible for and need these critical services, increasing the risk of escalating into crisis, and in some cases unnecessary separation of children and youth from their families and incarceration in order to receive services. If these services were provided before a child reaches crisis, they would be more likely to stay with their families and in their communities. This, combined with other Medicaid compliance issues, could result in the disallowance of previously paid funds by the CMS and creates unnecessary limited access to the program across the state for youth and families.

Oregon has the second highest rate of detention for youth per capita in the U.S., and almost half of the children in OYA custody are from communities of color. Improving access as a preventative measure will impact underserved communities by offering access to services and supports before escalation and crises that can lead to the youth being incarcerated and before CW becomes involved. Better access to BRS will also positively impact youth in ODHS CW custody.

In addition, BRS is structured whereby ODHS and OYA pay providers directly using Medicaid funds through their own internal process. Medicaid programs are required to be operationalized through the Medicaid Management Information System (MMIS). While currently all BRS providers are enrolled in MMIS, providers contracted with ODHS and OYA, are not billing through MMIS. This creates a compliance issue and a gap in appropriate oversight of a Medicaid program by OHA (State Medicaid Agency). Navigating these issues has significantly limited the ability of OHA staff to focus on the

Oregon Health Authority: 2027-29 Policy Package

development of new mandated services, as core focus is on bringing established services into compliance with state and federal rules and regulations.

2. What would this policy package buy and how and when would it be implemented?

OHA is requesting 18 months of services, \$1 million in grants for infrastructure buildout counties/providers, 8 positions. This option ramps up funding for all eligible OHP members on Jan 1, 2028, and obtains minimal compliance and oversight for sustained program quality assurance.

Specifically, this POP will enable OHA to:

- **fully establish a community driven BRS program, designated as Youth Enhanced Support Services (YESS) for Oregon youth so that all eligible children and youth in Oregon, covering the state share and costs associated with placement-related activities in YESS residential and proctor foster settings for all eligible OHP members.** Once fully funded, comprehensive community services for all eligible youth would go into effect 1/1/2028.
- **configure Medicaid Management Information System (MMIS) to streamline all BRS provider reimbursement (including referrals managed by ODHS and OYA) which will allow OHA full oversight and access to claims data, achieving compliance with federal and state Medicaid laws.** Any additional agency-specific program requirements or non-Medicaid services covered by ODHS or OYA would be handled through contracts. It is estimated that completing the configuration could take between 6 to 9 months. This estimate factors in the possibility of leveraging existing rules and edits within MMIS, though additional time may be necessary if new provider types, rate groups, and rules are needed.

Oregon Health Authority: 2027-29 Policy Package

- **fund a research project to assess gaps in Oregon’s continuum of care with a focus on best practices and treatment options that complement BRS/YESS services. BRS is not a BH treatment service. Therefore, other BH services in complement to BRS could strengthen the service continuum, especially when expanded to the entire eligible Medicaid population.**

Specialized treatment services could include:

- Commercial Sexual Exploitation of Children (CSEC) treatment
 - Substance Use Disorder (SUD) treatment
 - Mental Health (MH) treatment
 - Sexual Abuse Specific Treatment (SAST)
 - Treatment/Therapeutic Foster Care (TFC) programs
 - Eating Disorder specific programs
- **expand or create new specialized treatment services as recommended by the research study, covering the state share.** Based on the results of this continuum of care gap assessment, this POP would fund the expansion of BRS/YESS or investment in implementing any other types of care identified to meet these needs.
 - **offer grant funding to allow providers to improve and expand current services to BRS /YESS in-home, provide community access to BRS or implement new specialized treatment services as recommended by the research study.** Grant programs will include research about the amount and types of services a grant would fund and determine if the grants are for one-time start-up costs, ongoing financial stability of the program, or both. Grants will be necessary to ensure financial solvency for provider agencies to ensure statewide implementation of BRS. Research will be needed to identify grant reporting requirements, aligning with current grants operated through OHA’s Behavioral Health Division and other federal grant opportunities.

Oregon Health Authority: 2027-29 Policy Package

Alignment with other grant opportunities for providers intends to reduce administrative burden on providers to access additional funding opportunities.

- **more appropriately staff the BRS/YESS program with the following eight positions:**
 - (1) Operations and Policy Analyst 4
 - (1) Operations and Policy Analyst 3
 - (1) Operations and Policy Analyst 2
 - (1) Compliance Specialist 3
 - (4) Public Service Representative 4

3. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity¹ or equitable health outcomes? How does this policy package further OHA's mission and align with its strategic plan?

OHA's mission in reducing health disparities and providing access to quality care is a priority for BRS, and one that is achievable. This POP would allow OHA to align BRS/YESS with the OHA Strategic Plan.

Expanding BRS eligibility to include all OHP members beyond current custodial settings, like CW and OYA, addresses a critical compliance gap and access barrier. By reducing the reliance on custodial systems solely for accessing BRS, this program expansion aims to mitigate systemic inequities.

¹ Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability, gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.**

Oregon Health Authority: 2027-29 Policy Package

Oregon's System of Care Advisory Council (SOCAC) identified the lack of funding to broaden access to BRS to all eligible OHP members as a barrier in 2020. By integrating BRS within Oregon's broader healthcare framework and emphasizing data-driven decision-making, OHA aims to foster comprehensive care coordination and improve health outcomes. The policy's commitment to collecting data on service needs, health disparities, and program effectiveness underscores its alignment with OHA's strategic goal of using evidence-based approaches to drive equitable health outcomes statewide.

OHA is currently working on:

- Transitioning all BRS providers to bill through MMIS through collaboration with ODHS and OYA.
- Updating BRS prior authorization (PA) and due process procedures to align with federal and state regulations.
- Onboarding OHA contracted Licensed Practitioner of the Healing Arts (LPHA) for all OYA referrals. This will streamline the medical necessity determination process through one centralized LPHA for all BRS providers.
- Training state and county staff on MMIS billing and new PA request processes.
- Developing a communication plan to inform community about expanded access.
- Coordinating and holding community and provider listening sessions.
- Revising rules and processes to facilitate access to all eligible OHP members.
- Updating ongoing compliance practices to reflect these changes in process procedures and rule.

Oregon Health Authority: 2027-29 Policy Package

Quantifying results

4. What are the long-term desired outcomes?

The desired long-term outcomes include increased youth access to BRS through the OHP, improved program outcomes measures, decreased requests from families for voluntary placement due to enhanced and earlier child behavior support services, and reduced involvement of CW or juvenile justice systems. Success will be measured by these indicators, demonstrating a comprehensive improvement in service accessibility, effectiveness, and the overall well-being of youths and families benefiting from BRS support across the state. In addition, it is critical to ensure that the state Medicaid authority has oversight of BRS programs and access to claims data to ensure compliance with federal and state Medicaid laws.

5. What are the envisioned outputs of this investment? How will OHA measure the impacts on health inequities of this policy package?

OHA is requesting several positions to implement policies and procedures to improve access and administration of BRS statewide.

Policy analysts will ensure the Medicaid State Plan authority is codified in Oregon Administrative Rules (OARs). MED will review demographics data to determine if there are populations that are disproportionately represented within the BRS program and work with systems to address inequities. Policy analysts will also be collaborating with the EPSDT Program in reviewing key performance measures for youth enrolled in BRS with a focus on race, ethnicity, language, and disability (REALD)/sexual orientation and gender identity (SOGI) data.

Oregon Health Authority: 2027-29 Policy Package

In collaboration with OYA, CW, Child Family Behavioral Health (CFBH) team, and Medicaid's community engagement team, policy analysts will use data and tools provided by the research analyst to inform process and guidance development and opportunities for focused community outreach. Focused community outreach and partnership with the Division of Equity and Inclusion and the Office of Community Health and Engagement (previously named Community Partner Outreach Program) will identify specific communities where training, education, and outreach will impact the OHA's 2030 goal to eliminate health inequities.

This investment will:

1. Provide access to BRS to Early and Periodic Screening, Diagnostic and Treatment (EPSDT) OHP members – according to CMS just over 560,000 children, youth and young adults under age 21 were eligible for EPSDT in 2025, approximately 55% of people under age 21 in Oregon. This would be the eligible population for BRS, not a projected caseload number.
2. Bring OHA as State Medicaid Agency to compliance with CMS policy.
3. Improve oversight for Medicaid program in accordance with CMS policy.

BRS program envisioned would incorporate skills building and mentoring, and would possibly be developed as the Oregon Youth Mentoring Supports and Services Program.

Oregon Health Authority: 2027-29 Policy Package

How achieved

6. What actions have occurred to resolve the issue prior to requesting a policy package?

Previous efforts to address challenges within BRS have been limited, primarily due to funding and staffing constraints and difficulties integrating BRS within broader behavioral health services. Securing sufficient funding to expand BRS beyond its current constraints, limited mainly to CW or OYA custody, has been a significant challenge. This has impacted the accessibility and quality of BRS services for diverse populations in Oregon. In response to these ongoing challenges, this Policy Option Package aims to redefine service delivery by enhancing representation, cultural responsiveness, and accessibility, aligning with Oregon's 2030 goal of achieving equitable healthcare access and outcomes.

Over the past four years, OHA has taken proactive steps to lay a foundation for implementation. This includes rewriting rules to allow for telehealth during emergencies like pandemics and natural disasters, implementing Family First and SB 710 regulations to modernize service practices, and conducting a thorough review of BRS referral and authorization processes. OHA has also addressed discriminatory practices of denials based on disability, ensured all BRS providers are Medicaid enrolled, and contracted qualified medical professionals for BRS medical determinations.

Currently, OHA is actively updating BRS PA procedures to comply with state and federal regulations, onboarding new Licensed Practitioner of the Healing Arts (LPHA) contractors, and training staff on revised authorization processes. Comprehensive communication strategies are being developed, providers are engaging in community and provider listening sessions, and OHA is drafting new rules to implement expanded BRS access for OHP members. Ongoing efforts also include updating compliance practices to ensure alignment with updated procedures and regulations.

Oregon Health Authority: 2027-29 Policy Package

OHA has partnered with County Providers, OYA and ODHS CW to discuss system gaps towards implementation as well as discussions with fiscal and technical programs to discuss system interoperability between the CW electronic records system and the OYA electronic records system. County providers were able to apply through provider enrollment to be OHA service providers, provide BRS services, and are billing directly in MMIS.

These actions, together with this POP, will enhance the accessibility and equity of BRS services for all eligible OHP members in Oregon, addressing historical barriers and ensuring that BRS effectively meets the needs of Oregonians across diverse communities.

7. What alternatives were considered and what were the reasons for rejecting them?

Oregon's Medicaid state plan is specific about how implementation of BRS is necessary to comply with CMS. This leaves OHA with two options. OHA is required to either implement BRS as a statewide service offered to all OHP BRS-eligible individuals or remove this service as a Medicaid-eligible service. Removing BRS as a Medicaid-eligible service would have far-reaching impacts on OHA, CW, and OYA, and significant reduction in services for youth and their families. Contrarily, failing to provide BRS statewide is a risk for continuing to access Medicaid matching funds, which may result in the state repaying for funds used outside of the Medicaid state plan.

Oregon Health Authority: 2027-29 Policy Package

8. What other agencies, programs, community partners or interested parties are collaborating on this policy package?

- Oregon System of Care Advisory Committee (SOCAC)
- Oregon Youth Authority (OYA)
- Oregon Department of Human Services – Child Welfare (ODHS-CW)
- OHA has received feedback from partners that the limited pathway of BRS access to youth in CW, OYA, or county-based Juvenile Justice custody sets up an unintended consequence of a perverse incentive. Partner feedback was that parents have had no choice to receive BRS services and have their child remain in their family: this has resulted in actions that are not in the best interest of their family to seek access to BRS services, such as relinquishing their children to CW or OYA, abandoning their children in the ER, or locking their children out of the house and calling law enforcement.
 - This choice is particularly harmful to Black, African American, American Indian/ Alaska Native, Latino/a/x, and immigrant families who are already disproportionately represented in Oregon's CW and OYA system. This outcome would exacerbate existing inequities of punitive system impacts on acute and future health.
 - This choice also further isolates disproportionately affected youth because their parents are forced to walk away for the chance to get them access to care, removing any advocacy, support and stability they were providing for the youth.

Oregon Health Authority: 2027-29 Policy Package

9. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No, this package requests resources to implement BRS as a statewide service and to become and remain compliant with CMS policy.

10. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

The ODHS Office of Developmental Disabilities, ODHS – CW, OYA, local county governments, county-based Juvenile Justice, Tribal governments and educational institutions would be affected.

Expanding current BRS to address statewide needs would increase the number of providers throughout all areas of the state. This expansion would fund traditional out-of-home BRS placement for needed foster care and build an in-home BRS option to assist in developing parental skills necessary for the child to remain embedded in the family home and familial system.

The statewide expansion of BRS services will affect each identified entity or program differently. The ODDS system will see impacts as appropriate settings and providers expand to meet the diverse needs of youth throughout Oregon, including those with intellectual and developmental disabilities. CW and OYA, along with county-based juvenile justice programs, already offer BRS services but will likely experience staffing and financial impacts due to increased provider oversight and service provision. Local county governments will need additional funding to support BRS as a leveraged program, where they are currently required to pay the state's share to receive matching federal funds. Tribal governments will be impacted by changes and additions to Medicaid services, with opportunities to

Oregon Health Authority: 2027-29 Policy Package

review and request consultation before the approval and submission of Medicaid state plan changes and rule promulgation. Similarly, educational institutions will be vital members of the youth's service plan and educational plan development, impacting the necessary supports for youth success in all settings the youth attends.

11. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No; however, there is general fund and federal fund financial risks due to the lack of statewide implementation of traditional BRS services. This POP is to eliminate financial risk to federal Medicaid dollars and ensuring compliance with federal CMS policy.

Staffing and fiscal impact

Implementation date(s): 1/1/2028

End date (if applicable): ongoing

12. What assumptions affect the pricing of this policy package?

The pricing is based off of the biennium projection of costs for full program implementation. OHA will require staffing and funding to implement and implement BRS services statewide. Assumptions consider expanding services statewide, staffing resources to ensure compliance with Oregon's Medicaid State Plan, and funding to expand the number of providers to ensure statewide access.

Oregon Health Authority: 2027-29 Policy Package

The assumption is that staff will be hired and start January 1, 2028. The original estimate was based on prior projects, like the SAIP building and similar Child Welfare projects, which projected about \$3M in startup costs. That included property development, personnel cost, training, furniture, and equipment, based on providing 24 months of service with 10 positions. The estimate was then reduced to about \$1M to reflect 18 months of service and 8 positions.

This pricing assumes that significant efforts at recruiting providers must take place and provider enrollment will need to work with providers to set them up in Medicaid billing systems to receive reimbursement. Additional efforts to provide information on the program to youth and families and specific information to disproportionately impacted populations will also require diligent efforts by staff.

Research is needed to help identify the gaps in the continuum of care specifically for children with a need for specialized services such as Commercial Sexual Exploitation of Children (CSEC) treatment, Substance Use Disorder (SUD) treatment, Mental Health (MH) treatment, Sexual Abuse Specific Treatment (SAST), Treatment/Therapeutic Foster Care (TFC) programs, eating disorder specific programs, and other types of care identified to meet these needs.

A grant program would be needed to help providers meet the expanded needs and address program capacity with implementing the types of services identified through research. Supporting providers with one time start-up costs to ensure the stability of the program will also be essential as expanded statewide access.

Oregon Health Authority: 2027-29 Policy Package

Additionally, technology systems such as the Medicaid Management Information System need to be leveraged so that all providers can bill through this CMS required system. In addition to billing, service level data is reviewed by CMS and used for compiling national health statistics and current systems are not reporting these required data points if services are provided through OYA or ODHS. In order to complete the system configuration needed to allow for billing in MMIS, it is estimated that OHA staff would need between 6-9 months if they are able to use existing structures within MMIS.

13. Will there be new responsibilities for OHA and/or Shared Services? Specify which programs and describe their new responsibilities.

Yes, OHA will need staffing resources to address rule updates, guidance and billing documents, research and data collection to target specific areas and communities in the state, and outreach to underserved communities and communities of color overrepresented in the CW and juvenile justice systems. OHA anticipates the growth and expansion of BRS services and additional services to meet the current needs of Oregon youth and their families. The additional staff requested in this POP will provide the foundation for BRS services throughout Oregon. Additional specialized services may benefit youth. However, OHA needs staff, guidance, and policies to ensure each service is medically appropriate and necessary for each youth. Additional services and access points for BRS will necessitate providers create and maintain documentation supporting the need for a service and ongoing documentation to support the current service level.

Each staffing resource requested will play a vital role in making significant improvements to the BRS program to achieve and sustain compliance with CMS expectations. As discussed throughout this POP, OHA has yet to have resources to ensure statewide implementation. Updates to the program have

Oregon Health Authority: 2027-29 Policy Package

begun; however, without the resources requested, OHA risks becoming non-compliant with BRS and other program areas.

Requested staffing is intended to improve BRS's current and future states, ensure updated and accurate provider guidance and technical assistance, and ensure providers comply with rules, guidelines, and contractual obligations.

14. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

Yes, BRS expansion will increase the number of PAs received, reviewed, and processed. This POP requests additional staff to ensure PA authorizations are completed on time and that individuals receive hearing rights when services are determined not appropriate for their needs. Additionally, this expansion intends to increase the number of providers and the number of eligible youths accessing the service.

Currently, OHA contracts with only six of thirty-six counties; OHA will need to develop contracts with counties throughout the state to access the BRS leverage program. In-Home BRS will be offered statewide through direct Medicaid payment; however, OHA must develop provider opportunities through recruitment, training, enrollment, and guidance for this to be effective. Staffing is necessary to offer these services. As a result of this work, OHA anticipates growth in the number of individuals eligible to access. As a prevention service, the in-home model will be implemented before the youth and their family's involvement in the juvenile justice system and CW. Additional guidance will be necessary to refer youth to appropriate services in other health programs.

Oregon Health Authority: 2027-29 Policy Package

15. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

Proposed Positions: All positions are permanent and will start at the earliest budget cycle.

- **(1) OPA 4 (BRS Lead):** Dedicated to the Medicaid Behavioral Health Policy and Programs team. This position leads program oversight and compliance efforts in collaboration with the Oregon Youth Authority, the Oregon Department of Human Services Division of Child Welfare, and Oregon Health Authority's Divisions of Medicaid, Behavioral Health, Budget, and Health Policy and Analytics Divisions. Responsibilities include leading the BRS program under manager approval, directing work, participating in and leading onboarding activities, and engaging with DOJ, Medicaid, CW, and BH leadership to steer the direction and objectives of the BRS program.
- **(1) OPA 3 (BRS Analyst):** Dedicated to the Medicaid Behavioral Health Policy and Programs team. This position is responsible for leading the BRS In-Home policy expansion. This analyst will develop policy utilizing rule development, policy guidance, and billing guidance. This position will work with CW, CFBH, budget, and OAFA to develop applicable rate-setting methodologies, author a Medicaid State Plan Amendment, and develop rules around eligibility, service authorization, providers, service types and documentation standards. This position will develop additional provider guidance, including program parameters and billing guidance
- **(1) OPA 2 (BRS Coordinator):** Dedicated to the Children and Families team in the Behavioral Health Division. This position is responsible for research and access grants to connect to a child's necessary level of care. Grants will be used to provide funding to current and potential providers to meet the current needs of children in BRS and fully use their available capacity. This position will also administer grant opportunities to bolster the capacity and resilience of the BH system, identifying options for sustainable improvements and connections to specialized services.

Oregon Health Authority: 2027-29 Policy Package

- **(1) CS 3 (BRS Compliance specialist):** Dedicated to the Medicaid FFS Quality Assurance team. The CS3 provides regulatory advice and oversight for traditional and In-Home BRS programs. Staff must investigate complaints of non-compliance with rules governing facilities and providers. The CS3 identifies, interprets, and applies Medicaid Code of Regulations, Oregon Revised Statutes, Oregon Administrative Rule and OHA policies, and provides training, mentoring and technical assistance with rules and policies governing health and safety of individuals receiving services. This position helps to ensure individuals are receiving the services and supports identified in their individualized services plans, as described in OAR. Additionally, this staff will be responsible for auditing county contracts and other providers to ensure program compliance with OAR and contractual obligations
- **(4) PSR 4 (BRS Prior Authorization Specialist):** Dedicated to the Medicaid Behavioral Health Policy and Programs team. These staff will screen, enroll, revalidate, maintain, and expand PA workloads. These staff will maintain a new and growing provider group. The BRS provider and In-Home BRS programs require specific and new provider types and additional maintenance as they move within and between other programs within OHA, OYA, and ODHS. These staff will be responsible for working with providers and answering questions about services and supports offered through the Program, ensuring MMIS is updated accurately. These staff will monitor email communication and provide timely and accurate responses, consulting, as needed, with the appropriate policy analyst or manager. Potentially, at least one PSR4 will be in the Medicaid Provider Enrollment unit dedicate to assisting new BRS providers to enroll in MMIS.

16. What are the start-up and one-time costs?

Start-up and one-time costs are those costs associated with grant opportunities for providers to expand their services throughout the state and to underserved populations.

Oregon Health Authority: 2027-29 Policy Package

- Funding for a research project to assess whether specialized treatment services should be part of BRS or separate programs.
- Grant funding to allow providers to improve and expand current services to BRS in-home, community access to BRS or to implement new specialized treatment services recommended through the research study.
- State share to cover cost of expanding or creating new specialized treatment services recommended through the research study.
- Funds to configure MMIS to be able to streamline all BRS provider payments (including referrals managed by ODHS and OYA).

17. What are the ongoing costs?

BRS services and supports, expanding services statewide, and providing access to all OHP BRS eligible individuals and their families. Ongoing costs also include funding for staffing and funding enabling counties to leverage matching Medicaid funds.

- Ongoing cost to cover the state share and costs associated with placement related activities in BRS residential and proctor foster settings for all eligible OHP members.
- Program Staffing

18. What reductions will you use to offset the costs of this work and maintain budget neutrality?

This POP maintains budget neutrality by fully offsetting the requested investment through the savings and reductions included in POP 415: OHA Savings and Reductions.

Oregon Health Authority: 2027-29 Policy Package

19. What are the sources of funding (revenue) and the funding split (GF/OF/FF) for each part of the investment as well as the offset/reduction?

For OHA, BRS services are a leveraged program, meaning that contracting counties pay the state share of matching federal funds. In-Home BRS services will be paid through OHA at the appropriate federal match. OYA and CW have access to additional general funds when Medicaid funding is not appropriate. Like any other Medicaid program, the federal match will be 60 percent. State share match will be 40 percent.

20. What are the potential savings (above the offset to pay for the investment)?

Eliminates compliance risk of the BRS program described in the state plan. Ensures statewide access to services and supports in appropriate settings, preventing the need to access additional high-cost services such as emergency department utilization and boarding, parents relinquishing their custody to CW or OYA, and utilizing law enforcement instead of appropriate interventions.

RACIAL EQUITY IMPACT STATEMENT (REIS) WORKSHEET: POLICY OPTION PACKAGE (POP) QUESTIONS

OHA POP 403: BEHAVIOR REHABILITATION SERVICES

Program managers responsible for the POP: Please answer the questions below for every POP being proposed in your agency request budget. To fill out this worksheet, download a copy of this worksheet and type your answers below each question.

Medicaid Behavior Rehabilitation Services POP Program Overview

1. Please describe the POP being proposed.

To meet Centers for Medicare & Medicaid Services (CMS) expectations, Behavior Rehabilitation Services (BRS) needs to be offered to all eligible individuals in Oregon Health Plan (OHP) through the Early and Periodic Screening and Diagnostic Treatment (EPSDT). Medicaid covered services should be accessible to all eligible individuals.

The goals of this POP include providing BRS in home settings, not just CW or OYA out of home placement settings in order to reduce trauma and system involvement, but to increase upstream interventions for individuals who need support. If the BRS POP is funded, services could prevent individuals from having to leave their home and OHA could provide support from a preventative stance rather than from a reactionary stance when youth are in an out of home setting and likely have experienced crisis and trauma over a long period.

2. Why is the POP being proposed?

Currently BRS is only accessible to youth who are under the care of ODHS Child Welfare or Oregon Youth Authority. To comply with Center for Medicare & Medicaid Services (CMS) policy, OHA must make BRS accessible to all eligible Oregon Health Plan (OHP) members and establish MMIS oversight to the BRS program. The POP will enable OHA to expand BRS to serve all Medicaid eligible youth, and includes the resources and staffing needed to fully implement the program.

3. Who is completing this REIS?

The REIS is being completed by the Medicaid Children and Family Policy Team in collaboration with Health Policy and Analytics (HPA), Equity and Inclusion Division, and Medicaid OHP Community Engagement & Communications Unit.

4. Who is responsible for tracking equity outcomes? What method(s) are they using to track outcomes?

Shifting BRS under OHP Medicaid MMIS data and oversight, would allow data analysts and BRS program staff at Oregon Health Authority (OHA) to increase equitable access to services and implement a reduction of racial, ethnic, and geographical disparities. Further, OHA could determine and assess additional equity outcomes using administrative claims and enrollment data from Oregon's Medicaid Management Information System (MMIS) or qualitative data from member issues, complaints, community engagement or outreach.

Several data analysts within the HPA Division focus on the EPSDT population and even more specifically on children and family behavioral health. The EPSDT program is building capacity to monitor health outcomes for equity groups including Race, Ethnicity, and Language, Disability (REALD) and Sexual Orientation, Gender Identify (SOGI) demographic groups and EPSDT OHP members with specialized health needs, and those connected to government systems like CW and OYA. Specific outcomes could be determined related to BRS services, or EPSDT OHP members who utilize BRS services could be considered an equity group to closely monitor.

Health outcomes include quality and access metrics from the CMS Child Core Set, EPSDT outcomes from the CMS 416 report, and OHA is currently prioritizing additional "homegrown" EPSDT outcomes for monitoring.

Pertinent OHA staff could participate in a Health Equity Impact Assessment (HEIA) for BRS to identify equity outcomes and determine a path forward for meaningful community engagement.

OHA leadership will then prioritize the outcomes and approaches to use in order to support program changes to decrease disproportionate outcomes for impacted populations.

5. Does your agency have a Diversity, Equity, Inclusion and Belonging (DEIB) practitioner (Yes or no)?

Yes.

- a. If yes, describe how you collaborated with them on this REIS.

The Oregon Health Authority has engaged in a process to assess health equity for EPSDT beneficiaries accessing OHP benefits. The HEIA is a tool for proposed policy changes with the intent to eliminate health inequities.

In April of 2026, the Medicaid team collaborated with Health Policy Analytics, Equity and Inclusion Division, and the MMIS Business Services Unit, in planning the HEIA that will accompany the Children and Youth Medicaid Data Report (CYMDR) that is required by legislature every two years to ensure the process is centered on health equity.

- b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

NA

6. Did you collaborate with your agency's data analysts, community engagement managers, outreach managers, and/or others that regularly interact with underserved and marginalized communities on this REIS? (Yes, no, or not applicable)

Yes.

- a. If yes, describe how you collaborated with them on this REIS.

As part of the process to respond to the POP, The Medicaid Children and Family Policy Team has coordinated with the Health Policy and Analytics, Equity and Inclusion Division, and Medicaid OHP Community Engagement & Communications Unit.

HPA data analysts who are dedicated to the EPSDT population and to child and family behavioral health have reviewed this application. The data

analysts will be able to incorporate BRS program and services data into monitoring and evaluation plan for the EPSDT population once services switch to Medicaid [and have MMIS data and oversight incorporated](#).

Staff from the Equity & Inclusion Division were consulted during the development of this proposal and reviewed the application from a health equity perspective. The Division is committed to providing ongoing technical assistance and guidance, including support for the application of the Health Equity Impact Assessment (HEIA) tool, as appropriate, to strengthen equitable implementation.

The Director of the Medicaid OHP Community Engagement & Communications Unit reviewed this application. This unit will consult with implementing staff on opportunities to engage and communicate with impacted community members, partners, and providers.

- b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

N/A

Community Engagement and Data

7. Identify the specific racial groups and communities that may be impacted by this POP, both directly and indirectly. In your answer, include responses to the following questions:

Preliminary analysis of BRS requests indicate that some groups are accessing and utilizing more BRS services than others. [In April 2026](#), about 4.9% of OHP members under age 21 were American Indian or Alaska Native and 5.9% were Black or African American. In 2026 so far, of OHP members who utilized BRS services, 7.8% were American Indian or Alaska Native, and 9.4% were Black or African American which is more than expected compared to who is enrolled in OHP. A higher percentage of members under age 21 who accessed BRS services were disabled or had a complex chronic or a behavioral health diagnosis compared with all OHP members under age 21.

The System of Care Advisory Council (SOCAC) published the [Oregon System of Care 2026-2029 Strategic Plan](#) on January 2, 2026. On page 12, the report lists “priority populations,” which include groups that are overrepresented in juvenile legal systems and child welfare, such as American Indian or Alaska Native persons, and Black, African American persons. SOCAC further notes that:

“Inequity and systemic racism have kept these communities from accessing upstream systems. These upstream systems include behavioral health services and services for people identified as having intellectual or developmental disabilities. In contrast, these groups are overrepresented in downstream services like child welfare and the juvenile legal system.”

a. How did you identify these impacted groups?

These impacted groups were identified by HPA data analysts through a review of demographic data from individuals who are currently served in BRS programs or requested services. These affected groups are also identified through the SOCAC strategic plan.

These impacted groups only represent children, youth and young adults who requested or utilized BRS services. There may be impacted groups that are unknown because we do not have administrative or qualitative data about them. As a result, OHA will focus on analyzing newly eligible populations.

b. What data are you using to validate your assessment? If possible, use outreach and engagement feedback to gather information and insight.

Data for this application comes from:

- BRS request data provided by the BRS program,
- Oregon Health Plan administrative claims and enrollment data from the Medicaid Management Information System,
- And self-report race, ethnicity, language, disability and gender identity data from OHA’s REALD SOGI repository. If possible, disaggregate the data by race, ethnicity, geography, income level, and other relevant characteristics. If disaggregated data is not available, please describe why.

Some disaggregated data is available for the EPSDT OHP population and can be analyzed along with BRS data in the future.

- c. How are communities impacted by this POP? What are the disproportionate impacts? Please be specific.

BRS Program data is only representative of youth who are in CW or OYA settings and does not include youth who have not displaced from their home setting. This also means that youth need to displace before they can get the support they need.

Currently, BRS program data disproportionately represents OHP members who are Black or African American, American Indian or Alaska Native, under age 21 who are disabled, had a complex chronic or a behavioral health diagnosis because these individuals are disproportionately impacted in the CW and OYA systems.

8. How did you ensure multiple perspectives were part of the decision-making process for this POP? In your answer, include responses to the following questions:

- a. Identify how you have or are planning to engage multiple perspectives and impacted groups to provide feedback on this POP (e.g. program design, budget, policy decisions, etc.). Please give specific examples.

OHA has been pursuing a POP for a few years, and in that time, advocacy groups, SOCAC, and even the legislature have championed a need for upstream expanded access to individualized care for youth. BRS is that option and providing a way to access this support in any setting would not only meet the CMS requirement under EPSDT but would also connect youth before juvenile justice involvement and likely before involvement with child welfare. This reduces trauma and diverts individuals from more expensive levels of support.

BRS Program data is only representative of youth who are in CW or OYA settings and do not serve youth who have not displaced from their home setting. This also means that youth need to displace before they can get the support they need. If parents or guardians are seeking BRS treatment for their child, they are forced to wait until their child displaces from their home and then forced to walk away so their children can get the help they need. This also removes advocacy and support for a child at a time when they need it the most.

If BRS could be accessed in home settings, children and families would be provided the opportunity to receive treatment and support before displacing, reducing trauma and potentially the need for CW and OYA intervention. Not only would this be a more holistic intervention, but most community-based services are less expensive compared to costly interventions such as out of home placement.

- b. If community engagement is not part of your approach, please explain why and what you did instead to incorporate community perspectives. In your response, describe the following: the decision-making process used to determine engagement was not feasible or appropriate, the specific barriers (beyond general time or capacity), and how you mitigated the risk of missing community input (e.g. using existing feedback, partnering with trusted organizations, review from advisory bodies, etc.).

NA

Impacts and Accountability

9. If this POP is not funded, please describe the following:

- a. Which racial or ethnic communities would be most impacted.

Black or African American members and American Indian or Alaska Native members, in addition to members under age 21 who are disabled, had a complex chronic or a behavioral health diagnosis would be the most impacted if this POP is not funded. According to SOCAC and our own BRS program data, these are the populations that are overrepresented in CW and OYA settings, and the BRS program has seen an increase in disproportionately impacted individuals from these groups over the past year.

There are additional structural inequities that would be exacerbated by lack of investment, such as providing access to care only after someone displaces from their home setting, impacting timely access to culturally responsive health services, continuity of care, family stability and involvement in CW and OYA systems. A lack of investment would result in worse outcomes and increased trauma, and higher system costs for Oregonians.

- b. How disparities would likely persist or worsen.

Having individuals only served in CW and Juvenile Justice programs means that someone has to engage with higher and more expensive levels of support to get the help they need. If the goal is to prevent individuals from having to leave their home and helping them succeed in a home environment, we are missing an opportunity by only providing services from a reactionary stance when youth are in an out of home setting and likely have experienced crisis over a long period. If this is not funded, needs will be unaddressed until youth have no alternative but to leave their home settings to enter this type of care.

Program data shows increasing rates of Black or African American members and American Indian or Alaska Native members, in addition to members under age 21 who are disabled, had a complex chronic or a behavioral health diagnosis when compared to rates from last year. If this data continued to trend, this would lead to even worse disparities for these groups.

10. Who will be monitoring racial equity outcomes over time for this POP?

- a. How will progress be reported?

Research analysts within OHA's HPA Division who are focused on the EPSDT population, and child and family behavioral health will monitor progress of the BRS program as BRS moves to OHA and Medicaid.

In addition, the BRS program will engage with consultants on building out the future state of the program and then will engage in the HEIA process in order to develop a future state where qualitative and quantitative data will be used to inform decision making, quality improvement, and future program or policy changes. The HEIA will look for opportunities for engagement with communities, families, and advisory groups where they can review findings and provide feedback and help inform program improvements.

- b. How will leadership be informed of equity impacts?

BRS outcomes and population may be added to the internal monitoring and evaluation plan for the EPSDT OHP population and operational reports may be developed as needed.

Leadership will review the equity impacts of the BRS program through reports on the Children and Youth Medicaid Data Report that is required by legislature.

- c. How will the community be involved in monitoring outcomes?

Research Analysts are currently developing a Children, Youth and Young Adults Medicaid Data website to share reports related to the EPSDT OHP population. Any requested reports on BRS could go through the public reporting approval process and be included on that website.

Oregon Health Authority 2027-29 Policy Package

Division:	Medicaid
Program:	CCO Operations
Policy package title:	Coordinated Care Contract Procurement
Policy package #:	404
Related legislation:	None

Summary statement:	This request will provide staffing for project management and community engagement to support the next CCO contract procurement process. It will also provide contracted services for procurement-specific actuarial work for rate methodology reviews and rate development, as well as contracted interpretation and translation services. The CCO contract procurement process is a federally required process that begins in 2027. Without this policy package, funding will not be available during the procurement process to create opportunities and resources for members, providers, health care professionals, and communities to provide input on how the CCO model is performing and identify areas in need of improvement. Without a unified process OHA cannot assess how issue-specific program changes affect the system overall or whether those changes have unintentionally left some regions or populations behind by creating uneven access, alignment or support across the state.
---------------------------	---

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	\$0	\$0	\$0	\$0	8	6.00

Oregon Health Authority: 2027-29 Policy Package

Purpose

1. What problem is OHA trying to fix or solve?

OHA has not conducted a CCO contract procurement since 2019. Originally designed as a five-year contract, the current CCO contract has been extended twice. In the years since, the CCO model has absorbed numerous new programs, benefits, mandates, and expectations introduced incrementally through legislation, program updates, and market changes. As a result, changes were evaluated piecemeal and from a more narrow vs. holistic review of their impact which has created some inconsistencies and limited opportunities to promote integrative expectations.

This fragmentation has resulted in OHP members receiving inconsistent services depending on the CCO and region where they receive care. Some CCOs have been able to adjust to new or shifting expectations, while others have struggled, particularly in areas such as mental health services where benefits, coverage, and payment structures have changed dramatically over the last several years. Members experience uneven access, variation in service quality, and differences in culturally and linguistically appropriate care as a result.

When the current contract expires, it will have been in effect for nine years. During this period, the role of CCOs and scope of coverage has expanded in a number of ways not anticipated during the 2019 procurement process. Member enrollment expanded by more than 35% when limits were placed on termination of Medicaid coverage during the federal public health emergency declared in response to COVID-19. Benefit coverage was also expanded with the implementation of the 2022-2025 Medicaid 1115 demonstration waiver, which included new coverage for housing, and nutrition. New plans that served new populations were also established with Healthier Oregon in 2022 and the Basic Health Plan in 2023. Across these expansions, evolving expectations have been communicated and implemented inconsistently across

Oregon Health Authority: 2027-29 Policy Package

the system. This inconsistency in deployment disproportionately affects communities that already face health inequities, including communities of color, linguistically diverse populations, people with disabilities, and members who rely heavily on coordinated care for behavioral health or complex conditions. These communities are often the least likely to have their needs understood or reflected when expectations evolve unevenly or are communicated inconsistently across the system.

The contract procurement process also offers members, providers, healthcare professionals, and communities across the state the opportunity to provide input on how the CCO model is performing, and to support the identification and prioritization of focused areas for improvement. While smaller scaled back and workgroup activities are proactively utilized, OHA currently lacks a comprehensive and diverse understanding of how the system is being experienced, how community priorities have shifted, and what communities want and need from the CCO model. The absence of a unified process also prevents OHA from understanding how layered, issue-specific program changes affect the system as a whole and whether those changes have unintentionally left some regions or populations behind.

2. What would this policy package buy and how and when would it be implemented?

This policy package will fund the staffing and contracted support needed for OHA to complete the next CCO procurement cycle. It will allow OHA to develop the request for applications, carry out statewide multilingual community engagement, finalize procurement materials based on community input, select coordinated care organizations, and construct new CCO contracts.

The package funds eight new limited duration positions that support procurement development and community engagement. These include two positions for project management, one lead position for statewide multilingual engagement, three positions to support engagement and event delivery, and two

Oregon Health Authority: 2027-29 Policy Package

positions to analyze and synthesize community input. Some functions performed by these positions were previously provided by an external vendor – this policy package would allow OHA to transition this work to internal staff and reduce overall cost.

The policy package also purchases contracted services for interpreting, translation, and ADA or ASL support during community engagement and the contract award period. In addition, OHA will purchase procurement-specific actuarial work from Mercer to support rate methodology review and rate development needed for the request for applications.

CCO Contract Procurement activities will occur throughout the 2027–2029 biennium. Development of the request for applications (RFA) and related procurement documents will begin in early 2027, with the intent to release the RFA in the fall and close the application period by the end of 2027. Selection of coordinated care organizations will occur in spring 2028, and contract development and onboarding of members and newly selected CCOs for the 2029 calendar year will be the focus for the remainder of 2028. Hiring of the community engagement and position-management roles identified in this POP is planned for July 2027 to support overall procurement planning and implementation, including statewide community engagement activities in the second half of 2027, with findings from that engagement informing final contract development in 2028.

Oregon Health Authority: 2027-29 Policy Package

3. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity¹ or equitable health outcomes? How does this policy package further OHA's mission and align with its strategic plan?

This policy package supports the advancement of health equity by ensuring that the next CCO procurement is shaped by consistent expectations and by meaningful community input. The current fragmented expectations across CCOs have contributed to variation in access, service quality, and culturally and linguistically appropriate care. By resourcing a unified and community-informed procurement process, this package helps reduce these disparities and strengthens the ability of communities experiencing the greatest inequities to influence the structure of the CCO model that serves them.

The requested resources help redistribute power by creating structured opportunities for multilingual and culturally specific community engagement across the state. These investments ensure that communities most affected by inconsistent expectations can identify barriers, shape priorities, and articulate the outcomes they need from coordinated care organizations. The package also supports the reconciliation of historical and contemporary injustices by replacing fragmented, program-driven expectations with a process that centers community voice and equity in the development of the CCO contract.

This work directly contributes to OHA's goal of eliminating health inequities by 2030 by improving the transparency, consistency, and responsiveness of the CCO system. It increases OHA's capacity to understand how system changes affect different regions and populations, and it helps align the CCO model with what communities identify as necessary for equitable health outcomes.

¹ Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability, gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.**

Oregon Health Authority: 2027-29 Policy Package

The package aligns with OHA's mission by strengthening partnerships with communities, improving access to quality and affordable health care through clearer and more equitable contract requirements, and supporting a more coordinated system that promotes physical, mental, and social well-being. It also supports OHA priorities such as the Triple Aim and the State Health Improvement Plan by promoting better care, better health, and lower cost through community-driven expectations and clearer accountability structures.

Quantifying results

4. What are the long-term desired outcomes?

OHA's long-term desired outcomes for this procurement are centered on three core goals: establishing clearer and more consistent expectations across all CCOs; realigning programs and requirements to create a more cohesive and coherent system; and strengthening early, broad, and meaningful community engagement to guide the model. These goals together set the foundation for procurement process that is community-driven, structurally aligned, and capable of supporting a predictable and equitable coordinated care system over time.

This POP will support a long-term shift toward clearer and more consistent expectations across all CCOs. Since the last procurement, many new programs and initiatives have been added in a fragmented way. This package allows OHA to realign those components into a cohesive system. Over time, this reduces confusion and variation for members and providers and creates a more predictable and equitable experience statewide. This will also enable OHA to work with members, providers and communities across the state to chart a course for CCOs in the advancement of health care for Oregon Health Plan members over the life of the contract.

Oregon Health Authority: 2027-29 Policy Package

The long-term goal also includes ensuring that the CCO model advances OHA's 2030 health equity goal. By grounding the procurement in community experience, OHA can better identify inequities, align expectations with what communities need to achieve equitable outcomes, and reduce the amount of future course corrections required. A model built from strong early community engagement provides a more stable foundation for long-term accountability and reduces the need for frequent adjustments. This work will also create long-term benefits for providers. Clearer expectations and alignment across programs will help providers navigate the system more easily and support more consistent delivery of services that meet community priorities.

Overall, the long-term vision is a coordinated care system that is community-driven, more coherent, more equitable, and better aligned with OHA's mission and strategic direction.

5. What are the envisioned outputs of this investment? How will OHA measure the impacts on health inequities of this policy package?

This investment will produce several clear outputs that demonstrate progress toward a unified and community-informed CCO procurement. Core outputs include the completed request for applications, the new CCO contract, and the development of aligned expectations that reflect priorities identified through community engagement. The investment will also create a statewide engagement structure that reaches communities across Oregon. This includes multiple sessions across regions, multilingual materials, and educational tools that help communities understand the CCO model and the procurement process. Formal synthesis reports of community input will also be produced and will serve as another central output.

Oregon Health Authority: 2027-29 Policy Package

OHA will know this policy package is successful by tracking whether community-identified priorities appear in the final request for applications. OHA will also assess improvements in the clarity and consistency of expectations communicated through the procurement documents. Additional process measures will include the accessibility of procurement materials, such as whether they are available in multiple languages and in formats that support equitable community engagement.

REALD and SOGI data will be used throughout the engagement phase to determine whether participants represent the diversity of communities served by the Oregon Health Plan. These data will help OHA evaluate who participated, whether priority populations were reached, and whether feedback themes differ across demographic groups. This will support equitable participation and help ensure that the procurement reflects the needs and experiences of communities that have historically faced health inequities.

Because CCO incentive metrics and OHA Key Performance Measures apply after implementation and are not designed to assess procurement activities, OHA will rely on process measures that can be tracked during the procurement period. These include the number of engagement sessions conducted, the regions and communities reached, the languages supported, the materials created, the synthesis reports completed, and the procurement documents finalized.

These measures will allow OHA to monitor early and mid-term progress and understand how the policy package is reducing fragmentation, improving clarity, and centering community voice well before the long-term impacts of the procurement are realized.

Oregon Health Authority: 2027-29 Policy Package

How achieved

6. What actions have occurred to resolve the issue prior to requesting a policy package?

OHA began early procurement planning and limited community engagement in 2024. This included hiring a dedicated engagement staff member, holding initial sessions, and starting preliminary scoping. These early steps showed that community interest in shaping the next CCO model was significantly higher than the agency's available capacity. Many communities and partners wanted opportunities to learn about the process and help shape the future model, but OHA was not able to meet the level of demand with existing resources.

These early activities also revealed structural limitations in how past procurement and engagement work had been approached. Historically, OHA relied on existing engagement avenues that were not designed to center community voice at the beginning of the process. These approaches did not consistently represent communities across race, ethnicity, language, disability, gender identity, sexual orientation, social class, or geography. Accessibility supports such as expanded translation, interpretation, and disability access were not consistently available, which limited equitable participation.

Internal coordination efforts also highlighted the challenges of addressing fragmentation across programs without adequate staffing or structure. While ad hoc workgroups and internal processes attempted to respond to evolving requirements, they did not capture community priorities or provide a holistic view of the CCO model. The contract restatement process within CCO operations could not substitute for procurement because it focuses only on limited changes rather than a comprehensive review of the model.

Oregon Health Authority: 2027-29 Policy Package

Ongoing federal changes and shifts within the CCO program further increased community desire to participate in a full, statewide discussion about coordinated care. Without a larger, structured engagement approach, OHA could not meaningfully respond to this level of community interest or ensure participation from communities most affected by health inequities.

This POP redefines the way OHA approaches procurement by engaging communities before expectations are finalized and by building a comprehensive process that integrates accessibility as a core requirement. It aligns with the 2030 health equity goal by ensuring that the design of the next CCO model reflects community priorities, lived experience, and the conditions needed to advance equitable health outcomes.

Short-term mitigation efforts included early engagement, preliminary scoping, and internal coordination, but these actions were not sufficient for the scale and depth required for a statewide procurement. An assessment of current processes confirmed that existing resources cannot meet the equity and engagement standards necessary for this work, nor the federal and state requirements for a full procurement.

7. What alternatives were considered and what were the reasons for rejecting them?

OHA considered several alternatives before requesting this policy package, but each option was insufficient to address the scale of community engagement and the need for a holistic, equity-centered procurement process.

One option was to complete the procurement using only existing staff. This was not feasible because staff are already working at full capacity and do not have the specialized skills or time required to lead a statewide, community-centered engagement process. Early procurement work in 2024 showed that

Oregon Health Authority: 2027-29 Policy Package

community demand for engagement was far greater than current resources could support, especially when attempting to approach engagement equitably and at the statewide level.

OHA also considered relying on existing engagement structures, such as advisory groups, operational meetings, and sessions used during contract restatement. These avenues were rejected because they are designed for day-to-day operations rather than for shaping the CCO model. They do not provide a holistic view of the system and do not reach communities equitably. Another alternative was to move forward with procurement without new investment. This would have resulted in extremely limited engagement, confined to preexisting venues that do not reflect the full experiences and needs of Oregon Health Plan members. Proceeding without additional support would likely have led to a model that is not shaped by community input and would have increased the risk of inconsistent expectations across CCOs.

These alternatives were ultimately rejected because they would not allow OHA to meaningfully involve the communities most affected by health inequities, nor would they provide the scale, accessibility, or statewide reach required for a fair and equitable procurement process.

8. What other agencies, programs, community partners or interested parties are collaborating on this policy package?

No other agencies have proposed a similar POP proposal. Below is a list of agencies programs and community partners who would be collaborating on this Policy Package.

Oregon Health Authority: 2027-29 Policy Package

Oregon Health Policy Board

Provides policy direction and supports alignment of engagement activities with statewide health system transformation goals.

Community Mental Health Programs (CMHPs)

Collaborate with OHA to support regional planning, bring local behavioral health expertise, and assist in coordinating engagement with communities served by CMHPs.

Local Public Health Authorities (LPHAs)

Serve as regional partners supporting outreach, logistical coordination, and engagement with local communities and partners.

Community Organizations

Work with OHA to design and implement culturally responsive, accessible community engagement approaches, with emphasis on reducing participation barriers.

OHP Providers

Actively participate in engagement planning by providing insight into provider needs, service delivery impacts, and community-level considerations relevant to CCO contract requirements.

OCHE (Office of Community Health and Engagement)

Provide guidance and framework in engagement planning specifically into culturally linguistically appropriate outreach for disproportionately represented communities.

Oregon Health Authority: 2027-29 Policy Package

Oregon Department of Human Services (ODHS) Actively participates in engagement planning and cross-agency coordination to ensure alignment for populations jointly served by OHA and ODHS.

Oregon Department of Education (ODE)

Contributes to engagement planning and coordination for families, youth, and school-connected communities impacted by CCO service delivery and contract requirements.

9. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

10. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

This policy package affects several state, tribal, and local government partners whose programs, services, and communities are directly influenced by CCO contract requirements. The Oregon Department of Human Services, Public Health Division, Department of Education, and Community Mental Health Programs will be affected because the procurement will shape expectations for CCOs that serve populations connected to their programs. Tribal governments will be affected through required government-to-government engagement, as procurement decisions influence access to coordinated services for tribal communities. All of these entities are affected because CCO contracts set expectations for coordination, service delivery, and local partnerships. This POP establishes the processes necessary for OHA to engage these partners throughout the procurement cycle, ensuring

Oregon Health Authority: 2027-29 Policy Package

their operational needs, community perspectives, and program impacts are incorporated into the development of the RFA and the resulting CCO contracts

11. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Staffing and fiscal impact

Implementation date(s): July 2027

End date (if applicable): January 2029

12. What assumptions affect the pricing of this policy package?

This policy package is based on several key assumptions that shape staffing needs, costs, and the timeline for the CCO procurement. First, project management for the procurement will be handled by two new internal positions rather than contracted services. Prior procurements relied on contractors, which are typically more expensive but offer flexible hour management. Bringing this work in-house is intended to strengthen internal capacity and reduce future reliance on external support.

Second, the staffing model assumes a comprehensive statewide community engagement effort. This includes multiple outreach activities in every county and additional statewide engagement opportunities to ensure broad and representative input. Because community voice is central to the procurement design, the scale of this engagement is a major cost driver, and changes in scope would directly affect staffing and total cost.

Oregon Health Authority: 2027-29 Policy Package

Finally, the package assumes approval of the 1115 waiver as submitted, allowing OHA to proceed with a full procurement for contracts beginning in 2029. It will be necessary to make this assumption in order to develop those new contracts, and future changes based on actual CMS approval will have to be incorporated after the procurement and contracting process. Under this timeline, new positions would start in July 2027 to support early procurement planning and statewide engagement. The package also assumes continuation of Mercer rate-setting services within existing structures.

Together, these assumptions define the staffing and resources needed to support a procurement approach that centers community experience, strengthens internal capacity, and aligns the CCO model with statewide priorities.

13. Will there be new responsibilities for OHA and/or Shared Services? Specify which programs and describe their new responsibilities.

This policy package creates new responsibilities for the CCO Operations Unit Team as part of completing the next CCO contract procurement cycle. The POP provides the staffing and contracted resources required for the unit to develop the Request for Applications (RFA), conduct statewide multilingual community engagement, finalize procurement materials with community input, select coordinated care organizations, and construct the new CCO contracts.

These responsibilities were previously carried out by external contractors. Bringing this work in-house creates new operational, coordination, and documentation responsibilities for the CCO Operations Unit across all phases of the procurement cycle.

Oregon Health Authority: 2027-29 Policy Package

Shared Services will also take on new responsibilities by procuring vendor services for interpreting, translation, and ADA/ASL accessibility required for engagement activities and public meetings during the procurement and award period. Additionally, Shared Services will support contracting with Mercer for actuarial methodology review and rate development needed for the RFA, which is expected to require a one-time cost of at least \$1 million. No other Shared Services offices are expected to assume new responsibilities beyond standard support functions.

14. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

15. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

The CCO Operations Unit Team will take on new operational functions through eight new limited duration positions for the 2027-29 biennium:

- 2 Project Management (PM3),
 - Manage end-to-end tracking of procurement decisions
 - Draft, organize, and document all written procurement materials
 - Provide project support for procurement components across the RFA development process
- 1 Community Engagement Lead (OPA4),
 - Provide leadership and coordination for statewide multilingual engagement
 - Oversee virtual participation activities

Oregon Health Authority: 2027-29 Policy Package

- Ensure community input is effectively integrated into procurement development
- Consult with the OHP Community Engagement & Communications Unit and the Office of Community Health and Engagement to align planning and operations within the larger OHA community engagement framework and best practices
- 3 Community Engagement (OPA3),
 - Coordinate planning and delivery of community engagement sessions
 - Manage logistics, technology needs, and event execution
 - Organize community input to inform procurement materials and ongoing contract monitoring
- 2 Community Input and analysis (OPA2).
 - Code, synthesize, and analyze community input
 - Translate engagement findings into actionable recommendations
 - Directly inform procurement materials and RFA development

16. What are the start-up and one-time costs?

The start-up and one-time costs include the initial onboarding and setup of eight new positions needed to support development of the RFA, community engagement activities, and procurement documentation. One-time expenses include contracted interpreting, translation and ADA/ASL accessibility services required for statewide multilingual engagement, along with the actuarial methodology review and rate development performed by Mercer for inclusion in the RFA.

17. What are the ongoing costs?

There are no ongoing costs beyond the 2027-2029 biennium. The positions established under this policy package are time-limited and will be concluded when the CCO procurement cycle is complete and new

Oregon Health Authority: 2027-29 Policy Package

contracts take effect in 2029. Contracted services for interpreting, translation, and the ADA/ASL accessibility are limited to the procurement and engagement period and do not extend past it. The actuarial methodology review and rate development work performed by Mercer is one-time procurement activity and will not continue beyond this cycle. After 2029, ongoing community engagement and contract monitoring functions will be absorbed into existing operation structures, eliminating the need for additional or continuing resources.

18. What reductions will you use to offset the costs of this work and maintain budget neutrality?

Funding for the requested positions will be offset by leveraging existing administrative program dollars through reduction in multiple administrative contracts in 2027-29.

19. What are the sources of funding (revenue) and the funding split (GF/OF/FF) for each part of the investment as well as the offset/reduction?

Funding for this proposal can be split 50/50 between federal funding and general funds.

20. What are the potential savings (above the offset to pay for the investment)?

None identified.

RACIAL EQUITY IMPACT STATEMENT (REIS) WORKSHEET: POLICY OPTION PACKAGE (POP) QUESTIONS

OHA POP 404: COORDINATED CARE CONTRACT PROCUREMENT

Program managers responsible for the POP: Please answer the questions below for every POP being proposed in your agency request budget. To fill out this worksheet, download a copy of this worksheet and type your answers below each question.

Coordinated Care Contract Procurement Program Overview

1. Please describe the POP being proposed.

This POP funds the staffing, contracted services, and engagement work needed to complete the next CCO procurement. It establishes limited duration positions to support project management, policy development, statewide multilingual engagement, and the analysis of community input. These positions replace functions previously done by external vendors and bring key work in-house.

The POP also funds translation, interpretation, ADA and ASL support, and actuarial services required for rate development and procurement materials. Together, these investments create the infrastructure for a consistent, community-informed procurement process.

Work funded by this POP spans the 2027–2029 biennium, including hiring staff, conducting statewide engagement, developing the request for applications, evaluating submissions, selecting CCOs, and finalizing new contracts effective January 1, 2029.

2. Why is the POP being proposed?

The purpose of the POP is to update and realign the CCO contract so that it reflects current system needs and expectations. OHA has not conducted a CCO procurement since 2019, and during this period a series of new programs, benefits, and operational requirements have been added without a comprehensive evaluation of how they interact. This has created inconsistent expectations for CCOs and uneven service delivery across regions.

The current contract was initially intended to last five years but will have remained in place for nine by the time it expires on 12/31/2028. In that time, enrollment increased significantly, new benefits were introduced through the 1115 waiver, and additional programs such as the Healthier Oregon Program and the Basic Health Program were implemented. These developments expanded the CCO structure beyond what was anticipated during the last procurement cycle.

Without a statewide procurement, OHA does not have a complete understanding of how these changes are affecting performance or whether the CCO model continues to align with community needs and priorities. A formal procurement process allows members, providers, and community partners to offer structured input, and it enables OHA to assess how incremental program changes have influenced the system as a whole.

The POP will help OHA modernize and organize expectations, restore consistency, and ensure that the CCO contract framework is up to date and responsive to current system demands.

Consultation

3. Who is completing this REIS?

Health Delivery Analyst CCO Operations

Who is responsible for tracking equity outcomes? What method(s) are they using to track outcomes?

The new positions funded through this POP will be responsible for tracking equity outcomes. The lead engagement position, the three engagement support staff, and the two analysis and synthesis positions will monitor who is reached through statewide engagement activities, whether outreach is linguistically and culturally accessible, and how community input is reflected in procurement materials. These staff will work with existing teams to track outcomes through participation data, language access metrics, community feedback coding, and synthesis reports that show how community-identified priorities influenced the procurement and contract language. The project management and policy staff will ensure these findings are incorporated into procurement documents and reported through established project reporting processes.

4. Does your agency have a DEIB practitioner (Yes or no)?

a. If yes, describe how you collaborated with them on this REIS.

- b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).**

Yes. Jessica Deas, Director of the Medicaid OHP Community Engagement & Communications Unit, was consulted during the development of both the POP and the REIS. In her role within the Medicaid Community Engagement and Communications Unit, Jessica provided targeted guidance on how this proposal could align with OHA's Community Engagement Framework and support a more consistent statewide approach to outreach. Her input helped validate the need for this POP by reflecting what had been surfaced through earlier community feedback efforts from both the Lane County transition and earlier procurement efforts. Jessica's consultation helped CCO Operations confirm key components of the POP, including the importance of multilingual outreach, accessible engagement structures and clear process for translating community input into procurement and contract material. Her feedback supported the development of a POP that is aligned with established engagement practices while remaining grounded in community priorities identified through prior work.

The Equity & Inclusion Division was not formally consulted during the development of this proposal. A limited review of the REIS was completed prior to submission; however, there was not sufficient opportunity for substantive consultation. The program plans to partner with the Equity & Inclusion Division during implementation to obtain technical assistance and guidance, including support for the application of the Health Equity Impact Assessment (HEIA) tool, as appropriate.

5. . Did you collaborate with your agency's data analysts, community engagement managers, outreach managers, and/or others that regularly interact with underserved and marginalized communities on this REIS? (Yes, no, or not applicable)
- a. If yes, describe how you collaborated with them on this REIS.
- b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and

community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

Yes, agency data analysts, community engagement managers, and outreach managers, including Ombuds, OCHE, Innovator Agents, and the Medicaid Services and Engagement Team, were involved in the development of this POP and REIS. Their involvement aligned with their roles in the original procurement work and the Lane County transition work noted later in this section. Their participation helped ensure continuity with prior engagement structure and informed the early planning efforts for this procurement cycle. CCO Operations, relied on this collaboration along with community feedback gathered through previous statewide engagement efforts, ongoing relationships with community partners and general demographic information, to ensure that planning for this proposal reflects the diversity of communities served. These sources provided important context on system fragmentation, service variation, and the need for clearer and more consistent expectations across CCOs.

Recent experience with the Lane County CCO transition also underscored the importance of meaningful community engagement. That transition highlighted how essential it is to be present in communities, listen directly to members, and build an engagement process that is inclusive and accessible. The lessons learned from Lane County reinforced the need to design a procurement process that actively seeks community expectations rather than assuming them, and to ensure that engagement structures support early, clear, and responsive communication.

While formal engagement for this procurement cycle is still forthcoming, CCO Operations used this planning process to identify approaches that will support broad and inclusive participation. These approaches include region-specific listening sessions, multilingual outreach, and partnerships with trusted community-based organizations to help ensure that communities most affected by system fragmentation can share their perspectives.

By grounding the REIS in existing community insights, demographic context, and lessons learned from recent system transitions, CCO Operations ensured that equity considerations and community perspectives were incorporated even before the formal engagement process begins. The POP will build on this foundation and give us an alignment opportunity with OHA's community engagement framework, and chance to work in collaboration with the OHP Community Engagement and Communications Unit.

Community Engagement and Data

- 6. Identify the specific racial groups and communities that may be impacted by this POP, both directly and indirectly. In your answer, include responses to the following questions:**
- a. How did you identify these impacted groups?**
 - b. What data are you using to validate your assessment? If possible, use outreach and engagement feedback to gather information and insight.**
 - c. If possible, disaggregate the data by race, ethnicity, geography, income level, and other relevant characteristics. If disaggregated data is not available, please describe why.**
 - d. How are communities impacted by this POP? What are the disproportionate impacts? Please be specific.**

CCO Operations identified the impacted groups using two primary sources: early community feedback gathered during the initial 2024 procurement work and observations from the recent Lane County transition. Both confirmed that members who rely on culturally and linguistically appropriate services are most affected by inconsistent expectations across CCOs.

To validate this assessment, CCO Operations used general demographic information about Oregon Health Plan members and communities statewide. This data helped ensure the planning for this POP reflects the diversity of the population, even though more detailed, disaggregated procurement specific data is not available until the formal engagement process begins.

The Lane County transition reinforced the importance of being present in communities, listening directly to members, and building an inclusive process that helps define expectations clearly. That experience demonstrated that communities depending on clear communication and culturally responsive services face disproportionate impacts when expectations vary between CCOs.

This POP impacts communities by creating the structure for a more consistent, accessible, and community informed procurement process. It is designed to reduce current service variation and ensure that members, especially those relying on culturally and linguistically appropriate care, have meaningful opportunities to shape the expectations that guide the next CCO contract

7. How did you ensure multiple perspectives were part of the decision-making process for this POP? In your answer, include responses to the following questions:

- a. Identify how you have or are planning to engage multiple perspectives and impacted groups to provide feedback on this POP (e.g. program design, budget, policy decisions, etc.). Please give specific examples.**
- b. If community engagement is not part of your approach, please explain why and what you did instead to incorporate community perspectives. In your response, describe the following: the decision-making process used to determine engagement was not feasible or appropriate, the specific barriers (beyond general time or capacity), and how you mitigated the risk of missing community input (e.g. using existing feedback, partnering with trusted organizations, review from advisory bodies, etc.).**

CCO Operations is planning to engage multiple perspectives and impacted groups by building a structured, statewide community engagement process as part of the next procurement. This will include region-specific listening sessions, multilingual outreach, and partnerships with trusted community-based organizations to ensure participation from members who rely on culturally and linguistically appropriate services. Lessons from the recent Lane County transition demonstrated how essential it is to be present in communities, listen directly to members, and involve local partners early in decision-making. Those experiences are informing how CCO Operations shapes the engagement strategy for procurement design, communications, and expectations.

Because this POP focuses on creating the infrastructure for that engagement, direct community engagement was not feasible during development of the REIS. Procurement-specific engagement has not yet begun, and the structures needed to support an inclusive process are what this POP will fund. To mitigate the absence of new engagement, CCO Operations relied on existing community feedback gathered during early 2024 procurement work, observations from the Lane County transition, and general demographic information about the Oregon Health Plan population.

Impacts and Accountability

8. If this POP is not funded, please describe the following:

a. Which racial or ethnic communities would be most impacted.

b. How disparities would likely persist or worsen.

If this POP is not funded, the greatest impacts would fall on communities that already experience inconsistent access to culturally and linguistically appropriate services. This includes many racial and ethnic communities across the state, particularly communities of color, immigrant and refugee communities, and members with limited English proficiency who depend on clear communication and culturally responsive care to navigate the system effectively.

Without funding, the disparities created by fragmented expectations across CCOs would likely persist or worsen. The absence of a structured, statewide engagement process would limit opportunities for these communities to shape the next procurement and to identify the outcomes and supports they need. Lessons from the Lane County transition underscored how critical direct engagement is for understanding community expectations, and without resources to build that engagement the voices of communities who already have barriers to care would be further marginalized. Inconsistent expectations across CCOs would remain unaddressed, leading to continued variations in access, quality, and culturally appropriate services. Over time these gaps would widen as regions with fewer resources or established engagements infrastructure fall further behind.

Failure to fund the POP would also slow progress toward creating consistent expectations across CCOs and other OHP contractors and delivery systems. This would allow regional variation in access, service quality, and culturally appropriate care to continue, further widening gaps for communities that already face the greatest barriers. The result would likely be a continuation of uneven service experiences and a missed opportunity to reduce inequities through a more coordinated and community-informed procurement process. Without this investment Medicaid Division and CCO Operations would lack the staff, tools and engagement structure needed to correct existing inequities and the communities most affected by inconsistent expectations would have fewer opportunities to influence the system that serves them. This would leave current disparities unaddressed and allow gaps in access, communication, and culturally and linguistically appropriate services to deepen over time.

9. Who will be monitoring racial equity outcomes over time for this POP?

- a. How will progress be reported?**
- b. How will leadership be informed of equity impacts?**
- c. How will the community be involved in monitoring outcomes?**

Racial equity outcomes for this POP will be monitored by the staff positions responsible for engagement, policy development, and analysis that are funded through this package. The lead engagement position and the engagement support staff will track equitable participation across regions, languages, and communities during statewide engagement activities. The policy and project management positions will monitor how community-identified priorities are reflected in procurement materials, while the analysis and synthesis positions will track themes, participation data, and the extent to which culturally and linguistically specific needs are addressed.

Progress will be reported through the procurement governance structure and formal project progress reports. These updates will allow leadership to review engagement reach, accessibility, themes identified across communities, and how those themes are incorporated into draft procurement documents.

The community will be involved in monitoring outcomes through multiple feedback loops. Engagement summaries will be shared publicly, posted online, and brought back to future community sessions. During these sessions, CCO Operations will show how community input was coded, synthesized, and translated into procurement language or contract changes. This approach will allow communities to see how their feedback influenced decision-making and to confirm whether the outcomes align with what they identified as priorities.

Oregon Health Authority 2027-29 Policy Package

Division:	Equity and Inclusion
Program:	Accessibility, Inclusion, & Education Unit
Policy package title:	Digital Accessibility Initiative
Policy package number:	405
Related legislation:	SB 1090, ADA Title II, and related LC (collaboration with DAS)

Summary statement:	This POP would support a coordinated digital accessibility program at the Oregon Health Authority that advances adoption of WCAG 2.2 standards across public-facing and internal digital and IT systems. The program would fund stable capacity for accessibility implementation, technical guidance, training, and remediation of the backlog of inaccessible documents.
---------------------------	---

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	\$1,024,363	\$117,604	\$244,686	\$1,386,653	6	4.50*

* Pricing is for 6 positions for 18 months of the Biennium.

Oregon Health Authority: 2027-29 Policy Package

Purpose

1. What problem is OHA trying to fix or solve?

Digital systems are a primary way people access health information, health benefits, and public services, yet many public health websites, applications, and documents are not consistently designed to be accessible to people with disabilities, people who use assistive technology, and aging populations. When digital tools do not meet accessibility standards, people who rely on assistive technologies (such as screen readers, braille devices, magnification or keyboard navigation) face barriers to obtaining critical health information, completing applications, scheduling services, and communicating with providers. These barriers can delay care, limit participation in health programs, and contribute to poorer health outcomes. At the Oregon Health Authority, efforts to improve digital accessibility and remediate content are currently supported in part by limited duration staff and time-limited resources, creating risk to continuity, institutional knowledge, and sustained implementation of accessibility practices across divisions, programs and IT systems. Without stable capacity to lead governance, provide technical guidance, and support programs in implementing accessibility standards, progress may be inconsistent, and systems may continue to be developed or deployed without full accessibility considerations. This will put the agency at risk and delay achieving health equity goals.

2. What would this policy package buy and how and when would it be implemented?

This POP would support a coordinated digital accessibility program at the Oregon Health Authority that advances adoption of WCAG 2.2 standards across public-facing and internal digital and IT systems. The program would fund stable capacity for accessibility implementation, technical guidance, training, and remediation of the backlog of inaccessible documents. Integrating accessibility standards into IT

Oregon Health Authority: 2027-29 Policy Package

investments, procurement, and program operations will allow OHA to ensure health information and services are usable by all Oregonians, including people with disabilities and people who rely on OHA-provided services including Oregon Health Plan recipients. This approach improves equitable access to care and benefits, reduces legal risk and manual accommodations, and strengthens the efficiency, compliance, and long-term sustainability of OHA's digital health infrastructure.

3. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity¹ or equitable health outcomes? How does this policy package further OHA's mission and align with its strategic plan?

Digital accessibility is foundational, not peripheral, to OHA's 2030 goal of eliminating health inequities. OHA's strategic plan names disability explicitly as one of the dimensions on which Oregonians must not face disadvantage in reaching their full health potential, alongside race, ethnicity, language, immigration status, age, gender, and geography. People with disabilities, older adults who rely on assistive technology, people with low vision or lower literacy reading levels, and people navigating cognitive or intellectual disabilities are they intersect with every priority population OHA serves, and many already face compounding barriers tied to income, rural resourcing limitations, or limited English proficiency. When OHA's websites, applications, and forms cannot be operated with a screen reader, navigated by keyboard, or understood by someone using assistive technology, the agency is not simply providing a worse user experience, it is functionally denying access to coverage, services, and information to people our strategic plan specifically commits to reach and serve.

¹ Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability, gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.**

Oregon Health Authority: 2027-29 Policy Package

This POP advances multiple strategic plan goal pillars at once. It directly supports strengthening access to affordable care for all by removing technical barriers that prevent people from completing applications, scheduling services, and understanding their benefits independently, rather than through a caregiver, call center, or in-person workaround that not everyone can access. It supports fostering healthy families and environments by ensuring that the digital front door to preventive services, eligibility, and program information works for everyone who needs it, not just users without disabilities. And it speaks directly to the pillar of building OHA's internal capacity and commitment to eliminate health inequities, since sustainable accessibility governance, staffing, and technical guidance are exactly the kind of internal infrastructure and accountability mechanism that pillar calls for. The risk runs in both directions. Funded, this program lets OHA close longstanding accessibility gaps in high-use systems and documents, reduce the burden currently carried by a mostly limited-duration team, and prevent accessibility debt from being built into new IT investments, including ONE Eligibility System changes driven by HR 1. Left unfunded, the current model. Reliant on five FTE, four of them limited duration, cannot keep pace with that growing surface area, and progress already underway risks stalling or reversing as positions close, deepening exactly the access barriers the strategic plan commits OHA to eliminate.

Quantifying results

4. What are the long-term desired outcomes?

This POP's long-term outcomes are organized around four strategic workstreams: (1) web accessibility, (2) document accessibility, (3) accessibility standards in procurement and (4) building internal capacity through training, while supporting the enterprise by extending our subject matter expertise, guidance, and training beyond OHA.

Oregon Health Authority: 2027-29 Policy Package

Web accessibility: sustained WCAG 2.2 conformance across OHA's public-facing and internal digital systems, with priority websites and applications maintained at compliant levels on an ongoing basis through continued site improvement, monitoring and manual testing, rather than addressed as a one-time remediation push or reactive response.

Document accessibility: elimination of the current backlog of inaccessible PDFs and forms, with new documents accessible at the point of creation and posting by default, supported by trained Division Accessibility Leaders and updated Publication and Creative Services (PCS) templates so the backlog does not regenerate.

Accessibility standards in procurement: enforceable contract language requiring Accessibility Conformance Reports, paired with a clear exception approval process, so new technology is accessible by design rather than requiring costly retrofits after purchase or deployment.

Building internal capacity through training: a trained, accessible-by-default workforce across OHA and ODHS, with our team's subject matter expertise extended enterprise-wide so accessibility knowledge lives in every division, and agency, not just within a small central team.

Together, these workstreams reduce legal and compliance risk, lower the long-term cost of accommodations, and advance OHA's 2030 goal to eliminate health inequities by ensuring people with disabilities and others can access health information, benefits, and services independently and equitably. Converting the program's limited-duration positions to permanent FTE is what makes this sustainable rather than another time-limited project.

Oregon Health Authority: 2027-29 Policy Package

5. What are the envisioned outputs of this investment? How will OHA measure the impacts on health inequities of this policy package?

