X Agency Request _____ Governor's Budget _____ Legislatively Adopted

Letter from the Director

The Oregon Health Authority (OHA) developed our agency's budget request at a time of profound challenge and change. As in communities throughout the nation, Oregonians are confronted by the COVID-19 pandemic, which threatens both the lives and livelihoods of people across the state. At the same time, Oregonians are grappling with a national reckoning over systemic racism and inequity – and we cannot ignore the many Black and brown lives tragically lost and diminished due to the legacy of racism in our health care and public health systems. OHA's mission to help every Oregonian achieve optimal health and well-being and ensure access to quality affordable health care has never been more urgent.

To fulfill our mission, OHA is developing a strategic plan with a single overarching goal: to eliminate health inequity in Oregon over the next 10 years. This strategic plan has been developed with the input of hundreds of Oregonians throughout the state, with a primary focus on listening to people from communities that have experienced health inequity and whom our health care system has failed to serve as well as white residents.

Our Agency Request Budget (ARB) for the 2021-23 biennium is based on priorities that take important steps toward our strategic plan goal and meet the challenges and opportunities of this profound moment of change.

Progress and barriers

Prior to and during the COVID-19 pandemic, OHA and our partners throughout Oregon's health care and public health systems had made important strides toward better health outcomes and greater health equity.

- While the national uninsured rate rose in 2019, Oregon maintained a 94 percent coverage rate over the past 2 years.
- Oregon's opioid-related overdose death rate was 8.1 per 100,000, compared to 14.9 per 100,000 nationwide.
- The Oregon Health Plan continues to serve more than 1 million Oregonians (1 in 4 state residents) and OHP members report better health and high levels of satisfaction with their coverage. In 2019, OHA successfully updated contracts (valued at more than $5 billion in 2020) with 16 Coordinated Care Organizations and seamlessly transitioned more than 800,000 OHP members. Based on an inclusive and intensive public input process, these contracts were rewritten to improve access to behavioral health services, improve health equity and address social determinants of health, put the brakes on cost growth and incentivize providers to achieve better outcomes.
- Oregon has had among the lowest COVID-19 case rates, death rates and test positivity rates in the nation.

Yet, we continue to face significant challenges.

- Disproportionate COVID-19 infection rates have laid bare the systemic health inequities people of color and members of sovereign tribal nations experience.

- Our state's behavioral health system remains fragmented, overloaded, underfunded and inequitable in access and outcomes, especially for people of color and people living in rural parts of the state. The Oregon State Hospital has struggled to keep up with mounting court-ordered admissions of patients from the criminal justice system.
- Health care costs continue to rise faster than inflation, especially costs for prescription drugs. These cost increases place added pressure on the state budget at a time when OHP enrollment has increased due to the COVID-19 pandemic.
- The COVID-19 pandemic has highlighted gaps in state and local public health capacity, despite recent legislative investments in public health modernization.

OHA 2021-2023 budget request: investments to eliminate health inequity

To accomplish our mission on and behalf of all Oregonians and to achieve our goal to eliminate health disparities over the next decade, OHA requests $26.3 billion in total funds for the 2021-23 biennium ($3.8 billion in state general funds). Our 2021-23 biennium budget prioritizes the following objectives, which we relied on to develop our policy option packages:

- Reduce barriers to health and advance health equity in our communities.
- Improve access and quality of behavioral health services and decrease behavioral health inequities.
- Reduce health inequities in the healthcare system and realize better care, better health and lower costs.

Below is a summary of some of OHA's major policy option packages:

I. Reduce barriers to health and advance health equity in our communities:

- ***Health Equity Innovation and Implementation (POP 402):*** OHA has limited capacity to complete current baseline equity and inclusion work for agency and Oregon, specifically related to health system transformation. This POP provides capacity needed to meet the needs of the agency to fulfill the 10-year strategic goal of eliminating health inequities in Oregon, including strategic planning development and implementation.
    - Amount requested: $5.8 million General Fund/$510,000 Other Funds/$947,000 Federal Funds. Total Funds: $7.3 million.
- ***Beer, Wine and Cider Tax (POP 401):*** Oregon faces a great unmet need for behavioral health services. At the same time, alcohol imposes large and avoidable costs on the health of all people in Oregon, and on Oregon's economy, communities and health care systems. This policy package would increase the tax on beer, wine, and cider by an amount yet to be determined. The additional revenues generated by the tax would be primarily used to address behavioral health, including substance use disorder prevention and treatment.
    - Amount requested: $293 million Other Funds.
- ***Tobacco Retail Licensure (POP 408):*** Tobacco is the leading preventable cause of death and disease in Oregon, costing the state $2.9 billion and nearly 8,000 lives every year. Moreover, the burden of tobacco use is not distributed evenly, falling heavily on Oregonians with low incomes, African Americans, Native Americans and Alaska Natives, and those who identify as LGBTQ+. This policy package would establish a strong statewide licensing system for retailers that sell tobacco products and inhalant delivery systems. It would equip OHA-PHD with new tools to

educate retailers about tobacco laws, and – critically – to hold tobacco retailers that sell tobacco illegally accountable. Without statewide tobacco retail licensure, Oregon cannot robustly enforce tobacco laws such as the minimum legal sales age. A retail license could make it easier to enforce other tobacco sales laws such as tax collection compliance, counterfeit product sales, and compliance with federal laws (for example, no single cigarette sales or self-service displays of tobacco products).
    - Amount requested: $2.1 million Other Funds.
- ***Public Health Modernization (POP 417):*** Since 2013, Oregon has been on a path to fundamentally shift its practice to ensure essential public health protections are in place for all Oregonians through equitable, outcomes-driven and accountable services. The groundwork laid through initial investments in public health modernization have been critical to Oregon's management of the COVID-19 pandemic. However, the COVID-19 response has highlighted continued gaps in the public health system, especially the need to apply equity principles across all areas of public health practice. This policy package supports implementation of key public health programs in state, local and tribal public health authorities and communities and creates mechanisms for increased accountability for equitable health outcomes. Not funding this policy package risks OHA's ability to ensure basic public health protections guaranteed in statute are available to every person in Oregon and challenges OHA in continuing to meet the deliverables and timelines prescribed in House Bill 3100 (2015).
    - Amount requested: $68.9 million General Fund/($465,000) Other Funds/($752,000) Federal Funds. Total Funds: $67.7 million.
- ***Universally Offered Home Visiting (POP 418):*** This policy option package provides resources required to implement and scale up the next phase of universally offered home visiting (UoHV) in Oregon. This continues the phased-in approach of implementing this program, continuing with the early adopter communities and the next cohort. If this initiatives is not funded, it would result in the inability to fully implement the program as statutorily mandated and would undermine Oregon's goal to connect every family who has a newborn with local support that is individualized, non-stigmatizing, evidence-based and meets their needs.
    - Amount requested: $5.1 million General Fund/$3.2 Federal Funds. Total Funds: $8.3 million.

II. Improve access and quality of behavioral health services and decrease behavioral health inequities.

- ***Children's Mobile Response and Stabilization Services (POP 406)***: Institutes a 24-hour, 365 day-a-year Children's Mobile response and stabilization program designed to deliver mobile response to support children, young adults and their parents and/or caregivers, as well as youth at risk for and in the custody of Child Welfare. Oregon has a mobile crisis response program for adults, but no such program is offered to children, youth and their parents and/or caregivers. This upstream, early intervention program would be available to parents and/or caregivers through use of a centralized referral system. Mobile response and stabilization staff would be able to support young people and their parents and/or caregivers in stabilizing the crisis

situation and averting unnecessary emergency department visits, out-of-home placements, placement disruptions, arrests/incarceration and in reducing overall system costs.
    - Amount requested: $11.1 million General Fund/$4.3 million Federal Funds. Total Funds: $15.5 million.
- ***Community Behavioral Health Services (POP 409)***: This policy option package would fund strategies and recommendations from the Governor's Behavioral Health Advisory Council to improve the behavioral health system for adults and transitioned-aged youth who experience serious mental illness and co-occurring substance use disorders.
    - Amount requested: $99.7 million General Fund/$94.8 million Federal Funds. Total Funds: $194.5 million.
- ***Community Mental Health Aid and Assist (POP 411)***: OHA requests funds to increase community services to meet the immediate needs of people who have been arrested and court-ordered for services under Oregon's "Aid and Assist" laws (ORS 161.365 & 161.370). This policy option package would provide better coordination between courts, the Oregon State Hospital (OSH) and Community Mental Health (CMH) and Substance Use Disorder (SUD) service providers for people who have intensive behavioral health service needs. When people have access to the proper behavioral health services at the proper time, they have a better chance of recovery and Oregon will be in a stronger position to remain in compliance legal obligations.
    - Amount requested: $19.3 million General Fund/$3.4 million Federal Funds. Total Funds: $22.6 million.
- ***Rivers Run Conversion to Secure Residential Treatment Facility (POP 415)***: This proposal would create establish a Secure Residential Treatment Facility on the Junction City campus for patients stepping down from hospital level of care. Increased SRTF capacity would allow the state hospital to serve individuals who no longer need hospital level of care but who are not yet ready to transition to an unsecure environment.
    - Amount requested: $12.2 million General Fund. Total Funds: $12.2 million.
- ***Substance Use Disorder 1115 Waiver State Plan Amendment (POP 431)***: Oregon is submitting a substance use disorder (SUD) 1115 Waiver and state plan amendment (SPA) to CMS to support an enhanced full continuum of care delivery system for individuals with SUD. If the waiver and corresponding SPA are approved, OHA would be able to utilize additional Medicaid dollars to pay for residential treatment for more Oregonians with SUD. If approved, this would provide the supports needed to prevent SUD and sustain long-term recovery, including crisis intervention, peer support services, outreach and education to help individuals in recovery find and keep housing.
    - Amount requested: $31.5 million General Fund/$166.5 million Federal Funds. Total Funds: $198 million.
- ***Transition Residential Mental Health Services to CCOs (POP 441)***: Moves mental health residential services to coordinated care organizations' global budgets effective January 1, 2022.
    - Amount requested: $14.9 million General Fund/$27.2 million Federal Funds. Total Funds: $42 million.
- ***Expanded Capacity/Caseload at Oregon State Hospital (POP 445)***: Opens the two remaining vacant treatment units on the Junction City campus, increasing OSH service capacity by 24 hospital level of Care beds and 24 Secure Residential Treatment Facility beds, allowing for

movement of patients between campuses to yield space on the Salem campus to better meet the demand for treatment of individuals under Aid and Assist orders.

- Amount requested: $30 million General Fund. Total Funds: $31 million.

III. Reduce health inequities in the healthcare system and realize better care, better health and lower costs.

- ***Indian Managed Care Entity (POP 403):*** Establish and support Indian Managed Care Entities at the request of Oregon's Federally recognized Tribes, which would provide critical care coordination services to American Indian/Alaska Native enrollees in OHP.
  - Amount Requested: $1.4 million General Fund/$10.7 million Federal Funds. Total Funds: $12.1 million.
- ***Operate FFS like a CCO (POP 407):*** This policy package would improve the Oregon Health Plan (OHP) fee-for-service (FFS) program operations and align the fee-for-service delivery system with that of a coordinated care organization. The adverse effect of not funding this package is that program gaps will persist, OHP members in FFS will continue to have a health plan that is inferior to CCO plans, and provider fee schedules would remain out of date.
  - Amount requested: $12.1 million General Fund/$20.14 million Federal Funds. Total funds: $32.2 million.
- ***Align Purchasing Power Across PEBB and OEBB and other Public Programs (POP 425):*** One of the most important levers OHA has for spreading change across the healthcare marketplace is aligning the state's purchasing power across PEBB and OEBB along with other public purchasers. This policy package provides a pathway to expand PEBB and OEBB's statewide enrollment footprint of 300,000 covered lives. It allows for additional special procurement authority for joint purchasing initiatives and adds resources to continue to transform the delivery systems in alignment with coordinated care organizations (CCO) and the coordinated care model. Both boards have fully committed to advancing the coordinated care model and exploring innovative, long-term solutions to stay under a 3.4 percent annual trend cap. Under their current legal structures, the boards' procurement authority does not allow for the flexibility needed to directly contract with plans who can meet specific criteria as determined by the boards, without issuing a request for proposal. This policy package will grant expanded procurement authority to explore opportunities in innovation as they are presented to the boards.
  - Amount requested: $1.6 million Other Funds. Total funds: $1.6 million.
- ***Public Option/Medicaid Buy-in (POP 427):*** Enables OHA to refine the details of health insurance reforms that would be intended to increase access to health insurance while reducing premiums paid by consumers – potentially through a public option or a "Medicaid buy-in" plan as envisioned by SB 770 (2019).
  - Amount requested: $200,000 million General Fund. Total funds: $200,000.
- ***Strengthen Purchasing Power of the Marketplace (POP 437):*** Moves the Marketplace from DCBS to OHA, creating greater opportunities for aligned policy and leverage all state health coverage programs to maximize opportunities to achieve better health, better care and lower costs.

- Amount requested: $1.5 million General Fund/$18 million Other Funds. Total funds: $19.6 million.

OHA appreciates our many partners – from tribal nations to CCOs to local health officials and community-based non-profit partners – who share our commitment to eliminating health inequity in Oregon. We depend on their input, collaboration, innovation and inspiration to improve the health and well-being of every Oregonian and to aid us in dismantling systemic barriers to equitable, affordable and accessible health care in our state.

Sincerely,

Patrick M. Allen

Director

Enrolled
House Bill 2377

Sponsored by Representative SMITH DB, Senator ROBLAN, Representative MCKEOWN; Representative LEIF, Senator HEARD (Presession filed.)

CHAPTER .....

AN ACT

Relating to state financial administration; creating new provisions; amending ORS 3.012, 21.007, 171.072, 180.095, 180.160, 291.278, 292.406, 292.411, 292.416, 292.426 and 475B.759; repealing ORS 9.577 and section 5, chapter 775, Oregon Laws 2009, and section 3, chapter 81, Oregon Laws 2018; and declaring an emergency.

Be It Enacted by the People of the State of Oregon:

TRANSFERS FOR GENERAL GOVERNMENTAL PURPOSES

SECTION 1. Notwithstanding ORS 30.282, 30.285, 278.425, 655.515 and 655.540, the amount of $10,000,000 is transferred from the Insurance Fund to the General Fund for general governmental purposes. The transfer shall be made on May 31, 2021.

SECTION 2. Notwithstanding ORS 283.076, the amount of $50,900,000 is transferred from the Oregon Department of Administrative Services Operating Fund to the General Fund for general governmental purposes. The transfer shall be made on May 31, 2021.

SECTION 3. Notwithstanding ORS 276A.209, the amount of $26,500,000 is transferred from the State Information Technology Operating Fund to the General Fund for general governmental purposes. The transfer shall be made on May 31, 2021.

SECTION 4. Notwithstanding ORS 180.095, the amount of $46,000,000 is transferred from the Department of Justice Protection and Education Revolving Account to the General Fund for general governmental purposes. The transfer shall be made on May 31, 2021.

SECTION 5. Notwithstanding ORS 741.102, the amount of $3,800,000 is transferred from the Health Insurance Exchange Fund to the General Fund for general governmental purposes. The transfer shall be made on May 31, 2021.

SECTION 6. Notwithstanding ORS 677.290, the amount of $5,000,000 is transferred from the Oregon Medical Board Account to the General Fund for general government purposes. The transfer shall be made on May 31, 2021.

SECTION 7. Notwithstanding ORS 243.167, the amount of $15,000,000 is transferred from the Public Employees' Revolving Fund to the General Fund for general governmental purposes. The transfer shall be made on May 31, 2021.

SECTION 8. Notwithstanding ORS 274.064, the amount of $3,000,000 is transferred from the Portland Harbor Cleanup Fund to the General Fund for general governmental purposes. The transfer shall be made on May 31, 2021.

MARIJUANA REVENUE DISTRIBUTION

SECTION 9. Section 3, chapter 81, Oregon Laws 2018, is repealed.

SECTION 10. ORS 475B.759, as amended by sections 1 and 2, chapter 81, Oregon Laws 2018, is amended to read:

475B.759. (1) There is established the Oregon Marijuana Account, separate and distinct from the General Fund.

(2) The account shall consist of moneys transferred to the account under ORS 475B.760.

(3)(a) The Department of Revenue shall certify quarterly the amount of moneys available in the Oregon Marijuana Account.

(b) Subject to subsection (4) of this section, the department shall transfer quarterly 20 percent of the moneys in the Oregon Marijuana Account as follows:

(A) Ten percent of the moneys in the account must be transferred to the cities of this state in the following shares:

(i) Seventy-five percent of the 10 percent must be transferred in shares that reflect the population of each city of this state that is not exempt from this paragraph pursuant to subsection (4)(a) of this section compared to the population of all cities of this state that are not exempt from this paragraph pursuant to subsection (4)(a) of this section, as determined by Portland State University under ORS 190.510 to 190.610, on the date immediately preceding the date of the transfer; and

(ii) Twenty-five percent of the 10 percent must be transferred in shares that reflect the number of licenses held pursuant to ORS 475B.070, 475B.090, 475B.100 and 475B.105 on the last business day of the calendar quarter preceding the date of the transfer for premises located in each city compared to the number of licenses held pursuant to ORS 475B.070, 475B.090, 475B.100 and 475B.105 on the last business day of that calendar quarter for all premises in this state located in cities; and

(B) Ten percent of the moneys in the account must be transferred to counties in the following shares:

(i) Fifty percent of the 10 percent must be transferred in shares that reflect the total commercially available area of all grow canopies associated with marijuana producer licenses held pursuant to ORS 475B.070 on the last business day of the calendar quarter preceding the date of the transfer for all premises located in each county compared to the total commercially available area of all grow canopies associated with marijuana producer licenses held pursuant to ORS 475B.070 on the last business day of that calendar quarter for all premises located in this state; and

(ii) Fifty percent of the 10 percent must be transferred in shares that reflect the number of licenses held pursuant to ORS 475B.090, 475B.100 and 475B.105 on the last business day of the calendar quarter preceding the date of the transfer for premises located in each county compared to the number of licenses held pursuant to ORS 475B.090, 475B.100 and 475B.105 on the last business day of that calendar quarter for all premises in this state.

(c) Eighty percent of the moneys in the Oregon Marijuana Account must be used as follows:

(A) Forty percent of the moneys in the account must be used solely for purposes for which moneys in the State School Fund established under ORS 327.008 may be used;

(B) Twenty percent of the moneys in the account must be used solely for [*purposes for which moneys in the Mental Health Alcoholism and Drug Services Account established under ORS 430.380 may be used*] **mental health treatment or for alcohol and drug abuse prevention, early intervention and treatment**;

(C) Fifteen percent of the moneys in the account must be used solely for purposes for which moneys in the State Police Account established under ORS 181A.020 may be used; and

(D) Five percent of the moneys in the account must be used solely for purposes related to alcohol and drug abuse prevention, early intervention and treatment services.

(4)(a) A city that has an ordinance prohibiting the establishment of a premises for which issuance of a license under ORS 475B.070, 475B.090, 475B.100 or 475B.105 is required is not eligible to receive transfers of moneys under subsection (3)(b)(A) of this section.

(b) A county that has an ordinance prohibiting the establishment of a premises for which issuance of a license under ORS 475B.070 is required is not eligible to receive transfers of moneys under subsection (3)(b)(B)(i) of this section.

(c) A county that has an ordinance prohibiting the establishment of a premises for which issuance of a license under ORS 475B.090, 475B.100 or 475B.105 is required is not eligible to receive transfers of moneys under subsection (3)(b)(B)(ii) of this section.

(5) In a form and manner prescribed by the Oregon Liquor Control Commission, each city and county in this state shall certify with the commission whether the city or county has an ordinance prohibiting the establishment of a premises for which issuance of a license under ORS 475B.070, 475B.090, 475B.100 or 475B.105 is required. If a city fails to comply with this subsection, the city is not eligible to receive transfers of moneys under subsection (3)(b)(A) of this section. If a county fails to comply with this subsection, the county is not eligible to receive transfers of moneys under subsection (3)(b)(B) of this section.

HOUSING AND COMMUNITY SERVICES

SECTION 11. ORS 21.007 is amended to read:

21.007. It is the intent of the Legislative Assembly that funding be provided to the following entities by appropriations each biennium to fund programs, services and activities that were funded through court fees before the 2011-2013 biennium:

(1) To the counties of this state for the purposes of funding mediation services, conciliation services and other services in domestic relations cases.

(2) To the counties of this state for the purposes of funding the operation of law libraries or of providing law library services.

(3) To Portland State University and the University of Oregon to fund the programs and expenses of the Mark O. Hatfield School of Government and the University of Oregon School of Law under ORS 36.100 to 36.238 and 183.502.

[*(4) To the Housing and Community Services Department for the purpose of funding programs that defray the cost of rent for dwelling units for very low income households.*]

[*(5)*] **(4)** To the Higher Education Coordinating Commission to fund clinical legal education programs at accredited institutions of higher education that provide civil legal services to victims of domestic violence, stalking or sexual assault.

[*(6)*] **(5)** To the State Department of Agriculture for the purpose of funding mediation programs established by the department, other than individual farm credit mediations.

[*(7)*] **(6)** To the Judicial Department for the purposes of funding the appellate settlement program established under ORS 2.560.

[*(8)*] **(7)** To the Department of Human Services for the funding of the Office of Children's Advocate.

TRUST FOR CULTURAL DEVELOPMENT ACCOUNT

SECTION 12. Section 5, chapter 775, Oregon Laws 2009, is repealed.

LEGAL AID ACCOUNT

SECTION 13. ORS 9.577 is repealed.

SECTION 14. (1) The Legal Aid Account established under ORS 9.577 is abolished on the effective date of this 2019 Act.

(2) Any moneys remaining in the account specified in subsection (1) of this section on the effective date of this 2019 Act shall be transferred, on the effective date of this 2019 Act, to the General Fund for general governmental purposes.

SECTION 15. ORS 292.406, as amended by section 19, chapter 98, Oregon Laws 2018, is amended to read:

292.406. (1)(a) The annual salary of the Chief Judge of the Court of Appeals shall be [*$147,560*] **$154,040** for the period beginning on January 1, [*2017*] **2019**, and ending on June 30, [*2018*] **2020**.

(b) On July 1, [*2018*] **2020**, the annual salary of the Chief Judge of the Court of Appeals, as adjusted under ORS 292.428, shall be increased by $5,000.

(2)(a) The annual salary of each other judge of the Court of Appeals shall be [*$144,536*] **$150,980** for the period beginning on January 1, [*2017*] **2019**, and ending on June 30, [*2018*] **2020**.

(b) On July 1, [*2018*] **2020**, the annual salary of each other judge of the Court of Appeals, as adjusted under ORS 292.428, shall be increased by $5,000.

SECTION 16. ORS 292.411, as amended by section 20, chapter 98, Oregon Laws 2018, is amended to read:

292.411. (1)(a) The annual salary of the Chief Justice of the Supreme Court shall be [*$150,572*] **$157,076** for the period beginning on January 1, [*2017*] **2019**, and ending on June 30, [*2018*] **2020**.

(b) On July 1, [*2018*] **2020**, the annual salary of the Chief Justice of the Supreme Court, as adjusted under ORS 292.428, shall be increased by $5,000.

(2)(a) The annual salary of each other judge of the Supreme Court shall be [*$147,560*] **$154,040** for the period beginning on January 1, [*2017*] **2019**, and ending on June 30, [*2018*] **2020**.

(b) On July 1, [*2018*] **2020**, the annual salary of each other judge of the Supreme Court, as adjusted under ORS 292.428, shall be increased by $5,000.

SECTION 17. ORS 292.416, as amended by section 21, chapter 98, Oregon Laws 2018, is amended to read:

292.416. (1) The annual salary of each judge of a circuit court shall be [*$135,776*] **$142,136** for the period beginning on January 1, [*2017*] **2019**, and ending on June 30, [*2018*] **2020**.

(2) On July 1, [*2018*] **2020**, the annual salary of each judge of a circuit court, as adjusted under ORS 292.428, shall be increased by $5,000.

SECTION 18. ORS 292.426, as amended by section 22, chapter 98, Oregon Laws 2018, is amended to read:

292.426. (1) The annual salary of the judge of the Oregon Tax Court shall be [*$139,652*] **$146,048** for the period beginning on January 1, [*2017*] **2019**, and ending on June 30, [*2018*] **2020**.

(2) On July 1, [*2018*] **2020**, the annual salary of the judge of the Oregon Tax Court, as adjusted under ORS 292.428, shall be increased by $5,000.

SECTION 18a. ORS 3.012, as amended by section 1, chapter 631, Oregon Laws 2017, is amended to read:

3.012. (1) The judicial districts, the counties constituting the judicial districts and the number of circuit court judges for each judicial district are as follows:

(a) The first judicial district consists of Jackson County and has [*nine*] **10** judges.

(b) The second judicial district consists of Lane County and has 15 judges.

(c) The third judicial district consists of Marion County and has [*14*] **15** judges.

(d) The fourth judicial district consists of Multnomah County and has 38 judges.

(e) The fifth judicial district consists of Clackamas County and has 11 judges.

(f) The sixth judicial district consists of the counties of Morrow and Umatilla and has five judges.

(g) The seventh judicial district consists of the counties of Gilliam, Hood River, Sherman, Wasco and Wheeler and has four judges.

(h) The eighth judicial district consists of Baker County and has one judge.

(i) The ninth judicial district consists of Malheur County and has two judges.

(j) The tenth judicial district consists of the counties of Union and Wallowa and has two judges.

(k) The eleventh judicial district consists of Deschutes County and has seven judges.

(L) The twelfth judicial district consists of Polk County and has three judges.

(m) The thirteenth judicial district consists of Klamath County and has five judges.

(n) The fourteenth judicial district consists of Josephine County and has five judges.

(o) The fifteenth judicial district consists of the counties of Coos and Curry and has six judges.

(p) The sixteenth judicial district consists of Douglas County and has five judges.

(q) The seventeenth judicial district consists of Lincoln County and has three judges.

(r) The eighteenth judicial district consists of Clatsop County and has three judges.

(s) The nineteenth judicial district consists of Columbia County and has three judges.

(t) The twentieth judicial district consists of Washington County and has 15 judges.

(u) The twenty-first judicial district consists of Benton County and has three judges.

(v) The twenty-second judicial district consists of the counties of Crook and Jefferson and has three judges.

(w) The twenty-third judicial district consists of Linn County and has five judges.

(x) The twenty-fourth judicial district consists of the counties of Grant and Harney and has one judge.

(y) The twenty-fifth judicial district consists of Yamhill County and has four judges.

(z) The twenty-sixth judicial district consists of Lake County and has one judge.

(aa) The twenty-seventh judicial district consists of Tillamook County and has two judges.

(2) The Secretary of State shall designate position numbers equal to the number of judges in each of the judicial districts established by this section. The positions shall reflect any qualifications established by ORS 3.041.

LEGISLATIVE BRANCH

SECTION 19. ORS 171.072, as amended by section 1, chapter 578, Oregon Laws 2013, and section 17, chapter 98, Oregon Laws 2018, is amended to read:

171.072. (1) A member of the Legislative Assembly shall receive for services an annual salary that equals [*the greater of:*]

[*(a)*] one step below the maximum step of Salary Range 1 in the Management Service Compensation Plan in the executive department as defined in ORS 174.112[*; or*]

[*(b) Seventeen percent of the salary of a circuit court judge*].

