The Children's System of Care Data Dashboard illustrates an over-representation of Black or African American youth as well as American Indian / Alaskan Native youth receiving services across the full continuum of behavioral health treatment. At the same time, Hispanic youth are under-represented in the degree to which they receive these services. Statistics show youth of color are among those most negatively impacted by inadequate social determinants of health supports, thus experiencing poverty, racism, institutionalized discrimination, educational disruption, and other barriers to healthcare access. Children who qualify for residential psychiatric and SUD services are struggling with the most acute and complex behavioral health conditions. Those in state custody also experience the absence of safe parents and a familiar, stable home. This combination of factors results in a disproportionate number of children and adolescents from minoritized groups placed in residential treatment programs or in need of multi-system services to ensure access for an equitable opportunity to thrive.

Though there are numerous and complex reasons behind these disparities, OHA's efforts to right-size the residential treatment component of the behavioral health system for youth will relieve pressures up and down the continuum. Creating more capacity for psychiatric residential treatment

across our state, nearer to the homes and communities of the families that need it, decreases the current inequitable burden on disadvantaged families by reducing travel needed to participate in their child's treatment. Additionally, the availability of more localized treatment facilities allows hiring of local staff and relationship building between the community and the facility.

The current system for disbursing funding for adult residential services is dominated by bureaucratic processes tailored for large organizations with the resources to effectively compete for funding. This system places culturally and linguistically diverse providers and smaller organizations at a disadvantage.

The Behavioral Health Residential+ Facility Study ("Res+ Study") documented a significant need to expand services across the adult behavioral health continuum, especially for residential SUD facilities and withdrawal management services throughout the identified Trauma System Areas (TSAs), which are defined under OAR 333-200-0040 and described as the establishment of "seven trauma system areas across the state utilizing county lines, zip codes, township and range, and roads for the purpose of developing, implementing and monitoring the trauma system and not for the purpose of restricting patient referrals." Support to TSA communities across the state builds upon the Res+ Study findings to determine and share their most pressing residential treatment capacity needs, so that OHA can distribute funding accordingly – prioritizing smaller, culturally, and linguistically responsive organizations. This approach will advance OHA's goal to redistribute power by investing funds back into communities in the ways they have identified best meets the needs of their unique populations.

3. Accountability to Racially Equitable Outcomes

a. For POPs that are improving or expanding existing programs, how does the agency currently track quantitative and/or qualitative data to evaluate program outcomes, including by race and ethnicity? Will this POP improve the evaluation of outcomes by race/ethnicity to improve program evaluation and administration?

This POP provides funding for the expansion of youth-serving residential treatment services. Currently, OHA utilizes data from the Medicaid Management Information System (MMIS) as one source of race and ethnicity data, as well as data compiled under the Children's System of Care Data Dashboard, and a centralized referral system is currently under development for intensive services within the youth system, including day treatment and residential care. There are multiple key indicators which will be evaluated to determine the success of this proposal. First, OHA will monitor the number of beds added to the youth system, as well as the impact on wait times for care and the impact on other parts of the youth-serving system, including Temporary Lodging and emergency department "boarding" (ED stay longer than 24 hours) for mental health crises. Additionally, a focus on expansion of smaller, home-like programs across the state is designed to ease the burden on youth and families who have to travel to the I-5 corridor for services, and OHA is interested in the number of youth served closer to their home community, youth and family satisfaction with services, and the racial and ethnic makeup of youth served.

For the youth system, measurements of success include:

- Increased number of beds/units available and accessible in licensed residential and SUD treatment and housing access for adults, and PRTF for youth throughout the state
- Reduction in the number of days on a waitlist for referrals to be admitted into residential SUD and PRTF treatment
- Reduced boarding of youth (stays longer than 24 hours) in hospital emergency rooms for significant mental health concerns

- Decreased travel distances for families to attend therapy and make in-person visits

For the adult system, the following data points will be utilized:

- The number of culturally, linguistically, developmentally responsive, smaller organizations that are awarded funding.
- The level and type of technical support provided to culturally and linguistically diverse, developmentally responsive, smaller organizations.
- The number of successful project completions – fewer project withdrawals.
- Conducting satisfaction surveys with community organizations about their experience in working with us with this new collaborative planning approach to disbursing funding and technical support.

b. For POPs that are creating new programs, how will the agency track quantitative and/or qualitative data to evaluate program outcomes, including by race/ethnicity for the purpose of evaluating and improving program implementation to advance racial equity.

Verbiage included in the Grant Agreement required reporting template will encompass REAL D and SOGI data.

4. Equitable Administration

In administering resources in this POP, how will you create contracting and/or granting opportunities for culturally specific and culturally responsive community-based organizations and disadvantaged, minority, women, and emerging small businesses?

The CFBH unit will develop and issue a request for proposals (RFP) with an explicit requirement that applications discuss how they will meet the standards of an anti-racist approach to their work as well as culturally and linguistically appropriate treatment. Applications that demonstrate higher levels of cultural humility and deeper proficiency with anti-racist values will be scored more favorably.

In contracts, as well as reporting expectations of contract recipients, OHA requires inclusion of REAL D and SOGI demographic information. This information enables us to track and analyze services provided and equitable access for marginalized communities for specific impacts to improve health equity.

In addition, OHA requires that our youth-serving contractors provide specific strategies and action steps to address equity goals in their quality improvement plans under each contract, and we make a point of regularly discussing progress toward these goals in regular contract meetings.

Support to TSA communities across the state in building upon the Res+ Study findings to determine and share their most pressing adult-serving residential treatment capacity needs, so that OHA can distribute funding accordingly – prioritizing smaller, culturally, and linguistically responsive organizations. This approach will advance OHA's goal to redistribute power by investing funds back into community in a way they have identified best meets the needs of their unique populations.

Oregon Health Authority
2025-27 Policy Package

Division:	Behavioral Health Division, Agency Operations Division
Program:	Behavioral Health Service Delivery, OHA Office of Data Strategy and Operations
Policy package title:	Behavioral Health Data Requirements
Policy package number:	553
Related legislation:	None

Summary statement:

OHA aims to enhance the coordination of behavioral health services and improve health outcomes by addressing current data management issues. The proposal seeks resources to advance the OHA Data Environment, which will integrate siloed data systems, streamline administrative processes, and enable comprehensive data sharing and analysis. This will involve hiring new staff and contractors to manage technical requirements, data integration, reporting, and data quality. The policy package focuses on promoting health equity by enabling data-informed decisions, improving service delivery, engaging communities, and increasing operational efficiency. The initiative aligns with OHA's strategic priorities, aiming to reduce health disparities and enhance access to behavioral health services, ultimately fostering a more responsive and effective health care system in Oregon.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$722,357**	**$1,277,158**	**$5,091,750**	**$7,091,265**	**8**	**7.00**

Oregon Health Authority: 2025-27 Policy Package

Purpose

1. What problem is OHA trying to fix or solve?

OHA is currently unable to provide coordination of care or measurement of outcomes and equitable delivery across behavioral health services for people in Oregon due to the inability to efficiently connect, share and report data. Emerging opportunities to improve access to treatment and recovery, such as through investments from the implementation of Ballot Measure 110 through Senate Bill 755 (2021), are thwarted by difficulties in tracking, reporting and analyzing data. Aid and Assist services are challenged by the inability to integrate court data with Oregon State Hospital records and other needed data. Overdose prevention, treatment and recovery programs rely on disjointed data that do not represent the full spectrum of client care or allow for measuring outcomes nor effectiveness of interventions. Furthermore, if we do not better connect data, OHA is prone to collecting redundant data from our behavioral health providers and partners because there is a lack of visibility across programs regarding what information already exists. This redundancy wastes time and resources, adds to administrative burden, and devalues our relationship with community and clients. Siloed data makes it challenging to implement human-centered, data-informed solutions such as population health management and the identification and elimination of health inequities. These critical data issues must be addressed to ensure investments are optimized and to demonstrate Oregon's commitment to improving behavioral health services.

Implementation of key OHA behavioral health initiatives are dependent on the maturation of the OHA Data Environment (ODE) and the establishment of data management structures and solutions to facilitate decision-making processes related to the integration, analysis and sharing of behavioral health data. This will also assist in improvements in reporting and analytics through automated dashboards, expanded analytics tools, and accessible self-service data for programs. OHA must invest in integrated and interoperable data solutions that enable sharing and access to health information across various platforms while maintaining strict privacy and security standards. These

efforts necessitate a dedicated investment by the legislature and will not significantly advance in the coming years if not funded.

The Behavioral Health Division needs improved data resources to equitably address delivery of services and make human-centered, data-informed decisions to improve the outcomes of people in Oregon through Measure 110, Aid and Assist/Mink-Bowman, Overdose Response, and other programs and priorities. Currently, there are siloed systems that hold data surrounding behavioral health and the goal of this POP is to reduce administrative burden, increase data quality, and whole picture accessibility.

Integrating siloed data systems will contribute to streamlining administrative processes. This will make it easier for health care providers to focus on patient care rather than data collection, potentially improving access to and quality of services for underserved populations. Improved data resources will lead to better understanding of behavioral health needs across different demographic groups. This will help in targeting interventions and services more effectively to address disparities and improve health outcomes. A comprehensive view of behavioral health data will enable policymakers and health care providers to identify gaps in services and disparities in access to care. This holistic approach supports efforts to allocate resources more equitably and ensure that all populations receive the necessary support.

2. What would this policy package buy and how and when would it be implemented?

This policy package includes resources needed to meet the data requirements for transforming behavioral health by continuing the essential work of expanding and enhancing ODE to incorporate new data integrations from other state agencies and more agency-managed data sets. The request also includes resources for contracting support to advance data management capabilities that are foundational in ensuring the success of ODE expansion. This work has already begun and is

expected to continue through the biennium. The implementation timeline will be improved by a blended approach of vendor consulting, new positions, and restructure of the current staff supporting ODE.

Specifically, a new manager and several staff must be brought on to manage the technical requirements, data sharing agreements, reporting infrastructure and design, development and testing coordination, architecting, ingestion and ongoing management of additional datasets (specifically data from Public Health Division related to the overdose crisis) as well as the implementation of data quality and management tools that will support an integrated data environment. These tools include, but are not limited to, those that support the following functions: data indexing, data quality, data cataloging and inventory management, and analytics.

Staff positions required for the Compass Team supporting the ODE include:

- ODE Manager (IT Manager 1)
- ODE Data Integrations Architect (Information Systems Specialist 8)
- ODE Complex Reporting Analyst (Research Analyst 4)
- Data Initiatives Coordinator (Operations and Policy Analyst 2)

Staff positions required for the OIS Team(s) supporting the ODE include:

- Database Engineers (two Information Systems Specialist 8s)
- Cloud Architect (Information Systems Specialist 8)
- Sr. Testing Specialist (Information Systems Specialist 7)

The Compass staffing requested will create a team dedicated to ODE and provide structure for the four positions currently supporting these efforts. The Compass program expects recruiting for higher level ISS positions to be somewhat challenging and is exploring all options for adding the first three requested positions as quickly as possible. Additionally, Compass is preparing a recruitment to fill an

OPA3 vacancy that supports the project management of data integrations and provides business systems analysis to the Behavioral Health Division. Recruitment and onboarding are expected to take three to six months and will begin once securing position authority.

Additional funding is required to support data indexing tool licensing, contracted maintenance and ongoing support, and data architecting consultative services. The program team is committed to exploring all contracting approaches in parallel with staff recruitments as part of a blended approach to rapid implementation. The procurement activities are expected to take three to twelve months and will begin once budget figures are confirmed after *sine die* of the 2025 legislative session.

To advance data management capabilities foundational to the operations of ODE, the following data management related resources are required:

- Training, including planning and implementation resources to develop and deliver a data fluency program for agency staff, as well as data management and modernization related trainings. These trainings will include those aimed at improving the ability of agency staff to communicate data and support external partners in use of OHA-managed data. Trainings are expected to begin in October 2025.
- Planning and implementation of Data Council-prioritized data management initiatives. This will include initiatives relating to data integration and architecture, further defining and establishing data management structures including workgroups, and establishing standardized analytical practices and environments for the agency. Specific data tools and solutions may be utilized to advance data management practices such as inventorying and cataloging, analysis and reporting, and indexing. This work is currently underway and will continue into the next biennium. To maintain momentum and expand across the agency, additional resources are needed.
- Establishing and implementing community data rights framework. This will include the development of standards and processes to ensure community perspective is incorporated in

OHA's data management practice, as well as alignment of REALD/SOGI data policies with agency data management and the development of an OHA Open Data publication plan. Establishing and implementing the framework is expected to begin in October 2025.

- Identifying inequities and monitoring policy impacts on reducing inequities through advanced reporting and analytical capabilities of modernized data environments.

3. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes? How does this policy package further OHA's mission and align with its strategic plan?

The proposal aims to enhance health equity by addressing data gaps hindering behavioral health service delivery and informed decision-making. It focuses on several impacts:

- **Improved Service Delivery**: By expanding the Behavioral Health Data Environment, OHA can coordinate care across programs like Measure 110, Aid and Assist/Mink-Bowman, and Overdose Response, ensuring equitable access to health care.
- **Data-Informed Decision-Making**: Mature data management structures will facilitate decision-making processes related to integration, analysis, and sharing, enabling OHA to identify and address health inequities effectively.
- **Community Engagement and Transparency**: Establishing a community data rights framework incorporates community perspectives into data management, empowering communities to participate in decision-making and hold OHA accountable.
- **Operational Efficiency**: Streamlining data processes reduces manual collection and administrative burdens, allowing OHA to focus resources on delivering high-quality behavioral health services efficiently.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

The policy package directly supports OHA's mission to ensuring all people and communities can achieve optimum physical, mental, and social well-being through partnerships, prevention, and access to quality, affordable health care by enhancing the delivery of behavioral health services. By reducing administrative burden and improving data quality, the package aims to foster a more responsive and effective health care system that prioritizes equitable outcomes.

OHA's strategic priorities include reducing health disparities, enhancing data-driven decision-making, and promoting access to behavioral health services. The policy package aligns with these priorities by addressing systemic barriers (like administrative inefficiencies and data silos) that hinder equitable access and outcomes for people in Oregon. In particular, this policy package aligns with the following goals of OHA's Strategic Plan:

- **Access to affordable care for all**: Ensure 100% of people in Oregon have easy access to affordable health care, prioritizing communities disproportionately harmed by racism, discrimination, and other forms of oppression.
- **Transform behavioral health**: Build a behavioral health system that works for every child, teen, adult and family who are experiencing a mental health or substance use issue by expanding integrated, coordinated, culturally responsive behavioral health services when and where people need them, guided by people with lived experience.
- **Build OHA's internal capacity and commitment to eliminate health inequity**: Provide OHA staff the training, support and tools necessary to partner with communities and recognize, rectify and reconcile the racism and other forms of discrimination and oppression that undermine the health, well-being and opportunities of people across Oregon.

Integrating siloed systems and improving data quality can be complex and resource intensive. There may be challenges in terms of funding, technological infrastructure, and stakeholder cooperation,

which could delay or hinder the intended improvements. Consolidating data from multiple sources could raise concerns about privacy and security. Safeguards must be in place to protect sensitive information, especially for vulnerable populations who may already face distrust in health care systems. Efforts should be made to ensure equitable access to information and services across all communities.

Overall, the proposal is crucial for advancing health equity in Oregon by improving access to services, promoting data-informed decisions, engaging communities, and enhancing operational efficiency within OHA.

4. What are the long-term desired outcomes?

Outcomes of the proposal include the following:

- Improved Service Delivery: By expanding the Oregon Data Environment (ODE), OHA can coordinate care across programs like Measure 110, Aid and Assist/Mink-Bowman, and Overdose Response, ensuring more equitable access to health care.
- Data-Informed Decision-Making: Mature data management structures will facilitate decision-making processes related to integration, analysis, and sharing, enabling OHA to identify and address health inequities effectively.
- Community Engagement and Transparency: Establishing a community data rights framework incorporates community perspectives into data management, empowering communities to participate in decision-making and hold OHA accountable.
- Operational Efficiency: Streamlining data processes reduces manual collection and administrative burdens, allowing OHA to focus resources on delivering high-quality behavioral health services efficiently.

Overall, the proposal is crucial for advancing health equity in Oregon by improving access to services, promoting data-informed decisions, engaging communities, and enhancing operational efficiency within OHA.

5. How will OHA measure the impacts on health inequities of this policy package?

Efforts covered in this policy package are foundational to measuring outcomes and impacts on health inequities across services delivered. Investment in the data systems and architecture will vastly improve OHA's ability to measure the health equity outcomes of policies and programs beyond our current siloed analysis and make human-centered, data-informed decisions. Additionally, the program will implement robust monitoring and evaluation frameworks to assess the impact of data integration on health equity outcomes. Regular feedback loops can help identify and address any emerging disparities or unintended consequences promptly.

Data infrastructure built with this policy package funding will also help us actively work to reduce provider administrative burden. In meetings with providers the data-related administrative burden priorities have been identified as improving ease of reporting and eliminating required duplicative reporting. Currently providers must submit data to our Measures and Outcomes Tracking System and may also have to submit multiple excel spreadsheets which require manual work (over 200 excel reporting templates were identified). Initial target will be to eliminate approximately 40 excel spreadsheet reports that were identified in our work with providers as containing duplicative data while we also look to reduce the remaining spreadsheet reporting. Administrative burden reduction also has a health equity impact as current burden levels are seen as a barrier to our efforts to attract and retain culturally appropriate providers.

6. What actions have occurred to resolve the issue prior to requesting a policy package?

Implemented in February 2023, the ODE (formerly known as the Behavioral Health Data Warehouse) began as a central repository for all of Oregon's behavioral health data and expanded to include enterprise data from the Medicaid and Integrated Eligibility systems. ODE interfaces with program applications and databases, and provides comprehensive analysis and reporting for state, federal, and ad hoc data requests. The ODE has proven its ability to scale to meet enterprise needs; and supports data partnerships with the Public Health Division, Oregon State Hospital, and external agencies such as Oregon Judicial Department.

REALD/SOGI data integration has already begun and will continue over the next year to comprehensively support health equity goals and provide transparency on the success and progress of critical initiatives such as M110 and 988 Mobile Crisis Services. Work efforts currently prioritized for upcoming development include the integration of Public Health Division -managed overdose data, integration of the Certification & Licensing Information Collection System (CLICS), a data inventory search tool, and expansion of Oregon Judicial Department data to meet the Mink-Bowman/Aid & Assist community restoration requirements. New data requirements and integration demands are increasing daily, and the current staffing structure has limited the ability to rapidly scale up the data architecture, reporting infrastructure, and long-term strategy planning.

Establishing mature data management is foundational in ensuring the success of behavioral health data improvement through the expansion and enhancement of the ODE. In order to effectively manage the expansion of ODE to address key priorities such as M110 data collection and reporting, improving data to inform Aid & Assist, and supporting overdose related reporting and analytics, data management of the ODE must be organized and governed. In recent years, OHA has begun investing in and consequently initiating efforts to mature its data management and add consistency

across the Agency. Currently, agency data management is ad hoc with limited standardization. This determination of overall OHA data management maturity was made through a comprehensive review and documentation of data use cases and pain points in the agency in early 2023. Through this assessment, it was evident that data handling and decisions are largely siloed across the agency, processes are reliant on data set and/or system experts and processes and often unpredictable. This siloing also prevents OHA from having data transparency with the communities it serves and engaging with them in empowerment of their data. Additionally, the absence of an established data management strategy creates risk for bias in how data are collected and reported, reduces transparency in our programming and can be costly in requiring rework of low-quality information. This request includes resources required to advance essential data management functions in the agency, building off foundational assessment, planning and initiating work done to date.

7. What alternatives were considered and what were the reasons for rejecting them?

The alternative to this policy package is continuing our current approach of manual data connections as reports and analysis are needed. This approach is rejected as the path forward as it is staff intensive, prone to inconsistencies between reports as different staff may work on the data connections each report, and unable to support our goal of eliminating health inequities due to its inability to connect the volume of data generated across OHA programs.

Another alternative considered was using contract resources in place of OIS staff for the technology efforts. At this time, adding internal staff to directly support this effort is seen as the most cost effective and sustainable due to length of effort and ability to build internal expertise.

8. **What other agencies, programs, community partners or stakeholders are collaborating on this policy package?**

   This proposal is a collaboration between the Behavioral Health Division, the Office of Data Strategy and Operations, and the Office of Information Systems.

9. **Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.**

   No changes or new statutes required.

10. **What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?**

    This proposal would improve OHA's capacity for data sharing with other agencies.

11. **Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.**

    This proposal supports the recommendations from the 2019 OHA Behavioral Health Integration Audit related to investment in data collection and storage systems to improve outcome reporting.

Staffing and fiscal impact

Implementation date(s): July 1, 2025

End date (if applicable): Ongoing

12. What assumptions affect the pricing of this policy package?

Assumptions:

- Cost of professional services is assumed to be in alignment with other comparable efforts.
- Costs of staffing is assumed to be relatively consistent.
- Internal staffing is assumed to be less expensive than external contract resources.
- Resources (both internal to the agency and externally/vendors) with the necessary skills will be available.

13. Will there be new responsibilities for OHA and/or Shared Services? Specify which programs and describe their new responsibilities.

As ODE expands to integrate more datasets, Compass staff are needed to support technical writing, enhanced data accessibility for programs, and the training needs of the broader modernization of ODE efforts. As ODE continues to scale up, the responsibilities related to data access, management, and governance increases exponentially and exceeds current staffing levels. Staffing responsibilities include managing the technical requirements, reporting infrastructure and design, development and testing coordination, and ingestion and ongoing management of ODE datasets. OIS supports the technical development and architectural aspects of the ODE and needs to scale staff appropriately to support this effort.

14. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No. However, continued expansion of ODE will provide the capability to measure changes in services provided to population groups and enable human-centered, data-informed decisions for service delivery which may change services in a more equitable manner.

15. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This POP request is for the resources needed to meet the data requirements for transforming BH by continuing the essential work of expanding and enhancing ODE to incorporate new data integrations from other state agencies and more agency-managed data sets.

New staff must be brought on to manage the technical requirements, data sharing agreements, reporting infrastructure and design, development and testing coordination, architecting, ingestion and ongoing management of additional datasets as well as the implementation of data quality and management tools that will support an integrated data environment.

Staff positions required for the Compass Team supporting the ODE include:

- **ODE Manager (IT Manager 1)** | plan, organize, and manage diverse operations in regards to staff and projects. Evaluate current business processes and systems, implement and strategize budget on a state level, implement change to enhance ODE and its partners, and ensure efficiency amongst the team. This role would supervise the day to day of the ISS8, RA4, and OPA2 and ensure roles were defined and work was driven forward and deployed.
- **ODE Data Integrations Architect (Information Systems Specialist 8)** | planning, coordinating, build analysis, tech support for integrating data into ODE as it takes on more. Finding data/systems that would benefit being in ODE to decrease administrative burden and create a more wholistic view of what people need. Long term planning for taking ODE to where it has the potential to be.
- **ODE Complex Reporting Analyst (Research Analyst 4)** | will evaluate, analyze, and run reports from ODE, will be experts in the data, will help users by developing needed reports, train how to run reports, understand how it all fits together in a comprehensive way. Will research and stay up to date on new data coming in and how it fits.

- **Data Initiatives Coordinator (Operations and Policy Analyst 2)** | coordinates the database and helps organize its build out, collaborating with the RA4 & ISS8 with day-to-day work, running basic reports, checking in with the OIS team on where things are, updating them with bugs, data entry when needed into ODE, validating data as it is streamlined into ODE, and helps with improvements to ODE as it grows.

Staff positions required for the OIS Team(s) supporting the ODE include:

- **Database Engineers (two Information Systems Specialist 8s)** | will work with IT manager 1 and ISS8 to build ODE and its database, ensuring things are connected while ensuring access is not compromised.
- **Cloud Architect (Information Systems Specialist 8)** | working with the database engineer, IT manager 1, and ISS8 to build out the database into the cloud to protect ODE's data and its feeding systems/programs.
- **Sr. Testing Specialist (Information Systems Specialist 7)** | to test the database and cloud support functions to ensure bugs and work is vetted.
- Data indexing tool licensing, maintenance and ongoing support and data architecting consultative services.

16. What are the start-up and one-time costs?

Not applicable.

17. What are the ongoing costs?

The ongoing costs include the permanent staff listed above and cloud data storage and software tools.

18. What are the potential savings?

This POP will leverage federal funding match to fund positions, contractors, and licensing costs. Additionally, there are potential long-term savings by reducing administrative burden, thus allowing reporting agencies to increase effectiveness within the resources they have. This will lead to system improvement, whereby individuals will receive higher quality, more effective care, thus reducing health inequities and a subsequent decrease in overall costs to Oregon's health care system.

19. What are the sources of funding and the funding split for each one?

- Improving Medicaid Enterprise Data (IMED) Implementation Advanced Planning Document (IAPD) at 90 percent Medicaid Federal Funds and 10 percent General Fund.
- Compass Modernization IAPD 75 percent Medicaid Federal Funds and 25 percent General Fund.

Behavioral Health Data Requirements
Policy Package #553

1. Outcomes

What outcomes will this POP achieve? Please be specific and connect the outcomes to the Governor's priorities in homelessness, behavioral health, or education.

Implementation of key Behavioral Health initiatives are dependent on the maturation of the OHA Data Environment (ODE). This investment will result in process improvements that reduce administrative burden and strengthen available reporting and analytics. OHA will measure the success of this investment by:

Benefit	Measurement
Reduce administrative burden among behavioral health providers	• Reduce excel-based reporting by 20%[1]
Human-centered, data-informed decision making	• Establish automated and self-service analytics dashboards for 75% of priority initiatives pursued by the Behavioral Health Division.
Expanded analytics tools	• Promote 'bring your own tool' flexibility for analysts by implementing 2 new analytic offerings
Holistic Reports (seeing disparities or inconsistencies amongst providers/agencies through collected data)	• Increase the percentage of automated dashboards produced using ODE in which qualitative data is included by 25% • Integrate data from Public Health data sources to improve overdose analyses

This investment is tailored to the critical data challenges within Oregon's behavioral health system. These outcomes directly support the Governor's priority of Behavioral Health. ODE is a critical support in measuring whether "every Oregonian [has] access to healthcare, including behavioral health services and supports—no matter where they live or what they can afford."

OHA must invest in integrated and interoperable data solutions that enable sharing and access to health information across various platforms while supporting strict privacy and security standards.

2. Racial Equity Strategy

What are the racial disparities in the population that are intended to be served through this program (e.g., racial disparities in substance use treatment access). How will this POP, including the implementation of the POP, address these disparities and equitably serve Oregonians?

This investment is aligned with Oregon's Diversity, Equity and Inclusion Action Plan[1] which cites "Disaggregated Data as a Lever for Change" among its strategies. OHA and the Behavioral Health Division recognize that administrative data are lacking in representation and visibility for all people in Oregon. This POP looks to improve representation in administrative data by tapping into different sources of information that exist in different information systems. Over time this will include integrating new types of data sources including community narratives (meaning qualitative data), to provide context to quantitative data. Improved data collection and connectivity will allow OHA to respond to racial disparities and measure the equitable delivery of services.
The successes of several key initiatives—and their objectives to reduce racial disparities—rely on the availability of high-quality and wide-ranging information. This includes:

[1] https://www.oregon.gov/das/Docs/DEI_Action_Plan_2021.pdf#page=23

Key Initiative	Disparities
Measure 110	Racial disparities in access to substance use treatment
Aid and Assist/Mink-Bowman	Racial disparities in the aid and assist population Racial disparities in length of stay and discharge planning
Overdose Response	Racial disparities in access to substance use treatment Racial disparities in overdose deaths
Health Related Social Needs	Racial disparities in access to housing supports Racial disparities in access to nutrition supports

3. Accountability to Racially Equitable Outcomes

a. For POPs that are improving or expanding existing programs, how does the agency currently track quantitative and/or qualitative data to evaluate program outcomes, including by race and ethnicity? Will this POP improve the evaluation of outcomes by race/ethnicity to improve program evaluation and administration?

This investment will improve the evaluation of outcomes by race/ethnicity for Behavioral Health programs. Currently, OHA uses proxy measures to assess changes in outcomes resulting from updates to Behavioral Health policy. As an example, changes in quality health metrics may be used to show how well the Medicaid program has achieved outcomes such as

- Improving care
- Making quality care accessible
- Eliminating health disparities; and

- Curbing the rising cost of health care. While disaggregated by race and ethnicity, these metrics are primarily based on Medicaid claims and only gives a snapshot of the Oregon population.

To measure equitable service delivery OHA must join information from program records with the best available demographic data. This investment will improve the Behavioral Health Division's ability to make direct measurements (instead of proxy measurements) on mental health- and substance use-related outcomes using both quantitative and qualitative data which underpins all OHA equity work.

4. Equitable Administration

In administering resources in this POP, how will you create contracting and/or granting opportunities for culturally specific and culturally responsive community-based organizations and disadvantaged, minority, women, and emerging small businesses?

This POP would not directly result in contracts or granting opportunities. The investment this POP requests is limited to the "personal services" and "services and supplies" associated with staff. There will be limited contracting opportunities and no granting opportunities resulting from this investment. However, the enhanced data and tools created by this POP will support the agency's efforts in creating contracting and grant opportunities by providing accurate, detailed, and timely data needed for identifying and monitoring culturally specific and culturally responsive community-based organizations and disadvantaged, minority, women, and emerging small businesses.

Oregon Health Authority
2025-27 Policy Package

Division:	Medicaid
Program:	Medicaid Behavioral Health
Policy package title:	Medicaid Behavioral Health (BH) Adult
Policy package number:	554
Related legislation:	Not applicable

Summary statement:

Reforms and expands Home and Community-Based Services (HCBS) for people with behavioral health needs, aligning with legislative mandates, CMS directives, and audit findings. Currently, processes facilitating access to HCBS are fragmented, leading to service gaps and inequities, especially for individuals with co-occurring physical and behavioral health needs. OHA and the Oregon Department of Human Services (ODHS) collaborated on this investment to improve HCBS delivery for people with disabilities and complex behavioral health needs. This POP improves quality assurance, oversight, regional coordination and case management. It also provides technical assistance and training to providers and expands culturally and linguistically appropriate respite care services to support caregivers and stabilize crises. Without funding, OHA risks perpetuating disparities, hindering coordination, training, crisis support, and program expansion, compromising service effectiveness and equity.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$13,597,013**	**$20,602**	**$23,262,905**	**$36,880,520**	**21**	**15.75**

Purpose

1. **What problem is OHA trying to fix or solve?**

   Home and Community-Based Services (HCBS)
   Oregon Health Authority (OHA) is undergoing significant changes to its HCBS program based on legislative requests identifying the need to reduce barriers, increase access and streamline approval processes. Additionally, needed changes have been identified by the federal Center for Medicare & Medicaid Services (CMS) requirements for 2023 access to care rules, an internal audit, and the 2022 Ombuds Report. Currently, it is hard to access HCBS for people with behavioral health needs: processes are fragmented and lead to service gaps, inequities, and differential treatment for individuals with co-occurring physical and behavioral health needs. OHA and the Oregon Department of Human Services (ODHS) have collaborated to develop recommendations for improving HCBS delivery across all areas of the state. Needed operational improvements include cross-agency coordination and decision-making, data sharing, documentation standardization, training, care coordination models, assessment processes, regulatory frameworks, workforce development, and technical assistance.

   Respite Services
   One of the most requested and needed services is respite care for individuals struggling with mental health and substance use disorders (MH/SUD). OHA aims to obtain CMS waiver authority for respite services across the lifespan. The goal of such respite services is to ease caregiver stress and provide stability during crises, ensuring cultural and linguistic appropriateness and flexibility. Challenges to current access include limited options, workforce shortages, awareness gaps, and stigma.

Respite is foundational to a comprehensive service delivery model for individuals with behavioral health needs and related conditions. Respite is one of several services within a functional system of care. Aside from benefits to individuals, their families, and caregivers, respite also offers cost savings as it prevents the need for more expensive, out-of-home services like residential treatment or hospitalization.

The Institute for Innovation & Implementation created a set of core components to a comprehensive service array in systems of care: Mobile Crisis Response and Stabilization Services (MRSS), Intensive Care Coordination using Wraparound, Intensive In-Home Mental Health Treatment Services, Parent and Youth Peer Support, Respite Care, Flex Funds, Trauma-Specific Treatments and Trauma-Informed Systems, Specific Evidence-Informed and Promising Practices, and Telehealth Services. **Oregon is working on implementing all the listed components statewide except for respite.**

2. What would this policy package buy and how and when would it be implemented?

HCBS

OHA and ODHS, the two agencies responsible for HCBS, have partnered to develop recommendations for more responsive and cohesive processes across Oregon's HCBS ecosystem. This has required the use of existing staff and resources to act on short-term implementation projects at the risk to other assigned health care areas. Concurrently, long-term planning is underway to develop sustainable, cross-agency solutions that are responsive to the needs of HCBS recipients and internal and external partners. This POP outlines resources needed to bring the recommendations to fruition, sustain short-term project implementation and better position OHA for long-term planning in collaboration with ODHS. Several high-level timeframes have been identified to implement both short-term and long-term work. For example, American Rescue Plan Act (ARPA)

funds are currently being used to implement infrastructure and workforce expansion and improvements, access to and quality of care for consumers, and support for providers and community partners. ARPA funds are set to expire in March 2025, and ongoing maintenance, monitoring and oversight of these initiatives will be needed. Other regulations, such as the federal access to care rules, require a phased-in approach, spanning from 2026-2030, to comply with the final timeline. Additionally, these regulations require OHA and ODHS to work both independently and inter-dependently to assess system-wide impacts of implementation on Oregonians, as well as to evaluate existing staff and technology capacities to confirm implementation dates.

- Expand clinical and care coordination operations for Home and Community-Based Services statewide for Oregonians with complex behavioral health needs:
    - Adopt a consistent documentation system and related processes (i.e., a shared Enterprise-wide Case Management System) for program participant information throughout HCBS delivery to improve efficiencies of processes, reduce duplication, and promote program excellence.
    - Implement new assessment tools for level of care determination that are more comprehensive and understood by clinicians and providers.
    - Provide additional and consistent training and technical assistance on HCBS to members, agencies, providers, clinicians, community partners, and acute care and state hospitals.
    - Develop a regional care coordination team to work across all HCBS programs and local behavioral health systems to ensure Oregonians can access the HCBS program.
    - Build out a care coordination model at acute care hospitals, nursing facilities, and mental health residential settings to transition participants to the community on an expedited basis through HCBS, starting at the referral stage.
    - Review assessment and redetermination processes and policies continuously based on situations where participants are not receiving supports and services, need episodic care, and cycle through level of care changes related to crisis stabilization/maintenance periods.

  - Develop a shared regulatory and licensing framework that encompasses different types of facilities/settings in which people receive care, supports and services to reduce administrative burden and break down silos across agencies.
  - Evaluate and enhance OHA and ODHS workforce through trainings and other incentives.
  - Provide technical assistance to providers, clinicians, community partners, schools, and government agencies to promote streamlined access, assessment, and delivery of HCBS.
  - Review and improve processes that support transitions from Oregon State Hospital and other acute care hospital settings to the community through HCBS.
  - Develop succinct outcomes-based metrics across HCBS program components.
- Add staff to ensure compliance with federal requirements and expansion of HCBS programs between OHA and ODHS, coordinate the development of a case management system while ensuring its seamless implementation within the enterprise framework, and coordinate with the Nine Federally Recognized Tribes of Oregon to facilitate equitable access to 1915(i) HCBS services.
- Develop rate-setting methodologies to ensure timely and appropriate payment to providers.
  - Resources for HCBS Level of Care assessment tool development for Oregon's adult population ages 18+.
  - Case management system development funds to align with Office of Development Disabilities Services (ODDS) and Aging and People with Disabilities (APD) systems and technical staff support.

Respite Services

- Develop and implement a comprehensive array of respite services. These services could result in a reduction in caregiver stress, decreased caregiver/provider turnover, provision of a safe and neutral setting for individuals who need sustained stability in their behavioral health condition,

placement stability, family preservation, reduction in utilization of higher cost services, and preservation of people remaining in their own homes and communities.

- Support CCOs in developing respite care options through various mechanisms, including direct billing through specific Medicaid codes, inclusion through In Lieu of Services (ILOS) (which has been submitted to CMS for 2025 enactment), and utilization of global budget funds to channel back to the community through specific mechanisms such as (Health- Related Services (HRS), Supporting Health for All through Reinvestment (SHARE) to meet this need.
- Add respite care to comport with the Governor's Executive Order 18-01: Building Oregon's commitment to addiction prevention, treatment, and recovery priorities, setting deadlines for statutory requirements, and declaring a health crisis.
- Two positions to develop a 1915(c) or 1115 Demonstration waiver and operationalize the program in coordination with the Behavioral Health Division and community partners.

3. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes? How does this policy package further OHA's mission and align with its strategic plan?

By enhancing Home and Community-Based Services (HCBS) programs, the policy will streamline access and improve coordination across OHA and ODHS (and other agencies?) to address fragmented processes and operational silos. By creating a more cohesive system, the policy will reduce these barriers and ensure that individuals with behavioral health needs, including those with co-occurring mental health and substance use needs, receive timely, consistent and comprehensive

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

support. This will contribute to more equitable health outcomes by leveling the playing field in accessing necessary services and reducing the impact of systemic inequities.

In addition, the expansion of respite services under this policy option package is crucial for addressing caregiver burnout and providing essential breaks for individuals with MH/SUD. These services are designed to be culturally and linguistically appropriate, meeting diverse needs and potentially reducing the stigma associated with seeking care. By enhancing availability and promoting awareness, particularly in underserved rural areas and other geographic areas facing workforce shortages, the policy will increase equity in access to supportive care options.

In terms of aligning with OHA's mission and strategic plan, this policy package directly supports OHA's goals of improving health outcomes and reducing health disparities across Oregon. The burden of caregiving is particularly high for communities of color and other groups experiencing systemic and structural racism, as well as disparities in health access and outcomes. By addressing the specific needs of individuals with mental health and substance use disorders (MH/SUD) through improvements in Home and Community-Based Services (HCBS) and the expansion of respite care, the policy package reinforces OHA's commitment to comprehensive, holistic, person-centered care.

However, potential challenges and considerations include ensuring that the policy implementation effectively reaches all populations, particularly those historically marginalized or underserved. Addressing workforce shortages and ensuring culturally competent care delivery will be critical in achieving equitable outcomes. Furthermore, ongoing evaluation and adjustment of the policy's impact on health equity metrics will be necessary to ensure that it effectively addresses disparities and promotes equitable health outcomes as intended.

Quantifying results

4. What are the long-term desired outcomes?

The ultimate goal for HCBS is to facilitate the delivery of care, supports and services in less restrictive and community-based settings, helping people with complex behavioral health needs remain in their homes and communities and thrive. To do this, this POP aims to improve access and service quality for individuals with behavioral health (MH/SUD) needs. This includes expanding clinical and care coordination operations statewide. Key initiatives include adopting an enterprise case management system to streamline processes and enhance program excellence; providing comprehensive assessment tools and technical assistance to members, agencies, providers, clinicians, community partners, and acute care and state hospitals on HCBS; building a robust care coordination model across acute care hospitals, nursing facilities, and mental health settings aims to expedite transitions to community-based HCBS services; and continuous improvement in assessment processes, development of shared regulatory frameworks, enhancement of workforce capabilities, and development and implementation of outcomes-based metrics further support the goal of delivering integrated and effective HCBS across Oregon. These efforts are essential to reducing service gaps, promoting equity, and ensuring sustainable support for individuals and families in their communities.

Expanding Oregon's authority with CMS to offer respite services supports individuals with Mental Health/Substance Use Disorders (MH/SUD) and their caregivers. Long-term objectives include establishing a flexible array of respite options that reduce caregiver turnover, ensure placement stability, and support individuals in remaining in their homes and communities. By integrating respite care into Oregon's healthcare framework through collaborative efforts with Coordinated Care Organizations (CCOs) and other mechanisms, such as direct Medicaid billing and innovative funding approaches like In Lieu of Services (ILOS), the aim is to minimize reliance on higher-cost services

and foster sustainable community-based care solutions. Moreover, aligning respite services with statewide health priorities, as outlined in Executive Order 18-01, underscores Oregon's commitment to enhancing addiction prevention, treatment, and recovery initiatives. These efforts will bridge existing gaps in respite care access, enhance service delivery, and promote holistic support systems that effectively meet the diverse needs of individuals and families impacted by MH/SUD challenges in Oregon.

5. How will OHA measure the impacts on health inequities of this policy package?

OHA will work with the Division of Health Policy and Analytics to identify key metrics and data strategies. OHA will continue to refine efforts to build upon service delivery dashboards to inform where and how services are offered throughout the state, demonstrate where and how services are being received, where targeted outreach is necessary, and how training will be used to inform and guide providers to implement the entitled services.

How achieved

6. What actions have occurred to resolve the issue prior to requesting a policy package?

HCBS

- Reprioritized existing resources to improve access with limited success in sustainability of coverage and in ability to address systemic issues and infrastructure building
- Integrated community-identified strategies such as developing a community outreach team to help with community-led policy development.
- Sought technical assistance from federal partners around flexibilities across state plan and waiver such as 1915(i), 1915(k), and two 1115 Demonstration Waivers.

- Contracted with project management vendor to support ARPA, the internal Independent and Qualified Agent (IQA) audit, and other initiatives to ensure compliance with state law and federal regulation.
- Developed a roadmap to identify existing resources to leverage without compromising quality.
- Identified compliance pathways across HCBS authorities.
- Collaborated with ODHS as part of a cross-agency effort to enhance access for individuals with mental health needs. A majority of identified barriers, potential solutions, and key “themes” can be leveraged to impact the needs of children and adults.

Respite Services

The System of Care Advisory Council thoroughly studied respite and held focus groups with youth and families; this information is included in their March 2024 report. For many years, individuals and their families have repeatedly requested increased access to and availability of respite care for their needs. Respite care is needed to support individuals across the lifespan who experience SUD, mental health conditions, and crisis, to support the current needs and divert from acute care settings, as appropriate.

There has been a persistent lack of services for all types of respite, but especially for in-home, overnight and day unplanned and planned respite. The SOCAC report outlines recommendations for development, including ways that CCOs can utilize existing mechanisms to create more opportunities for respite. OHA has begun to reach out to CCOs to encourage their participation in building more respite.

7. What alternatives were considered and what were the reasons for rejecting them?

Continuing to operate the 1915(i) under the current authority with the current resources was considered. However, the status quo is fragmented, creating delays, barriers to access, and disjointed care coordination. In addition, an internal audit and the 2022 Ombuds report indicate Oregon risks operating the HCBS option outside of CMS regulations and expectations. Non-compliance with the CMS state plan and OARs could necessitate repaying already allocated funds, potentially resulting in an unbudgeted debit to state general funds. Respite care is not a current option for OHA; however, the SOCAC report and a 2019 report from contractor Alverez and Marsal identified this lack of service provision in Oregon as problematic. Respite services are a vital part of the behavioral health infrastructure that, when implemented appropriately, can solve concerns with primary caregiver burnout and alternative, higher-cost services, like ED visits and ED boarding. ED visits and boarding have been demonstrated to be overused and disproportionately accessed by communities of color in Oregon.

8. What other agencies, programs, community partners or stakeholders are collaborating on this policy package?

- ODHS: Inform the impact of the utilization of ODHS-licensed programs for people who qualify for behavioral health supports.
- Acute care (Behavioral Health and Medical) hospitals and Oregon State Hospital: Inform the impact of complex behavioral health needs on psychiatric/medical conditions, which could be avoided with the necessary supports.
- SRTF/Residential (SUD/Mental Health) providers: Inform the impact of resources on the ability to reintegrate into the least restrictive setting.
- Disabilities Rights Oregon, Oregon Law Center, System of Care Advisory Counsel and NAMI: Provide legal and advocacy support for people living with behavioral health disorders.

- Housing providers: Inform the impact of behavioral health needs on the ability of individuals to remain in the least restrictive settings/avoid evictions/houselessness.
- ACT/ICM/Outreach providers: Inform the impact of homelessness due to the lack of available HBSC supports.

9. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No, as written, this POP would require changes to Oregon's Medicaid state plan and requires a new waiver. New waivers do come with additional reporting and monitoring requirements.

10. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Changes to the Medicaid State Plan and a request for any CMS waiver would be considered a critical event, resulting in Tribal consultation. OARs would need to be developed, which would impact Program Integrity, the Division of Behavioral Health, and collaboration opportunities with ODHS.

11. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

Yes, additional positions and services are being requested as a result of a 2023 Internal Audit and a 2022 Ombuds report, described in section one above.

Staffing and fiscal impact

Implementation date(s): April 1, 2025

End date (if applicable): Ongoing

12. What assumptions affect the pricing of this policy package?

Additional staffing to impact service understanding and delivery. OHA anticipates increased utilization of services across the state. Additionally, adding a new service to the array of BH services will increase utilization and cost for services. OHA used the current behavioral health fee schedule and direction from the Oregon legislature through HB 5202 to increase behavioral health provider rates. Additionally, OHA leadership prioritized two 3.4 percent rate increases to all BH services identified on the BH fee schedule. One increase occurred on October 1, 2023, and the other increased on July 1, 2024. OHA Division of Medicaid, in collaboration with the Division of Behavioral Health, has engaged a contracted actuarial firm to review Medicaid rates for adult mental health residential settings. This work is underway but will have an impact on the overall budget for OHA for services to individuals with chronic, sever and persistent mental illness. Additionally, OHA will be reviewing behavioral health program rates for all open card members to improve access to care. OHA will work toward setting appropriate benchmarks that will adjust over time as the cost of providing services changes.

13. Will there be new responsibilities for OHA and/or Shared Services? Specify which programs and describe their new responsibilities.

Yes, Medicaid behavioral health will take on additional responsibility to inform, train, and track the new services being offered and addressed in the 2023 internal audit. Additional training, oversight, and guidance is being implemented and will need staffing resources to ensure appropriate

implementation and accountability. Additionally, standing up a 1915(c) or 1115 demonstration waiver requires additional reporting requirements, different from and more comprehensive than the 1915(i). The additional requirements will be necessary to comply with CMS expectations to define, report on, and remain budget neutral.

14. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

Yes, growth of the 1915(i) and respite care will result in additional Oregonians accessing appropriate services and supports. These additions will impact the Independent and Qualified Agent contract, required by CMS, to address functional needs and ensure program eligibility. Projections of growth in the number of people served increased from 7 percent to 10 percent representing an increase in cost of $21.7 million, this includes $6.0 million General Fund and $15.7 million Federal Funds.

15. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This policy package would establish 21 permanent, full-time positions. The positions are priced at 18 months for the 2025-27 biennium. Regarding data system needs, resources will be required. However, the current unknowns make it challenging to submit a formal request for Office of Information Systems (OIS) support needed during the 2025-27 biennium. As more information becomes available, we will continue to evaluate and define the resources and expertise needed to support the data needs for this body of work.

HCBS – Medicaid Division, 17 positions

Behavioral Health Senior Operations Manager (Health Policy and Program Manager 3)

Manage, organize, and direct policy, clinical, and operations for Medicaid behavioral health programs. This position directs deliverables, tracks work products and outcomes, and reports to Medicaid, the Division of BH, and OHA executive leadership. It will also have an executive leadership role.

Medicaid Behavioral Health Clinical Team Manager (Health Policy and Program Manager 3)

Manage, organize, and direct clinical operations. Will be a voting member of the Rate Review Committee (RRC) and the Behavioral Health Medical Committee (BHMC). This will be staffed by a licensed clinician who will collaborate with the medical director and BH medical director within the Medicaid Division.

HCBS Expansion Lead (Operations and Policy Analyst 4)

This position will be the responsible analyst to lead HCBS expansion work. This position will work with their manager and lead the HCBS team to expand HCBS services across OHA and ODHS. Due to the critical nature of this position, OHA is in process to hire a non-budgeted position by end of Q3 2024. This position will liaise with Government Relations, the Behavioral Health division, the Office of Development Disabilities Services (ODDS), and Aging and People with Disabilities (APD). This analyst will also be responsible to ensure Oregon complies with the new federal HCBS access rules.

HCBS Community Engagement (Operations and Policy Analyst 3)

The Lead staff will be responsible for leading HCBS community engagement activities. This staff will focus on promoting HCBS throughout the state, aligning with efforts from ODHS, and working to identify barriers to service provision and staffing.

Policy Development Analyst, Process and Guidance Development Analyst, and Operations Development Analyst (three Program Analyst 2s)

These three positions will be responsible for working with the OPA 3, 4, and management positions to identify trends in necessary guidance, assist in developing guidance and project to move OHA forward in HCBS service provisions and the goal of eliminating health inequities by 2030. These positions will also develop project scopes, convene steering committees, identify operational budgets, and track and report on project deliverables.

Regional Outreach Coordinators (five Operations and Policy Analyst 1s)

The positions will be responsible for working within five identified statewide regions, collaborating with ODHS, to improve outcomes, service utilization, and community-based problem solving. This team will report to the managers and policy teams for necessary guidance, resources, and opportunities to train and teach external and internal partners.

HCBS Provider Policy Analyst (Program Analyst 1)

Provider enrollment to review and identify policy options and practices to support enrolling HCBS providers.

HCBS Training and Support (Learning and Development Specialist 2)

Training and Development specialist staff working with policy analysts and compliance specialists to create and present training and guidance documents to internal and external staff. This staff will develop performance and evaluation criteria to ensure understanding and effectiveness. The staff will ensure direct care staff receive the requisite skills to perform the duties necessary for the job.

Prior Authorization Review Coordinators (two Public Service Representative 4s)

These positions are responsible for reviewing, entering, and processing PA requests for payment. They will need to operate within multiple operating systems, including the mainframe, the Medicaid Management Information System (MMIS), and Provider Time Capture (PTC).

Administrative Assistant (Administrative Specialist 1)

This position will assist the two manager positions, offering scheduling, tracking and finalizing work products, setting agendas, and taking meeting minutes. This staff will be necessary to support the manager's teams as they experience additional requests for background checks to support a new provider type.

HCBS Case Management System – Office of Information Services (OIS),

Regarding data system needs, resources will be required. However, the current unknowns make it challenging to submit a formal request for Office of Information Systems (OIS) support needed during the 2025-27 biennium. As more information becomes available, we will continue to evaluate and define the resources and expertise needed to support the data needs for this body of work.

HCBS – Office of Data Strategy & Operations (ODSO); 1 position:

Operations and Policy Analyst 2

Plays a pivotal role in facilitating the seamless implementation of a case management solution within the enterprise framework. They serve as the bridge between technical expertise and overarching policy objectives. The person in this position does not need direct technical proficiency in solution implementation; the analyst's primary responsibility lies in liaising with technical experts and peer initiatives (such as Medicaid Enterprise Systems Modernization), translating their insights into actionable strategies, and aligning them with broader organizational policies and goals. The justification for this role stems from the recognition of the multifaceted nature of enterprise-wide initiatives which address common functional needs. While technical expertise is crucial for developing and implementing solutions, it is equally essential to ensure that these endeavors are aligned with organizational policies, regulations, and overarching strategic objectives. The OPA2 provides the necessary context and policy insight to connect decision-making activity occurring in concurrent projects. Thus, by facilitating collaboration between technical, policy and data domains, this role enhances the initiative's effectiveness, mitigates risks, and fosters a holistic approach towards enterprise-wide transformation.

HCBS – Tribal Affairs, 1 position

Operations and Policy Analyst 1

Dedication to Medicaid Policy and Program team, matrix managed through the Director of Tribal Affairs. This staff will collaborate with Medicaid BH policy to respond to requests for technical assistance from providers of tribal members. This staff will project manage upcoming initiatives with the Nine Federally recognized Tribes of Oregon and to establish needed training and outreach to ensure the tribes are aware of and have equitable access to 1915(i) HCBS services.

Respite Services – Medicaid Division, 2 positions

Respite Care Policy analyst and federal and state liaison (Operations and Policy Analyst 3)

Responsible for working across OHA, Medicaid, Behavioral Health, Health Policy and Analytics, OHSU, and ODHS to develop a 1915 (C) or 1115 demonstration waiver to receive approval to operate a respite program and expand eligibility for people up to 300% FPL. This staff will collaborate and communicate with CMS and OHA's federal policy team.

Respite project management and waiver reporting (Program Analyst 2)

Responsible for identifying scope, budget, and deliverables to ensure successful implementation of the respite program. Staff will establish key deliverables, due dates, and report status to the steering committee.

16. What are the start-up and one-time costs?

None anticipated.

17. What are the ongoing costs?

Ongoing costs include staffing resources to develop and implement a 1915(c) or 1115 demonstration waiver. Additionally, OHA anticipates increased utilization of HCBS as a result of training and provider resources.

Staff	$3.8 million
IT Services	$0.3 million
Assessment Tool	$1.0 million
Case Management System Development	$2.0 million
Project Management Services	$1.0 million
Direct Services Provided to Individuals	$28.8 million
Total	**$36.9 million**

18. What are the potential savings?

None anticipated.

19. What are the sources of funding and the funding split for each one?

Positions would receive federal Medicaid funds at the administrative match rate of 50 percent Federal Funds and 50 percent General Fund. Funding for services and supports will be determined by the state's current federal matching funds, based on each individual's eligibility category. Currently HCBS receives on average a 63/37 percent federal/state fund match.

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE

Medicaid Behavioral Health Adult
Policy Package #554

1. Outcomes

What outcomes will this POP achieve? Please be specific and connect the outcomes to the Governor's priorities in homelessness, behavioral health, or education.

The Medicaid Behavioral Health Adult POP reforms and expands Home and Community-Based services (HCBS), including respite services, allowing more individuals with complex behavioral health needs and substance use disorder access to services. This work aligns with the Governor's priorities regarding behavioral health and houselessness by supporting individuals remaining in their homes and communities, which reduces the use of higher acuity settings. Oregon's population is aging, which will increase the need for caregiving services well into the future. The Oregon Office of Economic Analysis reports that in 2023, Oregon's median age was 40.3 years old, up from 38.5 in 2010 reported by the US census. This increased age, coupled with higher rates of behavioral health and substance use disorder care, prevention, and recovery needs in Oregon, makes the expansion of HCBS services integral in ensuring that more Oregonians can receive supports and services that facilitate their well-being, activities and engagement within their local communities. This POP will support a more sustainable and robust system to meet the needs of individuals by expanding respite services and access to culturally and linguistically supportive services.

2. Racial Equity Strategy

What are the racial disparities in the population that are intended to be served through this program (e.g., racial disparities in substance use treatment access). How will this POP, including the implementation of the POP, address these disparities and equitably serve Oregonians?

In Oregon, Black and African Americans are disproportionately represented in the highest acuity behavioral health settings. This overrepresentation is starkly illustrated by census data from the Oregon State Hospital, which shows that Black or African American individuals account for 10.1 percent of the Oregon State Hospital population while only accounting for 1.8 percent of the overall population in Oregon. Additionally, the National Institutes of Health report that relative to white caregivers, Black caregivers provide more than 40 hours of care per week (54.3 percent versus 38.6 percent) and more often cared for an older adult with dementia (27.1 percent versus 20.7 percent) who was living below the federal poverty line (31.7 percent versus 11.9 percent) or was Medicaid-eligible (42.2 percent versus 11.8 percent). In addition, while Black caregivers are more likely to work more hours outside of the home, they also report a higher number of workplace-related challenges due to caregiving. By reducing silos and increasing communication and collaboration between state agencies, expanding and retaining a supported and sufficiently trained workforce, streamlining and integrating systems, and meaningfully engaging with communities to increase awareness and knowledge of HCBS services, Oregon can reduce the disproportionate impacts on both individuals needing services and family members who care for them.

3. Accountability to Racially Equitable Outcomes

a. For POPs that are improving or expanding existing programs, how does the agency currently track quantitative and/or qualitative data to evaluate program outcomes, including by race and

ethnicity? Will this POP improve the evaluation of outcomes by race/ethnicity to improve program evaluation and administration?

HCBS is being expanded. Currently, OHA has not constructed and analyzed race and ethnicity data for HCBS services. Tracking quantitative and qualitative data to evaluate program outcomes and including race and ethnicity data is a strategic priority for continued development and quality assurance of the program. Currently the REALD data for HCBS recipients is housed in a separate repository and, if the proposed investments in this POP are funded, there will be work to align the data sets to understand the equity impacts of access and outcomes.

The resources in the POP will allow better tracking of individual care and outcomes through the development of a more robust case management system and additional staff to monitor case coordination and quality assurance across the program. The additional staff and resources will provide enhanced analytics to improve access, quality of services, and analyze equity impacts through REALD analysis.

b. For POPs that are creating new programs, how will the agency track quantitative and/or qualitative data to evaluate program outcomes, including by race/ethnicity for the purpose of evaluating and improving program implementation to advance racial equity.
Respite services will be new.

Medicaid reimburses different provider types to ensure appropriate coverage to meet individual's assessed needs in a medically appropriate way. The addition of respite services and supports through this POP will allow OHA to collect specific data and implement services in a trauma-informed, and appropriate way. Working with these provider types and within their communities will offer OHA better insight into the community needs and promote community health.

4. Equitable Administration

In administering resources in this POP, how will you create contracting and/or granting opportunities for culturally specific and culturally responsive community-based organizations and disadvantaged, minority, women, and emerging small businesses?

On February 1, 2023, Medicaid Behavioral Health Policy began implementing enhanced payments to certified Culturally and Linguistically Specific Services (CLSS) providers (22 percent) and providers offering services in rural areas (5 percent). Providers receive both enhancements for a combined 27 percent increase when offering appropriate CLSS in rural areas. Additionally, Medicaid requested from CMS a qualified directed payment to CCO providers offering behavioral health services, including CLSS. CMS approved CCO directed payments effective January 1, 2023. When contracting, wherever possible, OHA will center and prioritize proposals from vendors representative of, or with a proven history of working with, communities experiencing disproportionate impact and communities of color.

Oregon Health Authority
2025-27 Policy Package

Division:	Central Services, Behavioral Health
Program:	Director's Office, Behavioral Health Admin & Program
Policy package title:	Kids Integrated Delivery in Schools (KIDS)
Policy package number:	555
Related legislation:	Senate Bill 1557, House Bill 4070 (did not pass in 2024)

Summary statement:

This policy package will increase access to mental health supports and services to students through multiple investments focused on decreasing inequities in health and education outcomes. Schools are an optimal place for students to receive mental health services and now is the time to invest in a comprehensive school mental health system in partnership with ODE and local communities. This multi-pronged approach complements and expands on existing resources to increase access to services for youth in a coordinated and efficient way that maximizes Medicaid reimbursement, is responsive to local needs, and builds on local assets.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$16,643,246**	**$41,361**	**$747,081**	**$17,431,688**	**9**	**7.00**

Oregon Health Authority: 2025-27 Policy Package

Purpose

1. What problem is OHA trying to fix or solve?

Oregon youth are experiencing unprecedented levels of poor mental health, and current programs and systems are struggling to meet their needs. Students who experience disabilities, students from rural communities and those identifying as BIPOC and LGBTQ2SIA+ are disproportionately impacted. Schools are an optimal place for students to receive mental health supports and services. This multi-pronged approach aims to increase access to mental health supports and services by expanding on existing resources and building new ways to address youth mental health challenges in a coordinated, efficient way that meets the needs of local communities.

The Oregon Department of Education (ODE) and the Oregon Health authority (OHA) collaborate to support student mental health through a range of programs and initiatives from health education to social emotional learning to intensive services and recovery supports. Comprehensive school mental health systems are critical to mental health promotion and literacy, and early identification, intervention, treatment and recovery of mental illness. Currently, ODE is providing technical assistance to schools to complete a School Health Assessment and Performance Evaluation System (SHAPE) profiles. This tool guides districts and schools in implementing a comprehensive school based mental health system and provides key data to state agencies. OHA invests in student mental health services and suicide prevention through school-based health centers (SBHCs), school-based mental health (SBMH) partnerships, and suicide prevention programming. These programs complement one another and serve nearly every county across the state. However, schools continue to struggle to meet the increasingly complex mental health needs of students with current resources.

According to the Oregon's 2022 Student Health Survey:

- 26 percent of 6th graders, 32 percent of 8th graders and 40 percent of 11th graders experienced depressive symptoms in the past year.

- 14 percent of 6th graders, 18 percent of 8th graders and 18 percent of 11th graders reported self-harming in the past year.
- 8 percent of 6th graders, 13 percent of 8th graders and 16 percent of 11th graders reported considering suicide in the past year.
- Youth disproportionately impacted by health inequities were more likely to report these mental health concerns:
  - 55 percent of American Indian / Alaska Native 11th graders reported experiencing depression in the past year; 35 percent contemplated suicide and 17 percent attempted suicide in the past year.
  - 63 percent of gay / lesbian 8th graders reported experiencing depression; 41 percent contemplated suicide and 13 percent attempted suicide in the past year.

While Oregon's recently approved Medicaid State Plan Amendment has expanded the opportunity for school districts to bill Medicaid for services, including mental health services, there are significant gaps in resources, workforce, and infrastructure that prevent districts from leveraging Medicaid to support children and families most impacted by health inequities.

There is opportunity to provide additional funding and support to local education agencies, School-Based Health Centers, and Community Mental Health Programs to increase available mental health services and build sustainability through increased Medicaid billing. Investing in local solutions based on community needs and assets will ensure more students gain access to mental health services and supports through a network of culturally diverse providers available onsite at schools and through tele-mental health options.

2. What would this policy package buy and how and when would it be implemented?

Through this POP, OHA aims to increase access to mental health supports and services to students through multiple investments that provide statewide infrastructure for supports and services that can be tailored to local needs. We know that schools are an optimal place for students to receive mental health supports and services and now is the time to invest in a comprehensive school mental health system in partnership with ODE and local communities. This multi-pronged approach complements and expands on existing resources to increase access to services and supports for youth and families in a coordinated and efficient way that is responsive to local needs and builds on local assets.

We aim to:

- Maximize Medicaid billing for school-based health services
- Expand mental health services through the School-Based Health Center Program
- Expand mental health services through the School-Based Mental Health Program
- Support culturally specific youth suicide prevention efforts
- Build capacity within OHA to coordinate and align efforts across the agency and with ODE and other state agencies

School Medicaid Billing - $200,000

Oregon's state leadership and agencies are committed to addressing health inequities through increased access to health care for children and adolescents in school settings. OHA and the Oregon Department of Education (ODE) work closely together on Oregon's School-Based Health Services (SBHS) program to ensure that LEAs are equipped to successfully implement Medicaid billing while adhering to all education and Medicaid requirements. In 2023, the Centers for Medicare and Medicaid Services (CMS) approved Oregon's Medicaid State Plan Amendment (SPA) to include

additional services and provider types as allowable for Medicaid reimbursement. Only 25 percent of LEAs enrolled in Medicaid, many of which are billing Individualized Education Program (IEP) and Individualized Family Service Plan (IFSP) services below full capacity.

This POP would focus on long overdue infrastructure development to support the following goals:

- Increased number of LEAs enrolled and actively participating in SBHS, from 59 to 80
- Increased claiming by 25 percent for covered services provided to students with an IEP/IFSP and to general education students
- Increased federal reimbursement for participating LEAs
- Increased access to health care services for Medicaid- and CHIP-enrolled students

OHA, in collaboration with ODE, we will accomplish these goals through the following:

- Expand state capacity to provide technical assistance and address infrastructure needs through the addition of 2 permanent OHA staff and contracting with a research and service agency with expertise in educating and engaging LEAs in accessing Medicaid reimbursement for services in school settings.
- Develop and implement a training and technical assistance plan that provides support to LEAs in addressing the barriers, challenges, and infrastructure needs to successfully participate and comply with the SBHS program.
- Develop training materials, including identifying topics, drafting resources, incorporating OHA and ODE feedback, facilitating activities (i.e., presenting workshops, facilitating office hours), and packaging resources for posting on OHA’s website; and
- Develop a five-year cross agency work plan to maintain and sustain ongoing TA along with train-the-trainer staff development for OHA

School-Based Health Centers (SBHCs) - $8 million

The funding requested will enable the SBHC Program to implement changes that have been recommended by youth and community partners.

- Increase to operating grants awarded to State certified SBHCs. SBHCs will require additional operating funds as the SBHC Program modernizes its minimum certification requirements to center health equity and youth engagement. In a recent survey, 61 percent of SBHC systems indicated a need for increased funding to meet these revised requirements. Further, the cost of operating an SBHC has continued to increase, particularly in areas of staff recruitment/retention and supplies following the COVID-19 pandemic. SBHCs last saw a small ($4,000) increase to base operating funding in 2019. A funding increase would allow OHA to fully implement a funding formula recommended by partners and support SBHCs to expand service availability.

- Support for comprehensive behavioral health services delivered by State certified SBHCs. SBHCs provide a wide array of behavioral health treatment and prevention activities. New minimum State certification requirements will raise the baseline level of behavioral health services provided at all State certified SBHCs to include minimum behavioral health provider hours. Additionally, the new standards will enhance coordination between behavioral health and primary care provides, increase access to suicide, depression and substance use screening, promote ongoing collaboration with the SBHC host school and ensure all SBHCs offer individual therapy with an attuned focus on health equity and youth-centered clinical care. SBHCs may also use this funding to provide behavioral health services beyond these minimum requirements, for example, using telehealth to access culturally-specific behavioral health therapy. There will be additional funding opportunities as part of this to support communities to meet their healthcare needs in innovative ways – including telehealth and mobile clinics via the expansion

of two healthcare access pilot programs and/or the implementation of other innovative solutions to meet community needs. The SBHC program frequently hears from communities facing barriers to build and implement SBHCs due to the large resource investments needed for construction and operation.

- Implementation of meaningful youth engagement at Oregon SBHCs. Currently a small number of SBHCs receive funding to support Youth-Led Projects. These projects support activities that reduce mental health stigma, promote SBHC access, prioritize prevention efforts and provide students the opportunity to build community and leadership skills while addressing topics that matter to them. The POP would expand these culturally responsive youth engagement efforts.

School-Based Mental Health (SBMH) - $7 million

The existing partnerships between Oregon's local schools, districts and community mental health agencies (CMHPs) have strengthened access to timely mental health services and supports. The CMHPs provide master's level therapists and skills trainers to provide immediate, on-site school-based mental health treatment for children, youth and families.

60-80 percent of children and youth who receive mental health services do so in schools. When SBMH services are consistently available on campus, mental health issues can be identified early, help prevent crises and reduce service utilization on already overburdened emergency departments and healthcare settings. SBMH providers have the infrastructure and support of their local agencies to link youth and families to additional and, if needed, more intensive services such as WRAP, EASA. SBMH providers have the time and bandwidth to attend IEP/504 meetings, support educators through mental health consultation in the classroom, strengthen the continuum of care alongside school-employed helping professionals and increase school staff mental health literacy.

Recent visits with existing OHA-supported SBMH programs school-community partnerships included time spent with students, parents/caregivers, superintendents, principals, school counselors, SBMH therapists and their agency leadership. The most cited reasons students are seen for SBMH services are anxiety, depression, suicidal ideation, self-harm, bullying, social media bullying, gender, sex, and race discrimination. School administrators and their CMHP partners noted staff exhaustion and burnout, and nearby districts are reaching out to access community mental health supports. This widens the gap between adequate workforce capacity and adds strain to local agencies, schools and districts. While community support largely exists for these programs, there is currently not enough workforce to meet the ever-growing need. Current providers are struggling to keep up with the needs of their schools, and there are districts across Oregon without access to these services. Providers report feelings of overwhelm and inability to keep up with the needs of the students in their schools, and students in crisis cannot always access the treatment they need.

OHA seeks $7 million to expand OHA-supported school-based mental health services. Funds will be put out in a Request for Proposal (RFP) process, prioritizing contracts with culturally specific and rural community mental health providers for administrative review, development, training, and initiation of equity-oriented and trauma-informed SBMH services and collection of outcome data. Expansion of training is needed to ensure services are delivered in a way that integrates a young person’s gender, culture, language, values, is trauma-informed, and developmentally appropriate. This will also allow OHA to better utilize the dollars by broadening the workforce available to work with youth and families. Youth peer support specialists and skills trainers will partner alongside existing therapists to help these therapists work to the top of their license.

Culturally Specific Suicide Prevention - $1 million

Oregon's youth suicide rate has decreased since 2018 for non-Hispanic white youth – it has increased or remained similar for all other youth. Nationally, black youth have seen the greatest increases in youth suicide rates of any racial group, and American Indian/Alaska Native youth have a highest rate of youth suicide.

OHA seeks $1 million to increase and sustain culturally specific youth suicide prevention efforts including:

- 10 percent Tribal set-aside to support tribal suicide prevention efforts
- Culturally infused mental health training for school staff
- Culturally infused suicide prevention training for school staff
- Sustained support for the Black Youth Suicide Prevention Coalition and other suicide prevention efforts for Black, African, and African American youth
- Support for bolstering culturally specific suicide prevention in school district's Adi's Act plans, in partnership with Oregon Department of Education
- Support for increasing the evidence base for culturally specific suicide prevention training and programs

Strategic Coordination - $800,000

This policy package supports an investment in dedicated staff to provide strategic coordination and alignment across OHA divisions and with other state agencies, analyze multi-system data, gather community and partner input and best practices to develop a strategic approach to policy and programs that improve access, quality, and equity in education and health care systems. Specifically, policy and program coordination and community engagement staff, child health cross-sector analytics staff and contractual expertise are needed to:

- Strengthen relationships and partnership across OHA and between OHA and other youth- and family-serving agencies to ensure strategic alignment, coordination and direction; to reduce system redundancies; and to better streamline service delivery and communications to people in Oregon.
- Provide convening, planning, and collaboration infrastructure for policy and program alignment.
- Incorporate and leverage existing cross-sector data and data sets (e.g. Integrated Client Services data, state agency data sets accessed under the 1115 waiver such as housing and corrections data sets) and other social needs data to inform program supports for children and families. This includes data analytics collaboration across OHA (PHD, HPA, CFBH workplan strategies), ODHS (ODDS, CW, SSP), Oregon Youth Authority, DELC, and the Oregon Department of Education.
- Monitor and understand metrics and other health indicators specific to children and families to identify inequities, trends, and gaps and inform policy priorities and program changes.
- Expand analysis of child and family relationships in data to inform how to better support the family unit.
- Engage communities in data equity and data justice informed approach to child health policy and analytics.
- Collaborate with other policy making office and functions out of the OHA Director's Office.

3. **How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity1 or equitable health outcomes? How does this policy package further OHA's mission and align with its strategic plan?**

   This policy package furthers OHA's mission and aligns with its strategic plan by strengthening the children's continuum of care and improving mental and behavioral health through community and education partnerships, prevention, early intervention and access to quality, affordable mental health services in education settings. This familiar setting where students gather is a natural environment to offer services, thereby reducing the burden of time and transportation on families.

   This POP represents an intention to respond to needs identified by youth, families, school administration and community mental health providers in rural and frontier communities throughout Oregon. This package is designed to support locally driven solutions and support healthcare access through in-person and telehealth service options. Not funding this policy package would keep the children's behavioral health service array status quo, youth continuing to use emergency departments and higher levels of care, and contribute to Oregon's poor attendance rates, impacting educational attainment.

   Inadequate healthcare services, lack of awareness of existing services, and workforce limitations all impact student's ability to participate meaningfully in their education. This policy package helps increase mental health supports and services for student populations, which includes those who identify as LGBTQ2SIA+,[2] People of Color including Black persons and American Indian or Alaskan

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

[2] Lesbian, Gay, Bisexual, Transgender, Queer, Two Spirit, Intersex, Asexual, and the myriad ways people identify their sexual orientation and gender identities.

Native persons, students with a physical, developmental and/or intellectual disability, people who live in rural and frontier areas, and those with intersecting identities across these groups. Youth may be reluctant to seek out services because they do not find providers who they can identify with, they are not trusting of adults who may have discriminated against them (including their own families) and they are generally disconnected from support. This reluctance is further heightened if they have an intersectional identity. The ability to see a provider in a school setting or access a provider that understands their culture and/or speak their preferred language helps maintain the confidentiality so the youth can feel psychologically safe. These services may be better accessed through telehealth for some students and this POP will support local communities in meeting those needs.

Services will be prioritized to culturally specific organizations serving populations who have not been adequately served, or served at all, in prior years. Contracts and requests for proposals will incentivize the hiring and training of provider staff who resemble the clients they are serving demographically.

We also acknowledge the deep historic and systemic roots within the health and education systems that have and continue to result in disproportionate disciplinary rates and the birth to prison pipeline. In Oregon, Black, American Indian/Alaska Native students and student with disabilities continued to be suspended at higher rates than White students and students without disabilities. The package will support mental health literacy among staff in education settings and support providers to attend IEP and 504 plan meetings to support students and families in reaching their education goals and reduce harmful disciplinary practices.

In addition to expanding needed mental health supports and services, this policy package aims to address health inequities through a focus on innovative cross sector data policy, analytics strategy

and products, and data equity/data justice specific to children's health. Currently, while there is significant data collection, and some cross-sector data, there is little capacity to pull together data from various disparate systems and systematically analyze them to identify, monitor and support program work related to health inequities or other systemic challenges that are specific to children and youth. Additionally, there is a need to engage children and families directly in the analysis, communication, and use of these data. The POP would support the staffing and contract resources needed to do this critical work.

Quantifying results

4. What are the long-term desired outcomes?

The multi-pronged approach of this POP will lead to the following long-term outcomes:

- Increased access to health care services for Medicaid- and CHIP-enrolled students
- Increased # and diversity of providers that schools are employing or contracting with
- Youth accessing care when they need it, which leads to a positive preventive impact on the adult behavioral health system.
- Addressing and reducing the emerging race-related health inequity around youth suicide deaths.
- Reduced burden on local emergency healthcare and mental health systems by building upon current efforts of prevention, early intervention, and treatment services in schools.
- Creation of supportive pathways leading to increased student belonging in school, higher graduation rates, and successful adulthood outcomes by teaching youth coping tools and connection.
- Improved student mental health outcomes by strengthening alternatives to discipline allowing for increased healing pathways that keep students engaged in school.
- Reduced health-related (including behavioral health) barriers to learning

- Partnerships with ODE and school districts to improve school attendance and educational outcomes
- Improved coordination and alignment between the health care system and the education system at the state and local level
- Better collection and use of cross-sector data to inform policy and program improvements, including access and utilization

5. How will OHA measure the impacts on health inequities of this policy package?

School Medicaid:

To evaluate the effectiveness of implementation activities, OHA will review data and community partner input to monitor and document increased service utilization in school settings. OHA will review the following and revise implementation activities as needed:

- School Medicaid Surveys will solicit feedback from local education agencies (LEAs) on project activities, infrastructure needs, and implementation challenges. Survey feedback will be used to inform and adjust the technical assistance plan and assess barriers to increased utilization to promote higher access to needed services for children/students with high need.
- Participation numbers in technical assistance activities will be gathered and reviewed following each activity. Where possible, participation data will be cross-referenced with LEA information (e.g., whether the LEA is enrolled in the billing program or not) to identify if strategies are engaging the intended audiences.
- Claiming and enrollment data will be analyzed on an annual basis to understand LEA participation trends and increases or decreases in billing and to identify regions or target LEAs for engagement in technical assistance activities.
- Other data to be tracked and monitored:
  - Increased Medicaid claiming by 25 percent by 2027.

- Diversity of providers serving students (k-12) in each LEA.
- Demographic diversity of Medicaid covered children receiving services in the school setting
- Cost savings for LEAs who are billing Medicaid for SBHS.

School-Based Health Centers:

State certified SBHCs must submit data at least twice annually on all encountered visits at the SBHC. Required variables include Medicaid ID, insurance status, date of birth, race, ethnicity, preferred language, and visit procedure codes, among others. The SBHC Program is also preparing to support all SBHCs to come into compliance with REAL-D / SOGI data collection standards as part of OHA's HB 3159 implementation.

While the encounter data provides demographic data and can illustrate trends in service utilization over time, it is also necessary to measure the impacts this policy package will have on the quality of services. Involving youth to shape their health care is essential to address health inequities and the SBHC program will continue to prioritize youth-engagement activities. The updated SBHC Standards will require SBHCs to routinely gather feedback from youth and families to improve clinical access, quality of care, breadth of service, and/or comfort, design, and appearance of the SBHC facility. Additionally, through the expansion of the Youth-Led Projects Grant, upcoming changes related to youth participation in certification site visits, and a partnership with OHA's statewide YAC the SBHC Program can better assess the impacts of the revised certification standards.

Separately, the SBHC Program has begun a partnership with RAND, a national policy and research nonprofit, which recently received a 5-year NIH grant to examine outcomes associated with SBHC access in Oregon and several other states. Findings from this study will help inform Oregon SBHC

Program and policy decisions, particularly with regards to ensuring access to quality care for youth from communities disproportionately impacted by health inequities.

School-based Mental Health:

School-based Mental Health programs will continue to capture information on the youth served through school-based therapy supports. Current outcomes for this service include number of youth served, REAL-D and SOGI data for youth served to ensure equitable access and supports, and number of supports provided by a culturally responsive provider. With this expansion in school-based mental health services, OHA would continue to monitor these outcomes, in addition to impacts on the birth to prison pipeline, supporting youth in districts with the highest number of youth of color overlaid with the highest number of school suspensions and expulsions as measured by ODE, to provide proactive support and validation of youth experiences of systemic racism. Programs are also focused in rural areas of Oregon where often there are no other providers; an additional outcome of expansion is access to culturally responsive providers through both in-person and telehealth providers. Finally, current programs do not require partnership or supports of tribal partners; expansion contracts would require an MOU with the local tribal partners to provide school-based supports for tribal youth, if desired by the tribe.

Youth suicide prevention:

- Outcome data: Protective factors reported by youth on Student Health Survey by race/ethnicity
- Outcome data: Emergency department visits by race/ethnicity
- Outcome data: Youth suicide deaths by race/ethnicity
- Implementation data: Number of trainers for culturally infused suicide prevention trainings
- Implementation data: Number of school staff trained in culturally infused suicide prevention trainings

- Implementation data: Number and reach of tribal suicide prevention activities

Strategic Coordination:

- Progress toward implementation of the ODE-OHA MOU focused on ensuring equitable education and health outcomes on Oregon. Work Is currently underway to select a set of metrics to measure progress.
- Increased engagement of CBOs, and children and families directly in the analysis, communication, and use of child health data.
- New data equity-informed child risk/population data reporting as well as CCO reports that identify complexity factors for children and families to enable intervention and care coordination.

How achieved

6. What actions have occurred to resolve the issue prior to requesting a policy package?

Each OHA Division has done both focused internal work and cross-agency collaboration to support youth mental and behavioral health, including suicide prevention. We have listed below information specific to each initiative/program.

School Medicaid Billing

OHA and ODE partner to administer the School Medicaid Program and provide training and technical assistance to schools for appropriate service provision and Medicaid billing. OHA currently has one OPA4 to provide ad-hoc technical assistance to schools to be able to bill Medicaid and we are in the process of filling an open OPA3 position. This is not enough staffing to provide an ideal level of service to school districts. Lack of sufficient capacity means only those school districts that have funding and staff capacity of their own have been able to explore Medicaid billing. This usually tends to be relatively large districts. With the CMS approval of the SPA to expand the types of billable

services, there is even greater opportunity for districts to seek Medicaid reimbursement as a sustainable funding source. With the anticipation of more districts interested in billing Medicaid, we entered into an IGA with WestEd to increase short term OHA capacity. OHA was awarded a $2.5 million CMS grant that provides immediate resources for staffing and contracting needs. Investment through this POP would create the needed long-term infrastructure to increase access to school based health services for students through sustainable Medicaid reimbursement.

School-Based Health Center Program (SBHC)

SBHCs serve as trusted health care providers and are well positioned to respond to the ongoing health needs of youth, specifically those disproportionately impacted by health inequities. Of SBHC school-aged clients during the 2022-2023 school year, 39 percent identified as youth of color and 61 percent were enrolled in Medicaid at their first visit. Certified SBHCs have increased from 68 in 2015 to 87 in 2024. During the 2022-2023 school year, 46 SBHCs were in rural or frontier counties; and 65 percent of SBHCs were in primary care health provider shortage areas (HPSAs). In addition to expansion of Certified SBHCs, the Adolescent and School Health Program has implemented two pilot programs – telehealth and mobile clinics – to increase healthcare access to youth at school. Since 2013, the Oregon State Legislature has dedicated Mental Health Expansion Grant (MHEG) funding to SBHCs to support behavioral health capacity (FTE) and prevention activities. This investment has correlated to a substantial increase in behavioral health visits in SBHCs (from **8,532** behavioral health visits to school-aged clients in 2013-2014 school year to **44,438** visits in the 2022-2023 school year). MHEG is primarily used to support provider time so all youth can access services regardless of insurance type or ability to pay; however not all SBHCs receive MHEG funding and those that do report current award amounts are inadequate to match the need in their communities. The SBHC Program has engaged youth and community partners in a multi-year modernization process to help communities meet these needs and to center behavioral health, youth engagement, and health equity in SBHC program requirements, the SBHC Standards for Certification. Notable

proposed changes to these Standards require all State Certified SBHCs to: provide behavioral health services onsite; engage youth and their families in SBHC operations decisions – with a focus on communities disproportionately impacted by health inequities; work more closely with local partners, including schools, families, and community-based organizations – including culturally specific and responsive community service providers; use qualified health care interpreters; provide gender-affirming care; provide staff training on topics related to health equity; and screen for social determinates of health and support youth/families with resources navigation.
Although the SBHC Program has and will continue to support SBHCs in meeting the Standards for Certification through training and technical assistance, SBHCs currently have insufficient levels of funding to meet the increased requirements. The POP would provide the fiscal investment necessary for full implementation and support for increased access to health care and prevention services.

School-Based Mental Health Program (SBMH)

School-based mental health (SBMH) programs supported through the Child and Family Behavioral Health unit are focused primarily in rural areas for regional equity and are often the only outpatient therapy services available for youth in their regions. Since 2014, the Oregon legislature has provided direct funding to fifteen community mental health programs (CMHPs) to partner with rural schools and districts across seventeen counties. However, current providers are struggling to keep up with the needs of their schools, and there are districts across Oregon without access to these services. Providers and school administrators report feelings of overwhelm and inability to keep up with the needs of the students in their schools, and students in crisis cannot always access the treatment they need.

OHA's Big River Suicide Prevention Programming and ODE's support for Adi's Act

Since 2019, OHA has supported several suicide prevention, intervention and postvention training programs which are collectively called the Big River Suicide Prevention Programming. These

programs, along with the requirement for all school districts to have a policy to have a suicide prevention plan (Adi's Act), have contributed to a lower youth suicide prevention rate. The decrease in youth suicide has only been for white, non-Hispanic youth, and more needs to be done to bolster culturally specific suicide prevention. While over 90 percent of school districts have adopted a policy to have an Adi's Act plan, the need remains to bolster culturally specific suicide prevention efforts in schools' plans.

OHA Capacity for Strategic Coordination

In recognition of the need for cross agency coordination with the Oregon Department of Education, the Director of Health in Education position was created in 2019 after the passage of the Student Success Act. The work to date has focused primarily on meeting immediate needs during the pandemic and more recently resetting the work on establishing clear goals and metrics based on the MOU between the two agencies. Given the breadth of work across the agency that involves youth and education settings, there is opportunity for greater alignment, particularly outside of the K-12 system.

With respect to broader child health efforts, OHA has tried to support greater coordination and alignment around children's health and increase expertise in a number of ways. Strategies have included limited duration positions, matrixed teams, and dedicating portions of multiple staff members' time towards this work. Several efforts at using grant funding for this work have also been made (such as ECCS, Race to the Top, Integrated Care for Kids). Additionally, two prior policy packages have been developed to try and address the need for a strategic and centralized children's health team, but neither proceeded through the legislative process.

7. What alternatives were considered and what were the reasons for rejecting them?

See response to question #6. Current resource levels are insufficient to meet needs.

8. What other agencies, programs, community partners or stakeholders are collaborating on this policy package?

Oregon Department of Education is collaborating on the policy package. Many other partners have provided input that has helped shape the package. This includes but is not limited to: Local Education Agencies, community-based organizations, Community Mental Health Programs, school-based health centers, and youth.

9. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

10. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

- Tribal partners from the Nine Federally Recognized Tribes of Oregon – will receive a 10 percent set-aside and ongoing partnership with OHA's suicide prevention team, as well as opportunities to form MOUs with local counties for school-based mental health services.
- Oregon Department of Education (ODE) - As the state education agency, ODE is a critical partner in most aspects of this POP. OHA and ODE have an existing MOU that guides our collaboration. Dedicated staff is necessary for this cross-agency work and we ask that current LD positions be made permanent through this POP and within ODE for the work to continue.
- Local Education Agencies (LEAs) – anticipate a positive impact to LEAs as more students receive the services they need and LEAs are better equipped to bill Medicaid for those services. We will work with partners to ensure timely and thorough communication and technical assistance with all affected partners.

- Community Mental Health Programs (SBMH contracts) – CMHP programs that currently receive funding could receive additional funds, and new counties could also access these services.

11. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Staffing and fiscal impact

Implementation date(s): July 1, 2025

End date (if applicable): Not applicable

12. What assumptions affect the pricing of this policy package?

Hiring and implementation dates, cost allocation methodologies with available revenue streams, and anticipated costs for programs, contracting and software are all estimates using current information available.

13. Will there be new responsibilities for OHA and/or Shared Services? Specify which programs and describe their new responsibilities.

This work will be absorbed into current programs and services. OHA does not anticipate any major new responsibilities for Shared Services.

14. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

The total client caseload is indeterminant but there will be increase in Medicaid-covered individuals served by schools under the SBHS.

15. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This work will be supported by existing positions and new positions are also required as indicated below.

Medicaid Children and Families Program in the Medicaid Division

- Operations and Policy Analyst 2 (make grant funded LD position permanent): to coordinate overall implementation and expansion of school-based Medicaid billing; coordinate with other agencies, develop agendas and meeting schedules, coordinate training and technical assistance, administer the contract with the Training and TA Vendor to design curriculum, track program evaluation, ensure reports/documentation are submitted to CMS. The position will also work directly with Medicaid enrollment and billing teams to ensure the Medicaid billing system (MMIS) is set up to streamline enrollment and reimbursement of school districts (SDs) as billing expands across the state.
- Learning & Development Specialist 2 (new position): provide direct training and technical assistance to external partners across the state such as school Medicaid billing specialists, school financial offices, school Medicaid Advisory Workgroup, and any other SD staff that need training and TA to be able to bill Medicaid. The position will work directly with the contactor to develop curriculum for training and will work with other Medicaid teams to ensure training and TA aligns with technical aspects of Medicaid billing system.

Adolescent and School Health Program in the Public Health Division

- Public Health Manager 1 (new position) to lead the School-Based Health Center (SBHC) Team and support alignment of SBHCs within health and education systems, including and especially for behavioral and mental health.
- Public Health Nurse 2 (new position) focused on provided dedicated support for behavioral health services delivered at SBHCs.
- Current staffing:
  - Public Health Nurse 2: Currently, two Public Health Nurses are responsible for the certification of all 87 SBHCs, with a focus on primary care. An additional PHN2 with a strong behavioral health background will allow the OHA to provide more dedicated support for behavioral health services delivered at SBHCs.
  - Program Analyst 3: Currently, a PA3 provides grant coordination support for the SBHC Mental Health Expansion Grant. This position also supports youth engagement via the Youth-Led Projects. This position is not able to provide the high-level clinical guidance and expertise required to support SBHCs to implement new behavioral health minimum requirements.
  - Program Analyst 3: Currently, a PA3 supports innovative school-linked pilot projects for telehealth and mobile clinics. This position will develop grant opportunities to support the implementation of new innovative healthcare access projects with this funding.

Child and Family Behavioral Health team in the Behavioral Health Division

- Operations and Policy Analyst 3 Youth and Family Culturally Specific Treatment Policy Coordinator (new position) – This staff will have expertise in culturally specific and responsive promising practices and practice-based evidence. Tasks will include policy and program leadership for youth and family practices for culturally specific groups, providing guidance and

support for providers, working collaboratively with the Behavioral Health Equity and Inclusion team. This role will involve community relationship and connection in conjunction with the Office of Recovery and Resilience to gain community input and center the voices of youth and families with lived experience, elevating clinical promising practices for communities that have been economically and socially marginalized.

Health in Education Team in the Director's Office

- Health Policy and Program Manager 3 (new position) – Lead the Health in Education cross agency work to align ODE and OHA efforts to improve student health and wellbeing through anti-racist policies and programs. Currently staffed as an LD position.
- Operations and Policy Analyst 4 (new position) – Focused on strategic alignment, coordination, community engagement, and communication across OHA and other state agencies across the full education continuum from early learning and K-12 settings to community colleges, universities and other young adult serving institutions.

Child Health Analytics Team in the Health Policy and Analytics Division

- Operations and Policy Analyst 4 (new position) focused on innovative cross sector data policy and analytics strategy, and data equity/data justice in child health analytics. Expertise in child, adolescent and family policies at the state and federal level. Focus will be on supporting the utilization of data to inform policy and identifying programmatic and system gaps to address. This person will also build, manage, and lead conversations about shared data and data use agreements across agencies. In addition, this position will be seated on a team collaborating on innovative Medicaid children's health programs (EPSDT, YSCHN, Continuous Eligibility) and will strengthen connections and improve shared knowledge to improve future programs and policies.

- Research Analyst 4 (new position) focused on cross sector analytics and analytics products. This position will be tasked with deeply understanding broad trends in child and adolescent health care, especially as it relates to SBHCs and other Medicaid claims through schools. This position will lead integration of data sets in partnership with ODHS/ICS and serve as a subject matter expert for informing the data use agreements. Additionally, this person will be tasked with using child and adolescent data to inform opportunities that align with other strategic initiatives, including the CCO quality incentive metrics program, CCO procurement, and 1115 waiver submissions.
- Existing resources within Health Policy and Analytics will be integrated into this overall team bringing expertise in Medicaid program data on children (EPSDT Research Analyst 4), the System-of-Care Advisory Council, and child and family behavioral health analytics and metrics.

16. What are the start-up and one-time costs?

This package includes no start-up or one-time costs. They are all ongoing and should be made part of the continuing service level for each unit/division.

17. What are the ongoing costs?

All costs are ongoing.

18. What are the potential savings?

The proposed package will lead to prevention and early identification of mental health issues which would decrease workforce and economic burden on higher levels of care, intensive services, emergency departments and healthcare settings. Cost savings would also be anticipated due to decreased engagement with the criminal justice system.

Cross division and cross agency collaboration has the potential to save resources by leveraging community engagement, communications, and data collection and analysis resources. There may also be unrealized opportunity to streamline programs and improve satisfaction among students, families, and educators.

While the investments in increased billing for school Medicaid don't technically save resources, increased Medicaid billing offsets the cost of providing needed services and leads to savings associated with preventing higher levels of care as mentioned previously.

19. What are the sources of funding and the funding split for each one?

Staffing fund splits:

- Central Services uses the most updated agency-wide cost allocation plan to distribute costs to all agency-wide available revenue sources, since their work is on behalf of the entire agency. The estimated fund splits are 80 percent General Fund, 7 percent Other Funds, and 13 percent Federal Funds.
- Medicaid Admin uses a 50 percent Medicaid Federal Funds and 50 percent General Fund split, which is the administrative match rate.
- Health Policy & Analytics uses a 39 percent Federal Funds and 61 percent General Fund split, which is a blend of General Fund and the administrative match rate.
- Behavioral Health uses a 15 percent Federal Funds and 85 percent General Fund split, which is based on Oregon's approved CMS Statewide Allocation for Medicaid and CHIP.

Program fund splits:

- School-Based Health Centers in the Public Health Division are entirely General Fund.
- School-Based Mental Health in the Behavioral Health Division are entirely General Fund.

- Medicaid contracting uses a 50 percent Medicaid Federal Funds and 50 percent General Fund split, which is the administrative match rate.

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Personal Services	$1,395,239	$39,986	$570,674	**$2,005,899**	9	7.00

Oregon Health Authority: Behavioral Health Initiative Enhanced Racial Equity Analysis

Kids Integrated Delivery in Schools (KIDS): Increasing access to Mental Health Services
Policy Package #555

1. Outcomes

What outcomes will this POP achieve? Please be specific and connect the outcomes to the Governor's priorities in homelessness, behavioral health, or education.

Through this POP, OHA aims to increase access to mental health supports and services to students through multiple investments that provide statewide infrastructure for supports and services that can be tailored to local needs. We know that schools are an optimal place for students to receive mental health supports and services and propose investing in a comprehensive school mental health system in partnership with ODE and local communities. This multi-pronged approach complements and expands on existing resources to increase access to services and supports for youth and families in a coordinated and efficient way that is responsive to local needs and builds on local assets. While this POP is focused primarily on health outcomes and is aligned with the Governor's behavioral health priorities, we know that students who experience poor mental and physical health are less likely to attend school and have less favorable educational outcomes.

We aim to:

- Maximize Medicaid billing for school-based health services
- Expand mental health services through the School-Based Health Center Program
- Expand mental health services through the School-Based Mental Health Program
- Support culturally specific youth suicide prevention efforts
- Build capacity within OHA to coordinate and align efforts across the agency and with ODE and other state agencies

2. Racial Equity Strategy

What are the racial disparities in the population that are intended to be served through this program (e.g., racial disparities in substance use treatment access). How will this POP, including the implementation of the POP, address these disparities and equitably serve Oregonians?

According to the Oregon's 2022 Student Health Survey:

- 26% of 6th graders, 32% of 8th graders and 40% of 11th graders experienced depressive symptoms in the past year.
- 14% of 6th graders, 18% of 8th graders and 18% of 11th graders reported self-harming in the past year.
- 8% of 6th graders, 13% of 8th graders and 16% of 11th graders reported considering suicide in the past year.
- Youth disproportionately impacted by health inequities were more likely to report these mental health concerns:
  - 55% of American Indian / Alaska Native 11th graders reported experiencing depression in the past year; 35% contemplated suicide and 17% attempted suicide in the past year.
  - 63% of gay / lesbian 8th graders reported experiencing depression; 41% contemplated suicide and 13% attempted suicide in the past year.

Young people of color are often excluded from the school environment through suspension or expulsion in much larger numbers than white students, where white students are offered more supportive interventions such as skill building and therapy. Through school-based health centers and school-based mental health programs, OHA has focused supports for youth across the state, particularly in rural areas where often there is little or no other access to mental health supports. Expansion of mental health within school-based health centers and school-based mental health will

be centered in the voices of students with lived experience, and if funded, school-based mental health services will expand through an RFP focusing on supports providing culturally responsive services for youth.

Oregon's youth suicide rate has shown a downward trend over the years 2019 – 2022, but this trend was not equal across all racial groups. While white youth saw a decrease over these years, youth who identify as Black or Latine did not experience the same decrease, and Tribal youth have a disproportionately high rate of suicide. Culturally infused and targeted youth suicide prevention efforts are designed to specifically address these disparities and save lives.

Finally, providing culturally infused mental health and suicide prevention trainings for educational staff and those working within OHA-funded programs will build cultural humility and responsiveness within the school environment. While these supports were needed prior to the pandemic as well, studies have shown[1] that school attendance has dropped significantly following the return to school after COVID-19, particularly for youth of color. Young people need to feel a sense of belonging and community within their school setting to fully engage in their education.

3. Accountability to Racially Equitable Outcomes

a. For POPs that are improving or expanding existing programs, how does the agency currently track quantitative and/or qualitative data to evaluate program outcomes, including by race and ethnicity? Will this POP improve the evaluation of outcomes by race/ethnicity to improve program evaluation and administration?

School Medicaid:

[1] Vidal C, Hinson L, Bartolini E. School Absenteeism and the COVID-19 Pandemic: The Role of Pediatricians. Clin Pediatr (Phila). 2024 Jan;63(1):5-9. doi: 10.1177/00099228231174772. Epub 2023 May 19. PMID: 37208918; PMCID: PMC10200804.

To evaluate the effectiveness of implementation activities, OHA will review data and community partner input to monitor and document increased service utilization in school settings. OHA will review the following and revise implementation activities as needed:

- School Medicaid Surveys will solicit feedback from local education agencies (LEAs) on project activities, infrastructure needs, and implementation challenges.
- Participation numbers in technical assistance activities will be gathered and reviewed following each activity.
- Claiming and enrollment data will be analyzed on an annual basis to understand LEA participation trends, increases or decreases in billing and to identify regions or target LEAs for engagement in technical assistance activities.

School-Based Health Centers:

State certified SBHCs must submit data at least twice annually on all encountered visits at the SBHC. Required variables include Medicaid ID, insurance status, date of birth, race, ethnicity, preferred language, and visit procedure codes, among others. The SBHC Program is also preparing to support all SBHCs to come into compliance with REAL-D / SOGI data collection standards as part of OHA's HB 3159 implementation. SBHCs also submit annual narrative reports as part of the Mental Health Expansion Grant.

While the encounter data provides demographic data and can illustrate trends in service utilization over time, it is also necessary to measure the impacts this policy package will have on the quality of services. Involving youth to shape their health care is essential to address health inequities and the SBHC program will continue to prioritize youth-engagement activities. The updated SBHC Standards will require SBHCs to routinely gather feedback from youth and families to improve clinical access, quality of care, breadth of service, and/or comfort, design, and appearance of the

SBHC facility. Additionally, through the expansion of the Youth-Led Projects Grant, upcoming changes related to youth participation in certification site visits, and a partnership with OHA's statewide YAC the SBHC Program can better assess the impacts of the revised certification standards.

School-based Mental Health:

School-based Mental Health programs will continue to capture information on the youth served through school-based therapy supports. Current outcomes for this service include number of youth served, REAL-D and SOGI data for youth served to ensure equitable access and supports, and number of supports provided by a culturally responsive provider. With this expansion in school-based mental health services, OHA would continue to monitor these outcomes, in addition to impacts on the birth to prison pipeline, supporting youth in districts with the highest number of youth of color overlaid with the highest number of school suspensions and expulsions as measured by ODE, to provide proactive support and validation of youth experiences of systemic racism. Programs are also focused in rural areas of Oregon where often there are no other providers; an additional outcome of expansion is access to culturally responsive providers through both in-person and telehealth providers. Finally, current programs do not require partnership or supports of tribal partners; expansion contracts would require an MOU with the local tribal partners to provide school-based supports for tribal youth, if desired by the tribe.

Youth Suicide Prevention:

The youth suicide prevention team closely monitors suicide information from across the state, comparing rates within racial and ethnic groups. This close attention will continue as targeted youth suicide prevention efforts are expanded to determine the impact on these vulnerable groups.

- Outcome data: Protective factors reported by youth on Student Health Survey by race/ethnicity
- Outcome data: Emergency department visits by race/ethnicity
- Outcome data: Youth suicide deaths by race/ethnicity
- Implementation data: Number of trainers for culturally infused suicide prevention trainings
- Implementation data: Number of school staff trained in culturally infused suicide prevention trainings
- Implementation data: Number and reach of tribal suicide prevention activities

Strategic Coordination:

- Progress toward implementation of the ODE-OHA MOU focused on ensuring equitable education and health outcomes on Oregon. Work is currently underway to select a set of metrics to measure progress.
- Increased engagement of CBOs, and children and families directly in the analysis, communication, and use of child health data.
- New data equity-informed child risk/population data reporting as well as CCO reports that identify complexity factors for children and families to enable intervention and care coordination.

b. For POPs that are creating new programs, how will the agency track quantitative and/or qualitative data to evaluate program outcomes, including by race/ethnicity for the purpose of evaluating and improving program implementation to advance racial equity.

This POP will model a newly launched qualitative feedback tracker used at OHA, first piloted for the 1115 waiver process, to capture, monitor, and address community and partner feedback to

inform program and policy improvements. Additionally, research analysts will specifically monitor access to care, utilization, and denials based on REAL-D SOGI data and geographic location.

4. Equitable Administration

In administering resources in this POP, how will you create contracting and/or granting opportunities for culturally specific and culturally responsive community-based organizations and disadvantaged, minority, women, and emerging small businesses?

With the expansion of school-based mental health services through RFP, OHA will prioritize funding for programs offering therapeutic supports through culturally specific and culturally responsive community-based organizations. Youth engage in, and remain in, clinical supports when they feel that the provider of those services shares their experiences and community[2], and a key element of school-based service provision is improving youth access to culturally responsive care.

This POP also provides funding to continue existing programs targeting Black youth suicide rates. OHA's youth suicide prevention team has developed the Black Youth Suicide Coalition, working with Black leaders from across the state, and has contracted with REAP, a culturally specific organization for suicide prevention trainings. The team has also begun working with Dr. Joyce Chu, a Palo Alto University professor and researcher who has developed culturally infused suicide prevention trainings, and has begun expanding access to the Be Sensitive, Be Brave suicide prevention training which builds upon these principles. In addition, the team works closely with the Nine Federally Recognized Tribes of Oregon through their suicide prevention work.

Oregon Health Authority
2025-27 Policy Package

Division:	Medicaid; Behavioral Health Division
Program:	Medicaid Behavioral Health: Medicaid Safety Net Policy
Policy package title:	CCBHC Expansion
Policy package number:	556
Related legislation:	House Bill 4002 (2024), House Bill 5204 (2024)

Summary statement:

This policy package implements House Bill 4002, which mandates OHA to secure federal approval via a State Plan Amendment (SPA) for CCBHC program funding before the current demonstration expires, ensuring strategic leveraging of federal financial support for statewide expansion. OHA plans to integrate fifteen additional clinics in 2026, expanding beyond the existing twelve to meet the statewide requirement. Funding for this POP is needed to provide services at these 15 new clinics and to establish two crucial staff positions essential for supporting statewide expansion by ensuring Medicaid compliance, optimizing payment models, developing policies, coordinating programs and fostering collaboration. Without the funding in this POP, OHA cannot fulfill its statutory obligations, ensure compliance with federal regulations, and expand access to vital behavioral health services statewide, which is critical for Oregon's comprehensive mental health care delivery.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$14,096,922**	**$0**	**$33,708,295**	**$47,805,217**	**2**	**1.50**

Oregon Health Authority: 2025-27 Policy Package

Purpose

1. What problem is OHA trying to fix or solve?

House Bill 4002 (2024) requires that prior to the expiration of the demonstration, OHA must seek federal approval through a State Plan Amendment (SPA) to receive federal financial participation in the cost of the Certified Community Behavioral Health Clinic (CCBHC) program. The SPA will require the CCBHC program to be statewide.

Oregonians experience multiple barriers to behavioral health services, due to a workforce shortage, a bifurcated system, and limited access to low-barrier treatment services within their community. In the evaluation of Oregon's CCBHC program, evaluators found that Oregon CCBHCs demonstrated a 4.9 percent increase in the number of individuals served and increases in the number of services per person. Clinic leaders attributed these increases to their ability to hire and retain more staff, greater flexibility in providing services "outside of the four walls," and greater flexibility in community outreach. These flexibilities are primarily the result of the prospective payment system (PPS) model that pays for the CCBHCs. The PPS model is a cost-based, clinic-specific rate paid per member per day, regardless of the number or type of services provided. The rate allows clinics to include both the direct and indirect costs of services, giving them greater flexibility in how services are provided. Because the rate is the same regardless of the number or type of services, it creates parity between mental health and substance use services and greater flexibility within backend billing practices to offer integrated care. It also allows clinics to cover transportation and liability costs more sustainably when providing services within the community, thereby increasing their ability to provide services where people are as opposed to solely within the physical location of the clinic. Lastly, the PPS model allows clinics to be creative in how they conduct community outreach. Clinics have been able to host community events and free services to community members as a result of the financial sustainability the PPS model creates.

Currently, Oregon has 12 CCBHCs covering 14 of 36 counties. Expanding the CCBHC model will allow more clinics to shift away from a fee-for-service payment model to the more flexible PPS model. This will allow more equitable distribution of resources to clinics in counties that currently do not have CCBHCs and increase services to Oregonians within those communities.

OHA anticipates integrating fifteen clinics across the state into the program (in addition to the twelve clinics currently part of the demonstration), eight clinics beginning in April 2026, and seven more in October 2026.

OHA has funds in its base budget to pay for services at established CCBHCs but lacks funding to pay for services provided by new clinics that come online in 2026. This POP would secure funding for CCBHC services at 15 new clinics. In addition, this POP would add two new staff positions that were not funded through House Bill 5204 (2024), both of which are needed to effectively implement House Bill 4002 and support statewide expansion.

Without this funding, the CCBHC program would be unable to grow and reach statewide status, as there is no alternative funding source for new clinics. This would render OHA incapable of meeting its statutory obligation to pursue a SPA and deny broader access to high-quality, integrated, holistic behavioral health care.

2. What would this policy package buy and how and when would it be implemented?

The policy package would fund services at future CCBHCs for the 2025-27 biennium and would be required on an ongoing basis. This package would also fund two new staff positions to provide crucial technical assistance for clinics to achieve CCBHC status successfully and support the

effective development and implementation of infrastructure necessary to sustain the program and ensure compliance with federal standards and reporting requirements.

3. **How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes? How does this policy package further OHA's mission and align with its strategic plan?**

   This policy package would address health inequities by significantly enhancing access to integrated behavioral health services. The addition of fifteen new clinics will enable the delivery of more comprehensive care, encompassing mental health, substance use, and primary care services. This expansion is particularly beneficial for groups experiencing disproportionate impact that often encounter barriers to health care access. The commitment of CCBHCs to serve individuals regardless of payment type or ability to pay supports broader efforts to diminish disparities in health care access. Specifically, CCBHCs bolster community-based services through provision of diverse services, including street outreach, school-based programs, home-based care, services within shelters, and therapists integrated into primary care and other community settings. Moreover, the program has demonstrated significant reductions in inpatient and emergency department visits among American Indian/Alaska Native and Black/African American service users, reflecting improved treatment outcomes for these groups as well as for Black adults and children and Latina and American Indian/Alaska Native children.

   Specifically, the 2023 Evaluation of the Oregon CCBHC program conducted by Oregon Health Sciences University-Portland State University (OHSU-PSU) School of Public Health found,

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

"Analysis of the Mental Health Statistics Improvement Program (MHSIP) data provides compelling evidence of improvements in access to behavioral health care across various perspectives. Specifically, rural adults and urban children and youth reported higher satisfaction levels with access to care, indicating that the service expansion has been successful in enhancing access for these groups. The data also revealed that Black/African American adult respondents reported the most significant improvements in their perception of access to care. This finding is especially noteworthy as this group has historically experienced, and continues to encounter, significant barriers in accessing health care due to systemic racism present in both the health care system and society at large."