Envisioned outputs include:

- a permanent, fully staffed Digital Accessibility Team operating across the four workstreams described above
- a sustained reduction in the backlog of non-compliant documents and web applications
- enforceable accessibility requirements embedded in IT contracts and procurement
- a completed library of training modules (building on the "Getting Started with Digital Accessibility" course and forthcoming document-accessibility modules) available to OHA, ODHS, and other state agencies
- an established Division Accessibility Leader network across all OHA divisions
- and finalized exception approval processes that give the agency a documented, defensible way to manage risk when full compliance isn't immediately achievable.

OHA will measure impact on health inequities through a combination of compliance, reach, and outcome indicators:

Compliance metrics: WCAG 2.2 conformance scores on priority public-facing websites and applications, tracked through ongoing site improvement monitoring and manual testing; number of PDF pages and documents remediated to WCAG 2.2/PDF-UA standards; percentage of new documents and IT investments meeting accessibility standards at launch rather than requiring post-deployment fixes.

Oregon Health Authority: 2027-29 Policy Package

Reach and capacity metrics: number of divisions with trained Accessibility Leaders in place; number of staff completing accessibility training statewide; number of vendor contracts incorporating Accessibility Conformance Report requirements.

Risk and equity metrics: reduction in accommodation requests and complaints tied to inaccessible digital systems; reduction in legal/compliance risk exposure under ADA Title II; and -- longer term -- whether people with disabilities can complete high-use transactions, like ONE Eligibility applications, independently and without assistive workarounds.

These measures connect directly to OHA's strategic plan goal pillars, particularly strengthening access to affordable care for all and building OHA's internal capacity and commitment to eliminate health inequities. These measures will be tracked alongside the project's existing success metrics and ongoing Executive Steering Committee reporting.

How achieved

6. What actions have occurred to resolve the issue prior to requesting a policy package?

OHA has submitted POPs and LCs in prior budget cycles with minimal traction. For the 25-27 budget cycle, OHA submitted both a POP and LC. An LC to amend ORS to align Oregon law with federal requirements and a POP to start building a permanent digital accessibility team (DAT). Neither the POP nor LC advanced as submitted. OHA did receive permission to hire one regular full-time position (OPA4) to advise OHA, ODHS, shared services and at times DAS on digital access requirements, national best practices, among other things. OHA initially authorized three non-budgeted limited duration positions to help with testing, training, remediation, and technical assistance (1 LDS2, 1 OPA2, 1 OPA3).

Oregon Health Authority: 2027-29 Policy Package

Recently, OHA authorized a second non-budgeted limited duration position (OPA3) due to the heavy workload. OHA is fortunate to have highly skilled and deeply experienced people in all of these positions, including native users of assistive technology. Transitioning these four non-budgeted limited duration positions to permanent positions will stabilize this work and allow for long-term strategic planning and implementation. The addition of two budgeted permanent positions – for a total of six FTE – allows for sustainable and manageable workloads to support all of OHA, ODHS, Shared Services and offer support to DAS and other state agencies.

7. What alternatives were considered and what were the reasons for rejecting them?

Please see response to question 6.

Additionally, and currently, there are four non-budgeted limited duration positions held by experienced people doing this work. Two of those LD positions are represented so those positions' duration cannot be extended per the relevant Collective Bargaining Agreement (CBA). If those positions are not approved as permanent, the agency cannot fill or create new LDs. Two of the current LD positions are management service and could technically be renewed. Given the specialized nature of the knowledge, skills and abilities to successfully perform those jobs, OHA risks losing the employees with this highly-sought-after SME to other more permanent employment opportunities.

8. What other agencies, programs, community partners or stakeholders are collaborating on this policy package?

Internally, this POP reflects collaboration between the Equity and Inclusion Division, OHA's (Shared Services with ODHS) Information Services (OIS), Publications and Creative Services (PCS), and Division

Oregon Health Authority: 2027-29 Policy Package

Accessibility Leaders across all OHA divisions, coordinated through the project's Executive Steering Committee. Externally, the Oregon Department of Justice is a key partner, having worked with OHA over the past eight months to draft accessible IT contract language. ODHS is a close partner given shared systems like the ONE Eligibility Platform and joint operational policies (ODHSOHA 010-029 and 010-030). DAS is engaged to extend OHA's accessibility training statewide. Community partners and disability advocacy groups have provided ongoing input and support, including significant public comment in favor of the ADA Title II rule, and three team members who are native users of assistive technology, including two screen reader users, bring lived-experience expertise directly into the program's design and testing work.

9. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

This POP does not **require** any changes to existing or the adoption of a new statute, since the requirements for digital access are memorialized in federal regulation. That said, the adoption of an ORS-specific statute would further embed an ongoing commitment and value to serve all people in Oregon. As stated in response 6, OHA had previously (25-27) submitted an LC for Oregon to adopt a state-specific digital access requirement. OHA again submitted an LC for the 27-29 biennium. The Governor's Office indicated that DAS should be the entity who facilitates a digital access LC since the requirement is enterprise (state)-wide. OHA through the agency's Government Relations team has offered to help DAS where and when needed to support such an LC.

Oregon Health Authority: 2027-29 Policy Package

10. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

ODHS is the most directly affected, since OHA's Digital Accessibility Team supports shared systems, policies, and the ONE Eligibility platform used jointly by both agencies. The Department of Administrative Services (DAS) is also affected, as OHA is working with DAS to make its accessibility training available to other state agencies. Tribal governments and the Nine Federally Recognized Tribes of Oregon may be indirectly affected to the extent OHA's accessible digital systems and materials support tribal health partners and shared service delivery, though this POP does not fund tribal-specific accessibility work directly. Local governments are not directly affected, though improved OHA accessibility practices could serve as a model given the same ADA Title II requirements apply statewide.

11. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Staffing and fiscal impact

Implementation date(s): Upon Receipt

End date (if applicable): Not applicable

12. What assumptions affect the pricing of this policy package?

This POP presumes that if approved, OHA will get timely DAS approval for the requested positions. If there is a delay in position approval, then available staffing to do this work will vary since represented

Oregon Health Authority: 2027-29 Policy Package

LDs cannot be renewed/extended. There is also variance in costs associated with hardware and software required for digital access work because of market fluctuations and supply availability. Those variables are outside of OHA's control.

13. Will there be new responsibilities for OHA and/or Shared Services? Specify which programs and describe their new responsibilities.

The new responsibilities are consistent with the federal regulations requiring digital access. As stated above, OHA has been working in partnership with numerous internal and external partners to prepare for the effective date of federal digital access requirements. Those preparations included the adoption and implementation of a digital access policy, the creation of a "playbook" created in collaboration with DOJ and OC&P to support vendors and contract administrators understand and comply with digital access requirements. The USDOJ delayed the required effective date for state and local governments to comply from April 26, 2026, to April 26, 2027. The change in effective date does not change OHA's approach or work.

The POP is premised on a matrixed model of work and responsibility. SME will reside within E&I's Digital Access Team. Each Division will identify specific employee(s) who will be responsible for Division-specific work with the assistance of the DAT. DAT will work closely with OC&P, OIS, DOJ, ODHS, among others for consistency in practice and increasing SME across the agencies.

Oregon Health Authority: 2027-29 Policy Package

14. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

This POP does not directly change client caseloads or alter the services OHA provides. It improves access to existing services by ensuring the digital systems, documents, and applications through which Oregonians access those services are usable by people with disabilities and those relying on assistive technology. The consistent adoption of digital access practices will enhance current service quality for all people receiving OHA and ODHS services since integrating such practices increases general accessibility, whether someone is disabled or uses assistive technology for example.

15. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This POP requests six positions (for 18 months in 2027-29) including the conversion of four limited-duration positions to permanent FTE, these are existing roles currently funded on a time-limited basis whose work is essential to sustaining the program beyond the DAP Implementation Project close date of March 2027.

- 3 OPA3 – (1) Digital Accessibility Coordinator, (2) Digital Accessibility and Usability Testing Analyst
- 1 OPA2 – (1) Digital Accessibility Specialist
- 1 LDS2 – (1) Accessibility Trainer
- 1 AS2 – (1) Digital Accessibility Administrative Specialist

Oregon Health Authority: 2027-29 Policy Package

Three Operations and Policy Analyst 3 (OPA3) positions anchor the team's technical and analytical capacity: one Digital Accessibility Coordinator providing program coordination and cross-division leadership, and two Digital Accessibility and Usability Testing Analysts conducting manual application testing, Site improvement monitoring, document remediation, and WCAG conformance evaluation across OHA's web and digital properties.

One Operations and Policy Analyst 2 (OPA2) serving as Digital Accessibility Specialist supports document remediation, division-level technical assistance, and accessibility review of forms and publications.

One Learning and Development Specialist 2 (LDS2) serving as the Accessibility Trainer develops and delivers training across OHA, ODHS, and other state agencies, maintaining the training library and supporting Division Accessibility Leaders in building accessible content practices.

One Administrative Specialist 2 (AS2) serving as Digital Accessibility Admin Specialist provides operational and administrative support, including the technical assistance ticketing system, tracking exceptions, maintaining documentation, and supporting procurement review workflows.

Together these six FTE constitute the minimum staffing floor necessary to sustain the agency compliance efforts through web accessibility monitoring, document remediation, procurement standards, and enterprise training on an ongoing basis without reverting to a time-limited project model.

16. What are the start-up and one-time costs?

This POP has no significant start-up or one-time costs. The only exception is software that exceeds the standard software package, specifically the accessibility testing and remediation tools required to carry out the program's core functions. All other implementation infrastructure, workflows, and processes are

Oregon Health Authority: 2027-29 Policy Package

already established through the DAP Implementation Project and do not require additional one-time investment.

17. What are the ongoing costs?

The primary ongoing costs are personal services for the six FTE positions requested in this POP. Beyond staffing, ongoing costs include the accessibility software subscriptions, along with standard services and supplies necessary to support program operations. No ongoing contracted services or major operational expenditures are anticipated beyond what is reflected in the budget request.

18. What reductions will you use to offset the costs of this work and maintain budget neutrality?

Four of the six requested positions are currently non-budgeted limited duration positions. The conversion of those LDs to permanent positions will have negligible budget impact. The two additional positions represent additional salary and similar costs. The offset to these expenditures would be reasonably foreseeable costs if this POP is not supported. Those expenditures include any fines or penalties assessed by the USDOJ for noncompliance and damages awarded in civil litigation. The mitigation of penalties and damages extends beyond OHA and ODHS as the OHA DAT frequently partners with DAS to support the enterprise and provides technical assistance to other executive agencies and small boards and commissions.

Additionally, the adoption of consistent integration of creating digitally-accessible information on the web saves the enterprise the high cost of remediating non-compliant information in terms of FTE to remediate documents.

Oregon Health Authority: 2027-29 Policy Package

Digital Access requirements are newish work. Training current staff and onboarding new staff with the skills to do this work is an investment in the enterprise's workforce by building internal capacity and SME to do this work effectively and efficiently.

19. What are the sources of funding (revenue) and the funding split (GF/OF/FF) for each part of the investment as well as the offset/reduction?

GF %	OF %	FF %
74%	8%	18%

The Other and Federal Funds are cost-allocated across multiple funding streams from agency divisional funding sources.

20. What are the potential savings (above the offset to pay for the investment)?

See response to 18 above.

RACIAL EQUITY IMPACT STATEMENT (REIS) WORKSHEET: POLICY OPTION PACKAGE (POP) QUESTIONS

OHA POP #405: Digital Accessibility Initiative

Program managers responsible for the POP: Please answer the questions below for every POP being proposed in your agency request budget. To fill out this worksheet, download a copy of this worksheet and type your answers below each question.

Program Overview

1. Please describe the POP being proposed.

This POP requests permanent funding for OHA's Digital Accessibility Program, converting four limited-duration positions to permanent FTE across four strategic workstreams: (1) web accessibility, (2) document accessibility, (3) accessibility standards in procurement, and (4) building internal capacity while extending subject matter expertise to ODHS and enterprise-wide to other state agencies. The program ensures that OHA's public-facing and internal digital systems, documents, and applications meet Web Content Accessibility Guidelines (WCAG) 2.2 standards and are usable by people with disabilities and those relying on assistive technology.

2. Why is the POP being proposed?

Federal ADA Title II regulations now require state and local governments to meet WCAG digital accessibility standards. OHA's current Digital Accessibility Program is staffed almost entirely by limited-duration positions that conclude at the close of the DAP Implementation Project in March 2027. Without permanent funding, the agency loses the staff and their expertise, institutional knowledge, and infrastructure needed to maintain compliance, continue remediating inaccessible documents and systems, uphold accessibility requirements in procurement, and sustain division-level capacity already built. This POP is proposed to prevent that loss and to establish digital accessibility as a permanent, accountable function of how OHA operates.

Consultation

3. Who is completing this REIS?

Accessibility, Inclusion and Education Unit Manager in Equity & Inclusion Division

4. Who is responsible for tracking equity outcomes? What method(s) are they using to track outcomes?

The Digital Accessibility Team Manager, the DAP Implementation Project Manager, and partners in OHA's Office of Information Services (OIS) are jointly responsible for tracking equity outcomes. They do so through a combination of compliance monitoring and capacity metrics: ongoing site improvement, web accessibility scoring, manual application testing results, document remediation counts, training completion rates, Division Accessibility Leader network coverage across divisions, and procurement contract compliance. Progress is reported through the Executive Steering Committee on a regular basis and tracked against the success metrics established in the project's Business Case and Charter. Together these measures provide a picture of whether digital access barriers are being reduced for people with disabilities and those most affected by inaccessible systems.

5. Does your agency have a DEIB practitioner (Yes or no)?
 - a. If yes, describe how you collaborated with them on this REIS.
 - b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

Yes. The practice of DEIB is a strategic priority in OHA, and as such everyone is expected to be a practitioner. Related to this POP, the POP's leads partnered with numerous OHA DEIB practitioners including the Deputy Director, Equity & Inclusion Division Director, and Workforce Equity Strategist.

6. Did you collaborate with your agency's data analysts, community engagement managers, outreach managers, and/or others that regularly interact with underserved and marginalized communities on this REIS? (Yes, no, or not applicable)
 - a. If yes, describe how you collaborated with them on this REIS.
 - b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

Yes. Development of this REIS drew on input from OHA's Civil Rights and Inclusion Section, which houses a co-sponsor of the Digital Accessibility Program through the Equity and Inclusion Division and brings ongoing expertise in how inaccessible systems create barriers for people and communities OHA is committed to reaching. The program also benefits from direct lived-experience and subject matter expertise (SME) as three members of the Digital Accessibility Program Team are native users of assistive technology, including two screen reader users, whose firsthand knowledge of access barriers informs both the program's priorities and equity framing. Community input gathered during the federal ADA Title II rulemaking process included significant public comment from disability advocacy organizations and community members.

Community Engagement and Data

7. Identify the specific racial groups and communities that may be impacted by this POP, both directly and indirectly. In your answer, include responses to the following questions:
 - a. How did you identify these impacted groups?
 - b. What data are you using to validate your assessment? If possible, use outreach and engagement feedback to gather information and insight.
 - c. If possible, disaggregate the data by race, ethnicity, geography, income level, and other relevant characteristics. If disaggregated data is not available, please describe why.
 - d. How are communities impacted by this POP? What are the disproportionate impacts? Please be specific.

This POP benefits all Oregonians who interact with OHA's digital systems. Its equity impact is most significant for communities that experience disability at higher rates and simultaneously face other structural and systems barriers to accessing health services. Oregonians with limited English proficiency (LEP) face compounding exclusion when translated documents are posted in inaccessible formats that assistive technology cannot read.

When OHA's digital systems are inaccessible, the burden falls hardest on people who cannot easily substitute another access channel. Those most likely to need OHA services are also most likely to be shut out by inaccessible systems and least likely to have a workaround available. Accessible digital infrastructure also directly supports timely

language access, since documents and applications that meet accessibility standards can be translated, posted, and updated more efficiently, meaning people who need information in languages other than English receive it faster and in a usable format. This POP addresses these intersecting and compounding disparities by making accessibility a permanent, built-in function of how OHA designs, procures, and maintains its digital systems.

8. How did you ensure multiple perspectives were part of the decision-making process for this POP? In your answer, include responses to the following questions:

- a. Identify how you have or are planning to engage multiple perspectives and impacted groups to provide feedback on this POP (e.g. program design, budget, policy decisions, etc.). Please give specific examples.
- b. If community engagement is not part of your approach, please explain why and what you did instead to incorporate community perspectives. In your response, describe the following: the decision-making process used to determine engagement was not feasible or appropriate, the specific barriers (beyond general time or capacity), and how you mitigated the risk of missing community input (e.g. using existing feedback, partnering with trusted organizations, review from advisory bodies, etc.).

Multiple perspectives were embedded in this POP from the ground up. The digital accessibility policies that guide the program's work were co-created with disability community members and advocacy organizations. Community voices shaped the policy and accessibility framework before this POP was ever drafted. Within the program itself, three members of the Digital Accessibility Team are native users of assistive technology, including two screen reader users, bringing lived experience of digital access barriers directly into day-to-day decision-making about priorities, workflows, and program design.

The Executive Steering Committee, which provides oversight and approval authority for key program decisions, includes representation from OHA's Equity and Inclusion Division and Civil Rights and Inclusion Section. Internally, the Division Accessibility Leader network ensures that perspectives from across OHA's program areas, including programs that serve communities most affected by health inequities, inform how the program applies its capacity.

The federal ADA Title II rulemaking process also generated substantial public comment from disability advocacy groups and community members nationwide, which OHA

reviewed and is reflected in the program's approach. These inputs ensured that this POP reflects multiple perspectives rather than a single internal viewpoint.

Impacts and Accountability

9. If this POP is not funded, please describe the following:

a. Which racial or ethnic communities would be most impacted.

The communities most impacted would be American Indian and Alaska Native, Black, and multiracial Oregonians who experience disability at disproportionately higher occurrence, along with Oregonians with limited English proficiency, low-income Oregonians dependent on OHP and OHA-administered programs, and rural Oregonians who have few or no alternatives when digital systems are inaccessible. These are the same communities OHA's strategic plan commits to reaching, and they are the most likely to be shut out when digital access barriers go unaddressed.

b. How disparities would likely persist or worsen.

Without permanent funding, the limited-duration positions that constitute the Digital Accessibility Team vanish at the close of the DAP Implementation Project in March 2027. The institutional knowledge, remediation workflows, procurement guardrails, training infrastructure, and Division Accessibility Leader network built over the course of the project would erode without staff to sustain them. The document backlog would grow again as new inaccessible documents enter circulation without remediation capacity to address them. Accessibility requirements would go unenforced in procurement, meaning new technology purchased by OHA would be acquired without accessibility standards, creating compounding technical debt that becomes increasingly costly to remediate over time. Web accessibility scores would decline without ongoing monitoring and intervention.

More than the lack of enforcement and lower scores described above, the avoidable consequence of not funding this POP would be felt most by people in the communities identified above. No Digital Access POP would cause a return to a reality where people with disabilities, people who rely on assistive technology, and people who need translated materials in accessible formats are functionally and practically excluded from the digital front door to health coverage, behavioral health services, and public health information, deepening exactly the disparities OHA's 2030 health equity goal commits the agency to eliminate.

10. Who will be monitoring racial equity outcomes over time for this POP?

The Accessibility, Inclusion and Education Manager holds primary responsibility for monitoring racial equity outcomes, in coordination with the DAP Implementation Project Manager and partners in OIS.

a. How will progress be reported?

The Equity and Inclusion division has adopted a workplan centered in results-based accountability (RBA). That workplan includes partnering with all of OHA's divisions to co-develop consistent data and reporting that will be integrated into each division's equity plan and rolled up into OHA's equity plan. As the Digital Accessibility program develops more robust data, equity impact reporting will be incorporated into OHA's RBA, broader health equity accountability frameworks, and strategic planning focus area actions and outcomes.

b. How will leadership be informed of equity impacts?

Leadership will be informed of equity impacts through the program's existing Executive Steering Committee reporting structure and elevated to agency leadership. Web conformance scores, document remediation counts, training completion rates, and procurement compliance will be reported on a regular basis and contextualized within OHA's broader health equity goals. The manager will ensure that equity impact data is surfaced and report whether communities most affected by digital access barriers are experiencing improved access to OHA services.

c. How will the community be involved in monitoring outcomes?

Community involvement in monitoring outcomes will be grounded in the same disability community and advocacy relationships that informed the co-creation of OHA's digital accessibility policies. As the program matures, feedback from assistive technology users, including through the team members who are native assistive technology users, will continue to inform whether remediation and testing efforts are producing real accessibility improvements, not just technical compliance scores.

Oregon Health Authority 2027-29 Policy Package

Division:	Public Health
Program:	Oregon Immunization Program
Policy package title:	Enhancing Vaccine Access and Financing
Policy package number:	406
Related legislation:	N/A

Summary statement:

Access to vaccines is uneven across Oregon, particularly for people facing systemic barriers or increased health risks. Increasing costs and administrative complexity have made it more difficult for many provider types to offer immunization services.¹ As a result of these challenges, Oregon continues to face widening gaps in vaccine access, largely for uninsured, rural and historically marginalized communities. This is primarily driven by rising costs and administrative burdens on vaccine providers.

Reforming Oregon's vaccine finance model to adhere to a universal vaccine purchase (UVP) and distribution model will stabilize funding, reduce barriers for vaccine providers and improve vaccine access for all ages. Modernizing Oregon's vaccine finance model is essential for safeguarding public health and achieving the state's goal of eliminating health inequities by 2030.

¹ <https://www.oregon.gov/oha/PH/PREVENTIONWELLNESS/VACCINESIMMUNIZATION/Documents/ImprvVacAccessEvalSummary.pdf>

Oregon Health Authority: 2027-29 Policy Package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	\$774,223	\$177,209	\$12	\$951,444	1	1.58

Purpose

1. What problem is OHA trying to fix or solve?

Oregon's current vaccine financing and delivery system is fragmented across age groups, payors, and programs, creating access gaps, administrative burden for providers, and financial risks for public health agencies and many immunization providers. Because of this, some communities in Oregon are faced with increasing gaps in vaccine access as many clinics choose not to participate. These gaps are most present in rural communities, among uninsured Oregonians and among other historically marginalized communities.¹ Recent and potential federal immunization policy changes further increase system vulnerability and risk disruptions to vaccine supply and coverage.

The current vaccine financing system has resulted in financial risks for many vaccine providers and public health agencies that provide vaccines. They are unable to continue to afford immunizations, and many clinics therefore opt out of providing immunizations to their communities.

2. What would this policy package buy and how and when would it be implemented?

This policy package would fund the planning and implementation of a universal vaccine purchase (UVP) model, including staffing and vendor support for program administration setup and project management.

Oregon Health Authority: 2027-29 Policy Package

UVP is a state-coordinated system where vaccines are centrally purchased using braided funding and distributed to providers at no cost. This is intended to stabilize funding and ensure equitable access regardless of insurance or income. Under this model, payors contribute a quarterly per-capita fee based on the number of covered lives they insure in two age groups—children (0-18) and adults (19+). The fees collected are combined with federal Vaccines for Children (VFC) funds, federal Section 317 funds (used to purchase vaccines for uninsured adults), and state appropriations, when available.

The Oregon Immunization Program would utilize this pooled funding to purchase all routinely recommended vaccines for participating clinics, leveraging CDC contract rates to buy vaccines in bulk at significantly lower prices. Legislation creates a secure fund for vaccine purchasing and program operations, ensuring predictability across budget cycles. Payor assessments would be deposited into a dedicated account, so funds are protected year-to-year and across biennia and used only for the purpose of UVP.

More detailed information regarding staffing and new operations is provided under questions #13 and #15.

Timeline

- 2026: Design, partner engagement, fiscal modeling, LC development
- 2027: Legislative session, rulemaking, procurement steps begin
- 2028: Vendor onboarding, payor and provider onboarding, and statewide launch mid-year.

Oregon Health Authority: 2027-29 Policy Package

3. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity² or equitable health outcomes? How does this policy package further OHA's mission and align with its strategic plan?

Vaccine access gaps most acutely affect Oregonians in rural areas, historically marginalized Oregonians and Oregonians who do not have health insurance.

A universal vaccine purchase (UVP) model is proposed to offer the strongest path to equitable access, predictable and sustainable funding, simplified administration, and long-term system stability.

This will strengthen two prioritization focus areas within OHA's strategic plan:

1. Strengthening access to affordable care for all by prioritizing affordability for Oregon families by:
 - Using state programs and levers to blunt federal costs shifts and keep care affordable.
 - Pursuing payment, purchasing, and delivery reforms within existing resources that address primary drivers of health care costs while maintaining providers' and payors' financial stability.
2. Fostering healthy families and environments by leveraging the West Coast Health Alliance to:
 - Coordinate on immunization guidance, vaccine supply, and other evidence-based clinical services.

² Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability, gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.**

Oregon Health Authority: 2027-29 Policy Package

This also supports the focus of the Rural Health Transformation Fund (RHTF) to protect and strengthen rural health care infrastructure, access, and patient outcomes for Oregonians across the lifespan, including:

- Establishing strong foundations for healthy families.
- Supporting rural residents with special health care needs.
- Ensuring access to vaccines that keep communities healthy and supports aging in place.

Supporting health care interventions like immunizations across the entire lifespan protects individuals, families and communities against vaccine-preventable disease and lowers healthcare costs for the treatment of preventable conditions.

Quantifying results

4. What are the long-term desired outcomes?

A lifespan UVP model offers the clearest path to simplify a fragmented funding landscape, stabilize provider participation statewide, and protect access for Oregonians of all ages in the face of shifting federal policy, market volatility and rising vaccine costs. UVP will produce savings to the health care system by leveraging Centers for Disease Control and Prevention (CDC) contract prices for vaccine purchasing; Oregon will pay significantly lower per-dose costs than what is paid by individual immunization providers. Public and private payors operating in Oregon will save by paying into a quarterly vaccine fund based on the number of covered lives they insure rather than paying for vaccine costs through the current claim-by-claim system. For immunization providers, UVP will eliminate the cost of purchasing (and billing for) routine immunizations, as well as the reimbursement disparities and

Oregon Health Authority: 2027-29 Policy Package

uncertainties that exist within the current system. Currently non-vaccinating clinics will be incentivized to offer immunizations, avoiding referrals and missed opportunities.

Advancing a UVP model positions Oregon to build a resilient immunization infrastructure that aligns with other West Coast Health Alliance states and prioritizes equity, fiscal predictability, and long-term public health outcomes.

5. What are the envisioned outputs of this investment? How will OHA measure the impacts on health inequities of this policy package?

Envisioned outputs include stable and predictable vaccine funding mechanism for routinely recommended vaccines that is aligned with other West Coast Health Alliance states and prioritizes equity, fiscal predictability, and long-term public health outcomes.

Impacts of UVP will be measured by tracking immunization coverage rates by VFC status (Medicaid and un-/under-insured kids), geography, race/ethnicity, and age; also tracking provider enrollment (changes in enrollment number by provider type, location and population served).

How achieved

6. What actions have occurred to resolve the issue prior to requesting a policy package?

Over several years, OHA has convened key partners from throughout the health care system to address concerns about growing vaccine access gaps. This includes a January 2024 Vaccine Finance Summit and the Vaccine Finance Reform Steering Committee, which met from May-September 2024. The committee concluded that Oregon's current vaccine purchase and delivery model is outdated and

Oregon Health Authority: 2027-29 Policy Package

contributing to access gaps. The group also concluded that, while the Vaccine Access Program (VAP) has worked as a temporary fix to expand access for all ages regardless of insurance status or type, the program is no longer sustainable due to rising demand and costs (for both vaccine and staffing). The committee identified the need for a long-term solution like UVP.

Senate Bill 42 was introduced in the 2025 legislative session to shore up VAP until a sustainable long-term solution like UVP could be implemented. SB 42 did not pass, resulting in an indefinite freeze on program enrollment.

7. What alternatives were considered and what were the reasons for rejecting them?

1. Ensure long-term sustainability of the current system by requiring a substantial investment of state funding to cover both operational needs and rising vaccine costs, especially as expenses increase and demand for VAP enrollment continues to grow. OHA is budgetarily unable to support this option.
2. Permanently close new VAP enrollment and disenroll a substantial percentage of current VAP clinics—including Federally Qualified Health Centers and Rural Health Centers. OHA has delayed implementing this option because of the negative impact it will have on participating clinics that rely on VAP to support vaccine access for their patient population. The downstream impact would be a disruption in immunization services statewide, with the possibility that some number of clinics would stop offering immunizations altogether.

Alternatively, a UVP program supports these clinics with a sustainable vaccine supply and a predictable funding source. Administrative and operating costs are included in the payor assessment, which is

Oregon Health Authority: 2027-29 Policy Package

meant to fully fund the program, not just the vaccine doses. The model would include both vaccine acquisition costs and the infrastructure required to run the system.

8. What other agencies, programs, community partners or stakeholders are collaborating on this policy package?

OHA is working closely with the Department of Business and Consumer Services, the Oregon Medical Board and the Oregon Board of Pharmacy.

As noted in #6 above, partners from throughout Oregon's health care system have been supportive of OHA's efforts to identify a long-term vaccine finance solution like UVP, including clinicians, commercial insurers, Coordinated Care Organizations, local public health officials, provider associations (e.g., Oregon Pediatric Society, Oregon Academy of Family Physicians), and advocacy groups like Oregon Families for Vaccines, Boost Oregon, and the Immunize Oregon statewide coalition.

9. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

Yes, this package requires a new statute to create a UVP model in the state.

10. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Department of Business and Consumer Services (DCBS)

Oregon Health Authority: 2027-29 Policy Package

- DCBS and its Division of Financial Regulation (DFR) are the state's lever to guarantee smooth financial operations, stable access, and consistent UVP program compliance across the insurance sector. They must ensure Oregon's insurers implement UVP rules uniformly, fairly, and without cost barriers.

Oregon Board of Pharmacy

- In most UVP states, large chain pharmacies do not participate in the state's UVP program, however independent, community pharmacies may participate. The Board may expand ORS 689.645 rules further to align pharmacists' vaccine services with UVP supply and eligibility rules to ensure pharmacies can fully participate in the program.

Oregon Medical Board

- A UVP program may prompt the Board to issue or revise guidance on standing orders, physician responsibilities, and coordination with statewide Public Health Officer recommendations—ensuring medical providers can legally and safely administer universally purchased vaccines.

Tribal health programs

- Clinics that participate in the Oregon UVP program (instead of continuing to access vaccines through Indian Health Services), would experience simplified ordering, inventory management, and reduced complexity in managing the requirements of multiple vaccine programs.

Local public health departments

- Eliminates costs for purchasing vaccines not currently available through state programs.
- Simplifies vaccine ordering and inventory management.
- Reduces complexity in managing the requirements of multiple vaccine programs.

Oregon Health Authority: 2027-29 Policy Package

11. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Staffing and fiscal impact

Implementation date(s): July 1, 2028

End date (if applicable): n/a

12. What assumptions affect the pricing of this policy package?

Assumes continued approval to move LC forward. Pricing of the policy package is aligned with OHA's best cost estimates.

13. Will there be new responsibilities for OHA and/or Shared Services? Specify which programs and describe their new responsibilities.

New responsibilities for OHA's Immunization Program include UVP program setup, program administrator (vendor) RFP release and onboarding, and ongoing UVP operations related to vaccine procurement, distribution, and provider support.

The program administrator will bring operational and technical expertise in UVP payor administration activities, such as onboarding, quarterly billing, assessment collection, and distribution of funds to the Oregon Immunization Program for vaccine procurement and distribution. These activities would be handled by an experienced third-party UVP vendor selected through a competitive RFP process.

Oregon Health Authority: 2027-29 Policy Package

OHA staffing requirements are described in question #15.

14. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

Not applicable.

15. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

OIP already has the right mix of staff to support early implementation, though overall capacity is limited. Several permanent positions are currently funded through temporary sources (Public Health Infrastructure Grant) that extend into mid or late 2027, leaving a roughly 8-month gap between the end of the grant and the point at which the payor assessments begin generating operational funding. The POP includes these 4.0 FTE permanent positions and the funding needed to bridge the gap. An estimated additional 1.0 FTE would also be needed to support clinic compliance and is noted below.

Required functions	Estimated required staffing	Current staffing	Needs gap funding
Vaccine accountability controller	1 FTE	1 FTE	No
Provider onboarding and support*	1-2 FTE	2 FTE	Yes
Compliance visit reviewers*	4-5 FTE	3 FTE	Yes, need new 1.0 FTE, requires position authority

Oregon Health Authority: 2027-29 Policy Package

Order management*	1-2 FTE	2 FTE	No
IIS data exchange analysis	1 FTE	1 FTE	Yes
Policy lead, will coordinate UVP for OIP	1 FTE	1 FTE	Yes
Fiscal analyst, invoicing	1 FTE	1 FTE	Yes

*FTE required for these functions depends on the number of enrolled clinics.

16. What are the start-up and one-time costs?

\$1,106,471 in one-time costs for staffing and vendor support for program administration setup and project management.

17. What are the ongoing costs?

The UVP assessment will fully fund the program; ongoing administrative and operating costs are built directly into the quarterly payor assessment, to include both vaccine acquisition costs and the infrastructure required to run the system. This includes a program administrator (vendor), some program staffing, and support for the state's immunization information system, ALERT IIS. Including these costs in the assessment improves financial transparency and prevents underfunding that can erode program performance over time.

18. What reductions will you use to offset the costs of this work and maintain budget neutrality?

This POP maintains budget neutrality by fully offsetting the requested investment through the savings and reductions included in POP 415: OHA Savings and Reductions.

Oregon Health Authority: 2027-29 Policy Package

19. What are the sources of funding (revenue) and the funding split (GF/OF/FF) for each part of the investment as well as the offset/reduction?

Not applicable.

20. What are the potential savings (above the offset to pay for the investment)?

Not applicable.

RACIAL EQUITY IMPACT STATEMENT (REIS) WORKSHEET: POLICY OPTION PACKAGE (POP) QUESTIONS

OHA POP #406: ENHANCING VACCINE ACCESS AND FINANCING

Program managers responsible for the POP: Please answer the questions below for every POP being proposed in your agency request budget. To fill out this worksheet, download a copy of this worksheet and type your answers below each question.

Program Overview

1. Please describe the POP being proposed.

Access to vaccines is uneven across Oregon, particularly for people facing systemic barriers or increased health risks. Increasing costs and administrative complexity have made it more difficult for many provider types to offer immunization services. As a result of these challenges, Oregon continues to face widening gaps in vaccine access, largely for uninsured, rural and historically marginalized communities. This is primarily driven by rising costs and administrative burdens on vaccine providers. This POP proposes shifting Oregon's vaccine finance model from its current fragmented state to a centralized, universal vaccine purchase and distribution model.

2. Why is the POP being proposed?

Adopting a UVP model will stabilize funding, reduce barriers for vaccine providers and improve vaccine access for all ages. Modernizing Oregon's vaccine finance model is essential for safeguarding public health and achieving the state's goal of eliminating health inequities by 2030.

Consultation

3. Who is completing this REIS?

Interim Immunization Section Manager

4. Who is responsible for tracking equity outcomes? What method(s) are they using to track outcomes?

The Oregon Immunization Program is responsible for tracking outcomes. OIP will monitor vaccine coverage rates by Vaccines for Children eligibility status (e.g., Medicaid and un-/under-insured children), geography, race/ethnicity, and age. We will also track changes in provider enrollment, disaggregated by provider type, location and population served.

5. Does your agency have a DEIB practitioner (Yes or no)? Yes.
- If yes, describe how you collaborated with them on this REIS.
 - If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

OHA is actively coordinating with the PHD Partnerships for Community Health to engage a practitioner to support review of this POP.

6. Did you collaborate with your agency's data analysts, community engagement managers, outreach managers, and/or others that regularly interact with underserved and marginalized communities on this REIS? (Yes, no, or not applicable)
- If yes, describe how you collaborated with them on this REIS.

Public Health Division program data analysts and subject matter experts have provided information on the equity impacts of this POP.
 - If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

Community Engagement and Data

7. Identify the specific racial groups and communities that may be impacted by this POP, both directly and indirectly. In your answer, include responses to the following questions:

Vaccine access gaps most acutely affect Oregonians in rural areas, historically marginalized Oregonians and Oregonians who do not have health insurance.

A universal vaccine purchase (UVP) model is proposed to offer the strongest path to equitable access, predictable and sustainable funding, simplified administration, and long-term system stability.

- a. How did you identify these impacted groups?

An [assessment](#) was conducted with the Northwest Center for Public Health Practice during 2025 to specifically identify vaccine access risks across Oregon.

- b. What data are you using to validate your assessment? If possible, use outreach and engagement feedback to gather information and insight.

See assessment methodology on page 6, Table 1, here:

<https://www.oregon.gov/oha/PH/PreventionWellness/VaccinesImmunization/Documents/ImprvVacAccessEvalSummary.pdf>

- c. If possible, disaggregate the data by race, ethnicity, geography, income level, and other relevant characteristics. If disaggregated data is not available, please describe why.

Please see assessment report for more detailed information.

- d. How are communities impacted by this POP? What are the disproportionate impacts? Please be specific.

This POP is intended to support individuals in all communities across Oregon who wish to receive vaccines. By strengthening and sustaining the purchasing and distribution of vaccines in Oregon, UVP will help ensure that access to vaccines is as robust as possible, preventing contraction of the vaccine provider network throughout the state.

8. How did you ensure multiple perspectives were part of the decision-making process for this POP? In your answer, include responses to the following questions:

- a. Identify how you have or are planning to engage multiple perspectives and impacted groups to provide feedback on this POP (e.g. program design, budget, policy decisions, etc.). Please give specific examples.

The respective Public Health programs will engage with community partners, work groups, and Advisory Boards as applicable.

- b. If community engagement is not part of your approach, please explain why and what you did instead to incorporate community perspectives. In your

response, describe the following: the decision-making process used to determine engagement was not feasible or appropriate, the specific barriers (beyond general time or capacity), and how you mitigated the risk of missing community input (e.g. using existing feedback, partnering with trusted organizations, review from advisory bodies, etc.).

Impacts and Accountability

9. If this POP is not funded, please describe the following:

a. Which racial or ethnic communities would be most impacted.

Rural Oregonians of all ethnic and racial communities would be at greatest risk for experiencing reduced access to vaccines if this POP is not funded. Individuals who are under- or uninsured are also at increased risk.

b. How disparities would likely persist or worsen.

The current vaccine financing system in Oregon is fragmented and unsustainable; vaccines for uninsured adults and individuals without access to a medical home are at significant risk without more reliable funding and bolstering of the vaccine provider network in Oregon. Without adoption of UVP, the current system will erode and lead to reductions in vaccine access in Oregon.

10. Who will be monitoring racial equity outcomes over time for this POP?

a. How will progress be reported?

Assessments will be conducted bi-annually to identify changes in vaccine coverage and provider enrollment. This information will be reported to agency leadership and community organizations that participate in immunization work.

b. How will leadership be informed of equity impacts?

PHD and OHA leadership will be made aware of any equity impacts identified during bi-annual assessments via written reports.

c. How will the community be involved in monitoring outcomes?

Community organizations funded by the PHD to conduct immunization work will participate in discussions during the implementation and monitoring period if UVP is approved.

Oregon Health Authority 2027-29 Policy Package

Division:	Public Health
Program:	Adolescent, ScreenWise, and Reproductive Health Unit – Transgender Health and Wellness
Policy package title:	Gender Affirming Care
Policy package number:	407
Related legislation:	Not applicable
Summary statement:	The request addresses widening gaps in Oregon’s gender affirming care (GAC) provider network caused by federal legal threats that have led clinics to discontinue services, disproportionately harming Trans, Gender Diverse, and Intersex (TGI) people living in rural and frontier areas and TGI people of color. The POP establishes dedicated expertise and community-led workforce development to stabilize and strengthen the GAC network, ensuring Oregon meets its obligations under HB 2002. Without funding, provider shortages will worsen, access will continue to decline, and inequities for marginalized TGI communities will deepen across the state.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	\$538,777	\$0	\$0	\$538,777	1	0.88

Oregon Health Authority: 2027-29 Policy Package

Purpose

1. What problem is OHA trying to fix or solve?

OHA is addressing a widening health inequity in access to gender affirming care (GAC) caused by federal legal and financial threats that have led many Oregon providers, FQHCs and hospital systems to discontinue basic GAC services, worsening access for Trans, Gender Diverse, and Intersex (TGI) people in Oregon. These disruptions have deepened existing health inequities affecting TGI populations experiencing the greatest inequities, including:

- TGI people of color facing compounded racial and gender-based discrimination.
- TGI individuals living in rural and frontier areas who already have fewer providers and longer travel distances.
- Communities relying on safety net clinics that have scaled back services.

This POP supports OHA's **statutory mandate under HB 2002**, which requires access to gender affirming services statewide.

2. What would this policy package buy and how and when would it be implemented?

The package would:

- **Establish a 1.0 FTE OPA3** to broadly provide subject matter expertise, analysis and consultative advice on policies relating to GAC provider network adequacy. OPA3 will support CCO Operations to conduct culturally responsive and trauma informed provider network adequacy assessments, as well as manage grant program development and implementation through community-based organization (CBO) partnerships.

Oregon Health Authority: 2027-29 Policy Package

- **Fund a community-led workforce development grant program** to build provider capacity through trainings, learning collaboratives, provider support lines, and communities of practice.

Implementation:

- Staffing and grant administration would begin **Q3/Q4 2027**, consistent with legislative, hiring, and granting timelines.
- Workforce development activities would roll out on a continuous basis as CBOs design and propose interventions, beginning in **Q4 2027**.

Purchases include:

- One permanent position (OPA3).
- Community-based workforce development grants.

3. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity¹ or equitable health outcomes? How does this policy package further OHA's mission and align with its strategic plan?

This POP advances OHA's goal of eliminating health inequities by 2030 by stabilizing access to a medically necessary service disproportionately inaccessible to TGI communities in rural or frontier areas and TGI people of color in Oregon, and redistributes power by resourcing community-led workforce development, centering those most affected by historical and contemporary injustices. It supports OHA's mission by improving access to high-quality, culturally responsive care through

¹ Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability**, gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

Oregon Health Authority: 2027-29 Policy Package

partnerships and community-driven solutions, and strengthens statewide infrastructure needed to ensure safety and access of GAC services during a period of federal uncertainty.

The Oregon state legislature's passage of gender affirming services provisions in 2023's HB2002 established state requirements related to protecting and improving access to gender-affirming care. While OHA has important responsibilities under the law, the agency currently has limited dedicated infrastructure and capacity focused specifically on transgender and gender diverse health. This investment helps establish sustainable capacity to meet those statutory responsibilities and advance equitable health outcomes for TGI communities.

This proposal is informed by the Health Care Workforce (HCWF) Gender Affirming Care Provider Workgroup recommendations report², which was convened at the request of the OHA director's office in 2025, as well as feedback and recommendations from OHA-sponsored community listening sessions held throughout the state in 2025.

Quantifying results

4. What are the long-term desired outcomes?

- A **stable, statewide GAC provider network** able to withstand federal or legal pressures.
- Reduced racial, geographic, and other systemic disparities in access to high-quality, culturally responsive gender-affirming care, particularly for underserved TGI communities.
- Sufficient network adequacy assessment systems to maintain awareness of regional and service gaps, in compliance with state mandates.

² Oregon Health Authority, 2025. Health Care Workforce Committee Gender-Affirming Care Provider Workgroup Report. <https://www.oregon.gov/oha/HPA/HP-HCW/Documents/Final-HWCF-GAC-Provider-Work-Group-Report-Feb-2025.pdf>

Oregon Health Authority: 2027-29 Policy Package

- Stronger CBO-led training and provider support infrastructure.
- Improved physical, mental, and social wellbeing for TGI Oregonians by increasing timely access to medically necessary, affirming, and culturally responsive care.

5. What are the envisioned outputs of this investment? How will OHA measure the impacts on health inequities through this policy package?

OHA will measure success through:

- Number of providers supported, trained, or participating in learning collaboratives.
- Number of community-based organizations receiving funding to support workforce development and provider capacity.
- Number of workforce development initiatives completed
- Network adequacy analyses documenting changes in provider availability and regional access.
- Process measures such as community partnerships engaged, workforce projects launched, and provider support services implemented.

Data will rely on network and programmatic monitoring to align with current data collection guidelines and to prevent collection of additional identifiable data.

Oregon Health Authority: 2027-29 Policy Package

How achieved

6. What actions have occurred to resolve the issue prior to requesting a policy package?

Prior efforts included the formation of a temporary OHA agencywide GAC workgroup formed after HB 2002, convening a Health Care Workforce (HCWF) Gender Affirming Care Provider Recruitment, Training, and Retention Recommendations Workgroup³ at the request of the OHA director's office in 2025, creation of a limited-duration position (Gender Affirming Care policy lead), and a GAC steering committee staffed with fractional contributions from divisions across the agency.

Despite ongoing progress and urgent need, **no dedicated permanent GAC positions or resources exist at the agency.** Lack of specialized GAC network adequacy expertise prevented required Medicaid CCO Quality Assurance network analyses from being completed. Community members and partner organizations have played a central role in identifying priorities and informing OHA's GAC strategic planning. However, dedicated resources have not been available to implement many of the community-informed recommendations or to establish sustained community-led workforce development and provider support initiatives.

This policy package builds on those initial efforts by establishing permanent staffing, strengthening statewide coordination, and investing in community-led solutions that support implementation of House Bill 2002, advancing OHA's goal of eliminating health inequities by 2030.

³ Oregon Health Authority, 2025. Health Care Workforce Committee Gender-Affirming Care Provider Workgroup Report. <https://www.oregon.gov/oha/HPA/HP-HCW/Documents/Final-HWCF-GAC-Provider-Work-Group-Report-Feb-2025.pdf>

Oregon Health Authority: 2027-29 Policy Package

7. What alternatives were considered and what were the reasons for rejecting them?

Alternatives included:

- Continuing with existing limited staff capacity.
- Distributing workforce development responsibilities across existing OHA programs.
- Relying solely on CCO Operations to complete network adequacy work.

These options were rejected because they lacked GAC-specific expertise and dedicated resources, failed to meet statutory network adequacy assessment requirements under HB 2002, and did not provide resources for community-defined workforce solutions.

8. What other agencies, programs, community partners or stakeholders are collaborating on this policy package?

Equity & Inclusion Division is collaborating on this POP by providing policy guidance and strategy, as well as equity analysis and accountability support. No other state agencies are requesting complementary funding.

9. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No. There is no associated legislative concept, and no new statute is required.

Oregon Health Authority: 2027-29 Policy Package

10. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

CCOs: strengthened accountability and support for GAC network adequacy assessment.

Local public health authorities and clinics: improved access to provider training and workforce supports.

Tribal governments: increased access to stable GAC provider networks, especially in rural regions.

Impacts are operational and capacity building rather than fiscal for external agencies.

11. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Staffing and fiscal impact

Implementation date(s): July 2027

End date (if applicable): N/A, ongoing

12. What assumptions affect the pricing of this policy package?

- Stable budget to hire and retain the OPA3 role.
- Continued need to monitor network changes as providers, clinics, and hospitals respond to federal pressures.
- Continued network adequacy statutory obligation under HB 2002.
- CBO capacity to design and implement funded workforce development activities.

Oregon Health Authority: 2027-29 Policy Package

13. Will there be new responsibilities for OHA and/or Shared Services? Specify which programs and describe their new responsibilities.

- PHD will oversee the position and grant portfolio.
- Shared Services may support contracting, finance, and payment processing for CBO workforce grants.
- CCO Operations / Quality Assurance will receive enhanced SME guidance on GAC network adequacy.

14. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No changes to eligibility or caseload numbers. Access to gender affirming services is expected to increase as provider capacity stabilizes.

15. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

1.0 FTE OPA3, permanent. No modifications to existing positions.

16. What are the start-up and one-time costs?

While some start-up labor will not carry into the 2027-2029 biennium (e.g. establishing grant program administration workflows, initial staff onboarding, and development of partnership systems), the POP does not include any dedicated funding specific to these start up activities.

Oregon Health Authority: 2027-29 Policy Package

17. What are the ongoing costs?

Ongoing costs include the permanent OPA3 position and CBO workforce development grant fund (total: \$538,777)

18. What reductions will you use to offset the costs of this work and maintain budget neutrality?

This POP maintains budget neutrality by fully offsetting the requested investment through the savings and reductions included in POP 415: OHA Savings and Reductions.

19. What are the sources of funding (revenue) and the funding split (GF/OF/FF) for each part of the investment as well as the offset/reduction?

The POP is funded through general funds only. Offsets will derive from internal reallocations.

20. What are the potential savings (above the offset to pay for the investment)?

OHA may realize long-term savings in Oregon Health Plan (OHP) expenditures due to more cost-effective, high-quality care being delivered to OHP members. To the extent savings occur, they will be reflected in subsequent years' CCO rates, which are based on past expenditures, and incorporated into OHA's budget as part of the capitation rates for CCO-enrolled OHP members.

Oregon Health Authority: 2027-29 Policy Package

RACIAL EQUITY IMPACT STATEMENT (REIS) WORKSHEET: POLICY OPTION PACKAGE (POP) QUESTIONS

OHA POP #407: GENDER AFFIRMING CARE

Program managers responsible for the POP: Please answer the questions below for every POP being proposed in your agency request budget. To fill out this worksheet, download a copy of this worksheet and type your answers below each question.

Program Overview

1. Please describe the POP being proposed.

The proposed POP funds:

- A 1.0 FTE Operations & Policy Analyst 3 in PHD to provide subject matter expertise on policies and practices to support access to gender affirming care (GAC). This SME will support CCO Operations in conducting culturally responsive and trauma informed assessments of provider network adequacy and coordinate community-led workforce development activities.
- \$250,000 per biennium in grants to community-based organizations (CBOs) to design and implement workforce development interventions such as trainings, learning collaboratives, communities of practice, and provider support lines.

These investments advance the development of OHA's Transgender Health and Wellness (TGHW) Program, supporting Oregon's statutory obligations under HB 2002 and ensuring the stability of the GAC provider network amid widespread federal hostility.

2. Why is the POP being proposed?

Federal agencies (e.g., HHS, CMS, DOJ) have issued legal and financial threats against GAC providers, causing many Oregon clinics, FQHCs and hospital systems to discontinue GAC services, severely restricting access for Trans and Gender Diverse (TGD) Oregonians. Community testimony confirms these pressures have deepened workforce shortages. HB 2002 mandates statewide access to GAC, which cannot be achieved without strengthened workforce capacity and accurate network adequacy assessments. This POP addresses these gaps by establishing expertise, staffing, and community-led workforce strategies.

Consultation

3. Who is completing this REIS?

Gender Affirming Care Policy Lead

4. Who is responsible for tracking equity outcomes? What method(s) are they using to track outcomes?

CCO Quality Assurance & Operations is responsible for tracking equity outcomes related to assessment of provider network adequacy and CBO grantee workforce development projects, supported by the proposed OPA3 position in PHD and equity SME from E&I.

Network adequacy assessment methods will include mixed methods analysis of provider availability, travel burdens, regional gaps, CBO workforce development outcomes, and monitoring provider withdrawal trends. Grant monitoring will include analysis of the number and type of organizations funded, including TGD-led, culturally specific, and organizations serving Black, Indigenous, People of Color, Tribal, rural, and other historically underserved communities, as well as how grant-funded activities contribute to workforce development, provider capacity, and equitable access to gender-affirming care.

Data collection must avoid creating identifiable registries or lists of GAC providers or patients to address community concerns about the risks of OHA holding personal health data.

5. Does your agency have a DEIB practitioner (Yes or no)?

Yes. The REIS author is a DEIB practitioner and collaborated with DEIB expert in OHA's Equity & Inclusion Division. OHA DEIB expertise was integrated with community feedback from organizations specializing in DEIB and representing marginalized racial groups.

6. Did you collaborate with your agency's data analysts, community engagement managers, outreach managers, and/or others that regularly interact with underserved and marginalized communities on this REIS? (Yes, no, or not applicable)

Yes. Worked with data analysts from Equity and Inclusion, Medicaid, and Health Policy and Analytics divisions to discuss previous attempts and challenges in network adequacy analysis and potential alternative strategies that meet analysis needs and data protection standards.

Community engagement work included collaboration with External Relation's Division Office of Community Health and Engagement (OCHE) community engagement staff to conduct statewide listening sessions in Medford, La Pine, Ontario, Corvallis, and Portland.

Community Engagement and Data

7. Identify the specific racial groups and communities that may be impacted by this POP, both directly and indirectly.
 - Racial groups and communities impacted include Transgender and Gender Diverse people in Oregon that are Black, Indigenous, Latina/o/x/e, Asian, Pacific Islander, MENA, and multiracial across the state. Impacts will be heightened in rural and Tribal communities, where GAC access is already severely limited.
 - Studies show trans women in Oregon, especially women of color, face economic and social discrimination that restricts access to affirming healthcare, even in supportive policy environments.¹ BIPOC TGD Oregonians face compounded discrimination based on race, gender identity, and poverty.²
 - Nationwide rural workforce analyses indicate fewer GAC providers in rural counties, creating heightened access barriers for TGD people living in rural areas, including those of color.³ OHA's initial GAC provider workforce report based on community engagement and input found that rural BIPOC TGD communities face the most severe workforce shortages and longest travel distances.⁴

¹ Garcia, J., Crosby, R.A. (2020) Social Determinants of Discrimination and Access to Health Care Among Transgender Women in Oregon. *Transgender Health* 5(4)

² Gray, M., Blalock, K., Kappesser, K., Corman, J., Leichtling, G. (2026) Gender-affirming care for transgender and gender-diverse youth in Oregon: trends over time, *Research Connections* 1(2) <https://doi.org/10.1093/rescon/vmag049>

³ Smith, D. (2025) Access to Healthcare for Rural Transgender Adults in the United States. *University Honors Theses*. Paper 1653.

⁴ Oregon Health Authority. (2025) Health Care Workforce Committee Gender-Affirming Care Provider Workgroup Report. <https://www.oregon.gov/oha/HPA/HP-HCW/Documents/Final-HWCF-GAC-Provider-Work-Group-Report-Feb-2025.pdf>

- Federal hostility leading to provider withdrawal disproportionately harms communities already lacking culturally responsive and geographically accessible care.
8. How did you ensure multiple perspectives were part of the decision-making process for this POP?

Extensive community engagement throughout the development of this POP included:

- Five regional listening sessions (urban and rural) with TGD community members, providers, and advocates.
- Continuous policy and feedback partnership with CBOs engaged in OHA's PRISM LGBTQ+ CBO collaborative including Basic Rights Oregon, Oregon Trans Health Coalition, Latino Network, Cascade AIDS Project, Gender Hive, PRISM, and others.
- Integration of recommendations from OHPB's Healthcare Workforce Committee (2024–2025), which included community members and subject matter experts.

Impacts and Accountability

9. If this POP is not funded, please describe which racial or ethnic communities would be most impacted and how disparities would likely persist or worsen.

If this POP is not funded, BIPOC TGD communities, especially in rural regions, will experience worsening disparities as harmful federal policies and provider withdrawals continue. Workforce gaps will deepen and culturally responsive care efforts will stall. Communities served by safety net clinics are facing the highest risk of discontinuing GAC services. Disparities would persist or worsen through:

- Continued erosion of GAC access as providers withdraw under federal pressure.
- Failure to meet HB 2002 access requirements for marginalized groups.
- Intensification of regional and racial disparities due to lack of workforce stabilization.
- Loss of community-driven workforce initiatives that build culturally and linguistically responsive care.

10. Who will be monitoring racial equity outcomes over time for this POP?

The requested OPA3 position in PHD will work with existing staff in CCO QA & Operations, and E&I Division equity staff to monitor POP racial equity outcomes.

Reporting will occur regularly to OHA leadership and the Oregon Health Policy Board

through existing workforce reporting mechanisms. CBOs will provide OHA representatives in PHD, MED, and E&I with ongoing community-informed progress updates and accountability, and will also receive regular updates from OHA on network adequacy assessment and racial equity progress outcomes.

Oregon Health Authority 2027-29 Policy Package

Division:	Public Health
Program:	Health Care Regulation and Quality Improvement (HCRQI)
Policy package title:	PH – Health Care Facility Program Restoration
Policy package number:	408
Related legislation:	LC 442

Summary statement:

This POP seeks to ensure that OHA has sufficient resources to keep people in Oregon seeking health care through the operation and oversight of multiple health-related licensing programs: ambulatory surgery centers, outpatient renal dialysis facilities, in-home care agencies, caregiver registries and non-transplant anatomical research and recovery organizations. Increased fees will be used to maintain current service levels for timely initial licensure processing, routine licensure surveys, complaint investigations, technical support services for licensees, complainants and other interested parties, Department of Justice (DOJ) consultation, and ongoing maintenance of an online licensing system. Limited resources would reduce the ability to provide technical assistance to applicants; delay investigations; and hinder the ability to provide timely response to public inquiries. These barriers exacerbate inequities by slowing the licensing process and delaying the availability of urgently needed health care services in communities that already face disparities.

Oregon Health Authority: 2027-29 Policy Package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	\$0	\$675,000	\$0	\$675,000	0	0.00

Purpose

1. What problem is OHA trying to fix or solve?

OHA is charged with ensuring health care facilities keep people seeking care in Oregon safe. This POP seeks to ensure that OHA has sufficient resources for oversight of multiple health care licensing programs: ambulatory surgery centers (ASC), outpatient renal dialysis facilities (ORDF), in home care agencies (IHCA), caregiver registries (CGR) and non-transplant anatomical research and recovery organizations (NARRO).

Fee funding for these licensing programs has remained unchanged for 10-15 years and no longer covers programs' costs and the full scope of regulatory work required to regulate and support the licensees. As a result of legislative actions, the complexities and types of health care facilities and programs regulated by HCRQI have grown substantially since 2009. While some of these legislative actions have resulted in frontline staff positions, fee revenue and other funding for management and administrative support to conduct the regulatory work is inadequate. Fees need to be increased to maintain the current service level, accounting for the increased complexity of procedures performed and services provided by these licensees, complaint investigations, and other resources needed to oversee licensees.

Oregon Health Authority: 2027-29 Policy Package

2. **What would this policy package buy and how and when would it be implemented?**

This POP allows HCRQI to increase licensing fees for ASCs, ORDFs, CGRs, IHCAs and NARROs to ensure adequate funding to support all resources needed for oversight to ensure safe and accessible health care for people in Oregon, regardless of where they live.

HCRQI is proposing to implement a fee increase to the current licensing fees that are based on number of procedure rooms for ASCs, number of patient care stations for ORDFs, and licensure levels for IHCAs. The fee increase is projected to generate \$XXX additional biennial revenue that will support unfunded program costs.

Funds will be used to maintain current service levels (timely complaint investigations, initial licensure processing, routine licensure surveys, technical support services for licensees, complainants and other interested parties), DOJ consultation, improve capacity to implement and enforce increasing regulatory requirements added to the statutes since 2009, and support ongoing maintenance of the online licensing system that will be easier to use than the current paper-based process and also provide needed information for emergency preparedness. The new fee structure will go into effect on October 1, 2027 in time for the 2028 annual license renewal.

Oregon Health Authority: 2027-29 Policy Package

3. **How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity¹ or equitable health outcomes? How does this policy package further OHA's mission and align with its strategic plan?**

The purpose of health facility licensing regulation is to ensure safe, high-quality health care for people in Oregon. This is especially important for chronically ill individuals and individuals with disabilities, who disproportionately use more health facility services, and for many historically and increasingly geographically rural underserved populations. The fee that supports ASC, ORDF and CGR licensing was last increased in 2009. Fees for IHCA's were last increased in 2017 and NARROs have not increased since the creation of the program in 2013. Limited resources for the licensing program have led to less community outreach, less timely investigations, and less assistance for individuals who speak a language other than English or experience other communication barriers. These limitations also hinder the program's efforts to assist in equitable emergency planning and disaster response, answer frequent queries from the public, and consult on regulatory solutions for health facilities that best serve community needs.

Quantifying results

4. **What are the long-term desired outcomes?**

- Safe, high-quality health care through timely routine licensing surveys and patient safety incident investigations in health facilities

¹ Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability, gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.**

Oregon Health Authority: 2027-29 Policy Package

- Timely return to compliance when health care facilities or programs do not meet set standards for patient safety
- Adequate access to care through timely initial license processing and technical assistance
- A modernized online licensing system to allow simplified license renewal, online license verification, electronic payment, reporting functions with increased transparency of health facility services and public posting of regulatory findings.
- Timely responsiveness and communication with patient populations and health care consumers, including through community-based and advocacy organizations.

5. **What are the envisioned outputs of this investment? How will OHA measure the impacts on health inequities of this policy package?**

OHA will measure process outcomes including timeliness of initial license processing, triennial inspections, and complaint investigations; customer service satisfaction for applicants and licensees; outreach presentations to community-based organizations and volume of non-English-language complaints received following increased availability of complaint intake in multiple languages.

How achieved

6. **What actions have occurred to resolve the issue prior to requesting a policy package?**

HCRQI has conducted many process improvements over the years to use existing licensing resources most efficiently, engaged with individual licensees and their representative advocacy associations related to regulatory matters to improve health facilities' ability to comply with requirements and provided FAQs and other materials for the public to clarify implementation of new rules like the surgical technician certification legislation for ASCs.

Oregon Health Authority: 2027-29 Policy Package

HCRQI has also responded to inadequate fee revenue by reducing spending whenever possible and applying fee funding from other facility types to indirectly support the work of the ASC, ORDF, IHCA, CGR and NARRO licensing programs.

To the greatest extent possible, management and staff have also reprioritized time and resources to meet expanded program workload needs including drafting communications for the public and conducting webinars with Q&A for partners and organizations representing special populations impacted by new rules and process delays.

OHA has also supported the development of the online licensing system with some limited General Funds instead of passing some of the development costs to licensees.

7. What alternatives were considered and what were the reasons for rejecting them?

The program considered several alternatives in lieu of the proposed fee increase, including:

- Imposing a limit on the type of regulatory requirements reviewed during required re-licensure and/or initial licensure surveys.
- Reducing the scope of regulatory activities performed for other types of health care facilities regulated by the program.

These were rejected because they do not meet the minimum expectations for current service level in OHA statutes and rules. Limited resources reduce the program's ability to provide outreach, education, and training to applicants; delay investigations; and hinder the program's ability to provide timely response to public inquiries. These barriers exacerbate inequities by slowing the licensing process and delaying the availability of urgently needed services in communities that already face disparities.

Oregon Health Authority: 2027-29 Policy Package

8. What other agencies, programs, community partners or stakeholders are collaborating on this policy package?

None at this time.

9. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

Yes. See the changes needed below with justifications

- Update for modernization – ORS 441.086 (2) An ambulatory surgical center shall post a notice in the facility, in a prominent place and in prominent font size, advising patients of the manner in which patients may express concerns regarding the ambulatory surgical center and services provided at the ambulatory surgical center. The posting must include but need not be limited to the address, *and* telephone number, and website for contacting the Oregon Health Authority to express the concerns.
- Update to align and clarify – ORS 441.086 (3) The authority shall adopt rules classifying ambulatory surgical centers in three categories:
 - (a) Certified ambulatory surgical centers, which must comply with federal Centers for Medicare and Medicaid Services rules, 42 C.F.R. 416 and rules adopted by the authority, and which may use deep sedation or general anesthesia;
 - (b) High complexity noncertified ambulatory surgical centers, which must comply with rules adopted by the authority and which may use deep sedation or general anesthesia; and

Oregon Health Authority: 2027-29 Policy Package

(c) Moderate complexity noncertified ambulatory surgical centers, which must comply with rules adopted by the authority and which may use only conscious sedation and analgesia.

- Update to ensure resources for extra workload related to processing of change of ownership and allow flexibility to streamline regulatory workload and allow for remote surveys for licensees, whose clients are home-based like IHCA– ORS 443.315 License required; application; rules; fees. (4) A license may be granted, or may be renewed annually, upon payment of a fee as follows: (e) For a change of ownership; (7) The authority shall conduct an on-site inspection, which may be on-site, of each in-home care agency prior to services being rendered and once every two years thereafter as a requirement for licensing.
- (8) In lieu of the on-site inspection required by subsection (7) of this section, the authority may accept a certification or accreditation from a federal agency or an accrediting body approved by the authority that the state licensing standards have been met, if the in-home care agency

10. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

None known at this time.

11. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Oregon Health Authority: 2027-29 Policy Package

Staffing and fiscal impact

Implementation date(s): October 1, 2027
End date (if applicable): NA

12. What assumptions affect the pricing of this policy package?

The pricing of this policy package was established by projecting expenditures vs. revenues needed to support current service levels and estimated increases in services and supplies.

For consideration as a possible alternative to reduce renewal fee increase: add processing fees for change of ownership and change of information, and addition/removal of service levels, procedure rooms.

13. Will there be new responsibilities for OHA and/or Shared Services? Specify which programs and describe their new responsibilities.

No.

14. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

15. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

No positions are being modified or added.

Oregon Health Authority: 2027-29 Policy Package

16. What are the start-up and one-time costs?

None.

17. What are the ongoing costs?

Staffing (including cost of living adjustments and step increases), DOJ fees, other services and supplies, cost allocation and data base maintenance.

18. What reductions will you use to offset the costs of this work and maintain budget neutrality?

Not applicable.

19. What are the sources of funding (revenue) and the funding split (GF/OF/FF) for each part of the investment as well as the offset/reduction?

Ambulatory surgery centers and outpatient renal dialysis facilities (OF/FF for surveyor positions only); in home care agencies (OF/GF by program positions); caregiver registries (CGR) and Non-Transplant Anatomical Research and Recovery Organizations (OF only).

20. What are the potential savings (above the offset to pay for the investment)?

While there is an upfront financial impact on licensees, improved technical assistance may reduce costs to licensees by providing timely reliable inspections and return to compliance resolution. The online licensing system, which requires ongoing maintenance and support, will improve annual licensure renewal, reduce initial licensing delays and costs associated for applicants to complete the process.

RACIAL EQUITY IMPACT STATEMENT (REIS) WORKSHEET: POLICY OPTION PACKAGE (POP) QUESTIONS

OHA POP #408: PH- HEALTH CARE FACILITY PROGRAM RESTORATION

Program managers responsible for the POP: Please answer the questions below for every POP being proposed in your agency request budget. To fill out this worksheet, download a copy of this worksheet and type your answers below each question.

Program Overview

1. Please describe the POP being proposed.

This POP seeks to ensure that OHA has sufficient resources for oversight of multiple licensing programs: ambulatory surgery centers (ASC), outpatient renal dialysis facilities (ORDF), in home care agencies (IHCA), caregiver registries (CGR) and non-transplant anatomical research and recovery organizations (NARRO). These programs help keep people seeking health care in Oregon.

2. Why is the POP being proposed?

Funding for these licensing programs has remained unchanged for 10-15 years and no longer covers programs' costs and the full scope of regulatory work required to regulate and support the licensees. As a result of legislative actions, the complexities and types of health care facilities and programs regulated by HCRQI have grown substantially since 2009. While some of these legislative actions have resulted in frontline staff positions, fee revenue and other funding for management and administrative support to conduct the regulatory work is inadequate. Fees need to be increased to maintain the current service level, accounting for the increased complexity of procedures performed and services provided by these licensees, complaint investigations, and other resources needed to oversee licensees.

Consultation

3. Who is completing this REIS?

Health Care Regulation and Quality Improvement (HCRQI), Section Manager

4. Who is responsible for tracking equity outcomes? What method(s) are they using to track outcomes?

Not applicable.

5. Does your agency have a DEIB practitioner (Yes or no)? Yes.

- a. If yes, describe how you collaborated with them on this REIS.
- b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

HCRQI used extensive equity-related feedback from previous health care regulatory program rulemakings to complete the REIS.

6. Did you collaborate with your agency's data analysts, community engagement managers, outreach managers, and/or others that regularly interact with underserved and marginalized communities on this REIS? (Yes, no, or not applicable) Not applicable.

- a. If yes, describe how you collaborated with them on this REIS.
- b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

HCRQI accounts for needs to serve all people in Oregon in its work, including its fee requests. As HCRQI identifies community-specific needs through its work such as health facility complaints, operational improvements are made as feasible to address those needs. Examples include improving operations to add complaint intake forms in more languages, ensuring that HCRQI staff are trained in how to access interpreters as requested for complaint intake and increasing capacity to offer public webinars and other outreach related to new rules for specific populations. For example, there is a requirement for hospitals to allow to individuals with disabilities access to their support persons while receiving care.

Community Engagement and Data -Identify the specific racial groups and communities that may be impacted by this POP, both directly and indirectly. In your answer, include responses to the following questions: The purpose of health facility licensing regulation is

to ensure safe, high-quality health care for all people in Oregon. This is especially important for chronically ill individuals and individuals with disabilities, who are often from historically underserved racial groups, and disproportionately use more health facility services. We also know from limited health care resources, as well as health care facility services changes and closures, rural communities are often underserved.

c. How did you identify these impacted groups?

- See response above

d. What data are you using to validate your assessment? If possible, use outreach and engagement feedback to gather information and insight.

e. If possible, disaggregate the data by race, ethnicity, geography, income level, and other relevant characteristics. If disaggregated data is not available, please describe why.

HCRQI's licensing systems do not collect REALD/SOGI data about health facility owners, patients, or clients.

f. How are communities impacted by this POP? What are the disproportionate impacts? Please be specific.

- Safe, high-quality health care through timely routine licensing surveys and patient safety incident investigations in health facilities
- Timely return to compliance when health care facilities or programs do not meet set standards for patient safety
- Adequate access to care through timely initial license processing and technical assistance
- A modernized online licensing system to allow simplified license renewal, online license verification, electronic payment, reporting functions with increased transparency of health facility services and public posting of regulatory findings.
- Timely responsiveness and communication with patient populations and health care consumers, including through community-based and advocacy organizations.

7. How did you ensure multiple perspectives were part of the decision-making process for this POP? In your answer, include responses to the following questions:

a. Identify how you have or are planning to engage multiple perspectives and impacted groups to provide feedback on this POP (e.g. program design, budget, policy decisions, etc.). Please give specific examples.

HCRQI will be engaging the various partners affected by the proposed fee increases.

- b. If community engagement is not part of your approach, please explain why and what you did instead to incorporate community perspectives. In your response, describe the following: the decision-making process used to determine engagement was not feasible or appropriate, the specific barriers (beyond general time or capacity), and how you mitigated the risk of missing community input (e.g. using existing feedback, partnering with trusted organizations, review from advisory bodies, etc.).

Impacts and Accountability

8. If this POP is not funded, please describe the following:

- a. Which racial or ethnic communities would be most impacted.

All communities and populations in Oregon are affected if OHA is unable to continue to adequately ensure the health and safety of patients seeking health care.

- b. How disparities would likely persist or worsen.

Since people from historically underserved populations and communities are disproportionately affected by many chronic conditions, the disparities in those groups are likely to persist or worsen.

9. Who will be monitoring racial equity outcomes over time for this POP?

- a. How will progress be reported?
- b. How will leadership be informed of equity impacts?
- c. How will the community be involved in monitoring outcomes?

HCRQI will continue to report issues related to the health care facilities and programs it regulates to OHA leadership. The further downstream equity impacts are likely to emerge through other OHA programs which are responsible for tracking health outcomes.

Oregon Health Authority 2027-29 Policy Package

Division:	Health Policy & Analytics Health Policy
Program:	Health Care Market Oversight (HCMO) Program
Policy package title:	HCMO Program Restoration
Policy package number:	409
Related legislation:	ORS 415.500 et seq

Summary statement:	Requests General Fund to support the Oregon Health Authority’s (OHA) administration of the Health Care Market Oversight (HCMO) program in the 2027-29 biennium. Through the HCMO program, OHA reviews and approves health care consolidation in Oregon, ensuring that health care mergers and acquisitions support statewide goals related to cost, quality, access, and equity. Without this policy package to support the HCMO program, health care in Oregon could become more consolidated, resulting in higher prices without improved quality, and access issues, particularly for low-income communities, rural communities, and communities of color. This POP requests funds to cover HCMO program costs that are not covered by fee revenue, including staff, DOJ costs, and required community engagement efforts.
---------------------------	--

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	\$1,932,126	\$700,933	\$0	\$2,633,059	4	4.00

Oregon Health Authority: 2027-29 Policy Package

Purpose

1. What problem is OHA trying to fix or solve?

In Oregon and nationwide, health care consolidation has become increasingly common, resulting in more markets being dominated by large, national companies and fewer independent and local health care providers. Research shows that when health care entities combine, it can lead to higher prices without improving quality or health outcomes. Health care consolidation can affect access to care, particularly for low-income communities, communities of color and rural communities.