(2) The President of the Senate and the Speaker of the House of Representatives each shall receive for services, as additional salary, an amount equal to the salary allowed each of them as a member under subsection (1) of this section.

(3) A member of the Legislative Assembly shall receive, as an allowance for expenses not otherwise provided for, a per diem determined as provided in subsection (9) of this section for each day within the period that the Legislative Assembly is in session, to be paid with the salary provided for in subsection (1) of this section. Pursuant to procedures determined by the Legislative Administration Committee, a member may draw from an accrued allowance.

(4) A member of the Legislative Assembly shall receive, as an allowance for expenses incurred in the performance of official duties during periods when the legislature is not in session, $400 for each calendar month or part of a calendar month during those periods, to be paid monthly, and subject to approval of the President of the Senate or Speaker of the House of Representatives, mileage expenses and a per diem determined as provided in subsection (9) of this section for each day a member is engaged in the business of legislative interim and statutory committees, including advisory committees and subcommittees of advisory committees, and task forces and for each day a member serves on interstate bodies, advisory committees and other entities on which the member serves ex officio, whether or not the entity is a legislative one.

(5) In addition to the mileage and per diem expense payments provided by this section, a member of the Legislative Assembly may receive reimbursement for actual and necessary expenses, subject to approval by the President of the Senate or Speaker of the House of Representatives, for legislative business outside of the state.

(6) The President of the Senate and the Speaker of the House of Representatives may delegate to the chairpersons of interim and statutory committees and task forces the approval authority granted to the President and the Speaker by subsection (4) of this section, with respect to expenses incurred in attending any meeting of a particular committee or task force.

(7) Amounts received under subsections (3) to (5) of this section are excluded from gross income and expenditures of the amounts are excluded in computing deductions for purposes of ORS chapter 316. If there is attached to the personal income return a schedule of all ordinary and necessary business expenses paid during the tax year as a member of the Legislative Assembly, a deduction may be claimed on the return for legislative expenses paid in excess of the amounts received under subsections (3) to (5) of this section. Expenses of members of the Legislative Assembly who are reimbursed by the state for actual expenses for meals and lodging associated with state travel for the same period during which a legislator receives per diem are subject to state income tax.

(8) For periods when the Legislative Assembly is not in session, [*the Legislative Administration Committee shall provide for a telephone and*] **a member of the Legislative Assembly shall receive** an expense allowance [*for members of the Legislative Assembly*] that is in addition to the amount allowed under subsection (4) of this section. [*In determining the amount of allowance for members, the committee shall consider the geographic area of the member's district. The additional allowance shall*] **The amount allocated to a member under this subsection must be adjusted based on the geographic area of the member's district to** reflect travel expenses necessary to communicate in [*districts of varying sizes*] **the district**.

(9) The per diem allowance referred to in subsections (3) and (4) of this section shall be the amount fixed for per diem allowance that is authorized by the United States Internal Revenue Service to be excluded from gross income without itemization.

SECTION 20. ORS 291.278 is amended to read:

291.278. (1) Upon completion of the determination by the Oregon Department of Administrative Services under ORS 291.274 and 291.276, the department shall:

(a) Transfer to the Legislative Fiscal Office Operating Fund, with appropriate notice to the State Treasurer, out of moneys appropriated to each state agency, the amount of [*$4 million*] **$4,500,000**; and

(b) After deducting the amounts specified in paragraph (a) of this subsection, transfer to the General Fund, with appropriate notice to the State Treasurer, out of moneys appropriated to each state agency, the amount of governmental service expenses certified for the agency.

(2) In the case of a state agency that collects or receives moneys for fees, fines, licenses or taxes not by law made a part of the General Fund available for general governmental purposes, if moneys available to such state agency are not sufficient to permit the transfers under subsection (1) of this section, the department shall notify the state agency of the amount certified with respect to the state agency under ORS 291.274 and 291.276, less any amount transferred out of moneys appropriated to such state agency under subsection (1) of this section. Thereafter, until such balance has been paid into the General Fund, 10 percent of all moneys collected or received by the state agency for fees, fines, licenses or taxes not by law made a part of the General Fund available for general governmental purposes shall be:

(a) Transferred by the department to and made a part of the General Fund available for general governmental purposes if such moneys are paid to the State Treasurer by the state agency; or

(b) Paid to the State Treasurer by the state agency receiving such moneys at the time when they are received by the state agency if such moneys are authorized by law to be kept and disbursed other than by and through the State Treasurer, and be credited by the State Treasurer to and made a part of the General Fund available for general governmental purposes.

(3) The transfers and payments to the Legislative Fiscal Office Operating Fund and the General Fund required by this section shall be made notwithstanding any law that appropriates such moneys or any of them to any other purposes, and such portion so paid and transferred is not subject to any special uses thereby provided.

ECONOMIC DEVELOPMENT

SECTION 21. The University Innovation Research Fund is established in the State Treasury, separate and distinct from the General Fund. Interest earned by the University Innovation Research Fund must be credited to the fund. The fund consists of all moneys appropriated, allocated, deposited or transferred to the fund by the Legislative Assembly or otherwise and any donations or grants received for the purpose of the fund. Moneys in the fund are continuously appropriated to the Oregon Business Development Department to make grants to public universities listed in ORS 352.002 or grants to the Oregon Health and Science University for the purpose of matching competitive federal research grant awards.

DEPARTMENT OF JUSTICE

SECTION 22. ORS 180.160 is amended to read:

180.160. **(1)** Subject to rules prescribed by the Attorney General, in rendering assistance to the respective officers, departments, boards and commissions of state government, and other public bodies, the Department of Justice may charge such officers, agencies and public bodies (including, when appropriate, the Department of Justice itself) separately for the cost of such assistance, said cost including, but not limited to salaries of assistants and administrative and clerical salaries, investigative services, and capital outlay; and shall also charge such officers, departments, boards, commissions or public bodies for other costs incurred and disbursements made pursuant to request or authorization in connection with such assistance, and not paid directly out of moneys appropriated or otherwise available for expenditure by such officers, agencies or public bodies.

(2) The Department of Justice may not impose charges under subsection (1) of this section at rates greater than the rates established for the biennium through the legislative budgeting process in the preceding odd-numbered year regular session of the Legislative Assembly unless the department first notifies the Joint Committee on Ways and Means, the Joint Interim Committee on Ways and Means or the Emergency Board.

SECTION 23. ORS 180.095 is amended to read:

180.095. (1) The Department of Justice Protection and Education Revolving Account is created in the General Fund. All moneys in the account are continuously appropriated to the Department of Justice and may be used to pay for only the following activities:

(a) Restitution and refunds in proceedings described in paragraph (c) of this subsection;

(b) Consumer and business education relating to the laws governing antitrust, unlawful trade practices and the environment; and

(c) Personal services, travel, meals, lodging and all other costs and expenses incurred by the department in investigating, preparing, commencing and prosecuting the following actions and suits, and enforcing judgments, settlements, compromises and assurances of voluntary compliance arising out of the following actions and suits:

(A) Actions and suits under the state and federal antitrust laws;

(B) Actions and suits under ORS 336.184 and 646.605 to 646.656;

(C) Criminal prosecutions under state and federal environmental laws;

(D) Actions commenced under ORS 59.331; and

(E) Actions and suits under ORS 180.750 to 180.785.

(2) Moneys in the Department of Justice Protection and Education Revolving Account are not subject to allotment. Upon request of the Attorney General, the State Treasurer shall create subaccounts within the account for the purposes of managing moneys in the account and allocating those moneys to the activities described in subsection (1) of this section.

(3) Except as otherwise provided by law, all sums of money received by the Department of Justice under a judgment, settlement, compromise or assurance of voluntary compliance, including damages, restitution, refunds, attorney fees, costs, disbursements and other recoveries, but excluding civil penalties under ORS 646.642, in proceedings described in subsection (1)(c) of this section shall,

upon receipt, be deposited with the State Treasurer to the credit of the Department of Justice Protection and Education Revolving Account. However, if the action or suit was based on an expenditure or loss from a public body or a dedicated fund, the amount of such expenditure or loss, after deduction of attorney fees and expenses awarded to the department by the court or agreed to by the parties, if any, shall be credited to the public body or dedicated fund and the remainder thereof credited to the Department of Justice Protection and Education Revolving Account.

(4) If the Department of Justice recovers restitution or refunds in a proceeding described in subsection (1)(c) of this section, and the department cannot determine the persons to whom the restitution or refunds should be paid or the amount of the restitution or refund payable to individual claimants is de minimis, the restitution or refunds may not be deposited in the Department of Justice Protection and Education Revolving Account and shall be deposited in the General Fund.

(5) Before April 1 of each odd-numbered year, the Department of Justice shall report to the Joint Committee on Ways and Means:

(a) The department's projection of the balance in the Department of Justice Protection and Education Revolving Account at the end of the biennium in which the report is made and at the end of the following biennium;

(b) The amount of the balance held for restitution and refunds; and

(c) An estimate of the department's anticipated costs and expenses under subsection (1)(b) and (c) of this section for the biennium in which the report is made and for the following biennium.

(d) Any judgment, settlement, compromise or other recovery, the proceeds of which are used for purposes other than:

(A) For deposit into the Department of Justice Protection and Education Revolving Account; or

(B) For payment of legal costs related to the judgment, settlement, compromise or other recovery.

(6) The Joint Committee on Ways and Means, after consideration of recommendations made by the Department of Justice, shall use the information reported under subsection (5) of this section to determine an appropriate balance for the revolving account.

TRANSPORTATION

SECTION 24. Notwithstanding ORS 184.751, the Department of Transportation shall transfer the amount of $10,100,000 from the Statewide Transportation Improvement Fund established under ORS 184.751 to the Elderly and Disabled Special Transportation Fund established under ORS 391.800, to be used for the purposes of distribution to transit entities to support elderly and disabled transit services. The transfer shall be made on July 1, 2019.

CAPTIONS

SECTION 25. The unit captions used in this 2019 Act are provided only for the convenience of the reader and do not become part of the statutory law of this state or express any legislative intent in the enactment of this 2019 Act.

EMERGENCY CLAUSE

SECTION 26. This 2019 Act being necessary for the immediate preservation of the public peace, health and safety, an emergency is declared to exist, and this 2019 Act takes effect on its passage.

Summary of Revenue Changes

House Bill 3165 appropriates $950,000 General Fund to the Oregon Health Authority (OHA) for the 2019-21 biennium to award planning grants to 10 school districts or education service districts.

Summary of Human Services Subcommittee Action

House Bill 3165 directs OHA, in consultation with the Oregon Department of Education, to select 10 school districts or education service districts to receive planning grants for district planning and technical assistance in evaluating the need and developing a plan for school-based health services, which must include an alternative model to the school-based health center model. The alternative approach should focus on services for a specific community need, such as mental health services, school nursing services, dental services, primary care or trauma-informed services, and must involve a partnership with a coordinated care organization, a federally qualified health center, a local public health authority, or another major medical sponsor. The alternative approach must also identify a process for billing insurance, medical assistance, or another third-party payer, or identify other funding for the cost for services.

The bill appropriates $950,000 General Fund to the OHA Public Health Division for the 2019-21 biennium to fund 10 planning grants at $95,000 each.

Summary of Revenue Changes

The General Fund appropriations made in the bill are within resources available as projected in the May 2019 economic and revenue forecast by the Department of Administrative Services (DAS), Office of Economic Analysis, supplemented by transfers from various agency accounts to the General Fund for general governmental purposes as authorized in HB 2377, plus other actions to reduce state agency expenditures.

Summary of Capital Construction Subcommittee Action

HB 5050 appropriates General Fund to the Emergency Board for general purpose and targeted special purpose appropriations and makes other adjustments to individual agency budgets and position authority as described below.

Emergency Board

The Emergency Board allocates General Fund and provides Lottery Funds, Other Funds, and Federal Funds expenditure limitation to state agencies for unanticipated needs in approved agency budgets when the Legislature is not in session. The Subcommittee appropriated $75 million General Fund to the Emergency Board for general purposes.

HB 5050 makes seven special purpose appropriations to the Emergency Board, totaling $250.8 million General Fund. Agencies must make a request to the Emergency Board to access these funds. The seven special purpose appropriations are:

- $200 million General Fund for state employee compensation changes.
- $20 million General Fund for allocation to state agencies for compensation changes driven by collective bargaining for workers who are not state employees.

- $5.7 million General Fund for allocation to the Oregon Health Authority to support interdisciplinary assessment teams to provide consultation, evaluation, and stabilization services to youth with behavioral health needs. This appropriation reflects one of the recommendations of the Children and Youth with Specialized Needs Workgroup and is consistent with SB 1 (2019), which provides the framework for establishing these teams.
- $20 million General Fund for allocation to the Public Defense Services Commission for activities designed to improve indigent defense caseloads and to implement an improved public defense contract model.
- $1 million General Fund for allocation to the Public Defense Services Commission and the Department of Corrections or both, for costs relating to prosecutions for the unauthorized use of a vehicle per HB 2328 (2019).
- $1,146,094 General Fund for allocation to the Secretary of State for costs relating to the implementation prepaid postage on ballot return envelopes per SB 861 (2019).
- $3 million General Fund for the implementation of grand jury recordation and SB 505 (2017).

With the beginning of the statewide roll-out of grand jury recordation, questions have arisen regarding how grand jury recordation can be delivered in the most efficient, consistent, and economical method across the state given the Legislature's funding of similar recordation services for circuit courts. To this end, the Subcommittee approved the following budget note.

Budget Note

The Judicial Department, District Attorneys, and the Association of Oregon Counties are to report to the Interim Joint Committee on Ways and Means in January of 2020 with a joint plan that provides for the most efficient, consistent, and cost effective delivery of grand jury recordation across the state, including, but not limited to, the assignment by entity of responsibility for: (a) non-attorney staff to manage recording equipment and train grand jurors on the use of recording equipment; (b) non-attorney staff to review and redact grand jury recordings; (c) production of grand jury transcripts; and (d) information technology costs for the day-to-day upkeep of the recording devices and the storage or archiving of recordings.

If these special purpose appropriations are not allocated by the Emergency Board before December 1, 2020, any remaining funds become available to the Emergency Board for general purposes.

The Subcommittee established a reservation within the general purpose Emergency Fund of $10 million for the Department of Human Services for the Child Welfare program as the agency continues to implement its action plan to improve child safety, stabilize the workforce, and help foster families. The Department may request allocation of the reservation from the Emergency Board for efforts or initiatives not covered within the existing budget upon evidence that the additional funding will result in demonstrative improvements in Oregon's child welfare system.

A second reservation was established within the general purpose Emergency Fund of $9 million for the Oregon Health Authority for the purpose of supporting community mental health programs. The Oregon Health Authority may request allocation of the reservation from the Emergency Board if any or all of these funds are deemed necessary to maintain the 2017-19 level of on-going community mental health program services funded by the agency.

Adjustments to Approved 2019-21 Agency Budgets

STATEWIDE ADJUSTMENTS

Statewide adjustments reflect budget changes in multiple agencies based on reductions in Department of Administrative Services' assessments and charges for services, Attorney General rates, Secretary of State assessments, and Parks assessments. Statewide adjustments also reflect net reductions to debt service realized through interest rate savings on bond sales, and Other Funds balances and interest earnings that can be applied to debt service. Total savings are $66.2 million General Fund, $13.7 million Lottery Funds, $34 million Other Funds, and $11 million Federal Funds.

Specific reductions include $37.1 million total funds from lower Department of Administrative Services assessments and service rates; $31.1 million total funds from PERS rate updates; $39.8 million total funds from debt service interest rate savings and refunding of outstanding bonds; $8.1 million total funds from lower Attorney General rates; and $2.6 million total funds from lower Secretary of State and Parks assessments.

Section 161 of the budget bill reflects the changes, as described above, for each agency. These adjustments are included in the table at the beginning of the budget report but are not addressed in the individual agency narratives. Additionally, new Other Funds debt service expenditure limitations for multiple agencies are established to accommodate the use of fund balances for debt repayment.

ADMINISTRATION

Department of Administrative Services

The Subcommittee approved various one-time General Fund appropriations to the Department of Administrative Services for the following purposes:

- $7,500,000 for disbursement to the United Way for census outreach and coordination activities
- $2,000,000 for disbursement to Clatsop County for the Clatsop County Jail
- $2,000,000 for disbursement to Innovation Law Lab for Immigration Defense
- $1,500,000 for disbursement to Josephine County for rural fire protection district start-up costs once the district is created
- $1,000,000 for disbursement to City of Salem for the Gerry Frank/Salem Rotary Amphitheater
- $1,000,000 for disbursement to Umatilla-Morrow Head Start for an Early Learning Center
- $1,000,000 for disbursement to Umatilla County for surface water pumping costs of groundwater rights holders in Critical Groundwater areas
- $700,000 for disbursement to Central Linn School District for the 6th-8th grade Cobra Academy
- $500,000 for disbursement to Siuslaw Regional Aquatics Center for renovations of the Mapleton Pool
- $500,000 for disbursement to Tucker Maxon School for capital improvements
- $500,000 for disbursement to Association of Oregon Counties for urban growth boundary planning grants to Eastern Oregon Counties
- $500,000 for disbursement to Oregon Thoroughbred Owners and Breeders Association for safety improvements at race tracks holding race meets and education for thoroughbred owners and breeders
- $500,000 for disbursement to Lutheran Community Services Northwest for drug abuse programs
- $500,000 for disbursement to Special Olympics Oregon for sports training and athletic competition
- $485,000 for disbursement to Clackamas County for Clackamas Women's Services
- $452,930 for disbursement to Douglas Timber Operators for a Rogue River Sediment Study
- $400,000 for disbursement to Historic Portland Public Market Foundation for the James Beard Public Market
- $300,000 for disbursement to City of Independence for a Mid-Willamette Valley Trolley
- $300,000 for disbursement to Ecumenical Ministries of Oregon for its runaway homeless youth program
- $250,000 for disbursement to Liberty House of Salem for childhood abuse assessment and support services
- $175,000 for disbursement to Harney County School District #1J to drill a potable water well
- $100,000 for disbursement to Save the Salem Peace Mosaic to protect the River of Peace mosaic
- $30,000 for disbursement to Klamath County to acquire, install, and maintain stream gauges in the Klamath Basin

The Subcommittee added $61,331,872 Other Funds expenditure limitation for one-time costs of special payments associated with the disbursement of proceeds from 2019-21 Lottery Bond sales; projects are detailed below and approved in HB 5030. Cost of issuance for these projects totals $1,247,463. There is no debt service allocated in the 2019-21 biennium, as the bonds will not be sold until the spring of 2021. Debt service payments on all the projects described below are estimated to be $10,581,755 Lottery Funds for the 2021-23 biennium and $105,334,738 over the life of the bonds.

- $15,000,000 Other Funds for disbursement to Eugene Family YMCA Facility
- $10,000,000 Other Funds for disbursement to City of Roseburg - Southern Oregon Medical Workforce Center

- $5,000,000 Other Funds for disbursement to Oregon Coast Aquarium
- $5,000,000 Other Funds for disbursement to YMCA of Columbia-Willamette to purchase the Beaverton Hoop YMCA
- $4,100,000 Other Funds for disbursement to Jefferson County - Health and Wellness Center
- $3,500,000 Other Funds for disbursement to Parrott Creek Child & Family Services - Building Renovation
- $2,500,000 Other Funds for disbursement to Center for Hope and Safety - Hope Plaza
- $2,500,000 Other Funds for disbursement to Wallowa Valley Center for Wellness
- $2,400,000 Other Funds for disbursement to Port of Cascade Locks - Business Park Expansion
- $2,311,872 Other Funds for disbursement to Multnomah County School District #7 - Reynolds High School Health Center
- $2,000,000 Other Funds for disbursement to City of Gresham - Gradin Community Sports Park
- $2,000,000 Other Funds for disbursement to Curry Health District - Brookings Emergency Room
- $2,000,000 Other Funds for disbursement to Hacienda Community Development Corporation - Las Adelitas Housing Project
- $1,600,000 Other Funds for disbursement to Umatilla County Jail - Expansion/Mental Health Facility
- $1,400,000 Other Funds for disbursement to Port of Morrow - Early Learning Center Expansion

The Subcommittee approved an increase of $27,405,993 Other Funds expenditure limitation for special payments associated with the disbursement of proceeds from Lottery Bonds issued in previous biennia that have yet to be fully disbursed to grantees.

The Subcommittee added $10,525,000 Other Funds expenditure limitation for one-time special payments associated with the disbursement of proceeds from Article XI-Q general obligation bond sales; projects are detailed below and approved in HB 5005. Cost of issuance for these projects totals $199,075. There is no debt service allocated in the 2019-21 biennium, as the bonds will not be sold until the spring of 2021. Total debt service on the projects described below is estimated at $2,257,480 General Fund for the 2021-23 biennium and $15,834,095 General Fund over the life of the bonds.

- $5,325,925 Other Funds for disbursement to the Oregon State Fair for facilities capital improvements
- $3,000,000 Other Funds for disbursement to the Oregon State Fair for improvements to and repairs of the Horse Barn
- $2,000,000 Other Funds for disbursement to the Oregon State Fair for improvements to and repairs of the Poultry Barn

The Subcommittee approved $4,527,721 in additional Other Funds Debt Service to support repayment of Article XI-Q General Obligation bond proceeds approved in HB 5005 that will be issued before the end of the biennium to support DAS projects, and an Other Funds expenditure limitation increase of $800,000 was included for the cost of issuance of the bonds.

One-time General Fund increases to on-going operating subsidies for the Oregon Historical Society ($1,250,000) and Oregon Public Broadcasting ($500,000) were also approved.

The Subcommittee approved a technical adjustment for the Public Records Advocate Office which increased Personal Services by $113,406 and reduced Services and Supplies in the Department of Administrative Services Chief Operating Office not related to the Public Records Advocate Office by a like amount, for a net zero change. Two limited duration full-time positions (2.00 FTE) were approved (an Operations & Policy Analyst 4 and a State Procurement Analyst) to backfill DAS employees who will be working with the Public Employee Retirement System (PERS) on information technology solutions needed to implement SB 1049, which made significant changes to public employees' retirement. The cost of the DAS positions dedicated full-time to the PERS project to implement SB 1049 will be paid by PERS.

Office of the Governor

A General Fund appropriation of $250,000 was approved for the Office of the Governor to provide administrative support for the Council on Wildfire Response established by executive order number 19-01. The Council was created to review Oregon's current model for wildfire prevention, preparedness, and response and provide recommendations to strengthen, improve, or replace the existing model. The recommendations of the council will be presented to the Governor no later than September 30, 2019.

Oregon Liquor Control Commission

Other Funds expenditure limitation in the amount of $233,400 is included for the Oregon Liquor Control Commission to support a permanent, full-time internal auditor position. The position will help to evaluate and improve internal processes with the goal of increasing productivity and minimizing risk throughout the agency's various divisions.

Secretary of State

To address the costs of implementing HB 2983 relating to campaign finance, the Subcommittee appropriated $336,696 General Fund to the Secretary of State's Elections Division and authorized the establishment of two new limited duration Compliance Specialist 2 positions (1.75 FTE). These positions will be used to manually accept, review, and maintain lists of filings; answer questions; conduct investigations; oversee civil penalties and case hearings; and fulfill public records requests. Over time, some of these manual processes will be able to be moved online reducing personal services costs, but potentially incurring one-time information technology expenditures. The agency can report back to the Legislature during the 2020 legislative session on progress in implementing HB 2983.

CONSUMER AND BUSINESS SERVICES

Department of Consumer and Business Services

An increase in Other Funds expenditure limitation of $262,610 and the authorization to establish a permanent full-time position (1.00 FTE) in the Division of Financial Regulation, working on the Senior Health Insurance Benefit program, was approved by the Subcommittee. The position is being restored from a reduction taken in the agency's 2019 budget bill.

The Subcommittee approved an increase in the Federal Funds expenditure limitation to the Department of Consumer and Business Services of $780,000 to allow the agency to expend federal grant funds awarded but not fully expended during the 2017-19 biennium from the Centers for Medicare and Medicaid Services for the planning and implementing of certain insurance market reforms under Title 27 of the Public Health Service Act.

ECONOMIC AND COMMUNITY DEVELOPMENT

Oregon Business Development Department

The Subcommittee approved a one-time General Fund appropriation of $10,000,000 for the Oregon Business Development Department (OBDD) to deposit in the University Innovation Research Fund (UIRF) established in HB 2377. Other Funds limitation of $10,000,000 was also established to accommodate distribution of monies from the UIRF. The UIRF will support grants to public universities and the Oregon Health and Science University to match competitive federal research awards, increasing the competitiveness of Oregon universities for federal research funds, leveraging federal grants that require matching funds, and supporting innovation and research capacity. Grants will be targeted in priority industries, such as advanced manufacturing, high technology, outdoor gear and apparel, health care innovation, food and beverage, and forestry and wood products.

Lottery Funds expenditure limitation for the Strategic Reserve Fund (SRF) was increased by $2,000,000, bringing total ongoing Lottery Funds support for SRF to $8,978,100, not including limitation of $3,718,693 that was provided to expend the program's estimated beginning balance of committed project awards. The Subcommittee also increased Lottery Funds expenditure limitation by $5,000,000 for the Oregon Manufacturing and Innovation Center (OMIC) operating and research expenses, bringing total Lottery Funds support for OMIC operations in the Department's budget to $8,736,800.

The Subcommittee approved increasing Lottery Funds by $175,350 and Other Funds by $30,944 in the Operations Division to establish an Internal Auditor 3 position (0.88 FTE). The approved amount includes $194,794 for personal services and $11,500 for associated services and supplies expenditures.

The Subcommittee approved one-time Lottery Funds expenditure limitation of $3,600,001 in the Infrastructure Division for the following projects and programs:

- $500,000 for City of Sandy - Wastewater System Planning and Permitting
- $500,000 for Columbia Corridor Drainage Districts Joint Contracting Authority - Levee Ready Columbia
- $1,600,000 for Port of Port Orford - Port of Port Orford Cannery Redevelopment
- $1,000,000 for City of Astoria - Warehouse Site Cleanup and Redevelopment
- $1 for Tide Gates and Culverts Repair and Replacement Program

A lottery allocation of $6,000,000 for the Tide Gates and Culverts Program is included in HB 5029. The Legislature or Emergency Board will increase the Lottery Funds expenditure limitation for the program after the Department presents a request that includes a proposal, developed in coordination with the Oregon Watershed Enhancement Board, for distributing grants and loans for the repair and replacement of tide gate and culvert infrastructure. The proposal should address eligible recipients, matching fund requirements, maximum awards for planning and construction grants and loans, criteria for prioritizing project requests, and necessary coordination with state, local, and federal agencies, as well as surrounding landowners or other entities, required for project implementation.