Quantifying results

4. What are the long-term desired outcomes?

The long-term desired outcome is to transform health care delivery through integrating mental health, substance use, and primary care services and to improve health outcomes by providing timely and comprehensive care that prevents the worsening of behavioral health conditions and reduces reliance on emergency services and hospitalizations. In addition, expanding geographic coverage of CCBHCs across Oregon will reduce health care disparities among communities with insufficient resources and infrastructure and promote equitable access to critical services. In addition, because the CCBHC model allows providers to meet people where they are, outside of the four walls of the clinic, and requires care coordination with a broad range of providers and organizations serving the individual, they typically have greater reach within their communities compared to provider organizations operating under non-CCBHC models.

The expansion also focuses on systemic improvements in health care delivery through collaborative care models. By strengthening connections between CCBHCs, coordinated care organizations

(CCOs), primary care providers, and community services, the desired outcome is to deliver more coordinated and patient-centered care and achieve cost savings by reducing the burden on emergency care resources. This approach improves health outcomes and enhances patient satisfaction and overall efficiency in health care delivery statewide.

5. How will OHA measure the impacts on health inequities of this policy package?

To measure impacts on health inequities, OHA will track several key metrics related to Certified Community Behavioral Health Clinics (CCBHCs):

- **Number of clinics certified as CCBHCs statewide**: This metric provides an overview of the availability of CCBHCs across the state.
- **Number of CCBHCs in compliance with federal and state standards**: Monitoring compliance ensures that CCBHCs meet required quality and operational standards.
- **Hospitalization and ED Utilization:** Analyzing utilization data helps assess the impact CCBHCs have on utilization of higher levels of care.
- **Increased enrollment of individuals in CCBHCs**: Tracking enrollment numbers indicates the accessibility and utilization of CCBHC services by the community.
- **Demographic diversity of individuals enrolled in CCBHCs compared to the community**: Analyzing demographic data helps evaluate whether CCBHCs are effectively reaching and serving diverse populations within their communities.

Regarding data collection and metrics:

- **Reduction in emergency department visits and hospitalizations**: This metric requires collaboration with HPA (Health Policy Analytics) to establish how to effectively measure and track these outcomes.

- **Follow-up and all-cause readmission metrics**: These are already included in current data collection efforts.
- **Certification and compliance**: Monitored through licensing and certification processes.
- **Enrollment increases**: Tracked through caseload characteristics in metrics.
- **Comparison to community demographics**: Conducted through needs assessments, with consideration for adding demographic breakdowns if supported by the new data template.

How achieved

6. What actions have occurred to resolve the issue prior to requesting a policy package?

According to the 2023 Evaluation of the Oregon CCBHC program conducted by the OHSU-PSU School of Public Health,

> "The CCBHC program has increased access to behavioral health treatment for residents statewide (4.3%); this is proportionately higher in rural and remote areas (23.4% and 18.3%, respectively) where substance use disorder treatment services have substantially increased. Racial and ethnic diversity of service users also increased, primarily by Hispanic/Latino/a/x service users ... The prospective payment system (PPS) model enhanced service delivery "outside the four walls" of the CCBHC clinics, enabling CCBHCs to engage service users in non-clinic settings. CCBHCs have the potential to play a meaningful and central role in Oregon health systems reform and transformation ... Future CCBHC sustainability and expansion efforts need to build the capacity of CCBHCs to provide greater access, improve coordination of care, and center equity."

The Department of Administrative Services Legislative Fiscal Office directed OHA to pursue CCBHC program funding via a POP. In addition, OHA reviewed its budget and funding sources and determined there was no alternative financial mechanism for supporting direct payment of CCBHC

services for new clinics in the 2025-27 Biennium. Regarding the two new positions requested in this POP, OHA reviewed its current staffing resources and determined that existing resources cannot meet the staffing needs for CCBHC expansion.

7. What alternatives were considered and what were the reasons for rejecting them?

The only alternative to this POP would be to restrict the CCBHC program to the current 12 clinics, preventing OHA from meeting its statutory obligation to seek a state plan amendment and expand the program statewide. This would further inequities across Oregon because some communities would have CCBHCs, and others would not.

According to the evaluation of Oregon's CCBHC program conducted in 2022, CCBHCs demonstrated a 4.9% increase in number of individuals served between 2017 and 2021. Rural and remote communities saw the greatest increase in number of individuals served, with a 16.1% and 22.5% increase, respectively. In addition to serving more individuals, CCBHCs provided more mental health services and substance use services per person between 2017 and 2019. CCBHCs saw additional increases in mental health services per person between 2019 and 2021.

Populations with the greatest increase in access to services are individuals under 25, individuals over 65, women, and the Hispanic/Latino/a/x population. CCBHCs also demonstrated an increase in services provided within schools, homes, inpatient and residential treatment settings, shelters, and carceral settings. The flexibility to provide services "outside the four walls" allows CCBHCs to reach the most vulnerable populations where they are and provide more flexible, low-barrier treatment options.

8. **What other agencies, programs, community partners or stakeholders are collaborating on this policy package?**

   Acute care hospitals, Oregon State Hospital, SRTFs, Disabilities Rights Oregon, Oregon Law Center, System of Care Advisory Council, NAMI, ODHS, Providers

9. **Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.**

   No.

10. **What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?**

    Most clinics in the CCBHC demonstration program are community mental health programs (CMHPs), and we expect that CMHPs will continue to be a provider type that has strong interest in joining the program in the future. Therefore, the funding in this POP directly enables CMHPs across Oregon to pursue CCBHC status.

11. **Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.**

    No.

Staffing and fiscal impact

Implementation date(s): April 2026 for first eight clinics, October 2026 for another seven clinics

End date (if applicable): Ongoing

12. What assumptions affect the pricing of this policy package?

Two main assumptions impact the pricing of this policy package:

1. All future costs for expanding CCBHCs match present costs. This, in turn, is predicated on the assumption that the way clinics are financed and operated will not substantially change from the current state.
2. All 15 clinics will come online within the first year, and all 12 current clinics will remain online. OHA will work to expand as much as possible, but House Bill 4002 explicitly made participation in the CCBHC voluntary, which limits OHA's ability to control market entry.

13. Will there be new responsibilities for OHA and/or Shared Services? Specify which programs and describe their new responsibilities.

Other than establishing the two requested staff positions, this POP does not create additional impacts or responsibilities associated with the CCBHC program beyond those already expected from implementing of House Bill 4002.

14. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

Adding 15 additional clinics will increase the number of services and the number of individuals and families served.

15. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This policy package would establish two permanent, full-time positions for Medicaid as follows:

- **Research Analyst 3:** Review and analyze clinic data associated with Medicaid compliance, rate setting for Medicaid Fee for Service (FFS) and Coordinated Care Organization (CCO) populations, and coordinate with the MMIS business team to make appropriate system changes for appropriate payments to clinics. Based on clinical data and rate review, the position will also research appropriate payment models to maximize services and leverage Medicaid match for CCBHCs. The RA3 will also research, recommend, and implement ways to make the wraparound payment process for the CCO population more efficient and reduce risks of retroactive error correction in payments.

- **Operations and Policy Analyst 3**: Support Program & Policy Development for statewide infrastructure. The primary role of this Medicaid position will include supporting the CCBHC Program Administrator (OPA4) in BH in developing and implementing program development and policy changes to the federal CCBHC program via its State Plan Amendment. Lead one-off research/application on policy academies and initiative development within the CCBHC model/integration with Oregon initiatives like 988 and M110. Help foster relationships/develop applications for CCBHC expansion grantees who may later join the CCBHC State Plan Amendment. Support workload and coordination needed for new contract administration, rule changes, and steering/advisory committee recruitment/retention for the program of 30+ CCBHCs. Develop topics/supporting documents/agendas for the ongoing learning collaborative for all CCBHCs statewide; facilitate information sharing for clinics. Support the development of contract negotiations with CCO from a programmatic lens. This position is distinct from the current position, whose primary role is supporting the operations of CCBHC billing, such as cost

report review, support for rate setting, technical assistance on billing issues, support for MMIS for operationalizing billing requirements, and billing guidance and support for current and on-boarding clinics.

16. What are the start-up and one-time costs?

There is no specific allocation of funds for one-time or start-up costs. However, these costs may be factored into a CCBHC's PPS payments, funded through this POP.

17. What are the ongoing costs?

Two full-time, permanent staff positions in Medicaid; direct payments for CCBHC services via the PPS for the 2025-27 biennium, which will fluctuate based on daily service utilization.

18. What are the potential savings?

Oregon should see the greatest cost savings via reduced utilization of acute care, such as emergency department and inpatient hospital stays, based on historical CCBHC performance. For example, in the first four years of the demonstration program, emergency department use for mental health conditions declined by 11–14 percent, and inpatient hospitalizations for mental health conditions declined by 13–22 percent. There was also a statistically significant decline in emergency department and inpatient stays for physical health conditions.

19. What are the sources of funding and the funding split for each one?

This policy package includes General Fund and Medicaid Federal Funds. Positions are priced at 50 percent General Fund and 50 percent Federal Funds, which is the Medicaid administrative match

rate. The fund split for clinics/services was calculated using a weighted average match rate based on eligibility category.

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Personal Services	$184,917	$0	$184,917	$369,834	2	1.50
Services & Supplies	$9,244	$0	$9,244	$18,488

Positions	2				**2**
FTE	1.50				**1.50**

Certified Community Behavioral Health Clinics
Policy Package #556

1. Outcomes

What outcomes will this POP achieve? Please be specific and connect the outcomes to the Governor's priorities in homelessness, behavioral health, or education.

Expanding Certified Community Behavioral Health Clinics (CCBHCs) will increase access to behavioral health services, including screening for health-related social needs, targeted case management, supported employment/supported housing, and substance use services. The 2023 Oregon CCBHC evaluation highlighted significant increases in access to services. From 2019-2021, including the onset of the COVID pandemic, CCBHCs served 4.9 percent more individuals, while non-CCBHC Community Mental Health Programs (CMHPs) experienced a 4.2 percent decrease in the number of people served. The greatest improvements in access occurred in rural and remote areas of Oregon and among individuals who identify as American Indian/Alaska Native, Asian, Black/African American, Hispanic/Latino/a/x, Middle Eastern, or Native Hawaiian/Pacific Islander, and those who speak Spanish as their primary language.

2. Racial Equity Strategy

What are the racial disparities in the population that are intended to be served through this program (e.g., racial disparities in substance use treatment access). How will this POP, including the implementation of the POP, address these disparities and equitably serve Oregonians?

There are numerous federal CCBHC requirements that address racial disparities in behavioral health care access, care experience, and outcomes:

- CCBHCs are required to provide culturally specific and linguistically appropriate services.
- CCBHCs are required to collaborate with other system partners to provide services in community settings, including in settings where American Indian/Alaska Native and Black/African American are disproportionately represented, such as juvenile and criminal justice agencies and facilities.
- Many CCBHCs have street outreach services and drop-in services to provide care to those experiencing or at risk of experiencing houselessness, which disproportionately impacts people of color.
- CCBHCs are required to conduct a community needs assessment to identify health disparities in their community and to create a plan to address such disparities.
- CCBHCs are required to develop a continuous quality improvement plan that must have an explicit focus on addressing health disparities and a plan for how the clinic will use data to track and improve outcomes for people facing health disparities.
- CCBHC staff are required to receive cultural competency training aligned with National Standards for Culturally and Linguistically Appropriate Services (CLAS).

The program has demonstrated significant reductions in emergency department and inpatient utilization. CCBHC consumer survey data has revealed that Black/African American adults report the most significant improvements in their perception of access to care.

3. Accountability to Racially Equitable Outcomes

a. For POPs that are improving or expanding existing programs, how does the agency currently track quantitative and/or qualitative data to evaluate program outcomes, including by race and ethnicity? Will this POP improve the evaluation of outcomes by race/ethnicity to improve program evaluation and administration?

   CCBHCs are required to report on five clinic-led metrics and 15 state-led metrics. These metrics have been updated at the federal level to include additional breakouts by race and ethnicity to better assess the outcomes by race/ethnicity. The state-led metrics include a survey to gather qualitative data from recipients regarding their care. In Fall 2024, as a result of the HB 4002 (2024) investment, the CCBHC team will have a dedicated, full-time Research Analyst 4 who will be responsible for program reporting. This position—which will sit in the Health Analytics unit—will support ongoing analysis of program and clinic outcomes and enable the team to advance analytic work beyond what is currently being done. In addition, the two new staff positions funded under this POP will add team capacity—directly or indirectly through task-shifting—to collect, analyze and integrate outcomes data in program reporting and clinical improvement initiatives.

b. For POPs that are creating new programs, how will the agency track quantitative and/or qualitative data to evaluate program outcomes, including by race/ethnicity for the purpose of evaluating and improving program implementation to advance racial equity.
   Not Applicable.

4. Equitable Administration

In administering resources in this POP, how will you create contracting and/or granting opportunities for culturally specific and culturally responsive community-based organizations and disadvantaged, minority, women, and emerging small businesses?

CCBHC is a voluntary program open to all providers meeting the criteria. SAMHSA offers grants to help build capacity, and the prospective payment system rates for CCBHCs are clinic-specific rates to allow clinics to better meet costs, specific to the population and reflective of the local communities they serve and grow their services over time.

We will work with the Behavioral Health Division's Office of Equity and Community Partnerships and other agency units that have established relationships with culturally specific organizations to ensure that culturally specific providers are informed of expansion opportunities and to provide targeted support and technical assistance to those who wish to pursue CCBHC certification.

Alcohol & Drug Policy Commission
2025-27 Policy Package

Division:	Budget is situated within the OHA Behavioral Health Division
Program:	Alcohol & Drug Policy Commission
Policy package title:	Alcohol & Drug Policy Commission Sustainability
Policy package number:	557
Related legislation:	HB 4002 (2024); HB 4098 (2022); HB 4137 (2018); HB 3353 (2009)

Summary statement:

The Alcohol and Drug Policy Commission (ADPC) aims to enhance the efficiency and effectiveness of substance use disorder (SUD) services in Oregon. Created in 2009, ADPC develops and implements a comprehensive addiction, prevention, treatment, and recovery plan for the state. This policy package would provide permanent funding for three positions within the ADPC, initially funded temporarily for a specific study in 2024. These positions are crucial for maintaining subject matter expertise, stakeholder communication, and research analysis. It also requests $225,000 for ongoing strategic plan contracts. Without these positions, ADPC will lack expertise and resources, impairing guidance on SUD practices, stakeholder communication, and data analysis. This can worsen health outcomes, increase disparities, and elevate the economic burden of SUDs in Oregon.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$750,181**	**$0**	**$92,682**	**$842,863**	**0**	**2.25**

Alcohol & Drug Policy Commission: 2025-27 Policy Package

Purpose

1. What problem is OHA trying to fix or solve?

The Alcohol and Drug Policy Commission (ADPC) was created by the Legislative Assembly in 2009, via passage of House Bill 3353. The statutory charge of the ADPC is to improve the efficiency and effectiveness of substance use disorder services in Oregon. The ADPC develops, disseminates, and implements the comprehensive addiction, prevention, treatment and recovery plan for the state.

In line with this charge, the ADPC must be appropriately staffed to study substance use-related issues, convene stakeholders and state agencies, and bring forth recommendations to the Governor and the Legislature. The requested positions are necessary to achieve the minimum statutory requirements for the ADPC. The 2024 legislature approved and funded the positions, but only for a limited duration related to a specific study directed by HB 4002 (2024).

2. What would this policy package buy and how and when would it be implemented?

The POP would fund the three (3) permanent FTE allocated to the ADPC for a limited duration during the 2024 legislative session related to studies directed by House Bill 4002 (2024). If ADPC had been fully staffed before the 2024 session, the limited duration positions would not have been necessary. Studies such as those directed in HB 4002 are likely to become more frequent and are in line with the ADPC statutory role. Making the positions permanent will provide stability and sustainability to the ADPC to continue serving its advisory and oversight role with state agencies, the Governor and the legislature.

Without these positions, the ADPC will be unable to provide necessary subject matter expertise on substance use disorder (SUD) treatment best practices; adequate communication with community

partners and policymakers on SUD trends, barriers and responses in the state; and adequate research analysis and data sharing to effectively track outcomes and indicators in alignment with the strategic plan.

The POP also requests the continuation of $225,000 in contract funding, which is one-half of the $450,000 allocated in the 2024 short session. This funding will allow the ADPC to continue contracting subject matter experts and consultants for the development and implementation of the 2026-2030 and beyond strategic plans.

Given the state's SUD prevalence, rates of overdose and other substance use-related deaths, the quickly evolving illicit drug market and health disparities related to substance use disorder, there is a high need for continued contracts to study emerging issues and treatments, evaluate best practices and make recommendations to the Governor, the legislature and state agencies.

3. **How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes? How does this policy package further OHA's mission and align with its strategic plan?**

   Reduced racial and ethnic disparities related to substance use disorder is one of the three main impacts of the ADPC Strategic Plan. Adequate staffing will support ADPC refined strategies in the 2026-30 strategic plan, implementation of those strategies, and tracking of outcomes, particularly outcomes related to health disparities. Without ongoing support of the positions, the ADPC will not have a dedicated Research Analyst to develop enhanced data across state agencies, a Public

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

Affairs Specialist to develop strategic communications to all communities and stakeholders, or an additional Policy Advisor to further develop strategies and move forward health equity outcomes.

Quantifying results

4. What are the long-term desired outcomes?

The long-term outcomes of the ADPC work are to reduce the prevalence of SUDs in Oregon, reduce deaths related to SUDs, and reduce health disparities related to SUDs. Progress toward these outcomes will also reduce the economic burden to the state resulting from SUDs.

5. How will OHA measure the impacts on health inequities of this policy package?

The ADPC tracks a number of health equity measures over time to measure our progress as a state. For instance, if ADPC strategies are implemented, we would expect racial and ethnic disparities in deaths related to overdose to decrease over time.

How achieved

6. What actions have occurred to resolve the issue prior to requesting a policy package?

The ADPC unsuccessfully advocated for permanent positions during the 2024 legislative session.

7. What alternatives were considered and what were the reasons for rejecting them?

None.

8. **What other agencies, programs, community partners or stakeholders are collaborating on this policy package?**

   The ADPC Commissioners support the package. The additional positions will support all of the ADPC participating state agencies.

9. **Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.**

   No.

10. **What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?**

    This would affect the ADPC 14 participating state agencies by supporting collaboration, reducing duplication and increasing efficiency, and moving forward a cohesive strategy on SUDs across state agencies.

11. **Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.**

    No.

Staffing and fiscal impact

Implementation date(s): July 1, 2025

End date (if applicable): Ongoing

12. What assumptions affect the pricing of this policy package?

Assumptions include that the Governor and state agencies, including OHA, will continue to prioritize the need for a comprehensive strategy for SUD services. Oregon continues to experience increasing rates of overdose and overall high numbers for SUDs. Overdose death rates for America Indian/Alaska Native and Black Oregonians continue to increase. Oregon also experiences one of the highest prevalence rates of SUDs in the country.

13. Will there be new responsibilities for OHA and/or Shared Services? Specify which programs and describe their new responsibilities.

No. The positions will already be hired and receiving shared services support.

14. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

N/A.

15. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

The POP would modify three limited duration positions by making them permanent:

- 1 Research Analyst 4 (RA4): The purpose of this position is to play both lead and support roles in various ADPC data-related projects. These projects include a cross-agency substance use disorder data assessment, research and recommendations for substance use disorder outcome and performance measures as they relate to policy and strategy, and the creation and facilitation of a committee of data analysts from ADPC participating state agencies aimed at improving efficiency and effectiveness of substance use services. This position will work

closely and collaboratively with another Alcohol and Drug Policy Research Analyst within the OHA Public Health Division and will collaborate with senior policy and communications staff at the ADPC.

- 1 Public Affairs Specialist (Public Affairs Specialist 3 (PA3)) responsible for developing the ADPC long-term communications and stakeholder engagement strategy. The ADPC develops and publishes a 5 year comprehensive plan, along with progress reports to the Legislature, Governor and public in July of each even-numbered year. The ADPC also holds monthly public meetings of the Commission and its 5 committees. The position is responsible for developing a strategy to engage policymakers and the public in the work of the ADPC as well as best practice strategies for substance use disorder (SUD) services, as well as reducing stigma and addressing health disparities. A key component to breaking down siloes between state agencies, local governments and SUD service providers will continue to be communicating on best practice research, emerging trends, available funding and community education and engagement to reduce stigma and address health disparities.
- 1 Senior Policy Advisor (OPA4) to serve as a subject matter expert and policy and implementation lead for SUD treatment and recovery services related to the ADPC and the state strategic plan and all related studies and implementation strategies directed by the legislature and Governor. This requires expertise in relating state policies to quality clinical outcomes. This Senior Policy Advisor is currently leading the ADPC study and strategic plan development on opioid use disorder treatment access directed by HB 4002 (2024). The need for a subject matter expert in treating an ever-evolving illicit drug supply will remain an essential component of the ADPC team through the next five year strategic plan and beyond. It is also expected that the ADPC will move forward with standardized definitions and standard pathways for treatment across all state agencies. This work cannot be accomplished without this position.

16. What are the start-up and one-time costs?

None.

17. What are the ongoing costs?

$806,244 ongoing GF, $908,818 TF. This includes the ongoing costs of staff and ongoing contract needs anticipated for ADPC's statutorily required strategic plans and bi-annual progress reports.

18. What are the potential savings?

There are potential savings across state agencies through the avoidance of duplication and implementation of strategies that will maximize federal funding.

19. What are the sources of funding and the funding split for each one?

The total request is for $908,818. Of the total request, 89 percent is General Fund and 11% is Medicaid Federal Funds.

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE

Alcohol & Drug Policy Commission Sustainability
Policy Package #557

1. Outcomes

What outcomes will this POP achieve? Please be specific and connect the outcomes to the Governor's priorities in homelessness, behavioral health, or education.

The POP aims to support the three stated objectives of the Alcohol and Drug Policy Commission ("ADPC") in the 2020-25 Strategic Plan, all of which support the Governor's priority of improving the behavioral health system:

- Reduce the number of Oregonians experiencing substance use disorder.
- Reduce substance-use related deaths.
- Reduce health inequities related to substance use.

Addressing health inequities is a central tenet of the current ADPC strategic plan and is expected to be a continued goal of the 2026-30 strategic plan with actionable strategies that will be measured for effectiveness. Oregon is currently trending in the wrong direction – American Indian and Alaska Natives are twice as likely (99.8 per 100k) to die from alcohol-related causes than Oregonians as a whole (51.0 per 100k). In 2022, both Black or African American Oregonians (82.8 per 100k) and American Indian or Alaska Native Oregonians (81.1) were almost 3 times as likely to die from a drug overdose than all Oregonians (30.2). Addressing these disparities will require ongoing, meaningful community engagement, subject matter expertise and enhanced research and analysis capability – currently provided by the ADPC staff in limited duration positions. The existing team of four – the

director, two policy analysts and one executive support specialist – is inadequate to effectively address disparities that require a multi-faceted approach at both the state and local level to address.

The outcome of sustainable funding to the ADPC for staff and contracting resources will be a robust, aligned approach across the ADPC 14 participating state agencies to address health inequities related to substance use disorder.

2. Racial Equity Strategy

What are the racial disparities in the population that are intended to be served through this program (e.g., racial disparities in substance use treatment access). How will this POP, including the implementation of the POP, address these disparities and equitably serve Oregonians?

The ADPC currently measures disparities largely through drug overdose deaths and alcohol-related deaths. While this data is available and essential, other disparity research should be brought into the ADPC's strategies. With a permanent Research Analyst, the ADPC can begin to leverage academic research, data from other governmental agencies in Oregon, and work from across the nation. The Research Analyst will bring together racial disparity data related to SUD across state agencies in order to develop a system-wide approach. The example given in this very question – racial disparities in substance use treatment access – will require a multi-agency response that examines prevention, diagnosis and treatment access across agencies and systems, from child welfare to corrections, using uniform definitions and comparable data. Ongoing analysis and evaluation are necessary to improve the efficiency and effectiveness of strategies chosen by Oregon to address SUD disparities.

Ongoing staff capacity and contracting resources will also be necessary in the development and execution of the next strategic plan to address lack of access to culturally and linguistically specific

providers, access to CLAS (culturally and linguistically appropriate services), access to acculturated Evidence Based Practices, as well as promising, or culturally specific, treatment interventions. The subject matter expertise of the limited duration OPA4 will be essential to this work. The expertise and capacity of the Public Affairs Specialist is necessary to ensure community input and engagement in order to develop strategies that will effectively reduce disparities in Oregon.

3. Accountability to Racially Equitable Outcomes

a. For POPs that are improving or expanding existing programs, how does the agency currently track quantitative and/or qualitative data to evaluate program outcomes, including by race and ethnicity? Will this POP improve the evaluation of outcomes by race/ethnicity to improve program evaluation and administration?

This POP will improve the capacity of the state to evaluate outcomes related to SUD and racial inequities across state agencies. The ADPC currently relies heavily on publicly available national and public health data through OHA. With the introduction of a Research Analyst, the ADPC will expand partnerships with state agencies, bringing in new data sources and developing new relationships to help carry out the Strategic Plan and begin to align data across agencies to hold the entire system accountable for reducing disparities in health outcomes related to substance use disorder. The Research Analyst will also allow the Commission to begin to dive into qualitative information in a way that is currently beyond the capacity of the Commission.

b. For POPs that are creating new programs, how will the agency track quantitative and/or qualitative data to evaluate program outcomes, including by race/ethnicity for the purpose of evaluating and improving program implementation to advance racial equity.

N/A

4. Equitable Administration

In administering resources in this POP, how will you create contracting and/or granting opportunities for culturally specific and culturally responsive community-based organizations and disadvantaged, minority, women, and emerging small businesses?

With respect to contracts and grants, ADPC is committed to prioritizing organizations run by individuals with lived experience of substance use related harms and organizations that provide culturally specific services related to substance use and substance use disorder. Currently, the Commission does not administer contracts or grants for direct services but can and will support culturally specific and peer run providers for engagement, planning and systems alignment work. The 2026-2030 strategic plan will require facilitation and community engagement at a scale not previously achieved by the Commission. Given that, the Commission will need support from community-based organizations to build relationships with communities and to achieve equitable engagement and decision making at a commission level.

The ADPC is also committed to engagement with providers representing culturally specific programs and underserved community members to ensure the commission has internal accountability in decision making and planning, as well as ongoing evaluation of emerging best practices to address health inequities. Ongoing support of the staff positions as well as contracting funding and authority to ensure evaluation, analysis and support of evidence producing projects to address inequities is necessary for the ADPC to continue to address racial disparities in SUD.

System of Care Advisory Council
2025-27 Policy Package

Division:	Budget is situated in the OHA Behavioral Health Division
Program:	System of Care Advisory Council
Policy package title:	Preventing Temporary Lodging due to Complex Care Needs
Policy package number:	558
Related legislation:	Senate Bill 1521 (2024)

Summary statement:

OHA proposes a comprehensive policy package to address the overuse of temporary lodging for youth in foster care, targeting systemic barriers to immediate placement for those with high needs. This initiative involves establishing a dedicated team of administrators and system navigators to collaborate across agencies, including private insurance and Medicaid, to facilitate timely access to necessary services and supports. The package includes a 4-year pilot project allocating funds for preventative services, residential treatment capacity grants, and specialized supports. The goal is to reduce reliance on temporary lodging by enhancing stability and integration of mental health and developmental disability supports for complex cases. This policy aims to improve outcomes by ensuring equitable access to services, fostering agency coordination, and ultimately reducing the incidence of temporary lodging for vulnerable youth in Oregon.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$17,000,000**	**$0**	**$3,000,000**	**$20,000,000**	**10**	**7.50**

System of Care Advisory Council: 2025-27 Policy Package

Purpose

1. What problem is OHA trying to fix or solve?

Foster care provides temporary homes for children who cannot safely remain with their families due to abuse or neglect. The state's Office of Child Welfare, a division of the Department of Human Services (ODHS), is responsible for investigating reports of child abuse or neglect, finding appropriate placements for affected children, and assisting courts with custody decisions. Children and youth in foster care range in age and often have diverse backgrounds and higher needs due to trauma, including the grief of separation from their families.

Once a child or youth enters foster care, they are assigned a permanency caseworker to oversee their case. Following removal, the child or youth may return home under caseworker supervision, though most are placed with resource families or relatives. Children with high needs might be placed in more restrictive institutional settings or behavior rehabilitative programs. The local court decides the duration of the child's stay in state custody. Upon leaving state custody, the child may return home, be adopted through foster care, or enter long-term foster care or guardianship.

Placements for children and youth in the state’s care have historically been insufficient to meet the need. By 2012, the decline in resource homes and group care, complexities from prenatal substance exposure and trauma, and inadequate interagency coordination led ODHS to resort to utilizing temporary lodging, a practice of housing of children and youth in foster care in offices or hotels. Legal action led to a 2018 settlement limiting temporary lodging to situations where no safe alternatives exist. Despite efforts, compliance issues persist, attributed to staffing shortages, increased unmet behavioral health needs, and insufficient resource homes. After the settlement was

reached, ODHS spent more than $25 million in temporary lodging for 426 children and youth in the state's care.[1]

According to ODHS data, an average of 15 children are housed in temporary lodging on any given night in Oregon. Of them, 83% are identified as having intermediate to high needs based on risk factors like self-harm, verbal or physical aggression, running away, problematic sexual behaviors, or substance use. This compares to 32% of the general foster care population having similar levels of needs or risk factors. Most children and youth in temporary lodging (80%) are 13 years or older, while the general foster care population is, on average, under age 12 (70%). The average length of stay in temporary lodging is 12 nights before a suitable placement can be provided, and more than a third of youth experienced temporary lodging before.

In July 2023, U.S. District Court Judge Michael McShane appointed Marty Beyer, a child welfare expert and Oregon psychologist, to analyze and make specific recommendations[2] to the court for terminating the practice of temporary lodging. The analysis found that between January 2023 and September 2023, a total of 92 children and youth in Oregon's foster care system stayed in hotels, constituting less than 2% of the foster care population. They ranged in age from 6 to 19 years old, with the majority (41%) aged 16 to 19, followed by 35% aged 13 to15, and 24% aged 6 to 12. There were more males (60%) than females (40%), and a majority (63%) identified as White (non-Hispanic). A third of the children and youth were from Multnomah County, and 17% were from Lane County.

---

[1] Oregon continued to put foster kids in hotels for years, defying legal settlement

[2] Report of the Special Master CASA for Children, et al. v. State of Oregon et al. United States District Court for the District of Oregon

The length of time children and youth spent in temporary lodging varied widely, from one night to over four months, with some youth experiencing multiple stays over several years. Many had complex backgrounds, including placements disrupted by family issues or behavioral challenges. A significant portion (one third) entered foster care at age 14 or older, often from juvenile or emergency departments, or after being rejected from multiple placements due to unmet behavioral health needs or mental health concerns. The portion of youth entering foster care during their teenage years and experiencing temporary lodging was disproportionately Black, Hispanic, Native, and included several LGBTQIA+ individuals. The Native youth may have been identified as meeting the criteria for Indian Child Welfare Act (ICWA), therefore requiring active efforts to prevent the removal of the youth. ICWA also requires that the youth's Tribe approve the placement and temporary lodging is not considered a culturally appropriate placement setting and the Tribe and youth's attorney may request the court make a no active efforts finding.

The lack of placement options for children and youth with complex needs has been a consistent driver for the use of temporary lodging in Oregon. ODHS has identified the following suite of services which, if consistently accessible to youth, would prevent most instances of temporary lodging:

Service/ Program	Description	Funding
Behavior Rehabilitative Services (BRS)	Behavior intervention, counseling, and skills-training. Services are delivered in a way that integrates a gender-responsive, culturally sensitive, trauma-informed, and age-appropriate or developmentally appropriate approach. Services can be provided in a facility based BRS residential setting,	Medicaid

Service/ Program	Description	Funding
	therapeutic foster home or in the family home. This is not a mental health service.	
Intensive In-Home Behavioral Health Treatment (IIBHT)	Access to a multidisciplinary team of professionals and 24/7 proactive and crisis response to the home. Collaboratively developed treatment plan, services and supports. This intensive level of care is utilized instead of receiving treatment in a facility-based setting.	Medicaid and Behavioral Health General Fund
Psychiatric Residential Treatment Services (PRTS)	Intensive psychiatric services to children and adolescents diagnosed with a mental health condition. 24-hour residential psychiatric care.	Medicaid and Behavioral Health General Fund
Mobile Response and Crisis Stabilization Services (MRSS)	Behavioral Health Crisis mobile response for youth and families. Support to maintain stability in home and in community. Services as the youth specific 988 response.	Behavioral Health
Behavioral Health Treatment Foster Care (BH-TFC)	Combines Behavior Rehabilitation Services (BRS) with community based behavioral health services, provided in a BRS Proctor Foster placement.	Medicaid Behavior Rehabilitative Services Behavioral Health General Fund

Service/ Program	Description	Funding
Mental Health Respite Care	Respite services provide a break for primary caregivers of children and youth with complex needs, as well as a break for youth themselves. Effective respite services are culturally and linguistically responsive, developmentally appropriate, flexible, and provide a range of options, from drop-in childcare to preplanned or overnight crisis services.	Medicaid
Assessment and Evaluation/ Stabilization	Crisis stabilization, Psychological and Neuropsychological Evaluations, medication management, Psychiatric Assessment, screening and recommendations for ongoing service and treatment needs, individualized care planning, behavior support plans, 30 to 60-day facility based therapeutic setting	Medicaid

2. What would this policy package buy and how and when would it be implemented?

OHA proposes the establishment of a dedicated team of administrators and system navigators tasked with identifying and eliminating systemic barriers that hinder immediate placements for youth with high levels of need, thereby reducing reliance on temporary lodging and ensuring that prevention efforts are shared across agencies, including payers such as private insurance and Medicaid. This comprehensive policy package includes a 4-year pilot project aimed at bridging

current gaps in the children's service delivery system, enhancing stability in children's services, and integrating mental health and developmental disability supports for youth facing complex challenges. This policy package would fund the following:

- $40m allocation over two biennia (2025-2029), with $20 million allocated for each biennium.
- $18 million directed towards contracts for preventative services and supports, aimed at preventing youth from entering temporary lodging due to unmet service needs. This funding will also bolster capacity in residential treatment facilities and homes, ensuring access to necessary care for up to 30% of the temporary lodging population.
- $8 million per biennium invested in capacity grants to residential settings, with a goal of increasing residential treatment capacity by 40% in the first year and achieving a cumulative 70% increase by the end of the second year. These grants will support staffing to cater to higher acuity youth and move away from the traditional 'heads in beds' funding model, promoting provider sustainability.
- $10 million dedicated to strategies outlined in the Special Master's Report and endorsed by the Governor's Foster Care Advisory Council, including:
    - Specialized in-home supports to prevent temporary lodging and enhance services for families seeking voluntary placement.
    - One-time contracting for services unavailable in existing settings, such as direct support professionals and extracurricular activities.
    - Child-specific caregiver supports to equip parents and resource caregivers with skills to support youth with intensive needs.
    - Expansion of Response Support Networks for rapid in-home response beyond the Portland Metro area.
    - Telehealth initiatives to provide specialized supports to remote youth, including those from diverse backgrounds.
    - Flexible funding for unique needs not covered by existing streams, aimed at preventing temporary lodging.

- Family support services to prevent removal or support reunification, including home modifications and wellness activities.
- Youth peer support services delivered by Peer Support Specialists to foster engagement in community-based services.

This policy package includes the following Limited Duration positions to staff the initiative:

- 1 FTE Child Welfare Manager (CWM 3) – to lead the initiative focused on allocating and managing funds to meet youth needs in home, community, or residential settings to prevent temporary lodging.
- 3 FTE Temporary Lodging Prevention Policy Analyst (OPA 3) – to support expanding service delivery and contract development, and implement additional services to address needs of youth at risk of entering temporary lodging.
- 4 FTE Residential Resource Consultant (PA 4) – to facilitate local connections with youth, ensuring relationship continuity as they navigate different levels of care, as well as to remove system barriers to complex care coordination in a case-specific way.
- 1 FTE Research and Program Analyst (OPA 3) – to analyze outcomes and system impacts by integrating data from multiple databases, focusing on funding strategies and service eligibility to assess and improve effectiveness in preventing temporary lodging
- 1 FTE Administrative Specialist (AS 2) – to coordinate the team, ensure documentation is timely, and communications run smoothly.

OHA anticipates commencing the recruitment, hiring, and onboarding process on July 1, 2025. Implementation in anticipated to being in the Fall of 2025, or once the team is established. The positions are expected to end June 30, 2029. The initiative and related reports and data is projected to be completed by June 30, 2029.

This policy package ensures that these critical services and supports are accessible to all children and families, irrespective of their involvement with Child Welfare, thereby promoting a comprehensive and sustainable approach to reducing the overuse of temporary lodging for youth in foster care across Oregon.

3. **How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[3] or equitable health outcomes? How does this policy package further OHA's mission and align with its strategic plan?**

   The initiative to reduce and ultimately eliminate the practice of temporary lodging of children and youth in the state's care presents a significant opportunity to advance health equity by addressing systemic barriers that are disproportionately impacting children and youth with unmet health related needs in Oregon. By focusing on reducing the overuse of temporary lodging for youth in foster care, particularly those from marginalized communities based on race, ethnicity, disability, gender identity, and other factors, the initiative aims to ensure that all young people can access timely and appropriate services regardless of their social circumstances. This would also improve compliance with the ICWA by ensuring Tribal children and youth receive the appropriate level of services and supports. This includes enhancing access to specialized in-home supports, expanding telehealth options for remote communities, and providing flexible funding for unique needs not covered by traditional services. These measures are crucial in mitigating disparities in health outcomes by offering tailored interventions that meet the diverse needs of vulnerable youth, thereby promoting their full potential and well-being.

[3] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

However, the policy package must navigate potential pitfalls that could hinder health equity efforts. Challenges may arise in effectively implementing braided funding strategies and ensuring equitable access to services across different geographical regions and demographic groups. Payers' eligibility criteria and determinations of medical necessity could continue to pose barriers, especially for marginalized youth who already face systemic disadvantages. To counter these challenges, ongoing evaluation and adaptation of the initiative will be essential to identify and rectify any disparities in service delivery and outcomes. By aligning closely with OHA's mission to eliminate health inequities by 2030, the initiative aims to dismantle structural inequities, promote inclusivity, and foster a healthcare environment where every child and youth can achieve optimal health and well-being without facing undue barriers.

Quantifying results

4. What are the long-term desired outcomes?

- Reduction in temporary lodging: Achieve a significant decrease in the number of children and youth placed in temporary lodging due to unmet placement needs, ensuring that these instances become rare and only occur under exceptional circumstances.
- Increased quality of placements: Supporting resource parents and families (including kinship caregivers) with tools and assistance in caring for children and youth with complex needs, thereby reducing turnover and increasing retention of resource parents and families.
- Increased ICWA compliance for Tribal children and youth.
- Increased timely placements: Ensure that youth with high levels of need are placed in appropriate and stable environments promptly upon entering the foster care system, minimizing delays that contribute to temporary lodging.

- Enhanced coordination across agencies: Foster seamless collaboration and communication among agencies involved in child welfare and health care, including private insurance and Medicaid, to streamline access to necessary services and supports.
- Equitable access to services: Ensure that all youth, regardless of their background or circumstances, have equitable access to essential services and supports, eliminating disparities based on race, ethnicity, disability, gender identity, or other factors.
- Improved permanency outcomes: Increase the rate of successful reunifications, adoptions, and permanent placements for youth in foster care, promoting stable and lasting family connections.
- Enhanced mental and behavioral health and well-being: Improve mental health outcomes for youth by providing timely access to mental and behavioral health services and treatment, reducing the need for crisis interventions and temporary lodging.

5. How will OHA measure the impacts on health inequities of this policy package?

- Quantitative metrics: Tracking the number of children and youth placed in temporary lodging quarterly, aiming for a steady reduction over time, with specific data for ICWA children and youth. Measuring the average length of stay in temporary lodging and set targets for decreasing this duration.
- Placement quality: Surveying resource parents and kin caregivers on their needs to successfully provide care to children and youth with complex needs, as well as on the quality of the supports they are provided from agencies.
- Placement timeliness: Monitoring and reporting on the time taken to place children and youth in foster care from initial assessment, aiming to shorten the placement process through streamlined procedures and improved agency coordination.
- Agency collaboration index: Developing a metric to assess the effectiveness of collaboration among agencies, including feedback loops and communication protocols. Conducting regular surveys and evaluations to measure improvements in inter-agency cooperation.

- Equity and access metrics: Collecting data on service utilization among diverse demographic groups to identify any disparities in access. Implementing corrective measures to ensure equitable service delivery based on identified needs.
- Permanency rate improvement: Tracking the percentage of youth achieving permanency goals (reunification, adoption, guardianship) annually, setting targets for increasing these rates and reducing the time to achieve permanency.
- Outcome-based mental and behavioral health indicators: Implementing measures to assess mental and behavioral health outcomes, such as reductions in behavioral crises, improvements in emotional stability, and increased engagement in therapeutic services. Using standardized assessment tools and periodic evaluations to track progress.

How achieved

6. What actions have occurred to resolve the issue prior to requesting a policy package?

The 2018 settlement agreement from CASA for Children, et al. v. State of Oregon et al., set targets for reducing and preventing the use of temporary lodging for children and youth in foster care. As a result, ODHS undertook substantial practice changes aimed at eliminating temporary lodging. The agency created contracts and funded services specifically designed to prevent temporary lodging stays, leading to the prevention of 75% of temporary lodging occurrences through these new practices. Additionally, the court enlisted Dr. Marty Beyer to provide a comprehensive report on the systemic changes needed in Oregon to further reduce or eliminate temporary lodging. The recommendations from Dr. Beyer's report have been integral in shaping current policy options and strategies.

Further efforts have focused on developing and implementing specific services to support children and youth with intensive needs in their own communities. These services include the Response Services Network and Child Specific Caregiver Supports, both of which have proven highly effective

in maintaining placement stability. Despite their success, these programs are currently available only in limited regions and to children and youth in the care of ODHS-Child Welfare.

Additionally, the agency has established contracts with multiple Psychiatric Residential Treatment Facilities to ensure prioritized access for youth at risk of temporary lodging. This approach has been highly effective in securing timely care for children and youth with the most intensive needs and ensuring providers are adequately compensated for their services.

7. What alternatives were considered and what were the reasons for rejecting them?

To address the problem of temporary lodging, SOCAC has considered the following strategies:

- Re-creating a single children's agency with responsibility for Medicaid payments, Child Welfare funding disbursement, disability funding disbursement, and service delivery/referral. This option was rejected due to the administrative challenges of recombining agencies as large and well-established as OHA and ODHS.
- Creating a single, statewide CCO for high-needs children to provide high-quality, consistent care coordination for children and youth with higher-than-usual needs. This option was rejected due to the anticipated political challenges and administrative barrier to a solution of this kind. It is anticipated that the existing CCOs would not support such a concept, nor does SOCAC have the support of the Governor's Office on such a strategy.
- SOCAC also considered waiting to see if the work of House Bill 4086 (2024), which aims to reform regulations regarding the definitions of child abuse and neglect, as well as articulate appropriate services for children and youth with problematic sexual behaviors, would address many of the systemic challenges which result in temporary lodging. This potential solution is still underway, but the crisis is too urgent to wait until regulatory reform can take place in 2027 or later.

8. **What other agencies, programs, community partners or stakeholders are collaborating on this policy package?**

   Child Welfare (ODHS), System of Care Advisory Council (OHA), Governor's Foster Care Advisory Commission, Children's Alliance, families and youth with lived expertise

9. **Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.**

   No.

10. **What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?**

    This policy package has impacts on Child Welfare (ODHS), Self-Sufficiency Programs (ODHS), Office of Developmental Disability Services (ODHS), Behavioral Health Division (OHA), Medicaid Division (OHA), schools and school districts, Indian Child Welfare Act leaders (ODHS), and all nine federally recognized Oregon tribes.

    Impacts on ODHS Child Welfare include additional coordination time required to work with this team, decreases in children entering temporary lodging, and improved coordination with OHA. It is anticipated that Child Welfare case workers who are directly involved with youth in temporary lodging would see reduced overtime due to appropriate placements for youth with complex needs, reduced injuries and stress which results from the aggression some of these youth exhibit, and improved staff retention. Child Welfare would see a reduction in the number of very high acuity cases they work with, as children and youth would have their needs met earlier in the service continuum if this project is effective.

ODHS Self Sufficiency would see improved collaboration with OHA and other agency partners. This could result in increasing benefit payouts as more eligible families are identified by agency partners.

Office of Developmental Disability Services (ODHS-ODDS) would see improved collaboration with both Child Welfare and OHA programs, which could result in increasing the number of clients who are found eligible for ODDS services and supports. ODDS would also likely see improved mental and behavioral health services provided for clients with I/DD, and an enhanced service array available to the children, youth, and families they serve.

OHA Behavioral Health Division would potentially see increased costs at first, as services provided by this division are provided at increased rates to youth who are currently underserved until they come to the attention of Child Welfare. They would see improved coordination with agency partners, and have the opportunity to work in partnership on braiding funding to ensure services are available quickly and appropriately for youth with behavioral health, mental health, I/DD, and other needs in their communities.

OHA Medicaid would likely see increased costs as additional services are provided. It is anticipated that through improved collaboration, Medicaid division will improve their ability to meet the complex needs of children with I/DD, mental health, behavioral health, and family safety concerns.

Schools and school districts would see improved access to supports for children with high needs, and decreased aggression and outbursts in school from youth whose needs are unmet. This will improve stability in classrooms and support teachers and staff in providing and maintaining a safe environment for youth. Teachers and classified staff have reported increased incidents of aggressive behaviors in schools, and increased OTIS investigations as a result of teachers and staff intervening in aggressive behavior. These OTIS investigations are expected to decrease as youth with high needs have improved access to services and supports tailored to meet their unique needs.

ODHS Indian Child Welfare case workers, supervisors, consultants and regional specialists would see improved access to a variety of funding options to meet the needs of the children they serve. This should improve access to appropriate services and supports, and reduce the number of tribal children who are sent to temporary lodging and out-of-home long-term placements.

Oregon's Nine Federally Recognized Tribes would see improved agency coordination to meet the needs of their children, resulting in increased compliance with ICWA, access to appropriate services and decreased disruption to youth and families.

11. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Staffing and fiscal impact

Implementation date(s): July 1, 2025

End date (if applicable): June 30, 2029

12. What assumptions affect the pricing of this policy package?

It's assumed that the number of children at risk of entering temporary lodging will remain the same, or increase, if nothing is done. It's assumed that General Fund investments articulated in the budget can be replaced by Medicaid, Title IV-E Foster Care, Title IV-E Family First Prevention Service Act and other Federal Funds or appropriate agency funds within a few months of initiation of each instance of care. It is assumed that any additional position for ODHS Child Welfare would qualify for federal fund reimbursement at the current cost allocation model of 30% Federal Fund. While General

Fund investments may be required at the start of each instance of care to ensure access and adequacy, most of those investments will be very time-limited once another resource can be directed to cover those costs, or the child's needs are met and they're able to step down to a lower intensity of services.

13. Will there be new responsibilities for OHA and/or Shared Services? Specify which programs and describe their new responsibilities.

There will be new responsibilities for OHA, which include hiring ten additional staff within the System of Care Advisory Council. New responsibilities include: leading the initiative focused on allocating and managing funds to meet youth needs in home, community, or residential settings to prevent temporary lodging; supporting the expansion of service delivery and contract development; implementing additional services to address needs of youth at risk of entering temporary lodging; facilitating local connections with youth, ensuring relationship continuity as they navigate different levels of care, as well as to remove system barriers to complex care coordination in a case-specific way; analyzing outcomes and system impacts by integrating data from multiple databases, focusing on funding strategies and service eligibility to assess and improve effectiveness in preventing temporary lodging; and coordinating schedules and internal communications regarding case planning, ensuring documentation is timely, and communications run smoothly.

14. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No expected changes to client caseloads. Services provided to population groups will increase and be more responsive and intensive, matching the level of urgency of the client. These services are likely to include IIBHT, residential treatment services, partial hospitalization, skills training, and social determinants of health supports such as housing, nutrition, and access to appropriate medications.

15. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

The following new Limited Duration positions will be needed to implement this policy package:

- A Child Welfare Manager 3 position (CWM 3) would authorize and support utilization of funds allocated to the project, for the purpose of meeting a youth's needs in home, community, or residential treatment settings, to prevent the need for temporary lodging. This position would be the leader of this project, authorized to make decisions related to each case and to guide the temporary lodging prevention activities of the other project staff. They will convene regular staffings for temporary lodging prevention for youths who are not currently involved with ODHS CW. A staffing is a group process in which a group of professionals and others (individuals with lived expertise), involved with the youth or represented systems, to help identify issues, suggest barrier resolution strategies, recommend service options.
- Three FTE Temporary Lodging Prevention Policy Analysts (PA 4) on the Child Welfare Treatment Services team to: Support expanding service delivery and contract development and implement additional services to address needs of youth at risk of temporary lodging. The Treatment Services team is unable to expand services that have demonstrated effectiveness until staffing resources are made available.
- Four FTE Residential Resource Consultants (PA 4) to youth to ensure relationship continuity as they navigate different levels of care and remove system barriers to complex care coordination in a case-specific way (caseload model). Initial work for each of these employees will be assigned by geographical region to ensure relationships and system knowledge is specific and relevant.
- One Administrative Support Professional (AS 2) to coordinate the team, ensure documentation is timely, and communications run smoothly.

- One Research and Program Analyst (OPA 3) to track outcomes and system impacts of the pilot program, align program data from ODHS-CW, ODHS-ODDS, Medicaid and All Payers All Claims databases to seek improvements in funding strategies, eligibility, and data collection. This position would be tasked with generating data to determine the size and scope of the impact of the pilot project. One particular task of this worker will be to identify all relevant funding streams that pay for services (or those that could, but currently don't pay for services) that can play a role in preventing TL. This person will work with others on the team to create a funding report with recommendations for improving braided funding to meet all of a young person's service needs, keeping in mind program changes such as Family First Preservation Act implementation, EPSDT implementation, etc.

16. What are the start-up and one-time costs?

There are no start-up costs. One-time costs include funding for the limited duration staff positions and any case-specific contracts which are created to meet the unique needs of the children and youth who are at-risk of temporary lodging. It is not possible to determine the exact amount of one-time contracts which will be required by this pilot project, but the overall cost of case-specific contracts will be limited to the $18M for contracts described in item 2 above.

17. What are the ongoing costs?

Ongoing costs beyond the 2025-2027 biennium include all ten Limited Duration positions, which will end June 30, 2029. Additionally, OHA expects General Funds to supplement services for children and youth with complex needs by ensuring needed services from any child-serving system are available to the child in their current living situation to the greatest extent possible. For example, a youth who is receiving BRS services and also needs support for their I/DD diagnosis may have I/DD support services paid for by General Fund dollars while the assessments and service authorization

processes are completed by multiple agencies, in order to provide stability for this youth in their current living situation. Once those assessments and authorizations are completed, appropriate funds will be available to cover the costs currently paid for by GF. OHA anticipates that this strategy of using GF to ensure timely service access while other fund eligibility is determined could continue beyond the pilot project term, pending the results of the research on the impact of the pilot project, described above.

18. What are the potential savings?

When working proactively on compliance matters liability is mitigated, therefore, there are potential savings as the work prevents lawsuits and rework when accessibility and compliance are well resourced. Streamlined agency work and responsiveness across OHA and ODHS would lead to equity-centered approaches, enhanced communications, and reduces risks overall to the agency.

While difficult to quantify, potential savings coming from having a well-trained workforce is not to be overlooked. Redistribution of resources away from programs and activities that exacerbate health inequities and into programs that move to eliminate health inequities.

19. What are the sources of funding and the funding split for each one?

This policy package uses a 15 percent Federal Funds and 85 percent General Fund split, which is based on Oregon’s approved CMS Statewide Allocation for Medicaid and CHIP.

System of Care Advisory Council: 2025-27 Policy Package

Total for this policy package

SOCAC Preventing Temporary Lodging due to Complex Care Needs
Policy Package #558

1. Outcomes

What outcomes will this POP achieve? Please be specific and connect the outcomes to the Governor's priorities in homelessness, behavioral health, or education.

This POP addresses the Governor's priority of behavioral health.

This POP will reduce the number of youth in temporary lodging due to lack of access to services and supports they need to maintain stability in community-based or residential placements. The POP provides General Fund to allow for specialized contracts and capacity-based payment structures for residential behavioral health (mental health, SUD, and I/DD) providers to ensure adequate numbers of open beds are available and fully staffed so youth in crisis can access care quickly. SOCAC expects this POP to increase residential treatment capacity by 40% in the first year and achieving a cumulative 70% increase by the end of the second year. The funds will support staffing to cater to higher acuity youth and move away from the traditional 'heads in beds' funding model, promoting provider sustainability, which addresses a portion of the youth behavioral health workforce crisis.

This POP will allocate $20 million dedicated to strategies outlined in the Special Master's Report and endorsed by the Governor's Foster Care Advisory Council, including:

- Specialized in-home supports to prevent temporary lodging and enhance services for families seeking voluntary placement.

- One-time contracting for services unavailable in existing settings, such as direct support professionals and extracurricular activities.

- Child-specific caregiver supports to equip parents and resource caregivers with skills to support youth with intensive needs.

- Expansion of Response Support Networks for rapid in-home response beyond the Portland Metro area.

- Telehealth initiatives to provide specialized supports to remote youth, including those from diverse backgrounds.

- Flexible funding for unique needs not covered by existing streams, aimed at preventing temporary lodging.

- Family support services to prevent removal or support reunification, including home modifications and wellness activities.

- Youth peer support services delivered by Peer Support Specialists to foster engagement in community-based services.

2. Racial Equity Strategy

What are the racial disparities in the population that are intended to be served through this program (e.g., racial disparities in substance use treatment access). How will this POP, including the implementation of the POP, address these disparities and equitably serve Oregonians?

The length of time children and youth spend in temporary lodging varies widely, from one night to over four months, with some youth experiencing multiple stays over several years. Many have complex backgrounds, including placements disrupted by family circumstances or behavioral challenges. A significant portion (one third) of youth in Temporary Lodging enter foster care at age 14 or older, often from juvenile or emergency departments, or after being rejected from multiple placements due to unmet behavioral health needs or mental health concerns.

The portion of youth entering foster care during their teenage years and experiencing Temporary Lodging is disproportionately Black, Hispanic, Native, and included several LGBTQIA+ individuals. Native youth may be identified as meeting the criteria for Indian Child Welfare Act (ICWA), therefore requiring “Active Efforts” be made to provide services that prevent the removal of the youth from their home. ICWA also requires that the youth’s Tribe approve the placement if the youth is placed in foster care. Temporary Lodging is not considered a culturally appropriate placement setting, and the Tribe and youth’s attorney may request the court make a “No Active Efforts” finding for Native youth placed in Temporary Lodging.

This POP will provide flexible funding and case-specific contracts to ensure culturally responsive care for youth at risk of temporary lodging, with a particular focus on services which are culturally appropriate, linguistically relevant, and tailored to the needs of the child at risk – including I/DD services, trauma-responsive supports, and dual-diagnosis care. This strategy will strive to resolve the historic systemic preference for dominant culture providers by building relationships and

providing sustainable funding to smaller providers who specialize in culturally specific, linguistically appropriate, developmentally relevant care.

3. Accountability to Racially Equitable Outcomes

a. For POPs that are improving or expanding existing programs, how does the agency currently track quantitative and/or qualitative data to evaluate program outcomes, including by race and ethnicity? Will this POP improve the evaluation of outcomes by race/ethnicity to improve program evaluation and administration?

This POP will add new, flexible funding and create the ability for agencies (OHA, ODHS-CW, ODHS-ODDS, OYA, and possibly County Juvenile programs) to enter into case-specific contracts to provide trauma-responsive care to high-acuity youth with complex needs. The SOCAC will track outcomes of this work in partnership with ODHS-CW, through their team dedicated to temporary lodging. We will evaluate outcomes by racial identity, sexual identity and gender orientation, I/DD status, and location within the state (do rural youth with complex needs have similar outcomes to youth with complex needs who live near the I-5 corridor, for example). We will provide regular reporting on the activities funded by the POP, outcomes of those services, and demographic breakdowns to evaluate for disparities within this work. If disparities are identified, those will be highlighted for agency leadership and specific plans to address those disparities will be shared with agency leaders and the Governor's Office.

This POP will also fund a capacity payment model for residential treatment providers for youth. The numbers of youth at risk of temporary lodging who are housed in a bed at a participating facility will be tracked, along with their demographic information. Outcomes for these youth will be included in the report mentioned above to the Governor's Office, and disparities will be identified

and rectified with specific, measurable, and time-specific plans shared across relevant agency leaders.

b. *For POPs that are creating new programs, how will the agency track quantitative and/or qualitative data to evaluate program outcomes, including by race/ethnicity for the purpose of evaluating and improving program implementation to advance racial equity.*

N/A. This POP does not create new programs.

4. Equitable Administration

In administering resources in this POP, how will you create contracting and/or granting opportunities for culturally specific and culturally responsive community-based organizations and disadvantaged, minority, women, and emerging small businesses?

This POP includes funds for case-specific contracts which are culturally appropriate, linguistically responsive, and trauma-informed. In order to do that well, contracts with smaller providers, culturally-specific providers, and minority and women-owned businesses will be necessary to reach the specific goals of this funding. The SOCAC bylaws require people with lived experience (PWLE) to be meaningfully involved in funding, policy, and program decisions as part of our foundational values. So, our contracting process will have guidelines set by people who have prior experience with I/DD, juvenile justice, residential treatment, and foster care systems, with a specific focus on equity. The contracts themselves will be managed by the appropriate agency, but contract reports, including specific equity considerations listed under item 3a (above) will be required of each participating agency. The SOCAC DEI Committee will then evaluate those (deidentified) reports to look for equity concerns. If/when equity concerns are identified, those concerns and specific recommendations for rectifying them, will be provided directly to the agency in question as well as to the Governor's Office.

System of Care Advisory Council
2025-27 Policy Package

Division:	Budget is situated within the OHA Behavioral Health Division
Program:	System of Care Advisory Council
Policy package title:	Strengthening the System of Care Advisory Council
Policy package number:	559
Related legislation:	SB 1 (2019), SB 4 (2021), HB 2992 (2021), SB 968 (2023)

Summary statement:

OHA aims to strengthen the System of Care Advisory Council (SOCAC) to address gaps in support for children with complex needs across various state systems, such as juvenile justice, child welfare, and health services. Established by Senate Bill 1 in 2019, SOCAC is a 25-member council tasked with improving state and local youth service systems through centralized policy development and planning. SOCAC focuses on enhancing service coordination, promoting culturally competent practices, and ensuring equitable access to services for youth. The council collaborates with state agencies, evaluates system effectiveness, and recommends improvements. To support SOCAC's legislative mandates, the policy package proposes sustained staff support for SOCAC's operations. Implementation is set to begin on July 1, 2025, with recruitment and onboarding processes for the new position commencing thereafter.

Oregon Health Authority: 2025-27 Policy Package

Purpose

1. What problem is OHA trying to fix or solve?

In January 2018, the Children and Youth with Specialized Needs work group was formed by the Governor, the President of the Senate, and the Chief Justice of the Supreme Court, to address unique challenges faced by children with distinctive mental or behavioral health needs who come to the attention of different systems (such as the juvenile justice system, the child welfare system, or the health system). The recommendations from this work group included the formation of a statewide system of care advisory council empowered to incentivize, change, and address gaps in current state systems meant to support children and youth with complex needs.

As a result, Senate Bill 1 was passed during the 2019 legislative session, establishing a 25-member System of Care Advisory Council (SOCAC) to improve state and local systems that serve youth by centralizing statewide policy development and planning. The council consists of 25 members appointed as follows:

- The Chief Justice of the Supreme Court shall appoint one representative from the Judicial Department.
- The Governor shall appoint:
    - Two members who are representatives of the Department of Human Services with extensive knowledge of systems of care, one of whom must have direct experience with intellectual and developmental disabilities programs.
    - One member who is a representative of the Oregon Youth Authority with extensive knowledge of systems of care.
    - One member who is a representative of the Oregon Health Authority with extensive knowledge of systems of care.

- One member who is a representative of the Department of Education.
- Two members who are representatives of coordinated care organizations meeting the criteria adopted by the Oregon Health Authority under ORS 414.625, at least one of which must provide services to rural communities.
- One psychiatrist, one psychologist and one pediatric physician, each of whom must have clinical experience with youth.
- One member who is a representative of an entity that offers commercial insurance.
- Three members who are representatives of agencies that provide different services and supports to youth and families of youth.
- One member who is a representative of organizations that advocate for youth.
- One member who is a representative of organizations that advocate for families of youth.
- Two members of the public, each of whom are family members of:
  - Persons with intellectual or developmental disabilities or mental illness; or
  - Persons who are currently or were previously in the foster care system or the youth criminal justice system.
- Two members of the public who are no more than 25 years of age and who:
  - Are persons with intellectual or developmental disabilities or mental illness;
  - Are currently or were previously a ward, youth or youth offender, as those terms are defined in ORS 419A.004.
- One member who is a county juvenile department director.
- One member who is a county mental health program director.
- One member who is a member of a federally recognized Indian tribe in this state or a designee of the Indian tribe.
- One member who is a representative of Oregon's federally mandated disability protection and advocacy agency.

SOCAC plays a critical role in enhancing the efficiency and effectiveness of state and local youth service systems in Oregon. At the core of its mission is the development and upkeep of a comprehensive, long-term plan aimed at coordinating services across various sectors including public health, child welfare, education, juvenile justice, mental and behavioral health, and support for individuals with intellectual or developmental disabilities. SOCAC is primarily responsible for formulating policies that address the capacity, utilization, and types of services available, integrating services like in-home behavioral health and crisis intervention into existing programs to ensure seamless service delivery.

Additionally, SOCAC conducts assessments to evaluate the effectiveness of current systems and identifies areas where coverage may be lacking. It places a strong emphasis on promoting culturally competent practices, ensuring that services are accessible and responsive to the diverse needs of youth and families across different backgrounds. Collaborating closely with state agencies such as the Oregon Health Authority, Oregon Youth Authority, and Oregon Department of Human Services, SOCAC oversees service implementation, provides oversight, and recommends improvements to enhance overall system effectiveness. Through joint studies, legislative recommendations, biennial plan updates, and the maintenance of a comprehensive data dashboard, SOCAC remains committed to achieving equitable access to high-quality care for all youth in Oregon, aiming to reduce barriers to service implementation and support their well-being comprehensively.

OHA is directed to provide staff support to SOCAC. The legislature approved funding for two positions (1.50 FTE) to support SOCAC during the 2019-2021 biennium, as well as two positions (2.0 FTE) during the 2021-2023 biennium. Senate Bill 4 (2021) created a permanent Executive Director (BOA1) position for SOCAC. Currently, SOCAC is staffed by one permanent position

(OPA4), one Limited Duration position (AS2), and one non-budgeted Limited Duration position (OPA3).

SOCAC was created to ensure appropriate access to services and supports for youth with high acuity needs in Oregon. A large part of this mandate requires agencies to partner across what have traditionally been siloes – funding, policies, program guidelines all exist at each agency or division without regard to how the people who are using these systems navigate through systems. SOCAC facilitates improved communication and collaboration between agency partners, to reduce barriers to care and improve efficiency. SOCAC also brings the voices of people with experience navigating our complex systems directly into conversation with system managers. This allows the people who best understand our system challenges, our clients, to take leadership in solving these challenges, in equal partnership with executive branch agency partners.

2. What would this policy package buy and how and when would it be implemented?

The policy package would buy permanent staff support for SOCAC. The policy package would purchase two permanent positions to replace the two current Limited Duration positions (OPA3 and AS2). These roles are necessary for SOCAC to meet various legislative mandates. This policy package includes funding for a new permanent position focused on public affairs (PA2). Providing ongoing, stable funding for these positions will enable SOCAC to meet legislative requirements without burning out staff members or resorting to contracts which are time consuming to create and manage. Beginning July 1, 2025, the limited duration positions would be converted to permanent positions, and recruitment, hiring, and onboarding of a public affairs position would commence.

3. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes? How does this policy package further OHA's mission and align with its strategic plan?

Equity work demands that those who have been impacted by disparities, racism, and systemic barriers are involved in the conversation. This policy package will significantly benefit populations impacted by health inequities by ensuring that voices of people with lived experience are integral to system improvement efforts. The current AS2 position at SOCAC is crucial in connecting equity strategies to these individuals, ensuring that youth and families who have experienced Child Welfare, Juvenile Justice, Medicaid Behavioral Health Services, Intellectual and Development Disability supports, and educational interventions are meaningfully engaged. Without sustained engagement from these individuals, crafting a system that truly meets their needs is impossible. The current AS2 and OPA3 work diligently to build relationships with people with lived experience advisors, provide them with necessary information and technology, ensure timely stipend payments as mandated by HB 2992 (2021), and facilitate supportive services such as American Sign Language or Spanish interpretation. This ensures that every interested person with lived experience can join and contribute meaningfully to the discussions.

Historically, the lack of sustainable funding for these positions has perpetuated a dynamic where equity is prioritized rhetorically but not financially. By committing to sustainably fund the OPA3 and AS2 positions, SOCAC aims to break this cycle and demonstrate a genuine commitment to equity. This funding will ensure that people with lived experience, particularly those from historically oppressed populations, can build trust with SOCAC staff and engage meaningfully in the system

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

change efforts. This will enhance SOCAC's ability to address and eliminate health inequities in Oregon by creating a system that is truly responsive to the needs of all its users. The involvement of people with lived experience will ensure that the services and supports developed are culturally responsive, accessible, and effective, thereby promoting equitable health outcomes across the state.

Quantifying results

4. What are the long-term desired outcomes?

The long-term desired outcomes of this policy package are stability in staffing for these two critical positions for building and maintaining relationships with people with lived experience, and increasing the number and amount of stipends being paid quarterly to people with lived experience by 25%. This will lead to stronger engagement of people with lived experience, which will result in better planning and improved structural changes so our state-funded systems better meet the needs of those who have the hardest time getting the supports and services they're entitled to.

5. How will OHA measure the impacts on health inequities of this policy package?

SOCAC will measure the impact of this funding in the following ways:

- Maintain both staff positions with the same employees;
- Document and monitor the number and dollar amount of stipends being paid quarterly to people with lived experience;
- Surveying people with lived experience to determine how engaged they feel, how well the stipends process is working for them, and how welcome they feel in various public meetings to share their lived expertise.

How achieved

6. What actions have occurred to resolve the issue prior to requesting a policy package?

In 2022, SOCAC hired a limited duration OPA1 to do some of this work. The candidate pool was very limited due to candidates seeking long-term/permanent roles rather than the Limited Duration position SOCAC was able to recruit for. The candidate selected to fill this role was not meeting performance requirements, but they remained in the role due to the risk of losing the position all together if the employee were to be terminated. When the Limited Duration OPA1 position expired, the position description for that work was reclassified to a Limited Duration AS2 and us currently funded through General Fund dollars.

SOCAC is also using General Funds for a Limited Duration Youth & Family Engagement Coordinator (OPA3). These funds will be redirected to investing in improving local or regional systems of care once permanent funding can be acquired for the current position.

To meet other staffing needs, SOCAC has tried ‘borrowing’ staff from partner agencies for specific projects. This approach has been challenging due to the existing demanding workload of the additional staff, and this has caused conflict and stress for both the borrowed staff as well as the team they left behind.

7. What alternatives were considered and what were the reasons for rejecting them?

SOCAC members considered continuing with the two funded positions and rejected that idea because they firmly believe the people closest to the problem are the ones who best know the solution. SOCAC members firmly believe people with lived experience are entitled to be fairly compensated for their work on the Council in the same way employees of agencies and partners

who participate in councils and commissions. SOCAC is not able to manage the volume of work with two staff, even if members were willing to forgo their values and do all the work without the wisdom and context provided by partners who have lived expertise.

SOCAC also tried to use contracts to address workload challenges. However, DOJ recently informed SOCAC that it does not have legal authority to enter into contracts, so OHA must enter into any contracts on behalf of SOCAC. This is time-consuming, confusing for contractors, and could lead to legal challenges if there is a disagreement between the contractor, SOCAC, and/or OHA about whether the deliverables were met, funds were paid out, or other common contracting conflicts. This strategy does not improve SOCAC's bandwidth or help meet legislative mandates. Instead, this approach directs the SOCAC Executive Director's time into contract procurement with OHA, DOJ, and the potential contractor, which is time that could have gone to meeting SOCAC's legislative requirements.

8. **What other agencies, programs, community partners or stakeholders are collaborating on this policy package?**

   SOCAC's DEI Committee, Youth Council, Legislative Committee, CCO-employed local System of Care Coordinators.

9. **Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.**

   Yes. SOCAC's Legislative Concept 429 relating to the System of Care Advisory Council includes authority to enter into contracts as an entity and adds four additional membership appointments (two for youth with lived experience and two for family members) to bring better balance to the voices on the Council.

10. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Every child-serving state agency (DELC, ODHS-CW, ODHS-ODDS, ODHS-VocRehab, Youth Development Division, ODE, OHA-BH, OHA-Medicaid, OYA, county juvenile departments, etc.) have an opportunity to benefit from the work these two positions complete. The people with lived experience that engage with SOCAC receive extensive training on advocacy and are well-supported to engage with systems change. The positive impact on all these systems will be enhanced by permanently funding these two positions.

11. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Staffing and fiscal impact

Implementation date(s): July 1, 2025

End date (if applicable): Ongoing

12. What assumptions affect the pricing of this policy package?

It is assumed that SOCAC will continue to have legislative mandates and requirements moving forward. It is assumed that people with lived experience will continue to show interest in participating in policy change.

13. Will there be new responsibilities for OHA and/or Shared Services? Specify which programs and describe their new responsibilities.

- One new permanent FTE Public Affairs PA3

14. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

15. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

- One permanent FTE AS2.
- One permanent FTE OPA3: Youth & Family Engagement Strategist.
- One permanent FTE PA3.

16. What are the start-up and one-time costs?

There are no costs outside the position funding.

17. What are the ongoing costs?

This POP will result in ongoing CSL funding for four total SOCAC employees. Ongoing costs for the two positions we're requesting at this time will be $571,098 per biennium, with cost of living or other bargained increases leading to adjustments in that rate over time.

18. What are the potential savings?

SOCAC will not have to hire underqualified candidates due to an inability to offer permanent roles. That reduces turnover and improves productivity, saving the state money. SOCAC also won't have time lost to recruitment, hiring, onboarding, or termination of underperforming staff, saving the state funds expended on underperforming employees. Funding this POP ensures SOCAC meets legislative requirements regarding HB 2992.

19. What are the sources of funding and the funding split for each one?

Strengthening the System of Care Advisory Council
Policy Package #559

1. Outcomes

What outcomes will this POP achieve? Please be specific and connect the outcomes to the Governor's priorities in homelessness, behavioral health, or education.

This POP will ensure staffing stability for the System of Care Advisory Council (SOCAC), by modifying two Limited Duration positions to permanent positions. One of the positions is the Youth & Family Engagement Coordinator, whose purpose is to build capacity for the SOCAC to execute equity and belongingness strategies and ensure equal value is given to voices of people with lived expertise who are working with SOCAC to improve access to and outcomes for the child-serving system. Due to centuries of structural racism, institutional oppression, and system trauma, people with lived experiences are disproportionately BIPOC, LGBTQIA2S+, or speak languages other than English at home.

The Administrative Support position provides crucial administrative support to ensure people with lived experience that are working with SOCAC have access to the information, technology, and language support they need to meaningfully participate and contribute to SOCAC activities.

Ensuring staffing stability for these two positions is integral to SOCAC's Diversity, Equity and Inclusion strategies as people who are closest to the problem have the most practical solutions to propose. SOCAC cannot meaningfully address equity challenges without the perspectives and guidance from people with lived expertise.

The POP is also requesting a new position to SOCAC staff. SOCAC has highlighted a need for a Public Affairs Specialist, which will allow the Council to improve communication across agencies and with system external partners to reduce disparities and improve access to culturally appropriate, linguistically responsive care, with a particular focus on children and youth who, historically, have not been served: individuals experiencing co-occurring diagnoses, those whose cultures are not reflected by most providers, those who need specialty care or culturally specific services, and rural youth with complex needs.

Specific outcomes which will be achieved by this funding:

- The relationships with people with lived experience, which have been built intentionally by current staff to build trust with people who are historically wary of trusting 'system people', will be maintained, as the two staff who are currently in those positions will be kept if the positions are made permanent. Stipends for eligible participants will continue to be provided in an ongoing basis, which is crucial to demonstrating the value they bring to our work.
- Modifying the AS2 to an OPA1 will allow SOCAC to expand the level of customer support and engagement with people with lived experience to ensure SOCAC is adjusting systems to match the urgency and needs of the people the Council is most focused on serving – those whose children/youth are involved with multiple state systems (or those who should be, but can't gain access due to system barriers).
- Engagement with people with lived experience will continue to increase. In 2024, SOCAC built a youth council. By 2025, if this POP is funded, SOCAC will also build a family council. The Council will adjust meeting times for subcommittee meetings which are of highest interest to people with lived experience to ensure they can attend those meetings.

- SOCAC will increase engagement with people with lived experience, with a focus on priority populations (BIPOC, LGBTIQ+, people experiencing I/DD or physical disability, and people who speak languages other than English), by at least 50% over the current level of engagement. Additionally, SOCAC will ensure the voices of those most marginalized by current systems are reflected and prioritized in the Council's upcoming Strategic Plan.

2. Racial Equity Strategy

What are the racial disparities in the population that are intended to be served through this program (e.g., racial disparities in substance use treatment access). How will this POP, including the implementation of the POP, address these disparities and equitably serve Oregonians?

Racial disparities exist nearly everywhere in Oregon's child serving system. Black and Pacific Islander populations are least likely to have access to prenatal care in the first trimester of pregnancy (per Oregon Birth Certificate Data) and disparities continue from there. Black and Pacific Islander students are most likely to face disciplinary action, including suspension and expulsion, per ODE data available online. Black youth are 630% more likely to end up in a juvenile correctional facility than white youth in Oregon. The SOCAC Data Report provides additional information on disparities in the children's system related to race, and also sexual orientation/gender identity (SOGI), ability/disability statuses.

SOCAC's Member Orientation Guide, available in English and Spanish, provides details on SOCAC's racial equity values and strategies. In 2025, SOCAC will be creating the next Strategic Plan for the children's system, which must include specific and measurable goals for racial equity improvements across the children's system. The only way the Council can ensure the equity strategies and priorities of youth and families who have been historically harmed by child-serving systems are incorporated into the next strategic plan is to maintain and expand relationships with

members of those communities, and ensure they're given the tools and supports they need to meaningfully engage in the planning process. This POP is necessary to ensure SOCAC can do that strategic planning work with the equity lens we've adopted (modified from GARE) to ensure the next Children's System Strategic Plan has clear, measurable, and meaningful equity outcomes we can work together across systems to achieve.

3. Accountability to Racially Equitable Outcomes

a. For POPs that are improving or expanding existing programs, how does the agency currently track quantitative and/or qualitative data to evaluate program outcomes, including by race and ethnicity? Will this POP improve the evaluation of outcomes by race/ethnicity to improve program evaluation and administration?

SOCAC has a goal that our Council, and every subcommittee, is racially representative of the disproportionality in the system they're working to improve. For instance, the SOCAC Youth Council includes Native American, Black, and Latino youth at the same rate as the foster care and juvenile justice systems, to ensure those most impacted have the loudest voice regarding the proposed solutions. We track this with annual surveys to voting members on each committee, asking them to inform us of which lenses they're using to view our work. We then review those surveys in our DEI committee, and after that review there will be specific recommendations for recruitment if gaps exist. We also use a modified GARE tool for every decision on policy, program, or funding within the Council, to ensure we're reviewing equity as we make every decision in front of us. This is challenging work, and this POP will help stabilize the staff who have developed skills for navigating tough conversations about race, gender, and disability as we make our decisions, as well as continue to increase the number of historically marginalized voices in the room as we make these decisions.

b. For POPs that are creating new programs, how will the agency track quantitative and/or qualitative data to evaluate program outcomes, including by race/ethnicity for the purpose of evaluating and improving program implementation to advance racial equity.

N/A. This POP does not create new programs.

4. Equitable Administration

In administering resources in this POP, how will you create contracting and/or granting opportunities for culturally specific and culturally responsive community-based organizations and disadvantaged, minority, women, and emerging small businesses?

Funding this POP will ensure that the voices of people who have been historically oppressed due to race, gender or gender identity, disability status, documentation status, and age (youth, particularly those with mental health or substance use challenges are very much disregarded by systems when it comes to decision making and leadership opportunities) are not just considered, but included and supported to lead conversations about how to improve equity and access across Oregon's entire child-serving system.

People with lived experience are part of the SOCAC Grants Committee, making decisions about eligibility and disbursement for the SOC Grants issued every biennium. They have made excellent equity suggestions throughout that process, many of which were implemented in the last cycle.

People with lived experience are part of the SOCAC Youth Council, which disbursed $500,000 in grants to culturally specific youth-supporting organizations in the 21-23 budget cycle via support from the full Council.

People with lived experience participate on every contract and hiring committee which relates to their engagement – from hiring technical assistance contractors for youth and family engagement to hiring staff to support them in our shared work – we adhere to the adage ‘nothing about us, without us’ as well as we can.

This POP will improve SOCAC’s ability to be proactive and responsive to community-identified priorities for system improvements, and to support people with lived experience in leading the child-serving system to where it needs to go to meet the most urgent needs children and families across Oregon are facing in school, mental health, substance use care, I/DD supports, and juvenile justice.

Overview

The Oregon State Hospital's Agency Request Budget includes one capital construction project for the 2025-27 biennium. The policy option package is for OSH Facility Conservation and Development, made up by three components: Capital Improvement, Equipment Replacement, and Deferred Maintenance.

The Salem campus of the Oregon State Hospital consists of 1.2M sq. ft. of buildings and interior secure perimeter court yards, and 23 cottages with a current replacement value (CRV) as reported to the Capital Advisory Board (CPAB) of $495 million. This makes the Oregon State Hospital among the highest replacement value of any single facility owned by the state. The Junction City campus is 229,816 sq. ft. with a current CRV of $180 million. The Pendleton Cottages facility consists of several older buildings with a total of 39,390 sq. ft. and a current replacement value of $10 million. OSH is at a crossroads where its facilities have reached an age where a robust long-term

investment strategy is needed to ensure that it can effectively meet OHA's strategic plan to support all Oregonians in need of mental health treatment. This policy option package provides the support OSH needs in the interim to ensure business continuity, and to reduce long term escalation in capital outlay as building systems are added to the deferred maintenance backlog.

Project Costs and purpose

The costs described below are for the 2025-27 biennium. This project funding includes investments that support the Oregon State Hospital's current operations and facility infrastructure needs. The objective is to ensure that all Oregon State Hospital facilities can meet programming needs, promote a safe and healthy workplace, are functional, are nimble to accommodate programming changes, and resilient during emergency declarations (e.g., climate change, wildfires, power outages, etc.). OSH campuses in Salem and Junction City have a considerable volume of equipment at or near the end of their useful lifecycle that are at a point of replacement; equipment that supports the critical 24/7 level of care to patients needing intensive psychiatric treatment for severe, acute, and persistent mental illness.

The OSH Facility Conservation and Development project is expected to cost about a total of $14.1 million in the 2025-27 biennium, which includes approximately $5,875,050 for project costs, $232,000 for bond issuance, and $548,669 debt services. The portion estimated for bond costs totals $7,463,000.

Capital Improvement investments fund high priority infrastructure projects determined critical to hospital operations. Major requests with this package include workspace expansion to accommodate an additional 32 staff in the existing Vocational Services area, replacing lighting fixtures, adding a water connection to Salem Campus, adding sewage storage tanks, and a public address system.

OSH strives to achieve the highest standards and outcomes in all aspects of our work. Good stewardship of the public dollar includes maintaining the facility to the highest standards and making regulatory and infrastructure improvements

Oregon State Hospital Capital Improvement

to meet the needs to patients and staff. All the issues are infrastructure needs and are critical to providing patient care and ensuring the health and safety of patients, staff, and the public.

Oregon State Hospital Capital Construction/Acquisition

As of the publishing of the Oregon Health Authority 2025-27 Agency Request Budget document, there are no major construction or acquisition projects planned. As the agency moves through the budget development process, projects may arise in this area. If that occurs, a project report will be included in the applicable budget document.

Description of Agency Business/Master Plan and Project Purpose/Problem to be Corrected

The hospital has identified an administrative and program staff space shortage and have had to move staff and programs to the cottages on campus and have identified future space needs requiring additional staff space.

Project Scope and Alternatives Considered

OSH is at a crossroads where its facilities have reached an age where a robust long-term investment strategy is needed to ensure that it can effectively meet OHA's strategic plan to support all Oregonians in need of mental health treatment. This policy option package provides the support OSH needs in the interim to ensure business continuity, and to reduce long term escalation in capital outlay as building systems are added to the deferred maintenance backlog.

This investment is part of an over-arching long-term strategic facilities investment plan to ensure that OSH's strategic plan can be realized and managed in perpetuity, especially as its facilities and site systems are aging. The investments that are submitted via this policy package are one part of a multi part planning effort to ensure that all of OSH's facilities are mission ready and to ensure uninterrupted business continuity.

This long-term capital planning objective is to adopt a facilities portfolio management system that will provide a dynamic facilities condition index as a measuring metric to support informed decision making as investments in minor, major, capital improvement, and capital construction projects load continuously increase, and to ensure business continuity and adaptability needs are supported.

The maintenance projections that are created by the Facilities Program are based on a tracked metric called the Facility Condition Index (FCI). The FCI is a standard facility management benchmark that is used to objectively assess the current and projected condition of a building asset and provide a means for comparisons of facility or building conditions, as well as allowing for renewal funding needs and comparisons. The FCI is the ratio of current year required renewal cost to current building replacement value, or in other words, a calculated measure of facility condition relative to its current replacement value expressed as a percentage. Based on this index, a structure's condition can be ranked as Good (0-5% FCI), Fair (5-10%), Poor (>10%) or Very Poor (>60%). An FCI of 60% or greater usually indicates that the structure should be replaced rather than renewed.

The fundamental drivers of this plan include:
- Effective long-range capital planning for maximizing the use and value of our facilities via a consistent 10-year planning vision.
- Being good stewards of our investments: this is where public investments are properly maintained to ensure occupant safety, being nimble as programming needs change or evolve, and the reduction of long-term operating costs.
- Designing for quality: good building design contributes to higher employee productivity and adaptability and enhanced public service.
- Right sizing our portfolio: sustainability and resiliency being very high priorities, and meeting agencies programming needs.
- Conveying our identity: ensuring that our buildings have an image of accessibility and responsiveness (in-short, how adaptable are our buildings to program changes).
- Emphasizing resiliency: ensuring that buildings are prepared to withstand catastrophic events – both natural (earthquake) and man-made (climate change which could affect HVAC loads, snow loads, etc.).
- Applying best practices when maintaining and planning for new facilities: for example, utilizing Master Planning to help facilitate the long-term need when planning for larger capital improvement and capital construction projects.
- Facility investment tool: effective investment strategy that leverages matching dollars.

OSH is committed to comply with regulatory requirements and achieve good stewardship of state assets to provide a safe and therapeutic environment of care to Oregon's most vulnerable populations.

It's important to note that the investments requested in this policy package reflect the required biennial ask of an investment of at least 2% of its portfolio CRV as per ORS 291.215. OSH will be implementing a long-term capital planning effort that will provide the necessary data to support a plan that will reduce future unplanned maintenance costs, support operational sustainability, and continued compliance with regulatory requirements; all while being good stewards of state assets and to provide a safe and therapeutic environment of care to some of Oregon's most vulnerable, as well as a safe and conducive work environment where the patients and staff can thrive.

Article XI-Q Bond Financing and Other Financing Request Form

Capital Acquisition, Construction or Improvement of Real Property, Equipment or IT Systems

Please return the completed Request Form by **May 17, 2024** to:

Rhonda Nelson, Capital Finance Manager
E-mail to Rhonda.Nelson@das.oregon.gov
Department of Administrative Services, Chief Financial Office
350 Winter St NE; Salem, OR 97301

If you have any questions, please call Rhonda Nelson at (971) 719-1998.

Agency:	Oregon Health Authority
Contact Person:	Karen Jamieson
Phone:	503-947-2676
E-mail:	Karen.M.Jamieson@oha.oregon.gov

Form Requirements: Use this form to request acquisition, construction or improvement of real property, equipment or IT systems that your agency is asking to finance using Article XI-Q Bonds or Leases (only leases that function as a vehicle to borrow money) over the next biennium beginning July 1, 2025. Article XI-Q bonds are limited to costs of a project that can be capitalized to the asset being financed (see OAM 15.60.10 and 15.60.40), with a few exceptions; thus, other non-capital and unallowed* capital costs of a project will need to be funded with other sources. The capital assets financed with XI-Q Bonds must be owned or operated by the State**. Financing agreements are defined in ORS 283.085(3) and include any agreement to finance real or personal property that is or will be owned and operated by the State. This includes lease purchase agreements and similar financing arrangements. Do not list leases on this form if the lease does not function as a vehicle to borrow money.

Acquisition, Construction or Improvement of Real Property, Equipment or IT Systems							
Description of Property/Equipment/ System Project	**Owned or Operated by the State (if operated, who owns?)**	**Estimated Useful Life of Capital Asset**	**Total Estimated Cost of Project**	**Amount Requested to be Financed in 2025-27[1]**	**XI-Q Bonds or Lease Financing**	**Date Financing Needed (list separate rows for different dates)[2]**	**Debt Service Funding Source**
Air handler returns - Junction City - equipment needed to properly address air quality in the event of environmental outside air concerns (such as forest fires).	Owned by the State	15	900,000	900,000	XI-Q Bonds	October 2025	GF
Addition of second floor - Salem - infill space within Vocational Services area to add second floor, creating 2,700 square feet of office space and approximately 32 additional work spaces.	Owned by the State	25(+)	1,775,000	1,775,000	XI-Q Bonds	October 2025	GF
Public Address system - Salem - install a separate PA system separate from the current fire panel-zoned system to assist with response and increase efficiency.	Owned by the State	10	1,700,000	1,700,000	XI-Q Bonds	October 2025	GF
Sewage Grinders - Salem - an essential component of the sewage system that is beyond useful life.	Owned by the State	10	168,000	168,000	XI-Q Bonds	October 2025	GF
Trash compactors with cart lifts - Salem - Equipment at end of useful life and necessary for hospital environmental control.	Owned by the State	10	282,000	282,000	XI-Q Bonds	October 2025	GF
Kubota full cab utility vehicles - Salem and Junction City - vehicles at end of useful life, utilized for a variety of functions around the campus including hauling and maintenance.	Owned by the State	10	375,000	375,000	XI-Q Bonds	October 2025	GF
Carousels for Pharmacy - Salem and Junction City - equipment used in conjunction with dispensing cabinets, purchased last biennium, to dispense medication. Equipment is beyond useful life and no longer vendor supported. Non-capital amounts have been removed from the total expense for this bond request.	Owned by the State	10	1,408,800	1,363,000	XI-Q Bonds	October 2025	GF
Cottage Roofs - Salem - replace the roofs on 10 of 18 Salem cottages.	Owned by the State	25	500,000	500,000	XI-Q Bonds	October 2025	GF
Cottage Roofs - Salem - replace the roofs on the remaining 8 of 18 Salem cottages.	Owned by the State	25	400,000	400,000	XI-Q Bonds	May 2026	GF
Totals			7,508,800	7,463,000			

Notes:

a. Related Party Costs (costs paid from one State Agency to another and does not represent out-of-pocket costs to an unrelated third party).

b. Pollution Remediation and Demolition Costs (except when it is required to complete the project and is not the entire project; discuss with Capital Finance Analyst).

c. Indirect or Administrative Costs that are not directly related to a capital project or a series of capital projects.

Note: See Section 2.1.2 of the "Agency Guide to Financing Capital Projects with Article XI-Q Bonds" for more information on un-allowed uses.

**Capital assets funded with tax-exempt bonds cannot have more than 10% Private Business Use, where all or a portion of the asset is used by a private person or entity other than a state or local government unit, including the federal government, a for-profit or non-profit organization, or individuals acting in a trade or business.

[2] Sale dates for Article XI-Q Bonds are for budgeting purposes only, and are subject to change.

Capital Financing Six-Year Forecast Summary 2023-25

Agency: OHA - Oregon State Hospital
Agency #: 443

Provide amounts of agency financing needs for the 2023-25 biennium, by expected use and repayment source. Include proposed project amounts only (do not include debt service from either previously issued debt or from new debt issuance).

Facilities Summary Report

2025-27 Biennium

Facility Plan - Facilities Planning Narrative 107bf02a
2025-27 Biennium

Agency Name | **Oregon Health Authority (OHA) | Oregon State Hospital (OSH)**

1. What are the key drivers for your agency's facility needs, and how do you measure space/facility demand?

• The Oregon State Hospital is subject to standards determined by the Centers for Medicaid and Medicare Services (CMS) and reviewed and accredited through the Joint Commission on Accreditation of Healthcare Organizations (JCAHO).

• In addition to applying best management practices and standards for the maintenance/repair/replacement of buildings and equipment, the hospital is required to meet more stringent facilities requirements as determined by the CMS and JCAHO governing bodies.

• The occupancy of the hospital is primarily determined by the judicial system. Periodic legislative changes will impact the types and quantities of patients to be admitted to OSH. Depending on the changes in law, this can drive an increase or decrease to the facility demand, partially determined by the level of care required for new patient admissions and the associated adaptation of existing hospital space.

• Occupancy requirements and needs are dynamic. The measurement of space is completed through monitoring of legislative and regulatory requirements, with associated increases or decreases to staffing dependent on shifting requirements and the needs of the patients.

2. What are the key facility-related challenges over the next 10-years? (Please answer in order of priority)

• Increase demand in patient services.
• Above average use/wear of building systems due to the 24/7 operations schedule and hospital operations environment.
• Keeping up with the demand for hospital services programming.
• Deferred maintenance: the replacement of building systems and equipment that have met their useful life.
• Responding to regulatory changes requiring facility improvements.
• The need for the development of a long-term strategic planning framework.
• Emergency management and resiliency planning.

3. What do you need to meet these challenges?
• Completing a statewide building assessment of all OSH facilities; including Salem, Junction City, and Pendleton.
• Introducing a software platform (TRIRIGA or equal) to provide long-term strategic capital planning data.
• Updating the Oregon State Hospital Area Plan (125-125-0350).
• Completing a master plan for the Oregon State Hospital facility (including the cottages).

Facilities Summary Report

2025-27 Biennium

Agency Name: **Oregon Health Authority (OHA) | Oregon State Hospital (OSH)**

Owned Facilities Over $1 million	**FY 2024 DATA**

Healthy People	OHA	ALERT IIS Replacement	P50009	Steve/Randa	ALERT IIS Replacement Project	Federal	The Oregon Health Authority (OHA) Oregon Immunization Program (OIP) uses the ALERT IIS system, a database that records all immunization doses administered by participating providers in Oregon, as a powerful tool for managing immunization records and supporting healthier communities. The ALERT IIS Replacement Project will ensure continued administration of immunization records and promote modernization of OIP's processes and applications. This project aligns with the national Data Modernization Initiative (DMI) and with the Oregon Health Authority's strategic goal to eliminate health inequities in Oregon by 2030. This project must be executed before 12/31/2027, prior to the end of the existing vendor contract with Gainwell Technologies.	2022-10-20	2027-12-31	$ 1,205,000	TBD	$ 271,886	$ -	$ -	$ 271,886	TBD	TBD	TBD	TBD	TBD	TBD	TBD	TBD	Alert is just in the intitial planning stages, the current projected costs are minimal and do not reflect the total expected costs for this project. Project management is still collecting information for this project
Healthy People	OHA	COMPASS - MOTS Replacement	P80023/P80027	Said/Steve	Community Outcomes Management System (COMPASS)	None	The Measures and Outcomes Tracking System (MOTS) replacement will replace the existing siloed, aged, and fragmented MOTS system. The new system will support the administration, planning, and monitoring of substance abuse disorder and mental health treatment programs.	2020-01-23	TBD	$ 11,342,630	$ 9,296,386	$ 1,341,912	$ -	$ -	$ 4,249,387	TBD	TBD	TBD	TBD	TBD	TBD	TBD	TBD	Current MOTS spend plan through June 2024. Another phase is anticipated (APD in progress) but unprojected at this time. Does not include any M&O estimates.
Healthy People	OHA	GO Priority - 1115 HRSN - Community Information Exchange	-	Lisa/Randa	GO Priority - 1115 HRSN - Community Information Exchange	Federal	Oregon recently received Centers for Medicare and Medicaid Services (CMS) approval for the 2022-2027 1115 Medicaid Waiver. Provisions in the new waiver will be implemented over the course of the 5-year demonstration period and will include significant changes to Coordinated Care Organization (CCO) contract requirements; revision of Oregon Administrative Rules (OAR) that impact all providers; substantial changes to IT systems to support financial disbursement, claims activity, and data submission; and management of the adoption and utilization of statewide community information exchange (CIE) platforms for referrals.	2023-05-01	2026-02-24	$ -	TBD	$ -	$ -	$ -	$ -	TBD	TBD	TBD	TBD	TB D	TBD	TBD	TBD	
Healthy People	OHA	HIV-E (HIV-Electronic)	500001	Steve/Randa	HIV-E (HIV-Electronics)	None	Develop a solution that will replace the existing CAREAssist 1.0 application with a new, custom developed CAREAssist 2.0 application that addresses current system issues.	2015-11-30	2027-06-29	$ 23,700,949	$ 24,946,537	$ -	$ 10,305,584	$ -	$ -	$ -	$ 9,739,443	$ -	$ -	$ -	$ -	$ -	$ -	M&O has not been included in these estimates. Currently this project is projected to be completed March 2027. Total cost is a DDI estimate only.
Healthy People	OHA	Improving Medicaid Enterprise Data	P80041	Lisa, Said	N/A		OHA will expand the Behavioral Health Data Warehouse (BHDW) Person Index (PI) and enhance the BHDW, two primary building blocks from the Compass Modernization initiative, to improve data quality, sharing, and analytical capacity for the Medicaid population. Oregon's modular Medicaid Enterprise System (MES) will require a data environment capable of matching, cleaning, and storing integrated and interoperable data from various sources. Incremental expansion and improvement of the BHDW will improve Oregon's analytic and operational capabilities in the near term and will be consistently evaluated for inclusion as part of the state's Enterprise Data Warehouse (EDW) module.	2023-10-01	TBD		N/A	TBD	$ 819,253	$ -	$ -	$ 7,371,714	$ -	$ -	$ -	$ -	$ -	$ -	$ -	$ -	End date TBD, project extending. New APD coming. Date/scope TBD.
Healthy People	OHA	MES Modernization (formerly Modularity) Planning Phase	P80014	Chad/SAID	N/A	None	Medicaid Enterprise System (MES) Modularity strategy development is being facilitated by the consulting vendor.	2022-07-01	TBD		N/A	TBD	TBD	$ -	$ -	TBD	TBD	$ -	$ -	TBD	TBD	$ -	$ -	TBD	Project still in planning, but projected to continue for some time. 25-27 POP in progress.
Healthy People	OHA	MMIS Infrastructure Replacement	P80039	Chad/SAID	MMIS Infrastructure Replacement Project	None	The industry-wide move toward Cloud hosting solutions solves a number of IT challenges. Cloud hosting is cost effective, scalable, flexible, secure, and redundant, which all bring large benefits to the the Medicaid Management Information System (MMIS) and is our largest step in preparing for Modularity. 1) Existing MMIS Infrastructure is reaching end of lifecycle in 2024. Project must be completed before 2024 with a duration estimated at 3 years. 2) CMS supports moving MMIS to the Cloud by providing 90/10 funding. 3) Gainwell is transitioning its national data centers to the Cloud, and we will leverage their existing support model.	2022-01-03	2025-12-25	$ 20,318,175	TBD	$ 712,409	$ -	$ -	$ 6,411,685		TBD	$ -	$ -	TBD	TBD	$ -	$ -	TBD	
Healthy People	OHA	MMIS Private Public Providers	P80034	Chad/SAID	MMIS Private Public Providers	None	Update Medicaid Management Information System (MMIS) system to enable distinction between public and private providers for the purposes of adjusting claims.	2021-08-02	2026-09-30	$ 1,066,342	$ 1,164,065	$ 59,256	$ -	$ -	$ 533,304		TBD	$ -	$ -	TBD	TBD	$ -	$ -	TBD	
Healthy People	OHA	MMIS TMSIS	P80029	Chad/SAID	MMIS T-MSIS Phase 2	Federal	This project will involve modifications to the Medicaid Management Information System (MMIS) system to collect and submit required data for Centers for Medicare & Medicaid Support (CMS) to perform necessary data analytics for decision-making. Specifically, this project addresses Transformed Medicaid Statistical Information System (TMSIS) data quality elements and CMS dashboard issues.	2020-05-01	2025-09-30		TBD	$ 4,974,719	$ 202,142	$ -	$ -	$ 1,819,274.40		TBD	$ -	$ -	TBD	TBD	$ -	$ -	TBD	APD currently scheduled through 09/2025, but project is expected to go beyond that date. Subject to change.
Healthy People	OHA	OEBB-PEBB Benefit Management System (BMS) Replacement	P70003	Chad/Said	OEBB-PEBB Benefit Management System (BMS)	Legislature	Replace two aging and highly customized benefits management systems (BMS) with a single, modernized Software-as-a-Service (SaaS)/Commercial-Off-The-Shelf (COTS) system that supports delivery of required functionality in order to meet legislative requirements and improved user experience (UX).	2019-07-01	2026-04-30	$ 14,448,785	$ 14,470,785	$ -	$ 8,423,956	$ -	$ -	$ -	$ -		TBD	$ -	$ -	$ -	TBD	$ -	$ -	Project has POP to go for 9 months into 25-27.
Healthy People	OHA	Oregon State-Based Marketplace	P70004	Carol/Randa	Oregon State-Based Marketplace	None	The Oregon Health Authority (OHA), Oregon Health Insurance Marketplace is seeking to transition Oregon from a State-Based Marketplace using the Federal Platform (SBM-FP) to a state-based marketplace (SBM). Becoming an SBM requires that a state acquire and implement its own enrollment technology and accompanying consumer assistance center (CAC) to provide over-the-phone support for enrollees.	2023-07-06	2027-03-31	$ 14,880,000	$ 79,380,000	$ -	$ 2,059,864	$ -	$ -	$ -	$ -	$ 38,000,000	$ -	$ -	$ -	$ 39,320,136	$ -	$ -	Total cost assumed to be the estimate provided in the IT Investment form, and includes operating costs.

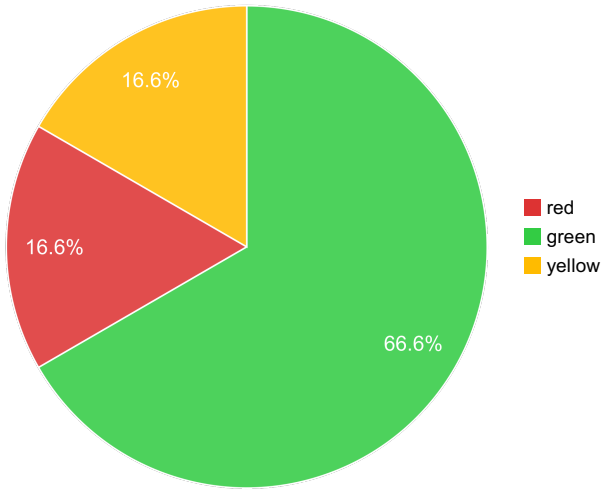
PTC including Ph2a and Ph2b through June 2027, M&O costs have been projected has its own project No P30002

Oregon Health Authority

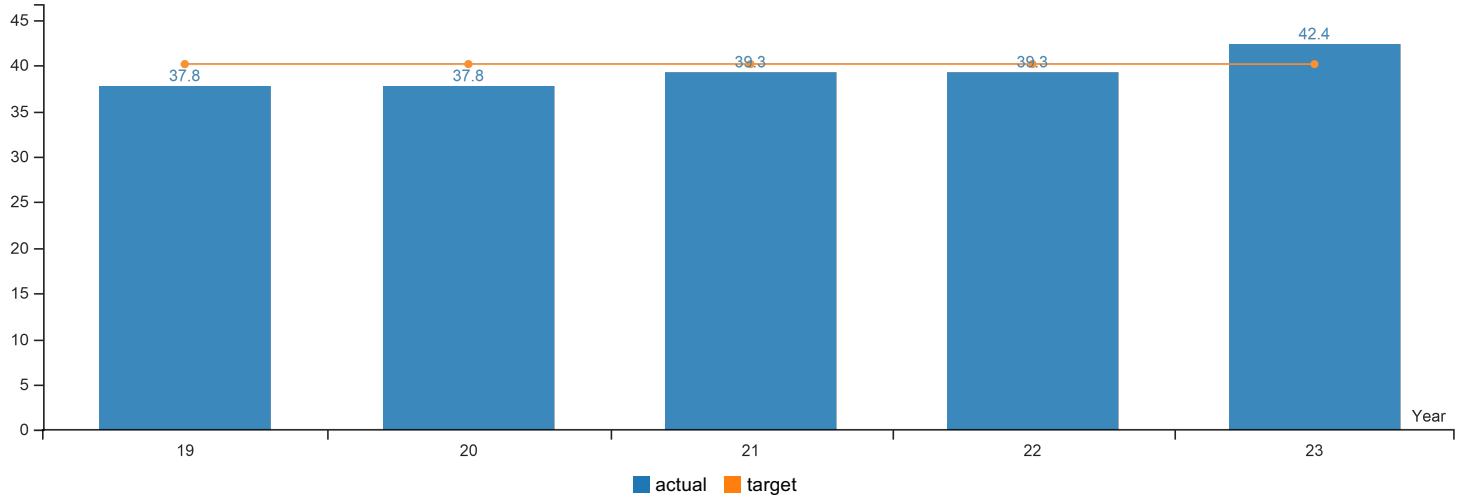


Annual Performance Progress Report

Reporting Year 2023

Published: 11/8/2023 8:21:00 AM

KPM #	Approved Key Performance Measures (KPMs)
1	INITIATION OF ALCOHOL AND OTHER DRUG DEPENDENCE TREATMENT - Percentage of members with a new episode of alcohol or other drug dependence who received initiation of AOD treatment within 14 days of diagnosis.
2	ENGAGEMENT OF ALCOHOL AND OTHER DRUG DEPENDENCE TREATMENT - Percentage of members with a new episode of alcohol or other drug dependence who received two or more services within 30 days of initiation visit.
3	FOLLOW-UP AFTER HOSPITALIZATION FOR MENTAL ILLNESS - Percentage of enrollees 6 years of age and older who were hospitalized for treatment of mental health disorders and who were seen on an outpatient basis or were in intermediate treatment within seven days of discharge.
4	MENTAL, PHYSICAL, AND DENTAL HEALTH ASSESSMENTS FOR CHILDREN IN DHS CUSTODY - Percentage of children in DHS custody who receive a mental, physical, and dental health assessment within 60 days of the state notifying CCOs that the children were placed into custody with DHS (foster care).
9	30 DAY ILLICIT DRUG USE AMONG 8TH GRADERS - Percentage of 8th graders who have used illicit drugs in the past 30 days.
10	30 DAY ALCOHOL USE AMONG 8TH GRADERS - Percentage of 8th graders who have used alcohol in the past 30 days.
20	ACCESS TO CARE - Percentage of members who responded "always" or "usually" to getting care quickly.
21	MEMBER SATISFACTION OF CARE - Composite measurement: how well doctors communicate; health plan information and customer service (Medicaid population).
23	RATE OF TOBACCO USE (POPULATION) - Rate of tobacco use among adults.
25	RATE OF OBESITY (POPULATION) - Percentage of adults who are obese among Oregonians.
34	CUSTOMER SERVICE - Percentage of OHA customers rating their satisfaction with the agency's customer service as "good" or "excellent" overall, timeliness, accuracy, helpfulness, expertise, availability of information.
35	HEALTH EQUTY MEASURE – COMPONENT #1: MEANINGFUL LANGUAGE ACCESS TO CULTURALLY RESPONSIVE HEALTH CARE SEVICES FOR CCO MEMBERS - Component 1 is based on an annual language access self-assessment survey and designed to evaluate the development of structures and workflow processes to provide quality and consistent interpreter services.
36	HEALTH EQUITY MEASURE - COMPONENT #2: MEANINGFUL LANGUAGE ACCESS TO CULTURALLY RESPONSIVE HEALTH CARE SERVICES FOR CCO MEMBERS - Component 2 is based on the reporting of quarterly utilization data on interpreter services and designed to measure quality of interpreter services.
37	INFANTE MORTALITY RATE - Numerator: # of deaths of infants <365 days of age in specified time period Denominator: # of live births in specified time period. Rate calculation: (Num/Denom)*1,000
38	REDUCTION OF SEVERE MATERNAL MORBIDITY - Numerator: # of cases of severe maternal morbidity* in specified time period Denominator: # of delivery hospitalizations in specified time period Rate calculation: (Num/Denom)*10,000 (read out as “[number] per 10,000 delivery hospitalizations”) *Note: Severe maternal morbidity cases are determined by using a validated set of ICD-10 diagnosis and procedure codes to examine hospital data.
39	COMPARISON OF OHA WORKFORCE TO POTENTIAL LABOR MARKET - Comparisons of the OHA workforce to the potential labor market provide a measurement of parity, defined as: achieving comparable representation of Tribal communities, communities of color, people with disabilities and females (binary gender for now) in OHA’s workforce to the same proportion in the potential labor market.
40	COMPARISON OF OHA NON-SUPERVISORY MANAGERS TO POTENTIAL LABOR MARKET - Comparisons of OHA non-supervisory managers to the potential labor market provide a measurement of parity, defined as: achieving comparable representation of Tribal communities, communities of color, people with disabilities and females (binary gender for now) who are OHA non-supervisory managers to the same proportion in the potential labor market.
41	COMPARISON OF OHA SUPERVISORY MANAGERS TO POTENTIAL LABOR MARKET - Comparisons of OHA supervisory managers to the potential labor market provide a measurement of parity, defined as: achieving comparable representation of Tribal communities, communities of color, people with disabilities and females (binary gender for now) who are OHA supervisory managers to the same proportion in the potential labor market.
42	COMPARISON OF OHA VOLUNTARY SEPARATIONS TO ALL AGENCY SEPARATIONS - OHA defines parity as achieving comparable representation of Tribal communities, communities of color, people with disabilities and females (binary gender for now) in OHA’s workforce to the same proportion to OHA’s potential labor market.
43	COMPARISON OF OHA INVOLUNTARY SEPARATIONS TO ALL AGENCY SEPARATIONS - Parity is determined by a ratio of OHA involuntary separations—dismissal, dismissal during trial service or layoff—(numerator) and all agency separations (denominator). If the ratio score is greater than or equal to 90% for Tribal communities, communities of color, people with disabilities or females, then there is a relatively high representation of that group in involuntary separations from the agency. Excludes deaths and unknown separations.
44	QUALITY OF LIFE - POOR PHYSICAL HEALTH - Average number of physically unhealthy days in the past 30 among adults. Measuring health-related quality of life helps build understanding around people’s lived experience with disabilities and chronic diseases across the population. Self-report of days when physical health was not good is a reliable estimate of recent health status.
45	QUALITY OF LIFE - POOR MENTAL HEALTH - Average number of mentally unhealthy days in the past 30 days (age 18+). Measuring health-related quality of life helps build understanding around people’s lived experience with disabilities and chronic diseases across the population. Self-report of days when mental health was not good is a reliable estimate of recent health status.
46	PREMATURE DEATH - Number of years of potential life lost (YPLL) per 100,000 before age 75. Premature death is measured by summing the years between age at death and age 75 across all people who died before reaching that age. It’s a way of quantifying the societal impact of early deaths in a population. Causes of death that are more likely to affect younger people – such as congenital anomalies and accidental injuries – contribute to higher rates of premature death.
47	MORTALITY FROM DRUG OVERDOES - Number of deaths per 100,000 from drug overdoses excluding suicide. Drug overdose deaths account for a major proportion of all premature deaths and are largely preventable.
48	TOBACCO USE - TEENS - Percent of 11th graders who use tobacco (past 30 days). Cigarette smoking is the most common cause of preventable death and disease. It is identified as a cause of various cancers, cardiovascular disease, and respiratory conditions, as well as low birthweight and other adverse health outcomes. Many teen smokers become adult smokers. Measuring the prevalence of tobacco use in the youth population can alert communities to potential adverse health outcomes and can be valuable for assessing the need for prevention programs or the effectiveness of existing programs.
49	OBESITY - TEENS - Percent of 11th graders who are obese (BMI >= 95th percentile for age/sex). Obesity is the second leading cause of preventable death in Oregon. It is a major risk factor for high blood pressure, high cholesterol, diabetes, heart disease, and cancer. Obese teens are at an increased risk of becoming obese adults.