The Health Care Market Oversight (HCMO) program is a legislatively mandated program (per ORS 415.500 et seq.) charged with reviewing proposed mergers and acquisitions that involve health care entities, including hospitals, health insurance companies, and provider groups, to see how they could affect market consolidation and competition, access to care, quality of care, health care costs, and health equity. The HCMO program aims to ensure that health care consolidation in Oregon supports statewide goals related to health equity, lower costs, increased access, and better quality.

HCMO is currently unfunded, other than collecting fees from entities subject to review, and the fees are not sufficient to support the costs of running the program. The number of HCMO transactions that require review; the statutorily required one-, two-, and five-year follow-up reviews; and the associated legal costs are increasing.

2. What would this policy package buy and how and when would it be implemented?

Program implementation began in 2022 after the passage of HB 2362 in 2021. The POP provides funding for the ongoing, legislatively mandated work.

Oregon Health Authority: 2027-29 Policy Package

HCMO has an updated fee schedule effective July 1, 2026, which will hopefully reduce but not eliminate the funding shortfall. Additionally, not all of the required HCMO program activities can be covered by fee revenue, and fee revenue is dependent on the number, timing, and type of transactions subject to review. The policy package would provide General Fund in the 2027-2029 biennium to cover HCMO program costs that will not be covered by fee revenue, including staff, DOJ costs, and required community engagement efforts.

HCMO has four permanent positions and to ensure capacity to conduct HCMO reviews, additional capacity has been bought on via unbudgeted limited duration staff positions and internal rotations. The policy package increases position authority to 8 positions, which reflects the current staffing. DOJ supports, including staff counsel, and contracted SAAG firms to provide additional capacity when needed, are already in place. The POP provides funding to maintain current capacity that will not be covered by fee revenue.

Any fees the program collects in the 2027-29 biennium will be used to offset General Fund budgeted to cover program expenses.

3. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity¹ or equitable health outcomes? How does this policy package further OHA's mission and align with its strategic plan?

¹ Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability, gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.**

Oregon Health Authority: 2027-29 Policy Package

HCMO does not just focus on cost and market impact of health care consolidation; it also has an explicit focus on equity in its rules and statute. Equity is a core component of all transaction analyses and reviews, and the program supports robust public and community engagement. HCMO processes require health care entities to consider the health equity implications of their actions. Moreover, OHA may not approve transactions that are likely to have a negative impact on health equity, which positions HCMO as an effective initiative to improve health equity over the long term in Oregon.

Without this POP to support the HCMO program, health care in Oregon could become more consolidated, resulting in higher prices without improved quality, and access issues, particularly for low-income communities, rural communities, and communities of color.

HCMO supports OHA's strategic goal to strengthen access to affordable care for all by ensuring 100% of people in Oregon have easy access to affordable health care, prioritizing communities disproportionately harmed by racism, discrimination, and other forms of oppression. Implementing and enforcing Oregon's HCMO program is a key activity in OHA's Strategic Plan. The HCMO program aims to ensure that health care consolidation in Oregon supports statewide goals related to health equity, lower costs, increased access, and better quality.

Quantifying results

4. What are the long-term desired outcomes?

The desired long-term outcome of this program is a more equitable health care system with competitive markets that support affordable prices and access to essential services. The program seeks to deter health care corporations from creating monopolies and anti-competitive markets.

Oregon Health Authority: 2027-29 Policy Package

5. What are the envisioned outputs of this investment? How will OHA measure the impacts on health inequities of this policy package?

For each transaction review, OHA measures quality outcomes and access to care, stratified by community and patient demographics, including race, ethnicity, age group, gender, and geography, as available. OHA also examines community engagement and availability of equity-enhancing services. For each approved transaction, OHA also conducts one-, two-, and five-year follow-up reviews, for an opportunity to understand what has happened since the transaction closed, as well as compliance with and the impact of any conditions OHA imposed.

How achieved

6. What actions have occurred to resolve the issue prior to requesting a policy package?

The HCMO program launched March 1, 2022. The program waived fees for the first nine months of operations in response to public and partner input. HCMO began collecting fees for transaction reviews on January 1, 2023 as directed in statute. However, because the volume and timing of reviews is unpredictable, and because not all of HCMO's statutorily required work is currently covered by fees, General Fund is needed to cover program expenses.

OHA requested POPs for the 2023-2025 and 2025-2027 biennia that included General Fund to support this program. General Fund was not provided, and HCMO is currently unfunded other than fee revenue.

HCMO conducted administrative rulemaking in 2025-2026, which included updating its fee schedule to better cover the costs of operating the program; the updated fee schedule is effective July 1, 2026,

Oregon Health Authority: 2027-29 Policy Package

which will hopefully reduce but not eliminate the funding shortfall. As noted above, this is because not all required HCMO program activities can be covered by fee revenue, and fee revenue is dependent on the number, timing, and type of transactions subject to review. Any fees the program collects in the 2027-29 biennium will be used to offset General Fund budgeted to cover program expenses.

7. What alternatives were considered and what were the reasons for rejecting them?

As part of the administrative rulemaking process, OHA considered various options for increasing the fee schedule to better cover the cost of the program; rules advisory committee members and entities subject to HCMO review strenuously objected to major changes to the fee schedule and OHA determined that the fee schedule could not be raised further (beyond the fee schedule that will be effective July 1, 2026) at this time without causing significant disruption. OHA will continue to revisit the fee schedule in future years to determine how much of program operating costs are being covered. Also, OHA continues to look at ways to streamline program operations and achieve additional efficiencies in conducting statutorily required transaction reviews and follow-up reviews.

8. What other agencies, programs, community partners or stakeholders are collaborating on this policy package?

No other agencies or programs are collaborating on this policy package.

9. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No. This policy package would not require any changes to ORS 415.500 et seq, HCMO's governing statute.

Oregon Health Authority: 2027-29 Policy Package

10. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

OHA partners with the Department of Consumer and Business Services (DCBS) and the Department of Justice (DOJ) to align regulatory oversight of reviewing proposed health care transactions. This policy package would allow for continued partnership. Local and tribal governments would not be directly affected by this policy package.

11. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Staffing and fiscal impact

Implementation date(s): July 1, 2027

End date (if applicable): Ongoing

12. What assumptions affect the pricing of this policy package?

OHA's current fee schedule for transaction reviews; OHA's updated fee schedule for transaction reviews (effective July 1, 2026); any fees the program collects in the 2027-29 biennium will be used to offset General Fund budgeted to cover program expenses.

Oregon Health Authority: 2027-29 Policy Package

13. Will there be new responsibilities for OHA and/or Shared Services? Specify which programs and describe their new responsibilities.

No. OHA is already responsible for operating the Health Care Market Oversight program.

14. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No. Not applicable.

15. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

HCMO currently has four permanent positions and to ensure capacity to conduct HCMO reviews, additional capacity has been brought on via unbudgeted limited duration staff positions and internal rotations. This staff has reviewed more than 52 transactions in the last 2.5 years, and has a duty to complete one, two, and five-year follow-ups. The policy package increases position authority to 8 permanent positions (reflecting the current staff in place).

Current permanent positions

- Two Operations & Policy Analyst 4 (OPA4) positions to lead and oversee program policies and processes, transaction reviews, follow-up reviews, administration, community engagement and health equity efforts, etc.
- Two Research Analyst 4 (RA4) positions to analyze data and support transaction review analyses.

Oregon Health Authority: 2027-29 Policy Package

New permanent positions

- One Operations & Policy Analyst 4 (OPA4) position to lead and oversee program policies and processes, transaction reviews, follow-up reviews, administration, community engagement and health equity efforts, etc.
- One Operations & Policy Analyst 3 (OPA3) position to support program administration, operations, vendor contracting, invoicing, rulemaking, etc.
- Two Operations & Policy Analyst 2 (OPA2) positions to support ongoing transaction reviews, follow-up reviews, and community engagement efforts.

DOJ supports, including staff counsel, and contracted SAAG firms to provide additional capacity when needed, are already in place. The POP provides funding to maintain current capacity that will not be covered by fee revenue.

16. What are the start-up and one-time costs?

Not applicable.

17. What are the ongoing costs?

Ongoing costs include resources to support staffing, services, and supports. This includes the standard services and supplies for the four new permanent positions.

Additional services and supports include funds for public engagement and DOJ support. All transaction reviews will have a public engagement process and comprehensive reviews may convene a community review board. This policy package would provide \$135,000 General Fund to support public engagement

Oregon Health Authority: 2027-29 Policy Package

activities, including translation, interpretation, and outreach, as well as compensation for qualifying community review board members, as required by House Bill 2992 (2021). This policy package also includes \$1,200,000 General Fund for ongoing necessary support from DOJ to review transaction decisions, contested case hearings and other appeal processes, assist with pre-filing technical assistance, support rules updates, and other legal questions related to operating and enforcing this regulatory program.

18. What reductions will you use to offset the costs of this work and maintain budget neutrality?

This POP maintains budget neutrality by fully offsetting the requested investment through the savings and reductions included in POP 415: OHA Savings and Reductions.

19. What are the sources of funding (revenue) and the funding split (GF/OF/FF) for each part of the investment as well as the offset/reduction?

Permanent positions are funded 20% General Fund and 80% Other Funds from HCMO fee revenue. Public Engagement and DOJ legal support is funded 100% General Fund.

20. What are the potential savings (above the offset to pay for the investment)?

Any fees the program collects in the 2027-29 biennium will be used to offset General Fund budgeted to cover program expenses.

Oregon Health Authority: 2027-29 Policy Package

RACIAL EQUITY IMPACT STATEMENT (REIS) WORKSHEET: POLICY OPTION PACKAGE (POP) QUESTIONS

OHA POP # 409: HCMO PROGRAM RESTORATION

Program managers responsible for the POP: Please answer the questions below for every POP being proposed in your agency request budget. To fill out this worksheet, download a copy of this worksheet and type your answers below each question.

Program Overview

1. Please describe the POP being proposed.

Through the legislatively mandated Health Care Market Oversight (HCMO) program, OHA reviews and approves health care consolidation in Oregon, ensuring that health care mergers and acquisitions support statewide goals related to cost, quality, access, and equity. This POP requests General Fund to cover the Oregon Health Authority's administration of the HCMO program costs that are not covered by fee revenue in the 2027-2029 biennium, including staff, DOJ costs, and required community engagement efforts

2. Why is the POP being proposed?

The POP is necessary for the program to fulfill its legislative mandates and statutory obligations. This is because the HCMO program is currently unfunded other than collecting fees from entities subject to review, and the fees are not sufficient to support the costs of running the program; moreover, the number of HCMO transactions that require review; the statutorily required one-, two-, and five-year follow-up reviews; and the associated legal costs are increasing.

Consultation

3. Who is completing this REIS?

HPA Cost Programs Manager

4. Who is responsible for tracking equity outcomes? What method(s) are they using to track outcomes?

For each transaction review, OHA's HCMO Program measures quality outcomes and access to care, stratified by community and patient demographics, including race, ethnicity, age group, gender, and geography, as available. The Program also

examines community engagement and availability of equity-enhancing services. For each approved transaction, OHA conducts one-, two-, and five-year follow-up reviews, for an opportunity to understand what has happened since the transaction closed, as well as compliance with and the impact of any conditions OHA imposed. Methods vary by transaction.

The HCMO program is overseen by Executive Sponsors from the OHA Leadership Team, including the Health Policy and Analytics Division Director.

5. Does your agency have a DEIB practitioner (Yes or no)?
- a. If yes, describe how you collaborated with them on this REIS.
 - b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

Yes, the HPA Equity Team.

The POP is to fund an existing program and ongoing work; OHA is not proposing any programmatic changes and so did not separately seek equity expertise or community input. Instead, the HCMO program, which includes data analysts as well as policy staff who conduct community and partner engagement, relied on the ongoing feedback it receives about the program from community partners, interested parties, consumer advocates, health care entities subject to HCMO review and others throughout transaction reviews and administrative rulemaking processes.

6. Did you collaborate with your agency's data analysts, community engagement managers, outreach managers, and/or others that regularly interact with underserved and marginalized communities on this REIS? (Yes, no, or not applicable). NO
- a. If yes, describe how you collaborated with them on this REIS.
 - b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

The response is the same as question 5. The POP is to fund an existing

program and ongoing work; OHA is not proposing any programmatic changes and so did not separately seek equity expertise or community input. Instead, the HCMO program, which includes data analysts as well as policy staff who conduct community and partner engagement, relied on the ongoing feedback it receives about the program from community partners, interested parties, consumer advocates, health care entities subject to HCMO review and others throughout transaction reviews and administrative rulemaking processes.

Community Engagement and Data

7. Identify the specific racial groups and communities that may be impacted by this POP, both directly and indirectly. In your answer, include responses to the following questions:
 - a. How did you identify these impacted groups?
 - b. What data are you using to validate your assessment? If possible, use outreach and engagement feedback to gather information and insight.
 - c. If possible, disaggregate the data by race, ethnicity, geography, income level, and other relevant characteristics. If disaggregated data is not available, please describe why.
 - d. How are communities impacted by this POP? What are the disproportionate impacts? Please be specific.

The POP is to fund an existing program and ongoing work; OHA is not proposing any new programmatic changes that would affect any specific racial groups and communities. However, please see the response to question nine for the racial and equity impacts of not funding this POP.

8. How did you ensure multiple perspectives were part of the decision-making process for this POP? In your answer, include responses to the following questions:
 - a. Identify how you have or are planning to engage multiple perspectives and impacted groups to provide feedback on this POP (e.g. program design, budget, policy decisions, etc.). Please give specific examples.
 - b. If community engagement is not part of your approach, please explain why and what you did instead to incorporate community perspectives. In your response, describe the following: the decision-making process used to

determine engagement was not feasible or appropriate, the specific barriers (beyond general time or capacity), and how you mitigated the risk of missing community input (e.g. using existing feedback, partnering with trusted organizations, review from advisory bodies, etc.).

The POP is to fund an existing, legislatively mandated program and ongoing work; OHA is not proposing any programmatic changes and so did not conduct separate community engagement related to the POP. OHA has received ongoing feedback about the program from community partners, interested parties, consumer advocates, health care entities subject to HCMO review and others throughout transaction reviews and administrative rulemaking processes.

Impacts and Accountability

9. If this POP is not funded, please describe the following:

- a. Which racial or ethnic communities would be most impacted.
- b. How disparities would likely persist or worsen.

Through the HCMO program, OHA reviews and approves health care mergers and acquisitions in Oregon, ensuring that health care transactions support statewide goals related to cost, quality, access, and equity. HCMO does not just focus on cost and market impact of health care consolidation; equity is a core component of all transaction analyses and reviews, and the program supports robust public and community engagement. Without this POP to support the HCMO program, health care in Oregon could become more consolidated, resulting in higher prices without improved quality, and access issues, particularly for low-income communities, rural communities, and communities of color.

Which communities may be most impacted and which disparities may worsen will be dependent on which transactions are proposed by various health care entities over time.

10. Who will be monitoring racial equity outcomes over time for this POP?

- a. How will progress be reported?
- b. How will leadership be informed of equity impacts?
- c. How will the community be involved in monitoring outcomes?

For each transaction review, OHA measures quality outcomes and access to care, stratified by community and patient demographics, including race, ethnicity, age group, gender, and geography, as available. OHA also examines community engagement and availability of equity-enhancing services. For each approved transaction, OHA also conducts one-, two-, and five-year follow-up reviews, for an opportunity to understand what has happened since the transaction closed, as well as compliance with and the impact of any conditions OHA imposed.

For each transaction review and follow-up review, OHA posts information online, including public-facing information provided by health care entities subject to review and OHA's analyses and findings. Additionally, OHA invites public comment and notifies the public of the opportunity to provide input.

Oregon Health Authority 2027-29 Policy Package

Division:	Medicaid
Program:	Medicaid Enterprise System (MES) Modernization
Policy package title:	Health Systems Integration Platform
Policy package number:	410
Related legislation:	Not applicable

Summary statement:

Federal CMS guidance requires a modular approach to Medicaid IT modernization. This POP keeps Oregon aligned through acquisition of a System Integration Platform, a central transit hub for Medicaid system interfaces allowing OHA and ODHS to more rapidly modernize Medicaid systems. It also funds procurement planning for three future modules: an MMIS data warehouse, a care management module, and a provider enrollment module. In 2025, Oregon's federal partners opened an inquiry into the MES Modernization Program's lack of progress. Failure to comply risks losing enhanced federal funding, estimated at \$254 million per biennium.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	\$2,436,382	\$3,425,520	\$21,927,826	\$27,789,728	12	9.00

Oregon Health Authority: 2027-29 Policy Package

Purpose

1. What problem is OHA trying to fix or solve?

Oregon Medicaid, Oregon Health Plan (OHP), programs rely on legacy Information Technology (IT) systems-- including the Medicaid Management Information System (MMIS)--that are outdated, segregated, and lack standardized technology and cohesive data flow. These fragmented systems create barriers to care for Oregon's Medicaid members resulting in delayed claims processing, limited data sharing across providers, and an inability to rapidly adopt new technology solutions that could improve care coordination and health outcomes. The rigid, high-maintenance nature of these systems also constrains OHA/ODHS operational capacity, diverting resources away from program improvements that directly benefit members.

Federal CMS guidance requires states to follow a modular approach to Medicaid IT System modernization. A module is a collection of software designed for exceptional performance in one major functional area. Failure to comply risks Oregon losing access to enhanced federal funding, a full loss of which is estimated to increase state budget costs by \$254 million per biennium. Oregon's federal partners have already initiated an active inquiry into the Medicaid Modernization Program's lack of progress on modular software modernization activities, underscoring the urgency of this investment.

Module planning activities must be scoped and sequenced in alignment with the System Integration (SI) Platform's integration architecture to ensure that they can be effectively onboarded as the SI Platform becomes operational. This POP funds the design and implementation of the SI Platform which will act a central transit hub for Medicaid system interfaces allowing OHA and ODHS to more rapidly modernize Medicaid systems, as well as the planning work that is the necessary next step in that sequence.

Oregon Health Authority: 2027-29 Policy Package

2. What would this policy package buy and how and when would it be implemented?

Funding in support of Medicaid Enterprise Systems (MES) Modernization would enable:

- Acquisition of a system's integration technology platform from a **Systems Integration (SI) vendor** which will ensure Medicaid systems will be interoperable via integration and modernization.
- Permanent positions to provide technical expertise to support oversight of the SI vendors' activities and management of the vendor relationship.
- Permanent positions to support planning and subsequent project activities for future modernization efforts such as a Medicaid Management Information System (MMIS) data warehouse, Provider Enrollment and Care Management.
- Strategic Advisor services in support of module planning activities.
- Continued use of **Independent Quality Management Services (IQMS)** to support oversight of SI vendor platform work, and long-term modernization of Medicaid Systems.
- Procurement planning efforts to:
 - Gather system requirements for subsequent modules (to be solicited and procured in the 2029-2031 biennium).
 - Identify the specific permanent positions needed to support modernization.
- A Procurement Specialist position for the Office of Contracts and Procurement to support amendments to the SI vendor contract, support contracts and additional procurements resulting from planning activities.
- A vendor to provide Organizational Change Management (OCM) services.

This project will procure a third-party vendor to develop and implement a System Integration Platform (SIP), which will serve as the central transit hub for all 120+ known Medicaid Management Information System (MMIS) interfaces. The SIP will be designed and implemented in conformance with the OHA/ODHS Technical Reference Architecture (TRA), which establishes enterprise-wide integration

Oregon Health Authority: 2027-29 Policy Package

patterns, open standards, data governance requirements, and Zero Trust security controls for the Medicaid Ecosystem. Interface migration will follow a risk-stratified, prioritized sequence developed collaboratively with the vendor, with the Agency retaining architectural ownership of the integration layer.

Once implemented, the System Integration Platform will lower the cost to the agency for system changes related to orchestration or automation. The platform will create a technology-neutral "plug and play" framework that will allow OHA and ODHS to more rapidly modernize legacy solutions, avoid duplicative development across departments, and remain aligned with federal modernization requirements through the procurement of modular software solutions.

This POP also funds planning activities in preparation for the procurement of three modules. For each module, planning activities will produce initial scope and requirements documents, state and federal funding documentation, and foundational project materials including a project charter and business case. Effective module procurement requires substantial upfront investment in planning. Each module pursued requires extensive internal research, including documentation gathering, identification of interested parties, system mapping, and requirements development, as well as external research in the form of market analysis, review of peer state experiences, and vendor engagement through Requests for Information (RFI). Planning activities will ensure that new modules integrate cleanly with existing systems without creating data duplication or authority conflicts.

Contracted services will be used to support planning activities including market research, peer state outreach, RFI development, and the preparation of solicitation documents. The strategic advisor will work in close coordination with state staff and will operate within the governance structure established under the Technical Reference Architecture (TRA), including the Technology Standards Board (TSB) and Program Technical Design Council (PTDC). These bodies are responsible for ensuring that planning

Oregon Health Authority: 2027-29 Policy Package

outputs and eventual procurement requirements align with TRA standards, enterprise integration patterns, and the Agency's broader modernization roadmap.

MES Modernization will be implemented according to the following timeline:

Year	2026			2027				2028				2029	
Quarter	2	3	4	1	2	3	4	1	2	3	4	1	2

Oregon Health Authority: 2027-29 Policy Package

3. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity¹ or equitable health outcomes? How does this policy package further OHA's mission and align with its strategic plan?

This investment in modernizing Medicaid Enterprise Systems addresses barriers to achieving and measuring equitable health outcomes for Oregon Health Plan members who face disparities based on race, ethnicity, language, disability, and geography. OHA has set a goal to eliminate health inequities in Oregon by 2030. Achieving that goal requires reliable, integrated data infrastructure to identify where disparities exist and track whether interventions are working.

Fragmented legacy systems currently limit OHA's ability to consistently collect and analyze data across race, ethnicity, language, and disability (REALD) and sexual orientation and gender identity (SOGI) categories at the population level. The System Integration Platform will standardize data exchange across enterprise systems, supporting more consistent REALD/SOGI data collection across OHP programs and enabling focused analysis of disparities by population group and geography. An integrated platform also reduces manual, inconsistent data entry, lowering barriers to timely care coordination for impacted populations including members in behavioral health, Health Related Social Needs (HRSN), and long-term services and support programs.

Progress made in the MES Modernization program will enable the achievement of goals, strategies and actions identified in the ODHS|OHA Strategic Technology Plan 2024-2027, including:

¹ Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability, gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.**

Oregon Health Authority: 2027-29 Policy Package

- **Goal 2: Strengthen Cybersecurity, Risk and Privacy.** The SIP will implement Zero Trust security controls and enforce enterprise-wide data governance requirements across the Medicaid ecosystem, directly advancing the STP strategy to improve security and privacy posture.
- **Goal 3: Accelerate Technology Modernization.** The SIP is explicitly named in the STP project portfolio. This investment fulfills the STP strategy to modernize legacy IT systems and share technology solutions across OHA and ODHS.
- **Goal 4: Increase Data Insight.** Standardizing integration across 120+ MMIS interfaces creates the foundation for consistent, unduplicated, and accessible data, advancing the STP strategy to connect systems through standardized approaches and improve how information is organized and delivered.
- **Goal 5: Optimize Technology Management.** The governance structure established under the TRA, including the TSB and PTDC, centers technology decisions on equity and inclusion, advancing the STP strategy to enhance communication and partnerships across enterprise systems.

Quantifying results

4. What are the long-term desired outcomes?

The long-term desired outcome of this and subsequent investments are a fully modernized and modular Medicaid system that can rapidly conform to changing business needs. This project will upgrade key information technology systems at OHA and ODHS, allowing agency staff and providers to access and use information to better serve patients and improve care coordination for impacted populations. The System Integration Platform will reduce fragmented clinical, social and demographic data to identify and address disparities. This will ensure that OHA and ODHS technology systems can seamlessly support advancing health policies to reduce inequities.

Oregon Health Authority: 2027-29 Policy Package

This investment is the first in a series of steps toward achieving this outcome. It will position OHA and ODHS to invest in critical technologies in future biennia as well as support OHA and ODHS in organizing the needs and wants of Medicaid enterprise programs.

5. What are the envisioned outputs of this investment? How will OHA measure the impacts on health inequities of this policy package?

The major output of this investment is the acquisition of a SI Platform. This will serve as a central transit hub for Medicaid system interfaces and allow OHA and ODHS to modernize the technological infrastructure supporting Medicaid systems. Measuring the health equity impacts of an IT infrastructure investment requires a phased approach, as the platform must be operational before outcome-level data can be attributed to it. OHA will track impact at two levels.

At the output level, OHA will monitor the proportion of MES Modernization procurements and implementation initiatives that include health equity-based Key Performance Indicators in their contracts and project charters. This will be tracked by OHA program staff in coordination with the IQMS vendor and reported through the program's existing governance structure.

At the data infrastructure level, OHA will measure progress in standardizing REALD and SOGI data fields across interfaces integrated into the System Integration Platform. Consistent REALD/SOGI data across OHP systems is a prerequisite for population-level disparity analysis. Baseline data availability will be established during the SIP vendor's discovery and design phase, with integration milestones tracked against the master integration plan.

Oregon Health Authority: 2027-29 Policy Package

Longer-term outcome measurements, such as changes in care coordination rates or disparity gaps for specific populations, will be addressed in subsequent module POPs as those capabilities are built.

How achieved

6. What actions have occurred to resolve the issue prior to requesting a policy package?

To learn more about pivoting from a non-modular to modular solution, OHA has:

- An Analysis and Recommendation Report in 2021, identifying the case for system modernization
- Completed a Medicaid Information Technology Architecture (MITA) Self-Assessment Report and Modernization Roadmap Development in 2022, establishing the Agency's architectural maturity baseline
- Completed a Business Outcome Report in 2023, quantifying the operational and health system benefits of a System Integration Platform
- Engaged in outreach efforts to over a dozen states pursuing System Integration Platforms in 2023–2024, incorporating peer state experience into Oregon's planning approach
- Developed Technical Reference Architecture (TRA) in 2024, establishing enterprise-wide integration standards, security requirements, and data governance expectations that will govern the System Integration Platform and all future modules
- Interviewed other states to learn from their efforts to modernize Medicaid systems and increase interoperability.
- Engaged business partners and continue to work closely with the Equity & Inclusion Division to ensure program strategy remains in alignment with that program's continued work efforts.

Oregon Health Authority: 2027-29 Policy Package

- Hired a team to support the modernization of MES and is advocating for services and tools that are specifically designed to standardize data that facilitates a focused response to eliminating health inequities.
- Completed a Request for Information (RFI) to assess market availability for System Integration vendors, received scope validation and gathered preliminary pricing for this effort. This RFI received 18 responses indicating a highly competitive market.
- Procured interface mapping services from integration support vendors (NTT Data and Resource Data) to develop interface control documents for the 120+ MMIS interfaces that will be integrated into the System Integration Platform (SIP). This preparation work is vital to ensure that the System Integration Platform vendor base can provide informed proposals for the requested work.
- Procured Independent Quality Management Services (IQMS) from Public Knowledge for the System Integration Platform Project.
- Drafted a Request for Proposal (RFP) in April 2026 to hire a SIP vendor. The RFP is expected to be posted in Q3 of 2026. The SIP vendor will complete discovery and design work culminating in the development of a master integration plan. The master integration plan will cover the platform development and interface integration schedule which is anticipated to be completed in phases. It is projected that much of this work will occur during the '27-'29 Biennium.

This body of work has positioned Oregon to move from planning into implementation. The System Integration Platform is the necessary foundation upon which future modules, focused on an MMIS data warehouse, care management and provider enrollment will be built. Funding this project is the next essential step in improving the systems that Oregon's Medicaid members, providers, and partners depend on.

Oregon Health Authority: 2027-29 Policy Package

7. What alternatives were considered and what were the reasons for rejecting them?

The following alternatives were considered for MES Modernization:

Alternative 1: OHA does not modularize its Medicaid Management Information System (MMIS) (Status Quo)

The existing MMIS system is built on legacy technology and lack of progress towards modernization and modularization is causing Oregon to be out of compliance with CMS modernization mandates. Selecting this option was not considered as it would jeopardize enhanced Federal funding for Medicaid programs (a potential loss of \$254 million per biennium), thus dramatically increasing the cost of continued operation of existing Medicaid systems. Failure to modernize poses a significant risk to the fulfillment of Agency operational objectives and strategic goals and would act as a barrier to providing a continued level of service to members. This would severely impact populations throughout the State who rely on OHA and ODHS benefits and would increase inequities among populations that experience historical and contemporary marginalization and barriers to healthcare.

- In 2025, CMS put in an inquiry on Oregon's lack of progress regarding the modernization of Medicaid systems. There is a significant risk to continued non-compliance with the CMS modularity mandate which could result in the loss of federal enhanced funding (\$254 million per biennium) described earlier in this Policy Option Package and the following CMS Memos:
 - CMS Modularity Final Rule²

² <https://www.medicaid.gov/federal-policy-guidance/downloads/smd16010.pdf>

Oregon Health Authority: 2027-29 Policy Package

- CMCS Informational Bulletin on Modularity Compliance³
- Eventually reprocurring a monolithic system will not support the increasing needs of the Oregon Health Plan due to lack of integration and reusability. The procurement method would be much less efficient due to the volume of requirements needed to support a full MMIS versus a modularized procurement.
- There would likely be significant reduction in competition resulting in less options to the state and higher costs due to the limited number of vendors that can support the MMIS legacy system.

Alternative 2: OHA modularizes its MMIS and seeks to reuse tools for other needs within the broader Medicaid Enterprise System (MES) (Recommended)

Selecting this option avoids the potential loss of federal enhanced funding, helping Oregon avoid a cost increase of \$254 million dollars in the upcoming biennium.

This option modernizes and modularizes Oregon's Medicaid software systems (principally MMIS) using a phased approach supported by 3rd party vendors along with an in-house oversight and support team. Investments in modernizing Oregon's Medicaid software ecosystem would leverage federal funding to support planning and the subsequent design, development and implementation of technology tools to meet the needs of OHA and ODHS, their partners, and Oregon Medicaid recipients. This alternative

³ <https://www.medicaid.gov/federal-policy-guidance/downloads/cib052423.pdf>

Oregon Health Authority: 2027-29 Policy Package

would provide an opportunity for several vendors to bid on portions of the Medicaid ecosystem based on their common business functions.

Planning for Medicaid Module solicitations is a necessary next step which will enable the implementation of subsequent software modernization packages. It is the pursuit and implementation of these modules that will show our federal partners that Oregon has a long-term vision for this federally required program.

8. What other agencies, programs, community partners or interested parties are collaborating on this policy package?

ODHS is a key collaborator on this initiative as the department operates several Medicaid programs that depend on the same enterprise systems. CMS is OHA's primary federal partner in this work, providing both the compliance mandate and the enhanced federal funding structure that makes this investment possible. CMS has been engaged throughout the planning process and will be engaged through the Advance Planning Document (APD) approval process for this POP.

The Office of Contracts and Procurement (OC&P) is a direct operational collaborator; this POP includes a dedicated Procurement and Contract Specialist position within OC&P to support SI vendor contract amendments and subsequent module procurements.

OHA's Equity and Inclusion Division has been engaged in program strategy development and will continue to provide guidance on equity-centered planning and implementation.

Oregon Health Authority: 2027-29 Policy Package

Pursuant to OHA's Tribal Consultation Policy, the Nine Federally Recognized Tribes of Oregon are interested parties in this initiative, and OHA will conduct tribal consultation consistent with its commitment and obligations.

9. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

10. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Medicaid Enterprise Systems (MES) Modernization will affect how the Medicaid program operates. Pursuant to OHA's Tribal Consultation Policy, these represent Critical Events subject to consultation. OHA will ensure inclusion of Tribes in the planning and implementation of these policies and will initiate and conduct consultation in response to Critical Events.

11. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Staffing and fiscal impact

Implementation date(s): The program will initiate platform development activities and interface integrations after Policy Option Package approval.

Oregon Health Authority: 2027-29 Policy Package

End date (if applicable): To be determined

12. What assumptions affect the pricing of this policy package?

- Medicaid Enterprise System governance processes have been established at the state level.
- IQMS costs have been estimated at 10% of the design, development and implementation (DDI) effort.
- CMS approves Modernization Program timeline as submitted through the required federal review process.
- CMS approves the Advance Planning Document (APD) for this initiative, qualifying project expenditures for the 90% enhanced federal match for DDI activities.
- Federal enhanced match is 90% for DDI activities.
- Cost estimates remain in alignment with market research and historical data.

13. Will there be new responsibilities for OHA and/or Shared Services? Specify which programs and describe their new responsibilities.

This policy package establishes new contract oversight and administration responsibilities for OHA. The program will manage at minimum three active vendor relationships during the 2027-29 biennium: the System Integration Platform vendor, the IQMS vendor, and the OCM vendor. These responsibilities include deliverable review, contract compliance monitoring, invoice approval, and change order management.

The 12 new positions requested in this POP are the mechanism for fulfilling these responsibilities. No additional responsibilities beyond those covered by the requested positions are anticipated for Shared Services at this time.

Oregon Health Authority: 2027-29 Policy Package

14. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No direct change to caseload for 2027-29 biennium

15. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

Effort	Position	New
SI Platform	OCM Analyst (OPA 4)	Yes
	Solution Architect (ISS8)	Yes
	Interface Architect (ISS8)	Yes
	Data Architect (ISS8)	Yes
	Procurement Contract Specialist (PCS 3)	Yes
	Service Delivery Manager (ITM1)	Yes
	Technical Manager (ITM1)	Yes
Planning	Project Manager 2 (PM2)	Yes
	Project Manager 3 (PM3)	Yes
	Solution Architect (ISS8)	Yes
	Data Architect (ISS8)	Yes
	Business Technical Analyst (OPA3)	Yes

Oregon Health Authority: 2027-29 Policy Package

System Integration Platform Staffing

The positions described here will be dedicated to supporting the SI Platform project through all phases until the system receives CMS certification and moves into Maintenance & Operations. These positions are required to maintain progress, uphold quality standards, and manage evolving demands effectively with full alignment to project objectives. This investment in staffing stability is critical to achieving the project's anticipated outcomes and delivering long term value.

- **Program Organizational Change Management Analyst:**
 - **Job focus:** People and process. Ensure staff, partners, and interested parties are prepared for changes to workflows, policies, and responsibilities.
 - **Detailed description:** The OPA4 Program Organizational Change Management (OCM) Analyst role focuses on overseeing and guiding an external OCM vendor to ensure alignment with OHA and ODHS strategic goals, interested party needs, and regulatory requirements. The analyst acts as a bridge between internal leadership, program teams, and the program vendors, ensuring that change management activities are effective, coordinated, and measurable. The OCM analyst provides day-to-day oversight of the OCM vendor, ensuring deliverables meet contractual requirements, timelines, and quality standards. The OCM analyst reviews and recommends approval or rejection of vendor-produced artifacts to the contract administrator. The OCM analyst's primary focus will be on the System Integration Platform (SIP) vendor but will transition to supporting other module projects as appropriate.
- **Program System Integration Platform Solution Architect:**
 - **Job Focus:** Overall technical design. This position ensures the vendor builds a system that matches Agency needs, complies with rules, and can grow over time.

Oregon Health Authority: 2027-29 Policy Package

- **Detailed Description:** The ISS8 Solution Architect provides technical oversight for the SIP vendor supporting OHA's MES Modernization Program. This role is responsible for ensuring that the SIP vendor delivers a solution aligned with OHA and ODHS enterprise architecture, Medicaid business needs, and state and federal compliance requirements. The solution architect serves as the primary technical authority for the integration platform, acting as a liaison between OHA and ODHS leadership, program teams, and the SIP vendor. The role ensures that vendor designs, implementations, and operations adhere to established standards and support long-term sustainability and extensibility of OHA and ODHS systems. The solution architect provides oversight of the System Integration Platform vendor, ensuring deliverables meet contractual, technical, and quality expectations.
- **Program System Integration Platform Interface Architect:**
 - **Job Focus:** How multiple systems connect and talk to each other. This position oversees systems interactions and focuses on integration pathways, Application Programming Interfaces (APIs), security, and ensuring every system exchanges data correctly.
 - **Detailed Description:** The ISS8 Interface Architect provides vendor oversight, expert consultation to management and professional IS staff in interface development and integration. The Interface Architect is responsible for the oversight of SIP vendor design and implementation of system-to-system integrations across the SIP. This role ensures that interfaces between disparate applications, agencies, and external partners are scalable, secure, and aligned with contract requirements and enterprise architecture standards. The interface architect is responsible for assisting in the definition and implementation of standards and best practices for interactions between systems interfacing with the SIP. The interface architect plays a critical role in enabling

Oregon Health Authority: 2027-29 Policy Package

interoperability across state systems by providing expert consultation on integration patterns, data exchange standards, and API strategies.

- **Program System Integration Platform Data Architect:**

- **Job Focus:** How data is structured, stored, moved and protected. This position oversees *data architecture, storage, transfer, and security, ensuring the platform uses data efficiently, securely, and in ways that support reporting and analytics.*
- **Detailed Description:** The ISS8 Data Architect will provide oversight on the implementation of the MES SI platform, ensuring optimal data storage, integration, and retrieval solutions tailored to agency needs. This position will collaborate closely with IT and business team to architect data systems supporting efficient data analysis and reporting. Key responsibilities include developing data models, overseeing data migration, and establishing data governance policies to maintain data integrity and security. The data architect will identify, recommend and support strategic goals and objectives for managing the information architecture domain and its data in support of the MES Mod Program.

- **Program Procurement and Contract Specialist 3:**

- **Job Focus:** Business and legal aspects of how technology is procured. This position ensures contracts, solicitations, and agreements are timely, compliant, accurate, and support program goals.
- **Detailed Description:** This position provides direct procurement support for the Oregon Medicaid Enterprise Systems Modernization (MES Mod) program via the Office of Contracts and Procurement to support procurement of technology system modules. Contract and procurement specialists negotiate and develop solicitations, contracts, intergovernmental and grant agreements that comply with all federal and state laws,

Oregon Health Authority: 2027-29 Policy Package

Oregon administrative rules, agency policies and procedures, and other established criteria. This position consults with professional and technical program staff in determining the most appropriate procurement method to meet program procurement needs. This role provides technical assistance to program staff by interpreting and clarifying contract and solicitation rules and guidelines. This position provides contracting and purchasing advice and guidance. This position assists program staff in planning and developing solicitation, contracting, and agreement preparation for new IT supply and services acquisitions.

- **Program Service Delivery Manager:**

- **Job Focus:** Business-side delivery. This position *coordinates people, tasks, schedules, and communication across agency teams and vendors to keep business operations aligned and on track. Serves as a bridge between technical teams, vendor and business staff.*
- **Detailed Description:** The ITM 1 Service Delivery Manager coordinates and manages program business staff, assigning tasks to staff members, monitoring progress and ensuring satisfactory completion of assigned work. The service delivery manager coordinates across multiple vendors, agencies, and interested parties to ensure healthy and effective collaboration between all parties. The service delivery manager is responsible for keeping the program director, project managers and business team up to date on the status of business initiatives and providing transparency into program performance, funding utilization, and business risks. The service delivery manager partners with project and program management to define business scope, estimates, and schedules for program initiatives. The service delivery manager maintains communication with vendor business management to ensure proper oversight and effective

Oregon Health Authority: 2027-29 Policy Package

communication between vendor and state business staff. The service delivery manager, in collaboration with the project direction and project manager, monitors issues, risks, and change requests. This position provides a business perspective on day-to-day project decisions and has a primary responsibility to resolve business policy issues and questions in alignment with program governance standards.

- **Program Technical Manager:**

- **Job Focus:** Technology-side delivery. This position ensures the technical teams' work stays coordinated, on schedule, and aligned with technical standards and decisions.
- **Detailed Description:** The ITM1 Technical Manager coordinates and manages program technical staff, assigning tasks to staff members, monitoring progress and ensuring satisfactory completion of assigned work. The technical manager coordinates across multiple vendors, agencies, and interested party groups to ensure healthy and effective collaboration between all parties. The technical manager is responsible for keeping the program director, project managers and technical team up to date on the status of technical initiatives. The technical manager partners with project and program management to define technical scope, estimates, and schedules for program initiatives. The technical manager maintains communication with vendor technical management to ensure proper oversight and effective communication between vendor and state technical staff. The technical manager, in collaboration with the project direction and project manager, monitors issues, risks, and change requests. This position provides a technical perspective on day-to-day project decisions and has a primary responsibility to resolve technology policy issues and questions in alignment with program governance standards.

Oregon Health Authority: 2027-29 Policy Package

Planning Efforts Staffing

Positions described in this section will be integral in shaping project scope, requirements, and strategic direction. As each project transitions from planning into execution, the assigned staff will continue in their roles through project completion, providing continuity, reducing onboarding time, and preserving institutional knowledge. This approach ensures that each project benefits from personnel who are deeply familiar with its history, decisions, and objectives, ultimately strengthening overall project outcomes and operational efficiency.

- **Program Planning Project Manager PM2:**
 - **Job Focus:** Day-to-day coordination of planning activities. This position ensures tasks, schedules, and communications move forward effectively and help the Senior IT Project Manager effectively handle the workload for multiple projects.
 - **Detailed Description:** The PM2 Project Manager is responsible for working with a senior project manager to assist in overseeing the planning and execution of specialized projects within a defined timeframe. This role involves helping the senior project manager coordinate resources, manage timelines, and ensure deliverables meet quality standards. The project manager collaborates closely with partners to define project scopes and objectives, facilitating effective communication throughout the project lifecycle. The person in this position will collaborate closely with partners to define project scopes and objectives, facilitating effective communication throughout the planning project lifecycle which is expected to conclude during the 2027-2029 biennium.
- **Program Planning Senior Project Manager PM3:**

Oregon Health Authority: 2027-29 Policy Package

- **Job Focus:** Leading and controlling the planning process. This position manages schedules, risks, budgets, and interested party coordination to ensure planning work is completed accurately and on time.
- **Detailed Description:** The PM3 Senior Project Manager will be responsible for developing and managing the execution of planning project plans, budgets, schedules, controls, tracking and managing risks and issues. The senior project manager works with divisions, partners and external entities representatives to ensure that they clearly understand project tasks, activities, and deliverables. They monitor progress on tasks and develop methods for helping team members work through the various project related issues. The senior project manager facilitates communication with project members and interested parties, prepares status reports and ensures that scope control is maintained. The individual in this position will collaborate closely with partners to define project scopes and objectives, facilitating effective communication throughout the planning project lifecycle which is expected to conclude during the 2027-2029 biennium.
- **Program Planning Solution Architect:**
 - **Job Focus:** Overall technical design. In planning, this role ensures that architecture, scope, and requirements align with enterprise standards and will work within the broader systems environment. As projects move into execution, this position ensures the vendor builds a system that matches Agency needs, complies with rules, and can grow over time.
 - **Detailed Description:** The ISS8 Program Planning Solution Architect provides technical oversight for the module solutions being pursued as part of the planning efforts. This role is responsible for ensuring that module scope and requirements align with OHA and ODHS enterprise architecture, Medicaid business needs, and state and federal compliance requirements. The solution architect serves as the primary technical

Oregon Health Authority: 2027-29 Policy Package

authority for the modules, acting as a liaison between OHA and ODHS leadership, program teams, and the technical team. This role ensures that resulting scope and requirements documentation align to established standards and support long-term sustainability and extensibility of OHA and ODHS systems. The solution architect will continue to act as a primary technical consultant for modules which move out of planning and into projects. The solution architect will ensure resulting vendor deliverables meet contractual, technical, and quality expectations through the project to which they are assigned.

- **Program Planning Data Architect:**

- **Job Focus:** Data in future modules. This position ensures attention to detail about how data is structured, stored, moved and protected, as well as how it is governed during planning for the program's data warehouse and other upcoming modules. As projects move from planning into execution, this position ensures the modules use data efficiently, securely, and in ways that support reporting and analytics.
- **Detailed Description:** The ISS8 Data Architect will provide consultation on data topics for module planning initiatives with a primary focus on the planning for the programs data warehouse project. The data architect will ensure that market research and subsequent scope and requirements documentation focuses on developing optimal data storage, integration, and retrieval solutions tailored to agency needs. This position will collaborate closely with IT and business team to architect data systems supporting efficient data analysis and reporting. Key responsibilities include developing data models, overseeing data migration, and establishing data governance policies to maintain data integrity and security. The data architect will identify, recommend and support strategic goals and

Oregon Health Authority: 2027-29 Policy Package

objectives for managing the information architecture domain and its data in support of the MES Mod Program with a primary focus on the program's data warehouse.

- **Program Planning Business Technical Analyst OPA3:**
 - **Job Focus:** Technical requirements and testing. This position translates business needs into clear technical requirements and planning documentation and prepares for acceptance testing of future module projects. As projects move into execution, this position will work with vendors and interested parties to ensure that modules are tested thoroughly to ensure functionality, security, and that the system meets the documented requirements.
 - **Detailed Description:** The OPA3 Business Technical Analyst is responsible for assisting IT management and customer organizations with collection and analysis of business requirements, including the design of new software and technology applications. The business technical analyst will manage workgroups of customers, managers, and partners to develop long and short-range operational plans to accomplish goals and objectives. This position collaborates on scope of work, Request for Proposals (RFPs), and work specifications. This position manages requirements verification and validation activities. This position develops user acceptance testing strategies, test plans and test cases. This position will lead acceptance testing efforts and report outcomes on projects that result from these planning efforts. This position provides contract administration support and advises program leadership on project change control and risk management.

16. What are the start-up and one-time costs?

This is an initial System Integration Platform design and implementation POP which also includes future module planning efforts. More accurate pricing for system integration implementation and maintenance

Oregon Health Authority: 2027-29 Policy Package

costs will be available when a system integration vendor is chosen under the ongoing procurement process. For systems covered under planning efforts, implementation costs along with ongoing maintenance may be requested in future biennia.

17. What are the ongoing costs?

Staffing costs.

Operations and management of modules including licensing costs, will be known once the software solution is selected and a contract is negotiated.

18. What reductions will you use to offset the costs of this work and maintain budget neutrality?

Federal CMS guidance requires states to follow a modular approach to Medicaid IT modernization. Failure to comply risks Oregon losing access to enhanced federal funding, a full loss of which is estimated to increase state budget costs by \$254 million per biennium. In 2025, Oregon's federal partners initiated an inquiry into the MES Modernization Program's lack of progress on modular software modernization activities. As cited in Section 7, Alternative 1 above, approving this Policy Option Package will eliminate the possibility of losing enhanced federal funding, allowing Oregon to remain budget neutral.

19. What are the sources of funding (revenue) and the funding split (GF/OF/FF) for each part of the investment as well as the offset/reduction?

The work described within this Policy Option Package would be funded using enhanced federal matching funds from the Centers of Medicare and Medicaid at 90/10 with the State of Oregon providing the remaining 10% of funds via this request.

Oregon Health Authority: 2027-29 Policy Package

20. What are the potential savings (above the offset to pay for the investment)?

This policy package is designed to bring Oregon into compliance with federal rules and regulations. If the program continues to operate out of compliance, there can be risk of losing enhanced federal funding for the maintenance of Medicaid IT Systems. The current estimated impact of this funding loss is \$254M per biennium. The results of this project are expected to create technology and architecture standards, improve procurement timelines and eliminate duplicative acquisitions, all of which will reduce the cost of future Medicaid investments.

Oregon Health Authority: 2027-29 Policy Package

Fiscal Detail

One-time costs							
	General Fund	Lottery Funds	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Medicaid	\$ 2,106,325	\$ -	\$ -	\$ 18,957,313	\$ 21,063,638	-	0.00

RACIAL EQUITY IMPACT STATEMENT (REIS) WORKSHEET: POLICY OPTION PACKAGE (POP) QUESTIONS

OHA POP 410: HEALTH SYSTEMS INTEGRATION PLATFORM

Program managers responsible for the POP: Please answer the questions below for every POP being proposed in your agency request budget. To fill out this worksheet, download a copy of this worksheet and type your answers below each question.

Health Systems Integration Platform POP Program Overview

1. Please describe the POP being proposed.

Through the acquisition of a System Integration Platform, this investment allows Oregon to remain aligned with federal modernization requirements and avoid the loss of enhanced funding. This platform will act as a central transit hub for Medicaid system interfaces allowing OHA and ODHS to more rapidly modernize Medicaid Systems in alignment with federal modularity requirements. This investment would also fund procurement planning activities for three future Medicaid modernization modules: an MMIS data warehouse for integration of fragmented claims, clinical and eligibility data; a care management module; and a provider enrollment module.

2. Why is the POP being proposed?

Federal Centers for Medicare and Medicaid Services (CMS) guidance requires states to follow a modular approach to Medicaid IT modernization. Failure to comply risks Oregon losing access to enhanced federal funding, a full loss of which is estimated to increase state budget costs by \$254 million per biennium. In 2025, Oregon's federal partners initiated an inquiry into the Medicaid Enterprise System (MES) Modernization Program's lack of progress on modular software modernization activities, underscoring the urgency of this investment.

This investment in modernizing Medicaid Enterprise Systems addresses barriers to achieving and measuring equitable health outcomes for Oregon Health Plan (OHP) members who face disparities based on race, ethnicity, language, disability, and geography. OHA has set a goal to eliminate health inequities in Oregon by 2030. Achieving that goal requires reliable, integrated data infrastructure to identify where disparities exist and track whether interventions are working.

Fragmented legacy systems currently limit OHA's ability to consistently collect and analyze data across race, ethnicity, language, and disability (REALD) and sexual orientation and gender identity (SOGI) categories at the population level. The System Integration Platform will standardize data exchange across enterprise systems, supporting more consistent REALD&SOGI data collection across OHP programs and enabling targeted analysis of disparities by population group and geography. An integrated platform also reduces manual, inconsistent data entry, lowering barriers to timely care coordination for vulnerable populations including members in behavioral health, HRSN (Health Related Social Needs), and long-term services and support programs.

Consultation

3. Who is completing this REIS?

MES Program Director

4. Who is responsible for tracking equity outcomes? What method(s) are they using to track outcomes?

The responsibility for tracking equity outcomes is going to be shared across multiple groups. The MES Mod program will work with DEIB practitioner, the DEIB practitioner's support staff, the E&I Division: and the program's vendor partner to determine equity measures and reporting metrics. Equity metrics and KPIs will be created in alignment with requirements outlined in the E&I equity plan. The DEIB Practitioner and programs sponsors will be accountable for approving equity measures and ensuring that equity goals are met. Business owners and program areas will monitor the outcomes for specific populations and services. The MES Mod program is going to define Key performance indicators (KPI) during the design and planning phase of project in collaboration with vendor partners and Equity & Inclusion staff.

5. Does your agency have a DEIB practitioner (Yes or no)?

- a. If yes, describe how you collaborated with them on this REIS.**
- b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).**

Yes. Steve Nakana is OHA's DEIB practitioner. His division has several staff with expertise in this field who will support this effort on his behalf.

DEIB practitioner's representatives Maria Elena Castro and Kweku Wilson have been involved in the development of this REIS. Whenever possible, throughout the life of this program, the DEIB practitioner and its representatives will be involved in program activities when subject matter expertise and engagement is sought through outreach efforts.

6. Did you collaborate with your agency's data analysts, community engagement managers, outreach managers, and/or others that regularly interact with underserved and marginalized communities on this REIS? (Yes, no, or not applicable)

- a. If yes, describe how you collaborated with them on this REIS.
- b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

Yes, we are engaging with the DEIB practitioner and their representatives through meetings and document sharing to ensure that their input is provided throughout the POP process. The REIS community engagement and expertise provide vital information that will be used to inform program strategy, which includes this Policy Option Package.

Community Engagement and Data

7. Identify the specific racial groups and communities that may be impacted by this POP, both directly and indirectly. In your answer, include responses to the following questions:

- a. How did you identify these impacted groups?
- b. What data are you using to validate your assessment? If possible, use outreach and engagement feedback to gather information and insight.
- c. If possible, disaggregate the data by race, ethnicity, geography, income level, and other relevant characteristics. If disaggregated data is not available, please describe why.

d. How are communities impacted by this POP? What are the disproportionate impacts? Please be specific.

The MES Modernization program, in collaboration with a Strategic Advisor (NTT Data) completed a series of outreach efforts. These efforts included meetings and surveys to 120+ interested parties to identify pain points associated with Medicaid programs.

The resulting product was a recommendations report that includes a list of the top pain points found as a result of these survey and outreach sessions. The MES Modernization program includes these pain points in the overall assessment of which software modernization efforts to prioritize as part of the program's development roadmap.

At this time the program does not have enough data to know which communities are most strongly impacted by the lack of software modernization. As mentioned below in our answer to question 10, we hope to be able to gather this information via the implementation of a System Integration Platform and associated data warehouse planning efforts. Consistent REALD&SOGI data across OHP systems is a prerequisite for population-level disparity analysis. Baseline data availability will be established during the System Integration Platform (SIP) vendor's discovery and design phase, with integration milestones tracked against the master integration plan.

8. How did you ensure multiple perspectives were part of the decision-making process for this POP? In your answer, include responses to the following questions:

- a. Identify how you have or are planning to engage multiple perspectives and impacted groups to provide feedback on this POP (e.g. program design, budget, policy decisions, etc.). Please give specific examples.**
- b. If community engagement is not part of your approach, please explain why and what you did instead to incorporate community perspectives. In your response, describe the following: the decision-making process used to determine engagement was not feasible or appropriate, the specific barriers (beyond general time or capacity), and how you mitigated the risk of missing community input (e.g. using existing**

feedback, partnering with trusted organizations, review from advisory bodies, etc.).

The MES Modernization program, working with a strategic advisor, interviewed 120+ internal OHA and ODHS partners to identify pain points across Medicaid programs. The resulting recommendations report informs which modernization efforts the program prioritizes on its development roadmap, ensuring that the perspectives of staff who work directly with members and providers shape program design and sequencing.

Pursuant to OHA's Tribal Consultation Policy, the Nine Federally Recognized Tribes of Oregon are impacted communities in this initiative. MES Modernization activities represent Critical Events subject to consultation, and OHA will initiate and conduct consultation with Tribes throughout planning and implementation.

OHA's Equity and Inclusion Division has been engaged in program strategy development and will continue to provide guidance on equity-centered planning and implementation. ODHS is a key collaborator, as the department operates several Medicaid programs that depend on the same enterprise systems. CMS, OHA's primary federal partner, has been engaged throughout the planning process and will continue to be engaged through the APD approval process.

The MES Mod program is planning to hire an Organization Change Management (OCM) vendor partner. This vendor partner will play a critical role, incorporating multiple perspectives from all impacted groups to ensure that program initiatives can achieve equitable outcomes. OCM will provide the structured approach and outline the engagement strategies needed to understand impacted group needs, reduce resistance and drive adoption.

Broader member and community-level engagement will occur during module-level planning, where member and provider facing capabilities are designed and community input can directly shape requirements and outcome measures.

Impacts and Accountability

9. If this POP is not funded, please describe the following:

- a. Which racial or ethnic communities would be most impacted.**
- b. How disparities would likely persist or worsen.**

The existing MMIS system is built on legacy technology and lack of progress towards modernization and modularization places Oregon out of compliance with CMS

modernization mandates. Not funding this POP could jeopardize enhanced Federal funding for Medicaid programs, a potential loss of \$254 million per biennium, dramatically increasing the cost of continued operation of existing Medicaid systems. Because the State legislature has recently invested in expanding coverage, a loss of anticipated Federal dollars could prevent the execution of new programs and reduce the level of service provided to members.

As noted in question 7, the program does not yet have disaggregated data identifying which communities are most strongly impacted by the lack of software modernization; building that data capability is itself a goal of this investment. What is known is that the populations most dependent on OHA and ODHS benefits would bear the greatest impact of a funding loss, including OHP members who experience disparities based on race, ethnicity, language, disability, and geography, and members in behavioral health, HRSN, and long-term services and supports programs. Without modernization, fragmented systems would continue to limit consistent REALD & SOGI data collection, leaving OHA unable to reliably identify where disparities exist or measure whether interventions are working. Disparities would likely persist or worsen through two channels: reduced program funding and the continued absence of the data infrastructure needed to target and track equity interventions.

10. Who will be monitoring racial equity outcomes over time for this POP?

- a. How will progress be reported?**
- b. How will leadership be informed of equity impacts?**
- c. How will the community be involved in monitoring outcomes?**

Measuring the health equity impacts of an IT infrastructure investment requires a phased approach, as the platform must be operational before outcome-level data can be attributed to it.

OHA will measure progress in standardizing REALD & SOGI data fields across interfaces as they are integrated into the System Integration Platform. Baseline data availability will be established during the SIP vendor's discovery and design phase through a close partnership between the project development and REALD & SOGI teams to establish, refine, and validate the applicable data standards and field definitions. Standardization progress will be tracked as integration milestones within the master integration plan.

Progress will be reported through the program's existing governance structure, providing regular visibility to OHA and ODHS leadership.

Community involvement in monitoring outcomes will begin at the module level. This POP funds integration infrastructure and planning; the member and provider facing capabilities through which equity outcomes can be measured, such as improvements in care coordination and provider enrollment, will be built through subsequent module investments. Those module POPs will define outcome measures, including changes in care coordination rates and disparity gaps for specific populations, and will incorporate community input in their design and monitoring.

Oregon Health Authority 2027-29 Policy Package

Division:	Agency Operations
Program:	Human Resources
Policy package title:	Human Resources Workforce Capacity
Policy package number:	411
Related legislation:	N/A

Summary statement:	Human Resources works as critical infrastructure to ensure that candidates who will best serve populations most harmed by health inequities have no barriers to entry into our organization and upon entry have a more meaningful, mission centered, value aligned onboarding experience and supported learning through professional development courses, reflecting our commitment to equity and anti-racism. It is also imperative that the workforce receive all the benefits and supportive services needed in a timely and culturally responsive manner. This POP provides for permanent positions for currently non-budget positions to continue current service levels.
---------------------------	---

	General Fund	Lottery Funds	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	\$ 4,443,167	\$ 9,039	\$ 517,015	\$ 1,063,584	\$ 6,032,805	19	19.00

Oregon Health Authority: 2027-29 Policy Package

Purpose

1. What problem is OHA trying to fix or solve?

This policy option package is to make permanent 19 non-budgeted positions in Human Resources (HR) that currently serve the day-to-day needs of OHA. In order for HR to maintain its doors-open-and-lights-on service levels to OHA business lines, we need these positions so that we may serve the agency's growing, changing, and diverse needs at our current level. We need more staff to step up to the service demands; however, these positions would provide stability moving forward and allow for continuity of services to continue at their current level.

2. What would this policy package buy and how and when would it be implemented?

This POP buys sustained service level delivery, specifically to Classification & Compensation reviews, Learning & Development services, Family Medical Leave Act (FMLA)/Oregon Family Leave Act (OFLA) and American with Disabilities Act (ADA) services. OHA currently has (2) Learning & Development Specialist 2 positions permanently allotted to deliver training, and this is woefully inadequate to serve an organization of approximately 6,000 FTE. In Classification & Compensation, we do not have the permanent staffing capacity to critically review classification and compensation requests and also analyze policies and practices to address barriers to entry (such as minimum qualifications), analyzing and describing lived experience in the context of our current classification system. Additionally, there is inadequate permanent project management resources within HR to take on critical projects and initiatives to help ensure a diverse, viable, and vibrant workforce to serve Oregonians. Without a permanent staffing solution, we will continue to be out of compliance in meeting legal timeliness standards in the administration of much needed FMLA/OFLA benefits to our staff. The Family Medical Leave Act and Bureau of Labor and Industries (BOLI) require employers to respond to employees within 5 business days of request to determine that leave may for a qualifying

Oregon Health Authority: 2027-29 Policy Package

purpose, be given. With the number of inquiries and our current staffing levels we are often out of compliance. The addition of Paid Leave Oregon, has further burdened an already overly strained team. Additionally, we are requesting permanent positions in support of the interactive ADA process to provide for more timely and supportive services through this sensitive process. Long response times in these processes causes additional stress to people who are facing difficult and life altering medical situations as they seek these benefits.

3. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity¹ or equitable health outcomes? How does this policy package further OHA's mission and align with its strategic plan?

As HR is a support to all OHA staff, our policy package is all about creating a more skilled, better equipped, and healthy workforce to serve populations impacted by health inequities. We work as critical infrastructure to ensure that candidates who will best serve populations impacted by health inequities have no barriers to entry into our organization. That once they are here, we are providing them with a meaningful, mission centered, value aligned onboarding experience, that we continue to support their learning through professional development courses that reflect our commitment to equity and antiracism. And that they receive all the benefits and supportive services that they need in a timely and culturally appropriate manner. All the positions in this policy package will work directly to contribute to our employees' ability to delivery on eliminating health inequities by 2030.

¹ Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability, gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.**

Oregon Health Authority: 2027-29 Policy Package

Quantifying results

4. What are the long-term desired outcomes?

One goal of this POP is to create a functioning Learning & Development team that will contribute directly to knowledge, capacity, and skill building of staff and, together, we will work toward our goal of eliminating health inequities and to become an actively antiracist organization. As a supportive arm of the organization, our success is measured and tied to the overall success of the organization. We can measure the success of our training program in terms of knowledge transfer and the meeting of learning objectives; however, the true test of success is how our staff are performing in their service to Oregonians, especially in service to those who impacted most by health inequities.

Another goal is to create capacity for Classification and Compensation policy work and workforce project management such that we can deliver on valued added changes for our employees and managers. Critically evaluating HR policies and practices in terms of equity and antiracism and then implementing improvement projects to shape our current and future workforce to meet the demands of eliminating health inequities by 2030.

5. What are the envisioned outputs of this investment? How will OHA measure the impacts on health inequities of this policy package?

While impacts on health inequities by this policy package may not be seen in a direct, one-to-one impact measure, as a supportive service to employee learning and well-being this POP will have an impact on our staff's ability to successfully fulfill their duties and work. This supportive, behind-the-scenes work is still critically important in goal attainment. Only through a diverse, engaged, well-trained workforce will we reach our goal to eliminate health inequities, this POP can play a significant role in creating such a workforce.

Oregon Health Authority: 2027-29 Policy Package

How achieved

6. What actions have occurred to resolve the issue prior to requesting a policy package?

We have worked to streamline processes so that we eliminate redundancies, waste, and increase efficiency. This has been helpful and created better cycle times in many cases; however, the volume of work cannot be addressed by process improvement efforts alone as we lack the number of HR professional to FTE ratio needed for a productive and responsive HR shop for an agency this size.

7. What alternatives were considered and what were the reasons for rejecting them?

We considered purchasing all training solutions for professional, leadership, and management development in the market through vendors. However, this is not a cost-effective solution, and it is much more costly to contract for these services. Outsourcing is also not a meaningful solution for management and leadership development as having tailored, specific training for OHA in these areas provides for the most meaningful, applicable, and relevant training for staff.

8. What other agencies, programs, community partners or stakeholders are collaborating on this policy package?

We are working with OHA's Office of Equity and Inclusion.

9. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

Oregon Health Authority: 2027-29 Policy Package

10. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

None.

11. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Staffing and fiscal impact

Implementation date(s): Upon receipt

End date (if applicable): Not applicable

12. What assumptions affect the pricing of this policy package?

This assumes an ongoing FMLA/OFLA and Paid Leave Oregon use rate for OHA staff.

13. Will there be new responsibilities for OHA and/or Shared Services? Specify which programs and describe their new responsibilities.

No.

14. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

Oregon Health Authority: 2027-29 Policy Package

15. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

- (1) HR Manager 3
- (1) Training Manager 3
- (1) HR Manager 1
- (2) Executive Support Specialist 2
- (1) Project Manager 3
- (5) HR Analyst 3
- (2) HR Analyst 2
- (3) HR Analyst 1
- (1) Operations & Policy Analyst 3
- (1) Program Analyst 3
- (2) Learning & Development Specialist 2

16. What are the start-up and one-time costs?

Not applicable.

17. What are the ongoing costs?

Ongoing budgeted costs for permanent positions.

Oregon Health Authority: 2027-29 Policy Package

18. What reductions will you use to offset the costs of this work and maintain budget neutrality?

This POP maintains budget neutrality by fully offsetting the requested investment through the savings and reductions included in POP 415: OHA Savings and Reductions.

19. What are the sources of funding (revenue) and the funding split (GF/OF/FF) for each part of the investment as well as the offset/reduction?

General Fund 74%, Lottery Funds <1%, Other Funds 9%, Federal Funds 18%. The Lottery, Other and Federal Funds are all cost allocated funds from agency sources.

20. What are the potential savings (above the offset to pay for the investment)?

While difficult to quantify, the potential savings associated with a well-trained workforce should not be overlooked. Permanent staff reduce the need to hire limited-duration employees or temporarily reassign and backfill existing positions. This approach also improves retention and reduces turnover, lowering costs for the organization over time. Hiring, training and bringing new staff up to speed in a highly complex organization such as OHA takes time and resources and is a costly endeavor. Lowering that turnover with permanent positions saves money, creates continuity, consistency, and builds institutional knowledge that provides many benefits to the agency.

RACIAL EQUITY IMPACT STATEMENT (REIS) WORKSHEET: POLICY OPTION PACKAGE (POP) QUESTIONS

OHA POP #411: HR WORKFORCE CAPACITY

Program managers responsible for the POP: Please answer the questions below for every POP being proposed in your agency request budget. To fill out this worksheet, download a copy of this worksheet and type your answers below each question.

Program Overview

1. Please describe the POP being proposed.

This POP provides for permanent positions for currently non-budget positions to continue current service levels.

Human Resources works as critical infrastructure to ensure that candidates who will best serve populations most harmed by health inequities have no barriers to entry into our organization and upon entry have a more meaningful, mission centered, value aligned onboarding experience and supported learning through professional development courses, reflecting our commitment to equity and anti-racism. It is also imperative that the workforce receive all the benefits and supportive services needed in a timely and culturally responsive manner.

2. Why is the POP being proposed?

This policy option package is to make permanent 19 non-budgeted positions in Human Resources (HR) that currently serve the day-to-day needs of OHA. In order for HR to maintain its doors-open-and-lights-on service levels to OHA business lines, we need these positions so that we may serve the agency's growing, changing, and diverse needs at our current level. Arguably, we need more staff to step up to the service demands; however, these positions would provide stability moving forward and allow for continuity of services to continue at their current level.

Consultation

3. Who is completing this REIS?

OHA HR Director

4. Who is responsible for tracking equity outcomes? What method(s) are they using to track outcomes?

HR's Data Analytics team tracks for equity outcomes broadly across the OHA enterprise. And each division is also responsible for tracking equity outcomes at their programmatic level. Results will be shared with the DEIB practitioner for consultation and consideration of ongoing changes to better reflect and improve the experience of employees at OHA. The methods to track outcomes will include quantitative data assessing of aspects of the employee lifecycle, such as recruitment pools, hiring, promotions, as well as investigations, turnover, employee engagement, and others. Qualitative data in which feedback from staff is gathered (such as Employee Engagement Survey) will serve as the basis for assessment of current practices and future changes as needed based on employee experience.

5. Does your agency have a DEIB practitioner (Yes or no)?

Yes,

- a. If yes, describe how you collaborated with them on this REIS.
- b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

As an internal service provider, we work closely with Executive Leadership and our Equity & Inclusion (E&I) partners in all facets of work. We have broad support from leaders and E&I partners to strengthen our HR workforce to ensure that we continue to deliver on our current service delivery levels for which this POP would provide.

6. Did you collaborate with your agency's data analysts, community engagement managers, outreach managers, and/or others that regularly interact with underserved and marginalized communities on this REIS? (Yes, no, or not applicable)

- a. If yes, describe how you collaborated with them on this REIS.

Not Applicable

- b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

Not Applicable

Community Engagement and Data

- 7. Identify the specific racial groups and communities that may be impacted by this POP, both directly and indirectly. In your answer, include responses to the following questions:
 - a. How did you identify these impacted groups?

OHA has a diverse workforce that will be impacted by this POP. OHA's workforce is reflective of the ever-changing population of those that we serve throughout Oregon.
 - b. What data are you using to validate your assessment? If possible, use outreach and engagement feedback to gather information and insight.
 - c. If possible, disaggregate the data by race, ethnicity, geography, income level, and other relevant characteristics. If disaggregated data is not available, please describe why.

Health Operations Demographics

How are communities impacted by this POP? What are the disproportionate impacts? Please be specific.

OHA staff are the specific community that is impacted by this POP.

8. How did you ensure multiple perspectives were part of the decision-making process for this POP? In your answer, include responses to the following questions:

- a. Identify how you have or are planning to engage multiple perspectives and impacted groups to provide feedback on this POP (e.g. program design, budget, policy decisions, etc.). Please give specific examples.

This POP is centered around the continued service level delivery of HR staff to the OHA workforce. HR staff work closely with our Employee Resource Groups, made up of staff across OHA to form affinity groups, such as the Black, African & African American ERG, the People of Color ERG, El Grupo ERG, Workplace Individuals with Strong Experience (WISE) ERG, Disability Community (DisCo) ERG, Veterans ERG, Queer Collective ERG, Healthy Families ERG, Neurodiversity Network ERG, Fuerza Latina de Oregon (FLOR) ERG, Positive Employment Opportunities 4 People of Lived Experience (PEOPLE) ERG, and others to understand how they are experiencing OHA as an employer and how to improve. We also administer the annual Employee Engagement Survey that provides for a depth and breadth of feedback that is integral to understanding employee perspectives. HR staff are both members of and consultants to OHA's Equity Advancement Leadership Team that is instrumental in furthering equity practices and holding divisional leadership accountable for equity planning and delivery.

- b. If community engagement is not part of your approach, please explain why and what you did instead to incorporate community perspectives. In your response, describe the following: the decision-making process used to determine engagement was not feasible or appropriate, the specific barriers (beyond general time or capacity), and how you mitigated the risk of missing community input (e.g. using existing feedback, partnering with trusted organizations, review from advisory bodies, etc.).

For this POP, the community would be limited to OHA employees.

Impacts and Accountability

9. If this POP is not funded, please describe the following:

- a. Which racial or ethnic communities would be most impacted.

The internal workforce communities of color, LGBTQIA2S+ communities, disability communities, multilingual staff communities will be impacted adversely by a decline in service level delivery, including administration of ERG programs.

- b. How disparities would likely persist or worsen.

Disparities will continue and worsen as long as there are not staff dedicated to serving the needs of OHA's diverse workforce.

10. Who will be monitoring racial equity outcomes over time for this POP?

- a. How will progress be reported?

HR's Data Analytics team will report on progress through our normal channels such as Affirmative Action plan data, dashboards for leadership team members, Employee Engagement Survey analytics, Governor Office reporting.

- b. How will leadership be informed of equity impacts?

As above.

- c. How will the community be involved in monitoring outcomes?

Our OHA internal community of ERGs and EALT receive reporting data as mentioned above.

Oregon Health Authority 2027-29 Policy Package

Division:	Behavioral Health Division & Medicaid Division
Program:	988 & Behavioral Health Crisis System
Policy package title:	Medicaid Match for Crisis Stabilization Cntrs
Policy package number:	412
Related legislation:	HB 2417 (2021), HB 2757 (2023)

Summary statement:

OHA is seeking to put in place the structural and financial funding mechanism that will enable Crisis Stabilization Centers (CSC) to leverage federal Medicaid dollars, providing a more stable and sustainable reimbursement model to maintain and expand access across the state. CSCs provide short-term, facility-based behavioral health crisis intervention and stabilization, decreasing reliance on higher cost and more acute Emergency Department visits, psychiatric hospitalization, and law enforcement response. To utilize Medicaid funding, OHA needs to amend the State Plan Agreement with the Centers for Medicare & Medicaid Services (CMS) to establish and authorize specific CSC services and be able to demonstrate that state dollars are available to match federal dollars. Without this specific state funds investment, Oregon cannot leverage federal Medicaid funding.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	\$1,300,000	\$0	\$3,000,000	\$4,300,000	0	0.00

Oregon Health Authority: 2027-29 Policy Package

Purpose

1. What problem is OHA trying to fix or solve?

Crisis Stabilization Centers (CSCs) provide short-term, facility-based behavioral health crisis intervention and stabilization. While they are an essential component of Oregon's crisis continuum model, CSCs are constrained by a lack of access to Medicaid reimbursement for services and are not currently available statewide. Currently OHA does not have agreement or authorization from the Oregon Legislature nor Centers for Medicare & Medicaid Services (CMS) to allow Medicaid billing for CSC services. In order to establish the authorization for these services, Oregon must authorize and commit to funding CSC services, and CMS must approve a State Plan Amendment (SPA) that authorizes the services and federal match for the services as part of the Medicaid State Plan for Oregon. CMS operates strictly on a cost-sharing basis. CMS will not approve federal reimbursement for crisis stabilization center services without the state of Oregon authorizing a matching payment.