The Subcommittee approved one-time Lottery Funds expenditure limitation of $2,125,000 for the Arts Commission to distribute the following grants:

- $375,000 for Cottage Theatre - ACT III Theatre Expansion
- $250,000 for High Desert Museum - By Hand Through Memory Exhibit Renovation and Art of the American West Gallery
- $1,000,000 for Liberty Theatre - Stage House and Facilities Improvements
- $500,000 for Oregon Nikkei Endowment - Oregon Nikkei Legacy Center Renovations

Other Funds expenditure limitation was increased by $191,380,000 for distribution of general obligation and lottery bond proceeds authorized in HB 5005 and HB 5030 for the following projects and programs:

- $100,000,000 for Seismic Rehabilitation Grant Program - Schools
- $20,000,000 for Seismic Rehabilitation Grant Program - Emergency Services Facilities
- $15,000,000 for Levee Grant Program
- $15,000,000 for Port of Coos Bay - Channel Deepening Project
- $1,880,000 for City of Mill City - Storm Drainage System Improvements
- $20,000,000 for City of Salem - Drinking Water System Improvements
- $7,000,000 for City of Sweet Home - Wastewater Treatment Plant Rehabilitation

- $7,800,000 for Confederated Tribes of the Warm Springs Reservation - Warm Springs Wastewater Treatment Plant, Water Meter, and Water Distribution System Improvements
- $1,700,000 for City of Hood River - Waterfront Stormwater Line Replacement
- $1,500,000 for Beaverton Arts Foundation - Patricia Reser Center for the Arts
- $1,500,000 for Lincoln City Cultural Center - Cultural Plaza and Exterior Grounds

The Subcommittee also increased Nonlimited Other Funds expenditures by $35,000,000 for distribution of lottery bond proceeds authorized for the Special Public Works Fund ($30 million) and the Brownfields Redevelopment Fund ($5 million).

Other Funds expenditure limitation was increased by a total of $3,338,294 for costs of issuing the general obligation and lottery revenue bonds authorized for the above projects. Bond proceeds are used to finance these costs.

The Subcommittee also established Other Funds debt service expenditure limitation of $157,290 to allow the agency to apply excess proceeds and interest earnings to debt service payments in the 2019-21 biennium. An associated decrease in General Fund and Lottery Funds debt service is included in the statewide debt service adjustments table.

Finally, General Fund debt service was increased by $4,535,118 for payments in the 2019-21 biennium on general obligation bonds authorized for the Seismic Rehabilitation Grant Program. The additional debt service supports issuing $50.6 million of seismic rehabilitation bonds for schools and $10.1 million of seismic rehabilitation bonds for emergency services facilities in spring 2020. The remaining seismic rehabilitation bonds, and all lottery revenue bonds authorized for projects and programs in this budget, are scheduled to be sold in spring 2021, with related debt service payments beginning in the 2021-23 biennium.

Housing and Community Services Department

The Subcommittee approved adjustments for the Housing and Community Services Department totaling $70.1 million total funds. These changes provide for administrative expenses, capital construction investments to create new affordable housing for low income and chronically homeless Oregonians, programs funded by lottery bond proceeds, and expenditure limitation related to the passage of HB 2032. A permanent procurement manager and additional months for a limited research manager (both PEM E) positions will ensure accountability and data-driven decisions related to additional housing investments for the 2019-21 biennium. Expenditure limitation totaling $376,763 Other Funds and 1.50 FTE in position authority are included for this purpose.

Cost of issuance amounting to $730,000 Other Funds will allow for $50 million in Article XI-Q Bonds to finance the construction of an estimated 500 units of permanent supportive housing. The target population for the new permanent supportive housing units will be chronically homeless individuals, including the following: formerly incarcerated people reentering the community, people with a severe and persistent mental illness or substance use disorder, and chronically homeless veterans. Expenditure limitation for administration of rental assistance payments is

included for the estimated 200 units of permanent supportive housing that are anticipated to be available to residents by the last six months of the 2019-21 biennium. Rental assistance payments are financed by a transfer of funding from the Oregon Health Authority in the amount of $2,932,331 Other Funds. These funds also provide for 2 positions (1.17 FTE). Of the total amount budgeted, $200,000 is for one-time costs related to procurement and enhancement of a data system to track and deliver rental assistance payments. Staffing costs totaling $232,331 consist of a Program Analyst 3 for program setup and ongoing oversight and an administrative assistant position to process rent payments and calculate subsidy amounts. The rent subsidy payments are expected to total approximately $999,996 Other Funds for the last six months of the biennium. Other Funds expenditure limitation in the amount of $1.5 million will provide a rent guarantee to project investors and management companies but is recommended to be unscheduled.

Costs associated with the issuance of $150 million in Article XI-Q Bonds for the Local Innovation and Fast Track (LIFT) housing program, which will finance the construction of an estimated 2,168 rental units for low income Oregonians, include the following: $1,550,000 Other Funds for the cost of issuance, Other Funds expenditure limitation in the amount of $462,839 and position authority for an additional loan officer (0.50 FTE), a low-income housing tax credit analyst (1.00 FTE), a Fiscal Analyst 3 position for debt management (0.50 FTE), and General Fund in the amount of $11,370,998 for debt service. Debt service supports issuing $75.8 million of bonds for the LIFT housing program in spring 2020, and early issuance of bonds for permanent supportive housing.

Other Funds expenditure limitation totaling $15,278,750 is related to Lottery bond proceeds totaling $15 million and is for project costs and cost of issuance. The bonds will seed a revolving loan fund that will finance the acquisition of housing properties. This is an effort to keep these properties affordable for residents at 60%-100% of area median income. There is also Other Fund expenditure limitation totaling $25,407,658 for costs related to Lottery bonds to finance the preservation of existing affordable housing. Proceeds totaling $25 million will be awarded to finance the preservation of 400 units of affordable housing. This can include publicly supported affordable housing, properties with federal project-based rental assistance contracts, rent subsidies, manufactured dwelling parks, and properties undergoing recapitalization.

An increase in Other Funds expenditure limitation of $5 million and decrease in Federal Funds expenditure limitation of $1 million are included for the agency's Housing Stabilization Program, which provides homeless assistance and is funded from Department of Human Services Temporary Assistance to Needy Families (TANF) funds. Other Funds expenditure limitation in the amount of $10.5 million is included for a housing pilot project pursuant to HB 2032 (2019). The project will competitively award TANF funding to be used in conjunction with local shares of Emergency Housing Assistance (EHA) and other program dollars, to extend the period that families eligible for TANF can receive housing and other assistance to keep them stably housed. Successful applicants for the housing pilot program will be expected to apply federal funds prior to utilizing other funding, to ensure that TANF program funds are fully allocated for housing assistance provided through the pilot program. A limited duration Program Analyst 3 position (0.92 FTE) will design the competitive funding award and monitor program outcomes. This funding is not intended to be included in calculations used to estimate the cost of operations in future biennia.

The Low Income Rental Housing Fund program was eliminated because it was found to be redundant to the agency's Emergency Housing Assistance Program. Costs associated with two positions -- a Research Analyst 2 and a Program Analyst 4 position -- were shifted from General Fund to Other Funds. This change reduced ongoing General Fund operating expenditures by a total of $935,504, while Other Funds expenditure limitation was increased by $440,043 to accommodate the shift in position costs.

Oregon Department of Veterans' Affairs

The Subcommittee added Lottery Funds expenditure limitation of $1,000,000 for a one-time grant to the YMCA of Marion and Polk Counties to construct veterans' affordable housing adjacent to the new YMCA facility in Salem. Other Funds expenditure limitation of $4,000,000 was established for distribution of lottery bond proceeds authorized in HB 5030 for the veterans' affordable housing project and an additional $56,603 was provided for costs of issuing the lottery revenue bonds. Bonds are scheduled to be sold in spring 2021, so no debt service payments are due in the 2019-21 biennium. Lottery Funds debt service is estimated to be $690,005 in the 2021-23 biennium.

EDUCATION

State School Fund

The Subcommittee approved increases of $5,101,078 General Fund and $471,972 Other Funds, as well as a decrease of $5,573,050 Lottery Funds for the State School Fund. This change reflects the final balance of available Lottery Funds across the entire state budget as well as the most recent forecast of Marijuana-related revenues.

Department of Education

A total of $125,000,000 Other Funds expenditure limitation was approved for the Oregon School Capital Improvement Matching program (OSCIM). The proceeds of the sale of Article XI-P general obligation bonds are used for grants to school districts which match the grants with proceeds of locally issued bonds for the construction and improvement of school district buildings and property. The Subcommittee also approved $1,090,000 Other Funds expenditure limitation for the issuance costs of the Article XI-P bonds.

Higher Education Coordinating Commission

Funding of $4,184,935 total funds was included in HB 5047, the Student Success budget bill, for the 2019-21 costs of the education-related Statewide Longitudinal Data System (SLDS). That bill provided General Fund and Other Funds expenditure limitation to the Oregon Department of Education (ODE) for transfer to the Higher Education Coordinating Commission (HECC) for the staffing, data processing, and other costs of the SLDS which will be housed within HECC. These resources (expended by HECC as Other Funds) will support eight existing positions as well as the

addition of one Research Analyst position beginning in the second year of the biennium for a total of nine positions (8.50 FTE). Prior to 2017-19, the SLDS was part of the Chief Education Office which sunsets on June 30, 2019.

A General Fund appropriation of $975,000 was approved for a one-time grant to Treasure Valley Community College for a portion of the construction costs of a new Career and Technical Center. In 2009, the Legislature approved Article XI-G bonds for the original proposal for this project which was reauthorized in 2013 when the scope of the project was changed to expand and improve an existing building. In 2017, the project was again reauthorized. Later in that year, the federal Economic Development Administration awarded the Community College a grant which is being used as a portion of the required match. This $975,000 grant will be used to make up the difference between the current cost of the project and the previously estimated amount.

The Subcommittee approved transferring the responsibilities of the Criminal Justice Policy Research Institute's Law Enforcement Contacts Policy & Data Review Committee from Portland State University to the Criminal Justice Commission, thereby consolidating both quantitative and qualitative data collection on traffic and pedestrian stops in one state agency. This action reduced the HECC budget for Public University Statewide Programs by $276,581 General Fund.

Total funding of $245,362 ($122,866 General Fund, $27,030 Other Funds, and $95,466 Federal Funds) was approved for a permanent Operations and Policy Analyst 4 position (1.00 FTE) to serve as HECC's Chief Culture, Diversity, and Inclusion Officer and will produce the Affirmative Action Plan, develop diversity and inclusion policies and trainings, analyze policies and procedures to ensure their contribution to the HECC's diversity goals, and review and make recommendations to assist HECC in implementing the Equity Lens within the education and workforce programs.

The Subcommittee approved Other Funds expenditure limitation of $2,194,431 for the costs of issuance of bonds authorized in HB 5005 (Article XI-G and XI-Q bonds) and in HB 5030 (Lottery Bonds) for public universities and community colleges. Capital construction limitation for new capital projects is provided in HB 5006 and project descriptions are included in HB 5005.

The Subcommittee approved $2,000,000 General Fund for the Oregon State University (OSU) Extension Service to build fire resilience and resistance by expanding the OSU Forestry Extension pilot fire program into a statewide effort. OSU Forestry and Natural Resources Extension and the College of Forestry will build fire resilience and resistance on lands at risk of catastrophic wildfire by forming cross-boundary partnerships and agreements, delivering landowner education and outreach, producing wildfire risk mitigation plans, assisting private landowners in developing land management plans, and implementing risk mitigation projects to reduce fuels. Regional Wildfire Extension Specialists will be added in six key regions of the state.

The Subcommittee also approved increasing General Fund support for the OSU Agricultural Experiment Station by $2,270,000 and the OSU Extension Service by $410,000 for an integrated river basin water quality and quantity program. Funding supports positions in the Agricultural Experiment Station (4.50 FTE) and Agricultural Extension Service (1.30 FTE) that will provide the expertise and capacity for systematic, coordinated regional research and education programs focused on helping to solve Oregon's growing ground and surface water management

challenges. Programs will address increasing water conservation, storage, and instream flows; integrating water and fertilizer management; and increasing irrigation efficiency.

A General Fund appropriation of $375,000 was approved for two organic agriculture faculty positions in the OSU Extension Service to support the Organic Farming Program at the OSU College of Agricultural Sciences. One position will be located at the OSU Corvallis campus to cover the mid and southern valley regions. The second position will be located at the North Willamette Research and Extension Center and will support crops, growers, and consumers in the north valley and metro regions. Funding is approved to support position costs beginning January 1, 2020, or 18 months of the 2019-21 biennium. The Subcommittee also approved a one-time General Fund appropriation of $125,000 to continue funding in the Agricultural Experiment Station for the Berry Initiative. The approved amount supports a berry research position at the OSU North Willamette Research and Extension Center.

The Subcommittee approved a one-time General Fund appropriation of $450,000 for the Oregon Institute of Technology (OIT) to support the Oregon Manufacturing Innovation Center (OMIC) Research & Development (R&D) to begin research with equipment at the Rapid Toolmaking Center for Excellence. A one-time General Fund appropriation of $300,000 was also approved for OIT system integration funds to develop additive manufacturing and prototyping training capability for students at the Klamath Falls campus.

General Fund debt service was increased by $955,149 for payments in the 2019-21 biennium on general obligation bonds authorized for distribution to OIT for the OMIC R&D Rapid Toolmaking Center for Excellence facility and research equipment. The debt service supports issuing $6.6 million of Article XI-Q bonds for the project in October 2019. The remaining general obligation bonds approved for public university and community college projects are scheduled to be sold in spring 2021, with related debt service payments beginning in the 2021-23 biennium.

Lottery Funds support for the Sports Lottery program was increased by $5,859,809, resulting in total Sports Lottery funding of $14,099,809. The approved increase is allocated to the four technical and regional public universities, bringing the 2019-21 allocation for each to $2,440,560 (or $2,440,561, due to rounding adjustments). Allocations to the remaining universities continue at the level approved in the prior two biennia. Total funding will be the distributed to the public universities in the following amounts:

- $2,440,561 for Eastern Oregon University
- $2,440,560 for Oregon Institute of Technology
- $1,030,000 for Oregon State University
- $2,277,567 for Portland State University
- $2,440,560 for Southern Oregon University
- $1,030,000 for University of Oregon
- $2,440,561 for Western Oregon University

The Subcommittee also approved a reduction of $349,000 General Fund in the Public University Statewide Programs budget for Dispute Resolution allocated to the University of Oregon's Office for Community Dispute Resolution and increased the budget for the Labor Education and Research Center at the University of Oregon by $349,000 General Fund.

HUMAN SERVICES

Oregon Health Authority

The Subcommittee approved $200,000 General Fund for providing fresh Oregon-grown fruits, vegetables, and cut herbs from farmers' markets and roadside stands to eligible low-income seniors under the Senior Farm Direct Nutrition Program. Also included is $1,000,000 General Fund for the same purpose for eligible individuals through the Women, Infants and Children Program. Both program enhancements are one-time only.

HB 5050 makes General Fund and Federal Funds adjustments related to Medicaid cost containment efforts included in the agency's 2019-21 budget bill (SB 5525). The budget bill includes savings of $6.7 million General Fund and $25 million Federal Funds to reflect a reduced annual average growth target of 3.3% for Oregon Health Plan capitation rates. Instead of this adjustment, the Subcommittee approved restoring the annual growth target to 3.4% and replacing it with a non-caseload related General Fund savings target of $10 million.

The Subcommittee approved a $6 million General Fund increase for community mental health programs to help ensure, at a minimum, these programs maintain the level of services provided in 2017-19 in light of budget adjustments made in the agency's 2019-21 budget bill based on the declining caseload forecast.

Also included is Other Funds expenditure limitation of $1.5 million, Federal Funds expenditure limitation of $1.5 million, and two limited duration positions (1.66 FTE) to support the fiscal impact of HB 2032 (2019). This bill creates a Mental and Behavioral Health Pilot Program to award grants to up to four coordinated care organizations to assess gaps in access to Medicaid behavioral health services by Temporary Assistance for Needy Family recipients. The Other Funds revenue will be realized through a transfer of funds from the Department of Human Services.

As a technical adjustment, the bill reduces the expenditure limitation in the agency's 2019-21 budget bill for Lottery Funds revenue allocated from the Administrative Services Economic Development fund by $2.5 million and establishes a separate expenditure limitation of $2.5 million for Lottery Funds revenue allocated from the Veterans' Services Fund. This adjustment is necessary to ensure the transfer of Measure 96 Lottery Funds revenue from the Veterans' Services Fund is authorized to take place to support veterans' behavioral health services, as intended in the agency's budget bill.

The Subcommittee also established Other Funds debt service expenditure limitation of $216,435 to allow the agency to apply excess proceeds and interest earnings to debt service payments in the 2019-21 biennium.

The Subcommittee established expenditure limitation of $1.5 million Other Funds, subject to available revenue, from the Community Housing Trust Account (which must be expended in accordance with section 431, chapter 595, Oregon Laws 2009) to support facility improvements to help people with mental illness. The intent of this adjustment is to help more Aid and Assistance patients receive restorative services in the community instead of at the Oregon State Hospital.

To support the ongoing effort by the Department of Human Services to develop and implement the ONE Integrated Eligibility and Medicaid Eligibility (ONE IE & ME) system, the Subcommittee approved $671,490 General Fund, $11,216,676 Other Funds expenditure limitation, $1,638,121 Federal Funds expenditure limitation, and 45 positions (34.52 FTE). Of these positions, 20 are limited duration.

The Subcommittee also approved $1 million General Fund for competitive grants to support sobering center planning and startup costs. Support for startup costs can include funding for operational expenses during a sobering center's first five years of operations. This funding is one-time and should be phased-out in the 2021-23 budget.

Department of Human Services

The Subcommittee approved two food-related investments in the Self Sufficiency program. The first is $1,300,000 General Fund, on a one-time basis, for the Oregon Hunger Response Fund, which sustains the 2017-19 funding level. Funding is expected to help the Oregon Food Bank, through its network of 21 regional food banks, acquire and distribute more than one hundred million pounds of food annually to approximately 1,200 food assistance sites.

The second is $1,500,000 General Fund for the Double Up Food Bucks program, also on a one-time basis, to incentivize fruit and vegetable consumption among Supplemental Nutrition Assistance Program (SNAP) recipients. Under this program, when clients use their SNAP benefit at a farmers' market, the value of that purchase is matched dollar for dollar (up to $10 per visit), allowing them to take home more healthy food while also providing a financial benefit to local farmers. Eligible products include a variety of fresh, dried, or frozen fruits and vegetables without added sugars, fats, oils, or salt. Mushrooms, cut herbs, dried beans, vegetable starts, and nuts are also allowed under the program.

In the Aging and People with Disabilities (APD) program, the Subcommittee added $2,235,831 General Fund to restore a budget reduction included in HB 5026, the primary budget bill for the Department of Human Services (DHS). These dollars, which augment federal Older Americans Acts funding, will be distributed to local Area Agencies on Aging to help pay for services including home-delivered meals, support for family caregivers, and transportation to medical appointments.

Another adjustment approved by the Subcommittee for APD is a $251,600 one-time fund shift from General Fund to Other Funds in the nursing facilities program; this change relies on a projected carryforward balance in the long-term care facility assessment. Then, the General Fund is

used, along with an increase of $167,188 in Federal Funds expenditure limitation, to pay for two (1.76 FTE) permanent full-time Operations and Policy Analyst 3 positions; these are phased-in effective October 1, 2019. One position will promote the effective use of emergency medical services by residents of licensed long term care settings and the other position will support efforts of the quality measurement council.

For the Intellectual and Developmental Disabilities (IDD) program, the Subcommittee made a budget adjustment to account for SB 274 not moving from the Joint Committee on Ways and Means to the second chamber, due to the measure having unresolvable conflicts with an already enrolled 2019 measure (SB 20). The DHS budget bill, HB 5026, contains increases of $268,514 General Fund, $267,674 Federal Funds expenditure limitation, and 3 positions (2.64 FTE) to implement SB 274; these amounts are reversed.

The Subcommittee also discussed provider rate increases approved in HB 5026, the DHS 2019-21 budget bill, and how to best ensure that information on rates for adult foster homes is included in an interim report. As a result, the Subcommittee approved the following budget note:

> **Budget Note**
> Under a budget note in the budget report for HB 5026, the Department of Human Services is directed to report, by February 1, 2020, to the Interim Joint Committee on Ways and Means on the transition to new rate models for providers in the Intellectual and Developmental Disabilities program. As part of that report, the Department shall provide a status update on the development of a new rate model for adult foster homes serving people with intellectual and developmental disabilities and note any outcomes or timelines related to union negotiations, since these rates are collectively bargained.

The Subcommittee approved funding for the final development phase, implementation, and transition to Maintenance and Operations (M&O) of an integrated eligibility system, called the Integrated Eligibility (IE) project. This effort integrates enrollment and eligibility activities for several programs at the Department of Human Services (DHS) (Non-MAGI Medicaid, Supplemental Nutrition Assistance Program (SNAP), Temporary Assistance for Needy Families (TANF), and Employment Related Day Care (ERDC)) into the OregonONEligibility (ONE) system used by the Oregon Health Authority (OHA).

Due to schedule changes and issues with the user acceptance testing vendor, the 2019-21 cost estimate for the project has increased over the budget development timeframe; some costs also shifted between biennia. The project's current cost estimate and approved amount for the 2019-21 biennium is $200,561,925 total funds. This budget includes state staff costs of $20.7 million, $94 million for contracted information technology services, $11.2 million for payments to OHA for its project work, and $5.8 million for debt service. Other elements addressed in the project plan include cost allocation, contingency, legacy system work, hosting services, disaster recovery, and security enhancements. The state staffing component consists of 33 positions (30.78 FTE) and primarily supports business analytics, system program support, and training activities; 17 of the positions (14.78 FTE) are limited duration for system rollout and short-term training needs.

The bulk of the project budget, at $139.7 million or 70% of 2019-21 costs, is supported by Federal Funds; this is due to enhanced federal funding (74% federal/26% state) approved for the Design, Development, and Implementation (DDI) phase of the work, which is expected to be closed

out by January 31, 2021. Once the system transitions to M&O in the last six months of the biennium, the federal cost share decreases. General Fund supports $16.9 million of project costs and debt service; the bulk of the state share will be covered by $43.9 million in ending balance or new proceeds from Article XI-Q bonds. In HB 5005, the Joint Committee on Ways and Means Subcommittee on Capital Construction approved $38,165,000 Article XI-Q bonds to finance $37,500,000 of project costs and $665,000 for costs of issuing the bonds.

The Joint Legislative Committee on Information Management and Technology (JLCIMT) reviewed the project on June 4, 2019, and recommended conditional approval, contingent on funding availability and subject to completion of several actions. These actions include reporting to JLCIMT during the legislative interim and the 2020 session on project status, progress, and variances to key performance metrics; and developing a mitigation plan for issues and concerns identified by the quality assurance vendor and/or the Legislative Fiscal Office. The mitigation plan is to be provided to JLCIMT no later than November 2019.

JUDICIAL BRANCH

Commission on Judicial Fitness and Disability

The Subcommittee approved an additional $16,000 for the Commission on Judicial Fitness and Disability to pay for compensation adjustments made at the end of the 2017-19 biennium and for up to 20 hours a month of administrative support. The Commission only has a half-time Executive Director and the amount of materials necessary to provide the volunteer members of the Commission adequate information on specifics of complaints requires additional support work.

Judicial Department

The Subcommittee approved $1,755,516 General Fund and nine positions (9.00 FTE) for the Oregon Judicial Department to support implementation of SB 24 (2019) and SB 973 (2019) related to supports and services for people with serious mental illness and substance addictions. In addition, two new circuit court judge positions (1.00 FTE) were added, one in Jackson County and one in Marion County, as well as six judicial services specialist positions (3.50 FTE) to be funded with $1,058,624 General Fund.

Other Funds expenditure limitation of $410,000 was approved for the cost of issuance of $28,230,000 in Article XI-Q bonds for the Oregon Judicial Department's Supreme Court Building Renovation Project. The project is to renovate the Oregon Supreme Court building, including seismic updates, energy efficiency improvements, and various systems and safety code upgrades. Bonds will be issued in March 2021.

Additionally, funds were added to the Judicial Department's budget to continue renovating county courthouses. Specifically, $136,695,000 Other Funds is provided for project costs and the cost of issuing bonds for projects associated with the Clackamas, Lane, and Linn County Courthouses. The budget also includes $1,300,000 Other Funds expenditure limitation for debt service costs and $2,000,000 General Fund for planning costs associated with replacing the Benton County Courthouse.

Public Defense Services Commission

The Subcommittee restored one position and $305,853 Other Funds in the Public Defense Services Commission's Application Contribution Program that was reduced in the agency's 2019-21 budget bill. In addition, effective July 1, 2020, the Parent-Child Representation Program will be extended into Multnomah County with $3.5 million General Fund and one permanent full-time Deputy General Counsel position (1.00 FTE).

The Subcommittee approved the following two budget notes for the Public Defense Services Commission:

Budget Note

The Oregon Public Defense Services Commission is directed to work with stakeholders to identify data public defense contractors should be required to submit to the Office of Public Defense Services as part of its contractual agreement. It is the Legislature's intent that OPDS, in establishing reporting requirements, obtain data that to the greatest extent possible will allow the agency to determine (1) the level and quality of services provided to each defendant, and (2) improvements in case outcomes for defendants.

Budget Note

The Oregon Public Defense Services Commission shall evaluate options for delivering indigent public defense services and adopt an approach that delivers quality public defense services. In its evaluation of public defense contract options, the Commission is directed to consider the findings of the January 2019 report by the Sixth Amendment Center entitled "The Right to Counsel". As part of its new contract model, the Commission shall require contract attorneys to provide information the Commission determines is needed to demonstrate the level and quality of services provided, and the case outcomes.

LEGISLATIVE BRANCH

Funding is provided to the Legislative Administration Committee (LAC) for the Document Publishing and Management System (DPMS) project, including Other Funds expenditure limitation in the amount of $5,168,000 for the cost of issuing general obligation bonds and for actual project costs to be incurred during the 2019-21 biennium. In addition, $766,117 General Fund is provided to LAC for debt service costs associated with

the DPMS project. LAC is also charged with planning for Phase II of the Capitol Accessibility, Maintenance and Safety (CAMS) Project; $1,361,800 General Fund is appropriated for this planning effort.

NATURAL RESOURCES

Department of Agriculture

The Subcommittee approved four General Fund increases, each of them one-time only, for the Department of Agriculture (ODA) totaling $1,200,000. First, $200,000 General Fund was added for the predator control program, which provides pass-through money to the U.S. Department of Agriculture Wildlife Services for predator control services in partnership with the Department of Fish and Wildlife and Oregon counties. A similar one-time appropriation is provided to the Department of Fish and Wildlife. Next, $300,000 General Fund was provided for additional funding to the Invasive Species Council, and $100,000 General Fund was added for the collection and testing of water samples from Klamath Lake to analyze for nutrients, including phosphorous, which can lead to harmful algae bloom. Finally, $600,000 General Fund was added for the replacement of lab equipment.

Columbia River Gorge Commission

The Subcommittee approved an increase of $109,813 General Fund for the Columbia River Gorge Commission to finance Oregon's share of a new Vital Sign Indicators Land Use Planner position and costs related to replacement of staff laptops and desk top computers. These expenditures were included in the State of Washington's budget for the Commission but were not included in the initial Oregon budget due to revenue uncertainties at the time of passage. With this appropriation, the agency will be able to hire the additional land use planner position since the operating costs of the Commission are to be shared equally by the two states under the Interstate Compact.

Department of Energy

The Subcommittee approved a one-time General Fund appropriation of $2 million to the Department of Energy for the solar rebate program established in HB 2618. The $2 million will be deposited into the Rooftop Solar Incentive Fund for the issuance of rebates and to pay for implementation and administration of a solar rebate program. Of the $2 million, $1.5 million is available for rebates through Special Payments, with $500,000 available for administration. The Department will hire three limited duration positions, a Program Manager 3 (0.25 FTE) and two Program Analyst 2 positions (0.50 FTE each). Additionally, the Department will utilize existing personnel to assist with program establishment, implementation, and oversight. Personal Services costs are anticipated to be $255,258, with $83,138 for services and supplies and $161,604 for indirect costs associated with administering the program.