KPM #	Approved Key Performance Measures (KPMs)
50	STATEWIDE SUSTAINABLE COST OF CARE - Comparison of health care cost changes to personal income changes. Any value 0 or higher is green because we want per capita income growth to equal or exceed per capita health care cost growth. By way of background, the statewide sustainable cost of care measure is a comparison between per person growth in income in Oregon and health care spending growth in Oregon. Historically, health care costs have grown faster than income and Oregon is trying to change that with the Cost Growth Target program and other initiatives. When the result from subtracting per person income growth minus per person health care cost growth is 0 or positive, it means income is growing at the same pace or faster than health care costs, which is good. When the measure is a negative number, it means health care costs are growing faster than income, which is not good.
51	OHA SUSTAINABLE COST OF CARE - Difference between real personal income and health care inflation. Any value 0 or higher is green because we want per capita income growth to equal or exceed OHA's per person spending on PEBB, OEBB, and OHP. By way of background, the OHA sustainable cost of care measure is a comparison between per person growth in income in Oregon and health care spending growth for OHA's three health programs: Oregon Health Plan, Public Employees Benefits and Oregon Educators Benefits. When the result from subtracting per person income growth in Oregon minus per person spending on PEBB, OEBB, and OHP is 0 or positive, it means income is growing at the same pace or faster than OHA's health care costs, which is good. When the measure is a negative number, it means the cost of OHA's three health care programs is growing faster than income, which is not good.
52	CRITICAL EVENTS MEETING THE 14-CALENDAR DAY TIMELINE TO PROVIDE CORRESPONDENCE TO TRIBAL LEADERS - To track compliance with the OHA Tribal Consultation Policy timelines, % of critical events meeting the timeline. Total number of critical events meeting the timeline/total number of identified critical events.
53	TRIBAL CONSULTATIONS MEETING THE 30-CALENDAR DAY TIMELINE FOR REPORTING OF OUTCOME OF CONSULTATION - To track compliance with the OHA Tribal Consultation Policy timelines, % of consultations reporting outcome within 30 calendar days. Total number of consultations meeting reporting timeline/total number of consultations
54	TIMELINESS OF TRANSLATIONS DURING EMERGING PUBLIC HEALTH EVENTS - To allow for equitable access to important public health information during public health events. Meet Federal and state legal obligations to provide information in alternative languages and formats, including Title VI of the Civil Rights Act. Compliance with agency policies, including DHS|OHA-010-013 Alternate Formats and Language Access Services. Number of hours from Incident Manager approval of an important (expedited) public information document for an identified public health event to the return of translated documents to the incident's Joint Information Center.
55	PENDING REDETERMINATION APPLICATIONS OVER 45 DAYS OLD - Total number of pending applications for redetermination that are over 45 days old.

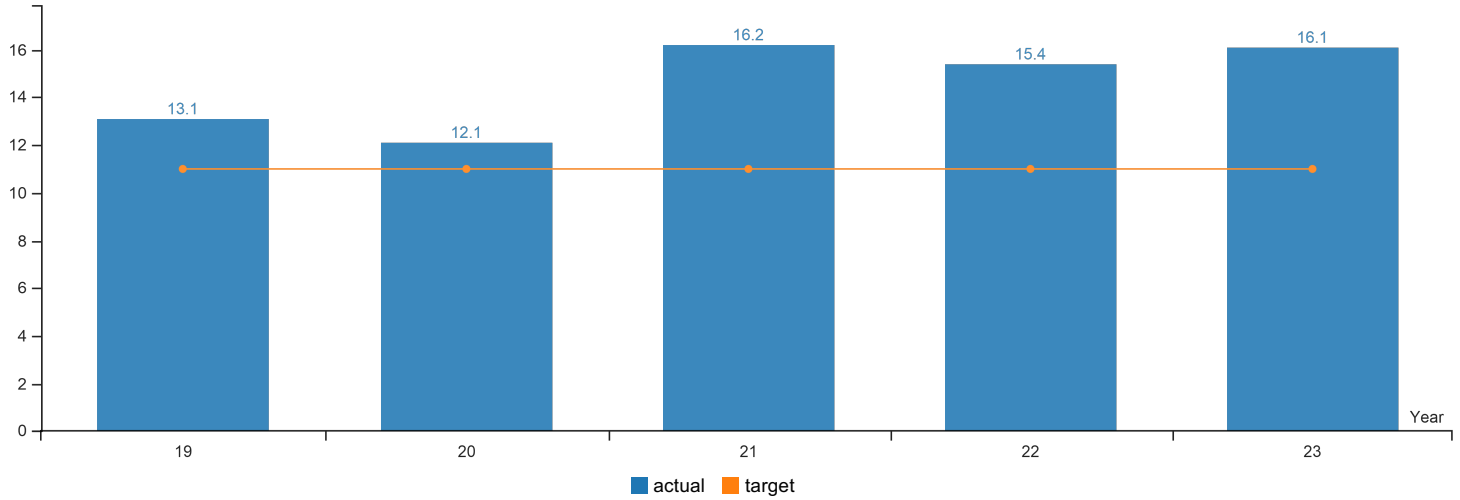
Performance Summary	Green	Yellow	Red
	= Target to -5%	= Target -5% to -15%	= Target > -15%
Summary Stats:	66.67%	16.67%	16.67%

KPM #1	INITIATION OF ALCOHOL AND OTHER DRUG DEPENDENCE TREATMENT - Percentage of members with a new episode of alcohol or other drug dependence who received initiation of AOD treatment within 14 days of diagnosis.
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = positive result*

Report Year	2019	2020	2021	2022	2023
Initiation of alcohol and other drug dependence treatment					
Actual	37.80%	37.80%	39.30%	39.30%	42.40%
Target	40.20%	40.20%	40.20%	40.20%	40.20%

How Are We Doing



The percentage of members ages 13 and older newly diagnosed with alcohol or other drug dependencies who initiated treatment within 14 days stayed was 42.4% in 2022. Data prior to 2022 are not directly comparable due to a methodology change.

Factors Affecting Results

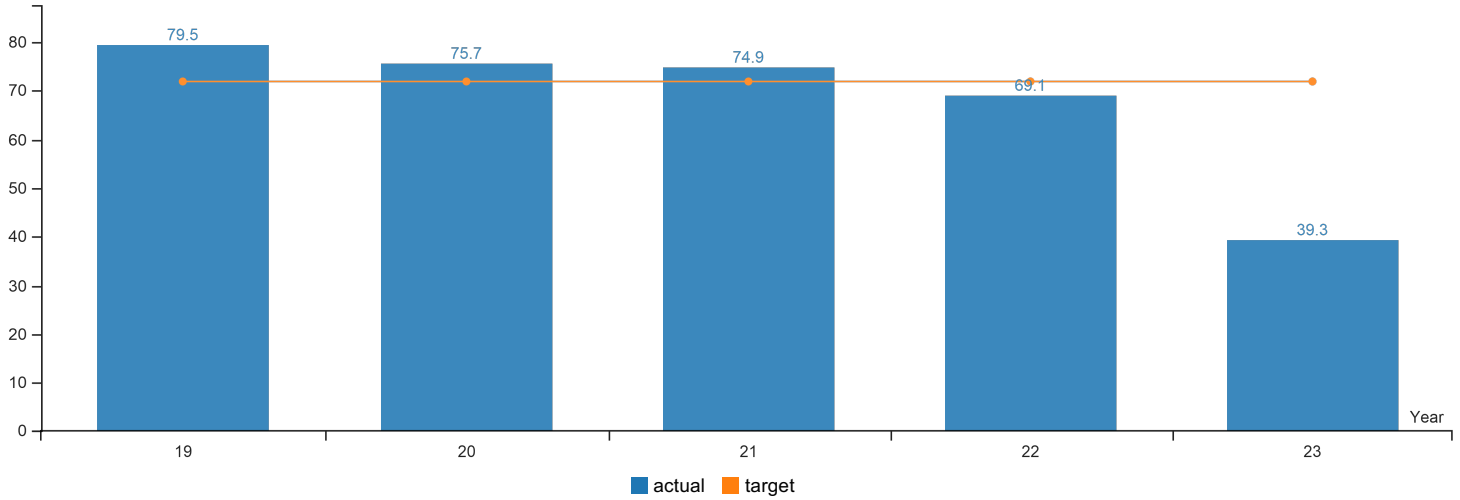
It is possible that the increased statewide emphasis on alcohol and drug use screening (SBIRT) due to the CCO incentive measure in 2020 resulted in an increase in initiation of alcohol and drug treatment, as more individuals with risky or problematic substance use are identified and referred to treatment services.

KPM #2	ENGAGEMENT OF ALCOHOL AND OTHER DRUG DEPENDENCE TREATMENT - Percentage of members with a new episode of alcohol or other drug dependence who received two or more services within 30 days of initiation visit.
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = positive result*

Report Year	2019	2020	2021	2022	2023
Engagement of alcohol and other drug dependence treatment					
Actual	13.10%	12.10%	16.20%	15.40%	16.10%
Target	11%	11%	11%	11%	11%

How Are We Doing



The percentage of members who continued their treatment was 16.1% in 2022. Data prior to 2022 is not directly comparable due to a methodology change.

Factors Affecting Results

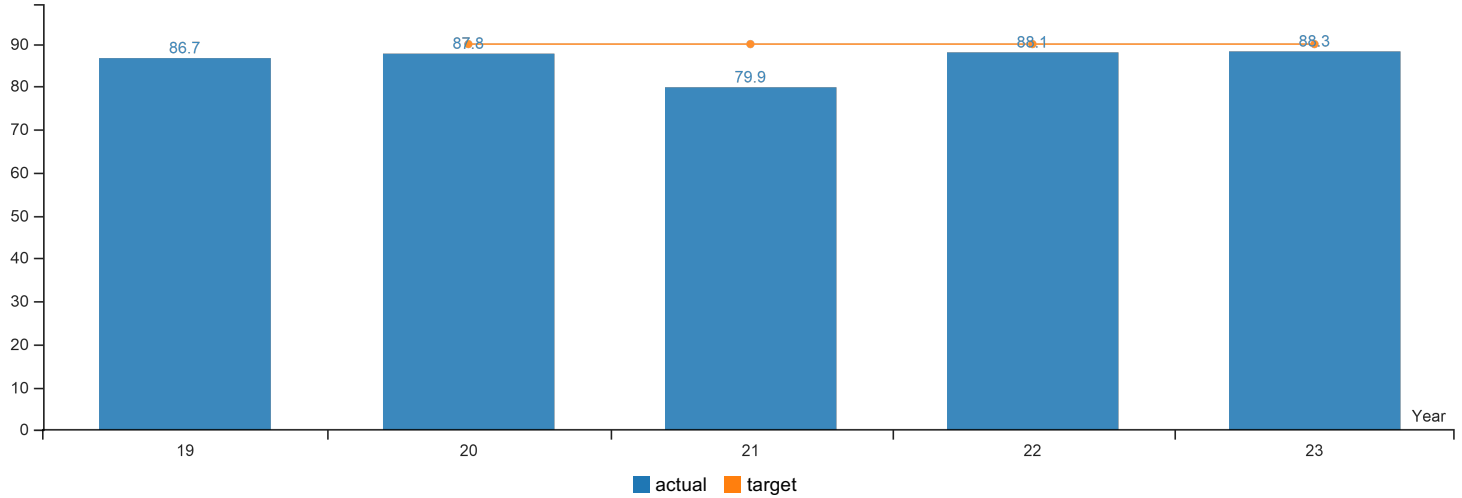
This was selected to be an incentive measure beginning in 2020, which possibly brought increased focus on this measure. However, the COVID-19 pandemic may have impacted initial gains.

KPM #3	FOLLOW-UP AFTER HOSPITALIZATION FOR MENTAL ILLNESS - Percentage of enrollees 6 years of age and older who were hospitalized for treatment of mental health disorders and who were seen on an outpatient basis or were in intermediate treatment within seven days of discharge.
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = positive result*

Report Year	2019	2020	2021	2022	2023
Follow-up after hospitalization for mental illness					
Actual	79.50%	75.70%	74.90%	69.10%	39.30%
Target	72%	72%	72%	72%	72%

How Are We Doing



Performance on this measure cannot be compared to previous years due to a change in specifications.

Factors Affecting Results

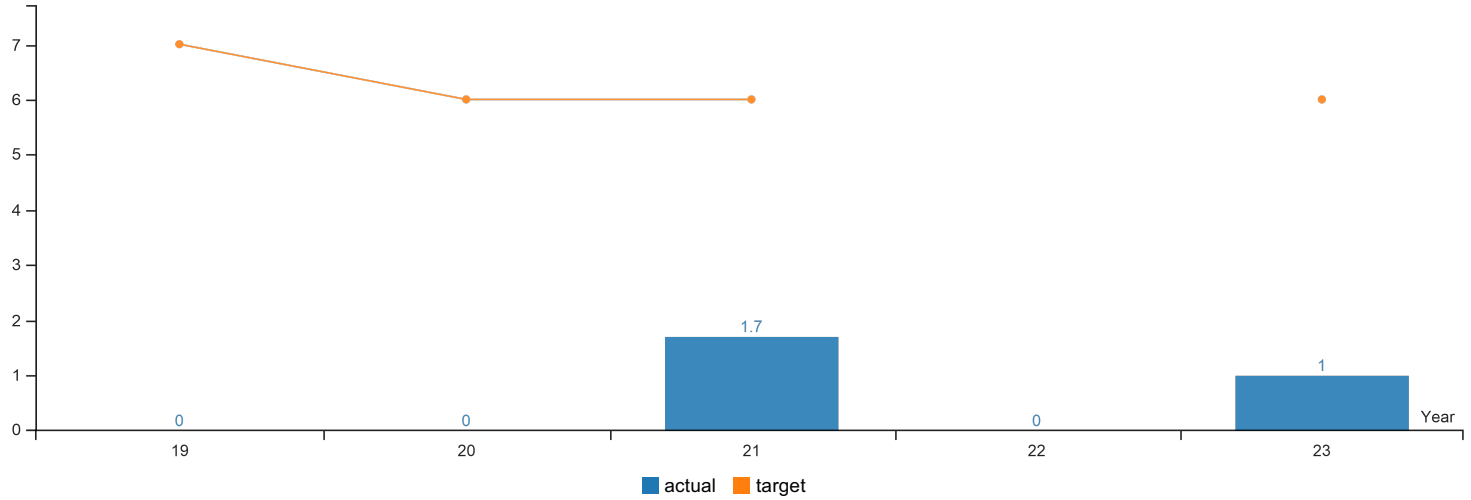
The specifications for this measure changed to require that the service be provided by a mental health professional. This change aligns the measure with HEDIS specifications.

KPM #4	MENTAL, PHYSICAL, AND DENTAL HEALTH ASSESSMENTS FOR CHILDREN IN DHS CUSTODY - Percentage of children in DHS custody who receive a mental, physical, and dental health assessment within 60 days of the state notifying CCOs that the children were placed into custody with DHS (foster care).
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = positive result*

Report Year	2019	2020	2021	2022	2023
MENTAL, PHYSICAL, AND DENTAL HEALTH ASSESSMENTS FOR CHILDREN IN DHS CUSTODY					
Actual	86.70%	87.80%	79.90%	88.10%	88.30%
Target		90%	90%	90%	90%

How Are We Doing



Data represent performance in CY 2022 and show a slight increase from CY 2021 when the percentage was 88.1%.

Factors Affecting Results

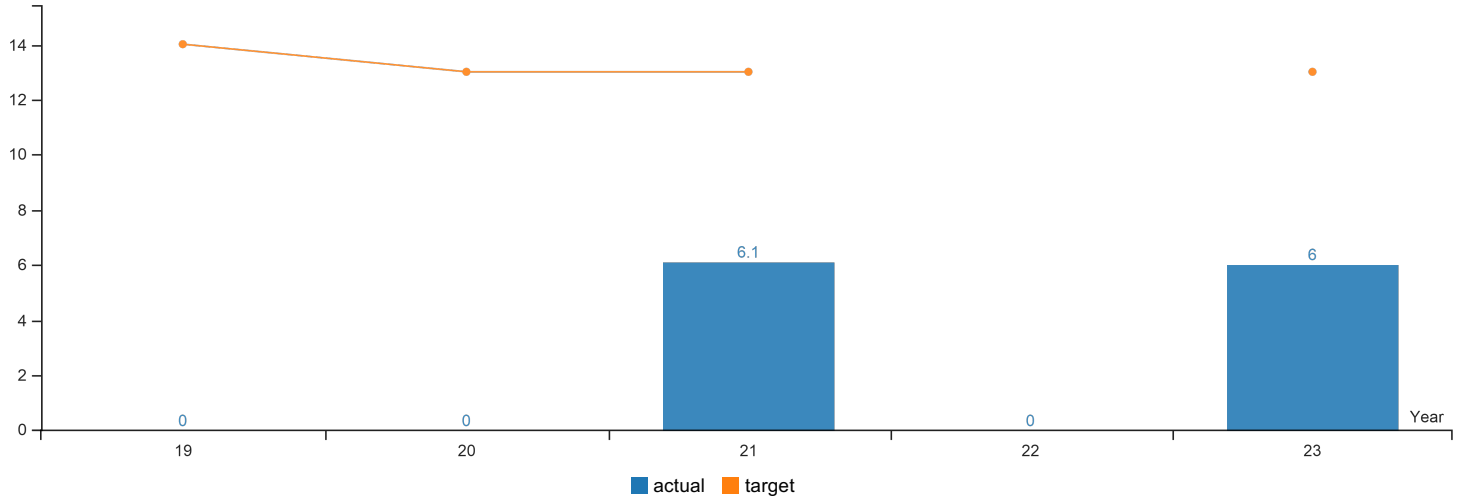
None

KPM #9	30 DAY ILLICIT DRUG USE AMONG 8TH GRADERS - Percentage of 8th graders who have used illicit drugs in the past 30 days.
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = negative result*

Report Year	2019	2020	2021	2022	2023
30 day illicit drug use among 8th graders					
Actual			1.70%		1%
Target	7%	6%	6%		6%

How Are We Doing



Beginning in 2020, the Oregon Health Authority Public Health Division launched the Student Health Survey (SHS), which replaced the previous Oregon Healthy Teens and Student Wellness Surveys. SHS data are not strictly comparable to prior Student Wellness Survey results reported in 2018 due to differences in data collection methods, learning environment, and data collection period. Due to the COVID-19 pandemic, the SHS data shows alcohol and illicit drug use results are low among youth. This measure doesn't include marijuana use starting in 2022 SHS.

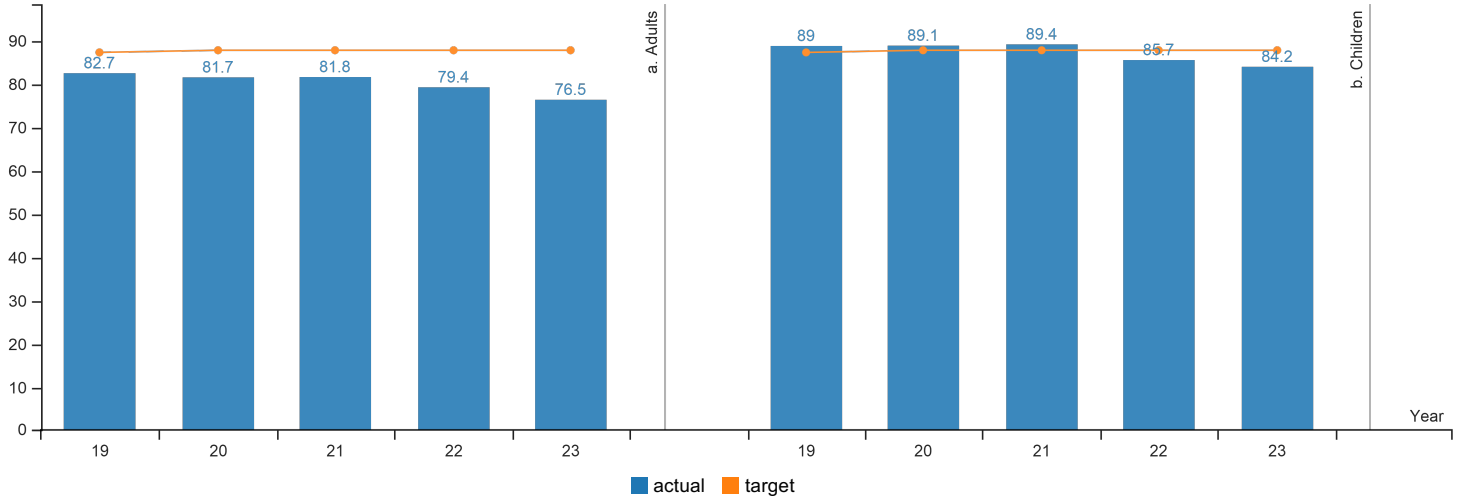
Factors Affecting Results

Starting with the 2022 SHS, the community partner recommended adding additional response categories for every question with "I am not sure," "I don't know what this question is asking," and "I prefer not to answer." Including these three additional response categories impacts the denominator and resulting percentages so that 2022 results are not strictly comparable to the 2020 SHS results.

KPM #10	30 DAY ALCOHOL USE AMONG 8TH GRADERS - Percentage of 8th graders who have used alcohol in the past 30 days.
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = negative result*

Report Year	2019	2020	2021	2022	2023
30 day alcohol use among 8th graders					
Actual			6.10%		6%
Target	14%	13%	13%		13%



How Are We Doing

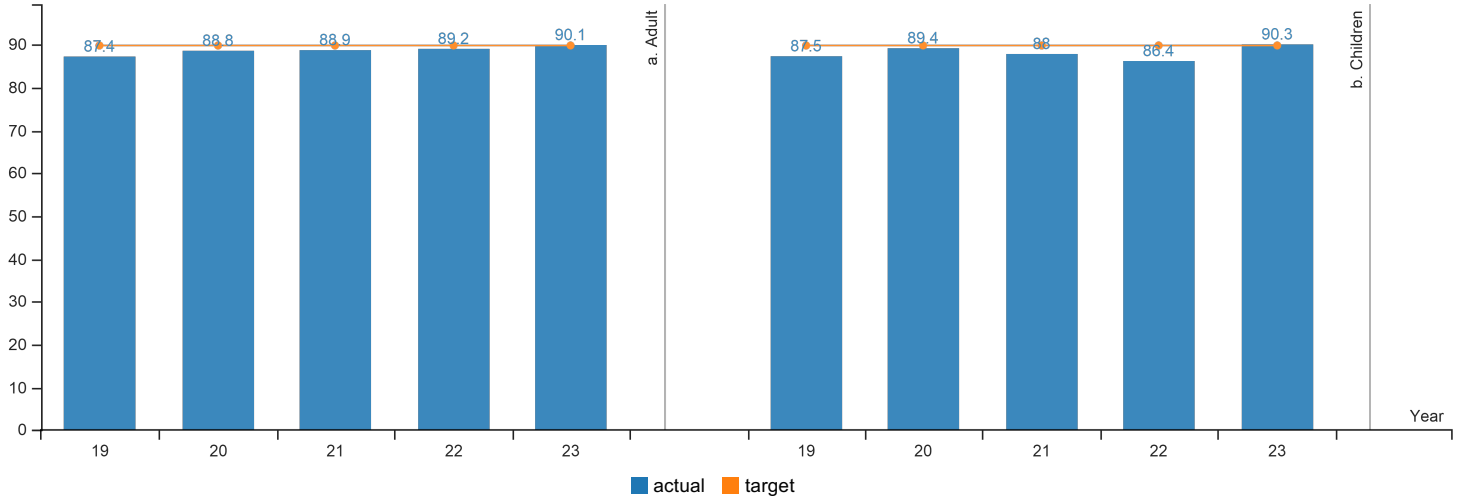
Beginning in 2020, the Oregon Health Authority Public Health Division launched the Student Health Survey (SHS), which replaced the previous Oregon Healthy Teens and Student Wellness Surveys. SHS data are not strictly comparable to prior Student Wellness Survey results reported in 2018 due to differences in data collection methods, learning environment, and data collection period. Due to the COVID-19 pandemic, the SHS data shows alcohol and illicit drug use results are low among youth.

Factors Affecting Results

Starting with the 2022 SHS, the community partner recommended adding additional response categories for every question with "I am not sure," "I don't know what this question is asking," and "I prefer not to answer." Including these three additional response categories impacts the denominator and resulting percentages so that 2022 results are not strictly comparable to the 2020 SHS results.

KPM #20	ACCESS TO CARE - Percentage of members who responded "always" or "usually" to getting care quickly.
	Data Collection Period: Jan 01 - Dec 31

Report Year	2019	2020	2021	2022	2023
a. Adults					
Actual	82.70%	81.70%	81.80%	79.40%	76.50%
Target	87.50%	88%	88%	88%	88%
b. Children					
Actual	89%	89.10%	89.40%	85.70%	84.20%
Target	87.50%	88%	88%	88%	88%



How Are We Doing

The percentage of adult members who thought they received appointments and care when needed was 76.5% in 2022. The percentage of child members who received appointment and care when needed was 84.2% in 2022. Prior to 2018, this measure was weighted score across children and adults. From 2018 on, however, these data are now disaggregated and reported separately for children and adults. This ensures that performance across the different age groups can be monitored appropriately and is based upon a decision from the Metrics and Scoring Committee. OHA added an oversample of race/ethnicity groups to the 2021, making results after 2021 not directly comparable to previous years.

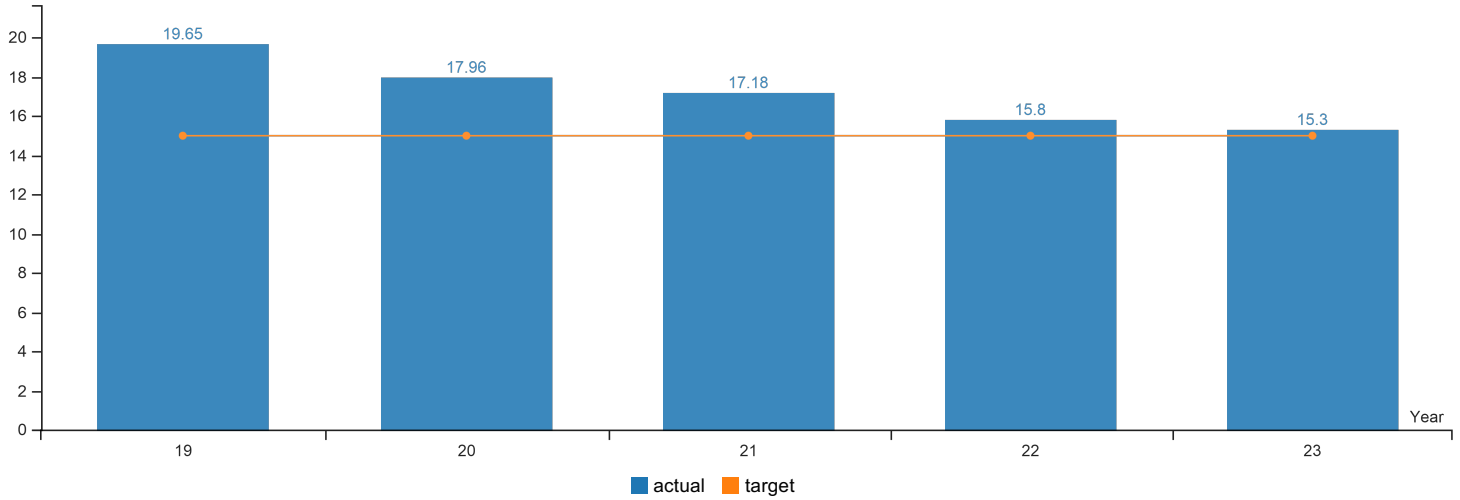
Factors Affecting Results

The COVID-19 pandemic may have affected most recent performance. This measure is included in the state's Medicaid demonstration agreement with CMS.

KPM #21	MEMBER SATISFACTION OF CARE - Composite measurement: how well doctors communicate; health plan information and customer service (Medicaid population).
	Data Collection Period: Jan 01 - Dec 31

Report Year	2019	2020	2021	2022	2023
a. Adult					
Actual	87.40%	88.80%	88.90%	89.20%	90.10%
Target	90%	90%	90%	90%	90%
b. Children					
Actual	87.50%	89.40%	88%	86.40%	90.30%
Target	90%	90%	90%	90%	90%

How Are We Doing



The rate of adults who were satisfied with their experience of care was 90.1% in 2022. The percentage of adults who were satisfied with their child's experience of care was 90.3% in 2022. Prior to 2018, this measure was a weighted score across children and adults. From 2018 on, however, these data are now disaggregated and reported separately for children and adults. This ensures that performance across the different age groups can be monitored appropriately and is based upon a decision from the Metrics and Scoring Committee. OHA added an oversample of race/ethnicity groups in 2021, making results after 2021 not directly comparable to previous years.

Factors Affecting Results

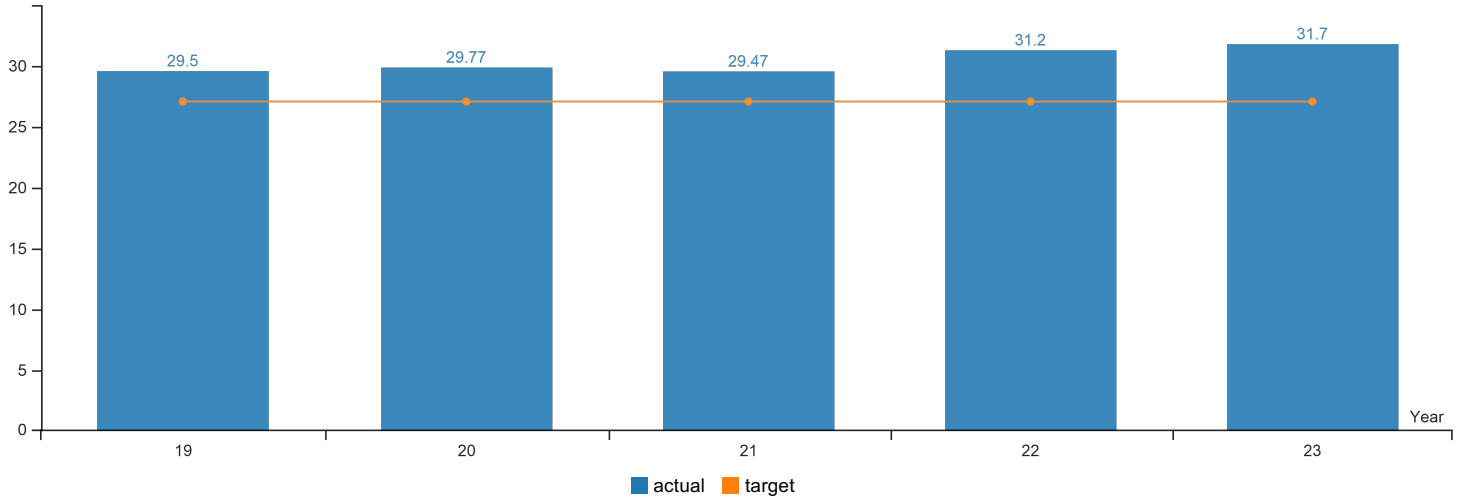
This was retired from the incentive measure set in 2017.

KPM #23	RATE OF TOBACCO USE (POPULATION) - Rate of tobacco use among adults.
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = negative result*

Report Year	2019	2020	2021	2022	2023
Rate of tobacco use - adult population					
Actual	19.65%	17.96%	17.18%	15.80%	15.30%
Target	15%	15%	15%	15%	15%

How Are We Doing



Oregon has reached its threshold of less than 15.8% of Oregon adults using tobacco (cigarette and smokeless tobacco) and it is nearing the target of 15%.

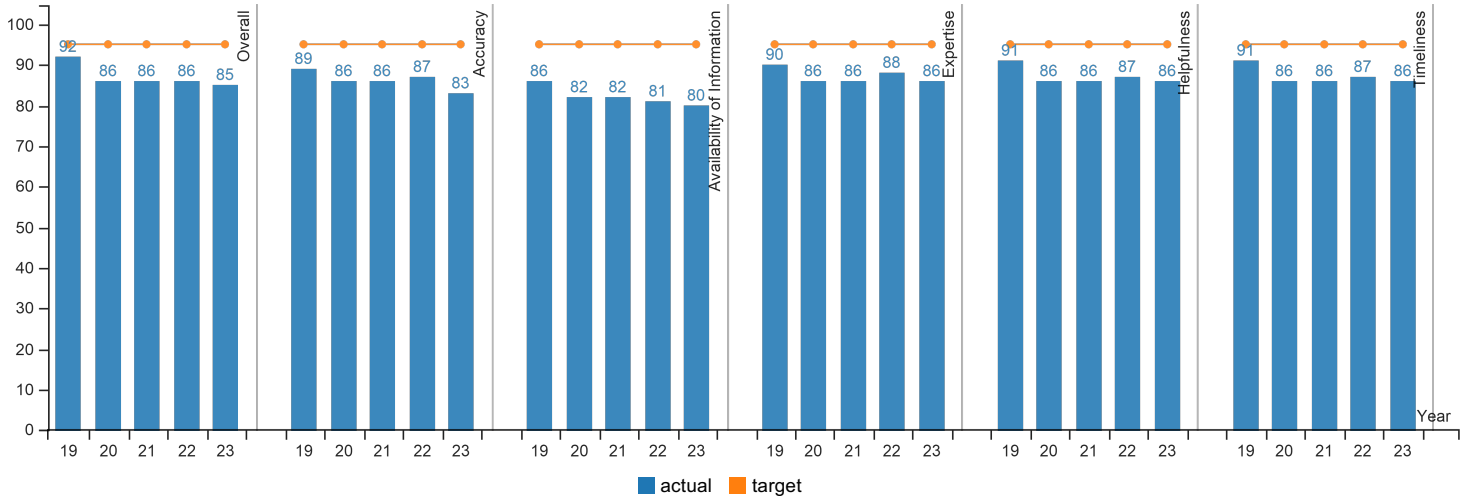
Factors Affecting Results

This measure does not include the increase in use of electronic cigarettes.

KPM #25	RATE OF OBESITY (POPULATION) - Percentage of adults who are obese among Oregonians.
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = negative result*

Report Year	2019	2020	2021	2022	2023
Rate of obesity - adult population					
Actual	29.50%	29.77%	29.47%	31.20%	31.70%
Target	27%	27%	27%	27%	27%



How Are We Doing

The obesity rate continues to increase (worsen) in Oregon.

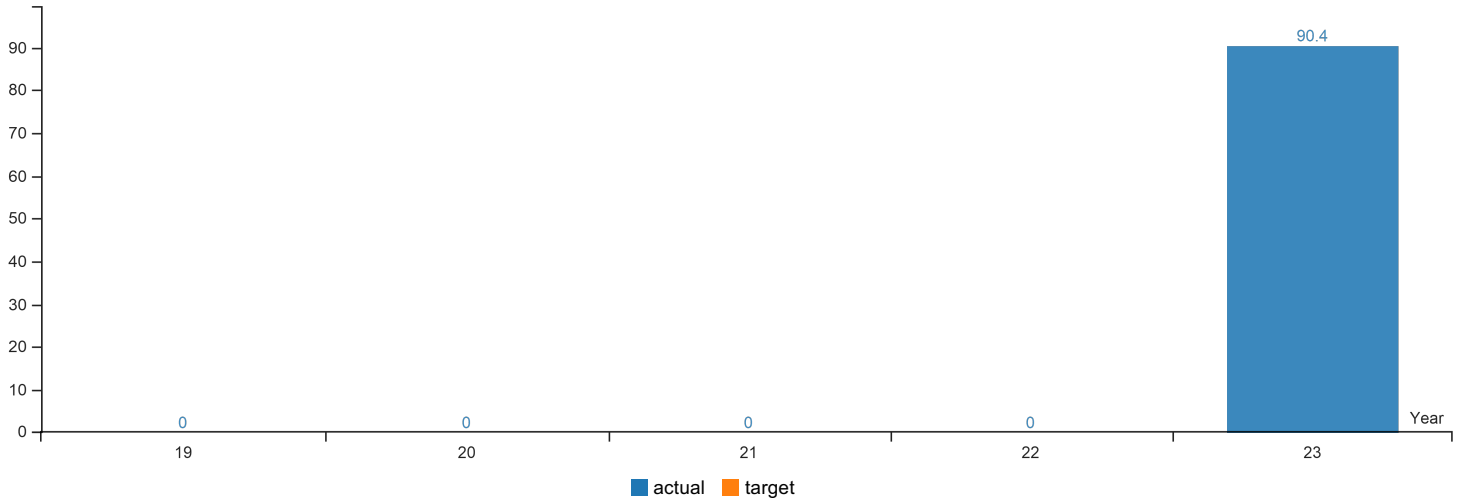
Factors Affecting Results

The main factor affecting Oregonian's results is limited funds for statewide initiatives that promote healthy environments where access to physical activity is imporved and barriers to nutrition security are reduced.

KPM #34	CUSTOMER SERVICE - Percentage of OHA customers rating their satisfaction with the agency's customer service as "good" or "excellent" overall, timeliness, accuracy, helpfulness, expertise, availability of information.
	Data Collection Period: Jan 01 - Dec 31

Report Year	2019	2020	2021	2022	2023
Overall					
Actual	92%	86%	86%	86%	85%
Target	95%	95%	95%	95%	95%
Accuracy					
Actual	89%	86%	86%	87%	83%
Target	95%	95%	95%	95%	95%
Availability of Information					
Actual	86%	82%	82%	81%	80%
Target	95%	95%	95%	95%	95%
Expertise					
Actual	90%	86%	86%	88%	86%
Target	95%	95%	95%	95%	95%
Helpfulness					
Actual	91%	86%	86%	87%	86%
Target	95%	95%	95%	95%	95%
Timeliness					
Actual	91%	86%	86%	87%	86%
Target	95%	95%	95%	95%	95%

How Are We Doing



Results from the 2022 survey are about the same year over year as we continue to provide services fully remote. On the 'Overall' metric, the percent of members rating quality of service excellented did increase quite a bit since last reporting period. With regards to 'Accessibility', we hope to see improvements here on our next survey. We implemented a monthly newsleetter and are updating our website. We are focusing on language and reading level accessibility in outgoing communications, resources, and web pages.

Factors Affecting Results

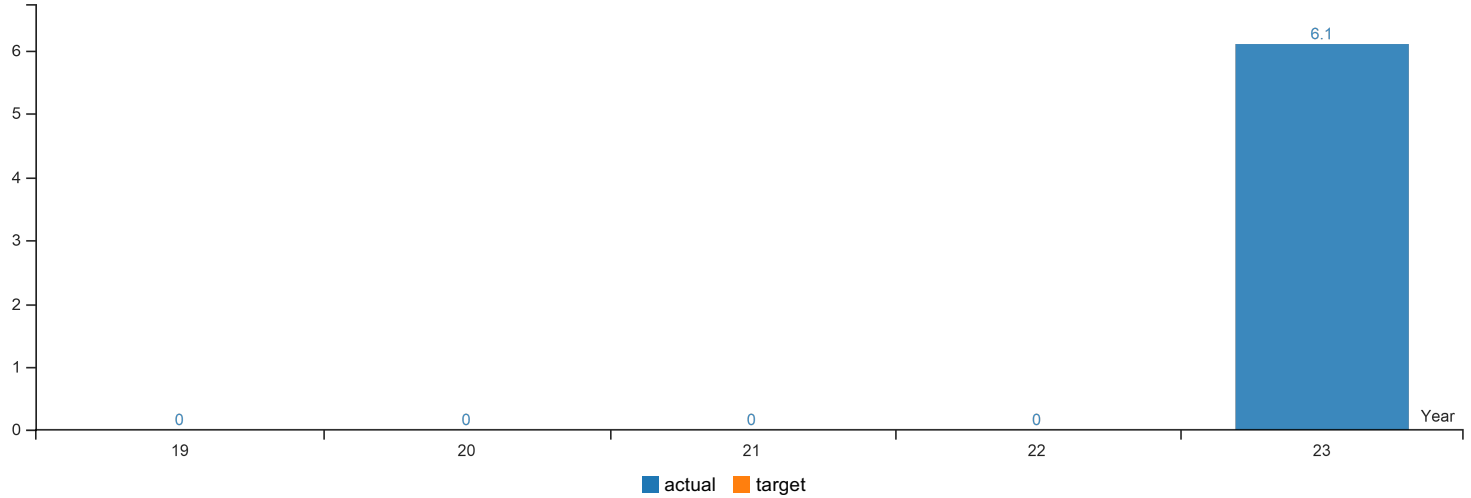
While we send the survey to the same audience (all PEBB members) each year, only about 20-25% of members respond. It's not always the same members, so it'd difficult to really gauge improvement or lack thereof.

KPM #35	HEALTH EQUTY MEASURE – COMPONENT #1: MEANINGFUL LANGUAGE ACCESS TO CULTURALLY RESPONSIVE HEALTH CARE SEVICES FOR CCO MEMBERS - Component 1 is based on an annual language access self-assessment survey and designed to evaluate the development of structures and workflow processes to provide quality and consistent interpreter services.
	Data Collection Period: Jan 01 - Jan 01

** Upward Trend = positive result*

Report Year	2019	2020	2021	2022	2023
Health Equity Measure – component #1: Meaningful language access to culturally responsive health care services for CCO members					
Actual					90.40%
Target					

How Are We Doing



Compared to 2021 scores, CCO performance in 2022 show improvement in their capacity to identify and implement workflow structures to provide consistent quality language access services.

Factors Affecting Results

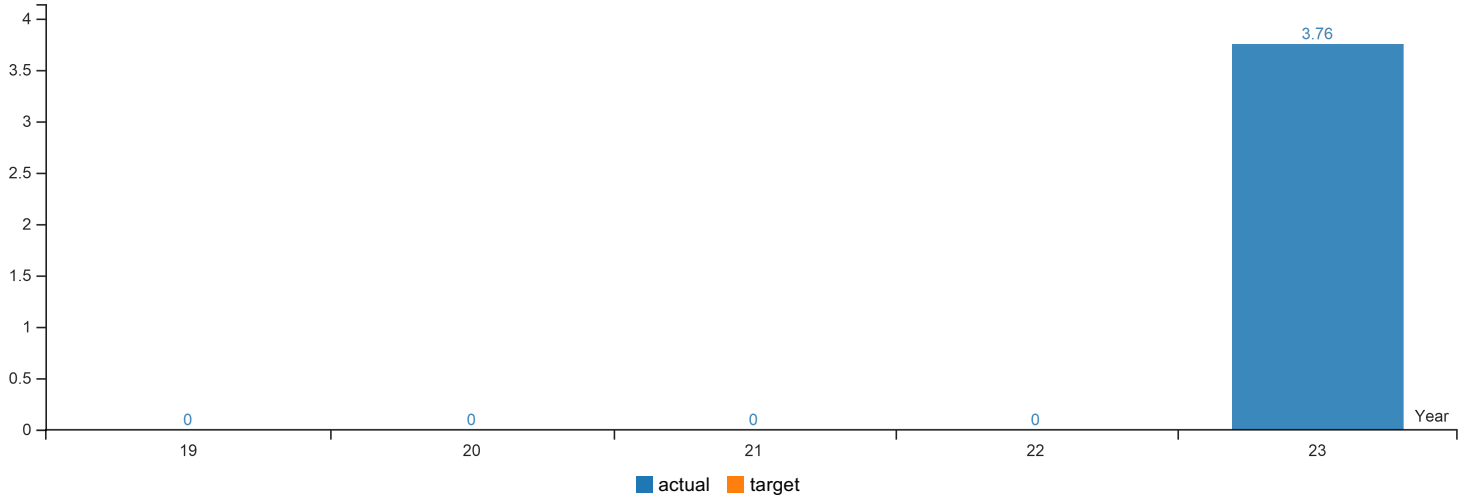
None

KPM #36	HEALTH EQUITY MEASURE - COMPONENT #2: MEANINGFUL LANGUAGE ACCESS TO CULTURALLY RESPONSIVE HEALTH CARE SERVICES FOR CCO MEMBERS - Component 2 is based on the reporting of quarterly utilization data on interpreter services and designed to measure quality of interpreter services.
	Data Collection Period: Jan 01 - Jan 01

** Upward Trend = positive result*

Report Year	2019	2020	2021	2022	2023
Health Equity Measure – component #2: Meaningful language access to culturally responsive health care services for CCO members					
Actual					6.10%
Target					

How Are We Doing



Due to data reporting lag impacting the quarterly reporting time frame for this measure, a rolling 12 month reporting approach has been adopted going forward, beginning with this reporting period. We therefore advise against comparing this result with previous results. The average CCO utilization of OHA qualified or certified interpreters for appointment by members with language interpretation needs during the rolling 12 months of 2022 was 6.1%. The maximum CCO utilization rate for the same period was 20.3%. The results of CCO performance for the rolling 12 months of 2022 was also stratified by the use of any interpreters - this includes other interpreters not credentialed by OHA, which include bilingual providers and untrained interpreters. The average utilization rate was 14% and the highest utilization rate was 54.1%. The results continue to show an underutilization of trained and OHA credentialed interpreters (Qualified or Certified). A trend that emerges from reviewing both components of the metric suggests that while CCOs are on average attesting to higher rates (90%) of implementing workflows to provide quality interpretation services, their scores in component 1 has not yet translated into utilization of consistent quality interpretation services for member appointments (6.1%). We are working to implement technical assistance to support CCOs capacity to provide quality interpretation services.

Factors Affecting Results

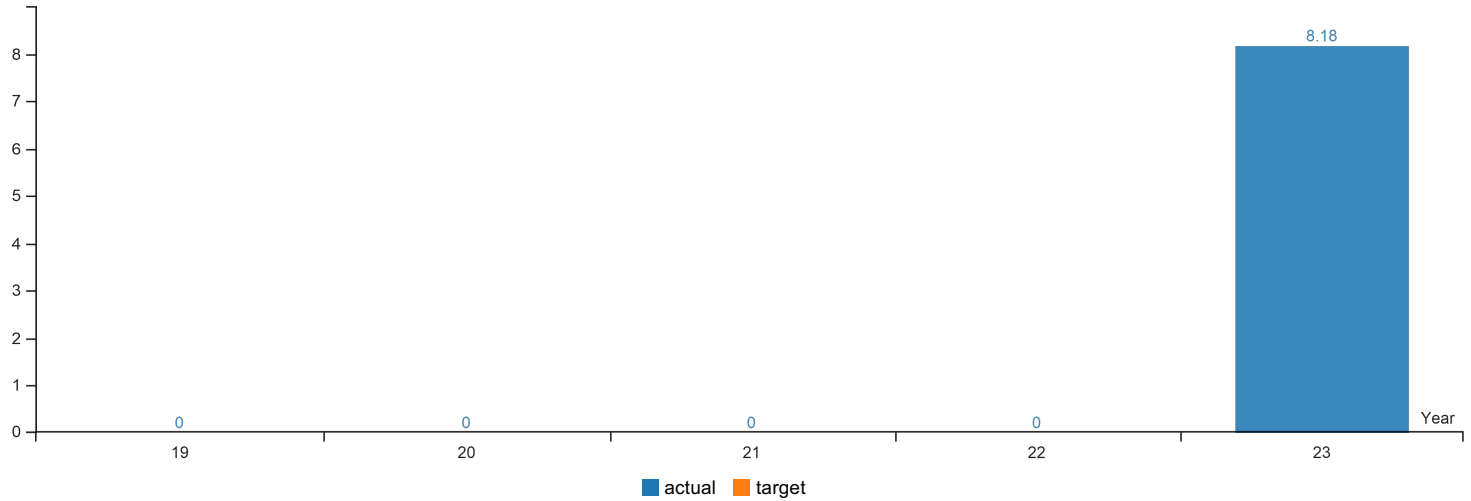
None

KPM #37	INFANTE MORTALITY RATE - Numerator: # of deaths of infants <365 days of age in specified time period Denominator: # of live births in specified time period. Rate calculation: (Num/Denom)*1,000
	Data Collection Period: Jan 01 - Jan 01

** Upward Trend = positive result*

Report Year	2019	2020	2021	2022	2023
Infant Mortality Rate					
Actual					3.76%
Target					

How Are We Doing



While the infant mortality rate in Oregon is lower than the national rate, racial/ethnic disparities persist in Oregon in this rate and in other perinatal outcomes. The field of maternal and child health (MCH) is grounded in a life course framework which recognizes the need to eliminate health inequities to improve the health of all women, children, and families. Health inequities are systemic, avoidable, unfair and unjust differences in health status and mortality rates that are sustained over generaltions and beyond the control of individuals. Institutional changes, including the development of culturally and linguistically responsive MCH services and systems are needed to address health inequities.

Factors Affecting Results

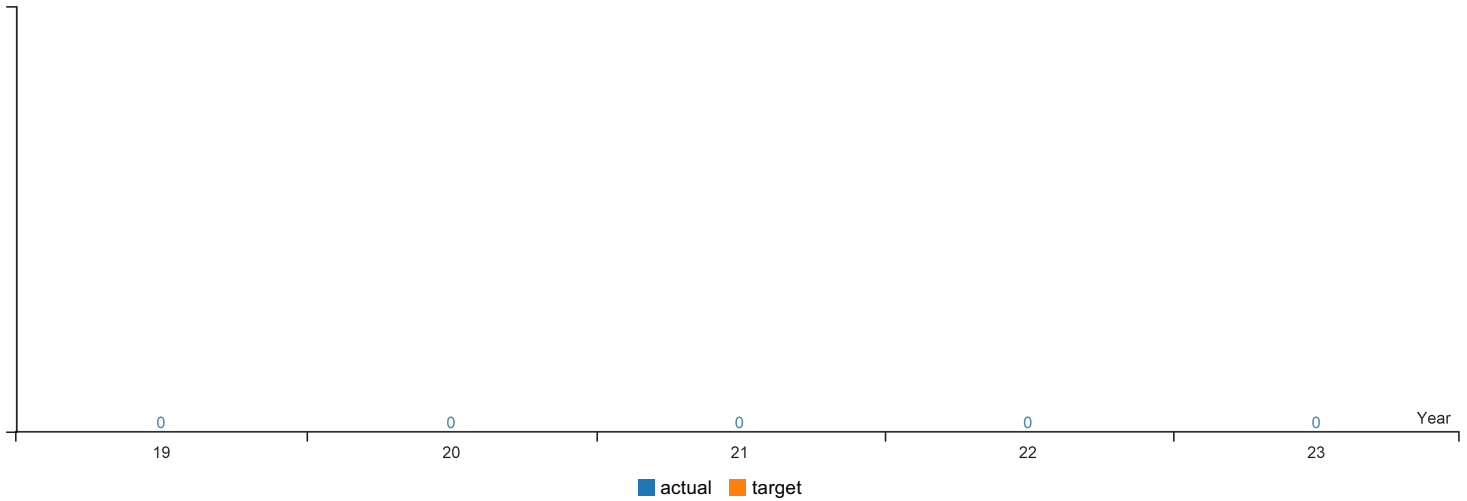
The death of a child within the first year of life is an important indicator of population health reflecting the well-being of mothers and families, including the broader socioeconimic and enviornmental facotrs that influence health and access to health care. Approximately two-thirds of infant deaths occur in the neonatal period (<1 month old) and one-third occur in the postneonatal period (1 month to <1 year). Neonatal mortality is predominantly related to prematurity, congenital anomalies, and other perinatal conditions. Postneonatal mortality is mostly attributable to sudden unexpected infant death (SUID), congenital anomalies, infection, and injury. Data reported is final from 2021.

KPM #38	REDUCTION OF SEVERE MATERNAL MORBIDITY - Numerator: # of cases of severe maternal morbidity* in specified time period Denominator: # of delivery hospitalizations in specified time period Rate calculation: (Num/Denom)*10,000 (read out as “[number] per 10,000 delivery hospitalizations”) *Note: Severe maternal morbidity cases are determined by using a validated set of ICD-10 diagnosis and procedure codes to examine hospital data.
	Data Collection Period: Jan 01 - Jan 01

** Upward Trend = positive result*

Report Year	2019	2020	2021	2022	2023
Reduction of Severe Maternal Morbidity					
Actual					8.18%
Target					

How Are We Doing



81.8 per 10,000 deliveries for calendar year 2022 or .818%. This is below the target of .94% (see note below on reporting). The trend has been increading 2016-2020, with a large increase in 2021 that was lower in 2022.

Factors Affecting Results

The target for this metric was incorrectly provided as 9.4% and should have been .94% to match the methodology of [number] per 10,000 delivery hospitalizations. The value has been increased by a factor of 10 for reporting to align with the target as approved with this explanation provided for clarification in the comments.

KPM #39	COMPARISON OF OHA WORKFORCE TO POTENTIAL LABOR MARKET - Comparisons of the OHA workforce to the potential labor market provide a measurement of parity, defined as: achieving comparable representation of Tribal communities, communities of color, people with disabilities and females (binary gender for now) in OHA's workforce to the same proportion in the potential labor market.
	Data Collection Period: Jan 01 - Jan 01

** Upward Trend = positive result*

Report Year	2019	2020	2021	2022	2023
Comparison of OHA Workforce to Potential Labor Market					
Actual					
Target					

How Are We Doing

OHA looks at 10 different comparisons when comparing the workforce to the potential labor market - there is no composite number. Below are the details on how we are doing on each of these 10 disaggregations.

OHA was **above** the parity target of .9 (90%) for 3 race and ethnicity categories and **below** parity for 3 race and ethnicity categories.

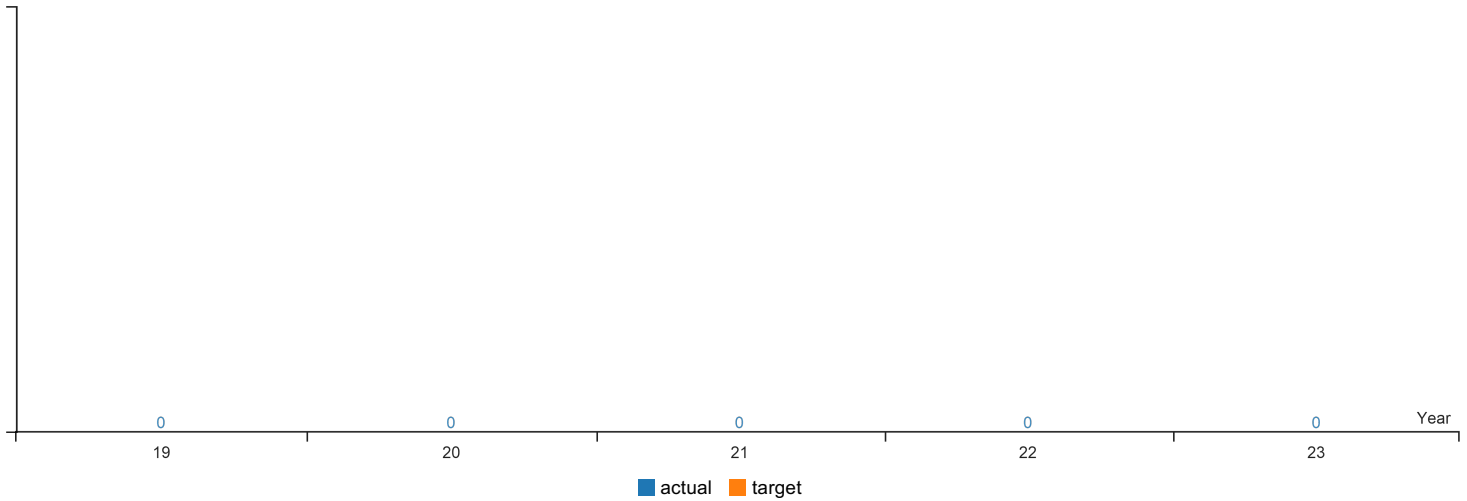
- Among the OHA workforce in all divisions, Native Hawaiian & Pacific Islander employees comprised 1.0%, or 48 employees, at FY 2023 Q4. Compared to 1.1% from Oregon's population (ACS 2016-2020) this results in a parity ratio of 0.8933 and is near parity but **below** the .9 target.
- Among the OHA workforce in all divisions, American Indian & Alaska Native employees comprised 1.9%, or 95 employees, at FY 2023 Q4. Compared to 5.0% from Oregon's population (ACS 2016-2020) this results in a parity ratio of 0.3889 and is **below** parity.
- Among the OHA workforce in all divisions, Black & African American employees comprised 4.8%, or 234 employees, at FY 2023 Q4. Compared to 5.1% from Oregon's population (ACS 2016-2020) this results in a parity ratio of 0.9392 and is at or **above** parity.
- Among the OHA workforce in all divisions, Asian employees comprised 8.1%, or 396 employees, at FY 2023 Q4. Compared to 7.3% from Oregon's population (ACS 2016-2020) this results in a parity ratio of 1.1105 and is at or **above** parity.
- Among the OHA workforce in all divisions, Hispanic or Latino, Latina or Latinx employees comprised 11.4%, or 555 employees, at FY 2023 Q4.Compared to 19.3% from Oregon's population (ACS 2016-2020) this results in a parity ratio of 0.5887 and is **below** parity.
- Among the OHA workforce in all divisions, White employees comprised 72.8%, or 3,557 employees, at FY 2023 Q4. Compared to 62.0% from Oregon's population (ACS 2016-2020) this results in a parity ratio of 1.1744 and is at or **above** parity.

OHA was **above** the parity target of .9 (90%) for 1 gender (binary) category and **below** parity for 1 gender (binary) category.

- Among the OHA workforce in all divisions, Man employees comprised 38.1%, or 1,987 employees, at FY 2023 Q4. Compared to 50.0% from Oregon's population (ACS 2016-2020) this results in a parity ratio of 0.7618 and is near but **below** parity.
- Among the OHA workforce in all divisions, Woman employees comprised 61.4%, or 3,203 employees, at FY 2023 Q4.Compared to 50.0% from Oregon's population (ACS 2016-2020) this results in a parity ratio of 1.2265 and is at or **above** parity.
- Percentages do not add up to 100% due to OHA's dataset recently allowing an option for non-binary (and it is a small amount of people), but the ACS data we run against as the comparative group does not have a non-binary group.

OHA was **above** the parity target of .9 (90%) for 1 disability category and **below** parity for 1 disability category.

- Among the OHA workforce in all divisions, One or more disability employees comprised 1.9%, or 102 employees, at FY 2023 Q4.Compared to 11.0% from Oregon's population (ACS 2016-2020) this results in a parity ratio of 0.1774 and is **below** parity.
- Among the OHA workforce in all divisions, No disability employees comprised 98.1%, or 5,129 employees, at FY 2023 Q4. Compared to 89.0% from Oregon's population (ACS 2016-2020) this results in a parity ratio of 1.1016 and is at or **above** parity.



Factors Affecting Results

This data is best reviewed in a disaggregate form where differences and inequities can be illuminated. There is no composite score for this metric so the actual for this reporting period has been left blank. This metric was intended to have disaggregated categories for reporting and we will correct that with the next legislative session.

OHA is working to improve workforce demographic data collection over the next year and aims to be able to report out additional gender categories.

KPM #40	COMPARISON OF OHA NON-SUPERVISORY MANAGERS TO POTENTIAL LABOR MARKET - Comparisons of OHA non-supervisory managers to the potential labor market provide a measurement of parity, defined as: achieving comparable representation of Tribal communities, communities of color, people with disabilities and females (binary gender for now) who are OHA non-supervisory managers to the same proportion in the potential labor market.
	Data Collection Period: Jan 01 - Jan 01

** Upward Trend = positive result*

Report Year	2019	2020	2021	2022	2023
Comparison of OHA Non-Supervisory Managers to Potential Labor Market					
Actual					
Target					

How Are We Doing

OHA looks at 10 different comparisons when comparing the workforce to the potential labor market - there is no composite number. Below are the details on how we are doing on each of these 10 disaggregations. We want to be **at or above** the parity target for these metrics.

OHA was **above** the parity target of .9 (90%) for 3 race and ethnicity categories and **below** parity for 3 race and ethnicity categories.

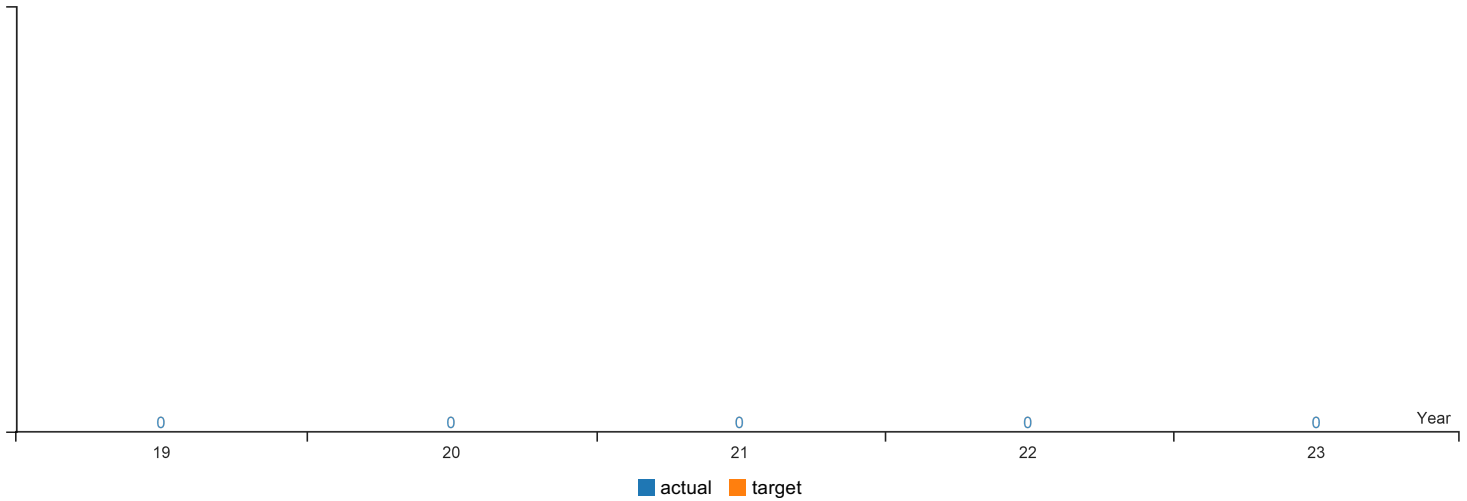
- Among OHA non-supervisory managers in all divisions, Native Hawaiian & Pacific Islander employees comprised 0.7%, or 3 employees, at FY 2023 Q4. Compared to 1.1% from Oregon's population (ACS 2016-2020) this results in a parity ratio of 0.6417 and is **below** parity.
- Among OHA non-supervisory managers in all divisions, American Indian & Alaska Native employees comprised 2.6%, or 11 employees, at FY 2023 Q4. Compared to 5.0% from Oregon's population (ACS 2016-2020) this results in a parity ratio of 0.5176 and is **below** parity.
- Among OHA non-supervisory managers in all divisions, Black & African American employees comprised 5.6%, or 24 employees, at FY 2023 Q4. Compared to 5.1% from Oregon's population (ACS 2016-2020) this results in a parity ratio of 1.1073 and is at or **above** parity.
- Among OHA non-supervisory managers in all divisions, Asian employees comprised 9.6%, or 41 employees, at FY 2023 Q4. Compared to 7.3% from Oregon's population (ACS 2016-2020) this results in a parity ratio of 1.3215 and is at or **above** parity.
- Among OHA non-supervisory managers in all divisions, Hispanic or Latino, Latina or Latinx employees comprised 9.9%, or 42 employees, at FY 2023 Q4. Compared to 19.3% from Oregon's

population (ACS 2016-2020) this results in a parity ratio of 0.5120 and is **below** parity.
- Among OHA non-supervisory managers in all divisions, White employees comprised 71.5%, or 304 employees, at FY 2023 Q4.Compared to 62.0% from Oregon's population (ACS 2016-2020) this results in a parity ratio of 1.1537 and is at or **above** parity.

OHA was **above** the parity target of .9 (90%) for 1 gender (binary) category and **below** parity for 1 gender (binary) category.

- Among OHA non-supervisory managers in all divisions, Man employees comprised 32.3%, or 148 employees, at FY 2023 Q4. Compared to 50.0% from Oregon's population (ACS 2016-2020) this results in a parity ratio of 0.6467 and is **below** parity.
- Among OHA non-supervisory managers in all divisions, Woman employees comprised 67.0%, or 307 employees, at FY 2023 Q4.Compared to 50.0% from Oregon's population (ACS 2016-2020) this results in a parity ratio of 1.3398 and is at or **above** parity.
- Percentages do not add up to 100% due to OHA's dataset recently allowing an option for non-binary (and it is a small amount of people), but the ACS data we run against as the comparative group does not have a non-binary group.

OHA was **above** the parity target of .9 (90%) for 1 disability category and **below** parity for 1 disability category.



- Among OHA non-supervisory managers in all divisions, One or more disability employees comprised 3.3%, or 15 employees, at FY 2023 Q4. Compared to 11.0% from Oregon's population (ACS 2016-2020) this results in a parity ratio of 0.2980 and is **below** parity.
- Among OHA non-supervisory managers in all divisions, No disability employees comprised 96.7%, or 443 employees, at FY 2023 Q4. Compared to 89.0% from Oregon's population (ACS 2016-2020) this results in a parity ratio of 1.0867 and is at or **above** parity.

Factors Affecting Results

This data is best reviewed in a disaggregate form where differences and inequities can be illuminated. OHA is working to improve workforce demographic data collection over the next year and aims to be able to report out additional gender categories.

KPM #41	COMPARISON OF OHA SUPERVISORY MANAGERS TO POTENTIAL LABOR MARKET - Comparisons of OHA supervisory managers to the potential labor market provide a measurement of parity, defined as: achieving comparable representation of Tribal communities, communities of color, people with disabilities and females (binary gender for now) who are OHA supervisory managers to the same proportion in the potential labor market.
	Data Collection Period: Jan 01 - Jan 01

Report Year	2019	2020	2021	2022	2023
Comparison of OHA Supervisory Managers to Potential Labor Market					
Actual					
Target					

How Are We Doing

OHA looks at 10 different comparisons when comparing the workforce to the potential labor market - there is no composite number. Below are the details on how we are doing on each of these 10 disaggregations. We want to be **at or above** the parity target for these metrics.

OHA was **above** the parity target of .9 (90%) for 1 race and ethnicity categories and **below** parity for 5 race and ethnicity categories.

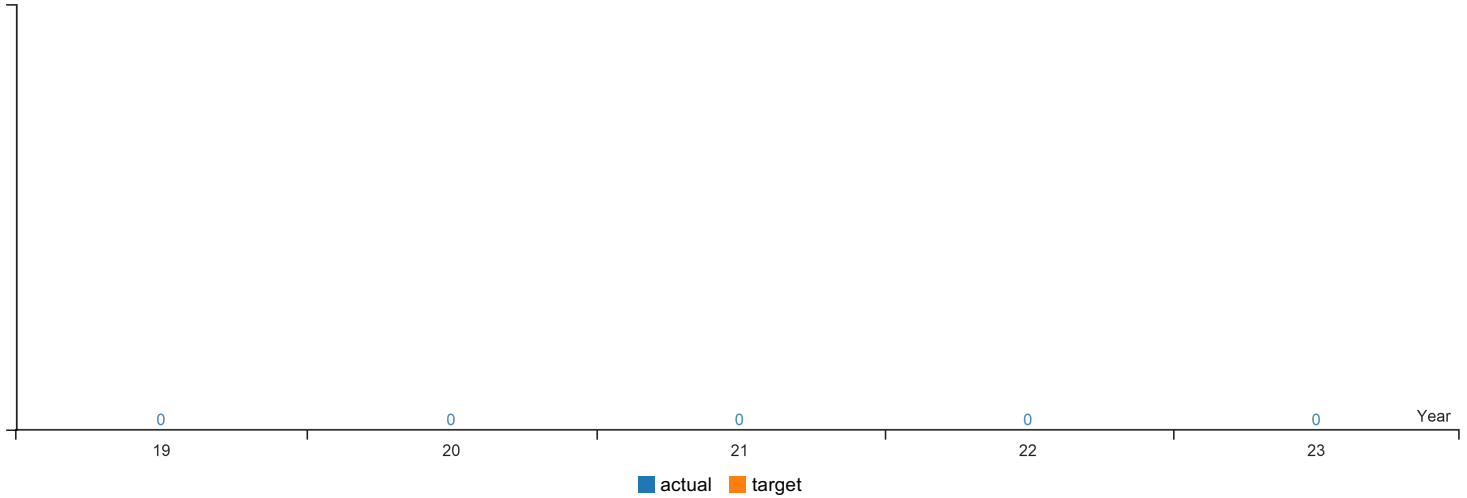
- Among OHA supervisory managers in all divisions, Native Hawaiian & Pacific Islander employees comprised 0.4%, or 2 employees, at FY 2023 Q4. Compared to 1.1% from Oregon's population (ACS 2016-2020) this results in a parity ratio of 0.4086 and is **below** parity.
- Among OHA supervisory managers in all divisions, American Indian & Alaska Native employees comprised 1.8%, or 8 employees, at FY 2023 Q4. Compared to 5.0% from Oregon's population (ACS 2016-2020) this results in a parity ratio of 0.3596 and is **below** parity.
- Among OHA supervisory managers in all divisions, Black & African American employees comprised 2.9%, or 13 employees, at FY 2023 Q4. Compared to 5.1% from Oregon's population (ACS 2016-2020) this results in a parity ratio of 0.5728 and is **below** parity.
- Among OHA supervisory managers in all divisions, Asian employees comprised 4.3%, or 19 employees, at FY 2023 Q4. Compared to 7.3% from Oregon's population (ACS 2016-2020) this results in a parity ratio of 0.5849 and is **below** parity.
- Among OHA supervisory managers in all divisions, Asian employees comprised 4.3%, or 19 employees, at FY 2023 Q4. Compared to 7.3% from Oregon's population (ACS 2016-2020) this

results in a parity ratio of 0.5849 and is **below** parity.
- Among OHA supervisory managers in all divisions, White employees comprised 82.9%, or 369 employees, at FY 2023 Q4. Compared to 62.0% from Oregon's population (ACS 2016-2020) this results in a parity ratio of 1.3374 and is at or **above** parity.

OHA was **above** the parity target of .9 (90%) for 1 gender (binary) category and **below** parity for 1 gender (binary) category.

- Among OHA supervisory managers in all divisions, Man employees comprised 38.8%, or 183 employees, at FY 2023 Q4. Compared to 50.0% from Oregon's population (ACS 2016-2020) this results in a parity ratio of 0.7759 and is **below** parity.
- Among OHA supervisory managers in all divisions, Woman employees comprised 60.4%, or 285 employees, at FY 2023 Q4. Compared to 50.0% from Oregon's population (ACS 2016-2020) this results in a parity ratio of 1.2069 and is at or **above** parity.
- Percentages do not add up to 100% due to OHA's dataset recently allowing an option for non-binary (and it is a small amount of people), but the ACS data we run against as the comparative group does not have a non-binary group.

OHA was **above** the parity target of .9 (90%) for 1 disability category and **below** parity for 1 disability category.



- Among OHA supervisory managers in all divisions, One or more disability employees comprised 2.8%, or 13 employees, at FY 2023 Q4. Compared to 11.0% from Oregon's population (ACS 2016-2020) this results in a parity ratio of 0.2506 and is **below** parity.
- Among OHA supervisory managers in all divisions, No disability employees comprised 97.2%, or 459 employees, at FY 2023 Q4. Compared to 89.0% from Oregon's population (ACS 2016-2020) this results in a parity ratio of 1.0925 and is at or **above** parity.

Factors Affecting Results

This data is best reviewed in a disaggregate form where differences and inequities can be illuminated. OHA is working to improve workforce demographic data collection over the next year and aims to be able to report out additional gender categories.

KPM #42	COMPARISON OF OHA VOLUNTARY SEPARATIONS TO ALL AGENCY SEPARATIONS - OHA defines parity as achieving comparable representation of Tribal communities, communities of color, people with disabilities and females (binary gender for now) in OHA's workforce to the same proportion to OHA's potential labor market.
	Data Collection Period: Jan 01 - Jan 01

** Upward Trend = negative result*

Report Year	2019	2020	2021	2022	2023
Comparison of OHA Voluntary Separations to All Agency Separations					
Actual					
Target					

How Are We Doing

OHA looks at 10 different comparisons when comparing the workforce to the potential labor market - there is no composite number. Below are the details on how we are doing on each of these 10 disaggregations.

OHA was **below** the parity target of .75 (75%) for 1 race and ethnicity categories and **above** parity for 5 race and ethnicity categories. NOTE: for this metric, being below parity is desired.

- Among voluntary separations in all divisions, Native Hawaiian & Pacific Islander employees comprised 0.0%, or 0 employees, at FY 2023 Q4. Compared to 0.8% from all separations this results in a parity ratio of 0.005 and is at or **below** parity.

  Among voluntary separations in all divisions, Black & African American employees comprised 5.9%, or 6 employees, at FY 2023 Q4. Compared to 4.8% from all separations this results in a parity ratio of 1.238 and is **above** parity.
- Among voluntary separations in all divisions, American Indian & Alaska Native employees comprised 5.0%, or 5 employees, at FY 2023 Q4. Compared to 5.6% from all separations this results in a parity ratio of 0.884 and is **above** parity.
- Among voluntary separations in all divisions, Asian employees comprised 5.9%, or 6 employees, at FY 2023 Q4. Compared to 7.2% from all separations this results in a parity ratio of 0.825 and is **above** parity.
- Among voluntary separations in all divisions, Hispanic or Latino, Latina or Latinx employees comprised 18.8%, or 19 employees, at FY 2023 Q4. Compared to 19.2% from all separations this

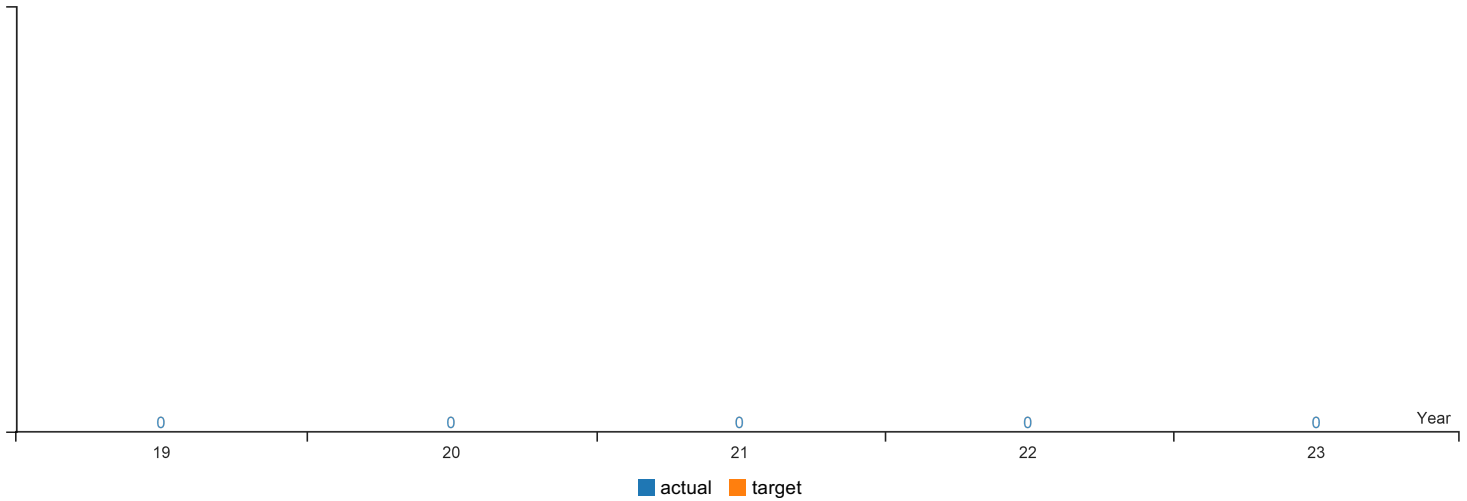
results in a parity ratio of 0.980 and is **above** parity.
- Among voluntary separations in all divisions, White employees comprised 64.4%, or 65 employees, at FY 2023 Q4. Compared to 62.4% from all separations this results in a parity ratio of 1.031 and is **above** parity.

OHA was **above** the parity target of .75 (75%) for both gender (binary) categories.

- Among voluntary separations in all divisions, Man employees comprised 37.6%, or 44 employees, at FY 2023 Q4. Compared to 38.6% from all separations this results in a parity ratio of 0.97427 and is **above** parity.
- Among voluntary separations in all divisions, Woman employees comprised 60.7%, or 71 employees, at FY 2023 Q4. Compared to 61.4% from all separations this results in a parity ratio of 0.98833 and is **above** parity.
- Percentages do not add up to 100% due to OHA's dataset recently allowing an option for non-binary (and it is a small amount of people), but the ACS data we run against as the comparative group does not have a non-binary group.

OHA was **above** the parity target of .75 (75%) for 1 disability category and **below** parity for 1 disability category.

- Among voluntary separations in all divisions, One or more disability employees comprised 0.9%, or 1 employees, at FY 2023 Q4. Compared to 1.4% from all separations this results in a parity ratio of 0.6105 and is at or **below** parity.
- Among voluntary separations in all divisions, No disability employees comprised 99.1%, or 116 employees, at FY 2023 Q4. Compared to 98.6% from all separations this results in a parity ratio of 1.0055 and is **above** parity.



Factors Affecting Results

These estimates may be statistically unreliable and data should be interpreted with caution due to small numbers.

This data is best reviewed in a disaggregate form where differences and inequities can be illuminated. OHA is working to improve workforce demographic data collection over the next year and aims to be able to report out additional gender categories.

KPM #43	COMPARISON OF OHA INVOLUNTARY SEPARATIONS TO ALL AGENCY SEPARATIONS - Parity is determined by a ratio of OHA involuntary separations—dismissal, dismissal during trial service or layoff—(numerator) and all agency separations (denominator). If the ratio score is greater than or equal to 90% for Tribal communities, communities of color, people with disabilities or females, then there is a relatively high representation of that group in involuntary separations from the agency. Excludes deaths and unknown separations.
	Data Collection Period: Jan 01 - Jan 01

** Upward Trend = negative result*

Report Year	2019	2020	2021	2022	2023
Comparison of OHA Involuntary Separations to All Agency Separations					
Actual					
Target					

How Are We Doing

OHA looks at 10 different comparisons when comparing the workforce to the potential labor market. A breakdown of each comparison and how OHA is doing is included below. NOTE: For these metrics, being **below** the parity target is desired.

OHA was **above** the parity target of .75 (75%) for 4 race and ethnicity categories and **below** for 2 race and ethnicity categories.

- Among involuntary separations in all divisions, Native Hawaiian & Pacific Islander employees comprised 0.0%, or 0 employees, at FY 2023 Q4. Compared to 0.8% from all separations this results in a parity ratio of 0.005 and is at or **below** parity.
- Among involuntary separations in all divisions, Black & African American employees comprised 0.0%, or 0 employees, at FY 2023 Q4. Compared to 4.8% from all separations this results in a parity ratio of 0.005 and is at or **below** parity.
- Among involuntary separations in all divisions, American Indian & Alaska Native employees comprised 8.7%, or 2 employees, at FY 2023 Q4. Compared to 5.6% from all separations this results in a parity ratio of 1.553 and is **above** parity.
- Among involuntary separations in all divisions, Asian employees comprised 13.0%, or 3 employees, at FY 2023 Q4. Compared to 7.2% from all separations this results in a parity ratio of 1.812 and is **above** parity.
- Among involuntary separations in all divisions, Hispanic or Latino, Latina or Latinx employees comprised 21.7%, or 5 employees, at FY 2023 Q4. Compared to 19.2% from all separations this

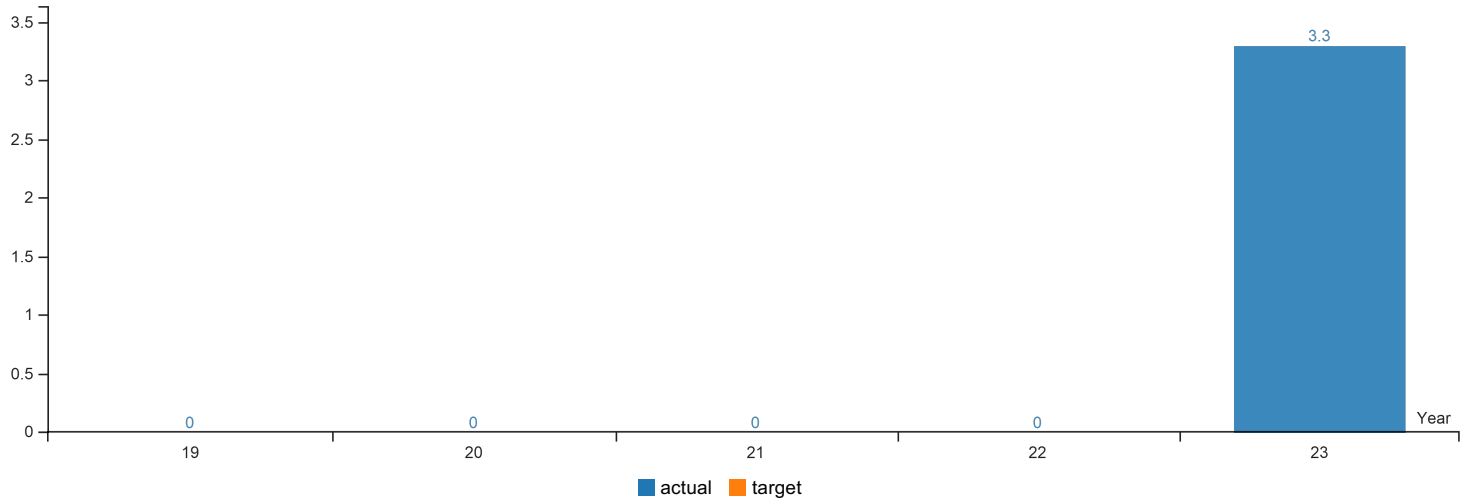
results in a parity ratio of 1.132 and is **above** parity.
- Among involuntary separations in all divisions, White employees comprised 56.5%, or 13 employees, at FY 2023 Q4. Compared to 62.4% from all separations this results in a parity ratio of 0.906 and is **above** parity.

OHA was **above** the parity target of .75 (75%) for both gender (binary) categories.

- Among involuntary separations in all divisions, Man employees comprised 40.0%, or 10 employees, at FY 2023 Q4. Compared to 38.6% from all separations this results in a parity ratio of 1.03627 and is **above** parity.
- Among involuntary separations in all divisions, Woman employees comprised 60.0%, or 15 employees, at FY 2023 Q4. Compared to 61.4% from all separations this results in a parity ratio of 0.97720 and is **above** parity.

OHA was **above** the parity target of .75 (75%) for both disability categories.

- Among involuntary separations in all divisions, One or more disability employees comprised 4.0%, or 1 employees, at FY 2023 Q4. Compared to 1.4% from all separations this results in a parity ratio of 2.857 and is **above** parity.
- Among involuntary separations in all divisions, No disability employees comprised 96.0%, or 24 employees, at FY 2023 Q4. Compared to 98.6% from all separations this results in a parity ratio of 0.974 and is **above** parity.



Factors Affecting Results

These estimates may be statistically unreliable and should be interpreted with caution due to small numbers.

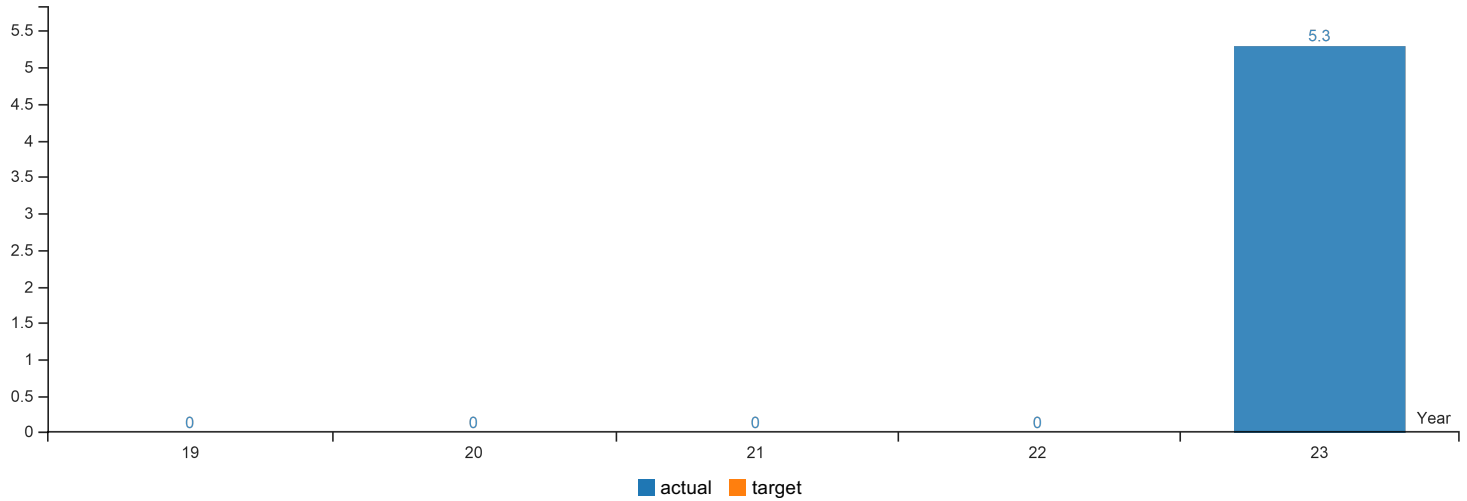
This data is best reviewed in a disaggregate form where differences and inequities can be illuminated. OHA is working to improve workforce demographic data collection over the next year and aims to be able to report out additional gender categories.

KPM #44	QUALITY OF LIFE - POOR PHYSICAL HEALTH - Average number of physically unhealthy days in the past 30 among adults. Measuring health-related quality of life helps build understanding around people's lived experience with disabilities and chronic diseases across the population. Self-report of days when physical health was not good is a reliable estimate of recent health status.
	Data Collection Period: Jan 01 - Jan 01

** Upward Trend = negative result*

Report Year	2019	2020	2021	2022	2023
Quality of Life - Poor Physical Health					
Actual					3.30
Target					

How Are We Doing



In 2021, the average number of unhealthy days (age adjusted) in adults was 3.3. This is above our target of 3.

Factors Affecting Results

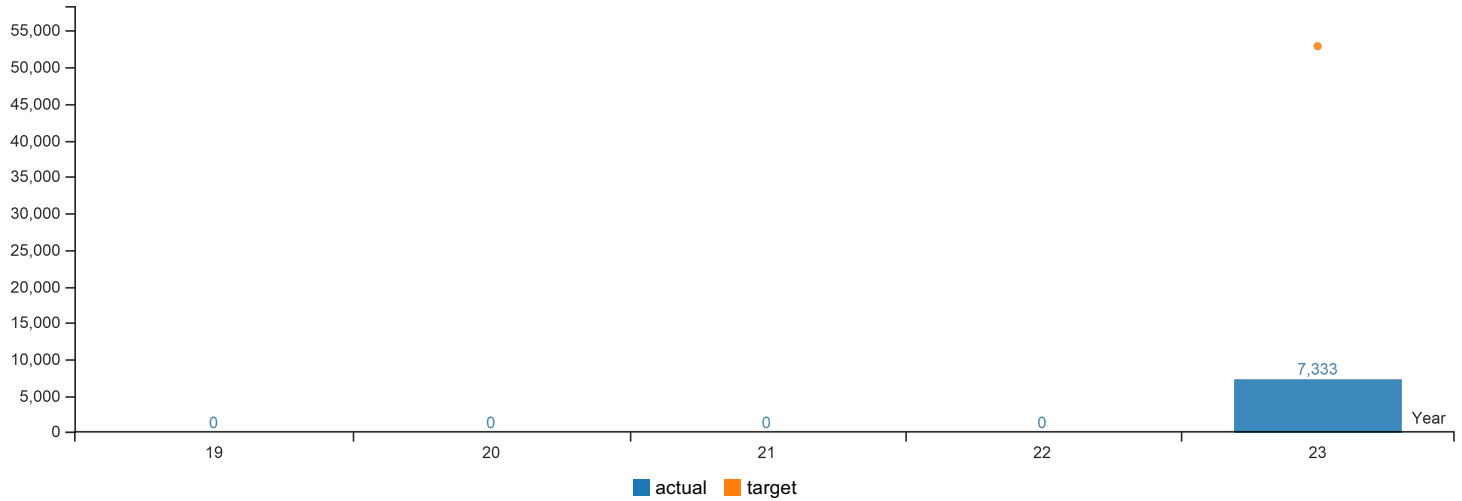
None

KPM #45	QUALITY OF LIFE - POOR MENTAL HEALTH - Average number of mentally unhealthy days in the past 30 days (age 18+). Measuring health-related quality of life helps build understanding around people's lived experience with disabilities and chronic diseases across the population. Self-report of days when mental health was not good is a reliable estimate of recent health status.
	Data Collection Period: Jan 01 - Jan 01

** Upward Trend = negative result*

Report Year	2019	2020	2021	2022	2023
Quality of Life - Poor Mental Health					
Actual					5.30
Target					

How Are We Doing



In 2021, the average number of mentally unhealth days in the past 30 days (age 18+) was 5.3. This is above our target of 3.

Factors Affecting Results

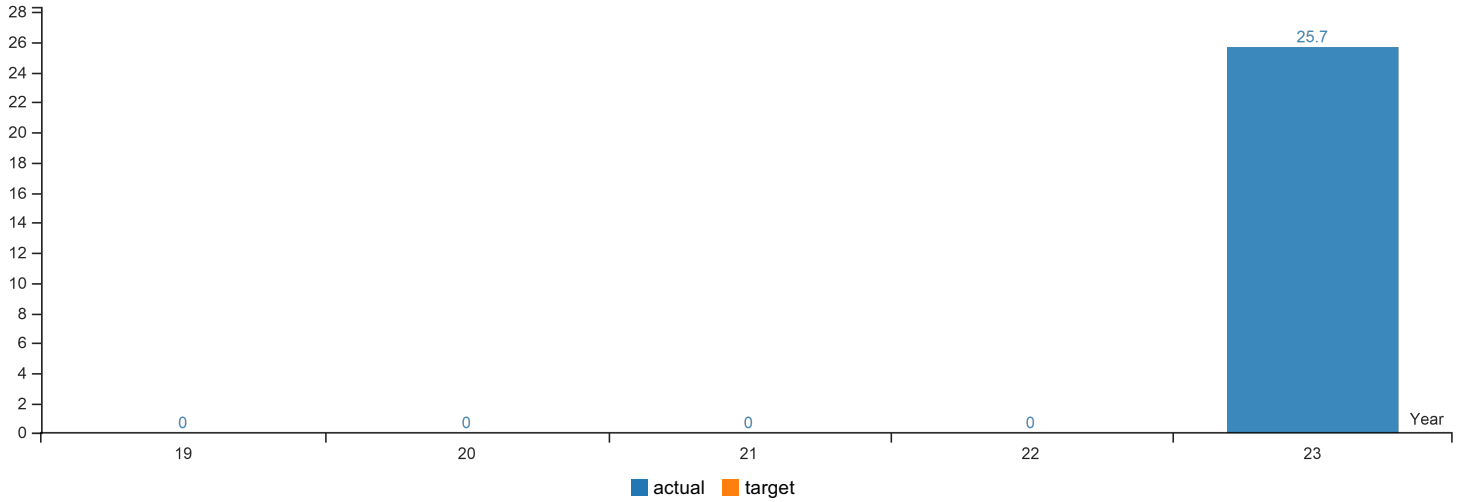
None.

KPM #46	PREMATURE DEATH - Number of years of potential life lost (YPLL) per 100,000 before age 75. Premature death is measured by summing the years between age at death and age 75 across all people who died before reaching that age. It's a way of quantifying the societal impact of early deaths in a population. Causes of death that are more likely to affect younger people – such as congenital anomalies and accidental injuries – contribute to higher rates of premature death.
	Data Collection Period: Jan 01 - Jan 01

** Upward Trend = negative result*

Report Year	2019	2020	2021	2022	2023
Premature Death					
Actual					7,333
Target					53,000

How Are We Doing



The age-adjusted years potential life lost (YPLL) was 7,333 in 2021.

Factors Affecting Results

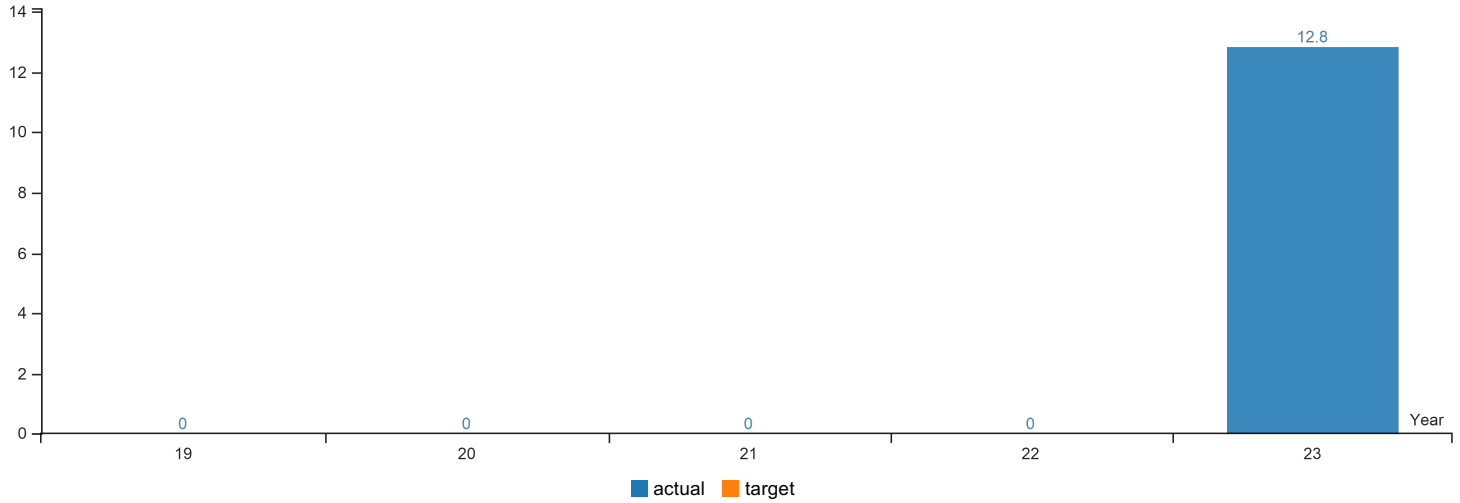
Premature death is measured by summing the years between age at death and age 75 across all people who died before reaching that age. It's a way of quantifying the societal impact of early deaths in a population. Causes of death that are more likely to affect younger people – such as congenital anomalies and accidental injuries – contribute to higher rates of premature death.

KPM #47	MORTALITY FROM DRUG OVERDOES - Number of deaths per 100,000 from drug overdoses excluding suicide. Drug overdose deaths account for a major proportion of all premature deaths and are largely preventable.
	Data Collection Period: Jan 01 - Jan 01

** Upward Trend = negative result*

Report Year	2019	2020	2021	2022	2023
Mortality from Drug Overdose					
Actual					25.70
Target					

How Are We Doing



The number of deaths per 100,000 from drug overdoses excluding suicide was 25.7 in 2021. This is well above our target of 7.70.

Factors Affecting Results

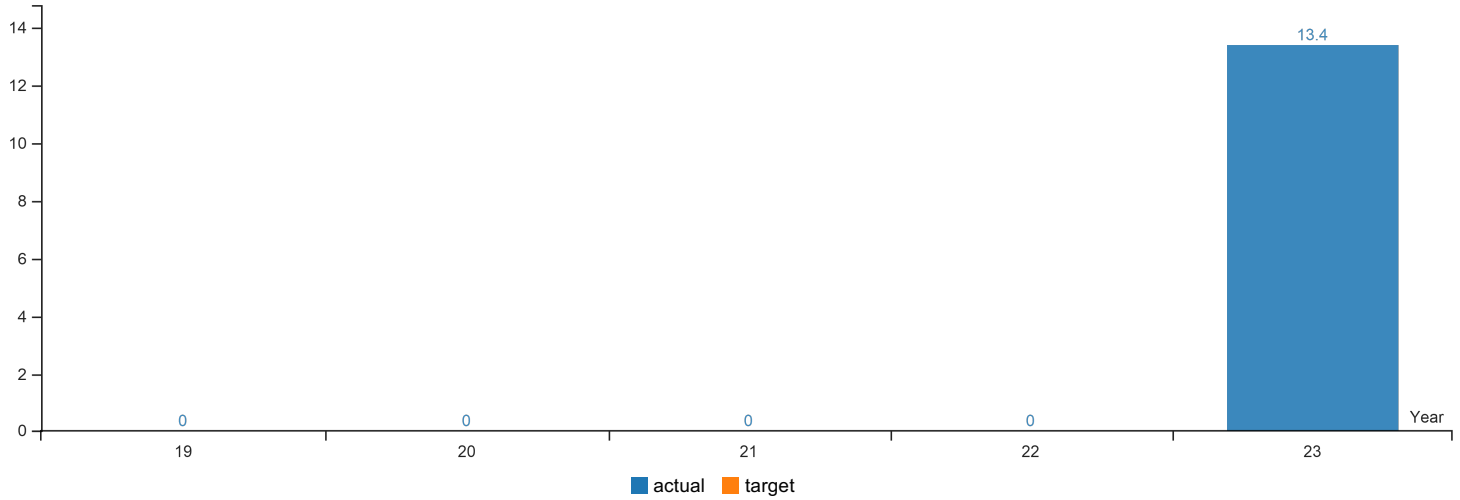
None.

KPM #48	TOBACCO USE - TEENS - Percent of 11th graders who use tobacco (past 30 days). Cigarette smoking is the most common cause of preventable death and disease. It is identified as a cause of various cancers, cardiovascular disease, and respiratory conditions, as well as low birthweight and other adverse health outcomes. Many teen smokers become adult smokers. Measuring the prevalence of tobacco use in the youth population can alert communities to potential adverse health outcomes and can be valuable for assessing the need for prevention programs or the effectiveness of existing programs.
	Data Collection Period: Jan 01 - Jan 01

** Upward Trend = negative result*

Report Year	2019	2020	2021	2022	2023
Tobacco Use - Teens					
Actual					12.80%
Target					

How Are We Doing



The percentage of 11th graders who use tobacco or nicotine (past 30 days) was 12.8%. This is below our target of 21%.

Factors Affecting Results

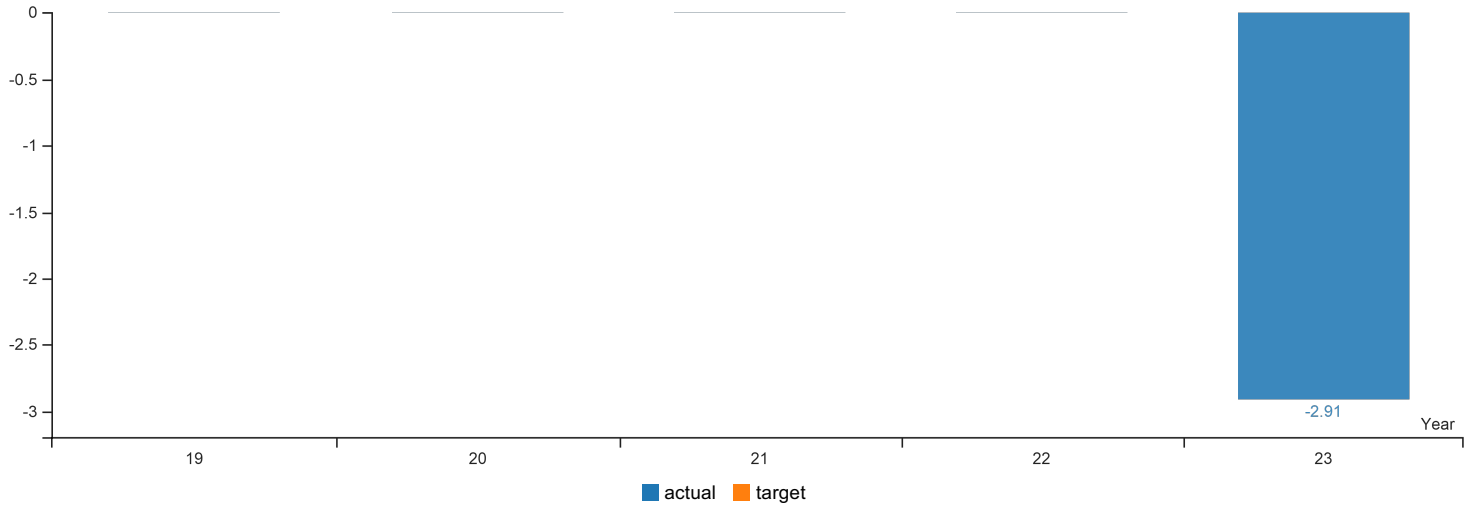
None.

KPM #49	OBESITY - TEENS - Percent of 11th graders who are obese (BMI >= 95th percentile for age/sex). Obesity is the second leading cause of preventable death in Oregon. It is a major risk factor for high blood pressure, high cholesterol, diabetes, heart disease, and cancer. Obese teens are at an increased risk of becoming obese adults.
	Data Collection Period: Jan 01 - Jan 01

** Upward Trend = positive result*

Report Year	2019	2020	2021	2022	2023
Obesity - Teens					
Actual					13.40
Target					

How Are We Doing



The percentage of 11th graders who are obese (BMI >=95th percentile for age/sex) was 13.4% in 2022.

Factors Affecting Results

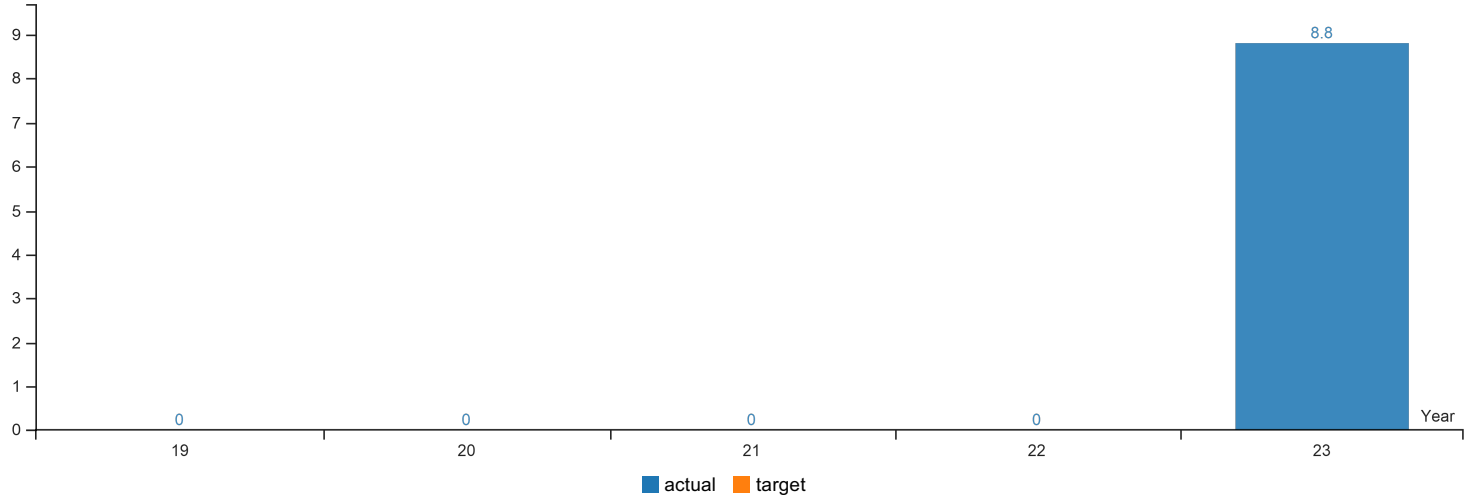
In 2022, 42.8% of 11th graders did not provide height or weight for calculating obesity. The Student Health Survey for 2022 questions and manner of data collection was significantly different from 2020 so no comparisons should be made with prior years data.