2. What would this policy package buy and how and when would it be implemented?

This Policy Option Package (POP), along with authorizing legislation, would establish a state general fund match to allow for full Medicaid reimbursement to CSC providers serving Oregon Health Plan (OHP) members. Once the Oregon Legislature has authorized funding for CSC services, OHA can submit a SPA to CMS to authorize federal Medicaid match for those services. With CMS approval, this will allow Oregon to use federal funds to match General Fund (GF) contributions, thereby meeting the state share of the Federal Medical Assistance Percentage (FMAP) requirement. This will help to stabilize funding for CSCs currently in operation and incentivize the creation of additional CSCs in parts of the state that continue to see high use of Emergency Departments (EDs) and emergency services for behavioral health crises.

Oregon Health Authority: 2027-29 Policy Package

3. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity¹ or equitable health outcomes? How does this policy package further OHA's mission and align with its strategic plan?

This initiative closely aligns with OHA's 2030 Health Equity Goals to transform behavioral health care, strengthen affordable access for all and build capacity to eliminate health inequities.

This proposal seeks to support OHA's focus on transforming behavioral health and strengthening affordable access by establishing a sustainable financial model for crisis stabilization centers. The Substance Abuse and Mental Health Services Administration (SAMHSA) National Guidelines for Behavioral Health Crisis Care establish a comprehensive crisis services system across three core pillars: Someone to Contact, Someone to Respond, and A Safe Place for Help. CSCs are a key component of the third pillar: A Safe Place for Help.

OHA also supports several other key components of SAMHSA's three pillars, including the national behavioral health crisis hotline (988), Mobile Crisis Intervention Services (MCIS) and Mobile Response and Stabilization Services (MRSS) for youth and their families. Oregon's 988 program and statewide MCIS and MRSS systems receive Medicaid reimbursement for services. However, the lack of Medicaid reimbursement to Crisis Stabilization Centers has slowed the establishment of new CSCs and constrained existing CSCs.

¹ Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability, gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.**

Oregon Health Authority: 2027-29 Policy Package

Another goal and state statutory mandate of the Behavioral Health Crisis System is to reduce hospitalizations and incarcerations by offering a safe place for help for people experiencing a behavioral health crisis. Communities and individuals affected by racism and other forms of discrimination and oppression are more vulnerable to contact with law enforcement and more likely to experience iatrogenic trauma from psychiatric hospitalization. Expanding funding streams for CSCs will allow more communities to offer and sustain this alternative to law enforcement, Emergency Medical Services (EMS), EDs. Facilities dedicated to deescalating behavioral health crises, such as CSCs, can also reduce the need for civil commitment.

Finally, the [Governor's Behavioral Health Talent Council's \(BHTC\) Final Report](#) included the recommendation to establish crisis stabilization billing codes and sustainable funding via Medicaid reimbursement. This recommendation can be found within Compensation Action Plan 4 – Recruitment and Retention Strategy 4.5 (RR 4.5), which states “OHA to implement new billing codes for short-term crisis stabilization services (4-24 hours) for Medicaid and commercial payors. CMS-approved billing codes and provider guidance.”

Quantifying results

4. What are the long-term desired outcomes?

- Establish a sustainable funding source for CSC services to ensure stable access for Oregonians experiencing a behavioral health crisis.
- Strengthen Oregon's behavioral health crisis continuum by expanding access to facility-based crisis stabilization services, particularly in underserved rural and frontier communities, reducing health inequities while easing burden on the broader health care system.

Oregon Health Authority: 2027-29 Policy Package

- Advance a comprehensive crisis system aligned with national best practices by providing a safe, appropriate alternative to emergency departments, inpatient psychiatric care, and law enforcement response for individuals experiencing a behavioral health crisis.
- Reduce reliance on higher-cost and higher-acuity services, including emergency department visits, inpatient psychiatric admissions, repeat crisis encounters, and unnecessary law enforcement involvement, creating opportunities for long-term cost savings.

5. What are the envisioned outputs of this investment? How will OHA measure the impacts on health inequities of this policy package?

A sustainable reimbursement structure for CSCs by leveraging federal Medicaid funding with state GF match will support the development, expansion, and maintenance of CSCs.

OHA will collect data on service utilization and track its impact on emergency department and psychiatric hospital admissions. Law enforcement and EMS drop-offs will be tracked to understand the jail avoidance impacts of CSCs, and data will be collected and analyzed through quarterly reports to identify disparities and inform efforts to address service gaps.

How achieved

6. What actions have occurred to resolve the issue prior to requesting a policy package?

OHA's Behavioral Health, Medicaid and Health Policy and Analytics divisions have been engaged with Community Mental Health Programs (CMHPs), coordinated care organizations (CCOs), and the Association of Oregon Community Mental Health Programs (AOCMHP) on a monthly basis to evaluate

Oregon Health Authority: 2027-29 Policy Package

Oregon system alignment with the Crisis Now model, understand operational challenges with the current billing and funding structures, and establish standardized goals for CSC services in Oregon. The Crisis Now model is a best-practice behavioral health framework designed to provide immediate, community-based mental health and substance use that diverts people in crisis from EDs and the criminal justice system.

OHA also collaborated with internal budget offices and fiscal analysts to determine the overall cost of CSC services and identify potential funding sources assessing the feasibility of implementing reimbursement in the current budgetary climate without a policy package request. It is not feasible to sustain and expand CSCs in Oregon without leveraging Medicaid federal funds.

Additionally, OHA engaged with peer states—including New York and Idaho—to inform the development of Oregon’s CSC approach to include reimbursement, establishment criteria, and other logistical information that is critical to successful operationalization. Oregon learned from these states that no other option was successful without leveraging Medicaid funds. In Oregon, community partners are in agreement that Medicaid reimbursement is the best path forward to strengthening CSCs in Oregon.

7. What alternatives were considered and what were the reasons for rejecting them?

OHA considered the Certified Community Behavioral Health Clinic (CCBHC) payment model for CSCs. However, since CCBHCs bill at an established Prospective Payment System (PPS) rate and have limited codes for CSC services, this model would not cover the full range of CSC services in Oregon’s communities. Instead, the CCBHC model serves as an important complement to the CSC model in the overall crisis response and management strategy in Oregon.

Oregon Health Authority: 2027-29 Policy Package

Some CSCs have used the crisis service intervention code H2011 and other codes to bill for CSC services. However, OHA determined that these codes were not designed for the CSC model of care. Many existing codes for services have requirements associated with them that do not align well with the CSC structure and the types of providers allowed to render services at CSCs, creating challenges for billing all services provided. As an example, H2011 is a per unit code that requires direct contact for billing. The CSC model of care allows for multiple types of staff to attend to the individual; this could lead to confusion on documentation and runs the risk of duplicate billing.

Additionally, OHA considered relying on local funding and budgeting alternatives such as local taxes, grants, private donations, and CCO contributions. However, counties and agencies consistently expressed difficulties with this approach due to budget constraints, the uncertainty of private funding, and the competitive and limited time nature of grant opportunities.

8. What other agencies, programs, community partners or stakeholders are collaborating on this policy package?

Partners collaborating on this policy package include:

- OHA Behavioral Health Division
- OHA Medicaid Division
- OHA Office of Actuarial and Financial Analytics
- OHA Fiscal and Operations Division
- Behavioral Health Crisis System Advisory Committee
- Community Mental Health Programs
- Coordinated Care Organizations

Oregon Health Authority: 2027-29 Policy Package

- Association of Oregon's Community Mental Health Programs (AOCMHP)
- Peer States: New York, Washington, Idaho, Colorado, Massachusetts, North Carolina, Louisiana, Arizona

9. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

To leverage federal Medicaid funding, the state needs to commit to providing state General Funds to match Medicaid funds. Therefore, this POP requires legislative authority to pay for these services. Once the state of Oregon authorizes these services and commits the General Fund match, the Medicaid policy team will work with CMS to negotiate a State Plan Amendment (SPA) so that federal funds can be drawn upon to reimburse CSC services.

10. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Local Mental Health Authorities (LMHA), which designate and oversee CMHPs, would be positively affected due to the establishment of a pathway for reimbursement for CSC services, reducing reliance on local funding while improving crisis stabilization infrastructure.

The Nine Federally Recognized Tribes of Oregon would have improved access to Medicaid-funded Crisis Stabilization Center services for Tribal members.

The Confederated Tribes of Warm Springs, as both the LMHA and the CMHP for the Warm Springs service area, would also benefit from the new reimbursement model.

Oregon Health Authority: 2027-29 Policy Package

11. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

Yes. The ongoing 2025 Secretary of State 988 & Behavioral Health Crisis System Audit requires OHA to build a framework for sustainable funding in the Crisis Now model. Expanding service code and Medicaid billing options for providers will help sustain services in the absence of dedicated state funding. The 2025 audit also noted an imbalance in facility-based crisis services options for youth, CSCs can provide a safe place for youth and their families to deescalate from a crisis.

Staffing and fiscal impact

Implementation date(s): 07/01/2027

End date (if applicable): n/a

12. What assumptions affect the pricing of this policy package?

The cost estimate is based on assumptions regarding provider participation, member uptake, duration of services, rate setting process for new codes, and the time required for CMS approval.

13. Will there be new responsibilities for OHA and/or Shared Services? Specify which programs and describe their new responsibilities.

Yes. This policy option would impact OHA staff responsible for rule making, administration, technical assistance requests, oversight of programs, CMS compliance and ongoing evaluation.

Oregon Health Authority: 2027-29 Policy Package

14. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

While the exact changes are unknown, this investment is expected to increase access to CSC services and members served. Existing CSC Oregon Administrative Rules are anticipated to become permanent in September 2026, after which OHA anticipates four CMHPs will seek certification to officially operate CSCs. Upon certification, OHA will receive these data related to client caseloads and services provided.

15. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

None.

16. What are the start-up and one-time costs?

N/A.

17. What are the ongoing costs?

The ongoing costs of implementing this policy option package will include payments to providers or CCOs for CSC services rendered, as well as administrative activities for data collection and analysis, program oversight, quality improvement activities, training and technical assistance, partner engagement, and ongoing coordination with providers and CCOs to ensure service quality and compliance.

Oregon Health Authority: 2027-29 Policy Package

18. What reductions will you use to offset the costs of this work and maintain budget neutrality?

This POP maintains budget neutrality by fully offsetting the requested investment through the savings and reductions included in POP 415: OHA Savings and Reductions.

19. What are the sources of funding (revenue) and the funding split (GF/OF/FF) for each part of the investment as well as the offset/reduction?

The General Fund contribution will be \$1.3 million. The matching Medicaid contribution will be \$3 million. A detailed breakdown of the matching arrangement will be established through routine budgetary processes.

20. What are the potential savings (above the offset to pay for the investment)?

There are potential longer-term, system-level savings associated with improved access to Crisis Stabilization Center services. Medicaid funded CSCs would reduce reliance on higher-cost settings such as emergency departments, inpatient psychiatric hospitalization, and law enforcement or jail-based crisis response efforts. Over time these cost savings may lead to downstream reductions in acute care expenditures.

Oregon Health Authority: 2027-29 Policy Package

RACIAL EQUITY IMPACT STATEMENT (REIS) WORKSHEET: POLICY OPTION PACKAGE (POP) QUESTIONS

OHA POP #412: MEDICAID MATCH FOR CRISIS STABILIZATION CNTRS

Program managers responsible for the POP: Please answer the questions below for every POP being proposed in your agency request budget. To fill out this worksheet, download a copy of this worksheet and type your answers below each question.

Program Overview

1. Please describe the POP being proposed.

This POP seeks to establish a state general fund match to allow for Medicaid reimbursement to Crisis Stabilization Center (CSC) providers serving Oregon Health Plan (OHP) members. Once the Oregon legislature has authorized funding for CSC services, OHA can submit a State Plan Amendment (SPA) to CMS to authorize federal Medicaid match for those services.

2. Why is the POP being proposed?

Oregon's Medicaid Division does not have an approved rate of payment for CSC services for adults. Without ability to leverage Medicaid funds, CSCs will not be sustainable in Oregon as there is not enough general fund capacity.

Consultation

3. Who is completing this REIS?

The 988 & Behavioral Health Crisis System (BHCS) Program.

4. Who is responsible for tracking equity outcomes? What method(s) are they using to track outcomes?

The 988 & BHCS team shares responsibility with the Office of Data Strategy and Operations and Health Policy & Analytics. The 988 & BHCS team includes a Continuous Improvement Analyst who holds the primary responsibility for tracking and analyzing health equity outcomes.

Outcome trends and utilization will be monitored through the Resilience Outcomes Analysis and Data Submission (ROADS) system via stratified quarterly analysis of encounter-level data. Deviations of 10% or more from statewide aggregate trends will trigger review of demographic subgroup rates to identify and address potential disparities in close collaboration with the Equity & Inclusion team, and division leadership.

5. Does your agency have a DEIB practitioner (Yes or no)?

- If yes, describe how you collaborated with them on this REIS.
- If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

OHA has two teams dedicated to providing DEIB subject matter expertise specific to behavioral health. One team is in Behavioral Health Division and the other is in the Equity and Inclusion Division. These two teams provide subject matter expertise and technical support to the behavioral health units through learning collaboratives, communities of practices, equity hours, community partners meetings, community engagement, and one-on-one consultation. To support the legislative process, the teams also offer research and data regarding behavioral health inequities and draft equity impacts.

This POP REIS was developed with and reviewed by the Behavioral Health Division's Equity and Community Partnerships Unit.

6. Did you collaborate with your agency's data analysts, community engagement managers, outreach managers, and/or others that regularly interact with underserved and marginalized communities on this REIS? (Yes, no, or not applicable)

- If yes, describe how you collaborated with them on this REIS.
- If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

The 988 & BHCS Unit's Continuous Improvement Analyst has reviewed this document.

Community Engagement and Data

7. Identify the specific racial groups and communities that may be impacted by this POP, both directly and indirectly. In your answer, include responses to the following questions:

- How did you identify these impacted groups?
- What data are you using to validate your assessment? If possible, use outreach and engagement feedback to gather information and insight.
- If possible, disaggregate the data by race, ethnicity, geography, income level, and other relevant characteristics. If disaggregated data is not available, please describe why.
- How are communities impacted by this POP? What are the disproportionate impacts? Please be specific.

Crisis system services, including Crisis Stabilization Centers, are available to anyone in Oregon experiencing a behavioral health crisis. OHA identified racial groups and other communities that may be affected by this POP by relying on the OHA Strategic Plan to Eliminate Health Inequities. These goals ensure that individuals receiving health care do not face disadvantages due to their race, ethnicity, language, disability, immigration status, age, gender, gender identity, sexual orientation, geography, and social class.

People of color, people experiencing Severe and Persistent Mental Illness (SPMI) or Intellectual and Development Disabilities (IDD), and people who identify as LGBTQIA2S+ are more likely to have poor outcomes, such as incarceration or hospitalization, after contact with law enforcement or emergency medical services (EMS).

According to the National Alliance on Mental Illness' (NAMI's) 2024 Poll on Public Perspectives on 988 & Crisis Response, "Black (77%), Hispanic (72%) and LGBTQ+ (80%) Americans say they would be afraid the police may hurt their loved one or themselves while responding to a mental health crisis, and Black (28%) and AAPI (28%) Americans are significantly less comfortable going to a law enforcement officer in a crisis than white (43%) or Hispanic (40%) Americans."

A 2023 National Health Statistics Report published by the Centers for Disease Control (CDC) reported that “rates of ED visits [per 1,000 adults] for any mental health disorder were highest among non-Hispanic Black adults (96.8) compared with non-Hispanic White (53.4) and Hispanic (36.0) adults.” The same report notes that Hispanic and non-Hispanic Black adults are less likely to receive routine treatment for mental health disorders and, in the absence of routine care, often receive care related to a mental health disorder in emergency departments (EDs) instead. Investing in a robust crisis continuum – including Crisis Stabilization Services – helps alleviate the reliance on law enforcement, 911, behavioral health related ED visits and Emergency Medical Services (EMS) for people experiencing behavioral health crisis. CSCs also offer substance use crisis screening and deescalation.

CSCs are a new type of facility in Oregon and OHA lacks initial data reporting on utilization and outcomes. Permanent rules going into effect in September 2026 will allow providers to certify CSC services. Once certified, providers will be required to provide data to OHA. Race, Ethnicity, and Language, Disability (REALD) and Sexual Orientation, Gender Identity (SOGI) are amongst the data that will be tracked and analyzed, as appropriate.

8. How did you ensure multiple perspectives were part of the decision-making process for this POP? In your answer, include responses to the following questions:
 - Identify how you have or are planning to engage multiple perspectives and impacted groups to provide feedback on this POP (e.g. program design, budget, policy decisions, etc.). Please give specific examples.
 - If community engagement is not part of your approach, please explain why and what you did instead to incorporate community perspectives. In your response, describe the following: the decision-making process used to determine engagement was not feasible or appropriate, the specific barriers (beyond general time or capacity), and how you mitigated the risk of missing community input (e.g. using existing feedback, partnering with trusted organizations, review from advisory bodies, etc.).

OHA has met extensively with community partners and providers through listening sessions, work groups, and written feedback regarding the content of this POP. OHA has also presented this option to the Behavioral Health Crisis System Advisory Committee whose membership includes representatives for service providers, consumers of behavioral health services, family members and caregivers of

individuals with lived experience, and The Nine Federally Recognized Tribes of Oregon.

Impacts and Accountability

9. If this POP is not funded, please describe the following:

- Which racial or ethnic communities would be most impacted.
- How disparities would likely persist or worsen.

If this POP is not supported, it may jeopardize the financial viability of operational Crisis Stabilization Centers (CSCs) and thwart the development of future of CSCs. This would disproportionately impact Black and brown communities, who are more likely to suffer negative outcomes due to the absence of appropriate crisis care. These disparities will continue to persist if communities are unable to sustainably fund Crisis Stabilization Centers. Costly and invasive alternatives like incarceration, civil commitment, emergency department admission, and psychiatric hospitalization remain the most likely alternatives to those who are unable to access lower levels of care.

In addition, the ripple effect on families with members who rely on or are forced into invasive alternatives is significant, and can lead to stigma, disruption in daily life, poorer health outcomes, economic strains and challenges in maintaining healthy family dynamics and relationships.

10. Who will be monitoring racial equity outcomes over time for this POP?

- How will progress be reported?
- How will leadership be informed of equity impacts?
- How will the community be involved in monitoring outcomes?

The 988 & BHCS team shares responsibility with the Office of Data Strategy and Operations and Health Policy & Analytics. The 988 & BHCS team includes a Continuous Improvement Analyst who holds the primary responsibility for tracking and analyzing health equity outcomes.

Progress will be reported through quarterly data analysis and reporting by providers through the Resilience Outcomes Analysis and Data Submission (ROADS) system. Race, Ethnicity, and Language, Disability (REALD) and Sexual Orientation, Gender Identity (SOGI) data will be tracked and analyzed in these reports. Reports will be

used to identify gaps and inform policy and strategic decisions in close collaboration with data experts, the Equity & Inclusion team, and division leadership.

The 988 & BHCS team is developing procedures and protocols to report utilization data on its public website in accordance with data equity best practices.

Oregon Health Authority 2027-29 Policy Package

Division:	Public Health Division
Program:	Oregon Medical Marijuana Program
Policy package title:	Medical Marijuana Program Modernization
Policy package number:	413
Related legislation:	ORS 475C.770 to 475C.939

Summary statement:	This policy package corresponds to a proposed legislative concept that will move part of the Oregon Medical Marijuana Program (OMMP) to the Oregon Liquor and Cannabis Commission (OLCC) for greater budget stability and increased efficiency. This policy package reduces the OMMP CSL budget assuming the adoption of the legislative concept.
---------------------------	---

	General Fund	Lottery Funds	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	\$ 452,698	\$ -	\$ (4,678,750)	\$ -	\$ (4,226,052)	0	(12.18)

Oregon Health Authority: 2027-29 Policy Package

Purpose

1. What problem is OHA trying to fix or solve?

The Oregon Medical Marijuana Program (OMMP) can no longer generate enough revenue to cover expenditures, and the program is expected to have a negative cash balance for 2025-27.

OMMP is funded solely on patient application, grower registration, and dispensary and processor license fees. Since legalization in 2015, the program has seen an 84% decrease in registered patients and a 95% decrease in registered growers. All OMMP dispensaries and processors shifted to the retail market. Until this year, the program had not had any dispensaries or processors registered for the last four years. This decline has created a significant decrease in revenue.

Regulating growers, processors, and dispensaries is time consuming and costly, with significant overlap between OMMP, which oversees the medical market, and the Oregon Liquor and Cannabis Commission (OLCC), which regulates the retail market. Both agencies register or license applicants, conduct inspections, oversee reporting requirements, work with the Oregon Department of Justice and participate in administrative hearings, and coordinate with law enforcement. Larger OMMP grow sites and all OLCC licensees use the Cannabis Tracking System, and although OLCC inspects larger OMMP sites, any enforcement actions remain the responsibility of OMMP.

Oregon Health Authority: 2027-29 Policy Package

2. What would this policy package buy and how and when would it be implemented?

This POP corresponds to a Legislative Concept that would move authority and oversight of medical marijuana growers, grow sites, processors, and dispensaries from OHA to the OLCC. Shifting statutory authority to the OLCC will streamline regulation by consolidating inspections, compliance enforcement, and administrative hearings under a single agency, while still allowing medical growers and grow sites to serve patients. Centralizing oversight will reduce duplication and confusion.

OHA will continue to manage the patient and caregiver registry and maintain responsibility for testing standards for all marijuana items and hemp derived vapor products. Under this change, OHA would restructure the OMMP by reducing positions. Implementation includes reducing currently filled positions, establishing a date the program would no longer register new applicants, coordinating with OLCC to transition current registrants, and developing a communication plan. Implementation would begin upon the bill's passage with a completion date of September 30, 2027.

3. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity¹ or equitable health outcomes? How does this policy package further OHA's mission and align with its strategic plan?

This POP option would be the least impactful to current registrants by having one agency oversee the regulation of medical cannabis production and transactions while another agency ensures patient access is overseen by a health-focused agency. This option also ensures patients continue to have

¹ Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability, gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.**

Oregon Health Authority: 2027-29 Policy Package

affordable access to cannabis as a treatment option for their debilitating medical condition. There are no known equity concerns for growers, grow sites, dispensaries, or processors. Medical marijuana growers do not make a profit and growing medical cannabis is not treated as a business.

Quantifying results

4. What are the long-term desired outcomes?

- Significantly lower operational costs
- Reduction in regulatory redundancies
- Stable OMMP budget
- Patients continue to retain access to cannabis for their debilitating medical conditions

5. What are the envisioned outputs of this investment? How will OHA measure the impacts on health inequities of this policy package?

OMMP will actively track costs, savings, and revenue following implementation of these changes to ensure improvements are realized as expected. OMMP and OLCC will maintain close coordination throughout the transition to support smooth operations, uphold regulatory consistency, and minimize any impact on OMMP patients.

Oregon Health Authority: 2027-29 Policy Package

How achieved

6. What actions have occurred to resolve the issue prior to requesting a policy package?

The OMMP has reprioritized resources and spending to reduce expenditures while still meeting legal obligations and maintaining service levels. Services and supplies costs, travel, and modernization efforts have been reduced. The program has also left vacancies unfilled, reduced FTE and redistributed workloads. In addition, the OMMP will be merging with another substance regulatory program in September 2026 as a cost-saving measure. There are no further reductions in resources and supplies that can be made that will make any meaningful impact or stabilize the budget.

7. What alternatives were considered and what were the reasons for rejecting them?

A reduction in staffing was evaluated; however, it was concluded that such reductions would result in non-compliance with legal obligations while also being insufficient to fully mitigate the funding deficit.

OMMP has one of the highest registration fees for medical marijuana in the United States and 65% of registrants pay a reduced or waived application fee due to income level or veteran status. Raising fees may be counterproductive, pricing out registrants resulting in even fewer participants and further decreasing revenue.

Oregon Health Authority: 2027-29 Policy Package

8. What other agencies, programs, community partners or stakeholders are collaborating on this policy package?

The Governor's Office, OLCC and OHA have had discussions on this POP and corresponding legislative concept. OHA is lead agency for this work. OHA expects to collaborate closely with the OLCC if the concept advances.

9. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

Yes, there would be significant statutory changes to the Oregon Medical Marijuana Act ORS 475C.770 to 475C.939. The associated legislative concept is LC629 (44300-204). If passed, the legislative concept would move all authority and oversight of medical marijuana growers, grow sites, dispensaries, and processors to OLCC. OHA would maintain a patient and caregiver registry and oversee testing standards for all marijuana items and hemp-derived vapor products. The legislative concept would also repeal the Oregon Cannabis Commission, ORS 475C.930 – ORS 475C.939. The commission would no longer be needed to advise OHA as OLCC already has a commission with the ability to direct the agency.

10. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

There will be an increased workload to OLCC as they take over authority and oversight of growers, grow sites, processors, and dispensaries. OLCC is equipped to manage licensing, inspections, and enforcement actions and can incorporate these actions into existing operations and programs.

Oregon Health Authority: 2027-29 Policy Package

11. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Staffing and fiscal impact

Implementation date(s): July 1, 2027

End date (if applicable): September 30, 2027

12. What assumptions affect the pricing of this policy package?

This change is projected to reduce OMMP filled positions from 19 to 5 and decrease services and supplies spending starting October 1, 2027.

OMMP expects to raise enough revenue to cover expenditures for 2027-29 assuming the number of licenses and spending remain steady. However, OMMP but will have to reassess its budget for 2029-31 and forward.

13. Will there be new responsibilities for OHA and/or Shared Services? Specify which programs and describe their new responsibilities.

No. These changes will reduce workloads and eliminate some program legal responsibilities.

Oregon Health Authority: 2027-29 Policy Package

14. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

There will be a significant decrease in program workload as it will no longer be required to perform background checks, verify property owner consent, track reporting, issue and track violations, and perform inspections.

15. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

These changes will reduce the current staffing of the program from 19 full-time positions to 5 full-time positions. All positions will need to be funded for the first quarter of the 27-29 biennium. Fifteen (15) positions will be eliminated by September 2027 leaving 4 full time positions that will continue to be funded by the Other Funds fee revenue.

16. What are the start-up and one-time costs?

There are no startup costs.

17. What are the ongoing costs?

There will be ongoing costs for Oregon Department of Justice consultation and transition guidance to ensure legal obligations are met during the transition.

Oregon Health Authority: 2027-29 Policy Package

18. What reductions will you use to offset the costs of this work and maintain budget neutrality?

This POP maintains budget neutrality by fully offsetting the requested investment through the savings and reductions included in POP 415: OHA Savings and Reductions.

19. What are the sources of funding (revenue) and the funding split (GF/OF/FF) for each part of the investment as well as the offset/reduction?

Other funds will be used as the program is solely funded by application and registrations fees. GF will be used to support the first quarter as the program transitions out of OHA.

20. What are the potential savings (above the offset to pay for the investment)?

The long-term savings will be in lower operational costs and stabilizing the budget.

RACIAL EQUITY IMPACT STATEMENT (REIS) WORKSHEET: POLICY OPTION PACKAGE (POP) QUESTIONS

OHA POP #413: MEDICAL MARIJUANA PROGRAM MODERNIZATION

Program managers responsible for the POP: Please answer the questions below for every POP being proposed in your agency request budget. To fill out this worksheet, download a copy of this worksheet and type your answers below each question.

Program Overview

1. Please describe the POP being proposed.

This POP corresponds to a proposed legislative concept that would shift authority for regulating medical marijuana growers, grow sites, processors, and dispensaries from OHA to the Oregon Liquor and Cannabis Commission (OLCC), streamlining oversight by consolidating inspections, compliance, and hearings under one agency. OHA would retain responsibility for the patient and caregiver registry and testing standards, while restructuring the Oregon Medical Marijuana Program (OMMP) by reducing positions.

2. Why is the POP being proposed?

Since the legalization of retail marijuana in Oregon, the OMMP is no longer financially sustainable due to steep declines in participants, leaving the program unable to generate enough revenue to cover its costs for 2025–27. Significant overlap between OMMP and OLCC regulatory functions further strains and duplicates resources, as both agencies conduct similar licensing, inspection, and enforcement activities despite shrinking participation in the medical market.

Consultation

3. Who is completing this REIS? OMMP Section Manager
4. Who is responsible for tracking equity outcomes? What method(s) are they using to track outcomes?

OHA is proposing this request to resolve a funding gap and redundancies in regulatory oversight. If this POP is approved, OHA and OLCC will need to determine

a transition plan to ensure all participants will continue to be registered and have access to medical cannabis.

5. Does your agency have a DEIB practitioner (Yes or no)? Yes

- a. If yes, describe how you collaborated with them on this REIS.
- b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

The Governor's Office, OLCC and OHA have had discussions on this POP.

6. Did you collaborate with your agency's data analysts, community engagement managers, outreach managers, and/or others that regularly interact with underserved and marginalized communities on this REIS? (Yes, no, or not applicable)

- a. If yes, describe how you collaborated with them on this REIS.
- b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

There have been past discussions on this topic with the Oregon Cannabis Commission. The commission has been in favor of moving some regulatory oversight from OHA to OLCC. The commission is made up of representatives of the cannabis industry and includes current registrants, OLCC, law enforcement, and OHA.

Community Engagement and Data

7. Identify the specific racial groups and communities that may be impacted by this POP, both directly and indirectly. In your answer, include responses to the following questions:

The OMMP has approximately 11,645 registered patients, over 4,000 caregivers, 2,385 growers, and over 2,000 grow sites. There are currently no registered medical marijuana processors or dispensaries although the program has received some recent interest and applications. The ethnicities of OMMP patients include

approximately 80% white, followed by 8% Hispanic, 6% African American, and 3.5% Asian. There should be minimal impact on the cannabis registrants and communities as the agencies are shifting oversight of regulation and not eliminating registration or licensing types or regulatory requirements.

- a. How did you identify these impacted groups? The OMMP publishes quarterly statistics and collects REALD data from patient surveys.
 - b. What data are you using to validate your assessment? If possible, use outreach and engagement feedback to gather information and insight. The POP is only shifting regulation and oversight, not eliminating any legal obligations or applicant types.
 - c. If possible, disaggregate the data by race, ethnicity, geography, income level, and other relevant characteristics. If disaggregated data is not available, please describe why. It is not possible as OMMP does not collect data such as income level.
 - d. How are communities impacted by this POP? What are the disproportionate impacts? Please be specific. This POP transfers oversight and regulation from one agency to another with minimal impact on the cannabis community. The shift will strengthen regulatory oversight and support more consistent enforcement, communication, and service to the cannabis industry and to other agencies that oversee cannabis laws in Oregon.
8. How did you ensure multiple perspectives were part of the decision-making process for this POP? In your answer, include responses to the following questions:
- a. Identify how you have or are planning to engage multiple perspectives and impacted groups to provide feedback on this POP (e.g. program design, budget, policy decisions, etc.). Please give specific examples.

The proposed changes will be shared and discussed with the Oregon Cannabis Commission and other partners.

- b. If community engagement is not part of your approach, please explain why and what you did instead to incorporate community perspectives. In your response, describe the following: the decision-making process used to determine engagement was not feasible or appropriate, the specific barriers (beyond general time or capacity), and how you mitigated the risk of missing

community input (e.g. using existing feedback, partnering with trusted organizations, review from advisory bodies, etc.).

Based off of previous discussions with the Oregon Cannabis Commission, they are supportive of shifting some regulatory functions from OHA to OLCC.

Impacts and Accountability

9. If this POP is not funded, please describe the following:

- a. Which racial or ethnic communities would be most impacted.
- b. How disparities would likely persist or worsen.

There should be minimal impact on the cannabis registrants and communities as the agencies are shifting oversight of regulation and not eliminating registration or licensing types or regulatory requirements.

10. Who will be monitoring racial equity outcomes over time for this POP?

- a. How will progress be reported? REALD data will continue to be collected for medical marijuana registrants so significant changes in those data can be identified.
- b. How will leadership be informed of equity impacts? OLCC and OHA regularly collaborate on medical marijuana activities. This partnership will continue since both agencies will still hold regulatory responsibilities for medical marijuana in the state. Significant changes in registrant data will be shared with OLCC as needed.
- c. How will the community be involved in monitoring outcomes?

OLCC has its own Cannabis Advisory Committee where data can be shared and monitored.

Oregon Health Authority 2027-29 Policy Package

Division:	Agency Operations
Program:	Office of Data Strategy & Operations
Policy package title:	OHA Data Management Platform
Policy package number:	414
Related legislation:	N/A

Summary statement:

A core part of OHA's continued effort to modernize data related operations and tools, this POP supports meeting the critical operational needs relating to the establishment of the OHA Data Office, achieving meaningful Enterprise Data Governance and Data Modernization across OHA, as outlined in the Improving Medicaid Data Implementation (IMED) Advanced Planning Document (APD), used to request Federal match funding for Oregon's Medicaid IT projects. This is an active and ongoing Transparency, Accountability, and Belonging Initiative (TABI) which requires investments in positions and technology to support OHA's achievement of critical data modernization goals.

This POP funds the implementation of an Enterprise Data Management Platform with data cataloging capabilities, integrated data-sharing agreement and request management functionality, Data Indexing and Entity Resolution, priority data source ingestion into the OHA Data Environments, and the staff needed to operate and sustain these capabilities. These investments will enable staff and partners across OHA to find, understand,

Oregon Health Authority: 2027-29 Policy Package

govern, trust, and appropriately share data. This will reduce duplication of effort and data, strengthen stewardship and accountability, improve transparency, support consistent privacy and security decision, and improve OHA's ability to identify and respond to health inequities.

	General Fund	Lottery Funds	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	\$ 454,234	\$ -	\$ 248,850	\$ 4,088,045	\$ 4,791,129	10	7.50

Purpose

1. What problem is OHA trying to fix or solve?

OHA's ability to identify and reduce health inequities is constrained by a highly fragmented data environment and limited visibility into the rules for using and sharing data. Hundreds of data repositories have been, and continue to be, identified across OHA divisions and programs. These repositories contain overlapping and inconsistent datasets, often with unclear ownership, definitions, lineage, stewardship, access rules, and controls.

As a result, staff and partners often cannot quickly determine what data exists, what it means, whether it can be trusted, who is responsible for it, how it is used in reporting, or if it is eligible to be shared. Programs frequently rely on informal knowledge, one-off documentation, personal networks, and repeated discovery efforts to locate and interpret data. This creates an avoidable burden, duplicates work, slows reporting and analysis, increases the risk of inconsistent interpretation, and makes governance decisions harder to operationalize.

Oregon Health Authority: 2027-29 Policy Package

These issues directly impact OHA's ability to understand access, eligibility, service utilization, outcomes, population health, and service delivery patterns across communities. When key data elements are inconsistently defined or poorly documented, it becomes harder to compare results, explain measures, identify disparities, and support transparent human-centered and data-informed decision making. This slows equity-focused analysis and timely actions, reducing OHA's ability to identify and respond to disparities in access, quality, and outcomes for priority populations. Inconsistent definitions and unclear pathways for data sharing increase administrative burden and slow coordinated improvement with providers, Coordinated Care Organizations, community partners, and local public health authorities. For OHA operations, unclear rules around data sharing result in rework, slower delivery, and inconsistent handling of data requests.

Without an enterprise approach, OHA will continue to rely on fragmented documentation and informal knowledge to manage critical data assets. Governance decisions will remain difficult to operationalize, stewardship responsibilities will be harder to sustain, and staff will continue spending time rediscovering data rather than reusing trusted data.

2. What would this policy package buy and how and when would it be implemented?

This POP will buy the technology, services, and staff needed to increase OHA's data management maturity and establish sustainable operational capacity for enterprise data management.

The proposed investment includes five major components:

1. Data Management Platform with a Data Catalog Tool

Oregon Health Authority: 2027-29 Policy Package

This SaaS software will allow for the creation of a searchable catalog of OHA data assets, making it easier for staff and authorized partners to find, understand, govern, and use data. It will support self-service discovery, shared definitions and business glossary terms, ownership and stewardship reference information, metadata, lineage, access guidance, data quality information, and role-based access security. Awareness of the data collected will ensure OHA is not requiring duplicative submissions from community partners.

2. Integrated Data-Sharing Agreement and Request Management Software Capability

This capability, either built into the Data Management platform or integrated with it, will provide a central, searchable place to store data-sharing agreements and track data requests from intake through decision. It will document required approvals, restrictions, permitted uses, access owners, decisions status, and related workflow information.

3. Data Indexing and Entity Resolution Module

This component will make matching and connecting records for persons and entities across multiple systems and data assets. This will decrease duplication of data and the costs associated with storing siloed data, support a consistent enterprise index, enable golden record capabilities, and strengthen cross-program reporting and equity analysis.

4. Ingestion of Priority Data Sources into the OHA Data Environment

This POP will support ingestion of up to five priority data sources into the OHA Data Environment. For each source, OHA will securely connect, ingest, and structure the data for cohesive, cross-source reporting. This modernized process will support cataloging of the data by the data management platform and ensure that priority and high impact data assets are discoverable, governed, and available for meaningful use.

5. Dedicated Position Staff

Oregon Health Authority: 2027-29 Policy Package

This POP funds nine positions to develop the enterprise framework, build standard operating process, support adoption of the tools, and sustain ongoing operation of the platform. These staff will provide stewardship enablement, metadata and definition management, governance coordination, platform administration, project management, data source onboarding support, and partner engagement.

Together, these investments create a more complete data management pathway that improves data discovery, documentation, access guidance, and appropriate sharing, while reducing duplication, accelerating delivery of trusted equity insights, and strengthening OHA's ability to act quickly to address health inequities.

Implementation Approach & Timeline:

Implementation will build on Phase 0 work already initiated for the Enterprise Data Management Platform Initiative. Phase 0 work includes pre-initiation activities such as obtaining OIS project prioritization and EIS Stage Gate 1 endorsement. Phase 1 includes procurement, platform configuration, pilot data cataloging priority domains, partner engagement, and early data steward onboarding. During the 2027-2029 biennium, this POP will support completion of Phase 1 activities, Phase 2 implementation of entity/identity indexing capabilities, operational staffing, continued onboarding of priority data domains, additional platform functionality, data ingestions, and the transition to maintenance and operations.

As part of establishment of the OHA Data Office within the Office of Data Strategy & Operation (ODSO), this POP will fund critical development in the OHA's operational data management capacity – reducing data silos and creating a cohesive data enterprise. Software solutions will be implemented within and connected adjacent to the OHA Data Environment. The positions funded through this POP

Oregon Health Authority: 2027-29 Policy Package

will make up the future ODSO business unit that will manage the OHA Data Environment and enterprise data management operations, including related data tools, stewardship workflows, partner engagement, and program development.

Proposed milestone timeline:

- **2027 – Q3:** POP-funded hiring, implementation planning, governance alignment, and operational readiness activities commence.
- **2027 – Q4:** Initial Enterprise Data Catalog implementation completed for launch scop.; Phase 1 go-live targeted for November 2027.
- **2028 – Q2:** Data Indexing and Entity Resolution implementation completed for initial scope. Phase 2 Implementation completed and transition to maintenance and operations begins.
- **2028 – Q3:** Priority OHA Data Environment data source ingestions completed for up to fix priority sources
- **2028 – Q4:** Data-sharing agreement and request management capabilities implementation completed.
- **2029 – Q2:** New ODSO Business Unit reaches steady-state operations, including established stewardship workflows, catalog maintenance process, adoption support, governance coordination, and ongoing platform operations.

The projected milestones may be adjusted through implementation planning, procurement results, vendor timelines, OIS technical readiness, and governance prioritization.

Oregon Health Authority: 2027-29 Policy Package

3. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity¹ or equitable health outcomes? How does this policy package further OHA's mission and align with its strategic plan?

This investment advance health equity by strengthening the data foundation OHA relies on to understand needs, monitor outcomes, allocate resources, and improve service delivery for people in Oregon. Today, the fragmented data infrastructure perpetuates inconsistent definitions, unclear lineage, and uneven documentation. This creates an avoidable burden for staff and can contribute to inconsistent use of data across programs. These conditions make it harder to identify disparities, explain how measures are constructed, compare results across population, and ensure that decisions are based on trusted and well-understood information.

An Enterprise Data Management Platform will support equity by making data assets easier to find, understand, govern, and use responsibly. Shared business glossaries, documented stewardship roles, lineage, access guidance, and data quality information will help program apply definitions consistently and understand the context, limitations, and appropriate use of the data. This is especially important for data used to assess access, outcomes, eligibility, service utilization, population health, quality, and other factors relevant to identifying and addressing disparities.

This platform will also reduce inequities in organization capacity. In the current environment, programs with more technical staff, longer institutional knowledge, or stronger informal networks are better positioned to find and interpret data. Agency staff with fewer resources may spend more time

¹ Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability, gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.**

Oregon Health Authority: 2027-29 Policy Package

rediscovering information, navigating unclear access paths, or relying on inconsistent documentation. By creating a shared enterprise approach to data discovery, definitions, stewardship, and access guidance, this investment reduces reliance on informal knowledge and makes trusted data more available to staff across programs and divisions.

This work supports non-invasive data governance by embedding equity-supporting practices into daily data management activities, rather than creating unnecessary new burdens. Data stewards and program partners will be able proactively contribute to the curation of their cataloged data assets. This will improve transparency and trust in the quality of data and support more consistent implementation of governance decisions made by the [OHA-ODHS Data Governance Council](#) and related governance bodies.

This investment aligns with [OHA's Strategic Plan](#) and mission by building internal capacity and accountability mechanisms necessary to identify and eliminate health inequities. It also aligns with the [ODHS-OHA Strategic Technology Plan](#) by strengthening cybersecurity and privacy, accelerating technology modernization, increasing data insights, and optimizing technology management.

This investment also aligns with [Oregon's Data Strategy](#) by treating data as a shared enterprise asset, supports the [Oregon Cloud Forward Strategy](#) through the use of secure cloud-based services where appropriate, and is consistent with [OIS Strategic Planning](#), the [EIS Strategic Framework](#), and the [EIS Modernization Playbook](#). Through this investment, OHA advances their equity goals and the state's Diversity, Equity, and Inclusion priorities, consistent with the Governor's Priorities, by improving shared definitions, lineage transparency, stewardship clarity, and access guidance.

Oregon Health Authority: 2027-29 Policy Package

Quantifying results

4. What are the long-term desired outcomes?

The long-term desired outcome is to establish sustainable enterprise data management capacity across OHA. This will enable agency staff, programs, data stewards, governance bodies, and authorized partners to consistently find, understand, govern, trust, and appropriately use OHA data. This investment will move OHA from a fragmented, program-by-program approach to a more coordinated and modern enterprise model.

Overtime this investment is expected to:

- Improve OHA's ability to identify, monitor, and respond to health inequities through more timely and reliable access to trusted data.
- Establish a searchable catalog of priority OHA data assets, with clear information on ownership, stewardship, business definition, lineages, quality consideration, refresh cadence, access requirements, and allowable use.
- Reduce reliance on informal knowledge, personal networks, one-off documentation, and repeated discovery efforts when staff need to locate, interpret, or responsibly use data.
- Improve consistency in data definitions, reporting, governance implementation, and data-sharing decision documentation across programs and divisions.
- Support cross-program reporting and equity analysis through data indexing, entity resolutions, and golden record capabilities.
- Strengthen OHA's ability to operationalize decisions made through enterprise data governance bodies, including the OHA-ODHS Data Governance Council or related governance bodies.

Oregon Health Authority: 2027-29 Policy Package

- Increase audit readiness, transparency, and accountability by documenting stewardship roles, access pathways, metadata changes, data lineage, and data use considerations.
- Building the internal staffing capacity needed to sustain the OHA Data Environment, enterprise data management platform, data catalog, stewardship workflows, metadata standards, data-sharing workflows, and ongoing platform adoption.

The desired future state is one where OHA staff and authorized partners can more quickly determine what data exists, what it means, whether it can be trusted, who is responsible for it, how it is connected to upstream and downstream uses, and whether and how it may be shared. This will support better program decisions, faster analysis, more consistent privacy and security practices, and stronger accountability for reducing health inequities.

5. What are the envisioned outputs of this investment? How will OHA measure the impacts on health inequities of this policy package?

OHA will measure the impact of this investment through implementation milestones, operational performance measures, adoption measures, and equity-focused use measures. Because this POP funds enabling infrastructure rather than direct services, the most immediate measures will focus on whether OHA has improved the availability of useability, governance, and appropriate sharing of data needed to identify and respond to inequities.

Benefit	Measure
Improved discoverability and access to authoritative data	At least 80% of priority data assets identified in pilot or implementation scope are cataloged

Oregon Health Authority: 2027-29 Policy Package

	within six months of pilot start or domain onboarding. Median time for users to identify the authoritative sources for an in-scope priority dataset is reduced by 50% from baseline.
Stronger stewardship and metadata quality	At least 85% of priority data elements in scope have an approved business definition, assigned data steward, ownership information and known usage requirements documented within six months of domain onboarding.
Improved lineage and transparency	At least 70% of priority reporting assets and upstream data sources in scope have documented end-to-end lineage within 12 months of domain onboarding.
Improved access guidance and compliance	At pilot closure or implementation milestone, 100% of priority data assets in scope will have documented access guidance, security classifications, and an identified access owner, including audit logging for in-scope metadata and access related changes.
Stronger adoption and organizational capability	At least 95% of identified stewards and platform administrators for priority data assets complete role-based training before end of pilot or applicable onboarding phase. At least 75% of pilot participants use the platform monthly by pilot close.

Oregon Health Authority: 2027-29 Policy Package

Improved data-sharing transparency and efficiency	Number of data-sharing agreements migrated into the system; number of data requests tracked through workflows; median time from request intake to decisions, percentage request with documented restrictions, permitted uses, approvals, and status.
Improved cross-program identity and entity resolution	Number of systems or data assets included in the data index/entity resolution module pilot, match quality and duplication reduction measures; number of reporting or analytic products supported by linked data or golden record capabilities.
Improved availability of high-value data assets in the OHA Data Environment	Number of priority data assets ingests into the OHA Data Environment, with an initial target of up to five; percentage of ingested sources with completed metadata, validation, stewardship, monitoring, and catalog documentation.
Better support for equity focused analysis and decision-making.	Reduction in time required to identify appropriate data for equity analysis, for data assets included in scope.
Reduced administrative burden and rework	Staff-reported reduction in time spent locating data, identifying owners, interpreting definitions, understanding access requirements, or recreating documentation.

Oregon Health Authority: 2027-29 Policy Package

OHA will also evaluate whether this investment improves the agency's ability to identify disparities in access, eligibility, service utilization, quality, outcomes, and program performance for population experiencing health inequities. Measures will be refined during implementation as priority data domains are selected, catalog standards are finalized, data-sharing workflows are operationalized, and baseline measures are established.

How achieved

6. What actions have occurred to resolve the issue prior to requesting a policy package?

OHA has completed several planning, assessment, partner engagement, procurement readiness, and proof-of-concept activities prior to requesting this policy package. These efforts have consistently identified the need for an enterprise data catalog, modern data management platform, data sharing agreement and request management capability, data indexing/entity resolution, priority data source ingestion, organizational change management, and dedicated operational staffing.

Work completed to date includes:

- **Landscape Assessment on Data Quality, Inventory, and Catalog**
This assessment included OHA and ODHS partner listening sessions focused on the current state of data management, known barriers, user needs, and opportunities for improvement.
- **Data Management Tool Requirements Gathering and Persona Development**
Requirements and user personas were developed with partners from across OHA and ODHS to identify how different users would interact with a future data catalog and data management platform.
- **TABI Data Catalog Proof of Concept**

Oregon Health Authority: 2027-29 Policy Package

This proof of concept demonstrated how role-based access within a modern data management platform can support operational work while maintaining data security and controlled access.

- **Request for Information 6106 – Enterprise Data Catalog**

OHA issued RFI 6106 to better understand market readiness, available enterprise data catalog capabilities, implementation options, and partner education needs. The RFI included vendor demonstrations and market research and confirmed that viable solutions exist.

- **Data Sharing Landscape Assessment.**

This assessment provided a clearer understanding of how data is currently shared across OHA and with partners, and informed recommendations, opportunities, and next steps for the OHA Data Office.

- **Enterprise Data Management Platform Initiative**

Established through the prioritization of this initiative by the OIS Joint Technology Governance Council. At this time 0.5 FTE Project Manager 3 has been assigned and project artifacts are being developed. This includes a business case, charter, and IT Investment (ITI) form. EIS Stage-gate artifact review is underway.

These activities represent planning and readiness work that produced validated requirements, informed by business partners, and then market tested via an RFI.

7. What alternatives were considered and what were the reasons for rejecting them?

Alternative 1: Do Nothing

Under this alternative, OHA would continue operating in the current fragmented data environment without further investment. This alternative was rejected because it would leave OHA reliant on manual processes, informal knowledge, personal networks, inconsistent definitions, one-off documentation, expensive data costs, and disbursed data sharing records.

Oregon Health Authority: 2027-29 Policy Package

To continue operating without business-ready data management and cataloging functionality tools, OHA extends current state fragmentation and data duplication. Analysts and stewards would continue to spend time rediscovering information, lineage would remain unclear, access paths would remain slow to confirm, and implementation of new data governance policies would lack a primary tool to support operational use. This would preserve current inefficiencies, governance gaps, equity risks, and accountability challenges.

Alternative 2: Expand Existing Tool Usage (*erwin*)

Under this alternative, OHA would attempt to reintroduce and expand use the existing tool, *erwin*, as a limited functionality enterprise data management and catalog tool. *Erwin* as a tool provides strong technical capabilities, however it has not demonstrated the ability to deliver consistent agency-wide discovery and stewardship for agency business users. This is reflected in limited adoption outside of technical teams during its time in use. For this reason, this alternative was rejected.

Launching *erwin* as the primary enterprise data catalog would require a fully dedicated implementation effort, significant training and change management activities, and would still leave substantial capability and usability gaps for business partners. This option offers a lower investment than procuring a new platform but carries a high risk of continued low adoption and little-to-no business side operational value to the agency overall.

Alternative 3: Implement a Data Catalog Only

Under this alternative, OHA would implement only the core data catalog capability and would not fund the full set of related capabilities, including data sharing agreement and request management, data

Oregon Health Authority: 2027-29 Policy Package

indexing/entity resolution, priority data source ingestion, or the staffing model required to maintain operations. This alternative would provide some benefit by improving discovery, definitions, and ownership for selected datasets. However, it was rejected as it would leave major operational problems unresolved.

Data sharing requests and agreements would remain manual and disbursed, cross program indexing would remain limited, and the catalog could become underpopulated or difficult to sustain without sufficient staff, stewardship engagement, and priority data ingestion.

Alternative 4: Procure and Implement an Enterprise Data Management Platform with Related Capabilities (RECOMMENDED)

The recommended alternative is to procure & implement an Enterprise Data Management Platform with robust data cataloging capabilities, supported by the staffing and related data management function described in this POP. As it scales, the platform will serve as the primary enterprise source for finding authoritative data assets, current and consistent data definitions, stewardship contacts, data lineage, current considerations, and access request steps.

Programs will be better able to align on shared terminology, reduced rework, meet reporting timelines, and implement data governance decisions in a transparent and measurable way. This alternative is recommended because it provides stronger long-term returns through reduced burden, improved transparency, stronger governance, better stewardship, improved access guidance, and sustainable data management capabilities. It is the only alternative to directly address the root cause of OHA's data fragmentation called out in numerous SOS audits (see #11) and support the transition from repeated rediscovery of data to responsible reuse of trust data.

Oregon Health Authority: 2027-29 Policy Package

8. What other agencies, programs, community partners or stakeholders are collaborating on this policy package?

This policy package is led by Agency Operations through the Office of Data Strategy and Operations. Collaboration will include OHA divisions and programs that produce, manage, analyze, share, or rely on agency data, including Medicaid, Behavioral Health, Health Policy & Analytics, Public Health, Equity & Inclusion, Oregon State Hospital, Tribal Affairs, and Agency Operations Divisions.

The Oregon Department of Human Services may be moderately impacted and will be engaged where shared systems, shared data governance structures, or joint OHA-ODHS governance actions are involved. The Office of Information Services will be a key partner for technology implementation, security, integration, cloud services, architecture alignment, and data pipelines.

9. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

10. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

The Oregon Department of Human Services may be moderately affected where OHA and ODHS share data assets, governance structures, or data management standards.

Oregon Health Authority: 2027-29 Policy Package

The POP does not directly impact local or tribal governments. Tribal and local government partners may benefit indirectly over time from improved consistency, documentation, and transparency in OHA's data through more consistent data definition, clearer stewardship contracts, improved data sharing documentation, and more transparent request tracking.

11. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

Yes, this proposal supports the recommendations related to data management and outcomes reporting in the following SOS audits:

- [2025-29](#): Measure 110 Lacks Stability, Coordination, and Clear Results
- [2025-14](#): Oregon Faces Challenges in Addressing Gaps in the Behavioral Health Crisis System
- [2023-39](#): Oversight and Accountability Council Funding and Delivery of Measure 110 Substance Use Disorder Services Shows Progress, but Significant Risks Remain
- [2023-03](#): Too Early to Tell: The Challenging Implementation of Measure 110 Has Increased Risks, but the Effectiveness of the Program Has Yet to Be Determined
- [2020-32](#): Chronic and Systemic Issues in Oregon's Mental Health Treatment System Leave Children and Their Families in Crisis

Staffing and fiscal impact

Implementation date(s): 11/1/2027

End date (if applicable): N/A

Oregon Health Authority: 2027-29 Policy Package

12. What assumptions affect the pricing of this policy package?

Pricing is based on the following assumptions:

- OHA will implement a Data Management Platform with Data Catalog capabilities.
- OHA will implement an integrated data-sharing agreement and request-management capability, either as part of the Data Management Platform or through an integrated software solution.
- OHA will implement a Data Indexing and Entity Resolution module to support linking records across systems and data assets.
- Up to five priority data sources will be ingested into the OHA Data Environment during the biennium.
- Nine new positions are needed by Q4 of 2027 to implement, operate, and sustain the platform and related data modernization and management programs.
- Priority domains and datasets will be identified and made available for cataloging and onboarding in a timely manner.
- Agency leadership will continue to support resource assignment, stewardship participation, and scaling of the initiative.
- Data owners, subject matter experts, and data stewards will be available to support implementation and ongoing operations.
- Viable software solutions and implementation partners are available in the market.
- The RFQ and RFP processes will result in contracts that support pilot, implementation, knowledge transfer, standard operations procedures, training, and early scale.
- Security, privacy, accessibility, cloud, enterprise architecture, and OIS requirements will be met before broader platform access or expansion.

Oregon Health Authority: 2027-29 Policy Package

- OHA and OIS will have sufficient capacity to support procurement, implementation, system integration, data onboarding, and technical operations.
- Implementation complexity may vary depending on source system readiness, availability of metadata, data quality, technical integration needs, privacy and security requirements, and steward availability.
- Ongoing funding will be required to maintain staff, subscriptions, platform support, stewardship workflows, catalog quality, training, and adoption.

13. Will there be new responsibilities for OHA and/or Shared Services? Specify which programs and describe their new responsibilities.

Yes. The Office of Data Strategy & Operations will be responsible for operating the Data Management Platform, maintaining the data catalog, managing metadata and glossary standards, coordinating data stewardship workflows, supporting adoption across divisions, managing data-sharing agreement and request-management workflows, supporting data indexing and entity resolution, and coordinating priority data source ingestion into the OHA Data Environment.

The Office of Information Services will have related responsibilities for technical implementation, system integration, security, cloud services, architecture alignment, platform support, and data pipeline operations.

14. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

Oregon Health Authority: 2027-29 Policy Package

15. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This POP includes 9.00 FTE new permanent positions. Existing positions are not expected to be modified to include new required skills, and current staffing does not have capacity. The requested positions are necessary to implement, operate, and maintain the investments included.

Requested Positions Include:

- 4 x OPA 2 – Data Stewardship and Engagement Analysts

These positions will engage with data stewards across the agency and coordinate how stewards participate in Data Catalog implementation, operations, and maintenance. They will support adoption, assist with metadata and definition development, guide programs through stewardship workflows, and help OHA program data stewards migrate existing and future data-sharing documentation and associated workflows into the Data Sharing Documentation and Management software.

- 1 x ISS 8 – Data Environment and Catalog Architect and Librarian

This position will design, configure, and operate the agency's data catalog by establishing metadata standards, business glossary structures, tags and taxonomy, dataset profiles, search configuration, onboarding workflows, and catalog maintenance processes. They will also support ingestion of priority data sources into the OHA Data Environment by defining onboarding patterns, technical handoffs, and requirements to ensure ingested datasets are structured, governed, and ready for discovery and reuse.

Oregon Health Authority: 2027-29 Policy Package

- 2 x ISS 6 – Data Catalog Technicians

These positions will keep the data catalog accurate, current, and usable as new assets are onboarded. They will maintain core metadata, including descriptions, ownership, access notes, refresh cadence, and links; validate catalog entries against standards; monitor for stale or incomplete documentation; and escalate complex catalog configuration or integration issues. They will also support data ingestion activities by coordinating onboarding tasks, supporting documentation, conducting validation against required standards, testing data structures, and troubleshooting issues related to new data sources.

- 1 x PM 2 – Data Management Project Manager

This position will manage projects related to the Data Management Platform, Data Catalog, data-sharing capability, entity resolution module, and data ingestion cycles. Given the scope of data fragmentation across OHA, this role is necessary from a long-term strategic operations perspective. They will manage timelines, dependencies, risks, partner coordination, vendor activities, and milestones.

- 1 x ITM 2 – Data Environment & Management Manager

This position will manage the Data Environment and Data Management staff and related operational workstreams. The position will be accountable for delivery, operations, and adoption of the data management platform across OHA, within the OHA Data Environment, as well as OHA Data Environment strategic growth. Responsibilities will include setting priorities and roadmaps, managing vendor and implementation performance, contract administration, coordinating with OIS and governance partners on security and standards, and ensuring sustainable day-to-day execution of platform modules and related programs.

Oregon Health Authority: 2027-29 Policy Package

16. What are the start-up and one-time costs?

Start-up and one-time costs include the initial implementation, configuration, procurement, integration, and onboarding activities required to establish the Enterprise Data Management Platform, data catalog, data sharing agreement and request management capabilities, Data Indexing and Entity Resolution module, and priority data set ingestion into the OHA Data Environment.

Start-up and one-time costs do not include any licensing or usage-based technology expenses. Those represented as on-going costs.

The start-up and one-time implementation service estimates a total of \$1,250,000, with a 90/10 federal fund split.

Component	General Fund	Federal Fund	Estimated Cost
Data Management Platform/Data Catalog Implementation Costs	\$30,000	\$270,000	\$300,000
Data Sharing Agreement and Request Tracking Implementation Costs	\$10,000	\$90,000	\$100,000
Data Indexing and Entity Resolution Module Implementation Costs	\$10,000	\$90,000	\$100,000
Ingestion of up to 5 priority data sources into the OHA Data Environment	\$75,000	\$675,000	\$750,000
Total Startup Technology/Services Estimate @ 90/10 Split	\$125,000	\$1,125,000	\$1,250,000

Oregon Health Authority: 2027-29 Policy Package

These costs are estimated implementation services, configuration, integration, data source onboarding, catalog setup, metadata and glossary structure, stewardship workflows, access guidance, documentation, testing, training, and transition to operations. Size and complexity of the data sources may require additional funding,

17. What are the ongoing costs?

Ongoing costs include staffing and technology licensing and usage costs necessary to sustain operations over time.

The total estimated cost for 9 FTE in the 2027-2029 biennium is \$3,150,000. Position costs are expected to be ongoing because the platform and related data modernization and management programs require sustained operational capacity after implementation.

The technology licensing and usage costs for 2027-2029 biennium are estimated \$750,000. This covers expected platform subscriptions, maintenance, support, and usage-based software costs.

The 2027-2029 biennium ongoing costs are calculated with a 90/10 federal fund split.

Component	General Fund	Federal Fund	Estimated Cost
Data Management Platform/Data Catalog Licensing & Usage Costs	\$45,000	\$405,000	\$450,000
Data Sharing Agreement and Request Tracking Usage Costs	\$15,000	\$135,000	\$150,000

Oregon Health Authority: 2027-29 Policy Package

Data Indexing and Entity Resolution Module Licensing & Usage Costs	\$15,000	\$135,000	\$150,000
9 FTE	\$315,000	\$2,835,000	\$3,150,000
Total Initial On-going Cost Estimate @ 90/10 Split	\$390,000	\$3,510,000	\$3,900,000

Relating to the on-going costs as it relates to post 2027-2029 biennium, as the project work transitions from implementation and into maintenance and operations, the federal funding split will shift from 90/10 to 75/25. This future transition has not been represented in the above calculations.

18. What reductions will you use to offset the costs of this work and maintain budget neutrality?

No reductions have been identified to offset the cost of this work. This POP is not budget neutral.

The request is scalable if a lower funding level is required.

19. What are the sources of funding (revenue) and the funding split (GF/OF/FF) for each part of the investment as well as the offset/reduction?

The investment described in this POP would be funded using enhanced federal matching funds from the Centers of Medicare and Medicaid Services. Federal funding would occur at 90% of costs with the State of Oregon contributing 10%.

Oregon Health Authority: 2027-29 Policy Package

20. What are the potential savings (above the offset to pay for the investment)?

No direct savings are currently being tracked as an offset to pay for the investment. However, the POP is expected to produce operational efficiencies, avoided costs, and risk reduction over time.

Potential efficiency-based savings:

- Reduced staff time spent locating data, identifying owners, interpreting definitions, understanding lineage, and determining whether data may be shared.
- Reduced duplication of data inventories, manual tracking spreadsheets, one-off documentation tools, and program-specific data discovery processes.
- Reduced rework caused by inconsistent definitions, unclear data ownership, incomplete metadata, or duplicative data requests.
- Reduced duplication across data repositories through indexing, entity resolution, and better visibility into existing data assets.
- Improved data quality and timeliness of equity focused analysis, supporting earlier identification of disparities and more targeted program action.
- Reduction of reporting administrative burden by community partners and contracted service providers.

Oregon Health Authority: 2027-29 Policy Package

RACIAL EQUITY IMPACT STATEMENT (REIS) WORKSHEET: POLICY OPTION PACKAGE (POP) QUESTIONS

OHA POP #414: OHA Data Management Platform

Program managers responsible for the POP: Please answer the questions below for every POP being proposed in your agency request budget. To fill out this worksheet, download a copy of this worksheet and type your answers below each question.

Program Overview

1. Please describe the POP being proposed.

POP Title: OHA Data Management Platform

OHA, Agency Operations, Office of Data Strategy & Operations

This Policy Option Package supports OHA's continued effort to modernize data related operations, tools, and governance capacity through the implementation and sustained operation of an Enterprise Data Management Platform with robust Data Catalog capabilities. The investment includes a Data Management Platform with Data Catalog functionality, integrated data-sharing agreement and request-management capability, Data Indexing and Entity Resolution, ingestion of up to five priority data sources into the OHA Data Environment (ODE), prioritized by the OHA Data environment Steering Committee, and nine dedicated positions to operate and sustain ODE and the Data Management Platform.

The platform will help OHA staff, data stewards, governance bodies, and authorized partners find, understand, govern, trust, and appropriately use data. It will create a searchable inventory of priority data assets, shared business definitions, documented ownership and stewardship roles, lineage visibility, access guidance, data quality information, and workflows for documenting and tracking data-sharing requests and agreements.

2. Why is the POP being proposed?

OHA's ability to identify and reduce health inequities is constrained by a highly fragmented data environment and limited visibility into the rules for using and sharing data. Hundreds of repositories exist across OHA divisions and programs. These repositories often contain overlapping and inconsistent datasets, with unclear ownership, definitions, lineage, access requirements, and stewardship responsibilities.

As a result, staff and partners often cannot quickly determine what data exists, what it means, whether it can be trusted, who is responsible for it, whether it can be shared, or what restrictions apply. Programs frequently rely on informal knowledge, personal networks, one-off documentation, and repeated discovery efforts. This creates avoidable administrative burden, duplicates work, slows reporting and analysis, and increases the risk that different programs will interpret or apply the same data in different ways.

The need is especially important for data used to understand access, eligibility, service utilization, outcomes, population health, behavioral health, service delivery patterns, and disparities across communities. When data elements are inconsistently defined or poorly documented, it becomes harder to compare results, explain measures, identify disparities, and support transparent decision-making.

This POP addresses those barriers by creating a shared enterprise approach to data discovery, definitions, stewardship, lineage, access guidance, and appropriate sharing. The investment will improve OHA's ability to identify disparities, monitor outcomes, support equity-focused analysis, and make timely, accountable decisions. It will also reduce inequities in organizational capacity by making trusted data easier to find and understand for programs that may not have the same technical staffing, institutional knowledge, or informal networks as other parts of the agency.

Consultation

3. Who is completing this REIS?

Lead Data Management Coordinator
Office of Data Strategy & Operations, OHA Data Office

4. Who is responsible for tracking equity outcomes? What method(s) are they using to track outcomes?

Responsibility for tracking equity outcomes will be shared across the Office of Data Strategy & Operations units, OHA's Equity and Inclusion Partners, OIS, program data stewards, and applicable data governance bodies, including the OHA-ODHS Data Governance Council or designated subgroup.

Because this POP funds internal data infrastructure rather than direct services, outcomes will focus first on whether OHA improved the data conditions needed to identify and address inequities. Measure may include the number of priority domains cataloged, equity-relevant glossary terms documented, stewardship roles assigned, priority assets with lineage and access guidance, stewards trained, platform adoption, and data-sharing requests tracked through the new workflow.

Over time, these measures will help OHA determine whether the platform is improving the agency ability to identify disparities, improve the reliability of equity-related reporting, and support accountable decision-making across programs. Baselines and final targets will be refined during implementation, pilot onboarding, and transition to maintenance and operations.

5. Does your agency have a DEIB practitioner (Yes or no)? Yes.
- a. If yes, describe how you collaborated with them on this REIS.
 - b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

Yes, OHA has a DEIB practitioner.

No, the DEIB practitioner was not directly involved in drafting this REIS but they were involved in activities and discussion leading up to the drafting of the POP.

Because this POP is an internal-facing data infrastructure investment and does not directly change services, benefits, eligibility, or community funding, this REIS was developed using prior equity-related planning and partner input. That work included Equity & Inclusion participations in the underlying POP concept (Data Catalog/Data Management), OHA and ODHS listening sessions, requirements gathering, the Data Catalog proof of concept, the Enterprise Data Catalog RFI, and the Data Sharing Landscape Assessment.

These prior efforts identified that fragmented data, inconsistent definitions, unclear lineage, and uneven access guidance limit OHA's ability to identify disparities and support equity-focused decision-making.

6. Did you collaborate with your agency's data analysts, community engagement managers, outreach managers, and/or others that regularly interact with underserved and marginalized communities on this REIS? (Yes, no, or not applicable)

- a. If yes, describe how you collaborated with them on this REIS.**
- b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).**

Yes, this POP has been informed by broad internal partner engagement across OHA, ODHS, and OIS, including business partners, data stewards, technical staff, and programs that rely on data for reporting, oversight, policy decisions, service improvement, and equity analysis. Prior work included a Landscape Assessment on Data Quality, Inventory, and Catalog; data management tool requirements gathering and persona development; a TABI Data Catalog Proof of Concept; Request for Information 6106 for an Enterprise Data Catalog; and a Data Sharing Landscape Assessment.

These efforts included listening sessions, requirements gathering, proof-of-concept work, vendor demonstrations, and partner feedback. They helped identify current barriers such as difficulty finding data, unclear definitions, inconsistent documentation, unclear stewardship, and manual data-sharing processes. These

barriers directly affect the ability of data analysts, program staff, and leaders to identify and respond to inequities.

The project team will continue engaging data analysts, program partners, data stewards, Equity and Inclusion, and community-facing program areas when selecting priority domains and documenting equity-relevant data.

Community Engagement and Data

7. Identify the specific racial groups and communities that may be impacted by this POP, both directly and indirectly. In your answer, include responses to the following questions:

- a. How did you identify these impacted groups? This POP is internal data infrastructure and data management investment, and therefore does not directly impact eligibility, benefits, funding, or service for any specific racial or ethnic group.**
- b. What data are you using to validate your assessment? If possible, use outreach and engagement feedback to gather information and insight.**
- c. If possible, disaggregate the data by race, ethnicity, geography, income level, and other relevant characteristics. If disaggregated data is not available, please describe why.**
- d. How are communities impacted by this POP? What are the disproportionate impacts? Please be specific.**

This POP does not directly change services, benefits, eligibility, or funding for a specific racial or ethnic group. It is an internal data infrastructure investment. However, it may indirectly affect all communities served by OHA by improving the agency's ability to identify disparities, monitor outcomes, and make data-informed decisions.

Communities most likely to benefit indirectly are those experiencing health inequities, including Black and African American communities; American Indian and Alaska Native communities; Latino/a/x and Hispanic communities; Asian communities; Native Hawaiian and Pacific Islander communities; immigrant and

refugee communities; people with limited English proficiency; rural and frontier communities; people with disabilities; LGBTQIA2S+ communities; and people with low incomes.

OHA does not have enough disaggregated data within this POP to determine which racial or ethnic groups are most impacted by the lack of enterprise data management. Building that capability is part of the purpose of this investment. The platform will help make priority data assets, definitions, ownership, lineage, access rules, and quality considerations more visible and consistent, which will support future disparity analysis.

8. How did you ensure multiple perspectives were part of the decision-making process for this POP? In your answer, include responses to the following questions:

- a. Identify how you have or are planning to engage multiple perspectives and impacted groups to provide feedback on this POP (e.g. program design, budget, policy decisions, etc.). Please give specific examples.**
- b. If community engagement is not part of your approach, please explain why and what you did instead to incorporate community perspectives. In your response, describe the following: the decision-making process used to determine engagement was not feasible or appropriate, the specific barriers (beyond general time or capacity), and how you mitigated the risk of missing community input (e.g. using existing feedback, partnering with trusted organizations, review from advisory bodies, etc.).**

Multiple perspectives were included through partner-informed planning with OHA, ODHS, OIS, program partners, data stewards, business users, technical staff, and governance partners. Specific activities included data quality and catalog landscape assessment work, partner listening sessions, requirements gathering, persona development, a Data Catalog proof of concept, an Enterprise Data Catalog RFI, vendor demonstrations, and a Data Sharing Landscape Assessment.

Direct community engagement was not the primary approach for this POP because the investment is internal-facing infrastructure, uses existing and administrative data and does not directly change member services or benefits. To mitigate the risk of missing community perspectives, the POP relies on input from Equity and Inclusion, community-facing program areas, data analysts, and data stewards who support equity-related reporting and program decision-making. Community engagement will be most appropriate at the program or data-domain level, where specific data definitions, measures, and reporting uses can be tied to community needs.

Impacts and Accountability

9. If this POP is not funded, please describe the following:

a. Which racial or ethnic communities would be most impacted.

b. How disparities would likely persist or worsen.

If this POP is not funded, OHA will continue to operate in a fragmented data environment with inconsistent definitions, unclear ownership, limited lineage visibility, and distributed data-sharing processes. The communities most impacted would likely be those already experiencing health inequities and those most dependent on OHA's ability to identify disparities and target program improvements.

OHA does not currently have enough disaggregated evidence within this POP to rank which racial or ethnic communities would be most impacted. However, without this investment, disparities may persist because staff would continue to spend time rediscovering data, reconciling inconsistent definitions, and navigating unclear access rules instead of using trusted data to identify and address inequities.