Department of Environmental Quality

The Subcommittee approved a $250,000 one-time General Fund appropriation to provide grants to local communities for planning and implementation of smoke management plans consistent with Oregon's new smoke management rules. The Department will utilize existing staff to administer and distribute the grant funds.

A technical adjustment was approved to accurately reflect the reduction of a position eliminated in the Department's 2019-21 budget bill (HB 5017). General Fund was reduced from the Land Quality program to reflect the eliminated position; however, the position was funded across three programs, and an adjustment is made to reduce General Fund in Air Quality and Water Quality with a corresponding increase to Land Quality for a net zero impact.

The Subcommittee approved $5,065,000 Article XI-Q bonds to finance $5,000,000 of project costs and $65,000 for costs of issuing the bonds. The Environmental Data Management System (EDMS) project is to develop and implement a customized off-the-shelf software solution that will replace multiple outdated and disparate information technology systems. The EDMS project will modernize and improve business processes by providing a common platform to receive and share environmental information and support e-commerce and web-based interactions. Early estimates indicate the EDMS project will cost around $18 million to be completed. Also approved is $834,752 General Fund for the debt service associated with the bonds, which are scheduled to be sold in May 2020.

Department of Fish and Wildlife

The Subcommittee approved a $200,000 one-time General Fund appropriation for the predator control program, which provides pass-through money to the U.S. Department of Agriculture Wildlife Services for predator control services in partnership with the Department of Agriculture and Oregon counties. A similar one-time appropriation is provided to the Department of Agriculture.

The Subcommittee approved a $1,352,102 Other Funds expenditure limitation to continue operations of the Leaburg Hatchery. The Department will utilize a portion of the General Fund provided in SB 5510 for steelhead production to raise some of those fish at Leaburg instead of at the Santiam Hatchery. This will allow the Santiam Hatchery to continue to produce its current level of both steelhead and spring chinook, while Leaburg will be able to produce the summer steelhead and transport them to the Santiam waterways. To properly align the Department's budget and position need for the continued operation of Leaburg, there is a reduction of $866,091 Federal Funds limitation that was carry-forward in the budget from 2017-19, the abolishment of a full-time technician position, and the addition of a half-time senior technician position, leaving a net reduction of 0.50 FTE. Total staffing at Leaburg will be 7 positions (6.50 FTE) funded with Other Funds fishing license revenue.

Department of Forestry

A one-time General Fund appropriation of $200,000 to the Oregon Department of Forestry was approved to purchase a tract of timber land adjacent to the Santiam State Forest for inclusion in the Santiam State Forest. Purchase of the property is intended to resolve a legal dispute between the current owner and the Department of Forestry regarding access to the roughly 160-acre parcel. Access is limited due to the condition and availability of a logging road crossing existing state forest property that requires rebuilding.

A one-time General Fund appropriation of $1.7 million to the Oregon Department of Forestry was approved for activities related to slowing or stopping the spread of Phytophthora ramorum, the invasive pathogen that causes sudden oak death.

The Subcommittee approved an increase of $52,035 in the Other Funds expenditure limitation established for the Oregon Department of Forestry to accommodate the payment of bond issuance costs related to bonds issued for the replacement of a shared facility at Toledo. An increase of $121,559 General Fund and Other Funds expenditure limitation of $168,904 is included for the payment of debt service on the bonds for the project.

Department of Land Conservation and Development

The Subcommittee approved a one-time General Fund appropriation in the amount of $2,005,563 and the establishment of seven limited-duration positions (6.00 FTE) for the implementation of HB 2001 and HB 2003 by the Department of Land Conservation and Development. The funding is in addition to General Fund appropriated in HB 2001 and HB 2003 for assistance to local governments and provides for the administrative costs of the agency for implementing the provisions of the bills.

Department of Parks and Recreation

An increase in the Lottery Funds expenditure limitation of $448,769 was approved by the Subcommittee for the Oregon Parks and Recreation Department. This increase is due to updated projections of Lottery revenues as of the May 2019 revenue forecast. This increase will provide the Department with sufficient capacity to distribute the 12% of lottery revenues allocated to the Department that are dedicated to local parks.

The Subcommittee approved the establishment of an Other Funds expenditure limitation for the Parks and Recreation Department in the amount of $33,023 for debt service. Investment earnings on non-expended bond proceeds are credited to the agency as Other Funds regardless of the type of bond issuance. These earnings are then expended by the agency to offset the debt service expenditures from the fund type that would otherwise be used. The offsetting reductions to Lottery Funds expenditure limitation for debt service are included in the statewide debt service adjustments.

An increase in the Other Funds expenditure limitation of $5,106,587 for the Oregon Parks Department was approved by the Subcommittee for the expenditure of lottery bond proceeds for the Oregon Main Street Revitalization program. The funding will be used to provide competitive grants to organizations participating in the Oregon Main Street Network. The program awards grants to acquire, rehabilitate, and construct buildings on properties in designated downtown areas and facility community revitalization that leads to additional private investment, job creation or retention, expansion or establishment of viable businesses, or creating a stronger tax base. Of the total increase, $106,587 is for the costs of bond issuance.

Department of State Lands

An increase in Federal Funds expenditure limitation of $154,000 was approved for the Department of State Lands' South Slough National Estuarine Research Reserve. The National Oceanic and Atmospheric Administration awarded a federal grant to the Department to expand the reserve's maintenance compound and enhance security for the reserve's facilities.

The Subcommittee approved an Other Funds expenditure limitation increase in the amount of $6 million for the Department of State Lands from the Portland Harbor Cleanup Fund. The agency will use the increased limitation to transfer $6 million from the fund to a trust account established by the state and the city of Portland under a settlement agreement for remedial design with the U.S. Environmental Protection Agency (EPA). The amount transferred will be matched by the city of Portland. Monies in the trust will be transferred to the EPA on an as-needed basis to fund the activities under the agreement.

Water Resources Department

The Subcommittee approved the establishment of an Other Funds expenditure limitation for the Water Resources Department in the amount of $394 for debt service. Investment earnings on non-expended bond proceeds are credited to the agency as Other Funds regardless of the type of bond issuance. These earnings are then expended by the agency to offset the debt service expenditures from the fund type that would be used otherwise. The offsetting reductions to Lottery Funds expenditure limitation for debt service are included in the statewide debt service adjustments.

The Subcommittee approved a total increase of $25,521,689 in Other Funds expenditure limitation established for the Water Resources Department for the purpose of making grants, loans, and paying the cost of bond issuance from lottery bond proceeds deposited into the Water Supply Development Fund established under section 3, chapter 784, Oregon Laws 2013. Of the amount of additional limitation provided for the expenditure of net bond proceeds allocated to the fund, $15,000,000 is for Water Supply Development grants and loans to evaluate, plan, and develop in-stream and out-of-stream water development projects that repair or replace infrastructure to increase the efficiency of water use; provide new or expanded water storage; improve or alter operations of existing water storage facilities in connection with newly developed water; create new, expanded, improved, or altered water distribution, conveyance, or delivery systems in connection with newly developed water; allocate federally stored water; promote water reuse or conservation; provide streamflow protection or restoration; provide for water

management or measurement in connection with newly developed water; and, determine seasonally varying flows in connection with newly developed water. The budget includes $521,689 for the payment of bond issuance costs. The remaining $10 million expenditure limitation is for bond proceeds allocated to the fund for the Deschutes Basin Board of Control Piping Project. The funding will be combined with additional state, local, and federal funds to allow the Board of Control to pipe currently open canals for a total project cost of $99.38 million.

The Subcommittee approved a total increase of $18,327,563 in the Other Funds expenditure limitation established for the Water Resources Department for the purpose of making grants, loans, and paying the cost of bond issuance from lottery bond proceeds deposited into the Water Supply Fund established by section 10, chapter 906, Oregon Laws 2009. Of the total increase, $327,563 is for the estimated cost of bond issuance. The budget includes $14 million for a grant to the Wallowa Lake Irrigation District for the rehabilitation of the Wallowa Lake Dam. The remaining $4 million is for a grant to the City of Newport for planning, environmental permitting, and design costs to replace the Big Creek Dams.

PUBLIC SAFETY

Department of Corrections

The Subcommittee approved a General Fund appropriation of $1,650,000 to the Department of Corrections for its Corrections Information System Tool Upgrade project.

The agency's General Fund appropriation for debt service was increased by $1,579,588 for debt service to be paid in 2019-21 on $47,835,000 in Article XI-Q bonds for the Department of Corrections' deferred maintenance program, wireless communications system, and camera system. Projects will be undertaken for facility improvements including building envelope, electrical systems, water systems, roofs, HVAC, fire systems and infrastructure improvements; to acquire and install wireless communications systems at 10 correctional facilities for mobile radio communications; and to acquire and install upgraded camera systems at 10 correctional facilities and place additional cameras in strategic locations to improve monitoring of activity. Debt service for bonds issued in 2019-21 is estimated to be $12,463,107 General Fund in 2021-23.

The Subcommittee approved an increase in Other Funds expenditure limitation of $724,932 for cost of issuance of $47,835,000 in Article XI-Q bonds for the Department of Corrections' deferred maintenance program. Bonds will be issued in May 2020 and in March 2021.

An Other Funds expenditure limitation for debt service of $51,378 was established for the Department of Corrections in order to allow the agency to apply interest earned on bond proceeds to debt service on bonds.

The Subcommittee approved an Other Funds expenditure limitation increase of $4,585,442 for the Community Corrections program to allocate funding to counties from the Criminal Fines Account for the purpose of planning, operating, and maintaining county juvenile and adult corrections programs and facilities and drug and alcohol programs. The Subcommittee approved the following budget note:

Budget Note:
The Department of Corrections shall require county recipients of Criminal Fines Account disbursements to report annually on the programs and services funded with this allocation and on the number of clients served.

Oregon Department of Justice

The Subcommittee appropriated $700,000 General Fund to support the Oregon Crime Victims Law Center, as a one-time increase. This will increase General Fund support for the Law Center from the Department of Justice (DOJ) from $342,081 to $1,042,081. This increase may supplant the need for DOJ to provide the Law Center with a state grant funded from punitive damage awards. In addition, the Law Center may continue to apply for, and possibly be awarded, federal Victim of Crime Act grant funding, as was the case during the 2017-19 biennium.

Oregon Military Department

The Subcommittee approved an increase in Other Funds expenditure limitation of $348,000 for cost of issuance of $22,275,000 in Article XI-Q bonds for Aviation Facility Emergency Enhancement projects in Salem and Pendleton, three Armory Service Life Extension projects at the Owen Summers and Anderson Readiness Center facilities in Salem and at the Jackson Armory in Portland, and construction of exhibit space at the Oregon Military Museum at Camp Withycombe. Bonds are planned to be issued in May 2020, and in March 2021.

The agency's General Fund appropriation for debt service was increased by $533,528 for debt service on $22,275,000 in Article XI-Q bonds estimated to be paid in 2019-21. Debt service for these bonds is estimated to be $4,367,339 General Fund in 2021-23.

For a risk abatement study of the Critical Energy Infrastructure Hub located in Portland, the Subcommittee approved a one-time General Fund appropriation of $300,000. The Office of Emergency Management will collaborate with the Department of Environmental Quality and the Department of Energy to commission a study that will evaluate the impacts of a catastrophic failure of fuel storage facilities located at the Critical Energy Infrastructure Hub following a Cascadia subduction zone earthquake.

Criminal Justice Commission

The Subcommittee approved adding Other Funds expenditure limitation of $275,086 to the Criminal Justice Commission's 2019-21 budget to allow the agency to spend a grant award from the Laura and John Arnold Foundation. Oregon is one of five states chosen to participate in the

National Criminal Justice Reform Project and will use the grant funds to gather and establish baseline data on Oregon's pretrial detention system and pretrial jail population.

The Subcommittee approved transferring the responsibilities of the Criminal Justice Policy Research Institute's Law Enforcement Contacts Policy & Data Review Committee responsibilities from Portland State University to the Criminal Justice Commission, thereby consolidating both quantitative and qualitative data collection on traffic and pedestrian stops in one state agency. This action adds $78,242 General Fund to the Criminal Justice Commission's 2019-21 budget and makes permanent an existing limited-duration Administrative Specialist 2 position.

To address the growth of the Criminal Justice Commission due to the programs, responsibilities, and positions added to the agency's budget through other legislation passed in 2019, an existing Program Analyst 4 is reclassified to a Principal Executive Manager F position, to ensure adequate managerial oversight of the grant programs operated by the Commission. This reclassification has no budget impact in 2019-21.

Department of Public Safety Standards and Training

To accommodate a purchase not anticipated to be received by June 30, 2019, the Subcommittee approved increasing the Department of Public Safety Standards and Training's 2019-21 Federal Funds expenditure limitation by $325,955 in order to carry forward a grant received from the Federal Emergency Management Agency's Assistance to Firefighters grant program in 2018 for the purchase of a new fire truck. This is a one-time increase in expenditure limitation for the 2019-21 biennium.

Oregon Youth Authority

The Subcommittee approved an increase in Other Funds expenditure limitation of $774,709 for cost of issuance of $34,430,000 in Article XI-Q bonds to complete the remodel of seven living unit cottages at the MacLaren Youth Correctional Facility and dormitory spaces at the Rogue Valley Youth Correctional Facility; remodel three medical and dental clinics; renovate the control rooms at the Oak Creek, Rogue Valley, and Eastern Oregon youth correctional facilities; and undertake deferred maintenance projects in 2019-21. Bonds are planned to be issued in October 2019, May 2020, and in March 2021.

The agency's General Fund appropriation for debt service was increased by $914,307 for debt service to be paid on $34,430,000 in Article XI-Q bonds in 2019-21. Debt service for these bonds is estimated to be $6,245,948 General Fund in 2021-23.

Other Funds expenditure limitation for debt service of $95,000 was established for the Oregon Youth Authority in order to allow the agency to apply interest earned on bond proceeds to debt service on bonds.

TRANSPORTATION

Department of Transportation

The Subcommittee increased the Department of Transportation's (ODOT) Other Funds expenditure limitation, on a one time basis, by $5,149,463 for ODOT project costs and cost of issuing lottery bonds. This amount consists of $42,876 for the Sherwood Pedestrian Connectors Project and $5,106,587 for the Coos Bay Rail Line and Bridge Replacement Project.

Additional one-time Other Funds expenditure limitation of $1,000,000 was approved for the Neskowin Emergency Egress Project in Tillamook County. The source of funds for this project is the Transportation Operating Fund. The Transportation Operating Fund was also used to provide one-time Other Funds expenditure limitation of $650,000 to support the upgrade and recapitalization of 44 electric vehicle charging station locations known as the West Coast Electric Highway.

The Subcommittee approved the addition of three limited duration Transportation Service Representative 1 positions (0.42 FTE) and $221,442 Other Funds expenditure limitation to implement HB 2015 (2019).

Two budget notes were approved, as follows:

Budget Note

The Department of Transportation shall study the I-5 Boone Bridge Project and provide an estimate of the cost to complete the project. The Department shall report back to the Joint Committee on Ways and Means and the Joint Committee on Transportation no later than February 1, 2021.

Budget Note

The Department of Transportation, in coordination with the City of Sherwood, shall report to the Joint Committee on Ways and Means on the results of the City of Sherwood's Pedestrian Connector Project implementation and related feasibility study and submit a funding request for the balance of project costs in February 2020.

Adjustments to 2017-19 Budgets

Department of Corrections

The Subcommittee approved a net-zero rebalance of $650,000 between General Fund appropriations and appropriated an additional $3,000,000 General Fund, on a one-time basis only, to the Department of Corrections to address the remainder of a known 2017-19 budget shortfall of $20.2 million and additional unanticipated expenditures totaling $23.5 million. Unanticipated expenditures included emergency repairs to facilities, spending on medication for Hepatitis C and for contract medical staff in prisons, computer replacements and necessary software upgrades, and to backfill a federal grant. The agency has mitigated its budget shortfall through management actions such as a hiring freeze on management positions, limiting spending on staff training, reducing inmate alcohol and drug treatment costs, and limiting inmate clothing orders through the end of the biennium, as well as by using Other Funds revenue where available.

Summary of Revenue Changes

Senate Bill 669 appropriates $399,587 General Fund to the Oregon Health Authority (OHA) to establish training requirements for individuals who provide in-home care services and to conduct increased on-site inspections of licensed in-home care agencies. The bill also appropriates $125,000 General Fund and increases Federal Funds expenditure limitation by $125,000 to the Department of Human Services (DHS) to develop recommendations to assess and monitor home care services. In total, Senate Bill 669 appropriates $524,587 General Fund between the two agencies for the 2019-21 biennium.

Summary of Capital Construction Subcommittee Action

Senate Bill 669 directs the Oregon Health Authority to establish by rule training requirements that must be met before an individual may provide in-home care services. The training standards must require a minimum number of hours of orientation and assessment of competency before a home care worker or personal support worker is permitted to provide home care services to a client. The minimum number of hours may be greater for home care workers who will be providing enhanced care and services, such as medication management. The bill also changes

the time between on-site inspections conducted by OHA of licensed in-home care agencies from three years to two years and authorizes OHA to impose a civil penalty and deny, suspend, or revoke the license of any in-home care agency for failure to comply with training requirements and employment or wage laws.

The bill requires DHS to develop recommendations for methods to assess and monitor home care services provided by home care workers. The recommendations may include electronic monitoring and on-site assessment and monitoring of home care workers providing care in their clients' homes. DHS must report its recommendation to the Legislature by February 1, 2021.

Oregon Health Authority
Senate Bill 669 appropriates $399,587 General Fund to the Oregon Health Authority and establishes four positions (1.64 FTE) for the 2019-21 biennium. The funding supports one Operations and Policy Analyst 3, two Client Care Surveyors, and one Administrative Specialist 1 to support the need of increased on-site inspections of licensed in-home care agencies, as well as increased costs for Department of Justice consultation and representation related to additional enforcement issues.

Department of Human Services
Senate Bill 669 appropriates $125,000 General Fund and increases Federal Funds expenditure limitation by $125,000 to the Department of Human Services to cover costs of contracting with an external vendor to develop recommendations for methods to assess and monitor home care services, which may include electronic monitoring and on-site assessments, as required by the bill.

Summary of Revenue Changes

SB 770 appropriates $1,174,816 General Fund to the Oregon Health Authority (OHA) for the 2019-21 biennium to support the Task Force on Universal Health Care, as well as to develop a plan for a Medicaid Buy-In program to provide an affordable health care option to all Oregon residents.

Summary of Capital Construction Subcommittee Action

SB 770 establishes a 20-member Task Force on Universal Health Care, charged with recommending the design of the Health Care for All Oregon Plan. The program will be administered by the Health Care for All Oregon Board. This plan would be publicly funded, equitable, affordable and comprehensive, and of high-quality care to all Oregon residents. Members of the task force must be appointed by May 31, 2020. The task force must submit to the 2021 Legislative Assembly a report of its findings and recommendations for the design of the Health Care for All Oregon Plan, and the Health Care for All Oregon Board. The bill will sunset on January 2, 2022.

The 20 member task force will be assigned as follows:

- The Senate will assign two voting members;
- The House will assign two voting members;
- The Governor will assign 13 voting members;

- The Oregon Health Authority will assign one non-voting member;
- The Department of Consumer and Business Services will assign one non-voting member; and
- The Oregon Association of Counties will assign one non-voting member.

The bill also directs OHA to develop a plan for a Medicaid Buy-In program or public option to provide an affordable health care option to all Oregon residents.

The bill appropriates $1,174,816 General Fund to the OHA Health Policy & Analytics Division and establishes three full-time limited duration positions (2.37 FTE) to assist the task force with data and research to formulate findings and recommendations for the design of the Health Care for All Oregon Plan. OHA will be charged with the following:

- Reviewing the work from existing health care professional boards and commissions.
- Investigating other states' attempts at providing universal coverage and using single payer health care financing systems.
- Applying for public and private grants from nonprofit organizations for the costs of research.
- Formulating a list of federal and state laws, rules, state contracts or agreements, court actions or decisions that may facilitate, constrain, or prevent implementation of the plan, and an explanation of how the federal or state laws, rules, state contracts or agreements, court actions, or decisions may facilitate or constrain or prevent implementation.
- Developing cost estimates for the Health Care for All Oregon Plan.
- Drafting the report of task force findings and recommendations for the design of the Health Care for All Oregon Plan.

Costs associated with the three positions listed below are estimated to be $574,816 General Fund; $474,480 Personal Services, and $100,336 Services and Supplies. Specifically, these positions are to conduct research, compile data, and produce reports within the timeframe required by the bill. OHA will hire the following three full-time positions for the 2019-21 biennium:

- One Operations and Policy Analyst 4 position to coordinate the work and internal OHA project management, policy research, and analysis.
- One Research Analyst 3 to conduct specific research needed to facilitate findings and task force recommendations.
- One Operations and Policy Analyst 3 position to produce and conduct complex research of data contained exclusively within OHA's data systems.

In addition to the costs for the three positions, the following expenses are included in the General Fund appropriation for OHA:

- $200,000 General Fund, Services and Supplies (Professional Services) to cover consulting fees for subject matter experts to ensure regulatory and legal expertise and financial model design is available to OHA to support the task force; and
- $400,000 General Fund, Services and Supplies (Professional Services) to cover consultant costs for legal and regulatory analysis, as well as modeling of financial and actuarial variables associated with developing a plan for the Medicaid By-In program.

Summary of Revenue Changes

Senate Bill 889 appropriates $993,797 General Fund to the Oregon Health Authority (OHA) for the 2019-21 biennium to establish the Health Care Cost Growth Benchmark program.

Summary of Human Services Subcommittee Action

Senate Bill 889 requires the Oregon Health Authority, in collaboration with the Department of Consumer and Business Services, to establish the Health Care Cost Growth Benchmark program. The bill also creates the Health Care Cost Growth Benchmark Implementation Committee under the direction of the Oregon Health Policy Board.

The program will establish a health care cost growth benchmark for increases in total health care expenditures and will review and modify the benchmark on an annual basis. The committee will design an implementation plan for the benchmark program and is required to report its recommendations to the Oregon Health Policy Board for approval by September 15, 2020, and also report the recommendations to the Legislature. The report must include a legislative concept regarding performance improvement action plans or other enforcement actions when a provider or payer fails to remain at or below the health care cost growth benchmark.

The bill appropriates $993,797 General Fund in the 2019-21 biennium, which will provide funding for six positions (2.75 FTE) and the associated Services and Supplies costs. The positions include a Principal Executive Manager F, a Project Manager 3, an Operations and Policy Analyst 4, a Health Economist 4, a Research Analyst 4, and a Research Analyst 3.

Summary of Revenue Changes

The Oregon Health Authority (OHA) is funded with a mix of General Fund, Lottery Funds, Other Funds, and Federal Funds revenues. Most of the General Fund is used as match to receive Federal Funds, particularly for the state's Medicaid programs. Lottery Funds finance gambling addiction prevention and treatment services. In addition to Medicaid, Federal Funds support a variety of grant programs across the agency. Other Funds revenue comes from various sources, including Medicaid provider assessments, tobacco taxes, Tobacco Master Settlement Agreement funding, recreational marijuana taxes, beer and wine taxes, licensing fees, grants, estate collections, health care premiums, third party recoveries, pharmaceutical rebates, and charges for services.

House Bill 2010 (2019) made changes to Medicaid provider assessments, which support the Oregon Health Plan. Specifically, House Bill 2010 extends the sunset for the provider assessments; increases the assessment paid by commercial insurers, Public Employee Benefit Board plans and coordinated care organizations (CCOs) from 1.5 percent to 2.0 percent of premiums and expands the assessment to stop-loss insurance; and continues the current six percent assessment rate paid by diagnostic related group (DRG) hospitals; however, the six percent assessment is

under the fully reimbursable hospital assessment structure. OHP continues to be supported by Other Funds from an assessment for Type A and Type B rural hospitals and a separate intergovernmental transfer funding program with the Oregon Health & Science University (OHSU). In total, the OHA budget assumes a combined $2.5 billion from Medicaid provider assessments and the OHSU funding program.

The budget includes a total of $364 million in tobacco tax revenue, which is used to support OHP, community mental health programs, and tobacco prevention and education programs, as well as a total of $98.4 million of the Tobacco Master Settlement Agreement (TMSA) resources. The 2019-21 budget uses $64.9 million in forecasted recreational marijuana tax revenue to save a like amount of General Fund in behavioral health programs.

The recommended budget includes increased Other Funds revenues from revised Drinking Water Services fees (as included in Senate Bill 27 (2019)), increased Food, Pool, and Lodging fees (as included in Senate Bill 27 (2019)), and the establishment of a waiver application fee through the administrative rules process for the Toxic Free Kids program.

The 2017-19 budget for the Oregon State Hospital (OSH) recognized additional Other Funds revenue of $40.5 million related to the certification by the federal Centers for Medicare and Medicaid Services (CMS) of additional hospital-licensed beds. The certification allows OSH to bill insurance plans for patients covered under Medicare, Medicaid, and third-party (commercial) insurance. However, the hospital was unable to increase Other Funds revenues as much as projected due various administrative challenges as the hospital increased billings. The 2019-21 budget assumes OHA will improve billing practices as recognized in the previous biennium and identify other solutions, as necessary, to mitigate the Other Funds revenue challenges.

Finally, the budget reflects the collection of an estimated $3.9 billion by the Public Employees Benefit Board and the Oregon Educators Benefit Board from state agencies and educational entities to pay premiums and provide health insurance for members.

Summary of Human Services Subcommittee Action

The Oregon Health Authority (OHA) was created in the 2009 Legislative Session to bring most health-related programs into a single agency to maximize its purchasing power and contain rising health care costs statewide. OHA is overseen by the Oregon Health Policy Board. OHA's mission is to help all people and communities achieve optimum physical, mental, and social well-being through partnerships, prevention, and access to quality, affordable health care. OHA has adopted the triple aim of improving health, increasing quality, and lowering costs of care to achieve its mission. Programs provide medical coverage to low-income individuals and families and to public employees; offer treatment services to persons with mental illness, alcohol or drug addictions; provide support for Oregonians with disabilities; and regulate the state's public health system.

The Subcommittee recommended a budget for the Oregon Health Authority of $2,712,778,022 General Fund, $17,098,000 Lottery Funds, $7,631,526,249 Other Funds expenditure limitation, $12,635,381,436 Federal Funds expenditure limitation, $40,000,000 Other Funds

Nonlimited, and $106,196,261 Federal Funds Nonlimited for a total funds budget of $23,142,979,968 and 4,230 positions (4,200.07 FTE). The budget represents an increase of 25.4 percent General Fund and a total funds increase of 6.0 percent, compared to the 2017-19 Legislatively Approved Budget as of June 2019.

In general, health care costs for the Public Employees' Benefits Board (PEBB) and Oregon Educators Benefits Board (OEBB) continue to be capped at an increase of 3.4 percent per person per year during the 2019-21 biennium, with the exception of the 2.0 percent insurer assessment for PEBB. The budget maintains the existing level of health care benefits in OHP; however, OHP inflationary increases are slightly reduced based on OHA's on-going work to contain health care costs. Subsequent to the Subcommittee's recommendation, an alternative non-caseload savings adjustment will be made in the end of session bill to restore the growth target to the traditional 3.4% while still recognizing the agency's commitment to achieve efficiencies. The recommended budget makes significant investments in mental health and public health programs, and maintains both the Salem and Junction City campuses of the Oregon State Hospital at current capacity. The budget also includes administrative reductions, uses various Other Funds revenues to replace General Fund and incorporates savings that result from program changes.