KPM #50	STATEWIDE SUSTAINABLE COST OF CARE - Comparison of health care cost changes to personal income changes. Any value 0 or higher is green because we want per capita income growth to equal or exceed per capita health care cost growth. By way of background, the statewide sustainable cost of care measure is a comparison between per person growth in income in Oregon and health care spending growth in Oregon. Historically, health care costs have grown faster than income and Oregon is trying to change that with the Cost Growth Target program and other initiatives. When the result from subtracting per person income growth minus per person health care cost growth is 0 or positive, it means income is growing at the same pace or faster than health care costs, which is good. When the measure is a negative number, it means health care costs are growing faster than income, which is not good.
	Data Collection Period: Jan 01 - Jan 01

** Upward Trend = positive result*

Report Year	2019	2020	2021	2022	2023
Statewide Sustainable Cost of Care					
Actual					-2.91
Target					

How Are We Doing



From 2020 to 2021, per capita wages grew 7.3%, but health care spending grew more at 10.2%, resulting in a difference of -2.9 percentage points. When the result from subtracting per person income growth minus per person health care cost growth is 0 or positive, it means income is growing at the same pace or faster than health care costs, which is good. When the measure is a negative number, it means health care costs are growing faster than income, which is not good.

Factors Affecting Results

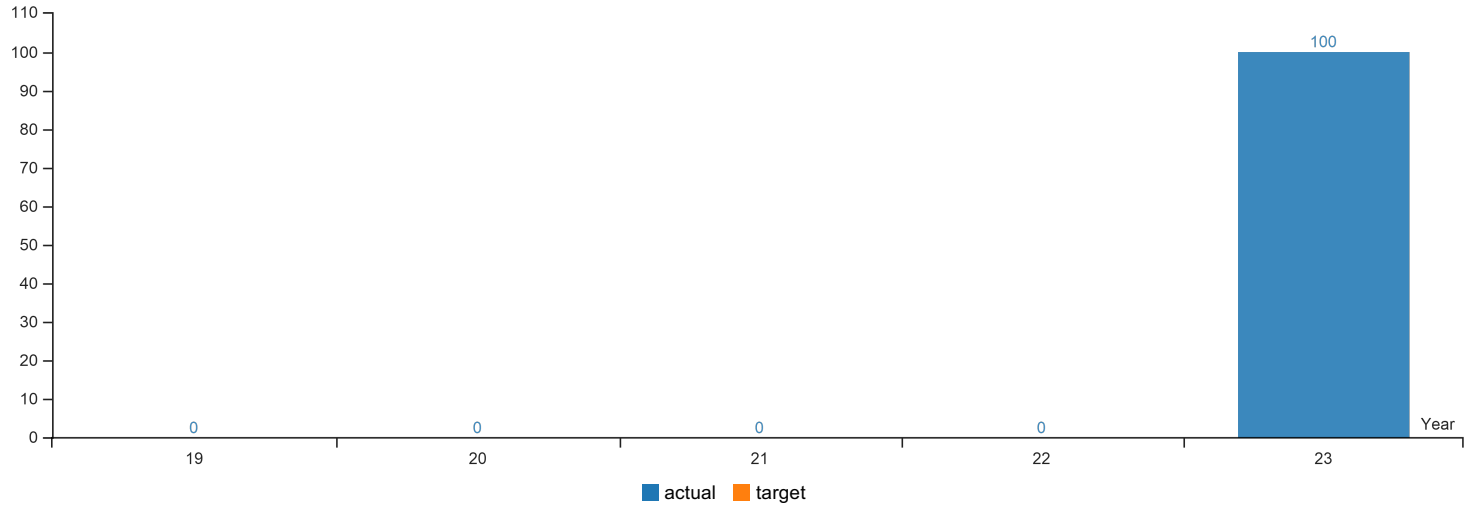
The statewide sustainable cost of care measure is a comparison between per person growth in income in Oregon and health care spending growth in Oregon. Health care costs have grown faster than income and Oregon is trying to change that with the Cost Growth Target program and other initiatives. Data is reported on a two year lag.

KPM #51	OHA SUSTAINABLE COST OF CARE - Difference between real personal income and health care inflation. Any value 0 or higher is green because we want per capita income growth to equal or exceed OHA's per person spending on PEBB, OEBB, and OHP. By way of background, the OHA sustainable cost of care measure is a comparison between per person growth in income in Oregon and health care spending growth for OHA's three health programs: Oregon Health Plan, Public Employees Benefits and Oregon Educators Benefits. When the result from subtracting per person income growth in Oregon minus per person spending on PEBB, OEBB, and OHP is 0 or positive, it means income is growing at the same pace or faster than OHA's health care costs, which is good. When the measure is a negative number, it means the cost of OHA's three health care programs is growing faster than income, which is not good.
	Data Collection Period: Jan 01 - Jan 01

** Upward Trend = positive result*

Report Year	2019	2020	2021	2022	2023
OHA Sustainable Cost of Care					
Actual					8.80
Target					

How Are We Doing



In 2021, income grew faster than OHA's health care spending, resulting in a positive measure value. When the result from subtracting per person income growth in Oregon minus per person spending on PEBB, OEBB, and OHP is 0 or positive, it means income is growing at the same pace or faster than OHA's health care costs, which is good. When the measure is a negative number, it means the cost of OHA's three health care programs is growing faster than income, which is not good.

Factors Affecting Results

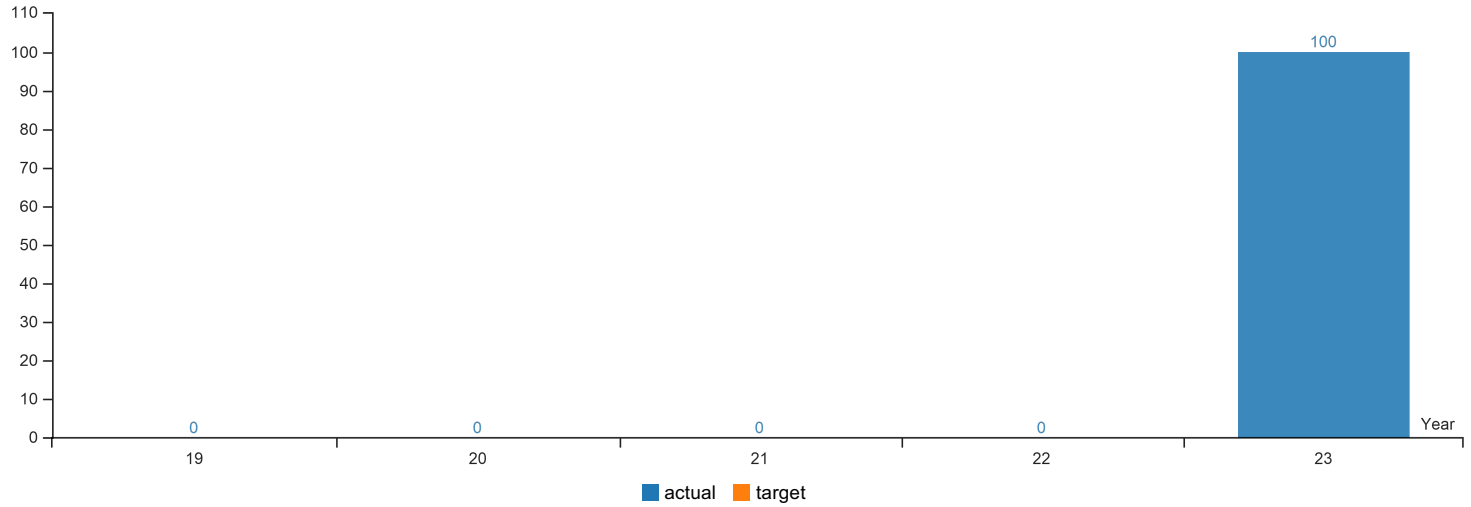
The OHA sustainable cost of care measure is a comparison between per person growth in income in Oregon and health care spending growth for OHA's three health programs: Oregon Health Plan, Public Employees Benefits and Oregon Educators Benefits. Data is reported in on a two year lag.

KPM #52	CRITICAL EVENTS MEETING THE 14-CALENDAR DAY TIMELINE TO PROVIDE CORRESPONDENCE TO TRIBAL LEADERS - To track compliance with the OHA Tribal Consultation Policy timelines, % of critical events meeting the timeline. Total number of critical events meeting the timeline/total number of identified critical events.
	Data Collection Period: Jan 01 - Jan 01

** Upward Trend = positive result*

Report Year	2019	2020	2021	2022	2023
Critical events meeting the 14-calendar day timeline to provide correspondence to Tribal Leaders					
Actual					100%
Target					

How Are We Doing



In 2022, 100% of critical events met the timeline to provide correspondence to tribal leaders.

Factors Affecting Results

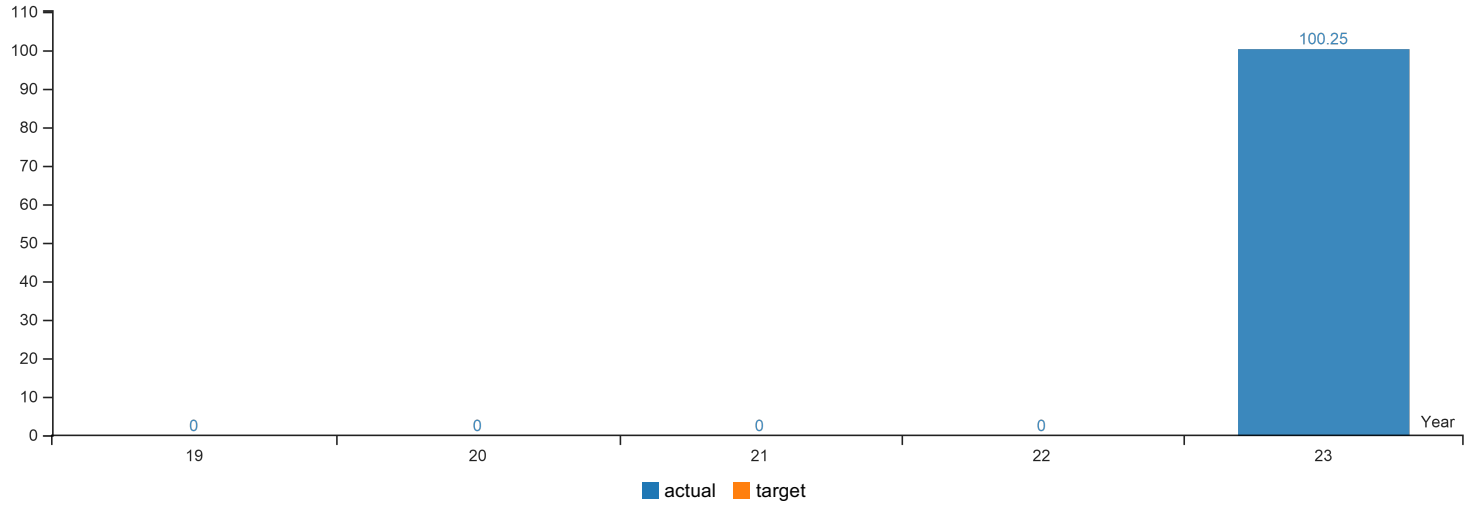
There were a total of 48 letters sent out in 2022.

KPM #53	TRIBAL CONSULTATIONS MEETING THE 30-CALENDAR DAY TIMELINE FOR REPORTING OF OUTCOME OF CONSULTATION - To track compliance with the OHA Tribal Consultation Policy timelines, % of consultations reporting outcome within 30 calendar days. Total number of consultations meeting reporting timeline/total number of consultations
	Data Collection Period: Jan 01 - Jan 01

** Upward Trend = positive result*

Report Year	2019	2020	2021	2022	2023
Tribal consultations meeting the 30-calendar day timeline for reporting of outcome of consultation					
Actual					100%
Target					

How Are We Doing



In 2022, 100% of consultations have outcomes reported within 30 days.

Factors Affecting Results

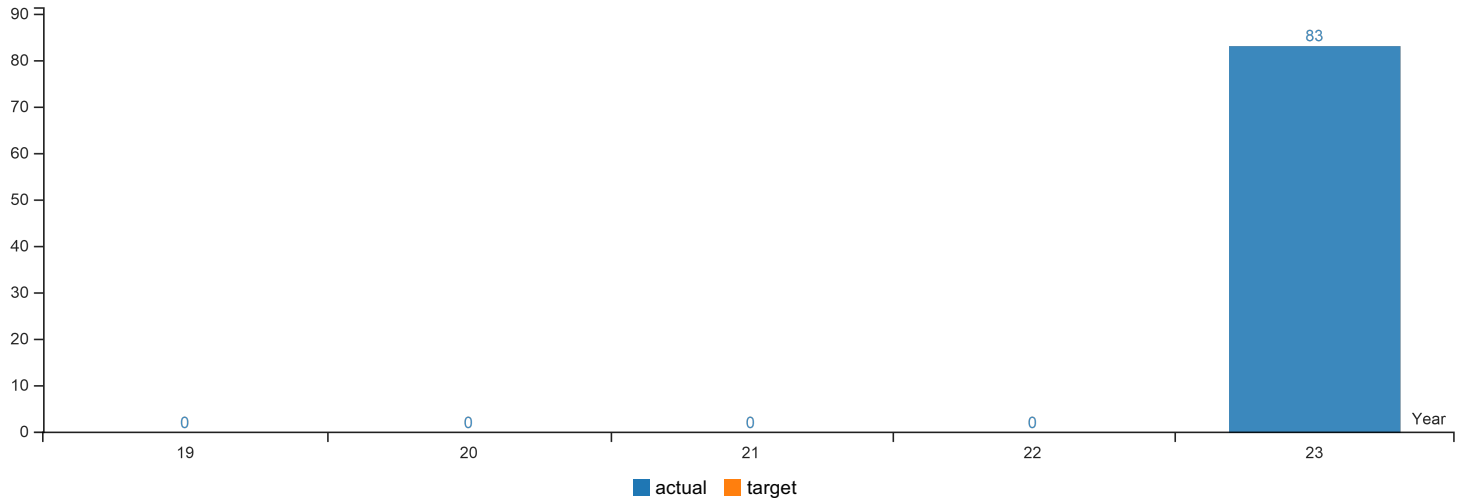
There were a total of 3 consultations in 2022.

KPM #54	TIMELINESS OF TRANSLATIONS DURING EMERGING PUBLIC HEALTH EVENTS - To allow for equitable access to important public health information during public health events. Meet Federal and state legal obligations to provide information in alternative languages and formats, including Title VI of the Civil Rights Act. Compliance with agency policies, including DHS|OHA-010-013 Alternate Formats and Language Access Services. Number of hours from Incident Manager approval of an important (expedited) public information document for an identified public health event to the return of translated documents to the incident's Joint Information Center.
	Data Collection Period: Jan 01 - Jan 01

** Upward Trend = positive result*

Report Year	2019	2020	2021	2022	2023
Timeliness of Translations During Emerging Public Health Events					
Actual					100.25
Target					

How Are We Doing



There were a total of 14 english language documents resulting in 130 translations for mpox and RSV IMTs. Arabic, Chuukese, Hmong, Korean, Marshallese, Portuguese, Russian, simplified Chinese, Somali, Traditional Chinese, Vietnamese.

Factors Affecting Results

The chuukese and Marshallese translations experienced the highest delays. These languages have strong oral traditions.

KPM #55	PENDING REDETERMINATION APPLICATIONS OVER 45 DAYS OLD - Total number of pending applications for redetermination that are over 45 days old.
	Data Collection Period: Jul 01 - Jun 30

** Upward Trend = positive result*

Report Year	2019	2020	2021	2022	2023
PENDING REDETERMINATION APPLICATIONS OVER 45 DAYS OLD					
Actual					83
Target					

How Are We Doing

The total number of pending applications for redetermindation that are over 45 days old is 83. This is above our target of 0.

Factors Affecting Results

We installed new software at call center mid-August 2023, leading to increased wait times and abandonment rates especially in the eligibility assistance queue. An ongoing marketing to remind people to update contact info and finish renewal applications has continued. Of note, approximately 65% of the renewal applications so far have been auto-processed (i.e. no touch from a worker). Of those 35% of apps that have been processed manually, the vast majority continued their benefits (81%).

Oregon Health Authority
AUDIT RESPONSE REPORT

1. ODHS and OHA: Statewide Single Audit Including Selected Financial Accounts and Federal Award for the Year Ended June 30, 2020, audit #2021-13 (dated April 2021)

- Recommend management ensure transaction review is adequate and includes examination of proper and complete coding, accounting periods, and supporting documentation.

  OFS has reviewed and updated all year-end procedures and is engaged with staff for more accurate accrual data.

- Recommend management strengthen year-end review procedures to ensure necessary system processing has occurred, and account balances are reasonable and properly classified.

  Year-end methodologies have been reviewed and we continue to engage closely with the staff providing year-end transaction details to educate on the importance of accurate estimates. The MMIS contractor has made the FMAP rate updates from 2020 at this time.

- Recommend department and authority management strengthen controls to perform timely eligibility redeterminations and provide periodic training to caseworkers to reduce the risk of administrative errors. We also recommend management implement corrections in the ONE system to address the weaknesses identified in verifying income. Management should also review the entire duration of the claim identified to determine if there are additional questioned costs from previous years. Additionally, management should reimburse the federal agency for unallowable costs.

The Department is committed to providing timely benefits to only those individuals who are appropriately determined eligible. The Department has taken positive steps since 2016 to continuously improve and automate reporting capabilities for tracking and remediating untimely Medicaid redeterminations, including the successful implementation of the new Integrated Eligibility (IE) system, named "ONE" in February 2021. This new system provides improved client eligibility controls specifically related to timeliness of determinations, correct enrollment, automated notification of redeterminations and subsequently, actions to close eligibility if necessary, along with electronic retention of eligibility data elements such as signed applications. With implementation of ONE and as we move the rest of the cases into ONE over the next year of redeterminations, we expect the errors associated with these areas to be reduced.

The Department has collaborated across OHA and ODHS programs to develop a combined eligibility manual that incorporates all relevant policy and process for determining eligibility for the medical benefits contained in the IE system. This allows our eligibility workers and case managers in the local offices an upgraded tool and a singular resource that allows us to work collaboratively in our efforts to better serve and be good stewards to Oregonians. We anticipate releasing this in July 2021.

In addition, new program and system training has been developed and deployed collaboratively across OHA and ODHS programs to ensure new and existing eligibility staff are trained sufficiently in the ONE system and all programs contained therein.

The department and authority are committed to providing training and guidance to staff to ensure information related to an eligibility determination, that is not captured by the ONE system, will be include in the individual's case record. The department will review and update any existing training material as needed and send a communication to staff highlighting the importance of recording any information related to the eligibility decision, that is not already captured by ONE.

The authority has submitted a change request to update the logic used by the ONE system to determine whether income information received by the Federal Data Services Hub is reasonably compatible with

information contained within a case record. Additionally, the authority will review the identified individual's case and reimburse the federal agency for any questioned costs for the duration of the claim.

Update: *Staff materials have been updated, communications have been sent, training and guidance have been provided:*
◦ *The combined eligibility manual that was updated can be found on the DHS forms: https://sharedsystems.dhsoha.state.or.us/DHSForms/Served/de2818.pdf*
◦ *Information about verifying and documenting income sent May 3, 2021 in a staff Weekly Update*
◦ *Attached All staff transmittal sent in March 2021*
◦ *Income related trainings provided in the months listed below; recordings of these are still available online for staff: July 2021 and December 2021*

- Recommend authority management strengthen controls to ensure documentation supporting a provider's eligibility determination and revalidation is retained. Additionally, we recommend management review the automated processes to ensure databases are checked timely.

  As of June 30, 2021, the state had addressed all bullet points noted in the finding and obtained the missing managing employee information, new disclosure statements or new eenrollment agreements for all providers in the sample with one provider being inactivated who failed to respond. New enrollment agreements and provider disclosure documents for revalidating providers are now required.

  Since April 2019, the State has been running monthly missed validation reports for newly enrolled or revalidated providers to ensure missed validations are completed.

- Recommend authority management continue to implement procedures to monitor potential unauthorized changes to the application, as well as continue to verify the effectiveness and completeness of the claim's edits and audit's function.

HSD has taken the following corrective action for 2020-2021:

1. *Rewrote the deliverable from Gainwell, the MMIS contractor, so that testing results are easier to read and understand.*
2. *OHA conducts monthly meetings involving managers from Provider Services, Claims, EDI, and BSU to review any claims/EDI issues, including new edits being proposed or developed. This meeting is a checkpoint to be sure that all units impacted by claims edit and audit changes are aware of proposed & pending changes, and to create accountability before implementing a new edit or audit in MMIS. (meeting once a month since January 2021)*

1. *Regular auditing reports reviewed on the four analyst positions who can update edits and audits in the MMIS. These reports allow HSD Leadership & Management to monitor activity by the analyst in MMIS to determine if any incorrect actions have occurred. (reports are being developed weekly)*
2. *The MMIS Business Support Unit has explored ways that the monitoring of edits can be automated. However, HSD has found this is not a viable solution to date and that manual oversight and control processes implemented before July 1, 2021, will continue.*

***Update**: BSU continues to monitor selected claims edits and audits each quarter, and Gainwell continues testing throughout the year on the top 20% of edits with significant financial impact.*

Monthly meetings are schedule with the EDI Manager and lead worker, Provider Services Manager and lead worker, and also includes from the MMIS BSU the Claims and Reference subsystem analysts. Among the many agenda items is a check in regarding any new edits or audits that have been implemented into the MMIS over the previous 30 days.

Additionally, a monthly usage audit is conducted for the 4 individuals in MMIS BSU who can update edits and audits in the MMIS.

- Recommend authority management strengthen controls over review to ensure transactions are adequately supported and the federal financial participation rate is correctly applied. Additionally, we recommend the authority reimburse the federal agency for unallowable costs.

  The agencies immediately corrected the questioned costs by charging the transaction to the correct period federal participation rate and reimbursing the federal agency. The questioned costs of $124,851 was corrected with document BTCL8375 on March 4, 2021. The questioned federal costs of $213,575 was corrected with document number BTCL8382 on March 18, 2021. The refund was reported on the Title XXI FFY 2021 Q2 report to CMS.

  To ensure the appropriate program coding is used, OFS will send the Public Health program staff the appropriate program coding for inclusion on the CHIP Vaccine Value Report that is submitted quarterly to the Office of Financial Services (OFS). Adding the coding elements to the report (used as entry documentation) will help ensure the correct program codes are used on the approved request and entry.

  To ensure the correct FFP rate is used on the CHIP vaccine draw entry, OFS will update the internal process document to show the methodology change to claiming funds based on the date vaccines are administered rather than based on the date the vaccines are purchased.

  Remaining questioned costs in the amount of $77,214 were refunded using document BTCL8588 with a May 13, 2022, effective date. The refund is being reported to CMS on the FFY2022 Q3 CMS-21.

- Recommend authority management strengthen controls by providing periodic training to eligibility staff to reduce the risk of administrative errors. This training should ensure eligibility staff know how to verify and document income support. In addition, management should review benefits and program eligibility related to cases identified with questioned costs to ensure proper funding within CHIP and other applicable federal programs and should reimburse the federal agency for unallowable costs.

The ODHS and OHA are committed to providing training and guidance to ensure staff know how to verify and document income support. The ODHS and OHA will review and update any existing training material and eligibility manuals and send communications to staff with this information. Additionally, the authority will work with the federal agency to reimburse for the unallowable costs.

OHA requested technical guidance from the Center for Medicare and Medicaid Services (CMS) on March 23, 2021. As 42 CFR 435.956(e), Oregon Administrative Rule, and Oregon's State Verification Plan all indicate that the state will accept self-attestation for this eligibility criteria, and not require proof, either pre- or post-eligibility, unless questionable, OHA is seeking CMS' position on whether this should be an audit finding of non-compliance resulting in the return of FMAP. At the time that the individual attested that she was pregnant, it was not questionable, staff followed procedure, and appropriate regulations, rules, and the State Verification Plan were followed. If CMS deems it a valid finding, OHA will work with the CMS to reimburse for the unallowable costs.

The Center for Medicare and Medicaid Services (CMS) responded that per 42 C.F.R. § 435.945(a), states are permitted to accept self-attestation of information needed to determine the eligibility of an individual for Medicaid, except where law requires other procedures (e.g. citizenship or immigration status). States have flexibility to accept self-attestation of eligibility criteria, such as age or date of birth, income, state residency, and household composition. Consistent with 42 C.F.R. § 435.956(e), states must accept self-attestation of pregnancy, unless the state has information that is not reasonably compatible with the attestation. Additionally, states must describe these policies in their Verification Plan, per 42 C.F.R. § 435.945(j). In instances where an attestation is later determined to be incorrect, the state is not held liable for such an eligibility determination if the state followed its documented policies and procedures and all applicable federal rules.

- Recommend authority management strengthen controls over provider eligibility determinations and revalidations to ensure maintenance of updated agreements and disclosure statements in accordance with federal regulations and ensure all databases are checked timely.

  For the first item noted in this finding the validation box was missed due to staff error and as of February 2021, OHA obtained an updated disclosure statement and verified the death master file for the managing employee. The ongoing corrective action plan is already in place but was implemented after this provider was enrolled. To ensure current and future required validations are completed accurately and timely, the State pulls the missed validation report monthly seeking validations which were missed by enrollment staff. Validations which were missed are remediated. The missed validation reports have been pulled and worked monthly since April 2019 and will continue.

  For the second item noted in this finding OHA contacted both providers to obtain the missing documentation. As of March 1, 2021, OHA obtained a completed disclosure statement with required managing employee details from one of these providers. The second provider must complete the revalidation process by submitting a managing employee. This provider requested and was granted an extension. The Provider Enrollment Unit anticipates receiving information and completing revalidation by April 30, 2021. Should the provider fail to revalidate by the deadline, they will be inactivated as a Medicaid provider.

  For the third item noted in this finding OHA obtained a signed provider enrollment agreement and completed disclosure statement from one of these providers as of March 1, 2021. While the second provider failed to comply and is in the process of having their Medicaid participation inactivated.

  For the fourth item noted in this finding OHA obtained a completed disclosure statement for this provider as of March 1, 2021. The provider submitted the information prior to the close of the audit and prior to the March 31, 2021, revalidation deadline.

For the fifth item noted in this finding OHA obtained signed provider enrollment agreements and disclosure statements from five of the six providers as of March 1, 2021. The remaining provider failed to comply and is in the process of having their Medicaid participation inactivated. These providers are also currently going through the revalidation process and will all be required to provide updated enrollment agreement and disclosure forms.

The State is in the process of revalidating these providers but has been delayed due to the federal COVID-19 Disaster Relief 1135 waiver. The waiver allows revalidation to be delayed for providers that were due during the public health emergency. Federal guidelines state these revalidations must be completed within six months after the end of the public health emergency for compliance. To meet these requirements, OHA has begun revalidations and is on track to complete this work by August 31, 2021. The ongoing corrective action plan is already in place. Since 2019, the provider revalidation process mirrored the provider enrollment process by requiring the submission of an enrollment agreement and disclosure statements. Providers will not be enrolled or revalidated without the managing employee information, signed provider enrollment agreements or disclosure statements. All missing provider documents were received and one provider was end dated because they failed to respond by August 31, 2021.

2. OHA: Timely Notification of Inpatient Hospital Stays Could Help Reduce Improper Medicaid Payments, audit #2021-37 (dated December 2021)

- Reimburse the federal government for the federal portion of the identified improper payment amount.

OHA is reviewing the NEMT claims and will pursue the appropriate actions to reimburse the Centers for Medicare and Medicaid Services (CMS) for any improper payments. Additionally, technical assistance will be provided to the NEMT brokerages and providers found to be inappropriately billing. If intentional fraud, waste, or abuse is identified through this research and outreach OHA will pursue the appropriate legal remediations. OHA is collaborating with ODHS on the In-home service and private duty nursing for children that involves cross agency funding. ODHS has committed to researching the individual claims

identified through the audit to determine necessary actions including repaying the Centers for Medicare and Medicaid Services for any inappropriate billing.

- Develop and implement cost-effective controls that would prevent or detect improper payments for unallowable services while a Medicaid client is inpatient. Consider ways timely notification of hospital admissions could be integrated efficiently into claims processing.

  OHA is collaborating across program areas to identify cost-effective automation and process improvements.

  OHA is assessing the feasibility of expanding its current software analytical tools to perform pre and post-payment reviews. This could facilitate the automated review of payments to providers.

  Until OHA can accomplish a cost-effective automation, OHA will conduct a quarterly data pull to include In-Patient claims where there is an additional claim type for the same dates of service as the In-Patient stay. The data elements of that report will include the following: Member Information, From Date of Service to Date of Service, and Claim Type. This quarterly report will be sent to the Medicaid Policy Unit in the Health Systems Division for assessment, analysis, and determination regarding any further action on those claims. If the Medicaid Policy Unit determines there is some potential solution that can be administered, they will work collaboratively with the MMIS team to determine the best course of action, or if any action can be taken in the current system environment. The inpatient claims data will also be shared with ODHS for review and remediation of claims outside of MMIS. During the Public Health Emergency related to COVID-19, beginning in 2020, OHA and ODHS collaborated on an emergency waiver to Home and Community Based Services (HCBS) to stabilize the system and offer additional supports to Medicaid eligible individuals. Specifically, one part of the waiver allowed OHA and ODHS to provide personal care supports while an individual was hospitalized. OHA and ODHS have found that the waiver has provided a necessary benefit to the members we serve. Jointly, we have included this flexibility as a new, ongoing service as part of the state's 1915(k) and 1915(i) state plan amendments to be a permanent component of HCBS to eligible individuals. Approvals for HCBS providers to serve individuals in hospitals are made by

the case management entities or the central policy teams. Additionally, ODHS is currently researching further controls the agency can put in place to prevent future inappropriate billing from occurring and will be included in OHA discussions regarding potential automation of reviews. As the single state Medicaid agency for Oregon, OHA holds the ultimate responsibility for the administration, compliance, and accuracy of Oregon's Medicaid program and will establish quarterly meetings with ODHS to ensure mechanisms are in place to identify and implement cross systems risks and mitigation. The revised due date is June 30, 2024.

3. ODHS and OHA: Statewide Single Audit Including Selected Financial Accounts and Federal Awards for the Year Ended June 30, 2021, audit #2022-18 (dated July 2022)

- We recommend department and authority management strengthen review controls to ensure only allowable expenditures are charged to the Medicaid program. Additionally, we recommend the authority reimburse the federal agency for unallowable costs.

  The Office of Financial Services will continue to consult with and advise program on the need for accurate coding and review of vendor payments to ensure proper funding is used for the services provided. Questioned costs were corrected with documents BTCL4471 and BTCL4473 and the appropriate amount was refunded to the federal agency.

- We recommend department and authority management strengthen controls to ensure documentation supporting a provider's eligibility determination and revalidation is retained and is complete.

  ODHS – Aging and People with Disabilities (APD) Response:

  The department's expectation to have a correctly completed and retained I-9 for homecare workers was reinforced by the department with APD and Area Agency on Aging (AAA) program managers, district managers, supervisors, and support staff responsible for completing I-9s in APD and AAA offices meetings

held on 4/13/22, 5/10/22, 5/11/22, and 5/26/22. The Local office staff were reminded of the legal requirement to correctly complete and retain the form and have it readily available for inspection. Local office staff were reminded of the resources available to assist with completing and retaining I-9s, particularly referencing the information memorandum issued in 2019 on how to correctly fill out an I-9 for homecare workers (APD-IM-19-062), the U.S. Citizenship and Immigration Services' Handbook for Employers (M-274) and referenced the information available on the case management tools webpage for APD/AAA staff. Additionally, in August 2021, we implemented the process of uploading HCW provider applications, supporting documentation and renewals into EDMS as noted in APD-AR-21-039, which were previously maintained in paper files at the local office. This will assist with the finding and retention of records.

ODHS - Intellectual/Developmental Disabilities Response:

For a short-term solution, we are implementing a random sampling Quality Assurance by the Provider Enrollment team. Currently, there is a QA staff who is monitoring agency enrollments, but we are having them also include Personal Support Worker items as well. Our current Fiscal Intermediary, Public Partnerships, are processing the I-9s currently and we will go into their system to check for any missing items.

- We recommend authority management strengthen internal controls to ensure each medical loss ratio (MLR) report contains all required information.

OHA has increased the staff assigned to the medical loss ratio report review for CY2020 and based on feedback through the audit, has already improved review to ensure the allocations are filled out by all CCOs for CY2020 (current filing period under review). The three managed care entities missing this information in CY2019 completed the information for the updated filing. OHA will continue to review and follow-up with filings from managed care plans to ensure they are complete.

OHA completed the 2020 review and ensured the allocations are filled out by CCOs in the evaluation phase.

- We recommend department management develop and implement procedures to help ensure the accuracy of amounts reported in the monthly financial reports. Additionally, we recommend department management work with the CDC to revise and resubmit the inaccurate reports.

  Our corrective action plan to improve financial reporting accuracy is as follows:

  - *All ELC monthly financial reporting will be assigned to our current ELC Fiscal Analyst.*
  - *ELC Fiscal Analyst will submit monthly financial reports and the query used to generate the reports to the Office of Financial Services (OFS) for review and approval.*
  - *ELC Fiscal Analyst will then revise monthly financial reports based on OFS feedback.*
  - *Following OFS approval, monthly financial reports will be entered into REDCap by ELC administrative staff. A second staff member will verify that data entry is accurate.*
  - *ELC Fiscal Analyst will reach out to CDC to develop a plan to revise and resubmit inaccurate reports.*

- We recommend the authority return the questioned costs to the Department of Health and Human Services.

  The Oregon Health Authority has processed the refund with a May 13, 2022, effective date using document BTCL8588.

- We recommend management strengthen internal controls to ensure appropriate subrecipient monitoring is performed. Specifically, monitoring procedures should be performed timely and should be designed to ensure subrecipients use program monies for allowable purposes. We also recommend management seek reimbursement of program monies that were not spent by subrecipients or were used for indirect costs and reimburse the federal agency for unallowable costs.

Finding: Evidence of monitoring not retained

Health Systems Division (HSD) – Behavioral Health Response:

- *HSD is already in the process of developing a more robust grant compliance monitoring process and is currently in the pilot phase. We are currently planning for widespread training and socialization Summer 2022 with continued compliance monitoring on all grants quarterly thereafter. However, the internal compliance team (Governance & Process Improvement – GPI unit) is attempting to acquire dedicated staff for grant monitoring as this team has not grown at the rate of the Behavioral Health teams.*

Finding: Indirect Costs/Unspent monies not reimbursed.

HSD – Behavioral Health Response:

- *As of the writing of this response, OHA has received final expenditure reports and recovered $99,613 in unspent funds from one entity. Since completion of the audit, HSD – Behavioral health, has also confirmed through expenditure reports that the other two entities expended all their funding appropriately*
- *Behavioral health is working statewide to ensure that all county-based CRF reports are submitted, and any unspent funds will be returned to OHA by September 15, 2022. Additionally, OHA will ensure that any unspent funds will be returned to the US Department of Treasury promptly.*

Public Health Division (PHD) Response:

- *PHD will complete a full analysis of all CRF contracts and posted payments for any errors or miscoding during adjustment requests. PHD has issued settlement letters to CBOs owing funds to OHA during Fall 2021. OHA will ensure that any unspent funds will be returned to the US Department of Treasury promptly.*

- We recommend management strengthen internal controls to ensure subaward information is accurately communicated to all subrecipients. We also recommend management ensure a risk assessment is completed for each subrecipient.

  Finding: Inaccurate/incomplete subaward information communicated

  HSD – Behavioral Health Response:

  - *Corrected the link to subaward information website; created an internal tracking sheet for subrecipients of federal funds and to verify that all required subaward information has been accurately posted.*

  Public Health Division Response:

  - *The Public Health Division will ensure that subrecipient designations are reviewed and validated as a part of the contract amendment process. Should funds that operate like CRF come to the Public Health Division in the future, necessary grant documentation such as Project Officer name will be collected from DAS in the grant set-up process.*

  Health Equity Response:

  - *Future awards related for these purposes that have federal funds will provide all appropriate subaward information in communication.*

  Health Equity Response:

  - *Future awards for these purposes that have federal funds will assure that risk assessments are completed as required.*

4. OHA: The Challenging Implementation of Measure 110 Has Increased Risks, but the Effectiveness of the Program Has yet to Be Determined, audit #2023-03 (dated January 2023)

- We recommend the agency publish a plan by September 2023 for how the M110 program integrates into the overall behavioral health system in Oregon.

  OHA agrees that the behavioral health system in Oregon needs a comprehensive strategic plan that incorporates Measure 110. As new leaders join the agency, OHA will develop a strategic behavioral health action plan, which the agency will evolve and regularly adjust over time based on community engagement, ongoing data collection and funding available to address program priorities. OHA will issue the first iteration of this strategic priority framework (which will include M110) by September 30, 2023.

- We recommend the agency identify and document gaps that prevent detailed metrics from being implemented that would track the overall effectiveness and impact of M110. • Develop and communicate a plan for addressing the gaps to appropriate stakeholders. Emphasis should be placed on developing metrics that allow policy makers and the public to effectively assess the impact and effectiveness of the M110 program.

  OHA acknowledges that continued data collection is necessary to accurately measure the effectiveness of M110. Since the inception of M110, there have been barriers to adequate data collection due to changes to the behavioral health reporting system (MOTS) and challenges at the Partner level (e.g. experience level, capacity) that have hindered ideal data collection efforts.

  In 2023, a state-level health records system, coined Resilience Outcomes Analysis and Data Submission (or ROADS), is expected to replace MOTS and allow all Providers to report client-level data on M110-related services. ROADS will have the capacity to store requirements specific to those outlined in SB755; BHRN Partners will be able to submit the client-level data necessary to evaluate the outcomes of M110. In addition to the creation of ROADS, OHA is nearing completion of a

Behavioral Health Data Warehouse (BHDW) that will allow analysts to connect client-level information across reporting systems. This will ultimately create a system that connects information on Class E Violations and dismissals, access to treatment services, demographics, and outcomes at the client-level. Client level data on M110 services will allow OHA analysts to better determine metrics such as rates of screening waivers and subsequent treatment plan initiation and completion across different geographic and demographic categories. OHA acknowledges that many BHRN Partners are new to health care and reporting systems. To avoid over-burdening the Partners, and in accordance with the suggested removal of unnecessary burdens on behavioral health providers as described in HB5202, OHA and the OAC approved a Phased Data Work Plan for 2022-2023. The Work Plan requires aggregated data submission from all BHRN Partners, regardless of some organizations' capability to submit additional data. This will allow OHA to view trends and outcomes on an aggregate level and allows the BHRNs to submit data requirements at the same frequency. In addition to the Work Plan, OHA is currently monitoring M110-related data in other statewide reporting systems. This includes drug-related death and hospitalization data from the Center of Health Statistics, Medicaid claims data on SUD diagnoses and treatment services, and poison control data. Because these systems have historical data prior to M110 implementation, they can provide baseline information for evaluating the effect of M110 statewide. While the ultimate responsibility to ensure this happens falls to the M110 program, the actions needed will require a cross-agency collaboration between the Health Systems Division and Health Policy & Analytics to ensure effective implementation.

- We recommend the agency document policies and procedures for the M110 program, including:
    - Clear expectations, roles, and responsibilities; and,
    - Trainings for grant applicants and evaluators, grants management, stipends, and conflicts of interest.

a) *The M110 program has documented policies and procedures for program interaction with the Oversight and Accountability Council, BHRN Grant administration processes, chapter 944 rulemaking/changing process in collaboration with the OAC. These policies and procedures include the roles and responsibilities for the involved parties. Currently the policies and procedures are up to date and will continue to be reviewed annually and revised as needed.*

b) *Trainings:*

- *Grant applicant and evaluator: Once the OAC determines the next BHRN funding model, The M110 Program will create a webinar training for grant applicants and a training for grant evaluators. Grant applicant and evaluator training will be provided for the next request for grant applications (RFGA), which begins in 2025.*
- *Grant administration: The M110 program currently utilizes the DAS contract administration training as well as M110 contract administrator orientation focused on all foundational aspects of M110. The program will continue to utilize these avenues of training grant administrators. Once the OAC determines the process for the next funding cycle, OHA will assist the OAC by making recommendations for the next evaluation process. Due to the current grant expirations, this should be completed by December 31, 2024, for the next grant cycle.*
- *Stipends: Currently, OAC members are trained on claiming stipends on an individual, as needed basis. The M110 program is currently developing a training to be delivered to the entire council once a year. We expect to have this training developed and available for the council to add to their agenda by June 2023. The OAC will then determine if and when to complete the training.*
- *Conflicts of Interest: The M110 program has and will continue to provide the Oregon Government Ethics Training by the office of the Oregon Government Ethics Commission (OGEC). M110 will also continue to collect conflict of interest declarations from council members in writing and before council votes on funding decisions. OHA does not have the authority to limit the involvement of OAC members*

based on their declared or perceived conflicts of interest. The M110 team collaborated with the OGEC this year to create an ethics training more tailored to the unique position of the OAC, which was delivered on September 8, 2023.

- OHA should recommend to the OAC to expand collaboration with:
    - The Department of Corrections to address substance use disorders of adults in custody;
    - Housing stakeholders such as Oregon Housing and Community Services and the Oregon Interagency Council on Homelessness to leverage expertise specifically on the intersection of housing and substance use disorder;
    - Opioid Settlement Prevention, Treatment and Recovery.

OHA will offer contacts within these various organizations to the OAC. If the OAC chooses to collaborate with any of the entities, OHA will offer to further assist in facilitating those discussions. Thank you for the opportunity to collaborate. We are excited about the value the M110 Program has and will continue to add to the lives of those living in Oregon.

5. ODHS and OHA: Statewide Single Audit Including Selected Financial Accounts and Federal Awards for the Year Ended June 30, 2022, audit #2023-21 (dated July 2023).

- Recommend management strengthen internal controls to ensure leased asset, lease liability, and accumulated amortization is appropriately valued and ensure all leases meeting the criteria of GASB 87 are recorded. We also recommend management strengthen internal controls to ensure expenditures and offsetting other financing sources related to leases are recorded to the appropriate governmental funds.

  The Office of Financial Services (OFS) has reviewed and corrected all initial lease entries within the GASB87 software as per the audit findings. OFS has also created a new D23 fund per guidance to record entries in the appropriate financing source. OFS will create detailed GASB87 procedures to follow to ensure accurate reporting in the future years.

- Recommend management ensure accounting entries are complete, accurate, and made in accordance with accounting standards. Additionally, management should develop and implement a process to modify year-end entries if expected adjustments do not occur within expected timeframes.

  The Office of Financial Services Statewide Financial Reporting (SFR) Unit will engage more closely with staff providing year-end system transaction details to ensure all elements of the data are accounted for are still anticipated to be completed by September 30. Specific to this finding, SFR has also adjusted the year end process for the cash accrual to avoid missing transactions affecting cash. Additionally, written processes are being updated with greater details.

- Recommend department management ensure controls are properly designed and implemented to record only allowable expenditures to the appropriate federal programs.

  The identified expenditures were initially charged to the MHBG in error, and when the error was found by OHA staff, the funding source was corrected to SAPT for the authorized $8.1 million prior to the SOS audit beginning. There was still $2.3 million remaining coded to MHBG which after extensive review and leadership decision, has now been re-coded appropriately. OHA's existing internal controls identified this issue initially, no additional corrective action is needed.

- Recommend department management ensure controls are properly designed and implemented to record only allowable expenditures to the MHBG. We further recommend department management seek SAMHSA approval for minor alterations and renovations.

  OHA intended to have an interagency agreement with ODHS to co-fund an improvement to a much-needed treatment facility for children. OHA submitted the payment per our agreement with the vendor with the expectation that ODHS would fund the non-SAMHSA allowable expenses. The vendor used the funds for minor safety related renovations as one would expect them to prioritize before programmatic costs. But unfortunately, the ODHS payment was never made to OHA which prevented any additional funds from being sent to the vendor.

Then, pandemic constraints along with a lack of funding prevented the vendor from being able to finalize their plan in the initial time frame. OHA sought a legal review, and the recommendation was made to cleave the contract from ODHS and allow the vendor additional time to finish their work. Upon cleaving the contract, the elements that OHA knows to be unallowable for SAMHSA funding were left in the contract because the contractor had already performed the work. OHA is awaiting a final review of expenditure reports and will request SAMHSA approval if warranted or adjust funding codes as needed to align with SAMHSA allowable charges.

In August 2022, when SAMHSA questioned these expenditures, OFS moved the entirety of the expenditures to general funds while OHA awaited SAMHSA's formal determination. In September 2023, SAMHSA formally notified OHA that the expenditures were not an allowable expense for the mental health block grant (MHBG). OHA did not draw down MHBG funds for these expenditures and, therefore, did not have to pay these dollars back.

- Recommend department management ensure recipients of federal funds are appropriately identified as subrecipients or contractors and the corresponding disbursement of federal funds are appropriately reported as direct or pass-through expenditures. We further recommend department management comply with subrecipient monitoring requirements, develop and implement internal controls to ensure risk assessments are performed and documented for each subrecipient, and monitoring activities are completed and documented according to risk assessment results.

  HSD Contracts team has already implemented additional checklists to ensure subrecipients and vendors are identified and coded properly. We will be making the checklist automated through our grant management process and fully implemented by this fall. As of June 2023, the checklist was updated on the OHA OWL page and is available for all contract administrators to use.

To fully comply with subrecipient monitoring requirements and ensure oversight, the authority will provide additional training to all active agreement administrators immediately (this was completed 2/29/24). The authority is also in discussions with the Office of Contracts & Procurement and Business Information Systems to procure a grant management software that will allow us to have better oversight over agreement administrators and their corresponding compliance monitoring documentation. OHA is also recruiting for a new position that will be the Behavioral Health Quality Assurance Manager who will have direct accountability to ensure subrecipient monitoring is completed timely and thoroughly.

- Recommend department management implement controls to ensure applicable expenditures are adequately tracked and calculations applicable to the maintenance of effort requirements are consistently performed across fiscal years. We further recommend department management work with the federal awarding agency to submit corrected maintenance of effort totals to ensure appropriateness of future maintenance of effort determinations.

  There were inconsistencies in how Maintenance of Effort (MOE) has been calculated. The applicable expenditures were not consistently or accurately calculated in each state fiscal year. The use of Marijuana paid expenses were not consistently used for both Mental Health and Substance Abuse Block Grant. We have met with SAMHSA MHBG State Project Office (SPO) for clarification on how Marijuana funds can be utilized in the calculation for the MOE. We have received guidance and clarification. We have recalculated MOE for the Block grants for SFY2022, SFY2021, and SFY2020. We also completed a written desk procedure to ensure applicable expenditures are adequately tracked and calculated to the maintenance of effort requirements and are consistently performed.

- Recommend department management resume FFATA reporting as soon as feasible and ensure all necessary subawards are reported. We further recommend department management implement controls to ensure all subawards are appropriately tracked and reported.

  On April 4, 2022, the federal government made a switch in the identifying information required for a subrecipient, changing from the previously used DUNS to a newly assigned Unique Entity Identifier (UEI).

ODHS/OHA was not made aware of the upcoming federal switch until late March 2022. OHA's Office of Contracts & Procurement (OC&P) is working directly with Program Contract Administrator's to request the missing UEIs. As the data comes in from Program it is being validated for accuracy and updated in the appropriate systems, so when all missing UEIs from a given FAIN's report month are collected, all NTE changes can be made immediately. OC&P is confident all FFATA reporting related to this audit will be submitted by November 30, 2023.

- Recommend management ensure controls over the draw process are designed and implemented to review and identify calculation errors.

  This was a criteria filter error in the accountant's data query as developed in the transition from one query tool to another. This criteria filter has been corrected and the data query is now operating correctly. The referenced grant is currently in balance, revenue is balanced to expenditures. The reconciliation, which would have identified this anomaly, was delayed for this quarter. In the future, a full reconciliation to the general ledger system of record will occur quarterly to ensure this is not repeated.

- Recommend department management comply with subrecipient monitoring requirements by implementing and documenting a procedure that evaluates each subrecipient's risk of noncompliance for the purpose of determining and performing the appropriate monitoring for each subrecipient. We also recommend department management implement procedures to ensure federal subrecipient versus contractor determinations result in accurate reporting on the SEFA.

  To comply with subrecipient monitoring requirements, the authority will implement our documented procedures. We will evaluate subrecipient's risk of noncompliance for the purpose of determining and performing the appropriate monitoring for each subrecipient. We will ensure each subrecipient completes the grantee self-risk assessment survey we've created; once completed and submitted this survey will generate a monitoring guidance document based on if the grantee was determined low, moderate, or high risk. This risk assessment survey and guidance document will help inform appropriate subrecipient monitoring. The auto-generated word document is

emailed to the identified OHA staff, stored in the software's report, and can be accessed by staff on an OHA intranet page (OWL site). Additionally, the authority will ensure accurate federal subrecipient versus contractor determinations. We will evaluate and improve current determination procedures, develop a comprehensive checklist or guidance document based on improvement recommendations, determine who has the primary responsibility for subrecipient determinations, and provide training as needed.

The authority meets weekly to discuss the current subrecipient monitoring process. Contract administrators currently use the OWL site to use the implemented tools to make a contractor/subrecipient determination. If awardee is a subrecipient, contract administrators send the self-risk assessment to the awardee. Once completed the contract administrator receives notice of the risk level and monitoring need and collects a FFATA form from the grantee. These documents are uploaded into the current contract/grant system CLM. The authority is also currently working with a contractor to develop an authority wide training about contractor/subrecipient determination and the process to ensure compliance.

- Recommend department management implement internal controls to ensure performance progress reports are complete and accurate prior to report submission.

  To ensure performance progress reports are complete and accurate prior to report submission, the department will review current internal controls and plans to implement revised or new controls. The current process steps we are reviewing include:

  - *Sending the completed report via email to the program manager requesting they review the report for completeness and accuracy.*
  - *Documenting approval via email confirmation that the report is complete and accurate prior to submission to federal funders.*

There is a need to revisit the internal control of having only managers designated to review the federal performance progress reports; we plan to discuss having the following individuals designated to conduct this review: principal investigator, grant coordinator, active partner, or manager.

The authority met in December 2023 to discuss how to refine the current process of reviewing reports. Further meetings and conversations have been on hold due to the split of HSD and need to build out behavioral health and Medicaid separately. The authority will resume meetings by December 2024 to further refine the process.

- Recommend department management correct the entries and reimburse excess cash drawn to the federal agency for unallowable costs. We also recommend department management revise the review procedures to verify that the same expenditure transactions are not duplicated in multiple batches.

  Corrective action plan:

  - *The agency has reviewed the questioned costs and has corrected the entries with BTCL7084 and reimbursed the federal programs.*
  - *The department has regular processes to review for duplicate adjusting entries. However, this process was missed for this entry.*
  - *Department management will work with department staff to reinforce their understanding of the need to follow these processes to ensure transactions are not adjusted more than once*

- Recommend management implement procedures to ensure that all employee payroll submissions are properly reviewed, and payroll is appropriately charged to the correct cost center or program.

  The Oregon Immunization Program (OIP) section manager immediately notified all supervisory managers and administrative support staff of the finding on June 5th. Finding: "As part of our testing of program expenditures, we found that 3 of 134 timesheets were not reviewed by a manager prior to release into the payroll system." Supervisory managers were reminded that it is an expectation of their position to ensure that payroll time entries

are thoroughly reviewed, and discrepancies resolved, and final entries approve according to agency requirements – on time, every month.

On June 5th, program administrative staff and the section manager began development of an internal standard operating procedure (SOP) that will thoroughly document the steps the program requires of supervisory managers to assure that all employee payroll submissions are properly reviewed and payroll is appropriately charged to the correct cost center or program. The final SOP will be signed by each supervisory manager in the program, and included in a quarterly Performance, Accountability and Feedback (PAF) session between each supervisory manager and the section manager.

The final SOP will be delivered to the offices of the Secretary of State Audit Division, and DAS once approved by the Division management, and signed by each OIP supervisory manager.

This finding and the resolution will be shared as well with our funder, the Centers for Disease Control and Prevention, as required by our cooperative agreement

- Recommend management correct the accounting error and ensure the expenditures are charged to the correct programs. We also recommend the department determine if there are additional questioned costs relating to the advanced cash draw as the federal programs have different timing for federal reimbursements.

  Corrective action plan:

  - *Adjust the two identified payments charged to the grant in error*
  - *Adjust the erroneous charges to the Federal Emergency Management Agency (FEMA) grant*
  - *Complete internal audit of expenditures and adjust any non-grant compliant expenditures out of this grant prior to federal financial reporting and close-out.*

- Recommend management ensure wireless device charges are properly reviewed, and expenditures are charged to the correct cost center or program. We also recommend management implement procedures to ensure all employee payroll submissions are reviewed and approved by program management.

  The questioned costs related to cell phone charges appear to have resulted from a lack of formal process in the Coronavirus Response and Recovery Unit. This unit has closed and departments have returned to standardized formal processes.

  Corrective action plan:

  - *Prior to "COVID-19" processes and procedures will be followed*
  - *Administrative staff will parse cell phone charges and code invoices according to employee payroll*
  - *Approving manager will review coding for accuracy prior to approval*

- Recommend department management maintain the necessary internal controls to ensure the monthly financial reports are accurate and agree to the accounting records.

  Our financial reporting accuracy had been remedied for all historical and current reports by March 2023. Unfortunately, these improvements were not in place by June 30, 2022, and, for that reason, a finding was noted.

  Corrective action plan:

  - *All monthly financial reporting has been assigned to our Fiscal Analyst*
  - *The Fiscal Analyst submits monthly financial reports and the query used to generate the reports to the Office of Financial Services (OFS) for review and approval*
  - *The Fiscal Analyst revises monthly financial reports based on OFS feedback*
  - *Following OFS approval, monthly financial reports are entered into CAMP by an ELC administrative staff member and verified by a second team member*

- Recommend department and authority management strengthen controls over the OR-PTC system to ensure transactions are adequately supported and reviewed.

  Regional Readiness Coordinators (RRCs) provide training, reinforce best practices, review business processes, and provide feedback on issues we are seeing to reduce incidences of human error. The department will also continue to review and research authorizations for Mileage and Time entries that do not align with existing claims to determine where additional RRC support is needed.

  Several system enhancements and changes slated for June 2023 are intended to help providers claim time accurately and reduce local office workload associated with reviewing pending entries. This will not fully resolve the issues noted by SOS, however, implementation of phase 2A of the Provider Time Capture System, which is scheduled to go into production July 12, 2024, will eliminate the need for local offices to manually enter mileage or hours into the mainframe payment systems and will automatically flag discrepancies between OR PTC DCI and the Mainframe.

  The PTC Team initiated a series of Webinar and Learning lab in October of 2023. These will continue through November, December and January with topics that are intended to reinforce best practices and are reflective of issues that have been received or reviewed by PTC where authorizations or entries do not align with existing claims. The October webinar also contained an overview of the upcoming changes to the system "Phase 2A" in July 2024. This is on schedule and the first of 2 system updates that will create interfaces between the PTC-DCI system and the mainframe, automate payroll batch entry and eliminated the manual data entry, ideally reduce errors. In preparation of this, PTC has found great value in using the Regional Readiness Coaches (RRC's) in local offices and is expanding the recruitment of these positions in December to assist with UAT, change management and more training.

- Recommend department and authority management strengthen controls over review to ensure transactions are adequately supported and reviewed. Additionally, we recommend the authority reimburse the federal agency for unallowable costs.

  ODHS Facilities Management Response for Finding #1: The Office of Facilities Management (OFM) is committed to providing accurate coding for payments. Communications have been made with staff responsible for coding invoices and the need to conduct thorough reviews to ensure coding is accurate and charged to the appropriate funding source for the goods or services the agency is being invoiced for. OFM will be communicating with the programs that provide coding to confirm that the information provided appropriately aligns with the intended use of the funds. The department will review current processes and forms to ensure there is sufficient detail to verify accuracy. Questioned costs of $1,361 in Federal Funds (and $2,722 in Total Funds) paid with invoice number VP815455, was corrected on 4/26/2023 with document BTCL1412.

  ODHS, Aging and People with Disabilities (APD) Response for Finding #2: The department is committed to storing and retaining supporting documentation for all authorized payments. The processes and procedures on contract bidding and approval associated with payment authorization for 1915k services and support are being reviewed and improvements such as central repositories are being explored. Once analysis and improvements are complete, they will be documented and communicated to staff within the department and to the Office of Financial Services for awareness. Additionally, as part of succession plan development, the department will create intentional opportunities for knowledge transfer, shared document storage, and increased transparency amongst work teams, which will assist with document location in the context of unexpected personnel changes.

  The department will reimburse the federal agency for any unallowable costs.

- Recommend authority management reimburse the federal agency for unallowable costs.

As indicated in the report and as of January 1, 2020, authority management updated the MMIS data tables to ensure all future provider payments were made at the correct rate. Additionally, authority management updated control procedures to ensure MMIS data tables are updated timely and accurately. The recoupment of funds paid for incorrect rates will be completed through the FFS cost settlement process. We expect to have this completed on or before June 30, 2024. We will evaluate the use of alternate recoupment processes in the event of future corrections.

Refund has been reported on the FFY2024 Q1 64 and has been loaded into MBES for Audit Finding 2022-056. The final refunded amount including all adjustments was $1,725,396 in total funds, federal portion was $1,340,158. The Q1 CMS 64 will be certified by January 30, 2024.

- Recommend department management strengthen controls to ensure documentation supporting a provider's eligibility determination and revalidation is complete.

  ODDS Response: The department is committed to having completed I-9 forms on file for all Personal Support Workers through our Fiscal Intermediary. The Provider Enrollment Unit now has a quality assurance staff who will conduct spot checks of the FI work. This is in process now and reviews will continue.

  APD Response: The department is committed to having completed I-9 forms on file for all employees and homecare workers. This expectation, as it relates to homecare workers, was reinforced by the department at the Client Employment Program Annual Summit held on 3/28/23 and 3/29/23. This Summit was attended by approximately 160 local office staff. Local office staff were instructed on how to properly fill out the I-9 form and retention requirements. Staff were also reminded of resources available to answer questions, including central office points of contact.

The department is also exploring short- and long-term solutions to mitigate this risk, including creating a peer review process on business procedures across the state intended to assist in not only accuracy, but knowledge transfer, developmental growth and mentoring opportunities. The department may also explore system changes that would automatically validate the completion of tasks related to provider enrollment and renewals, including the presence of required documentation.

6. OHA: Pharmacy Benefit Managers Poor Accountability and Transparency Harm Medicaid Patients and Independent Pharmacies, audit #2023-25 (dated August 2023).

- Recommend expanding contract provisions to more proactively monitor and enforce contract compliance and further develop monitoring processes that will give OHA reasonable assurance CCOs and PBMs are in compliance. Consider the following:
    - Require CCOs to obtain a yearly independent audit of their PBM for high-risk areas. An independent audit could help give OHA reasonable assurance that CCOs and their PBMs are in compliance. Note that a yearly audit should not replace a CCO's responsibility for on-going monitoring.
    - Incorporate monitoring results into the contracting process to improve oversight and program outcomes.
    - Update the CCO contract to apply the review requirement to all CCO-PBM amendments.
    - Require PBM contracts to be pass-through.

OHA conducts an annual CCO contract restatement process. These recommended considerations can be included in the 2025 restatement, which will begin in February 2024. The specific considerations identified are partially represented in the existing CCO contract.

- *Yearly independent audit – Currently a subcontractor performance audit is required for all high-risk subcontractors, which would include PBMs. The audits are conducted by CCOs. In addition, an annual PBM market check is conducted by a third party on behalf of the CCOs, for those not using OPDP. The*

contract could be changed to include an independent audit for PBMs; this would incur additional costs for all CCOs.

- *Incorporate monitoring results into contracting process – The addition of Quality Assurance staff with the background and experience to enable contract oversight without the appearance of conflict of interest.*
- *Update CCO contract to apply review requirements to all CCO-PBM amendments or contract renewals. Currently, this requirement only applies to pay-for-performance PBM subcontracts. This could be changed as part of the next contract restatement process to apply to all CCO-PBM amendments and contract renewals.*

OHA's CCO PBM readiness review includes a market check requirement, which could be expanded to include an audit of the PBM annually. The third-party nature of this market check requirement along with an annual audit would indeed give more assurances to OHA and better position CCOs to oversee their PBMs' behavior. As noted in the report, CCOs are permitted to utilize OPDP/ArrayRx as their PBM; only one CCO currently elected to utilize this option. It is important to note that OPDP/ArrayRx do perform a third-party review and market check for all programs participating in interstate cooperative agreement. Additionally, OPDP/ArrayRx conducts quarterly sample audits to ensure claim submission and payment accuracy for a diverse subset of claims processed for our participating programs. Annually, ArrayRx completes an audit representing in excess of 50% of its total claims. This audit assesses the accuracy of 100% of claims that are processed by our PBM for these programs (as opposed to audits that are conducted in quarterly PBM audits). The most recent audit results showed that OPDP/ArrayRx PBM had a 99.99% accuracy rate.

We agree that all subsequent contract amendments between PBMs and CCOs should be subject to OHA review and approval. This can be in place for the 2025 contract. OHA also agrees that PBM contracts should be pure pass-through contracts moving forward and will change the PBM readiness review process to reflect this. To successfully address the additional analytics and oversight necessary, it would be helpful to find a path to effectively resource OHA. A recent legal settlement between Oregon and a PBM highlights the need to have a

dedicated resource that can assist with audits, oversight, and review of PBM activities performed to best serve our Medicaid members. It would benefit all parts of OHA and other agencies to have a centralized pharmacy purchasing resource that can manage multiple pharmacy claims databases and ensure all Oregon agencies stay ahead of market changes that happen quickly and covertly within the pharmacy space.

- Recommend assigning staff without a conflict of interest to monitor CCO and PBM compliance.

  OHA agrees with this recommendation; however, staffing challenges have led to leveraging staff who have knowledge and expertise in the PBM contracting and pharmacy space. It was noted by OHA staff and confirmed by DOJ that a potential conflict of interest existed if OPDP/ArrayRx staff—who currently have this expertise—were to review CCOs' PBM materials. After the first CCO PBM readiness review, OHA did take steps to mitigate the conflict of interest by removing OHA's Director of Pharmacy Policy, Programs and Purchasing from all subsequent reviews. However, the remaining staff member—the OPDP/ArrayRx Operations Manager—still has a conflict of interest. It should be noted that other divisions within OHA and other Oregon agencies struggle to identify independent pharmacy analytic, policy, and purchasing resources, which suggests these resources are needed statewide. OHA intends to pursue adding resources to ensure availability of staff without a conflict of interest.

  OHA does not have sufficient staffing to sustain comprehensive review of all CCO PBM contracts and recent LC/POP limitations have dashed hope of additional staff. Therefore, as of March 1, 2024, Health Policy & Analytics' Delivery System Innovation Pharmacy team has reassigned all of this work to two members of the team who do not have OPDP contracting or procurement responsibilities. This has also involved creating an attestation process for CCO's PBM contracting practices that is validated by a third party hired by CCOs. At the moment this is the only strategy that can at least meet the spirit of agreement OHA has with the SOS audit.

7. OHA: Funding and Delivery of Measure 110 Substance Use Disorder Services Shows Progress, but Significant Risks Remain, audit #2023-39 (dated December 2023).

- Recommend development of a strategic plan with specific M110 outcome metrics and timelines and present it in the 2024 legislative session. Consider working with outside researchers for outcome evaluation if needed.

  OHA agrees to create and present a draft strategic plan specific to outcome metrics to the legislature in the 2024 session with a finalized version by August 1, 2024. OHA sees this plan as an opportunity to use the experience and knowledge gained over the first 18 months of this grant with our 230 BHRN Partners, and their capacity for data collection. It is OHA's goal to set strategic parameters around data collection, managing expectations around the type of data that is appropriate to collect, modifying our systems to collect data needed for outcomes metrics, and the role administrative burden plays in the provision of service. Due to the timeline of the 2024 legislative session, OHA cannot contract with an outside research expert prior to session, but OHA will consider that recommendation for future work.

- Recommend working with providers to better track and report:
  - Specifics on staffing, service expansion, and capital projects;
  - Youth services and virtual services; and
  - The availability of culturally and linguistically specific services.

  OHA agrees and acknowledges that reporting on the expansion of staffing and services are important measures to track. OHA continues to balance collecting high-quality data and the administrative burden on BHRN Partners to report on their program activities. The Measure 110 team will ask BHRN Partners for a count of the number of newly hired positions beginning in the Quarter 5 expenditure reports (for services provided between July 1, 2023 – September 30, 2023). The Measure 110 team has also worked to ensure that all BHRN Partner budgets are uniform and that all funded positions are listed including their corresponding salary and FTE for the grant extension period, beginning January 1, 2024. The program will add a question about how Measure 110 funding aided in the expansion of services to the Quarter 7 expenditure report, corresponding with the grant

extension period (January 1, 2024 – June 30, 2025). BHRN Partners will be asked to provide a retrospective answer to both questions of hiring and service expansion for all quarters in the final report for this grant.

Current and future data collection efforts include client age, which allows OHA to report on services provided to youths. Additionally, Quarter 5 reporting included an opportunity for Partners to identify if they provide outreach services to K-12 schools and/or minors. Future report forms, starting in the Quarter 7 grant extension period, will include an option for Partners to select if they provide services in-person, virtually, or both, and if they provide culturally and linguistically responsive/specific services.

However, OHA would like to note that in evaluating and selecting applicants for BHRN funding, the Measure 110 Oversight and Accountability Council (OAC) could not consider race, gender, or other protected identity of the applicants, because to do so is unlawful under the Equal Protection Clause of the 14th Amendment to the U.S. Constitution. Rather, the OAC could appropriately consider what types of services were proposed in the applications, such as whether applicants proposed to provide services to historically underserved populations in alignment with Measure 110's purpose.

- Recommend working with providers to improve the consistency and reliability of service expenditures and client data.

  OHA agrees that technical assistance and partnership are the keys to successful grant administration. The Measure 110 team will continue to provide 1:1 guidance and technical assistance throughout the end of this funded grant cycle, June 30, 2025, to BHRN partners when appropriate to facilitate the collection of high-quality expenditure and programmatic data. These efforts also include developing a roadmap for improving our data collection systems to better support this and other recommendations. With the addition of new Measure 110 grant administration staff, the capacity for technical assistance to our 230 BHRN grantees will increase over time. The Measure 110 team seeks to continually improve reporting templates and internal processes in response to partner feedback and SOS recommendations.

- Recommend improving the application and review process moving forward: Work with communities and providers to identify the most critical service gaps by county and barriers to increasing services.

  OHA agrees that identifying critical service gaps and barriers increasing services is important to improve the state's behavioral health and substance use treatment system. OHA is conducting a residential and facility study, due June 2024, and a SUD financial analysis, due April 2024, that will help the agency better identify service gaps and barriers to care. Additionally, under HB 2513 (2023), local alcohol and drug policy committees have been directed to coordinate with BHRNs to identify needs and establish priorities for alcohol and drug prevention and treatment services and report their findings to OHA. Together, these analyses will be presented to the Measure 110 Oversight and Accountability Council to inform their decision-making process in the future. OHA will also incorporate the results of these analyses and any identified gaps into the 2025 Measure 110 BHRN Request for Grant Application (RFGA) process to better inform the community of cri tical opportunities. By statue, the Oversight and Accountability Council is the sole body that can award Measure 110 funding.

- Recommend improving the application and review process moving forward: Make the application clear and direct and improve review process transparency and consistency.

  OHA agrees that a clear and direct grant application is essential. Acting on Recommendation 3 from the SOS Real Time Audit (January 2023) and the agency's newfound authority from HB 2513 (2023), OHA will work to ensure that the next iteration of the BHRN grant applications includes standard grant requirements including a statement of work, uniform budget documents, and enforced word counts. The M110 program will also work to create clear documentation that Measure 110 Oversight and Accountability Council can complete to accompany funding decisions and discussion in their public meetings. Taken together, these steps will ensure the application and review process is transparent, consistent, and clear to the public.

- Recommend improving the application and review process moving forward: Require providers to clearly detail what they plan to do with M110 funds and the experience, capability, and plans for providing services to clients from linguistically diverse or culturally specific backgrounds.

  OHA agrees that the new grant application should include a detailed statement of work outlining how providers will provide Measure 110 services with specificity regarding how they will render services to clients who are culturally and linguistically diverse and how they will utilize funds to ensure the services are provided. Using the new authority under HB 2513 (2023), OHA will require all future BHRN applicants include a detailed statement of work as part of their application, including detailed information on how applicants plan to provide culturally and linguistically specific/responsive services. In addition, there will be detailed and standardized budget documents in the new grant application process that will ensure all applicant budgets are clear and directly speak to the statement of work provided.

8. ODHS and OHA: Statewide Single Audit Including Selected Financial Accounts and Federal Awards for the Year Ended June 30, 2023, audit #2024-14 (dated April 2024).

- Recommend department management update accounting and review procedures to ensure entries prepared to address issues originating in prior fiscal years do not incorrectly impact the current year financial statements.

  The Office of Financial Services (OFS) is reviewing documentation from prior audits and direction from the Department of Administrative Services (DAS), Statewide Accounting and Reporting, to identify the most effective and efficient process going forward for refinancing prior year activity in the current fiscal year. As mentioned in the audit, the complexity of deferred revenue reimbursement, across multiple fiscal years, from FEMA during the pandemic increased the complexity of these accounting transactions. The office will write up a new process and train relevant staff on the new methodology.

- Recommend department management ensure recipients of federal funds are appropriately identified as subrecipients or contractors and the corresponding disbursement of federal funds are appropriately reported as direct or passthrough expenditures. We further recommend department management comply with subrecipient monitoring requirements, develop and implement internal controls to ensure risk assessments are performed and documented for each subrecipient, and monitoring activities are completed and documented according to risk assessment results.

  Contracts and program staff have piloted and implemented tools to help administrators determine if the NFP is a contractor or sub-recipient using the determination checklist. Department managers have communicated expectations related to the use of this tool and guidance to ensure that contract administrators understand how to determine if an agency is a contractor or sub-recipient. If determination identifies a subrecipient relationship, controls are in place to ensure the Federal Funding Accountability and Transparency Act (FFATA) form, self-assessment, and monitoring plan are completed. Further, mental health block grant planners will assess each new or amended contract for appropriate designation. OHA management plans to establish a single training for all staff to complete before developing a contract. This training will also include necessary messaging to all staff about terminology, location of resources, expectations as an administrator, and compliance/verification processes. OHA will provide this messaging and training through agency-wide emails, newsletters, and all staff meetings. OHA will continue refining its onboarding to incorporate these trainings and messaging. Additionally, the Office of Financial Services reviews each contract to determine the correct coding for each contracted service/deliverable and accurate code, such in State Financial Management Accounting (SFMA) system.

  Risk assessment survey has been developed that allows for self-assessment and documentation of the process. Administrators are requested to keep a copy of the assessment in their administrative file. Contract administrators create regularly scheduled meetings with the sub-awardee to monitor for compliance, depending on the risk of the sub-awardee. OHA-HSD has created a planning and implementation document to systematically identify the process of self-assessment and monitoring plan. In addition to the 11-module contract

administration training required for all administrators. OHA plans to create an accessible folder for download to include the Contract Administration Plan (CAP), RACI Matrix, Monitoring, and closeout activities.

Once all of the resources are socialized throughout the Program and Leadership staff, controls are still necessary to get as close to 100% compliance by the administrators.

Controls that will be implemented are:

- *DocuSign CLM- During the automated workflow for approvals, administrators must verify that the determination document and, if applicable, the self-assessment and monitoring plan is attached. If not, the request will be rejected until the proper documentation is provided.*
- *Team audit- The program analyst will perform random audits of grant/contracts administrator folders to confirm documentation is complete for each grant/contract, including monitoring activities, reports, invoices, and grant compliance requirements.*

- Recommend department management implement controls to ensure applicable expenditures are adequately tracked and reviewed for compliance with federal Earmarking requirements.

  As noted in the audit report, OHA has already taken corrective actions to ensure controls are in place for tracking applicable expenditures in SFMA to ensure compliance with federal Earmarking requirements. The Office of Financial Services, OHA Budget Unit, and block grant planners meet at least once a month to review budgeted earmarked requirements and expenditures to ensure compliance. Block grant planners meet at least once a month with the crisis team and children and family team to review required earmark budgets and expenditures.

- Recommend management ensure compliance with federal program requirements by prioritizing the completion and documentation of hospital audits.

The authority agrees with this finding and has completed the work to reconstitute the required tools necessary to perform these audits. As of January 2024, the authority has sent cost statements to the hospitals for review and response and is working to collect other reports required for completing the audits from actuaries and intermediaries. The authority will begin processing full audits starting April 2024 for outstanding Fiscal Year 2016 forward. The authority anticipates that the audits through Fiscal year 2020 will be completed by Dec. 31, 2024. The authority also affirms that the corrective action for finding 2021-17 has been implemented and resolved. This can be validated as completed audits become available in 2024.

- Recommend department and authority management strengthen controls over review to ensure documentation supporting a provider's eligibility determination and revalidation is complete. Additionally, we recommend the authority reimburse the federal agency for questioned costs related to ineligible providers including ineligible providers identified in prior year findings.

  The authority will provide two separate training modules to enrollment staff and staff responsible for the CCO enrollment and validation regarding complete ownership and disclosure documents. We will perform the trainings on April 18, 2024, during our monthly staff meeting and a separate ownership form only training on May 30, 2024.

  The Office of Developmental Disability Services has implemented new contractual language for our fiscal intermediary to review I-9 for providers with stricter criteria. This was added earlier this year and is already in place in the contract and implemented. Further, upon enrollment, state staff are validating older I-9s for providers who have submitted their I-9 historically.

  The Office of Aging and People with Disabilities is committed to ensuring Provider Enrollment Agreements and accurate I-9 forms are on file and ensuring records are stored and retained properly for all Home Care Workers. The department will reinforce the requirements concerning the collection and storage of agreements at both the Quarterly Home Care Coordinators meeting on May 30, 2024, and at the AAA/APD Local Line Leadership

meeting on May 16, 2024. The department will also create a reference guide in the new ODHS Field Business Procedure Manual implemented in February 2024. The department will make provider enrollment agreements and I-9 forms available statewide via DocuSign as an optional tool for state staff that guides them through accurately completing information on the form and capturing electronic signatures. This will ensure that all required fields in forms are filled out correctly including ensuring the presence of required documentation to mitigate human error.

Additionally, we will continue to explore developing a training module for front office staff and office managers as well as a peer review process on business procedures and exploring ways that we can leverage technology such as the replacement Electronic Data Management System (EDMS) "Laserfiche" implemented by Imaging and Records Management Services (IRMS) to store provider records electronically.

The Office of Aging and People with Disabilities released updated guidance and clarification on I-9 forms through an Information Memorandum transmittal on January 24, 2024 (APD-AR-23-099) During the February 19, 2024, at the Home Care Coordinators quarterly convening meeting the revisions from the prior transmittal were discussed along with the importance of ensuring timely renewals and accurate documentation and retention of PEA/I-9's. During the May 30, 2024, at Home Care Coordinators Quarterly convening, Laserfiche project team shared information on status of new system implementation and timing of transition from EDMS along with Q&A. Laserfiche implementation began on July 15, 2024. The DocuSign contract administrator has provided an update noting that the DocuSign contract to go from pilot to statewide is currently behind schedule due to the Office of contracts and Procurement backlog, once available. During the July APD/AAA Local Line managers meeting, APD leadership discussed with line managers the results of the audit, reinforced the importance of accurate documentation and retention of records and discussed ways we are looking to strengthen the process such as leveraging new software and solicited ideas or best practices they have. We will continue to explore training options for onboarding front office staff, develop procedures for the Field Business procedures manual.

.

The questioned costs of $1,786 will be refunded to CMS and reported on the CMS 64 by 6/30/2024. Of note, the prior year finding with questioned costs of $1,843 has since been found as the provider being eligible. No corrective action is needed.

- Recommend department management strengthen controls over review to ensure transactions are adequately supported and reviewed. Additionally, we recommend the department reimburse the federal agency for unallowable costs.

  The ODHS Office of Facilities Management coordinates care of a 168-building portfolio. Part of this work is coordination of furniture reconfiguration, minor and major remodels of office spaces and other building maintenance work. For these projects we rely on program staff with understanding of their funding sources to provide us with accurate coding to support the project related costs. Our office does not work directly with funding source management only coding and billing.

  To better track who is providing us the coding and maintain a record of payment approval we have revised our workorder form to include who from the program is providing the coding and what authority they have to provide the coding. This will allow us to assure that important details are captured regarding funding application and coding for billing and protect from funds being drawn from sources that do not support and/or are not appropriate for a given project.

  The questioned costs of $3,849 were corrected and refunded to CMS using document BTCL1485 with an April 17, 2024, effective date. The refund will be reported on the Q3 FFY 2024 CMS 64 which will be submitted by June 30, 2024.

- Recommend program management implement additional internal controls over payroll related costs to ensure all costs charged to the program are related to employees who work directly on the award.

WIC Leadership is dedicated to reviewing and integrating existing reports into their time review process and will also ensure that staff responsible for employee time approval have been adequately trained on how to use those reports and features in Workday to review time. Questioned costs will be refunded.

Agency overview

Overview of the Oregon Health Authority

The Oregon Health Authority (OHA) includes most of the state's health care programs. OHA has eight divisions: Behavioral Health, Equity and Inclusion, External Relations, Fiscal and Operations, Health Policy and Analytics, Medicaid, Oregon State Hospital, and Public Health.

The Oregon Health Policy Board[2] (OHPB) serves as OHA's policymaking and oversight body, OHPB works toward comprehensive health reform in our state. The nine-member board includes community members from across the state with an interest in health and health care. Board members have strong relationships with the communities they represent.

OHA appreciates our many partners who share a commitment to eliminating health inequity in Oregon. Partners range from Tribal nations and coordinated care organizations (CCOs) to local health officials and community-based non-profit organizations. The agency depends on their input, collaboration, innovation, expertise, and inspiration to improve the health and well-being of every Oregonian. Together, we are working to dismantle our state's systemic barriers to equitable, affordable, and accessible health care.

OHA mission and objectives

Vision

A healthy Oregon.

---

[2] Oregon Health Policy Board: https://www.oregon.gov/oha/OHPB/Pages/index.aspx

Mission

Ensuring all people and communities can achieve optimum physical, mental and social well-being through partnerships, prevention and access to quality, affordable health care.

Core Values

OHA has core values that guide our work. Those core values are articulated below.

Heath Equity

We address the clinical and social conditions, as well as the historical and contemporary injustices, which undermine health, so everyone can reach their full health potential. We respect diverse cultures, populations, histories, and health practices. We consider the diversity of Oregon's communities as we make decisions about how policy and practice are developed, and how resources are distributed. We ensure our workforce is diverse and inclusive because a workforce and leadership reflecting all Oregonians is best able to achieve these outcomes.

Service Excellence

We exceed the expectations of the people we serve by delivering responsive, efficient, and effective solutions.

Integrity

We are each accountable for maintaining the highest standards and outcomes in all aspects of our work. We are good stewards of the public trust and the public dollar. Our decisions are informed, fiscally responsible, open, and easily understood.

Leadership

Each one of us in OHA is responsible for helping to realize a healthy Oregon. We bring our talent, creativity, compassion, competence, generosity, and stewardship to the work we do every day. We break down barriers to ensure every employee has the ability and opportunity to help make changes that improve health and transform health care. We lead improvement in health through innovative strategies and creative solutions.

Partnership

In our service to the public, we seek out, listen to, and collaborate with our partners across diverse communities. Our common goal is to protect and promote the health of all people in Oregon.

Innovation

We are not satisfied with the status quo if there are new and better ways to meet the needs of the people we serve. We bring creativity, experience, and openness to our search for solutions to problems. We pursue opportunities to develop new evidence to evolve our practices.

Transparency

We communicate honestly and openly, and our actions are upfront and visible. We provide open access to information and meaningful opportunities to provide input and participate in our decision-making.

Our 2030 Goal

In 2019, OHA became the first health agency in the country to declare an ambitious statewide goal to eliminate health inequities, and to do so by 2030. In the simplest terms, that means establishing a health system where all people in Oregon can reach their full health potential and well-being, without facing disadvantages due to their race, ethnicity, language, disability, immigration status, age, gender, gender identity, sexual orientation, geography, or social class.

Strategic Plan Goals

OHA's 2024-2027 Strategic Plan goals support our 2030 goal and include the following:

- Transforming behavioral health;
- Strengthening access to affordable care for all;
- Fostering healthy families and environments;
- Fostering healthy Tribal communities; and

- Building OHA's internal capacity and commitment to eliminate health inequities.

Health equity definition

In 2019, the Oregon Health Policy Board and OHA adopted the following definition of health equity[3] (Appendix A-4, OHA health equity definition: 2019 Health Equity Committee presentation to Oregon Health Policy Board):

Oregon will have established a health system that creates health equity when all people can reach their full health potential and well-being and are not disadvantaged by their race, ethnicity, language, disability, gender, gender identity, sexual orientation, social class, intersections among these communities or identities, or other socially determined circumstances.

Achieving health equity requires the ongoing collaboration of all regions and sectors of the state, including Tribal governments to address:

- The equitable distribution or redistribution of resources and power, and
- Recognizing, reconciling and rectifying historical and contemporary injustices.

Key contact information

OHA Director

Sejal Hathi, MD, MBA

Oregon Health Authority

Equity leaders

Persons with "diversity," "inclusion," "access," "equal opportunity," "multicultural" or "equity" in their job title.

In June 2024, the Office of Human Resources completed a manual search in Workday, the statewide HR Information System, to locate positions with working titles that include the following keywords: "diversity", "inclusion", "access", "equal opportunity", "multicultural" and "equity". [4] As a result of this search, 17 positions were identified and are compiled in a matrix (Appendix D-1).

To meaningfully address the goals of this report, OHA has included additional information in the matrix:

- Eight positions in the matrix have working titles that do not include any of the keywords; however, these positions are designed to advance health equity within OHA and across the state. Their equity focus is comparable to the 17

[4] Workday Oregon: https://www.oregon.gov/das/hr/pages/workday.aspx

positions that were located in the search that have working titles with these keywords.

The search did not locate several key positions that advance diversity, equity, and inclusion. Examples include but are not limited to: Tribal Affairs Director; Health Equity Coordinator and Health Equity Planner in the Public Health Division; several positions in the Community Partner and Outreach Program (CPOP) and Ombuds programs in the External Relations Division; Project Managers and Change Management Specialists who make up the Strategic Action Team (SAT) in the OHA Director's Office and various equity, community engagement and training positions in the COVID Response and Recovery Unit (CRRU), many of which were reorganized into the Public Health Division. Very few OHA employee records in Workday reflect a Business Title different from or more specific than their Job Profile. As a result, except for those employees whose Job Profile reflects their Business Line that includes these keywords, it is very difficult to identify employees who may participate in work related to the keywords.

Finally, while not listed, there are numerous skilled and passionate people who hold unique lived, learned and professional experience throughout the agency who do not have these keywords listed in their working titles or classifications. However, they are key champions in advancing health equity. Some of these roles include but are no means limited to the Agency Director, division directors, Equity Advancement Leadership Team (EALT) members, employee resource group members and other staff throughout OHA.

OHA organizational chart

Organizational Chart

Affirmative Action policies

Policy statement

The Equity and Inclusion (E&I) Division, the Office of Human Resources (HR) and OHA managers are responsible for ensuring the following policy is appropriately posted in each OHA office's employee area. The policy statement (Appendix D-2, OHA Director's Affirmative Action/EEO Memo) is also posted on the Equity and Inclusion Division's website. The Equity and Inclusion Division monitors, reports and investigates charges of discrimination in violation of DAS Policy 50.010.01, Discrimination and Harassment Free Workplace policy, and reports trends to the OHA Executive Leadership Team as necessary. As part of OHA's strategic plan, E&I is developing a regular cadence of reporting to OHA Executive Leadership Team.

The AA/EEO memo, as well as state and federal employment law documents (Appendices B and C) are readily available on OHA's internal website (OWL) and external website. Additionally, OHA provides and makes available posters and other printed matter featuring this information throughout its workspaces, including locations where the public can easily access them. OHA creates the electronic and printed matter integrating meaningful accessibility to ensure people with disabilities and people with limited English proficiency (LEP) can request the information in a format or language of their choice at no cost to them.

Roles for implementation of the Affirmative Action Plan

Roles and responsibilities

Agency Director

- Ensure and articulate a positive climate throughout the agency concerning the goals of the Affirmative Action Plan, and other equity and inclusion initiatives and programs.

- Ensure division directors understand their work performance is evaluated based on their Affirmative Action efforts and results, in conjunction with other managerial responsibilities.
- Meet at least annually or as needed with the OHA Equity and Inclusion Division, Office of Human Resources and division and program directors to review Affirmative Action progress and challenges.
- Ensure the appropriate review and follow-up on findings are done including the following:
- The agency director or deputy director(s) review all investigation reports completed under the OHA Discrimination and Harassment Complaint procedure.
- Appropriate staff coordinate with staff conducting investigations about the findings.
- The agency director or designee responds to requests for reconsideration.
- Ensure division and program administrators do the following:
- Receive training in Affirmative Action concepts.
- Review management implementation of Affirmative Action strategies in performance appraisals including quarterly Performance and Accountability Feedback (PAF) processes
- Provide reports to the Legislature and public regarding progress on Affirmative Action Plan strategies' progress upon request in alignment with public records requirements
- Evaluate members of the management team for their effectiveness in creating the workplace conditions and results expected by the agency's affirmative action efforts.

Executive leadership

- Leads the agency in setting the direction and expectations around implementing the Strategic Plan, DEI Action Plan and Affirmative Action Plan.

- Receives ongoing professional development related to health equity, equity and inclusion, anti-racism and other topics relevant to advancing the Strategic Plan, DEI Action Plan and Affirmative Action Plan.
- Ensures division-level leadership and management teams:
    - Receive ongoing professional development related to health equity, equity and inclusion, anti-racism and other topics relevant to advancing the Strategic Plan, DEI Action Plan and Affirmative Action Plan.
    - Review management implementation of equity advancement strategies in performance appraisals, and
    - Evaluate management team members for their effectiveness in creating the workplace conditions and results expected by the agency's affirmative action policy.

Management

- Promote and foster a positive nondiscriminatory climate and a work environment in which all employees are valued and respected in accordance with state policy, agency values and state and federal statutory and regulatory requirements.
- Ensure all new and current employees are aware of the agency's strategic plan goal, health equity definition and core values, and understand OHA's priority initiatives for advancing workforce equity and inclusion.
- Periodically review training programs, hiring and promotion patterns and practices to remove barriers to achieving the agency's goals.
- Conduct periodic reviews by staff authorized to act to ensure the following:
    - EEO, Americans with Disabilities Act (ADA) and Discrimination and Harassment Policy information is properly displayed.
    - All facilities for the use and benefit of employees and members of the public are accessible both in policy and meaningful use.
    - That all employees, including People of Color, tribal members and other indigenous people, persons with disabilities, people of all genders and gender-identity, people of all ages, and all other protected class identities and categories have meaningful opportunities and

encouragement to participate in education, training, recreational and social activities that the agency provides, sponsors and contracts with other entities to provide or sponsor.

- Employees learn about the need for ADA compliance, alternate format and language access, and how to appropriately process and facilitate requests (Appendix A-5).
- Identify and seek solutions for problem areas in equity and inclusion practices and procedures.

Equity and Inclusion (E&I) Division

- Develop and communicate agency policies and procedures related to AA/EEO and prepare and disseminate Affirmative Action information.
- Coordinate activities in concert with the Affirmative Action Plan and monitor progress toward agency identified goals and strategies.
- Identify solutions to barriers preventing achievement of OHA Affirmative Action goals.
- Ensure recruitments support Affirmative Action goals.
- Ensure the agency is complying with Affirmative Action/EEO and other relevant laws and policies through collaboration with OHA Workday data professional.
- Receive and investigate discrimination, harassment, and retaliation complaints that allege potential violations of the DAS Discrimination and Harassment-Free Workplace policy.
- Attend equity and inclusion, anti-racism, ADA and other related training regarding current Affirmative Action guidelines and issues update. Develop knowledge and skills for advancing workforce equity and inclusion.

Other staff

- Perform their work in alignment with Affirmative Action/EEO requirements.
- Perform their work centering equity in alignment with OHA’s strategic goal

2021-2024 progress report

The following is a summary of OHA's progress on goals and strategies presented in the 2021-2023 Affirmative Action Plan (also known as the "Equity Advancement Plan[6]).

These goals were also addressed in the agency's 2023-2025 Diversity, Equity, and Inclusion (DEI) plan submitted to the Governor's office in June 2023. In reporting on these goals within the Affirmative Action Plan, we focus more specifically on workforce.

Goal 1. Continue Strategic Planning Efforts

Strategic plan

To fulfil the agency's vision of a healthy Oregon, OHA began efforts in 2019 to develop a strategic plan, starting with holding engagement sessions with communities across the state that have not been reached in the past. The OHA Equity and Inclusion Division and Community Partner and Outreach Program organized engagement sessions where facilitators asked a set of key questions regarding supports and barriers to achieving better health. Responses to the questions were compiled into a report to inform the plan's goals, strategies and initiatives. In late 2019 and early 2020, OHA leaders prioritized top themes from the report, which resulted in identifying the plan's overarching goal: Eliminate health inequities in Oregon by 2030.

In early 2020, OHA shifted its strategic planning efforts to respond to the COVID-19 pandemic. The work completed during Phase One provided a foundation for Oregon's pandemic response, having established robust community partnerships that addressed health inequities during an unprecedented public health emergency. This phase also resulted in community collaboration for other initiatives such as the Operation Warp Speed COVID-19 vaccine rollout, wildfire response and implementation of Measure 110.

---

[6] OHA 2021-2023 Affirmative Action Plan: https://www.oregon.gov/oha/EI/Reports/OHA%202021_2023%20Equity%20Advancement%20Plan.pdf

In 2023, strategic planning efforts resumed focused on expanding anti-racism education and practices across the agency. On January 11, 2023, Governor Tina Kotek created a list of agency expectations. One of the components in the expectations list is a documented strategic plan. The completion timeline for the strategic plan was June 1, 2024.

On June 1, 2023, the Governor released templates for agencies to provide a uniformed approach of strategic plan documentation.

Our approach to building a strategic plan included:

1. Center equity in our process and objectives.
2. Build upon what has already been established. In particular:
    a. Our Health Equity Definition
    b. Our 2030 Strategic Goal
    c. Our existing mission, vision, and values
    d. The Community Engagement OHA completed in 2019
3. Identify the major workstreams to completing the strategic plan and ensure there is adequate sponsorship for each
4. In building each phase, the approach being taken is captured on the last page of the document. Processes may vary but generally include:
    a. Review of existing work and feedback previously provided
    b. Review of any specific requirements
    c. Draft of approach/material by Subject Matter Expert (SME)
    d. Review by primary sponsor
    e. Review by other involved sponsors
    f. Review by leadership team and/or other involved contributors
    g. Edits applied if not already completed

h. Review and evolve based upon feedback from contractors once they are available

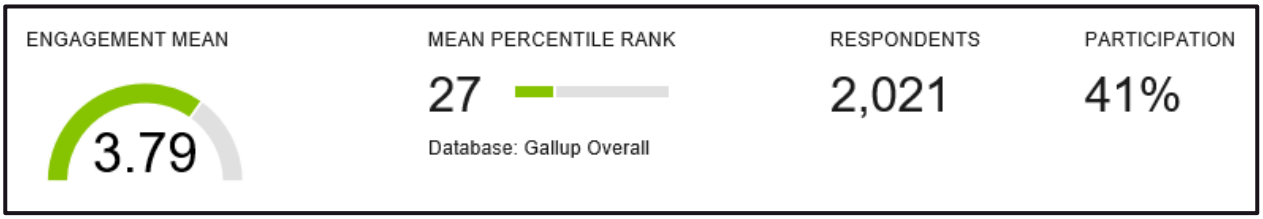
i. (revisit earlier stages if needed)

j. Final review and approval

k. Shared and communicated

On May 31, 2024, OHA submitted the agency's Strategic Plan to the Governor's Office. This strategic plan identifies five goals that serve as pillars of progress toward OHA's 2030 vision and overall strategic goal to eliminate health inequities in Oregon by 2030.

Several goals in the Strategic Plan address Affirmative Action and the workforce at OHA. These are discussed in another section of this report.



Performance system

The OHA Performance Management System is made up of measures and metrics that track the organization's fundamental work related to our Mission, Vision, Values, and Strategic Goal. The Oregon Health Authority (OHA) has created a system to improve how it operates and stay focused on its goals of improving health and healthcare for people in Oregon. This system helps make sure that OHA and its divisions are doing valuable work by being clear, open, and responsible in what they do. Performance outcomes are outlined in Appendix D-5. There are three measures in the performance system that pertain directly to the OHA workforce:

- Increase OHA workforce engagement (Outcome 1AOM1)
- Improve OHA workforce equity and inclusion (Outcome 1AOM5), and
- Develop and support the OHA workforce (Process 1ASP3).

OHA has made progress towards 1AOM1 with the agency-wide engagement survey in 2023.

Figure 1.

In response to survey results, action plans are being developed by managers to improve engagement. The next engagement survey will be available to employees at the end of October 2024.

Goal 2. Develop and Implement an Equity Action Plan

As the COVID-19 pandemic continued to unfold, OHA's primary focus was to lead and implement a statewide response. In early 2020, OHA shifted its efforts to respond to the COVID-19 pandemic. To this end, all available agency resources were diverted and thus we did not have the opportunity to develop an Equity Action Plan.

In April 2021, The Equity Advancement Leadership Team (EALT) shared a list of recommendations for themes to include in the Equity Action Plan. Several of those themes were related to workforce and the scope of the Affirmative Action Plan. While a formalized plan was not created, much of the work of these recommendations continued to occur throughout the agency in the previous biennium or was addressed when strategic planning began. Further, in 2023, our agency provided a Diversity, Equity, and Inclusion (DEI) plan to the Governor's office that articulated our agency's goals to advance DEI.

Goal 3. Integrate equity, inclusion, anti-racism and accessibility into existing systems and processes

Using the training system to support and develop cultural responsiveness and cultural humility among all employees

As part of the strategic plan development process, OHA held a series of anti-racism trainings in 2019, with more than 100 executive leaders and managers. OHA also held related trainings with a steering committee responsible for coordinating community engagement during the design of the strategic plan. In late 2020 and early 2021,

contractors who provided the trainings partnered with the OHA Executive Leadership Team to plan expanded trainings that reach more staff throughout the agency.

As articulated previously, a robust and statewide response to the COVID-19 pandemic paused much of this work. As strategic planning resumed in 2024, the need for anti-racism and equity focused trainings agency wide was revisited. As a result, foundational anti-racism trainings were listed as a goal within the strategic plan.

Concurrently, the OHA Equity and Inclusion Division continued to develop a training plan with different topic areas such as foundational equity principles and practices, microaggressions, and various other subjects. These will be offered to any requestor within the agency. The training plan is now in the final stages of development and a larger conversation with leadership is underway about the need for agency wide expectations of trainings.

Equitable hiring strategies

To achieve the agency's goal of eliminating health inequities by 2030, a strategic approach is needed to recruit, retain and advance a qualified workforce that is culturally responsive and reflects Oregon's population demographics. This effort requires change in organizational culture, policies and procedures. The agency must also facilitate professional development opportunities to managers and champions in the agency to mitigate bias and model inclusive practices in hiring, onboarding, employee development and succession planning.

The Equity and Inclusion Division (E&I) completed the Equitable Hiring Strategies Toolkit (EHT) for Managers and Interview Panelists in the fall of 2021. The EHT was also made available on the E&I OWL page to be accessed as an interactive site with additional tools and resources. The toolkit was presented to the OHA Leadership Team, on the OHA All Managers' call, at the October 2021 Performance system QPR, to divisional management teams, featured in staff newsletters, and some divisions participated in training and mentorship from E&I to implement strategies from the toolkit.

During the spring of 2021, the Equity Advancement Leadership Team (EALT) partnered with the Executive Leadership Team and Workforce Equity and Inclusion Outcome Measure (1AOM5) workgroup data stewards to compile concerns and recommendations to address the disproportionate number of involuntary separations

for Black, African and African American employees and to improve retention and promotion of staff of color. A summary of these discussions was compiled and provided to OHA Leadership in May of 2021.

Pat Allen, the then-OHA director released a memo to the EALT in January of announcing the co-sponsoring between HR and E&I directors of a new workgroup to facilitate and implement a list of actions based on EALT recommendations. Continued roll out of the EHT was included among the list of actions. In August of 2022, EALT released a memo, Equity Advancement Leadership Team Priority, outlining priority proposals and action steps for each initiative. Proposal two on this memo lists "Implementing the Equitable Hiring Toolkit as a mandatory process for all hiring managers in OHA." As a result, a project team to implement the toolkit was assembled later in 2022 with project management support from the newly formed Strategic Action Team (SAT) in the OHA Director's office.

The Equitable Hiring Toolkit Project was dissolved in February of 2023 with the conclusion that implementation of the EHT was not possible in the current OHA environment. Resourcing for this project was a significant limitation including limited staff capacity from HR and E&I, the two teams most needed for implementation. Ultimately it was concluded the EHT is a compilation of recommended resources and best practices for creating a more equitable hiring process and not a prescriptive "how-to" document that can be consistently applied across the agency.

Additionally, the availability of equity training as well as experience levels differ among managers in addition to varying recruitment practices established within divisions. The wide variety in current practices and levels of understanding of equity principles made it difficult to define what it would actually mean to implement the EHT. Due to the broad and unspecified nature of the EHT—an intentional aspect-- and the lack of an agency policy to provide enforcement and structure to agency divisions, it was determined that a policy is the actual need at this time. As a result, a new project team was assembled in November 2023, to refocus on an Equitable Hiring Policy for OHA.

This Equitable Hiring Policy discovery phase was the first step in what will become the overall Equitable Hiring Policy project. Leadership sponsorship was assembled to include Dave Baden representing executive leadership, former director Leann Johnson representing E&I, and Jen Midkiff representing HR. After assembling the discovery project team, the purpose of this work was defined as "Complete discovery of what is

needed to launch an equitable hiring policy project. Discovery includes assessing agency readiness for an Equitable Hiring Project. Assessing readiness means understanding the current and historical context relevant to the project to identify risks, barriers, subject areas requiring investigation, and develop initial recommendations. Completion of this phase may indicate that the agency is not ready to launch a project, or that key barriers and challenges must be addressed before initiation for a project to be successful." The discovery process included interviews with all divisions of OHA to determine historical context, barriers, strengths, and ways to move forward with an Equitable Hiring Policy.

Since beginning the discovery process, the development and implementation of an equitable hiring policy has been added as part of OHA's strategic plan. As a result, "not ready" when assessing readiness is not an option for OHA and this discovery report will instead focus on what is needed for a policy project to be successful.

As of publication of this report, the Equitable Hiring Policy discovery phase has concluded. A project plan is currently being formulated alongside a project team and resourcing for the work of creating a policy.

Maintaining and the expanding the OHA Employee Resource Group Program

OHA is committed to eliminating health equities by supporting the development and growth of employee resource groups (ERGs). ERGs are voluntary, employee-driven groups that engage in community building, mentorship and learning opportunities for agency staff and serve as an open communication channel among staff and executive leadership. During the biennium, the number of OHA-recognized ERGs expanded from seven to nine. At the time of this report's publication, OHA's current ERGs included:

- Black, African, and African American (BAAA)
- Disco (Disability Community ERG)
- El grupo (Spanish-language ERG)
- Healthy Families
- Queer Collective
- Black, Indigenous, and People of Color (POC)

- Positive Employment Opportunities 4 Persons of Lived Experience (PEOPLE)
- Workplace Individuals with Strong Experience (WISE)
- Upstanders (Oregon State Hospital)

The OHA ERG Program continued to expand in part because of ongoing outreach and communications activities throughout the agency. In late 2019, the Equity and Inclusion Division partnered with ERGs to host open house events at the Oregon State Hospital. Additionally, the program continued to disseminate ERG information in internal newsletters, town hall events, management meetings, new employee orientation and the agency's internal website (OWL). However, starting in March 2020, the COVID-19 pandemic posed challenges to ERG recruitment and engagement efforts when many employees throughout the agency shifted to working remotely.

In July 2020, advocacy by OHA ERG members led to the OHA Executive Leadership Team approving a revision to the agency's ERG Policy (Appendix D-11). This revision increased the amount of work time (non-overtime) available for ERG leaders to conduct ERG activities to a maximum of 16 hours per month for full-time employees.

Mentorship opportunities

In June 2019, the Office of Human Resources completed a workforce training resource and needs assessment. The assessment identified mentoring as one of several top needs. In 2020, the Equity Advancement Leadership Team (EALT) charter was updated to include recommendations for a mentorship program. In 2023, the Equitable Retention and Recruitment Workgroup (ERRW) identified mentorship as an important tool for retention within OHA.

In April 2024, a pilot mentorship program was launched inviting participants from ERGs. The pilot received 92 applications (47 mentee; 45 mentor). Fifty-four participants moved forward in pairs to the formal mentorship period of six months which is currently underway. Project leadership will collect feedback about the process and progress from participants and report out to leadership.

As part of the strategic plan, the Mentorship program will be launched formally this next biennium.

Workforce demographic data and analysis

OHA is committed to eliminating health inequity in Oregon. This requires the agency to recruit, retain and advance a qualified, culturally responsive and inclusive workforce that reflects, at minimum, Oregon's population demographics. The information presented in this report shows that OHA has a lot of work to do to dismantle institutionalized racism and change organizational culture, policies and priorities, in order to improve outcomes. The OHA Strategic Plan, DEI plan, performance system, and Affirmative Action Plan serve as OHA's roadmap for improving workforce equity and inclusion processes and outcomes.

This section summarizes workforce demographic data for multiple reporting years, as requested by the Department of Administrative Services (DAS). Detailed and supplemental data tables are provided in Appendix D-12.

The tables in this section include information about changes from 2020 and 2024; 2020 was the last time OHA reported on demographic data in the Equity Advancement Plan.

Finally, to help contextualize the information there is information on American Community Survey (ACS) population estimates when applicable. Note, that while parity analyses are not required by DAS for this reporting section, it is provided when available. OHA defines workforce diversity parity[7] as achieving comparable representation of Tribal communities, communities of color, people with disabilities and females in every job category in the agency's workforce in the same proportion as they are represented in the potential labor market. At the time of this report's publication, OHA has chosen to estimate parity in labor force diversity by comparing its workforce to population demographics in and near counties where OHA employees work

[7] Parity in workforce diversity is reached if the OHA workforce in each category reflects a comparison category in the state's population (the comparator population), within a specified range. For each race and ethnicity, gender (binary), and disability category, a parity ratio is calculated as a ratio of the observed proportion over the proportion from the comparator population, multiplied by 100. For example, if there are X% American Indian & Alaska Native persons in the OHA workforce and there are Y% American Indian & Alaska Native persons in the comparison category in the potential labor market, then the parity ratio is (x/y) multiplied by 100.

[Multnomah, Clackamas, Washington, Marion, Lane, Linn, Benton, Yamhill, Polk, Umatilla, Wasco and Union counties (Oregon) and Clark County (Washington)].

Figure 2. OHA Workforce by race/ethnicity in 2023 and 2024 (#, %)

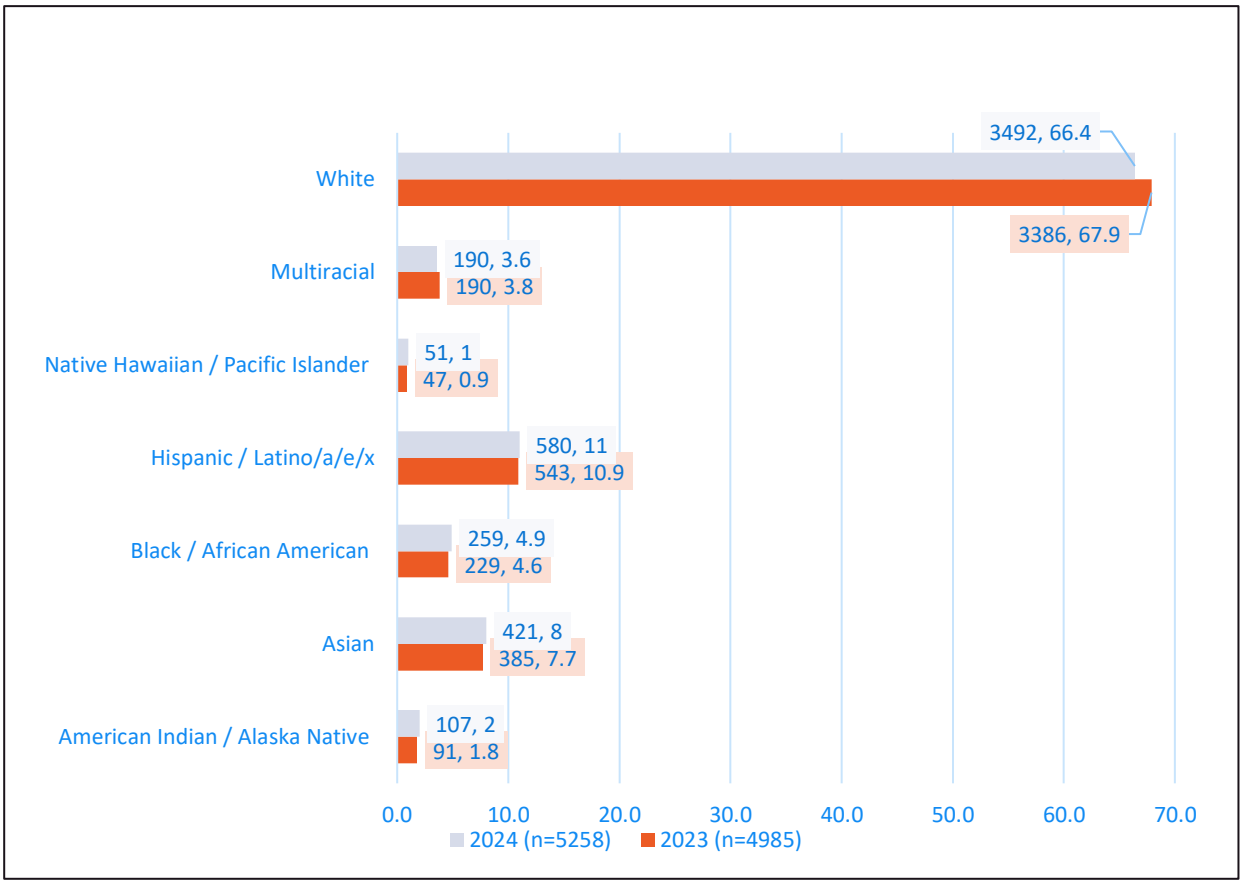


Table 1. OHA workforce by race/ethnicity (as of June 30 in these years: 2020, 2023, 2024)

	2020 (n=4332)		2023 (n=4985)		2024 (n=5258)		Change (2024-2020)	
Race/Ethnicity	No.	%	No.	%	No.	%	No.	% Points
American Indian & Alaska Native	67	1.5	91	1.8	107	2	40	0.5
Asian	304	7	385	7.7	421	8	117	1

	2020 (n=4332)		2023 (n=4985)		2024 (n=5258)		Change (2024-2020)	
Race/Ethnicity	No.	%	No.	%	No.	%	No.	% Points
Black & African American	152	3.5	229	4.6	259	4.9	107	1.4
Hispanic or Latino/a/e/x	347	8	543	10.9	580	11	233	3
Native Hawaiian & Pacific Islander	27	0.6	47	0.9	51	1	24	0.4
Multiracial	183	4.2	190	3.8	190	3.6	7	-0.6
White	3218	74.3	3386	67.9	3492	66.4	274	-7.9

Race/Ethnicity

Figure 2 is a summary of changes in counts and percentages by race/ethnicity (and Table D-12.1 in Appendix D-12 provides details). The percentage changes from 2023 to 2024 by race/ethnicity in OHA is fairly minimal; within a percentage point most groups (the multiracial group the percentage change is -1.5%). However, improvements in diversity by race/ethnicity in the workforce compared to 2020 are evident. The largest increase in workforce diversity was see among Asian, Black/African American and Latino/a/e/x groups seeing the most gains (1, 1.4 and 3 percentage points increases from 2020). In terms of parity, most groups are at parity except for American Indian and Alaska Native employees (Figure 3).