Without a shared enterprise data management platform, OHA's equity-related reporting and analysis would remain slower, less consistent, and more dependent on informal knowledge. This could delay the identification of disparities in access, utilization, quality, outcomes, and service delivery.

10. Who will be monitoring racial equity outcomes over time for this POP?

- a. How will progress be reported?**
- b. How will leadership be informed of equity impacts?**
- c. How will the community be involved in monitoring outcomes?**

The OHA Office of Data Strategy and Operations will monitor implementation and equity-supporting outcomes over time, in coordination with Equity and Inclusion, OIS, program data stewards, and applicable governance bodies. The OHA-ODHS Data Governance Council or a designated subgroup will help guide priority domains, stewardship expectations, and data governance alignment.

Progress will be reported through project and governance reporting. Measures may include priority domains cataloged, equity-relevant glossary terms documented, steward training completion, lineage documentation, access guidance completion, platform usage, data-sharing requests tracked, and time required to identify authoritative data sources.

Leadership will be informed through regular implementation, adoption, and benefit updates. Community involvement will occur primarily at the program or data-domain level, where improved data definitions, access guidance, and reporting can be connected to specific community-facing programs, equity measures, and advisory processes.

Oregon Health Authority 2027-29 Policy Package

Division:	OHA
Program:	OHA-Wide
Policy package title:	OHA Savings and Reductions
Policy package number:	415
Related legislation:	Not applicable

Summary statement:

This POP captures the Oregon Health Authority's agency-wide savings and reductions strategy developed to support a budget-neutral 2027-29 Agency Request Budget. Rather than assigning specific offsets to individual policy option packages, OHA evaluated investments and reductions holistically across the agency to ensure that total proposed investments are fully offset by agency-wide savings, efficiencies, and reprioritization of existing resources. The identified offsets reflect difficult prioritization decisions and include reductions to existing programs and planned expansions that may result in reduced service capacity, delayed program expansion, or other programmatic impacts. This approach reflects OHA's commitment to fiscal stewardship while continuing to prioritize investments that advance the agency's highest priorities and mission.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	(\$26,675,017)	(\$679,898)	(\$1,204,532)	(\$28,559,447)	0	0.00

Oregon Health Authority: 2027-29 Policy Package

Purpose

1. What problem is OHA trying to fix or solve?

The 2027-29 budget environment requires agencies to prioritize existing resources while continuing to address emerging needs and maintain critical services. To advance strategic investments within a constrained fiscal environment, OHA conducted an agency-wide review of programs, operations, and spending to identify savings and reductions that could offset proposed investments. Rather than evaluating reductions individually, OHA developed a comprehensive portfolio of offsets that collectively fund the agency's highest-priority investments while maintaining overall budget neutrality. In developing the collection of identified offsets, OHA considered both the resources available for reprioritization and the potential programmatic and service impacts of proposed reductions. Some identified offsets therefore represent difficult tradeoffs between maintaining existing or planned services and advancing other high-priority investments.

2. What would this policy package buy and how and when would it be implemented?

This POP does not represent a new investment or expansion of services. Implementation will occur beginning July 2027. Specific reductions will be implemented by the applicable divisions in accordance with legislative direction and agency budget decisions.

Oregon Health Authority: 2027-29 Policy Package

3. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity¹ or equitable health outcomes? How does this policy package further OHA's mission and align with its strategic plan?

By aligning limited resources with OHA's highest priorities, this POP supports continued investment in programs and services that advance health equity. However, some proposed reductions may also affect programs serving populations experiencing health inequities. These impacts reflect the difficult tradeoffs required to maintain a budget-neutral request and are described further in the specific reductions below.

Quantifying results

4. What are the long-term desired outcomes?

Ensure OHA's limited resources remain aligned with its highest priorities through a sustainable, budget-neutral approach.

5. What are the envisioned outputs of this investment? How will OHA measure the impacts on health inequities through this policy package?

Outputs include implementation of identified agency-wide savings and reductions sufficient to offset proposed investments included in the 2027-29 Agency Request Budget. Impacts will vary by reduction and will be monitored through existing program performance measures and reporting, where applicable.

¹ Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability**, gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

Oregon Health Authority: 2027-29 Policy Package

How achieved

6. What actions have occurred to resolve the issue prior to requesting a policy package?

OHA undertook a prioritization effort to align limited resources with the highest-value programs and strategic priorities while maintaining a budget-neutral request.

7. What alternatives were considered and what were the reasons for rejecting them?

Savings and reductions were evaluated holistically, and an agency-wide offset strategy best represents OHA's budgeting approach to align resources with the highest priorities while maintaining overall budget neutrality.

8. What other agencies, programs, community partners or stakeholders are collaborating on this policy package?

Development of this POP involved collaboration across OHA's divisions and programs.

9. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

Yes. Implementation of the proposed reduction to peer respite centers would require statutory changes. OHA is also evaluating whether statutory changes would be necessary to implement the proposed reductions in other programmatic areas.

Oregon Health Authority: 2027-29 Policy Package

10. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Some proposed reductions may affect local government partners. In particular, reductions to Public Health Modernization would reduce funding available to Local Public Health Authorities and may affect local public health staffing and service capacity.

11. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Staffing and fiscal impact

Implementation date(s): Various

End date (if applicable): Various

12. What assumptions affect the pricing of this policy package?

Pricing assumes implementation of the identified agency-wide savings and reductions at various start dates based on feasibility. Individual reductions will be reflected in the appropriate divisions and fund types consistent with legislative approval and final budget development.

13. Will there be new responsibilities for OHA and/or Shared Services? Specify which programs and describe their new responsibilities.

No new responsibilities are created.

Oregon Health Authority: 2027-29 Policy Package

14. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

Some proposed reductions would affect service capacity or the number of individuals served. These include removing two planned IIBHT pilots, reducing the number of peer respite centers, reducing funding for the Health Care Provider Incentive Program, and reducing Public Health Modernization funding. The specific number of individuals affected will vary by program and implementation of the final approved reductions, if applicable.

15. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

No new positions are required to implement this POP. Some reductions may result in reassignment of existing positions.

16. What are the start-up and one-time costs?

There are no start-up costs associated with this POP. This POP includes both one-time and ongoing reductions. The duration of each reduction depends on the nature of the underlying expenditure and the investment it is intended to offset

17. What are the ongoing costs?

There are no new ongoing costs associated with this POP. Rather, this POP captures the savings and reductions used to maintain a budget-neutral Agency Request Budget.

Oregon Health Authority: 2027-29 Policy Package

18. What reductions will you use to offset the costs of this work and maintain budget neutrality?

The reductions reflected in this POP represent the cumulative agency-wide savings identified through OHA's budget development process.

Oregon Health Authority: 2027-29 Policy Package

Savings and Reductions	General Fund	Other Funds	Federal Funds	Total Funds
Behavioral Health Division (BHD)	\$ (9.56)	\$ -	\$ -	\$ (9.56)
Intensive In-home Behavioral Health Treatment - removing 2 pilots	\$ (5.00)	\$ -	\$ -	\$ (5.00)

Office of Program Integrity contract savings	\$ (0.77)	\$ -	\$ -	\$ (0.77)
Public Health Division (PHD)	\$ (6.57)	\$ -	\$ -	\$ (6.57)
Reduce Public Health Modernization funding by 5%	\$ (6.05)	\$ -	\$ -	\$ (6.05)
School-Linked Telehealth	\$ (0.52)	\$ -	\$ -	\$ (0.52)
Statewide Assessments and Enterprisewide Costs (SAEC)	\$ (1.24)	\$ (0.39)	\$ (0.85)	\$ (2.48)
Reducing funding in IT Direct for equipment purchasing	\$ (0.84)	\$ (0.34)	\$ (0.70)	\$ (1.88)
Facilities rent savings	\$ (0.40)	\$ (0.05)	\$ (0.15)	\$ (0.60)
Totals	\$ (26.68)	\$ (0.68)	\$ (1.20)	\$ (28.56)

Oregon Health Authority: 2027-29 Policy Package

19. What are the sources of funding (revenue) and the funding split (GF/OF/FF) for each part of the investment as well as the offset/reduction?

For the reductions impacting Other Funds and Federal Funds, the work is on behalf of the entire agency and uses cost allocation to distribute costs to revenue sources.

20. What are the potential savings (above the offset to pay for the investment)?

No additional savings beyond the identified offsets are assumed as part of this POP.

Fiscal Detail

See table on previous detail for details by division and fund type.

RACIAL EQUITY IMPACT STATEMENT (REIS) WORKSHEET: POLICY OPTION PACKAGE (POP) QUESTIONS

OHA POP #415: OHA SAVINGS AND REDUCTIONS

Program managers responsible for the POP: Please answer the questions below for every POP being proposed in your agency request budget. To fill out this worksheet, download a copy of this worksheet and type your answers below each question.

Program Overview

1. Please describe the POP being proposed:

This policy package captures the agency-wide savings and reductions identified by OHA to support a budget-neutral 2027-29 Agency Request Budget.

2. Why is the POP being proposed?

OHA developed this policy package to maintain a budget-neutral Agency Request Budget while preserving investments that best advance the agency's mission and strategic priorities.

Consultation

3. Who is completing this REIS?

OHA

4. Who is responsible for tracking equity outcomes? What method(s) are they using to track outcomes?

OHA

5. Does your agency have a DEIB practitioner (Yes or no)? Yes.

- a. If yes, describe how you collaborated with them on this REIS.

- b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

Because this policy package documents an agency-wide budget strategy rather than implementing a new program or service, no specific DEIB consultation was conducted for this package.

6. Did you collaborate with your agency's data analysts, community engagement managers, outreach managers, and/or others that regularly interact with underserved and marginalized communities on this REIS? (Yes, no, or not applicable)

- a. If yes, describe how you collaborated with them on this REIS.

Yes. This policy package reflects agency-wide fiscal decisions rather than programmatic or service delivery changes.

- b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

Community Engagement and Data

7. Identify the specific racial groups and communities that may be impacted by this POP, both directly and indirectly. In your answer, include responses to the following questions:

The intent is to preserve OHA's highest-priority investments by identifying efficiencies and lower-priority reductions elsewhere in the agency. OHA sought to minimize impacts on services that support communities experiencing the greatest health inequities.

8. How did you ensure multiple perspectives were part of the decision-making process for this POP? In your answer, include responses to the following questions:

- a. Identify how you have or are planning to engage multiple perspectives and impacted groups to provide feedback on this POP (e.g. program design, budget, policy decisions, etc.). Please give specific examples.

Numerous parties were consulted to develop the POP. Decisions were made collectively with the goal of maintaining OHA's highest-priority services and strategic investments while achieving a balanced budget.

- b. If community engagement is not part of your approach, please explain why and what you did instead to incorporate community perspectives. In your

response, describe the following: the decision-making process used to determine engagement was not feasible or appropriate, the specific barriers (beyond general time or capacity), and how you mitigated the risk of missing community input (e.g. using existing feedback, partnering with trusted organizations, review from advisory bodies, etc.).

Community priorities are reflected through the individual policy option packages that this strategy supports.

Impacts and Accountability

9. If this POP is not funded, please describe the following:

- a. Which racial or ethnic communities would be most impacted.

Without a comprehensive agency-wide savings strategy, OHA would have fewer options to preserve investments designed to improve health outcomes and reduce disparities.

- b. How disparities would likely persist or worsen.

See above.

10. Who will be monitoring racial equity outcomes over time for this POP?

OHA

- a. How will progress be reported?

Implementation of the agency's savings strategy will be monitored through established budget oversight and financial reporting.

- b. How will leadership be informed of equity impacts?

Leadership will receive regular updates regarding implementation of the reductions, resource alignment, and any significant operational impacts identified through ongoing budget monitoring.

- c. How will the community be involved in monitoring outcomes?

Community engagement will continue through the individual programs and investments supported by the overall Agency Request Budget.

Oregon Health Authority 2027-29 Policy Package

Division:	Oregon State Hospital (OSH)
Program:	Facilities and Support Operations
Policy package title:	OSH Capital Improvement and Deferred Maint.
Policy package number:	416
Related legislation:	ORS 291.215

Summary statement:

This policy option package provides the support OSH needs to ensure business continuity with investments to reduce long-term escalation in needed capital outlay as building systems are added to the deferred maintenance backlog, and the need to modernize outdated building systems, infrastructure, and related equipment. It is also legislatively required, per ORS [291.215](#).

This policy package continues to build on addressing the facility/infrastructure maintenance and modernization needs. It also addresses the need for additional staffing capacity to ensure effective building portfolio asset management and contract administration for on-going maintenance and public improvement projects,

OSH's Peter Courtney Salem Campus consists of 1.2M ft² of buildings and structures, including 23 cottages, with a Current Replacement Value (CRV) of \$713M. The Junction City Campus is 227K ft², with a CRV of \$164M. The Pendleton Cottages Campus facility consists of several older buildings, totaling

Oregon Health Authority: 2027-29 Policy Package

39K ft², and a CRV of \$9M. This portfolio of buildings and structures support a psychiatric hospital system that inspires hope and promotes safety and supports recovery for all. The State Hospital system serves more than 1,800 people every year and employs more than 2,900 support staff.

All of OSH's facilities are at a crossroad where its facilities and dynamic in-patient care programming needs require a robust long-term investment strategy to ensure that it can effectively meet OHA's strategic plan – supporting Oregonians in need of mental health treatment. This policy package continues to build on addressing and supporting this strategic plan.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	\$7,333,792	\$13,495,000	\$0	\$20,828,792	3	2.76

Purpose

1. What problem is OHA trying to fix or solve?

OSH has a considerable volume of building systems and equipment at or near the end of their useful lifecycle that are at a point of replacement, requiring dedicated upkeep, modernization and

Oregon Health Authority: 2027-29 Policy Package

replacement beyond existing budget resources; equipment that supports the critical 24/7 level of care to patients needing intensive psychiatric treatment for severe, acute, and persistent mental illness.

OSH must continually and consistently improve, maintain and replace its aged infrastructure, buildings systems and equipment to provide a safe and secure environment for patients and staff, as well as maintain business continuity. Lifecycle replacement of equipment also plays a crucial role in the requirement for accreditation by the Joint Commission and for Medicare reimbursement through the Centers for Medicare and Medicaid Services (CMS), which supports 5% of OSH's biennial budget. Most of the existing equipment was procured at the time when the new hospital facilities in Salem and Junction City began operations well over a decade ago; while other equipment was transferred from the old facility that was demolished. The Peter Courtney Salem Campus began its operations in the new facility in 2011; the Junction City Campus in 2013.

This policy package supports OSH's on-going deferred maintenance and capital improvement investment needs. The objective of this policy package is to support OSH's long-term strategic capital planning effort for its facilities portfolio at its Salem, Junction City, and Pendleton facilities; facilities that support the mental healthcare services to Oregonians by providing therapeutic, evidence-based, patient-centered treatment that focuses on recovery and community reintegration in a safe environment.

2. What would this policy package buy and how and when would it be implemented?

This policy package buys permanent full-time positions and bonded capital improvement and deferred maintenance investments that will support OSH's aging facility infrastructure needs. The objective of these investments are to ensure that all OSH facilities can meet programming needs, promote a safe and healthy workplace, are functional, are nimble to accommodate programming changes, and resilient

Oregon Health Authority: 2027-29 Policy Package

during emergency declarations (e.g., climate change, wildfires, power outages, etc.). These investments will update, replace and maintain critical buildings, systems and equipment at or near the end of their useful.

There are 56 individual Capital Improvement projects and 22 Deferred Maintenance projects. These are categorized below into general groups and include:

Capital Improvement (XI-Q Bonds)	
Professional Services	
Salem	Master planning, building assessment, specific architectural and engineering
Junction City	Master planning, building assessment
Pendleton	Master planning, building assessment, specific architectural and engineering
Physical Plant Operations	
Salem	Building control components, HVAC, lighting, environmental, boiler replacement
Junction City	Building control components, HVAC, lighting, environmental, nurse call system
Pendleton	Underground storage tank removal, HVAC, environmental
Safety and Security	
Salem	Security cameras, fire system updates, security door maglocks
Junction City	Security cameras, fire system updates, personal medical transmitter renewal
Pendleton	Windows and security screens, retaining wall
Deferred Maintenance (General Fund)	
Salem	Environmental components, chiller repair or replacement, backup power equipment, concrete and fencing replacement

Oregon Health Authority: 2027-29 Policy Package

The position investments include:

- One (1) permanent full-time Construction Project Manager 2 (CPM2): this position will support the schematic, design, and construction phases of the projects listed herein. Additional work includes contract development, and contract administration, and all contractor-related business needs.
- Two (2) permanent full-time Procurement & Contracts Specialist 2 (PCS2): these positions will provide contract development, solicitation, and administration support for all of OSH's public improvement projects, including minor and major maintenance, capital improvement and capital construction projects, and related professional services contracting. Due to the specialized operations and business needs associated with a psychiatric care hospital environment, contract experience that is focused on this business need is imperative to ensure that all procured goods and services are realized in a timely manner and are effective. This type of procurement expertise and position focus does not exist within the agencies central Office of Contracts & Procurement (OCP), OSH has partnered with OCP on the planning of these positions.

The investments are totaled in their respective categories below:

27-29 INVESTMENT	
Capital Improvement (ORS 291.215¹)	\$13.3M
Deferred Maintenance (ORS 291.215¹)	\$4M
Permanent Positions	\$0.8M
Costs of Issuance and Debt Services	\$2.7M
TOTAL	\$20.8M
¹ ORS 291.215 : Each biennium, the Governor shall propose as part of the Governor's recommended budget an amount for deferred maintenance and capital improvements on existing state-owned buildings and	

Oregon Health Authority: 2027-29 Policy Package

infrastructure that is equivalent to at least two percent of the current replacement value of the state-owned buildings and infrastructure.

3. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity¹ or equitable health outcomes? How does this policy package further OHA's mission and align with its strategic plan?

OSH strives to achieve the highest standards and outcomes in all aspects of its work. Engaged stewardship of the public trust and public resources includes maintaining OSH's facilities portfolio to the highest standards and investing in regulatory and infrastructure improvements to meet the constantly evolving needs of patients and staff.

OSH serves one of the most marginalized populations, the mentally ill. Maintaining well-kept, safe and functional treatment environments for Oregonians in need supports OHA's strategic plan to eliminate health inequities by ensuring that all people and communities can achieve optimum physical, mental, and social well-being through partnerships, prevention, and access to quality and affordable health care.

This policy package supports the continued investments needed to support OSH's mission to provide the necessary and statutorily required healthcare services to Oregonians that have historically been discriminated and oppressed; being a fundamental component of the behavioral health system;

¹ Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability, gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.**

Oregon Health Authority: 2027-29 Policy Package

enhancing the treatment environment and providing preventive health services and acts as the foundational and core component of behavioral health in Oregon.

Without this policy package there is an elevated risk that OSH's facilities and operations will be less effective and functional, and limited in its ability to support its mandated mission.

Quantifying results

4. What are the long-term desired outcomes?

The objective of this policy package is to support the management of OSH's facilities infrastructure and site systems to ensure that they are safe, functional, resilient, and nimble to meet changing programming needs.

This investment is part of an overarching long-term strategic facilities investment plan to ensure that OSH's strategic plan can be realized and managed in perpetuity, especially as its facilities and site systems are aging. The investments that are submitted via this policy package are one part of a multi-part planning effort to ensure that all OSH's facilities are mission ready and to ensure uninterrupted business continuity.

It's important to note that the investments requested in this policy package reflect the required biennial request of an investment totaling at least 2% of its portfolio CRV (est. \$886M) (a requirement of [ORS 291.215](#)). OSH is implementing a long-term, data-based capital planning effort that reduces future unplanned maintenance costs, supports operational sustainability and continues compliance with regulatory requirements; all while being good stewards of state assets and continuing to provide a safe

Oregon Health Authority: 2027-29 Policy Package

and therapeutic environment of care to some of Oregon's most vulnerable, as well as a safe and conducive work environment where the patients and support staff can thrive.

This long-term capital planning objective adopts a facilities portfolio management system that will provide a dynamic facilities condition index as a measuring metric to support informed decision making as investments in minor, major, capital improvement, and capital construction projects load continuously increase, and to ensure business continuity and adaptability needs are supported.

The maintenance projections that are created by the Facilities Program are based on a tracked metric called the Facility Condition Index (FCI). The FCI is a standard facility management benchmark that is used to objectively assess the current and projected condition of a building asset and provide a means for comparisons of facility or building conditions, as well as allowing for renewal funding needs and comparisons. The FCI is the ratio of current year required renewal cost to current building replacement value, or in other words, a calculated measure of facility condition relative to its current replacement value expressed as a percentage. Based on this index, a structure's condition can be ranked as Good (0-5% FCI), Fair (5-10%), Poor (>10%) or Very Poor (>60%). An FCI of 60% or greater usually indicates that the structure should be replaced rather than renewed.

The fundamental drivers of this plan include:

- Effective long-range capital planning for maximizing the use and value of our facilities via a consistent 10-year planning vision.
- Being good stewards of our investments → this is where public investments are properly maintained to ensure occupant safety, being nimble as programming needs change or evolve, and the reduction of long-term operating costs.

Oregon Health Authority: 2027-29 Policy Package

- Designing for quality → good building design contributes to higher employee productivity and adaptability and enhanced public service.
- Right sizing our portfolio → sustainability and resiliency being very high priorities, and meeting agencies programming needs.
- Conveying our identity → ensuring that buildings have an image of accessibility and responsiveness (in-short, how adaptable buildings are to program changes).
- Emphasizing resiliency → ensuring that buildings are prepared to withstand catastrophic events – both natural (earthquake) and man-made (climate change which could affect HVAC loads, snow loads, etc.)
- Applying best practices when maintaining and planning for new facilities → for example, utilizing recurring master planning efforts to help facilitate and support the long-term need when planning for larger capital improvement and capital construction projects.
- Facility investment tool → effective investment strategy via a dedicated Facilities investment account (ORS [276.285](#)).

OSH is committed to comply with regulatory requirements and achieve good stewardship of state assets to support and provide a safe and therapeutic physical environment of care to Oregon's most vulnerable populations.

5. What are the envisioned outputs of this investment? How will OHA measure the impacts on health inequities of this policy package?

The replacement of critical depreciable assets helps ensure for a safe, secure, functional, and therapeutic environment for treating some of Oregon's most vulnerable populations.

Oregon Health Authority: 2027-29 Policy Package

The comprehensive agency portfolio facilities condition assessment and programming master plan will support the accuracy of OSH's strategic capital plan, ensuring that OSH remains a safe and therapeutic environment while mitigating the likelihood of building system failures and the subsequent disruption in operations.

How achieved

6. What actions have occurred to resolve the issue prior to requesting a policy package?

OSH has attempted to use budgetary resources to resolve lifecycle issues that continuously pose a challenge due to unplanned repair or replacement occurrences. The current strain on biennial operations and facilities managements budgets do not provide the resources to address and resolve the large replacement load.

With an estimated \$886M in structural assets, deferred maintenance (DM), capital improvement (CI), and capital construction (CC) investments to modernize OSH's buildings are a significant need. This is further supported by the fact that many of its newer facilities are well into their second decade of use, while the majority of its older structures are over 50 years old.

7. What alternatives were considered and what were the reasons for rejecting them?

There are no viable alternatives to lifecycle asset replacement and preventative maintenance replacement.

Oregon Health Authority: 2027-29 Policy Package

- 8. What other agencies, programs, community partners or stakeholders are collaborating on this policy package?**

None

- 9. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.**

None

- 10. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?**

None

- 11. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.**

No

Staffing and fiscal impact

Implementation date(s): Positions and services will be implemented
starting September 2027

Oregon Health Authority: 2027-29 Policy Package

End date (if applicable): Debt Services, 2037-2039; Positions are permanent

12. What assumptions affect the pricing of this policy package?

Inflation and other market price escalation, and the availability of services and supplies. Pricing of staff positions could vary due to cost of living increases and annual step increases.

13. Will there be new responsibilities for OHA and/or Shared Services? Specify which programs and describe their new responsibilities.

No

14. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No

15. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

The positions supporting this policy package consist of one permanent, full-time Construction Project Manager 2 and two permanent, full-time Procurement and Contract Specialist 2 positions.

This policy package is requesting the following staffing (FTE) capacity:

Oregon Health Authority: 2027-29 Policy Package

Classification	Class Title	Position Type	Implementation	Count	FTE	Fund
OAI C3268 AP	Construction Project Manager 2	Permanent Full Time	September 2027	1	0.92	GF
OAI C0437 AP	Procurement & Contract Specialist 2	Permanent Full Time	September 2027	1	0.92	GF
OAI C0437 AP	Procurement & Contract Specialist 2	Permanent Full Time	September 2027	1	0.92	GF

16. What are the start-up and one-time costs?

Start-up and one-time costs total \$4,175,435. They consist of the General Fund Deferred Maintenance requests, totaling \$4,010,260. These requests primarily focus on failing components of larger equipment or systems to ensure those larger scale items maintain operation. The remaining \$165,175 in General Fund start-up costs are related to costs of issuance for the XI-Q bonds.

17. What are the ongoing costs?

The current XI-Q Bond estimate expires in the 2037-39 biennium and totals \$19,147,106 after reimbursement of Debt Services.

For the 2027-29 biennium only, XI-Q Bond expenses (excluding Costs of Issuance in the prior section) are expected to total \$13,329,825 for projects and \$2,483,049 in Debt Services for a 2027-29 expense of 15,812,874 related to bond financing.

The three support positions, a 2027-29 biennium expense of \$840,483 for 22 months, will be permanent and ongoing to perform the same tasks in future years (and are not included in the above XI-Q Bond amounts).

The 2027-29 biennium total for XI-Q Bonds and positions is expected to be \$16,727,230.

Oregon Health Authority: 2027-29 Policy Package

18. What reductions will you use to offset the costs of this work and maintain budget neutrality?

Reductions will be represented in the OHA cost offset POP.

19. What are the sources of funding (revenue) and the funding split (GF/OF/FF) for each part of the investment as well as the offset/reduction?

The requested funding split for the 2027-29 investment is 35.4% GF and 64.6% OF. The Other Funds requested are to allow for proceeds of XI-Q bond sales to be expended.

General Fund Debt Services are estimated to total \$19,147,106 and be completed in 2037-39.

20. What are the potential savings (above the offset to pay for the investment)?

There are no direct savings resulting from this investment.

Oregon Health Authority: 2027-29 Policy Package

RACIAL EQUITY IMPACT STATEMENT (REIS) WORKSHEET: POLICY OPTION PACKAGE (POP) QUESTIONS

OHA POP #416: OSH CAPITAL IMPROVEMENTN AND DEFERRED MAINT.

Program managers responsible for the POP: Please answer the questions below for every POP being proposed in your agency request budget. To fill out this worksheet, download a copy of this worksheet and type your answers below each question.

Program Overview

1. Please describe the POP being proposed.

The Oregon State Hospital (OSH), operates and maintains a substantial portfolio of state-owned buildings and infrastructure that support Oregon's behavioral health system. As the steward of these public assets, OSH is responsible for ensuring that its facilities remain safe, functional, secure, and capable of supporting the delivery of high-quality psychiatric care to patients from across the state.

ORS 291.215 requires that the Governor's Recommended Budget include funding for deferred maintenance and capital improvements on existing state-owned buildings and infrastructure at a level equivalent to at least two percent (2%) of Current Replacement Value (CRV). The statute reflects the Legislature's recognition that consistent investment in facility renewal is necessary to preserve public assets, avoid the accumulation of maintenance backlogs, and reduce long-term costs associated with infrastructure deterioration.

The Oregon Department of Administrative Services further directs agencies that own state facilities to develop budget requests and policy packages sufficient to meet the 2% CRV investment standard established in ORS 291.215. This standard serves as a statewide benchmark for responsible asset management and long-term capital stewardship.

For Oregon State Hospital, maintaining funding at or above the 2% CRV level is critical because the hospital operates specialized treatment facilities that require reliable building systems, secure environments, and continuous compliance with healthcare, life-safety, accessibility, and accreditation requirements. Deferred maintenance of roofs, building envelopes, HVAC systems, electrical infrastructure, plumbing systems,

fire and life-safety systems, security infrastructure, and patient care environments increases operational risk and may negatively affect patient treatment, staff safety, regulatory compliance, and continuity of operations.

Failure to adequately fund deferred maintenance accelerates facility degradation, increases future capital liabilities, and ultimately results in significantly higher replacement and repair costs for taxpayers. Consistent investment at the statutory 2% CRV level represents prudent fiscal management and responsible stewardship of Oregon's public assets.

2. Why is the POP being proposed?

Investment in deferred maintenance reduction and capital renewal provides several critical benefits:

- Preserves the state's investment in public infrastructure and extends the useful life of existing facilities.
- Reduces the risk of costly emergency repairs and unplanned facility failures.
- Supports a safe, therapeutic, and recovery-oriented environment for patients receiving psychiatric treatment.
- Improves reliability of critical building systems necessary for patient care and institutional operations.
- Enhances energy efficiency and sustainability, reducing future operating costs.
- Ensures continued compliance with state and federal requirements related to healthcare facilities, accessibility, and life safety.
- Aligns Oregon State Hospital with statutory expectations and statewide facility management best practices under ORS 291.215.

Failure to adequately fund deferred maintenance accelerates facility degradation, increases future capital liabilities, and ultimately results in significantly higher replacement and repair costs for taxpayers. Consistent investment at the statutory 2% CRV level represents prudent fiscal management and responsible stewardship of Oregon's public assets.

Investment in deferred maintenance reduction and capital improvements at Oregon State Hospital supports Oregon's commitment to advancing health equity and eliminating disparities in access to quality behavioral health services.

Because equitable access to behavioral healthcare depends in part on the quality and reliability of the physical environment in which care is delivered, investment in deferred maintenance reduction and capital improvements advance both operational

necessities and Oregon's broader equity goals. Maintaining facilities in accordance with the 2% CRV standard established by ORS 291.215 helps ensure that all Oregonians receiving treatment at Oregon State Hospital are served in environments that are safe, respectful, accessible, and conducive to positive health outcomes.)

Consultation

3. Who is completing this REIS?

OSH Health Equity Support Services Manager

4. Who is responsible for tracking equity outcomes? What method(s) are they using to track outcomes?

Each department will be responsible for tracking equity outcomes. Results will be shared with the DEIB practitioner for consultation and consideration of ongoing changes to better reflect and improve the experience of patients at OSH. The methods to track outcomes will include quantitative data assessing incident reports, and qualitative data in which feedback from patients will serve as the basis for assessment of current practices and future changes as needed based on patient's needs.

5. Does your agency have a DEIB practitioner (Yes or no)?

Yes, If yes, describe how you collaborated with them on this REIS.

OSH Facilities department worked with Health Equity Support Services department to complete REIS.

- a. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.). *N/A*

6. Did you collaborate with your agency's data analysts, community engagement managers, outreach managers, and/or others that regularly interact with underserved and marginalized communities on this REIS? (Yes, no, or not applicable)

Not applicable.

- a. If yes, describe how you collaborated with them on this REIS.

- b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

Community Engagement and Data

- 7. Identify the specific racial groups and communities that may be impacted by this POP, both directly and indirectly. In your answer, include responses to the following questions:

- a. How did you identify these impacted groups?

Census data was taken in 2025. While not a “racial group”, all patients at OSH are people with lived experience with mental health conditions – a subset of Oregonians who have been historically marginalized. Furthermore, the OSH patient population demographics has a disproportionate number of Black/African Americans patients when compared to Oregon’s population.

What data are you using to validate your assessment? If possible, use outreach and engagement feedback to gather information and insight.

OSH census data. The hospital conducted a census in 2025 and since then, used systems upgrades and other data procedures and extractions as part of the data maturing process.

- b. If possible, disaggregate the data by race, ethnicity, geography, income level, and other relevant characteristics. If disaggregated data is not available, please describe why.

OSH Census By Race		
White/Caucasian	498	71.0%
Black/African-American	84	12.0%
Other	79	11.3%
Unknown/No Entry/Declined	14	2.0%
American Indian	13	1.9%
Asian-Asian/Pacific Islander	10	1.4%
Hawaiian/Pacific Islander	3	0.4%
Total	701	100.0%

Patients Served in 2025		
Age at D/C or End of Year		
Age Group	Count	Percent
18-24	125	6.7%
25-34	518	27.9%
35-44	593	31.9%
45-54	334	18.0%
55-64	212	11.4%
65-74	67	3.6%
75-84	9	0.5%
85+	0	0.0%
Total	1858	100.0%

- c. How are communities impacted by this POP? What are the disproportionate impacts? Please be specific.

OSH patients are impacted by this POP. OSH patients must live on campus, so they are directly impacted by the condition and functionality of OSH facilities. OSH staff rely on having a functional facility in order to provide quality healthcare.

8. How did you ensure multiple perspectives were part of the decision-making process for this POP? In your answer, include responses to the following questions:

- a. Identify how you have or are planning to engage multiple perspectives and impacted groups to provide feedback on this POP (e.g. program design, budget, policy decisions, etc.). Please give specific examples.

This POP is centered around the condition of OSH facilities. Impacted groups (OSH patients and staff) have multiple mediums (Peer Advisory Council, OSH Direct Connect) in which they can communicate concerns to OSH leadership. The OSH facilities team is also responsible for maintaining and assessing the condition of the hospital and ensuring it meets or exceeds standards established by Centers for Medicare and Medicaid Services (CMS) and The Joint Commission (TJC).

- b. If community engagement is not part of your approach, please explain why and what you did instead to incorporate community perspectives. In your response, describe the following: the decision-making process used to determine engagement was not feasible or appropriate, the specific barriers (beyond general time or capacity), and how you mitigated the risk of missing community input (e.g. using existing feedback, partnering with trusted organizations, review from advisory bodies, etc.).

For this POP, the community would be limited to patients who live at OSH, as well as staff who report to work at OSH facilities.

Impacts and Accountability

9. If this POP is not funded, please describe the following:

- a. Which racial or ethnic communities would be most impacted.

All OSH patients including communities of color, LGBTQIA2S+ communities and multilingual patients will be impacted.

- b. How disparities would likely persist or worsen.

If this POP is not funded, patients and staff at OSH may suffer due to declining functionality of OSH facilities, which may impact patient/staff safety and decrease the overall effectiveness of the environment of care.

10. Who will be monitoring racial equity outcomes over time for this POP?

- a. How will progress be reported?

Not Applicable.

b. How will leadership be informed of equity impacts?

Not Applicable.

c. How will the community be involved in monitoring outcomes?

Not Applicable.

Oregon Health Authority 2027-29 Policy Package

Division:	Oregon State Hospital
Program:	Technology Services
Policy package title:	OSH Electronic Health Record Modernization
Policy package number:	417
Related legislation:	Not Applicable

Summary statement:	The Oregon State Hospital is seeking to replace the current Electronic Health Record (EHR) application. This was identified in the January 2026 Joint Technology Council update as a high-priority safety initiative. This Policy Option Package funds the analysis and planning for a new EHR focused on patient safety in a psychiatric hospital setting addressing patient safety and quality outcomes at Oregon State Hospital (OSH) while integrating whole system improvements, enhancing health equity, and improving coordination of care standards. Per ORS Chapter 276A, the Office of Information Services in the Oregon Health Authority’s Chief Information Officer, is managing this Policy Option Package (POP), as it is requesting funding to plan for a replacement IT system (Electronic Health Record for the hospital).
---------------------------	--

	General Fund	Lottery Funds	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	\$ 1,802,055	\$ -	\$ 595,459	\$ -	\$ 2,397,514	5	3.38

Oregon Health Authority: 2027-29 Policy Package

Purpose

1. What problem is OHA trying to fix or solve?

Oregon State Hospital's current Electronic Health Record (EHR) system cannot adequately support OSH's targeted requirements for psychiatric inpatient hospitalized care.

Key deficiencies of the existing EHR include:

- **Patient Safety Risks:** The likelihood of medication errors, missed alerts, and delayed interventions resulting from the lack of consistent, real-time communication and delayed data exchanges is high. Risk tracking (falls, suicide, aggression, elopement) and other communications are fragmented and access to patient data is not timely.
- **Care Coordination Challenges:** Communication is siloed and leads to poor patient outcomes. Treatment plans are difficult to access due to ongoing integration issues between EHR applications.
- **Compliance Challenges:** Current system does not fully support psychiatric inpatient standards or interoperability requirements. This has contributed to adverse findings from Centers for Medicare and Medicaid Services (CMS) site visits.
- **Operational Inefficiencies:** Service level agreement (SLA) and other vendor support issues have caused delays in critical clinical workflows, sometimes requiring manual, paper-based interventions.
- **Data & Reporting Gaps:** Limited analytics and reporting capabilities exist.
- **Technical Constraints:** Currently, OSH relies on email to communicate protected health information which is not best practice. Legacy architecture has ongoing integration and performance issues.

Oregon Health Authority: 2027-29 Policy Package

2. What would this policy package buy and how and when would it be implemented?

This POP funds the creation of 5 positions who will document current state needs and gaps, required compliance with federal statutes/regulations, emerging technologies and needed system functionality.

This work will require additional funding (in other years) to support a procurement to select the most appropriate EHR solution for OSH. The work for the procurement, selection and implementation of a new EHR is broken into the project stages described below.

The work intended to be completed in the 27-29 biennium are the activities of Stages 1-3 and are summarized as follows:

- Multidisciplinary sessions to define clinical case management and safety needs, usability baselines, and interoperability test cases.
- Clinical Safety & Quality Board - to adopt quality metrics and go/no-go criteria for vendor selection and progression in conjunction with the State Chief Information Officer's portfolio-based management and oversight of state information technology resources.
- Documented workflows for comprehensive, integrated care models, meeting all regulatory requirements for inpatient psychiatric hospitals.
- Matrix of patient and staff safety-focused EHR requirements and test planning based on standards and best practices.
- EHR testable requirements that integrate culturally responsive care, equitable access and an informed decision-making environment.

Oregon Health Authority: 2027-29 Policy Package

- Conversion of incidents and regulatory findings into testable requirements with acceptance criteria, risk-based validation plans, and quality gates.

This POP also funds IT professional services which will assist in the scope development for the eventual procurement.

The positions purchased by this POP will ultimately be responsible for the work in all stages of the EHR replacement, system, implementation and use. The procurement for a new EHR will happen after project stage 3, before stage 4. Stage 4 and later will focus on work related to implementation of the new EHR, data migration strategy from the existing, legacy EHR system, training of staff on the new EHR, sustainment activities post go-live, long-term governance, clinical optimization/workflow redesigns and software upgrades.

Position Information:

OSH Positions

- Psychiatrist I Clinical Informaticist- In stages 1-3 this role will act as the chief medical informatics officer, directing the other clinical informaticists, doing requirements gathering and work process definition and documentation. During stage 4+, will work to make decisions about clinical workflow, and solution optimization for how OSH operates. This role is critical for clinical solution optimization and risk management to the EHR. During sustainment, this role will continue to work with clinicians and guide the clinical decisions made to optimize the EHR.
- Operations and Policy Analyst 3 – this role is a clinical nurse informaticist. During stages 1-3 will work at the direction of the Psychiatrist I Clinical Informaticist to gather requirements, work process definition and documentation. During stage 4+ this role will lead change management, work with the implementation team and frontline caregivers to learn and optimize the EHR. During sustainment

Oregon Health Authority: 2027-29 Policy Package

Nurse Informaticists support caregivers through workflow changes and process optimizations that impact information flow in the EHR.

- Project Manager-3 (PM3) – this role in stages 1-3 works to coordinate and document the needs requirements, systems gaps, and current state of the EHR. This work is the foundation for a quality EHR RFI/RFP¹. In stages 4+, the PM3 works to assign, coordinate, and manage OSH activities to implement the EHR working with project managers from the vendor and from Oregon Department of Human Services ODHS/OHA Office of Information Services (OIS). This is a lynchpin role due to the required alignment of work across the teams. During sustainment stages, this role aligns OSH work to support the solution and upgrades that are released from the vendor.

OIS Positions

- Information Systems Specialist 8 – Project Manager – This role will work with other Project Managers within OIS to plan, manage, and execute the work of stage gates required up through stage 3, including facilitation of all required documents, finalized requirements, and RFI/RFP development. In stages 4+, this role works on the implementation of the EHR on the OIS side to ensure OIS required work is organized and completed on time. During sustainment stages, this role aligns OIS work to support the solution and upgrades that are released from the vendor.
- Information Systems Specialist 8 – Quality Assurance – This role will be fully assigned to OSH and will manage all QA and testing efforts, across the EHR portfolio, including requirements definition, interface development and test case development. This is an ongoing role that develops quality

¹ **RFI-Request for Information**, a non-binding request used to gather market intelligence, ideas, and general information from vendors before deciding whether and how to conduct a formal procurement. **RFP-Request for Proposal**, a formal competitive solicitation used to request detailed proposals (scope, pricing, qualifications) from vendors and is typically the basis for evaluating offers and awarding a contract.

Oregon Health Authority: 2027-29 Policy Package

testing plans and performs quality checks both before and after new releases are implemented. This proactively reduces system issues and downtime.

EHR Replacement Project Stages

Stage 1- Discovery and Requirements Definition (6-9 months)

OSH will conduct structured discovery to document current workflows, pain points, safety considerations, and reporting obligations. Requirements will be benchmarked against federal standards (Cures Act APIs², USCDI³, TEFCA⁴) and mapped to clinical, operational, security, and analytics needs. The Enterprise Architecture Team will draft nonfunctional requirements for reliability, scalability, privacy, and auditability, and will define integration patterns and data governance expectations. Early stakeholder engagement will confirm priorities across clinical leadership, nursing, ancillary services, public health, Medicaid/OHP coordination, privacy/compliance, and IT operations.

Stage 2- Market Scan and Procurement Preparation (4-6 months)

A systematic market scan will evaluate vendors' standards compliance (FHIR R4⁵, USCDI v4+, TEFCA readiness), security posture (HIPAA⁶, 42 CFR Part 2⁷, Zero Trust⁸), SaaS operating model (Software as a Service), upgrade cadence, and total cost of ownership. OSH will issue an RFI/RFP (Request for

² **Cures Act API** (Application Programming Interface) is a standardized software connection that let patients and providers securely access and share electronic health information under the 21st Century Cures Act rules.

³ **USCDI (United States Core Data for Interoperability)**: Federally specified set of health data classes and elements for nationwide interoperability.

⁴ **TEFCA (Trusted Exchange Framework and Common Agreement)**: National framework for interoperable health information exchange through connected Qualified Health Information Networks (QHINs)

⁵ **FHIR (Fast Healthcare Interoperability Resources)**: HL7's (Health Level 7) standard for representing and exchanging health data via modern APIs (Application Programming Interface); **FHIR R4** is the fourth major release.

⁶ **HIPAA (Health Insurance Portability and Accountability Act)**: U.S. law governing privacy and security of health information; includes the **Security Rule**.

⁷ **42 CFR Part 2**: Federal regulation providing confidentiality protections for Substance Use Disorder (SUD) treatment records.

⁸ **Zero Trust**: A security model that assumes no implicit trust; enforces strict identity verification, least-privilege access, and continuous monitoring.

Oregon Health Authority: 2027-29 Policy Package

Information/Request for Proposal) with explicit standards clauses and evaluation criteria covering usability, workflow fit, data migration tooling, testing automation, training content, and roadmap transparency. Reference checks, proof of capability demonstrations, and contract terms (including BAAs and TEFCA/QHIN agreements) will be planned in detail.

Stage 3- Security Blueprint and Gap Assessment (included above in MS&PP)

In parallel, OSH will develop a Zero Trust security blueprint aligned with NIST SP 800-207⁹, mapping identity, device, network, application, and data controls to the SaaS EHR architecture. A gap assessment will identify remediation actions for HIPAA Security Rule and 42 CFR Part 2 compliance, incident response readiness, audit logging, and resiliency testing. The blueprint will anchor configuration hardening, access governance, and continuous monitoring plans.

Stage 4- Data Migration Strategy and Governance (included in Implementation)

A detailed data migration plan will inventory legacy sources, define data quality thresholds, and map clinical data to USCDI/FHIR resources. Governance processes will oversee terminology alignment, provenance capture, and validation. Data migration rehearsals will be scheduled to reduce cutover risk, with parallel run strategies where feasible. Reporting schemas will be reengineered to accommodate new EHR data structures, ensuring continuity for CMS, public health, and operational dashboards.

⁹ **NIST SP 800-207** is the National Institute of Standards and Technology's Special Publication on **Zero Trust** Architecture. It defines the core concepts, components, and deployment models for implementing a zero-trust security approach in an enterprise, shifting protection from broad network perimeters to individual resources, identities, and access decisions

Oregon Health Authority: 2027-29 Policy Package

Stage 5- Phased Implementation Focused on Safety and Documentation (20-24 months)

Initial functionality will prioritize medication management, remediation of identified deficiencies, and improvements to documentation quality and chart usability. Each phase will include structured user acceptance testing, workflow validation, and safety checkpoints. Ancillary integrations (pharmacy cabinets, lab, food & nutrition, dental) will be sequenced to minimize disruption and allow progressive stabilization.

Stage 6- Training, Change Management, and Operating Model (included in Implementation)

Project activities will include role-based training with simulation and competency validation, reinforced by on-the-floor support during go-live. A formal change management plan will address communications, readiness assessments, feedback loops, and adoption metrics. The operating model will define responsibilities across vendor, OSH, OIS, operations, and security teams, including incident response, release management, and performance monitoring.

Stage 7- Analytics Enablement and AI Assisted Processes (0-18 months post implementation)

Standards-aligned data will be integrated with OHA's enterprise data environment to support statewide initiatives and policy assessments. OSH will build capacity to use contemporary agentic synthetic intelligence tooling to assist analytic processes, always under governance for privacy, fairness, and auditability. Dashboards and self-service analytics will be curated to improve decision making while maintaining data quality and access controls.

Stage 8- Sustainment, Continuous Improvement, and Audit Readiness

Post go-live, OSH will maintain continuous QA and testing aligned to vendor release cycles, safety & risk management best practices and documented metrics. Practices will be refined through

Oregon Health Authority: 2027-29 Policy Package

informed, measured improvements, ensuring continuous improvement cycles are integrated into ongoing operations. Audit readiness will be preserved via comprehensive logging, evidence capture, and periodic control assessments.

Governance and Partner Engagement (Included in Stage 8)

Program governance will be anchored by the Project Sponsor and Executive oversight through OHA leadership. The Chief Medical Officer and clinical leaders will co-own workflow design, patient safety requirements, and adoption decisions. Nursing leadership will guide documentation standards, medication safety practices, and training content. Pharmacy, laboratory, and radiology leads will ensure orders/results integration and medication management meet clinical and regulatory needs. Hospital Informatics will steward specialty workflows and reporting obligations.

3. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity¹⁰ or equitable health outcomes? How does this policy package further OHA's mission and align with its strategic plan?

This POP will allow OSH to select the EHR that best supports and facilitates caregivers' ability to provide safe and quality care for patients. The patient population covers patients of all racial, ethnic, socioeconomic, educational and sexual orientation groups. This patient population also faces the stigma of mental health diagnoses. The path to replacing OSH's EHR will allow clinicians and caregivers

¹⁰ Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability**, gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

Oregon Health Authority: 2027-29 Policy Package

to better track progress and outcomes for its entire population and identify gaps that arise in its populations in order to address them, providing equitable treatment for all patients.

Quantifying results

4. What are the long-term desired outcomes?

The development and execution of procurement activities that produce an EHR that meets the needs of OSH. These activities include:

- Requirements & market scan.
- Complete a procurement with technical standards (FHIR, USCDI, TEFCA, HIPAA, 42 CFR Part 2, Zero Trust) for industry and regulatory compliance.
- Conduct security blueprint & gap assessment aligned to information security needs (NIST SP 800-207, HIPAA and 42 CFR Part 2).
- Create a data migration strategy mapping legacy data to USCDI/FHIR to ensure that historical patient data is usable in a replacement EHR ensuring continuity of care.
- Ensure public health & CMS alignment for interoperable APIs (data transfer protocols between connected systems).
- Ensure operating model & training leverages vendor knowledge and toolsets.
- Identify potential for current agentic synthetic intelligence (AI) tooling to assist with document creation processes.
- Ensure ongoing reporting needs are factored into requirements and procurement decisions. Ensure current data stores are re-engineered to accommodate new EHR data structures.

Oregon Health Authority: 2027-29 Policy Package

Over the long term, the successful selection and implementation of a new EHR solution (stages 4+) will result in improved services for OSH patients. This improved data results in better communication about our patients between caregivers which enhances patient care/outcomes. It also provides greater awareness about OSH patients to caregivers allowing them to be more aware of the potential for serious patient incidents which could result in sentinel events (these are events that can or do result in serious injury including death or safety risk). In reducing the potential for sentinel events, it also allows us to more readily remain in compliance with CMS accreditation standards.

5. What are the envisioned outputs of this investment? How will OHA measure the impacts on health inequities of this policy package?

This investment will allow OSH to scope, procure and then transition operations to a modern EHR that meets the needs of the patients it serves. A modern and suitable EHR will allow for improved tracking of health inequities by allowing hospital staff to accurately capture demographic and social determinant data. The methods to track outcomes will include quantitative data assessing patient demographic data, physical and behavioral health data from the EHR, hospital incident reports, and qualitative data in which feedback from patients will serve as the basis for assessment of current practices and future changes.

How achieved

6. What actions have occurred to resolve the issue prior to requesting a policy package?

OSH's existing EHR has required consistent modifications to make it functional for OSH's operational environment. OSH's EHR is significantly different than the vendor's base product, requiring a dedicated team to develop and maintain the customizations.

Oregon Health Authority: 2027-29 Policy Package

Additionally, to compensate for functionality that should be native to an EHR, like infection surveillance, OSH has needed to purchase separate “bolt-on” software solutions to close these gaps.

We have collaborated extensively with the existing vendor to implement numerous customizations to forms and workflows. These modifications have made it challenging for the vendor to support the hospital within the framework of their standard service model. For example, it recently took approximately 18 months for the vendor to resolve a reported problem that was delaying a critical system upgrade.

7. What alternatives were considered and what were the reasons for rejecting them?

- Continued Customization of the existing EHR- The result of these many years of customizations from the OSH team is that it has become increasingly difficult for the vendor to support. This is because the EHR varies from the vendor’s base product. This deviation from the EHR system as it is designed requires OSH to pay more for vendor support hours. This course is unsustainable.
- Continue purchasing of bolt-on software solutions- When the current EHR was selected and implemented, the functionality and features available in other EHR solutions was limited, however over time the current vendor’s feature set has not kept pace with the market, leading to the need to purchase bolt-on solutions. The software solution integrations between the EHR and other bolt-on solution vendors are dependent upon reliable data feeds, which are not consistent with the current vendor. This has resulted in bolt-on solution implementations that take more resource to implement and are more intensive to maintain. When these systems have issues, patient safety can be at risk. Continuing with this strategy is not sustainable due to cost and patient risks.

Oregon Health Authority: 2027-29 Policy Package

- Continued collaboration with the existing vendor- Previously deficiencies and vendor performance have led to OSH issuing a Cure Notice to the current EHR vendor contractor. To the current day, performance, adherence to contractual Service Level Agreements and issue resolution timeliness remain problems with this vendor and its platform. Continuing to partner with this vendor will perpetuate the risks to patient care and caregiver safety.

8. What other agencies, programs, community partners or stakeholders are collaborating on this policy package?

Oregon State Hospital and the Office of Information Services will collaborate due to the complex technical components of requirements RFI/RFP development and vendor response evaluation. DAS will be involved in shepherding the project through the stage gate process. Due to cost, an independent QA vendor will be used to validate proper processes, documentation, and ongoing technical vendor collaboration.

9. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No

10. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

The impacts from this POP occur in subsequent POPs that fund stages 4+.

Stages 4+ impacts to other agencies

Oregon Health Authority: 2027-29 Policy Package

- OHA related behavioral health information data quality will improve, along with the quality of data submissions to Centers for Medicare/Medicaid Services (CMS).
- OHA uses OSH patient data to enrich the data it has on patients it serves through its other divisions, strengthening its ability to coordinate care as patients are admitting and discharging from hospital care, with the goal of providing care that improves their lives through better outcomes and prevents subsequent admissions.
- Additionally, maintaining CMS accreditation is an OHA established priority for OSH. The ability to demonstrate performance and compliance with CMS regulations is done through regular data submission to CMS and production of requested data and records during site visits by CMS surveyors (auditors).

11. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No

Staffing and fiscal impact

Implementation date(s): Positions will be implemented beginning
November 2027

End date (if applicable): Positions will be ongoing

Oregon Health Authority: 2027-29 Policy Package

12. What assumptions affect the pricing of this policy package?

Since this POP is primarily related to FTE, POP pricing could vary due to cost of living increases and/or annual step increases.

13. Will there be new responsibilities for OHA and/or Shared Services? Specify which programs and describe their new responsibilities.

For this POP, OIS will be a critical partner in the development of the RFI/RFP and evaluate vendor submissions.

The ISS8 Project Manager will work with other Project Managers within OIS to plan, manage, and execute the work of this project. The ISS8 Quality Analyst, who will be situated within OIS, will be a new position which will fully manage all testing protocols for all OSH efforts, first focusing fully on this POP. Their initial duties will be to document requirements and develop test cases across the EHR portfolio. This dedicated resource will enhance the methods used for managing an EHR system replacement. This will be the first time that OSH has incorporated a QA role specifically to support an EHR replacement and remain embedded within OSH.

14. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No. The Oregon State Hospital is a facility that is and continues to operate at capacity.

Oregon Health Authority: 2027-29 Policy Package

15. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

The positions necessary for this policy package would be new and permanent, as a project of this scope and magnitude will span more than one biennium. Positions for the Oregon State Hospital would consist of two permanent, full-time positions and one permanent part-time (.6 FTE) position. The positions for the Office of Information Services are both permanent, full-time.

Oregon State Hospital

Classification	Class Title	Position Type	Implementation	Count	FTE	Fund
OAI C0856 AP	Project Manager 3	Permanent Full Time	November 2027	1	0.83	GF
OAI C0872 AP	Operations & Policy Analyst 3	Permanent Full Time	January 2028	1	0.75	GF
AMP U7516 AP	Physician Psychiatrist	Permanent Part Time	March 2028	1	0.42	GF

Office of Information Services

Classification	Class Title	Position Type	Implementation	Count	FTE	Fund
MMN X1488 IP	Information Systems Specialist 8	Permanent Full Time	January 2028	1	0.75	OF
OAH C1488 IP	Information Systems Specialist 8	Permanent Full Time	April 2028	1	0.63	OF

Note that while the OIS positions are Other Funds, the General Fund that ultimately finances the positions is requested within the OSH total.

Oregon Health Authority: 2027-29 Policy Package

16. What are the start-up and one-time costs?

The expenses in this policy option package that are one-time will consist of a requested \$200,000 for IT Professional Services. Initially, this will consist of consulting services to obtain an unbiased professional opinion on relevant components that should be included in the RFI/RFP. A consulting service from similar projects is expected to have a broader perspective on both what features and functionality are particularly valuable in other equivalent hospitals, as well as features and functionality that are emerging that should be included in the RFI/RFP, which will be the end-result of this stage of the process. An external perspective will ensure this package is comprehensive and isn't constrained by a myopic view.

17. What are the ongoing costs?

The five positions within this package, both OSH and OIS, are permanent and ongoing. The 2029-31 full biennium expense for these positions is estimated at \$2,252,611.

18. What reductions will you use to offset the costs of this work and maintain budget neutrality?

This proposal is not budget neutral.

19. What are the sources of funding (revenue) and the funding split (GF/OF/FF) for each part of the investment as well as the offset/reduction?

This investment represents a funding request of 100% General Fund at the agency level within the OSH request. While there is an Other Funds component for OIS, that portion of this request is to grant OIS limitation to receive "special payments" from within the OSH General Fund request as funding for the

Oregon Health Authority: 2027-29 Policy Package

OIS positions. This “duplicate” methodology allows OIS to cost out positions according to the Division where the work is performed and receive payment as Other Funds, while also allowing OSH to receive appropriate GF for that reimbursement, in this case within OSH Special Payments.

20. What are the potential savings (above the offset to pay for the investment)?

There are no direct savings resulting from this investment.

Oregon Health Authority: 2027-29 Policy Package

RACIAL EQUITY IMPACT STATEMENT (REIS) WORKSHEET: POLICY OPTION PACKAGE (POP) QUESTIONS

OHA POP #417: OSH ELECTRONIC HEALTH RECORD MODERNIZATION

Program managers responsible for the POP: Please answer the questions below for every POP being proposed in your agency request budget. To fill out this worksheet, download a copy of this worksheet and type your answers below each question.

Program Overview

1. Please describe the POP being proposed.

Oregon State Hospital (OSH) Electronic Health Record (EHR) application replacement planning

2. Why is the POP being proposed?

This was identified in the January 2026 Joint Technology Council update as a high-priority safety initiative. Thorough planning focused on patient safety in a psychiatric hospital setting will result in a replacement strategy addressing patient safety and quality healthcare outcomes at OSH both the Salem and Junction City campuses, integrating whole system improvements, enhancing health equity, and improving communication standards. Enhanced medical record portability will increase the likelihood of positive health outcomes for patients upon discharge.

Consultation

3. Who is completing this REIS?

OSH Health Equity Support Services Manager

4. Who is responsible for tracking equity outcomes? What method(s) are they using to track outcomes?

Each department will be responsible for tracking equity outcomes, with assistance provided by OSH's Data & Analysis team. Results will be shared with the DEIB practitioner for consultation and consideration of ongoing changes to better reflect and improve the experience of patients at OSH. The methods to track outcomes will include quantitative data assessing incident reports, and qualitative data in which

feedback from patients will serve as the basis for assessment of current practices and future changes as needed based on patient's needs.

5. Does your agency have a DEIB practitioner (Yes or no)? Yes

a. If yes, describe how you collaborated with them on this REIS.

Project Managers and DEIB practitioner collaborated in the assessment of current data and potential solutions that would lead to the reduced inequities in treatment services at OSH. Patient needs are personalized according to their ethnic background, race, gender; accommodations are intended to provide support during their stay while equipping patients to return to the community. Based on current data, many patients are impacted by the inability to receive services that are in alignment with their individual treatment needs. A more robust EHR would allow caregivers to focus on providing culturally competent care, which would increase positive health outcomes for OSH's patient population.

b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

Not applicable.

6. Did you collaborate with your agency's data analysts, community engagement managers, outreach managers, and/or others that regularly interact with underserved and marginalized communities on this REIS? (Yes, no, or not applicable)

Not applicable.

a. If yes, describe how you collaborated with them on this REIS.

b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

Community Engagement and Data

7. Identify the specific racial groups and communities that may be impacted by this POP, both directly and indirectly. In your answer, include responses to the following questions:

- a. How did you identify these impacted groups?

The last census conducted at the hospital was in 2025. The results reflected Black/African American population to be the second highest (12%). In addition, the hospital serves a diverse age group, including 15.5% with ages between 55-84. In addition, the entire patient population at OSH is comprised of individuals who have lived experience with mental health conditions. This POP would enhance health record interoperability, making each patient's medical records easier to share with health care providers outside of OSH.

- b. What data are you using to validate your assessment? If possible, use outreach and engagement feedback to gather information and insight.

The hospital conducted a census in 2025 and since then, used system upgrades and other data procedures and extractions as part of the data maturing process.

- c. If possible, disaggregate the data by race, ethnicity, geography, income level, and other relevant characteristics. If disaggregated data is not available, please describe why.

Census by Race and Age data is provided below; other factors such as income level and medical diagnoses are not readily available due to system limitations within OSH's current electronic health records system.

OSH Census By Race		
White/Caucasian	498	71.0%
Black/African-American	84	12.0%
Other	79	11.3%
Unknown/No Entry/Declined	14	2.0%
American Indian	13	1.9%
Asian-Asian/Pacific Islander	10	1.4%
Hawaiian/Pacific Islander	3	0.4%
Total	701	100.0%

Patients Served in 2025		
Age at D/C or End of Year		
Age Group	Count	Percent
18-24	125	6.7%
25-34	518	27.9%
35-44	593	31.9%
45-54	334	18.0%
55-64	212	11.4%
65-74	67	3.6%
75-84	9	0.5%
85+	0	0.0%
Total	1858	100.0%

- d. How are communities impacted by this POP? What are the disproportionate impacts? Please be specific.

All patients at OSH, regardless of race or ethnicity, are persons living with mental illness. This POP has the potential to increase health outcomes for this subset of Oregonians by allowing health care providers across the continuum of care to best treat patients for their specific diagnoses, as well as provide culturally competent care once they are discharged from OSH and resume life in the community.

8. How did you ensure multiple perspectives were part of the decision-making process for this POP? In your answer, include responses to the following questions:

- a. Identify how you have or are planning to engage multiple perspectives and impacted groups to provide feedback on this POP (e.g. program design, budget, policy decisions, etc.). Please give specific examples.

Feedback from OSH caregivers as well as medical health professionals outside of OSH will be collected either informally or formally.

- b. If community engagement is not part of your approach, please explain why and what you did instead to incorporate community perspectives. In your response, describe the following: the decision-making process used to determine engagement was not feasible or appropriate, the specific barriers (beyond general time or capacity), and how you mitigated the risk of missing community input (e.g. using existing feedback, partnering with trusted organizations, review from advisory bodies, etc.).

This POP is unique in that it is related to a patient's individual health records; it does not directly impact the community at large. Alternative perspectives will be incorporated through feedback between OSH caregivers and medical health professionals outside of OSH. The current electronic health record system is not heavily supported in many healthcare environments. This results in difficulties communicating a patient's medical history between medical professionals without using paper copies.

Impacts and Accountability

9. If this POP is not funded, please describe the following:

- a. Which racial or ethnic communities would be most impacted.

All OSH patients including communities of color, LGBTQIAS+ communities and multilingual patients will be impacted. The immediate response from caregiver to the individual needs of patients will be delayed due to the interruption of communication if electronic systems are not responding to the requests that better suit patients' care.

- b. How disparities would likely persist or worsen.

Disparities will persist, or potentially worsen, because it will remain difficult for patients to receive appropriate, culturally competent care upon discharge from OSH if their medical records are not easily transportable between health care providers.

The limitation of information will affect the relationship between caregivers and patients, and it will continue perpetuating behaviors that could be avoided if the caregiver knows the patients' needs ahead of time (e.g., specific hair products, tribal cultural practices).

10. Who will be monitoring racial equity outcomes over time for this POP?

- a. How will progress be reported?

Not applicable.

- b. How will leadership be informed of equity impacts?

Not applicable.

- c. How will the community be involved in monitoring outcomes?

Not applicable.

Oregon Health Authority 2027-29 Policy Package

Division:	Agency Operations
Program:	Human Resources
Policy package title:	OSH Human Resource Workforce Capacity
Policy package number:	418
Related legislation:	N/A

Summary statement:	This request is to provide enhanced HR service to the Oregon State Hospital. HR's Employee & Labor Relations (ELR) program serving OSH requires additional positions to fulfill the ELR needs of OSH. The demands on OSH's workforce as they respond to external scrutiny and internal drivers to improve, results in increased workplace tension, behavior implications, and morale concerns. Outgrowths include an increase in investigations into workplace conduct, use of leave, increase in ADA requests, and supporting managers in managing concerns around unauthorized leave use, call outs, staffing levels, and employee engagement. The additional positions requested here are to directly serve OSH and positively impact workplace outcomes, engagement, attendance, and improve patient services.
---------------------------	---

	General Fund	Lottery Funds	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	\$ 2,345,883	\$ -	\$ 272,414	\$ 560,402	\$ 3,178,699	15	9.32

Oregon Health Authority: 2027-29 Policy Package

Purpose

1. What problem is OHA trying to fix or solve?

The Employee & Labor Relations (ELR) team serving OSH is currently structured with one (1) Senior HR Manager and seven (7) Senior HR Business Partners (SR HRBPs) responsible for supporting nearly 3,000 employees and managers. This structure is insufficient to meet the operational and strategic demands of the organization that is a highly complex medical facility that operates 24 hours a day/365 days per year.

The proposed staffing increases are essential to building a sustainable, scalable, and strategically aligned Employee & Labor Relations team capable of meeting OSH's organizational, contractual, and operational demands. The current structure places excessive workload on senior-level staff, forcing them to balance high-risk investigations with routine administrative tasks and leaving little capacity for strategic consultation or proactive workforce management. As there are no mid- or entry-level HR Business Partners (BPs), Senior (SR) HRBPs must absorb a high volume of lower-level and administrative duties. This misalignment of work overwhelms senior staff, reduces their availability for strategic consultation, and limits their capacity to lead complex employee investigations, disciplinary actions, and proactive labor-relations engagement.

In comparison to 2 other state agencies, the Oregon Youth Authority (OYA) and Oregon Department of Corrections (DOC), that operate 24 hours a day/365 days per year, OSH stands out as unique in its delivery of daily in-person patient care, treatment, and rehabilitation. For example, the DOC is only 7% larger than OSH yet is staffed 50% higher at the ELR senior level with 14 HRA 3s in ELR

Oregon Health Authority: 2027-29 Policy Package

and 100% more at the ELR mid and entry levels with (2) HRA 2s and (1) HRA 1 (as we have no positions at those levels.)

2. What would this policy package buy and how and when would it be implemented?

Granting additional leadership, SR HR Business Partners, and dedicated mid and entry level HR Analyst support will realign work to appropriate levels, reduce backlogs, and ensure timely responses to employee relations issues. These positions will strengthen investigative quality, improve compliance with labor-relations obligations, enhance service to leaders and employees, and create the necessary infrastructure for consistent policy implementation and organizational risk mitigation. It also will allow us to build depth and ultimately create succession within the infrastructure, which is critical to meeting future business needs and maintaining business continuity once we have achieved optimum staffing levels.

3. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity¹ or equitable health outcomes? How does this policy package further OHA's mission and align with its strategic plan?

As HR is a support to all OSH staff, our policy package is all about creating a more skilled, better equipped, and healthy workforce to serve populations impacted by health inequities. We work as critical infrastructure to ensure that candidates who will best serve populations impacted by health inequities have no barriers to entry into our organization. That once they are here, that we are providing them with a

¹ Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability, gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.**

Oregon Health Authority: 2027-29 Policy Package

meaningful, mission centered, value aligned onboarding experience, that we continue to support their learning through professional development courses that reflect our commitment to equity and antiracism. And that they receive all the benefits and supportive services that they need in a timely and culturally appropriate manner. All the positions in this policy package will work directly to contribute to our employees' ability to deliver on eliminating health inequities by 2030.

Quantifying results

4. What are the long-term desired outcomes?

One goal is to create an Employee & Labor Relations team dedicated to the Oregon State Hospital that is large enough to shoulder the workload at such a dynamic and complex institution – creating timely, audit worthy, defensible, and fair results for the workforce and managers. In doing so, OSH will benefit from a more engaged workforce, one that is aware of and compliant to standards and policies and held accountable to such standards.

5. What are the envisioned outputs of this investment? How will OHA measure the impacts on health inequities of this policy package?

While impacts on health inequities by this policy package may not be seen in a direct, one-to-one impact measure, as a supportive service this POP will have an impact on our staff's ability to successfully fulfill their duties and work. This supportive, behind-the-scenes work is still critically important in goal attainment. Only through a diverse, engaged, well-trained workforce will we reach our goal to eliminate health inequities, this POP can play a significant role in creating such a workforce at OSH.

Oregon Health Authority: 2027-29 Policy Package

How achieved

6. What actions have occurred to resolve the issue prior to requesting a policy package?

We have worked to streamline processes so that we eliminate redundancies, waste, and increase efficiency. This has been helpful and created better cycle times in many cases; however, the volume of work cannot be addressed by process improvement efforts alone as we lack the number of HR professional to FTE ratio needed for a productive and responsive HR shop for an agency this size.

7. What alternatives were considered and what were the reasons for rejecting them?

Outsourcing of HR services is cost-prohibitive and not ideal in our highly technical environment.

8. What other agencies, programs, community partners or stakeholders are collaborating on this policy package?

We are working with Oregon State Hospital leadership.

9. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

10. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

None.

Oregon Health Authority: 2027-29 Policy Package

11. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Staffing and fiscal impact

Implementation date(s): Upon receipt

End date (if applicable): Not applicable

12. What assumptions affect the pricing of this policy package?

This assumes an ongoing rate of investigations and complaints at OSH, that are currently in excess of 700% of our non-OSH side of OHA.

13. Will there be new responsibilities for OHA and/or Shared Services? Specify which programs and describe their new responsibilities.

No.

14. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

15. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

Oregon Health Authority: 2027-29 Policy Package

- (2) HR Analyst 2s
- (2) HR Analyst 1s
- (1) Administrative Specialist 2
- (3) Operations & Policy Analyst 3s
- (1) Operations & Policy Analyst 2
- (1) HR Manager 2
- (1) HR Administrator 1

16. What are the start-up and one-time costs?

Not applicable.

17. What are the ongoing costs?

Ongoing budgeted costs for permanent positions.

18. What reductions will you use to offset the costs of this work and maintain budget neutrality?

This POP maintains budget neutrality by fully offsetting the requested investment through the savings and reductions included in POP 415: OHA Savings and Reductions.

19. What are the sources of funding (revenue) and the funding split (GF/OF/FF) for each part of the investment as well as the offset/reduction?

General Fund 74%, Other Funds 9%, Federal Funds 18%. The Other and Federal Funds are cost allocated from agency funding sources.

Oregon Health Authority: 2027-29 Policy Package

20. What are the potential savings (above the offset to pay for the investment)?

While difficult to quantify, the potential savings associated with a well-trained workforce should not be overlooked. Permanent staff reduce the need to hire limited-duration employees or temporarily reassign and backfill existing positions. This approach also improves retention and reduces turnover, lowering costs for the organization over time. Hiring, training and bringing new staff up to speed in a highly complex organization such as OHA takes time and resources and is a costly endeavor. Lowering that turnover with permanent positions saves money, creates continuity, consistency, and builds institutional knowledge that provides many benefits to the agency.

RACIAL EQUITY IMPACT STATEMENT (REIS) WORKSHEET: POLICY OPTION PACKAGE (POP) QUESTIONS

OHA POP #418: OSH HR WORKFORCE CAPACITY

Program managers responsible for the POP: Please answer the questions below for every POP being proposed in your agency request budget. To fill out this worksheet, download a copy of this worksheet and type your answers below each question.

Program Overview

1. Please describe the POP being proposed.

This POP is to provide enhanced HR customer and compliance services to the Oregon State Hospital. HR's Employee & Labor Relations (ELR) program serving OSH requires 15 additional positions to fulfill the ELR needs of OSH. The demands on OSH's workforce as they respond to external scrutiny and internal drivers to improve their outcomes, result in increased workplace tension, behavior implications, and morale concerns. Outgrowths of this include an increase in investigations into workplace conduct, use of leave, increase in ADA requests, and supporting managers in managing concerns around unauthorized leave use, call outs, staffing levels, and employee engagement. The additional positions requested here are to directly serve OSH and positively impact workplace outcomes, engagement, attendance, and improve service to patients.

2. Why is the POP being proposed?

The Employee & Labor Relations (ELR) team serving OSH is currently structured with one (1) Senior HR Manager and seven (7) Senior HR Business Partners (SR HRBPs) responsible for supporting nearly 3,000 employees and managers. This structure is insufficient to meet the operational and strategic demands of the organization that is a highly complex medical facility that operates 24 hours a day/365 days per year.

The proposed staffing increases are essential to building a sustainable, scalable, and strategically aligned Employee & Labor Relations team capable of meeting OSH's organizational, contractual, and operational demands. The current structure places excessive workload on senior-level staff, forcing them to balance high-risk investigations with routine administrative tasks and leaving little capacity for strategic consultation or proactive workforce management. As there are no mid- or

entry-level HR Business Partners (BPs), Senior (SR) HRBPs must absorb a high volume of lower-level and administrative duties. This misalignment of work overwhelms senior staff, reduces their availability for strategic consultation, and limits their capacity to lead complex employee investigations, disciplinary actions, and proactive labor-relations engagement.

In comparison to 2 other state agencies, the Oregon Youth Authority (OYA) and Oregon Department of Corrections (DOC), that operate 24 hours a day/365 days per year, OSH stands out as unique in its delivery of daily in-person patient care, treatment, and rehabilitation. For example, the DOC is only 7% larger than OSH yet is staffed 50% higher at the ELR senior level with 14 HR Analysts 3s in ELR and 100% more at the ELR mid and entry levels with (2) HR Analysts 2s and (1) HR Analyst 1 (as we have no positions at those levels.)