The Subcommittee incorporated the agency's repricing ("reshoot") adjustments for caseload, federal match rates, and other changes since the current service level budget was developed. Also included are Emergency Board actions taken in the 2017-19 biennium that have an impact on the agency's 2019-21 budget. The changes made by the Subcommittee are described for each program area in more detail below.

Health Systems Division

The Health Systems Division (HSD) is a statewide system of integrated physical, behavioral, and oral health care supporting the triple aim of better health, better care, and lower costs by increasing access to preventative, coordinated care for Oregon's medical assistance program members and behavioral health consumers. The HSD budget is comprised of the following budget units: 1) Medicaid; 2) Non-Medicaid; and 3) Program Support and Administration. HSD Medicaid delivers health services to over one million people, primarily through OHP, which includes Medicaid, the Children's Health Insurance Program (CHIP), and Oregon's Cover All Kids medical coverage. The Non-Medicaid unit includes funds for community mental health and addictions programs for low-income people who do not qualify for Medicaid or to provide services to OHP members not covered by Medicaid. These programs provide a system of comprehensive health services to qualifying low-income Oregonians and their families to improve their health status and promote independence. The Program Support and Administration unit provides the support needed to ensure HSD as the administrative, operational, and information technology resources necessary to fulfill the Division's mission.

In developing HSD's budget, a predominate challenge was the growth in the level of state funds needed to sustain OHP absent any changes to program revenue or reductions in health care services or provider rates. The OHP General Fund budget for current service level represented a net $922 million, or 90 percent, increase from the 2017-19 Legislatively Approved Budget. The increase was primarily a result of decreased federal Medicaid match rates (mostly due to the step down in the match rate for the Affordable Care Act caseload), the statutory sunset of provider assessment Other Funds revenue, as well as Other Funds revenues not keeping pace with inflation costs.

The Subcommittee recommended a total funds budget of $17,246,346,999, including $1,824,601,029 General Fund, $16,824,779 Lottery Funds, $3,255,806,476 Other Funds expenditure limitation, $12,149,114,715 Federal Funds expenditure limitation, and 331 positions (320.13 FTE). The total funds budget is a 6.7 percent increase from the 2017-19 Legislatively Approved Budget as of June 2019. The General Fund budget is an increase of $509.3 million since the 2017-19 biennium, or 38.7 percent. The General Fund recommended budget is 21.3 percent, or $493.3 million, less than the current service level budget for the 2019-21 biennium. In summary, the table below outlines the recommended General Fund adjustments from the Division's 2019-21 current service level:

Recommended General Fund Adjustments from CSL	**General Fund Change** *$ in millions*
Provider Assessments / OHSU IGT	($553.9)
Other Funds Revenue (tobacco; marijuana taxes)	($16.6)
Behavioral Health Investments	$38.9
Provider Rate Increases (Behavioral Health)	$10.0
Caseload - Oregon Health Plan / Non-Medicaid	$33.7
Housing, Targeted Addictions / Health Investments	$8.0
Other Net Adjustments	($13.4)
General Fund Change from CSL	($493.3)

The Subcommittee recommended several packages related to HSD's revenue, program investments, savings, and other budget adjustments. This includes the following packages:

Package 070, Revenue Shortfalls. This package reduces Other Funds expenditure limitation by a total of $8.8 million from estimated changes in the availability of Tobacco Master Settlement Agreement funding, a reduction in the forecast for Tobacco Tax, and the Other Funds revenue not keeping up with inflation costs.

Package 095, December 2018 Emergency Board. This package funds actions by the December 2018 Emergency Board, which impact the 2019-21 biennial budget. This package includes increased Other Funds expenditure limitation for the OHSU Graduate Medical Education Program and a corresponding increase in Federal Funds expenditure limitation, technical adjustments, and the transfer of positions across agency divisions. Overall, this package increases General Fund by $2.7 million, increases Other Funds expenditure limitation by $7.4 million, and increases Federal Funds expenditure limitation by $33.1 million.

The Subcommittee approved several other packages, of which two invest in HSD's IT systems:

Package 202, Medicaid Modularity. The Centers for Medicare and Medicaid Services (CMS) is requiring all states to plan for and implement modular technology solutions supporting Medicaid. This package adds $2.2 million total funds, of which $0.5 million is General Fund, to define Oregon's Medicaid Service Delivery strategic plan, assess other state's modularization approaches, identify options for modular solutions, and begin procurement activities to secure modular solutions components and services to comply with the CMS requirements.

Package 413, Behavioral Health Funding Shortfall. This package invests $9.1 million General Fund to backfill declining Tobacco Tax and Tobacco Master Settlement Agreement funding to continue community mental health and substance abuse disorder services at their current service level.

Package 414, Behavioral Health IT System Project. This package adds $1.5 million General Fund to support the initial stage of OHA's non-Medicaid behavioral health IT system replacement project. The intent of this project is to have a reporting system for behavioral health services which, among other things, will increase the agency's ability to gather data from providers, improve collaboration between agency programs and providers, improve caseload forecasting, and bring the agency current on required state and federal reporting. The agency shall work with the Legislative Fiscal Office (LFO) as well as the Office of the State Chief Information Officer (OSCIO) and the Chief Financial Office at the Department of Administrative Services (DAS) to show readiness to proceed with this project. DAS is requested to unschedule this funding, pending recommendations to proceed from LFO and DAS.

Package 416, CCO 2.0. As OHA continues to advance Oregon's coordinated care model with a new procurement of CCOs, also known as "CCO 2.0," the Subcommittee recommended Package 416, CCO 2.0. This package adds $0.6 million General Fund, increases Other Funds expenditure limitation by $0.1 million, decreased Federal Funds expenditure limitation by $0.1 million and establishes nine positions (6.10 FTE). The package supports the establishment of a reinsurance program for CCOs, as authorized in House Bill 2267 (2019), and staff to support the increased focus included in CCO 2.0. With the new procurement of CCOs, the Subcommittee approved the following Budget Note around the CCO enrollment process:

> **Budget Note:**
> For the enrollment period for the 2020 plan year, the Oregon Health Authority's first priority in assigning members shall be maintaining, to the greatest extent practical, ongoing primary care and behavioral health relationships. After assignment, the agency shall ensure members retain the right to choose a different coordinated care organization, if more than one is available in their area. The agency shall report to interim health care committees on their transition plans before the end of 2019.

The recommended budget includes a number of budget adjustments in Package 801, LFO Analyst Adjustments.

Given the decreases in federal match rates, expiring provider assessments, and other revenue issues impacting OHP, the recommended budget includes increased Other Funds revenues to offset General Fund. First, the Legislature adopted House Bill 2010, which reinstates the insurer assessment at 2.0 percent and broadens it to include stop-loss insurance premiums. The recommended budget includes General Fund savings of $281 million as a result. Second, the budget reflects an increase in the DRG hospital assessment to six percent and an increase in the rural A/B hospital assessment to 5.5 percent, both according to the fully reimbursable assessment model. These increases, which can be done administratively by OHA within certain parameters defined by federal and state law, are based on a January 1, 2020 implementation date. The change to the DRG assessment is estimated to save $98 million General Fund and the change to the rural A/B assessment is estimated to save $33 million General Fund. Lastly, the budget recognizes General Fund savings from multiple budget adjustments related to the OHSU intergovernmental transfer (IGT). This includes an increase to the IGT contribution provided by OHSU, which offsets General Fund costs by $25 million; and a total of $116 million in savings is also achieved through updated IGT revenue estimates in accordance with program growth and through the use of on-going IGT revenue initially considered to be contingency revenue prior to the program's full biennial roll-out.

The recommended budget includes adjustments consistent with forecasted caseload changes. For Medicaid, the Spring 2019 forecast is higher by a net 18,480 compared to the Fall 2018 forecast, which was used to develop the current service level budget. Most caseload categories are forecasted to decrease or not significantly change in comparison to the Fall 2018 forecast. Notably, the Children's Medicaid caseload is expected to decrease by over 5,000. To an extent, this decrease corresponds to a forecasted increase of over 1,200 for the Children's Health Insurance Program caseload, which has a higher income eligibility threshold. In contrast to these and the forecasted changes for other caseloads, the ACA and Parent/Caretaker Relative caseloads are forecasted to increase by approximately 12,300 and 12,600, respectively. The cost of the increase in the ACA caseload is largely supported by Federal Funds given the higher federal match for this population. However, the Parent/Caretaker Relative caseload receives the traditional Medicaid match and requires a much larger amount of state funds. The overall impact of the Spring 2019 forecast for Medicaid is a General Fund cost of $54.9 million and a Federal Funds increase of $231.7 million. The recommended budget also includes a decrease in General Fund of $2.8 million with a reduced level of enrollment in the Cover All Kids program compared to forecasted growth. To help address this reduced enrollment, the Subcommittee recommended an investment in the Community Outreach Program within OHA's Central Services Division.

For non-Medicaid community mental health programs, there are two caseloads that are part of the forecast process in terms of adjustments made to the budget: 1) individuals who have committed a crime and are determined to be guilty except for insanity (GEI); and 2) individuals who have been found by a court to be a danger to themselves or others or unable to provide for their own basic needs due to a mental illness and are civilly committed. Changes in the GEI and civil commitment caseloads impact the level of General Fund provided to county-based community mental health programs. The Spring 2019 forecast results in a slight increase in the GEI caseload, but a decrease in the civil commitment caseload. The result of these caseload changes is a decrease of $18.5 million General Fund. When combined with a $3.1 million General Fund increase at CSL based on the Fall 2018 forecast, the net budget impact for community mental health caseload changes is a decrease of $15.4

million General Fund. Although this budget change is intended to follow the caseload forecast and not impact services, the size of this decrease has raised concerns regarding the potential impact on the community mental health system. As a result, the Subcommittee approved the following Budget Note:

Budget Note:
The Oregon Health Authority, in consultation with the Chief Financial Office of the Department of Administrative Services, the Legislative Fiscal Office, and community mental health programs, shall make recommendations to the 2020 Legislative Assembly about how to update behavioral health caseload forecast methodologies, processes and related funding formulas. At a minimum, the agency shall consider if the price per case accurately captures the cost of community based behavioral health treatment and how caseload methodologies and use of funding incentivizes regionally and nationally recognized best practices, and outcome oriented strategies, to create a more effective system to meet the behavioral health needs of individuals in the community and prevent higher levels of care when appropriate. The agency shall present recommendations to the Legislature by December 1, 2019.

A number of Other Funds revenue adjustments have resulted in less need for General Fund in the budget. This includes a $7.6 million carryover of the remaining unallocated hospital assessment revenues, $6.2 million in increased Tobacco Master Settlement Agreement revenues, $14.2 million from increased marijuana tax revenues, and $2.5 million in carryover Lottery Funds for veteran's behavioral health services. On the other side, the recommended budget includes two increases to the General Fund as a result of decreased Federal or Other Funds revenues. This includes $4.5 million from decreased Tobacco Tax forecasted revenues and $2.7 million from a further decrease in the federal Medicaid match rate.

The recommended budget includes several changes to programs that generate General Fund savings. In order to meet budgetary targets in the 2017-19 biennium, OHA reduced the CCO Quality Incentive Pool for one year—the 2019 quality pool paid to CCOs in 2020. The budget includes a General Fund reduction of $6.7 million to account for the 2019-21 budget impact of that reduction. The Subcommittee's recommendation also decreased the budgeted annual expenditure growth cap to 3.3 percent for savings of $6.7 million General Fund based on OHA's effort to contain costs through the CCO 2.0 initiative. As mentioned above, an alternative non-caseload related savings target was identified subsequent to the Subcommittee's recommendation and will be included in the end of session bill to restore the budgeted expenditure growth cap to 3.4 percent. The Subcommittee approved the following Budget Note related to how the agency will meet the expenditure growth benchmark, with the percentage being updated to 3.4 percent to be consistent with the revised growth target:

Budget Note:
The Oregon Health Authority shall report to the Joint Interim Committee on Ways and Means by February 1, 2020 regarding coordinated care organization capitation rates developed by the agency for the 2020 plan year. At a minimum, the report shall include a comparison of the 2020 rates to the 2019 rates and demonstrate the steps the

agency has taken to achieve its annual 3.4 percent per member growth target. The agency shall report on the extent to which, if any, the Quality Incentive Pool or any other portion of the agency's budget has been used to support capitation payments. By January 1, 2021, the agency shall report the same information to the Joint Interim Committee on Ways and Means or the Emergency Board, but do so for plan year 2021 in comparison to plan years 2020 and 2019.

The Subcommittee recommended $4.5 million General Fund to provide partial biennium support for individuals living in permanent supportive housing units. Part of this funding will remain in HSD to provide wrap-around supports for people experiencing chronic homelessness, with the remainder transferred to Oregon Housing and Community Services (OHCS) to provide rental assistance. This investment corresponds to the planned construction of 500 new permanent supportive housing units, which are not expected to be completed until the last six months of the 2019-21 biennium. Given the delayed timing with the construction of the new units, the Department of Administrative Services is requested to unschedule all of this funding except for the portion transferred to OHCS. Additionally, the recommended budget includes $2.5 million General Fund for Project Nurture, supporting pregnant women and new mothers who struggle with addiction, and $1.0 million General Fund for Project ECHO to increase accessibility to providers. The recommended budget also includes $13.0 million General Fund and $36.3 million Federal Funds expenditure limitation for Behavioral Health providers. One of the goals of this investment is to increase fee-for-service substance use disorder rates by a net 20 percent for both Medicaid and non-Medicaid services. The investment may also increase non-residential mental health rates according to the availability of funds.

Other budget adjustments include an increase of $3.6 million General Fund for payments owed to the federal government for prescription drugs paid under Medicare Part D; an increase of $4.3 million General Fund to continue residential services for clients who do not meet the federal eligibility requirements, however, were previously incorrectly found eligible and have been receiving services; and an increase of $0.1 million General Fund for the Alcohol and Drug Policy Commission. The recommended budget also includes a decrease of $4.5 million to reverse the one-time investment for transitioning OHP clients eligible for both Medicaid and Medicare from fee-for-service coverage to opting-in to CCO enrollment and also includes a decrease of $3.6 million General Fund to reverse the phase-in of increased coverage for Hepatitis C treatment.

As part of Package 802, $50 million General Fund behavioral health package, the HSD budget recommendation includes $31.3 million to support investments related to recommendations from the Children and Youth with Specialized Needs workgroup, as well as other targeted behavioral health investments. This includes:

- $1.0 million General Fund and two positions (1.50 FTE) for the System of Care Advisory Council,
- $6.6 million General Fund and $13.1 million Federal Funds expenditure limitation for Intensive In-Home Behavioral Health Services,
- $3.1 million General Fund for crisis and transition services,
- $7.6 million General Fund for community based services for Aid and Assist clients to alleviate the caseload pressure on the Oregon State Hospital,

- $3.0 million General Fund and $8.4 million Federal Funds expenditure limitation for Behavioral Health provider rates (included in the dollar amounts cited above for increasing provider rates), and
- $10 million General Fund for school-based mental health consultation and treatment services and suicide prevention.

Health Policy and Analytics

Health Policy and Analytics (HPA) includes offices providing policy support, technical assistance, and access to health information statistics and tools to all organizations and providers participating in Oregon's health system transformation, including programs within OHA. Together these offices provide services focused on achieving the triple aim of better health, better care, and lower costs. Programs included within HPA include the Office of Health Policy, Office of Health Analytics, the Office of Clinical Improvement Services, Office of Health Information Technology, and Office of Health Information Technology. HPA is supported by General Fund matched with federal Medicaid dollars. The office also receives Federal Funds through the CMS Adult Medicaid Quality grant, the Health Resources and Services Administration Primary Care grant, and Health Information Technology Electronic Health Records funds.

The Subcommittee recommended a total funds budget of $192,247,320, which includes $46,863,282 General Fund, $24,912 Lottery Funds, $31,047,462 Other Funds expenditure limitation, $114,311,664 Federal Funds expenditure limitation, and 154 positions (144.84 FTE). The recommended total funds budget is 0.2 percent lower than the 2017-19 Legislatively Approved Budget as of June 2019. The recommended budget includes the following packages:

Package 095, December 2018 Rebalance. This package adds $9.8 million Other Funds to reflect revenue provided by the Oregon Health Science University (OHSU) as part of the Healthy Oregon Workforce Training Opportunity Grant program and a reduction of $13.8 million to account for the suspension of the Common Credentialing Program. This package also incorporates technical adjustments and transfers made during the December 2018 meeting of the Emergency Board. The package results in an overall General Fund decrease of $3.5 million, Other Funds expenditure limitation decrease of $4.1 million, Federal Funds expenditure limitation decrease of $1.3 million and a decrease of 13 positions (12.50 FTE).

Package 411, Mental Health Clinical Advisory Group. This package increases General Fund by $396,907 and includes federal Medicaid matching funds to support the Mental Health Clinical Advisory Group, which was re-established by Senate Bill 138 (2019). This adjustment also includes two positions to support the ongoing work of the group.

Package 416, CCO 2.0. This package adds $2.2 million total funds, of which $1.3 million is General Fund, to support OHA's on-going work to advance Oregon's coordinated care model, also known as "CCO 2.0," to support eight new positions (6.28 FTE). These positions will be responsible for helping develop and implement value-based payment models, address social determinants of health and equity, and improve cost containment and financial accountability across the system. This adjustment also includes $150,000 General Fund to process and analyze

emergency department discharge abstract records, as authorized in Senate Bill 23 (2019). Additional positions and adjustments related to CCO 2.0 are recommended as part of the Health Systems Division budget.

Package 801, LFO Analyst Adjustments. OHA received funding in 2017-19 to support providers connecting to health information exchange entities. The Subcommittee recommended one-time support of $0.4 million General Fund, which represents the amount of unspent funds from the 2017-19 biennium, to finish this work in 2019-21. These dollars will leverage federal Medicaid funding at a 90 percent match rate.

Package 802, $50M Behavioral Health Investment. As part of the $50 million General Fund behavioral health investment, this package makes a number of investments in the state's behavioral health system across multiple state programs. For HPA, this package includes an increase of $0.3 million General Fund and related federal matching dollars to support two positions responsible for identifying, monitoring, and regulating behavioral health homes, as authorized in Senate Bill 23 (2019).

Public Employees' Benefit Board

The Public Employees' Benefit Board (PEBB) designs, contracts for and administers health plans, group insurance policies, and flexible spending accounts for state employees and their dependents, representing over 130,000 Oregonians. PEBB is entirely funded with Other Funds through premiums collected for all insured individuals. Premiums are collected from agencies, universities, and self-pay members to directly cover the costs of the plans. Although PEBB's budget is reflected entirely as Other Funds, the agency receives its revenue from public employee health care premium payments, of which nearly 45 percent is paid with General Fund.

The Subcommittee recommended an Other Funds budget of $2,116,635,989 and 20 positions (19.50 FTE). The budget represents a 3.4 percent funding increase over the 2017-19 Legislatively Approved Budget. The budget continues to hold PEBB's base program expenditure growth at 3.4 percent per employee per year, with the exception of the 2.0 percent premium assessment included in House Bill 2010 (2019). The Subcommittee recommended the following packages:

Package 421 – OEBB/PEBB Benefit Management System. This package increases Other Funds expenditure limitation by $0.9 million and establishes two positions (2.00 FTE) to support the planning stage of a project to replace the benefit management systems used by PEBB and the Oregon Educators Benefit Board (OEBB) with an integrated system. The agency shall work with the Legislative Fiscal Office (LFO) as well as the Office of the State Chief Information Officer (OSCIO) and the Chief Financial Office at the Department of Administrative Services (DAS) to show progress in planning for this project. DAS is requested to unschedule this funding and reschedule funding as progress is made on this project. A similar adjustment is recommended in the OEBB budget.

Package 801 – LFO Adjustments. This package, in total, increases Other Funds expenditure limitation by $17.0 million and eliminates one position (1.00 FTE), which provides expenditure limitation for the continuation of the insurer assessment at two percent, in accordance with House Bill 2010 (2019). The limitation associated with the two percent assessment is $17.2 million Other Funds. The package also makes

technical adjustments resulting in a decrease of $0.2 million Other Funds expenditure limitation through the transfer of one position (1.00 FTE) to the Office of Information Services.

Oregon Educators Benefit Board

The Oregon Educators Benefit Board (OEBB) administers medical, dental, vision, and other benefits for Oregon's school districts, community colleges, and education service districts. Cities, counties, and special districts are also eligible to join the OEBB benefits program. OEBB designs and maintains a full range of benefit plans for eligible and participating entities to offer their employees and early retirees. OEBB is entirely funded with Other Funds revenue from premium payments, which OEBB then expends to purchase insurance plans.

The Subcommittee approved a budget of $1,740,199,515 Other Funds expenditure limitation and 20 positions (20.00 FTE). The budget represents a 1.8 percent increase compared to the 2017-19 Legislatively Approved Budget. As with PEBB, the 2019-21 budget continues to hold OEBB core program expenditure growth at 3.4 percent per employee per year. As pharmaceutical costs continue to put pressure on both OEBB and PEBB costs, the Subcommittee recommended the following Budget Note:

> **Budget Note:**
> The Public Employees' Benefit Board and Oregon Educators Benefit Board shall pursue additional pharmacy cost savings tools that provide members individualized information on their costs paired with quality and plan cost information to help encourage consumerism and save the boards' employers money on their prescription costs.

The recommended budget includes the following packages:

Package 421, OEBB/PEBB Benefit Management System. The package increases Other Funds expenditure limitation by $0.9 million and establishes two positions (2.00 FTE) to support the planning stage of a project to replace the benefit management systems used by OEBB and the Public Employees' Benefit Board (PEBB). The agency shall work with the Legislative Fiscal Office (LFO), as well as the Office of the State Chief Information Officer (OSCIO) and the Chief Financial Office at the Department of Administrative Services (DAS) to show progress in planning for this project. DAS is requested to unschedule this funding and reschedule funding as progress is made on this project. A similar adjustment is recommended in the PEBB budget.

Package 801, LFO Analyst Adjustments. This package decreases Other Funds expenditure limitation by $0.2 million, which reflects the transfer of one position (1.00 FTE) to the Office of Information Services.

Public Health

Public Health administers a variety of programs addressing behavioral and social drivers of health by working to ensure physical and social environments promote health and make it easier for people to make healthy choices. Public Health programs can complement investments in

health care programs by focusing on prevention and have the potential to reduce the need for costly health care services. Oregon's public health system includes federal, state, counties and local agencies, private organizations and other partners. Public Health operates some programs directly and funds and coordinates other programs through local health departments across the state.

The Subcommittee recommended a budget for Public Health of $730,159,914 total funds, which includes $92,315,337 General Fund, $218,382,068 Other Funds expenditure limitation, $40,000,000 Other Funds Nonlimited, $276,733,458 Federal Funds expenditure limitation, $102,729,051 Federal Funds Nonlimited, and 763 positions (753.89 FTE). The budget represents a total funds increase of 11.8 percent and a General Fund increase of 41.3 percent compared to the 2017-19 Legislatively Approved Budget as of June 2019. The change in General Fund is largely due to increased support for Public Health Modernization, new funding for a voluntary universal home visiting program, and the backfill of declining medical marijuana revenue. The recommended budget includes the following packages:

Package 081, September 2018 Eboard Actions. This package reflects the 2019-21 biennium effect of actions taken at the September 2018 meeting of the Emergency Board, increasing General Fund by $0.2 million and establishing one position (1.00 FTE) for the Drinking Water Services program.

Package 095, December 2018 Rebalance. This package reflects the 2019-21 biennium effect of actions taken at the December 2018 meeting of the Emergency Board. The package increases General Fund by $0.7 million, increases Other Funds expenditure limitation by $17.6 million, increases Federal Funds expenditure limitation by $11.8 million and adds nine positions (9.50 FTE). The increase in General Fund and Other and Federal Funds expenditure limitation is for various grants received by the agency, returning the Wallowa County Public Health program to OHA, adjusting limitation for the Immunization project, truing up positions within the program, and other transfers and technical adjustments.

Package 401, Universal Home Visiting. This package increases General Fund by $2.9 million, increases Federal Funds expenditure limitation by $1.8 million and establishes four positions (3.00 FTE) to implement a new voluntary universal nurse home visiting program for families with newborns. In order for coverage of these services to be available for all Oregon families, Senate Bill 526 (2019) requires health benefit plans offered in Oregon to reimburse the cost of the newborn home visiting services without any cost-sharing. For those who do not have health care through the commercial market, OHA is seeking a Medicaid State Plan Amendment for these services to be available to families who receive health care through the Oregon Health Plan. The Public Health Division will design the program consistent with the Family Connects home visiting model and implement it over a three-biennia period.

Package 405, Public Health Modernization. This package increases General Fund by $10.0 million, increases Federal Funds expenditure limitation by $0.3 million and establishes six positions (5.28 FTE) to advance Public Health Modernization activities. The additional investment will increase communicable disease prevention and response activities, support efforts to improve health equity, increase emergency response planning, and help develop tribal modernization plans, among other key modernization priorities.

Package 417, State Support for Local Public Health. This package reduces Other Funds expenditure limitation by $5.5 million and increases General Fund by the same amount. The General Fund is being used to backfill declining medical marijuana revenue that is used to support local public health authorities. In the past, this revenue had been used to replace General Fund in several core public health programs, including support for local public health authorities, Drinking Water Services, Emergency Medical Services, and others. Laws passed during the 2015, 2016 and 2017 Legislative Sessions related to recreational marijuana have significantly reduced medical marijuana program revenue. In 2017-19, the Legislature approved $12.1 million General Fund to mitigate this issue across multiple Public Health programs, leaving state support for local public health authorities as the last non-medical marijuana program to still have a budget dependent on this revenue stream.

Package 418, Drinking Water Services Fees. This package increases Other Funds expenditure limitation by $1.9 million and establishes five positions (5.00 FTE) related to revised Drinking Water Services fees in Senate Bill 27 (2019).

Package 419, Food, Pool, & Lodging fees. This package increases Other Funds expenditure limitation by $0.1 million related to increased food, pool, and lodging fees in Senate Bill 28 (2019).

Package 420, Toxic Fee Kids Program. This package increases Other Funds expenditure limitation by $0.1 million through the establishment of a waiver application fee through the administrative rules process for the Toxic Free Kids program.

Package 801, LFO Analyst Adjustments. This package decreases General Fund by $0.2 million, increases Other Funds expenditure limitation by $12.0 million and reduces the program by one position (1.00 FTE). The package includes technical adjustments, vacancy savings of $0.2 million General Fund and recognizes a decrease of $266,426 in tobacco tax revenue available for tobacco prevention and cessation programs based on the May 2019 revenue forecast. The package also trues up the limitation for CARE Assist and adjusts limitation for the Oregon Medical Marijuana Program.

Oregon State Hospital

The Oregon State Hospital (OSH) is an integral part of the statewide behavioral health system by providing psychiatric care for adults from all 36 counties at OSH's Salem and Junction City campuses. The hospital's primary goal is to help people recover from their mental illness and return to life in their communities. The hospital has gone through significant programmatic changes in the past several years, underscored by the closure of the Blue Mountain Recovery Center in Pendleton and the Portland campus. The two remaining campuses have the capacity to serve up to 766 individuals, with 592 beds in Salem and 174 beds in Junction City.