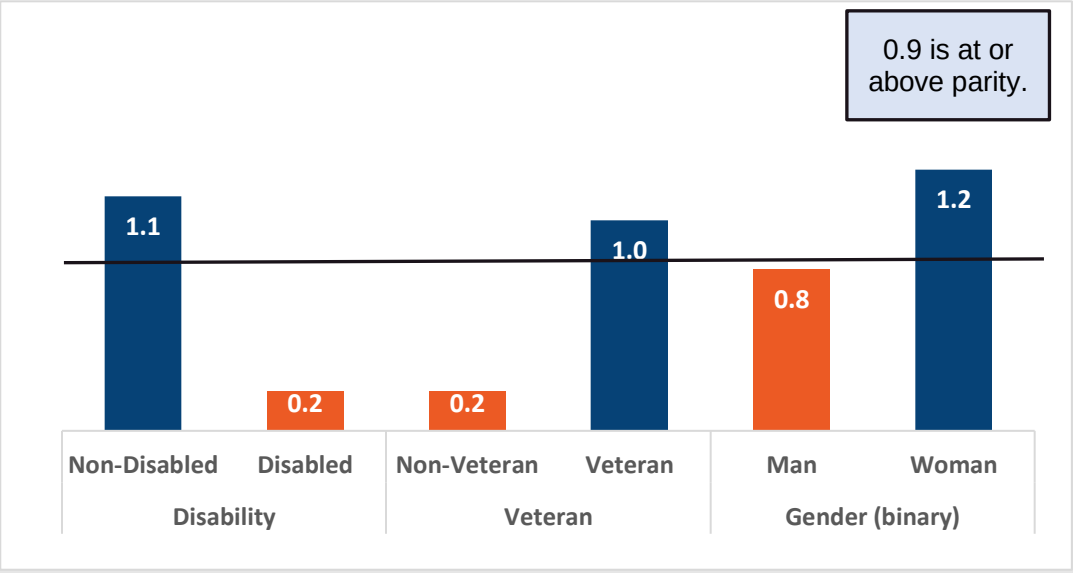

Figure 3. Comparison of OHA workforce to potential labor market by Race/Ethnicity

Disability

The percentage of employees with disabilities is 2% of the workforce and that has remained the same in the last two years. This is a decrease from June 30, 2020, when there were 124 employees identifying as disabled (2.9%). It is possible this will increase once REALD & SOGI data from the employee survey is used for reports such as this. Compared to the population estimates (11.4% disabled), OHA has much to do to increase hiring, retention and representation of people with disabilities in the workforce. This is also shown in Figure 4 where people with disabilities are underrepresented in the agency (Parity Ratio = 0.2).

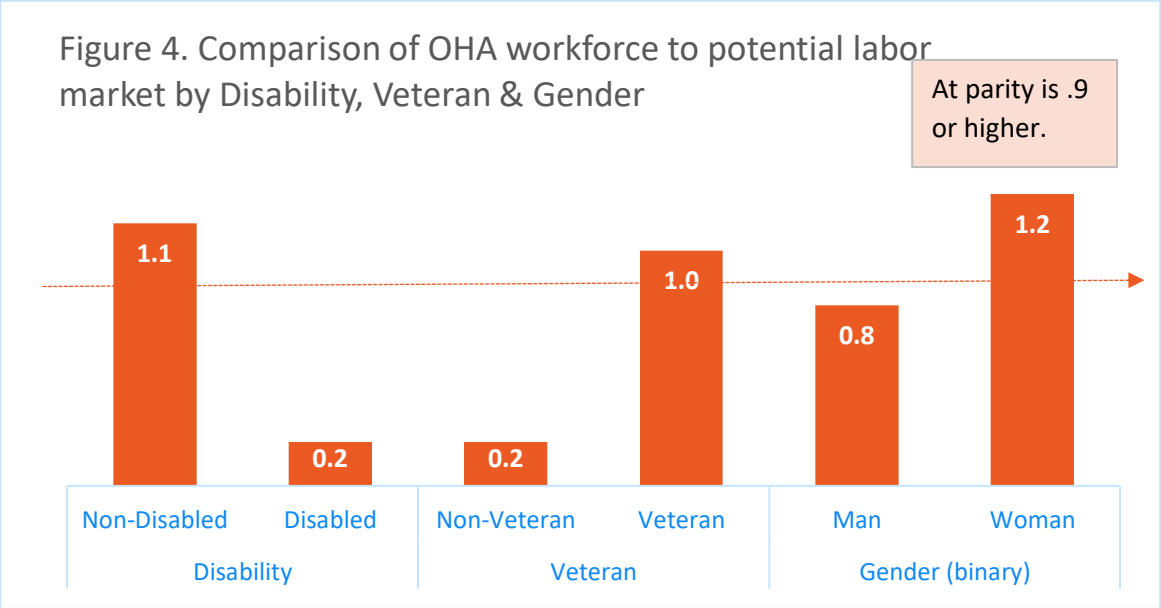
Figure 4. Comparison of OHA workforce to potential labor market by Disability, Veteran, and Gender

Veteran Status

The percentage of veterans in 2024 is slightly less than in 2023 (-1.3 percentage points less). Veterans are not underrepresented in the agency; the percentages of veterans in OHA workforce are identical to the ACS estimates at 4.6% (Table D-12.1 in Appendix D-12).

Gender Identity

The percentage of women, men and non-binary employees in OHA has remained the same in the last two years (38%, 61% and 1% respectively). Women are not underrepresented in the agency.

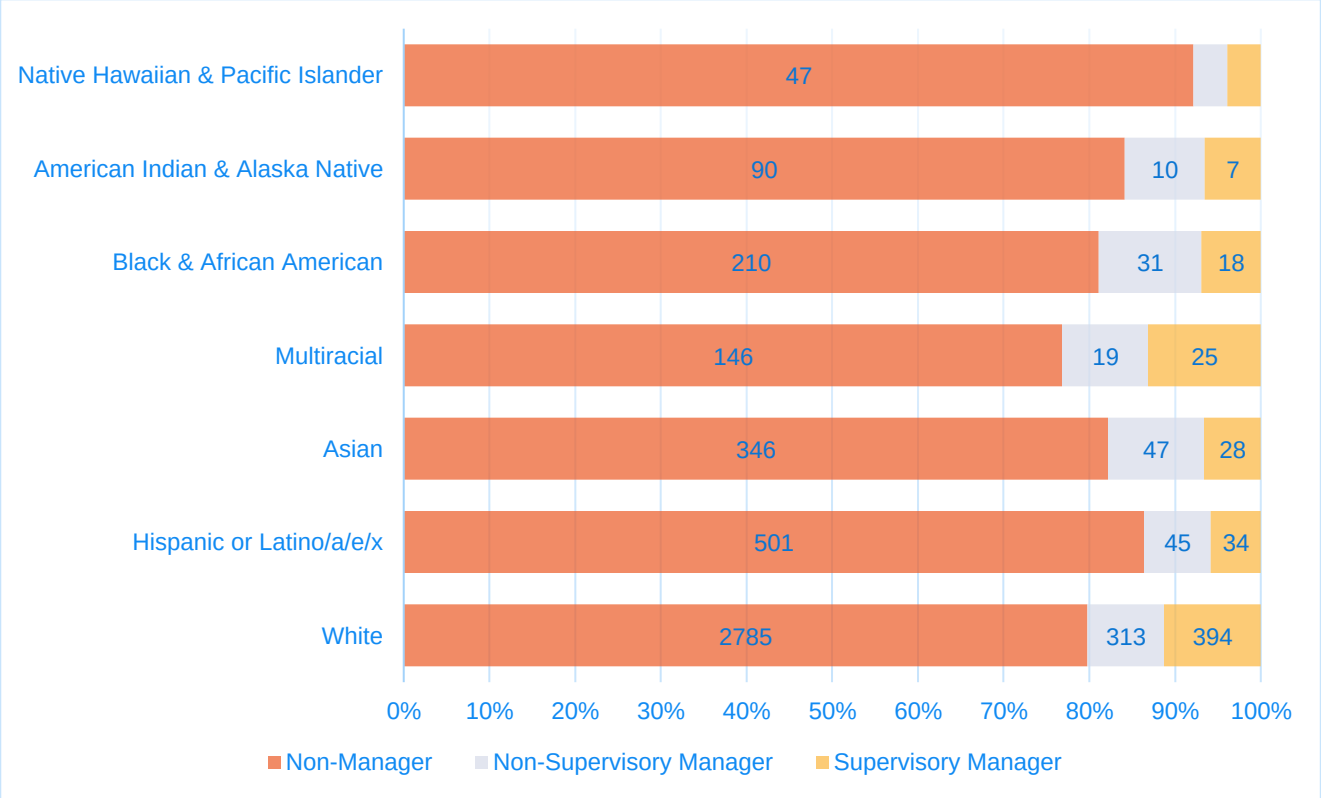


EEO Classification Group

The percentage of employees by EEO Classification Group (Table D-12.1 in Appendix D-12).in OHA has remained the same in the last two years except for the Professionals and the Service classifications.

Generation (age)

There was an 1% increase over the last year in younger hires (age 27 or less). There is nearly an even distribution of employees aged 28-43 (41%) and those age 44-59

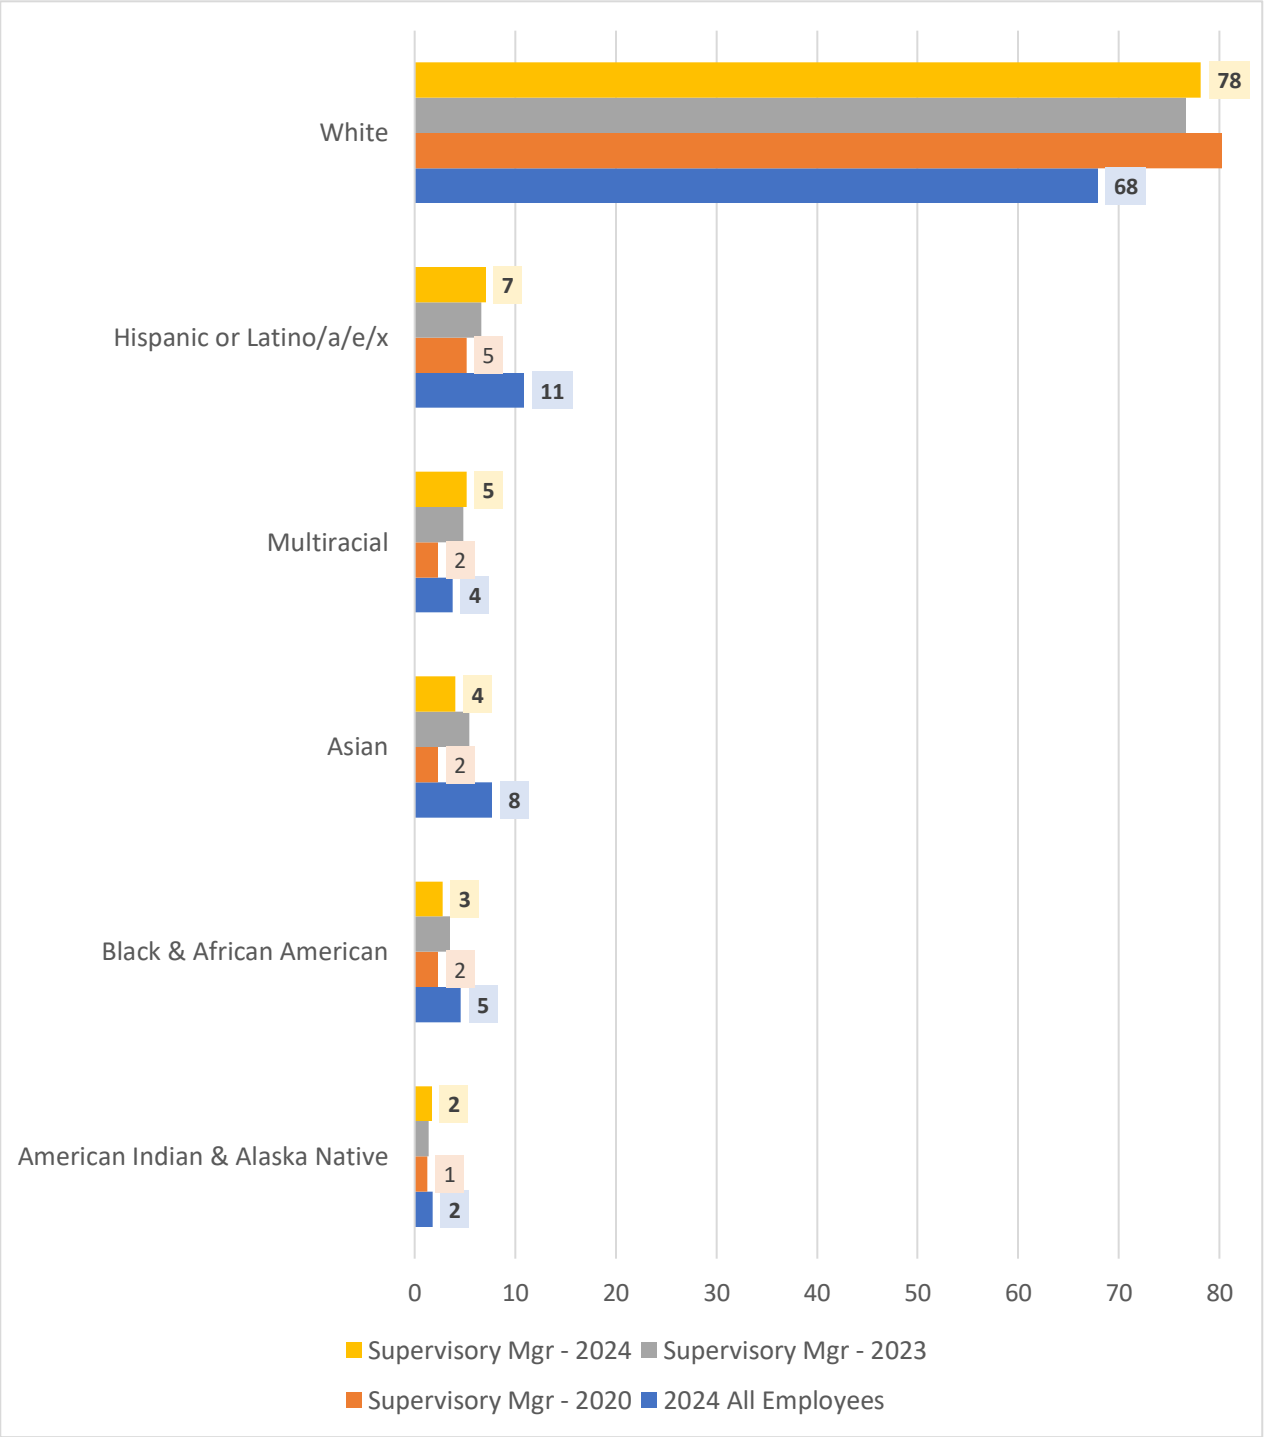


(40%). The percentage of older employees age 60+ decreased by 2% from 2023, and 9% from 2020 to 2024 (Table D-12.1 in Appendix D-12).

Supervisors

When reviewing supervisory data, it is helpful to consider the non-supervisory manager positions as a potential pipeline for internal employees to promote to supervisory manager positions in the future. For this reason, this report includes three categories of supervisory status (Figure 5 and Table D-12.1 in Appendix D-12). Eighty one percent (81%) of the workforce are not managers or supervisors. This has not changed in the last two years, but there is a sizeable decrease from 2020 (85%). The percentage of non-supervisory managers also has not changed much over the last two years but has increased from 6.3% in 2020 to 9.2% in 2024. The percentage of supervisory managers has remained nearly the same since 2020 (9% in 2020 to 9.8% in 2024).

Figure 5. Supervisory Status by Race/Ethnicity in 2024.

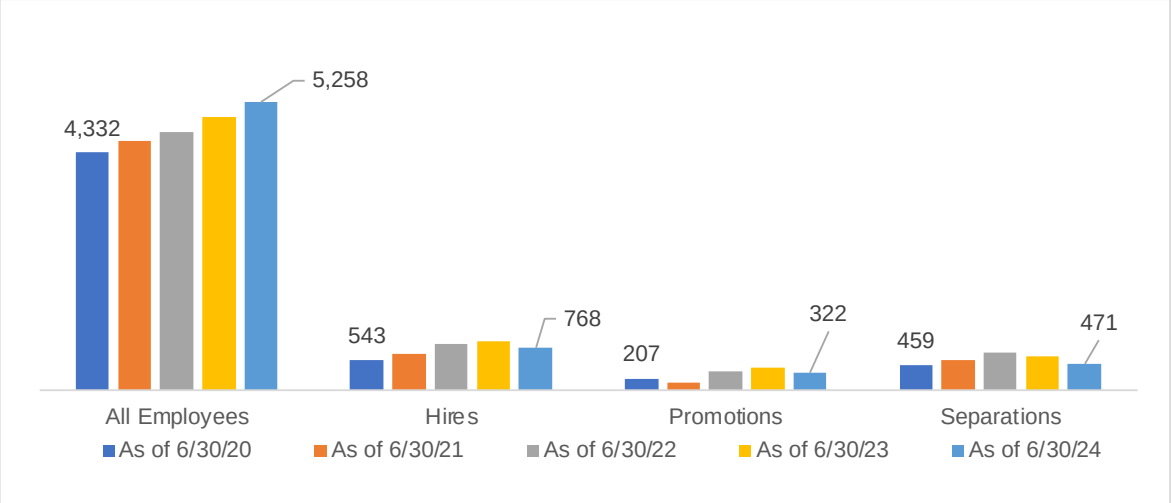


Compared to 2020 (Figure 5), the proportions of OHA supervisory managers by race/ethnicity have increased by

- 2% for Asian and Latino/a/e/x employees,
- 3% for Multiracial employees,
- 1% for Black and African American and American Indian & Alaska Native employees.

There haven't been any supervisors in OHA identifying as Native Hawaiian & P Islander in 2020, 2023 or 2024.

Figure 6. Proportion of OHA Supervisory Managers by Race/Ethnicity compared to Entire Workforce in 2024.



Employees in each job classification

Since the date of the last publication of OHA's Equity Advancement Plan in 2020, the Agency has seen quite a bit of variation in hires, promotions and separations largely driven by the pandemic response, and expansion in some areas (Figure 2).

Movement over time: Hires, promotions, and separations

Figure 7.OHA Workforce Trends Overall.

Promotions

OHA's Workforce Demographics by Supervisory Status for 2023 and 2024 are detailed on Table D-12.5 1 in Appendix D-12. This is a summary of changes over time from 2020 to 2024 by managerial status and selected demographic data. There has been marked improvement in promotion to supervisory managerial status from 2020 to 2024 among Asian and Multiracial. A smaller improvement is observed for Black/African Americans and Latino/a/e/x employees.

Supervisor promotion, movement

Non-supervisor, movement

Of the 322 promotions that occurred in 2024 Table D-12.32.

- 109 were Black, Indigenous and People of Color (34%)

    - Promotions increased by 9.3% percentage points since 2020.
    - The greatest gains were among Asian and Latino/a/e/x employees with an increase of 5 and 3 percentage points respectively since 2020 (21 positions in both groups).
- 7 promotions were People with Disabilities (2%; a gain of one promotion since 2020).
- 15 were Veterans (5%)
- 119 were women (62%)
- 196 were younger (born after 1980; 61%)
- 39 were hired into the Professional classification group (52%).
- 54 promoted in non-managerial positions (72%)
- Oregon State Hospital hired most positions. (43%)

Separations

For the period of 6/30/2020 to 6/30/2024, OHA is voluntarily reporting the following data regarding separations. Although not required by DAS, it is an important metric to understand our progress in creating an equitable and inclusive workplace that retains a diverse workforce.

The number and percentage of all separations have fluctuated each year since 2020 (Table D12.9 in Appendix D-12). The percentage of all separations was rather high in 2023 at 20.4% (622 total separations) compared to 2024 at 16.6% (471 total separations).

Figure 8 provides a visual of the trends between voluntary[8] and involuntary[9] separations since 2020. There was a peak in voluntary separations during FY 2022 and a peak in involuntary separations during FY 2023 .

[8] For purposes of this report, voluntary separation is defined as resignation, voluntary transfer, voluntary end of a limited duration position and retirement. Excludes deaths and unknown separations.
[9] For purposes of this report, involuntary separation is defined as dismissal, dismissal during trial service, or layoff. Excludes deaths and unknown separations.

Figure 8. Trends in Separations over Time

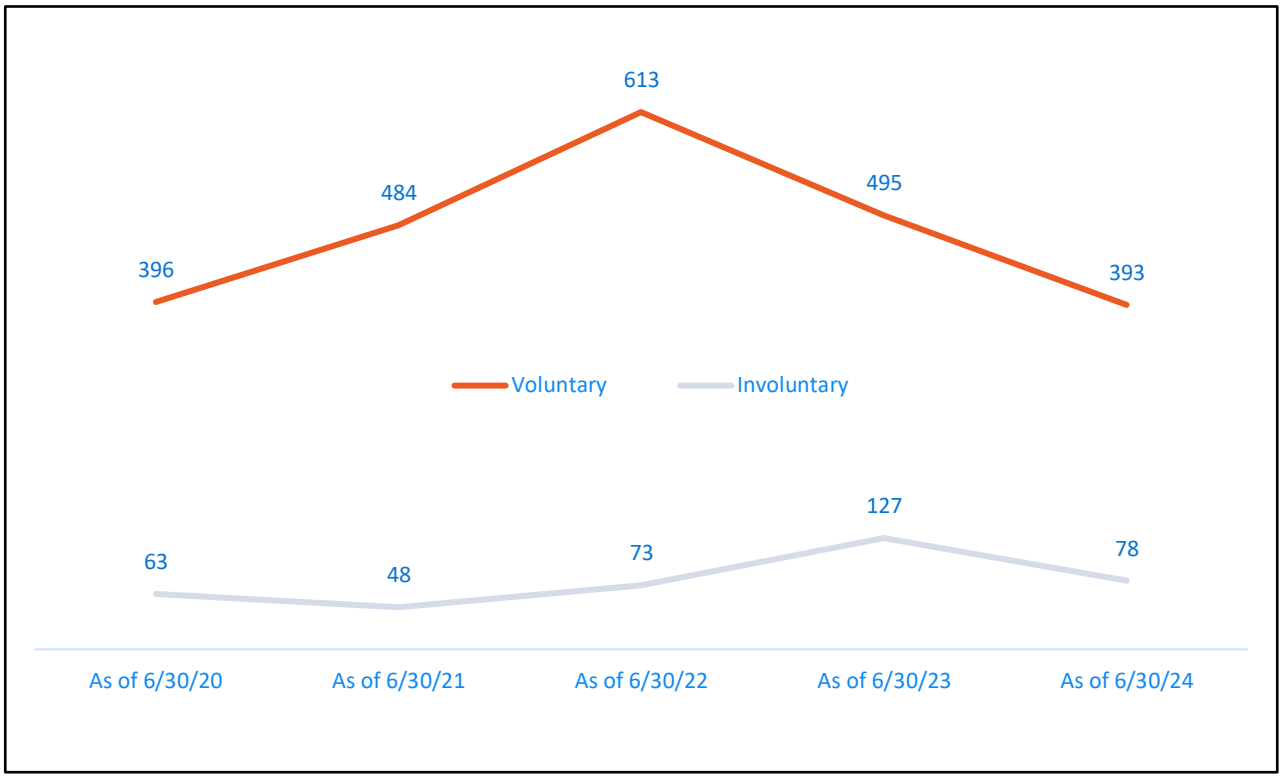


Table 2. Separation Types by Fiscal Year

	Voluntary Separations		Involuntary Separations		Total Separations	Of all Employees	
Fiscal Year	No.	%	No.	%	No.	No.	%
2020	396	86.3	63	13.7	459	4,332	10.6
2021	484	91.0	48	9.0	532	4,559	11.7
2022	613	89.4	73	10.6	686	4,716	14.5
2023	495	79.6	127	20.4	622	4,986	12.5
2024	393	83.4	78	16.6	471	5,259	9.0

Separations by Race/Ethnicity: Voluntary & Involuntary separations

Appendix Table D-12.10, (Separations in 2023 and 2024 for all Groups with Workforce Comparison Percentages) provides comparisons in terms of workforce percentages to percentage of voluntary and involuntary separations. We list the groups (by race/ethnicity and gender) experiencing disproportionality by year and type of separation. Disproportionality in separations was not found for people with disabilities.

2023: **Voluntary** separations did not reveal any one group experiencing disproportionality.

2023: **Involuntary** separations:

- 7.1% of Black and African American employees separated compared to 4.6% of all Black and African American employees in the workplace)
- 23.6% of Hispanic or Latino/a/e/x employees separated (compared to 10.9% of all Hispanic or Latino/a/e/x employees in the workplace)

2024: **Voluntary** separations:

- 6.9% of Black and African American employees separated compared to 5.1% of all Black and African American employees in the workplace)

2024: **Involuntary** separations:

- 3.8% of American Indian and Alaska Native employees separated compared to 2.0% of all American Indian and Alaska Native employees in the workplace.
- 15.4% of Hispanic or Latino/a/e/x employees separated compared to 11.0% of all Hispanic or Latino/a/e/x employees in the workplace.
- 67.9% of women employees separated compared to 61.0% of all women employees in the workplace.

2025-2027 OHA Affirmative Action Goals & Strategies

The 2025-2027 Affirmative Action Plan reaffirms OHA's strategic plan goal of eliminating health inequity in Oregon by 2030. For the first time in OHA's history, the agency will dedicate resources and time to facilitate an organization-wide engagement process that results in an Equitable Hiring Policy. This policy is envisioned to align with the strategic plan and outline OHA's priority initiatives and metrics for improving workforce equity and inclusion. The strategies and actions discussed in this section are pulled directly from OHA's 2024-2027 strategic plan.

During the 2025-2027 biennium, OHA will focus on the following affirmative action goals and strategies.

Strategic Objective 1: Equitable Hiring Practices and Professional Development Pathways

Advance equitable hiring strategies and professional development pathways that assure OHA staff composition reflects the communities we serve and that enhance their competencies and career trajectories.

Action 1

Implement the OHA Equitable Hiring Policy and Equitable Hiring Strategies Toolkit investing in the agency structure to sustain daily practice, innovation, and accountability.

At the time of this report, OHA has undergone an extensive discovery process for an equitable hiring policy sponsored by the then-director of E&I and the Human Resources Director. The findings from the discovery support the need for an agency wide equitable hiring policy that will guide recruitment across the agency and will embed equity principles throughout the process.

The stated outcomes for this action are:

- The Equitable Hiring Policy is created and finalized by the end of calendar year 2025. Final policy, fully vetted, approved, and signed by Executive Management by 12/31/2025.
- All staff are trained on Equitable Hiring Policy. Policy training is added to all employees' required training curriculum. Also added to new employee curriculum. 85% of current employees trained by 6/30/2027.

Action 2

Collect and use OHA employee data to guide and validate workforce equity and diversity strategies and policy decisions, including REALD and SOGI data and other data that provide near-term and comprehensive insight across under-represented groups most harmed by inequities and socio-political injustices.

Action 3

Develop, expand, and promote structured professional development opportunities, including learning on the job (OJT) programs and job rotations.

The stated outcomes for this action are:

- Develop, expand, and promote structured professional development opportunities, including learning on the job (OJT) programs and job rotations. Baseline rotation, OJT, and development opportunities. Evaluate year over year growth. Target = 25% growth the first year, and 10% growth the second year.

Strategic Objective 2: Building a Culture of Belonging

Foster OHA staff well-being, belonging and wholeness so that all OHA staff feel safe and invited to bring their identities, perspectives, and experiences to work each day and have those be heard, understood, honored, and included in alignment with OHA's values, the 2030 strategic goal to eliminate health inequities, and its commitment to being an anti-racist organization.

Actions that we will use to advance Objective 2 that are relevant to the Affirmative Action Plan:

Action 1

Expand the employee mentorship program agency-wide, building upon the pilot launched in 2024.

Alignment Across Organizational Plans

Oregon Health Authority participates in multiple planning processes each biennium. These include the Affirmative Action Plan, the Diversity, Equity, and Inclusion (DEI) Plan, and the Strategic Plan. The focus of this report is affirmative action and workforce. It is important to note that there is an important and unbreakable symbiosis and overlap between the Affirmative Action Plan, DEI Plan, and the Strategic Plan. Some goals, strategies, and actions are directly tied to affirmative action goals, such as the ones articulated above and were pulled directly from the Strategic Plan.

Further, many of the goals that are found in the DEI Plan directly impact workforce such as culture, retention, and promotion. The same is true for the Strategic Plan. An example is the second goal articulated in the section above. Well-being, belonging, and wholeness impact our workforce and while one action has been included above, it is important to note that several other actions exist for that goal that are not directly tied to affirmative action and workforce though they do impact the workforce. We encourage the reader to access the agency's DEI and Strategic Plans to understand a wholistic picture of how we as an agency are working towards our 2030 goal.

Supporting Affirmative Action

Complaint Options

OHA is unique among Oregon state agencies in how it responds to complaints or reports of potential discrimination, harassment including sexual harassment, intimidation and retaliation based on or because of protected class status. That responsibility rests with experienced civil rights strategists in the Equity and Inclusion Division who investigate and respond to concerns as they arise. The strategists regularly collaborate with managers, staff and Human Resources to ensure the agency

responds in a prompt and appropriate manner. The OHA Executive Leadership Team is apprised of systemic issues, trends and opportunities for proactive measures to ensure OHA employees are valued, respected and treated equitably.

The Office of Human Resources oversees issues unrelated to protected class status. HR and Equity and Inclusion Division staff work collaboratively to address workplace issues identify training gaps. These teams also meet with and present to managers and staff to enhance their understanding of workplace expectations, cultural responsiveness, unconscious bias and other relevant topics.

The Equity and Inclusion Division's Civil Rights, Learning and Inclusion (CRLI) Section coordinates the OHA Discrimination and Harassment Complaint Procedure (Appendix D-3).

Complaint Contact information

Janice Kim

OHA, E&I Civil Rights Learning and Inclusion Section

janice.h.kim@oha.oregon.gov

503-884-5966 (voice|text) (711 TTY)

OWL (internal website): https://dhsoha.sharepoint.com/teams/Hub-OHA-EI/SitePages/Discrimination-Harassment-Free-Workplace.aspx

Complaint process

The complaint process includes:

- Anyone who suspects they have experienced or witnessed discrimination, harassment including sexual harassment, intimidation or retaliation based on or because of protected class status may contact the Equity and Inclusion Division. The Equity and Inclusion Division accepts all reports whether made verbally, in writing, on the OHA Discrimination and Harassment Complaint Form (Appendix D-4) or the State of Oregon Complaint form .
- Upon receipt of a complaint or concern, the civil rights manager will review the information and assign a civil rights strategist to the matter. The

investigator will assess the information and develop a response plan in consultation with the civil rights manager. The response plan may include a intake meeting to gather additional information to determine jurisdiction, the development and implementation of a formal or informal investigative plan, or an informal consult with the reporter or other involved parties to identify alternate resolution paths, including collaborative and restorative justice responses between staff, managers, Office of Human Resources and the Equity and Inclusion Division.

- The agency's CASPER database system captures all reports, complaints, and respective responses. Additionally, OHA retains all paper and electronic information in compliance with state government retention requirements. The CASPER system allows for data reporting (not REALD+SOGI) to assist OHA in identifying trends, hotspots and other emerging issues. The agency and the Equity and Inclusion Division continue to work with OIS systems professionals to identify and implement system enhancements to assist with more nimble data systems use.

The agency strives to respond to and resolve matters within 120 days of report. OHA continues to work toward achieving that timeline goal. Resource limitations including staffing shortages and workload issues present ongoing challenges to meeting this goal.

Succession Plan

OHA has a succession plan that was provided to the Governor's office in late 2023.

OHA contracts and grants

OHA's economic footprint is significant and disbursed throughout communities across the state because of current regulatory measures in place that direct OHA to provide funding to Tribes, counties, cities, public health entities, coordinated care organizations (CCO), educational and medical facilities, as well as community-based organizations (CBO) and for-profit businesses. Within this large range of entities, only for-profit businesses meet Business Oregon's Certification Office for Business Inclusion and Diversity (COBID) eligibility criteria , and not all eligible firms choose to apply. Additionally, OHA is only able to track use of COBID-certified firms that are prime

contractors; there is not currently functionality to capture subcontractors who may be COBID-certified. This means the agency does not currently capture the significant contributions toward supplier diversity that Tribes, counties, CCOs and others achieve. Given this context, OHA is working on multiple levels to expand the number of vendors and potential business partners, regardless of COBID eligibility, that do business with the agency; this includes vendors who originate from communities most impacted by inequities.

From July 1, 2017 to June 30, 2022, **OHA awarded $20,294,775 in contacts, price agreements, purchase orders, and grants to 7 Minority Business Enterprise or Women Business Enterprise COBID-certified firms** (Appendix D-13). Of these firms, one was a Minority Business Enterprise (MBE) with a total of $488,140 in awards. Six of these firms were Women Business Enterprise (WBE) with a total of $19,806,635 in awards.

Management

Leadership Evaluation

As of August 2019, performance management system functionality in Workday was operational at OHA, designed to complete and track all employee performance reviews. Workday has business processes established to provide a framework for performance accountability and feedback for employees and managers. There are tools and training aids to help move OHA toward a consistent evaluation process for all employees. Workday sends annual notification to each employee via the Workday inbox within 60 days of their work anniversary date, to help ensure employees receive timely reviews. Workday also provides managers with reports on where employees are in the performance evaluation process.

The previous biennium of 2021-2023 saw the Oregon Health Authority continue to meet community needs during an ongoing COVID-19 pandemic and the OHA-led Covid Response and Recovery. Further, our agency found itself in a time of transition as we served under an interim director while a national search initiated for a new permanent agency director. Dr. Sejal Hathi began her tenure as OHA’s director in January 2024.

For this leadership evaluation, we will focus on our past agency director, interim agency directors, executive leadership, and managers.

Executive Leadership

OHA's executive leadership includes the Director, Chief of Staff & External Relations Division Director, Agency Operations Director, Deputy Director for Programs and Policy, and the directors of the eight divisions.

Managers

Managers who supervise managers have been required at the enterprise level to complete mandatory training on performance feedback. OHA's performance management system includes a performance evaluation component where all employees, including those in management service, will have employee development conversations and a development plan.

OHA Discrimination and Harassment Complaint Form

Appendix D-5. OHA Performance System: measures related to workforce equity and inclusion

3Table D-5. 1 Outcome 1AOM1: Increase OHA Workforce Engagement

(Owner: Human Resources Director)

#	Outcome Measures
1AOM1a.	OHA Workforce engagement survey participation
1AOM1b.	Very strong OHA workforce satisfaction
1AOM1c.	Very strong OHA management quality
1AOM1d.	Very strong OHA teamwork

Table D-5. 2. Outcome 1AOM5: Improve OHA Workforce Equity and Inclusion

(Owner: Chief of Staff/External Relations Director)

#	Outcome Measures
1AOM5a.	Comparison of OHA workforce to potential labor market
1AOM5b.	Comparison of non-supervisory managers to potential labor market
1AOM5c.	Comparison of supervisory managers to potential labor market
1AOM5d.	Comparison of voluntary separations to all agency separations
1AOM5e.	Comparison of involuntary separations to all agency separations

Table D-5. 3. Process 1ASP3: Developing and Supporting the OHA Workforce

(Owner: Human Resources Director)

#	Outcome Measures
1ASP3.a	Diversity recruitment
1ASP3.b	New hire turnover
1ASP3.c	OHA workforce performance appraisals
1ASP3.d	OHA workforce development plans
1ASP3.e	Safety and security

Appendix D-6. OHA ADA Centralized Accommodation Budget Process

Oregon Health Authority ADA Accommodation Centralized Budget Process

Manager Responsibilities

Managers must notify the Office of Human Resources if they:

- Know, or have reason to know, that their employee is experiencing workplace problems because of a known disability, and/or
- Know, or have reason to know, that the disability prevents the employee from requesting a reasonable accommodation
- Employee has requested an accommodation
- Employee has indicated that they are experiencing difficulty performing the essential functions of their job due to a medical condition
- If an employee already has an approved accommodation in place and needs additional accommodations

Accommodation requests do not require any particular words used like, “reasonable accommodation” or “disability”

Budget

OHA has a central budget to manage and track expenses related to providing reasonable accommodations for OHA employees and applicants under the Americans with Disabilities Act (ADA).

What the budget covers

The costs to provide one-time or recurring expenses associated with providing a reasonable accommodation to employees or job applicants.

These may include: adaptive software, sign language interpretation, captioning services, modification to office equipment for a wheelchair user or other adjustments that may not be resolved through ergonomic assessment.

What the budget does not cover

- Costs for providing accommodation or modification for a member of the public, e.g. captioning at a public listening session
- Personal durable equipment that an employee would use away from work, e.g., a wheelchair or an electric scooter
- A sit-stand desk that is recommended from an ergonomic assessment that can be approved regardless of the employee's medical situation, ergonomic keyboards, mice or standard issue chairs

Invoice submission and payment processing

- An approved accommodation letter from Human Resources must be provided and attached to the invoice(s) before the funds can be utilized.
- Submit invoice(s) to Sr. HR Manager for approval.

*EEO-4 job category definitions:

Administrative Support

Occupations in which workers are responsible for internal and external communication, recording and retrieval of data and/or information and other paperwork required in an office. Includes: bookkeepers, messengers, clerk-typist, stenographers, court transcribers, hearing reporters, statistical clerks, dispatchers, license distributors, payroll clerks and kindred workers.

Officials and Administrators

Occupations in which employees set broad policies, exercise overall responsibility for execution of these policies, or direct individual departments or special phases of the agency's operations, or provide specialized consultation on a regional, district or area basis. Includes: department heads, bureau chiefs, division chiefs, directors, deputy directors, controllers, wardens, superintendents, inspectors and kindred workers.

Paraprofessionals

Occupations in which workers perform some of the duties of a professional or technician in a supportive role, which usually require less formal training and/or experience normally required for professional or technical status. Such positions may fall within an identified pattern of staff development and promotion under a "New Careers" concept. Includes: research assistants, medical aides, child support workers, policy auxiliary, welfare service aides, recreation assistants, homemakers aides, home health aides and kindred workers.

Professionals

Occupations which require specialized and theoretical knowledge which is usually acquired through college training or through work experience and other training which provides comparable knowledge. Includes personnel and labor relations workers, social workers, doctors, psychologists, registered nurses, economists, dietitians, lawyers, systems analysts, accountants, employment and vocational rehabilitation counselors, teachers or instructors and kindred workers.

Service/Maintenance

Occupations in which workers perform duties which result in or contribute to the comfort, convenience, hygiene or safety of the general public or which contribute to the upkeep and care of buildings, facilities or grounds of public property. Workers in this group may operate machinery. Includes chauffeurs, laundry and dry cleaning operatives, truck drivers, bus drivers, garage laborers, custodial employees, gardeners and groundkeepers, refuse collectors, construction laborers and kindred workers.

Skilled Craft Workers

Occupations in which workers perform jobs which require special manual skill and a thorough and comprehensive knowledge of the process involved in the work which is acquired through on-the-job training and experience or through apprenticeship or other formal training programs. Includes mechanics and repairers, electricians, heavy equipment operators, stationary engineers, skilled machining occupations, carpenters, compositors and typesetters and kindred workers.

Technicians

Occupations which require a combination of basic scientific or technical knowledge and manual skill which can be obtained through specialized post-secondary school education or through equivalent on-the-job training. Includes computer programmers, drafters, survey and mapping technicians, licensed practical nurses, photographers, radio operators, technical illustrators, highway technicians, technicians (medical, dental, electronic, physical sciences), police and fire sergeants, inspectors and kindred workers.

Equity and Inclusion Division
421 SW Oak Street, Suite 750, Portland, OR 97204

OREGON HEALTH AUTHORITY

OHA’s Diversity Equity and Inclusion Plan – Memo for Inclusion in the 2025-27 Agency Request Budget

The Oregon Health Authority (OHA) oversees most of the state’s health system and health system transformation through its eight divisions. The Oregon Health Policy Board (OHPB), OHA's policymaking body, works on comprehensive health reform with its nine members, who represent communities across the state. OHA is dedicated to advancing diversity, equity, and inclusion within its workforce and in the services and programs it provides to the people of Oregon including people who belong to populations that have been most affected – historically and currently – by health inequities.

OHA’s Diversity Equity and Inclusion (DEI) Plan builds upon previous Affirmative Action plans and workforce metrics to outline the strategic initiatives and commitments OHA is implementing to create a more equitable workplace and eliminate health inequities in Oregon by 2030. This memo, which connects OHA’s DEI plan submitted in June 2023 with the 2025-27 Agency Request Budget (ARB), is brief and general in nature with more detailed information available from OHA and in the numerous plans and documentations submitted memorializing OHA’s work, priorities and initiatives.

1. **Who benefits from agency programs, both directly and indirectly?**

OHA understands question one to ask “who” to mean people and organizations. OHA’s programs are designed to provide services and programs to help the people who live and/or work in Oregon and the communities to which they belong to achieve optimum physical, mental and social wellbeing through partnerships, prevention and access to quality, affordable health care. Those people and communities include Oregon Health Plan (OHP)/Medicaid recipients, Oregon State Hospital (OSH) patients, people seeking licensure as an esthetician, people seeking behavioral health services, traditional health workers (THW), and health care interpreters (HCI) among many others.

Additionally, the organizations, e.g., community-based organizations (CBO), coordinated care organizations (CCO), service providers and vendors as well as partner and regulatory governmental entities including local public health authorities (LPHA), other executive state agencies, and the Nine Federally Recognized Tribes are organizational OHA beneficiaries. OHA provide resources, services, contracts and other tangible and intangible investments that model and support these entities.

Indirect benefit is experienced by the people who are employed by the aforementioned entities as OHA’s economic footprint is significant.

2. **Who will be burdened by agency programs?**

It is OHA's position that no one will be burdened by OHA's programs if the answer is considered in the context of OHA's strategic goal to eliminate health inequities in Oregon by 2030. Pursuant to that goal, OHA adopted a health equity definition that states:

> Oregon will have established a health system that creates health equity when all people can reach their full health potential and well-being and are not disadvantaged by their race, ethnicity, language, disability, age, gender, gender identity, sexual orientation, social class, intersections among these communities or identities, or other socially determined circumstances. Achieving health equity requires the ongoing collaboration of all regions and sectors of the state, including Tribal governments to address:
>
> • The equitable distribution or redistribution of resources and power; and
>
> • Recognizing, reconciling and rectifying historical and contemporary injustices.

The crux of OHA's approach and priority is to develop and reform practices and processes that account for historical and contemporary realities that are barriers to people and provide meaningful and authentic access to appropriate services that allow each person to achieve optimum health. The health equity definition acknowledges that people may experience barriers because of their race, language, disability and other identities and intersections. OHA's strategic goal seeks to redistribute among everyone those resources and power. Redistribution however is not limiting or finite as OHA's approach resists a scarcity mindset in favor of a strengths-based framework where resources and power are not finite and can be shared.

3. **How does the agency increase or decrease racial equity? Do proposed new programs have potential unintended/racial equity consequences? What benefits may result from the program?**

OHA centers health equity in how it conducts all of its work, services and activities. OHA does this through a foundation of anti-racism. In so doing, OHA works to improve racial (and other) equity and eliminate racial (and other) inequities. OHA acknowledges that there is always a potential for unintended racial equity consequences and works to mitigate harmful consequences through its engagement work with partners, people, Tribes and communities that include the people, Tribes and communities who are least likely to trust, have meaningful access to and/or use public services. That commitment to meaningful and authentic engagement is a foundational part of building and stewarding trust and relationships with those whom OHA serves and with whom OHA partners. OHA remains humble, open and respectful through ongoing work to practice culturally- and linguistically-responsive services, disaggregate data to meaningfully understand population health disparities and other equity-based practices to continue our work and commitment to eliminate inequities.

4. **Whose voices and perspectives are not at the table? Why?**

It is an ongoing endeavor to work towards meaningful inclusion and engagement. OHA knows that we do not yet have trusted relationships with all partners, people, Tribes and communities in Oregon. OHA is committed to establishing and stewarding those relationships through the work that is described in detail in OHA's strategic plan, DEI plan and other documents capturing OHA's efforts. That said, it is difficult to know with whom OHA is not connecting because of OHA's work for comprehensive and consistent engagement.

An important factor in understanding whose voice and perspective are not at the table is to have robust REALD+SOGI disaggregated data practices to more accurately and specifically understand the demographic identities of the people in Oregon. One of the barriers to consistent REALD+SOGI data collection practices is that the state enterprise has less rigid data requirements than the Oregon legislature requires of OHA (and ODHS). Because OHA is part of the state enterprise, there are some decisions, resources and practices that do not align with REALD+SOGI requirements requiring ad-hoc workarounds, e.g. Workday data functionality vs. REALD+SOGI data requirements.

5. **What does the agency do to ensure multiple perspectives are part of our decision-making process?**

OHA engages in consistent community and partner engagement to identify and understand the experiences – good and bad—of OHA's partners, people, Tribes, and communities. OHA has the benefit of a mature (and growing) Equity and Inclusion (E&I) division with subject matter experts who have lived, learned and professional experience practicing equity, inclusion, anti-racism, social justice and community engagement. E&I has deep and valued relationships with numerous partners, people, and communities from which there is a candid exchange of information and recommendations.

Illustrative of E&I's work is the Regional Health Equity Coalition (RHEC) program. RHECs are made up of grassroots community members and representatives from culturally specific community-based organizations who work to identify what the most pressing health equity issues are in their region. These efforts focus on issues impacting priority populations including Communities of Color, Tribal communities including the nine federally recognized Tribes in Oregon and other American Indians and Alaska Natives people, immigrants, refugees, migrant and seasonal farmworkers, individuals and families with low-income, people with disabilities, and LGBTQ communities, with Communities of Color as the leading priority.

Additionally, OHA also has a Community Partner Outreach Program (CPOP) and Ombuds program with direct connection to serve and advocate for people and the organizations that serve these same people who are most likely to be unaware, unable through no fault of their own or disinclined to engage with OHA services whether due to Limited English Proficiency, disability, immigration status or other

identity/background/intersections. OHA and its staff are active participants in state-regional- and federal workgroups and communities of practice to stay abreast of trends, hotspots and innovative practices. In addition to the teams with statewide impact and broad agency responsibilities, many of OHA's divisions include dedicated Equity and Inclusion teams with the division's director's office or other centralized location.

Finally, OHA has a robust workforce infrastructure to allow for employee participation in decision-making and policy/practice development including but not limited to the Equity Advancement Leadership Team and the Employee Resource Group program. OHA facilitates numerous boards, commissions and workgroups made up of industry representatives, community organizations, advocacy groups, governmental entities and statewide peers. OHA prioritizes communication and recruitment to fill these groups with people and representatives from marginalized communities and with less familiarity with government processes. OHA's Agency Director completed a statewide listening at which local public health partners, coordinated care organizations, providers, community-based organizations and community members could tell the OHA director about their needs and priorities and how OHA can support and facilitate their work.

Executive Summary

Introduction

The Oregon Health Authority (OHA) is one of the state's largest executive agencies with a single overarching strategic goal: **eliminate health inequities in Oregon by 2030**. Our work is guided by the definition that the Oregon Health Policy Board (OHPB) and OHA adopted in 2020[1]:

> *Oregon will have established a health system that creates health equity when all people can reach their full health potential and well-being and are not disadvantaged by their race, ethnicity, language, disability, age, gender, gender identity, sexual orientation, social class, intersections among these communities or identities, or other socially determined circumstances.*
>
> *Achieving health equity requires the ongoing collaboration of all regions and sectors of the state, including Tribal governments to address:*
>
> - *The equitable distribution or redistribution of resources and power; and*
> - *Recognizing, reconciling and rectifying historical and contemporary injustices.*

The OHPB-adopted Health Equity definition directs OHA to leverage our policies, practices and programs to address the historic and contemporary social injustices and other upstream factors that produce health inequity, including racism, oppression, colonization and additional structural bias and dehumanizing factors embedded in the system.

This Diversity, Equity, and Inclusion (DEI) Plan serves as an update and continuation of OHA's previously reported Equity Advancement Plan[2] — also referred to as the Affirmative Action Plan. OHA develops an Equity Advancement Plan every biennium that communicates the agency's efforts toward related goals, monitors progress and recommends corrective action.

Progress on 2021-2023 equity advancement goals and strategies

During the 2021-2023 biennium, OHA focused on three major equity advancement strategies. Below is a list of those strategies along with an update on progress made:

I. Continue Strategic Planning Efforts

Anti-racism is a core component of OHA's strategic planning efforts.

During the 2021-2023 biennium, OHA's leadership participated in 78 hours of equity-focused facilitated discussion, practice, application, coaching, consultation and education led by Engage to Change. Additionally, and concurrently, approximately 775 employees throughout the agency participated in foundational antiracism training and conversation

[1] Oregon Health Policy Board Health Equity Committee, https://www.oregon.gov/oha/EI/Pages/Health-Equity-Committee.aspx
[2] Equity Advancement Plan, https://sharedsystems.dhsoha.state.or.us/DHSForms/Served/le9813.pdf

series. Finally, to complement the foundational antiracism training, the Agency supported optional Community of Practice sessions to allow employees to delve deeper into topics covered in the foundational antiracism series with Engage to Change. These sessions provided ongoing learning opportunities for people who had completed the Foundational Series.

OHA plans to continue and expand on this work over the next biennium. Accordingly, OHA is in the final stages of an RFP (Request for Proposal) that is titled Equity & Inclusion; Antiracism; and Health Equity Services. This will allow the agency to have a pool of contractors available to fill the various training and facilitation needs in this space to help us move towards achieving our strategic goal.

In addition to internal anti-racism work, **community engagement** is a critical aspect of developing the next strategic plan. Robust community engagement was conducted in 2019, via 22 in-person events in 11 counties with more than 400 Oregonians.

OHA was intentional in how it undertook community engagement by integrating equity and working to ensure meaningful access. Specifically, the sessions were conducted in English and six additional primary languages; there were three remote participation options: one statewide webinar conducted in Spanish, one statewide survey in both Spanish and English, and a weekly radio call-in show in Spanish. Each event was led by either culturally specific community-based organizations or grassroots community members and was customized to be culturally and linguistically appropriate.

This integration of respecting and honoring communities in Oregon included having culturally responsive meeting formats, serving culturally appropriate food, and having known and respected community leaders facilitate discussions in the communities' preferred languages. The final report on those engagements was finalized in May of 2023, and recommendations from that will inform the current strategic planning efforts. The final report can be found in the Appendix: Community Engagement Process with Diverse Communities: Input on OHA's Strategic Plan, October 2019.

II. Develop an Equity Action Plan.

OHA has taken this opportunity to update the previous Equity Action Plan with the OHA Equity Advancement Leadership Team (EALT) recommendations for the 2023-2025 biennium. The recommendations can be found in detail at the Diversifying workforce and Internal Culture section of this document and we have listed the actions as measurable outcomes in Table 1: OHA Summary DEI Goals 2023-2035 Biennium.

OHA is currently in the process of updating its strategic plan and committed to ensuring that this DEI plan is in alignment as those updates are made. This DEI plan represents an update to our previous plan to align with the governor's office template for these plans moving forward. As noted above, strategic planning efforts for the agency remain ongoing. OHA is committed to ensuring our DEI plan is embedded in that strategic plan and that workforce equity initiatives remain at the forefront of prioritized work.

III. Integrate equity, inclusion, anti-racism and accessibility into existing systems and processes

OHA has made advancements in recognizing the systemic racism that exists within organization processes and policies. The work to dismantle these systems is ongoing, but progress has been made. Specific examples are listed below with additional details presented later in the document.

- GARE Survey; the Government Alliance on Race & Equity, or GARE, survey was rolled out in Spring 2023 to help OHA leadership understand:
    - What staff know about health inequities, specifically racial inequities.
    - How staff incorporate addressing racial inequity into their daily work.
    - How well employees think OHA is doing to eliminate racial inequities.
    - The survey also will help identify gaps where education or training is needed to help OHA reach our 2030 goal and become an anti-racist organization.
- COVID-19 Accessibility and Language; extensive work to improve accessibility for people with disabilities and language access for people who communicate in languages other than English with regards to pandemic information, treatment, and vaccines occurred during the pandemic.
- Agency Performance System; the agency proposed updates to legislatively approved Key Performance Metrics for those outcome and process measures identified in our performance system that most reflect our strategic goal of eliminating health inequities by 2030.
- Internal Audits – ADA and Wellness; OHA conducted internal audits on both the employee process for requesting and receiving ADA reasonable accommodations as well as employee wellness. Findings from these audits spurred widespread process changes to improve employee experiences and steward supportive and inclusive workplace culture and practices.
- Legislative Pricing Pilot; OHA rolled out an initial training to budget administrators to underscore the critical role budget and finance professionals play in ensuring that the agency's fiscal endeavors integrate equity analysis procedures in legislative pricing.
- ODHS-OHA Auxiliary Aids, Alternate Formats and Language Access (AAFLAS) Policy; In 2023 ODHS and OHA updated their joint policy on Alternate Formats and Language Access to clarify the expectations and process for ensuring that communication services are provided to people who have different communication needs.

Workforce Parity – March 31, 2023

OHA currently tracks five measures focused on workforce diversity and parity. The data used to populate these metrics come from Workday reporting data. Demographic data collected in Workday are limited compared to REALD | SOGI standards. In particular, the current data masks considerable diversity according to Race/Ethnicity, Gender identity, and Disability. E&I is working internally on the development of a REALD&SOGI employee survey that would collect detailed race/ethnicity data (allowing for 38+ Race/ethnicity categories compared to the limited OMB standards), detailed disability data (allowing us to move beyond the simple yes/no binary of current disability data to 9+ categories), and detailed gender identity data (giving the

opportunities for employees to identify outside of the simple groupings of male, female, and non-binary currently available in Workday). E&I seeks to have this data will be used to allow OHA to better understand the intersectional identities of our workforce.

The first measure (**1AM005A**) is a comparison of the OHA workforce to the potential labor market. The most recent quarterly data indicates that the racial/ethnic composition of the OHA workforce is:

- At or above parity for Black & African Americans, Asians, and Whites
- Near parity for Native Hawaiian & Pacific Islanders
- Below parity for both American Indian & Alaska Natives and Hispanic or Latino, Latina or Latinx persons.

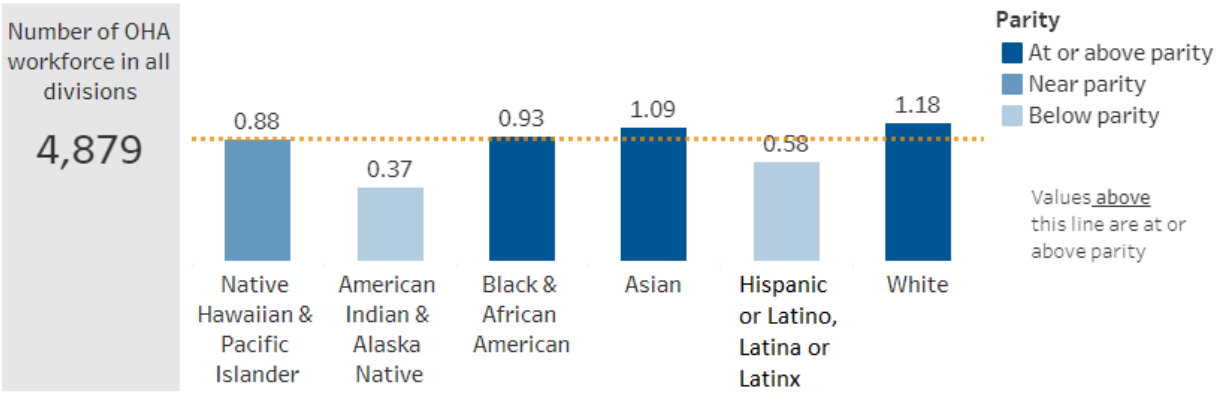

FIGURE 1: 1AM005A COMPARISON OF THE OHA WORKFORCE TO THE POTENTIAL LABOR MARKET. PARITY SNAPSHOT OF THE MOST RECENT QUARTER, FY 2023 Q3.

The second measure (**1AOM005B)** is a comparison of OHA non-supervisory managers to the potential labor market. The most recent quarterly data indicates that the racial/ethnic composition of the OHA non-supervisory managers workforce is:

- At or above parity for Black & African Americans, Asians, and Whites,
- Below parity for American Indian & Alaska Native persons, Hispanic or Latino, Latina or Latinx persons, and Native Hawaiian & Pacific Islanders.

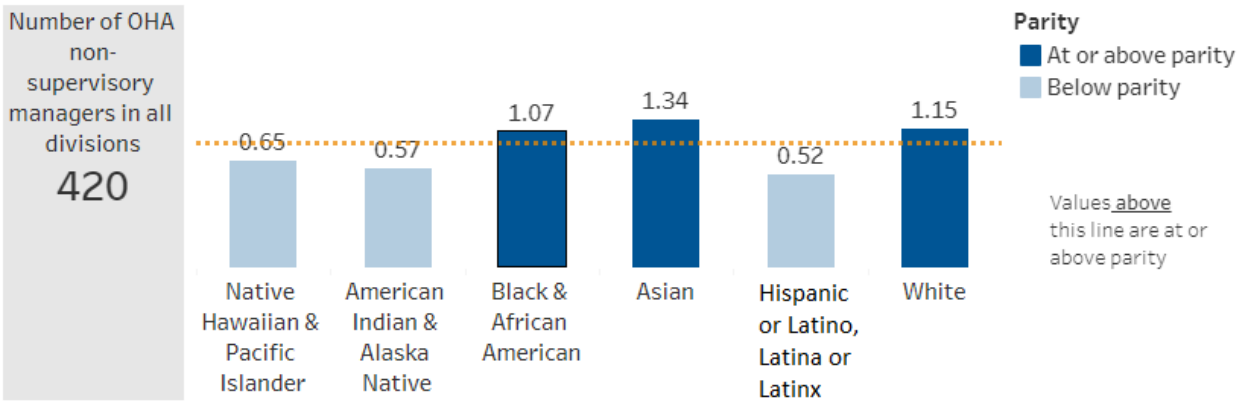

FIGURE 2: 1AOM005B COMPARISON OF THE OHA WORKFORCE TO THE POTENTIAL LABOR MARKET. PARITY SNAPSHOT OF THE MOST RECENT QUARTER, FY 2023 Q3.

The third measure (**1AOM005C)** is a comparison of OHA supervisory managers to the potential labor market. The most recent quarterly data indicates that the racial/ethnic composition of the OHA supervisory managers workforce is at parity for only Whites, meaning that American Indian & Alaska Native persons, Hispanic or Latino, Latina or Latinx persons, Native Hawaiian & Pacific Islanders, Asians, and Black & African Americans are *underrepresented* in supervisory positions compared to the potential labor market.

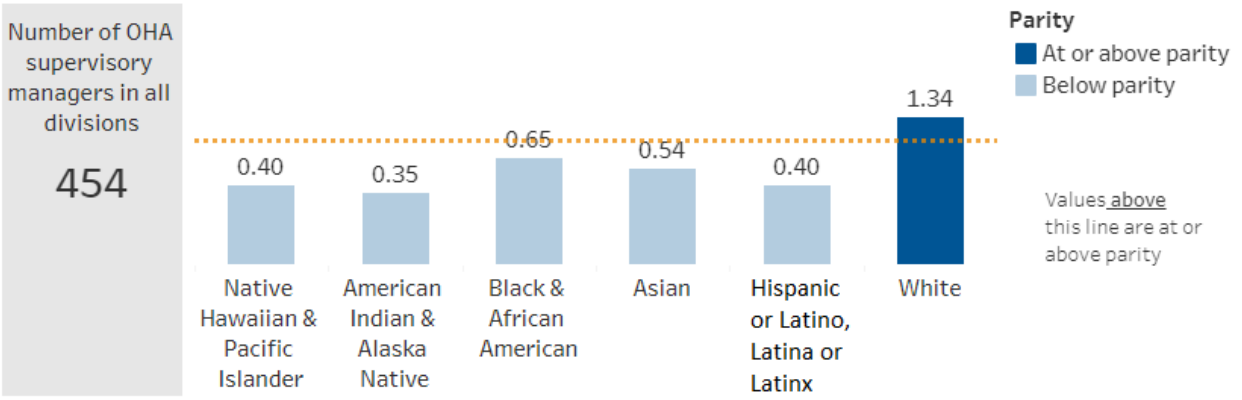

FIGURE 3: 1AOM005C COMPARISON OF THE OHA WORKFORCE TO THE POTENTIAL LABOR MARKET. PARITY SNAPSHOT OF THE MOST RECENT QUARTER, FY 2023 Q3.

The fourth measure (**1AOM005D**) is a comparison of voluntary separations to all agency separations.

The most recent quarterly data for **1AOM005D** (voluntary separations) indicates that only the Hispanic or Latino, Latina or Latinx group is at or above parity, meaning that the voluntary separations of all other racial/ethnic groups was higher than expected given the overall counts of *all* separations.

Specific to gender and disability status, the new quarter data shows OHA is near parity for men and below parity for women, and that persons with disabilities are at parity.

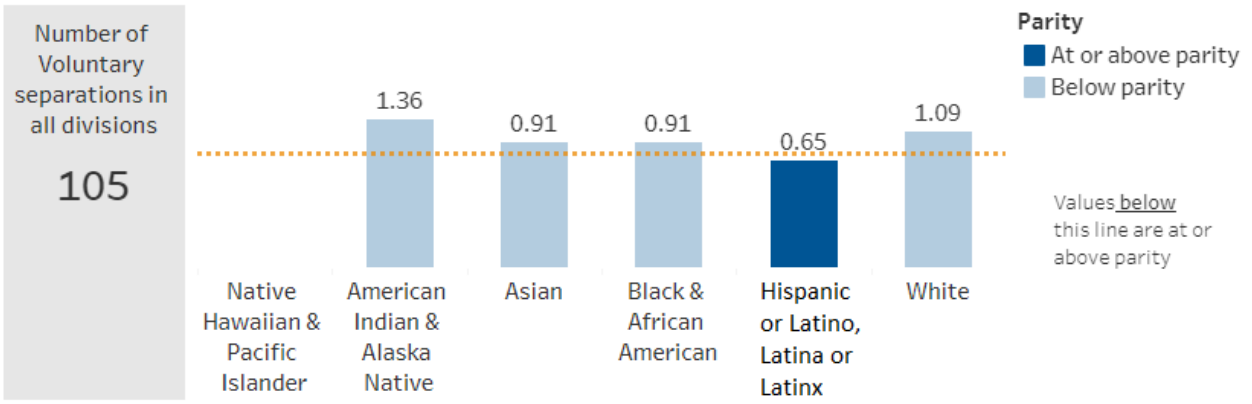

FIGURE 4: 1AOM005D COMPARISON OF VOLUNTARY SEPARATIONS TO ALL AGENCY SEPARATIONS. PARITY SNAPSHOT OF THE MOST RECENT QUARTER, FY 2023 Q3.

The fifth measure (**1AOM005E**) is a comparison of involuntary separations to all agency separations.

The most recent quarterly data for **1AOM005E** (involuntary separations) indicates that only the White population for involuntarily separated persons is at or above parity, meaning that the involuntary separations of all other racial/ethnic groups were higher than expected given the overall counts of *all* separations. Specifically, American Indian & Alaska Native persons, Hispanic or Latino, Latina or Latinx persons, Native Hawaiian & Pacific Islanders, Asians, and Black & African Americans are *overrepresented* among the involuntarily separated workforce.

Specific to gender and disability status, the new quarter data shows OHA is near parity for men and below parity for women, and that persons with disabilities are below parity. As noted above, current Workday data dies not align with READLD|SOGI disaggregated categories due to Workday data limitations.

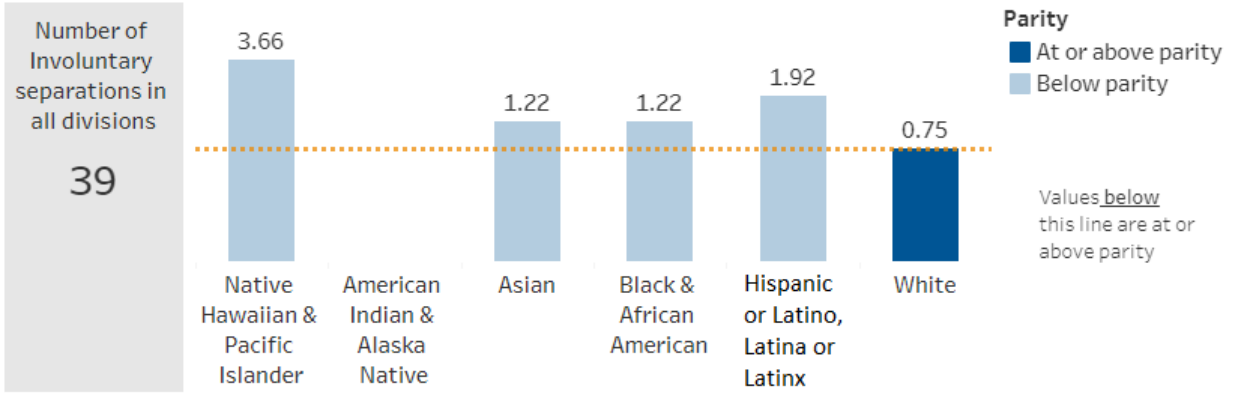

FIGURE 5: COMPARISON OF INVOLUNTARY SEPARATIONS TO ALL AGENCY SEPARATIONS. PARITY SNAPSHOT OF THE MOST RECENT QUARTER, FY 2023 Q3.

Goals for the 2023-2025 biennium

The table below outlines the strategy areas, challenges, actions, and timelines OHA is focused on during the upcoming biennium.[3] Each strategy area is discussed in more detail in the corresponding section following this summary.

TABLE 1: OHA SUMMARY DEI GOALS 2023-2035 BIENNIUM

Strategy/Focus Area	Challenge	Action	Timeline
Government to Government Relations with the Nine Federally Recognized Tribes of Oregon	There is a lack of understanding of the unique relationship between these government entities.	• Develop enhanced foundational training on tribal affairs to OHA staff • Develop and deliver advanced Tribal Consultation and Urban Indian Health Confer Policy training to OHA staff and partners • Expansion of THW Program to include Tribal THW programming, partnership and representation	• By December 2024 • Begin planning and conferral in 2024 • Ongoing
Community Engagement	Communities need a clear and cohesive engagement framework in place.	• Create an internal framework for community engagement	• By December 2024
Communications	Communications need to be accessible, culturally appropriate, and written in a way that all can understand.	• Implement Digital Accessibility Policies • Creation of Language Access Plan • Publications and Creative Services	• December 2023 • June 2024
Data	Systems need to be able to disaggregate data in compliance with REALD and SOGI so that inequities can be identified.	• Finalize planning for REALD and SOGI data collection system, including design of the eventual HB 3159 data registry (front end) and repository (back end). • Future Rules Advisory Committees for HB 3159 specific to the registry and how providers need to submit the data.	• December 2023 • June 2024

[3] OHA included "Government to Government Relations with the Nine Federally Recognized Tribes in Oregon" as one of the Strategy/Focus Areas.

Decision Making and Budgets	Structural racism exists in current decision making and budgeting frameworks.	• Eliminating Health Inequities POP Objectives	• By June 2025
Diversifying workforce and Internal Culture	The workforce is not representative of the diverse communities living in Oregon.	• Achieve workforce parity goal (OM5) • Implement proposals of the EALT • Implement Organizational Healing and Resilience Policy	• June 2030
Contracting and Procurement	Barriers exist in the contracting process that perpetuate white supremacy.	• Hire the OHA Business Outreach Coordinator • Finalize the State Business Outreach Plan • CBO Contracting Workgroup	• August 2024 • September 2024
Service Delivery	Health outcomes for communities and people have been disproportionately affected by health inequities in our state.	• 1115 Implementation demonstration period activities • Improve the staffing capacity at OSH • Invest in an equity focused infrastructure at OSH • Work towards the full implementation of REALD and SOGI data collection standards at OSH • Stabilize the BRHNs created through Measure 110	• June 2025

Agency Overview

Overview of the Oregon Health Authority

The Oregon Health Authority (OHA) includes most of the state's health delivery and policy programs. Leading OHA is the OHA Director's Office which includes Tribal Affairs. Additionally, OHA has eight divisions: Agency Operations (AO), Equity and Inclusion (E&I), External Relations Division (ERD), Fiscal Operations (FO), Health Policy and Analytics (HPA), Health Systems Division (HSD), Oregon State Hospital (OSH) and Public Health Division (PHD).

The Oregon Health Policy Board[4] (OHPB) serves as OHA's policymaking and oversight body. OHPB works toward comprehensive health reform in our state. The nine-member board includes community members from across the state with an interest in health and health care. Board members have strong relationships with the communities they represent.

It is OHA's concentration of health responsibilities that has enabled the agency to be an engine for innovative health transformation in Oregon and gains in health equity. Through its health care, public health and behavioral health programs, OHA affects the lives of everyone who lives in Oregon. OHA administers the Oregon Health Plan ("OHP" or Medicaid), which provides health coverage to nearly one (1) in three (3) people in Oregon (and nearly four (4) in ten (10) people who live in rural and frontier counties).[5]

OHA's Public Health Division (PHD) protects every state resident from communicable diseases (such as COVID-19) and other public health threats, ensures that every person in Oregon has clean water to drink and tackles the causes of chronic disease, from reducing tobacco consumption to addressing upstream factors that affect the social determinants of health (SDOH) such as food insecurity and environmental health.

OHA operates the Oregon State Hospital (OSH) and funds behavioral health programs that serve thousands of Oregonians in counties across the state. With a biennial budget of more than $34.3 billion, including more than $24.2 billion in funds for the Oregon Health Plan (OHP), OHA is the largest payer in Oregon's health care system.

The scale and scope of OHA's combined regulatory, purchasing and policy-making responsibilities have given state health officials the tools and leverage necessary to transform the way health care is delivered in Oregon to achieve better outcomes and slow the growth in health care costs. In recent years, OHA has:

- Administered policies and programs that have enabled Oregon to achieve 95 percent health care coverage.

[4] Oregon Health Policy Board, https://www.oregon.gov/oha/OHPB/Pages/index.aspx

[5] "Frontier" as used in this report is based upon OHSU's Oregon Office of Rural Health's (ORH) definition to mean "any county with six or fewer people per square mile. ORH has identified 10 of Oregon's 36 counties as frontier. See https://www.ohsu.edu/oregon-office-of-rural-health/about-rural-and-frontier-data (last accessed 5/30/2023)

- Successfully transitioned hundreds of thousands of OHP members to new coordinated care organizations (CCO) following CCO 2.0, the largest contracting process in state history.
- Won federal approval for innovative new Medicaid waivers, including the most recent Section 1115 waiver. Under this agreement, Oregon is the first state in the nation approved to provide Medicaid coverage for medically necessary, short-term rent payments for people who are homeless, as well as food for people with inadequate nutrition and coverage for housing and other supports for people experiencing the effects of climate change.
- Protected Oregonians throughout the COVID-19 pandemic. According to the Commonwealth Fund, Oregon ranked 5th among all states in the effectiveness of its COVID-19 response. Oregon has had the 2nd lowest case COVID-19 case rate in the nation since the start of the pandemic and the 7th lowest COVID-19 death rate. Oregon's rate of all residents who are fully vaccinated against COVID-19 ranks 18th in the nation. Oregon's COVID-19 response has saved more than 5,000 lives (based on a comparison of Oregon's COVID-19 deaths per million residents to the national COVID-19 death rate per million people).

OHA's combined capabilities have enabled our agency to make important gains in eliminating health inequities. For example, today in Oregon, more than 8 in 10 people (81 percent) in the Hispanic or Latino, Latina, Latinx community are vaccinated against COVID-19. Gains in COVID-19 vaccination rates for Black, African American and African Immigrants have been even more dramatic. Today, 95 percent of Black people in Oregon are vaccinated. No state in the nation has posted a higher COVID-19 vaccination rate for the Black community.

Vision

A healthy Oregon.

Mission

Ensuring all people and communities can achieve optimum physical, mental and social well-being through partnerships, prevention and access to quality, affordable health care.

Goals

In service to this mission, OHA has adopted a single overarching goal: to eliminate health inequities in Oregon by 2030. The primary objectives of OHA remain unchanged from the 2021-2023 biennium:

- Reduce barriers to health and advance health equity in our communities
- Improve access and quality of behavioral health services and decrease behavioral health inequities
- Reduce health inequities in the health care system and realize better care, better health, and lower costs.

2021-2023 Progress Report

The following is a summary of OHA's progress on goals and strategies presented in the 2021-2023 Equity Advancement Plan.

Strategy 1: Continue Strategic Planning Efforts

During the last biennium, OHA focused efforts extensively on anti-racism training. The following antiracism education was provided between 2021 and 2023

- Engage to Change provided approximately 78 hours of equity focused facilitated discussion, practice, application, coaching, consultation and education to OHA's leadership team.
- Our foundational antiracism training and conversation series was provided to approximately 775 employees.
    - This training included
        - OHA Tribal Affairs presentation on the History and the Government to Government Relationship between the State of Oregon and the Nine Federally Recognized Tribes of Oregon
        - Health Equity and Racism with the Equity and Inclusion Division
        - 2030 strategic goal and OHA's role with the Director or Deputy Director or both
        - 16 Hours with Engage to Change covering topics such as key concepts of antiracism, impact vs intent, antiracist vs non-racist vs racist, de-centering whiteness, white dominant culture, edges of learning, understanding internalized racism, invisible(ized) labor, dynamics of power and access to power, interrupting racism, US and Oregon History.

    - This training was taken by:
        - COVID-19 Vaccine and planning unit
        - HSD managers
        - Human Resources
        - ODHS|OHA Audit team
        - Fiscal Division
        - OIS leadership
        - Team implementing REALD and SOGI
        - Organizational Healing and Resilience Policy workgroup
        - Representatives from OSH leadership
        - External Relations Division
        - Equity Advancement Leadership Team (EALT) members
        - Employee Resource Group (ERG) members
        - Volunteers from across the agency
        - Additional invited partners from DOJ and ODHS
        - Public Health Division managers and individuals responsible for committees

- Optional Community of Practice sessions to delve deeper into topics covered in the foundational antiracism series with Engage to Change. These sessions were provided as ongoing learning opportunities for individuals who had completed the Foundational Series. Topics included:
    - Divide and Conquer: how the system pits us against one another and how to disrupt that
    - Self-care
    - Responding to Trauma
    - Restorative Justice
    - Loving Accountability

To continue this work in the next biennium, OHA is in the final stages of an RFP (Request for Proposal) that is titled Equity & Inclusion; Antiracism; and Health Equity Services. The RFP seeks vendors to provide services to OHA in six services areas including:

- Organizational Transformation
- Training and Development
- Coaching and Technical Assistance
- Facilitation
- Oregon State Hospital Specific Services
- Sustainability Plan

Once contracts are established OHA will have price agreements with vendors who will then be available to provide services in these six areas.

Additionally, during the next biennium, OHA will be completing a Strategic Plan in support of the defined strategic goal of eliminating health inequities in Oregon by 2030. The strategic planning process began in May 2023, and is estimated to be completed by June 1, 2024. The strategic planning process will be sponsored by the Agency Interim Director, Deputy Director, Director of the Equity and Inclusion Division, Director of Tribal Affairs, and Deputy Chief of Staff for Strategic Operations, in addition to additional support from a Senior Advisor to the Governor.

OHA will be seeking consultation and facilitation throughout the strategic planning process from the contractors selected to provide Equity &Inclusion, Antiracism, and Health Equity services to maintain focus and practice of equity, inclusion, and antiracist principles throughout the strategic planning process. The planning process will focus on five distinct workstreams to build the plan:

- Development and Implementation of an inclusive and thorough planning process
- Internal and External Engagement
- Tribal Consultation
- Establishment of Systems of Accountability
- Documentation

Strategy 2: Develop an Equity Action Plan

In recognition that it takes leadership and participation from across the organization to make meaningful progress towards operationalizing health equity and anti-racism, OHA has convened an Equity Advancement Leadership Team (EALT). Sponsored by the Agency Director and Equity and Inclusion Director, the EALT engages staff from across the agency to develop recommendations and advise the agency on actions related to the Strategic Plan, Equity Advancement Plan and Performance System.

The purpose of the EALT it to catalyze an organizational culture change at OHA that operationalizes health equity and anti-racism. The group does this by leveraging the lived and learned experience of OHA employees to assist the agency to better recruit, retain, promote and advance a workforce that reflects--at minimum--Oregon's population demographics. The EALT also advises OHA executive and division leadership teams on innovative and inclusive strategies to operationalize the OHA Strategic and Equity Advancement Plans.

This DEI plan serves as the updated Equity Action Plan that incorporates the Equity Advancement Leadership Team (EALT) recommendations. The EALT has proposed four topic areas of focus for the agency going into the next biennium. Along with these topic areas are specific actions recommended by the group to address the outstanding needs in these areas. The list of topics is included below as a summary, while the full list can be found in the Diversifying workforce and Internal Culture section of this document.

1. Agency Accountability to operationalize the OHA Strategic Plan and the Equity Advancement Plan
2. Implement the Equitable Hiring Toolkit as a mandatory process for all hiring managers in OHA.
3. Implement a mentorship program within OHA.
4. Address disproportionate rates of involuntary separations of employees of color.

OHA is currently in the process of updating its strategic plan and committed to ensuring that this DEI plan is in alignment as those updates are made. Relatedly, this DEI plan is an update to our previous plan to align with the Governor's Office template for these plans moving forward. As noted above, strategic planning efforts for the agency are ongoing. OHA is committed to ensuring our DEI plan is embedded in that strategic plan. Workforce equity initiatives remain at the forefront of OHA's prioritized work.

Strategy 3: Integrate equity, inclusion, anti-racism and accessibility into existing systems and processes.

In the 2021-2023 biennium, OHA focused on ensuring that equity, inclusion, anti-racism and accessibility (disability and language were incorporated into existing systems and processes whether absent or lacking. The below section is a representative list of OHA systems and policies centering equity. It is intended to highlight the work done during the biennium to update those systems and policies where white supremacy and historic inequities had not previously been addressed.

GARE Survey

In an effort to assess OHA's readiness to achieve our transformational 2030 health equity goal, all employees were invited to complete an anonymous survey in Spring of 2023. The purpose of this survey was to establish a baseline understanding around staff awareness, skills, and experiences about doing health equity and anti-racism work in our externally and internally facing work. The survey results will inform strategic planning, training, operational efforts and the development of supports and resources for staff.

The delivery of the GARE Survey was timely as we transition in the state's COVID-19 work. While no longer a public health emergency, COVID-19 continues to harm the lives and livelihoods of countless people and has underscored systemic racism and health inequities disproportionately experienced by Tribes, Tribal communities, communities of color and other communities in Oregon and across the country that have been most harmed by health inequities and racism. As Oregon continues to grapple with a national reckoning over systemic racism and inequity, we at OHA cannot ignore the many lives lost and diminished due to racism's legacy in our health care and public health systems.

COVID-19 Accessibility – Disability and Language

The COVID-19 pandemic made clear the wide gaps in accessibility and language access that prevented people across Oregon from obtaining information, vaccines, and treatment. Major initiatives and efforts were untaken by the agency during this time to address these disparities. The sections below highlight the systems and structures OHA put in place to reduce harm and begin to address systemic barriers.

Accessibility Team

The Accessibility Team (also known as the A-Team) formed in June 2021, to increase accessibility across all aspects of Oregon's COVID-19 response. OHA resourced this team very intentionally, partnering in the recruitment with community organizations and advocacy groups dedicated to disability justice. The resulting team composition reflected these efforts with several team members who had lifelong lived, learned and professional experience. The team's vision was an integrated public health system without barriers or judgement. The team initiated and supported the efforts listed below in addition to providing extensive education and resource development to the agency.

The Accessibility Team developed three guides to assist COVID-19 Response and Recovery Unit (CRRU) staff and others in facilitating accessible and inclusive (virtual) meetings, creating and remediating documents and digital content to be accessible and modeling and training others on conducting accessible PowerPoint presentations.

The team also collaborated with PHD to develop a page on OHA's Work Link (OWL) that links to frequently referenced accessibility resources, such as how-to guides and agency-approved accessibility statements for documents and meetings. OHA also launched an Accessibility Team page on the OWL to highlight team trainings and other accessibility events and information.

In addition to creating and sharing resources, the Accessibility Team offered focused trainings to support the implementation of inclusive practices and delivered these trainings throughout OHA including:

- CRRU Field Operations staff
- Vaccination contractors
- PHD Policy and Modernization team
- PHD administrative support staff
- PHD new employee orientation staff
- CRRU data visualization teams
- All CRRU staff via 10-minute topic presentations at CRRU Leadership and Partnership meetings

Accessibility kits

Oregon was among the leaders in operationalizing accessibility in its COVID-response through the use of vaccination-site accessibility kits. The funding and process to source and create the kits, as well as a system for ordering and delivering kits to partners, were set up quickly as part of the FEMA vaccine project. The kits were initially stored in the Department of Administrative Services (DAS) warehouse and shipped as part of the same process for shipping pandemic response supplies to partners statewide. This accessibility aid was amplified and made available to community partners to leverage partners' proximity to the pandemic medical supply distribution process.

Communication Access Realtime Translation (CART)

Providing CART for internal meetings and community listening sessions was possible due to the captioner contract (which was secured quickly due to the COVID-19 state of emergency) and the secure funding source as part of the pandemic response. Historically, not knowing how to arrange captioning and how to pay for it have been barriers to providing this service. CRRU was able to respond quickly and nimbly to get this service included in standard meeting logistics to enhance general accessibility and inclusion.

Data visualization

The need for accessibility of data visualization on CRRU websites was widely recognized because of regular information sharing and opportunities to work across functional teams in CRRU. The recognized need resulted in a four-part series done in consultation with a deeply experienced digital accessibility consultant who educates and provides resources to CRRU and OHA about best practices and accessibility integration related to data visualization. This educational series led to the development of a remediation plan for the public facing COVID-19 dashboards to ensure data was accessible to assistive technology users. This effort also identified to OHA the need to prioritize and integrate digital accessibility resulting in the ongoing development of an agency-specific Digital Accessibility Policy and the Policy Option Package to resource a digital accessibility team as part of a larger universal accessibility unit in OHA's Equity and Inclusion Division.

Support for in-home vaccinations

The A-Team worked with Field Operations to learn more about the process for in-home vaccination and discuss how accessibility must be integrated into the process. This conversation was possible because of transparency among CRRU teams and encouragement from managers to work together on processes.

SB 1606 / hospital support person education and case work

The A-Team worked intensively with the COVID-19 Feedback Team, the hospital capacity Incident Management Team, and the OHA Healthcare Regulation and Quality Improvement program to create resources, communicate with hospitals, and provide information to the community and individuals about the rights of people with disabilities under Senate Bill 1606. The COVID-19 Feedback Team was created as part of CRRU with pandemic resources. Its responsive structure and collaborative work style facilitated rapid action that resulted in better outcomes for patients.

Get Vaccinated Oregon (GVO)

OHA launched the Get Vaccinated Oregon (GVO) tool on February 8, 2021, so that people in Oregon could check their vaccine eligibility and get connected to vaccine appointment opportunities. Over the subsequent 15 months (until May 2022), the GVO continued to enhance its functionality and served as a central repository and the source of truth for testing and vaccination information throughout the state. During its program period (June 2021 – May 2022) the GVO represented a successful integration of equity and inclusion via meaningful access and usability related to digital accessibility and language access.

ACCESSIBILITY

The root of accessibility issues on the GVO was the result of a rapid launch and lack of accessibility focus incorporated into the original design. In Spring of 2021, the project brought in an accessibility consultant who completed an initial review of the website. The initial accessibility reviews identified conformance and best practice gaps that were addressed by the development team in June 2021.

LANGUAGE ACCESS

The GVO website was published in 12 different languages end to end – from registration to text and email notifications. However, in the initial phases of vaccine roll out, providers sending notifications opted to send information in only English. After the phased vaccine approach concluded, the GVO team proactively initiated contact to providers to collect translated materials that could be shared with specific language users. That renewed commitment to language access in June of 2021, is represented by 8,388 language-specific ad hoc notifications that promoted vaccine events through partnerships with the following providers/organizers: CANN, Virginia Garcia Clinic, Lincoln County, Latino Community Association, Clackamas County, VPU Pharmacy Branch, VPU Communications Branch. During the program period (June 2021 through May 2022), a total of 51,570,000 messages were sent out to GVO subscribers with 610,844 of those messages being in a non-English language (Table 1).

TABLE 2: GVO NOTIFICATIONS BY LANGUAGE AND TYPE. JUNE 2021 - MAY 2022.

Language	Email	Phone	Grand Total
Arabic	6,607	3,701	10,308
Chuukese	1,965	1,644	3,609
English	38,468,838	12,490,318	50,959,156
Hmong	3,373	2,863	6,236

Somali	1,316	2,559	3,875
Spanish	235,955	160,610	396,565
Traditional Chinese	11,379	2,893	14,272
Vietnamese	38,105	16,296	54,401
Grand Total	**38,862,872**	**12,707,128**	**51,570,000**

My Electronic Vaccine Card

Oregon's My Electronic Vaccine Card is a web application that received information from ALERT IIS to provide people (upon request) with a voluntary digital copy of their COVID-19 vaccinations. The digital copy is represented by a QR code and can be scanned/verified by requiring entities.

OHA intentionally worked on this project differently than other IT projects based on a request from leadership that we lead with equity. We defined that as our intent, and it included the following:

- Provide access in 13 languages
    - 13 languages go-live simultaneously
    - Translations completed and reviewed by native language users (not autogenerated)
- Accessible web platform
    - Built to conform with WCAG 2.1 AA
    - Tested by a team of native assistive tech users
- Center community voices
    - Continuous engagement with community
    - User acceptance testing by community prior to go-live

The above-listed accomplishments are noteworthy and represent initial examples of OHA honoring our commitment to equity and inclusion as a pathway to eliminate health inequities. OHA rolled out the platform on April 25, 2022, in all 13 languages with a completed Accessibility Conformance Report (Appendix: My Electronic Vaccine Card ACR). Positive feedback was received from community and partners. In the weeks and months since go-live, OHA has shared this work in national forums including the American Immunization Registry Association

Conference,[6] and with the Vaccine Credentials Initiative Membership Group[7], at the Northwest Immunization Conference in 2022[8], and at the Qualitative Report Conference in 2023[9].

Having a demonstrable example of government centering equity by requiring that the product be accessible, usable and effective for Oregon's priority populations, in this case people with limited English proficiency (LEP) or whose primary language is something other than spoken English.

This report identifies opportunities for improvement and reflections for how to build on this work moving forward. In summary, the team highlighted 5 key lessons learned that are listed below:

- Equitable IT design is a conscious decision at the beginning of a project, I.e., it is part of the plan and purpose in all phases and not an afterthought
- Community engagement takes time, stewardship and respect. "Change moves at the speed of trust"
- Additional organizational resources and expertise are needed for sustained accessibility and community engagement work
- Language access work would benefit from shifting from translation to transcreation
- Leadership support for leading with equity is paramount to project success

Agency Performance System

In 2018, the OHA Leadership team embarked on developing a performance system centered on the agency's mission, vision, and values. It took about a year to bring the performance system to fruition, which includes in one graphic, the agency's mission, vision, values, key goals, outcome measures, core processes, supporting processes, and process measures. See Appendix: OHA Fundamentals Map for the current map.

From 2019 to present, agency leaders, outcome/process owners, data stewards, and invited guests have met quarterly (with a pause in 2020 due to the pandemic) to review the data and information related to the outcome and process measures. These quarterly performance reviews (QPR) allow participants to understand the positive trends and work the agency does that affect the measures, as well as identify where action plans are needed to address areas not meeting the targeted results.

OHA had hoped when the 2021-2023 budget development cycle began, the agency could make recommended changes to the key performance measures reported to policymakers. The goal

was to exchange the current legislatively approved KPMs for those outcome and process measures identified in our performance system that most reflect our strategic goal of eliminating health inequities by 2030. That did not happen. The time for the agency to submit KPM changes is in April of even numbered years. With the COVID-19 pandemic beginning in early 2020 and OHA's strategic role in the state's COVID-19 response, there was not leadership capacity or staff resources to make the recommended changes at that time.

During the 2021 Legislative Session, OHA and other policymakers renewed the commitment to prioritize the needs of Oregonians from a health equity framework, including a recognition of the health equity definition identified and adopted by OHPB and OHA. This led to a discussion between the agency and legislative staff about whether the current KPMs effectively address the agency's strategic goal of eliminating health inequities and the investments being made to address health inequities within OHA systems.

Since there was not an opportunity to fully address the KPMs in the 2021 Legislative Session, the agency was asked to come back to the 2022 Legislative Session with recommendations on changes to the key performance measures that better reflect the agency's strategic goal of eliminating health inequities and reflect OHA's health equity work. OHA responded accordingly and during the 2023 session, those KPM changes were brought to committee for official vote and approval.

Specific changes that are anticipated to be added to the legislative KPMs related to health equity include:

- Comparison of OHA Workforce to Potential Labor Market
- Comparison of OHA Non-Supervisory Managers to Potential Labor Market
- Comparison of OHA Supervisory Managers to Potential Labor Market
- Comparison of OHA Voluntary separations to all agency separations
- Comparison of OHA Non-voluntary separations to all agency separations
- Quality of Life – Poor physical health
- Quality of Life – Poor mental health
- Premature death
- Mortality from drug overdose
- Tobacco use teens
- Obesity – Teens
- Statewide sustainable cost of care
- OHA Sustainable Cost of Care
- Critical Events Meeting the 14-calendar day timeline to provide correspondence to Tribal Leaders
- Tribal Consultations meeting the 30-calendar day timeline for reporting of outcome of consultation
- Timeliness of translation during emerging public health events
- Health Equity Measure: Meaningful language access to culturally responsive health care services for CCO Members – Component #1
- Health Equity Measure: Meaningful language access to culturally responsive health care services for CCO Members – Component #2

- Infant Mortality Rate
- Reduction of Severe Maternal Morbidity

In addition to adding these metrics to the Legislative KPMs, OHA Leadership also revised the performance system's fundamentals map to ensure inclusion of these measures within the agency's key focus areas. The synchronization of the agency performance system and legislative KPMs with the strategic goal forms the foundation for the strategic planning work OHA is starting to complete now.

Internal Audits – Wellness and ADA

In December 2021, OHA surveyed our staff on two distinct and related topics: (1) well-being and (2) our agency's ADA processes and resources for employees. The agency shared widely the audit findings from both the Wellness and ADA surveys in January of 2023. Acting upon the audit findings, OHA established Implementation teams in both areas, each charged with implementing actionable changes in the 2023-2025 biennium.

OHA Employee Well-Being Audit

OHA's workforce has been under increased stress and workload demands for the past two years due to the COVID-19 pandemic, workforce shortages, and other pressures that strain agency resources and employee well-being. Increased turnover in some departments and heavy workload demands have led to widespread fatigue and concern about how employees are handling the added stressors. This topic was selected to audit because employee burnout was a major concern identified in our 2021-22 risk assessment and was identified by OHA leadership as a priority.

The purpose of this audit was to identify agency well-being initiatives currently in place and well-being practices that the agency could implement to further boost employees' well-being and help them transition to a better work-life balance as the immediate pandemic response subsided.

Despite the increased demands caused by the pandemic, the agency was able to improve well-being practices by revising and initiating wellness work policies, developing an organizational healing and resilience workgroup that drafted an agency organizational healing and resilience policy, implementing a virtual work health manual, creating an Office of Health, Safety, and Employee Well-being (OHSE) Dispatch newsletter, updating Public Employees Benefit Board (PEBB) wellness programs, and improving efforts to address violence and safety at Oregon State Hospital (OSH).

OHA leadership accepted the nine recommendations made by the audit team and will be moving this work forward during the 2023-2025 biennium.

OHA Americans with Disability Act (ADA) Audit

This audit of OHA's ADA accommodation process and resources related to employment was requested by OHA leadership based upon a recommendation from the Equity and Inclusion division and addressed the following objectives:

1. Assess whether the ADA accommodation request process ensures outcomes are compliant, appropriate, timely, equitable, and consistent.
2. Evaluate the agency's understanding of disabilities and the ADA.

The audit included an examination of requests, outcomes, and agency policies and procedures related to ADA accommodations for calendar years 2019, 2020 and the first quarter of 2021. The audit focused on internally raised accommodation requests and compliance with Title I of the ADA.

The audit concluded that there are numerous barriers that prevent or delay employees from receiving ADA accommodations within OHA. Generally, these barriers are related to a lack of structured and managed business processes and perceptions that prevent employees from seeking reasonable accommodations.

OHA leadership accepted the audit's five findings and committed to enact the audit's eight recommendations including instituting a quality assurance review process that covers ADA requests from intake through fulfillment or complaint resolution (Rec 1.2); communicate ADA Accommodation request process, complaint process and OHA Budget to all employees during the onboarding process (Rec 3.1); create a centralized online location for ADA accommodation resources (Rec 3.2); and increase employee awareness of and sensitivity to disability in the workplace (Rec 5).

Legislative Pricing Pilot

During the 2023 legislative session, OHA rolled out a training to budget administrators known as the 'Legislative Pricing Pilot' with the following objectives:

- Getting legislation budgeted in a way that accounts for equity-related costs
- Reframe for all staff that integrating equity and equity analysis is standard operating procedure for OHA, not an extra
- Network of knowledge, in that budget admins can share this information with people who come to them
- Build a repository of info/data that people can use when pricing (typical costs for line items, requirements to build programs or services that are universally accessible, etc.)

This training focused on providing budget administrators and legislative staff with the knowledge and skills necessary to identify equity-related costs that should be included in fiscal analyses for bills. The pilot emphasized the importance of intentional pricing to include costs to ensure meaningful access to priority populations including people of color, people with disabilities, immigrants and refugees, LGBTQ2S+ communities, and people who are homeless. By pricing legislation to reach people in priority populations, Oregon's statutory and regulatory framework could contribute to eliminating health inequities and begin to address systemic barriers.

ODHS-OHA Auxiliary Aids, Alternate Formats and Language Access (AAFLAS) Policy

In 2023, ODHS and OHA updated their joint policy on Alternate Formats and Language Access.[10] While the policy requirements remained largely unchanged, the updated policy clarifies the expectations and process for ensuring that ODHS's and OHA's communication services are provided to people who have different communication needs. Specifically, this means providing communication services to a wide spectrum of people including but not limited to people who primarily communicate in a language other than English, people who are Deaf, DeafBlind, Hard of Hearing, people who are neurodivergent, and people with communication, intellectual, cognitive, developmental or learning disabilities.

This policy update provided the specific steps for staff and agency programs to ensure people's communication needs are being meant as well as establishing guidelines for each agency to create a language access plan.

Partnering with Community-Based Organizations

OHA recognizes the essential role of community-based organizations (CBOs) in community-driven, culturally and linguistically responsive public health service. Our commitment to eliminating health inequities by 2030 relies upon building authentic trusting relationships with CBOs from every county and supporting their efforts to uplift community health priorities that are grounded in equity and accessibility.

As part of the COVID-19 Response, OHA through PHD and the CRRU funded CBOs across Oregon for work specifically related to COVID-19. This model was broadened by PHD to partner with CBOs to advance the goals of Public Health Modernization.

2023-2025 Key Strategy and Focus Areas

Government to Government Relations with the Nine Federally Recognized Tribes of Oregon

Integral to OHA is Tribal Affairs, housed in the Director's Office. They work with staff across the agency to uphold the government-to-government relationship with the Nine Federally Recognized Tribes of Oregon. The Oregon Tribal Governments are:

- Burns Paiute Tribe
- Confederated Tribes of Coos, Lower Umpqua and Siuslaw Indians
- Confederated Tribes of Grand Ronde
- Confederated Tribes of Siletz Indians
- Confederated Tribes of the Umatilla Indian Reservation
- Confederated Tribes of Warm Springs
- Coquille Indian Tribe
- Cow Creek Band of Umpqua Tribe of Indians
- Klamath Tribes

[10] ODHS-OHA Auxiliary Aids, Alternate Formats and Language Access (AAFLAS) Policy, https://sharedsystems.dhsoha.state.or.us/DHSForms/Served/dhsoha010-013.pdf

The Oregon Indian population includes 177,769 American Indians/Alaska Natives (alone or in combination, ACS 2021 data) with 58,951 residing in the Portland metro area.

To work towards achieving our strategic goal to eliminate health inequities, OHA considers it a priority to ensure staff and programs across the agency are educated and understand the historical and inter-generational trauma that has occurred, along with recognizing the current day trauma that continues to affect American Indians and Alaska Natives health and wellness.

Tribal Affairs Responsibilities

The responsibilities of Tribal Affairs include:

- Implementing the Tribal Consultation Policy.
- Identifying individuals at OHA who are responsible for developing and implementing programs that affect tribes.
- Utilizes a process to identify the programs that affect tribes.
- Coordinates communication between OHA and tribes.
- Promotes positive government-to-government relations between OHA and tribes.
- Provides training to staff on the policy, process and ongoing relationship.

As required by SB770-2001 (ORS 182.162 to 182.168)

Tribal Health Programs and Priorities

OHA Tribal Liaisons are vital to this work in specific areas, including Medicaid, Behavioral Health, Health Policy, Public Health and at the State Hospital.

Tribal Affairs, liaisons and other OHA staff work regularly with elected tribal officials, tribal health directors and staff, Indian Health Service, Urban Indian Health Program, Northwest Portland Area Indian Health Board, as well as other agencies and organizations focusing on tribal health priorities.

OHA supports Tribal Health Programs by providing resources for improving programs and services to best meet their needs. A few priorities include:

- Support the creation of Indian Managed Care Entities to improve tribal care coordination in tribal communities
- Increase access and quality of Behavioral Health Services and supporting the Tribal Behavioral Health workforce
- Create and sustain a Tribal Traditional Health Worker program
- Develop and receive authorization of Medicaid reimbursement for the Community Health Aid Program-Behavioral Health Aid Therapists, Community Health Aid's, and Dental Health Aid Therapists.
- Modernize the public health system with support from OHA.

Training on Tribal Affairs and Consultation Policy for OHA Employees

Tribal Affairs has developed training required for new staff and as requested for new managers, units/divisions and as a part of the anti-racism work. The purpose of this training includes:

- Understanding the government-government relationship between the state and the Tribes. This relationship is derived from the political and legal relationship that Indian Tribes have with the federal/state government and is not based on race.
- The "why" of tribal affairs work including - Federal law, state law, agency policy/process and roles of tribal liaison staff
- Historical and inter-generational trauma
- Tribal consultation: what, why, how

Community Engagement

OHA has strengthened its capacity to conduct meaningful, authentic and culturally responsive community engagement, which has been effective in shaping OHA's CCO 2.0 transition, 1115 Medicaid waiver application and approval and the COVID-19 response. The below sections describe various frameworks and plans OHA staff use to engage communities and partners. In the 2023-2025 biennium, OHA plans to develop a cohesive internal framework for community engagement that will be inclusive of the various pathways and components outlined below.

Community Partner Outreach Program

The Community Partner Outreach Program (CPOP) has a mission to: Engage communities across Oregon to advance an equitable, responsive health system. What they do is:

- Develop and maintain partnerships to address barriers to health coverage access, and system navigation for Oregon's most vulnerable and underserved populations
- Train, certify and provide on-going support to organizations that employ OHP-certified community partners (a.k.a. Application Assisters)
- Serve as the bridge between the community and the state of Oregon to support OHP eligibility and enrollment system improvement

CPOP has shifted from solely focusing on medical application enrollments to health system navigation and access to improve the long-term health outcomes of Oregonians. Additional support for CPOP is outlined in the section: Health Equity and Health Emergency Response.

Regional Health Equity Coalitions (RHEC)

Regional Health Equity Coalitions (RHEC) are autonomous, community-driven, cross-sector groups whose backbone organizations are non-governmental in nature. The work of these coalitions--to identify and address health equity issues--covers a wide range of underserved communities, including communities of color, immigrants, refugees, migrant and seasonal farmworkers, low-income populations, persons with disabilities and lesbian, gay, bisexual, transgender and questioning communities. Communities of color are the leading priority because communities of color often experience the greatest health inequities, both in Oregon and nationally. The work of the RHECs addresses social determinants of health that have persisted for generations in sectors such as health, education, housing, employment and

transportation. Ultimately, the coalitions are working to improve the overall state of health equity in Oregon.

The root causes of health inequities have persisted for centuries because systems and institutions have been created to benefit a select group of people over time. Meaningfully impacting health equity issues requires redistribution of resources, and in the context of the RHEC program, sustained, long-term efforts with dedicated fiscal investment is critical for success.

OHA has requested additional resources for the 2023-2025 biennium to support expansion of the RHEC program to add five more coalitions in additional regions across the state. The RHECs receive funding from several sources, but primary support comes from OHA. This foundational or base funding provides necessary nimble infrastructure support allowing the RHECs to focus their priorities on work that communities indicate are most important, rather than categorical funding which can be too narrowly focused on issues that may not be critical in some regions.

Capacity building grants are used to develop new RHECs by supporting coalitions to pilot the RHEC model with the health equity work they are doing and offers an opportunity to complete foundational RHEC activities. These activities include, but are not limited to: coalition building, developing and solidifying governance structures via charters, conducting community needs assessments, etc. After one biennium, the capacity building grantees are assessed for readiness to move into the implementation phase of their work, and whether the RHEC model aligns with the grantee's vision for their health equity work. Capacity building would take place from 2023 to 2025, with implementation anticipated in subsequent years.

There are several benefits to growing the RHEC model statewide through sustained and expanded funding, including:

- Increasing opportunities for coordinated care organizations (CCOs) to partner with RHECs, offer technical assistance and training to build CCO's capacity around health equity and the social determinants of health.
- Allowing coalitions the level of autonomy needed to improve health equity in meaningful and appropriate ways that ensures anti-racist priorities are not compromised.
- Continuing to grow the necessary capacity of Oregon to address health equity issues in culturally specific and effective ways.
- Creating additional opportunities to sustainably address issues related to avoidable policy and system barriers which may help lower costs to health and other related systems.

Healthier Together Oregon

Healthier Together Oregon (HTO) is the 2020–2024 State Health Improvement Plan for Oregon. HTO is a five-year plan that identifies our state's health priorities. It includes strategies that will lead to better health outcomes. HTO is a tool for anyone wanting to improve their community's health. It is meant to inform community health improvement plans and state agency policies,

partnerships and investments. HTO's primary goal is to achieve health equity. Its vision reads: Grounded in data and community voice, HTO identifies strategies to advance equity for these priority populations: Black, Indigenous, people of color, and American Indian/Alaska Native people (BIPOC-A I/A N), people with low incomes, people who identify as LGBTQ+, people with disabilities, and people living in rural areas. In early 2019, the PartnerSHIP identified five priorities:

- Institutional bias
- Adversity, trauma and toxic stress
- Behavioral health
- Economic drivers of health, and
- Access to equitable preventive health care

COVID-19 has worsened the trend in each of these priorities. The pandemic has exacerbated unjust racial disparities. HTO is a tool for our state to recover from COVID-19. More than 100 partners gathered to identify goals, strategies and measures for the priorities. They identified 62 strategies and wove them across an implementation framework that speaks to the interconnectedness of our health priorities. HTO will report key indicators and short-term measures each year to help track and communicate our progress. HTO is a key initiative of the Oregon Health Authority (OHA). However, OHA is not alone in this effort. We are all responsible for health. HTO welcomes new and existing partners to collectively and equitably improve Oregonians' health.

During the 2023-2025 biennium, OHA will continue the work outlined in the Healthier Together Oregon plan, including practices to engage community in the current and future plans. (Appendix: Healthier Together Oregon: Full Plan)

Community Engagement Team

OHA created the community engagement team (CET) in July 2020, in response to the COVID-19 pandemic. OHA awarded approximately $4,719,720, across 173 community-based organizations (CBO) to respond alongside the state in delivering contact-tracing, outreach and education, and wraparound support to Oregonians.

OHA, including the CET utilized data to organize the state's COVID-19 efforts. That data identified communities that experienced the highest infection rates. OHA partnered with people and organization within those communities to provide culturally- and linguistically-responsive support and resources for better health outcomes. While all counties were represented, there remain equity gaps in services and resources, due in part to the statewide scope of some CBOs.