Consultation

3. Who is completing this REIS?

OHA HR Director

4. Who is responsible for tracking equity outcomes? What method(s) are they using to track outcomes?

HR's Data Analytics team tracks for equity outcomes broadly across the OHA enterprise. And each division is also responsible for tracking equity outcomes at their programmatic level. Results will be shared with the DEIB practitioner for consultation and consideration of ongoing changes to better reflect and improve the experience of employees at OHA. The methods to track outcomes will include quantitative data assessing of aspects of the employee lifecycle, such as recruitment pools, hiring, promotions, as well as investigations, turnover, employee engagement, and others. Qualitative data in which feedback from staff is gathered (such as Employee Engagement Survey) will serve as the basis for assessment of current practices and future changes as needed based employee experience.

5. Does your agency have a DEIB practitioner (Yes or no)?

Yes,

- a. If yes, describe how you collaborated with them on this REIS.
- b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and

community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

As an internal service provider, we work closely with OHA Executive Leadership, Oregon State Hospital leadership team, and our Equity & Inclusion (E&I) partners in all facets of work. We have broad support from OHA and OSH leaders and E&I partners to strengthen our OSH HR workforce to provide improved service delivery to the Oregon State Hospital.

6. Did you collaborate with your agency's data analysts, community engagement managers, outreach managers, and/or others that regularly interact with underserved and marginalized communities on this REIS? (Yes, no, or not applicable)

- a. If yes, describe how you collaborated with them on this REIS.

Not Applicable

- b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

Not Applicable

Community Engagement and Data

7. Identify the specific racial groups and communities that may be impacted by this POP, both directly and indirectly. In your answer, include responses to the following questions:

- a. How did you identify these impacted groups?

OSH has a diverse workforce that will be impacted by this POP.

- b. What data are you using to validate your assessment? If possible, use outreach and engagement feedback to gather information and insight.

- c. If possible, disaggregate the data by race, ethnicity, geography, income level, and other relevant characteristics. If disaggregated data is not available, please describe why.

How are communities impacted by this POP? What are the disproportionate impacts?
Please be specific.

OSH staff are the specific community that is impacted by this POP.

8. How did you ensure multiple perspectives were part of the decision-making process for this POP? In your answer, include responses to the following questions:

- a. Identify how you have or are planning to engage multiple perspectives and impacted groups to provide feedback on this POP (e.g. program design, budget, policy decisions, etc.). Please give specific examples.

This POP is centered around the continued service level delivery of HR staff to the OHA / OSH workforce. HR staff work closely with our Employee Resource Groups, made up of staff across OHA to form affinity groups, such as the Black, African & African American ERG, the People of Color ERG, El Grupo ERG, Workplace Individuals with Strong Experience (WISE) ERG, Disability Community (DisCo) ERG, Veterans ERG, Queer Collective ERG, Healthy Families ERG, Neurodiversity Network ERG, Fuerza Latina de Oregon (FLOR) ERG, Positive Employment Opportunities 4 People of Lived Experience (PEOPLE) ERG, and others to understand how they are experiencing OHA as an employer and how to improve. We also administer the annual Employee Engagement Survey that provides for a depth and breadth of feedback that is integral to understanding employee perspectives. HR staff are both members of and consultants to OHA's Equity Advancement Leadership Team that is instrumental in furthering equity practices and holding divisional leadership accountable for equity planning and delivery.

- b. If community engagement is not part of your approach, please explain why and what you did instead to incorporate community perspectives. In your response, describe the following: the decision-making process used to determine engagement was not feasible or appropriate, the specific barriers (beyond general time or capacity), and how you mitigated the risk of missing community input (e.g. using existing feedback, partnering with trusted organizations, review from advisory bodies, etc.).

For this POP, the community would be limited to OSH employees.

Impacts and Accountability

9. If this POP is not funded, please describe the following:

- a. Which racial or ethnic communities would be most impacted.

The internal workforce communities of color, LGBTQIA2S+ communities , disability communities, multilingual staff communities will be impacted adversely by a decline in service level delivery, including administration of ERG programs.

- b. How disparities would likely persist or worsen.

Disparities will continue and worsen as long as there are not staff dedicated to serving the needs of OSH's diverse workforce.

10. Who will be monitoring racial equity outcomes over time for this POP?

- a. How will progress be reported?

HR's Data Analytics team will report on progress through our normal channels such as Affirmative Action plan data, dashboards for leadership team members, Employee Engagement Survey analytics, Governor Office reporting.

- b. How will leadership be informed of equity impacts?

As above.

- c. How will the community be involved in monitoring outcomes?

Our OHA internal community of ERGs and EALT receive reporting data as mentioned above.

Oregon Health Authority 2027-29 Policy Package

Division:	Oregon State Hospital (OSH)
Program:	Facilities and Support Operations
Policy package title:	OSH Safety and Security
Policy package number:	419
Related legislation:	42 U.S.C. § Ch.7 1395 XVIII & 1396 XIX (Medicaid and Medicare Conditions of Participation) 42 U.S.C. § CH.126 (Americans with Disabilities Act) ORS 276.915 (Energy Design Requirements) ORS 291.215 (Deferred Maintenance Reduction)
Summary statement:	This policy option package provides the support OSH needs to ensure business continuity with focused investments in patient care and operational program needs. This policy package continues to build on addressing the evolving clinical programming changes and facility/infrastructure modernization needs. It also addresses the need for additional staffing capacity to ensure effective building portfolio asset management and continuous project management. OSH's Peter Courtney Salem Campus consists of 1.2M ft² of buildings and structures, including 23 cottages, with a Current Replacement Value (CRV) of \$713M. The Junction City Campus is 227K ft², with a CRV of \$164M. The

Oregon Health Authority: 2027-29 Policy Package

Pendleton Cottages Campus facility consists of several older buildings, totaling 39K ft², and a CRV of \$9M. This portfolio of buildings and structures supports a psychiatric hospital system that inspires hope and promotes safety and supports recovery for all. The State Hospital system serves more than 1,800 people every year and employs more than 2,900 staff.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy Package Pricing:	\$3,068,775	\$16,099,331	\$0	\$19,223,775	0	0.00

Purpose

1. What problem is OHA trying to fix or solve?

OSH is at a crossroads where its facilities have reached an age where a robust long-term investment strategy is needed to ensure that it can effectively meet OHA's strategic plan to support all Oregonians in need of mental health treatment. For over a decade OSH has had a comprehensive preventative maintenance program and adequate budgetary funding for routine preventative maintenance and capital improvement investments since its two flagship facilities in Salem and Junction city were newly built and brought online in 2011 and 2013, respectively.

Oregon Health Authority: 2027-29 Policy Package

With their heavy use as a 24/7 secure mental health services operation, the buildings have reached a point where the lifecycle of many of its building systems must make capital improvement and capital construction investments a priority. Additionally, deferred maintenance is progressively becoming a consistent challenge. The remaining structures, including the 23 cottages in Salem and the facilities in Pendleton, are much older and more maintenance intensive.

2. What would this policy package buy and how and when would it be implemented?

This policy package buys a bonded investment that funds Capital Investments, Equipment Investments and 3 full-time 6-year limited duration positions. This investment will be implemented over 6 years from 2027 – 2033. These investments will support focused programming enhancement measures for clinical, security, safety, and facilities infrastructure improvements.

The objective of this policy package is to support OSH's long-term strategic capital planning effort for its facilities portfolio at its Salem, Junction City, and Pendleton campus locations; facilities that support the mental healthcare services to Oregonians by providing therapeutic, evidence-based, patient-centered treatment that focuses on recovery and community reintegration in a safe environment. The State Hospital system serves more than 1,800 people every year and employs more than 2,900 support staff.

The investments contained herein support patient care and staffing needs that are focused on the following priorities:

Oregon Health Authority: 2027-29 Policy Package

- Psychiatric In-patient Care.
- Security & Safety Management Enhancements.
- Operational Needs Investments.
- Equipment Replacement Investments.

These investments are critical to provide a safe and secure environment for patients and staff, as well as maintaining business continuity, and regulatory compliance.

- **Capital Investments:**

- Junction City Campus Clinic Dental Program Services Space Addition (Clinical Measures).
- Salem and Junction City Seclusion Room Door Replacement Project (Clinical/Safety/Security Measures).
- Salem Campus Unit(s) Medical Room Improvements Architectural & Engineering (A&E) Services (Clinical Measures).
- Multi-campus Parking Improvement and Expansion Project (Infrastructure Measures).
- Salem Campus Grounds Safety and Environmental Improvements (Infrastructure Measures).
- Salem Campus Facilities Building Rehabilitation/Renovation Project (Infrastructure Measures).
- Junction City Campus Architectural & Engineering (A&E) Services for Building and Infrastructure Improvements.

- **Equipment Investments:**

- Medical Beds (Clinical Measure)
- Grounds Equipment (Infrastructure Measure)
- Forklifts (Warehouse Operations Measure)
- Forklift (Motor Pool Operations Measure)

Oregon Health Authority: 2027-29 Policy Package

- Pallet Shelving (Warehouse Operations Measure)
- **Position Investments:**
 - One (1) Full-time Construction Project Manager 2 (CPM2) – 6-year limited duration: this position will support the schematic, design, and construction phases of the projects listed herein. Additional work includes contract development, and contract administration, and all construction project and contractor-related business needs.
 - Two (2) Full-time Laborers 6 -year limited duration: these positions will accompany all contractor and subcontractor staff due to the high security perimeter environment where all non-OSH personnel are subject to background checks and the required full-time escorting throughout the duration of all projects.

The investments are totaled in their respective categories below:

27-29 INVESTMENT	
Capital Improvement	\$12.7M
Equipment Replacement	\$0.8M
Limited Duration Positions (6-year term)	\$2.3M
Costs of Issuance and Debt Services	\$3.4M
TOTAL	\$19.2M

Oregon Health Authority: 2027-29 Policy Package

3. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity¹ or equitable health outcomes? How does this policy package further OHA's mission and align with its strategic plan?

OSH strives to achieve the highest standards and outcomes in all aspects of its work. Engaged stewardship of the public trust and public resources includes maintaining OSH's facilities portfolio to the highest standards and investing in regulatory and infrastructure improvements to meet the constantly evolving needs of patients and staff.

OSH serves one of the most marginalized populations, the mentally ill. Maintaining well-kept, safe and functional treatment environments for Oregonians in need supports OHA's strategic plan to eliminate health inequities by ensuring that all people and communities can achieve optimum physical, mental, and social well-being through partnerships, prevention, and access to quality and affordable health care.

This policy package supports the continued investments needed to support the State Hospital's mission to provide the necessary and statutorily required healthcare services to Oregonians that have historically been discriminated and oppressed; being a fundamental component of the behavioral health system; enhancing the treatment environment and providing preventive health services and acts as the foundational and core component of behavioral health in Oregon.

Without this policy package there is an elevated risk that OSH's facilities and operations will be less effective and functional, and limited in its ability to support its mandated mission.

¹ Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability, gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.**

Oregon Health Authority: 2027-29 Policy Package

Quantifying results

4. What are the long-term desired outcomes?

The objective of this policy package is to ensure that OSH continuously maintains a safe, reliable, and sustainable operational environment that supports uninterrupted delivery of critical services, dynamic clinical programming needs, and compliance standards. Funding provided through this package will address essential and immediate programming needs to support patient safety, renew aging equipment essential to the core functions of the hospital facilities, and provide staffing resources necessary to support the implementation of these projects.

By investing in these foundational capabilities, OSH will maintain and strengthen its ability to meet regulatory and safety requirements, reduce operational risks, improve workforce readiness, and maintain continuity of service. Equipment renewal and staffing investments will enhance organizational resilience, increase operational efficiency, and support the successful delivery of these projects.

Over time, these investments will position the agency to proactively manage infrastructure and program demands, minimize costly service disruptions, and ensure resources remain aligned with evolving business, safety, and customer needs. The result will be an enhanced, more effective, compliant, and sustainable organization.

These investments are part of an over-arching long-term strategic facilities investment plan to ensure that OSH's strategic plan can be realized and managed in perpetuity, especially as its facilities and site systems are aging. The investments that are submitted via this policy package are one part of a multi-part planning effort to ensure that all OSH's facilities are mission ready and to ensure uninterrupted business continuity.

Oregon Health Authority: 2027-29 Policy Package

The fundamental drivers of this plan include:

- Effective long-range capital planning for maximizing the use and value of our facilities via a consistent 10-year planning vision.
- Being good stewards of our investments → this is where public investments are properly maintained to ensure occupant safety, being nimble as programming needs change or evolve, and the reduction of long-term operating costs.
- Designing for quality → good building design contributes to higher employee productivity and adaptability and enhanced public service.
- Right sizing our portfolio → sustainability and resiliency being very high priorities, and meeting agencies programming needs.
- Conveying our identity → ensuring that our buildings have an image of accessibility and responsiveness (in-short, how adaptable are our buildings to program changes).
- Emphasizing resiliency → ensuring that buildings are prepared to withstand catastrophic events – both natural (earthquake) and man-made (climate change which could affect HVAC loads, snow loads, etc.)
- Applying best practices when maintaining and planning for new facilities → for example, utilizing recurring master planning efforts to help facilitate and support the long-term need when planning for larger capital improvement and capital construction projects.
- Facility investment tool → effective investment strategy via a dedicated Facilities investment account ([ORS 276.285](#)).

Oregon Health Authority: 2027-29 Policy Package

OSH is committed to comply with regulatory requirements and achieve good stewardship of state assets to provide a safe and therapeutic environment of care to Oregon's most vulnerable populations.

5. What are the envisioned outputs of this investment? How will OHA measure the impacts on health inequities of this policy package?

OSH strives to achieve the highest standards and outcomes in all aspects of its work. Good stewardship of the public trust and public resources includes maintaining facilities to the highest standards and making regulatory and infrastructure improvements to meet the needs of patients and staff by upholding OHA's mission that all people and communities can achieve optimum physical, mental, and social well-being through partnerships, prevention, and access to quality, affordable health care.

This policy package will strengthen organizational capacity by ensuring staff have the resources, equipment, and support necessary to perform their work safely and effectively. Investing in program needs and the renewal of critical equipment will reduce operational and safety risks, improve reliability, and help avoid service disruptions resulting from equipment failures or deferred replacement.

Over the long term, this policy package will also position the agency to maintain compliance with safety requirements, preserve institutional knowledge and workforce capability, and support the successful completion of strategic initiatives and programming needs. These investments will also ensure OSH remains responsive to patient care needs and is capable of delivering consistent, high-quality services to patients.

Oregon Health Authority: 2027-29 Policy Package

How achieved

6. What actions have occurred to resolve the issue prior to requesting a policy package?

OSH has attempted to use budgetary resources to resolve programming needs changes and building system lifecycle issues that continuously pose a challenge due to unplanned repair or replacement occurrences. The current strain on biennial operations and facilities managements budgets do not provide the resources to address and resolve the large building system replacement loads and facility upgrades to accommodate programming changes as patient care needs continuously evolve.

With an estimated \$886M dollars in structural assets, the deferred maintenance (DM), capital improvement (CI), and capital construction (CC) investments to modernize OSH's buildings are a significant need. This is further supported by the fact that many of its newer facilities are well into their second decade of use, while many of its older structures are over 50 years old.

7. What alternatives were considered and what were the reasons for rejecting them?

There are no viable alternatives to addressing patient care program change needs, lifecycle asset replacement and preventative maintenance needs.

8. What other agencies, programs, community partners or stakeholders are collaborating on this policy package?

None

Oregon Health Authority: 2027-29 Policy Package

- 9. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.**

None

- 10. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?**

None

- 11. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.**

No

Staffing and fiscal impact

Implementation date(s): Positions and services will be implemented
starting September 2027

End date (if applicable): OSH Projects will end June 2033
Debt Services will extend through 2037-39

Oregon Health Authority: 2027-29 Policy Package

12. What assumptions affect the pricing of this policy package?

Inflation and other market price escalation, and the availability of services and supplies. The pricing related to positions could vary due to cost of living increases and/or annual step increases.

13. Will there be new responsibilities for OHA and/or Shared Services? Specify which programs and describe their new responsibilities.

With the positions requested in a corresponding package, OSH will take over contracting responsibility for construction and deferred maintenance projects with delegated authority from Office of Contracts and Procurement therefore there will be no additional workload for Shared Services.

14. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No

15. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

Oregon Health Authority: 2027-29 Policy Package

This policy package is requesting the following staffing (FTE) capacity supported by XI-Q Bond financing:

Classification	Class Title	Position Type	Implementation	Count	FTE	Fund
OAI C3268 AP	Construction Project Manager 2	6-year Limited Duration, Full Time	September 2027	1	0.92	OF
OAI C4116 AP	Laborer/Student Worker	6-year Limited Duration, Full Time	September 2027	1	0.92	OF
OAI C4116 AP	Laborer/Student Worker	6-year Limited Duration, Full Time	September 2027	1	0.92	OF

16. What are the start-up and one-time costs?

Start-up costs consist of \$309,502 in Other Funds for XI-Q bond costs of issuance.

17. What are the ongoing costs?

The current XI-Q Bond estimate expires in the 2037-39 biennium and totals \$22,694,347 after reimbursement of Debt Services.

For the 2027-29 biennium only, XI-Q Bond expenses (excluding the Costs of Issuance in the prior section), are expected to total \$15,789,829 for projects and \$3,068,775 in Debt Services for a 2027-29 expense of \$18,858,604 related to bond financing.

The three support positions within this package are bond financed, limited duration positions to perform work on these projects and are within the 2027-29 bond financed amount above.

Oregon Health Authority: 2027-29 Policy Package

18. What reductions will you use to offset the costs of this work and maintain budget neutrality?

Reductions will be represented in the OHA cost offset POP.

19. What are the sources of funding (revenue) and the funding split (GF/OF/FF) for each part of the investment as well as the offset/reduction?

The requested funding split for the 2027-29 investment is 100% OF. The Other Funds being requested are to allow for proceeds of XI-Q bond sales to be expended.

General Fund Debt Services are estimated to total \$22,694,347 and be completed in 2037-39.

20. What are the potential savings (above the offset to pay for the investment)?

There are no direct savings resulting from this investment.

Oregon Health Authority: 2027-29 Policy Package

Fiscal Detail

One-time costs	Note: Assumes 2027-29 Debt Services and Costs of Issuances are one-time (Bond ongoing for 6-year term)

RACIAL EQUITY IMPACT STATEMENT (REIS) WORKSHEET: POLICY OPTION PACKAGE (POP) QUESTIONS

OHA POP #419: OSH SAFETY AND SECURITY

Program managers responsible for the POP: Please answer the questions below for every POP being proposed in your agency request budget. To fill out this worksheet, download a copy of this worksheet and type your answers below each question.

Program Overview

1. Please describe the POP being proposed.

OSH Facilities Investments for Safety and Security Infrastructure and Equipment

This policy option package provides the support OSH needs to ensure business continuity, can support program needs, and to provide additional staffing to ensure the successful completion of the Projects.

2. Why is the POP being proposed?

OSH has reached a crossroads where its facilities and dynamic patient programming needs require a robust long-term investment strategy to ensure that it can effectively meet OHA's strategic plan to support Oregonians in need of mental health treatment.

Consultation

3. Who is completing this REIS?

OSH Health Equity Support Services Manager

4. Who is responsible for tracking equity outcomes? What method(s) are they using to track outcomes?

Each department will be responsible for tracking equity outcomes. Results will be shared with the DEIB practitioner for consultation and consideration of ongoing changes to better reflect and improve the experience of patients at OSH. The methods to track outcomes will include quantitative data assessing incident reports, and qualitative data in which feedback from patients will serve as the basis

for assessment of current practices and future changes as needed based on patient's needs.

5. Does your agency have a DEIB practitioner (Yes or no)?

Yes,

a. If yes, describe how you collaborated with them on this REIS.

Project Managers and DEIB practitioner collaborated in the assessment of current data and potential solutions that would lead to the reduced inequities in treatment services at OSH. Patients' needs are personalized according to their ethnical background, race, gender, and any accommodation is intended to provide support during their stay while equipping patients to return to the community.

b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

6. Did you collaborate with your agency's data analysts, community engagement managers, outreach managers, and/or others that regularly interact with underserved and marginalized communities on this REIS? (Yes, no, or not applicable)

a. If yes, describe how you collaborated with them on this REIS.

Not Applicable

b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

Not Applicable

Community Engagement and Data

7. Identify the specific racial groups and communities that may be impacted by this POP, both directly and indirectly. In your answer, include responses to the following questions:

a. How did you identify these impacted groups?

The last census conducted at the hospital was in 2025. The results reflected Black/African American population to be the second highest (12%). In addition, the hospital serves a diverse age group, including 15.5% with ages between 55-84. Furthermore, all patients at OSH are people with lived experience with mental health conditions – a subset of Oregonians who have been historically marginalized.

- b. What data are you using to validate your assessment? If possible, use outreach and engagement feedback to gather information and insight.

The hospital conducted a census in 2025 and since then, used systems upgrades and other data procedures and extractions as part of the data maturing process.

- c. If possible, disaggregate the data by race, ethnicity, geography, income level, and other relevant characteristics. If disaggregated data is not available, please describe why.

OSH Census By Race		
White/Caucasian	498	71.0%
Black/African-American	84	12.0%
Other	79	11.3%
Unknown/No Entry/Declined	14	2.0%
American Indian	13	1.9%
Asian-Asian/Pacific Islander	10	1.4%
Hawaiian/Pacific Islander	3	0.4%
Total	701	100.0%

Patients Served in 2025		
Age at D/C or End of Year		
Age Group	Count	Percent
18-24	125	6.7%
25-34	518	27.9%
35-44	593	31.9%
45-54	334	18.0%
55-64	212	11.4%
65-74	67	3.6%
75-84	9	0.5%
85+	0	0.0%
Total	1858	100.0%

How are communities impacted by this POP? What are the disproportionate impacts? Please be specific.

OSH patients are the specific community that is impacted by this POP. OSH patients must live on campus, so they are directly impacted by the condition and functionality of OSH facilities. OSH staff rely on having a functional facility in order to provide quality healthcare.

8. How did you ensure multiple perspectives were part of the decision-making process for this POP? In your answer, include responses to the following questions:
 - a. Identify how you have or are planning to engage multiple perspectives and impacted groups to provide feedback on this POP (e.g. program design, budget, policy decisions, etc.). Please give specific examples.

This POP is centered around the condition of OSH facilities. Impacted groups (OSH patients and staff) have multiple mediums (Peer Advisory Council, OSH Direct Connect) in which they can communicate concerns to OSH leadership. The OSH facilities team is also responsible for maintaining and assessing the condition of the hospital and ensuring it meets or exceeds standards established by Centers for Medicare and Medicaid Services (CMS) and The Joint Commission (TJC).

- b. If community engagement is not part of your approach, please explain why and what you did instead to incorporate community perspectives. In your response, describe the following: the decision-making process used to determine engagement was not feasible or appropriate, the specific barriers (beyond general time or capacity), and how you mitigated the risk of missing community input (e.g. using existing feedback, partnering with trusted organizations, review from advisory bodies, etc.).

For this POP, the community would be limited to patients who live at OSH, as well as staff who report to work at OSH facilities.

Impacts and Accountability

- 9. If this POP is not funded, please describe the following:

- a. Which racial or ethnic communities would be most impacted.

Communities of color, LGBTQIA2S+ communities and multilingual patients will be impacted. The immediate response from staff to the individual needs of patients will be delayed due to the interruption of communication if facilities or systems are not responding to the requests that better suit patients' care.

- b. How disparities would likely persist or worsen.

Disparities will continue as long as there are not staff dedicated to serving the needs of patients, which it plays a crucial role in the requirement for accreditation by the Joint Commission and for Medicare reimbursement through the Centers for Medicare and Medicaid Services (CMS), which supports 5% of OSH's biennial budget.

- 10. Who will be monitoring racial equity outcomes over time for this POP?

- a. How will progress be reported?

Not Applicable

- b. How will leadership be informed of equity impacts?

Not Applicable

- c. How will the community be involved in monitoring outcomes?

Not Applicable

Oregon Health Authority 2027-29 Policy Package

Division:	Medicaid
Program:	
Policy package title:	Prior Authorization Modernization
Policy package number:	420
Related legislation:	None

Summary statement:	Improves Medicaid services and achieves compliance with CMS-mandated Application Programming Interfaces (API) to enable member, provider and payer access to records. Streamlines Prior Authorization processes and funds both staff and contractors to support similar work in the future. Improves system flexibility, data interoperability, and healthcare access, improving health outcomes and reducing inequities among Medicaid populations. Without funding OHA risks non-compliance; this would both jeopardize federal funding, and hinder provider and member access to health information, thus exacerbating health disparities.
---------------------------	---

	General Fund	Lottery Funds	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	\$ 1,245,397	\$ -	\$ -	\$ 5,325,397	\$ 6,570,794	2	1.50

Oregon Health Authority: 2027-29 Policy Package

Purpose

1. What problem is OHA trying to fix or solve?

OHP members, providers and subsequent payers currently have limited access to administrative-level member health records due to OHA's lack of a secure method to exchange information in response to ad hoc requests. This limits the interoperability or reuse of data by members, providers and payers.

The initiative described in this Policy Option Package are required by the Center for Medicaid and Medicaid Services (CMS).¹ This requirement was introduced in 2024 via CMS-0057-F.² Compliance dates for this work span 2024 – 2027. Some work (including this proposed investment) was eligible for a 1-year, 1-time extension.

2. What would this policy package buy and how and when would it be implemented?

Provider, Prior Authorization and Payer Application Programming Interface (API) implementation. An API is a solution that allows different software applications to talk to each other. This technology will allow patients, providers, and payers to easily exchange information with OHA.

Implementation will be completed using contracted services for technology implementation to allow:

- Members to authorize the transfer of health records between payers (e.g., from Open Card/FFS to CCO; OHP to private insurance and vice versa).
- Providers to request and receive information on member health records to support continuity in care coordination and whole-person care.

¹ <https://www.federalregister.gov/documents/2024/02/08/2024-00895/medicare-and-medicaid-programs-patient-protection-and-affordable-care-act-advancing-interoperability>

² <https://www.cms.gov/newsroom/fact-sheets/cms-interoperability-prior-authorization-final-rule-cms-0057-f>

Oregon Health Authority: 2027-29 Policy Package

- Providers to query which services require Prior Authorization, what documentation is required to support Prior Authorization and submit Prior Authorizations.
- Patients to access and review Prior Authorizations requested on their behalf.
- Contract funds to ensure parity between behavioral health and medical prior authorization processing timelines.
- Two staff to support the implementation, maintenance and policy-making related to existing and forthcoming Interoperability initiatives required by CMS.

Provider, Prior Authorization and Payer Application Programming Interface (API) will be implemented according to the following timeline:

Year -->	2026		2027				2028				2029	
Quarter -->	3	4	1	2	3	4	1	2	3	4	1	2
Contract Amendment				X								
Design (MMIS Change Request)												
Development, Implementation (Enhancement Order)							I					
Maintenance												

Negotiation	
Contract Execution	X
Design	
Development and Implementation	
Implementation Complete	I
Maintenance	

Oregon Health Authority: 2027-29 Policy Package

To accomplish this work within the required timeframe, Design work will need to begin prior to the start of the 2027-2029 biennium. To enable this work Agency leadership will need to approve the completion of work using funds and matching rates from the MMIS Change Request (CR) pool.

3. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity³ or equitable health outcomes? How does this policy package further OHA's mission and align with its strategic plan?

This investment aims to address several barriers to achieving and measuring equitable health outcomes. The results of this investment will include:

- **Streamlined Prior Authorization Processes:** Simplifying and speeding up prior authorization processes reduces delays in accessing necessary healthcare services. This is crucial for populations facing barriers to healthcare due to bureaucratic hurdles and whose health is impacted by social and systemic structures that create health disparities and negatively impact social determinants of health.
- **Enhanced Payer-to-Payer Data Exchange:** Promoting continued access to care through improved data exchange between payers ensures seamless transitions for individuals, reducing disruptions in care continuity.
- **Support for Care Coordination and Whole Person Care:** Enabling providers to access comprehensive patient information across different settings supports better care coordination and holistic healthcare approaches. This is particularly beneficial for populations with complex health needs.

The investment aims to reduce or mitigate systemic barriers and advance health equity through improved data management and integration. Its success hinges on effective implementation and ensuring that standardized systems truly support the diverse needs of Medicaid beneficiaries. This

³ Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability, gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.**

Oregon Health Authority: 2027-29 Policy Package

approach aligns with broader goals of reducing health inequities by enhancing access, continuity of care, and data-driven decision-making in healthcare delivery.

Progress will enable the achievement of OHA strategic goals, strategies and actions, including:

- Coordinate and simplify the collection of required information from providers, **reducing administrative burden** through improvements to information exchange and Prior Authorization submission.

Quantifying results

4. What are the long-term desired outcomes?

To promote the secure exchange, access, and use of electronic health information to support better informed decision making and a more efficient health care system. By participating in a secure, connected health care system that empowers patients and their providers to access and use electronic health information to make better informed and more efficient decisions.⁴

- **Patients and Caregivers** - Have access and use of their complete electronic health record (EHR), confidence that their care providers are communicating and coordinating their care, and the ability to engage in their own care in a more meaningful way.
- **Providers** - Have easy access to the right patient health information at the right time to facilitate safer, better coordinated, and more efficient care.
- **Payers** - Facilitate care coordination through the exchange of electronic health information and make timely coverage decisions based on current and accurate information.

⁴ <https://www.cms.gov/priorities/key-initiatives/burden-reduction/interoperability/cms-interoperability>

Oregon Health Authority: 2027-29 Policy Package

- **Researchers and Innovators** - Have streamlined access to recent data to support groundbreaking studies and the development of new applications and technology.

5. What are the envisioned outputs of this investment? How will OHA measure the impacts on health inequities of this policy package?

OHA will measure the outcomes of this investment using federally mandated metrics and ongoing reporting⁵. This initiative will evaluate adoption and usage of the Prior Authorization, Provider Access and Payer to Payer API using a similar framing.

Benefit	Measurement
Improved information sharing with Medicaid members gives patients the ability to learn and control their healthcare experience.	• Count of unique members accessing health records per year. • Count of unique members accessing health records >1 time per year.
Improved information sharing with Providers supports whole-person care, allowing providers to learn about other ongoing treatments to deliver person-centered services that result in better outcomes.	• Count of unique providers accessing records on existing patients. • Count of unique providers accessing records on new patients.
Improved information sharing with payers simplifies provision of continued access to	• Count of member records transferred to OHA. • Count of member records transferred to other payers from OHA.

⁵ [https://cmsgov.github.io/CMCS-DSG-DSS-Certification-Staging/Ongoing%20Reporting/Interoperability%20\(IO\)%20API%20Metrics/](https://cmsgov.github.io/CMCS-DSG-DSS-Certification-Staging/Ongoing%20Reporting/Interoperability%20(IO)%20API%20Metrics/)

Oregon Health Authority: 2027-29 Policy Package

services for individuals at risk of health detriment due to transition of care.	
---	--

To the extent possible, OHA will establish state measures on usage and adoption that disaggregate federal-level reports using member Race, Ethnicity, Language, and Disability demographics.

How achieved

6. What actions have occurred to resolve the issue prior to requesting a policy package?

OHA has completed work to comply with the provisions of the Centers for Medicare and Medicaid Services' Patient Access and Interoperability final rule. This included:

- Making Claims and Formulary data available to patients through third-party applications.
- Making Provider Directory information available to application developers by way of a publicly available API endpoint

Additionally OHA has completed the planning activities summarized in the table below:

ID	Activity	Description
1	Completed Rough Order of Magnitude (ROM)	Requested estimate from current vendor on effort, timeline, and cost of proposed initiative to comply with: • Provider Access API • Prior Authorization API • Payer to Payer API
2	Completed Analysis of Alternatives	Analyzed four alternatives related to compliance with CMS-0057-F:

Oregon Health Authority: 2027-29 Policy Package

		• Status Quo • Seek Exemption from requirements • Completes work via open-competitive solicitation • Complete work via amendment of existing vendor contract
3	Completed Business Case	Collected and presented relevant information for agency and enterprise-level decision makers. This included: • Overview and background • Measurable business benefits • Assumptions & constraints • Analysis of alternatives • Organizational change management plan
4	Completed work breakdown structure (WBS) of known activities	Used prior work (implementation of CMS-9115-F) to inform construction of a WBS. This identified: • Known activities • Estimated durations • Responsible parties
5	Requested funds from Oregon Legislature	Presented above materials for consideration as part of a request for funding during the 2025-2027 biennium (7/1/2025 – 7/1/2027)

7. What alternatives were considered and what were the reasons for rejecting them?

Alternative 1 – Status Quo / Do Nothing

2027-29 Agency Request Budget

Policy Package #420
Page 8 of 17

Oregon Health Authority: 2027-29 Policy Package

Maintaining the status quo would mean taking no action to comply with these requirements from CMS. Under this alternative no work or investment is needed during 2027-2029. As a consequence, OHA would not:

- Modify existing APIs
- Implement and maintain standards-based APIs to improve the electronic exchange of health information and prior authorization processes for medical items and services.

Failure to comply with federal requirements by their stated implementation dates (1/1/2027) could jeopardize Federal Financial Participation (FFP) for the ongoing operations and maintenance (O&M) of its Medicaid Information Systems. Loss of FFP is calculated to result in an increase of state costs for system O&M by \$117M per year (\$235M per biennium).

Alternative 2 – Seek Exemption from API Requirements

CMS outlines specific parameters under which states can seek exemption from the requirement that they implement and maintain Provider Access, Payer to Payer, and Prior Authorization APIs. Under this alternative work would still be needed to modify the behavior of the Patient Access API, however, no entirely new work would be completed.

Exemptions are demonstrated primarily based upon the percentage of the state’s Medicaid Managed Care enrollment. To qualify, Oregon would need to demonstrate its eligibility for exemption through the submission of its annual MMIS Operational Advanced Planning Document (OAPD). While likely eligible for an exemption based on enrollment, refraining from completing this work is misaligned with several of OHA’s core values including:

- Service Excellence – seeking exemption would not “exceed the expectations of the people we serve”

Oregon Health Authority: 2027-29 Policy Package

- Leadership – choosing not to implement these technology solutions would limit our ability to “make changes that improve health and transform health care”
- Innovation – “[OHA] is not satisfied with the status quo if there are new and better ways to meet the needs of the people we serve.”
- Transparency – failure to implement information exchange technologies actively works against OHA’s commitment to “provide open access to information and meaningful opportunities to provide input and participate in decision-making”

Importantly, though, to qualify for an exemption OHA must also implement comparable technologies that support Prior Authorization activities, Provider Access and Payer to Payer exchange. **Because OHA does not currently have any comparable processes this effort would likely result in greater costs and a longer implementation time than pursuing Alternative 3 or 4.**

Alternative 3 –Complete work through an open-competitive solicitation

Under this alternative OHA would complete the work required by CMS without seeking exemption and would do so through the release of an open-competitive solicitation. This approach would ensure that OHA receives and reviews high-quality vendor proposals on how best to meet CMS requirements.

Open-competitive solicitations for IT work require significant oversight and in recent years have taken over 800 days to complete. Oregon procurement laws prevent vendors from completing work without a signed contract in place—this means that work could not begin on the required design, development and implementation until some time in mid- to late-2028. There is serious risk that this would jeopardize OHA’s ability to meet the CMS implementation date of 1/1/2027. Failure to comply with federal

Oregon Health Authority: 2027-29 Policy Package

requirements by their stated implementation dates could jeopardize Federal Financial Participation (FFP) for the ongoing operations and maintenance (O&M) of its Medicaid systems. Loss of FFP is calculated to result in an increase of state costs for system O&M by \$117M per year (235 per biennium).

Alternative 4 – Complete work via amendment of existing vendor contract

OHA would amend its contract with an existing vendor (Gainwell Technologies; GWT) to include the work required to implement and maintain Provider Access, Payer to Payer and Prior Authorization APIs. This alternative is recommended because GWT was recently under contract to implement the Patient Access and Provider Directory APIs mandated by CMS-9115-F and described by CMS as “the technological foundation [for Provider Access, Payer to Payer, and Prior Authorization APIs].”

Amending an existing contract will greatly reduce the time spent procuring technology services and will therefore increase the likelihood that OHA achieves compliance with federal regulation by applicable implementation dates.

8. What other agencies, programs, community partners or stakeholders are collaborating on this policy package?

The scope of collaborators will be determined in large part by the policy interpretations of the Medicaid Division. This may include:

- Office of Data Strategy and Operations (ODSO)
- Office of Information Services (OIS)
- Oregon Department of Human Service (ODHS)

Oregon Health Authority: 2027-29 Policy Package

- Comagine Health
- Acentra Health
- Coordinated Care Organizations (CCOs)

9. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

10. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Implementation of APIs will impact how the Medicaid program operates. Pursuant to the OHA/ODHS Tribal Consultation and Urban Indian Health Program Confer Policy, these represent Critical Events subject to consultation. OHA will ensure inclusion of Tribes in the planning and implementation of these policies and will initiate and conduct consultation in response to Critical Events.

To the extent that State, Tribal and Local governments constitute healthcare providers or payers, these entities would likely benefit from increased information sharing by utilizing the Provider Access, Prior Authorization or Payer APIs.

11. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Oregon Health Authority: 2027-29 Policy Package

Staffing and fiscal impact

Implementation date(s): 1/1/2028
End date (if applicable): N/A

12. What assumptions affect the pricing of this policy package?

- Funding of Design work via MMIS Change Request pool will be supported during the remainder of the 2025-2027 biennium.
- Existing systems will need to undergo substantial enhancement to accept HIPAA-compliant PA requests.
- PA processes considered in the scope of the Prior Authorization API include all Medicaid covered services which require providers to seek approval from a payer before providing care (including Health Related Social Needs (HRSN), Behavioral Health services, others)
- Recruitment for the 2 positions will occur as soon as approval is known and associated pricing will account for a delay in payroll cost due to recruitment.

13. Will there be new responsibilities for OHA and/or Shared Services? Specify which programs and describe their new responsibilities.

The staff requested will be performing new responsibilities including monitoring, tracking and policy analysis related to the CMS interoperability program area. These staff will be located in the Medicaid Division's Electronic Data Interchange (EDI) team. They will maintain and support new business processes related to currently implemented, and newly implemented Interoperability solutions.

Oregon Health Authority: 2027-29 Policy Package

14. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

15. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

The Medicaid Division will hire 2 new staff to support its Electronic Data Interchange (EDI) activities and to formally staff the Interoperability responsibilities produced through recent CMS final rules⁶. These staff will include:

- **1 OPA3 – Senior Interoperability Analyst**

Providing Third-Party Application / Developer technical support. Design test plans, monitoring and evaluation approach to ensure the accuracy of data made available via Interoperability APIs. Federal policy monitoring, change and vendor management for newly proposed or modified requirements. Compliance and security monitoring of state Interoperability services. Acting as a liaison among the Medicaid Division and between other divisions and programs such as the Office of Health IT and Analytics Infrastructure. This position interprets Federal and State policies and produces guiding documentation including updates to Oregon Administrative Rules and agency policies as appropriate.

- **1 OPA2 – Interoperability and EDI Specialist**

Provide Third-Party Application / Developer customer service and triage. Execute test plans, document and report defects, and recommend promotion to production for changes. Administer ongoing and foundational provider, CCO, third-party application and staff training. Organize, draft

⁶ <https://www.cms.gov/priorities/burden-reduction/overview/interoperability>

Oregon Health Authority: 2027-29 Policy Package

and deliver communication to Interoperability and EDI partners on outages, changes, or other relevant subjects. This position utilizes the rules and policies developed by the Senior Interoperability Analyst in the completion of their work.

16. What are the start-up and one-time costs?

Start-up and one-time costs exist for the Provider Access, Prior Authorization and Payer API implementation activities. They are projected to be roughly \$2,775,000 with a 90/10 federal fund split.

17. What are the ongoing costs?

Cost	General Fund	Federal Fund	Total Fund
Increase in BH contracted services			
Interoperability Platform Annual Fee (2 years)	\$200,000.00	\$1,800,000.00	\$2,000,000.00
Contracted Services (Interoperability Vendor)	\$300,000.00	\$2,700,000.00	\$3,000,000.00
Senior Interoperability Analyst (OPA3)	\$38,577.00	\$347,192.00	\$385,769.00
Interoperability and EDI Specialist (OPA2)	\$38,577.00	\$347,192.00	\$385,769.00

Oregon Health Authority: 2027-29 Policy Package

18. What reductions will you use to offset the costs of this work and maintain budget neutrality?

Federal CMS guidance requires states to comply with the changes identified above. Failure to comply risks Oregon losing access to enhanced federal funding, a full loss of which is estimated to increase state budget costs by \$254 million per biennium.

19. What are the sources of funding (revenue) and the funding split (GF/OF/FF) for each part of the investment as well as the offset/reduction?

The work described within this Policy Option Package would be funded using enhanced federal matching funds from the Centers of Medicare & Medicaid Services. This funding would occur at 90/10 with the State of Oregon contributing 10% of funds.

20. What are the potential savings (above the offset to pay for the investment)?

Federal CMS guidance requires states to comply with the changes identified above. Failure to comply risks Oregon losing access to enhanced federal funding, a full loss of which is estimated to increase state budget costs by \$254 million per biennium.

RACIAL EQUITY IMPACT STATEMENT (REIS) WORKSHEET: POLICY OPTION PACKAGE (POP) QUESTIONS

OHA POP #420: PRIOR AUTHORIZATION MODERNIZATION

Program managers responsible for the POP: Please answer the questions below for every POP being proposed in your agency request budget. To fill out this worksheet, download a copy of this worksheet and type your answers below each question.

OHA POP #420: Prior Authorization Modernization

Program Overview

1. Please describe the POP being proposed.

This investment improves Medicaid services and achieves compliance with CMS-mandated technological enhancements intended to enable member, provider and payer access to records. These enhancements will improve system flexibility, data interoperability, and healthcare access which will improve health outcomes and reduce inequities among Medicaid populations by improving access to data and additional transparency around service delivery. If funded this POP will streamline Prior Authorization processes and fund permanent staff to support this work—and similar work—in the future.

This investment will result in the implementation of three Application Programming Interface (APIs) including:

- Provider Access API
- Prior Authorization API
- Payer to Payer API

2. Why is the POP being proposed?

Federal Center for Medicare and Medicaid Services (CMS) guidance requires states to implement a collection of technologies to promote access and interoperability while reducing administrative burden. Failure to comply risks Oregon losing access to enhanced federal funding, a full loss of which is estimated to increase state budget costs by \$254 million per biennium.

Beyond addressing compliance concerns, this investment aims to address several barriers to achieving and measuring equitable health outcomes. The results of this investment will include:

- **Streamlined Prior Authorization Processes:** Simplifying and speeding up prior authorization processes reduces delays in accessing necessary healthcare services. This is crucial for populations facing barriers to healthcare due to bureaucratic hurdles and whose health is impacted by social and systemic structures that create health disparities and negatively impact social determinants of health.
- **Enhanced Payer-to-Payer Data Exchange:** Promoting continued access to care through improved data exchange between payers ensures seamless transitions for individuals, reducing disruptions in care continuity.
- **Support for Care Coordination and Whole Person Care:** Enabling providers to access comprehensive patient information across different settings supports better care coordination and holistic healthcare approaches. This is particularly beneficial for populations with complex health needs.

The investment aims to reduce or mitigate systemic barriers and advance health equity through improved data management and integration. Its success hinges on effective implementation and ensuring that standardized systems truly support the diverse needs of Medicaid beneficiaries. This approach aligns with broader goals of reducing health inequities by enhancing access, continuity of care, and data-driven decision-making in healthcare delivery.

Progress will enable the achievement of OHA strategic goals, strategies and actions, including:

- Coordinate and simplify the collection of required information from providers, reducing administrative burden through improvements to information exchange and Prior Authorization submission.

Consultation

3. Who is completing this REIS?

OPA 4

4. Who is responsible for tracking equity outcomes? What method(s) are they using to track outcomes?

Part of OHA’s compliance with federal rules requires annual reporting on usage of required technologies. Responsibilities for reporting will be shared between Health Analytics teams and OHA’s interoperability solution vendor. Measurements will be taken to evaluate the realization of the following benefits

Benefit	Measurement
Improved information sharing with Medicaid members gives patients the ability to learn and control their healthcare experience.	- Count of unique members accessing health records per year. - Count of unique members accessing health records >1 time per year.
Improved information sharing with Providers supports whole-person care, allowing providers to learn about other ongoing treatments to deliver person-centered services that result in better outcomes.	- Count of unique providers accessing records on existing patients. - Count of unique providers accessing records on new patients.
Improved information sharing with payers simplifies provision of continued access to services for individuals at risk of health detriment due to transition of care.	- Count of member records transferred to OHA. - Count of member records transferred to other payers from OHA.

The analyses will use data from utilization of the different APIs. These analyses will be completed using available member Race, Ethnicity, Language and Disability status information to assess impacts on health inequities.

5. Does your agency have a DEIB practitioner (Yes or no)?

- a. If yes, describe how you collaborated with them on this REIS.**
- b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).**

We have not involved OHA’s DEIB practitioner at this stage as this is a CMS mandated effort with set requirements. Gathering and incorporating additional input will be a part of the project moving forward in communications and community engagement.

6. Did you collaborate with your agency's data analysts, community engagement managers, outreach managers, and/or others that regularly interact with underserved and marginalized communities on this REIS? (Yes, no, or not applicable)

- a. If yes, describe how you collaborated with them on this REIS.**
- b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).**

Not Applicable. While this work will improve access to data and transparency for Oregonians there has not been engagement as the requirements/ specifications for this work come from CMS.

Community Engagement and Data

7. Identify the specific racial groups and communities that may be impacted by this POP, both directly and indirectly. In your answer, include responses to the following questions:

- a. How did you identify these impacted groups?**
- b. What data are you using to validate your assessment? If possible, use outreach and engagement feedback to gather information and insight.**
- c. If possible, disaggregate the data by race, ethnicity, geography, income level, and other relevant characteristics. If disaggregated data is not available, please describe why.**
- d. How are communities impacted by this POP? What are the disproportionate impacts? Please be specific.**

The decision to invest in this initiative will impact members of the Oregon Health Plan (OHP) which includes disproportionate representations from:

- Hispanic or Latino/a/x/e
- Black/African American
- American Indian and Alaska Native
- Native Hawaiian and Pacific Islander

This conclusion has been drawn by comparing the demographic composition of the State¹ to the most recent OHP Demographic Report² (6/23/2026). As described above, failure to fund the pop increases the risk of loss of federal financial participation which would dramatically constrain the Medicaid budget. This would negatively impact the service delivery level of OHP and could dramatically harm these communities.

8. How did you ensure multiple perspectives were part of the decision-making process for this POP? In your answer, include responses to the following questions:

- a. Identify how you have or are planning to engage multiple perspectives and impacted groups to provide feedback on this POP (e.g. program design, budget, policy decisions, etc.). Please give specific examples.**
- b. If community engagement is not part of your approach, please explain why and what you did instead to incorporate community perspectives. In your response, describe the following: the decision-making process used to determine engagement was not feasible or appropriate, the specific barriers (beyond general time or capacity), and how you mitigated the risk of missing community input (e.g. using existing feedback, partnering with trusted organizations, review from advisory bodies, etc.).**

Work has not been completed to identify or engage with community perspectives. The timeline within which OHA must comply limits the degree to which such engagement can occur. Instead, OHA intends to incorporate and rely on the Medicaid Division's OHP Community Engagement and Communications team and Equity and Inclusion Division to support the navigation of potential barriers. This includes:

- Develop communication plans
- Advertisement to members on the availability of these solutions.
- Develop and distribute educational resources about the benefits of these solutions.

¹ <https://www.census.gov/quickfacts/fact/table/OR/PST045224>

² <https://www.oregon.gov/oha/HPA/ANALYTICS/pages/medicaid-demographics.aspx#Dashboard>

Impacts and Accountability

9. If this POP is not funded, please describe the following:

- a. Which racial or ethnic communities would be most impacted.
- b. How disparities would likely persist or worsen.

As stated above, impact will disproportionately effect members that receive health care benefits from the Oregon Health Plan. This includes:

- Hispanic or Latino/a/x/e
- Black/African American
- American Indian and Alaska Native
- Native Hawaiian and Pacific Islander

If unfunded, OHA risks non-compliance with federal regulations. This could jeopardize federal funding for Medicaid programs, a potential loss of \$254 million per biennium. This would dramatically increase the cost of continued operation for existing systems and could force a major reduction in service-level for Medicaid recipients.

10. Who will be monitoring racial equity outcomes over time for this POP?

- a. How will progress be reported?
- b. How will leadership be informed of equity impacts?
- c. How will the community be involved in monitoring outcomes?

Part of OHA's compliance with federal rules requires annual reporting on usage of required technologies. Responsibilities for reporting will be shared between Health Analytics teams and OHA's interoperability solution vendor.

Progress will be measured through the annual publication of these measures.

Oregon Health Authority 2027-29 Policy Package

Division:	Public Health Division
Program:	Radiation Protection Services; Food, Pool, Lodging Health & Safety Prog.
Policy package title:	PH – Environmental Health Program Restoration
Policy package number:	421
Related legislation:	RPS: ORS 453.671, ORS 453.729(2), ORS 453.757 FPLHS: ORS 624.073, ORS 624.490, ORS 624.560, ORS 624.630, ORS 448.030, 448.035, ORS 448.037, ORS 446.321, ORS 446.335.

Summary statement:	Amends statutes to keep all people in Oregon safe from radiation exposure, foodborne illness, and other hazards where they live, work, and play. This policy package will ensure that OHA's Radiation Protection Services (RPS) and Food, Pool and Lodging Health and Safety (FPLHS) programs are financially stable and adequately staffed by increasing 2027-2029 use fees and authorizing modest annual increases to be adopted by rule. The package prevents insolvency and avoids dramatic reductions in staff and program services that deliver radiation, food, pool and lodging public health protections. No new staff are requested.
---------------------------	---

	General Fund	Lottery Funds	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	\$ -	\$ -	\$ 4,572,273	\$ -	\$ 4,572,273	0	0.00

Oregon Health Authority: 2027-29 Policy Package

Purpose

1. What problem is OHA trying to fix or solve?

OHA's statutorily required environmental health programs that keep Oregon workers, residents and visitors safe from excessive radiation exposure and hazardous environments are almost solely funded by fees which no longer cover rising program costs. Direct services to jurisdictions that have transferred local public health authority to OHA under ORS 431.482 ("Direct Services"), currently Curry and Wallowa Counties, are a significant driver of insolvency for FPLHS. Fees must reflect the actual costs to maintain basic protections for people in Oregon from hazards that can cause illness or injury no matter who they are or where they live.

2. What would this policy package buy and how and when would it be implemented?

OHA currently inspects 336 radioactive material facilities, 226 tanning facilities, 3,485 x-ray facilities, 350 food and recreational facilities in Curry and Wallowa counties and provides oversight for the licensing and inspection of 22,000 more food and recreational facilities across the state. This policy package would allow OHA to continue this current service level for protecting workers and the public against excess radiation exposure, foodborne illness, and aquatic and lodging facility hazards.

New and increased fees with the ability for OHA to adjust up to three percent annually (through a public process) will maintain OHA's basic capacity to continue this critical work across most of the state. New fee authority is requested to ensure sustainability in future biennia in the Direct Service jurisdictions. Without the additional revenue, raised through this package, the only state staff whose primary role is to protect people from excessive radiation exposure will be reduced from 17 FTE to 8 FTE, and the

Oregon Health Authority: 2027-29 Policy Package

statewide food, pool and lodging health and safety program staff will be reduced from 9 FTE to 5 FTE. These reductions will significantly reduce OHA's ability to keep Oregon workers, residents and visitors safe in places like restaurants, medical and dental offices with x-ray equipment, tanning salons, and public community pools. For food, pool and lodging, the reductions will have acute effect in the Direct Service jurisdictions, such that OHA is unable to fulfill its statutory requirements.

3. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity¹ or equitable health outcomes? How does this policy package further OHA's mission and align with its strategic plan?

The proposed fees and fee increases ensure that all Oregonians and communities are afforded equitable protection from excessive radiation, foodborne illness, and health and safety hazards in aquatic and lodging facilities, regardless of location. These programs are committed to protecting all communities and people across the state where they live, work, play, and seek health care.

Quantifying results

4. What are the long-term desired outcomes?

- Timely licensing or registration and inspection of radioactive material facilities, tanning facilities, x-ray facilities, and food, pool and lodging facilities

¹ Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability, gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.**

Oregon Health Authority: 2027-29 Policy Package

- Continued capacity to support adoption of regulations that are technically and scientifically current and practicable, developed in consultation with the regulated community and the public, and effectively implemented with strong education and support for the regulated community.
- Strong training and technical support to local public health authorities charged with local implementation in 34 counties
- Maintenance of a transparent, publicly accessible database of food, pool and lodging facility inspections.
- Public confidence that Oregon's health care, recreational, food service, and other facilities can be safely used or enjoyed without concern for environmental hazard exposures.
- Meeting statutory obligations for food, pool and lodging health and safety in Direct Service jurisdictions where OHA delivers local public health services.

4. What are the envisioned outputs of this investment? How will OHA measure the impacts on health inequities of this policy package?

OHA measures and reports on the results of program implementation. For radiation protection work, this includes documenting an annual average of 100 emergency radiation calls, safe practices compliance for more than 4,000 radiation-emitting devices, and results of radiation monitoring of air and water. For food, lodging and recreational facilities regulation, this means documenting reviews of 34 local environmental public health programs and review of all local public health inspectors to demonstrate competence in application of regulations and fielding technical assistance emails from local public health partners annually. OHA sets an expectation that local public health partners will maintain an inspection rate of 100% of licensed food, pool and lodging facilities each year. The goal of

Oregon Health Authority: 2027-29 Policy Package

both programs is to ensure that no matter where someone lives in Oregon, they have equal protection from these environmental hazards.

How achieved

5. What actions have occurred to resolve the issue prior to requesting a policy package?

Radiation Protection Services (RPS) has utilized quality improvement strategies to fully maximize its productivity and efficiency through staff reconfigurations, on-site facility inspection frequency changes, and use of new IT equipment. RPS instituted electronic field reporting for inspections, created new databases for monitoring regulatory functions and generating new radioactive material licenses, and adopted smart phone technology for more efficient reporting by completing administrative tasks in the field. The Food, Pool, Lodging, Health and Safety Program (FPLHS) has similarly applied quality improvement strategies and implemented Smartsheet automation to streamline work.

6. What alternatives were considered and what were the reasons for rejecting them?

RPS has carried out risk evaluation to reduce inspection frequencies for selected facilities. For FPLHS, the frequency of activities and inspections for these regulatory programs are mandated in rule and statute, so OHA does not have the option to modify workload by reducing licensing and inspection frequencies.

Oregon Health Authority: 2027-29 Policy Package

7. What other agencies, programs, community partners or stakeholders are collaborating on this policy package?

The State Radiation Advisory Committee (RAC) is a primary partner group representing Registrants and Licensees and provides guidance to RPS regarding Oregon Administrative Rule revisions and budgetary issues. It has been very supportive of past fee changes. Thus, presumably, the RAC would be an influencer of any proposed fee structure change. For previous fee increases, they have been unanimous in supporting the need for more revenue to maintain solvency. At this time, RPS has not been granted permission to discuss this policy package with partners.

FPLHS consults with a statutorily established Food Service Advisory Committee (FSAC) representing the food service industry, consumers, educators, dieticians, and local, state, and federal regulatory officials on policy, fees and other matters. Historically the FSAC has been supportive of fee increases for the program. Local public health authority partners represented through the Conference of Local Environmental Health Supervisors provide regular input and advice to the program on all food, pool and lodging health and safety programs. OHA closely collaborates with the Oregon Department of Agriculture, which has parallel responsibilities for retail food establishments and manufacturers.

8. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

Yes. See corresponding Legislative Concept.

For RPS fee increase amendments to:

- 1) ORS 453.671 to increase vendor licensing fees.

Oregon Health Authority: 2027-29 Policy Package

- 2) ORS 453.729(2) to increase the tanning registration fee cap.
- 3) ORS 453.757(1) to increase X-ray registration fees.
- 4) ORS 453.757(2) to increase the radioactive material licensing fee cap.
- 5) ORS 453.757 to adopt language to charge for license and registration application fees.
- 6) ORS 453.757 to adopt language to charge for licensing amendment fee.

For FPLHS, fees would increase for 29 categories of food service facilities (ORS 624.073, ORS 624.490, ORS 624.560, ORS 624.630), 21 categories of pool facilities (ORS 448.030, 448.035, ORS 448.037) and 8 categories of lodging facilities (ORS 446.321, ORS 446.335).

9. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Several state agencies and the regulated community depend upon stable, timely, and accountable programs and services. These agencies look for assistance and expertise related to emergency response, training, and rule interpretation, relying on OHA's environmental health regulatory programs as centers of expertise. Examples include radiation safety training for Oregon State Fire Marshall's regional hazmat teams and Oregon State Board of Nursing (OSBN), and consultation and training for local environmental health supervisors and staff in 34 counties on complex rule interpretation. In addition, while Local Public Health Authorities have the authority (unlike OHA) to set fees higher than statutory levels, they must get approval from OHA for fees more than 20% higher.

Oregon Health Authority: 2027-29 Policy Package

10. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Staffing and fiscal impact

Implementation date(s): July 1, 2027

End date (if applicable): n/a

11. What assumptions affect the pricing of this policy package?

Cost estimates are based on anticipated COLA increases for personal services (salaries) and indirect costs (associated operational expenditures). The pricing also assumes the number of licensees and registrants will remain approximately the same. For FPLHS, this assumes no counties in addition to Curry and Wallowa return public health responsibilities to OHA.

12. Will there be new responsibilities for OHA and/or Shared Services? Specify which programs and describe their new responsibilities.

This policy package is to maintain current levels for environmental health regulatory compliance and services related to radiation and food, pool and lodging facilities.

Oregon Health Authority: 2027-29 Policy Package

13. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

OHA does not anticipate any significant changes in the number of regulated entities or services delivered if this policy option package is approved. Absent this POP, OHA would have to reduce enforcement of statutes and rules and provide significantly less technical assistance to partners. This would increase the risks of adverse health impacts related to hazardous food, lodging and public pools, and radiation exposures.

14. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

No additional staffing is required with this policy package. The goal is to maintain current staffing and service levels.

15. What are the start-up and one-time costs?

None.

16. What are the ongoing costs?

Radiation Protection Services anticipates total expenses for the 2027-29 biennium to be approximately \$8.2 million and about \$8.6 million the 2029-31 biennium. These expenditures support regulatory personnel to be physically on site at registrants' and licensees' facilities conducting inspections and investigations throughout the state of Oregon. In addition, ancillary expenditures are generated with

Oregon Health Authority: 2027-29 Policy Package

partner agencies such as the Department of Justice to provide legal support and training institutions to address emerging technologies for developing regulations.

FPLHS anticipates 2027-29 costs at around \$4.8 million. Program expenses are for ongoing staff and associated services and supplies, including Department of Justice legal support and regular travel to conduct reviews of local public health authorities' environmental health delegated regulatory work, aquatic facility pre-opening inspections, and regional local public health training sessions. Increases are due to increases in cost-of-living adjustments and salary steps within the current staff structure. There are no one-time costs in 2027-29.

17. What reductions will you use to offset the costs of this work and maintain budget neutrality?

This policy package proposes to raise Other Funds fees to offset the costs of providing these environmental health regulatory services.

18. What are the sources of funding (revenue) and the funding split (GF/OF/FF) for each part of the investment as well as the offset/reduction?

Both programs are almost completely supported by fee revenue (Other Funds).

19. What are the potential savings (above the offset to pay for the investment)?

N/A

RACIAL EQUITY IMPACT STATEMENT (REIS) WORKSHEET: POLICY OPTION PACKAGE (POP) QUESTIONS

OHA POP #421: PH-ENVIRONMENTAL HEALTH PROGRAM RESTORATION

Program managers responsible for the POP: Please answer the questions below for every POP being proposed in your agency request budget. To fill out this worksheet, download a copy of this worksheet and type your answers below each question.

Program Overview

1. Please describe the POP being proposed.

This policy package will ensure that OHA's Radiation Protection Services (RPS) and Food, Pool and Lodging Health and Safety (FPLHS) programs are financially stable and adequately staffed by increasing 2027-2029 use fees in statute and authorizing modest annual increases to be adopted by rule.

2. Why is the POP being proposed?

The package prevents insolvency and avoids dramatic reductions in staff and program services that deliver radiation, food, pool and lodging public health protections. Adequate resources are needed to keep all people in Oregon safe from radiation exposure, foodborne illness, and other hazards where they live, work, and play.

Consultation

3. Who is completing this REIS?

Radiation Protection Services Interim Section Manager

Environmental Public Health Section Manager

4. Who is responsible for tracking equity outcomes? What method(s) are they using to track outcomes?

Not Applicable

5. Does your agency have a DEIB practitioner (Yes or no)? Yes

- a. If yes, describe how you collaborated with them on this REIS.

Not Applicable

- b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

FPLHS and RPS regulation programs strive to ensure fair and consistent application of safety requirements across the state so that all Oregonians and communities are afforded equitable medical care, radiation protection, prevention of foodborne illness, and other hazards regardless of where they live, work, and play.

6. Did you collaborate with your agency's data analysts, community engagement managers, outreach managers, and/or others that regularly interact with underserved and marginalized communities on this REIS? (Yes, no, or not applicable)

Not applicable

Community Engagement and Data

7. Identify the specific racial groups and communities that may be impacted by this POP, both directly and indirectly. In your answer, include responses to the following questions:

Not applicable due to programs not possessing a system to collect REALD/SOGI data. RPS and FPLHS do not possess the statutory authority to collect this information or archive the information collected.

- a. How did you identify these impacted groups?
- b. What data are you using to validate your assessment? If possible, use outreach and engagement feedback to gather information and insight.
- c. If possible, disaggregate the data by race, ethnicity, geography, income level, and other relevant characteristics. If disaggregated data is not available, please describe why.

- d. How are communities impacted by this POP? What are the disproportionate impacts? Please be specific.
8. How did you ensure multiple perspectives were part of the decision-making process for this POP? In your answer, include responses to the following questions:
- a. Identify how you have or are planning to engage multiple perspectives and impacted groups to provide feedback on this POP (e.g. program design, budget, policy decisions, etc.). Please give specific examples.

By statute, RPS is advised by the Radiation Advisory Committee, a committee appointed by the OHA Director with its primary role being to provide input and allow for public comment regarding RPS's fee structures.

- b. If community engagement is not part of your approach, please explain why and what you did instead to incorporate community perspectives. In your response, describe the following: the decision-making process used to determine engagement was not feasible or appropriate, the specific barriers (beyond general time or capacity), and how you mitigated the risk of missing community input (e.g. using existing feedback, partnering with trusted organizations, review from advisory bodies, etc.).

See responses to "a." above.

Impacts and Accountability: Not applicable due to programs not possessing a system to collect REALD/SOGI data. RPS and FPLHS do not possess the statutory authority to collect this information or archive the information collected.

9. If this POP is not funded, please describe the following:
- a. We do not believe any particular racial or ethnic group would be inequitably affected by reduced protections from excessive radiation exposure or foodborne illness, aquatic facility hazards, or lodging hazards.
 - b. N/A.
10. Who will be monitoring racial equity outcomes over time for this POP?
- a. How will progress be reported? N/A
 - b. How will leadership be informed of equity impacts? N/A
 - c. How will the community be involved in monitoring outcomes? N/A

Oregon Health Authority 2027-29 Policy Package

Division:	Public Health Division
Program:	Vital Records, Newborn Screening Program, Prescription Drug Monitoring Program, Oregon Environmental Lab Accreditation Program
Policy package title:	Public Health – Data Program Restoration
Policy package number:	422
Related legislation:	PDMP only: ORS 431A.880
Summary statement:	Fee revenue is no longer sufficient to maintain the mission critical data systems in vital records, newborn screening (NBS), Oregon Environmental Lab Accreditation Program (ORELAP), and the Prescription Drug Monitoring Program (PDMP).

	General Fund	Lottery Funds	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	\$ -	\$ -	\$ 6,212,468	\$ -	\$ 6,212,468	1	0.75

Oregon Health Authority: 2027-29 Policy Package

Purpose

1. What problem is OHA trying to fix or solve?

Fee revenue is no longer sufficient to maintain mission critical data systems in vital records, newborn screening (NBS), Oregon Environmental Lab Accreditation Program (ORELAP), and the Prescription Drug Monitoring Program (PDMP).

These programs provide essential activities and information needed to eliminate health inequities by 2030.

Related to vital records, current fee revenue has not kept pace with rising program operating costs, particularly increased personnel expenses resulting from cost-of-living adjustments. Without this additional revenue the foundational vital statistics data (births and deaths) used to assess the health inequities of the population would not be available timely for analysis and reporting.

At Oregon's state public health laboratory, two programs risk sustainability. ORELAP increased fees in July 2022, however, increased costs which were unanticipated in 2022 have resulted in a gap between program expenses and revenue from fees. ORELAP relies on fees, almost entirely, to sustain the program. The last fee increase for the Newborn Bloodspot Screening (NBS) program was in July of 2022. Over the past four years, unanticipated costs of program operations included COLA for state employees, increased costs of reagents/supplies due to inflation and tariffs and from adding three conditions to the Oregon panel in the past 4 years. The program anticipates adding four more conditions by 2028, further increasing costs. Fees ensure essential NBS program activities that identify babies with

Oregon Health Authority: 2027-29 Policy Package

treatable conditions, which prevents morbidity and mortality, and gives all Oregon newborns a healthy start.

Data and data-related management of prescription drugs is also at risk. Without a fee increase, OHA will be unable to continue supporting Prescription Drug Monitoring Program integration within electronic health records for more than 30,000 system users. Losing this functionality would be highly visible and unpopular across the healthcare community, as clinicians rely on seamless PDMP access to support safe prescribing practices. This reduction in service would significantly undermine provider workflows and patient safety efforts.

2. What would this policy package buy and how and when would it be implemented?

This policy option package would increase fees for services provided by four programs in the Public Health Division: vital records, newborn screening (NBS), Oregon Environmental Lab Accreditation Program (ORELAP), and the Prescription Drug Monitoring Program (PDMP).

The fee increases are needed to keep these essential programs solvent in future biennia and to continue to provide services to the public as well as data and information to assess the health of the population.

The vital records, NBS, ORELAP, and PDMP fee increases would be implemented on January 1, 2028.

Oregon Health Authority: 2027-29 Policy Package

3. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity¹ or equitable health outcomes? How does this policy package further OHA's mission and align with its strategic plan?

Data from vital records is essential for identifying and addressing health inequities across the state. Increasing the vital records fees supports the focus area Fostering Healthy Families and Environments by ensuring every person in Oregon has a healthy start. Birth and death statistics are essential public health tools to capture the health of a baby at birth. Birth records capture key indicators such as prenatal care and birth weight, while death records provide data on maternal and infant mortality and causes of death. These records are critical for identifying and addressing health disparities by race, ethnicity, gender, education, marital status, and geography. Such data are not available from other sources.

Within the state public health lab, ORELAP plays a vital role in protecting and promoting the health of all people and communities by helping ensure the water that people in Oregon drink, the air they breathe, and the environment they live in is free of chemicals, toxins and other substances that negatively impact health. These substances disproportionately impact communities of color, Tribal communities and low-income communities through past and current public policies that have increased risk in these communities.

Specifically, ORELAP-accredited laboratories test for lead in school drinking water and cyanotoxins from harmful algae blooms. ORELAP ensures that laboratories testing cannabis and psilocybin provide accurate data on potency and potential contaminants.

¹ Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability, gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.**

Oregon Health Authority: 2027-29 Policy Package

Newborn Bloodspot Screening (NBS) is a coordinated public health system that identifies infants with medical conditions requiring early treatment to prevent death or disability. It is mandated in statute that all babies receive screening, however cost has been cited as a barrier for why some families refuse screening. For the majority of Oregon families, NBS is covered by either private or public insurance (Oregon Health Plan). For families, choosing to use a birth provider who is NOT a Medicaid provider, the NBS fees are paid out of pocket. If a family states that they cannot afford this out-of-pocket expense, then the NBS program provides testing at no cost. An increase in fees will allow the program to continue to offer subsidized testing.

Likewise, although all babies with a medical condition might be identified through screening, there are differences in the access to follow-up care and treatment. The time to diagnosis may also vary depending upon whether the baby resides within an urban, rural or frontier region of the state. Lastly, at a national level, new conditions are continually being added to the recommended panel. Oregon must work towards implementation of these conditions to provide comparable care as our neighboring states. The Health and Human Services (HHS) Recommended Uniform Screening Panel (RUSP) provides states with guidance on which conditions should be included in their state newborn screening panels. In Oregon, the NBS advisory board reviews the RUSP and makes recommendations to the NBS program on which conditions should be added to Oregon's panel. The NBS program is responding to not only the recommendations of its advisory board, but also considering the impact nationwide, if we were to lag behind our neighboring states.

Without a fee increase, the path to continued solvency would require reductions in service levels (such as screening for fewer disorders or ending courier service (which picks up bloodspot screening cards

Oregon Health Authority: 2027-29 Policy Package

from across Oregon, including from rural areas). These measures would negatively affect health outcomes for infants and their families.

PDMP data is crucial to improving patient care for all patients and monitoring changes in the opioid epidemic in Oregon. This is especially impactful for non-Hispanic American Indian and Alaska Native communities, along with non-Hispanic Black and African American communities in Oregon, which have the highest rates per 100,000 for fatal overdoses and for drug overdose hospitalizations and emergency department visits.

4. What are the long-term desired outcomes?

Additional revenue from vital records fees increase will allow the program to continue to provide critical services by maintaining staff and operations that gather, edit, analyze and report vital statistics data. Without this additional revenue the foundational vital statistics data (births and deaths) used to assess the health inequities of the population would not be available timely for analysis and reporting.

For ORELAP, a fee increase will maintain current staffing levels and provide timely and quality accreditations that meet established standards and regulatory requirements to best serve ORELAP's clients and protect the health of Oregonians. For newborn screening, the goal with this proposed fee increase is to continue to support the essential operations of the program.

The additional revenue from a fee increase for PDMP will make the program sustainable long term (>10 years) without reliance on additional fee increases.

Oregon Health Authority: 2027-29 Policy Package

5. What are the envisioned outputs of this investment? How will OHA measure the impacts on health inequities of this policy package?

A fee increase will allow the vital records program to remain solvent. By supporting staff and operations that gather, edit, analyze and report vital statistics, specifically birth and death statistics, the program will be able to continue providing timely and accurate information to the public and communities to identify health inequities and address those inequities.

A fee revision is needed to ensure that ORELAP can maintain current staffing levels and provide timely and quality accreditations that meet established standards and regulatory requirements to best serve ORELAP's clients and protect the health of Oregonians. Importantly, this policy package would help ORELAP accredit laboratories that respond to critical emerging needs, such as Per- and polyfluoroalkyl substances (PFAS) chemicals in drinking water. For newborn screening, the fee increase will help ensure the NBS program maintain current staffing levels, continually add conditions to its panel, and support operational improvements, including the courier service and updates to the laboratory information management system. The impact on health inequities will be demonstrated through the detection of babies with conditions on our panel, along with a timely diagnosis and treatment. Additionally, it is a goal to remove barriers in access to screening. The program will continue to monitor and tailor outreach and education to populations in Oregon where screening uptake is reduced.

Finally, the additional revenue from a fee increase will make PDMP sustainable long term (>10 years) while continuing to provide enhanced access to best practice tools to Oregon providers.

Oregon Health Authority: 2027-29 Policy Package

6. What actions have occurred to resolve the issue prior to requesting a policy package?

The Center for Health Statistics (aka Vital Records) has maintained its critical operations and statutory obligations and modernized its services for a decade without raising fees, relying primarily on increased payments from government agencies that use the vital records system and information to conduct their business. However, rising operational costs now exceed this revenue, creating a need to raise service fees.