During the 2017-19 biennium, the hospital initiated an effort to increase insurance reimbursements, primarily in Medicare. This effort, however, has not realized the level of reimbursement revenues originally anticipated. The OSH 2017-19 legislatively approved budget included an additional $40.5 million Other Funds with a reduction of General Fund of $30 million. Due to significant delays and challenges in implementing the needed billing infrastructure and staffing set-backs, reimbursements have fallen short. The recommended budget continues to rely on

increased revenues from reimbursements for the 2019-21 biennium, due to the hospital's ongoing work to assess and resolve these challenges. In the interim, the agency shall continue to monitor revenue collections for the hospital, and report to LFO and DAS CFO on progress. The agency shall also include updates on revenues collected and present other solutions, as needed, to address the revenue shortfall in each 2019-21 Budget Rebalance Report submitted to the Legislature.

The budget approved by the Subcommittee is $608,572,863 total funds, which includes $499,314,517 General Fund, $70,328,792 Other Funds expenditure limitation, $38,929,554 Federal Funds expenditure limitation, 2,284 positions (2,283.82 FTE). The recommended total funds budget is 4.9 percent higher than the 2017-19 Legislatively Approved Budget. The General Fund budget decreased 1.9 percent as the hospital addresses the challenges relating to generate increasing amounts of Other Funds revenue through Medicare billing. The recommended budget includes the following packages:

Package 095, December 2018 Rebalance. This package reflects the 2019-21 biennium effect of actions taken at the December 2018 meeting of the Emergency Board; which made program transfers between OHA divisions and also reclassified positions with a net zero impact to the hospital.

Package 801, LFO Analyst Adjustments. This package includes three adjustments related to current costs in the hospital for an overall increase of $4.5 million General Fund. This includes a General Fund increase of $1.0 million to support ligature removal, facility alterations, and other environmental changes to reduce the risk of patient injury and suicide. This investment is consistent with conforming to heightened safety requirements by the Centers for Medicare and Medicaid and The Joint Commission. The package also includes an increase of $1.6 million General Fund for hepatitis C treatment and $1.9 million General Fund to pay for contractual nursing staff shift differential costs.

Central Services, Shared Services, and State Assessments and Enterprise-wide Costs

Core administrative functions for OHA are divided into Central Services, Shared Services, and State Assessments and Enterprise-Wide Costs (SAEC). Central Services proved the leadership and business support for the agency's mission, such as the director's office, external relations, agency operations, fiscal division, and the Office of Equity and Inclusion. Shared Services supports certain business functions for both OHA and the Department of Human Services regardless of where each function is housed. OHA Shared Services contains the Office of Information Services and the Information Security and Privacy Office. SAEC is the budget structure for payments to Department of Administrative Services (DAS) and third parties for goods and services that serve the whole agency, such as facility rents, state data center charges, DAS risk assessment, DAS government services charges, unemployment assessments, mass transit taxes, computer replacement, and debt service. SAEC is funded based on cost allocation statistics, which determine the distribution of expenditures to OHA and DHS Shared Services and the revenue distribution by General Fund, Other Funds limited and Federal Funds limited.

The Subcommittee's recommended budget for these administrative functions is $508,817,368 total funds, which includes $249,683,857 General Fund, $248,309 Lottery Funds, $199,125,947 Other Funds expenditure limitation, $56,292,045 Federal Funds expenditure limitation, $3,467,210

Federal Funds Nonlimited, and 658 positions (657.89 FTE). The budget represents a total funds increase of 5.1 percent and General Fund increase of 9.5 percent compared to the 2017-19 Legislatively Approved Budget as of June 2019. The recommended budget includes the following packages:

Package 070, Revenue Shortfalls. This package reduces Other Funds expenditure limitation by $2.7 million and reduces Federal Funds expenditure limitation by $2.4 million to align expenditure limitation with the level of revenue available and needed to support SAEC costs.

Package 095, December 2018 Rebalance. This package reflects the 2019-21 biennium effect of actions taken at the December 2018 meeting of the Emergency Board. The package increases General Fund by $0.5 million, increases Other Funds expenditure limitation by $27,164, increases Federal Funds expenditure limitation by $0.2 million and adds five positions (5.00 FTE). A key component in this package is the expansion of the Ombudsman Program.

Package 208, Centralized Abuse Management System. This package adds $0.4 million in Other Funds expenditure limitation to support the ongoing maintenance and additional enhancements of the DHS Centralized Abuse Management System. This is the OHA portion of this package for the Shared Services Office of Information Services, the funding for the package is included in the DHS 2019-21 budget.

Package 801, LFO Analyst Adjustments. This package adds $5.8 million General Fund, increases Other Funds expenditure limitation by $0.7 million, increases Federal Fund expenditure limitation by $4.2 million and adds 33 positions (33.78 FTE). The recommendation reduces budgeted inflation by $1.2 million General Fund as a cost-savings measure; trues-up position counts (no dollar impact); and adjusts Other Funds expenditure limitation to reflect the Shared Services component of the Centralized Abuse Management System. The Community Partner Outreach Program was transferred from OHA to the Department of Human Services (DHS) as part of the transfer of Medicaid eligibility services in 2017-19. Based on the subsequent determination by DHS and OHA that this program was not sufficiently related to Medicaid eligibility determinations, the program has been returned to OHA. This includes the transfer of $5.0 million General Fund and 21 positions from DHS to OHA. In addition to the return of this program to OHA, the budget adds one-time support of $2.4 million General Fund to increase outreach for the Cover All Kids program.

Package 803, Comprehensive CW Info System. This package increases Other Funds expenditure limitation by $2.8 million and establishes nine positions (9.00 FTE). This package adjusts Other Funds expenditure limitation to reflect the Shared Services component of the Child Welfare Information Systems Project, which is funded in the DHS budget.

Summary of Maximum Supervisory Ratio

The Subcommittee reviewed the agency's proposed Maximum Supervisory Ratio of 1:8.36.

Summary of Performance Measure Action

See attached "Legislatively Approved 2019-2021 Key Performance Measures."

DETAIL OF JOINT COMMITTEE ON WAYS AND MEANS ACTION

Oregon Health Authority
Kate Nass - 503-378-5442

DESCRIPTION	GENERAL FUND	LOTTERY FUNDS	OTHER FUNDS LIMITED	OTHER FUNDS NONLIMITED	FEDERAL FUNDS LIMITED	FEDERAL FUNDS NONLIMITED	TOTAL ALL FUNDS	POS	FTE

Legislatively Approved 2019 - 2021 Key Performance Measures

Published: 6/20/2019 2:30:44 PM

Agency: Oregon Health Authority

Mission Statement:

Helping people and communities achieve optimum physical, mental and social well-being through partnerships, prevention and access to quality, affordable health care.

Legislatively Approved KPMs	Metrics	Agency Request	Last Reported Result	Target 2020	Target 2021
1. INITIATION OF ALCOHOL AND OTHER DRUG DEPENDENCE TREATMENT - Percentage of members with a new episode of alcohol or other drug dependence who received initiation of AOD treatment within 14 days of diagnosis.		Approved	36.50%	40.20%	40.20%
2. ENGAGEMENT OF ALCOHOL AND OTHER DRUG DEPENDENCE TREATMENT - Percentage of members with a new episode of alcohol or other drug dependence who received two or more services within 30 days of initiation visit.		Approved	11.30%	11%	11%
3. FOLLOW-UP AFTER HOSPITALIZATION FOR MENTAL ILLNESS - Percentage of enrollees 6 years of age and older who were hospitalized for treatment of mental health disorders and who were seen on an outpatient basis or were in intermediate treatment within seven days of discharge.		Approved	84.70%	72%	72%
4. MENTAL, PHYSICAL, AND DENTAL HEALTH ASSESSMENTS FOR CHILDREN IN DHS CUSTODY - Percentage of children in DHS custody who receive a mental, physical, and dental health assessment within 60 days of the state notifying CCOs that the children were placed into custody with DHS (foster care).		Approved	82.80%	90%	90%
5. FOLLOW-UP CARE FOR CHILDREN PRESCRIBED WITH ADHD MEDICATION (INITIATION) - Percentage of children newly prescribed attention-deficit/hyperactivity disorder (ADHD) medication who had at least three follow-up care visits within a 10-month period, one of which was within 30 days of when the first ADHD medication was dispensed		Approved	64%	54%	54%
6. FOLLOW-UP CARE FOR CHILDREN PRESCRIBED WITH ADHD MEDICATION (CONTINUATION AND MAINTENANCE) - Percentage of children newly prescribed attention-deficit/hyperactivity disorder (ADHD) medication who had at least three follow-up care visits within a 10-month period, one of which was within 30 days of when the first ADHD medication was dispensed		Approved	75.40%	65%	65%
7. 30 DAY ILLICIT DRUG USE AMONG 6TH GRADERS - Percentage of 6th graders who have used illicit drugs in the past 30 days.		Approved	1.80%	1.30%	1.30%
8. 30 DAY ALCOHOL USE AMONG 6TH GRADERS - Percentage of 6th graders who have used alcohol in the past 30 days.		Approved	4.50%	3.50%	3.50%
9. 30 DAY ILLICIT DRUG USE AMONG 8TH GRADERS - Percentage of 8th graders who have used illicit drugs in the past 30 days.		Approved	8.20%	6%	6%
10. 30 DAY ALCOHOL USE AMONG 8TH GRADERS - Percentage of 8th graders who have used alcohol in the past 30 days.		Approved	15.40%	13%	13%
11. 30 DAY ILLICIT DRUG USE AMONG 11TH GRADERS - Percentage of 11th graders who have used illicit drugs in the past 30 days.		Approved	20.40%	16.50%	16.50%
12. 30 DAY ALCOHOL USE AMONG 11TH GRADERS - Percentage of 11th graders who have used alcohol in the past 30 days.		Approved	29%	26%	26%

Legislatively Approved KPMs	Metrics	Agency Request	Last Reported Result	Target 2020	Target 2021
13. PRENATAL CARE (POPULATION) - Percentage of women who initiated prenatal care in the first 3 months of pregnancy.		Approved	79.90%	91%	91%
14. PRENATAL CARE (MEDICAID) - Percentage of women who initiated prenatal care within 42 days of enrollment.		Approved	90.60%	91%	91%
15. PATIENT CENTERED PRIMARY CARE HOME (PCPCH) ENROLLMENT - Number of members enrolled in patient-centered primary care homes by tier.		Approved	70.10%	100%	100%
16. PQI 01: Diabetes Short-Term Complication Admission Rate		Approved	205.30	138	138
17. PQI 05: COPD or Asthma in Older Adults Admission Rate		Approved	516.80	404	404
18. PQI 08: Congestive Heart Failure Admission Rate		Approved	293.40	230	230
19. PQI 15: Asthma in Younger Adults Admission Rate		Approved	43	47.50	47.50
19. ACCESS TO CARE - Percentage of members who responded "always" or "usually" too getting care quickly (composite for adult and child).		Approved	84.20%	88%	88%
20. MEMBER EXPERIENCE OF CARE - Composite measurement: how well doctors communicate; health plan information and customer service (Medicaid population).		Approved	84.20%	90%	90%
21. MEMBER HEALTH STATUS - Percentage of CAHPS survey respondents with a positive self-reported rating of overall health (excellent, very good, or good).		Approved	68.90%	68.90%	68.90%
22. RATE OF TOBACCO USE (POPULATION) - Rate of tobacco use among adults.		Approved	20.45%	15%	15%
23. RATE OF TOBACCO USE (MEDICAID) - Percentage of CCO enrollees who currently smoke cigarettes or use tobacco every day or some days.		Approved	27.80%	25%	25%
24. RATE OF OBESITY (POPULATION) - Percentage of adults who are obese among Oregonians.		Approved	29%	27%	27%
25. EFFECTIVE CONTRACEPTIVE USE (POPULATION) - Percentage of reproductive age women who are at risk of unintended pregnancy using an effective method of contraception.		Approved	67.70%	70%	70%
26. EFFECTIVE CONTRACEPTIVE USE (MEDICAID) - Percentage of reproductive age women who are at risk of unintended pregnancy using an effective method of contraception.		Approved	45.70%	58.20%	58.20%
27. FLU SHOTS (POPULATION) - Percentage of adults ages 50-64 who receive a flu vaccine.		Approved	51%	70%	70%
28. CHILD IMMUNIZATION RATES (POPULATION) - Percentage of children who are adequately immunized (immunization series 4:3:1:3:3:1:4).		Approved	66%	80%	80%
29. CHILD IMMUNIZATION RATES (MEDICAID) - Percentage of children who are adequately immunized (immunization series 4:3:1:3:3:1:4).		Approved	73.20%	82%	82%
30. PLAN ALL CAUSE READMISSIONS - Percentage of acute inpatient stays that were followed by an acute readmission for any diagnosis within 30 days and the predicted probability of an acute readmission for members 18 years and older.		Approved	9.40%	10.50%	10.50%
31. ELIGIBILITY PROCESSING TIME - Median number of days processing time from date of request to eligibility determination.		Approved	1	31	31
32. OHP MEMBERS IN CCOs - Percent of Oregon Health Plan members enrolled in Coordinated Care Organizations.		Approved	85%	88%	88%

Legislatively Approved KPMs	Metrics	Agency Request	Last Reported Result	Target 2020	Target 2021
33. CUSTOMER SERVICE - Percentage of OHA customers rating their satisfaction with the agency's customer service as "good" or "excellent" overall, timeliness, accuracy, helpfulness, expertise, availability of information.	Overall	Approved	86%	95%	95%
	Accuracy		86%	95%	95%
	Availability of Information		77%	95%	95%
	Expertise		87%	95%	95%
	Helpfulness		90%	95%	95%
	Timeliness		86%	95%	95%

LFO Recommendation:

Approve KPMs as proposed. Approve targets for 2020 and 2021 as proposed. The Metrics and Scoring Committee sets the official targets for a number of these measures. Any changes to the targets should be reported to LFO when available.

SubCommittee Action:

The Human Services Subcommittee approved the Key Performance Measures and targets.

Summary of Revenue Changes

Senate Bill 5544 rebalances the Oregon Health Authority's (OHA) 2017-19 biennial budget. OHA programs are funded with a mix of General Fund, Lottery Funds, Other Funds, and Federal Funds. In December of 2018, the Emergency Board recommended $11.9 million General Fund be unscheduled from the agency's budget. The approved rebalance results in a net increased need of General fund and re-schedules $8.2 million General Fund, primarily to cover costs in the Oregon State Hospital as the hospital has not realized projected Other Funds revenues for the biennium. The rebalance also reduces General Fund by $3.7 million.

In addition to the General Fund changes, the approved rebalance includes net increases to the agency's Other Funds and Federal Funds revenues by $10.2 million and $125.4 million, respectively. In particular, federal Medicaid revenues are increasing for the Oregon Health Plan

with increases in the Affordable Care Act (ACA) caseload and increased costs within the program. The rebalance adjusts Other Funds revenue; which includes decreased forecasted Tobacco Tax revenues, decreased projected Medicare revenue collections within the Oregon State Hospital, and increased CARE Assist program prescription drug insurance claims revenues.

Summary of Human Services Subcommittee Action

The Human Services Subcommittee approved a budget rebalance that supports Oregon Health Authority (OHA) programs and operations for the remainder of the 2017-19 biennium. The rebalance reflects program cost increases and savings, revenue changes, and technical adjustments needed to ensure OHA's budget remains in balance. Based on recommendations at the December 2018 meeting of the Emergency Board, $11,879,295 General Fund remains unscheduled in OHA's 2017-19 budget. The approved rebalance reduces General Fund by $3,651,103 and requests the Department of Administrative Services reschedule $8,228,192 General Fund. Additionally, the rebalance increases expenditure limitation for Other Funds by $10,156,765 and for Federal Funds by $125,409,493.

Health Systems Division

The rebalance approved by the Subcommittee includes several cost and saving adjustments within the Health Systems Division (HSD), resulting a net a General Fund decrease of $7.1 million, Other Funds increase of $11.7 million, and Federal Funds increase of $122.9 million.

The rebalance includes forecasted increases in Medicaid caseloads, an increase in Other Funds revenues that offset the need for General Fund, administrative savings, and updates to program costs in the division. The updated Spring 2019 caseload forecast results in a net increase of 2,766 individuals compared to the Fall 2018 forecast. The increase in caseload is primarily driven by the Affordable Care Act (ACA) and Parent/Caretaker Relative caseloads. The cost of the increase in the ACA caseload is largely Federal Funds given the higher federal match for this population. However, the Parent/Caretaker Relative caseload receives the traditional Medicaid match thus requiring additional state funding. The financial impact of the caseload changes in the Spring 2019 forecast results in a cost increase of $5.0 million General Fund and $25.9 million Federal Funds. Additionally, the March 2019 revenue forecast for tobacco tax dedicated to the Oregon Health Plan and non-Medicaid mental health services is expected to decrease by $2.9 million; and in order to maintain existing level of services, the rebalance increases General Fund by $2.9 million. These increased General Fund costs are offset by a $6.5 million General Fund savings from updated cash flow projections for Other Funds revenues, lower than expected increase of Medicare Part B premiums, and lower "clawback" payments owed to the federal government for prescription drugs paid under Medicare Part D.

Also included in the rebalance for HSD are a number of program costs and savings for the 2017-19 biennium.

- In 2017, the Medicaid State Plan for home and community-based services was updated to manage individuals with chronic mental illness separately from other individuals who qualify for these services. With this change, 44 clients were identified who do not meet the federal eligibility requirements, however, had been enrolled and receiving services. This approved rebalance includes an increase in General

Fund of $4.0 million as the state must repay the federal government for Medicaid match provided and provides funding to continue to support these vulnerable clients.

- Based on a review of Medicaid payments made to coordinated care organizations (CCOs) from 2014 through 2018, clients who were dually eligible for both Medicaid and Medicare were incorrectly determined to be eligible for only Medicaid. This resulted in OHA over-claiming federal match and paying higher capitation rates than should have been paid. The rebalance includes $5.0 million General Fund and $9.9 million Other Funds from previously carried over tobacco tax revenue to reimburse the federal government for the over-claimed match.
- As part of the Medicaid waiver renewal in 2017, Oregon Health Plan clients eligible for both Medicaid and Medicare are transitioning from being enrolled in fee-for-service coverage and opting-in to CCO enrollment to enrolling in a CCO and opting-out for fee-for-service coverage. Due to one-time transitional overlap in CCO and fee-for-service payments, the legislature approved a one-time investment of $4.3 million General Fund in the division's 2017-19 budget; however due to a delay in the implementation, most of the population was not enrolled resulting in a decreased need of $3.1 million General Fund for 2017-19.
- The 2017-19 budget included $2.5 million in tobacco tax revenue for veterans' behavioral health services, however OHA anticipates using only $0.5 million. Since the agency's 2019-21 current service level budget continues the $2.5 for these services, the rebalance uses the $2.0 million unspent tobacco tax revenue for other non-Medicaid mental health services, resulting in a General Fund savings.
- The rebalance includes $13.8 million General Fund savings from administrative actions within HSD. This includes $4.8 million in Personal Services savings from vacant positions across the division, $6.7 million from increased Other Funds revenue through global settlements paid primarily by large drug manufacturers, and $2.3 million from procurement delays in the Program Integrity Unit.
- Hospital assessment revenue approved in the 2015-17 biennial budget, and carried over into the 2017-19 budget, supports the Rural Hospital Initiative Program. The funding will not be fully expended and the rebalance reduces Other Funds expenditure limitation by $1.7 million with the agency's request to carryover the $1.7 million balance to 2019-21 budget.
- The rebalance increases Federal Funds expenditure limitation by $0.5 million based on OHA's receipt of the Promoting Integration of Primary and Behavioral Health Care federal grant.

Oregon State Hospital

The approved rebalance for the Oregon State Hospital (OSH) reflects General Fund costs of $17.9 million, a decrease in Other Funds expenditure limitation of $14.1 million, and an increase in Federal Funds expenditure limitation of $2.6 million.

During the 2017-19 biennium, the hospital initiated an effort to increase insurance reimbursements, primarily in Medicare, however has not realized the level of reimbursement revenues anticipated. The OSH 2017-19 legislatively approved budget included an additional $40 million Other Funds with a reduction of General Fund of $30 million. Due to significant delays in implementing the needed billing infrastructure and

staffing set-backs, reimbursements have fallen short. The December 2018 Emergency Board increased General Fund for the hospital by $15 million based on projections in late 2018. The rebalance backfills the additional revenue shortfall with General Fund which is partially offset by increased federal revenues. The approved rebalance increases General Fund by $11.5 million, decreases Other Funds by $14.1 million, and increases Federal Funds by $2.6 million.

In addition to the revenue shortfall at the hospital, staffing costs continue to increase due to increased patient acuity and corresponding enhanced staff-to-patient ratios, as well as a high volume of daily call-outs and long-term absences. The rebalance increases General Fund by $5.6 million to cover the increased staffing costs. The rebalance also includes $0.8 million General Fund for suicide prevention and ligature removal costs to ensure patient safety and maintain compliance with federal standards. Lastly, the rebalance includes a technical adjustment transferring $1.5 million General Fund from the OSH to HSD. This funding was recommended by the Emergency Board at the December 2018 meeting to invest in community programs aimed at reducing the number of Aid and Assist patients sent to the hospital; however the funding is being managed by the HSD.

Health Policy and Analytics

The rebalance approved by the sub-committee for the Health Policy and Analytics division recognizes $1.1 million in General Fund savings. This includes $0.5 million in Personal Services savings due to staffing vacancies and hiring delays. Another $0.4 million results from the underspending on Health Information Exchange activities. The remaining $0.2 million savings is from the close-out of the Common Credentialing project. This project was intended to streamline the credentialing processes for health care practitioners; however the project was suspended in July 2018 due to significant challenges with implementing a cost-effective program beneficial to stakeholders.

Public Health

The approved rebalance increases Other Funds expenditure limitation for the Public Health division by $12.5 million. Of this amount, $11.6 million is due to increased spending in the CARE Assist Program, which helps people living with HIV or AIDS pay for medical care. The program implemented the End HIV Oregon project in 2017-19, which increased expenditures for contracts and medical supplies and services. The Other Funds revenue is available from prescription drug insurance claims. The remaining $0.9 million is related to the Oregon Medical Marijuana Program to account for the cannabis tracking fee collected in the division and transferred to the Oregon Liquor Control Commission.

Oregon Legislative Emergency Board

Sen. Peter Courtney, Senate Co-Chair
Rep. Tina Kotek, House Co-Chair

Certificate

March 9, 2020

Pursuant to the provisions of ORS 291.328, and acting under the authority of ORS 291.326(1)(a), (b), (c), and (d); ORS 291.371; and ORS 291.375; this hereby certifies that the Emergency Board, meeting on March 9, 2020, took the following actions:

Housing and Community Services Department
Established a General Fund appropriation by allocating $2,000,000 from the Emergency Fund established by section 1, chapter 644, Oregon Laws 2019, to the Housing and Community Services Department for development of new affordable housing units for Umatilla County flood victims, including residents of the Umatilla Indian reservation.

Housing and Community Services Department
Established a General Fund appropriation by allocating $1,500,000 from the Emergency Fund established by section 1, chapter 644, Oregon Laws 2019, to the Housing and Community Services Department for the provision of rapid rehousing, including rental assistance, to victims of February 2020 flooding in Umatilla County, including residents of the Umatilla Indian reservation.

Housing and Community Services Department
Established a General Fund appropriation by allocating $4,000,000 from the Emergency Fund established by section 1, chapter 644, Oregon Laws 2019, to the Housing and Community Services Department to replace housing and infrastructure damaged or lost in Umatilla County or on the Umatilla Indian reservation, due to flooding in February, 2020, with the understanding that the Department of Administrative Services (DAS) will unschedule the amount of the allocation until a plan is presented and approved by the Legislative Fiscal Office and the DAS Chief Financial Office.

Oregon Business Development Department
Established a General Fund appropriation by allocating $1,800,000 from the Emergency Fund established by section 1, chapter 644, Oregon Laws 2019, to the Oregon Business Development Department, for infrastructure, for deposit in the Special Public Works Fund established under ORS 285B.455, for reimbursement of loans made from the Special Public Works Fund to the City of Pendleton for levee repairs.

Oregon Business Development Department
Established a General Fund appropriation by allocating $1,500,000 from the Emergency Fund established by section 1, chapter 644, Oregon Laws 2019, to the Oregon Business Development Department, for business, innovation and trade, for the Strategic Reserve Fund for support of business clean-up and restoration expenses necessitated by flooding in Eastern Oregon that are not reimbursed by insurance.

Department of Administrative Services
Established a General Fund appropriation by allocating $500,000 from the Emergency Fund established by section 1, chapter 644, Oregon Laws 2019, to the Department of Administrative Services for a grant to the Blue Mountain Foundation for flood recovery activities.

Department of Administrative Services
Established a General Fund appropriation by allocating $350,000 from the Emergency Fund established by section 1, chapter 644, Oregon Laws 2019, to the Department of Administrative Services for a grant to the City of Milton-Freewater for flood recovery activities.

Oregon Health Authority
Established a General Fund appropriation by allocating $5,000,000 from the Emergency Fund established by section 1, chapter 644, Oregon Laws 2019, to the Oregon Health Authority, and increased the Federal Funds expenditure limitation established for the Authority by section 4(1), chapter 695, Oregon Laws 2019, Health Systems, Health Policy and Analytics, and Public Health, by $20,000,000, to support coronavirus emergency response activities, with the understanding the Department of Administrative Services (DAS) will unschedule $4,000,000 of the Emergency Fund allocation and $10,000,000 of the Federal Funds expenditure limitation until a plan is presented and approved by the Legislative Fiscal Office and the DAS Chief Financial Office.

Military Department
Established a General Fund appropriation by allocating $2,700,000 from the Emergency Fund established by section 1, chapter 644, Oregon Laws 2019, to the Military Department for the Office of Emergency Management for an all-hazard emergency preparedness and response program.

Department of Environmental Quality
Established a General Fund appropriation by allocating $5,000,000 from the Emergency Fund established by section 1, chapter 644, Oregon Laws 2019, to the Department of Environmental Quality, to be used for rulemaking and other actions with the goal of reducing greenhouse gas emissions across all emissions sources, including point sources, natural gas emissions and transportation fuels.

503-986-1828

Oregon Legislative Emergency Board

Sen. Peter Courtney, Senate Co-Chair
Rep. Tina Kotek, House Co-Chair

Certificate

April 23, 2020

Pursuant to the provisions of ORS 291.328, and acting under the authority of ORS 291.326(1)(a), (b), (c), and (d); ORS 291.371; and ORS 291.375; this hereby certifies that the Emergency Board, meeting via remote interface on April 23, 2020, took the following actions:

1. Housing and Community Services Department
Established a General Fund appropriation by allocating $12,000,000 from the Emergency Fund established by section 1, chapter 644, Oregon Laws 2019 to the Housing and Community Services Department for rental assistance payments and safe shelter alternatives for Oregonians who have been impacted by income loss due to COVID-19, or who are especially vulnerable to infection or health problems associated with the virus because of inadequate housing or shelter.