CTE centered Community Engagement Values and Principles that include: Outreach, Consult, Involve, Collaborate and Shared Leadership to steward meaningful relationships and trust with community. Culturally-specific engagement spaces were created for connection and cross collaboration across the state among various partners, such as local public health authorities (LPHAs) and CBOs. By amplifying people's lived experiences, partners could trust that everyone

would be respected and their feedback and ideas valued. This framework supported real-time feedback about what was happening and what people were experiencing.

CTE shared this feedback, ideas, and data with the COVID-19 response teams and OHA/ODHS Leadership allowing for new opportunities for regional, systematic engagement and systems' change within the Public Health Division. This direct response to community has allowed important community insight into public health prioritizations, leading to the success of the state's pandemic response. A highlight of accomplishments is listed below.

Outreach and Education

- Total people reached at in-person events: 746,626
- Services offered in 62 languages other than English
- Majority of outreach and education events focused on COVID-19 vaccination education and prevention and safety messaging

Wraparound Support

- Total people assisted: 128,136
- Wraparound support assisted positive COVID-19-tested people during their quarantine and isolation period. Examples of this support included food, rent, and utility assistance.

Supplementary Program Elements

- Food boxes were established from June 2021 to March 2023. Food support included:
    - 2,957,948 total meals served
    - 121,525 food boxes and 21,791 hot meals delivered to vaccination events
    - 10,127 food boxes picked up at food hubs
      (each food box contained 21 meals and each hot meal is an individual meal)
    - approximately49% of food boxes were culturally specific
        - The food box program evolved to include culturally specific food boxes in the second half of program, underscoring popularity and necessity
        - Boxes that were offered: Hispanic or Latino, Latina or Latinx persons, Halal, Asian, and Columbia River Intertribal Fish Commission
- Educational bags were offered starting June 2021, alongside Safe+Strong campaign to increase COVID-19 awareness at health fairs, vaccination clinics and community events
    - Items in bags included Personal Protective Equipment (PPE), COVID-19 test kits and COVID-19 information
    - 70,000 bags have been distributed as of May 2023

Internal Framework

For Oregon Health Authority (OHA) to be successful in its efforts, we must meaningfully involve the people of Oregon to ensure the agency is appropriately identifying and prioritizing issues and implementing solutions that get to the desired outcomes of improving health equity as known and experienced by the people who are and have been living it.

OHA is working toward building the infrastructure needed to support and sustain meaningful and respectful community engagement through intentional actions that institutionalize the feedback received via new ways of doing the agency's work. This not only helps build necessary relationships and trust with community partners for future work, but also takes the guess work out of the agency's efforts to address health inequities among Oregonians- making OHA's work more equitable, effective, and efficient.

There is need to establish an agency framework for community engagement so all divisions within OHA have clear direction around best practices for high-quality, inclusive, and equitable outreach and engagement standards. By shifting away from transactional and extractive engagement methods and centering on building relationships and trust with the people the agency serves, OHA will be able to accomplish initiative-specific goals, and engagement will be more comprehensive and inclusive of all the state's populations. When communities have opportunities to engage in respectful ways and feel that they can trust OHA, they are more willing to openly share the barriers and challenges they experience; this helps the agency to better understand population-specific inequities. This can begin future dialogues about creative and sustainable solutions to uplift health equity in all communities across the state. Creating and fostering authentic trusting relationships, especially with priority populations[11], lay the groundwork for people to be respected and have opportunities to share candidly about their experiences and needs. This allows OHA to better understand the full context of population-specific health inequities and to learn directly from communities about how to address health equity most responsively, meaningfully, strategically and sustainably in Oregon.

To achieve this goal, OHA has begun establishing an agency-wide workgroup to leverage the work already established, develop a shared framework for community engagement, creating recommendations for staff capacity building opportunities, identifying comprehensive infrastructure elements needed to fully support community engagement without minimizing organic and necessarily fluid and flexible responses required, and preparing a preliminary budget for leadership approval to ensure investment of resources to support these efforts.

Communications

Digital Accessibility

OHA and ODHS discovered during COVID that our agencies' IT solutions are not accessible to people who have disabilities (e.g. people who use screen readers, alt text, or audio captions). While Oregon has a general statewide policy, OHA and ODHS do not have that policy operationalized at the agency level to make IT solutions accessible.

To close this gap, OHA and ODHS have convened a workgroup to draft and implement Shared Services policies for digital accessibility. These policies would enable ODHS and OHA to plan for

[11] Priority populations include: Communities of color; Tribal communities including the nine federally recognized tribes of Oregon and other American Indians and Alaska Natives people; Immigrants; Refugees; Migrant and seasonal farmworkers; Low-income individuals and families; Persons with disabilities; and Individuals who identify as lesbian, gay, bisexual, transgender, or queer, or who question their sexual or gender

and require accessibility in IT solutions to make available to staff or the public, whether those IT solutions are acquired, procured, developed, modified, or enhanced.

The scoping on this policy is split into two main areas – (1) technology procurements and development, and (2) content creation. We are moving forward with the procurement policy first in 2023, and plan to have the content creation policy in place in early 2024. Each policy will have an implementation plan and timeline that is agreed upon by all involved collaborators.

The technology procurement policy will improve processes and practices throughout all phases of IT projects and solutions, bringing them toward compliance with Section 508 of the Rehabilitation Act (Section 508). The policy establishes a source of authority so we can start to build program improvements. It is tied to the OHA's 2023 Eliminating Health Inequities Policy Option Package under Universal Accessibility that was partially sustained in the GAB and intended to enable program development.

In late 2022, the Oregon Department of Human Services (ODHS) and the Oregon Health Authority (OHA) engaged in a joint policy workgroup to ensure equitable and meaningful access to information and services. The workgroup stemmed from the agencies' commitment to effective communications that are culturally and linguistically appropriate and accessible for people who have different communication needs or abilities.

This policy unambiguously (re)affirms that ODHS and OHA are using information and communications technology (ICT) solutions that fully comply with accessibility standards, whether those solutions are developed in-house or acquired from a third party. This includes providing ICT solutions that that give people experiencing equity barriers the opportunity to acquire the same information, engage in the same interactions, and enjoy the same services in an equally integrated and effective manner, and with equivalent ease as someone without that barrier. This includes people who primarily communicate in a language other than English, people who are Deaf, DeafBlind, Hard of Hearing, people who are blind or have low vision, people with color blindness, people with motor disabilities, people who are neurodivergent, people with communication, intellectual, cognitive, developmental or learning disabilities, and people who use assistive technology.

During the 2023-2025 biennium, OHA and ODHS will roll out policies that: (1) outline and clarify each agency's expectations for technology procurements and WCAG (Web Content Accessibility Guidelines) assessments and (2) address creating services and content standards for the agencies.

Language Access Plan

At the Oregon Department of Human Services (ODHS) and the Oregon Health Authority (OHA) we are committed to providing effective culturally and linguistically appropriate communication services. Everyone has the right to access ODHS and OHA resources and meetings, and through a recently updated policy, this now includes internal meetings as well. The updated Auxiliary Aids, Alternate Formats and Language Access Services Policy demonstrates our commitment to providing full access to our meetings, surveys and materials.

In April 2023, accessibility statements started auto populating at the top of all Outlook Calendar appointments. The statement is not editable and ensures that meeting attendees are getting the information they need. The statement reads:

> *For people who speak or use a language other than English, people with disabilities or people who need additional support, we can provide free help to participate in this meeting. Please call or email the meeting organizer. We accept all relay calls. ODHS and OHA staff can click on this link if they need help with a request.*

Language Access Services Resources for both ODHS and OHA can now be found within one shared Language Access Services OWL (intranet) site. Additionally, OHA recently launched a Language Access Desktop Icon to make it easier for OHA staff to access information and resources. Finally, OHA has committed to creating a language access plan that includes processes for how we will provide auxiliary aids, alternate formats and language access services.

Publications and Creative Services

Publications and Creative Services (PCS) is responsible for multiple bodies of work across OHA and ODHS. This includes translations, forms design and maintenance, creative design, editing, ensuring accessibility of all products, brand integrity, etc. PCS has had a growing level of work demands from both OHA and ODHS over the last few years due to increased commitment to language access, the COVID-19 response, other emergency events such as wildfires and heat dome, the implementation of the ONE system, contributed to an overall increase in requests for support.

In 2020 to 2021, requests for changes and new forms increased greatly while staffing and resources within PCS remained the same. Staffing and several other factors including how requests were received and prioritized, developed into a long workload backlog. The buildup of requests, the issue of capacity and demand, request process, tracking, communication, and prioritization all reached a tipping point where both agencies realized the need to support and provide additional resources to PCS if business needs are to be met.

OHA and ODHS programs/divisions work with PCS to produce communications materials that are required by state or federal law. These fall under three primary workstreams: (1) creative design, (2) translations/transcreations, and (3) systems administration and operations which includes physical warehouse operations. Additionally, both agencies utilize PCS for translation and accessibility of materials. Rollout of the ONE system alone has led to translation needs for ONE notices at a pace that outstrips the two translation coordinators currently handling all translation requests for both agencies. The process and staffing challenges within PCS have highlighted the inequitable impacts of delays for communities of color and disability communities. Some people, depending on their language needs must wait to receive critical information in a language they understand or a format they can access.

During the 2023 – 2025 biennium, OHA and ODHS will continue a multi phased project to address these challenges. The first phase focuses on stabilization. The second phase is to build a sustainable state-of-the art publication and creative services unit that is equity centered, aligned with agency communications units, and engaged with community needs. Completion of this project will create a system that helps our agencies meet our requirements in an efficient, effective and culturally responsive way.

Data

REALD/SOGI Repository

Using more complete demographic data to measure systems performance towards achieving OHA's goal of eliminating health inequities by 2030, is the primary motivation for the initial Race/Ethnicity, Language, Disability, and Sexual Orientation, and Gender identity (REALD&SOGI) repository. The repository represents the first effort by any state government to develop a relational database containing the most complete demographic information possible to inform policy-development and implementation aimed at reducing health inequities. A major shortcoming of nearly all existing efforts to monitor health inequity is a lack of quality demographic data necessary to produce accurate estimates of impacts of inequities by REALD&SOGI categories.

The initial repository draws on approximately seven different sources of data to ultimately produce a detailed REALD & SOGI demographic history for all persons observed in the source data. All of these data sources (see below) are REALD-compliant, and all provide a mixture of Race/Ethnicity, Language, Disability, Sexual Orientation, and Gender Identity data.

These sources include:

- ORPHEUS (ACDP: communicable diseases; case mgmt. system for case investigators)
- MORBIUS (ACDP: communicable diseases)
- ARIAS (ACDP: Contact tracing for COVID, no longer active)
- OCRP (ACDP: Covid online data portal)
- OPERA (ACDP: Covid case mgmt. system for case investigators)
- CSV data (ACDP: Covid CSV batch uploads from Providers)
- ONE/IE (OHP, TANF, SNAP, TADVS, CC from ONE/IE data system)

The repository contains approximately 19.4 million unique records. Roughly 90% of the records come from ONE, with 10% coming from Acute and Communicable Disease Prevention (ACDP) sources (ARIAS, MORBIUS, OCRP, OPERA, CSV, and ORPHEUS).

Conceptually, the repository is based on automating complex person-matching and data transformation processes to synthesize data from the above-mentioned sources to produce customizable outputs of more complete REALD&SOGI-compliant data. Preliminary data from the initial repository is already being leveraged by internal partners to produce legislatively mandated reports, model health plan payment rates to reduce inequities in health care outcomes as well as produce dashboards to inform agency and state-wide policy decision making.

During the 2023-2025 biennium, OHA and partners will work to ingest additional data sources from birth certificate data from OVERS to further enhance data completeness of the repository. In addition, we will continue efforts to ingest additional data streams, prioritizing those data streams with REALD & SOGI information to continue to improve on the level of completeness of the demographic data profile for all OHP members.

Decision Making and Budgets

This section outlines roles, responsibilities and expectations in OHA for implementing the Equity Advancement Plan (also known as the DEI or Affirmative Action Plan) and ensuring the agency complies with affirmative action/EEO and related laws, rules and policies.

Accountability mechanisms within the agency include the OHA Performance System, employee development plans and performance management of all agency executives, managers and staff. Additionally, the Oregon Management Project outlines performance expectations for executives who supervise managers and management service employees, to ensure that manager performance evaluations address duties and responsibilities for advancing Equity Advancement Plan goals and strategies.[12]

Agency director

- Sets strategic direction and expectations for the agency concerning development and implementation of goals in the Strategic Plan, Equity Advancement Plan, and other equity and inclusion initiatives and programs.
- Ensures Executive Leadership Team members understand their work performance is evaluated based on their efforts and results around implementing Strategic Plan and Equity Advancement Plan goals and strategies, in conjunction with other leadership responsibilities.
- Ensures the appropriate review and follow-up on findings including:
  - The agency director or deputy director reviews all investigation reports completed under the OHA Discrimination and Harassment Complaint procedure.
  - Appropriate staff coordinate with investigators about the findings, and
  - The agency deputy director responds to requests for reconsideration.
- Receives ongoing professional development related to health equity, equity and inclusion, anti-racism and other topics relevant to advancing the Strategic Plan and Equity Advancement Plan.
- Ensures executive leadership team members:
  - Receive ongoing professional development related to health equity, equity and inclusion, anti-racism and other topics relevant to advancing the Strategic Plan and Equity Advancement Plan.
  - Review management implementation of equity advancement strategies in performance appraisals.
  - Provide reports to the Legislature and public regarding the agency's status and progress on Equity Advancement Plan goals and strategies, and

[12] The Oregon Management Project (TOMP), https://www.oregon.gov/das/HR/pages/TOMP.aspx

    - Evaluate members of their divisional management team for effectiveness in creating the workplace conditions and results outlined in the Strategic Plan and Equity Advancement Plan.
  - Meets as needed with the OHA Equity and Inclusion Division, Office of Human Resources and division and program directors to review progress and challenges with Equity Advancement Plan goals and strategies.

Executive Leadership Team

- Leads the agency in setting the direction and expectations around strategic planning efforts, as well as leadership in implementing the Strategic Plan and Equity Advancement Plan.
- Receives ongoing professional development related to health equity, equity and inclusion, anti-racism and other topics relevant to advancing the Strategic Plan and Equity Advancement Plan.
- Ensures divisional leadership and management teams:
  - Receive ongoing professional development related to health equity, equity and inclusion, anti-racism and other topics relevant to advancing the Strategic Plan and Equity Advancement Plan
  - Review management implementation of equity advancement strategies in performance appraisals, and
  - Evaluate management team members for their effectiveness in creating the workplace conditions and results expected by the agency's affirmative action policy.

Equity Advancement Leadership Team

- Makes recommendations to the Agency Director and Equity and Inclusion Division director to inform and implement the OHA Strategic Plan, Performance System and the Equity Advancement Plan
- Provides oversight to monitor the agency's progress on Equity Advancement Plan goals and strategies. Advises the agency on the development of the OHA Equity Action Plan.
- Receives ongoing professional development related to health equity, equity and inclusion, anti-racism, and other topics relevant to advancing the Strategic Plan and Equity Advancement Plan.

Equity and Inclusion Division

- Develops and communicates agency policies and procedures related to AA/ EEO, Equity, Inclusion and compliance matters and prepares and disseminates equity advancement information.
- Provides strategic, health equity leadership for the most ambitious health systems transformation in the nation.
- Coordinates activities in concert with the Strategic Plan, Performance System and Equity Advancement Plan; monitors progress toward agency identified goals and strategies.

- Documents and communicates to the Executive Leadership Team barriers preventing the agency's achievement of OHA Equity Advancement Plan goals; recommends to Executive Leadership potential solutions on removing barriers.
- Provides guidance and technical assistance to agency executive leaders and management on strategies to incorporate health equity, anti-racism and equity, inclusion and accessibility into the hiring process.
- Ensures the agency is complying with affirmative action/EEO and other relevant laws and policies; documents and communicates to Executive Leadership barriers that are preventing agency compliance with affirmative action/EEO and related laws and policies.
- Receives and investigates discrimination, harassment and retaliation complaints.
- Receives ongoing professional development related to health equity, equity and inclusion, anti-racism, ADA and other topics relevant to advancing the Strategic Plan and Equity Advancement Plan. Develops and maintains knowledge and skills for advancing health equity external and internal to the agency.

Management

- Promotes and fosters a nondiscriminatory, safe and welcoming climate and work environment — both in physical worksites and in the remote work environment — in which all employees are valued and respected in accordance with state policy and agency values.
- Ensures all new and current employees:
    - Are aware of the agency's strategic plan goal, health equity definition and core values, and
    - Understand OHA's priority initiatives and resources for advancing health equity.
- Periodically reviews training programs, hiring and promotion patterns to remove barriers to achieving the agency's Strategic Plan and Equity Advancement Plan goals.
- Implements recommended strategies to incorporate health equity, anti-racism and equity, inclusion and accessibility into the hiring process.
- Conducts periodic reviews by staff authorized to act to ensure the following:
    - EEO, ADA and Discrimination and Harassment Policy information is properly displayed.
    - All facilities for the use and benefit of employees and clients are accessible both in policy and use.
    - People of color, people with disabilities and other protected class identities have full opportunity and encouragement to participate in agency-sponsored education, training, recreational and social activities.
    - Employees learn about the need for ADA compliance, alternate format and language access, and that requests are appropriately processed and accommodated and
    - Problem areas in equity, inclusion and accessibility practices and procedures are identified and solutions sought.

- Receives ongoing professional development related to health equity, equity and inclusion, anti-racism and other topics relevant to advancing the Strategic Plan and Equity Advancement Plan.

Eliminating Health Inequities Policy Package

A critical piece of OHA's plan for the 2023-2025 biennium involves increased funding and resources to support the necessary infrastructure to carry out those activities. The following excerpts are from OHA's POP submissions provided as context for the agency's diversity, equity and inclusion strategies and priorities.

The Oregon Health Authority and its Equity and Inclusion Division are leading the state's effort to accomplish the largest and most ambitious transformation in health care and health delivery in the nation. The equity work charged to and led by the OHA Equity and Inclusion Division has agency-wide, state and national scope and impact. All divisions of the agency must be prepared and equipped to support equity and inclusion at every level of their work as well. It is critical to the success of this work that the agency hire additional subject matter expertise in the discipline of equity and inclusion and anti-racism. The work requires practitioners with career and lived experience, well versed in the research, theory and practical application of equity and inclusion. This policy package represents the next phase of assets necessary to achieve the state's and agency's imperative for health systems transformation and close the gap on health inequities that prevent the opportunity for all people in Oregon to attain optimal health, per a gap analysis related to additional capacity necessary to achieve the strategic goal of eliminating health inequities in Oregon by 2030.

Diversity, Inclusion, Training, Civil Rights, and Universal Accessibility

This initiative supports bringing on additional experienced and knowledgeable equity and inclusion professionals who are subject matter experts in stewarding supportive, respectful, and healthful work cultures for OHA staff, including disciplines such as training/adult learning, civil rights, disability access, language access and equity and inclusion generally. By providing proactive, restorative and cost-effective resources necessary to support the growing and ever-diverse OHA workforce and the varied needs of the people who live and work in Oregon.

One example based on a painful lesson learned from Oregon's COVID-19 response: many people who live and work in Oregon communicate in a language other than English. To provide information that is useful to people, we must invest in resources to produce and deliver information in languages other than English. It takes expertise to know how to do that effectively and efficiently. A second lesson learned is that not everyone can access and use information that is produced and delivered on a website. Even assuming you had a device and internet access, if you are blind you need the information on the website to be formatted so that your screen reader can read the information to you. That planning and doing does not happen automatically.

This [POP] proposal buys justice, liberty and life for the people of Oregon, especially the people who have been most harmed by injustice and health inequities, people who are experiencing the most harm, including racism, disenfranchisement and marginalization.

This investment represents OHA's commitment to not only ensure compliance with statutory and regulatory requirements. It is a sound investment enabling the agency to develop internal capacity support a thriving workforce who are key to eliminating health inequities for the people of Oregon.

Health Equity and Health Emergency Response

This proposal allows the Community Partner Outreach Program (CPOP) to expand the scope of their external reach to populations most harmed by health inequities, lead OHA overall around community-centered outreach, engagement, and co-creation within all programs, amplify the work of the OHA Equity and Inclusion Division and bring this feedback and community voice to inform, shape and influence OHA programs, policies and practices.

Strategic Action Team (SAT)

This initiative would fund positions as part of a Strategic Action Team (SAT), including project management and change management expertise, to create systems and processes that add capacity and enhance work on key initiatives across the agency that get us closer to our strategic goal to eliminate health in equities in Oregon by 2030. This team would amplify and support the work that has been led and is underway via the Equity and Inclusion Division, Tribal Affairs, the Community Partner Outreach Program, and broaden the agencies capacity across all divisions to achieve our strategic goal.

The Strategic Action Team would provide an array of operational supports and resources to strengthen the ability of our agency to apply health equity and anti-racism principles and practices in our everyday work.

For key initiatives in the agency, the Strategic Action Team would:

- Provide coaching and change management support to ensure it has been designed or adapted with health equity and anti-racism principles and practices at the forefront.
- Assist with scoping, planning, mapping out and communicating an implementation plan that is centered in health equity and anti-racism.
- Ensure that initiatives follow OHA's Tribal Consultation and Urban Indian Program Confer Policy in coordination with OHA's Office of Tribal Affairs and divisional tribal liaisons.
- Elevate and synthesize applicable best practices, policies, or processes for the program team that redistribute power and resources, centers community in achieving change, and disrupts white supremacy culture practices
- Document and
- Provide project metrics and a project dashboard or scorecard for a variety of views throughout the organization.

- Support cross-divisional program teams in addressing resistance to anti-racism and change.
- Identify and share when policy, practice, decisions, outputs, and documentation is in tension with our strategic goal, indicating the potential need for work to pause.

In addition to the support provided on key agency initiatives or programs, the Strategic Action Team would provide broader agency supports while following the lead and subject matter expertise already established in OHA, including agency-wide supports such as providing:

- Project management tools and templates to assist OHA teams in centering health equity in their work, including forms and templates to facilitate the development of project estimates, project plans, project schedules, issues management, change management and project reporting
- Project tracking tools and example project metrics and dashboards
- Coaching resources to support divisions and program staff to create, adapt and manage initiatives with health equity at the core of change management and project management

Fiscal Equity

This portion of the policy package would establish a new position, i.e., the start of a team, in OHA's fiscal division who would be fully dedicated to analyzing the agency's investment in health equity and anti-racism, including return on investment in health equity spending at OHA and in OHA-funded programs. This position would work with OHA subject matter experts and community partners to analyze the fiscal impact of OHA-funded health equity work and how those investments are contributing to OHA's strategic goal to eliminate health inequities. This highly-skilled and experienced professional would be better able to analyze, understand and quantify the costs of institutional racism within OHA programs and the effects of OHA's and the state's investments to address those institutional costs(harms). This position would make evidenced-based recommendations for future budget structure and budgetary levels needed for the elimination of health inequities.

The position would work closely with the Equity and Inclusion Division and Tribal Affairs to ensure that their work is inclusive, collaborative, and in alignment with the direction of agency initiatives.

Equity and Inclusion Business and Programmatic Support

This policy package further develops an infrastructure necessary to support equity and inclusion initiatives within the Equity and Inclusion Division and across the agency. It buys one position to provide essential administrative support to build the infrastructure necessary to support the physical and programmatic expansion of the Equity and Inclusion Division, and a second position to administer and lead strategic alignment of the expanding and statutorily mandated health care interpreter (HCI) program.

Organizational Resilience and Healing (ORHP)

This policy package includes one full-time Operations & Policy Analyst 4 position to work with OHA leadership and employees to develop project management plans, assess policy impacts, and make recommendations for resources needed to fully implement the Organizational Healing and Resilience Policy (ORHP). This position will also conduct an environmental scan to create a compendium of culturally appropriate staff resources and conduct a gaps analysis to assess what supports are still needed. This effort will also make recommendations to support implementation, including staffing supports and training.

Meaningfully impacting these workforce inequities requires fiscal investment. Specific benefits of these resources include:

- Increased morale, a sense of belonging, general wellness and an overall quality of workplace interactions for OHA staff.
- Decreased staff turnover
- Increased staff retention which can especially contribute to fostering a more diverse workforce
- Allows employees the level of autonomy needed to improve equity in meaningful and appropriate ways that ensures anti-racist priorities are not compromised.
- Continues to grow the necessary capacity of OHA to address equity issues in culturally specific and effective ways.

Diversifying workforce and Internal Culture

The Equity Advancement Leadership Team (EALT) and OHA leadership have committed to a cadence of quarterly meetings with Division Directors and the EALT, relating to equity work, goals and workforce demographics. These meetings aim to provide a clear structure and direction for accountability and feedback as it relates to agency equity goals.

The current equity goals of focus stem from the top priorities identified by the EALT in a memorandum to the OHA Executive Leadership Team from August 18, 2022. These priorities stemmed from several discussions with OHA leadership and among its own members. Below is a summary of the recommendations that outlined each proposal, which are of equal priority, and a framework for the respective action steps for each initiative, including the role of the EALT. These priorities outline the actions OHA intends to focus on during the 2023-2025 biennium to improve workforce parity.

Agency Accountability to operationalize the OHA Strategic Plan and the Equity Advancement Plan

1) Create and implement feedback loop for division directors to report out to the EALT regarding equity activities within the divisions.
2) Continue to promote agency Equity Advancement Plan to division directors.
3) Create accountability system to review agency implementation of the Equity Advancement Plan.
    a) The system will include metrics that will allow us to track implementation.
    b) Leverage the already established Performance System Metrics.

4) Provide workforce data quarterly to EALT members.
5) Implement mandatory exit interviews when staff move to other positions, both internal AND external. An intentional structure and protocols should be put in place to ensure that staff feel safe in this process and that they will not be retaliated against if they share critical feedback about their experience. Anonymity of the staff as request and objectivity in the process are critical. This process should also include a data collection, analysis, and process improvement
6) Include ERGs at new employee orientation to connect staff from communities most impacted by health inequities with internal resources to boost retention rates.
7) Require managers to notify staff, especially staff of color of professional development opportunities.

Implement the Equitable Hiring Toolkit as a mandatory process for all hiring managers in OHA.

1) Use of the toolkit shall be mandatory for ALL OHA recruitments. This requirement should be linked to the accountability system for the Equity Advancement Plan.
2) Adequate training and other resources should be dedicated to support the adoption of the toolkit. Assessment of current adoption across the agency and barriers/success to adoptions should be done, including assessment of training and other resource needs.
3) In terms of prioritization for implementation a greater emphasis may be placed on management positions and promotions. However, ideally all hiring would use the toolkit.
4) Establish a minimum diversity requirement for hiring panels that does not tokenize staff of color.
    a) Prioritize staff who have taken the search advocate training and prioritize training new staff who have the highest rates of inequity within our hiring/promotion practices.
5) Create process and outcome measures that will allow us to track implementation and to the degree possible connect the use of the toolkit with hiring outcomes.
    a) Examples may include:
        i) Assessing which divisions and offices are currently using the toolkit and when the toolkit is being used for all hiring.
        ii) Track the number of staff by division that have been trained to use the toolkit.
        iii) Establish goals for percentage of managers completing the training with a set period.
        iv) To the degree possible assess how use of the toolkit impacted the hiring process and outcome.
        v) Creating an opportunity for continuous quality improvement/feedback as the toolkit is used across the agency.
6) Create an auditing plan for toolkit implementation. This should be linked to the measures above.

Implement a mentorship program within OHA.

1) Create a project plan for a mentorship program within OHA that draws on historical plans and learns and connects to the agency Strategic Goal and Equity Advancement Plan.
2) Create a mentorship policy with the involvement and feedback from the EALT and ERGs as key partners.
    a) Policy should establish an amount of time that the agency is willing to support mentorship directly and will not come out of ERG hours.
3) Look to pilot the mentoring program with ERGs that are already doing this work naturally.
4) While mentorship is not a promise for promotion, there should be a clear infrastructure and opportunities embedded into the mentorship and as a supplement to the program for building the skills and experience necessary for advancement, particularly to management roles.
5) Create a pathway for mentees and mentors to utilize the mentorship program for succession planning.

Involuntary Separations

1) Create a requirement for mandatory exit interviews.
2) Create a method to track data as to why staff are leaving OHA voluntarily or involuntarily.
3) Determine if an independent entity would be best to collect this information from staff leaving the agency.

Contracting and Procurement

In Fall of 2022, the Deputy Director of OHA formed a Business Equity and Inclusion Collaboration Workgroup within OHA. This group formed in response to Executive Order 22-15[13], which directs state agencies to take specific steps, over several years, to improve equity in state procurement and contracting. The Executive Order is a result of proposals from the Racial Justice Council's (RJC) Procurement and Contracting Equity Workgroup, aimed at embedding equity into state procurement and contracting processes.

"Despite previous work to promote diversity and inclusion in state procurement practices, there continues to be gaps and barriers for businesses owned by people of color, women, and veterans, as well as emerging small businesses," said Governor Brown. "With this order, we will take further steps to promote greater equity in state contracting. I'd like to thank the members of the RJC for their work on developing thoughtful proposals to help us root equity in state procurement and create economic prosperity for all Oregonians."

"The RJC Procurement and Contracting Equity Workgroup proposals push state procurement of goods and services beyond spending by supporting opportunities to narrow the racial wealth gap," said Jan Mason, co-chair of the workgroup. "This Executive Order is a tremendous step towards ensuring our state investments enable equitable opportunities towards wealth mobility, particularly for economically disadvantaged and underrepresented minority-owned businesses."

Executive Order 22-15 includes directives to all state agencies regarding:

[13] Executive Order 22-15, https://www.oregon.gov/gov/eo/eo_22-15.pdf

- Embedding an equity lens in all aspects of state procurement processes;
- Improving data collection and data transparency;
- Proactive outreach and engagement;
- Staff training; and
- Accountability.

In addition, the Executive Order includes directives to specific state agencies, including Business Oregon, regarding business support and capacity building; the Oregon Department of Transportation, regarding public works project planning, procurement equity, and contract compliance; and the Department of Administrative Services, regarding an agency-led Procurement Equity Workgroup.

The workgroup serves the following purposes:

- Serves as the central source of coordination for groups and individuals across OHA with regards to equity and inclusion in business engagement and procurement contracting processes. Including specifically the following,
    - Guiding processes/procedures around integrating anti-racism, accessibility, and equity into our procurement evaluation and selection efforts (to mirror OHA"s equity in hiring toolkit and efforts to implement that with hiring panels).
    - Guiding trainings and resources for contract administrators in OHA doing inclusive procurement and business engagement work
- Create a community around good business engagement practices. This includes providing consistent tools and resources in addition to education across the agency.
- Acts as the OHA counterpart to the shared services Business Outreach Coordinator and serves as the point of contact (POC) for partnership with OHA
- Is responsible for administration of OHA specific pieces related to the Business Partnership program (see Core Functions)
- Ensures effective working relationships that
    - Achieve results,
    - Steward tax dollars, and
    - Promote cost effective, strategic solutions to meeting the short and long term needs of Oregonians in their communities.
    - Create ease of administration for both the agency and partners
- Responsible for oversight of audit deliverables

The workgroup has identified two actions of focus for the upcoming biennium – (1) Hire an OHA focused Business Outreach Coordinator and (2) Develop a state outreach plan in conjunction with ODHS that includes data-informed outcomes and metrics to track and monitor progress.

During the 2023-2025 biennium, OHA and ODHS will hire an OHA specific Business Outreach Coordinator to support the existing ODHS focused coordinator in providing statewide outreach. Subsequently, they will complete the Business Outreach Plan.

Service Delivery

1115 Waiver Policy Option Package

Oregon recently received approval for its 2022-2027 Medicaid 1115 Demonstration Waiver from the Centers for Medicare and Medicaid Services (CMS). The overarching goal of Oregon's 1115(a) Medicaid Waiver Demonstration renewal is to advance health equity in alignment with the Oregon Health Authority's strategic goal of eliminating health inequities in the state by 2030. Focusing our waiver work on making meaningful progress towards health equity, aligning with other health policy initiatives and integrating with other systems in our state such as housing, will allow us to:

- Make significant improvements for individuals who face historic and contemporary injustices;
- Increase individual, family and community resilience; and
- Reduce health disparities for groups disproportionately affected.

The waiver makes significant advancements in coverage by maintaining enrollment in the Oregon Health Plan (OHP) for kids, from birth until their sixth birthday, and for two-years enrollment for people age six and up even if their eligibility status changes. In addition, the waiver provides authority to cover certain health related social needs (HRSN) services (housing, nutrition, and climate services) to address HRSN for individuals experiencing life transitions. When people go through major life transitions, like losing housing or being impacted by extreme weather, they often lose access to their health care providers, leading to worse health outcomes. To help members keep their coverage, stay in touch with their health care providers, and stay healthy, Oregon will provide social supports to members as they experience these types of events in a package of services known as health-related social needs. Services will depend on the nature of the transition.

During the 2023-2025 biennium, OHA will be in the first part of the 5-year demonstration period and will implement significant changes to Coordinated Care Organization (CCO) contract requirements, revision of Oregon Administrative Rules (OARS) that impact all providers, substantial changes to IT systems to support financial disbursement, claims activity, and data submission, and managing the adoption and utilization of statewide community information exchange (CIE) platforms for referrals.

Oregon State Hospital Treatment Services Supports Policy Option Package

The Oregon State Hospital (OSH) is the largest workforce division of the Oregon Health Authority (OHA) and provides services to some of the most vulnerable Oregonians, who have both historically and currently, been harmed by inequities in systems of care. OSH experiences chronic systemic capacity limitations that have prevented it from carrying out strategies to address inequities in the system for both the people served and the service providers. Health equity work has been historically undervalued and deprioritized, and resources required for transformational change at OSH are lacking. Resources are required to facilitate diversity and equity programs and initiatives, foster the implementation of culturally appropriate policies and practices consistent with state and federal requirements, coordinate implementation of laws and regulations such as Section 1557 of the Affordable Care Act and the Americans with

Disabilities Act, and promote an increased understanding of the relevance of cultural responsiveness, culturally appropriate care, and diversity to building an organization that effectively meets the needs of its diverse patient population and workforce. There is currently one position to support this work for nearly 3,000 OSH employees and up to 675 clients between the two hospital campuses, and Pendleton Cottages.

In the current state of resource deficiency, OSH will not be able to meet OHA's mission of eliminating health inequities in Oregon, meet the Governor's State of Oregon DEI Action Plan, or provide care that aligns with the National Standards for Culturally and Linguistically Appropriate Services (National CLAS Standards) as outlined by the U.S. Department of Health and Human Services (HHS). Current investments are focused on responding to emergency situations and restabilizing the division to a pre-pandemic operational state. Simply operating at the historic institutional level is not sufficient for the provision of patient and staff services that address the diversity of the community, are equitable and inclusive to all community members, and meet a qualitative standard of excellence for addressing health inequity.

This policy package invests in resources dedicated to building an infrastructure that supports culture change necessary for meeting the goals of eliminating health inequities and the provision of national CLAS standards of care. Recognizing, reconciling, and rectifying historical and contemporary injustices for patients and staff require funding for resources including but not limited to:

- Dedicated professionals trained at the intersection of equity and mental health
- Patient-specific cultural, linguistic, and identify-affirming needs and supports
- Extensive workforce training related to equity, inclusion, diversity, anti-racism, and social determinants of health
- Clinical training related to the identification and facilitation of culturally and linguistically responsive treatment services
- Treatment resources required for the implementation of culturally and linguistically responsive treatment services
- Professionals who can work with frontline staff, patients, and managers to create inclusive and welcoming units

Additional dedicated OSH staffing resources are needed for the full implementation, tracking, and integration of Race, Ethnicity, Language, Disability (REALD) and Sexual Orientation and Gender Identity (SOGI) standards of data collection to drive decision-making processes at all levels of operations. This would include policy and practice implementation, provision of culturally and linguistically responsive and trauma-informed services, service quality improvement initiatives, and staff training for working with diverse populations. These resources are requested in the OSH policy package as OSH is moving towards utilizing REALD data to align treatment services with treatment needs specific to patients at OSH.

Contingent on the funding from this policy option package, during the 2023-2025 biennium, OHA will improve the staffing capacity at the OSH, invest in an infrastructure that recognizes, reconciles, and rectifies historical and contemporary injustices for patients and staff (outlined

above), and work towards the full implementation of REALD and SOGI data collection standards.

Measure 110

In response to the drug addiction and overdose rates in the state, Oregon voters passed Measure 110, which decriminalized the possession of substances for personal use and instituted a health-based approach to addiction and overdose. Senate Bill 755 ensured an equitable approach to implementation by mandating creation of an Oversight and Accountability Council (OAC), comprised of community members with lived experience, substance use disorder treatment providers, policy, and subject matter experts. The OAC has the sole authority to award BHRN funding or amend grant agreements. The OAC, in consultation with OHA, also supervises program implementation. This legislation created a paradigm shift in decision-making (external partners are decision-makers and OHA is in a supporting role) that required building new relationships and developing trust with community partners and the Council. This paradigm shift, coupled with ambitious implementation timelines and stretched OHA staffing resources due to the pandemic, led to an initial 8-month delay in implementation.

During the 2023-2025 biennium, OHA will continue this important work to support the 42 Behavioral Health Resource Networks (BHRNS) (spanning 36 Oregon counties consisting of 234 grant agreements, including 11 Tribal partners). Work will focus on extensions and revisions to current BHRN grant agreements (in progress) and aim to provide program and fiscal stability through 23-25 biennium.

Conclusion

The Oregon Health Authority along with the rest of the state of Oregon has experienced tremendous change, challenges and achievements. We acknowledge that we have experienced challenges with holding accountability around developing and supporting a culture of inclusion. That said, OHA is in the midst of our pursuit of our strategic goal to eliminate health inequities in Oregon by 2030, and doing so from a foundation of anti-racism. What we have done, are doing and will be doing to reach this goal are reflected in the strategies and focus areas described in this report. What we have presented here is representative of our efforts and commitment to diversity, equity and inclusion.

We value the support and investments from the Executive and Legislative branches of Oregon in recognition of the essential nature of this work. We welcome your questions and comments as we continue our work to serve the people of Oregon.

Background

Why a culturally specific approach is significant

The Oregon Health Authority (OHA) is embarking on a strategic planning process to identify the agency's goals for the next five to 10 years to continue to move toward improving the health of all people living in Oregon. As part of that effort, the agency has engaged culturally and linguistically diverse communities. OHA reached out to priority populations* who are most harmed by health inequities. These groups were selected specifically because the agency acknowledges the disproportionate harm of health inequities they face, as well as the historical and contemporary effects of structural and institutional racism and discrimination. To acknowledge and address this, the agency paused strategic planning efforts to ensure community engagement was respectful, meaningful and ultimately working toward building long-term relationships and trust.

These efforts are meaningful because OHA is deliberately planning, investing in and using new processes and strategies to ensure that engagement is meaningful, respectful, and culturally and linguistically appropriate. Creating and fostering trusting relationships with historically disenfranchised communities lays the groundwork for people to feel comfortable and have opportunities to share candidly about their experiences and needs. This allows OHA to better understand the full context of population-specific health inequities and to learn directly from communities about how to most meaningfully, strategically and sustainably address health equity in Oregon.

This process began by asking communities if they wanted to be engaged in providing feedback on the OHA strategic plan, and if so, how. It is important to note that these efforts were possible due to existing relationships and trust the Office of Equity and Inclusion (OEI) and the Community Partner Outreach Program (CPOP)† have fostered with diverse communities for many years. Also, the key to this effort was the resource investment and commitment made by OHA leadership to provide the support and resources communities needed to lead their own input sessions across the state.

---

* Priority populations include communities of color; Tribal communities including the nine federally recognized tribes of Oregon and other American Indians and Alaska Natives people; Immigrants; Refugees; Migrant and seasonal farmworkers; Low-income individuals and families; Persons with disabilities; and Individuals who identify as lesbian, gay, bisexual, transgender, or queer, or who question their sexual or gender identity. (ORS 413.042, OAR 943-021-0005)

† For more information about CPOP, please go to: https://oregoncpop.org

There were 22 in-person events in 11 counties with more than 400 participants. These events were conducted in seven primary languages (see Appendix A for details). Additionally, there were three remote participation options: one statewide webinar conducted in Spanish, one statewide survey in both Spanish and English, and a weekly radio call-in show in Spanish. Each event was led by either culturally specific community-based organizations or grassroots community members and was customized to be culturally and linguistically appropriate. This included having appropriate meeting formats, serving culturally appropriate food, and having known community leaders facilitate discussions in communities' preferred languages.

For OHA to meaningfully address health equity, the agency needs to adjust its strategies. By approaching community engagement in ongoing, culturally and linguistically appropriate ways, OHA is building trust and relationships to better understand communities, health inequities and what is needed to support the health and wellness of all Oregonians.

Lessons learned and logistical supports

These are the lessons learned highlights. More specific details about engagement events are available in Appendix C.

- Some communities did not want OHA present for their events. This reflects the distrust some feel toward government agencies due to historical and present-day injustices, and the need to invest time and resources in building relationships with communities. Despite this, many communities expressed the desire to get to know and have ongoing engagement with OHA.
- OHA needs more staff solely devoted to this work, to dedicate the time and capacity necessary for the full engagement process, including outreach, engagement and follow-up.
- More time is needed for community outreach. There were missed opportunities to engage some groups because the timeline for completing the outreach events was too aggressive. Some community leaders did not feel they had enough time for planning and outreach to do as good of a job as they wanted, so they declined altogether. Especially summertime, a high season for many Farmworkers and migrant communities working extra-long hours on evening and weekend, timing was a challenge for recruitment.
- Never assume all communities know who OHA is or what the agency does. There is not visibility of physical OHA offices in the community and unless someone from their own community explains OHA's function, the agency may get dismissed. There are great opportunities to create and strengthen agency visibility to marginalized communities by creating appropriate linguistically and culturally marketing materials.

- Every engagement is an opportunity to build new relationships by asking what communities need and how OHA can help; however, follow-through is key to building trust.
- Each engagement is also an opportunity to share information and resources, and to build the capacity of community members around key concepts related to health and wellness (health equity, social determinants of health, what are coordinated care organizations (CCOs), etc.). However, for input or feedback events, ensure OHA staff do not monopolize time by talking to participants for long periods.
- Always ask what formats for engagement are most appropriate and be creative with additional formats for people who cannot attend on a specific day or time.

The following were helpful logistical supports at the engagement events:

- Having a facilitator guide that was developed to explain the details and objectives of community engagement. This included a popular education toolkit to help facilitate communications and trust.
- Having at least two trained notetakers at each event.
- Before beginning, ask broad questions such as, "Define what health is to you?" "What do you think of when you think of health?" and "What are the social determinants of health?"
- Using audio recordings (when appropriate and the group agrees) and having the audio transcribed and translated for analysis after the event. This alleviated the need for detailed notes, and you don't lose the tone of comments made.
- Having multiple OHA staff attend to help with logistics and answering questions, but not so many staff that it becomes intimidating to the group.
- Taking time to explain OHA's purpose, role and key functions.
- Having easy-to-read materials and visuals to explain who OHA is.
- Depending on how familiar participants are with social determinants of health, time spent to explain this concept (see facilitator guide for more info).
- Writing each question on the chart paper, including the delta/plus feedback chart at the end. This helps participants refocus on the questions.
- Simplifying questions for participants by using plain language.
- Taking time to thoroughly explain the media consent form, as well as what audio, photos, and video would be used for.
- Using short videos to help explain key concepts.
- Using visual aids helps explain the social determinants of health to participants and to reference examples (see figure 1).

Figure 1. Economic, Cultural, and Social Conditions

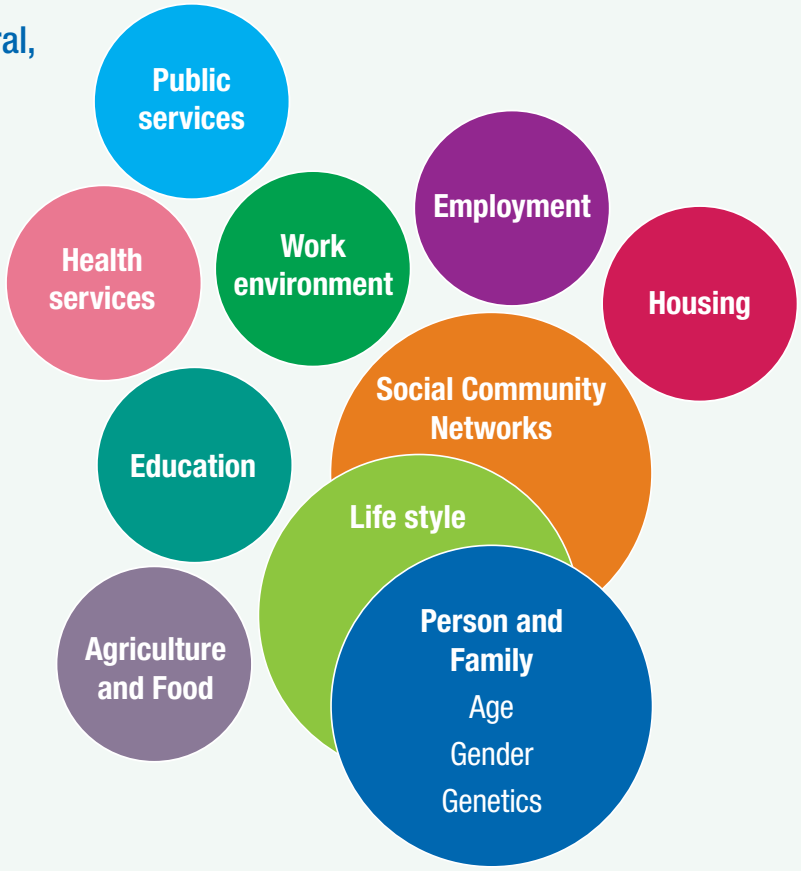

Figura 1. Condiciones socioeconómico y culturales

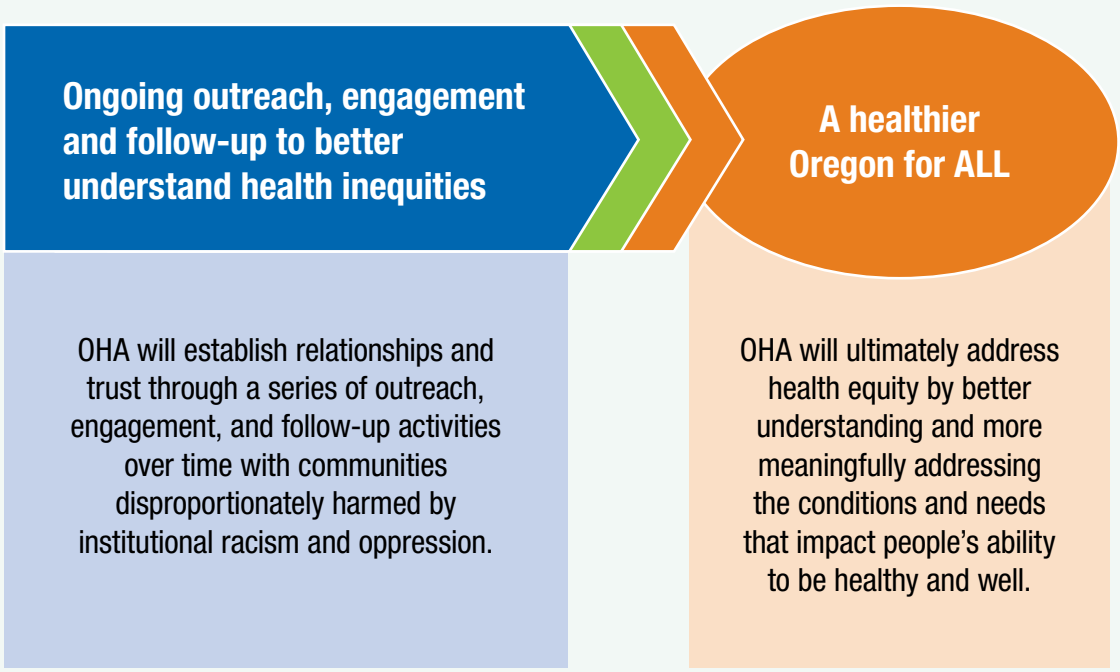
Limitations

It is important to mention there were limitations on collecting feedback from these priority communities.

- Time constraint: There was six weeks to collect feedback and coordinate logistics for the community engagement events. Most community organizations already had events scheduled throughout the summer. Although they were willing to participate and collaborate with us, it was additional work for them.
- Evaluators had a short time frame to analyze all the data from the over 20 community engagement events.
- Some communities did not want to be recorded or to have large group discussions. Therefore, notetaking in a way that reflected all the details of these discussions was especially challenging.
- Notetaking is a specific skillset that requires training and practice.
- Higher quality audio recorders are needed for data collection clarity.
- Access to timely and quality translation services was a challenge, and ultimately affected the quality of the data.



Recommendations

Utilizing a continuous community engagement model

OHA should shift away from engagement models in which interactions with communities are transactional and largely occur when the agency needs input, information or feedback for specific initiatives. Instead, the agency should consider a continuous community engagement model that values building long-term trust and relationships with communities.

By doing engagement work in this way, the agency will still be able to accomplish initiative-specific goals, but engagement will be more comprehensive and inclusive of all the state's populations. When communities have opportunities to engage in respectful ways and feel that they can trust OHA, they are more willing to openly share the barriers and challenges they experience; this helps the agency to better understand population-specific inequities. This can begin future dialogues about creative and sustainable solutions to uplift health equity in all communities across the state.

Figure 2. Continuous Community Engagement Model

Two keys to carrying out this model are: ensuring adequate time is allocated for engagement efforts; and ensuring there is the capacity for follow-up and timely feedback. As the agency begins to shift to a model of building trust and relationships, it will need adequate time to navigate sensitive dynamics such as distrust of government, and cultural and linguistic differences. Workforce diversity and non-defensive active listening strategies can help to mitigate some of these challenges. Engagement activities must be open to hearing community feedback, even when it does not appear to "fit" within the current frameworks the agency is using. There is endless wisdom in community experience, and it is key to be open to many ways of communicating, learning, and understanding.

Additionally, each time the agency engages the community it should develop a plan to set expectations around feedback and follow-up. For example:

1. How will OHA use the input or feedback? It is important to note that not every bit of feedback may be reflected and if not, why (feasibility, only using most common themes, etc.).
2. What will be the timeline to incorporate or carry out input or feedback?

3. How will communities know or become aware of new documents, processes, initiatives, etc., that they were providing input on?
4. Will there be an opportunity for the community to provide feedback on draft versions of the work they are commenting on?

Develop a community engagement team

OHA should develop an agency-wide team to focus solely on community engagement of priority populations* across the state. This team should accomplish its work via a community engagement-specific strategic plan that uses respectful, long-term strategies. Such a team could help coordinate efforts to lessen and eventually eliminate silos and duplication of work. It could also decrease input or feedback fatigue communities experience when asked similar things from multiple places within the agency. This approach would ultimately:

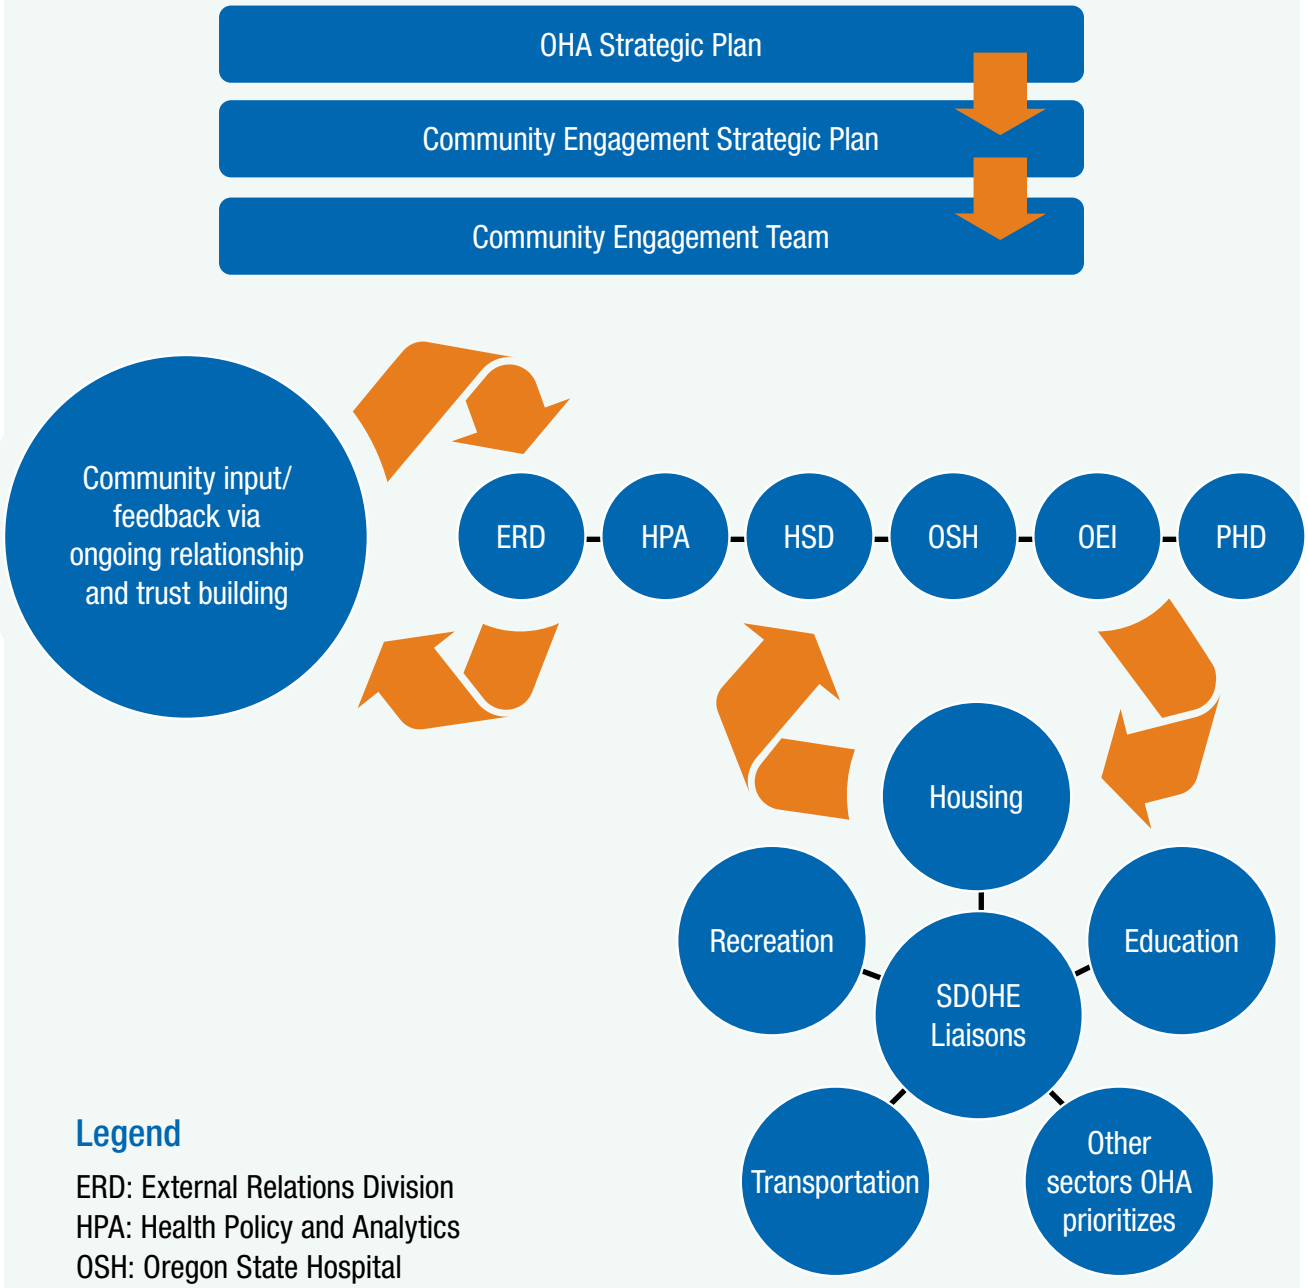
- Establish with these communities the trust and relationships needed to improve health outcomes and achieve health equity.
- Advance coordination and communication to ensure more strategic use of OHA capacity.
- Improve outreach and engagement so the agency is better informed to serve all Oregonians.

Team members would be stationed in the agency's various divisions but meet frequently as a team. While each team member would focus on division-specific work, those efforts will be braided into the agency-wide community engagement strategic plan and align with the agency's mission, vision and values. This effort must include the building of internal capacity around this work in each division so that staff outside this team understands and know the value of meaningful, culturally and linguistically appropriate community engagement, and how it applies to their own work.

To accomplish this OHA will need the following:

- An internal OHA steering committee to develop the community engagement team. The committee should be comprised of staff with demonstrated community engagement expertise.

* Priority populations include communities of color; Tribal communities including the nine federally recognized tribes of Oregon and other American Indians and Alaska Natives people; Immigrants; Refugees; Migrant and seasonal farmworkers; Low-income individuals and families; Persons with disabilities; and Individuals who identify as lesbian, gay, bisexual, transgender, or queer, or who question their sexual or gender identity. (ORS 413.042, OAR 943-021-0005)



- A team of staff located in each division solely devoted to accomplishing the agency's community engagement goals carrying out community engagement efforts. This would include the External Relations Division, Health Policy and Analytics Division, Health Systems Division, Equity and Inclusion Division, Oregon State Hospital, and Public Health Division. Depending on relevance and interest, it would also be critical to have a touchpoint with Tribal Affairs.
- Staff should have the following experience and competencies: bilingual or multilingual; bicultural or multicultural; demonstrated expertise in carrying out meaningful community engagement strategies; the ability to work respectfully with many diverse communities; understanding anti-racism, unconscious bias, health equity, social determinants of health equity; and lived experience.
- This team should have dedicated support from agency research analysts to assist with research and evaluation related to community engagement efforts.
- This team must have access to timely and high-quality translation services to succeed. Shared services do not have the necessary capacity for this. It must be included in the budget.
- Dedicated funding to support community engagement efforts, which should include line items referenced in the "Budget" section below.
- Administrative support is needed to assist with the logistics of completing, submitting, and tracking paperwork related to processing community engagement supports.

Social determinants of health equity liaisons

Barriers related to the social determinants of health equity (SDoHE) were frequently mentioned in feedback from engagement events. In addition to access to quality, affordable and appropriate health care, major themes included housing, nutrition, education, transportation, and recreation. Communities frequently highlighted the challenges of systems not communicating or coordinating efforts.

Staff recommends the creation of SDoHE liaison positions. This will allow OHA to begin to identify opportunities for coordination and collaboration to more strategically use resources and ultimately better serve Oregonians. The SDoHE liaisons should work closely with the community engagement team to understand and prioritize population-specific challenges that require stronger partnerships and focused efforts between OHA and other sectors.

Figure 3. Agency connections to community engagement

Legend

ERD: External Relations Division
HPA: Health Policy and Analytics
OSH: Oregon State Hospital
OEI: Office of Equity and Inclusion
PHD: Public Health Division
SDOHE: Social Determinants of Health Equity

Communications materials

OHA should have a core set of easily understandable resources in various formats (for example, written, video) readily available for community engagement purposes. They should also be available in multiple languages and ADA-accessible formats. This should include the following topics:

1. What is OHA and what is its role?
2. An organization chart with a brief description of each division's functions.
3. Materials defining and describing (with examples) key concepts that come up often in community engagement efforts (health equity, social determinants of health, etc.)

Investment in language access

Publications and Creative Services, part of ODHS|OHA Shared Services needs adequate resources to provide timely, accurate, complete, and consistent translations. They should follow the tenets of plain language and be culturally responsive. The translation process should include back translation* and plain language review. Staff should follow up with the source (community member or another partner) to confirm accuracy. All core communication materials listed above should be available in Oregon's 15 most commonly spoken languages, as well as all others upon request.

Staff recommends that OHA create an OHA staff translation team for greater internal capacity for this key support as well as a greater ability to manage timeliness and quality control for translations on any community engagement, community partners and community members materials.

Agency policies, procedures and fiscal management

In carrying out community engagement efforts, opportunities to address internal systemic barriers become apparent. Agency policies, procedures, contracts and agreements and fiscal management play a key role in determining what is allowable and feasible. These policies can either support or hinder meaningful community engagement work, and it is important to identify and analyze barriers and consider what potential solutions could be.

For example, as a result of community engagement efforts for the OHA strategic plan, the need for a policy that supports the use of childcare at community engagement events was identified and efforts are underway to develop this policy

* The process of back translation is when a translated document is converted back into the original language to ensure completeness, accuracy and readability.

for OHA. Relatedly, there is also the need to communicate policies and procedures that support community engagement work to internal staff and external partners to ensure clarity and consistent practices.

Decision-maker engagement with community

It is important to have OHA decisionmakers in attendance at engagement events. This demonstrates that the agency's leaders are investing time to hear from the community because they value community members' lived experiences and expertise. It is also an opportunity for OHA leaders to hear people's powerful stories firsthand, build relationships directly with community members, and better understand the context of people's lives and how it affects their health and wellness. Having staff with decision making authority attending community events can help lessen system challenges and support OHA in being more nimble and efficient when addressing community barriers to achieving health equity.

Budget

Having sufficient resources to support meaningful community engagement often makes the difference in people's ability to participate. It was critical that leadership allocated over $100,000 to supporting this effort. This ensured that communities had the resources they needed to conduct successful community engagement events.

Staff recommend that agency encourage divisions and units conducting community engagement to build necessary supports into budgets. The following line items should be included in future community engagement budgets:

- Agencywide training to build necessary competencies around understanding the need, value and purpose of meaningful and appropriate community engagement.
- Supporting technology and tools for collecting and analyzing qualitative and quantitative data.
- Research and evaluation support.
- Culturally appropriate catering.
- Childcare.
- Translation.
- Interpretation.
- Outreach and marketing.
- Participation stipends or gift cards.*
- Facilitation.
- Transportation and lodging.
- Administrative or indirect support for community-based organizations' outreach, coordination and payment processing work. This should generally be 10-12 percent, although the agency should consider budgeting at least 18 percent for Tribes as an equity consideration due to a lack of proportionate infrastructure support.

* Offering compensation for community members' labor to guide OHA efforts is important. It demonstrates gratitude for and value of the expertise provided and works to mitigate potential barriers to participation such as loss of wages from missing work. Compensation also works as an effective incentive to increase participation from community members.

Appendix A

Table of specific community engagement events

#	Lead organization or person	Location	Population(s)	Language(s)	Role of OHA
1	CPOP Community Partners: Mano a Mano, Interface, Northwest Human Services	Woodburn	Latino	Spanish	OHA facilitated, organized
2	CPOP Team	Virtual (statewide webinar)	Latino application assisters	Spanish	Regular OHA-facilitated webinar and discussion opportunity
3	Mid-Columbia Health Equity Advocates [a Regional Health Equity Coalition, (RHEC)]	Hood River	Latino	Spanish	Provide intro, help facilitate, answer questions
4	Eugene/Springfield NAACP	Eugene	African American, Latino, mixed race	English	Requested no OHA presence
5	Mid-Columbia Health Equity Advocates [a Regional Health Equity Coalition, (RHEC)]	Hood River, Radio Tierra: Entérate with Alejandro Aguilera Cano	Latino	Spanish	None requested
6	Olalla Center	Newport	Guatemalan and Latino	Mam Spanish	Set up and clean up, answer questions, help facilitate and provided visuals.
7	Eric Richardson, Eugene	Springfield	African American, Latino, mixed race	English	Requested no OHA presence
8	Eastern Oregon Health Equity Alliance/Euvalcree [a Regional Health Equity Coalition, (RHEC)]	Hermiston	Latino, Guatemalan indigenous	K'iche Mam Spanish	Set up/clean up, answer questions, help facilitate if needed, etc.

#	Lead organization or person	Location	Population(s)	Language(s)	Role of OHA
9	Mid-Columbia Health Equity Advocates [a Regional Health Equity Coalition, (RHEC)]	The Dalles	Latino	Spanish	Provide intro, help facilitate, answer questions
10	Oregon Health Equity Alliance [a Regional Health Equity Coalition, (RHEC)]	Portland	People of color	English	Help if needed, listen if not
11	Eugene/Springfield NAACP	Springfield	African American, Latino, mixed race	English	Requested no OHA presence
12	Oregon Health Equity Alliance [a Regional Health Equity Coalition, (RHEC)]	Portland	African immigrant	Swahili English	Requested no OHA presence
13	Eastern Oregon Health Equity Alliance/ Euvalcree [a Regional Health Equity Coalition, (RHEC)]	Ontario	Latino, Somali, Arabic speaking	Arabic Somali	Set up and clean up, answer questions, help facilitate if needed, etc.
14	Natives of One Wind Indigenous Alliance (NOWIA) Unete, Center for Farm Worker Advocacy	Medford	People with disabilities	English	Set up and clean up, answer questions, help facilitate and provided visuals
15	NOWIA Unete, Center for Farm Worker Advocacy	Phoenix	Latino, migrant, Farmworkers	English Spanish	Provide intro, took notes and answer questions
16	Eugene/Springfield NAACP	Springfield	African American, Latino, mixed race	English	Requested no OHA presence
17	Mid-Columbia Health Equity Advocates [a regional health equity coalition, (RHEC)]	Hood River	LGBTQIA2S+	English	Provide intro, help facilitate, answer questions
18	Mid-Columbia Health Equity Advocates [a regional health equity coalition, (RHEC)]	Celilo	Native American	English	Provide intro, help facilitate, answer questions

#	Lead organization or person	Location	Population(s)	Language(s)	Role of OHA
19	COFA Alliance National Network (CANN) and Marshallese Oregon Community Association	Salem	Compacts of Free Association (COFA): the Republic of the Marshall Islands	Marshallese	Provide intro, answer questions, help facilitate and took notes with the help of interpreter from their community.
20	Mid-Columbia Health Equity Advocates [a regional health equity coalition, (RHEC)]	Hood River	Community Health Workers	English	Provide intro, help facilitate, answer questions
21	Linn Benton Health Equity Alliance [a regional health equity coalition, (RHEC)]	Corvallis	Latino, African American, Arabic speaking	Arabic English Spanish	Set up and clean up, answer questions, help facilitate if needed, etc.
22	Asian Health and Service Center	Portland	Asian	Cantonese	Set up and clean up, answer questions, help facilitate if needed, etc.
23	Asian Health and Service Center	Portland	Asian	Vietnamese	Set up and clean up, answer questions, help facilitate if needed, etc.
24	Asian Health and Service Center	Beaverton	Asian	Korean	Set up and clean up, answer questions, help facilitate if needed, etc.

Appendix B

Community engagement event questions

Questions were intentionally developed, went through plain language review, reviewed by community members, translated, back-translated, and reviewed for plain language again after translation. The following questions were asked at each event.

English

1. What types of services help you, your family and your community to have better health?
2. What can OHA do to have a positive impact on your health, your family's health, and your communities' health?
3. What negative things affect your health, your family's health, and your communities' health? What can OHA do to help change these?
4. What are some situations that might affect your health, your family's health, and your communities' health in the next five to 10 years?
5. Which organizations or communities should OHA work with to improve your health, your family's health, and your communities' health?

Spanish

1. ¿Qué servicios ayudan a mejorar la salud de usted, su familia y su comunidad?
2. ¿Qué puede hacer OHA para tener un impacto positivo en la salud de usted, su familia y su comunidad?
3. ¿Qué cosas negativas afectan la salud de usted, su familia y su comunidad? ¿Y qué podemos hacer para cambiar esto?
4. ¿Cuáles podrían ser algunas situaciones que pueden afectar la salud de usted, su familia y su comunidad en los próximos 5 a 10 años?
5. ¿Con que agencias es necesario que se asocie OHA, para mejorar la salud de usted, su familia y su comunidad?

Appendix C

Facilitation guide

Spanish and English Facilitators Instructions Guide: This guide was created to help facilitators know how to lead community forums and present the objectives of community engagements effectively to collect feedback from unrepresented Oregon communities.

Why OHA needs public comments:

Introduction:

The Oregon Health Authority's strategic plan will determine where OHA will focus its time and resources over the next five to10 years.

Our strategic plan will focus on transforming health and health care over the next five to10 years, so OHA is achieving better health outcomes, making health care more affordable, and improving the quality of care. This strategic plan will help us guide what our priorities are in the long term, so it is important to think "big picture" about where OHA wants to go in terms of health in our state. Before OHA makes these decisions, OHA wants to learn from you about what you consider important to you and your communities.

OHA's Office of Equity and Inclusion (OEI) and the Community Partner Outreach Program (CPOP) have partnered to work on this project. Therefore, OHA is creating a statewide plan to engage and hear from communities across Oregon, especially for those who have historically not been involved as often.

- Good strategic planning occurs when OHA is fully informed of communities' concerns and needs, and about what is happening in communities.

Expectations for facilitators

Preferences:

- Discussions in people's native languages rather than using interpreters is preferred.
- Community groups should be facilitated under the guidelines of Popular Education. (Resource: https://multco.us/file/16372/download)
- Keep track of comments.

- Note-taking vs. audio recording (considerations for each method):
  - » Note-taking is recommended if:
    - Participants do not feel comfortable with audio recording.
    - The meeting space cannot facilitate a high-quality audio recording.
  - » Audio recording – (OHA prefers this method)
    - Ability to fully and accurately transcribe the discussion.
    - It allows for the discussion to flow naturally.
    - Facilitators and participants are always engaged

Before the events:

List of items to bring to events:

- Easel
- Markers
- Chart paper (write the definitions, questions, strengths and areas for improvement of this event)
- Notepads and pens and pencils
- Name tags
- Audio recorders (at least one per group)
- Media consents
- Confidentiality agreements

During the event:

- Either record or take notes of the discussion.
- Provide background information about what the purpose of the event is and why OHA is asking for input (for input on the OHA strategic plan).
- Ask the group the key questions provided by OHA, or similar questions so people can share their ideas and input.

After the event:

- Turn in any notes taken during the event and audio to OHA. If you need to follow up with someone after the event is over, please contact Monica Juarez MONICA.JUAREZ@oha.oregon.gov or Allison Varga, ALLISON.VARGA@oha.oregon.gov
- Once notes and recordings are transcribed and translated, they will be sent to the facilitators to review accuracy. OHA will send back a basic "what OHA heard" summary after all notes are compiled to facilitators.

Plan for the community event: Guide for participants:

Define what is the Oregon Health Authority (OHA) and its main purpose:

1. Define social determinants of health and make a connection to the strategic plan.
2. What is a strategic plan and why does OHA need your help to create one?
3. What is OHA's role and needs from you?
4. Five key questions (modifiable based on community needs)
5. What will OHA do with the information you provide to us?
6. Follow up plan
7. Strengths and areas for improvement for the event

Details, script and how to lead conversations:

1. **Does anyone know what OHA is? And what is the role of the agency?**

   OHA isn't just OHP — it has more to do with health and wellness in general in Oregon.

   The Oregon Health Authority (OHA) is the state agency responsible for making sure people in Oregon are as healthy as possible. OHA includes most of the state's health care programs, including Public Health and the Oregon Health Plan.

   In other words, because OHA works for the people of Oregon, OHA is interested in meeting people's needs.

   Now, let's talk about the Social Determinants of Health.

2. **Does anyone know what is the definition of social determinants of health (SDOH)? Or what are some ideas?**

   The social determinants of health (SDOH) are the conditions in which people are born, live, work and age. They are shaped by the distribution of money, power and resources at global, national and local levels. SDOH account for approximately 60 percent of people's health and are largely responsible for health inequities. These factors have an impact on both an individual's physical environment and health behaviors. To achieve health equity, where everyone has a fair and just opportunity to be as healthy as possible, it is essential to address the social determinants of health. It could include factors like transportation, housing, racism, and education, and really, the list is almost endless.

   Wellness is a more holistic approach that includes our environment, so to achieve our best health. Our mental, emotional and physical health needs to be in balance.

3. **What is a five- to 10-year strategic plan and what is the goal of having a strategic plan?**

   OHA is preparing to decide where OHA focuses time and money over the next five to 10 years. OHA's Strategic Plan will help guide what priorities are in the long term, so it is important to think "big picture" about where to go in terms of health for ourselves and our communities. Before OHA makes these decisions, OHA wants to hear from you about what is important to you and your communities.

   Effective strategic planning will occur when OHA is fully informed of the current concerns, needs, and realities in our communities.

4. **What does OHA need from you (the community)?**

   As an agency dedicated to serving people, OHA needs to hear and learn from all the people OHA strives to serve, especially those OHA hasn't done a good job of serving in the past.

   OHA is interested in knowing your thoughts, ideas, and opinions on what OHA could do to support and help improve the health of people in Oregon. It is important to make sure we're hearing and including all voices and views that represent all of Oregon's diverse communities – and are responsive to your community's needs.

   OHA is responding to community feedback that asked for increased community influence when OHA makes decisions. OHA especially wants to make sure we are truly listening to historically underrepresented communities.

5. **What will OHA be doing with the information once OHA receives it?**

   Each suggestion OHA hears will be carefully reviewed and considered for our Strategic Plan, and for other OHA efforts. Even if OHA is not able to immediately act on all of what OHA hears from communities, your ideas will help us know whom to partner with to improve the health of Oregonians. OHA is working on ways to keep you in the loop about how your feedback will be included, and OHA is committed to truly listening to you and your communities and being honest and open about how OHA does that.

   Your input will be considered by OHA's leaders as they develop the agency's plan. OHA will share the final plan with you, so you can see how your input helped shape it.

6. **Five key questions**

These are the questions OHA wants to hear from you about for our strategic plan.

Plain language English and Spanish questions to ask for the community engagement events summer of 2019.

English:

Health for you, your family, and your community!

For reference, use the Social Determinants of Health visual guide for each question, to help expand the ideas of the participants.

1. What types of services help you, your family and your community to have better health?
2. What can OHA do to have a positive impact on your health, your family's health, and your communities' health?
3. What negative things affect your health, your family's health, and your communities' health? What can OHA do to help change these?
4. What are some situations that might affect your health, your family's health, and your communities' health in the next five to 10 years?
5. Which organizations or communities should OHA work with to improve your health, your family's health, and your communities' health?

Spanish:

¡La salud de usted, su familia y su comunidad!

Usando la guía visual de los determinantes sociales de salud en cada pregunta, para ayudar a expandir las ideas de las personas presentes.

1. ¿Qué servicios ayudan a mejorar la salud de usted, su familia y su comunidad?
2. ¿Qué puede hacer OHA para tener un impacto positivo en la salud de usted, su familia y su comunidad?
3. ¿Qué cosas negativas afectan la salud de usted, su familia y su comunidad? ¿Y qué podemos hacer para cambiar esto?
4. ¿Cuáles podrían ser algunas situaciones que pueden afectar la salud de usted, su familia y su comunidad en los próximos 5 a 10 años?
5. ¿Con que agencias es necesario que se asocie OHA, para mejorar la salud de usted, su familia y su comunidad?

7. **Follow-up plan:**

   OHA will gather your comments and suggestions and send them to OHA leadership. They will read what you have to say and use comments like yours from all across Oregon to help create the Oregon Health Authority's Strategic Plan. If you would like to read this plan once it is completed, please contact Allison Varga, ALLISON.VARGA@state.or.us

Strengths and areas for improvement for the event:

- What did you like about this event?
- What would you improve?

Thank you! ¡Gracias!

Appendix D

Staff observations

The following are observations written by staff who attended the events and kept as an ongoing record of lessons learned. Staff often verbally debriefed and shared these observations following each event. Note there are no observations available for all events or from all staff who attended each event. Some communities requested there be no government or OHA presence.

Location: Woodburn
Populations: Latino
Date: June 25, 2019
Participants: 23

What went well and general observations:

- Lots of enthusiasm for the event; participants were promoting it on their own time.
- Good discussion about questions.
- More than double the expected attendance! (10 vs. 23)
- Participants would like there to be another larger event in Woodburn; go more in-depth with questions and try to create solutions as a community in partnership with OHA.
- People felt comfortable expressing challenging issues and opinions.
- Enough time built in for people to arrive late; important to expect that people won't arrive exactly on time from work.
- Everyone who attended spoke at least once.

Areas for improvement:

- Need childcare and a place for kids to be during the event.
- Need child-friendly activities and materials available.
- Need to include children in the headcount for food.
- "What is OHA" flyer did not work for people — lots of confusion.
- Very difficult to explain what OHA is or why it is important that OHA is hearing from people.

- Modify Question 4: add "what will the consequences be if things stay the same as they are now?" (community suggestion for clarity)
- Needed more food, drinks, and space; move than double expected attendance.
- More staff available to deal with unexpected situations (running out of food, etc.).
- Make sure the address is correct when sending out invitations.
- Not enough incentive cards. Needed to mail two, and one person left before they could get theirs.
- Consider having a multi-generational listening session where children can be with their family members during the discussion. Strongly recommend having a youth voice in the process.

Location: Hood River
Lead Organization: Mid-Columbia Health Equity Coalition (MCHEA), a Regional Health Equity Coalition (RHEC)
Populations: Latino
Date: Aug. 8, 2019
Participants: 12

What went well and general observations:

- Enthusiastic and engaged group, felt more like a group of friends having a conversation than a meeting.
- Good diversity of people in the community — a mix of ages, professions, and length of time in the valley.
- People were aware the audio recorders were there — not necessarily uncomfortable. However, there were multiple times that people stopped the discussion to interact with the recorder directly ("did you catch that?", etc.).
- Participants wanted OHA staff to take part in the discussion and show OHA is equal and not just there to "observe."

Areas for improvement:

- Better time of year — in the middle of harvest so everyone is working.
- Different parts of the valley so that OHA is meeting people where they are most comfortable and most accessible (Odell, Parkdale, etc.), especially since there are more Latinos outside of Hood River than in town.
- More advertising for bigger events. Participants think there is a lot of interest in the community for things like this, but there is a lack of awareness.

- Don't get there too early. A couple of The Next Door, Inc. (TNDI) staff members were anxious that no one had shown up to our event because staff was waiting around. Half an hour was plenty of time to help set up.

Cultural observations:

This was the first community engagement event and there was no visual aid for support. Additionally, questions were difficult to understand and therefore staff revised questions for clarity.

- This was the first community engagement event and there was no a visual aid for support. Additionally, questions were difficult to understand and therefore staff revised questions for clarity.
- Participants are part of a strong Latino advocates group.
- Participants felt comfortable sharing their thoughts and ideas.
- Participants have many more ideas for doing more community engagement and creating forums for families to know about OHP.

Location: Newport
Populations: Guatemalan community
Date: Aug. 11, 2019
Participants: 35

What worked well for this community engagement event?

- Good food and tamales
- The leaders and organizers
- Mam interpretation

What are some suggestions, lessons learned or areas for improvement in the future?

- There wasn't an opportunity to translate from Spanish to Mam. There also wasn't a Mam notetaker because Mam is a spoken and not written language.

Cultural observations:

- Families from Guatemala are considered new immigrants in Newport. They are mostly applying for asylum, so there are a lot of questions about status and benefits.
- Halfway through the meeting, OHA learned four adults spoke different Guatemalan dialects and were not understanding the conversation.

Location: Hermiston
Lead Organization: Euvalcree/Eastern Oregon Health Equity Alliance (EOHEA), a Regional Health Equity Coalition (RHEC)
Populations: Latino and Guatamalan
Date: Aug. 17, 2019
Participants: 12

What worked well for this community engagement event?

- Conversation was very rich. People gave good, honest feedback. The small group was ideal for a more dialogue-oriented conversation rather than simply answering questions.
- Euvalcree did a wonderful job with logistical preparation. Food, materials, etc.
- Participants were thoughtful and engaged despite it being a small group.
- Food was good but had tons of leftovers.
- Having sticky notes helped people get their thoughts in order.
- People liked the questions OHA was asking.
- Catering person was so enthusiastic about the event she showed up and participated despite not speaking Spanish!
- Participants got more outspoken as time went on — the first questions only had a few responses, while later ones had more.

What are some suggestions, lessons learned or areas for improvement in the future?

- Location: Good Shepherd hospital's location is kind of inconvenient. The event would have done better closer to the center of town. The conference rooms are also hard to find and not an intuitive entrance to the hospital.
- Date and time: Hermiston is a farming community and during the late summer months, many Latino families work on weekends or use that time to attend social functions. A better time to do this would be spring or right after harvest in October or November.
- OHA can simplify for next time and have OEI work directly with partners rather than have CPOP involved. Seemed to be too many layers of communication.
- Venue was confusing and not welcoming even though Good Shepard donated the space, hosting at a hospital isn't a good idea, especially after business hours.
- People had to enter through the Emergency Room doors, which was very intimidating.

- After more staff arrived, people could enter closer to the room. However, people had to know where to go to get there, which was confusing. (It was not the usual entrance and it wasn't clear that the other doors were open once it got darker).
- Hospitals in general are intimidating and stressful. This isn't a community where people usually go to hospitals for meetings regularly (for some communities it might be okay, but not for this one).
- Both a wedding and a quinceañera were happening at the same time as the meeting so most people were at one or both other events.
- The room was hard to set up and staff eventually needed to call tech support because staff couldn't figure it out.
- Needed to do more outreach (radio, hand out flyers, etc.).
- Sticky notes might not be the best for all audiences. Participants were very highly educated so might be more inclined to write vs. speak than other groups.
- Need to tweak the facilitation guide so people don't feel like they need to read the document word for word. It felt too formal when the facilitator was reading from the "script."
- Incentives for participants and facilitators were not clear, especially since there were a lot of Euvalcree staff members there to help out.
- OHA staff should be attending events outside the metro perimeter. It felt a bit frustrating that there was no interest from people who didn't have experience doing outreach in Eastern Oregon to attend this event.

Location: The Dalles
Lead Organization: Mid-Columbia Health Equity Advocates (MCHEA), a Regional Health Equity Coalition (RHEC)
Populations: Latino
Date: Aug. 20, 2019
Participants: 15

What worked well for this community engagement event?

- Participants indicated they felt heard.
- Participants liked the questions asked.
- Participants liked the Dinamica (ice-breaker activity) in the beginning.
- The discussion was good.
- Participants indicated this is the first time this kind of engagement has happened, and it felt helpful and not too tense.
- It felt like a safe place for participants.
- The facilitators were great.

- Participants said they liked getting meeting reminders over text messages.
- People expressed that they felt very comfortable in the meeting.
- People shared very openly about their experiences.
- Food was good.

What are some suggestions, lessons learned or areas for improvement in the future?

- Participants said they wanted reminders about meetings a week in advance.
- Participants indicated the announcement about the meeting could improve.
- People said they want to have a follow-up meeting about this and bring information back about the changes made.
- Better containers for taking food with them.
- More clear signs for people who haven't been to that room before.
- Holding events during harvest is always hard.

Location: Ontario
Lead Organization: Euvalcree/ Eastern Oregon Health Equity Alliance (EOHEA), a Regional Health Equity Coalition (RHEC)
Populations: Latino, Somali, and Arabic speaking community
Date: Aug. 24, 2019
Participants: 22

Logistics:

Great meeting location, time and time frame. Supplies and materials could have been coordinated a little better. I brought a box of miscellaneous supplies and they came in handy —scissors, duct tape, markers, etc.

Culturally specific needs: excellent food and language needs were met. Possibly more signage could have helped since there was another event happening at the same time. One community member reported they got confused and couldn't find the event, so they left.

What worked well for this community engagement event?

- Community Partner Outreach Program (CPOP) staff.
- Time frame.
- Location.
- Food.
- Multi-media.

- Comforting environment.
- Food was delicious! It felt very inviting.
- There were quite a few "youth council" members present which was great and provided some challenges. Some youth participants didn't feel comfortable responding in Spanish so some side conversations in English needed to be redirected. Some Spanish-only speakers were visibly uncomfortable with this but once they were re-integrated that seemed to dissipate. The people who understand both (not necessarily speaking both) ended up having a bi-lingual conversation that was really great but also had the potential to exclude some people. Something to keep in mind for next time is that a lot of younger people don't feel comfortable expressing themselves in Spanish even though they understand what is being said.
- A lot of attendees were repeats from the meeting last year—good to see so many familiar faces! Starting to feel like I am getting to know the community.
- Strong interest in follow up and wanting to stay involved — people want OHA to have a presence in the community.

What are some suggestions, lessons learned or areas for improvement in the future?

- Supplies on hand.
- Signage guiding people to an event.
- Have a separate "youth group" so younger people can express themselves in "Spanglish" without worrying about being out of place with the adults. There were some really important perspectives, especially around the future that there was some hesitation around sharing in the large group.
- More clear signs about where to go, especially if multiple events are going on.
- Higher-level OHA person should attend next time. It is good to be able to keep the meeting more casual. However, some people were not feeling prioritized.
- More consistent interactions with OHA are needed. The last engagement was almost a year ago.
- Recorders didn't really work very well. The tables were too close together and people were speaking softly to avoid having the room get too loud. Especially with having written sticky notes, OHA might not have any useful recordings from the meeting.
- There was another event going on in the same building at the same time (Anglo community auction or fundraiser?) which was confusing. People were accidentally going in the wrong door. Could hear music and announcements from another event even with the door closed which was disruptive at times, but not enough to stop the meeting.

Location: Medford
Lead Organization: Unete
Populations: Parent and advocates for children with disabilities
Date: Aug. 26, 2019
Participants: 19

What worked well for this community engagement event?

- Excellent facilitating.
- People from different sectors were represented in this meeting.
- People felt comfortable and happy.

What are some suggestions, lessons learned or areas for improvement in the future?

- Communities want more meetings; this is proof OHA needs them.
- Participants want a report copy showing how their input was included.
- Participants wanted representation from law enforcement.
- Need bigger visual aids (bigger pictures).
- Participants want to have an email on the next steps.

Cultural observations:

- Families and advocates felt trusting enough to share their thoughts openly without hesitation.
- An interpreter was translating simultaneously to a family member, and the family member was able to share her comments; thanks for the facilitation of the interpreter present.
- Family members were motivated to be there and have OHA presence in the room.
- Participants are very strong advocates and truly looking for more coordination and support from state, county and city to better serve their children.

Location: Phoenix
Lead Organization: Unete
Populations: Migrant Latino school parents
Date: Aug. 26, 2019
Participants: 20

What worked well for this community engagement event?

- The time the meeting was scheduled.
- Childcare provided.
- A local event and close to people (usually these types of meetings are held in Medford).
- It was in a location people trust, at a school where community members are familiar.
- The facilitators.
- The information provided.
- Participants indicated they feel trust and safe to share their comments.
- Food (next time they want something healthier, pizza is not healthy).

What are some suggestions, lessons learned or areas for improvement in the future?

- Participants want transportation to attend these types of events.
- The room was too hot.

Cultural observations:

- Most participants were the family members of school children.
- Participants felt comfortable.

Location: Celilo Village
Lead Organization: Mid-Columbia Health Equity Advocates (MCHEA), a Regional Health Equity Coalition (RHEC)
Populations: Native American
Date: Aug. 30, 2019
Participants: 22

What went well and general observations:

- Very engaged group, strongly wanting to discuss issues and what is happening in their communities.
- Food was good and there was a lot of it. Remember Canton Wok for next time.
- People liked the room setup, food and childcare — felt like it flowed well.
- Quite a few community leaders there. It was clear these were admired people with whom the community felt comfortable.
- Able to experience a community problem for ourselves. Staff had to wait for the train to go by before staff could leave.
- Situations are extremely complicated, and people are often looking for resources, understanding or solutions immediately because they needed it, ideally several years ago.
- Lots of "doorknob" comments — things people thought of last minute as they were about to leave. Indicates the need for more conversations.
- Everyone was very friendly and welcoming but could feel the isolation and precariousness. The fact that people still came out to talk about these issues after so many years of frustration and broken promises speak to the participants resilience and work ethic.
- Got to learn more about the connections with some more isolated, rural or frontier parts of the region — in a lot of ways they are more connected to Dufur and Biggs than The Dalles (which they are not happy about).

Areas for improvement:

- More outreach — people didn't feel that event was as well publicized in the village as it should have been.
- More door-to-door to make sure people know who aren't well connected.
- Someone from Tribal Affairs or OHA leadership should have been there.
- Lots of people from Washington or with stronger connections to Washington than Oregon felt left out of the discussion and like they should not be participating. They would like to balance this out by having a Washington-specific discussion, or even some sort of joint meeting because the issues they are experiencing do not stop just because state lines do.

- There was a miscommunication about the event location. About half the participants went to the preschool and waited almost an hour before making their way over to the longhouse to find out if it was the correct location.
- Tables and seating arrangement needs to be rethought — the original table space was OK for a small initial group of participants. However, once more people started to show up more tables were added in a way that made it difficult for newcomers to participate in the whole group discussion.
- Need to bring resources to these types of events — the needs are so great, even having the ability to do navigation or referrals would start to make a difference. Physical help (coats, etc.) would also be appreciated. Be responsive to the community. This will help build trust and relationships.
- Remember the "month cycle" — payday is usually the first of the month, and this event was on August 30

Location: Salem
Lead Organization: Oregon Marshallese Community Association
Populations: Marshallese Community
Date: Aug. 30, 2019
Participants: 16

What worked well for this community engagement event?

- Demos on how to make fresh juices.
- Small sandwiches and salads.
- Childcare providers.
- Very small groups (more intimate).

What are some suggestions, lessons learned or areas for improvement in the future?

- Large room with sink to wash the vegetables.
- More presentations on health topics:
  - » Tells more details on the health benefit on vegetables.
- OHA needs transportation because many families didn't have a car and OHA staff had to drive people to and from the event today.

Cultural observations:

- This specific group of Marshallese community members was very gentle with the way they approach. They don't come forward and ask many questions. They said, "We are very polite and don't remind. We sometimes don't know how to articulate our ideas."
- They are very close with each other and their cultural community.
- They expressed not having access to health knowledge (maybe need health education classes?).
- They expressed it is important to do something with the information they shared.
- They want the consistency of engagement.
- This was the first time this group had a meeting with the state where the state comes to their community this way. The people were very friendly and accepting.

Location: Corvallis
Lead Organization: Linn Benton Health Equity Alliance (LBHEA), a Regional Health Equity Coalition (RHEC)
Populations: Latino and African American
Date: Sept. 10, 2019
Participants: 20

What worked well:

- Having food at the meeting.
- Having an interpreter on hand if needed.
- Pre-prepping facilitators and event leads.
- Providing background on who OHA is and what the social determinants of health are.
- Breaking into groups based on preferred language and having people discuss in their preferred language versus having interpreters.
- Recording the audio of the event versus the distraction of taking notes or losing the participation of a person to take notes.
- Having OHA leadership attend. This demonstrates the importance of community voice to the agency, as well as leadership hearing community input and needs first-hand to inform future efforts.

Areas for improvement:

- More time for outreach to the community. OHA didn't have the representation from Arabic speaking community that OHA was hoping for.
- Arabic sign-in sheet was incorrectly translated via Shared Services.
- Hold an event at a site where there's sufficient free parking.
- Have an event in the evening or on the weekends to accommodate more people's schedules.
- Have one facilitator, it works better than two or more.
- Need to be better prepared to explain what CCOs are in plain language.

Location: Portland
Lead Organization: Asian Health and Services Center (AHSC)
Populations: Chinese (Cantonese)
Date: Sept. 11, 2019
Participants: 15

What went well and general observations:

- Super enthusiastic and engaged group! Very lively conversation.
- Participants expressed to the facilitators that they would like to see a repeat of this meeting with more participants — they meet regularly with a larger group and would like those people to have an opportunity to participate as well.
- Good to have the OHA flyer translated ahead of time — people liked having the reference during the meeting, even though they didn't want to hold onto it after they were done.
- Good to have elders' perspective — only had one younger couple who just moved from Hong Kong, the rest were seniors.
- Transportation was important — regular transport back to the senior housing was arranged in conjunction with the regular senior meals program at AHSC.
- Facilitators did a great job — there was a lot to keep track of and they managed to keep the conversation on track despite the relative chaos.

Areas for improvement:

- Group didn't like that I was there without understanding what they were saying — facilitators started questions in just Cantonese, then switched to interpreting when someone said they felt uncomfortable with me "just sitting there" — so I started taking notes on the interpretation.
- Conversation style is that a lot of people are talking at once — not sure staff was able to capture the full conversation in English, but it seems participants and facilitators understood what was going on.

- Plan better for media consent and explain why OHA wants to take photos — people weren't happy to sign something they couldn't read.
- More lead time in the future — facilitators were excited about the opportunity but also felt somewhat caught off guard about the timeline speed.

Location: Portland
Lead Organization: Asian Health and Services Center (AHSC)
Populations: Vietnamese
Date: Sept. 12, 2019
Participants: 11

What worked well:

- Providing background on who OHA is and our role.
- Taking the lead from the community event point person to be in more of an observation role as OHA staff.
- Sticking to the agenda as requested by the community lead, Cang.

Areas for improvement:

- Would be great to have been able to send bi-lingual and bi-cultural staff who could speak Vietnamese to this event.
- Need materials about what the social determinants of health are in the top 14 languages, and specifically for this event, in Vietnamese.
- Needed more time to plan this event, but still got a lot of helpful input. OHA could have had a huge turnout of participants if OHA had more time.
- More time before the event to discuss with facilitators what they prefer or need from OHA staff during the event in more detail.

Location: Beaverton
Lead Organization: Asian Health and Services Center (AHSC)
Populations: Korean
Date: Sept. 12, 2019
Participants: 9

What went well and general observations:

- Facilitators (Maria) were the ones who had been wanting AHSC to host from the beginning, so it was nice to come full circle, and to know that the facilitators wanted to do this and didn't feel pressured.
- Modified format so the majority of time was available for people to write their comments instead of speaking to them. This was identified by facilitators as the most culturally appropriate format.

- A couple of participants came early so they could share their comments without having to single themselves out.
- Participants were not comfortable with photos, recording, etc. All but one declined the consent form outright.
- Participants asked some really difficult and interesting questions about the budget process that I wasn't sure how to answer, but people were understanding and curious about learning more.
- Facilitators anticipated a quiet group, so they grouped the discussion questions all together at the end of the writing period to avoid pressuring people to speak to all questions.
- Facilitators pulled me aside before the meeting to give a "cultural briefing" as part of the run-of-show discussion which was very helpful in understanding some dynamics and modifying my behavior and strategies as a result.
- Facilitators thought the "What is OHA" document translation was really good quality.

Areas for improvement:

- More accessible room — had to have a key to get into the bathroom.
- Re-think sign-in sheets and make sure they are translated. Participants strongly preferred to be anonymous on sign-in sheets (initials only) and several identified that they don't want to be contacted, which is pretty different from the other populations, where that is uncommon.
- A lot of confusion about OHA vs. OHP — even one facilitator kept having to catch herself from saying OHP when she meant to say OHA.
- Have snacks available? Only tea was available which worked fine, but small snacks might have been nice to have as well.

Healthier Together Oregon

2020–2024 State Health Improvement Plan

September 2020

Oregon Health Authority

Acknowledgments

- OHA acknowledges there are institutional, systemic and structural barriers that perpetuate inequity and have silenced the voices of communities over time.
- OHA is committed to partnerships, co-creation and co-ownership of solutions with communities disproportionately affected by health issues so they can actively participate in planning, implementing and evaluating efforts to address health issues.
- OHA recognizes community-engaged health improvement is a long-term and dynamic process.
- OHA is striving to engage with communities through deliberate, structured, emerging and best practice processes.
- OHA is striving to make engagement with public health effective for communities, especially those communities that experience institutional, systemic and structural barriers.

Healthier Together Oregon reflects the contributions of countless people in our state. The Oregon Health Authority (OHA) is humbled by the hundreds of partners who shared their lived and learned experiences by serving on the PartnerSHIP and related subcommittees. OHA is grateful to members of the public who responded to surveys, raised their voices at meetings and shared thoughts via email. Finally, OHA recognizes the colleagues across the agency who responded to requests for help.

Dear Colleagues,

OHA is launching Healthier Together Oregon (HTO), the 2020–2024 State Health Improvement Plan (SHIP), during extraordinary times. COVID-19 has shined a bright spotlight on the impacts of structural racism in our society. Black, Indigenous, people of color and American Indian/Alaska Native people (BIPOC-AI/AN) have lived with the effects of discrimination, bias and oppression for centuries. Their disproportionate experience of disease and death during the COVID-19 pandemic is a painful reminder of institutional failure to address historical and current racism.

The impacts of COVID-19 will be with us for years to come. HTO is a timely tool to ensure an equitable recovery from this pandemic. HTO is a tool for individuals, organizations and communities working to achieve health equity. The priorities and strategies contained within this plan get at the root causes of poor health. While the 2015-2019 SHIP addressed traditional public health concerns such as tobacco and immunizations, the priorities of HTO go further upstream to address the social determinants of health and inequities. These root causes of health include racism, economic stability, and access to quality education, healthy foods, and transportation options. These root causes of health are complex and require the focused attention of a number of sectors, including public health.

HTO is the outcome of a modernized public health system. OHA took a very different approach for developing this plan. Through relationship with trusted community partners, OHA put community in the driver's seat. The PartnerSHIP, a community-based steering committee, made the final decisions for the priorities and strategies. Those decisions were informed by public health data and qualitative stories from affected communities to add critical information to our data gaps.

While these have been trying times, the pandemic is highlighting the resilience of communities. Oregon is making national news for our efforts to undo systemic racism. OHA is committed to building off these strengths and to the strategies identified in this plan. While improving health is the work of OHA, it is not our work alone, and we look to strengthened partnerships with others who are already doing this work.

Respectfully,

Pat Allen
Director
Oregon Health Authority

Lillian Shirley

Executive summary

Healthier Together Oregon (HTO) is the 2020–2024 State Health Improvement Plan for Oregon. HTO is a five-year plan that identifies our state's health priorities. It includes strategies that will lead to better health outcomes.

HTO is a tool for anyone wanting to improve their community's health. It is meant to inform community health improvement plans and state agency policies, partnerships and investments.

HTO's primary goal is to achieve health equity. Its vision reads:

> *Oregon will be a place where health and well-being are achieved across the lifespan for people of all races, ethnicities, disabilities, genders, sexual orientations, socioeconomic status, nationalities and geographic locations.*

Grounded in data and community voice, HTO identifies strategies to advance equity for these priority populations: Black, Indigenous, people of color, and American Indian/Alaska Native people (BIPOC-AI/AN), people with low incomes, people who identify as LGBTQ+, people with disabilities, and people living in rural areas.

In early 2019, the PartnerSHIP identified five priorities:

- Institutional bias
- Adversity, trauma and toxic stress
- Behavioral health
- Economic drivers of health, and
- Access to equitable preventive health care

COVID-19 has worsened the trend in each of these priorities. The pandemic has exacerbated unjust racial disparities. HTO is a tool for our state to recover from COVID-19.

More than 100 partners gathered to identify goals, strategies and measures for the priorities. They identified 62 strategies and wove them across an implementation

framework that speaks to the interconnectedness of our health priorities. HTO will report key indicators and short-term measures each year to help track and communicate our progress.

HTO is a key initiative of the Oregon Health Authority (OHA). However, OHA is not alone in this effort. We are all responsible for health. HTO welcomes new and existing partners to collectively and equitably improve Oregonians' health.

For more information about HTO and how to get involved, visit healthiertogetherOregon.org.

Introduction and background

Healthier Together Oregon (HTO) is Oregon's 2020–2024 State Health Improvement Plan. The five-year plan identifies our state's health priorities with strategies that will lead to improved outcomes. HTO's primary goal is to achieve health equity. It is a tool for anyone wanting to improve their community's health. HTO informs community health improvement plans and state agency policies, partnerships and investments.

HTO identifies strategies to advance health equity in five priorities:

- Institutional bias
- Adversity, trauma and toxic stress
- Behavioral health
- Economic drivers of health, and
- Access to equitable preventive health care.

Healthier Together Oregon

Vision

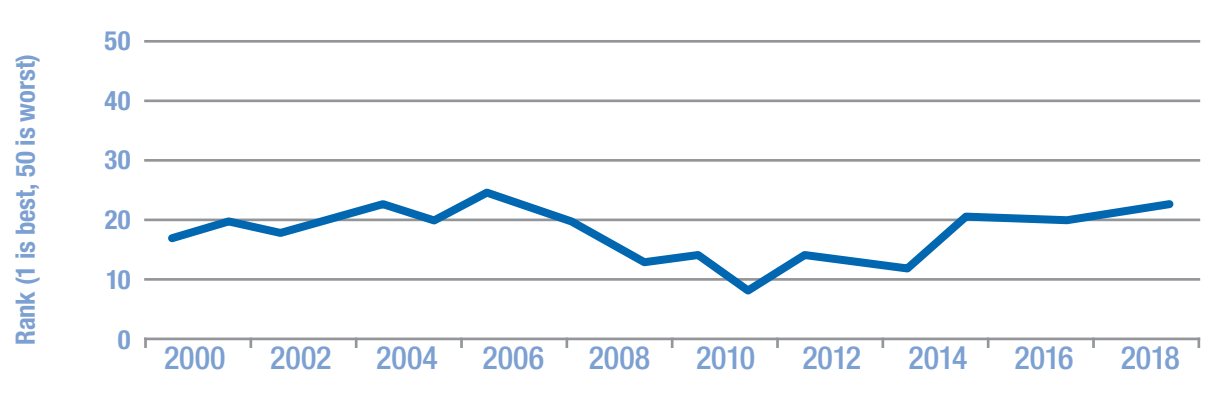
Oregon will be a place where health and well-being are achieved across the lifespan for people of all races, ethnicities, disabilities, genders, sexual orientations, socioeconomic status, nationalities and geographic locations.

Values

- Equity and social justice
- Empowerment
- Strengths-based
- Authentic community input
- Accountability

In early 2019, HTO named these priorities because they:

- Are upstream determinants of health
- Affect some communities more than others, and
- Have a major effect on our health.



The COVID-19 pandemic has worsened the short- and long-term trajectory for health in vulnerable communities. The pandemic highlights the unjust racial disparities in each of these five priority areas. It also underscores the need for connecting, collaborating and taking care of one another. HTO is a timely tool for our state's recovery from COVID-19.

The Oregon Health Authority Public Health Division (OHA-PHD) provides backbone support and coordination for HTO. As part of requirements for public health accreditation, OHA-PHD completes a State Health Assessment and State Health Improvement Plan every five years.

HTO is a key initiative of the Oregon Health Authority (OHA). However, OHA is not alone in this effort. We are all responsible for health. HTO welcomes new and existing partners to collectively and equitably improve Oregonians' health.

According to America's Health Rankings, Oregon's state of health is declining. Since 2012, our national ranking in health has dropped, and we currently sit 22nd of 50 states for overall health.

Figure 1: Oregon health ranking among U.S. states

OHA has developed a clearer understanding of how the agency can affect change to the social determinants of health and equity. Quality education, safe homes and neighborhoods, living wage jobs, and access to health care are examples of social determinants of health. They are the primary drivers for people's good or poor health. Significantly changing people's access to these social determinants can increase all Oregonians' health and especially for the priority populations in this plan. These groups face major barriers because of systemic racism, oppression, discrimination and bias. These barriers create great health disparities across Oregon, especially in rural areas. More must be done to reduce the health inequities affected communities experience. Improving the health of everyone in Oregon is complex and takes time. No single sector or agency can do this work on its own.

Priority populations for HTO:

- Black, Indigenous, people of color, and American Indian/ Alaska Native people (BIPOC-AI/AN)
- People with low incomes
- People who identify as lesbian, gay, bisexual, transgender, queer and questioning (LGBTQ+)
- People with disabilities
- People living in rural areas of the state

OHA's investment in modernizing the public health system will bolster Healthier Together Oregon. Developing and carrying out the SHIP is a core public health function of policy and planning. It will rely heavily on public health's other foundational capabilities. The 2020–2024 SHIP planning process is a primary example of a modernized approach to our work.

Health equity framework

HTO's primary goal is to achieve health equity for BIPOC-AI/AN, people with low incomes, people with disabilities, people who identify as LGBTQ+ and people who live in rural areas. These groups experience major health inequities because Oregon and U.S. systems that determine access to these resources are designed for people who typically identify as white, straight, English-speaking, able-bodied, cis-gendered and male. People at the intersection of more than one affected community, e.g., people who are Black and transgender, find these systems especially oppressive and hard to navigate. People in power positions may not be intentionally racist. However, our systems are racist because of implicit and institutional bias.

Health equity:

Oregon will have established a health system that creates health equity when all people can reach their full health potential and well-being and are not disadvantaged by their race, ethnicity, language, disability, gender, gender identity, sexual orientation, social class or the intersections among these communities or identities or other socially determined circumstances.

Achieving health equity requires the ongoing collaboration of all regions and sectors of the state, including tribal governments, to address:

- The equitable distribution or redistributing of resources and power, and
- Recognizing, reconciling and rectifying historical and contemporary injustices.

(Oregon Health Policy Board – Health Equity Committee, 2019)

In Figure 2, the fence illustrates structural racism and discrimination. The fence was erected centuries ago, with our national and state history of genocide, slavery and exclusion. Although these overtly racist actions are now a part of our past, this fence is still standing today as seen in countless examples of modern-day racism and discrimination. As shown in the "Equality" section, the fence continues to make it impossible for some of us to see the field, which contains the social determinants of health. The social determinants of health are the primary drivers of our health. To ensure everyone's access to the field, we can take two steps. The first is "Equity," or equitable action, which redirects resources to oppressed communities as seen in the shifting of boxes to uplift the most marginalized.