ORELAP fees haven't increased since 2023, and rising costs have created a gap between fee revenue and the work required by statute. The program has cut expenses, including eliminating one Compliance Specialist 3 position, but these savings still aren't enough to keep the program financially sustainable.

The NBS program has continually performed quality improvement studies to increase efficiency and timeliness while also reducing costs. The program has developed its own laboratory tests to avoid purchasing cost prohibitive vendor kits. However, these savings have not been sufficient to cover the program's operational needs.

The PDMP has attempted to minimize this barrier by proactively seeking additional funding through grant applications and Medicaid funding mechanisms. While the PDMP has received funding through several grants and Medicaid matched funding, this funding is inconsistent and unreliable for long term planning.

7. What alternatives were considered and what were the reasons for rejecting them?

The alternative to a vital records fee increase is to increase the amount the government agencies pay to access vital records information to conduct their business. This alternative was rejected because it

Oregon Health Authority: 2027-29 Policy Package

continues reliance solely on government agencies to fill the funding gap, which is not sustainable. A vital records fee increase is needed. The last fee increase was approved by the 2015 legislature and went into effect in 2016 and 2018. The previous fee increase was in 2003. The increases in the past have been \$5. The current base fee for a certificate is \$25. The fee for amending a record is \$35.

One alternative to ORELAP fee increases is to reduce staffing levels which would result in delayed on-site assessments of laboratories, lack of oversight of drinking water, cannabis, and psilocybin compliance testing laboratories, and inability to investigate improper testing. This was rejected because it comes with significant increase in health risks to Oregonians. Another alternative to fee increases is to cease accrediting out-of-state laboratories. This option was rejected, however, as these laboratories pay higher fees than in-state laboratories, offsetting costs for the laboratories in Oregon, and therefore they represent an important revenue source for the program.

The NBS program considered reducing staff or number of conditions for which babies are tested. These options were rejected because any reduction in staff or in the number of conditions on the panel will lead to delays in testing or missed testing, which will have devastating outcomes for some Oregon families. With the increasing number of conditions recommended by the Oregon NBS advisory board, and in line with services implemented in other states, the program cannot operate fully without additional revenue. The program has considered the option of moving from two screens required for all babies to only a single screen. However, retrospective analysis of program metrics demonstrated that as many as 50% of all affected babies are identified on the second screen. Because of this analysis, OHA is not pursuing this option.

Oregon Health Authority: 2027-29 Policy Package

Alternatives to increasing the PDMP fee have already been implemented, and they reduced the previous fee increase and delayed the current fee increase. The fee increase previously was \$25 to \$35 while the agency implemented budget reductions, pursued grant opportunities, and secured Medicaid funding. While these actions reduced strain on the budget, they are insufficient to sustain the program long term.

8. What other agencies, programs, community partners or stakeholders are collaborating on this policy package?

Other agencies, programs, and partners have not been contacted to collaborate on this the vital records fee increase as of now. Likely collaborators include Department of Justice – Division of Child Support, Oregon Department of Human Services, PERS and other state agencies who use vital records information to conduct their business. Local county vital records offices are also likely collaborators since they provide vital records services at the local level. Community partners would include funeral homes, county clerks and circuit courts.

Currently, other agencies and programs are not participating in developing the ORELAP fee increase proposal. The OTAC (ORELAP Technical Advisory Committee) board and laboratory community in Oregon and other states are generally supportive of the accreditation work performed by ORELAP.

Healthcare providers would likely support an NBS fee increase with the anticipated outcomes of an expanded panel of conditions, access to state-wide courier services, updated information systems to access patient information, and expansion of follow-up care services for affected newborns.

Advocacy groups supporting people with rare genetic conditions would also be in support of this fee

Oregon Health Authority: 2027-29 Policy Package

increase because it would enable the Oregon NBS program to expand the list of conditions, facilitate more timely result notification, and enhance the follow-up care services.

The OHA Office of Health IT and HIT Commons (public-private partnership) are partners in the PDMP integration initiative which have been crucial in increasing utilization of PDMP data will be supportive of this POP.

9. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

Vital Records: No statute change required.

PDMP: Yes, fee is set in [ORS 431A.880](#) and statute would need to be changed to reflect the updated fee.

ORELAP: No statute change required.

NBS: No statute change required.

10. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

County Vital Records offices will support the fee increase since such an increase will provide additional revenue for issuance of birth and death certificates. Local and state government agencies that need certificates would be affected since the fees to receive certified copies of records would increase. The

Oregon Health Authority: 2027-29 Policy Package

program's government agency partners will support a fee increase since the additional revenue provided by fees will not result in large increases in their payments.

ORELAP accredits many laboratories operated or owned by municipalities and also accredits one tribally-operated laboratory. Additionally, ORELAP accredits two laboratories operated by the U.S. EPA, the Klamath Tribes, municipal governments, and federal government would be affected by this policy package because they would need to pay increased fees for accreditation of the laboratories they operate. No other agencies, local, Tribal governments will be impacted by NBS changes.

No other agencies, local, Tribal governments will be impacted by PDMP changes.

11. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Staffing and fiscal impact

Implementation date(s):	Vital records fees: January 1, 2028, PDMP: January 1, 2028; ORELAP fees: January 1, 2028, NBS fees January 1, 2028
End date (if applicable):	Vital records fees: N/A PDMP: N/A, ORELAP fees: N/A and NBS: N/A

Oregon Health Authority: 2027-29 Policy Package

12. What assumptions affect the pricing of this policy package?

Vital records: An increase of vital records fees by \$5.00 for most services starting January 1, 2028, will provide enough additional revenue to ensure the program remains solvent and has a cash balance equivalent of three months of expenditures for future biennium. The current base fee for a certificate is \$25. Increasing the fee by \$5 will make the base fee for a certificate \$30. This increase will provide 10-year sustainability.

The increase in fees revenue will redistribute the amount other government agencies pay the program so that it is more equitable.

ORELAP: Analysis assumes consistent numbers and complexities of laboratories along with consistent payroll costs. We are proposing a general 50% fee increase as the program's fees change depending on the complexity of testing performed at the laboratory.

NBS: Analysis assumes consistent numbers of babies born in the state each year, along with consistent payroll costs and anticipated increases in reagents and instrumentation. The analysis also includes estimated costs for implementation of new conditions. The \$35 increases across the board (\$100 to \$135 for a single kit and \$175 to \$210 for double and triple) will help build a sustainable NBS program.

PDMP: Analysis assumes inconsistent grant funding and potential for decrease in Medicaid matched funds. The \$15 fee increase (from \$35 to \$50) would provide 10-year sustainability maintenance even with decreased additional revenue.

Oregon Health Authority: 2027-29 Policy Package

13. Will there be new responsibilities for OHA and/or Shared Services? Specify which programs and describe their new responsibilities.

No new responsibilities for OHA or Shared Services

14. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

Vital Records: Individuals or families that need certified copies of vital records will be paying a higher fee to get those records once the fee increase goes into effect.

PDMP, ORELAP and NBS: No changes.

15. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

Vital records: This work will be completed by existing staff. Implementation of a fee increase requires one-time staffing resources ranging from managers to administrative staff.

ORELAP: This work will be completed by existing staff. Implementation of a fee increase requires one-time staffing resources ranging from managers to administrative staff.

NBS: 1 FTE Implementation of a fee increase will cover one new position. We will be requesting a manager position to oversee the follow-up and education team within the newborn bloodspot screening program. Outreach and education are essential for meeting program goals to end health inequities and providing timely diagnosis and follow-up care.

Oregon Health Authority: 2027-29 Policy Package

PDMP: No additional resources required to implement.

16. What are the start-up and one-time costs?

Vital records: Existing staffing resources will be dedicated to update forms, prepare communications, update training and modify the vital records systems to process new fee amounts.

ORELAP: Existing staffing resources will be dedicated to update forms, prepare communications, update training and modify the vital records systems to process new fee amounts.

NBS: None.

PDMP: None.

17. What are the ongoing costs?

Vital records, PDMP, ORELAP and NBS: None.

18. What reductions will you use to offset the costs of this work and maintain budget neutrality?

Vital records, PDMP, ORELAP and NBS: No reductions are needed. Implementing a fee increase is a one-time cost.

19. What are the sources of funding (revenue) and the funding split (GF/OF/FF) for each part of the investment as well as the offset/reduction?

Vital records, ORELAP and NBS: This policy option package is to increase Other Funds through fees.

Oregon Health Authority: 2027-29 Policy Package

PDMP: N/A

20. What are the potential savings (above the offset to pay for the investment)?

Vital records, PDMP, ORELAP and NBS: N/A.

RACIAL EQUITY IMPACT STATEMENT (REIS) WORKSHEET: POLICY OPTION PACKAGE (POP) QUESTIONS

OHA POP #422: PUBLIC HEALTH - DATA PROGRAM RESTORATION

Program managers responsible for the POP: Please answer the questions below for every POP being proposed in your agency request budget. To fill out this worksheet, download a copy of this worksheet and type your answers below each question.

Program Overview

1. Please describe the POP being proposed.

This policy option package would increase fees for services provided by four integral programs in the Public Health Division: vital records, newborn bloodspot screening (NBS), Oregon Environmental Lab Accreditation Program (ORELAP), and the Prescription Drug Monitoring Program (PDMP).

The fee increases are needed to keep these essential programs solvent in future biennium and to continue to provide services to the public as well as data and information to assess the health of the population.

The vital records, NBS, ORELAP, and PDMP fees increase would be implemented on January 1, 2028.

2. Why is the POP being proposed?

Fee revenue is no longer sufficient to maintain the following mission critical data systems in vital records, newborn screening (NBS), Oregon Environmental Lab Accreditation Program (ORELAP), and the Prescription Drug Monitoring Program (PDMP). These programs provide essential activities and information needed to eliminate health inequities by 2030.

Consultation

3. Who is completing this REIS? Senior staff in the specific programs contributed to the completion of this REIS.

4. Who is responsible for tracking equity outcomes? Each program will be tracking equity outcomes. What method(s) are they using to track outcomes?

Vital Records: Equity outcomes will be tracked by ensuring that we provide and analyze accurate and timely birth and death data for identifying and addressing health inequities across the state. Health disparities by race, ethnicity, gender, education, marital status, and geography can be examined.

PDMP: Equity outcomes will be tracked by ensuring that we provide and analyze accurate and timely data to improve patient care for all patients and monitor changes in the opioid epidemic in Oregon. This is especially impactful for non-Hispanic American Indian and Alaska Native communities, along with non-Hispanic Black and African American communities in Oregon, which have the highest rates per 100,000 for fatal overdoses and for drug overdose hospitalizations and emergency department visits.

ORELAP: Equity outcomes will be tracked by ensuring that timely and quality lab accreditations are completed that meet established standards and regulatory requirements to best serve ORELAP's clients and protect the health of Oregonians. Importantly, this policy package would help ORELAP accredit laboratories that respond to critical emerging needs, such as Per- and polyfluoroalkyl substances (PFAS) chemicals in drinking water.

NBS: Equity outcomes will be tracked by ensuring that NBS program maintains current staffing levels, continually add conditions to its panel, and support operational expansion, including the courier service and updates to the laboratory information management system. The impact to health inequities will be demonstrated through the detection of babies with conditions on our panel, along with a timely diagnosis and treatment. Additionally, it is a goal to remove barriers in access to screening. The program will continue to monitor and tailor outreach and education to populations in Oregon where screening uptake is reduced.

5. Does your agency have a DEIB practitioner (Yes or no)? Yes
 - a. If yes, describe how you collaborated with them on this REIS.
 - b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and

community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

A recommendation to increase vital records fees was proposed by the House Bill 2420 workgroup that was convened in 2024. This workgroup was comprised of vital records partners throughout the state. A report of recommendations to provide equitable access to vital records throughout the state and equitable funding to maintain the vital records system was submitted to the legislative assembly in December 2024.

6. Did you collaborate with your agency's data analysts, community engagement managers, outreach managers, and/or others that regularly interact with underserved and marginalized communities on this REIS? (Yes, no, or not applicable)

If yes, describe how you collaborated with them on this REIS.

Public Health Division program data analysts and subject matter experts have provided information on the equity impacts of this POP.

- a. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

The Center for Health Statistics convened a workgroup of community partners in 2024 that provided recommendations for providing equitable access to vital records and equitable funding for the vital records system throughout the state.

Community Engagement and Data

7. Identify the specific racial groups and communities that may be impacted by this POP, both directly and indirectly. In your answer, include responses to the following questions:

Vital Records: Providing timely and accurate vital records data, specifically on all births and deaths that occur in Oregon, will allow us to identify and address health inequities by race, ethnicity, gender, education, marital status, and geography. For

example, birth records capture key indicators such as prenatal care and birth weight, while death records provide data on maternal and infant mortality and causes of death.

PDMP: PDMP data is crucial to improving patient care for all patients and monitoring changes in the opioid epidemic in Oregon. This is especially impactful for non-Hispanic American Indian and Alaska Native communities, along with non-Hispanic Black and African American communities in Oregon, which have the highest rates per 100,000 for fatal overdoses and for drug overdose hospitalizations and emergency department visits.

ORELAP: ORELAP plays a vital role in protecting and promoting the health of all people and communities by helping ensure the water that people in Oregon drink, the air they breathe, and the environment they live in is free of chemicals, toxins and other substances that negatively impact health and disproportionately impact communities of color, Tribal communities and low-income communities through policies that have increased risk in these communities.

Specifically, ORELAP-accredited laboratories play a critical role in testing for lead in school drinking water and cyanotoxins from harmful algae blooms. In addition, ORELAP helps protect public health by ensuring that laboratories testing cannabis and psilocybin provide accurate data on potency and potential contaminants.

NBS: Newborn Bloodspot Screening (NBS) is a coordinated public health system that identifies infants with medical conditions requiring early treatment to prevent death or disability. It is mandated in statute that all babies receive screening, however cost has been cited as a barrier for why some families refuse screening. Likewise, although all babies with a condition may be identified through screening, there are differences in access to follow-up care and treatment. The time to diagnosis may also vary depending upon whether the baby resides within an urban or frontier region of the state. Lastly, at a national level, new conditions are continually being added to the recommended panel. Oregon must work towards implementation of these conditions to provide comparable care as our neighboring states. To address these barriers to true health equity, additional funds are needed to invest in this public health program that protects newborns and saves lives.

- a. How did you identify these impacted groups?

Each program has data and information on the populations they serve and are able to conduct analysis to examine the differences in outcomes among sub-populations.

- b. What data are you using to validate your assessment? If possible, use outreach and engagement feedback to gather information and insight.

Each program has data and information on the populations they serve and are able to conduct analysis to examine the differences in outcomes among sub-populations.

- c. If possible, disaggregate the data by race, ethnicity, geography, income level, and other relevant characteristics. If disaggregated data is not available, please describe why.

Each program has data and information on the populations they serve and are able to conduct analysis to examine the differences in outcomes by race, ethnicity, language (if collected), disability status (if collected), income (if collected), gender, education, marital status, and geography.

- d. How are communities impacted by this POP? What are the disproportionate impacts? Please be specific.

Vital records: Data from vital records is essential for identifying and addressing health inequities for all communities throughout the state since this information is gathered for all births and deaths that occur in Oregon.

PDMP: PDMP data is crucial to improving patient care for all patients and monitoring changes in the opioid epidemic in Oregon. This is especially impactful for non-Hispanic American Indian and Alaska Native communities, along with non-Hispanic Black and African American communities in Oregon, which have the highest rates per 100,000 for fatal overdoses and for drug overdose hospitalizations and emergency department visits.

ORELAP: ORELAP plays a vital role in protecting and promoting the health of all people and communities by helping ensure the water that people in Oregon drink, the air they breathe, and the environment they live in is free of chemicals, toxins and other substances that negatively impact health and

disproportionately impact communities of color, Tribal communities and low-income communities through policies that have increased risk in these communities.

NBS: Newborn Bloodspot Screening (NBS) is a coordinated public health system that identifies infants with medical conditions requiring early treatment to prevent death or disability. It is mandated in statute that all babies receive screening, however cost has been cited as a barrier for why some families refuse screening. Likewise, although all babies with a condition may be identified through screening, there are difference in the access to follow-up care and treatment. The time to diagnosis may also vary depending upon whether the baby resides within an urban or frontier region of the state. Lastly, at a national level, new conditions are continually being added to the recommended panel. Oregon must work towards implementation of these conditions to provide comparable care as our neighboring states. To address these barriers to true health equity, additional funds are needed to invest in this public health program that protects newborns and saves lives.

8. How did you ensure multiple perspectives were part of the decision-making process for this POP? In your answer, include responses to the following questions:

- a. Identify how you have or are planning to engage multiple perspectives and impacted groups to provide feedback on this POP (e.g. program design, budget, policy decisions, etc.). Please give specific examples.

The respective Public Health programs will engage with community partners, work groups, and Advisory Boards as applicable.

- b. If community engagement is not part of your approach, please explain why and what you did instead to incorporate community perspectives. In your response, describe the following: the decision-making process used to determine engagement was not feasible or appropriate, the specific barriers (beyond general time or capacity), and how you mitigated the risk of missing community input (e.g. using existing feedback, partnering with trusted organizations, review from advisory bodies, etc.).

Impacts and Accountability

9. If this POP is not funded, please describe the following:

a. Which racial or ethnic communities would be most impacted.

Vital Records: If this POP is not funded, timely and accurate information on births and deaths that occur in Oregon would not be available to examine health inequities by all race, ethnicity, gender, marital status, education and geography. Thus, all communities in Oregon would be impacted.

PDMP: If this POP is not funded, PDMP data that is crucial to improving patient care for all patients and monitoring changes in the opioid epidemic in Oregon would not be available. The non-Hispanic American Indian and Alaska Native communities, along with non-Hispanic Black and African American communities in Oregon would be most impacted.

ORELAP: If this POP is not funded, the ORELAP program would not be able to effectively accredit laboratories. ORELAP plays a vital role in protecting and promoting the health of all people and communities by helping ensure the water that people in Oregon drink, the air they breathe, and the environment they live in is free of chemicals, toxins and other substances that negatively impact health and disproportionately impact communities of color, Tribal communities and low-income communities through policies that have increased risk in these communities.

NBS: If this POP is not funded, the NBS program would not be able to effectively identify infants with medical conditions requiring early treatment to prevent death or disability.

b. How disparities would likely persist or worsen.

If this POP is not funded, health inequities would not be easily identified in the future and the disparities for specific communities noted above will continue or increase.

10. Who will be monitoring racial equity outcomes over time for this POP? The respective Public Health Programs proposing the POP will monitor racial and equity outcomes over time.

a. How will progress be reported? The respective Public Health Programs will track, analyze and publish racial equity outcomes annually. This information will be provided to the public and partners through the Public Health Division

web site, regular communications with partners and communities, and reports to respective Advisory Boards.

- b. How will leadership be informed of equity impacts? The respective Public Health Programs will track, analyze and publish racial equity outcomes annually. This information will be provided to the public and partners through the Public Health Division web site, regular communications with partners and communities, and reports to respective Advisory Boards.
- c. How will the community be involved in monitoring outcomes? The respective Public Health Programs will track, analyze and publish racial equity outcomes annually. This information will be provided to the public and partners through the Public Health Division web site, regular communications with partners and communities, and reports to respective Advisory Boards.

Oregon Health Authority 2027-29 Policy Package

Division:	PHD
Program:	Adolescent and School Health (ASH)
Policy package title:	State School Nurse Realignment
Policy package number:	423
Related legislation:	ORS 413.084

Summary statement:	This request is to move the State School Nursing Consultant position from OHA to Oregon Department of Education (ODE), where it will be able to work alongside the only other school nursing-focused position. Moving the position will allow OHA to focus on its priority work set out in the OHA Strategic Plan and Public Health Division (PHD) State Health Improvement Plan (SHIP). The position move will also allow ODE to better align the school nursing work within its strategic priorities.
---------------------------	--

	General Fund	Lottery Funds	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	\$ (416,384)	\$ -	\$ -	\$ -	\$ (416,384)	0	(0.83)

Oregon Health Authority: 2027-29 Policy Package

Purpose

1. What problem is OHA trying to fix or solve?

The State School Nurse Consultant (SSNC) position was created in 2015 by Senate Bill 698; the resulting statute (ORS 413.084) states “The position of State School Nursing Consultant is created in the Oregon Health Authority.” At the time, the position was designated to be a public health nurse position within OHA because advocates felt that due to the Public Health Division’s (PHD) robust School-Based Health Center Program, PHD would have more capacity to address concerns around school nursing supports to Oregon students and provide a more coordinated school health services approach (outside of but in partnership with ODE). The health in education work is in a different place than it was in 2015 at both ODE and OHA, and ODE would like OHA to transition the SSNC position to ODE to consolidate that work. With the position move, ODE will be better able to strategically plan and implement school nursing supports and improvement work in partnership with OHA. Moving the agency home for this position to ODE will allow increased leadership for nursing to be aligned with the belonging and wellness pillar in ODE’s new strategic plan. As Oregon’s K-12 State Education Agency, ODE will foster increased alignment and continued growth of robust school health and school nursing services in schools and reflect the unique practice niche occupied by school nurses in Oregon.

2. What would this policy package buy and how and when would it be implemented?

This policy package would not buy anything but instead would be a transfer of a position to ODE. A legislative fix is required so this would not be implemented until after the 2027 session (likely July 1, 2027).

Oregon Health Authority: 2027-29 Policy Package

3. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity¹ or equitable health outcomes? How does this policy package further OHA's mission and align with its strategic plan?

OHA has had the SSNC position since its inception and has partnered closely with ODE to support school nursing work and student health for the past 10 years. Through this partnership, we know that ODE has recently restructured the Office of Health in Education and consolidated many of the health-related positions under one Administrator. With this restructuring, ODE will be better able to strategically plan and goal set around school nursing work. This move furthers OHA's and ODE's goals around elimination of health and education inequities by increasing efficiencies in roles, planning, and programming.

There is no known impact in moving the position from OHA to ODE. OHA does not anticipate that the work would change. ODE and OHA created a workgroup in Spring 2026 for strategic planning process focused on priority and goal setting for state school nursing work. This strategic planning has and will continue to center equity. OHA and ODE will be getting feedback on that plan from external partners in the Fall of 2026, which will also include gathering feedback on the impact of moving the position.

¹ Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability, gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.**

Oregon Health Authority: 2027-29 Policy Package

Quantifying results

4. What are the long-term desired outcomes?

The transition of resources to ODE will allow OHA to better focus on OHA strategic plan priorities for Fostering Healthy Families and Environments and Strengthening Affordable Access to Care. The Adolescent and School Health Program will be better able to focus on the work and resources in the programs that have been identified and prioritized.

5. What are the envisioned outputs of this investment? How will OHA measure the impacts on health inequities of this policy package?

The output is the position moving from OHA to ODE. OHA will continue to measure the goals set forth by the Adolescent and School Health Program as part of the PHD State Health Improvement Plan (SHIP).

How achieved

6. What actions have occurred to resolve the issue prior to requesting a policy package?

The OHA program has been meeting with ODE for more than one year about moving this position; ODE is supportive and aware that OHA is putting forward an LC/POP. OHA does not know of any other known support or opposition. ODE and OHA created a workgroup in Spring 2026 for strategic planning process focused on priority and goal setting for state school nursing work. This strategic planning has and will continue to center equity. OHA/ODE will be getting feedback on that plan from external partners in the Fall, which will also include gathering feedback on the impact of moving the position.

Oregon Health Authority: 2027-29 Policy Package

7. What alternatives were considered and what were the reasons for rejecting them?

Oregon Department of Education considered creating an additional school nurse leadership position in the agency. There are a few issues with that route: 1) this model has the high risk for duplication of efforts and could result in confusion from education system partners and the public in parsing the two roles, 2) there are no resources to fund that position, and 3) it would not help to streamline the work or increase alignment by having the positions housed within one agency.

OHA has not considered housing the school nursing positions because ODE has specific responsibilities related to the implementation of the Individuals with Disabilities Education Act (IDEA) in Oregon, ensuring compliance with federal requirements and providing oversight for special education and early intervention services. School nurses play a critical role in supporting students with disabilities under the Individuals with Disabilities Education Act (IDEA), ensuring they receive equitable health services that align with their Individualized Education Program (IEP) goals.

One alternative is to not move the position. This was rejected because moving the position allows both agencies to more successfully meet their strategic objectives related to equitable access to health and education.

8. What other agencies, programs, community partners or stakeholders are collaborating on this policy package?

OHA – Adolescent Health Program and ODE School Wellness, Inclusion, Safety, and Health (SWISH) Unit.

Oregon Health Authority: 2027-29 Policy Package

9. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

Yes - ORS 413.084. This statutory change is proposed in the Public Health Division's corresponding technical fix LC.

10. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

None

11. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Staffing and fiscal impact

Implementation date(s): July 1, 2027

End date (if applicable): N/A

12. What assumptions affect the pricing of this policy package?

- Stable budget for SSNC position; this position is funded by GF.

Oregon Health Authority: 2027-29 Policy Package

13. Will there be new responsibilities for OHA and/or Shared Services? Specify which programs and describe their new responsibilities.

No.

14. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No – the work would move from OHA to ODE.

15. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

N/A

16. What are the start-up and one-time costs?

N/A

17. What are the ongoing costs?

The costs are only related to the cost of the position.

18. What reductions will you use to offset the costs of this work and maintain budget neutrality?

This POP is budget neutral for the state of Oregon as the position is moving from one state agency to another.

Oregon Health Authority: 2027-29 Policy Package

19. What are the sources of funding (revenue) and the funding split (GF/OF/FF) for each part of the investment as well as the offset/reduction?

The position is funded through GF.

20. What are the potential savings (above the offset to pay for the investment)?

This would cause a reduction in OHA budget as the funding for the position would move to ODE.

RACIAL EQUITY IMPACT STATEMENT (REIS) WORKSHEET: POLICY OPTION PACKAGE (POP) QUESTIONS

OHA POP #423: STATE SCHOOL NURSE REALIGNMENT

Program managers responsible for the POP: Please answer the questions below for every POP being proposed in your agency request budget. To fill out this worksheet, download a copy of this worksheet and type your answers below each question.

Program Overview

1. Please describe the POP being proposed.

This request is to move the State School Nursing Consultant position to Oregon Department of Education (ODE), where it will be able to work alongside the only other school nursing focused position. Moving the position will allow OHA to focus on its priority work set out in the OHA Strategic Plan and Public Health Division (PHD) State Health Improvement Plan (SHIP). The position move will also allow ODE to better align the school nursing work within its strategic priorities.

2. Why is the POP being proposed?

The State School Nurse Consultant (SSNC) position was created in 2015 by Senate Bill 698; the resulting statute (ORS 413.084) states “The position of State School Nursing Consultant is created in the Oregon Health Authority.” At the time, the position was designated to be a public health nurse position within OHA because advocates felt that the Public Health Division’s (PHD) robust School-Based Health Center Program provide more capacity to address concerns around school nursing supports to Oregon students and provide a more coordinated school health services approach (in partnership with ODE).

Since 2015, health in education coordination is much more robust at both ODE and OHA, and ODE would like OHA to transition the SSNC position to ODE to consolidate that work. With the restructure, ODE is better positioned to strategically plan and implement school nursing supports and improvement work in partnership with OHA. Moving the agency home for this position to ODE will allow increased leadership for nursing to be aligned with the belonging and wellness pillar in ODE’s new strategic plan. As Oregon’s K-12 State Education Agency, ODE will

foster increased alignment and continued growth of robust school health and school nursing services in schools and reflect the unique practice niche occupied by school nurses in Oregon.

Consultation

3. Who is completing this REIS?

Adolescent and School Health Program Manager

4. Who is responsible for tracking equity outcomes? What method(s) are they using to track outcomes?

The OHA Adolescent and School Health Program Manager along with the ODE counterpart are responsible for tracking equity outcomes. This will be coordinated with tracking implementation of a state school nursing plan which is in development and will be implemented Summer 2027.

5. Does your agency have a DEIB practitioner (Yes or no)? Yes

- a. If yes, describe how you collaborated with them on this REIS.
- b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

This POP involves moving a position to ODE. The nature of the work will not change, just the placement of the position. We did not involve a DEIB practitioner.

6. Did you collaborate with your agency's data analysts, community engagement managers, outreach managers, and/or others that regularly interact with underserved and marginalized communities on this REIS? (Yes, no, or not applicable)

- a. If yes, describe how you collaborated with them on this REIS.
- b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

This POP involves moving a position to ODE. The nature of the work will not change, just the placement of the position. We have engaged the person in the position.

Community Engagement and Data

7. Identify the specific racial groups and communities that may be impacted by this POP, both directly and indirectly. In your answer, include responses to the following questions:

- a. How did you identify these impacted groups?
- b. What data are you using to validate your assessment? If possible, use outreach and engagement feedback to gather information and insight.
- c. If possible, disaggregate the data by race, ethnicity, geography, income level, and other relevant characteristics. If disaggregated data is not available, please describe why.
- d. How are communities impacted by this POP? What are the disproportionate impacts? Please be specific.

We expect all groups receiving school nursing services to be positively impacted by moving the position and increasing coordination and alignment on school nursing work.

8. How did you ensure multiple perspectives were part of the decision-making process for this POP? In your answer, include responses to the following questions:

- a. Identify how you have or are planning to engage multiple perspectives and impacted groups to provide feedback on this POP (e.g. program design, budget, policy decisions, etc.). Please give specific examples.
- b. If community engagement is not part of your approach, please explain why and what you did instead to incorporate community perspectives. In your response, describe the following: the decision-making process used to determine engagement was not feasible or appropriate, the specific barriers (beyond general time or capacity), and how you mitigated the risk of missing community input (e.g. using existing feedback, partnering with trusted organizations, review from advisory bodies, etc.).

We were in conversation with ODE and Oregon School Nurses Association as well as the person who is currently in the position at OHA.

Impacts and Accountability

9. If this POP is not funded, please describe the following:

- a. Which racial or ethnic communities would be most impacted.
- b. How disparities would likely persist or worsen.

We do not anticipate disparities worsening. Instead, this will increase efficiency at the state agency level.

10. Who will be monitoring racial equity outcomes over time for this POP?

- a. How will progress be reported?
- b. How will leadership be informed of equity impacts?
- c. How will the community be involved in monitoring outcomes?

OHA and ODE both routinely conduct community engagement around school nursing. OHA sponsors the School Nursing Survey and the Student Health Survey and ODE engages with school nurses and school districts.

Oregon Health Authority 2027-29 Policy Package

Division:	Health Policy & Analytics
Program:	Public Employees' Benefit Board & Oregon Educators Benefit Board
Policy package title:	Benefits Management System Modernization
Policy package number:	424
Related legislation:	N/A

Summary statement:

The current benefit management systems (BMS) used by the Oregon Educators Benefit Board (OEBB) and Public Employees' Benefit Board (PEBB) no longer support all current business needs since their respective introductions in 2008 and 2003. OEBB and PEBB are continuing the BMS replacement project to improve member experience and customer care.

After the project encountered challenges between the selected solution and OEBB-PEBB business requirements, implementation was paused under a stop-work order while requirements workshops were revisited and OEBB-PEBB and the vendor, Telus Health, realigned on scope. These workshops were completed in spring 2026.

OEBB and PEBB are finalizing a contract amendment with the vendor to resume implementation, with a pilot launch planned for spring 2028 and full go-live planned for spring 2029.

Oregon Health Authority: 2027-29 Policy Package

A central improvement in the new BMS is an integrated financial module, a capability the legacy systems do not have today, which would bring carrier invoicing, payment reconciliation, and enrollment financial data into a single system rather than the patchwork of manual processes and one-off tools OEBB and PEBB currently rely on. The new BMS would also provide a mobile app, expanded self-service tools, and automated dependent eligibility verification, modernizing access for all members; nationally, smartphone-dependent internet use is most common among younger adults and lower-income households, so mobile-first access stands to particularly benefit members for whom a smartphone is their primary way of getting online.

Not prioritizing and supporting continuation of this replacement effort would result in terminating the amended contract with the vendor, discontinued implementation efforts, and continued use of end-of-lifecycle technology that is fragmented, non-standard, difficult to support, and is not scalable.

	General Fund	Lottery Funds	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	\$ -	\$ -	\$ 11,129,067	\$ -	\$ 11,129,067	4	4.00

Oregon Health Authority: 2027-29 Policy Package

Purpose

1. What problem is OHA trying to fix or solve?

Since 2019, OEGB and PEBB have completed planning for a replacement Benefits Management System (BMS), selected a vendor to provide a solution and have begun implementation of that solution. The planning was done as a result of a technical assessment of the current BMS systems used by OEGB and PEBB, and as a result of Senate Bill 1067 (2017 Regular Session) to align operational and administrative activities of the two systems. The planning included requirements gathering, alternative analyses, development of a Request for Proposal (RFP), evaluation and scoring of RFP responses, vendor selection, and contract execution with the selected vendor. The replacement BMS is part of the goal to align the state's operational and support processes to provide demonstrably improved services with increased efficiency and sustainable effectiveness, and a fundamental step to activate that lever is alignment across OEGB and PEBB. Replacing the antiquated and independent operating systems for benefit management in the two programs with a single, modernized, and efficient system is a necessary step toward integration and alignment of benefits.

During implementation, OEGB-PEBB experienced challenges with adequate project documentation and alignment, and with the configured solution meeting OEGB-PEBB's business requirements. To address these challenges, OEGB-PEBB issued a stop-work order pausing implementation activities. OEGB-PEBB and Telus Health then revisited requirements through a series of joint workshops to confirm a shared understanding of fit and gaps between the solution and OEGB-PEBB's needs. These workshops were completed in spring 2026.

Oregon Health Authority: 2027-29 Policy Package

OEBB-PEBB and Telus Health are finalizing a contract amendment that reflects the realigned scope, schedule, and cost to resume implementation. Under the revised plan, OEBB-PEBB anticipates a pilot launch in spring 2028, followed by full go-live in spring 2029.

The current benefit management systems used by OEBB and PEBB (MyOEBB and pebb.benefits respectively) no longer support all current business needs since their respective introduction in 2008 and 2003. These needs include the ability of OEBB and PEBB subscribers in updating family member eligibility with legal documentation, which may include personally identifiable information (PII) data; modernized, secured communications between subscribers and OEBB/PEBB support staff, and enhanced remote capabilities for school district/university/state benefits administrators to properly manage accounts for their organizations and employees. The new system would also include an integrated financial module, which would bring carrier invoicing, payment reconciliation, and enrollment financial data into a single system rather than the patchwork of manual processes and one-off tools OEBB and PEBB currently rely on.

OEBB and PEBB, along with the OEBB and PEBB boards, are seeking to integrate the administrative and support of the two systems, with improved user experience and customer care, into a single platform to meet the legislative direction provided under SB 1067. Section 25 of the bill specifies the need for increased efficiency, reduction of duplication and merging of the two separate PEBB and OEBB oversight boards into one function as essential to driving cost reductions and driving operational improvements consistent with applicable law and administrative rule.

Oregon Health Authority: 2027-29 Policy Package

Both systems were built on, and continue to run on, legacy technology stacks with extensive custom code written in development languages, tools, and infrastructure that are past the end of their supported product lifecycle. Staff turnover on the legacy systems further increases project urgency, as replacement staff require significant ramp-up time to become familiar with the old, undocumented architecture before reaching the competency needed to address issues.

In addition, the legacy systems have been maintained by the same vendor lineage since their original build, through a series of corporate acquisitions, which has led to an increased dependency on this single vendor for institutional knowledge of the systems. The current legacy system vendor contract end date is June, 30, 2027. OEGB-PEGB and the legacy vendor are coordinating to extend legacy operations and maintenance support as needed to bridge to the revised BMS go-live in spring 2029.

OHA's 2015 Benefit Management System Technical Assessment Report first identified that both systems were nearing the end of their lifecycles and recommended near-term upgrades along with planning for full replacement. A follow-up 2025 technical assessment found that the underlying database and application server platform – Oracle Database and Oracle WebLogic Server – has already passed Premier and Extended Support (which ended March 31, 2022) and is no longer receiving new security patches, updates, or bug fixes from Oracle. The 2025 assessment recommends upgrading to Oracle 19c and a current Java runtime, which would restore vendor support through approximately December 31, 2029, potentially extending to December 31, 2032. However, the 2025 assessment is clear that this upgrade path addresses only the platform-level support risk and would not resolve the deeper architectural risk in both systems: nearly two decades of highly customized, database-centric code. This custom, non-standard architecture is where the report identifies the greatest ongoing security and maintainability risk,

Oregon Health Authority: 2027-29 Policy Package

since it depends on a shrinking pool of specialists who know these specific systems, and it persists regardless of how current the underlying Oracle and Java versions are kept. For this reason, the 2025 assessment's long-term recommendation, consistent with the 2015 report, is to migrate both systems off this custom architecture entirely and onto a modern, vendor-supported, cloud-hosted platform.

2. What would this policy package buy and how and when would it be implemented?

OEBB and PEBB are resuming implementation of the replacement BMS following a stop-work period during which requirements were revisited and OEBB-PEBB and the vendor, Telus Health, realigned on solution fit and scope. This policy package would fund the remaining implementation activities, including additional project staffing, vendor implementation costs, hosting and licensing fees, oversight fees for quality assurance, and contingency allowances. Under the revised implementation plan reflected in the pending contract amendment with Telus Health, OEBB-PEBB will launch a pilot in spring 2028, followed by a stabilization and evaluation period, with full go-live planned for spring 2029.

3. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity¹ or equitable health outcomes? How does this policy package further OHA's mission and align with its strategic plan?

This policy package supports populations impacted by health inequities by improving equitable access to benefit enrollment and information, even though its impacts are not direct health-equity interventions.

¹ Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability, gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.**

Oregon Health Authority: 2027-29 Policy Package

The new Benefits Management System (BMS) reduces administrative and technological barriers that disproportionately affect members with lower incomes, limited broadband access, or disabilities. By providing mobile-friendly tools, ADA Title II-compliant interfaces, and clearer benefit information, the system helps ensure all members—including those historically facing access barriers—can more easily enroll in coverage, understand their benefits, and make informed choices.

While the BMS does not directly change health outcomes, it strengthens the infrastructure that enables equitable access to coverage and wellness resources. This aligns with OHA’s mission by improving accessibility, reducing administrative burden, and supporting more consistent, user-centered service delivery across diverse populations.

The package also advances key elements of the ODHS/OHA Strategic Technology Plan by modernizing outdated systems, increasing automation, improving flexibility to meet evolving member needs, expanding mobile access, and enabling more robust data analytics. These improvements help OEGB and PEGB better serve all members, including those experiencing inequities, through more reliable, accessible, and responsive technology.

Quantifying results

4. What are the long-term desired outcomes?

A new combined Benefit Management System (BMS) would allow OEGB and PEGB to modernize its members' and administrators' user experience. Among the top modernization goals:

Oregon Health Authority: 2027-29 Policy Package

- Alignment with state information technology strategic plan.
- Ability to implement and maintain latest security best practices.
- Mobile app compatibility.
- More integrated benefit education tools to allow informed benefit choices.
- Compatibility with commonly used browsers, operating systems and devices.
- Flexibility to make changes to accommodate business partners and customers.
- Expanded automated error checking and data validation.
- Availability of on-demand enrollment, and training tools for members and administrators.
- Self-service tools and features for members and administrators.
- Automated dependent eligibility verification among, and between OEGB and PEBB member groups.
- Integrated financial module to improve invoice and payment processing, reconciliation, and ensuring enrollment and financial payment accuracy.
- Remove reliance on a single vendor to maintain custom coded system.
- Reduce ongoing operations and maintenance costs for the OEGB and PEBB Benefits Management System.
- Reduce manual and duplicative processes.
- Improved and enhanced reporting module for participating employers.

Oregon Health Authority: 2027-29 Policy Package

5. What are the envisioned outputs of this investment? How will OHA measure the impacts on health inequities of this policy package?

The primary outputs of this investment are a modern, accessible Benefits Management System (BMS) and improved operational performance across OEBC and PEBC. Because the BMS is an administrative system rather than a health intervention, its impact on health inequities are indirect. OHA can measure those indirect impacts by evaluating whether the new system reduces barriers to accessing benefit information and enrollment tools for members who historically face greater obstacles—such as members with disabilities, limited broadband access, or lower incomes.

Key measurable outputs include:

- Improved accessibility and ADA Title II compliance, ensuring members with disabilities can more easily navigate benefit enrollment and information.
- Expanded mobile access, which supports members who rely primarily on smartphones rather than home broadband.
- Higher rates of successful enrollment and completion of benefit related tasks among populations previously experiencing access barriers.
- Improved user experience metrics, such as reduced error rates, fewer abandoned enrollment attempts, and increased use of benefit education tools.

Beyond equity related measures, success of the policy package will also be demonstrated through:

- Quantifiable business process improvements and cost containment relative to baseline.
- Improved system performance and reliability compared to legacy platforms.

Oregon Health Authority: 2027-29 Policy Package

- Full compliance with state and federal data security and privacy standards (HIPAA, PCI DSS, PII protections).
- Accurate, timely reporting and notifications to internal and external partners.
- Role based security controls that ensure appropriate access.
- Disaster recovery and uptime performance meeting or exceeding current levels, including 99.5% reliability and database redundancy.

While the BMS does not directly change health outcomes, OHA can measure its contribution to health equity by assessing whether it reduces administrative and technological barriers that disproportionately affect certain member populations, and by tracking improvements in accessibility, usability, and successful engagement with benefit tools.

6. What actions have occurred to resolve the issue prior to requesting a policy package?

PEBB and OEGB have sought advice from technical experts within the Oregon Office of Information Services (OIS) and Oregon Office of the State Chief Information Officer/Enterprise Information Services (OSCIO/EIS). OEGB and PEBB have continued to contract, with little negotiating leverage due to the antiquated technologies involved, for maintenance and operations support to maintain basic system functions. OEGB and PEBB staff must either rule out or be very selective about enhancements to the systems as new functionality adds to the custom-made complexity of each system and could introduce new security risks.

Oregon Health Authority: 2027-29 Policy Package

In 2015, PEBB and OEGB contracted to have an in-depth security penetration test and an overall technical assessment conducted to identify and help in addressing any discovered risks and issues. Recommendations proposed by the 2015 Benefit Management System Technical Assessment Report were followed, including implementing hardware and software system upgrades to remedy issues identified in the report, and to allow OEGB and PEBB to continue meeting their statutory responsibilities until the replacement solution could be implemented.

In 2025, with the BMS migration experiencing delays beyond its original timeline, PEBB-OEGB Operations commissioned a current-state technical assessment to determine how much longer the legacy systems could be sustained and what interim steps would be needed. That assessment confirmed the legacy platform's database and application server software is already past vendor support and recommended an interim Oracle and Java upgrade as a bridge, while reaffirming that full migration to a modern, vendor-supported platform remains the only way to resolve the systems' underlying architectural risk.

More recently, when implementation surfaced fit-gap challenges between the configured Telus Health solution and OEGB-PEBB's business requirements, OEGB-PEBB issued a stop-work order rather than proceed on a misaligned path. OEGB-PEBB and Telus Health jointly conducted requirements workshops to re-confirm fit and identify gaps and used the results to negotiate a contract amendment that resets scope, schedule, and cost before implementation resumes. This approach was intended to protect the state's investment and reduce the risk of a costly post-go-live remediation effort.

Oregon Health Authority: 2027-29 Policy Package

7. What alternatives were considered and what were the reasons for rejecting them?

Status quo

The current OEGB and PEBB benefit management systems were built on antiquated legacy technology. OEGB-PEBB recently had an independent security assessment conducted. Future security assessments and remediation would be conducted biannually but the risk of a browser-based penetration attack is increased with the older technology.

Because of the custom nature of the systems, transition time related to contractor staff turnover puts programs more at risk as it takes new staff a much longer period to understand the systems well enough to address identified issues. The continued contractual relationship with the same vendor from the initial build to current maintenance and operations has resulted in an increased dependency on a handful of key knowledgeable individuals employed by the contractor due to the age, customization and complexity of the systems. Transitioning to a new vendor could be both cumbersome and costly in terms of maintenance and operations. In addition, the architecture of the systems, implemented over a decade ago, relies on server side, data base driven procedures and modernization of current systems to accommodate newer technology and program goals would be costly.

Workday

Incorporation of BMS reporting and management into the current Workday Human Resource Management platform was reviewed including software demonstrations by Workday. The Workday solution did not meet enough of the requirements for the combined BMS for OEGB-PEBB, particularly the

Oregon Health Authority: 2027-29 Policy Package

financial services section and the uniqueness of the OEGB program and the participating school districts, community colleges, special districts, other local governments.

Internal Custom System

Internal custom development and support of a state-funded, self-maintained software package and hardware platform (an “in-house” product) was analyzed. OIS resources are not readily available for a customized in-house product. Another custom solution does not meet the strategic goal outlined by the Enterprise Information Services Office.

8. What other agencies, programs, community partners or stakeholders are collaborating on this policy package?

OEGB and PEBB have received endorsements from both boards. The Office of Information Services (OIS), Legislative Fiscal Office (LFO), EIS, Oregon State Treasury, Oregon Department of Justice, Cyber Security Services, and DAS Procurement have all assisted in aspects of the RFP development, evaluation, and contracting process. Other agencies, programs, and stakeholders would be involved with the implementation of a new system.

9. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No additional statutes or changes to existing statutes.

Oregon Health Authority: 2027-29 Policy Package

10. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

All the benefit and payroll processes of state agencies, universities, school districts, education service districts and community colleges would be impacted: either by benefiting from a new benefit management system or adversely impacted if the benefit systems were not maintained, maintenance costs increased substantially due to the reliance on a single vendor, or if the systems became no longer viable.

11. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Staffing and fiscal impact

Implementation date(s): July 2027

End date (if applicable): June 2029

12. What assumptions affect the pricing of this policy package?

- Estimated staff time allocated to the project and dedicated to the project.
- Costs in contract for Internal Quality Management Services (iQMS) vendor (NTT Data)
- Implementation and Operations and Maintenance costs in contract with solution provider vendor (Telus Health)

Oregon Health Authority: 2027-29 Policy Package

- Contingency to account for movement of Deliverables and potential gaps.

13. Will there be new responsibilities for OHA and/or Shared Services? Specify which programs and describe their new responsibilities.

Although there are technical advisors from OIS on the project, there are no new responsibilities identified.

14. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

None.

15. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

OEBB and PEBB would need four limited duration positions for the implementation of the project. One position will be to coordinate OEBB and PEBB Change Management; three positions would be used to assist and backup current staff who would be more involved in the implementation. These positions would be used to ease workload in the current legacy system and to assist with testing the new software.

16. What are the start-up and one-time costs?

This policy package is comprised entirely of one-time costs. The request includes the implementation of the new BMS scheduled for full 'go-live' launch in spring 2029.

Oregon Health Authority: 2027-29 Policy Package

17. What are the ongoing costs?

While this policy package does not have any ongoing costs, there would be ongoing operations & maintenance costs that would be paid for from PEBB/OEBB's existing operations budgets. After implementation, per contract, **annual** ongoing operations & maintenance costs for the new system are as follows:

Operations and Maintenance Support	\$1,350,000
Third Party Software Licensing	\$ 84,000
Hosting and Services	\$ 566,000
Total	\$2,000,000

Annual cost for O&M is in contract for five full years after 'go live'.

18. What reductions will you use to offset the costs of this work and maintain budget neutrality?

Response.

19. What are the sources of funding (revenue) and the funding split (GF/OF/FF) for each part of the investment as well as the offset/reduction?

Funding sources are Other Funds revenue from administrative fees assessed on PEBB and OEBB Core Benefits. The administrative fee is paid by members and state agencies through an assessment added to medical and insurance premiums and premium equivalents. A greater percentage is allocated to PEBB

Oregon Health Authority: 2027-29 Policy Package

as PEBB would acquire two limited duration positions with different classifications and OEBC would acquire two limited duration positions in the same classification.

20. What are the potential savings (above the offset to pay for the investment)?

After implementation, OEBC and PEBB expect savings in operations and maintenance (O&M) costs of at least \$1 million annually initially. This is based on the O&M costs in the new vendor (Telus Health) contract and the current O&M costs for the legacy system. The O&M costs for Telus Health are set for five years without an increase; the O&M costs for the legacy system vendor increase annually so savings in O&M likely exceed \$1 million annually.

Additional research and ongoing measurements are needed to quantify savings by implementing a more modern system applying best practices regarding security, deduplication of processes, removal of one-off systems or the need to contract for additional enrollment.

RACIAL EQUITY IMPACT STATEMENT (REIS) WORKSHEET: POLICY OPTION PACKAGE (POP) QUESTIONS

OHA POP #424: BENEFITS MANAGEMENT SYSTEM MODERNIZATION

Program managers responsible for the POP: Please answer the questions below for every POP being proposed in your agency request budget. To fill out this worksheet, download a copy of this worksheet and type your answers below each question.

Program Overview

1. Please describe the POP being proposed.

The POP funds a new Benefits Management System for both the Oregon Educators Benefit Board (OEBB) and the Public Employees' Benefit Board (PEBB), focusing on modernization, and improved operational efficiency. The work includes technical enhancements that support members, external partners, staff and internal processes.

2. Why is the POP being proposed?

The POP is needed to replace aging, high-risk legacy systems that create administrative barriers, delays, and errors in benefits enrollment. Modernizing the BMS improves accuracy, timeliness, and accessibility, supporting equitable access to benefits for all members and reducing disparities caused by system limitations.

3. Who is completing this REIS?

Project Sponsor

4. Who is responsible for tracking equity outcomes? What method(s) are they using to track outcomes?

Equity outcomes will be monitored by the OEBB/PEBB program leadership. Tracking will focus on whether the new system reduces administrative barriers, improves digital accessibility, and supports equitable enrollment experiences across member groups. Methods include user experience feedback through surveys, accessibility testing, error-rate monitoring, and analysis of enrollment completion patterns.

5. Does your agency have a DEIB practitioner (Yes or no)?

Yes, OHA has an Equity and Inclusion Division.

- a. If yes, describe how you collaborated with them on this REIS.
- b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

This modernization project focused on replacing legacy technology infrastructure. The project does not change program eligibility, benefit design, or service-delivery policies.

To ensure equity considerations were still incorporated, the project team will engage the Equity & Inclusion Division, as appropriate, during implementation to help identify opportunities to strengthen equitable access and accessibility, particularly if design or implementation decisions may affect member interactions with the system.

6. Did you collaborate with your agency's data analysts, community engagement managers, outreach managers, and/or others that regularly interact with underserved and marginalized communities on this REIS? (Yes, no, or not applicable)

- a. If yes, describe how you collaborated with them on this REIS.
- b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

This project is a technical modernization effort focused on internal systems. The project includes subject matter experts from all functional areas of our programs, including our Communications, Member Services, and Systems team.

The team reviewed existing member feedback, accessibility findings, and known pain points for members with limited digital access or language support.

Community Engagement and Data

7. Identify the specific racial groups and communities that may be impacted by this POP, both directly and indirectly. In your answer, include responses to the following questions:

All racial and ethnic groups served by OEBC and PEBC may benefit indirectly from improved digital access, reduced administrative barriers, and more accurate enrollment processes. The POP does not create disproportionate burdens for any group

- a. How did you identify these impacted groups?

Not applicable.

- b. What data are you using to validate your assessment? If possible, use outreach and engagement feedback to gather information and insight.

Not applicable.

- c. If possible, disaggregate the data by race, ethnicity, geography, income level, and other relevant characteristics. If disaggregated data is not available, please describe why.

The current legacy systems do collect race and ethnicity and geographical location, but race and ethnicity are not at the currently defined REALD/SOGI levels. Race and ethnicity will be collected based on REALD/SOGI defined lists in the new BMS.

- d. How are communities impacted by this POP? What are the disproportionate impacts? Please be specific.

The new system reduces administrative barriers that disproportionately affect members with limited digital access, disabilities, or inconsistent access to employer HR support.

The new BMS improves mobile access, usability, and accuracy, which benefits members who rely on mobile devices or have historically experienced enrollment challenges.

8. How did you ensure multiple perspectives were part of the decision-making process for this POP? In your answer, include responses to the following questions:

- a. Identify how you have or are planning to engage multiple perspectives and impacted groups to provide feedback on this POP (e.g. program design, budget, policy decisions, etc.). Please give specific examples.

Internal partners from OEBC, PEBC, IT, operations, and member services contributed to identifying system .

- b. If community engagement is not part of your approach, please explain why and what you did instead to incorporate community perspectives. In your response, describe the following: the decision-making process used to determine engagement was not feasible or appropriate, the specific barriers (beyond general time or capacity), and how you mitigated the risk of missing community input (e.g. using existing feedback, partnering with trusted organizations, review from advisory bodies, etc.).

Direct community engagement was not conducted because the POP focuses on internal system modernization rather than policy or benefit changes. To mitigate the absence of direct engagement, the project team relied on existing member feedback, call-center data, and accessibility assessments.

Impacts and Accountability

9. If this POP is not funded, please describe the following:

- a. Which racial or ethnic communities would be most impacted.

All racial and ethnic communities served by OEBC and PEBC would be affected, but the greatest impact would fall on members who already experience digital access barriers. These include communities who rely heavily on mobile devices or employer assistance to complete enrollment.

- b. How disparities would likely persist or worsen.

Without funding, OEBC and PEBC would continue relying on outdated legacy systems that rely on desktop computers, contribute to enrollment delays, errors, and inconsistent access to benefits information. These issues disproportionately affect members who have limited access to computers or broadband, rely primarily on mobile devices.

10. Who will be monitoring racial equity outcomes over time for this POP?

Racial equity outcomes will be monitored by OEGB/PEGB program leadership in coordination with the project governance team. Because this is an IT modernization project, monitoring will focus on whether the new system reduces administrative barriers, improves digital accessibility, and supports equitable enrollment experiences across member groups.

a. How will progress be reported?

Progress will be reported through implementation status reports, accessibility testing results, user-experience metrics, and post-launch evaluations. These reports and surveys will identify whether the system is improving accuracy, usability, and access for all members.

b. How will leadership be informed of equity impacts?

Leadership will receive updates through regular project briefings, risk assessments, and post-implementation performance reviews.

c. How will the community be involved in monitoring outcomes?

Community involvement will occur through employer admin testing groups conducted prior to implementation, and employer admin and user-experience surveys conducted after implementation. These sources will help identify whether the new system is reducing administrative barriers and improving access for all member groups.

Oregon Health Authority 2027-29 Policy Package

Division:	BHD, HPA, OSH, C/S
Program:	Adult Behavioral Health (Intensive Services Unit)
Policy package title:	Forensic Behavioral Health Capacity
Policy package number:	425
Related legislation:	HB 2005 (2025)

Summary statement:	This policy package requests 19.25 FTE within OHA to effectively implement the statutory requirements established by HB 2005 (2025) and strengthen Oregon's civil commitment and forensic behavioral health system. The requested staffing will enable OHA to implement new community restoration forensic evaluations, oversee expanded civil commitment responsibilities, improve coordination with counties, courts, and providers, support timely transitions from OSH, and meet new statutory reporting and federal court compliance requirements. It represents the minimum staffing necessary to ensure OHA can implement HB 2005 safely, consistently, and equitably.
---------------------------	--

	General Fund	Lottery Funds	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	\$ 5,882,815	\$ -	\$ -	\$ 5,538,723	\$ 11,421,538	20	19.25

Oregon Health Authority: 2027-29 Policy Package

Purpose

1. What problem is OHA trying to fix or solve?

The Behavioral Health Intensive Services Program is facing a rapidly expanding workload driven by both federal court oversight requirements and significant statutory changes. Current staffing levels are not sufficient to meet these demands. Without additional positions, the program's ability to meet mandated responsibilities, ensure system accountability, and uphold public and client safety will be increasingly compromised.

House Bill 2005 (2025) introduced significant reforms to civil commitment, community restoration processes, information-sharing protocols, and other core forensic behavioral health functions. These new requirements do not displace OHA's existing responsibilities; rather, they add on substantial new duties and require comprehensive updates to policy, operations, data systems, and inter-agency coordination.

HB 2005 expands the statutory obligations of the Oregon Health Authority's Behavioral Health Division (BHD). This is because BHD oversees forensic and court-mandated programs, including civil commitment, Aid and Assist, community restoration, and Oregon State Hospital (OSH) diversion. In order to maintain legal compliance and support local partners, BHD must now meet new statewide oversight standards, procedural steps, reporting requirements, timelines, and documentation standards.

Operationally, HB 2005 creates a sizeable increase in the volume, complexity, and urgency of the work conducted by the Intensive Services Program. The unit must now:

- Implement a new program to provide forensic competency evaluations for individuals under Community Restoration orders.

Oregon Health Authority: 2027-29 Policy Package

- Implement revised civil commitment pathways and timelines.
- Build and maintain new reporting frameworks to track compliance across all counties.
- Develop statewide guidance and rules as well as provide technical assistance to community mental health programs and judicial partners.
- Strengthen oversight of highly scrutinized Aid and Assist processes and OSH diversion pathways.
- Ensure accurate and timely data-sharing across disparate and disconnected systems.
- Monitor new statutory requirements to ensure equitable application and avoid legal risk to the state.

To responsibly implement HB 2005, meet federal and state oversight obligations, and ensure safe and effective operation of Oregon's forensic and civil commitment systems, the Behavioral Health Intensive Services Program must increase staffing.

2. What would this policy package buy and how and when would it be implemented?

To meet the statutory requirements established by HB 2005 and strengthen statewide behavioral health and forensic system operations, this staffing package proposes targeted investments across four key program areas:

Aid and Assist Unit (Two positions: one Operations and Policy Analyst 3, one Operations and Policy Analyst 2).

HB 2005 mandates new statewide statutory aid and assist/community restoration reporting requirements for individuals transitioning out of Oregon State Hospital (OSH) and those under community restoration orders. These positions will ensure consistent statewide oversight and accountability requirements are met and support discharge efficiency from OSH.

Oregon Health Authority: 2027-29 Policy Package

Community Restoration and Evaluation Unit (CREU) (Eight positions: Behavioral Health Policy Manager 3, one Operations and Policy Analyst 3, one Administrative Specialist 2, three Administrative Specialists 1, one Fiscal Analyst 2, and one Fiscal Analyst 3).

HB 2005 mandates new statewide statutory requirement to provide forensic evaluations for individuals under Community Restoration (CR) orders. Community Restoration forensic evaluations are critical to ensuring individuals are receiving the appropriate level of care to restore their fitness to proceed. In addition, the Mink-Bowman Court Monitor issued a court-mandated recommendation that Oregon establish a formal, community-based forensic evaluation process to reduce delays and support ongoing compliance with the federal court order. Adult Behavioral Health anticipates managing a caseload of 1,000+ Community Restoration forensic evaluations per year. These eight positions will provide program leadership, system partner coordination, and contract oversight for forensic evaluators and a clinical supervisor. They will also handle scheduling, documentation and timely court filings.

Civil Commitment Program (Three positions: Behavioral Health Policy Manager 2, one Learning and Development Specialist, and one Administrative Specialist 2)

Civil Commitment responsibilities have grown significantly under HB 2005. Establishing a standalone Civil Commitment Program will ensure consistent statewide oversight and accountability. The Manager will lead policy development and coordination, a Learning and Development Specialist will support counties and system partners, and the Administrative Specialist will maintain documentation, scheduling, and communication functions.

Oregon Health Authority: 2027-29 Policy Package

Extended Care Management Unit Expansion (Four positions: Two Operations and Policy Analyst 3, one Operations and Policy Analyst 1, and one Administrative Specialist 2)

OHA needs additional staff to improve discharge efficiency from the Oregon State Hospital. Three new Operations and Policy Analysts and one Administrative Specialist will streamline patient transitions to community settings, reduce delays, and support collaboration with providers and courts. These roles will enhance patient flow, support OSH capacity, and strengthen compliance with federal expectations.

Health Policy and Analytics Support (Three positions: Research Analyst 4, Research Analyst 3, Research Analyst 2)

HB 2005 also introduces new data, reporting, and analytic obligations. Three Research Analyst positions, operating out of OHA's Health Policy and Analytics Division, will ensure timely and accurate reporting to the Legislature as well as judicial and system partners. These roles will also support data integration and analysis to guide policy and system improvements.

3. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity¹ or equitable health outcomes? How does this policy package further OHA's mission and align with its strategic plan?

Oregon's forensic behavioral health system serves some of the state's most vulnerable individuals. These populations navigate complex challenges, including serious mental health conditions, court involvement, housing instability, and limited economic resources. Furthermore, Black, Latino and Tribal communities,

¹ Health Equity: When all people can reach their full potential and well-being and are not disadvantaged by their race, ethnicity, language, disability, gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

Oregon Health Authority: 2027-29 Policy Package

people with disabilities, and people with limited access to culturally responsive care are disproportionately overrepresented in this system. These populations experience barriers at every stage of the forensic behavioral health system, from initial court involvement through civil commitment, Aid and Assist processes, hospital admission, restoration, and transition back to community settings. A lack of consistent statewide infrastructure, uneven county capacity, fragmented data, and workforce shortages have allowed disparities to grow. Without safely and effectively implementing the statutory changes required by HB 2005 and the staffing needed to implement them, the system will continue to reproduce inequities rather than reduce them.

This staffing package is more than an operational request; it represents a foundational investment in addressing the inequities that have long existed in the forensic behavioral health continuum. By strengthening oversight, improving statewide consistency, expanding community-based alternatives, and increasing analytic capacity, these positions directly influence whether Oregon can deliver equitable, legally compliant, and culturally responsive services across all communities.

If this package is not funded, the inequities that already exist would deepen. Counties with fewer resources could continue to provide limited access to community restoration, leading to disproportionate hospitalization and legal involvement for individuals in under-resourced regions. Inconsistent civil commitment practices would persist, worsening geographic and demographic disparities. Delayed discharges at the Oregon State Hospital would continue to affect individuals with the greatest social and economic barriers. Without analytic capacity, disparities would remain unmeasured and unaddressed. In short, without investment in this structure, the system will continue functioning in fragmented ways that create unequal access, uneven treatment pathways, and avoidable harm to the populations HB 2005 intends to protect.

Oregon Health Authority: 2027-29 Policy Package

Quantifying results

4. What are the long-term desired outcomes?

- **Reduced backlog and wait times:** Statewide wait times for initial evaluations, required reevaluations, and Guilty Except for Insanity (GEI) evaluations will decrease significantly as the new Community Restoration Evaluation Unit (CREU) becomes fully operational.
- **Reliable adherence to statutory and court mandated -timelines:** Consistently meet required timelines for evaluations, restoration, and reporting, ensuring legal compliance, reducing unnecessary delays, and improving overall system accountability.
- **Improved continuity of care and successful transitions:** Individuals moving from hospitals or restoration settings into the community will maintain stable housing, behavioral health services, and legal compliance, resulting in fewer returns to crisis systems, jails, or inpatient settings.
- **Strong analytic capacity and transparent performance monitoring:** The system will use reliable, integrated data to identify disparities, track outcomes, support decision-making, and drive continuous improvement, ensuring challenges are visible and addressed.
- **Standardized and equitable processes:** Uniform training, documentation, and reporting tools will be implemented statewide, reducing variability across jurisdictions and supporting equitable treatment for individuals involved in the civil and forensic systems.

Oregon Health Authority: 2027-29 Policy Package

5. What are the envisioned outputs of this investment? How will OHA measure the impacts on health inequities of this policy package?

- A fully operational Community Restoration Evaluation Unit (CREU) that meets statutory timelines.
- Standardized training, documentation, and reporting tools implemented consistently across all counties and partner agencies for civil and forensic behavioral health programs.
- Meet statutory and federal court timelines consistently through expanded staffing and improved oversight and processes.
- Strengthened coordination across civil commitment, aid and assist, hospital-based restoration, and community restoration pathways.
- Integrated data systems and analytic capacity that support regular performance monitoring, disparity analysis, and transparent reporting.
- More consistent and equitable access to community-based restoration, diversion, and transition support across the state.

How achieved

6. What actions have occurred to resolve the issue prior to requesting a policy package?

OHA's Behavioral Health Division undertook significant internal restructuring within the Adult Behavioral Health (ABH) section to absorb the growing workload associated with civil and forensic behavioral health responsibilities and new mandates introduced by HB 2005. HB 2005 did not come with any fiscal or positions investments into OHA. This restructuring aimed to manage expanded statutory duties with existing resources by redistributing workloads and integrating new responsibilities into ongoing program operations.

Oregon Health Authority: 2027-29 Policy Package

Despite these efforts, this restructuring has proven insufficient to manage the volume, complexity, and urgency of the work. The new statutory requirements fundamentally reshape civil commitment, community restoration, information sharing, data reporting, and cross-system coordination. These responsibilities were added to an already overstretched workforce managing multiple statewide behavioral health programs, many of which were themselves undergoing significant transformation. Even after realignment, the structure of the Adult Behavioral Health units cannot absorb highly specialized forensic functions or meet intensive oversight and statutory timelines.

The lack of dedicated staff to implement HB 2005 for civil commitment and community restoration has created gaps in accountability, consistency, and workforce training across the state.

For these reasons, OHA determined that internal restructuring alone could not sustainably meet the requirements of HB 2005. The creation of new, dedicated positions is necessary to provide statewide oversight, support system partners, ensure statutory compliance, and meet the needs of Oregon's forensic behavioral health populations. It is important to note that OHA's proposed position investments represent the minimum capacity required to operate an equitable, effective, and legally compliant civil and forensic behavioral health system.

7. What alternatives were considered and what were the reasons for rejecting them?

OHA evaluated whether any alternatives existed that would allow the agency to avoid additional staffing or decline the new responsibilities created by HB 2005. A thorough review confirmed that no other viable alternatives exist. The work required under HB 2005 is mandated by state law, and OHA's responsibilities for civil commitment, Aid and Assist processes, community restoration, and Oregon State Hospital oversight are further reinforced by existing federal court orders and compliance obligations.

Oregon Health Authority: 2027-29 Policy Package

These statutory and federal requirements leave the agency no discretion to reject, reduce, or defer the work. OHA attempted to meet the mandates by redistributing duties within existing structures, but the workload proved too specialized and too substantial to absorb without risking legal non-compliance. The agency is legally obligated to carry out these functions; the proposed staffing package will build the capacity required for OHA to meet its state and federal obligations and ensure safe, consistent, and equitable services for forensic behavioral health populations.

8. What other agencies, programs, community partners or stakeholders are collaborating on this policy package?

Through joint planning sessions, workgroups, operational walkthroughs, and data reviews, OHA and its partners examined how the new statutory requirements intersect with existing practices, staffing, timelines, and system pressures. Oregon State Hospital provided expertise on hospital capacity, discharge processes, and restoration needs. Community Mental Health Programs contributed insight into community-based service availability, local workload challenges, and the operational demands counties face in meeting statutory timelines. Oregon Judicial Department (OJD) offered direction on court processes, judicial expectations, and necessary information-sharing workflows. The Governor's Office ensured alignment with statewide behavioral health priorities and helped coordinate cross-agency expectations.

9. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No. The request is based statute changes and legislative requirements from HB 2005 (2025).

Oregon Health Authority: 2027-29 Policy Package

10. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

HB 2005 established a Tribal Forensic Task Force to better understand and address the needs of Tribal members involved in the intersection of Tribal and state behavioral health and forensic systems. The Task Force is intended to identify disparities, improve collaboration, and strengthen culturally responsive pathways for Tribal members who encounter civil commitment, Aid and Assist processes, community restoration, or forensic court involvement.

As the implementation team expands, several considerations may be elevated to support the Task Force's work. These include improving accuracy in Tribal identification and data collection; enhancing communication and partnership frameworks with federally recognized Tribes; building culturally specific training for evaluators, clinicians, and judicial partners; supporting pathways that incorporate Tribal healing practices; and integrating equity-focused analytics that reflect Tribal priorities. These considerations will help ensure the state's forensic system aligns with Tribal sovereignty and promotes equitable outcomes for Tribal communities.

11. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Staffing and fiscal impact

Implementation date(s): July 1, 2027

End date (if applicable): N/A

Oregon Health Authority: 2027-29 Policy Package

12. What assumptions affect the pricing of this policy package?

The pricing of this policy package is based on several key assumptions:

- **HB 2005 implementation is mandatory and ongoing:** The package assumes OHA must fully implement and sustain the new statutory responsibilities established by HB 2005, including community restoration evaluations, civil commitment reforms, expanded reporting, and statewide oversight. These responsibilities cannot be reduced or deferred.
- **Current staffing cannot absorb the workload:** Pricing assumes that prior organizational restructuring has reached its limits and that the additional workload cannot be managed through reallocation of existing staff without creating unacceptable compliance, operational, and legal risks.
- **Requested positions represent the minimum staffing necessary:** Cost estimates are based on establishing 18 new positions across Behavioral Health Division's Community Restoration and Evaluation Unit, Civil Commitment Program, and Extended Care Management Unit, and the Health Policy and Analytics Division to provide the minimum capacity needed to meet statutory, federal court, and operational requirements.
- **Workload projections are accurate:** Pricing assumes continued growth in workload, including management of more than 1,000 community restoration forensic evaluations annually, expanded statewide oversight responsibilities, increased technical assistance to counties, and new data reporting requirements.
- **Partner agencies will continue their existing roles:** The package assumes community mental health programs, the Oregon State Hospital, the judicial branch, and other partners will continue carrying out their respective responsibilities, while OHA provides the additional coordination, oversight, and implementation support required under HB 2005.

Oregon Health Authority: 2027-29 Policy Package

13. Will there be new responsibilities for OHA and/or Shared Services? Specify which programs and describe their new responsibilities.

Yes. While the primary responsibilities created by this package will reside within the Behavioral Health Division, several Shared Services programs will have implementation and ongoing support responsibilities.

- **Office of Information Systems (OIS):** May be required to modify or enhance existing information systems to support new Community Restoration, civil commitment, and reporting workflows; integrate data across systems; and support new reporting requirements.
- **Office of Enterprise Data and Analytics (OEDA):** May provide consultation and support for data governance, reporting, analytics, and performance measurement related to new statutory reporting and oversight requirements.
- **Office of Contracts and Procurement (OCP):** Will support procurement and contract administration for community restoration forensic evaluators, clinical supervision, and other contracted services needed to implement the new program.
- **Background Check Unit (BCU):** Will process background checks for newly established positions, as required.
- **Office of Training, Investigations and Safety (OTIS):** May provide onboarding, required employee training, and workplace safety support for new staff.
- **Office of Facilities Management (OFM):** May coordinate workspace, equipment, and facility needs associated with the addition of new positions.
- **Office of Financial Services (OFS) and Shared Services Budget Unit (SSBU):** Will support budget development, expenditure tracking, position establishment, and ongoing fiscal management of the package.

Oregon Health Authority: 2027-29 Policy Package

These responsibilities are expected to be consistent with the normal implementation support Shared Services provides for new programs and staffing. No significant ongoing expansion of Shared Services programs beyond these standard support functions is anticipated.

14. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

This package does not directly expand eligibility for services or increase client caseloads within existing OHA programs. Instead, it provides the staffing necessary to implement the statutory responsibilities established by HB 2005 and improve the state's capacity to administer, oversee, and coordinate Oregon's civil commitment and forensic behavioral health systems.

The most significant service impact will occur within the new Community Restoration Evaluation Unit, which is anticipated to coordinate and oversee more than 1,000 community restoration forensic evaluations annually. The package will also support individuals involved in civil commitment, Aid and Assist, community restoration, Oregon State Hospital diversion, and transition planning by improving timeliness, statewide consistency, and coordination of services.

Although the number of individuals served by existing programs is not expected to increase solely because of this package, those individuals are expected to experience improved access to timely evaluations, reduced delays, more consistent statewide practices, enhanced discharge planning, and better continuity of care. The package is intended to improve service quality, system performance, and legal compliance rather than expand the population eligible to receive services.

Oregon Health Authority: 2027-29 Policy Package

15. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This policy package requests 15 new permanent full-time positions (15.00 FTE) within the Behavioral Health Division and three new permanent full-time positions (3.00 FTE) within the Health Policy and Analytics Division. No existing positions would be modified. The requested positions provide the minimum staffing necessary to implement the statutory requirements established by HB 2005, meet federal court oversight obligations, and strengthen statewide administration of Oregon's civil commitment and forensic behavioral health systems.