2. Oregon Business Development Department
Established a General Fund appropriation by allocating $5,000,000 from the Emergency Fund established by section 1, chapter 644, Oregon Laws 2019, to the Oregon Business Development Department, for business, innovation and trade, to provide financial assistance to small businesses affected by economic conditions associated with the COVID-19 pandemic that have not received federal emergency assistance under the federal CARES Act or any subsequent federal act that provides emergency pandemic funding, with the understanding that the Department will dedicate an additional $5,000,000 of Lottery Funds and Other Funds monies in the Business, Innovation and Trade Division to this same purpose.

3. Department of Justice
Allocated $2,000,000 from the Emergency Fund established by section 1, chapter 644, Oregon Laws 2019, to supplement the appropriation made to the Department of Justice by section 1(4), chapter 692, Oregon Laws 2019, Crime Victim and Survivor Services, for emergency housing for victims of domestic and sexual violence due to increasing needs resulting from the effects of the COVID-19 pandemic.

4. Department of Administrative Services
Established a General Fund appropriation by allocating $10,000,000 from the Emergency Fund established by section 1, chapter 644, Oregon Laws 2019, to the Department of Administrative Services for a grant to the Oregon Community Foundation to oversee a culturally-specific community based grant program to make payments to

workers who are ineligible for wage replacement payments from traditional unemployment insurance programs.

5. Bureau of Labor and Industries

Established a General Fund appropriation by allocating $119,778 from the Emergency Fund established by section 1, chapter 644, Oregon Laws 2019, to the Bureau of Labor and Industries, and approved the establishment of one permanent Human Resource Analyst 3 position (0.54 FTE) to provide human resource services to the agency.

6. Department of Human Services

Established a General Fund appropriation by allocating $3,350,000 from the Emergency Fund established by section 1, chapter 644, Oregon Laws 2019, to the Department of Human Services to provide COVID-19 proactive testing and specialized training for long term care workers.

8. Department of Administrative Services

Established a Federal Funds expenditure limitation of $300,000,000 for the Department of Administrative Services for funding made available to states through the Coronavirus Relief Fund, with the understanding that $275,000,000 of the Federal Funds expenditure limitation increase will be unscheduled pending the identification of specific eligible response activity costs.

9. Department of Forestry

Allocated $4,000,000 from the special purpose appropriation made to the Emergency Board by section 5(1)(a), chapter 664, Oregon Laws 2019, to supplement the appropriation made to the Department of Forestry by section 1(2), chapter 664, Oregon Laws 2019, Fire protection, for severity resources costs for the 2019 fire season and in anticipation of 2020 fire season costs; allocated $2,000,000 from the special purpose appropriation made to the Emergency Board by section 5(1)(c), chapter 664, Oregon Laws 2019, to supplement the appropriation made to the Department of Forestry by section 1(2), chapter 664, Oregon Laws 2019, Fire protection, for supplemental fire personnel costs and other costs associated with the preparation for the 2020 fire season; and increased the Other Funds expenditure limitation established for the Department of Forestry by section 2(2), chapter 664, Oregon Laws 2019, Fire protection, by $23,587,897 for costs associated with the 2019 fire season.

10. Department of Human Services
Oregon Health Authority

Allocated $19,429,026 from the special purpose appropriation made to the Emergency Board by section 3(1), chapter 644, Oregon Laws 2019, to supplement the appropriation made to the Department of Human Services by section 1(4), chapter 668, Oregon Laws 2019, Aging and people with disabilities and intellectual and developmental disabilities programs; increased the Federal Funds expenditure limitation established for the Department of Human Services by section 3(4), chapter 668, Oregon Laws 2019, Aging and people with disabilities and intellectual and developmental disabilities programs, by $38,216,424; allocated $570,974 from the special purpose appropriation made to the Emergency Board by section 3(1), chapter 644, Oregon Laws 2019, to

supplement the appropriation made to the Oregon Health Authority by section 1 (1), chapter 695, Oregon Laws 2019, Health Systems, Health Policy and Analytics, and Public Health; increased the Federal Funds expenditure limitation established for the Oregon Health Authority by section 4 (1), chapter 695, Oregon Laws 2019, Health Systems, Health Policy and Analytics, and Public Health, by $880,298; for non-state employee collective bargaining costs.

11. Public Defense Services Commission

Allocated $868,415 from the special purpose appropriation made to the Emergency Board by section 4(1), chapter 644, Oregon Laws 2019, to supplement the appropriation made to the Public Defense Services Commission by section 1(2), chapter 303, Oregon Laws 2019, Professional services, to increase rates for services provided for indigent public defense cases by contract investigators and interpreters; allocated $1,589,702 from the special purpose appropriation made to the Emergency Board by section 4(1), chapter 644, Oregon Laws 2019, to supplement the appropriation made to the Public Defense Services Commission by section 1(3), chapter 303, Oregon Laws 2019, Contract and Business Services Division, and authorized the establishment of 9 permanent positions (5.67 FTE) to improve oversight of public defense services and the processing of provider claims for payment; allocated $1,267,848 from the special purpose appropriation made to the Emergency Board by section 4(1), chapter 644, Oregon Laws 2019, to supplement the appropriation made to the Public Defense Services Commission by section 1(3), chapter 303, Oregon Laws 2019, Contract and Business Services Division, for a contract with the Oregon Judicial Department for information technology services; and allocated $150,000 from the special purpose appropriation made to the Emergency Board by section 4(1), chapter 644, Oregon Laws 2019, to supplement the appropriation made to the Public Defense Services Commission by section 1(3), chapter 303, Oregon Laws 2019, Contract and Business Services Division, for training juvenile dependency attorneys participating in the Parent Child Representation Program.

Certificate

May 15, 2020

Pursuant to the provisions of ORS 291.328, and acting under the authority of ORS 291.326(1)(a), (b), (c), and (d); ORS 291.371; and ORS 291.375; this hereby certifies that the Emergency Board, meeting via remote interface on May 15, 2020, took the following actions:

1. Legislative Fiscal Office

Acknowledged receipt of a report outlining the agreement made by the Governor, the President of the Senate, and the Speaker of the House on a high-level distribution of the state's portion of the Coronavirus Relief Fund from the CARES Act into the three priority categories of State Expenses, Local Government and Tribes, and Reserves.

2. Department of Administrative Services

Increased the Federal Funds expenditure limitation for the Department of Administrative Services established at the April 23, 2020 meeting of the Emergency Board by $215,000,000 from funding made available to states through the Coronavirus Relief Fund, with the understanding that $100,000,000 of the Federal Funds expenditure limitation increase will be unscheduled pending identification of specific COVID-19 response activity costs eligible for reimbursement to local governments and tribes in Oregon, outside of the boundaries of Multnomah and Washington counties. The Department of Administrative Services shall include information on these reimbursable expenses in the monthly report due to the Legislative Fiscal Office on expenditures of all funds from the Coronavirus Relief Fund through February 2021.

Certificate

June 5, 2020

Pursuant to the provisions of ORS 291.328, and acting under the authority of ORS 291.326(1)(a), (b), (c), and (d); ORS 291.371; and ORS 291.375; this hereby certifies that the Emergency Board, meeting via remote interface on June 5, 2020, took the following actions:

1. Housing and Community Services Department
Established an Other Funds expenditure limitation of $55,000,000 for the Housing and Community Services Department, for funding rent assistance payments and associated administrative expenses on behalf of tenants at or below 80% of area median income, for funding from the Coronavirus Relief Fund received by the Department of Administrative Services and transferred to the Housing and Community Services Department; established an Other Funds expenditure limitation of $20,000,000 for operating support to affordable rental housing properties with long-term affordability covenants with the Housing and Community Services Department, for funding from the Coronavirus Relief Fund received by the Department of Administrative Services and transferred to the Housing and Community Services Department; and authorized the establishment of 2 positions (1.00 FTE) in the Housing and Community Services Department to administer loan agreements associated with operational assistance to those affordable housing properties.

2. Department of Administrative Services
Increased the Federal Funds expenditure limitation for the Department of Administrative Services established at the April 23, 2020 meeting of the Emergency Board by $10,000,000 from funding made available to states through the Coronavirus Relief Fund for a grant to the Oregon Community Foundation to support a culturally-specific community-based grant program making payments to workers who are ineligible for wage replacement payments from traditional unemployment insurance programs.

3. Department of Justice
Established an Other Funds expenditure limitation of $4,000,000 for the Department of Justice, Crime Victim and Survivor Services Division, for funding from the Coronavirus Relief Fund received by the Department of Administrative Services and transferred to the Department of Justice for victims of domestic and sexual violence due to increasing needs resulting from the effects of the COVID-19 pandemic.

4. Department of Human Services

Established an Other Funds expenditure limitation of $1,000,000 for the Department of Human Services, for funding from the Coronavirus Relief Fund received by the Department of Administrative Services and transferred to the Department of Human Services for maintaining 211info services during the COVID-19 pandemic.

5. Housing and Community Services Department

Established an Other Funds expenditure limitation of $15,000,000 for the Housing and Community Services Department, for funding from the Coronavirus Relief Fund received by the Department of Administrative Services and transferred to the Housing and Community Services Department for energy assistance payments to Oregonians with incomes adversely impacted by circumstances due to the COVID-19 pandemic.

6. Public Utility Commission

Established an Other Funds expenditure limitation of $3,500,000 for the Public Utility Commission, Residential Services Protection Fund, for funding from the Coronavirus Relief Fund received by the Department of Administrative Services and transferred to the Public Utility Commission to provide a greater discount on telephone and broadband services for eligible low-income households needing assistance due to the COVID-19 pandemic.

7. Oregon Health Authority

Established an Other Funds expenditure limitation of $25,630,000 for the Oregon Health Authority, for funding from the Coronavirus Relief Fund received by the Department of Administrative Services and transferred to the Oregon Health Authority for behavioral health services for individuals disproportionately impacted by the COVID-19 pandemic.

10. Oregon Business Development Department

Established an Other Funds expenditure limitation of $3,000,000 for the Oregon Business Development Department, for funding from the Coronavirus Relief Fund received by the Department of Administrative Services and transferred to the Oregon Business Development Department, for business, innovation and trade, for a grant program to provide technical assistance to minority- and woman-owned businesses affected by the COVID-19 pandemic.

11. Oregon Business Development Department

Established an Other Funds expenditure limitation of $50,000,000 for the Oregon Business Development Department, for funding from the Coronavirus Relief Fund received by the Department of Administrative Services and transferred to the Oregon Business Development Department, for business, innovation and trade, for a grant program for stabilizing rural Type A and Type B Hospital operations.

12. Oregon Business Development Department

Established an Other Funds expenditure limitation of $10,000,000 for the Oregon Business Development Department, for funding from the Coronavirus Relief Fund received by the Department of Administrative Services and transferred to the Oregon Business Development Department, for business, innovation and trade, to provide personal protective equipment for small businesses.

13. Department of Education

Established an Other Funds expenditure limitation of $30,000,000 for the Oregon Department of Education, Early Learning Division, for funding from the Coronavirus Relief Fund received by the Department of Administrative Services and transferred to the Department of Education for assistance in meeting the increased costs of child care providers and costs of reopening child care providers that have closed, with the understanding that the Department of Administrative services will unschedule $11,500,000 of the amount for initiatives further developed by the Early Learning Division.

14. Oregon Business Development Department

Established an Other Funds expenditure limitation of $20,000,000 for the Oregon Business Development Department, for funding from the Coronavirus Relief Fund received by the Department of Administrative Services and transferred to the Oregon Business Development Department, for business, innovation and trade, for a grant program for the Rural Broadband Capacity Program.

15. Department of Administrative Services
Oregon Watershed Enhancement Board
Oregon Health Authority

Increased the Federal Funds expenditure limitation for the Department of Administrative Services established at the April 23, 2020 meeting of the Emergency Board by $30,000,000 from funding made available to states through the Coronavirus Relief Fund, with the understanding that $10,000,000 of this amount will be used for a grant to the Oregon Community Foundation for a Worker Relief Quarantine Fund to assist recovering agricultural workers, $1,000,000 will be used to distribute state-purchased personal protective equipment directly to agricultural workers, and the remaining $19,000,000 will be used to distribute funding to other state agencies for agricultural worker protection activities; established a $16,000,000 Other Funds expenditure limitation for the Oregon Watershed Enhancement Board, for funding from the Coronavirus Relief Fund received by the Department of Administrative Services and transferred to the Oregon Watershed Enhancement Board and authorized the establishment of seven limited-duration positions (1.75 FTE) for the administration of grant funds for the reimbursement of agricultural producers' costs for agricultural worker housing, field sanitation, and transportation associated with COVID-19 response activities; and established a $3,000,000 Other Funds expenditure limitation for the Oregon Health Authority, for funding from the Coronavirus Relief Fund received by the Department of Administrative Services and transferred to the Oregon Health Authority for community outreach activities related to the COVID-19 pandemic response.

16. Department of Administrative Services

Increased the Federal Funds expenditure limitation for the Department of Administrative Services established at the April 23, 2020 meeting of the Emergency Board by $237,130,000 from funding made available to states through the Coronavirus Relief Fund for the costs of eligible programs and services related to the COVID-19 pandemic response.

17. Department of Geology and Mineral Industries

Allocated $2,864,393 from the Emergency Fund established by section 1, chapter 644, Oregon Laws 2019, to supplement the appropriation made to the Department of Geology and Mineral Industries by section 1, chapter 690, Oregon Laws 2019; increased the Other Funds expenditure limitation established for the Department of Geology and Mineral Industries by section 2(1), chapter 690, Oregon Laws 2019, Geologic survey, by $1,305,154; increased the Other Funds expenditure limitation established for the Department of Geology and Mineral Industries by section 2(2), chapter 690, Oregon Laws 2019, Mined land reclamation, by $2,261,038; increased the Federal Funds expenditure limitation established for the Department of Geology and Mineral Industries by section 3, chapter 690, Oregon Laws 2019 by $2,892,574; and authorized the establishment of a permanent manager position (0.50 FTE) to support the Geologic Survey program and authorized an increase in the position full-time equivalents by 19.21 FTE for funding the second year of operations in the 2019-21 biennium.

18. Racing Commission

Increased the Other Funds expenditure limitation established for the Racing Commission by section 1, chapter 28, Oregon Laws 2019 by $2,374,056, and authorized an increase in the position full-time equivalents by 4.25 FTE, to provide sufficient budgetary authority for the remainder of the 2019-21 biennium.

Oregon Health Authority: Agency Summary Narrative

Mission statement

The mission of the Oregon Health Authority (OHA) is helping people and communities achieve optimum physical, mental and social well-being through partnerships, prevention and access to quality, affordable health care.

Agency priorities and initiatives

With our mission in mind, OHA is focused on accelerating the transformation of Oregon's health care system. Our goals are to expand health coverage and provide easier access to care, deliver better health outcomes, improve health care quality and contain health costs for Oregon Health Plan members, while eliminating health disparities in all Oregon communities.

OHA's goals and priorities, detailed below, directly support safer, healthier and thriving Oregonians. OHA is committed to transparency, accountability and wise use of public resources. Our priorities and strategies are guided by a focus on health equity.

Sustain Health Transformation in Oregon. To accomplish this goal, we will:

- Continue implementation of CCO 2.0 and focus on improving behavioral health, expanding efforts to address social factors that fuel poor health (such as lack of stable housing, food insecurity, and systemic racism), continuing to hold down costs and expanding the use of value-based payment tools that reward providers for better, more efficient care.
- Close Oregon's Medicaid funding gap through solutions that provide long-term, sustainable options to maintain health coverage and stabilize Medicaid funding.

Provide healthy, safe and successful supports for children, teens and families. To accomplish this goal we will:

- Increase home-visiting statewide.
- Align services and expand in-home behavioral health services for youth with specialized needs.
- Provide prevention, intervention and access through the lifespan.

Modernize Oregon's public health system. To accomplish this goal we will:

- Expand the portion of Oregonians who are served by a health department that provides foundational public health services that are critical for protecting the health of everyone in Oregon.

- Quantify secure and sustainable funding for state and local implementation of foundational public health services.

Promote accountability, transparency and wise use of public resources. To accomplish this goal, we will:

- Utilize an agency performance system to strengthen business rigor in OHA's operations.
- Implement OHA's strategic plan to eliminate health inequities by 2030, a goal that was informed by input from stakeholders.
- Continue to be accountable and transparent by posting issue resolution reports and public records requests on the OHA website.

Program descriptions

OHA Central Services

OHA Central Services supports the OHA mission by providing leadership in key policy and business areas. This service area contains the following areas:

The Director's Office is responsible for overall leadership, policy and development, and administrative oversight for OHA. This office coordinates with the Governor's Office, the Legislature, other state and federal agencies, tribes, partners and stakeholders, local governments, advocacy and client groups, and the private sector.

The Director's Office provides leadership in achieving the agency's mission. In developing OHA's strategic plan, the agency has adopted a 10-year goal of eliminating health inequities by 2030. And, in order to achieve that goal, the agency has adopted the following definition of health equity:

> Oregon will have established a health system that creates health equity when all people can reach their full health potential and well-being and are not disadvantaged by their race, ethnicity, language, disability, gender, gender identity, sexual orientation, social class, intersections among these communities or identities, or other socially determined circumstances.
>
> Achieving health equity requires the ongoing collaboration of all regions and sectors of the state, including tribal governments to address:

  - The equitable distribution or redistribution of resources and power, and
  - Recognizing, reconciling and rectifying historical and contemporary injustices.

OHA still has a clear direction is to innovate, improve and transform the state health care system to meet three goals:

- Improve the lifelong health of all Oregonians.
- Increase the quality, reliability and availability of care for all Oregonians.
- Lower or contain the cost of care so it is affordable to everyone.

The **Agency Operations Division** provides operational support and human resources services to OHA. The division includes the following functional areas:

- Central Operations – Supports agency operations including public records requests, facility coordination, performance system management, and shared services coordination with the Department of Human Services (DHS).
- Human Resources – Provides recruitment, classification and compensation, employee relations, labor relations, organizational development and business operational support across the agency.

The **Fiscal Division** provides leadership and oversight of financing policies and coordinates budget development and execution for OHA. The division includes three functional areas: budget, actuarial services, and program integrity.

- Budget – Developing, coordinating, executing, monitoring and managing OHA budgets within divisions and across the agency. Developing and updating the agency budget as it progresses through the statewide budget process, including Agency Request Budget, Governor's Budget, the Legislatively Adopted Budget, rebalance reports and various Emergency Board actions.
- While the Actuarial Services Unit and Office of Program Integrity are functionally within the Fiscal Division of Central Services, they are budgeted in the Health Systems Division Program Support and Administration unit.

The **Equity and Inclusion Division** works on behalf of OHA and the broader health system in Oregon to ensure the elimination of avoidable health gaps and to promote optimal health in Oregon for everyone. The work is carried out in three major work units:

- Equity and Policy

- Diversity, Inclusion, Training, Compliance & Civil Rights
- Business Support and Administration

These units develop programs and initiatives relating to health equity policy and practice, including the social determinants of health and equity; universal access for people with disabilities, people with limited English proficiency, etc.; diversity and inclusion; non-discrimination; the development of culturally and linguistically responsive practices and services; and training among other things. The division engages community partners and stakeholders, and uses data and best practice research to carry out its work. The division's policy and program initiatives address contemporary and historical injustices experienced predominantly by racially, ethnically, culturally and linguistically diverse populations, including people with disabilities so that all people can reach their greatest health potential and well-being, and participate in a more robust and inclusive health delivery system. This division has also led the adoption of an anti-racism framework for the agency including anti-racism training, statewide community engagement with diverse communities for the agency's strategic plan and the development of OHA's 10-year goal to eliminate health inequities in Oregon.

The **External Relations Division** has three sub-divisions: Communications, Government Relations, and Member and Stakeholder Support, which includes the Community Partner Outreach Program (CPOP), Ombuds Program, and Innovator Agents. Together, they are responsible for building strong relationships with the public, community partners, media, the Legislature, and other agencies at the state and federal levels, as well as creating a broad understanding of the many ways in which OHA contributes to the health and well-being of Oregonians.

- Communications provides accurate and accessible information about OHA's mission and programs, responds to requests for information from the public and media, and produces content for a wide range of agency publications, websites and other channels for keeping the public informed.
- Government Relations provides timely health data and analysis to the Legislature, federal partners, and local elected officials to inform evidence-based health policies and legislation. It also develops OHA legislative concepts to ensure access to quality health care, contain costs of health care, and improve overall health for Oregonians.
- The Community Partner Outreach Program has built a one-of-a-kind network of Community Partner Organizations serving all Oregonians in every county in Oregon. The work CPOP and Community Partners do on behalf of OHA is essential to

support health system transformation and adequately serve Oregonians to access the health care they need and address equity and health system barriers.

- The Ombuds Program advocates for Oregon Health Plan (OHP) member access to care and quality of care provided through OHP; uses learnings from individual member issues to elevate OHP member voice through the OHA so Medicaid programs, policies, and operations are based on member experience; and elevates identified issues for system improvement. As required by legislation the program reports data and recommendations for improvement to the OHA Director, the Oregon Health Policy Board, and the Governor.
- The Innovator Agents work closely with Oregon's 15 Coordinated Care Organizations (CCOs) as required by legislation and Oregon's Medicaid Waiver to coordinate between OHA, the community, and CCOs to ensure local adaptation and implementation of statewide health priorities. They understand the health needs of the region, the strengths and gaps of the health resources in the CCO and articulate these needs and gaps to OHA to ensure statewide and local coordination. They prioritize elevating OHP member voice within CCO operations and in CCO 2.0 they elevate local work with CCOs in health equity, Tribe relationships, behavioral health, and emerging statewide priorities such as the COVID-19 response.

Health Systems Division

The Health Systems Division's (HSD) mission is to build and advance a system of care to create a healthy Oregon. The HSD vision is a coordinated, responsive and integrated system of care that serves and respects the diversity, cultures and languages spoken in each Oregon population and community.

HSD supports the triple aim of better health, better care, and lower costs by promoting integrated services through administration of the Medicaid program and Non-Medicaid behavioral health programs to improve long-term outcomes for Oregonians. The HSD budget includes funding for health care services to over 1 million Oregonians on the Oregon Health Plan and non-Medicaid behavioral health services to more than 145,400 people.

The budget for the Health Systems Division is comprised of three units:

- Program Support and Administration
- Medicaid
- Non-Medicaid (Behavioral Health)

Oregon Health Authority: Agency Summary Narrative

Program Support and Administration
The Health Systems Division Program Support and Administration unit provides administrative support, services and oversight for both Medicaid and Non-Medicaid programs. Program Support and Administration staff work directly with program staff, leadership, and other agency partners to support effective programs and achieve agency goals.

This unit includes critical business support staff for the Health Systems Division who execute of the administrative budget; manage positions, hiring, and facilities; oversee county contracts and grants for behavioral health programs; and provide project management for major program and agency initiatives.

Program Support and Administration staff also ensure HSD's federal and legislative mandates under the Oregon State Plan and Title XIX of the Social Security Act Medical Assistance Program. The Medicaid section is made up of teams focused on:

- Physical, dental and behavioral health program development, operations policy and special projects.
- Coordination of policy development and implementation of waivers and State Plan authorities with federal Medicaid partners.
- Quality assurance and hearings.
- Provider services, which includes delivery system support, provider support and enrollment, provider services training, provider clinical support, CCO contracting, and encounter data reporting and claims.

While functionally situated within the Fiscal Division of OHA Central Services, the Program Support and Administration budget also includes the Actuarial Services Unit (ASU), which develops OHA's capitation rates for Medicaid managed care entities (CCOs, dental care organizations and mental health organization), and the Office of Program Integrity, which ensures that Oregon's Medicaid program follows federal Medicaid Program Integrity regulations.

Medicaid
The Medicaid budget includes state and federal funds used to deliver and pay for health care services to over 1 million Oregon Health Plan (OHP) members of which 43 percent are children. The OHP includes Medicaid, the Children's Health Insurance Program (CHIP), Cover All Kids, Reproductive Health Equity Act (RHEA), and other related services. Payments are made to

individual health care providers as Fee-for-Service (FFS) and to the coordinated care organizations (CCOs) in the form of a global budget. CCOs serve over 90 percent of all OHP members.

In July 2012, the Centers for Medicaid and Medicare Services (CMS) approved Oregon's 1115 Medicaid Demonstration waiver that was necessary to implement coordinated care organizations and initiate health system transformation for the Oregon Health Plan. This initial waiver was for a five-year period, running from July 2012 through June 2017. Oregon's Medicaid Demonstration renewal request was approved by CMS and runs from January 12, 2017 through June 30, 2022. The renewal continues and expands on elements of the 2012 waiver, particularly around integration of behavioral, physical and oral health care, and has included a focus on social determinants of health, population health, and health care quality. Under the agreement, Oregon will advance the coordinated care model to improve quality and outcomes and offer evidence-based benefits through the state's prioritized list of services. The agreement also includes a commitment to an ongoing sustainable rate of growth, paying for value rather than volume of services, and advancing the use of value-based payments.

Statutory Authority
Oregon Revised Statute (ORS) 414.018 through 414.760 establish and authorize the programs administered by HSD-Medicaid.

Non-Medicaid (Behavioral Health)

Non-Medicaid Behavioral Health programs help all Oregonians achieve physical, mental and social well-being through access to mental health and addiction services and support (including housing services) for adults and children. Ongoing supports and services improve a person's ability to be successful with their family, education, employment, and in their community. This often reduces public safety problems, negative health-related consequences and suicide risk. Timely access to behavioral health care is a critical aspect for increasing protective factors and reducing risk factors that lead to suicide.

Services and supports include those delivered by peers, such as help establishing personal relationships, obtaining employment or education, and independent living skills training such as cooking, recreation and cultural activities, and shopping and money management. They also include residential treatment services or adult foster care and supervision of people in the community who have committed crimes but were found "Guilty Except for Insanity." Services are provided in local mental health clinics, doctor offices and clinics, schools, drop-in centers and homes.

Non-Medicaid Behavioral Health programs use numerous partnerships to develop and administer a community-based continuum of care delivered in outpatient, residential, school, acute, hospital, and criminal justice and community settings. In partnership with coordinated care organizations (CCOs), county governments, local community stakeholders and consumers, Behavioral Health programs provide funding and technical support for service provision to ensure investments and legislative mandates are implemented.

Statutory Authority
The statutory framework for Non-Medicaid programs administered by HSD is included in the following state and federal statutes:

- ORS 430 provides OHA the statutory framework for the development, implementation and continuous operation of the community treatment programs to serve people with addiction disorders and mental health disorders subject to the availability of funds.
- Alcohol and Drug Programs operate under the authority of Oregon Revised Statute (ORS) 430.254 through 430.426 and ORS 430.450- 430.590 and Federal PL 102-321 (1992) Sections 202 and 1926.
- Problem gambling treatment and prevention services are mandated by Oregon Revise Statute (ORS) 413.520, which directs OHA to develop and administer statewide gambling addiction programs and ensure delivery of program services.

Health Policy and Analytics

The Health Policy and Analytics Division develops and implements innovative approaches to lowering health care costs and achieving better health and better health care, while keeping a central focus on health equity. This is accomplished through six main functions:

- The Office of Health Policy.
- The Office of Delivery Systems Innovation.
- The Office of Health Analytics.
- The Office of Health Information Technology.
- The Public Employees Benefit Board and the Oregon Educators Benefit Board (each are budgeted separately from HPA).
- The Office of Business Operations.

These offices provide agency-wide policy development, strategic planning, clinical leadership, statewide delivery system technology tools to support care coordination, health system transformation support, and health system performance evaluation reports. Together these offices provide services and support focused on achieving health equity through the triple aim of better health, better care, and lower costs.