Figure 2: Equality, equity and liberation

Equality

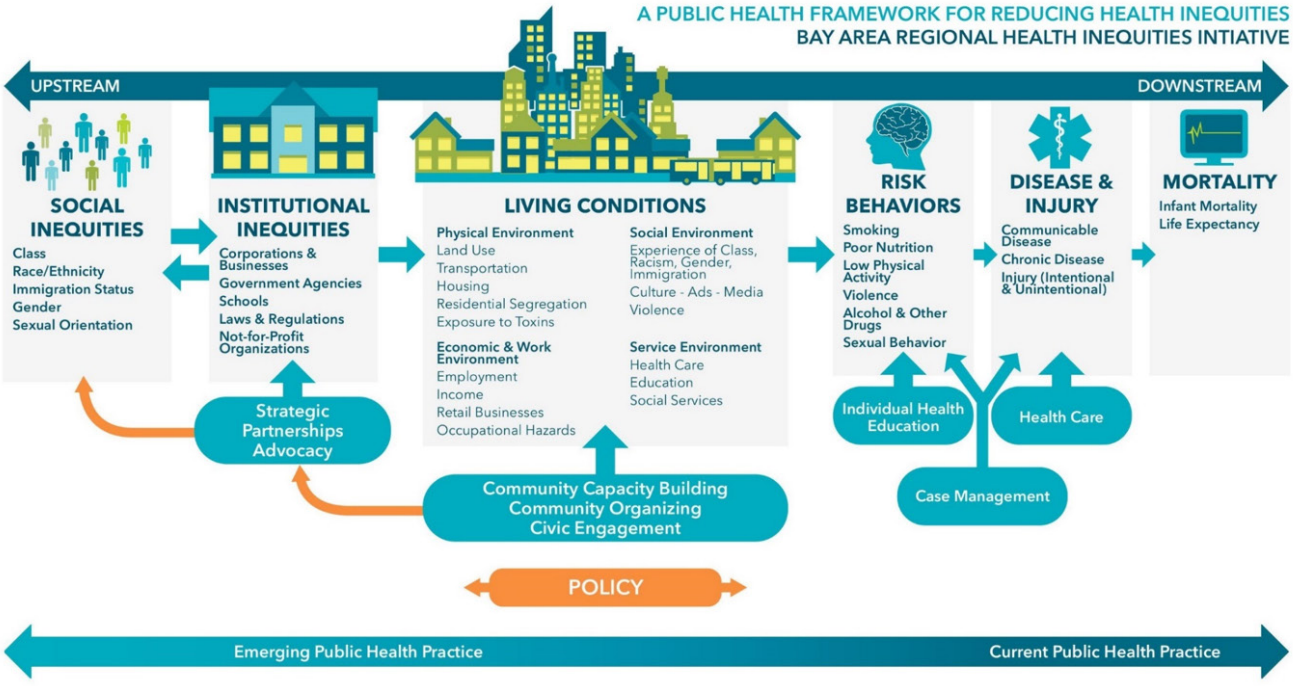
This image depicts EQUALITY. All individuals are being treated equally with the same supports. As shown, not all start from the same position; some have a height advantage. This challenges the assumption that everyone benefits from the same supports.

Equity

This image depicts EQUITY. The people are being treated equitably. It demonstrates that when different individuals are given different supports, it makes equal access possible for all of them.

Liberation

This image depicts LIBERATION. The barriers have been removed and supports are no longer needed. The inequity has been addressed.



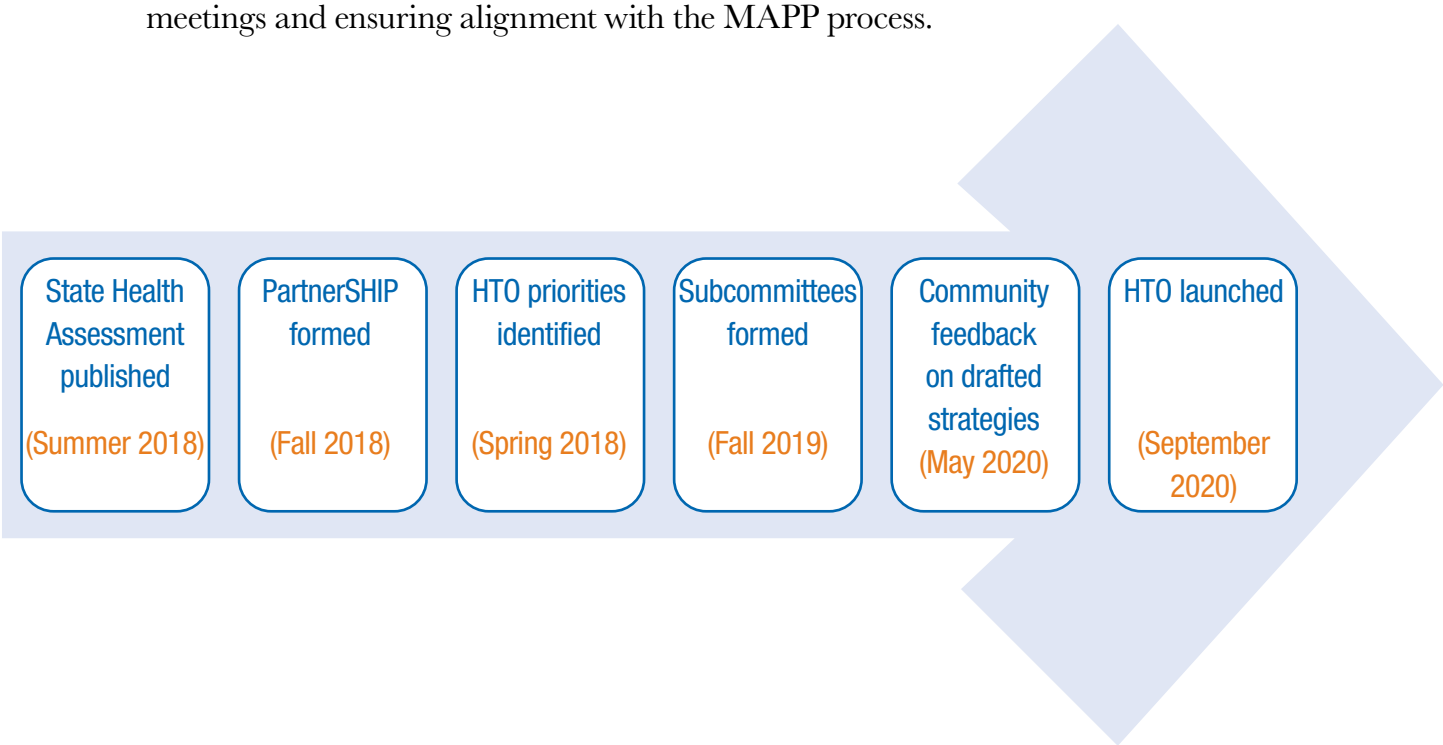
Second, we need to tear down the fence, or dismantle the institutional bias that has created these barriers in the first place, leading to liberation for us all. It is only when we remove the fence that everyone can see the field or access the social determinants of health.

Figure 3 illustrates how the upstream social and institutional inequities (the fence) lead to impacts on our living conditions (ability to see the field), and downstream behaviors and health outcomes. The strategies of HTO will enact change in partnerships, policy and investment to affect improvement in inequities and living conditions. Enacting equitable change in the social determinants of health will lead to improvements in downstream health outcomes. These improvements will come from increased access to the personal and community resources needed for health as well as changes in health behaviors used to cope with the trauma and toxic stress of oppression, discrimination and inequities. These changes will ultimately lead to flattening disparities in disease, injury and death, and to improving life for us all.

The COVID-19 pandemic has reminded us of the urgent need to end race and other identity-based inequities. While the road to liberation is our ultimate destination, undoing and redressing centuries of oppressive systems will take time. The equitable strategies and actions provided in this plan provide immediate solutions for the next five years to ensure an equitable recovery from COVID-19.

Figure 3: Public health framework for reducing health inequities

(Reproduced with permission from the Bay Area Regional Health Inequities Initiative)



Process of development

The Oregon Health Authority designed HTO as a community-driven strategic planning process for improving health, using the Mobilizing for Action through Planning and Partnerships (MAPP) framework. The MAPP framework informed the 2018 State Health Assessment (SHA) and the planning process for HTO. The PartnerSHIP, a community-based steering committee, formed in 2018 to provide guidance, direction and decision-making for Healthier Together Oregon. The PartnerSHIP is made up of agencies serving priority populations and potential implementers of the plan. The PartnerSHIP set the vision and values, and identified the five priorities for the plan based on State Health Assessment and Indicators data and extensive community feedback.

In fall 2019, subcommittees formed with people from more than 68 organizations representing public health, health care, social services, education, academia, transportation, housing and the business community. Subcommittees were charged with identifying goals, key indicators, strategies, short-term measures and activities to inform implementation.

Finally, a core group of staff within OHA-PHD provided overall coordination support to the planning process, staffing the PartnerSHIP and subcommittee meetings and ensuring alignment with the MAPP process.

HTO included significant community input. Two community feedback processes occurred during development: the first identified priorities and the second informed strategy development. Community-based organizations that work in and with affected communities received funding to amplify their voices. OHA also disseminated surveys in English and Spanish through partners around the state.

Implementation and accountability

HTO aims to affect change in complicated, persistent social problems. The Oregon Health Authority, under direction of the PartnerSHIP, will provide overall coordination for this work. However, HTO will only make progress in partnership with others. This plan aims to be a tool for agencies and organizations to work together, align efforts, and share what's working and not working to improve health.

The PartnerSHIP will provide oversight and direction throughout HTO's implementation. As the advisory body to OHA-PHD, the Public Health Advisory Board will also support implementing the strategies and advising on funding to implement HTO.

HTO will broadly share annual progress reports. This will provide:

- A summary of actions undertaken in strategy implementation
- Updates to measures and indicators, and
- Revisions to annual work plans.

OHA hopes this annual reporting will provide effective and meaningful accountability for partners engaged in this work. OHA also hopes this reporting will ensure transparency for affected communities to whom this work is ultimately accountable.

Priorities

The PartnerSHIP identified five priorities for HTO:

- Institutional bias
- Adversity, trauma and toxic stress
- Behavioral health
- Economic drivers of health, and
- Access to equitable preventive health care.

These priorities, which affect many people with often serious consequences, are upstream determinants of downstream health outcomes and affect some communities more than others. Subcommittees identified the goals for each of the priority areas.

Institutional bias

Institutional bias is defined as the tendency for resources, policies and practices of institutions to operate in ways that advantage white, heterosexual, cis-gendered, able-bodied individuals and communities. This discrimination results in adverse health consequences for underrepresented groups, such as people of color, people with low incomes, people with disabilities and people who identify as LGBTQ+.

Goals:

- Expose and reduce the impact of institutional biases that influence health, by
- Identifying and championing work across systems, structures, polices, communities and generations, so that
- All people in Oregon are empowered and have the opportunity to participate fully in decisions to achieve optimal health.

Adversity, trauma and toxic stress

Conditions that cause adversity, trauma and toxic stress include abuse and neglect, living in poverty, incarceration, family separation, and exposure to racism and discrimination. These events have a lifelong effect on health and are correlated with things such as substance use, suicide and heart disease.

Goals:

- Prevent trauma, toxic stress and adversity through data-driven policy, system and environmental change.
- Increase resilience by promoting safe, connected and strengths-based individuals, families, caregivers and communities.
- Mitigate trauma by promoting trauma-informed systems and services that assure safety and equitable access to services and avoid re-traumatization.

Behavioral health

Behavioral health includes mental health and substance use. Oregon has one of the highest rates of mental illness in the country. Mental distress can lead to lower quality of life, unemployment and increased rates of suicide. Use of alcohol, opioids, methamphetamine and other substances have a significant impact on many families. Although described as behavioral health, these strategies are specific to mental health. While all of the priorities impact substance use, strategies related to alcohol and drug use can be found in the Alcohol and Drug Policy Commission Strategic Plan.

Goals:

- Reduce stigma and increase community awareness that behavioral health issues are common and widely experienced.
- Increase individual, community and systemic resilience for behavioral health through a coordinated system of prevention, treatment and recovery.

Economic drivers of health, such as housing, transportation and living wage jobs

Economic drivers of health include housing, living wage, food security and transportation. Poverty is a strong predictor of poor health. Many people who have a job are struggling to get out of poverty due to the high cost of living or raising a family. People living in poverty experience higher rates of premature death, houselessness, mental distress and food insecurity.

Goals:

- Increase the percentage of Oregonians earning a livable wage by raising public awareness of the correlation between health and economic sufficiency and advocating for evidence-based policies to improve economic sufficiency.

- Ensure that all people in Oregon live, work and play in a safe and healthy environment and have equitable access to stable, safe, affordable housing, transportation and other essential infrastructure so that they may live a healthy resilient life.
- Increase equitable access to culturally appropriate nutritious food regardless of social or structural barriers by addressing the underlying issues in food availability.

Access to equitable preventive health care

Despite an increasing number of people with health insurance, many are challenged to get to a health care provider or see a dentist due to provider shortages, transportation barriers or health care costs. They also may not feel comfortable with their provider due to language or other cultural difference.

Goals:

- Increase equitable access to and uptake of community-based preventive services.
- Increase equitable access to and uptake of clinical preventive services.
- Implement systemic and cross-collaborative changes to clinical and community-based health-related service delivery to improve quality, equity, efficiency and effectiveness of services and intervention.

Implementation framework

To achieve the goals, subcommittees identified 62 strategies across the five priorities. Subcommittees identified strategies within three levels of intervention:

- Individual health-related factors
- Daily living conditions, and
- The broader social, economic, political, environmental and cultural context that affects our health.

To determine strategies, subcommittees aligned with other state agency strategic plans, community health improvement plans, other state health improvement plans, and technical guidance documents provided by partners and subject matter experts.

The implementation framework weaves the strategies across eight areas. This implementation framework attends to the intersectionality of the priority areas, reduces redundancies in strategies, and provides a framework for communicating about the plan to a broad audience. This framework will also help make progress on strategies while partnering with others. Annually updated implementation plans will provide more details about the supporting activities, short-term measures and accountable partners.

The eight implementation areas are:

- Equity and justice
- Healthy communities
- Healthy families
- Healthy youth
- Behavioral health
- Housing and food
- Workforce development, and
- Technology and innovation.

Figure 4: Implementation framework

Figure 4 illustrates how the strategies, indicators, implementation areas and priorities drive toward the HTO vision of health equity.

Equity and justice

Oregon has a unique history of white supremacy. This history and current institutional racism has created disadvantages for communities that are real, unjust and unacceptable. COVID-19 has shined a spotlight on the impacts of systemic racism; COVID-19 has disproportionately affected BIPOC-AI/AN communities in infections and death. All people in Oregon feel the stress of COVID-19, but non-white communities have the most burden. To increase health and reduce inequities for affected communities, institutions need to change how they do business. We will only reach our equity goals through co-creation and power-sharing with communities.

Racial equity needs to be built into everything state agencies do. Policies and initiatives need to rectify past injustices while honoring the resilience of communities of color. Until historically marginalized populations share decision-making authority in our state, decisions will favor the dominant culture, reinforcing institutional bias and contributing to disparities. Funding needs to reflect greater investment in communities that have been affected. BIPOC-AI/AN-led committees should be funded to inform state agency plans, policies and budgets. Agencies need to collect and analyze data to understand the unique needs of communities. The following strategies have been identified to advance equity and justice:

- Declare institutional racism as a public health crisis.
- Ensure state health indicators are reported by race and ethnicity, disability, gender, age, sexual orientation, socioeconomic status, nationality and geographic location.
- Require state agencies to commit to racial equity for BIPOC-AI/AN in planning, policy, agency performance metrics and investment.
- Ensure state agencies engage priority populations to co-create investments, policies, projects and agency initiatives.
- Build upon and create BIPOC-AI/AN-led community solutions for education, criminal justice, housing, social services, public health and health care to address systemic bias and inequities.
- Require all public-facing state agencies and state contractors to implement trauma-informed policy and procedure.
- Reduce legal and system barriers for immigrant and refugee communities, including people without documentation.
- Ensure accountability for implementation of anti-racist and anti-oppression policies and cross-system initiatives.

Healthy communities

Everyone wants to live in a healthy and vibrant community where people can thrive, feel safe and supported, and have opportunities for financial well-being. Healthy neighborhoods include access to healthy foods, active transportation options, safe housing, and safe places to be physically active, play and relax. Resilient communities increase social connection, especially for those affected by gentrification and in preparation for a changing climate. We will feel the economic impacts of COVID-19 for many years. We need to address barriers to higher education, finding jobs and earning a livable wage in order to create more equitable employment opportunities.

Built environment

- Center BIPOC-AI/AN communities in decision-making about land use planning and zoning in an effort to create safer, more accessible, affordable and healthy neighborhoods.
- Provide safe, accessible and high-quality community gathering places, such as parks and community buildings.
- Increase affordable access to high-speed internet in rural Oregon.
- Co-locate support services for low-income people and families at or near health clinics.

Community resilience

- Enhance community resilience through promotion of art and cultural events for priority populations.
- Build climate resilience among priority populations.
- Expand culturally responsive community-based mentoring, especially intergenerational programs and peer-delivered services.
- Expand programs that address loneliness and increase social connection in older adults.
- Develop community awareness of toxic stress, its impact on health and the importance of protective factors.

Economic wellness

- Invest in workforce development and higher education opportunities for priority populations.
- Strengthen economic development, employment and small business growth in underserved communities.
- Enhance financial literacy and access to financial supports among priority populations.

Healthy families

Raising a family is challenging. Families with young children know the childcare system is in crisis; high-quality day care and preschool experiences are unaffordable and often unavailable. There are other families who take on caregiving for older adults or for family members with disabilities, often without pay or adequate support. Despite Oregon's aspirational approach to health care delivery that includes coordinated care organizations, many families still face barriers in accessing preventive services.

We need to ease families' challenges to ensure they are supported and thriving. These strategies seek to build on family strengths, help families feel closer and more supported, and build skills in communication. These strategies also build on the gains in our health care system and seek to expand access to immunizations, harm reduction services and routine screenings provided in and outside of a doctor's office. Patients need linguistically appropriate information about their health conditions, medications and self-management of chronic conditions.

Supporting families

- Expand evidence-based and culturally responsive early childhood, home visiting programs.
- Ensure access to and resources for affordable, high-quality, culturally responsive childcare and caregiving.
- Build family resiliency through trainings and other interventions.
- Use health care payment reforms to support the social needs of patients.

Access to health care

- Increase patient health literacy.
- Expand reach of preventive health services through evidence-based and promising practices.
- Improve access to sexual and reproductive health services.
- Ensure access to culturally responsive prenatal and postnatal care for low-income and undocumented people.
- Support Medicare enrollment for older adults through expansion of the Senior Health Insurance Benefits Assistance (SHIBA) program.

Healthy youth

Educational outcomes are a critical determinant of health. Young people need opportunities for healthy upbringing and supportive learning environments. Existing structures, especially in schools, offer inconsistent access to these opportunities; COVID-19 has reinforced these school-based inequities. Addressing structural racism in the school system will have a positive impact on student well-being. Black students are twice as likely to be disciplined for disruptive behavior and more than twice as likely to be suspended or expelled. When used in place of suspension or other traditional discipline approaches, restorative justice and mediation can improve outcomes and graduation rates.

Health-related issues are a major cause of student absenteeism. Increasing school-based health services helps. Health-related screenings include asking students about their social needs, disabilities, mental health and chronic diseases. By identifying and addressing these barriers to learning, schools can help youth get to and stay in school every day. Oregon also has some of the most comprehensive health education laws in the country. These laws provide important information about preventing pregnancy, healthy relationships, preventing sexual violence, and preventing suicide. School districts need support to implement these standards.

Racial equity

- End school-related disparities for BIPOC-AI/AN children and youth through teacher training, data monitoring and follow-up with teachers, administrators and schools.
- Increase use of mediation and restorative justice in schools to address conflict, bullying and racial harassment.

Health care and education

- Ensure all school districts are implementing K-12 comprehensive health education according to state standards.
- Expand recommended preventive health-related screenings in schools.
- Ensure schools offer access to oral health care such as dental sealants and fluoride varnish.
- Provide culturally and linguistically responsive, trauma-informed, multi-tiered behavioral health services and supports to all children and families.

Housing and food

Safe and affordable housing is a primary concern for many people in Oregon. One in two Oregon households pays more than one-third of its income toward rent, and one in three pays more than half of its income toward rent. Despite legal protections from evictions, many households have less financial stability and, thus, less secure housing and food. BIPOC-AI/AN communities, in particular, face a greater housing-cost burden than other communities in Oregon. Home ownership is a major contributor to the wealth disparity seen between white families and BIPOC-AI/AN families. Convenient ability to safely walk, bike and use public transportation near home is also important for health.

Many households also struggle to afford healthy food. Oregon has one of the highest rates of food insecurity in the country, especially in families with children. Some people, especially in rural areas of the state, must travel long distances to get to a grocery store. Other people live in neighborhoods with a lot of fast-food and convenience stores, but few places to buy fresh fruits and vegetables. A resilient food system provides enough food to meet current needs while maintaining healthy systems that ensure food for future generations.

Housing and transportation

- Increase affordable housing with close access to active and public transportation options.
- Increase home ownership among BIPOC-AI/AN through existing and innovative programs.
- Require Housing First principles be adopted in all housing programs.

Food security

- Increase access to affordable, healthy and culturally appropriate foods for BIPOC-AI/AN and low-income communities.
- Maximize investments and collaboration for food-related interventions.
- Build a resilient food system that provides access to healthy, affordable and culturally appropriate food for all communities.

Behavioral health

Behavioral health describes the relationship between behaviors, physical health and overall well-being. Behavioral health includes, but is not limited to, mental health, substance use and gambling. Oregon has the highest prevalence of mental health conditions among youth and adults in the nation. Access to behavioral health care is a challenge. Communities describe many barriers related to provider shortages, long wait times, transportation challenges, and difficulty finding a culturally and linguistically responsive provider. The following strategies are specific to mental health. For strategies specific to alcohol and substance use, please see the Alcohol and Drug Policy Commission 2020-2025 Statewide Strategic Plan.

- Conduct behavioral health system assessments at state, tribal and local levels.
- Enable community-based organizations to destigmatize behavioral health by providing culturally responsive information to people they serve.
- Implement public awareness campaigns to reduce the stigma of seeking behavioral health services.
- Create state agency partnerships in education, criminal justice, housing, social services, public health and health care to improve behavioral health outcomes among BIPOC-AI/AN.
- Improve integration between behavioral health and other types of care.
- Incentivize culturally responsive behavioral health treatments rooted in evidence-based and promising practices.
- Reduce systemic barriers to receiving behavioral health services, such as transportation, language and assessment.
- Use health care payment reform to ensure comprehensive behavioral health services are reimbursed.
- Continue to strengthen enforcement of the Mental Health Parity and Addictions Law.
- Increase resources for culturally responsive suicide prevention programs for communities most at risk.

Workforce development

Oregon's demographics are changing. Our population is growing and becoming more diverse. To meet this growing diversity, we need a workforce that provides culturally and linguistically responsive services. This is especially important for those providing health and human services. Policies, standards and trainings can help to create a workforce better equipped to meet the needs of our community, especially for BIPOC-AI/AN communities. Traditional health workers are also a valuable part of Oregon's health and social support system. They often come from the community they serve and provide a critical link to services.

- Expand human resource practices that promote equity.
- Implement standards for workforce development that address bias and improve delivery of equitable, trauma-informed, and culturally and linguistically responsive services.
- Support alternative health care delivery models in rural areas.
- Create a behavioral health workforce that is culturally and linguistically reflective of the communities served.
- Ensure cultural responsiveness among health care providers through increased use of traditional health workers and trainings.
- Require all public-facing state agencies and state contractors receive training about trauma and toxic stress.
- Require sexual orientation and gender identity training for all health and social service providers.

Technology and innovation

Modernizing the health care system includes adoption of emerging technology. This includes use of electronic medical record technology, centralized referral systems that address social needs and expansion of telehealth. Telehealth can be used to address barriers to health care, including transportation, provider capacity and access to specialty care. It has proven to be a critical tool in the response to COVID-19. Most health care providers use electronic health record systems; however, it is difficult for health care providers to share data with each other. Electronic health record reminders can also prompt providers to ask questions or order tests to prevent illness or diseases. Referral and information systems such as 211 exist to address social needs such as housing, food and childcare. However, a comprehensive referral system doesn't exist. Once a referral is made, it's also challenging to follow up to ensure the person received the service they needed.

- Expand use of telehealth, especially in rural areas and for behavioral health.
- Use electronic health records to promote delivery of preventive services.
- Improve exchange of electronic health record information and data sharing among providers.
- Support statewide community information exchange to facilitate referrals between health care and social services.

Key indicators

Key indicators have been identified to indicate progress across the five priority areas. Visit the data dashboard at healthiertogetheroregon.org for definitions, baseline data, analysis by race/ethnicity and other demographic data.

Priority area	Indicator and data source
Institutional bias	Disciplinary Action (Department of Education) Premature death/years of potential life lost (Center for Health Statistics)
Adversity, trauma and toxic stress	Adverse childhood experiences (National Survey of Children's Health) Chronic absenteeism (Department of Education) Concentrated disadvantage (American Community Survey)
Behavioral health	Unmet emotional or mental health care need among youth (Student Health Survey) Suicide rate (Oregon Vital Statistics) Adults with poor mental health in past month (Behavioral Risk Factor Surveillance Survey)
Economic drivers of health	Third-grade reading proficiency (Department of Education) Opportunity Index economy dimension (Opportunity Index) Childcare cost burden (OSU Oregon Child Care Market Price Study, and American Community Survey) Food insecurity (Map the meal gap) Housing cost burden among renters (American Community Survey)
Access to equitable preventive health care	Childhood immunizations (ALERT IIS) Colorectal cancer screening (Behavioral Risk Factor Surveillance Survey) Adults with a dental visit in past year (Behavioral Risk Factor Surveillance Survey)

Conclusion and next steps

HTO is an ambitious plan. While some of the identified strategies are already in progress, much of this work is new and innovative. Certainly, the long-term impacts of COVID-19 are difficult to predict and the related economic downturn may threaten some of these ideas. The good news is that many of these strategies can happen even in the absence of funding. An equitable future is within reach by working together, aligning our goals and measures, and co-creating with affected communities. The work ahead will require brave conversations, moments of discomfort and mistakes. It will also offer opportunities for new relationships, trust building and easy wins. We will use our gains to keep pushing toward improved health for everyone. As the state agency with primary responsibility for health, OHA is poised to offer backbone support for overall coordination. But we know we won't get this right unless others join us in this effort. We look forward to your partnership as we work together to eliminate the disparities that will lift us all to better health.

Appendix

Definitions

Active transportation means walking, biking and use of public transportation.

Affordable housing is housing (rent or mortgage) that costs equal to or less than 30% of the gross household income.

Alternative health care delivery model means allowing providers such as nurses, dentists and pharmacists to deliver services that doctors typically provide.

Bias means prejudice in favor of or against one thing, person or group compared with another, usually in a way considered to be unfair. Bias happens within individuals (e.g., implicit) or institutions. Institutional bias is defined as the tendency for resources, policies and practices of institutions to operate in ways which advantage white, heterosexual, cis-gendered, able-bodied individuals and communities.

BIPOC-AI/AN is an acronym that stands for Black people, Indigenous people, people of color and American Indian/Alaska Native people. It is used to emphasize the particular racism they and their communities in the United States experience. American Indians/Alaska Native people in Oregon are citizens of the nine federally recognized tribes in Oregon or from other tribal nations outside Oregon. The PartnerSHIP approved this term in consultation with the Northwest Portland Area Indian Health Board.

Climate resilience is the ability to cope with the stress and changes created by climate change.

A **community information exchange** is a centralized referral and information system, such as 211.

Comprehensive behavioral health services mean all services provided to someone being treated for a behavioral health issue, including outreach and care coordination.

Cultural responsiveness is the ability to learn from and relate respectfully with people of your own culture as well as those from other cultures.

Diversity is the appreciation and prioritization of different backgrounds, identities and experiences collectively and as individuals. It emphasizes the need for

representation of communities that are systemically underrepresented and under-resourced. (Oregon Governor's definition)

An **electronic health record** is a software platform where your medical information is stored.

Equality is the state of being equal, especially in status, rights and opportunities

Equity is the effort to provide different levels of support based on an individual's or group's needs in order to achieve fairness in outcomes. Equity acknowledges that not all people, or all communities, are starting from the same place due to historic and current systems of oppression. Equity empowers communities most affected by systemic oppression and requires the redistribution of resources, power and opportunity to those communities. (Oregon Governor's definition)

Evidence-based means a practice that is based in scientific evidence.

Financial literacy means ability to effectively manage one's money.

Financial services include financial planning, tax services, paid family leave, debt management, savings and investment, and SSI/SSDI enrollment assistance.

Health care payment reform means changing the way health care is paid for to improve the quality of care a person receives.

Health equity: Oregon will have established a health system that creates **health equity** when all people can reach their full health potential and well-being and are not disadvantaged by their race, ethnicity, language, disability, gender, gender identity, sexual orientation, social class or the intersections among these communities or identities or other socially determined circumstances.

Achieving health equity requires the ongoing collaboration of all regions and sectors of the state, including tribal governments to address:

- The equitable distribution or redistributing of resources and power, and
- Recognizing, reconciling and rectifying historical and contemporary injustices.

(Oregon Health Policy Board – Health Equity Committee)

Health literacy is the degree to which individuals can access and understand health information needed to make decisions about their health.

Housing First is a recovery-oriented approach that quickly moves people from houselessness into independent and permanent housing and provides additional supports and services as needed.

Human resource practices include hiring, recruitment and retention.

Inclusion is a state of belonging when persons of different backgrounds, experiences and identities are valued, integrated and welcomed equitably as decision makers, collaborators and colleagues. Ultimately, inclusion is the environment that organizations create to allow these differences to thrive. (Oregon Governor's definition)

Intersectionality is normalization and legitimization of an array of dynamics – historical, cultural, institutional and interpersonal – that routinely advantage whites while producing cumulative and chronic adverse outcomes for people of color. (Miriam-Webster Dictionary)

The **Mental Health Parity Act (1996) and the Mental Health Parity and Addiction Equity Act** (2008) require that health plans and insurers offer mental health and substance use disorder benefits comparable to their coverage for general medical and surgical care.

Neighborhoods are the physical communities in which we live and that provide housing, transportation, childcare, education, employment opportunities, healthy foods and health care services.

Preventive health-related screenings include social determinants of health, disabilities, mental health, oral health, vision, hearing and other chronic conditions.

Preventive services are health care services that prevent illness or disease. They include vaccination, contraception, harm reduction, overdose prevention, screenings and chronic disease self-management programs.

Priority populations for the State Health Improvement Plan are BIPOC-AI/AN, people with low incomes, people who identify as LGBTQ+, people with disabilities and people living in rural areas.

Public-facing means an agency (OHA, OYA, ODE, DHS, etc.) provides a direct service to people.

Promising practice means a practice that reports positive outcomes but may not have yet been studied scientifically.

Protective factors include family resilience, social connections, social and cultural supports, parenting support, and social and emotional development in children.

Resilient food system means the ability to produce and access nutritious and culturally acceptable food in the face of disturbance and change.

Restorative justice repairs the harm done by conflict or crime by organizing a meeting for the victim, the offender and the wider community.

Social determinants of health are the conditions in which people are born, grow, live, work and age. They include factors such as socioeconomic status, education, neighborhood and physical environment, employment, and social support networks. They also include access to health care. (Kaiser Family Foundation)

State Health Improvement Plan (SHIP) is a five-year plan that identifies the state's health priorities with strategies to advance improvement and measures to monitor progress.

Structural racism is the normalization and legitimization of historical, cultural, institutional and interpersonal dynamics that routinely advantage whites while producing cumulative and chronic adverse outcomes for people of color.

Support services include housing and food assistance, health care, child care, and employment, education and financial supports.

Targeted universalism means setting universal goals pursued by targeted processes to achieve those goals.

Telehealth means using information and communication technologies, such as video calls, to provide health care services.

Traditional health workers is an umbrella term that refers to health care workers who are usually from the community they serve, and have knowledge of language and culture that other providers don't have. Includes health navigators, community health workers, peer specialists and doulas.

Trauma-informed approaches acknowledge the impact of trauma and promote a culture of safety, empowerment and healing.

Trauma-informed system and services ensure safety, consistency, transparency, peer support, collaboration, empowerment, choice and cultural responsiveness.

White supremacy is the belief that white people are superior to those of all other races and should dominate society.

Workforce development and higher education includes job training, vocational programs, community college, universities and continuing education.

OHA 3012 (8/20)

OHA Accessibility Conformance Report

WCAG Edition

(Based on VPAT® Version 2.4)

Name of Product/Version:

Oregon Electronic Vaccine Card / myelectronicvaccinecard.oregon.gov

Report Date:

April 22, 2022

Product Description:

From the FDD v3.0: “The Oregon Health Authority (OHA) intends to launch Digital Vaccine Record (DVR) Portal [title later changed to Oregon Electronic Vaccine Card] for COVID-19 vaccination, implementing the SMART Health Card framework. A Digital Vaccine Record will be an electronic vaccination record drawn from the data stored in the Oregon’s immunization registry (Alert IIS). The digital record will show the same information as a User’s paper Centers for Disease Control and Prevention (CDC) vaccination card: name, date of birth, vaccination dates, and type of vaccine received. The digital record will also include a Quick Response (QR) code that, when scanned by a SMART Health Card reader, will display to the reader the name, date of birth, vaccine dates, and vaccine type of the User. The QR code also confirms the vaccine record as an official record of the State of Oregon.”

The Oregon Electronic Vaccine Card site comprises the following elements:

1. Header (SS_S00)
2. Footer (SS-S01)

“Voluntary Product Accessibility Template” and “VPAT” are registered service marks of the Information Technology Industry Council (ITI)

3. Maintenance Page (SS_S10)
4. Home Page & Vaccine Form (SS_S02 & SS_S03)
5. Received Page (SS_S04)
6. PIN Page (SS_S09)
7. QR Page (SS_S05)
8. Request Processing Page (SS_S06)
9. Email Thank You Page (SS_S07)
10. Link SMS (M01)
11. No Match SMS (M02)
12. Link Email (E01)
13. No Match Email (E02)
14. QR Code Email (E03) [This can also be reached via “Download Accessible PDF” button].
15. QR Code Template for DL Paper (E04)
16. FAQ Page (SS-S0x [sic]): https://www.oregon.gov/oha/covid19/Pages/Electronic-Vaccine-Card-FAQ.aspx
17. How To Video [on YouTube]: https://www.youtube.com/watch?v=T5t-fzjH3ug

Contact Information:

Prepared by Adam McBride-Smith (Independent Accessibility Consultant)

adam.mcbride-smith@dhsoha.state.or.us

503-812-5123

Notes:

The Oregon Electronic Vaccine Card site was found to be in conformance with WCAG 2.1 level AA at the time of launch.

Evaluation Methods Used:

Accessibility testing started before development with an initial testing phase conducted on the waverify app, https://waverify.doh.wa.gov/, which served as the model for Oregon's Digital Vaccine Record. This testing helped to identify some areas of concern and led to the inclusion of 114 accessibility user stories to Oregon's FDD (Functional Design Document).

Testing on Oregon's Digital Vaccine Record included automated testing. Initially, this testing was conducted with WAVE and Axe DevTools. Later in the SDLC, Site Improve was integrated into testing. Manual testing was also conducted continuously throughout development. Manual testing was conducted by Adam McBride-Smith (CPACC) and by two native assistive technology users: Flori Tello (JAWS and VoiceOver screen readers), and Katelyn Truax (Switch Control with Auto-Scan).

Testing for this report followed the Deque WCAG Conformance Testing, Detailed Methodology (Deque Way 3.2.2). Testing was conducted on the following Assistive Technologies:

- NVDA (Screen Reader)
- JAWS (Screen Reader)
- VoiceOver (Screen Reader)
- Apple Switch Control with Auto-Scan
- Able Net Blue 2 (Universal Switch)
- Keyboard Access
- Dragon Naturally Speaking (Text-to-Speech Software)
- ZoomText (Magnification Software)

The following browser/OS combinations were used during testing:

- Chrome on Windows 10
- Chrome on Windows 11
- Firefox on Windows 11
- Edge on Windows 11
- Chrome on macOS 10.13.6
- Safari on macOS 10.13.6
- Chrome on iPad OS 15.3.1

- Safari on iPad OS 15.3.1
- Chrome on Android 9
- Chrome on iPhone OS 15.2 (later updated to 15.4)

The following devices/screen specs were used during testing:

- Dell XPS 15 9510: 15.6 inches, 16:10 aspect ratio
- Lenovo ThinkPad T480: 14 inches, 16:9 aspect ratio
- MacBook Air 1.4: 13.3 inches, 16:10 aspect ratio
- iPad Pro (2nd Gen): 12.9 inches
- Samsung Galaxy S8: 5.8 inches
- iPhone SE: 4.7 inches

In addition, the following tools were used during testing:

- Web Developer Extension for Chrome
- Web Developer Extension for Firefox
- Dylan Barrell's Bookmarklets
- Paul Adam Bookmarklets
- ANDI Bookmarklet
- WCAG 2.1 parsing error bookmarklet
- Colour Contrast Analyser
- PEAT
- W3C Markup Validation Service
- Nu Html Checker
- 44 x 44 Pixel Bookmarklet
- Bookmarklet to make the text between 45 and 75 characters turn red
- Fount Bookmarklet

Applicable Standards/Guidelines

This report covers the degree of conformance for the following accessibility standard/guidelines:

Standard/Guideline	Included In Report
Web Content Accessibility Guidelines 2.0	Level A (Yes) Level AA (Yes) Level AAA (Yes)
Web Content Accessibility Guidelines 2.1	Level A (Yes) Level AA (Yes) Level AAA (Yes)

Terms

The terms used in the Conformance Level information are defined as follows:

- **Supports**: The functionality of the product has at least one method that meets the criterion without known defects or meets with equivalent facilitation.
- **Partially Supports**: Some functionality of the product does not meet the criterion.
- **Does Not Support**: The majority of product functionality does not meet the criterion.
- **Not Applicable**: The criterion is not relevant to the product.
- **Not Evaluated**: The product has not been evaluated against the criterion. This can be used only in WCAG 2.0 Level AAA.

WCAG 2.1 Report

Note: When reporting on conformance with the WCAG 2.1 Success Criteria, they are scoped for full pages, complete processes, and accessibility-supported ways of using technology as documented in the WCAG 2.0 Conformance Requirements.

Table 1: Success Criteria, Level A

Notes:

Criteria	Conformance Level	Remarks and Explanations
1.1.1 Non-text Content (Level A)	Supports	PDFs for direct download and email options are auto-tagged and remediated to meet the w3c's PDF Techniques for WCAG 2.0 criteria using pdfHTML by iText. The same method was applied to PDFs in English and in all translated languages except Arabic. The team determined there was a great deal of complexity involved in implementing Arabic script in addition to the RTL vs. LTR reading order in a tagged PDF. Estimated time to completion was 47 hours and there were concerns that the solution would not work and would negatively impact the production of remediated PDFs in other languages. The decision was made to offer an accommodation model (manual remediation) to Arabic-speakers who are screen reader users and a screen-reader-only text note was added to **SS_S05** for these users, informing them of the process.
1.2.1 Audio-only and Video-only (Prerecorded) (Level A)	Not Applicable	There is no audio-only or video-only content.
1.2.2 Captions (Prerecorded) (Level A)	Supports	Captions are provided in YouTube for the "how to" video.
1.2.3 Audio Description or Media Alternative (Prerecorded) (Level A)	Supports	A transcript is provided in YouTube for the "how to" video.

Criteria	Conformance Level	Remarks and Explanations
1.3.1 Info and Relationships (Level A)	Supports	Information, structure, and relationships conveyed through presentation can be programmatically determined.
1.3.2 Meaningful Sequence (Level A)	Supports	The reading and navigation order is logical and intuitive.
1.3.3 Sensory Characteristics (Level A)	Supports	Instructions do not rely on shape, size, visual location, or sound.
1.4.1 Use of Color (Level A)	Supports	Color is not used as the sole method of conveying content or distinguishing visual elements. Color alone is not used to distinguish links from surrounding text (all links have underlines).
1.4.2 Audio Control (Level A)	Supports	The “how to” video on YouTube automatically plays and is over 3 seconds in length, but it has mechanisms to stop, mute, and adjust the volume.
2.1.1 Keyboard (Level A)	Supports	All page functionality is available using the keyboard.
2.1.2 No Keyboard Trap (Level A)	Supports	Keyboard focus is never locked or trapped at one particular page element.
2.1.4 Character Key Shortcuts (Level A 2.1 only)	Not Applicable	There are no character key shortcuts.
2.2.1 Timing Adjustable (Level A)	Supports	There are no maximum time limits for any of the processes on the site or associated pages.
2.2.2 Pause, Stop, Hide (Level A)	Not Applicable	There is no automatically moving, blinking, scrolling, or updating content.
2.3.1 Three Flashes or Below Threshold (Level A)	Supports	There is no flashing content.

Criteria	Conformance Level	Remarks and Explanations
2.4.1 Bypass Blocks (Level A)	Supports	A skip navigation link is provided in **SS_S01**. In addition, a proper heading structure is used on all pages, and all pages on the main site also have a proper landmark structure.
2.4.2 Page Titled (Level A)	Partially Supports	Both the Form page and the Thank you page of the Record Research Request Form have the same title: <title>My Electronic Vaccine Card Record Research Request Form</title> See WCAG 2.1 - Failure of Success Criterion 2.4.2 due to the title of a Web page not identifying the contents / “Example 2: A site generated using templates includes the same title for each page on the site. So the title cannot be used to distinguish among the pages.” The team determined that it was not possible in Customer Voice to add unique titles to pages and has referred the problem to Microsoft. This issue is tracked in User Story 123273.
2.4.3 Focus Order (Level A)	Supports	The navigation order of focusable elements is logical and intuitive.
2.4.4 Link Purpose (In Context) (Level A)	Supports	Link purpose is determinable from the link title itself.
2.5.1 Pointer Gestures (Level A 2.1 only)	Not Applicable	There are no multi-point or path-based gestures.
2.5.2 Pointer Cancellation (Level A 2.1 only)	Supports	Selector boxes open on down-event. This is true of the Month, Day, and Year boxes on **SS_S03**, the Choose Here selector box on **SS_S05,** and the State

Criteria	Conformance Level	Remarks and Explanations
		selector box (“Don’t have access to a printer” path) on **SS_S05.** However, this behavior described here is native combo box behavior. In addition, WCAG SC 2.5.2 notes: “In other interactions, the down-event may trigger a behaviour which can be reversed when the up-event concludes.” The behavior in question, the expansion of the combo box, can be reversed after the up-event concludes. Therefore, it was decided that the behavior described here supports this success criterion.
2.5.3 Label in Name (Level A 2.1 only)	Supports	All interface components that present text have accessible names that include the visible text.
2.5.4 Motion Actuation (Level A 2.1 only)	Not applicable	There is no functionality triggered by moving the device or by user movement.
3.1.1 Language of Page (Level A)	Supports	The lang attribute is contained in the <html> element. It defaults to en on the English version of the page, and resets appropriately when the page language is changed.
3.2.1 On Focus (Level A)	Supports	As components receive focus, they do not initiate a change of context or any other change that could disorient the user.
3.2.2 On Input (Level A)	Supports	On **SS_S05**, a small shift in focus occurs when an option is chosen from the “Choose Here” combo box. When the selection is made, focus shifts to a line of text inserted just below the selector box. This design decision was made to provide a better

Criteria	Conformance Level	Remarks and Explanations
		user experience for screen reader users. Testing demonstrated that these users might easily be unaware that new content was being inserted below the combo box – or that there were often multiple options to choose from. The complexity of the injected content, and doubts from the development team that an aria-alert region would function well in this environment, led us to implement this solution. According to the w3c, "Opening a new window, **moving focus to a different component**, going to a new page (including anything that would look to a user as if they had moved to a new page) or significantly re-arranging the content of a page are examples of changes of context." Understanding SC 3.2.2 [emphasis added]. The shift in focus that occurs on this page is *not* to a different component ("a part of the content that is perceived by users as a single control for a distinct function" per the w3c). In addition, even at high levels of magnification (400%+) the two elements retain enough proximity (1rem/16px) for the shift in focus to be easy for a user to track visually.
3.3.1 Error Identification (Level A)	Supports	Form validation errors are efficient, intuitive, and accessible. Required fields are indicated both visually (with an asterisk) and using aria-required. When errors are detected, the form is re-displayed with an error summary and focus is forced to the

Criteria	Conformance Level	Remarks and Explanations
		error summary. The error summary is provided as a semantic list, in plain language, with links that allow users to jump to the relevant field. The errors are flagged inline through the use of color (red) and aria-invalid.
3.3.2 Labels or Instructions (Level A)	Supports	Text labels are provided for all inputs, and labels are linked programmatically to the appropriate inputs.
4.1.1 Parsing (Level A)	Supports	Significant validation/parsing errors are avoided.
4.1.2 Name, Role, Value (Level A)	Supports	Markup is used according to HTML specifications and ARIA is used to enhance accessibility when HTML is not sufficient.

Table 2: Success Criteria, Level AA

Criteria	Conformance Level	Remarks and Explanations
1.2.4 Captions (Live) (Level AA)	Not applicable	There is no live multimedia content.
1.2.5 Audio Description (Prerecorded) (Level AA)	Supports	There is no visual content presented in the video that is not also presented in the audio.
1.3.4 Orientation (Level AA 2.1 only)	Supports	Orientation of web content is not restricted to only portrait or landscape.
1.3.5 Identify Input Purpose (Level AA 2.1 only)	Not applicable	The form fields on **SS_S03** and on **SS_S05** (both the Email option and the Send me a Paper Copy option) do not have autocomplete values. Personas and user stories related to the site have always included pathways for users who are

Criteria	Conformance Level	Remarks and Explanations
		filling out the form for another person. According to the w3c's documentation on autocomplete techniques, "For the autocomplete attribute: This technique should only be used when asking for data about the user who is filling the form in, not for other people." (https://www.w3.org/WAI/WCAG21/Techniques/html/H98) Therefore, it was decided not to include autocomplete attributes for these fields.
1.4.3 Contrast (Minimum) (Level AA)	Supports	Text and images of text have a contrast ratio of at least 4.5:1. Large text (18pt / 24px or 14pt / 18.66px and bold) has a contrast ratio of at least 3:1.
1.4.4 Resize text (Level AA)	Supports	The page is readable and functional when the page is zoomed to 200%.
1.4.5 Images of Text (Level AA)	Supports	The only example of an image used as text is the Oregon Health Authority logo, which is covered as an exception to this criterion.
1.4.10 Reflow (Level AA 2.1 only)	Supports	No loss of content or functionality occurs, and horizontal scrolling is avoided when content is presented at a width of 320 pixels / 400% zoom.
1.4.11 Non-text Contrast (Level AA 2.1 only)	Supports	A contrast ratio of at least 3:1 is present for differentiating interface components (such as buttons, form controls, and focus indicators/outlines) in all their various states (focus, hover, active, etc.)
1.4.12 Text Spacing (Level AA 2.1 only)	Supports	No loss of content or functionality occurs when the user adapts paragraph spacing to 2 times the font size, text line height/spacing to 1.5 times the font size, word spacing to

Criteria	Conformance Level	Remarks and Explanations
		.16 times the font size, and letter spacing to .12 times the font size.
1.4.13 Content on Hover or Focus (Level AA 2.1 only)	Not Applicable	No additional content is presented on hover or keyboard focus.
2.4.5 Multiple Ways (Level AA)	Not Applicable	The main site represents a process and is not subject to this success criterion. The same is true of the request form. The FAQ page is a single page and therefore is also not subject to this criterion (other pages linked to the FAQ page are out-of-scope).
2.4.6 Headings and Labels (Level AA)	Supports	Page headings and labels for form and interactive controls are informative and unique.
2.4.7 Focus Visible (Level AA)	Supports	Keyboard focus is visually apparent.
3.1.2 Language of Parts (Level AA)	Supports	The language of page content that is in a different language from the main content is identified using the lang attribute. This applies only to the language options available in the nav bar on **SS_S01** and in the dropdown options under the "More" combo box.
3.2.3 Consistent Navigation (Level AA)	Supports	Navigation links that are repeated on web pages do not change order when navigating through the site.
3.2.4 Consistent Identification (Level AA)	Supports	Elements that have the same functionality across multiple web pages are consistently identified.
3.3.3 Error Suggestion (Level AA)	Supports	If an input error is automatically detected and suggestions for correction are known, then the suggestions are provided to the user.

Criteria	Conformance Level	Remarks and Explanations
3.3.4 Error Prevention (Legal, Financial, Data) (Level AA)	Not Applicable	Changes to legal, financial, or personal data are not a part of the site's user flow. (The site allows a user to request and receive data but not to change it).
4.1.3 Status Messages (Level AA 2.1 only)	Supports	When important status messages are presented, either focus is set to the message, or the message is otherwise read to screen reader users.

Table 3: Success Criteria, Level AAA

Notes: Level AAA criteria can be understood as best practice recommendations. **None of these criteria are required for Section 508 compliance.** When following a AAA criterion would negatively affect user experience in a significant way, it is advisable to overlook that criterion. According to the w3c: "It is not recommended that Level AAA conformance be required as a general policy for entire sites because it is not possible to satisfy all Level AAA Success Criteria for some content." (https://www.w3.org/TR/WCAG21/#conformance)

Criteria	Conformance Level	Remarks and Explanations
1.2.6 Sign Language (Prerecorded) (Level AAA)	Does Not Support	No sign language interpretation is present in how-to video. Like all level AAA criteria this is a best practice recommendation – however, it is not required for Section 508 compliance.
1.2.7 Extended Audio Description (Prerecorded) (Level AAA)	Not Applicable	There is no relevant visual content in the "how to" video that is not also described in the audio narration.
1.2.8 Media Alternative (Prerecorded) (Level AAA)	Supports	A transcript is provided.
1.2.9 Audio-only (Live) (Level AAA)	Not Applicable	There is no audio-only content.

Criteria	Conformance Level	Remarks and Explanations
1.3.6 Identify Purpose (Level AAA 2.1 only)	Not Evaluated	This product has not been tested for conformance to this criterion.
1.4.6 Contrast (Enhanced) (Level AAA)	Does Not Support	Some areas do not meet the standard of 7:1 color contrast. Meeting this standard would require more significant design changes than are practical at this time. Like all level AAA criteria this is a best practice recommendation – however, it is not required for Section 508 compliance.
1.4.7 Low or No Background Audio (Level AAA)	Not Evaluated	Background music in the "how-to" video is significantly quieter than the narration. We will test post-launch to ensure that music is at least four times (20 decibels) quieter than the narration. Like all level AAA criteria this is a best practice recommendation – however, it is not required for Section 508 compliance.
1.4.8 Visual Presentation (Level AAA)	Partially Supports	Blocks of text are more than 80 characters wide. Adopting this criterion on **SS_S02** would have a negative impact on UX because it would push form elements on **SS_S03** "below the fold." Furthermore, it is not required for Section 508 compliance, like all level AAA criteria.
1.4.9 Images of Text (No Exception) (Level AAA)	Supports	The only example of an image used as text is the Oregon Health Authority logo, which is covered as an exception to this criterion.
2.1.3 Keyboard (No Exception) (Level AAA)	Supports	All page functionality is available using the keyboard.

Criteria	Conformance Level	Remarks and Explanations
2.2.3 No Timing (Level AAA)	Supports	There are no maximum time limits for any of the processes on the site.
2.2.4 Interruptions (Level AAA)	Not Applicable	The site pages do not support author/server generated updates.
2.2.5 Re-authenticating (Level AAA)	Not Applicable	There is no inactivity time limit on any page.
2.2.6 Timeouts (Level AAA 2.1 only)	Not Applicable	There is no inactivity time limit on any page.
2.3.2 Three Flashes (Level AAA)	Not Applicable	There is no flashing content on any page.
2.3.3 Animation from Interactions (Level AAA 2.1 only)	Not Applicable	There is no animation or moving content triggered by user actions.
2.4.8 Location (Level AAA)	Does Not Support	No breadcrumb trail, site map, or other extra navigation aid is present. Like all level AAA criteria this is a best practice recommendation – however, it is not required for Section 508 compliance.
2.4.9 Link Purpose (Link Only) (Level AAA)	Supports	Link purpose is determinable from the link title itself.
2.4.10 Section Headings (Level AAA)	Not Evaluated	This product has not been tested for conformance to this criterion.
2.5.5 Target Size (Level AAA 2.1 only)	Partially Supports	All target areas are a minimum of 44px by 44px, except the options in the combo boxes on pages **SS_S03** and **SS_S05** which are approximately 38px by 38px. The size of combo box options was increased by zooming the text for the options. As this also created incongruity with surrounding font sizes, 38px by 38px was determined to be sufficient for these items following native switch user testing.

Criteria	Conformance Level	Remarks and Explanations
2.5.6 Concurrent Input Mechanisms (Level AAA 2.1 only)	Supports	Content does not restrict input to a specific modality, such as touch-only or keyboard-only.
3.1.3 Unusual Words (Level AAA)	Does Not Support	No dictionary, glossary, or footnote definitions are provided for any vocabulary items. Like all level AAA criteria this is a best practice recommendation – however, it is not required for Section 508 compliance.
3.1.4 Abbreviations (Level AAA)	Supports	The expanded form of abbreviations is provided at first use.
3.1.5 Reading Level (Level AAA)	Supports	This criterion was tested using the main text on the **SS_S02** with proper nouns and titles removed. The text was fed into readabilityformulas.com. The consensus of the site's seven readability formulas was that this text is at an 8th grade reading level. This meets the success criterion for reading level.
3.1.6 Pronunciation (Level AAA)	Does Not Support	Pronunciation guidance is not provided for words with common homonyms, like the word "record." Like all level AAA criteria this is a best practice recommendation – however, it is not required for Section 508 compliance.
3.2.5 Change on Request (Level AAA)	Not Evaluated	This product has not been tested for conformance to this criterion.
3.3.5 Help (Level AAA)	Partially Supports	More context-sensitive help could be provided, such as a clear statement of the input restraints for PIN number creation. Like all level AAA criteria this is a best practice recommendation – however, it is not required for Section 508 compliance.

Criteria	Conformance Level	Remarks and Explanations
3.3.6 Error Prevention (All) (Level AAA)	Does Not Support	There is no mechanism that allows users to review and confirm inputs before submission. Like all level AAA criteria this is a best practice recommendation – however, it is not required for Section 508 compliance.

Racial Health Equity Impact Statement Update
Medicaid Dental

In the 2023-2025 ARB, the Medicaid Program described several key initiatives to positively impact oral health and dental care for Oregonians:

Efforts expanding dental care coverage to specific populations:

- **HB 4095**: A no-cost dental program for Veterans with incomes up to 400 percent of the Federal Poverty Level (FPL), designed to provide dental insurance to Veterans who previously lacked coverage.
- **HB 1538**: A no-cost dental program for Compact of Free Association (COFA) citizens with incomes up to 138 percent of FPL (133% FPL and an income eligibility disregard of five percentage points).

Efforts enhancing dental care coordination and equitable access to preventative services:

- **DCO Transition**: The shift of members' dental care from OHA's contracts with Dental Care Organizations (DCOs) to Coordinated Care Organizations (CCOs), designed to enhance the efficiency and quality of dental care.
- **School-Based Dental Sealant Services**: Increasing access to certain oral health services for children and adolescents in schools.

Effort facilitating community-based oral health from a public health approach:

- **Community Water Fluoridation**: Expanding access to reduce dental cavities and disease for Oregonians across their lifespan.

Outcomes of these programs include:

Enrollment and outcome data are analyzed to continually evaluate OHP and non-OHP Dental Care programs, and communication with specific communities is conducted to gain direct insight. The

Ombuds “2023 Year End Report,” focused on complaints about dental care access and recommended OHA institute Culturally and Linguistically Specific Services (CLASS) provider payments to address the complaints.

In 2024, OHA participated in Community Listening Sessions to hear directly from OHP members. Access to care and language access were the primary concerns. Collaboration across the agency led to improvements in member and provider communication in all areas.

The impact of these 2023-25 key initiatives is improved access to oral health services. At the same time, one clear area for continued focus and investment is OHP’s denture benefit. The current benefit allows for only one set of complete dentures per ten-year period; feedback from oral health providers, advocates, and members has indicated that this replacement time frame can create challenges. Not having teeth and not having properly fitting and functional dentures causes decreased employability, decreased self-image and increased isolation. Commonly, OHP members cannot maintain adequate nutrition due to their inability to chew. Due to current dental coverage limitations, Medicaid has proposed a Policy Option Package (POP) to expand dental services, including coverage for more frequent complete denture replacements, as well as to mitigate disparate benefit levels among children, pregnant adults, and non-pregnant adults.

Expanding dental care coverage:

- As of July 15, 2024, enrollment data shows that 2,574 individuals not meeting the eligibility criteria for full OHP benefits are now enrolled in OHP's dental-only coverage plans.
    - The Veterans Dental program launched on January 1, 2023, and has 2,554 veterans receiving dental care as of July 2024.
    - The COFA Dental program launched on January 1, 2023, and has 20 people receiving dental care as of July 2024.

Medicaid Dental

Enhancing dental care coordination and equitable access:

- The transition of members' dental care from OHA's contracts with DCOs to CCOs has been successfully completed. Transitioning responsibility for OHP members' dental health to CCOs establishes essential groundwork to coordinate whole-person care. There is potential to fully integrate members' oral health into their overall health care coordination.
- During the 2022-23 school year, approximately 747 elementary and middle schools were served by a certified school dental sealant program, overall providing at least one dental sealant to 26,767 students in grades K-12.
    - School-based dental sealant programs focus on serving children from families who are low-income and who are less likely to receive regular dental care. Targeted schools are those which:
        - Have at least 40 percent of students who are eligible for the USDA's National School Lunch Program;
        - Have been approved for the Community Eligibility Program (CEP); or
        - Are located in a dental care health professional shortage area (HPSA).

      Dental sealant services must be provided to all students regardless of insurance status, race and ethnicity, or socio-economic status.

Facilitating community-based oral health from a public health approach:

- Oregon ranks 49th among U.S. states and the District of Columbia for community water fluoridation (CWF), with only about 21.2 percent of the population receiving fluoridated water in 2023, compared to 22.5 percent in 2020.
    - Currently, OHA provides CWF education to water treatment operators and supports local communities who request information on fluoridation with data and education.

Racial Health Equity Impact Statement Update
Medical and Behavioral Health Workforce Incentives

The Oregon Health Authority (OHA) facilitates a set of federal and state-funded incentives and technical assistance for health care professionals, organizations, and educational institutions and training programs to expand the health care workforce's diversity and cultural responsiveness. The workforce incentives reviewed for the Racial Equity Impact Statement Update are from the Health Care Provider Incentive Fund (HCPIF). The Oregon Legislature passed HB 3261 (2017) to create the Health Care Provider Incentive Fund intended to increase the supply and retention of a diverse health care workforce serving people experiencing inequities in rural and urban underserved communities.

The HCPIF includes three components:

- **Health Care Provider Incentive Program (HCPIP)**, which is in the Clinical Supports, Integration and Workforce Unit in the Health Policy and Analytics Division. Through HB 3261, HCPIP combined several separate workforce-focused programs into a single funding pool overseen by the Oregon Health Policy Board. OHA has an Intergovernmental Grant Agreement with the Oregon Office of Rural Health (ORH) within the Oregon Health & Science University (OHSU) to conduct outreach and operations for several incentive programs. Modelled on National Health Service Corps federal incentives to meet Oregon's needs for health care professionals, HCPIP includes four types of incentives which allocated $25.2 million in 2023-25 biennium:
    - **Loan Repayment Program** funds for practicing professionals to repay qualifying student loan debt, in exchange for a three-year service commitment at a qualifying practice site.
    - **Loan Forgiveness Program** provides scholarships to students participating in approved rural training tracks, in exchange for a future year-for-year service obligation in rural or frontier areas.

  - **Rural Medical Practitioners Insurance Subsidy** pays a portion of malpractice premiums for Medical Doctors (MDs), Doctors of Osteopathic Medicine (DOs) and Nurse Practitioners (NPs) working in rural and frontier Oregon.
  - **Health Care Career Pathways** provides scholarships, advancement and retention incentives for students and health care professionals. Scholarship eligibility includes students from middle school and high school, trade programs, community colleges to graduate-level degree programs. Retention and advancement incentive eligibility include practicing professionals in the health care workforce.

- **Healthy Oregon Workforce Training Opportunity Grant Program (HOWTO)**, which is in the Clinical Supports, Integration and Workforce Unit in the Health Policy and Analytics Division. HOWTO is an OHSU-OHA partnership funded by a Medicaid Intergovernmental Transfer administered under the direction of the Oregon Health Policy Board since 2018. HOWTO awards grants to support innovative, transformative, and community-based training initiatives in Oregon to address local health care workforce shortages and expand diversity in culturally and linguistically diverse groups, economically and socially underserved groups, Tribal communities, rural communities, and communities experiencing inequities. HOWTO has conducted five grantmaking cycles awarding $25.7 million to 40 projects in primary care, dental health, and behavioral health workforce areas.

- **Behavioral Health Workforce Incentives (BHWi),** which sits in the Behavioral Health Workforce Development Program in the Behavioral Health Division, is funded by American Rescue Plan Act dollars through House Bill 2949 (2021). This legislation directed OHA to increase the recruitment and retention of behavioral health providers who are people of color, tribal members, or residents of rural areas of Oregon, and can provide culturally responsive care for diverse communities. To do this, OHA created BHWi. The initiative's funding includes:

- $60 million to develop a diverse behavioral health workforce in licensed and non-licensed occupations through scholarships, loan repayment, and retention.
- $20 million for grants to licensed behavioral health providers to provide supervised clinical experience to associates or other individuals so they may obtain a license or certification to practice.

The specific aims of the BHWi Program are to:

- Increase behavioral health system capacity to provide care that deeply embeds practices and promotes principles of health equity, cultural responsiveness, de-stigmatization of services, restorative healing and community empowerment;
- Develop and invest in a culturally specific workforce and increase access to culturally responsive services and interventions; and
- Engage communities through shared decision-making to build structures, processes, resources and supports for increasing recruitment and retention of a culturally specific behavioral health workforce.

1. **What outcomes did the agency anticipate and what were the actual outcomes of the program? How did you measure the impact? What is the impact of this program on our communities? Share what you learned.**

HCPIP: OHA anticipated HCPIP's outcomes since inception in 2018 would be to address gaps in culturally responsive care through incentives intended to improve health care workforce growth, diversity, recruitment and retention in rural and medically underserved areas of Oregon. HCPIP conducts data analysis, monitoring national and state health care workforce development initiatives and trends, and continued engagement with program participants and community partners. OHA and ORH collect participant data and experiences stored in an ORH database.

Medical and Behavioral Health Workforce Incentives

HCPIP measures outcomes through impact assessments and data reporting in the legislatively mandated biennial Evaluation of Health Care Provider Incentive Programs report, with the next report being developed for release in early 2025. In the 2023 Evaluation Report, incentives were shown to have an overall positive impact for students and health care professionals in medically underserved areas from 2018-2022:

- 1,017 participants in provider incentives programs receiving education or entering and remaining in the health care workforce.
- 34% of participants for whom race/ethnicity data was collected were people of color or from Tribal communities.
- Practicing professionals receiving loan forgiveness, loan repayment, and scholarship incentives provided an estimated 1,119,560 hours of primary care and dental care to 439,750 patients.

HCPIP has learned the following lessons about the impacts of provider incentives on people's access to culturally responsive care:

- **Creating programs that meet the needs of recipients increases retention and diversity in the workforce**. Innovation and flexibility in program operations and funding improves meeting community-defined workforce needs and creates an antiracist approach to supporting a diverse workforce. Examples of effective methods include:
  - Allowing incentive recipients to leverage telehealth to accommodate expansion in care delivery options.
  - Increasing loan repayment amounts and revising the application form to address experiences with and commitment to health equity and culturally responsive care.
  - Expanding provider types to include certified practicing professionals eligible for incentive programs.
  - Standardizing contract and amendment processes to accommodate changes in personal or professional circumstances.

- **Data collection is key to measuring program success and identifying methods for improvement and growth.** HCPIP has been improving data collection processes, including collecting race, ethnicity, language, and disability (REALD) and sexual orientation and gender identity (SOGI) data of applicants and participants to better focus future outreach efforts.
- **Preventing and addressing workplace discrimination for program participants.** The impact of racism, bias, and microaggressions on incentive recipients is significant in recruitment and retention of a diverse workforce. Evaluation respondents commented on experiences with racism, implicit bias, or microaggressions with patients and within the practice. These experiences contribute to disparities in access to quality care and burnout for people from communities experiencing inequities which may result in providers transferring practice site or taking a leave of absence. OHA recognizes this in its ongoing efforts to improve the program and identify methods to address adverse events that result in workplace discrimination.

HOWTO: HOWTO's anticipated outcomes are to decrease local shortages and increase diversity in the health care workforce serving people in medically underserved communities by increasing training opportunities for Oregonians entering the health care workforce, addressing career advancement, and improving retention. In addition, while HOWTO funding is typically for up to three years for each project, sustainability planning is a priority for selection with the aim that new programs may continue beyond the HOWTO funding period to extend their impact.

HOWTO measures outcomes through grantee reports on participant numbers. From October 2018-June 2024:

- 639 new workers were trained in a wide range of health care fields, including Traditional Health Workers, oral health, behavioral health, graduate medical education, and residency/internship programs.
- More than 160 incumbent workers received training to expand their skills.

- More than 2,300 workers* took part in behavioral and interprofessional health care trainings. (*Note: Workers may take multiple trainings offered so the same individual may be counted more than once in the 2,300 workers cited here).

BHWi: OHA's anticipated outcomes included equitably stabilizing and increasing capacity of Oregon's behavioral health care workforce. Impact was measured through several means within the various incentive programs including retention rates, number of hires, clinical supervision, racial ethnicity language and disability data (REALD), and number of scholarships provided.

BHDWi impacts are still being measured, as most programs are new and ongoing, and initial data gathered continues to be synthesized. However, initial data indicates progress from programs that have existed longer. For example, the Behavioral Health Workforce Loan Repayment program cycles three and four show a 90% retention rate of participants in the program who have stayed at the position of when they applied for the program (94% for those that have changed positions); 89% awarded identify as black, indigenous, or as a person of color; and 54.5% are multilingual. Overall, 97% of all BHWi funding is contractually obligated; and of this a $3M set aside has gone into the annual tribal behavioral health contracts for workforce funds (clinical supervision and other incentives).

Additional to the above impacts is the work that the Behavioral Health Medicaid Team and the Behavioral Health Equity and Community Partnerships team have completed in alignment with BHWi. This includes:

- CMHPs have received $17.5M in 2024 (reimbursement rate by 30% for rural and culturally/linguistically specific)
- Culturally and linguistically specific services enhanced the Medicaid payment program to grow (approximately 117 providers).

Other impacts are expected to follow similar, but perhaps less striking, trends as all workforce incentive programs prioritized providers of Culturally and Linguistically Specific Services (CLSS), rural providers, and providers and students from "Communities who are underserved" (defined in ORS 309-081).

OHA identified key lessons from these programs which include: reducing administrative burden (in the form of unnecessary processes) for applicants creates more equitable opportunities leading to increased participation and compliance; community needs must be driven by community voices to create tailored and meticulous solutions which can take time; and outcome measurements are difficult to standardize across the behavioral health workforce when considering the variety of services, credentials, education, and career pathways.

2. How does the program increase or decrease racial equity? Does the program have potential unintended racial equity consequences? What benefits may result from the program?

HCPIP: The 2023 Evaluation Report showed that for HCPIP incentive recipients for whom race/ethnicity data was collected, 34 percent of students and practicing professionals identified as people of color or Tribal members. By expanding and standardizing REALD data collection and reporting during the 2023-25 biennium, OHA will have data for the 2025 Evaluation Report at a more granular level, which will strengthen understanding of incentive impacts and expansion efforts. HCPIP's new incentives implemented in the current biennium intend to increase racial equity in two ways:

- **Expand health care career pathway and retention opportunities for individuals entering and practicing in the health care workforce.** Scholarships, beginning as early as middle/high school to throughout an individual's professional career, reduce financial barriers for students interested in health-focused careers to learn about different professional fields, and for practicing professionals to expand their credentialling. National data has shown that funding opportunities to decrease

educational debt is an effective strategy in reducing the financial burden that prevents many individuals from participating in health-focused academic tracks. By funding these incentives, HCPIP focuses on improving diversity in educational programs. In addition, two existing incentives retain a diverse workforce in medically underserved areas in sites experiencing the highest workforce shortages: 1) Loan repayment reduces financial burdens associated with rising student debt and 2) Medical Malpractice Insurance Subsidy helps alleviate high insurance costs for specific professions in rural Oregon.

- **Improve access to culturally comprehensive care and improve health outcomes.** A diverse workforce is key in providing inclusive and effective care for patients. The 2023 HCPIP Evaluation reported that, between 2018-2022, practicing professionals receiving HCPIP loan forgiveness, loan repayment, and scholarship incentives provided an estimated 1,119,560 hours of primary care and dental care to 439,750 patients. This reflects the large impact these programs have on direct patient care, which is anticipated to grow based on expansion in incentive recipients and eligible disciplines.

During the 2023-25 biennium, HCPIP has built on past efforts to address issues that decease racial equity of incentives:

- **Address workplace discrimination.** Racism, bias, and microaggressions towards providers participating in these incentives impact their ability to stay at their obligated service site and/or results in professional burnout. Monitoring the occurrence of racism, bias and microaggressions—and measuring the impact—has been a challenge due to underreporting. OHA has made reporting adverse events more accessible and confidential, created flexibility in site transfers and temporary contract suspension, and emphasized the need for equitable workplaces for eligible practice sites.
- **Expand provider type eligibility to expand access to equitable care.** HCPIP expanded student/provider eligibility for allied health care professionals who share lived experiences with diverse patients and are more racially/ethnically diverse. With limited biennial budget and staff capacity, tracking non-licensed health care workforce past the completion of their service

agreement is a challenge that HCPIP is working to address to evaluate long term impact of state funds.

HOWTO: READL data collection is under development for HOWTO grantees with an anticipated start in early 2025. Templates for data collection, training sessions, and additional resources to support grantees are in progress with OHA's Data Equity Program. By funding projects that increase health care workforce development opportunities for people experiencing racial inequities, the HOWTO program aims to increase access to care for Oregonians and contribute to OHA's 2030 goal of eliminating health inequities. Barriers for organizations wishing to apply for funding could create unintended negative racial equity impacts. As a result, HOWTO program efforts to increase racial equity also include integrating an equity focus throughout the process for reviewing and selecting funded proposals. Based on community input, changes to the selection process include updating the scoring rubric to embed equity as a priority for reviewing proposals, extending the application timeline, and increasing outreach efforts in advance of each round of funding.

BHWi: The BHWI's direct intent is to equitably increase the capacity of Oregon's behavioral health workforce. A primary focus of BHDWi has been increasing racial equity, as well as equity for intersecting identities that are marginalized by increasing the number of providers that hold these identities in Oregon. All healthcare-based programs have the potential for unintended racial equity consequences, but not blatant potential is unknown at this time, as the purpose of the BHWi is to increase racial equity. The BHWi continues to monitor feedback and program effectiveness to identify any potential for these unintended consequences.

Benefits from this program include proven results of maintaining job retention and increasing recruitment for CLSS providers, peer specialists, and the certified sector of the behavioral health workforce. All the above workforce categories have the highest number of non-white and multi-lingual providers in Oregon.

3. How do we use these results to continually reevaluate and improve our efforts?

HCPIP: Public reporting on HCPIP quantitative and qualitative data, as well as building relationships with providers, students, practice sites, and academic institutions, has created a better understanding of the impact these incentives have on the workforce and patients. A key opportunity for learning and growth is through OHA reports. As required by HB 3261 (2017), OHA publishes the biennial Health Care Workforce Needs Assessment and Evaluation Report to share data on the health care workforce, impacts of incentive program and trends and opportunities to evolve HCPIP to develop culturally responsive care in Oregon. The upcoming 2025 Evaluation Report will include REALD data and more qualitative data to ensure OHA represents a realistic, equity-focused narrative of HCPIP impact on incentive recipients. OHA plans to use this information to identify realistic changes to HCPIP to meet the needs of practicing professionals and students, practice sites and academic institutions. OHA approaches these spaces with humility and openness to listen, learn, and respond through feasible policy change.

HOWTO: Using data and input from grantees as well as feedback from applicants and the HOWTO Advisory Committee, the program works to improve processes for applicants to reduce barriers for organizations seeking funding.

BHWi: The BHWi engages in continuous process improvements for grant programs to improve outcomes for minoritized and marginalized communities. These include reducing unnecessary administrative barriers for grant applicants and recipients, providing grant documents in Spanish, providing a pathway to request documents in non-Spanish/English languages, offering alternative methods to accepting applications, and offering responsive technical assistance to applicants and grant recipients.

4. How did you engage communities during the process? What was the frequency of engagement? Did conversations lead to program or process changes?

HCPIP: HCPIP community engagement activities are described below.

- **Ongoing outreach and engagement.** OHA contracts with ORH to conduct continuous outreach and engagement with organizations, applicants, and participants for the HCPIP Loan Forgiveness, Loan Repayment and Rural Medical Practitioners Insurance Subsidy Programs. These activities include outreach to numerous professional organizations, practice sites, and prospective recipients; supporting applicants, assisting recipients with adhering to contract requirements, and alerting OHA of recipients' needs that may require contract changes. Communication channels include site visits, webinars, fact sheets and informative websites. Community feedback that led to HCPIP programmatic change were developing reporting and protocols to address workplace discrimination, ensuring a broader range of providers are aware of incentives, and evolving incentives better meet the financial needs of recipients.
- **Engagement to develop and publicize new incentives.** OHA remodeled the HCPIP scholarship program by working with educational institutions to create culturally inclusive outreach and programming, while meeting student needs in the specific health care disciplines. OHA partnered with Oregon Department of Education to develop a new scholarship program for middle and high school students. OHA will work with education programs, Oregon Department of Education and Higher Education Coordinating Commission, and ORH through its comprehensive outreach channels to spread awareness of the programs. Conversations that sparked change include feedback on reducing the administrative burden on scholarship distribution and data reporting, as well as which academic programs should be considered for the program.
- **Engagement with Health Care Workforce Committee and other state entities.** HCPIP conducts engagement regularly with the Health Care Workforce Committee, which include members that represent the racial/ethnic, rural and medically underserved diverse health care workforce, and the Oregon Health Policy Board. Committee meetings are public and provide

opportunities for feedback, policy updates, educational presentations and public comment. In addition, HCPIP has engaged with various licensing boards and other state entities to gather their feedback.

HOWTO: HOWTO gathers community input via three approaches. First, HOWTO has an Advisory Committee that meets twice a year to provide input into program design and implementation. In 2023, HOWTO recruited for new committee members to increase diversity of racial/ethnic groups, regional distribution, health care disciplines, educational backgrounds, and lived experiences. The committee meets virtually twice per year. Each meeting is open to the public and includes opportunities for public comment. Second, at the start of each Request for Grant Proposals cycle, HOWTO providers' virtual information sessions are venues for answering questions and hearing feedback from community members. Third, grantee input is also continually shared through one-on-one meetings, semi-annual progress reports, and an annual All-Grantee meeting. Feedback impacted changes in the Request for Grant Proposals process, including the next funding round anticipated in Fall 2024, and refining administrative and reporting requirements.

BHWi: The BHWi provides several channels for feedback from community members, providers, external partners, state agencies, local governments, and current/past grant recipients. Rules Advisory Committees (RACs), grant webinars, and feedback surveys have all yielded suggestions for improvements to BHWi programs. An example of these changes is changing the Clinical Supervision program application process to an online form with easier to read and answer questions, drop down answer fields to reduce potential errors and misunderstandings, limited use of narrative questions that were also more straightforward, and easier to understand instructions and definitions. These changes led to an application response rate that grew 200 percent compared to previous rounds.

Frequency of formal community feedback sessions range from 1-2 scheduled initial sessions for grants, 1-2 scheduled RACs for rules, 1-2 individual feedback and technical assistance sessions with CLSS

providers on the Clinical Supervision Expansion Grant, public meetings with the Community Leadership Counsel that was comprised of providers and members of communities of color, and typically public meetings twice per month from the HB 2235 Workgroup (still ongoing) which has a membership of several individuals who hold diverse racial/ethnic identities. This workgroup also accepts public comment verbally during sessions and written through the HB 2235 inbox that is posted on the HB 2235 webpage. The BHWi also holds a digital "open door" policy for grant recipients to ask questions and provide feedback through our general inbox, grant administrator emails, calling our work phones, and through scheduling video conferences. The BHWi general inbox email address is posted on the BHWi webpage.

5. What were the challenges the program encountered during implementation?

HCPIP: HCPIP has encountered the following challenges during implementation in the 2023-25 biennium:

- **Funding limitations.** HCPIP operates a focused set of effective incentives with current service level funding each biennium. However, innovation, engagement, and expansion to increase racial equity in incentives distribution would benefit from increased funding to ensure the needs of more professionals and communities are being met.
- **Data collection limitations.** OHA has recognized barriers to HCPIP data collection and made significant progress in addressing the barriers. A lengthy planning period with the OHA REALD/SOGI Program to ensure data integrity delayed collecting REALD data from incentive workforce participants, which began last year. Data sets were isolated to different external partners, who have experienced administrative burden in collecting data. These issues have led to gaps in understanding the full program impact and identifying areas for growth. OHA made data collection strategy improvements that will result in a robust 2025 Evaluation report.
- **Applicant diversity.** A common challenge to increasing recipient diversity in many HCPIP incentive programs, such as loan repayment, was a large gap in the diversity of practicing professionals who

have already completed or been accepted into a health care education program. Barriers in access to educational pathways prevent diversity in academic programs and the future workforce. As a result, HCPIP launched new incentives this biennium for career pathways programs such as scholarships for high school and community colleges to increase upstream opportunities for students to become interested in, prepare for, and practice in the health care workforce.

- **Addressing workplace discrimination.** HCPIP faced challenges in creating standardized processes to address racism, bias and microaggressions incidents that incentive recipients experience. Identifying strategies OHA has the authority to implement has made incident reporting more accessible. Future work remains since this will be an ongoing challenge.

HOWTO: Challenges faced by the HOWTO program include:

- Limited funding despite increased workforce shortages and growing number of project proposals (e.g., available funds limited Round 5 recipients to about 15% of the completed proposals).
- Connecting with organizations that are not aware of the funding opportunity.
- Reducing barriers to apply for funding (e.g., increasing application timelines and addressing complex application processes).
- Support for organizations implementing REALD collection from workforce training participants.
- Lack of funding to support evaluation of long-term HOWTO workforce impacts and focus future funding most effectively.

BHWi: Time to build and implement incentive programs for HB 2949/4071(2022) was short and did not provide adequate time to be outcomes driven. This led to programs that were based on recommendations and empirical evidence to not properly be set up at the beginning to measure the impacts of BHWi incentive programs. Further, it is challenging to measure the impact of many programs because of the time it takes to see results. Education, training, certification, supervision, and licensure all take time (in most cases several years); therefore, results for program investments will take time to yield.

Medical and Behavioral Health Workforce Incentives

Other challenges include the aforementioned issues with unnecessary administrative burden for applicants/grant recipients and finding that the initial/one-time investments from HB 2949/4071 did not meet the need or the demand of these incentive programs. Additionally, permanent staffing for this work has been a challenge; thus, the agency is requesting funding in the next biennium to be able to sustain staffing and programming.

Is the agency planning to continue the program?

HCPIP: OHA plans to continue HCPIP with funding allocated in each biennium, with continued growth and outreach of the incentives to address racial equity and increase access to culturally responsive care.

HOWTO: OHA and OHSU plan to continue the partnership that provides funding and support for the HOWTO program.

BHWi: OHA has requested to continue the program during the 2025-2027 biennium through a comprehensive populous option package (POP). If approved, the BHWi plans on expanding the programs to extend the reach of incentives and be more strategic at incentivizing providers to fill the most needed positions that would provide services to communities who are underserved. For example, the BHWi Loan Repayment program had nearly 2,200 applicants and was able to award 205.

Racial Health Equity Impact Statement Update
Alcohol & Other Drug Prevention and Education

Program Overview

OHA-PHD's Health Promotion Chronic Disease Prevention Program (HPCDP) provides overall administration of alcohol related primary prevention strategies. Program infrastructure includes data and evaluation, health communications, state level program and policy interventions, and funding directly allocated to communities to plan and implement strategies that prevent alcohol and other drug use across the lifespan through local and regional community mobilization and advocacy.

The Alcohol and Other Drug Prevention and Education Program (ADPEP), funded primarily by the federal Substance Abuse Prevention and Treatment (SAPT) Block Grant, as well as the Centers for Disease Control and Prevention (CDC), state general funds and state marijuana taxes, works to reduce excessive alcohol use and associated chronic and acute health harms. Primary prevention strategies include raising the price of alcohol; increasing access to comprehensive alcohol screening, referral, and treatment; maintaining state control for distilled spirits; increasing regulation of alcohol outlet density and retail environments; and limiting exposure to and access to alcohol. Community or tribal based ADPEP prevention strategies include Tribal Based Practices, coalition building, school-based prevention programs and supports or environmental prevention and community mobilization.

Additional funding through OHA-PHD's Rape Prevention and Education (RPE) grant supports environmental strategies to reduce alcohol outlet density. New funding through the Injury and Violence Prevention (IVPP) Program is increasing opportunities to partner across OHA Divisions to expand alcohol prevention initiatives, given alcohol is often associated with injuries related to vehicular related accidents, drug overdoses, suicide, and gun violence.

Over the last seven years, OHA-PHD has worked towards the goal of building a comprehensive prevention program addressing alcohol and other drug use that parallels the more robust infrastructure of tobacco prevention and cessation. This work occurs in collaboration with Oregon's 36 counties, culturally specific organizations, nine federally recognized Tribes, and eight Regional Health Equity Coalitions (RHECs). In addition, HPCDP coordinates closely with OHA-HSD's Child and Family Behavioral Health Program; Addiction Treatment, Recovery and Prevention Unit; Medicaid Policy and Partnerships Team; and Health Policy & Analytics to align efforts across the substance use continuum of prevention, treatment, and recovery**.**

Program examples

Below is a snapshot of alcohol related program activities in Oregon.

CDC Alcohol Epidemiology Grant

In 2021, CDC awarded Oregon a competitive five-year grant to increase capacity in alcohol epidemiology and excessive alcohol use prevention. Funding supports a new 1.0 FTE epidemiologist dedicated to strengthening alcohol related data systems that inform and expand alcohol prevention program, systems, and policy infrastructure in Oregon. An Excessive Alcohol Use Prevention webpage has been created, containing links to alcohol-related data and information. This is in addition to alcohol

data posted on the Chronic Disease Data Portal, which includes drinking prevalence data from BRFSS, hospital discharge data and emergency department data. The alcohol program has developed an alcohol density map which is currently undergoing leadership review. The alcohol program meets with internal and external partners regularly to provide technical assistance, to provide data or to discuss issues related to alcohol and to increase awareness of excessive alcohol use. For example, HPCDP staff fulfilled 17 alcohol-related data requests in 2023, nine requests for technical assistance from partners, and presented on alcohol ten times. The Rethink the Drink campaign launched in 2022 and has generated data requests and media coverage across the state (77 news makers about the importance of population-level, primary prevention interventions that prevent and reduce excessive alcohol use).

Alcohol Density Mapping

The AOD Prevention Alignment Team convened an "Alcohol Outlet Density" (AOD) workgroup with representation from across OHA-PHD and the Transportation Growth Management Program. There was a larger group that met quarterly from July 2021 to July 2023, and smaller technical mapping workgroup that met monthly starting in May 2022. The workgroup completed a functional ArcGIS story map in July 2023 and transitioned to a more communications-focused workgroup necessary to finalize the map. Tasks included creation of simplified language, choosing appropriate color palettes, and graphic design to facilitate understanding and ease-of-use. The program now has completed draft Alcohol Outlet Density Map that has been approved by CDC and is undergoing agency approvals.

Equity Initiative Spotlight:

Overview of OHA's excessive alcohol use communications brand, Rethink the Drink

Over the last six years, OHA-PHD has worked with a diverse array of public, private and community

partners, research and evaluation contractors, and communications consultants to develop the country's first statewide communications infrastructure to reduce excessive alcohol use. The Rethink the Drink (RTD) mass reach communications brand includes a website, social media, paid media, earned media, campaign evaluation, and continuous support for partners through engagement and technical assistance. The target population for RTD includes all adults in Oregon ages 21 and older who do not have an Alcohol Use Disorder (AUD).

The brand and first campaign launched on June 27, 2022. Since then, OHA has completed two additional paid media campaigns. The website, social media, and partner technical assistance has run continuously since launch resulting in significant media coverage, community specific advertising, and increased brand reach.

RTD's aims to reduce the harms associated with excessive alcohol use including preventing AUD, by reaching the 90% of people who drink excessively who are not alcohol dependent. Some communities experience more harms from excessive alcohol use due to systemic racism, discrimination, and an unjust lack of resources. These harms include cancer, addiction, violence, and others. Populations that experience these inequities include racial, sexual and gender minorities, and those with lower incomes.

Rethink the Drink monitors performance and evaluates progress through:

- Analytics including paid media analytics, website, and social media analytics, and earned media reach.
- Quantitative and qualitative evaluation of campaigns
- Partner and public feedback through focus groups, meetings, and interpersonal communication

RTD's most recent media campaign ran from December 2023 to February 2024 and had over 17 million impressions with digital tactics alone. This paid media campaign included an emphasis on buying media in Spanish and rural markets. Since its launch in June 2022, over 194,000 people have visited the RTD website.

RTD's first campaign evaluation showed that the campaign was successful in achieve initial goals. For example, people who saw the campaign advertisements had more conversations about drinking and were more likely to support community level strategies to prevent excessive alcohol use. Community level strategies are key to reducing inequities in alcohol related harms. Additional campaign evaluation for the '23-'24 Winter campaign will be available in Winter 2025.

Finally, relationships with partners are key to all the work OHA does in public health. Over the past 2 years OHA has seen increases in utilization and requests for technical assistance and customized community resources.

Since RTD was launched to the public in 2022, OHA has learned that the community is interested in and ready to talk about alcohol. People in Oregon appreciate diverse advertisements that provide many different perspectives on this complex topic. They appreciate receiving health information in a conversational, non-shaming way, and agree that alcohol is linked to many community harms including domestic violence and suicide. As part of the development of the Winter 2023-2024 campaign, OHA held two focus groups specifically for Black and African American people in Oregon, where participants agreed that even with the many other issues happening in the community, including systemic racism, that they needed this health information and appreciated that RTD advertisements provided that information without telling people not to drink.

Rethink the Drink engages communities in multiple ways:

- 1:1 meetings and emails
- Focus groups (ex. Culturally specific Spanish language and Black, African American focus groups)
- Large meetings with community partners

For the '23-'24 Winter campaign, monthly meetings in the Summer and Fall 2023 were held with community partners. Partners helped inform campaign goals, reviewed ads before testing, reviewed testing results, and even reviewed website copy.

OHA will continue to support this communications infrastructure, focusing on technical assistance and supporting community partner initiatives. Challenges for Rethink the Drink include stable funding, agency capacity, and political pressure from commercial alcohol industries. Further paid campaigns will be done as funding is identified and at the direction of OHA leadership. Currently, Rethink the Drink is launching an LGBTQIA2S+ community engagement initiative to work with the community on creating community specific materials for these diverse communities.

Community engagement and research will continue to inform the brand's evolution and future media and communications efforts. RTD utilizes population level data, culturally specific focus groups, and contractors with established experiencing engaging culturally and linguistically diverse communities. For example, the campaign produced the "How Many Drinks in a Week" video spot in both English and Spanish, and it was also created as a "Spanglish" spot (see here) to reach second and third generation Latino/a audiences who live their lives in both languages or who have Spanish as a heritage language. In addition, the campaign features unique, Spanish language-only videos shown to be effective with Spanish speaking communities based on audience testing. OHA-PHD changed the paid media plan based on recommendations from culturally specific focus groups; for example, based on areas of the

state with more or fewer Spanish language media outlets.

Data Collection, Analysis and Evaluation:

Alcohol use drives many pressing health and social challenges and inequities in alcohol related harm. According to the Centers for Disease Control and Prevention (CDC), excessive alcohol use contributes to adverse childhood experiences (ACEs) such as domestic violence, child abuse and neglect; risky suicide attempts and deaths by suicide; car crashes and serious injuries; lower educational outcomes; heart disease, liver disease, cancer, drug, and alcohol dependence, among others.

These alcohol-related harms most affect communities already experiencing other health and economic disparities. Alcohol is disproportionately available for sale in lower-income neighborhoods, and systemic racism, discrimination, oppression, toxic stress, and trauma have created and continue to perpetuate these inequities and related harms. The alcohol industry has further harmed low income and racial and ethnic communities with targeted alcohol advertising and overconcentration of alcohol outlets in these neighborhoods. The negative harms from excessive alcohol use disproportionately impact those with lower education and racial and ethnic populations, despite consumption rates that are generally lower than white Oregonians.

Available alcohol related data shows:

- Overall, alcohol is the third leading cause of preventable death in Oregon and is responsible for over 2,500 deaths annually.
- Excessive alcohol use and associated problems are on the rise. In Oregon, alcohol-related deaths have increased 47% since 2011.
- Deaths directly attributable to alcohol increased by over 26% from 2019 to 2021 during the COVID pandemic (Oregon Vital Records).

- Per capita consumption has also been trending upward over the last decade, and in both 2021 and 2022 was at an all-time high of 2.8 gallons of pure alcohol consumed per person over age 14 (National Institute on Alcohol Abuse and Alcoholism).
- Alcohol sales in Oregon have continued to increase (Oregon Liquor Control Commission).
- Alcohol use was a risk factor in nearly in 17.8% of unintentional or undermined drug overdose deaths in Oregon (2021 SUDORS).
- The rate of alcohol-related deaths in Oregon among American Indians and Alaska Natives (110.8 per 100,000) is much higher than any other racial or ethnic group (compared to 55.2 per 100,000 among non-Hispanic white), based on combined data from 2019-2022.
- The percentage of women in Oregon who use alcohol and binge drink is higher than the national average. This correlates with a higher rate of Fetal Alcohol Syndrome (FAS). Oregon studies show that children and youth with FAS are over-represented in the foster care system and FAS creates lifelong impacts on the child, the family, and society.

Excessive drinking places a heavy burden on Oregon's behavioral health system. Alcohol Use Disorder (AUD) is the most common substance use disorder (SUD) in the state and Oregon has the highest untreated SUD rate in the nation (2020 National Survey on Drug Use and Health). In contrast, spending and investments in alcohol and other substance use and abuse prevention relative to treatment remains very low (SB 1041 report for Criminal Justice Commission). The passage of Oregon's Ballot Measure 110 in 2020, the Drug Addiction Treatment and Recovery Act, re-directed hundreds of millions of dollars for increased screening, access to treatment and recovery services and peer supports, but did not include funding for substance use primary prevention as part of the continuum of care investments.

All told, excessive alcohol use is estimated to cost the Oregon economy $4.8 billion in 2019, or roughly $1,100 per person. This includes lost labor productivity, health care expenses, criminal justice costs, motor vehicle crashes and social welfare. It is estimated that over half of this cost ($2.6 billion) are public costs imposed on all Oregonians (ECONorthwest, 2020).

Racial Health Equity Impact Statement Update
Physical Activity & Nutrition

Program Overview
A resilient food system that incorporates positive relationships with a variety of trusted communities, organizations, Tribes and individuals across Oregon is needed. This food system must also include enough resources and capacity to ensure a number of structures and relationships are in place to co-create solutions that support the implementation of new policies, practices and programs that will provide enough food to meet current needs while maintaining healthy systems that ensure healthy food options and sustainability for future generations. Data shows that poor nutrition and diet quality are common risk factors among people in Oregon leading to serious yet preventable diseases, including type 2 diabetes, heart disease, stroke, cancer, metabolic syndrome, and others.

Many households in Oregon struggle to afford healthy food. Oregon has made strides in improving food insecurity in the past decade, moving from one of the highest food insecurity rates in the nation after the Great Recession, to now being around the national average. However, that decline began to reverse during the Covid-19 pandemic and has continued to climb. Rates of food insecurity are also higher among certain demographics, including American Indian, Black and African American and Hispanic and Latino/a/x/e communities, single mothers, rural communities, and people who rent their housing. Some people, especially in rural areas of the state, must travel long distances to access a full-service grocery store; others live in neighborhoods with fewer places to buy affordable fresh fruits and vegetables.

Walking is the easiest way for most people to get more physical activity, including people with disabilities

who can move with assistive devices such as wheelchairs and walkers. Time spent walking and moving can also improve muscle strength and flexibility, cardiorespiratory fitness, joint health, bone density, sleep quality, and it can also help with managing weight, stress and overall mental health. People who meet the CDC's guidelines for physical activity have reduced risk of developing multiple chronic conditions including heart disease, type 2 diabetes, multiple cancers, arthritis, stress, depression, and others.

Policies and programs that create more walkable environments and encourage walking for transportation and leisure can help people get more exercise, safely reduce their risk of chronic disease, and help manage many chronic conditions they may already have. Improving walkability in communities with high proportions of people with low incomes and people of color can also help reduce health inequities. These communities have experienced systemic discriminations and less access to healthy environments. This has resulted in higher rates of chronic diseases that may improve with walking and physical activity.

Overall, OHA has limited resources dedicated to promoting interventions for physical activity and nutrition. Total annual operating budget for physical activity and nutrition prevention interventions administered through HPCDP is approximately $6.3 million per biennium, most of which is dedicated Centers for Disease Control and Prevention Chronic Disease Prevention grant funding with limited flexibility. This limits the capacity of the agency to advance access to nutrition and physical activity among people in Oregon, especially among priority populations.

Program examples

Physical Activity and Nutrition

Below is a snapshot of physical activity and nutrition related program activities in Oregon:

Oregon Farm to Institution Collaborative (OFIC)

OHA supports partner agency the Oregon Department of Agriculture (ODA) by participating in the Oregon Farm to Institution Collaborative (OFIC). This project is funded by a US Department of Agriculture (USDA) Regional Food System Partnership Grant and brings together partners including institutional food purchasers, food service staff, farmers, food hubs, and community-based organizations. The concept behind Farm to Institution is to source locally grown foods to be served in larger institutions such as schools, hospitals, correctional facilities, and worksites. Increasing access to locally grown foods at these locations where many people in Oregon spend significant amounts of time can encourage and support increased consumption of nutritious foods. The purpose of the project is to leverage existing proofs of concept in farm to institution and take them to scale at a state level. The coalition is working to develop statewide procurement guidance for institutions, which focus on both nutritional standards and local food purchasing. One of the goals of the grant is to stand up solutions to address inequities in farm to institution in Oregon.

Infant and Toddler Nutrition Campaign

The Infant and Toddler Nutrition Campaign is a social marketing campaign created by the Centers of Disease Control and Prevention (CDC) to increase knowledge and awareness of the updated nutrition and feeding guidelines for ages 0-2 that were included in the Dietary Guidelines for Americans, 2020-2025. This campaign specifically focused on reaching Black and African American caregivers of youth ages 0-2, because research has shown that there are racial disparities in breastfeeding. According to the National Immunization Survey-Child, fewer non-Hispanic Black infants (77.3%) are ever breastfed

compared with Asian infants (87.1%), non-Hispanic White infants (85.3%) and Hispanic infants (81.9%). With funding from the National Association of Chronic Disease Directors (NACDD), an Oregon specific version of this campaign ran from March 1 - May 31, 2024. Coordinated by HPCDP, this project included collaboration with Maternal and Child Health (MCH) and the Women, Infants and Children program (WIC).

A total of nine in-depth interviews were conducted with African American mothers before running the ads. Participants liked a more direct call to action and found the immediate health and well-being of the child more important when making feeding decisions.

While running only for a brief, three-month period, the Oregon version of the campaign saw some success. The campaign had over 6.7 million impressions, and almost 17,000 clicks throughs to the website for more information.

Community Care Hub for Self-Management (Health) Programs

The Community Care Hub (CCH) receives referrals for self-management programs, some of which are described below. The purpose of self-management programs is to:

- Provide health education and lifestyle change support through nationally approved classes,
- Provide social support,
- Offer classes and programs by trained but non-Medicaid enrolled providers, allowing community members to tailor and teach classes to meet a variety of needs.

The CCH was built to serve communities with the highest rates of chronic disease. Self-management

classes are offered by the community, for the community. Some evidence-based self-management programs include:

- The National Diabetes Prevention Program (DPP): A community-based program focusing on physical activity, nutrition and stress management. DPP providers receive recognition from the CDC and are covered by Medicaid. Curriculum is available in multiple languages and there is particular focus on tailoring curricula for AI/AN communities. OHA has been engaged with this program since 2016, collaborating with OHA's Medicaid and Health Policy & Analytics Divisions, and working to establish regular coordination with Tribal Affairs. HPCDP also works with coordinated care organizations (CCOs) and community-based organizations (CBOs) to increase diverse participation in the program. Of note, a person must be diagnosed as obese or overweight to be eligible to participate and have the program covered by Medicaid/Medicare.
- Diabetes Self-Management Program: For people with Type 2 diabetes. Six-week group class. Covered by Medicare and Medicaid.
- Diabetes Self-Management Training: For people with Type 2 diabetes. Usually nine weeks – at least one session with a diabetes educator and then group classes. Covered by Medicare and Medicaid.
- Healthy Heart Ambassadors – four-month program taught by trained community members – self-monitoring of blood pressure and a healthy heart diet. Not currently covered by Medicare and Medicaid.
- Walk With Ease – six-week group walking class. Adaptive Walk with Ease pilot with Oregon Office of Disability and Health. A self-guided online class is free to all Oregonians and people can start any time.
- Tai Ji Quan: Moving for Better Balance®: A balance training regimen and group class designed for older adults at risk of falling and people with balance disorders. One hour two times a week for 24

weeks or more.

Although the CCH and individual programs are building capacity to screen for and connect people to social needs, without nutrition and food security, safe places to walk or hold classes, transportation, childcare, and other social needs, participating in these programs can be challenging.

Self-Management Program Medicaid and Medicare Reimbursement
The National Diabetes Prevention Program and Diabetes Self-Management Program (DSMP) were the first self-management programs approved for coverage by OHP. Self-management programs are unique in that they are not generally offered by Medicaid enrolled providers, as these are community-based programs. Now, OHA is shifting focus to other covered programs, and towards alternative billing options such as In Lieu of Services. With very limited funding not expected to extend past June of 2025, it is unclear how this effort to support Medicaid reimbursement for CDSMPs will continue.

Equity Initiative Spotlight:

State Partnerships Improving Nutrition and Equity (SPINE) project
The State Partnerships Improving Nutrition and Equity (SPINE) Project addressed economic and social conditions limiting food and nutrition security across the life span. This two-year project (January 2022 – December 2023) was funded through the National Association of Chronic Disease Directors (NACDD) to strengthen relationships with community-based organizations involved in equity-centered food and nutrition security policy, programs, and initiatives. The project aligned with Oregon's 2020-25 State Health Improvement Plan, Healthier Together Oregon (HTO) by:

- Increasing access to affordable, healthy, and culturally appropriate foods for priority populations,

including people of color and low-income communities,
- Building a resilient food system that provides access to healthy, affordable, and culturally appropriate food for all communities,
- Strengthening the public health infrastructure for establishing relationships and partnerships with equity-centered community-based organizations involved in food and nutrition security policy, programs, and initiatives.

The project was statewide, and community-driven, with activities focusing on training and technical assistance convenings as identified and led by partners. The Oregon Community Food Systems Network (OCFSN) was the lead partner for the project and their leadership team guided the direction of the work. OHA staff provided logistical and technical assistance with grant writing, reporting, and other requests, but programmatic direction was led by OCFSN.

Due to the end of the grant funding that supported this work, the formal project is not continuing. However, the project laid the foundation for stronger partnerships between OHA, OCFSN, and member organizations of OCFSN. These partnerships have continued to support connection and collaboration, for example, connecting OHA Medicaid 1115 Waiver staff with OCFSN members who were interested in the nutrition services portion of the waiver. OCFSN members were able to have their questions about the wavier answered, as well as provide input to OHA Medicaid Waiver staff about ways to increase equity in the waiver implementation.

Data Analysis:

Physical Activity and Nutrition data show that:

Physical Activity and Nutrition

- Physical inactivity and poor nutrition are common risk factors among Oregonians leading to serious yet preventable diseases such as diabetes and heart disease. There are disproportionate opportunities for safe physical activity and nutrition.
- In Oregon, only 25% of adults (2019 Behavioral Risk Factors Surveillance System), 18% of 11th graders, and 24% of 8th graders (2022 Student Health Survey) get enough physical activity. Nearly one-fifth of Oregon adults reported getting no physical activity outside of their work. Differences in physical activity rates exist by race and ethnicity, 30.5% of Hispanic and Latino/a/x/e, 26.1% of Native Hawaiian and Pacific Islander, and 25.6% of American Indian and Alaska Native respondents reported getting no physical activity outside of work, compared to 16.9% of White respondents, 16.6% of Asian, and 20.4% of Black and African American respondents (2018-2021).
- Diabetes rates in Oregon are: Black and African American (11%), Hispanic and Latino/a/x/e (13%), American Indian and Alaska Native (12%) and Native Hawaiian and Pacific Islander (17%). White and Asian adults had lower rates, 8% and 7%, respectively (2018-2021 age-adjusted estimates).

While OHA does have access to the data on Body Mass Index (BMI) and obesity rates, which have historically measured the impact of nutrition and physical activity programming, they were intentionally not included in this document. The use of BMI as an evaluation metric carries racial bias and weight stigma. OHA nutrition and physical activity programming aims to be evaluated from a more equitable lens.

Racial Health Equity Impact Statement Update
Tobacco Prevention and Cessation

Program Overview

Tobacco use and its resulting health problems are not spread equally throughout Oregon's communities. Black and African Americans, American Indians and Alaska Natives, people experiencing poor mental health, and people living with lower incomes in Oregon are some communities that experience a higher burden from tobacco. For decades, the tobacco industry has stolen community values and culture to sell their products, intentionally focusing their marketing on people facing systemic racism and other discrimination. Many of these same communities have not received enough protection through policy interventions and quitting efforts that help shape a healthier environment. This has led to disparities in smoking rates and health outcomes.

The Oregon Health Authority Public Health Division’s (PHD) Health Promotion Chronic Disease Prevention (HPCDP) Section administers commercial tobacco prevention and cessation programming. HPCDP’s programming focuses on the upstream social determinants of tobacco use and on specific policy interventions that will narrow persistent racial inequities in tobacco use. In the 2023-2025 biennium, HPCDP’s total operating budget for commercial tobacco prevention and cessation from federal, state, and other sources was just over $129 million. This included $13 million of carryover from the previous biennium as OHA set up equity-focused grant opportunities to eliminate tobacco-caused health disparities. HPCDP works in collaboration with federally recognized tribes, 35 Local Public Health Authorities (LPHAs), 91 community-based organizations, eight Regional Health Equity Coalitions

(RHECs), health care providers, and advocacy groups across the state. Together, these efforts comprise a comprehensive approach to tobacco inequities across the spectrum of prevention.

Program Highlights and Challenges

Regional Health Equity Coalitions (RHECs): Since 2014, HPCDP and the OHA Equity and Inclusion Division have funded RHECs to build both OHA's and communities' capacity to reduce health inequities through policy, system, and environmental change strategies. HPCDP now funds eight RHECs working on culturally specific upstream drivers of commercial tobacco use. Funding supports core operations of RHECs and culturally specific approaches to addressing cultural isolation, increasing representation and sense of place, responding to community needs, and tackling the toxic stress of systemic oppression experienced by these priority populations.

Smokefree Oregon: Smokefree Oregon is OHA's mass reach health communications brand for tobacco prevention and cessation. Smokefree Oregon's *Imagine* campaign invites people statewide to envision a tobacco-free future. This campaign was created with Local Public Health Authorities (LPHAs), Community Based Organizations (CBOs), RHECs, federally recognized tribes, and tribal-serving organizations. Communities heavily targeted by the tobacco industry designed artwork for the campaign, including Asian/Asian Americans, Black/African Americans, youth, people living with mental health challenges, and LGBTQIA2S+ communities. Smokefree Oregon includes two culturally specific health communications brands to narrow racial disparities in prevention and cessation. These brands are the Oregon Native Quit Line for American Indians and Alaska Native people in Oregon (www.nativequitline.org) and Vive Sin Fumar, a campaign co-created with Latino/a/x community members (www.vivesinfumar.com).

Tobacco Prevention and Cessation

Nicotine Treatment and Recovery Project: The Nicotine Treatment and Recovery Project's goal is to improve access to treatment and cessation services for people who use commercial tobacco or nicotine and who also have behavioral health needs. Nationally, people with behavioral health needs smoke at two to three times the rate of the general population, and nearly half of all annual deaths from smoking are among people with behavioral health conditions. This disparity stems from decades of tobacco industry targeting and a dearth of quit smoking resources in behavioral health treatment settings. This project is led by an expert panel of behavioral health and other community partners, including people with lived experience. Panel members provide guidance on data collection, a billing guide and implementation toolkit for behavioral health centers, and an upcoming statewide leadership academy that will move the state toward behavioral health equity in tobacco treatment.

Tobacco and E-Cigarette Tax Increase Update: In 2020, Oregon voters passed "Tobacco and E-Cigarette Tax Increase for Health Programs" (Ballot Measure 108) into law. Four years later, pack sales of cigarettes have decreased by 33 percent. While we do not have comparable sales data for e-cigarettes, we estimate a 21 percent decrease in sales of other tobacco products (tobacco products excluding cigarettes) based on comparisons of Oregon Department of Revenues tax receipt distributions pre- and post-tax increase.

With decreases in cigarette and e-cigarette consumption in recent years, adult current cigarette smoking is at an all-time low of 13% in Oregon (Behavioral Risk Factor Surveillance System (BRFSS), 2022). Despite this progress, disparities remain:

- 28% percent of American Indians and Alaska Natives smoke cigarettes (BRFSS, 2018-2021).

Tobacco Prevention and Cessation

- 62% of Black people in Oregon who smoke use menthols. Menthol cigarettes have a cooling mint flavor, making it easier to inhale more nicotine and harder to quit than non-flavored cigarettes (BRFSS, 2018-2021).
- One in four people who report experiencing poor mental health also report smoking cigarettes. (BRFSS, 2022).
- One in five people with household incomes of less than $25,000 a year smoke. (BRFSS, 2022).

HPCDP continues to use a community driven engagement process to allocate funds earmarked for eliminating tobacco-caused health disparities. In the 2023-2025 biennium, HPCDP granted a total of $14.5 million to 91 CBOs to provide culturally specific services to members of the BIPOC, LGBTQIA+, disability, AI/AN youth, and rural communities. Grantees include a variety of culturally specific organizations in 30 counties, with many CBOs serving multiple counties and a range of priority populations. CBOs reported forming close to 300 new partnerships across different sectors, including utility companies, faith-based organizations, media outlets, law enforcement agencies, farms, businesses, crisis lines, and corrections facilities. Funding also increased stability and sustainability for these organizations, with 30 CBOs reporting that Ballot Measure 108 helped them secure additional financial support from new funders.