Behavioral Health Division

Aid and Assist, Community Restoration Evaluation Unit Manager (1.00 FTE) – Health Policy and Program Manager 3 (HPPM3)

Office: Aid & Assist, Community Restoration and Evaluation Unit

Provides overall leadership for the Aid and Assist, Community Restoration and Evaluation Unit, including program implementation, policy development, statewide coordination, and supervision of staff. Oversees compliance with statutory requirements and serves as the primary liaison with counties, courts, providers, and other system partners.

Aid and Assist Policy Coordinator (1.00 FTE) – Operations and Policy Analyst 3 (OPA 3)

Office: Aid & Assist, Community Restoration and Evaluation Unit

Provides statewide leadership for implementation of HB 2005 and assist and community restoration reporting requirements. Develops policies, coordinates with Oregon State Hospital, community mental health programs, courts, and other system partners, monitors statutory compliance, and provides technical assistance to ensure consistent implementation across the state.

Oregon Health Authority: 2027-29 Policy Package

Community Restoration Policy Coordinator (1.00 FTE) – Operations and Policy Analyst 3 (OPA 3)

Office: Aid and Assist, Community Restoration and Evaluation Unit

Leads policy development, operational planning, and implementation activities for community restoration evaluations. Coordinates cross-agency initiatives, develops procedures, and provides technical assistance to local partners.

Aid and Assist Community Consult Program Analyst (1.00 FTE) – Operations and Policy Analyst 2 (OPA 2)

Office: Aid & Assist, Community Restoration and Evaluation Unit

Supports implementation of statewide aid and assist and community restoration reporting requirements by monitoring program performance, tracking statutory timelines, preparing reports, analyzing operational data, and assisting with policy implementation and partner coordination. The position also supports efforts to improve discharge planning and transitions from the Oregon State Hospital to community-based restoration services.

Community Restoration Administrative Specialist (1.00 FTE) – Administrative Specialist 2 (AS2)

Office: Aid and Assist, Community Restoration and Evaluation Unit

Provide advanced administrative support, technical assistance, and day-to-day coordination for Aid and Assist Community Restoration evaluations within CREU. Serve as the primary administrative resource for escalated case coordination issues from other administrative staff, providing procedural guidance and elevating matters requiring policy or legal interpretation.

Oregon Health Authority: 2027-29 Policy Package

Community Restoration Coordinators (3.00 FTE) – Administrative Specialist 1 (AS1)

Office: Aid and Assist, Community Restoration and Evaluation Unit

Provides day-to-day coordination of forensic evaluations, scheduling, documentation, communication with courts and providers, and case tracking to ensure evaluations and court filings occur within required timelines.

Community Restoration Fiscal Analyst (1.00 FTE) – Fiscal Analyst 2 (FA2)

Office: Aid and Assist, Community Restoration and Evaluation Unit

Provides contracting and financial operations for the forensic evaluator network (procurement support, contract administration, payment processing). Translates appropriations, spending patterns, and operational drivers into actionable guidance that keeps the program financially compliant, transparent, and able to meet service and court-driven obligations.

Senior Community Restoration Fiscal Analyst (1.00 FTE) – Fiscal Analyst 3 (FA3)

Office: Aid and Assist, Community Restoration and Evaluation Unit

Serve as CREU's principal budget and fiscal policy advisor, providing end-to-end leadership for complex budgeting, forecasting, and fiscal oversight that sustains Oregon's statewide system for court-ordered competency evaluations in community restoration. This position applies advanced analytic techniques to translate program requirements, workload trends, and long-range business plans into actionable fiscal strategies—developing budget proposals and decision packages, monitoring expenditures and projections, and recommending fiscal adjustments that align resources to CREU's mission and objectives.

Oregon Health Authority: 2027-29 Policy Package

Civil Commitment Program Manager (1.00 FTE) – Behavioral Health Policy Manager 2

Office: Civil Commitment Unit

Establishes and leads Oregon's statewide Civil Commitment Program. Oversees policy implementation, statewide coordination, compliance monitoring, and engagement with counties, courts, and behavioral health providers.

Administrative Support (1.00 FTE) – Administrative Specialist 2

Office: Civil Commitment Unit

Provides administrative support for the Civil Commitment Program, including scheduling, records management, correspondence, documentation, meeting coordination, and program logistics.

Extended Care Policy Analysts (2.00 FTE) – Operations and Policy Analyst 3 (OPA 3)

Office: Extended Care Management Unit

Supports discharge planning and coordination for individuals transitioning from the Oregon State Hospital to community settings. Coordinates with providers, courts, and local partners to reduce delays and improve continuity of care.

Extended Care Program Coordinator (1.00 FTE) – Administrative Specialist 2 (AS2)

Office: Extended Care Management Unit

Coordinates referrals, tracks discharge activities, supports provider communication, and assists with implementation of extended care management processes.

Extended Care Policy Analyst (1.00 FTE) – Operations and Policy Analyst 1 (OPA 1)

Oregon Health Authority: 2027-29 Policy Package

Office: Extended Care Management Unit

Provides policy research, program support, data tracking, and operational assistance for extended care initiatives and hospital transition activities.

Community Navigator Analyst (1.00 FTE) - Operations and Policy Analyst 3

Office: Extended Care Management Unit

Lead strategic coordination and policy development for the Forensic Community Navigator (CN)

Program that serves individuals under aid and assist orders transitioning from OSH to the community.

This position will oversee the current program operations with Community Mental Health Programs (CMHPs) and lead the expansion of this program to additional CMHPs around the state. This position will provide status updates to the Mink Bowman litigation project team and complete required formal reports on the outcomes of the CN program. Additionally, this role coordinates CN services and operations with OSH, CMHPs, residential providers and other systems partners to ensure the efficient use of funding, provide training and technical assistance and identify and address system gaps.

Health Policy and Analytics

Senior Forensic Mental Health Analyst (1.00 FTE) – Research Analyst 4 (RA4)

Office: Behavioral Health Analytics

Leads development of statewide reporting frameworks, performance measures, and advanced analyses supporting HB 2005 implementation. Provides strategic analytic leadership for legislative reporting and continuous system improvement.

Mandated Populations Analyst (1.00 FTE) – Research Analyst 3 (RA3)

Office: Behavioral Health Analytics

Oregon Health Authority: 2027-29 Policy Package

Develops reports, conducts data analysis, monitors statutory performance measures, and supports evaluation of program outcomes and health equity impacts.

Supportive Analyst (1.00 FTE) – Research Analyst 2 (RA2)

Office: Behavioral Health Analytics

Supports data collection, data quality, reporting, dashboard development, and routine performance monitoring to ensure timely and accurate statewide reporting.

Collectively, these positions establish the organizational capacity needed to implement HB 2005, improve statewide coordination and oversight, ensure compliance with statutory and federal court requirements, strengthen data-driven decision-making, and improve the timeliness and consistency of services for individuals involved in Oregon's civil commitment and forensic behavioral health systems.

16. What are the start-up and one-time costs?

Start-up costs for this package are expected to be limited and primarily associated with establishing 18 new permanent positions. One-time costs include standard employee onboarding, recruitment, office workstations, computers and information technology equipment, software licensing, and any necessary workspace modifications. Additional one-time costs may include configuration of existing information systems, development of program procedures and guidance documents, initial staff training, and implementation of reporting and data collection processes required under HB 2005.

The package does not require construction of new facilities or the purchase of major capital equipment. Any contracts established to support community restoration forensic evaluations will follow standard procurement processes and are reflected separately in the budget package, as applicable. Overall, one-

Oregon Health Authority: 2027-29 Policy Package

time implementation costs are expected to be modest relative to the ongoing personnel and operating costs needed to sustain the program.

17. What are the ongoing costs?

The primary ongoing costs associated with this policy package are the personnel and operating expenses necessary to sustain 15 permanent full-time positions within the Behavioral Health Division and three permanent full-time positions within the Health Policy and Analytics Division. These costs include salaries, employee benefits, payroll expenses, standard services and supplies, travel, training, information technology support, and ongoing administrative overhead.

Additional ongoing costs may include contracts for community restoration forensic evaluators and clinical supervision, as well as continued maintenance and support of reporting and data systems needed to meet statutory and federal court reporting requirements. These investments will enable OHA to maintain statewide oversight of civil commitment and community restoration programs, provide technical assistance to local partners, monitor compliance, support data-driven decision-making, and fulfill the ongoing responsibilities established by HB 2005.

The package does not create ongoing facility construction or major capital maintenance costs. Ongoing expenditures are primarily operational and are necessary to sustain compliance with state law, federal court obligations, and the continued administration of Oregon's civil commitment and forensic behavioral health systems.

18. What reductions will you use to offset the costs of this work and maintain budget neutrality?

Oregon Health Authority: 2027-29 Policy Package

This POP maintains budget neutrality by fully offsetting the requested investment through the savings and reductions included in POP 415: OHA Savings and Reductions.

19. What are the sources of funding (revenue) and the funding split (GF/OF/FF) for each part of the investment as well as the offset/reduction?

The sources of funding are \$5,882,811 General Funds, \$0 Other Funds, and \$5,538,727 Federal Funds.

20. What are the potential savings (above the offset to pay for the investment)?

While this package is not expected to generate direct General Fund savings that exceed its cost, it is anticipated to produce significant long-term cost avoidance and system efficiencies.

By improving statewide coordination of community restoration, civil commitment, and Oregon State Hospital discharge planning, the package is expected to reduce delays in evaluations, shorten unnecessary hospital stays, improve patient flow, and support more timely transitions to appropriate community-based care. These improvements may reduce avoidable costs associated with prolonged hospitalization, repeated court proceedings, unnecessary incarceration, and inefficient use of limited forensic behavioral health resources.

The package will also help OHA avoid the substantial financial and operational risks associated with noncompliance with HB 2005 and existing federal court orders. Improved oversight, standardized processes, and enhanced data reporting will strengthen system accountability, reduce the likelihood of corrective actions or litigation, and support more efficient use of state and local resources over time. While

Oregon Health Authority: 2027-29 Policy Package

these changes will reduce costs and improve operational efficiency, the benefits cannot be reliably quantified yet.

Oregon Health Authority: 2027-29 Policy Package

RACIAL EQUITY IMPACT STATEMENT (REIS) WORKSHEET: POLICY OPTION PACKAGE (POP) QUESTIONS

OHA POP #425: FORENSIC BEHAVIORAL HEALTH CAPACITY

Program managers responsible for the POP: Please answer the questions below for every POP being proposed in your agency request budget. To fill out this worksheet, download a copy of this worksheet and type your answers below each question.

Program Overview

1. Please describe the POP being proposed.

This policy package requests 19.25 FTE within OHA to implement the statutory requirements established by HB 2005 (2025) and strengthen Oregon's civil commitment and forensic behavioral health system. The requested staffing will enable OHA to implement new community restoration forensic evaluations, oversee expanded civil commitment responsibilities, improve coordination with counties, courts, and providers, support timely transitions from Oregon State Hospital, and meet new statutory reporting and federal court compliance requirements. It represents the minimum staffing necessary to ensure OHA can implement HB 2005 safely, consistently, and equitably.

2. Why is the POP being proposed?

This POP is being proposed to meet the statutory requirements established by HB 2005 and strengthen statewide behavioral health and forensic system operations; this staffing package proposes targeted investments across four key program areas across Adult Behavioral Health (BHD).

Consultation

3. Who is completing this REIS?

Behavioral Health Policy Manager

4. Who is responsible for tracking equity outcomes? What method(s) are they using to track outcomes?

BHD in collaboration with Health Policy Analytics (HPA) will track and analyze the outcomes.

5. Does your agency have a DEIB practitioner (Yes or no)?

Yes, OHA has two teams dedicated to providing DEIB subject matter expertise specific to behavioral health. One team is in Behavioral Health Division (BHD) and the other is in the Equity and Inclusion Division. These two teams provide subject matter expertise and technical support to the behavioral health units through learning collaboratives, communities of practices, equity hours, community partners meetings, community engagement, and one-on-one consultation. To support the legislative process, the teams also offer research and data regarding behavioral health inequities and draft equity impacts.

a. If yes, describe how you collaborated with them on this REIS.

Not applicable.

b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

The POP was developed in direct response to the legislative mandates established in HB 2005 (2025). During the legislative session, the Behavioral Health Division (BHD) completed a comprehensive bill analysis focused on health equity, incorporating the REIS principles to assess potential impacts. This equity analysis guided the development of the POP and ensured that the proposed investments align with legislative expectations and OHA's broader commitment to reducing behavioral health inequities.

In addition, the Equity and Community Partnerships Unit has established two senior analyst positions that provide consultation to BHD's civil and forensic programs. These roles strengthen OHA's capacity to embed equity principles into program design, service delivery, and policy development across the forensic and civil behavioral health systems.

6. Did you collaborate with your agency's data analysts, community engagement managers, outreach managers, and/or others that regularly interact with underserved and marginalized communities on this REIS? (Yes, no, or not applicable)

a. If yes, describe how you collaborated with them on this REIS.

b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community

input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

BHD and HPA have an established coordinated data strategy for both the civil and forensic populations, providing a consistent foundation for monitoring system performance, identifying disparities, and informing policy decisions.

Moving forward, this work will be enhanced through consultation with the Equity and Community Partnerships Unit and our community partners ensuring that data practices, analysis, and reporting are aligned with equity principles and fully reflect the needs and experiences of communities most affected by the forensic behavioral health system.

Community Engagement and Data

7. Identify the specific racial groups and communities that may be impacted by this POP, both directly and indirectly. In your answer, include responses to the following questions:
 - a. How did you identify these impacted groups?
 - b. What data are you using to validate your assessment? If possible, use outreach and engagement feedback to gather information and insight.
 - c. If possible, disaggregate the data by race, ethnicity, geography, income level, and other relevant characteristics. If disaggregated data is not available, please describe why.
 - d. How are communities impacted by this POP? What are the disproportionate impacts? Please be specific.

Oregon's forensic behavioral health system serves some of the state's most vulnerable individuals. These populations navigate complex challenges, including serious mental health conditions, court involvement, housing instability, and limited economic resources. Furthermore, groups that have been economically and socially marginalized, Tribal Nations, people with disabilities, and people with limited access to culturally responsive care are disproportionately overrepresented in this system.

A 2023 Improving People's Access to Community-based Treatment, Supports and Services (IMPACTS) Statewide Evaluation¹ reported that:

- In 2017, people with frequent criminal justice involvement (FCJI) who were enrolled in Oregon's Medicaid program were 75% more likely to have a mental health diagnosis, 650% more likely to have a substance use disorder diagnosis, and 150% more likely to visit the emergency department (ED) than non-FCJI Medicaid enrollees.
- Of the 812 individuals discharged from the Oregon State Hospital in 2018, 62% were committed for aid and assist, and one-third (35%) were civilly committed. Schizophrenia and acute psychosis were the most common admitting diagnosis.
- Substance use disorders (SUDs) were five to nine times more prevalent for the IMPACTS population that has complex behavioral health needs coupled with frequent healthcare utilization and criminal justice involvement.

OHA's 2025 *Aid and Assist – Community Restoration Annual Report* describes the racial and ethnic composition of individuals participating in community restoration as follows: Black or African American (11%), Hispanic or Latino/a/x (7%), American Indian/Alaska Native (3%), Native Hawaiian/Pacific Islander (2%), Asian (1%), other race or ethnicity (14%), unknown (2%), and White (68%). The report also notes that race and ethnicity information was missing for approximately 17% of individuals ordered to Community Restoration.

Forensic and civil data on race, ethnicity, age, gender, and geography are available, allowing us to identify groups and communities disproportionately impacted by system barriers and inequities. Through ongoing collaboration between BHD and HPA deeper analysis of these data will guide the development of data strategy that supports community engagement and thoughtful equity centered data interpretations. Forensic and civil data on race, ethnicity, age, gender, and geography are available and will allow OHA to identify groups and communities disproportionately impacted by system barriers and inequities. This Policy Options Package (POP) provides the essential staff that are needed to effectively evaluate and report on how communities are impacted by this POP and the forensic behavioral health systems they are involved in. Additionally, this POP supports a collaboration between BHD and HPA for a deeper analysis of these data that will guide the development of a data strategy that supports community engagement and thoughtful equity centered data interpretations.

¹ Renfro, S., & Simeon, E. (2023). *IMPACTS Statewide Evaluation: Baseline Report*. Center for Health Systems Effectiveness, Oregon Health & Science University.

8. How did you ensure multiple perspectives were part of the decision-making process for this POP? In your answer, include responses to the following questions:

- a. Identify how you have or are planning to engage multiple perspectives and impacted groups to provide feedback on this POP (e.g. program design, budget, policy decisions, etc.). Please give specific examples.
- b. If community engagement is not part of your approach, please explain why and what you did instead to incorporate community perspectives. In your response, describe the following: the decision-making process used to determine engagement was not feasible or appropriate, the specific barriers (beyond general time or capacity), and how you mitigated the risk of missing community input (e.g. using existing feedback, partnering with trusted organizations, review from advisory bodies, etc.).

Robust community engagement was not feasible for this process due to the legislative mandate and the accelerated timeline. However, as with all program development, ongoing engagement with community members, system partners, and agency partners remains essential for continuous quality improvement. As the programs represented in the POP are developed, program leadership and staff will seek input and make adjustments to best meet the needs of the individuals served. Examples of this ongoing refinement include adjusting timelines, reducing administrative burden, improving communication, and addressing inequities. For the development of the Community Restoration Evaluation Unit, intensive collaboration with the Oregon State Hospital occurred over several months to ensure that BHD incorporated lessons learned from their work. Additionally, system partners have expressed the need for an expanded evaluation process and more guidance from OHA for both Aid and Assist and Civil Commitment and more data transparency. The positions included in the POP would support this need. As these program expansions continue, we will maintain close engagement with system partners to ensure their needs are met.

9. If this POP is not funded, please describe the following:

- a. Which racial or ethnic communities would be most impacted.

Oregon's forensic behavioral health system serves some of the state's most vulnerable individuals. These populations navigate complex challenges, including serious mental health conditions, involvement in the criminal legal system, housing

instability, and limited economic resources. Furthermore, groups that have been economically and socially marginalized, Tribal Nations, people with disabilities, and people with limited access to culturally responsive care are disproportionately overrepresented in this system. These populations experience barriers at every stage of the forensic behavioral health system, from initial court involvement through civil commitment, Aid and Assist processes, hospital admission, restoration, and transition back to community settings.

- b. How disparities would likely persist or worsen.

A lack of consistent statewide infrastructure, uneven county capacity, fragmented data, and workforce shortages have allowed disparities to grow. Without the structural changes required by HB 2005 and the staffing needed to implement them, the system will continue to reproduce inequities rather than reduce them.

10. Who will be monitoring racial equity outcomes over time for this POP?

The outcomes will be monitored by BHD's partnership with HPA through the existing framework that supports civil and forensic data collection, monitoring and analysis.

- a. How will progress be reported?

Progress will be reported through county financial assistance agreement (CFAA) monitoring and reporting, internal dashboards and periodic updates through internal reports.

- b. How will leadership be informed of equity impacts?

Leadership will be updated through program performance meetings, and periodic reports.

- c. How will the community be involved in monitoring outcomes?

BHD is developing a strategy to address community involvement in monitoring outcomes.

Oregon Health Authority 2027-29 Policy Package

Division:	Equity and Inclusion Division
Program:	Traditional Health Worker Program
Policy package title:	Tribal Traditional Health Workers
Policy package number:	426
Related legislation:	HB 2088 (2021)

Summary statement:	The proposed Policy option package addresses a critical gap in the Oregon Tribal Health System by establishing a dedicated grant program for the newly created Tribal Traditional Health Worker (THW) type. These dedicated resources will support the Tribal THW Workforce to be trained and certified to meet the identified health needs in Tribal communities in Oregon and align with OHA’s strategic goal of eliminating health inequities by 2030.
---------------------------	--

	General Fund	Lottery Funds	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	\$ 111,080	\$ -	\$ -	\$ 88,920	\$ 200,000	0	0.00

Oregon Health Authority: 2027-29 Policy Package

Purpose

1. What problem is OHA trying to fix or solve?

In partnership and at the request of Tribal representatives HB 2088 created the Tribal Traditional Health Worker as the sixth worker type under the THW umbrella. It did not however provide a dedicated funding mechanism for ongoing implementation for the Nine Federally Recognized Tribes in Oregon and the Urban Indian Health Program (UIHP). Currently, Tribes need additional capacity to hire, train, and certify this new worker type. Without dedicated funding, the promise of HB 2088 remains unfulfilled, leaving a gap in culturally specific care for Tribes in Oregon.

2. What would this policy package buy and how and when would it be implemented?

This Policy Package will provide funding to the Nine Federally Recognized Tribes in Oregon and the Urban Indian Health Program to fully implement the Tribal Traditional Health Worker Program into their health systems. Through the OHA Tribal Consultation process, Tribal representatives will provide guidance on the funding formula. OHA will provide guidance on the use of funds including, but not limited to, staffing, supplies, training, and billing. After the Tribal consultation period has been concluded, OHA can initiate contracts and funds will be distributed to the Tribes.

Oregon Health Authority: 2027-29 Policy Package

3. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity¹ or equitable health outcomes? How does this policy package further OHA’s mission and align with its strategic plan?

This policy package directly supports the government-to-government relationship between the state and the Nine Federally Recognized Tribes of Oregon in addressing health inequities for American Indians and Alaska Natives served by Indian Health Care Providers. Pillar four of the OHA Strategic plan is “Achieving Healthy Tribal Communities.” This pillar focuses on uplifting the Oregon Tribal Health Strategic Plan for 2025 – 2030. The Tribal Health Strategic plan outlines a comprehensive approach to improving health outcomes for Tribal communities across Oregon through four strategic pathways of which “nurturing a healthy workforce” is one. This pathway includes increasing access to workplace wellness, training, and support. This pathway seeks to support the existing Tribal health workforce and promote its continued growth. This will be done by supporting accreditation programs, such as the Tribal THW certification, enhancing provider incentives for retention, continuing to offer Tribal-specific cohorts across the health field, and supporting mentorship opportunities and cross-training activities to connect one another in this work.

Quantifying results

4. What are the long-term desired outcomes?

Establishment of the Tribal Traditional Health Worker is essential to Achieving Healthy Tribal Communities, a pillar in OHA’s strategic goals to eliminate health inequities in Oregon by 2030. The long

¹ Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability, gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.**

Oregon Health Authority: 2027-29 Policy Package

term-desired outcome is the shared vision of, “seeing Tribal communities return to a state of wellbeing, health, and balance.”

5. What are the envisioned outputs of this investment? How will OHA measure the impacts on health inequities of this policy package?

The outputs envisioned are below:

- Increase the capacity of the Tribal Traditional Health Workforce, as they will be trained in multiple sectors of health topics identified by the Tribes Increase the proficiency of staff trained in areas of overall health, behavioral health, public health, and Tribal-Based Practices (TBPs)
- This worker will link community members with health services including Traditional Health Care Practices, a demonstration project approved in the 1115 waiver
- More employment and training opportunities for those with lived experience serving Tribal communities and increased retention
- More sustainability through established billing pathways
- Increase access to workplace wellness, training, and support that is culturally appropriate

OHA will measure the impacts on health inequities through an evaluation plan. The evaluation plan for the grant recipients will be where multiple perspectives are collected. The evaluation plan consists of the following data collection methods:

- Annual Reports that include qualitative and quantitative questions
- In-person feedback that is collected through the Tribal THW workgroup. The workgroup is comprised of direct service staff, management/supervisors, and Tribal health leadership. The workgroup meets monthly to discuss the development of the Tribal THW worker-type.

Oregon Health Authority: 2027-29 Policy Package

- Feedback collected at the OHA Tribal Monthly Meetings facilitated by the Office of Tribal Affairs. Tribal health leadership from Tribes and the Urban Indian Health Program are in attendance.
- One-on-one meetings with identified grant contacts with the Tribes and Urban Indian Health Program.

How achieved

6. What actions have occurred to resolve the issue prior to requesting a policy package?

OHA's Traditional Health Worker Program has previously provided grant funding to invest in the effort to expand the THW Tribal workforce. Due to limited resources, the grant was unable to continue due to lack of additional funding resources.

7. What alternatives were considered and what were the reasons for rejecting them?

There were two alternatives that were considered and rejected:

1. Tribes/UIHP would fund the development of the Tribal THW Program, on their own. This was rejected because the Tribes/UIHP are already under-resourced and do not have the capacity to do this.
2. The Equity and Inclusion Division would fund this work through their general funds however this was also rejected due to the lack of funds.

Oregon Health Authority: 2027-29 Policy Package

8. What other agencies, programs, community partners or stakeholders are collaborating on this policy package?

This policy packaged is a collaboration between the Nine of the Federally Recognized Tribes in Oregon along with the Urban Indian Health Program. Additionally, the OHA Office of Tribal Affairs is also a partner on this policy package led by the Tribal Affairs Director.

9. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

Response.

No changes to existing statues are not required.

10. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Response.

Tribal governments are affected in a positive way by OHA honoring the request to create and build this program.

11. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

Response.

No, it is not being requested because of an internal audit.

Oregon Health Authority: 2027-29 Policy Package

Staffing and fiscal impact

Implementation date(s): July 1st, 2027

End date (if applicable): June 30th, 2029

12. What assumptions affect the pricing of this policy package?

The pricing of this policy package was based on previous funding amounts provided by E&I to support the Tribal THW development.

13. Will there be new responsibilities for OHA and/or Shared Services? Specify which programs and describe their new responsibilities.

No.

14. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

Yes, due to an increase in the workforce and the services they provide, there will be more Tribal community members served to meet their health needs. The number of individuals served will be based on the capacity at each Tribal Program.

15. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

No additional OHA staff are needed to implement this policy package.

Oregon Health Authority: 2027-29 Policy Package

16. What are the start-up and one-time costs?

There are no start-up and no one-time costs.

17. What are the ongoing costs?

\$200,000 per biennium

18. What reductions will you use to offset the costs of this work and maintain budget neutrality?

This POP maintains budget neutrality by fully offsetting the requested investment through the savings and reductions included in POP 415: OHA Savings and Reductions.

19. What are the sources of funding (revenue) and the funding split (GF/OF/FF) for each part of the investment as well as the offset/reduction?

We will be utilizing the THW program cost allocation splits for these funds: 56% GF and 44% FF.

20. What are the potential savings (above the offset to pay for the investment)?

We will see a savings Lottery Funds of \$4,506, and Other Funds of \$102.

RACIAL EQUITY IMPACT STATEMENT (REIS) WORKSHEET: POLICY OPTION PACKAGE (POP) QUESTIONS

OHA POP #426: Tribal Traditional Health Workers

Program managers responsible for the POP: Please answer the questions below for every POP being proposed in your agency request budget. To fill out this worksheet, download a copy of this worksheet and type your answers below each question.

Program Overview

1. Please describe the POP being proposed.

- a. The proposed pop is for \$200,000 per biennium to develop a grant program to support the development and implementation of the Tribal Traditional Health Worker (THW) within the Nine Federally Recognized Tribes in Oregon and the Urban Indian Health Program.

2. Why is the POP being proposed?

- a. We are proposing the development of a grants program to distribute to the Nine Tribes and the Urban Indian Health Program to support the implementation of the Tribal THW within their Tribal Health Systems.

Consultation

3. Who is completing this REIS?

- a. Traditional Health Worker Program Staff. The THW program is located within the Equity and Inclusion Division.

4. Who is responsible for tracking equity outcomes? What method(s) are they using to track outcomes?

- a. The Traditional Health Worker program in the Equity and Inclusion Division will be responsible for tracking equity outcomes.

5. Does your agency have a DEIB practitioner (Yes or no)?

a. If yes, describe how you collaborated with them on this REIS.

1. Yes, we have collaborated with the Equity and Inclusion Tribal Liaison.

- b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).
6. Did you collaborate with your agency's data analysts, community engagement managers, outreach managers, and/or others that regularly interact with underserved and marginalized communities on this REIS? (Yes, no, or not applicable)
 - a. If yes, describe how you collaborated with them on this REIS.
 1. Yes, we are collaborating with the E & I Tribal Liaison and the OHA Office of Tribal Affairs Director on this REIS.
 - b. If they were not involved in the development of this REIS, please explain why. Describe what you did instead to incorporate equity expertise and community input (e.g. listening sessions, advisory review, analysis of existing community feedback, partnering with trusted community partners, etc.).

Community Engagement and Data

7. Identify the specific racial groups and communities that may be impacted by this POP, both directly and indirectly. In your answer, include responses to the following questions:

American Indian/Alaska Native and community members who receive services from Indian Health Care Providers are directly impacted by this POP. **How did you identify these impacted groups?**

1. OHA honors the government-to-government relationship with the Nine Federally Recognized Tribes in Oregon. As sovereign nations they identify their own patient population.
- b. What data are you using to validate your assessment? If possible, use outreach and engagement feedback to gather information and insight.**
 1. OHA Office of Tribal Affairs partnered with representatives from the Nine Federally Recognized Tribes in Oregon to develop the legislation

that passed in 2021 (HB 2088) that established the Tribal THW program with ongoing collaboration for implementation.

c. If possible, disaggregate the data by race, ethnicity, geography, income level, and other relevant characteristics. If disaggregated data is not available, please describe why.

1. Disaggregate data is not available for the clients to be served because only the Tribal Health Systems gather that specific of data for their patient population. For the worker type, the THW program does not collect employment data, only REALD and SOGI data. The data that is available only identifies the Race of a THW if reported and does not indicate whether they are employed within a Tribal Health System.

d. How are communities impacted by this POP? What are the disproportionate impacts? Please be specific.

Full implementation of the Tribal THW worker type will create:

- Increased capacity for the Tribal Health workforce, as they will be trained in multiple sectors of health topics identified by the Tribes
- Increase the proficiency of staff trained in areas of overall health, behavioral health, public health, and Tribal-Based Practices (TBPs)
- This worker will link community members with health services including Traditional Health Care Practices, a demonstration project approved in the 1115 waiver
- More employment and training opportunities for those with lived experience serving Tribal communities
- Create sustainability through established billing pathways

8. How did you ensure multiple perspectives were part of the decision-making process for this POP? In your answer, include responses to the following questions:

- a. **Identify how you have or are planning to engage multiple perspectives and impacted groups to provide feedback on this POP (e.g. program design, budget, policy decisions, etc.). Please give specific examples.**

1. The Equity and Inclusion Division staff including the Tribal Liaison continues to partner with the OHA Office of Tribal Affairs to collaborate with representatives from the Nine Federally Recognized Tribes in Oregon and the Urban Indian Health Program. Even before the development of HB 2088 (2021) that established the Tribal THW program and now with ongoing collaboration for writing the curriculum, developing a training plan and full implementation of the program. Formal Tribal consultation will be held for funding decisions.

The evaluation plan for the grant recipients will also include multiple perspectives collected. The evaluation plan consists of the following data collection methods:

1. Annual Reports that include qualitative and quantitative questions
 2. In-person feedback that is collected through the Tribal THW workgroup. The workgroup is comprised of direct service staff, management/supervisors, and Tribal health leadership. The workgroup meets monthly to discuss the development of the Tribal THW worker-type.
 3. Feedback collected at the OHA Tribal Monthly Meetings that are facilitated by the Office of Tribal Affairs. Tribal health leadership from Tribes and the Urban Indian Health Program are in attendance.
 4. One-on-one meetings with identified grant contacts with the Tribes and Urban Indian Health Program.
- b. If community engagement is not part of your approach, please explain why and what you did instead to incorporate community perspectives. In your response, describe the following: the decision-making process used to determine engagement was not feasible or appropriate, the specific barriers (beyond general time or capacity), and how you mitigated the risk of missing community input (e.g. using existing feedback, partnering with trusted organizations, review from advisory bodies, etc.).

Impacts and Accountability

9. If this POP is not funded, please describe the following:

a. Which racial or ethnic communities would be most impacted.

1. American Indian/Alaska Native community members served by the Nine Federally Recognized Tribes and the Urban Indian Health Program.

b. How disparities would likely persist or worsen.

1. Currently, there are no Tribal Traditional Health Worker specific trainings that are available to Tribal health staff. The THW training courses that are available do not address the topics that are crucial to understanding health disparities in Tribal and urban Indian communities. Additionally, the time commitment needed to attend these non-culturally specific trainings can overwhelm a small Tribal health program and almost eliminate services while the staff member is pursuing the certification training. These two reasons create a significant barrier. If not addressed, it can lead to a stall or decrease in Tribal Health Staff members seeking THW certifications which in turn can decrease federal Medicaid dollars going to Tribal health systems.

10. Who will be monitoring racial equity outcomes over time for this POP?

Monitoring will be a collaborative effort between the THW Program and Office of Tribal Affairs.

a. How will progress be reported?

1. Progress will be reported through annual reports to THW program manager and the Tribal Affairs Director. Progress will be gathered from the evaluation plan data collection methods.

b. How will leadership be informed of equity impacts?

1. Leadership will be informed of equity impacts through annual reports from both the grant recipients and internal THW program data. The information provided will include, but not limited to, increases in Tribal THW workforce, meeting outcomes, from qualitative and quantitative data.

c. How will the community be involved in monitoring outcomes?

1. The Tribes, as sovereign nations, will be provided with their data that is beyond what is available on the public registry. The Tribes, as subject matter experts, will decide how and if this data is shared with the community and how they will proceed with monitoring outcomes and making adjustments.

Major Construction/Acquisition Project Narrative

			\$ 2,278,008	

Description of Agency Business/Master Plan and Project Purpose/Problem to be Corrected
The Oregon State Hospital's (OSH) Facilities Program has completed the first iteration of its strategic capital plan; providing both a short- and long-term list of facility investment needs. These investments include operational priorities, maintenance needs, and capital investments in support of the patient physical environment of care for the 27/29 biennium, the coming decade, and beyond. While the comprehensive implementation strategy is still being refined through the planning process, the current funding requests have been identified as critical and time-sensitive needs that must be addressed. These requests represent foundational investments necessary to stabilize current operations, maintain continuity of services, address immediate infrastructure and resource gaps, and position the agency for successful execution of future strategic initiatives. Advancing these priority investments now ensures OSH can maintain operational readiness and patient care business continuity. BUDGETARY REQUEST: This investment will address the immediate needs of the Peter Courtney Salem campus facilities building correcting life safety ,

Project Scope and Alternatives Considered

This project represents a set of capital improvements to the hospital's Facilities Building to ensure continued operational reliability, regulatory compliance, and support for critical healthcare services. These upgrades are driven by five core priorities: seismic resilience, security, life safety, space optimization, and modernization of mechanical, electrical, and plumbing (MEP) systems.

Life Safety and Code Compliance:

- Structural and access improvements including replacement of the northeast entrance stairwell and ADA ramp, south entrance stairway. enhancements to the roof access system will ensure safe, compliant ingress and egress for staff and visitors.
- Lead remediation through encapsulation and full interior repainting will mitigate environmental health risks while extending the useful life of the building envelope.

Critical infrastructure modernization:

- Electrical system upgrades and replacement of end-of-life air conditioning equipment will improve reliability, reduce downtime risk, and support hospital operations.
- Energy-efficient window improvements will enhance thermal performance and reduce operating costs, aligning with sustainability goals.
- Security and emergency preparedness enhancements including updated building security systems and installation of an emergency operations satellite will strengthen the hospital's resilience and response capabilities in crisis situations.

Operational Efficiency and Functionality:

- Replacement of overhead doors
- Renewal of the paint shop spray booth
- Updates to facilities systems furniture (FFE).
- Temporary staffing offices will ensure continuity of operations during the renovation period, minimizing disruption to hospital services.

These investments are essential to maintaining a safe, secure, and efficient facilities environment that underpins the hospital's mission. The proposed improvements not only address deferred maintenance and end-of-life systems but also position the organization to meet future demands with greater resilience, compliance, and operational effectiveness.

Advancing these priority investments now ensures OSH can maintain operational readiness and patient care business continuity. BUDGETARY REQUEST: this investment is a multi-phase initiative to improve accessibility, safety, and overall functionality of parking and roadway infrastructure across all three campuses. This effort addresses system deficiencies, regulatory non-compliance, and capacity constraints while

Project Scope and Alternatives Considered

Peter Courtney Salem Campus:

Project cost: \$3,790,332

- ADA compliance and expansion study to inform the phased implementation of ADA-compliant improvements, including the installation of compliant curb ramps, accessible route improvements, traffic flow improvements to align with changing programming needs. These upgrades are critical to ensuring equitable access, reducing liability, and aligning all campuses with current accessibility standards.
- To preserve and extend the life of existing infrastructure, the program includes resealing and restriping approximately 891,187 square feet of parking lots and roadways

Junction City Campus:

Project cost: \$317,086

- Parking expansion will increase capacity to meet growing demand and reduce congestion. This will include additional surface water runoff mitigation as well as expanded lighting and security camera installations

Pendleton Campus:

Project cost: \$448,686

- Repaving the east parking lot and driveway will restore deteriorated pavement, eliminate safety hazards, and improve overall usability.

These improvements will modernize critical access infrastructure across the organization, ensuring compliance, improving safety, and supporting efficient campus operations. This program represents a cost-effective investment in maintaining essential assets while enhancing accessibility and the overall user experience.

BUDGETARY REQUEST: this investment is to expand clinical capabilities and improve access to essential oral health services within the hospital setting. This project will deliver a fully functional and code-compliant dental operatory designed to meet healthcare standards for safety, infection control, and

Project Scope and Alternatives Considered

The Junction City Dental Clinic Construction Project is a targeted investment to expand clinical capabilities and improve access to essential oral health services within the hospital setting. This project will deliver a fully functional, code-compliant dental operator designed to meet healthcare standards for safety, infection control, and patient care.

- The scope includes installation of specialized dental equipment and furnishings (FFE) necessary to support comprehensive clinical services. This includes dental cabinetry, chair and operator lighting, delivery systems, compressed air, and a dental vacuum system with an amalgam separator to ensure proper handling of waste materials. Imaging capabilities will be incorporated with X-ray equipment designed to meet all Authority Having Jurisdiction (AHJ) and radiation compliance requirements. Sterilization processes will be efficiently integrated by leveraging an existing sterilization room nearby, optimizing space and operational workflow.
- Mechanical system upgrades are a critical component of the project, aligning with best practices for infection control. Additional filtration and the introduction of negative air pressure will further reduce the risk of airborne contamination and enhance patient and staff safety.
- Interior finishes will be upgraded to meet clinical standards, including installation of continuous, seam-welded flooring to support infection prevention and ease of cleaning. Ceiling systems will be evaluated and potentially converted to a hard-lid design consistent with other clinical operatories, improving durability and hygiene control.
- Electrical and low-voltage systems will be modernized to support specialized dental equipment, including dedicated circuits for the dental chair, operator lighting, vacuum and air systems, and X-ray equipment. Data infrastructure will include IT and data drops to enable digital imaging, electronic charting, and seamless integration with hospital systems.

Collectively, these improvements will establish a modern, efficient, and compliant dental clinic within the Junction City hospital. The project supports the organization's mission by expanding access to care, improving patient outcomes, and ensuring a safe, high-quality clinical environment for both patients and staff.

These requests represent foundational investments necessary to stabilize current operations, maintain continuity of services, address immediate infrastructure and resource gaps, and position the agency for successful execution of future strategic initiatives. Advancing these priority investments now ensures OSH can maintain operational readiness and patient care business continuity. BUDGETARY REQUEST: this investment will Implement design changes that have proven to increase safety and the quality of patient care on the Junction City Campus. Recent sentinel events and staff injuries have highlighted the urgent need to implement these modifications.

Salem Seclusion Room Renewal

The Seclusion Room Safety Upgrades Project is a critical initiative to enhance patient and staff safety, reduce risk, and ensure compliance with behavioral health and ligature-resistant design standards across the Salem campuses 24 seclusion rooms. These targeted improvements address identified safety gaps in high-risk care environments where patients may be in acute distress.

- Replacement of seclusion room doors and bathroom doors with ligature-resistant assemblies equipped with remote locking capability. These improvements will allow staff to maintain control of the environment while minimizing direct physical intervention, reducing the risk of injury to both patients and caregivers.
- The installation of remote water shutoff systems further enhances safety by enabling staff to quickly respond to potential flooding or self-harm risks.
- Installation of impact-resistant padding between the anteroom and seclusion room door, helping to prevent injury during episodes of agitation or distress.

Collectively, these improvements will create safer, more controlled care settings that support de-escalation, protect patient dignity, and reduce staff exposure to risk. This project reflects a proactive commitment to patient-centered care, regulatory compliance, and continuous improvement in high-acuity treatment environments.

These requests represent foundational investments necessary to stabilize current operations, maintain continuity of services, address immediate infrastructure and resource gaps, and position the agency for successful execution of future strategic initiatives. Advancing these priority investments now ensures OSH can maintain operational readiness and patient care business continuity. BUDGETARY REQUEST:: this investment will effectively integrate lighting control panels with the building management system (BMS) system; a strategic upgrade that delivers energy efficiency, cost savings, improved system reliability, and enhanced occupant satisfaction. It positions the facility for smarter, more sustainable operations and supports long-term asset value management.

Project Scope and Alternatives Considered
This proposal includes the installation of advanced lighting control panels integrated with the existing Building Management System (BMS) to improve operational efficiency and reduce energy consumption at the Salem Campus. Lighting represents a significant portion of overall energy use in commercial and institutional buildings. By implementing centralized lighting control panels connected to the BMS, the organization can gain real-time visibility and control over lighting systems. This integration enables automated scheduling, occupancy-based control, daylight harvesting, and remote system management—leading to measurable reductions in energy waste and utility costs.

Description of Agency Business/Master Plan and Project Purpose/Problem to be Corrected
OSH's Facilities Program has completed the first iteration of its strategic capital plan; providing both a short- and long-term list of facility investment needs. These investments include operational priorities, capital investments, and organizational growth for the coming decade. While the comprehensive implementation strategy is still being refined through the planning process, the current funding requests have been identified as critical and time-sensitive needs that must be addressed prior to full implementation of the Master Plan. These requests represent foundational investments necessary to stabilize current operations, maintain continuity of services, address immediate infrastructure and resource gaps, and position the agency for successful execution of future strategic initiatives. Advancing these priority investments now ensures the agency can maintain operational readiness and build the capacity required to effectively implement the long-term vision and recommendations that will emerge from the completed Master Plan. BUDGETARY REQUEST: replacing the existing drift eliminators with modular media is a cost-effective and practical upgrade that enhances system performance, simplifies maintenance, and supports sustainable and compliant facility operations. This improvement will contribute to greater reliability and long-term efficiency of the cooling tower system.

Project Scope and Alternatives Considered

The Oregon State Hospital's (OSH) Facilities Program has completed the first iteration of its strategic capital plan; providing both a short- and long-term list of facility investment needs. These investments include operational priorities, maintenance needs, and capital investments in support of the patient physical environment of care for the 27/29 biennium, the coming decade, and beyond.

While the comprehensive implementation strategy is still being refined through the planning process, the current funding requests have been identified as critical and time-sensitive needs that must be addressed. These requests represent foundational investments necessary to stabilize current operations, maintain continuity of services, address immediate infrastructure and resource gaps, and position the agency for successful execution of future strategic initiatives.

Advancing these priority investments now ensures OSH can maintain operational readiness and patient care business continuity.

REQUEST: this investment will modernize the existing HVAC cooling tower system. Over time, the current fixed-style eliminators have become less effective due to wear, scaling, and limited accessibility for cleaning and repair. This degradation contributes to increased water consumption, chemical loss, and the potential for environmental and regulatory concerns. The proposed modular drift eliminator media offers a modern solution with enhanced efficiency in capturing water droplets while allowing for easier inspection, cleaning, and replacement. Unlike traditional fixed assemblies, the modular design enables maintenance teams to remove and service individual sections without requiring extensive disassembly or system downtime. This significantly reduces labor costs and improves maintenance response times.

Description of Agency Business/Master Plan and Project Purpose/Problem to be Corrected
The Oregon State Hospital's (OSH) Facilities Program has completed the first iteration of its strategic capital plan; providing both a short- and long-term list of facility investment needs. These investments include operational priorities, maintenance needs, and capital investments in support of the patient physical environment of care for the 27/29 biennium, the coming decade, and beyond. While the comprehensive implementation strategy is still being refined through the planning process, the current funding requests have been identified as critical and time-sensitive needs that must be addressed. These requests represent foundational investments necessary to stabilize current operations, maintain continuity of services, address immediate infrastructure and resource gaps, and position the agency for successful execution of future strategic initiatives. Advancing these priority investments now ensures OSH can maintain operational readiness and patient care business continuity. BUDGETARY REQUEST: this investment will support the replcement of all 800 legacy cameras with modern, high-resolution digital systems, including expanded data recording servers to accommodate increased demand. The upgraded solution will provide substantially improved image clarity, enhanced low-light performance, which can support proactive safety measures and more efficient incident response. Additionally, newer systems offer integration capabilities with existing security and IT infrastructure.

Project Scope and Alternatives Considered

Given the sensitive nature of our patient population and the need for continuous, reliable monitoring, maintaining a fully functional and secure surveillance system is essential. The existing cameras are no longer supported by the manufacturer making repairs and replacements increasingly more difficult to procure, also limited in resolution and performance, reducing the effectiveness of incident detection, investigation, and overall situational awareness.

This investment will directly support patient and staff safety, reduce institutional risk, and ensure compliance with healthcare security standards and best practices. While the upfront capital cost is significant, the long-term benefits include reduced maintenance expenses, improved operational efficiency, and mitigation of risks associated with system failure and outage turnaround time.

Description of Agency Business/Master Plan and Project Purpose/Problem to be Corrected
The Oregon State Hospital's (OSH) Facilities Program has completed the first iteration of its strategic capital plan; providing both a short- and long-term list of facility investment needs. These investments include operational priorities, maintenance needs, and capital investments in support of the patient physical environment of care for the 27/29 biennium, the coming decade, and beyond. While the comprehensive implementation strategy is still being refined through the planning process, the current funding requests have been identified as critical and time-sensitive needs that must be addressed. These requests represent foundational investments necessary to stabilize current operations, maintain continuity of services, address immediate infrastructure and resource gaps, and position the agency for successful execution of future strategic initiatives. Advancing these priority investments now ensures OSH can maintain operational readiness and patient care business continuity. BUDGETARY REQUEST: this investment will support the replacement of all end-of-life maglocks with modern and code-compliant electromagnetic locking systems designed for healthcare and high-security settings.

Project Scope and Alternatives Considered

The facility's current magnetic door locking (maglock) systems are increasingly reaching end-of-life status and are no longer manufactured which carries significant safety and liability implications in a secure behavioral health environment. This will require replacement with modern devices as the existing devices fail. With a goal of campus wide replacement with new standardized devices over the next 5-6 years.

Updated systems will offer improved reliability and availability. These upgrades will ensure doors respond appropriately during emergencies (e.g., fire alarm release) while maintaining strict access control under normal operations.

This investment is essential to maintaining a safe, compliant, and secure environment. Replacing the obsolete maglock infrastructure will mitigate operational risks, support regulatory compliance, and reinforce our commitment to patient and staff safety.

Definitions:

Position

Count: 1 Total Legislatively Approved Budget (LAB) Position Count assigned to (home location) each building or lease as applicable.

RSF 2 Rentable SF per BOMA definition. The total usable area plus a pro-rated allocation of the floor and building common areas within a building.

Usable Square Feet per BOMA definition for office/administrative uses. Area of a floor occupiable by a tenant where personnel or furniture are normally housed plus building amenity

USF 3 areas that are convertible to occupant area and not required by code or for the operations of a building. If not known, estimate the percentage.

O&M 4 Total Operations and Maintenance Costs for facilities including all maintenance, utilities and janitorial.

Facilities Summary Report

2027-29 Biennium

Facility Plan - Facilities Planning Narrative 107bf02a
2027-29 Biennium

Agency Name

Oregon State Hospital

1. What are the key drivers for your agency's facility needs, and how do you measure space/facility demand?

The Oregon State Hospital's (OSH) Facilities Program has completed the first iteration of its strategic capital plan; providing both a short- and long-term list of facility investment needs. These investments include operational priorities, maintenance needs, and capital investments in support of the patient physical environment of care (PEC) for the 27/29 biennium, the coming decade, and beyond.

While the comprehensive implementation strategy is ongoing and still being refined through the planning process, the current funding requests have been identified as critical and time-sensitive needs that must be addressed. These requests represent foundational investments necessary to stabilize current operations, maintain continuity of services, address immediate infrastructure and resource gaps, and position the agency for successful execution of current and future strategic initiatives.

Advancing these priority investments now ensures the agency can maintain operational readiness and build the capacity required to effectively implement the long-term vision and recommendations.

2. What are the key facility-related challenges over the next 10-years? (Please answer in order of priority)

Lengthy Procurement and Capital Planning Timelines:

OSH's public improvement process, while thorough, is inherently slow. Projects often require multiple layers of approval, environmental and health care-related regulatory reviews. These timelines can stretch over several years, during which maintenance needs continue to grow and costs escalate. The result is a compounding effect where delays in addressing one issue often leads to more extensive and expensive repairs later.

Deferred Maintenance Backlog:

The Oregon State Hospital (OSH) faces a growing and complex backlog of deferred maintenance across its three campuses in Salem, Junction City, and Pendleton. This backlog threatens the long-term sustainability of critical infrastructures, and directly impacts the hospital's ability to provide safe and uninterrupted care to patients.

Aging Infrastructure and End-of-Life Systems:

Many building systems across the OSH portfolio such as HVAC, plumbing, electrical, and security systems, are aging faster than anticipated due to its 24/7 patient care high utilization and evolving regulatory standards; with many systems approaching the 10 and 15-year end of useful life. The Peter Courtney Salem Campus and the Pendleton secured residential treatment facility (SRFT) Campus, both w/older buildings and infrastructure, face even greater challenges; including deteriorating building envelopes, outdated mechanical systems, and the need for seismic and energy/sustainability upgrades.

Operational Complexity in Active Treatment Environments:

Performing maintenance in a secure psychiatric hospital setting adds significant complexity. Work must be carefully scheduled to avoid disrupting patient care, ensure staff and contractor safety, and to maintain compliance with federal and state regulations. Many repairs require temporary relocation of patients or staff, which is logistically challenging and resource intensive. This constraint often leads to deferral of non-critical repairs.

3. What do you need to meet these challenges?

The completed agency master plan, and its ongoing refinement, establishes a long-term strategic roadmap for campus modernization, infrastructure renewal, and future capital investments. It ensures projects are aligned with operational needs, patient safety requirements, regulatory compliance, and long-term sustainability and resiliency objectives.

A comprehensive building assessments (funding requested for 27/29 within OSH policy packages) will provide OSH with a clear, data-driven understanding of facility conditions, infrastructure risks, and capital priorities. These assessments will allow the agency to prioritize investments, reduce reactive maintenance, and address deficiencies before they become major system failures.

Direct contracting authority would allow OSH to respond more quickly to urgent infrastructure and facility needs. Faster project delivery reduces the impacts of lengthy procurement timelines, limits cost escalation, and helps prevent minor issues from developing into larger, more expensive failures.

Adopting a strategic capital investment account (ORS 276.285) would provide stable, predictable funding to address infrastructure needs proactively rather than reactively, and subsequently preserve state-owned property. Dedicated funding allows OSH to plan and phase projects efficiently, reduce emergency repairs, minimize operational disruptions, and extend the life of critical assets.

Together, these tools position OSH to transition from reactive maintenance to proactive capital management; subsequently improving reliability, protecting state investments, supporting regulatory compliance, and ensuring for safe and uninterrupted patient care across all OSH campuses.

Letter from the Director

Agency overview

Overview of the Oregon Health Authority

The Oregon Health Authority (OHA) includes most of the state's health care programs. OHA has eight divisions: Behavioral Health, Equity and Inclusion, External Relations, Fiscal and Operations, Health Policy and Analytics, Medicaid, Oregon State Hospital, and Public Health.

The Oregon Health Policy Board² (OHPB) serves as OHA's policymaking and oversight body, OHPB works toward comprehensive health reform in our state. The nine-member board includes community members from across the state with an interest in health and health care. Board members have strong relationships with the communities they represent.

OHA appreciates our many partners who share a commitment to eliminating health inequity in Oregon. Partners range from Tribal Nations and coordinated care organizations (CCOs) to local health officials and community-based non-profit organizations. The agency depends on their input, collaboration, innovation, expertise, and inspiration to improve the health and well-being of every Oregonian. Together, we are working to dismantle our state's systemic barriers to equitable, affordable, and accessible health care.

OHA mission and objectives

Vision

A healthy Oregon.

² Oregon Health Policy Board: <https://www.oregon.gov/oha/OHPB/Pages/index.aspx>

Mission

Ensuring all people and communities can achieve optimum physical, mental and social well-being through partnerships, prevention and access to quality, affordable health care.

Core Values

OHA has core values that guide our work. Those core values are articulated below.

Health Equity

We address the clinical and social conditions, as well as the historical and contemporary injustices, which undermine health, so everyone can reach their full health potential. We respect diverse cultures, populations, histories, and health practices. We consider the diversity of Oregon's communities as we make decisions about how policy and practice are developed, and how resources are distributed. We ensure our workforce is diverse and inclusive because a workforce and leadership reflecting all Oregonians is best able to achieve these outcomes.

Service Excellence

We exceed the expectations of the people we serve by delivering responsive, efficient, and effective solutions.

Integrity

We are each accountable for maintaining the highest standards and outcomes in all aspects of our work. We are good stewards of the public trust and the public dollar. Our decisions are informed, fiscally responsible, open, and easily understood.

Leadership

Each one of us in OHA is responsible for helping to realize a healthy Oregon. We bring our talent, creativity, compassion, competence, generosity, and stewardship to the work we do every day. We break down barriers to ensure every employee has the ability and opportunity to help make changes that improve health and transform health care. We lead improvement in health through innovative strategies and creative solutions.

Partnership

In our service to the public, we seek out, listen to, and collaborate with our partners across diverse communities. Our common goal is to protect and promote the health of all people in Oregon.

Innovation

We are not satisfied with the status quo if there are new and better ways to meet the needs of the people we serve. We bring creativity, experience, and openness to our search for solutions to problems. We pursue opportunities to develop new evidence to evolve our practices.

Transparency

We communicate honestly and openly, and our actions are upfront and visible. We provide open access to information and meaningful opportunities to provide input and participate in our decision-making.

Our 2030 Goal

In 2019, OHA became the first health agency in the country to declare an ambitious statewide goal to eliminate health inequities, and to do so by 2030. In the simplest terms, that means establishing a health system where all people in Oregon can reach their full health potential and well-being, without facing disadvantages due to their race, ethnicity, language, disability, immigration status, age, gender, gender identity, sexual orientation, geography, or social class.

Strategic Plan Goals

OHA's 2024-2027 Strategic Plan goals support our 2030 goal and include the following:

- Transforming behavioral health;
- Strengthening access to affordable care for all;
- Fostering healthy families and environments;
- Fostering healthy Tribal communities; and

- Building OHA’s internal capacity and commitment to eliminate health inequities.

Health Equity definition

In 2019, the Oregon Health Policy Board and OHA adopted the following definition of health equity³ ([Appendix A-4](#), OHA health equity definition: 2019 Health Equity Committee presentation to Oregon Health Policy Board):

Oregon will have established a health system that creates health equity when all people can reach their full health potential and well-being and are not disadvantaged by their race, ethnicity, language, disability, gender, gender identity, sexual orientation, social class, intersections among these communities or identities, or other socially determined circumstances.

Achieving health equity requires the ongoing collaboration of all regions and sectors of the state, including Tribal governments to address:

- The equitable distribution or redistribution of resources and power, and
- Recognizing, reconciling and rectifying historical and contemporary injustices.

[Organizational Chart](#)

Affirmative Action Policies

Policy statement

The Equity and Inclusion (E&I) Division, the Office of Human Resources (HR) and OHA managers are responsible for ensuring the following policy is appropriately posted in each OHA office's employee area. The E&I Division monitors, reports and investigates charges of discrimination in violation of DAS Policy 50.010.01, Discrimination and Harassment Free Workplace policy, and reports trends to the OHA Executive Leadership Team as necessary. As part of OHA's strategic plan, E&I is developing a regular cadence of reporting to the OHA Executive Leadership Team.

State and federal employment law documents (Appendices [B](#) and [C](#)) are readily available on OHA's internal website (OWL) and external website. Additionally, OHA provides and makes available posters and other printed matter featuring this information throughout its workspaces, including locations where the public can easily access them. OHA creates the electronic and printed matter integrating meaningful accessibility to ensure people with disabilities and people with Limited English Proficiency (LEP) can request the information in a format or language of their choice at no cost to them.

Roles for Implementing the Affirmative Action Plan

Roles and responsibilities

Agency Director

- Articulate and ensure a positive climate throughout the agency concerning the goals of the Affirmative Action Plan, and other equity and inclusion initiatives and programs.
- Ensure division directors understand their work performance is evaluated based on their Affirmative Action efforts and results, in conjunction with other managerial responsibilities.
- Meet at least annually or as needed with the OHA Equity and Inclusion Division, Office of Human Resources and division and program directors to review Affirmative Action progress and challenges.
- Ensure the appropriate review and follow-up on findings are done including the following:
- The agency director or deputy director(s) review all investigation reports completed under the OHA Discrimination and Harassment Complaint procedure.
- Appropriate staff coordinate with staff conducting investigations about the findings.
- The agency director or designee responds to requests for reconsideration.
- Ensure division and program administrators do the following:
 - Receive training in Affirmative Action concepts.
 - Review management implementation of Affirmative Action strategies in performance appraisals including quarterly Performance and Accountability Feedback (PAF) processes

- Provide reports to the Legislature and public regarding progress on Affirmative Action Plan strategies' progress upon request in alignment with public records requirements
- Evaluate members of the management team for their effectiveness in creating the workplace conditions and results expected by the agency's affirmative action efforts.

Executive leadership

- Leads the agency in setting the direction and expectations around implementing the Strategic Plan, DEI Action Plan and Affirmative Action Plan.
- Receives ongoing professional development related to health equity, equity and inclusion, anti-racism and other topics relevant to advancing the Strategic Plan, DEI Action Plan and Affirmative Action Plan.
- Ensures division-level leadership and management teams:
 - Receive ongoing professional development related to health equity, equity and inclusion, anti-racism and other topics relevant to advancing the Strategic Plan, DEI Action Plan and Affirmative Action Plan.
 - Review management implementation of equity advancement strategies in performance appraisals, and
 - Evaluate management team members for their effectiveness in creating the workplace conditions and results expected by the agency's affirmative action policy.

Management

- Promote and foster a positive nondiscriminatory climate and a work environment in which all employees are valued and respected in accordance with state policy, agency values, and state and federal statutory and regulatory requirements.
- Ensure new and current employees are aware of the agency's strategic plan goal, health equity definition and core values, and understand OHA's priority initiatives for advancing workforce equity and inclusion.

- Periodically review training programs, hiring and promotion patterns and practices to remove barriers to achieving the agency's goals.
- Conduct periodic reviews by staff authorized to act to ensure the following:
 - EEO, Americans with Disabilities Act (ADA) and Discrimination and Harassment Policy information is properly displayed.
 - All facilities for the use and benefit of employees and members of the public are accessible both in policy and meaningful use.
 - That all employees, including People of Color, tribal members and other indigenous people, persons with disabilities, people of all genders and gender-identity, people of all ages, and all other protected class identities and categories have meaningful opportunities and encouragement to participate in education, training, recreational and social activities that the agency provides, sponsors and contracts with other entities to provide or sponsor.
 - Employees learn about the need for ADA compliance, alternate format and language access, and how to appropriately process and facilitate requests ([Appendix A-5](#)).
 - Identify and seek solutions for problem areas in equity and inclusion practices and procedures.

Equity and Inclusion (E&I) Division

- Develop and communicate agency policies and procedures related to AA/EEO and prepare and disseminate Affirmative Action information.
- Coordinate activities in concert with the Affirmative Action Plan and monitor progress toward agency identified goals and strategies.
- Identify solutions to barriers preventing achievement of OHA Affirmative Action goals.
- Ensure recruitments support Affirmative Action goals.
- Ensure the agency is complying with Affirmative Action/EEO and other relevant laws and policies through collaboration with OHA Workday data professional.

- Receive and investigate discrimination, harassment, and retaliation complaints that allege potential violations of the DAS Discrimination and Harassment-Free Workplace policy.
- Attend equity and inclusion, anti-racism, ADA and other related training regarding current Affirmative Action guidelines and issue updates. Develop knowledge and skills for advancing workforce equity and inclusion.

Other staff

- Perform their work in alignment with Affirmative Action/EEO requirements.
- Perform their work centering equity in alignment with OHA's strategic goal.

2025-2027 progress report

The following is a summary of OHA's progress on goals and strategies presented in the 2025-2027 Affirmative Action Plan (also previously known as the "Equity Advancement Plan).

Strategic Objective 1: Equitable Hiring Practices and Professional Development Pathways

Advance equitable hiring strategies and professional development pathways that assure OHA staff composition reflects the communities we serve and that enhance their competencies and career trajectories.

Action 1

Implement the OHA Equitable Hiring Policy and Equitable Hiring Strategies Toolkit investing in the agency structure to sustain daily practice, innovation, and accountability.

The stated outcomes for this action are:

- The Equitable Hiring Policy is created and finalized by the end of calendar year 2025. Final policy, fully vetted, approved, and signed by Executive Management by 12/31/2025.

- All staff are trained on the Equitable Hiring Policy. Policy training is added to all employees' required training curriculum. Also added to new employee curriculum. 85% of current employees trained by 6/30/2027.

Action 1 Progress

In 2024 the Equitable Hiring Policy (EHP) discovery team learned about the history of past attempts at policy development. They also engaged all divisions and additional groups including the Equity Advancement Leadership Team (EALT) to understand current practices, related work, and gather initial input. Recommendations for this work fell into three themes, all related to promoting and supporting accountability:

- Process alignment
- Buy-in for the policy
- Resourcing (for both the policy writing and implementation)

When the discovery process was complete, sponsors assembled project team and the EHP development project was chartered and initiated. It became clear that policy development and implementation would likely require different resourcing and subject matter expertise so in alignment with recommendations from the Discovery Report, it was decided to separate the work into two distinct but connected projects. In 2025 and early 2026 the EHP development project completed development of the EHP.

The Equitable Hiring Policy was approved in quarter one of 2026 and was published with an effective date of July 1, 2026. As stated previously, the project was split into two portions: writing the policy and implementation of the policy. The agency is currently underway with implementation planning. Implementation will include a detailed process document to operationalize the policy; a set of standard tools to use in the recruitment process; and socialization of the policy, process, and tools throughout the agency. The target completion date for implementation is December 2027.

Action 2

Collect and use OHA employee data to guide and validate workforce equity and diversity strategies and policy decisions, including REALD and SOGI data and other

data that provide near-term and comprehensive insight across under-represented groups most harmed by inequities and socio-political injustices.

Action 2 Progress

In 2023, OHA developed and launched a REALD & SOGI Employee Survey designed to compensate for the limitations of demographic data captured in Workday. Currently, the aggregated findings are shared with division recruitment teams but there is not a standardized process for how divisions engage with these data. We are currently evaluating how these data can be used agency wide, without risking the anonymity of participants to guide and validate workforce equity strategies.

While greater awareness of the Survey through the OHA newsletter early in 2025 resulted in a significant increase in participation, concerns surrounding REALD & SOGI data collection and governance arose with the shift in federal administrations. This resulted in a temporary pause on some REALD & SOGI projects and the development of new communication guidelines. Additionally, these changes extended to the OHA REALD & SOGI Employee Survey and influenced participation rates and recruitment strategies for the survey.

Action 3

Develop, expand, and promote structured professional development opportunities, including learning on-the-job (OJT) programs and job rotations.

The stated outcomes for this action are:

- Develop, expand, and promote structured professional development opportunities, including learning OJT programs and job rotations. Baseline rotation, OJT, and development opportunities. Evaluate year over year growth. Target = 25% growth the first year, and 10% growth the second year.

Action 3 Progress

A comprehensive organizational assessment was conducted and while challenges were identified, the workgroup believes that before pursuing external partnership, we should reform internal policies. The agency continues to offer professional development opportunities and job rotations.

Strategic Objective 2: Building a Culture of Belonging

Foster OHA staff well-being, belonging and wholeness so that all OHA staff feel safe and invited to bring their identities, perspectives, and experiences to work each day and have those be heard, understood, honored, and included in alignment with OHA's values, the 2030 strategic goal to eliminate health inequities, and its commitment to being an anti-racist organization.

Actions that we will use to advance Objective 2 that are relevant to the Affirmative Action Plan:

Action 1

Expand the employee mentorship program agency-wide, building upon the pilot launched in 2024.

Action 1 Progress

The mentorship program is an avenue for employees to gain support and career development. The program matches mentees with mentors who meet over a period of time to offer support, answer questions, give encouragement, and provide knowledge about career development.

The employee mentorship program, after a successful pilot, launched agency wide. The 2026 cohort included 157 total participants: 71 mentors and 86 mentees. Based on participant surveys, overall satisfaction is high (4.43 out of 5). Mentorship increases employee belonging, retention, and increases equitable outcomes along the employee lifecycle.

Workforce demographic data and analysis

OHA is committed to eliminating health inequity in Oregon. This requires the agency to recruit, retain and advance a qualified, culturally responsive and inclusive workforce that reflects, at minimum, Oregon's population demographics. The information presented in this report shows that OHA has a lot of work to do to dismantle institutionalized racism and change organizational culture, policies and priorities, in order to improve outcomes. The OHA Strategic Plan, DEI plan, performance system,

and Affirmative Action Plan serve as OHA’s roadmap for improving workforce equity and inclusion processes and outcomes.

This section summarizes workforce demographic data for multiple reporting years, as requested by the Department of Administrative Services (DAS). Detailed and supplemental data tables are provided in [Appendix D-10](#). The tables in this section include information about changes from 2024 to 2026, focusing on fiscal years (FY) 2025 (July 1, 2024 to June 30, 2025) and 2026 (July 1, 2025 to June 30, 2026). 2025 is used to refer to FY 25 and 2026 refers to FY 26.

Please note that certain data categories are opt-in or self-report, thus, some users may choose not to respond or not know that a response is needed. These include: disability, gender identity if non-binary, and veteran status. When data are missing because of non-response or declining to answer, they are not included thus the reader may notice different counts depending on what data are pulled.

Overall Workforce Demographics

Figure 1. OHA Workforce by race and ethnicity in 2025 and 2026 (#, %)

Race and Ethnicity

Figure 1 is a summary of changes in counts and percentages by race and ethnicity (Table D-10.1 in [Appendix D-10](#) provides details). The percentage changes from 2025 to 2026 by race and ethnicity in OHA are fairly minimal; within two percentage points for most groups. However, improvements in diversity by race and ethnicity in the workforce over the last biennium are evident. The largest increase in workforce diversity was seen among Black & African American/African American and Latinx seeing the biggest gains (1 percentage and .5 percentage point increases over the biennium). There was a decrease of 2.1 percentage points for the White demographic.

Table 1. OHA Workforce by Race and Ethnicity

Race and Ethnicity	FY 2025		FY 2026		Change	
	N	%	N	%	N	% Points
<i>American Indian & Alaska Native</i>	122	2.0	123	2.0	1	0.0
<i>Asian</i>	479	8.0	477	7.9	-2	-0.1
<i>Black & African American</i>	316	5.3	378	6.2	62	1.0
<i>Latinx</i>	674	11.3	715	11.8	41	0.5
<i>Native Hawaiian & Pacific Islander</i>	65	1.1	72	1.2	7	0.1
<i>Multiracial</i>	213	3.6	210	3.5	-3	-0.1
<i>White</i>	3,853	64.4	3,777	62.3	-76	-2.1

Disability

Table 2. OHA Workforce by Disability

Disability	FY 2025			FY 2026		
	N	Proportion	%	N	Proportion	%
<i>Not Disabled</i>	6296	0.98	97.95	6426	0.98	98.18
<i>Disabled</i>	132	0.02	2.05	119	0.02	1.82

The percentage of employees with Disabilities is 1.82% of the workforce and that has decreased .23% in the last two years.

Veteran Status

Table 3. OHA Workforce by Veteran Status

	FY 2025		FY 2026		Change	
	N	%	N	%	N	% Points
<i>Not a Veteran</i>	5,750	95.77	5,852	96.08	102	0.3
<i>Veteran</i>	254	4.23	239	3.92	-15	-0.3

The percentage of Veterans in 2026 is slightly less than in 2025 (-.3 percentage points less).

Please note that disability and veteran status data collection is an opt-in process, meaning that there is almost certainly underreporting in the data we have.

Gender Identity

Table 4. OHA Workforce by Gender Identity

<i>Gender (binary)</i>	FY 2025		FY 2026		Change	
	N	%	N	%	N	% Points
<i>Men</i>	2,285	38.06	2,341	38.43	56	0.4
<i>Women</i>	3,661	60.98	3,693	60.63	32	-0.3
<i>Nonbinary</i>	54	0.9	54	0.89	0	0.0

The percentage of women, non-binary, and men employees in OHA has seen small changes in the last two years, with a decrease for Women of .3 percentage points.

EEO Classification Group

The percentage of employees by EEO Classification Group ([Table D-10.1](#) in Appendix D-10) in OHA has remained relatively the same in the last two years except for the Paraprofessionals and Admin Support classifications.

Generation (age)

There was an 1% increase over the last two years in of Generation Z hires (age 27 or less). There are similar percentages of employees of the Millennial generation (4.59%) and those of Generation X (39.47%). The percentage of older employees age 60+ decreased by 1.9% from 2025 ([Table D-10.1](#) in Appendix D-10).

Supervisors

When reviewing supervisory data, it is helpful to consider the non-supervisory manager positions as a potential pipeline for internal employees to promote to supervisory manager positions in the future. For this reason, this report includes three categories of supervisory status (Figure 2 and [Table D-10.3](#) in Appendix D-10). Eighty one percent (81.76%) of the workforce are not managers or supervisors. This has not changed much the last two years (81.23% in 2025 and 81.76% in 2026). The percentage of non-supervisory managers also has not changed much over the last two

years (9.38% in 2025 and 9% in 2026). The percentage of supervisory managers has remained very similar as well (9.39% in 2025 and 9.24% in 2026).

Figure 2 Supervisory Status by Race and Ethnicity in 2026

Figure 2 shows supervisory status by race and ethnicity in 2026. There have not been significant changes in promotions to supervisory status for most race and ethnic categories ([Appendix Table D-10.3](#)). However, notably, there are now four individuals who identify as Native Hawaiian & Pacific Islander that are supervisors in 2026. In the previous biennium ending in FY 2024, there were no supervisors who identified as Native Hawaiian & Pacific Islander.

The proportion of White supervisory managers (75.2% in 2026) is higher than the proportion of White non-supervisory managers (61.6% in 2026) or non-managers (60.4% in 2026) in the OHA workforce. We do not observe similar differences across all groups. Figure 3 shows the proportion of supervisory managers by Race and Ethnicity compared to the entire workforce.

Figure 3 Proportion of OHA Supervisory Managers by Race and Ethnicity compared to Entire Workforce in 2025 and 2026.

Employees in each job classification

Since the date of the last publication of OHA's Affirmative Action Plan in 2024, the Agency has seen quite a bit of variation in hires and expansion in some areas (Figure 4).

Movement over time: Hires, promotions, and separations

Figure 4 OHA Workforce Trends Overall.

Promotions

OHA's Workforce Demographics by Supervisory Status for 2025 and 2026 are detailed in [Table D-10.3](#) 1 in Appendix D-10. Below is a narrative summary of changes over time for the last biennium by managerial status and selected demographic data.

Of the 281 promotions that occurred in 2025:

- 78 were Black & African American, Indigenous and People of Color (29% of those who reported their race)
- 7 promotions were People with Disabilities (2.5%; no individuals with Disabilities were promoted into a supervisory management position in the last biennium)
- 11 were Veterans (4%)
 - 170 identified as Women or nonbinary (60.5%)
- 216 promoted in non-managerial positions (76.9%)

Of the 137 promotions that occurred in 2026:2

- 37 were Black & African American, Indigenous and People of Color (27%)
- 0 promotions were People with Disabilities (no individuals with Disabilities were promoted into a supervisory management position in the last biennium)
- 7 were Veterans (5.1%)
 - 72 identified as Women or nonbinary (52.6%)
- 97 promoted in non-managerial positions (69.9%)

Separations