A new challenge facing community-led prevention and cessation efforts is the elimination of an incentive metric for Coordinated Care Organizations (CCOs) to reduce tobacco addiction among their members. Since 2016, CCOs received incentive dollars to reduce the prevalence of adult cigarette smoking. This metric resulted in partnerships and innovative local approaches to reducing tobacco use, such as better clinical referrals to treatment and locally driven communications campaigns. In 2024, members of the

Metrics and Scoring Committee voted to eliminate the metric. Ballot Measure 108 and other tobacco tax dollars provide significant funding to Medicaid. Without the incentive metric, OHA is concerned CCOs will deprioritize commercial tobacco prevention and lose ground on reducing prevalence and tobacco-caused health care costs. OHA's community partners, particularly CBOs and RHECs, submitted testimony in support of the incentive metric, expressing concern that CCOs would no longer collaborate on commercial tobacco prevention and cessation initiatives.

Addressing the Harms of Flavored Tobacco Products: Flavored commercial tobacco products, including cigarettes and little cigars, pose a significant risk to public health and obstacle to advancing health equity. Flavored smokeless tobacco and inhalant delivery systems (IDS), such as e-cigarettes and vaping devices have contributed to an "epidemic" of youth vaping. Menthol flavored products are the only flavored cigarette product allowed on the market and have been aggressively marketed to Black/African American communities. In 2023, HPCDP was one of two state public health agencies that received funding from the Centers for Disease Control and Prevention (CDC) to reduce the harms of flavored tobacco products. HPCDP is leveraging this five-year grant to expand cessation supports for flavored products, particularly menthol, building on the work started by CBOs receiving Ballot Measure 108 funding. HPCDP's new Oregon Tobacco Retail License Program also built rules and program processes following equitable enforcement principles. This approach is designed to maximize the public health benefit of additional flavor restrictions that may come from the local, state or national levels while minimizing the risk that individuals, particularly people of color, will be unfairly targeted by enforcement.

Impact of Community Feedback on Program Implementation

Tobacco Prevention and Cessation

The Oregon Tobacco Prevention and Education Program (TPEP) has two advisory bodies that provide guidance on how tobacco tax revenues are allocated for tobacco prevention and cessation. These include the Tobacco Reduction Advisory Group (TRAC) and the Ballot Measure 108 CBO Advisory Group. Over this biennium, OHA is facilitating a planning process that will result in a shared governance structure that equitably represents all partners in Oregon's tobacco prevention system and has purview over all commercial tobacco tax funding sources. The resulting governance body will collaborate with HPCDP and advise on policy development, program improvement, program strategy, budgeting strategy and community engagement frameworks.

Measuring Results and Evaluating Impact

OHA's surveillance infrastructure and data sources inform tobacco prevention and cessation performance measures, program design, and evaluation questions. Data sources include population-based surveys, the Tobacco Retail License regulatory database, hospitalizations, emergency department visits, vital records, and cancer incidence. Innovative data collection efforts are underway to gather better data for specific communities.

HPCDP evaluates tobacco-related data on youth, adults and marginalized groups in Oregon to describe and highlight state and local tobacco program effectiveness. This includes implementing novel research tools to reach those hardest to survey and most affected by tobacco. In 2024, the HPCDP Surveillance, Evaluation and Epidemiology Team launched a new Evaluation Price Agreement Pool of 12 diverse contractors with experience in community engagement and evaluation. Recent solicitations include a community-driven evaluation of the Smokefree Oregon Imagine Campaign, the CDC Menthol Grant Evaluation, and the Oregon's Tobacco Partner Evaluation.

Tobacco Prevention and Cessation

HPCDP facilitates a community-participatory approach to evaluations by convening core user groups composed of community organizations and LPHAs. This process builds evaluation capacity and knowledge and ensures evaluations are relevant to the end users. HPCDP received a Social Epidemiologist staff position through Ballot Measure 108, specifically focused on improving and uplifting equity-focused data collection, analysis, and evaluation. With this position, HPCDP is enhancing its understanding of investments in community led public health, social determinants of health, and factors impacting health outcomes in marginalized communities and communities of color.

OHA Racial Equity Impact Statements for Major Programs

DAS DEPARTMENT OF ADMINISTRATIVE SERVICES

Program/Division	1. Who benefits, both directly and indirectly? Who will be burdened?
Central Services	**Who directly benefits:** Given the mix of programs within Central Services – which include the External Relations Division, Equity and Inclusion Division, the Director's Office, Agency Operations Division, Fiscal Division, and Tribal Affairs – the main programs interfacing with the community include the Ombuds Program, the Feedback Team, the Community Partner Outreach Program (CPOP) within the External Relations Division, as well as the Tribal Affairs program that partners with the Nine Federally Recognized Tribes of Oregon to achieve our vision of health for all people in Oregon. The External Relations Division includes the Ombuds Program, the Feedback Team and CPOP. CPOP and community partners work directly with the public to provide culturally and linguistically appropriate health care navigation services. The Ombuds Program advocates for OHP member access to care and quality of care provided through OHP; uses learnings from individual member issues to elevate OHP member voices throughout OHA so Medicaid programs, policies and operations are based on member experience; and elevates identified issues for system improvement. The Feedback Team collects partner and member feedback from customer service data, partner engagement events and other areas across OHA to track concerns impacting health equity. The team identifies gaps in service or delivery based on emerging issues reported through the feedback system and ensures that critical loops are in place to act upon and report back on partner insights and member experiences.

OHA Racial Equity Impact Statements for Major Programs

DAS DEPARTMENT OF ADMINISTRATIVE SERVICES

Program/Division	1. Who benefits, both directly and indirectly? Who will be burdened?
Central Services cont.	**Who directly benefits, cont.:** In addition, the Equity and Inclusion Division provides resources, expertise and advocacy for all people of Oregon, especially those prioritized communities that have been traditionally impacted by racism, oppression and discrimination. **Who indirectly benefits:** The agency's equity work benefits all people of Oregon through focused efforts on population health outcomes to ensure that everyone has an opportunity to thrive. OHA is focused on operationalizing its strategic goal to eliminate health inequities. This is not just a model for the people of Oregon but for those in other states. **Who will be burdened:** OHA staff of color often carry the burden of both actively doing the health equity work necessary to reach OHA's strategic goal to eliminate health inequities by 2030, while also representing the communities we are trying to prioritize to serve. These staff are burdened when they are asked to provide expertise to issues or outcomes connected to people with a shared identity, or when current and proposed policies and practices impacts people who share their identify of themselves. OHA is sponsoring an Equitable Recruitment and Retention workgroup in partnership with the Equity Advancement Leadership Team (EALT) to address workplace issues for staff of color.

OHA Racial Equity Impact Statements for Major Programs

DAS DEPARTMENT OF ADMINISTRATIVE SERVICES

Program/Division	1. Who benefits, both directly and indirectly? Who will be burdened?
Shared Services & SAEC	**Who directly benefits:** Staff inside of OHA benefit from the services provided by the Shared Services staff across both agencies and have the obligation to pursue continuous improvement in administrative functions so that the outward facing programs can serve those most in need. **Who indirectly benefits:** The communities we serve benefit from less administrative burden if we are as efficient and effective as possible in providing administrative supports to outward facing programs. **Who will be burdened:** Not providing efficient and effective service leads to communities and partners navigating government "red tape" unnecessarily. This reduces their ability to provide services and supports via the grants, contracts, and interactions. Without these, Oregonians in prioritized communities that have been traditionally impacted by racism, oppression and discrimination will have less access to services that will eliminate health inequities.

OHA Racial Equity Impact Statements for Major Programs

DAS DEPARTMENT OF ADMINISTRATIVE SERVICES

Program/Division	1. Who benefits, both directly and indirectly? Who will be burdened?
Health Policy & Analytics	**Who directly benefits:** Individuals disproportionately at risk of facing health inequities due to racism and other factors benefit directly with access to care, benefits, and better quality of care. These include (1) individuals who face barriers to health insurance coverage due to income, life transitions or immigration status; (2) individuals who rely on federal subsidies to make private health insurance more affordable; (3) individuals and families now covered by OHP expanded benefits such as housing, nutrition and climate supports; and (4) people who seek health care who have higher-quality care and better access to information about drivers of health care costs and financial assistance for which they are eligible. Additionally, health care organizations, payers and providers benefit from workforce incentives that increase health care workers, especially in rural and medically underserved areas of the state. Finally, health care policy and decision makers benefit from HPA policy, reporting and analytics work which also provides transparency and accountability for communities on Oregon's health system, and Marketplace, Medicaid and Behavioral Health programs.

OHA Racial Equity Impact Statements for Major Programs

DAS DEPARTMENT OF ADMINISTRATIVE SERVICES

Program/Division	1. Who benefits, both directly and indirectly? Who will be burdened?
Health Policy & Analytics, cont.	**Who indirectly benefits:** OHP members, Marketplace enrollees and other individuals in Oregon receive better coordinated care, better quality of care and better health outcomes related to HPA programs (such as value-based payment, patient-centered primary care homes, CCO Quality Incentive Program and technical assistance) which support the ability of health care organizations and providers to holistically meet their patients' needs. In addition, OHP members and others in Oregon benefit from better coordinated care due to improved information exchange across the health care and social services systems. Finally, people who seek health care, health care organizations and payers benefit from HPA programs that work to contain health care costs, such as the Sustainable Cost Growth Target and Health Care Market Oversight programs. **Who will be burdened:** Health care organizations and payers may be burdened if HPA programs and data collection requirements are not as efficient and effective as possible. These organizations are critical partners in Oregon's effort to transform our health system and bear some burden to navigate and respond to needed system changes.

OHA Racial Equity Impact Statements for Major Programs

DAS DEPARTMENT OF ADMINISTRATIVE SERVICES

Program/Division	1. Who benefits, both directly and indirectly? Who will be burdened?
Public Employees' Benefit Board / Oregon Educators Benefit Board	**Who directly benefits:** The Boards are especially focused on the OHA priority populations, and all members are offered the same benefits and options, regardless of race or ethnicity. **Who indirectly benefits:** Because the plans offered to PEBB and OEBB members are from commercial carriers, all equity-based performance metrics the Boards puts in place force those carriers to focus in those areas, benefitting all their members. **Who will be burdened:** Until commercial market carriers eliminate racial bias, communities of color will continue to face inequities.

OHA Racial Equity Impact Statements for Major Programs

DAS DEPARTMENT OF ADMINISTRATIVE SERVICES

Program/Division	1. Who benefits, both directly and indirectly? Who will be burdened?
Public Health Division	**Who directly benefits:** The Public Health Division provides activities/services that are accessible to every Oregon state resident. The Division works closely with Local Public Health Authorities, Tribal, rural, and frontier communities, and community based organizations to ensure that it is reaching its most impacted communities and providing necessary and appropriate resources. The Division focuses its culturally and linguistically appropriate activities to populations with poorer health outcomes and/or who have historically experienced the impacts of structural racism, including, communities of color, immigrant and migrant populations, members of the LGBTQIA+ community and Tribes. **Who indirectly benefits:** The Public Health Division works to protect and promote the health of all Oregonians. As a result of the diverse populations prioritized and myriad of activities and services provided, resources and information are accessible and available to people living throughout Oregon. In addition, the Division's efforts aim to build a healthier population and lower the cost of health care for all people in Oregon.

OHA Racial Equity Impact Statements for Major Programs

DAS DEPARTMENT OF ADMINISTRATIVE SERVICES

Program/Division	1. Who benefits, both directly and indirectly? Who will be burdened?
Public Health Division, cont.	**Who will be burdened:** As the Division continues to offer more external resources and partner with additional community partners to center racial and health equity, while internal resources are dwindling funding, administrative support within the state's public health system will experience the most burden. These staff manage the onboarding and training of personnel and manage the budgets and contracts that come with this work.

OHA Racial Equity Impact Statements for Major Programs

DAS DEPARTMENT OF ADMINISTRATIVE SERVICES

Program/Division	1. Who benefits, both directly and indirectly? Who will be burdened?
Medicaid	**Who directly benefits:** As of June 2024, nearly 1.4 million people are enrolled in the Oregon Health Plan (OHP), which accounts for about 33 percent of Oregon's total population and includes 56 percent of the state's children (ages 0-17). This enrollment encompasses individuals and families enrolled in Oregon Health Program, the Bridge Program and Healthier Oregon Program with incomes at or below 200% of the federal poverty level (FPL), older adults and individuals experiencing disabilities, and individuals living with serious mental health or substance use disorders, who directly benefit from efforts to improve access to comprehensive healthcare. Leveraging Coordinated Care Organizations (CCOs) and Fee-for-Service (FFS) models, as well as taking direction from the Nine Federally Recognized Tribes of Oregon, expands access to a broad range of medical services and advances culturally and linguistically appropriate care, while reducing barriers such as service gaps, lack of insurance, citizenship status, prior incarceration and language and communication challenges. These systems also provide focused support for individuals undergoing critical life transitions, such as those leaving carceral settings or experiencing houselessness, improving their overall well-being and facilitating a smoother transition to stable living conditions.

OHA Racial Equity Impact Statements for Major Programs

DAS DEPARTMENT OF ADMINISTRATIVE SERVICES

Program/Division	1. Who benefits, both directly and indirectly? Who will be burdened?
Medicaid, cont.	**Who indirectly benefits:** As OHA modernizes its systems, providers and community partners benefit through improved administrative support and streamlined processes, which enhance efficiency in service delivery and claims management. Community partners and advocacy groups gain from their engagement in policy development and collaborative efforts with the Medicaid Division, contributing to better healthcare access and equity. Additionally, coordinating efforts both within and between agencies enhances operational efficiency, driving better outcomes through a more integrated and effective healthcare system. **Who will be burdened:** People with Medicaid and other health programs run by the state still face challenges accessing and coordinating care, adding strain to their health management. Limited health care resources in rural areas, cultural and language barriers, and historical and contemporary inequities and discrimination each present significant obstacles. When these factors intersect, they compound, creating complex barriers that further exacerbate difficulties in accessing and receiving quality care. Providers who must navigate complex systems, policies and prior authorization requirements may face increased challenges, which can add to their administrative responsibilities.

OHA Racial Equity Impact Statements for Major Programs

Program/Division	1. Who benefits, both directly and indirectly? Who will be burdened?
Medicaid, cont.	**Who will be burdened, cont.:** Additionally, staff within the Medicaid Division may experience increased burdens due to the extensive demands of managing, overseeing and ensuring compliance across multiple units and initiatives. This complexity can increase workloads and present challenges in efforts to improve operations and programs to better meet the needs of those served.

OHA Racial Equity Impact Statements for Major Programs

DAS DEPARTMENT OF ADMINISTRATIVE SERVICES

Program/Division	1. Who benefits, both directly and indirectly? Who will be burdened?
Behavioral Health	**Who directly benefits:** Behavioral Health Division (BHD) provides a comprehensive range of services to children and families, adults, individuals with substance use disorders, individuals in crisis and specific communities across Oregon. For children and families, services are focused on individuals aged 0-25, addressing mental health challenges through initiatives like suicide prevention, early intervention, trauma-responsive treatment and support for parent-child relationships. The Adult Behavioral Health unit serves individuals aged 18 and up, offering mental health and substance use disorder services from community-based outpatient care to secure treatment settings, with a strong emphasis on equity and community involvement. For individuals with substance use disorders, the division addresses the overdose crisis through harm reduction, treatment access and support initiatives such as the State Opioid Response grant and peer programs. The 988 & Behavioral Health Crisis System Unit provides a 24/7 crisis intervention helpline, mobile crisis intervention services and crisis stabilization centers to offer immediate support and prevent emergency department and jail admissions.

OHA Racial Equity Impact Statements for Major Programs

DAS DEPARTMENT OF ADMINISTRATIVE SERVICES

Program/Division	1. Who benefits, both directly and indirectly? Who will be burdened?
Behavioral Health, cont.	**Who directly benefits, cont.:** The division addresses racial equity by honoring the Government to Government relationship with the Nine Federally Recognized Tribes in Oregon and creates equitable access to funding through set asides and streamlined contracting whenever possible. In addition, the division addresses racial equity by providing equitable funding to communities that provide culturally specific services to communities that intersect with the criminal/legal system, houselessness and to populations that have been economically and socially marginalized. This includes intentional funding opportunities for community-based organizations that provide services to Black, Latino, Asian, and American Indian/Alaska Native populations or communities throughout the state.

OHA Racial Equity Impact Statements for Major Programs

DAS DEPARTMENT OF ADMINISTRATIVE SERVICES

Program/Division	1. Who benefits, both directly and indirectly? Who will be burdened?
Behavioral Health, cont.	**Who indirectly benefits:** The programs and services of BHD indirectly benefit a wide range of individuals and entities beyond the direct recipients of care. This includes family members who gain relief and support from knowing their loved ones are receiving proper care, as well as employers who benefit from a more stable and productive workforce. Schools and educational institutions see improvements in student performance and behavior when children receive necessary mental health services. The broader community also gains through reduced crime rates and lower instances of persons experiencing houselessness. and emergency room visits, leading to overall enhanced public safety and reduced healthcare costs. Moreover, partnerships with community-based organizations, coordinated care organizations and local governments are strengthened, fostering a collaborative environment aimed at addressing and mitigating behavioral health challenges comprehensively.

OHA Racial Equity Impact Statements for Major Programs

DAS DEPARTMENT OF ADMINISTRATIVE SERVICES

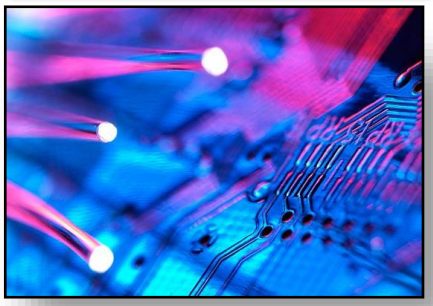
Program/Division	1. Who benefits, both directly and indirectly? Who will be burdened?
Behavioral Health, cont.	**Who will be burdened:** The people and communities that may be burdened by BHD programs and services include communities that have been economically and socially marginalized, such as Tribal youth, who disproportionately face disparities in access to behavioral health services and legal support. Communities of color experience inequities within the DUII service system, reflecting broader systemic challenges. Low-income individuals are hindered by financial barriers in crisis stabilization centers, which lack dedicated funding streams, limiting their access to continuous support. Additionally, overnight crisis service workers are significantly burdened by workforce challenges in staffing 24/7 Mobile Crisis Intervention Services. These burdens underscore the need for focused efforts to address systemic inequities and financial barriers within the behavioral health service delivery system.

OHA Racial Equity Impact Statements for Major Programs

DAS DEPARTMENT OF ADMINISTRATIVE SERVICES

Program/Division	1. Who benefits, both directly and indirectly? Who will be burdened?
Oregon State Hospital	**Who directly benefits:** 29% of patients admitted to Oregon State Hospital (OSH) identify as non-white. Notably, 10.7% identify as Hispanic and 10.1% as Black (compared to 13.8% and 1.8% of the Oregon population, respectively). Patients benefit from medical, dental and mental health treatment services and educational/vocational services provided during their hospital stay. Patients also benefit from comprehensive discharge planning, to a more stable setting in the community, with greater access to community-based services, than the one in which they lived prior to OSH admission. **Who indirectly benefits:** Community members, families, courts, jails, law enforcement agencies/personnel and acute care hospitals all benefit when patients with severe symptoms of mental illness and acutely dangerous behaviors are provided intensive treatment which improves their condition, as this reduces risk of further unsafe behaviors occurring in those settings.

OHA Racial Equity Impact Statements for Major Programs



DAS DEPARTMENT OF ADMINISTRATIVE SERVICES

Program/Division	1. Who benefits, both directly and indirectly? Who will be burdened?
Oregon State Hospital, cont.	**Who will be burdened:** Because the demand for OSH beds exceeds capacity, jails and acute care hospitals carry the burden of prolonged treatment of patients who would otherwise be admitted to OSH. Patients who experience prolonged hospital stays may lose housing, pets, personal property, benefits and connections to family/friends/community and services they had prior to admission. OSH direct care staff carry the burden of caring for patients who may engage in significant verbal and physical aggression and may not perceive that they have received benefit from their treatment.

Health and
Human Services

Strategic Technology Plan: A Comprehensive Overview

2024-2027

9.8. State Mandates 46

1. Executive Overview

This Oregon Department of Human Services (ODHS) and Oregon Health Authority (OHA) Strategic Technology Plan 2024-27: A Comprehensive Overview document is intended to communicate the alignment between the vision, planning and execution of major technology initiatives.

This Executive Overview section is the heart of the plan, and no further reading is necessary to get a basic understanding of the technology goals and strategies. However, reading the subsequent sections will provide a deeper understanding of the drivers, priorities and frameworks within the ODHS|OHA's technology organization.

It represents priorities of the governor, Oregon Department of Human Services (ODHS), Oregon Health Authority (OHA), Enterprise Information Services (EIS), Office of Information Services (OIS) and many other organizations as noted below.

1.1. Health and Human Services Programs

The Oregon Health Authority (OHA) has eight core divisions. The Oregon Department of Human Services (ODHS) has eight core programs. Both agencies have Shared Services units that support the needs of both agencies.

Oregon Dept. of Human Services	Oregon Health Authority
• Self-Sufficiency (SSP) • Child Welfare (CW) • Aging and People with Disabilities (APD) • Office of Developmental Disabilities Svs. (ODDS) • Vocational Rehabilitation (VR) • Oregon Eligibility Partnership (OEP) • Director's Office • Central and Shared Services	• Equity and Inclusion (E&I) • Health Systems (HSD) • Health Policy and Analytics (HPA) • Oregon State Hospital (OSH) • Public Health (PHD) • External Relations • Agency Operations • Fiscal and Operations

There are 15+ shared services areas, such as financial and facilities services between the two agencies. The combined Health and Human Services organization supports 1.5 million clients; 16,700 staff; more than 50,000 partners; and more than 140 office locations. The agencies have a combined Legislatively Approved Budget (LAB) of $54.25 billion.

1.2. Office of Information Services (OIS)

For the purposes of this document, we'll focus on the Office of Information Services (OIS). However, also, important to the agencies are other units with a strong focus on technology which we refer to as "local IT" and we'll lightly cover them in this document.

OIS exists to provide services in helping Oregonians achieve health, well-being, and independence. In support of this mission, OIS provides information technology systems and services that help ODHS|OHA to:

- Determine client eligibility
- Provide medical, housing, food and job assistance
- Provide addiction, mental health and vocational/rehabilitative services
- Protect children, seniors and people with physical and/or developmental disabilities
- Process claims and benefits
- Manage provider licensing and state hospital facilities
- Promote and protect the state public health
- Support internal ODHS|OHA administrative functions, including human resource, finance and procurement programs

OIS supports more than 75 core business applications that are used by approximately 16,700 agency and partner staff located at 140 locations throughout Oregon.

The OIS organizational structure consists of the Office of the chief information officer and several major units that play vital roles in achieving the agencies' mission:

- Risk and Privacy Office
- Business Engagement Services (BES) including Enterprise Alignment
- Project Solutions (PS)
- Vendor Managed Services (VMS)
- Health and Service Equity Transformation (focused on HB 3159)
- Customer Services and Support (CSS)
- Solution Development and Delivery (SDD)
- Business Operations

1.3.Strategic Goals and Strategies

OIS exists to provide services in helping Oregonians achieve health, well-being, and independence. To support this mission, the Strategic Technology Plan's goals, and strategies were developed with the purpose **to strengthen the Office of Information Services' ability to deliver IT functions with greater perspective and effectiveness**.

Goal 1: Cultivate IT Workforce - Cultivate a highly skilled, diverse, and customer-focused organization.

- Improve equitable hiring
- Increase recruitment cycle transparency
- Accelerate customer service and technical training
- Accelerate development opportunities

Goal 2: Strengthen Cybersecurity, Risk and Privacy - Strengthen cybersecurity and consider the risk in the decision-making process.

- Improve the security and privacy posture
- Prevent, monitor, and rapidly respond to emerging threats and vulnerabilities
- Prioritize initiatives through a risk-based approach

Goal 3: Accelerate Technology Modernization - Enhance and augment IT infrastructure, systems, cloud capabilities, and processes to address pressing human services and health care challenges.

- Align IT investments with business strategy
- Modernize legacy IT; include a specific evaluation for new AI technologies
- Share technology solutions
- Promote ADA accessibility, language access, and user experience

Goal 4: Increase Data Insights - Consider community involvement in data that is collected, and used in a way that does not perpetuate or exacerbate existing inequities ensuring accuracy and completeness.

- Improve how we handle, organize and deliver information
- Connect systems through standardized approaches
- Make data easily available and accessible while respecting privacy

Goal 5: Optimize Technology Management - Provide inclusive, customer-focused collaboration

- Center technology governance processes on equity and inclusion
- Improve customer service
- Enhance communication and partnerships

1.4. Action Plan and Measures

To ensure accountability in achieving the plan goals and strategies, each goal has 3-5 action items that are tracked and reported using the Performance Management System Quarterly Target Reviews. Actions and measures are re-evaluated periodically and will be refreshed in quarter 1, 2024, and again upon the completion of the agency strategic plans. As a side note, operational measures also exist and are reviewed on a quarterly basis.

1.5. OIS Operating Principles

Operating principles have helped define the culture of OIS and provide guidance for decision making at all levels of the organization.

Each decision we make can affect technology, process, and people. OIS uses these operating principles to guide our choices as we navigate the complex opportunities and challenges of our work.

- **Honor Business Drivers** – We use governance effectively, partnering with the business to prioritize investments.
- **Choose Wisely** – We consider diverse options and choose solutions by thoughtfully evaluating their benefits, costs, and risk. We consider the impact across the enterprise IT ecosystem and throughout the lifecycle.
- **Consider the Data** – We provide solutions that support keeping the data accurate, unduplicated, secure, and accessible for multiple uses.
- **Invest for Sustainability and Agility** – We seek and embrace opportunities to simplify, including reducing redundancy, promoting re-use, and embracing standards and modularity.
- **Deliver Incremental Value** – We deliver value efficiently and predictably, continuously learning and improving.

1.6. Challenges

While strategic plans create vision and excitement, a plan would not be complete without discussing known challenges. The list below includes the top challenges in implementing technology in Oregon state government that causes significant delays in modernization, maintenance and operations.

- **Lack of IT investment strategy to fund technology modernization** – While IT roadmaps exist for technology modernization, an IT investment plan does not exist. This puts technology groups in a reactive state, which is a catalyst for the technology to age beyond usefulness. The biennium budget policy option package process is too slow and siloed to be effective in providing funding to keep systems modernized and policy nimble.
- **Competitive IT market elongates the recruitment cycle to on-board staff** – A typical OIS recruitment averages 6-12 months from vacancy to job requisition to on boarding or 110 days from posting to first offer (depending on how it is measured).
    - Pay structures for large agencies affect IT professionals, who are paid significantly less (in most classifications) compared to other Oregon public sector entities.
    - Pay equity assessments capped at the step six have, also, lengthened the process and frustration for both candidates and hiring managers.
- **Heavy administrative processes** (IT, Human Resources, Procurement) slow down the delivery of services.
    - Backlog and cumbersome processes in DAS and agency human resource groups cause a delay in the hiring process.
    - Long procurement processes (agency, IT, agency procurement, Department of Administrative Services (DAS) procurement, DAS Enterprise Information Services, Department of Justice) for large technical projects take 12-18 months to get an executed contract.
- **Lack of shared vision, needs, schedules and workloads are barriers to accelerating technology modernization**.
    - These barriers continue to impact cross program, agency and IT organizations.
    - Centralized approaches take much longer than program specific approaches. Program specific approaches can cause re-work and significantly increase agency costs and increase IT risks.
    - Improved communication and collaboration will be needed to accelerate technology modernization.

2. Drivers

2.1. Governor

As Gov. Kotek took office in January 2023, she set clear direction on the top priorities, improving customer services in state agencies, and priorities for ODHS|OHA.

Priorities for Oregon	State Agencies & Customer Service
Housing and Homelessness	Increased accountability
Behavior Health	Prioritizing customer service
Education and Early Learning	Making things work efficiently as possible
	Providing tools and not barriers
	Improving access to services when and where people need them.

The governor provided direction to ODHS|OHA leadership that listed the following priorities.

- Transition of **Employment Related Day Care (ERDC)** to the new Department of Early Learning and Care (DELC) agency.
- Process **Medicaid Redeterminations,** which is the first time in three years (paused during the pandemic) that 1.5 million people on the Oregon Health Plan (OHP) must go through a benefit renewal process.
- Implement the 1115 **Medicaid Waiver** that has many new opportunities, including housing for up to six months for people at risk of homelessness and people at risk of extreme weather events due to climate change.
- Expand the **Healthier Oregon** to people who meet eligibility regardless of immigration/citizenship status.

- Provide a **Basic Health Program** which is initially focused on OHP members who will no longer be eligible after the redetermination.

2.2.Oregon Department of Human Services (ODHS)

The Oregon Department of Human Services (ODHS) is the largest executive branch agency. The mission of the ODHS is to help Oregonians in their own communities achieve safety, well-being, and independence increasingly through locally informed, culturally appropriate, customer-focused services and customer service provided at the state and local level in a way that protects, empowers, respects choice and preserves the dignity of all Oregonians in need of ODHS services.

In 2023-2025, ODHS' top focus areas in alignment with the mission are:

Strengthening ODHS foundations

- Building the capacity we need to serve our communities more equitably and effectively.

Preparing for and responding to emergencies

- Providing mass care, shelter, food, and water in times of disaster while investing year-round in agency and community preparedness.

Creating the future of ODHS and human services in Oregon

- Working internally and externally to break down silos, connect systems together and identify and bridge gaps in services, while acknowledging that people and communities are the experts in their own lives and partnering with them to design services that better support their needs and goals.

ODHS has several initiatives and frameworks to guide the work of the agency.

Equity North Star - – The ODHS Equity North Star informs our work toward our vision of an agency free of racism, discrimination and bias.

RiSE - RiSE is about creating an intentional, positive, equitable and trauma informed organizational culture. The vision is an organization where we all feel

safe, valued, supported, strengthened and engaged in our personal growth and the agency's growth.

Building Well-Being Together Initiative (BWTI) – The BWTI goal is to focus on the whole well-being of people, families, and communities, especially those being left behind due to race, age, disability, identity and place.

2.3.Oregon Health Authority (OHA)

The Oregon Health Authority (OHA) is one of the state's largest executive agencies with a single overarching strategic goal: **eliminate health inequities in Oregon by 2030**. OHA's work is guided by the definition that the Oregon Health Policy Board (OHPB) and OHA adopted in 2020[1]:

Oregon will have established a health system that creates health equity when all people can reach their full health potential and well-being and are not disadvantaged by their race, ethnicity, language, disability, age, gender, gender identity, sexual orientation, social class, intersections among these communities or identities, or other socially determined circumstances.

Achieving health equity requires the ongoing collaboration of all regions and sectors of the state, including Tribal governments to address:

- *The equitable distribution or redistribution of resources and power; and*
- *Recognizing, reconciling and rectifying historical and contemporary injustices.*

To advance that goal, OHA is focused on accelerating the transformation of Oregon's health care system, expanding health coverage, and providing easier access to care, delivering better health outcomes, improving health care quality, and containing health costs for Oregon Health Plan members, and improving public health services in all Oregon communities. The focus areas for 2023-2025 include:

- **Reducing health disparities**, advancing health equity, and protecting health coverage
- Implementing the **1115 Medicaid waiver**
- Addressing unmet **behavioral health** needs

[1] Oregon Health Policy Board Health Equity Committee, https://www.oregon.gov/oha/EI/Pages/Health-Equity-Committee.aspx

- Supporting **Oregon State Hospital**
- Sustaining and **expanding public health** capacity

2.4.Joint Initiatives

The ODHS|OHA initiatives are being discussed at the recently formed Joint Governance Board and will be available early 2024.

2.4.1. Digital Accessibility in Hardware, Software and Systems

ODHS|OHA are committed to providing equitable access to information and services.

The agencies are committed to effective communications that are culturally and linguistically appropriate and accessible for a wide spectrum of people who have different communication needs or abilities.

In 2023, the agencies commissioned a workgroup to formalize a Digital Accessibility policy that define the expectations around scope and Web Content Accessibility Guides (WCAG) compliance. The EIS legislative and communications coordinator has participated in the agency workgroup. The policy is expected to be finalized in the first half of 2024.

2.5.Enterprise Information Services (EIS)

Enterprise Information Services led by State Chief Information Officer Terrence Woods has provided direction and guidance to Executive Branch Agency Leadership through several strategies and frameworks.

- *EIS Strategic Framework 2023-2026, Version 2.0* – EIS strategic plan including objectives, goals, and strategies for the EIS organization.
- *Cloud Forward: A Framework for Embracing Cloud in Oregon* – Define and communicate the EIS cloud vision and to enable state agencies to accelerate cloud adoption across the enterprise.
- *EIS Modernization Playbook: An Agency Guide to Digital Transformation, Version 1.0* – Recognizes the urgent need to modernize state IT systems and lay the foundation for digital transformation.
- *Oregon's Data Strategy: Unlocking Oregon's Potential, 2021-2023* – Oregon's Data Strategy establishes a central vision and critical actions to enable Oregon to better use, manage, and share its data to create

information, knowledge, and insight. Note: Will replace newer version upon publication.

For the context of this document and to provide an overview of alignment between various strategic plans to technology, we'll focus on the EIS Modernization Playbook for the next two sections. **The focus will continue to be on embracing and accelerating the move to cloud technology**.

2.5.1. EIS Guiding Principles

EIS crafted the following principles to align with the vision of the Enterprise Leadership Team, common goals, and outcomes, and shared with leadership across state government. They are derived from the 2021 EIS Modernization Playbook and abbreviated for inclusion here.

- **Put People First**. Successful modernization starts and ends with people – the experience of people who rely on the essential services provided by the State of Oregon, the ability of the state employees to effectively provide those services, and the ability of the agency leadership to drive digital transformation.
- **Aligned and Enabled**. Alignment with EIS vision for user-friendly, reliable, and secure IT systems between agency business and IT leadership that will enable agencies to fulfill their mission and strategic objectives, while continuing to deliver the core services that the people of Oregon rely on.
- **Data- and Privacy-Informed**. Modernization provides a unique opportunity to leverage data as a strategic asset across systems and programs, govern and manage that data through its lifecycle, enable data informed decision-making, transparency by default, while considering personal and private information.
- **Secure by Design**. Secure by design embraces coding practices and the seamless integration of security policy and controls into the fabric of the IT system itself.
- **Agile and Continuous Improvement**. Modernization requires sustained investment in our people, the formation of empowered teams that embrace agile practices, and a culture of continuous improvement encompassing people, processes, and technology.

2.6.Federal Mandates

This section includes a short list from the volume of federal mandates we must adhere to. The mandates below were chosen as we have active technical projects to meet the relevant mandate(s).

- **CMS MES Modernization** – CMS has for the past eight years signaled its interest seeing states move to a modular architecture for their Medicaid Management Information Systems (MMIS). In 2023, at the annual Medicaid Enterprise Services Conference, CMS announced that it will now focus on modernization as in "MES Modernization." (Technical Project: Medicaid Enterprise Services Modernization)
- **Fair Labor Standards Act (FLSA)** – In context of ODHS Home Care Workers (HCW) and Personal Service Workers (PSW), the FLSA requires that the records include certain identifying information about the HCW/PSW and data about the hours worked. (Technical Project: Provider Time Capture)
- **Federal Department of Health and Human Services** – The Federal Department of Health and Human Services (HHS) rule on Comprehensive Child Welfare Information Systems (CCWIS) went into effect on Aug. 1, 2016. The rule governs the next generation of technology to support child welfare programs. The new rule focuses on modularity, interoperability, reusability, data sharing between programs, lifecycle data management, and data quality. ODHS Child Welfare declared that it would move towards a CCWIS environment. (Technical Project: Child Welfare CCWIS Project)

2.7.State Mandates

This section lists the states mandates with a significant technology effort, over $1 million, and significant risks if not completed. It is not intended to be comprehensive and is focused on new legislation from 2023. A more detailed list is provided in Appendix A.

- **HB 2683 (2023)** – Directs the Early Learning Council to adopt rules to establish eligibility for certain children to participate in Employment Related Day Care subsidy programs.
- **SB 966 (2023)** – Requires OHA to adopt standards for types of data collected for all payers and that all claims' databases are consistent with standards adopted for collection of data on race, ethnicity, language,

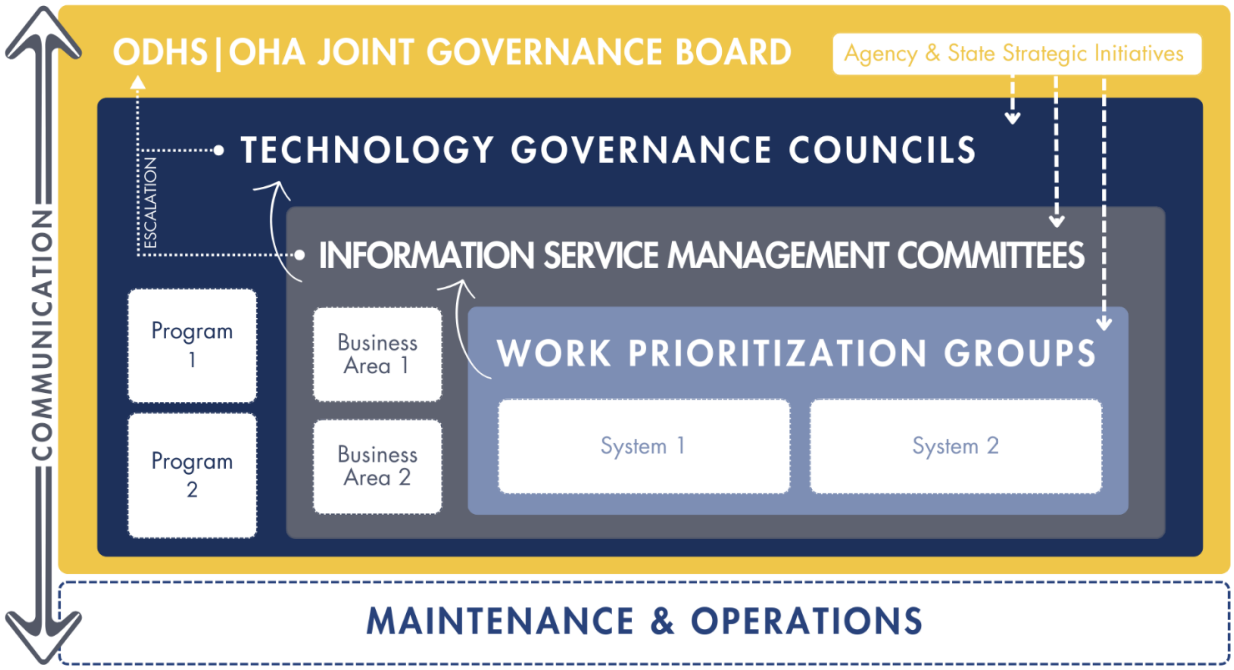
disability, sexual orientation, and gender identity. (Technical Project: REALD/SOGI Registry-Repository)

- **SB 972 (2023)** – Requires OHA to transition from healthcare.gov to state-based marketplace by Nov. 1, 2026. (Technical Project: State Based Marketplace)

2.8. Negotiated Labor Union Commitments

Through the Collective Bargaining process, ODHS|OHA have made commitments to the labor unions. Many of the agreements include large and small technical work with any changes over 40 hours going through the technology governance process – see Section 4.7, Technology Governance. For the 2023-2025 Collective Bargaining Agreement there are 11 large effort commitments. An example of these changes include:

- **Compensation and Payroll System Design** (925 development hours) – This request is to create multiple tiers of pay for ODHS/APD homecare workers and OHA/HSD personal care attendants.
- **Holiday Pay** (450 development hours) – Homecare workers who work on a specific holiday get 1.5 times their hourly rate of pay. Anything up to 8 hours would be 1.5 times; beyond 8 hours on the holiday, would be paid at their current rate.
- **Carina Registry** (300 hours) – Development of a web service interface with the Carewell/Carina registry to verify the identity of in-home service Medicaid, State Plan Personal Care, and Oregon Project Independence in-home consumers.



3. Large Technical Projects & Governance Model

3.1. Technology Governance

The current technology governance structure for ODHS|OHA has been intentionally evolving and maturing from as early as 2012. The technology governance process continuously matures and has received an EIS assessment score of 3 out of 4 for 2021 and 2022. Proposed changes for 2024 are in review.

The agencies recognize a strong investment prioritization structure and process are key to managing competing priorities where there are unlimited needs and limited resources.

Planning, coordination, and support for the overall governance structure and improvements is provided by Business Engagement Services, Business Relationship Management team, in partnership with agency leaders. The visual below represents the evolving technology governance structure. A written description of the different governing groups and roles follows the visual representation.

ODHS|OHA Joint Governance Board:
Starting at the top of the visual above, the Joint Governance Board (JGB), formed September 2023, was established to provide strategic direction on ODHS|OHA individual/joint strategic initiatives.

The strategic initiatives set by the board will help drive alignment with the agencies' goals of health equity and well-being. The board will help ensure the strategic direction is aligned with the governor's office initiatives, negotiated labor contracts, legislation, federal partners, as well as state and agencies goals. Priority setting at the Technology Governance Councils, Information Services Management Committees, and Work Prioritization Teams, described below, will be aligned to the top priorities of the JGB.

When lower-level governing body chairs/co-chairs are unable to resolve competing priorities, the board will act as a point of escalation.

Technology Governance Councils:
The ODHS|OHA Technology Governance Councils provide strategic guidance and prioritization on larger more complex technology initiatives and projects. These projects generally involve the implementation of a new system, platform, service, component, or module offering new capabilities and meet thresholds for EIS oversight.

Projects that will have an impact on and/or require staffing resources across the two agencies are reviewed and prioritized at both councils. The individual and joint agencies capacity to support and accomplish the individual and collective projects are part of the prioritization decision. Projects prioritized at the councils are vetted through a subordinate Information Services Management Committee (ISMC) prior to council prioritization, with a few exceptions. Project level governance is established within each project and the councils act as a point of escalation and review of proposed project schedule extensions.

During the biennial budget cycle policy option packages, existing, and new projects meeting the criteria go through a scoring process that is reviewed and finalized at the councils. After the councils complete their review, the policy option packages and projects scores and supporting documentation go through a statewide scoring process by the Enterprise IT Governance Committee (EITGC), which is made up of EIS and agency leadership. The EITGC is in process of being re-chartered for the 2025-2027 budget cycle.

Information Service Management Committees (ISMCs):
Both ODHS|OHA have ISMCs which review all change requests, prioritize, and sequence small to medium efforts greater than 40 hours that do not require project management or oversight support. There are six ISMCs prioritizing change requests for systems that support more than one program/division. There are nine ISMCs prioritizing change requests for systems supporting individual programs or divisions. Larger efforts requiring project management and/or oversight are prioritized at the appropriate ISMC and moved to the individual

agency council or both councils, in some circumstances, for review and final prioritization.

Work Prioritization Groups:
For tasks or small requests that will take less than 40 hours, there are small informal groups that collaborate to plan and coordinate accomplishing the work. Efforts greater than 40 hours are moved to the ISMC for review and prioritization.

3.2. Large Technical Project Portfolio

ODHS|OHA maintain a large portfolio of IT projects. A short list of the most significant and largest in-flight projects is presented here. Most of these projects are under oversight by OSCIO and the Legislative Fiscal Office.

The project management office continuously matures and has received a Enterprise Information Services assessment score of 4 out of 4 on both the portfolio and program management and maturity; and project management experience scores.

3.2.1. Major IT Projects Underway

As of October 2023, there are 45+ active technical projects with a project portfolio investment of $210 million. Not all projects meet the EIS thresholds for oversight. However, any time a professional technical project manager is assigned, we apply the same project management methodologies as large projects (though adjusted for size and complexity). Highlighted below are some of the active projects (listed alphabetically) with the full project portfolio available in Appendix A listed by agency priority.

- **Joint Department of Early Learning and Care (DELC) Technology Initiatives** – Work associated to DELC is being done with an interagency agreement via ODHS and activities are following project methodologies but is not an official designated project and is being managed through the technology governance processes. (Governor Priority)
- **Joint HB 3159 REALD & SOGI** – Establishes a centralized registry to collect Race, Ethnicity, Language, and Disability (REALD) & Sexual Orientation and Gender Identity (SOGI) data from CCO's, health providers and insurers in a consistent manner.

- **Joint Mainframe Migration Provider & Client Payment Systems** – Planning project to move ODHS|OHA off the mainframe with the focus around replacing payment type IT applications as the first phase.
- **Joint Medicaid 1115 Waiver Technology-only Portfolio** – Portfolio of the technical side of the projects in support of Health-Related Social Needs (Climate and Housing); Community Information Exchange; and the Basic Health Program. (Governor Priority)
- **Joint ONE & MMIS Infrastructure / Cloud Migration** – Two projects on two of the largest state IT systems are going through a significant lifecycle upgrade to keep the infrastructure reliable and secure. Both systems will be migrated to the cloud.
- **ODHS Case Management System** – Comprehensive Oregon Intellectual & Developmental Disability (I/DD) statewide case management system.
- **ODHS Comprehensive Child Welfare Information System (CCWIS) Portfolio** – To satisfy federal partners requirements and favorable cost allocation, Oregon has elected to migrate from the current legacy system to CCWIS. This is a case management information system that state and Tribal title IV-E agencies developed for the Child Welfare Program with a focus on data management and quality.
- **OHA Marketplace Transition from Federal to State-based Platform** – Move from a federal marketplace to a state-based marketplace in increased flexibility; provide more control over operations, customer service, and service levels; and consumer cost savings.
- **OHA Medicaid Enterprise Services (MES) Modernization** – Oregon Medicaid Enterprise System (MES) Modernization Planning effort is to move away from a single, monolithic system to a modular MES environment facilitating more efficient administration of Oregon's Medicaid program.
- **OHA OEBB/PEBB Benefit Management System Replacement** – Replacement of two legacy customized benefit systems with a solution that supports the delivery of required functionality, meets legislative mandates, and improves member experience.

3.2.2. Major IT Projects Recently Completed

There have been significant successes in project closures in recent years.

In March 2021, the final rollout of the Oregon Eligibility (ONE) implementation was completed and has transitioned to maintenance and operations. In the 2021-2023 biennium, 18 projects closed with an investment of $38.1 million.

In 2023-2025 biennium, 31 projects will close for an investment of over $125 million based on current project schedules. Of the significant and large projects listed above, the following are projected to close this biennium.

- Joint Department of Early Learning and Care (DELC) Technology Initiatives
- Joint Mainframe Migration Provider & Client Payment Systems (Planning only)
- Joint Medicaid 1115 Waiver Technology-only Portfolio
- Joint ONE & MMIS Infrastructure/Cloud Migration
- OHA Medicaid Enterprise Services (MES) Modernization (Planning only)
- OHA OEBB/PEBB Benefit Management System

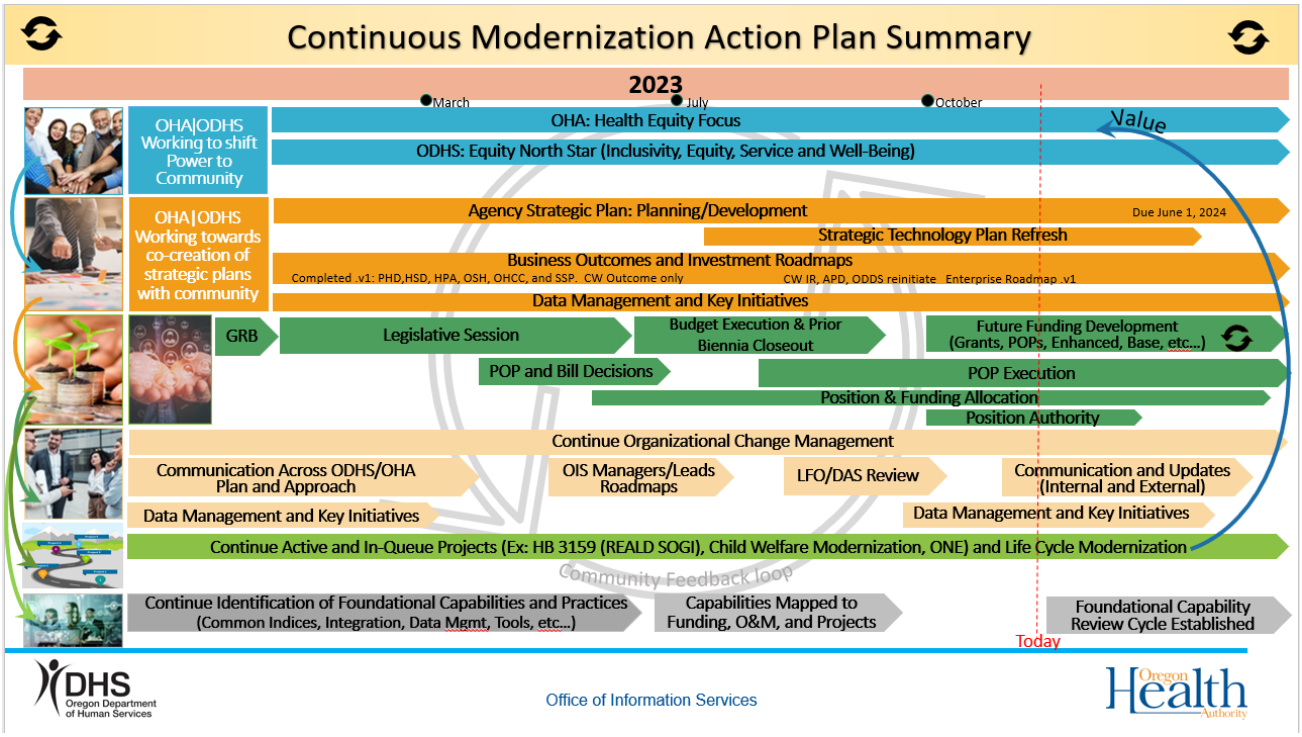
3.2.3. Mapping Projects to Strategic Goals and Drivers

The *Drivers* and *Aligning Strategy, Priorities, and Plans* sections are the basis for the mapping criteria. Liberties have been taken to categorize the Drivers and IT Strategic Alignment criteria into three categories for document readability and simplification. The alignment assessment was done by the chief information officer in review with the deliverable workgroup and agency leadership.

Mapping Projects to Strategic Goals and Drivers		Strategic Alignment	Operational: Efficiency, Risk Management, Maintenance	Compliance	Strengthen Cybersecurity & Privacy	Accelerate Technology Modernization	Increase Data Insights
		Drivers			IT Strategic Alignment		
Joint	Department of Early Learning and Care (DELC) Technology Initiatives	X	X	X		X	X
Joint	HB 3159 REALD & SOGI	X	X	X	X	X	X
Joint	Mainframe Migration Provider & Client Payment Systems	X	X	X	X	X	X
Joint	Medicaid 1115 Waiver Technology-only Portfolio	X	X	X	X	X	
Joint	ONE & MMIS Infrastructure / Cloud Migration		X	X	X	X	
ODHS	Case Management System	X	X	X	X	X	X
ODHS	Comprehensive Child Welfare Information System (CCWIS) Portfolio	X	X	X	X	X	X
OHA	Marketplace Transition from Federal to State-based Platform	X	X	X		X	X
OHA	Medicaid Enterprise Services (MES) Modernization	X	X	X	X	X	X
OHA	OEBB/PEBB Benefit Management System Replacement	X	X	X	X	X	X

Incorporating strategic goals and drivers is part of our governance process – during Intake, and then validated as part of the Project Initiation phase, working with EIS to validate it meets the goals and drivers including OIS, ODHS|OHA, EIS, and our federal partners.

4. Continuous Modernization

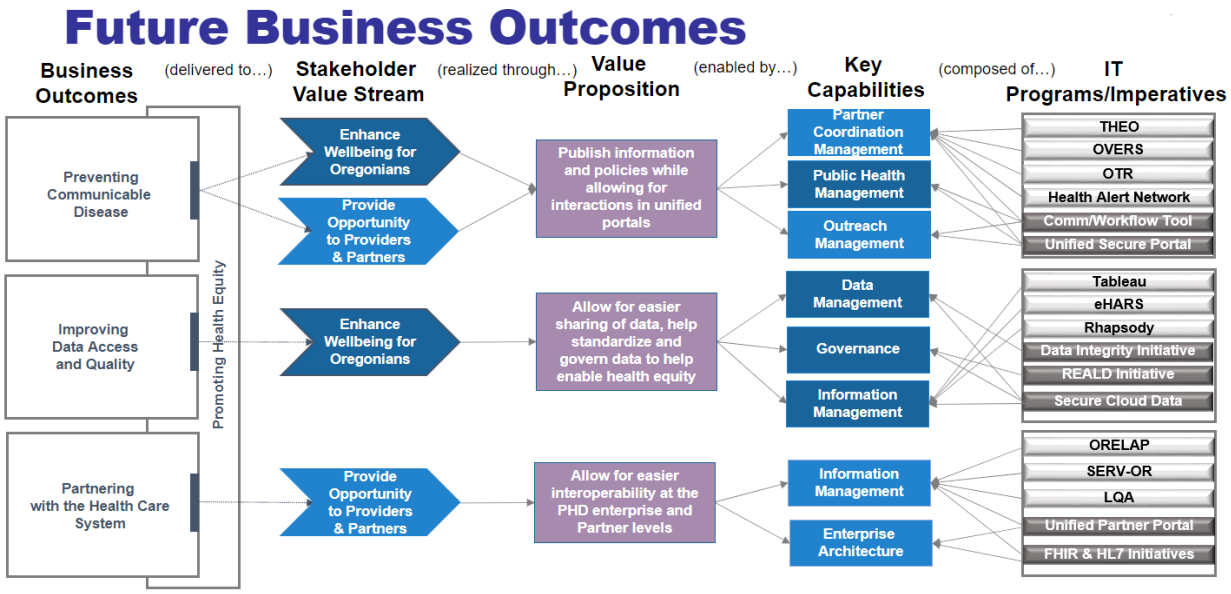


Our IT Modernization Framework aligns state level, business strategy and technical strategies. OIS is working closely with agency programs to develop what we refer to as Business Outcome Statements (business strategy) and Investment Roadmaps.

The work results in identification of current and future state capabilities, fosters proactive planning through investment roadmap development, positions the agency to be more strategic in decision making around funding requests, helps identify common capability needs and better informs decisions around prioritization of technology investment projects. The Outcome Statements and Investment Roadmaps will be refreshed and used to inform updates to the Strategic Technology plan.

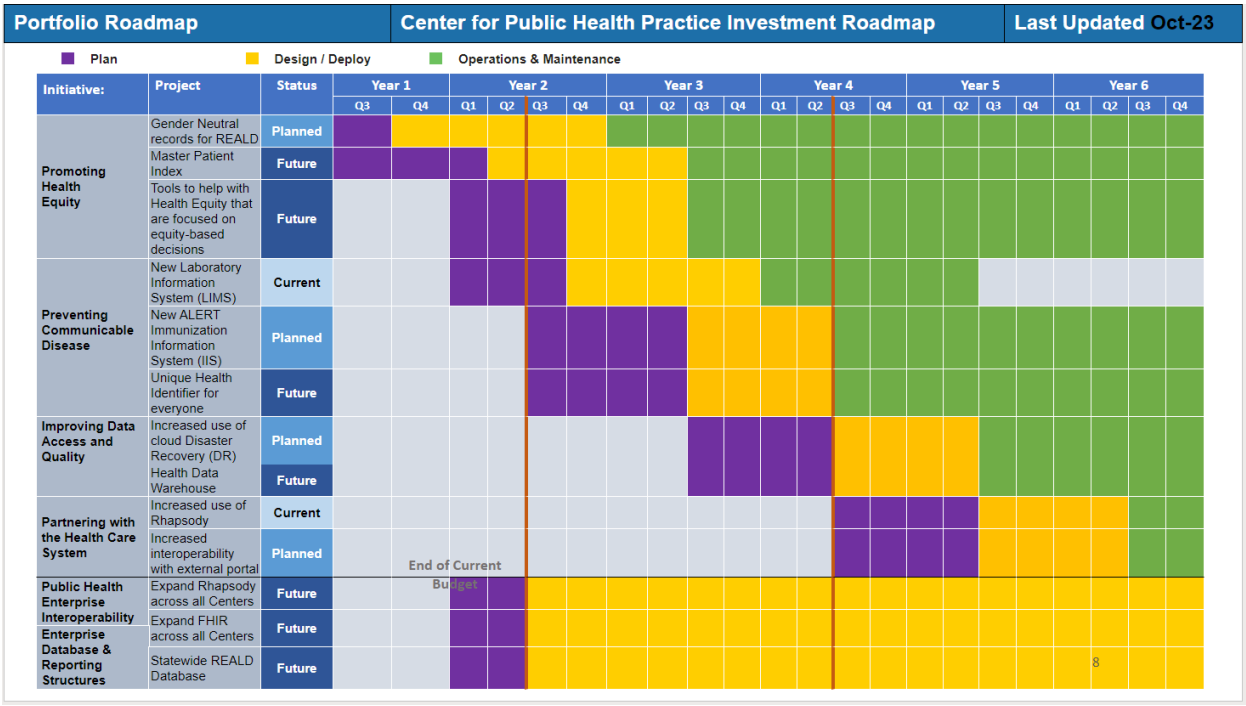
The approach is based on various leading frameworks with heavy influence by Gartner frameworks. Other key contributors included the Enterprise Information Services (EIS) Assistant State CIOs and EIS Senior IT Portfolio manager. In addition, the strategies and plans have been shared with the LFO IT analysts who help provide further guidance in the process.

4.1.Continuous Modernization Action Plan



The visual below depicts the Continuous Modernization Action Plan. The plan and resulting deliverables are led from a health and service equity perspective. The resulting deliverables drive and inform technology investments to meet the outcomes the agencies' desire. See Appendix A for a larger visual.

4.2. Business Outcome Statements



The Business Outcome States are the heart of the Continuous Modernization Approach. Enterprise architects' partner with program leadership to understand and collaborate on the desired business outcomes, compare it to an Integrated Health and Humans Services Capability Model (see Appendix A) and map it to technology components.

There are four components in every Business Outcome Statement, including Disruptive Business & Technology Trends; Business Goals and Objectives; Current Business Outcomes; and Future Business Outcomes. The visual below is a small portion of OHA's Public Health Division's Business Outcome statement, reflecting the future business outcomes component. See Appendix A for a larger visual.

4.3.Investment Roadmaps

The current capability gaps or future capabilities identified in Business Outcomes are mapped to Investment Roadmaps. The work results in identification of current and future state capabilities, fosters proactive planning through investment roadmap development, positions the agency to be more strategic in decision making around funding requests, helps identify common capability needs and better informs decisions around prioritization of technology investment projects. The Outcome Statements and Investment Roadmaps will be refreshed and used to inform updates to the Strategic Technology plan.

The visual above is a small portion of the OHA's Public Health Division's Investment Roadmap. See Appendix A for a larger visual.

4.4. Business Outcome Statements and Investment Roadmap Status

Since 2022, the Enterprise Architecture group has been working with the programs and divisions on the development of the Business Outcome Statements and Investment Roadmaps. A status by core programs is noted below.

Oregon Department of Human Services	Outcome Statement	Investment Roadmap	Target Start	Target Completion
Self-Sufficiency (SSP)	100%	90%		12/31/2023
Child Welfare (CW)	100%	45%		01/31/2024
Aging and People with Disabilities (APD)	100%	45%		01/31/2024
Office of Developmental Disabilities Svs. (ODDS)	100%	45%		02/28/2024
Vocational Rehabilitation (VR)	100%	45%		02/28/2024
Oregon Eligibility Partnership (OEP)			To be coordinated	TBD
Director's Office			To be coordinated	TBD
Central and Shared Services			To be coordinated	TBD
Oregon Health Authority				
Equity and Inclusion (E&I)			To be coordinated	TBD
Health Systems (HSD)	100%	100%		Complete
Health Policy and Analytics (HPA)	100%	90%		12/31/2023
Oregon State Hospital (OSH)	100%	90%		12/31/2023
Public Health (PHD)	100%	45%		01/31/2024
External Relations			To be coordinated	TBD
Agency Operations			To be coordinated	TBD
Fiscal and Operations			To be coordinated	TBD

5. Strategic Focus Areas

5.1. ODHS Office of Reporting, Research, Analytics, and Implementation (ORRAI)

The Office of Reporting, Research, Analytics, and Implementation (ORRAI) provides mission critical information to leadership and employees, legislators, partners, and the public. The office uses ODHS and inter-agency program data and tools such as predictive analytics, workload modeling and other quantitative and qualitative methods to improve outcomes for children and families. The office translates data into information and develops practitioner tools to ensure decisions are data informed.

ORRAI helps ensure our programs and services are accountable. ODHS reports to federal agencies, the Oregon state government, funders, and other community partners on an ongoing basis as well as in response to changes in policy or requirements. In addition to reporting, ORRAI staff conduct research and analytics to ensure ODHS programs and services are effective, efficient and best meet the needs of Oregonians. The implementation staff ensures that research and analysis are informed by workers, experts, and clients and that resultant changes are implemented through planned, consistent, and coordinated processes.

5.2. Cybersecurity, Risk and Privacy

Enterprise Information Services/Cyber Security Services (CSS) provides cybersecurity services for the executive branch. As such, this group is accountable for cybersecurity for ODHS|OHA. OIS is responsible for executing many cybersecurity activities and tasks in alignment with CSS. Examples of security activities that OIS handles include maintaining and adhering to the agency security plan; ensuring the security event and incident response plans are updated and adhered to; designing, developing, and procuring systems meeting statewide security requirements; implementation and adherence to the statewide standards and controls; and remediating known risks and vulnerabilities.

ODHS|OHA through the Office of Information Services has an Information Security and Privacy Office (ISPO) unit. ISPO has five primary functions – privacy; IT risk and compliance; information exchange; awareness and education; and e-discovery.

Due to the data protection obligations that originate from federal and state laws that include Health Insurance Portability and Accountability Act of 1996 (HIPAA), ODHS|OHA must have a Privacy Program and a dedicated Privacy Officer (PCO). The Privacy Program also supports privacy and security investigations for both ODHS and OHA including third party partnerships.

In addition, ISPO has a position for ONE (Oregon Eligibility) Security Advisement that supports federal compliance requirements with the Centers of Medicare and Medicaid Services (CMS).

ODHS Shared Services has a position for the Criminal Justice Information Services (CJIS) Local Agency Security Officer (LASO) in coordination with Oregon State Police CJIS Information Security Officer.

ODHS and OHA have state and federal requirements around regulated data sets including HIPAA (Protected Health Information); CJIS (Criminal Justice Information Systems); IRS (Federal Tax Information); SSA (Social Security Administration); MARS-E (Minimum Acceptable Risk Standards for Exchanges); PCI (Payment Card Data) and others.

5.3. Data Focus

In alignment with "Oregon's Data Strategy" and in compliance with EIS policy, ODHS|OHA each have named a lead data officer. These two roles along with the IT Director/Enterprise Architect provide leadership on respective agency data strategies, data governance, and ongoing data management practices necessary to manage data as an asset as required by policy and statute.

Lead data officers for both agencies work with leaders in other domains including the OHA REALD/SOGI director; ODHS REALD/SOGI(E) director; and ODHS|OHA Health & Service Equity IT director.

5.4. Newer Artificial Intelligence Technologies

Newer artificial intelligence capabilities have become a conversation topic from family dinner tables to board rooms to federal, state, and local governments.

In October 2023, the federal government released a Blueprint for an Artificial Intelligence Bill of Rights. The blueprint emphasizes the need for ethical and equitable principles, practices, and guidelines for government artificial intelligence adoption to protect individuals from harm.

In November 2023, State of Oregon Gov. Kotek signed Executive Order No. 23-26: Establishing a State Government Artificial Intelligence Advisory Council. The Council will be convened to guide awareness, education, and usage of artificial intelligence in state government that aligns with the State's policies, goals, and values and supports public servants to deliver customer service more efficiently and effectively. The recommended action plan shall include concrete executive actions, policies, and investments needed to leverage artificial intelligence while honoring transparency, privacy, and diversity, equity, and inclusion.

The agencies are having many conversations around this new AI technology and especially Generative Artificial Intelligence (GenAI). Freely available tools such as ChatGPT are being used and experimented with use cases include summarizing publicly available documents, rephrasing public information at different reading levels, and getting an opinion (with precautions) on a wide range of subjects. Broader application use cases being discussed in health and human services include using chatbots to provide quick and efficient answers to the public and assisting case workers by summarizing case notes across multiple platforms.

The fast pace of GenAI has the potential to shape our business and technology processes. The Office of Information Services has drafted an interim guidance document that the agencies can use until further direction from state leadership is provided. "Guidance on the use of generative AI technologies in the workplace" is beginning to be socialized with technical and agency leadership and will be adjusted to meet the needs of the agencies.

6. Operational Modernization

6.1. IT Infrastructure Overview

OIS supports the hardware and software that our staff, providers, and clients use.

On the client side, OIS is accountable for the infrastructure noted in the table below. This includes 32,100 computers and printers and 14,700 mobile devices geographically used across Oregon in 140 office locations.

People We Serve	
Clients	1,628,790
Staff	16,700
Partners	35,000
Medicaid providers	16,000

Locations We Support	
Office network devices	3,500
Web conferencing rooms	280
Offices around the state	140

Technology We Support	
Computers and printers	32,100
Mobile devices	14,700
Servers	1,800
Applications (Mission Critical)	75

On the server side, EIS is accountable for the state network, hardware infrastructure, server provisioning and operating system and virtual machine (VM). OIS is accountable for the applications that the agencies use in this infrastructure. Application development, patching, maintenance and operations all are under the responsibility of OIS.

Currently there are 1,544 virtual machines allocated to ODHS|OHA which represents 37 percent of the total VMs in the state. All changes to these systems are managed through OIS who ensures that change management processes are followed, including post-change testing and validation.

6.1.1. IT Infrastructure Modernization

In alignment with EIS, and a benefit to the agencies, there are two large technical projects to shift infrastructure to cloud services – see Section 4.8.1 Major IT Projects Underway – which are the ONE & MMIS Infrastructure/Cloud Migration

projects. With the completion projects in 2023-2025 the VMs hosted in the cloud will move from <5 percent to 62 percent.

ODHS|OHA has, also, invested resources and funding in planning efforts to migrate applications off the mainframe - see Section 4.8.1 - Mainframe Migration Provider & Client Payment Systems technical project. This planning project is in the pre-initiate phase. OIS leadership connects periodically with EIS (Data Center Services) leadership as there are plans underway on the future of support of Oregon's mainframe needs.

Also, OIS has an active project on IT Asset Hardware Management that will be completed this biennium.

6.2. Direct Customer Support Model

OIS has a presence in all 140 OHDS|OHA office locations throughout the state to the benefit of our staff, providers/partners, clients, and other agencies through our customer service and support field technicians support model. It's a support model that allows OIS to quickly provide in-person services; assistance to EIS on replacement of the 3,500 network devices in the agency's offices; and efficiently keep workstations reliable and updated through the workstation lifecycle replacement program (every four years.)

These field tech professionals are, also, the ones who respond to local needs in local or large scale disasters, such as relocating a majority of the workforce into remote working environments during the pandemic; handling infrastructure outages during severe weather events or fires; and providing support to other agencies in a disaster, such as assisting other call centers with setup during the pandemic or responding to urgent needs in recent local government security events that required workstations to be rebuilt.

6.3. Application Portfolio

The ODHS|OHA organization has a large and complex application portfolio. The holistic application portfolio includes roughly 450 applications with 75 considered mission/business critical. OIS manually maintains an application inventory for service support reasons and has an active project implementing an IT Asset Management Software system.

The five largest and most complex applications include the Oregon Eligibility (ONE); Medicaid Management Information System (MMIS); OR-Kids Child Welfare System; Oregon State Hospital Electronic Health Records (Avatar); and COBOL-Based Financial/Payment applications. OIS plays a variety of roles in each mission/business critical application ranging from technical oversight of a vendor-based systems to application development and support of on-premise systems.

The last application portfolio assessment was in 2020, led by the OIS Enterprise Architecture Team and Gartner Research. While it was completed, many interviews to validate the accuracy of the information were not held due to the agencies' limited availability during the global pandemic. Gartner concluded (at that time) that ODHS|OHA is lagging peers on the modernization and cloud journey migration. This 2020 result validated what the technical organization is aware of and continues to make progress and seek funding and resources to address legacy IT systems.

6.3.1. Application Portfolio Modernization

In alignment with EIS strategy, cloud-based applications are the preferred replacement for core applications. Of the five largest and most complex applications noted in the section above, all have active cloud projects in the continuous modernization journey.

For applications that OIS is responsible for developing, major initiatives are underway to remove dependence on non-standard operating systems, database platforms, application stacks, and programming environments. For example, OIS has decommissioned Sybase entirely, and is working to modernize off AIX, DB2, PowerBuilder and the mainframe platform.

In support of in-house application modernization, a lot of work has been done with process, practice, and standards maturity. OIS continues to incorporate modern operational processes and toolsets including agile development which is a highly iterative and flexible development process; DevOps which is aimed at streamlining software development and delivery into production environments; and using software tools that aid with accessibility and vulnerability maturity.

For details around the holistic application portfolio modernization – see Section 4.9, Continuous Modernization.

7. Investments

7.1. OIS Workforce

For the 2023-2025 biennium, OIS has 650 legislatively approved budget positions. Of these positions 6 percent are management/supervisory, 94 percent are staff with a management to staff ratio of 1:10.7. Our current OIS vacancy rate is less than 12 percent.

OIS is a Shared Services organization and ODHS|OHA use a 64 percent/36 percent cost allocation model. Direct charge codes are used for project-based work. It's common for OIS units to be fully dedicated to business units in our software development and delivery as the nature of the work is around internally developed and supported products. For a few examples, the OIS OR-Kids (child welfare) unit comprised of software engineers; OIS ONE unit comprised of project managers, contract administrators, system administrators; OIS Health & Service Transformation unit in dedicated support of REALD/SOGI. Approximately 100 staff direct charge 100 percent of their time on a monthly average, approximately 75 staff direct charge a portion of less than 100 percent of their time on a monthly average.

7.2. OIS Budget

OIS has a $234,600,000 budget for the 2023-2025 biennium, which is 0.44 percent of the combined ODHS|OHA budget. About 80 percent of the budget is for personnel services or labor, with the other software maintenance (10 percent), IT professional services (5 percent), and other services and supplies (5 percent).

Personnel services of local IT groups and product and solution business analysts are in agency budgets.

7.3. Technical Policy Option Package Investments in 2023-2025 budget

In 2023-2025, there were five investments (over $2 million) in technology through Policy Option Packages with descriptions in the Large Technical Project Portfolio – dollars are represented as total funds. The POPs below support the program and technology needed as outlined in the POP. This includes:

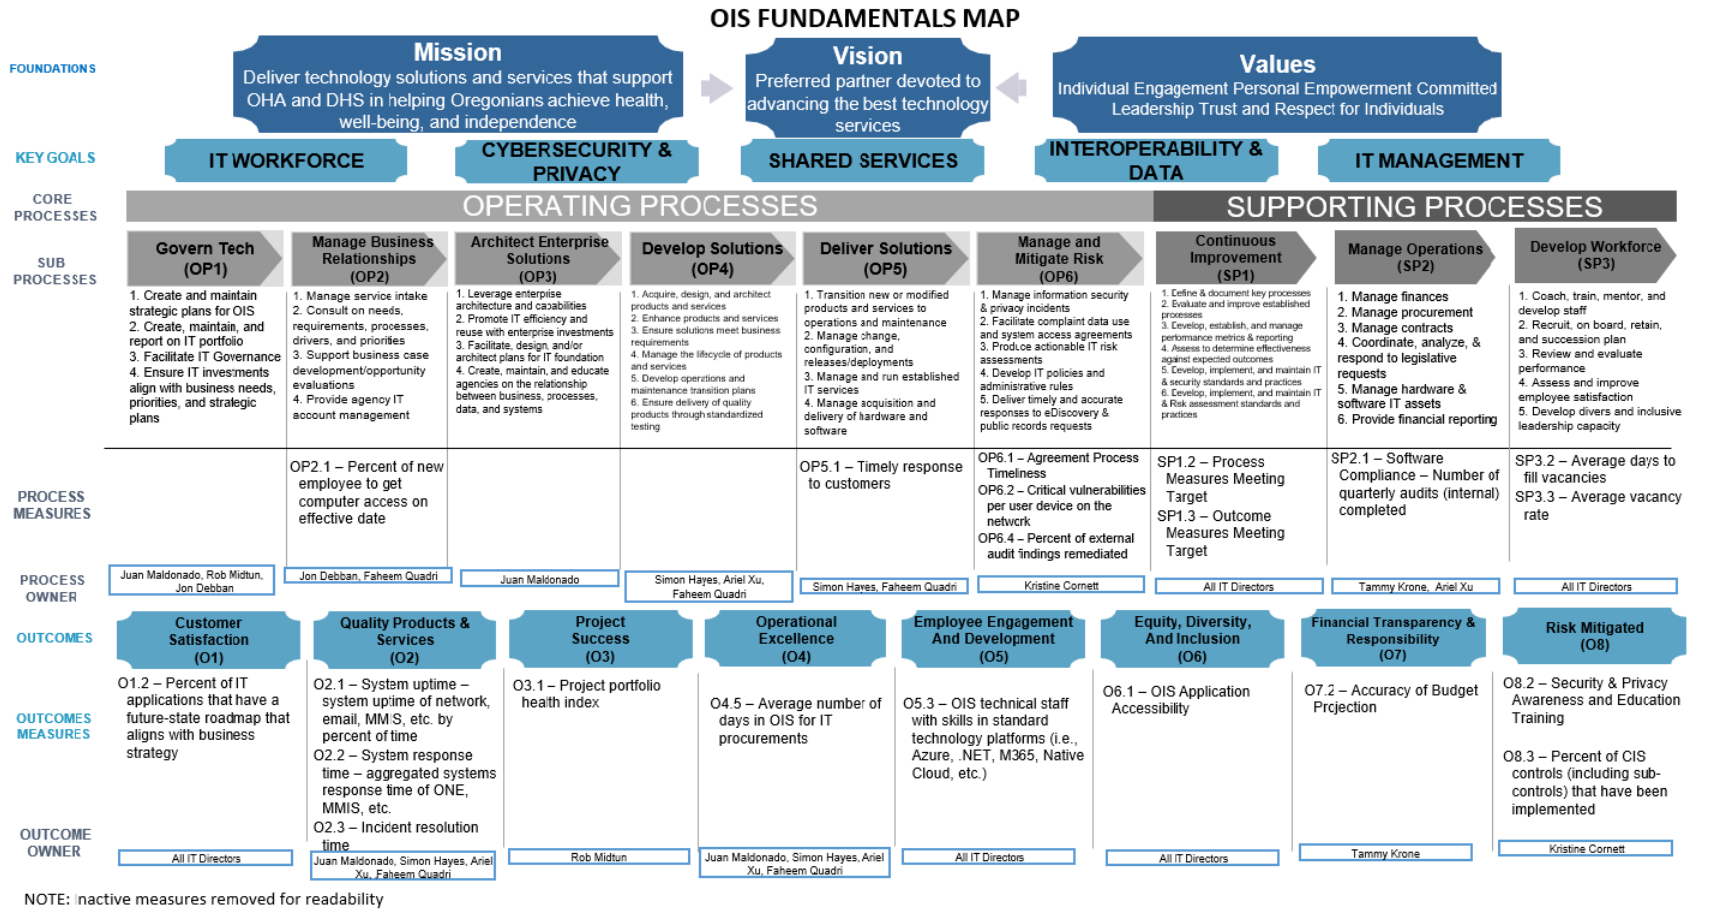
- **Joint Ongoing Maintenance (POP 143)** – **$39.1 million** – This policy package requests funding for ongoing maintenance and enhancements, ODHS Oregon Eligibility Program resources, cloud migration, additional

software licensing needs, and one-time payment to IT vendor for final contract cost.

- **REALD & SOGI Implementation: Getting to Data Justice (POP 403)** – $15.7 million –Supporting data collection by external providers, insurers, and individuals, the Initial Registry, Initial Repository, and creating the Enterprise Scale Statewide REALD & SOGI Registry and Repository represents an investment in data equity and facilitates data justice within communities most impacted by health inequities.
- **Joint – Mainframe Migration/Provider & Client Payments System (POP 203)** – $13.1 million – The policy package received funds and resources to start the planning work of a multi-biennia project to migrate the mainframe COBOL based payment & financial components to modern platforms. The oldest payment systems are complicated, antiquated, and fragile with limited resources being available in the IT industry. These mainframe COBOL components processed 14.5M payments for a total of $3.7B and is one of the greatest risks of the ONE Environment. This POP gets us started on planning and ideally to a pilot effort.
- **OHA – OEBB/PEBB Benefit Management System Replacement (POP 435)** $6.6 million –This policy package would fund implementation activities including additional project staffing, vendor implementation costs, hosting and licensing fees, oversight fees for quality assurance, and contingency allowances.
- **OHA – Marketplace Transition from SBM-FP to SBM (POP 416)** – $2.1 million – This (planning) policy package requests fund to end Oregon's reliance on the federal health insurance exchange eligibility and enrollment platform and the federal call center, and to fund the initial stage of its transition to a state-based marketplace platform and state-controlled call center.

8. Continuous Planning

8.1. Accountability



The ODHS|OHA chief information officer (CIO) and deputy CIO are accountable for the Office of Information Services. Key strategic documents such as this document, Strategic Technology Plan, and the Performance Management System will be a shared responsibility. Periodically, usually at year end and the end of the biennium, the materials are reviewed and refreshed.

8.2.Communication

IT progress and strategic artifacts are co-created, reviewed, and communicated to agency leadership. In recent years and going forward the leadership bodies for communication strategy includes agency directors and deputy directors; program/division directors; ODHS cabinet; OHA leadership team; agency technology councils; OIS and local IT technical directors, OIS all managers, and OIS all staff. Additionally, materials are co-created with and/or reviewed with the Healthy Policy assistant CIO; Senior Investment Program manager, and LFO IT analysts.

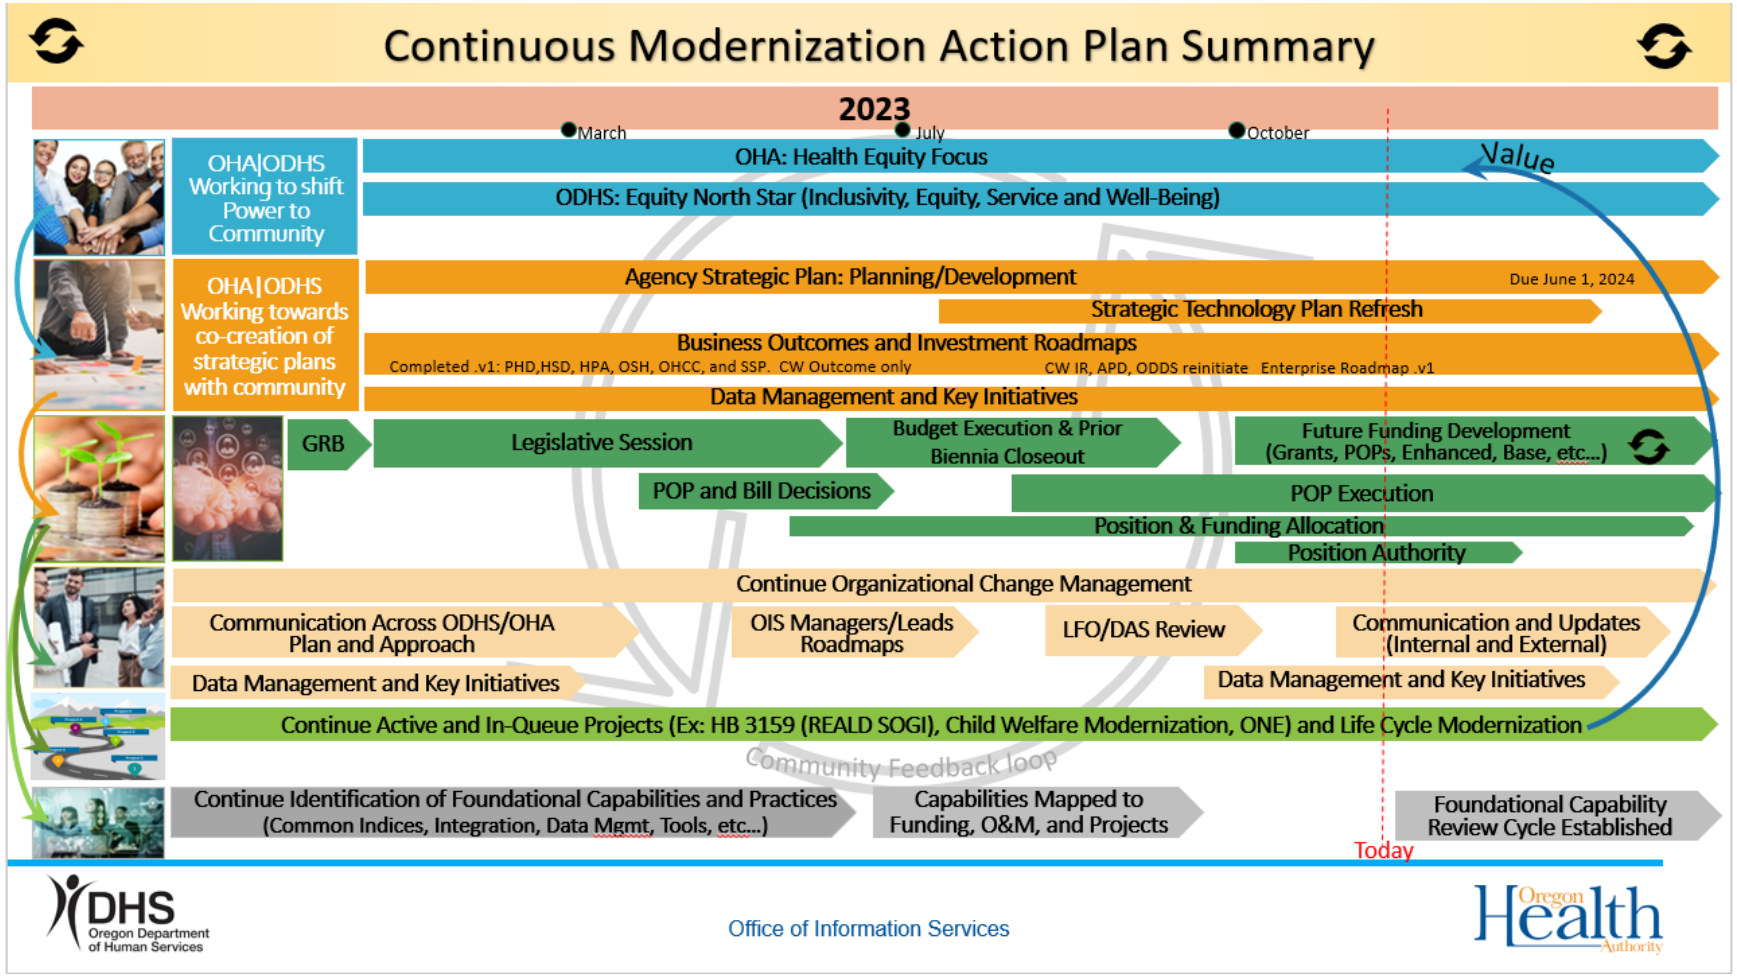
9. Appendix

9.1. Performance Management System – Fundamentals Map

NOTE: Inactive measures removed for readability

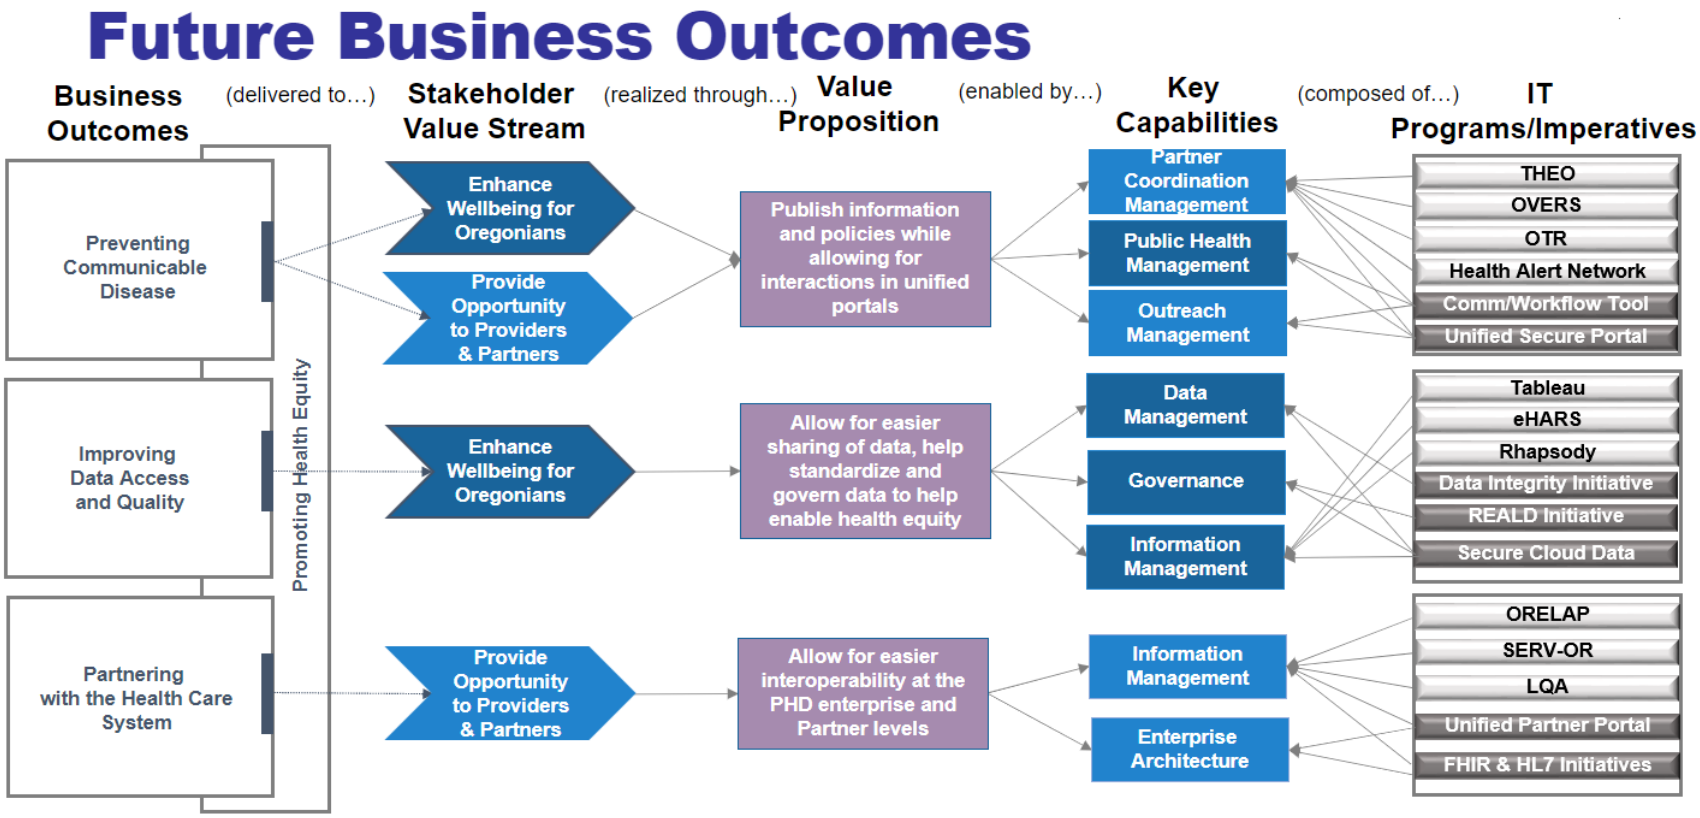
9.2. Project Portfolio with IT Governance Prioritization

The following snapshots are dated October 2023. Cross-agency projects will appear on both lists. Dollars are represented as total funds.



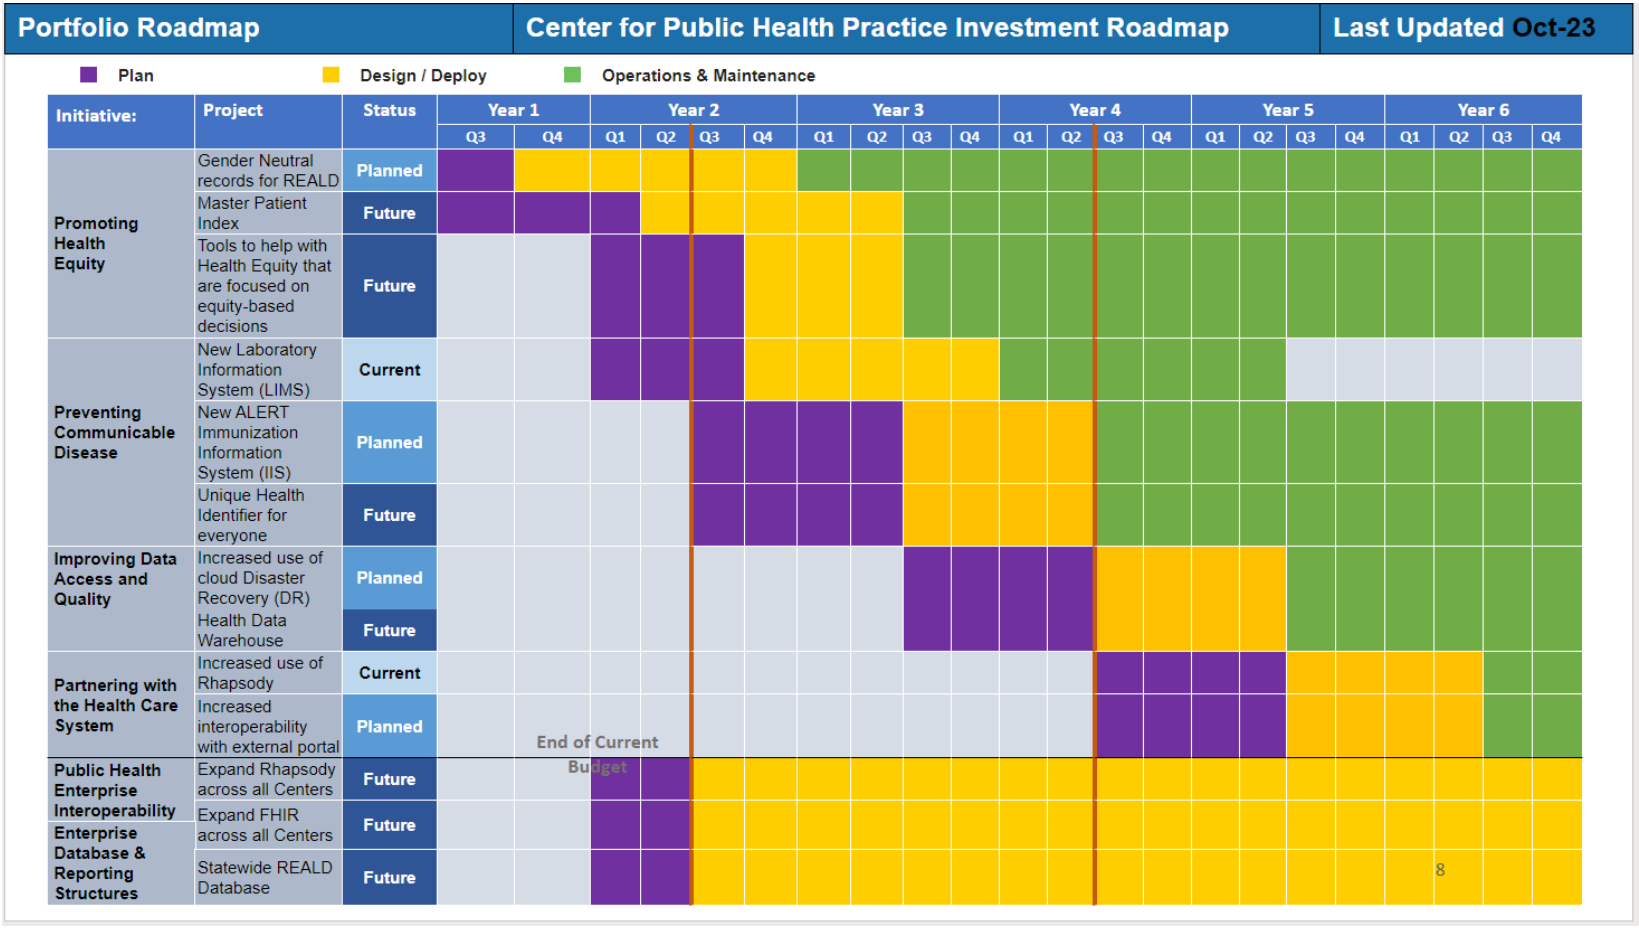
ODHS Governance Council Prioritization

Priority	Project Name	Health	Project Budget	Project Phase	Projected End
1	1115 Waiver Technology Implementation			1-Initiating	
2	Mainframe Modernization - Payment Systems			0-Pre-initiation	
3	SB155 Enhancements		$784,658	4-Closing	05/31/2023
4	Provider Time Capture (PTC)		$31,367,810	3-Executing	01/20/2025
5	CCWIS		$8,898,851	2&3-Planning/Executing	06/30/2024
6	REALD and SOGI Registry Implementation		$10,900,000	2-Planning	06/30/2025
7	Case Management System		$6,110,500	2-Planning	
8	Provider Enrollment Maintenance System		$9,200,000	2-Planning	
9	Resource Parent Inquiry Certification and Training (RPICT)		$1,363,107	1&2-Initiating/Planning	08/31/2024
10	GO Priority - DELC - Childcare Regardless of Citizenship			3-Executing	
11	ONE Program Cloud Migration			1-Initiating	12/31/2024
12	Aspen to iQIES Transition		$0	1&2-Initiating/Planning	09/16/2024
13	APS Community Workflow and REALD		$1,352,600	1-Initiating	07/10/2024
14	IT Service Management		$4,137,792	2-Planning	
15	Email Retention and Special Schedule Initiative			0-Pre-initiation	
16	Laserfiche Enterprise		$1,019,120	3-Executing	12/11/2023
17	OregonBuys Implementation		$220,000	2&3-Planning/Executing	03/29/2024
18	ODDS Electronic Visit Verification - Non-Web Solution			1-Initiating	

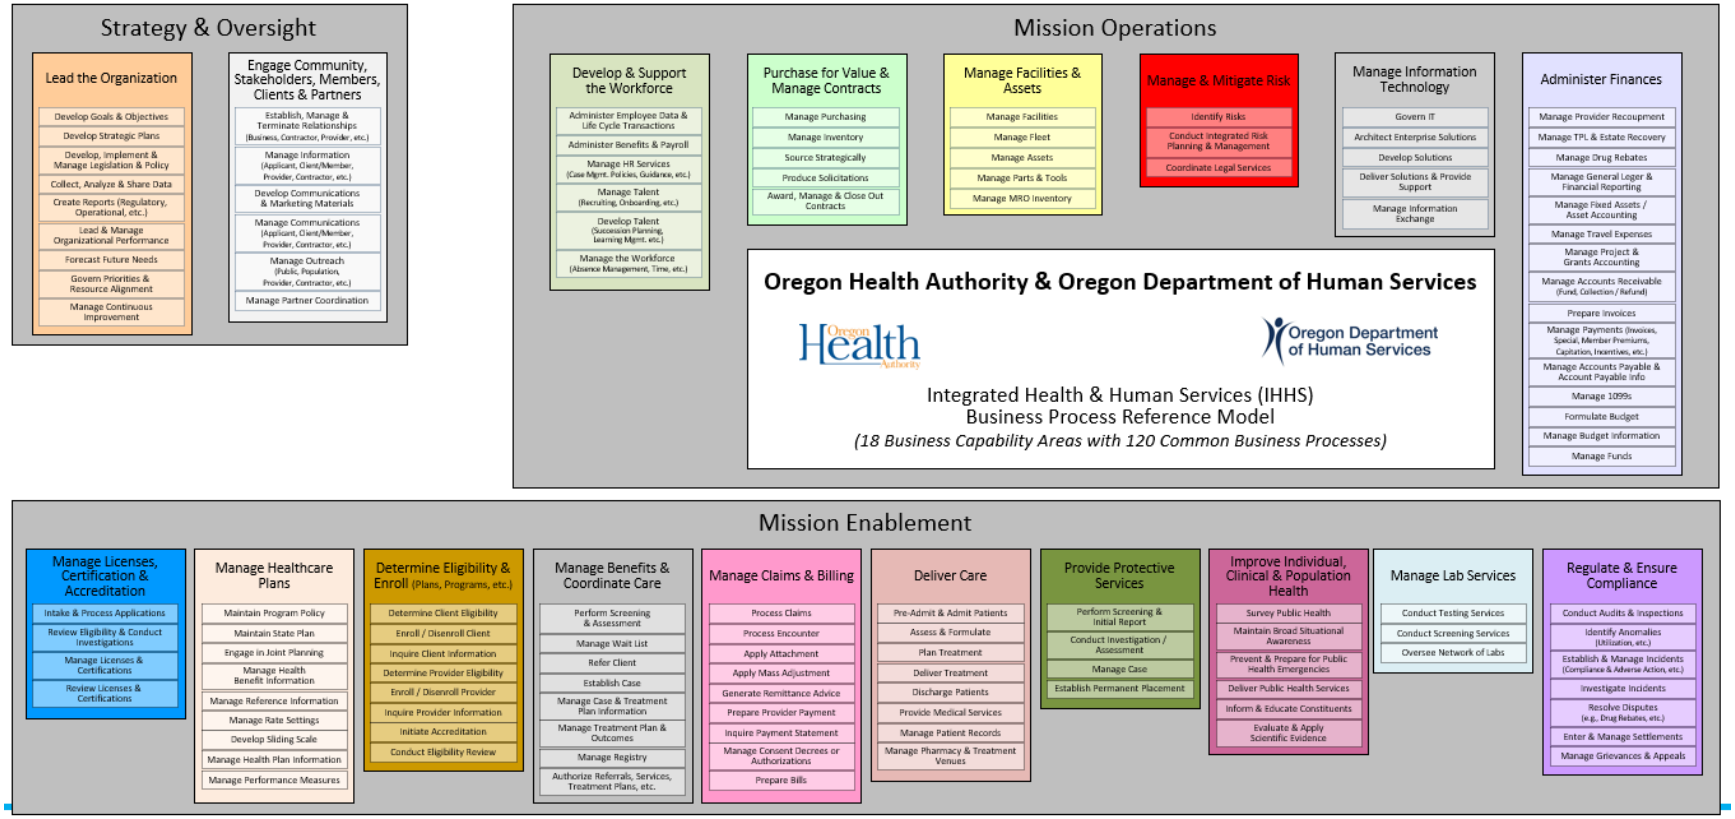


OHA Governance Council Prioritization

Priority	Project Name	Health	Project Budget	Project Phase	Projected End
1	1115 Waiver Technology Implementation			1-Initiating	
2	REALD and SOGI Registry Implementation		$10,900,000	2-Planning	06/30/2025
3	Mainframe Modernization - Payment Systems			0-Pre-initiation	
4	MES Modernization (formerly Modularity) Planning Phase		$922,994	3-Executing	12/31/2024
5	Oregon State-Based Marketplace		$1,200,000	2-Planning	04/04/2025
6	HASP 2		$2,067,840	3-Executing	02/02/2024
7	MES Interoperability - Claims & Provider Directory		$4,929,001	3-Executing	04/08/2024
8	SERV-OR		$769,980	3-Executing	09/12/2024
9	Compass Modernization		$1,788,046	1-Initiating	04/11/2024
10	OSH Incident Reporting and Infection Surveillance (IRIS)		$697,000	3-Executing	03/31/2024
11	MMIS Program Integrity - Release 4		$8,258,688	2&3-Planning/Executing	07/31/2023
12	HPA HEDIS			0-Pre-initiation	
13	ALERT IIS Replacement		$10,000,000	1-Initiating	
14	OEBB-PEBB Benefit Management Systems (BMS) Replacement		$14,470,585	3-Executing	08/04/2025
15	OSH Scheduling and Time Replacement			1-Initiating	
16	Email Retention and Special Schedule Initiative			0-Pre-initiation	
17	OregonBuys Implementation		$220,000	2&3-Planning/Executing	03/29/2024
18	HIV-E (HIV-Electronic)		$23,700,949	3-Executing	06/29/2027
19	TWIST TO WEB		$16,359,475	3-Executing	01/31/2024
20	IT Service Management		$4,137,792	2-Planning	
21	OVERS ICR		$6,455,838	2&3-Planning/Executing	07/26/2024
22	MMIS Letter Generator Upgrade		$1,179,731	3-Executing	12/22/2023
23	OSPHL LIMS Replacement		$1,873,953	2-Planning	
24	MMIS Infrastructure Replacement - Phase 1		$10,072,072	3-Executing	12/31/2024
25	Laserfiche Enterprise		$1,019,120	3-Executing	12/11/2023
26	ONE Program Cloud Migration			1-Initiating	12/31/2024
27	Oregon Trauma Registry (OTR) Replacement		$636,888	2-Planning	12/08/2023



9.3.Continuous Modernization Action Plan Summary



9.4.Future Business Outcomes Example

9.5.Investment Roadmap Example

9.6.Integrated Health & Human Services (IHHS) Business Process Reference Model

9.7.Federal Mandates

Top Federal Mandates
CMS MES Modernization – For the past eight years, CMS has signaled its interest seeing states move to a modular architecture for their Medicaid Management Information Systems (MMIS). In 2023, at the annual Medicaid Enterprise Services Conference, CMS announced that it will now focus on modernization as in "MES Modernization." (Technical Project: Medicaid Enterprise Services Modernization)
Fair Labor Standards Act (FLSA) – In context of ODHS Home Care Workers (HCW) and Personal Service Workers (PSW), the FLSA requires that the records include certain identifying information about the HCW/PSW and data about the hours worked. (Technical Project: Provider Time Capture)
Federal Department of Health and Human Services – The Federal Department of Health and Human Services (HHS) rule on Comprehensive Child Welfare Information Systems (CCWIS) went into effect on Aug. 1, 2016. The rule governs the next generation of technology to support child welfare programs. The new rule focuses on modularity, interoperability, reusability, data sharing between programs, lifecycle data management, and data quality. ODHS Child Welfare declared that it would move towards a CCWIS environment. (Technical Project: Child Welfare CCWIS Project)
21st Century Cures Act – Requires HCW and PSW time entries to be accurate and attested to by both service recipients and providers. (Technical Project: Provider Time Capture)
Hospital Accreditation – Patient safety and hospital accreditation require that federally mandated electronic health management systems be highly available. (Technical Project: Hospital Application Survivability Platform 2)
CMS Interoperability and Patient Access Final rule – The rules advance the efforts to make health information more easily available to patients and improve coordination of care. (Technical Project: Medicaid Enterprise Services Interoperability)
CMS MARS-E mandate – Federal mandates around information security, privacy, and accountability are evolving rapidly. Of relevance is the Minimum Acceptable Risk Standards for Exchanges (MARS-E). MARS-E provides a single, integrated approach to security and privacy that addresses multiple federal requirements. (Technical approach – ONE maintenance and operations)

9.8.State Mandates

Top State Mandates
HB 2468 (2023) – Requires property owners to allow dwellings to be used as family childcare homes and sets rules around certification, other children on premises, and subsidy payments from DELC.
HB 2665 (2023) – Requires the Health Licensing Office to establish processes to receive and investigate complaints regarding temporary staffing agencies. Requires OHA to develop rules to establish maximum rates that temporary agencies may charge.
HB 2683 (2023) – Directs the Early Learning Council to adopt rules to establish eligibility for certain children to participate in Employment Related Day Care subsidy programs.
HB 2757 (2023) – Expands and provides funding for a coordinated crisis services system including 9-8-8 suicide prevention and behavioral health crisis hotline.
HB 3127 (2023) – Identifies certain covered vendors and prevents state agencies from downloading and installing covered products from those vendors. Requires OSCIO to adopt rules, policies, and standards for state agencies to implement the removals relating to the vendors, including definitions and timelines of agency notification.
SB 11 (2023) – Requires certain executive department boards or commissions that conduct public meetings through electronic means to record and promptly publish recordings on websites or hosting services so the public may observe or listen to meetings for free.
SB 231 (2023) – Directs ODHS to establish and maintain a centralized child abuse reporting system.
SB 966 (2023) – Requires OHA to adopt standards for types of data collected for all payers and that all claims' databases are consistent with standards adopted for collection of data on race, ethnicity, language, disability, sexual orientation, and gender identity. (Technical Project: REALD/SOGI Registry-Repository)

SB 972 (2023) – Requires OHA to transition from healthcare.gov to state-based marketplace by Nov. 1, 2026. (Technical Project: State Based Marketplace)
SB 1089 (2023) – Establishes a Universal Health Plan Governance Board. (Note: Bill analysis stated need for single payer plan system)
HB 3159 (2021) – Getting to Data Equity - HB 3159 mandates a registry and repository for collection of Race, Ethnicity, Language, Disability (REALD) and Sexual Orientation, Gender Identity (SOGI) data from providers and insurers. REALD & SOGI data is OHA's best tool to assess how racism, disablism, lack of language access, sexism and heteronormative dominance impact individual and community health. (Technical Project: REALD/SOGI Registry-Repository)
SB 855 (2019) – Directs professional licensing boards to study matter in which people who are immigrants or refugees become authorized to practice occupation or profession – Directs the Oregon Home Care Commission (part of ODHS) to develop and implement methods to reduce barriers to enrollment for applicants who may be immigrants or refugees. (Technical Project - Provider Enrollment Maintenance System)
SB 1067 (2017) – Relating to government cost containment; and declaring an emergency – Per the bill, SB 1067 Oregon Educators Benefit Board (OEBB) and Public Employees Benefit Board (PEBB) are seeking to integrate the administrative and support of the two IT systems, with improved user experience and customer care, into a single platform to drive cost reductions and operational improvements consistent with applicable law and administrative rule. (Technical Project – OEBB-PEBB Benefit Management Systems (BMS) Replacement)
SB 774 (2015) – Requires Home Care Commission to adopt statewide plan to expand home care worker workforce – Directs ODHS to implement a single online application and universal provider number for the agency provider workforce and increase the size of the workforce available to serve individuals receiving services. (Technical Project – Provider Enrollment Maintenance System)

Agency Worksheet - Revenues & Expenditures
2025-27 Biennium
Oregon Health Authority

Version: V - 01 - Agency Request Budget