The Health Policy and Analytics Division is accountable for leading the next phase of health system transformation against the backdrop of COVID-19 and justified demands for addressing systemic racism by:

- Supporting and incentivizing payments for value, moving away from paying for service volume and incentivizing investments in better health for all communities.
- Supporting the Oregon Health Policy Board's work including its plans to operationalize OHA's Health Equity Definition and reimagine a health care system capable of achieving health equity.
- Focusing on social determinants of health in addition to medical care.
- Providing the clinical leadership to shape the management of high cost pharmaceuticals.
- Innovating and implementing integration across behavioral health, oral health, physical health and social services using health information technology.
- Implementing legislative directives to align metrics and supporting new and innovative metrics for equity and social determinants of health.
- Facilitating multi-payer alignment to stabilize critical provider services and rebuild a health care system capable of achieving health equity.

Public Employees' Benefit Board

The Public Employees' Benefit Board (PEBB) supports the goal of transforming the health care system in Oregon and fundamentally improving how care is paid for and delivered. PEBB's mission is to provide a high-quality plan of health and other benefits for state employees at a cost that is affordable to both the employees and the state. Oregon Revised Statues create an eight-member board whose members are appointed by the Governor and confirmed by the Senate. PEBB serves broadly diverse constituencies including the State of Oregon (as an employer), employees who live and work in every county of the state, the Legislature, taxpayers, labor unions and health policy groups.

Oregon Health Authority: Agency Summary Narrative

PEBB designs, contracts for and administers medical, dental, vision, life, disability, and accidental death and dismemberment plans and flexible spending accounts for PEBB members. More than 140,000 members are enrolled in PEBB coverage. They include active employees, retirees, spouse and domestic partner dependents, child dependents up to age 26, and adult children with disabilities over age 26. They are drawn from state agencies, universities, Lottery and semi-independent agencies, and local governments and special districts.

The PEBB Board serves diverse populations and constituencies and provides a critical public service to the taxpayers of Oregon. The board offers medical, dental, vision, life, disability and accidental death and dismemberment benefit plans. PEBB is a federal IRS Section 125 Cafeteria Plan benefits program that is required to offer the same benefits to all members.

Statutory Authority
The Public Employees' Benefit Board authority lies in ORS 243.061 through ORS 243.302. House Bill 2279 (2013) expands participation eligibility to include local governments and special districts.

Oregon Educators Benefit Board

The Oregon Educators Benefit Board (OEBB) provides a comprehensive selection of benefit plan options for most of Oregon's K-12 school districts, education service districts and community colleges, as well as a number of charter schools and some counties and special districts. OEBB serves more than 155,000 members (employees, early retirees and their family members) in more than 251 publicly-funded entities throughout Oregon.

The OEBB board designs and maintains a full range of benefit plans for eligible publicly funded entities to offer to their employees and early retirees. Plans include medical, dental, vision, life, disability, accidental death and dismemberment, long term care, an employee assistance program, a health savings account and flexible spending accounts. Each of the 251 employer entities OEBB serves maintains a unique service area, eligibility requirements, cost sharing, and population. OEBB's plans are designed to be flexible and accommodate the needs of all employers participating in OEBB and the members enrolled in OEBB plans.

Statutory Authority
OEBB was established by Senate Bill 426 (2007). House Bill 2279 (2013) expands participation eligibility to include local governments and special districts. The OEBB Board, functions and responsibilities are authorized by ORS 243.860 to 243.886.

Public Health

The Public Health Division (OHA-PHD) mission is to promote health and prevent the leading causes of death, disease and injury in Oregon. The OHA-PHD vision is lifelong health for all people in Oregon. OHA-PHD's modernization strategic plan priorities are to expand partnerships to maximize collective action; address health priorities using foundational capabilities; and demonstrate impact through metrics and evaluation. State population health indicators are updated annually and serve as the backbone for the division's reporting of OHA-PHD's key metrics, including key performance measures, Oregon's State Health Improvement Plan (SHIP) measures, and public health accountability measures. OHA-PHD continues to implement the REAL D law and support the use of data to identify and meaningfully address health inequities. Development of the 2020-2024 SHIP incorporated the State Health Assessment and feedback from communities across Oregon to identify the following five priorities for the 2020-2024 SHIP:

- Institutional bias
- Adversity, trauma and toxic stress
- Economic drivers of health (including issues related to housing, living wage, food security and transportation)
- Access to equitable preventive health care
- Behavioral health (including mental health and substance use)

The 2020-2024 SHIP will be finalized in August 2020 with community-led implementation plans to follow. OHA-PHD will engage Oregon communities and make data and progress transparent and accessible through its new website, www.healthiertogetheroregon.org.

OHA-PHD is a part of the governmental public health system, which includes the federal government, local and Tribal public health authorities. Public health services are delivered either directly from PHD or through contracts with local and Tribal public health authorities, clinics and community-based nonprofit organizations. The major cost drivers to Oregon's public health system are the increasing volume of public health threats and a consistent decrease in federal funding over time.

Oregon's public health modernization effort includes rethinking of business practices so they align with current public health threats. The public health infrastructure developed as a result of public health modernization has been essential to Oregon's response to COVID-19. Specifically, Oregon has benefited from additional state and local epidemiologists to track data, and quickly manage and respond to outbreaks. The ongoing focus on health equity and cultural responsiveness by the public health system has allowed better engagement with community members and community-based organizations. Staff hired with state, local and tribal public health modernization funds have supported the COVID-19 response.

Statutory Authority
Chapters 431 and 433 of Oregon Revised Statutes set forth hundreds of code sections enabling and mandating a wide range of public health activities carried out by state public health and its county partners.

Oregon State Hospital

Oregon State Hospital (OSH) is an essential part of the statewide behavioral health system, providing the highest level of psychiatric care for adults from all 36 counties. The hospital's primary goal is to help people recover from their mental illness and return to life in the community, contributing to healthy and safe communities for all people in Oregon. Oregon State Hospital promotes public safety by treating people who are dangerous to themselves or others in a secure, therapeutic setting. The hospital works in partnership with the other divisions of OHA including the Health Systems Division (HSD), the Psychiatric Security Review Board (PSRB), regional hospitals, community mental health programs, advocacy groups and other community partners to ensure people with mental illness get the right care, at the right time, in the right place.

OSH operates two campuses with the capacity to serve up to 708 Oregonians, with 592 beds in Salem and 100 beds in Junction City. Services are provided 24 hours per day, seven days a week. Commitment types include:

- **Civil commitment/voluntary by guardian** – People who come to Oregon State Hospital through a civil commitment require 24-hour care that is not available through community programs. These patients have been found by the court to be a danger to themselves or others, or unable to provide for their own basic needs – such as health and safety – because of a mental disorder.

- **Guilty except for insanity** – People who come to Oregon State Hospital who have successfully pleaded Guilty Except for Insanity (GEI) for crimes related to their mental illness. These patients are under the jurisdiction of the Psychiatric Security Review Board.
- **Aid and Assist** – People who come to Oregon State Hospital through a court order under Oregon law (ORS 161.370) for treatment that will help them understand the criminal charges against them and to assist in their own defense.

Oregon State Hospital's role is to provide services and treatment to individuals that will prepare them for discharge when they no longer require hospital level of care. Services include 24-hour on-site nursing, psychiatric and other credentialed professional services, treatment planning, pharmacy, laboratory, food and nutritional services, and vocational and educational services. The hospital is accredited by the Joint Commission on the Accreditation of Health Organizations and all 24 hospital-licensed units (21 on the Salem Campus and 3 in Junction City) are certified by the Centers for Medicare & Medicaid Services (CMS). Services are provided by psychiatrists, nurses, and mental health professionals. Upon discharge, people transition to the community with improved skills to better understand and manage their symptoms, fully participate and live in their local community in a variety of community-based settings, and when able, hold a job.

Oregon's only state-operated secure residential treatment facility also reports to the superintendent of OSH. Pendleton Cottage, a 16-bed facility, is located on the grounds of the former Eastern Oregon Training Center in Pendleton. The secure mental health treatment program provides a community treatment setting for people who need a secure level of care as their first step out of the state hospital.

Statutory Authority
The following ORS references provide OSH its authority:

- ORS 161.295-400 – Determination of fitness to proceed/commitment
- ORS 179.321 – Authority to operate, control, manage and supervise OSH campuses and state-delivered residential treatment facilities
- ORS 426 – Powers, duties, and responsibilities of OHA
- ORS 443 – Residential treatment homes and facilities

OHA Shared Services

Office of Information Services (OIS) is a shared service provider for DHS and OHA. It provides information technology (IT) systems and services for nearly 16,000 agency and partner staff at 162 local offices, Oregon State Hospital locations, and the public health laboratory. OIS provides support for more than 17,000 desktop computers and 2,600 printers. The Service Desk responds to more than 14,000 service requests each month.

OIS provides information systems and services to DHS and OHA staff and partners statewide in support of programs that:

- Determine client eligibility.
- Provide medical, housing, food and job assistance.
- Provide addiction, mental health, and vocational and rehabilitative services.
- Protect children, seniors and people with physical and developmental disabilities.
- Process claims and benefits.
- Manage provider licensing and state hospital facilities.
- Promote and protect public health.
- Respond to and coordinate statewide disasters and health emergencies and support Health Alert Network and emergency preparedness activities.

OIS also supports partners around the state that use DHS and OHA systems. Many of the IT systems used by DHS, OHA and agency partners are needed 24 hours a day, seven days a week.

OIS now also provides a sub-section of services which were formerly provided by the Information Security and Privacy Office (ISPO), primarily the IT security functions, as the over-arching Security & Privacy functions moved to the Department of Administrative Services (DAS) in the 2017-19 biennium.

Many of the IT systems used by DHS, OHA and agency partners are needed 24 hours a day, 7 days a week.
OIS also supports partners around the state that use DHS and OHA systems. These include:

- State agencies including the Oregon Department of Justice Division of Child Support, the Oregon Employment Department and others.

- Cities and counties.
- District attorney's offices.
- Private hospitals.
- Other computer centers.

Environmental factors

OHA programs are directly affected by the following environmental factors and are risks to the agency's budget:

- Economic changes, such as poverty and unemployment rates, affect Oregon Health Plan caseload growth.
- Social issues, including untreated mental health and substance abuse, homelessness, and disparities affect service delivery needs.
- Federal policy and funding changes affect state funding needs (e.g., Medicaid match rates, Health System Transformation).
- Medical inflation and utilization affect the cost for provide health coverage to Oregon Health Plan members.
- New health challenges, which include emerging infectious diseases, climate change, threats from human-caused and natural disasters, and an increase in chronic diseases all put pressure on Oregon's Public Health system.
- The adequacy and effectiveness of community behavioral health systems affect the Oregon State Hospital census.

Major information technology projects/initiatives

OIS expects to have several IT projects underway during the 2021-23 biennium. The business cases for each OIS project are included in the Special Reports section.

Projects and initiatives with policy packages in the OHA and DHS Agency Request Budgets include:

- **Improving Data Integrity and Compliance:** Policy package #201 requests funding for planning, assessment, and developing strategic direction for to improve data integrity across DHS and OHA; address current gaps; and pilot new capabilities.
- **Statewide Community Information Exchange:** Policy package #202 requests funding to create a statewide CIE that would electronically connect health care and social services to support Oregon Health Plan and DHS clients in need.

- **Critical Systems:** Policy package #203 would continue modernization efforts to improve access to services, automate processes and modernize aging systems.
- **Compass Modernization**: Policy package #414 would continue the portfolio projects approved and partially funded in the 2019-21 biennium to address data integration and reporting issues. Funding would be used to leverage federal funding for purchase of a Behavioral Health Data Warehouse and a front-end data collection system including 5 years of operations and maintenance, along with an enterprise-wide project for migrating paper-based assessments to an electronic tool.
- **Modernization: Financial Systems:** Policy package #204 would fund a planning effort to develop a cross-agency financial system and modernize the underlying technology supporting DHS and OHA budgeting and financial management.
- **Medicaid Modularity**: Policy package #205 requests funding to replace end-of-life servers supporting the mission critical Medicaid Management Information System (MMIS); continue development of a strategic plan and roadmap for modernization and modularization of the Medicaid System in compliance with Centers for Medicaid and Medicare Services (CMS).
- **Integrated Eligibility**: Policy package #206 requests permanent resources for DHS and OHA/OIS to support the transition from the IE project to the integrated ONE program through the 2021-23 biennium and into the future biennia. The requested resources and funding will provide stability and continued support for the Integrated Eligibility (IE) program.
- **Integrated Eligibility Modernization**: Policy package #213 requests permanent resources for DHS and OHA/OIS for modernization and enhancement services for the integrated ONE program, which includes the initial creation of the OregonEligibility ONE system for Modified Adjusted Gross Income (MAGI) Medicaid in 2015 and the Integrated Eligibility System, through the 2021-23 biennium and into the future biennia. The requested resources and funding will support enhancements, automation and system consolidation that will drive the integrated ONE program to a more sustainable and future focused solution.

Agcy													
1	Health Programs	Health Programs Medicaid	No	This budget includes the Oregon Health Plan, which provides medical coverage for Medicaid under Title XIX of the Social Security Act, and Children's Health Insurance Program (CHIP) under Title XXI of the Social Security Act. Medicaid has traditionally provided medical coverage to low-income seniors, people with disabilities, children, and pregnant women. Since January 2014, the Oregon Health Plan has also covered all Oregon adults with income at or below 138 percent of the federal poverty level.	Preventive services for OHP youth and adults, Preventive services for OHP children, Appropriate prenatal care for OHP clients, PQI Hospitalizations of OHP clients	12	2,011,792,230		3,299,034,184		13,158,127,802		18,468,954,216
2	Health Programs	Health Programs Non Medicaid	No	HSD administers contracts and agreements with local mental health authorities such as LMHAs, CMHPs, non-profit providers, and tribes to develop and administer community-based behavioral health services and supports that are not covered by Oregon's Medicaid program. HSD services restore functioning, promote resiliency, health and recovery, and protect public safety by serving adults, children and adolescents with substance use disorders, mental and emotional disorders and problem gambling disorders as well as providing resources to their families. These services and supports are delivered in outpatient, residential, school, hospital, justice and other community settings. Culturally specific statewide and regional programs provide services for Native American, Hispanic/Latino and African American populations. These programs are designed to deliver evidence-based services that restore individuals and their families to the highest level of functioning possible. These programs employ peer support specialists, qualified mental health associates (QMHAs), qualified mental health professionals (QMHPs), psychiatrists, psychiatric nurse practitioners, qualified health services (QHS) providers, psychologists and other independently licensed providers, Certified Alcohol and Drug Counselors (CADCs), Certified Gambling Addiction Counselors (CGACs), and personal care providers. Individual consumers and their families also are key partners. These partnerships are critical to successfully treating behavioral health conditions.	Completion of alcohol & drug treatment, Alcohol & drug treatment effectiveness: Employment, Child reunification, School performance	12	393,518,838	12,093,034	143,325,856		268,057,381		816,995,109
3	Public Health Programs	Center for Prevention and Health Promotion	No	Responsible for chronic disease prevention and health promotion, injury prevention, Prescription Drug Monitoring program, Women, Infants and children (WIC) Nutrition program, family planning, oral health, prenatal care, newborn hearing screening, and school-based health centers.	Teen suicide, Tobacco use, Cigarette packs sold, Teen pregnancy, Early prenatal care	10	32,077,525	-	26,676,510	40,000,000	101,294,338	101,929,051	301,977,424
4	Public Health Programs	State Public Health Director	No	Responsible for state emergency preparedness, planning, and response.		8, 10	77,610,842		649,352		267,765	-	78,527,959
5	Public Health Programs	Center for Public Health Practice	No	Responsible for state support to local health departments core capacity in disease control and surveillance, HIV/STD/TB, immunization, statewide communicable disease control and testing, maintaining vital records and health statistics.	HIV rate, child immunizations, Influenza vaccinations for seniors	8,10	4,112,903		21,825,062		16,458,025	-	42,395,990
6	Public Health Programs	Center for Health Protection	No	Responsible for the State Drinking Water Program (Primacy) and EPA Revolving Loan Fund which provides approx. $12M annually to local water systems for capital improvement initiatives. Also identifying and preventing environmental and occupational safety hazards, and initiatives such as the health faciilities licensure, quality improvemnet and regulation, medical marijuana, and Patient Safety Commission.		9,10	3,157,243		1,279,138		2,825,908	-	7,262,289
7	Oregon State Hospital	State Hospital System	No	The State Hospital System - with locations in Salem and Junction City provide 24-hour supervised care to people with the most severe mental health disorders, many of whom have either been civilly committed to the Department as a danger to themselves or others, or have been found guilty except for insanity, or require hospital care to restore competency in order that they may aid and assist in their own defense during a criminal proceeding.	OSH restraint rate, OSH length of stay (others to consider might be ratio of # served/# of budgeted beds, and/or recidivism/revocation rates. These new measures should be vetted a bit with Cabinet and or AMH, in light of the fact that KPMs are part of a larger OHA/DHS picture)	12	645,327,634		38,276,227		26,392,773	-	709,996,634
8	Oregon State Hospital	State Delivered SRTF's	No	The state operated 16-bed facilities permit the safe movement of persons from the State Hospital(s) into the community that current providers choose not to serve.		12	19,104,616		227,999		2,617,617	-	21,950,232

Priority (ranked with highest priority first)	Program or Activity Initials	ORBITS DCR Title	Is Program leveraged for the DSHP Waiver?	Program Unit/Activity Description	Identify Key Performance Measure(s)	Primary Purpose Program-Activity Code	GF	LF	OF	NL-OF	FF	NL-FF	TOTAL FUNDS
9	Public Employee's Benefit Board	PEBB/Stabilization, Self Insurance, Flex Benefit, Fully insured Plans, and Optional Benefits	No	(1) There is created the Public Employees' Revolving Fund The balances of the Public Employees' Revolving Fund are continuously appropriated to cover expenses incurred in connection with the administration of ORS 243.105 to 243.285 and 292.051. Among other purposes, the board may retain the funds to control expenditures, stabilize benefit premium rates and self-insure. The board may establish subaccounts within the Public Employees' Revolving Fund. (2) There is appropriated to the Public Employees' Revolving Fund all unused employer contributions for employee benefits and all refunds, dividends, unused premiums and other payments attributable to any employee contribution or employer contribution made from any carrier or contractor that has provided employee benefits administered by the board, and all interest earned on such moneys. Fully insured premiums are treated as a pass-through account and funds are sent directly to the Fully Insured provider. (1) In addition to the powers and duties otherwise provided by law to provide employee benefits, the Public Employees' Benefit Board may provide, administer and maintain flexible benefit plans under which eligible employees of this state may choose among taxable and nontaxable benefits as provided in the federal Internal Revenue Code. (2) In providing flexible benefit plans, the board may offer: (a) Health or dental benefits as provided in ORS 243.125 and 243.135. (b) Other insurance benefits as provided in OOptional benefits are insurance premiums paid by members and are treated as pass-through account and funds are sent directly to the Optional Benefit provider.	243.167 Public Employees' Revolving Fund; continuing appropriation to fund, 243.221 Options that may be offered under flexible benefit plan.	10			2,295,178,751				2,295,178,751
10	Oregon Educators Benefit Board (OEBB)	OEBB Stabilization	No	There is created the Oregon Educators Revolving Fund, separate and distinct from the General Fund. Moneys in the Oregon Educators Revolving Fund are continuously appropriated to the Oregon Educators Benefit Board to cover the board's expenses incurred in connection with the administration of ORS 243.860 to 243.886. Moneys in the Oregon Educators Revolving Fund may be retained for limited periods of time as established by the board by rule. Among other purposes, the board may retain the funds to pay premiums, control expenditures, stabilize premiums and self-insure.	243.884 Oregon Educators Revolving Fund; continuous appropriation to board; purposes; rules; moneys paid into fund	10			1,857,421,546				1,857,421,546

Oregon Health Authority: 10 Percent Reduction Options

As supplemental information to the Agency Request Budget, Oregon law requires each state agency to include reduction options of 10 percent from the estimate of projected costs of continuing currently authorized activities and programs for the next biennium.

A large proportion of the Oregon Health Authority's (OHA) budget is expended for services directly provided to clients.

General criteria and principles applied to the reduction list included:

- Avoid reductions that have a negative impact on populations already disproportionately impacted by health inequities and health disparities.
- Identifying reductions that do the least harm to the fewest number of clients.
- Applying the OHA goals of containing costs, improving quality and increasing access to health care.
- Avoiding reductions that shift people to more costly service models within OHA or DHS.
- Minimizing effect on OHA Health Systems Transformation efforts and the obligation to maintain the growth of health care costs to 3.4 percent per year or below.

Any reductions necessary would potentially affect the OHA programs in the following areas:

Central Office and Shared Services

Most of the Central Office and Shared Services General Fund is necessary for ongoing commitments for which OHA does not materially have the option to reduce. Central, Shared, State Government Service Charges, and Debt Service on Capital Construction authorized in prior biennium account for only about two percent of this budget. Administrative cuts through staff reductions or vacancies, or cuts to professional service contracts have been implemented in previous biennia. As OHA continues with its health system transformation efforts, any further reductions in these areas would have a direct impact on the Director's Office, as well as many of the OHA dedicated service offices (e.g., Human Resources, External Relations, and Equity and Inclusion).

Oregon Health Authority: 10 Percent Reduction Options

Health Systems Division

Inflation increases for coordinated care organization capitation rates and Oregon Health Plan fee-for-service provider rates would be less than 3.4 percent annual inflation.

Indirect and Direct Medical Education payments to teaching hospitals would be eliminated—at the very time we need more trained medical professionals to serve our growing population.

Non-Medicaid inflation for substance use disorder treatment and community mental health programs would be eliminated.

Elimination of the Mental Health Services Fund for residential development may result in some facilities deteriorating and potentially becoming unsafe. This could affect the environment and livability of residential programs.

Funding used to facilitate the transition of civilly committed adults from the state hospital to the community when they no longer need inpatient mental health treatment would be reduced 50 percent.

Oregon Health Plan coverage would be reduced by limiting or eliminating specific services or reducing line items covered on the Prioritized List of Health Services. Specific options reduce dental services, eliminate non-emergent dental coverage for nonpregnant clients, and eliminate treatment of substance abuse disorders for non-pregnant adults. Obviously, some individuals could experience immediate adverse impacts to their health without these services; others could see their health deteriorate.

All reductions to the Oregon Health Plan would require approval by the Centers for Medicare & Medicaid Services (CMS) and most would be prohibited under the special terms and conditions previously agreed upon by OHA and CMS.

Public Health

The budget for Oregon Contraceptive Care program payments would be reduced by 20 percent.

Farmers Market Food Voucher program for both WIC families and low-income seniors would be eliminated.

Oregon Health Authority: 10 Percent Reduction Options

Oregon State Hospital

Because of ongoing revenue and expenditure challenges at the hospital, OHA is not proposing any reductions to this budget. The Oregon State Hospital faces continued challenges in balancing the needs for individuals are referred to the hospital through a civil commitment and individuals ordered to the hospital by the courts for treatment that will help them to assist in their own defense. Because of the number of individuals requiring court-ordered treatment to assist in their own defense, there is a waiting list for hospital admission for individuals referred through a civil commitment.

Health Policy & Analytics

OHA is not proposing any reductions to this budget. This division is critical to supporting the rest of the agency in addressing health disparities and health inequities.

Oregon Health Authority
Reduction Options: 2021-2023 Agency Request Budget

10% General Fund / 10% Other & Federal Fund Reduction Options for the 2021-2023 Biennium

(Limited Other and Federal Funds only - does not include Non-Limited Funds)

Current Service Level Budget (OHA LEVEL)	**3,276,330,945**	**7,956,991,242**	**13,554,578,302**	**24,787,900,489**
10% Target	**(327,633,095)**	**(795,699,124)**	**(1,355,457,830)**	**(2,478,790,049)**

Accumulative % Reduction of CSL GF	Program Priority	Program Area	Reduction Description	Federal Approval required? (Y/N)	GF & LF	OF	FF	TF	# of Employees Affected	BUDGET FTE	Impact of Reduction on Services and Outcomes (include other program areas, number of clients affected, etc.)
-1.00%	1	Medicaid	Reduce Oregon Health Plan inflation for managed care and fee-for-service from 3.4% to 3.0% per year.	N	(32,800,000)	0	(78,300,000)	(111,100,000)			This reduction is removing inflation that was built into the CSL 2021-23 budget to meet the anticipated program growth. Removing this inflation would leave a greater gap between what is able to be reimbursed for Medicaid expenses in comparison to the reimbursement rate by other insurers. If the above inflation reduction were to take place, it would require program expenses to be cut by a corresponding amount. There would be tough decisions to be made about which programs could be reduced or cut to stay with in budgetary constraints. In making these cuts, Medicaid would work to prioritize protection of priority populations, however since Medicaid operates with virtually no reserve it would be impossible not to impact even priority populations. Less reimbursement for Medicaid services may make it harder to recruit providers to serve in demographics that service largely aged, disabled or impoverished areas where provider growth is noted as being needed most.
-1.30%	2	Medicaid	Eliminate the Indirect Medical Education (IME) component of the Graduate Medical Education (GME) program. The agency would eliminate Medicaid payments to teaching hospitals that help offset indirect costs associated with their GME programs. IME includes indirect costs that arise from the inexperience of residents such as extra medical tests and reduced productivity. CMS APPROVAL REQUIRED.	Y	(9,766,000)	0	(15,046,000)	(24,812,000)			Oregon's teaching hospitals depend on these payments to supplement their teaching programs. Discontinuing payments would be a hardship on ten teaching facilities and would de-incentivize hospitals from training new physicians. Discontinuing GME payment would also impact the physician workforce as there is already a shortage in the primary care specialty, which is one of the largest specialties in a teaching program. A reduction of trained providers may limit access to quality healthcare.
-1.35%	3	Medicaid	Eliminate the Direct Medical Education (DME) component of the Graduate Medical Education (GME) program. The agency would eliminate Medicaid payments to teaching hospitals that help offset costs associated with their graduate medical education programs. GME includes costs associated with stipends or salaries for residents, payments to supervising physicians, and direct program administration costs. CMS APPROVAL REQUIRED.	Y	(1,805,000)	0	(2,782,000)	(4,587,000)			Oregon's teaching hospitals depend on these payments to supplement their teaching programs. Discontinuing payments would be a hardship on ten teaching facilities and would de-incentivize hospitals from training new physicians. Discontinuing GME payment would also impact the physician workforce as there is already a shortage in the primary care specialty, which is one of the largest specialties in a teaching program. A reduction of trained providers may limit access to quality healthcare.
-1.37%	4	PHD/AGRH	Reduction in Oregon Contraceptive Care (CCare)	N	(500,000)	0	(4,500,000)	(5,000,000)			It is likely that this level of reduction could be covered by unspent funds for claims for clinical services, including vasectomy services which are typically underutilized. Additionally, program staff can continue efforts to support providers to reduce the number of ineligible claims (due to clients determined to be over the income threshold for CCare eligibility), thereby reducing the need to adjust ineligible claims to all General Fund instead of Federal Fund/General Fund.
-2.04%	5	Non-Medicaid	Remove inflation for Community Mental Health and Substance Use Disorder Programs.	N	(22,013,205)	0	(5,264,706)	(27,277,911)			Removal of inflation for the 2021-23 biennium would be devastating to the BH system. Programs reliant on OHP reimbursement for treating clients may have layoffs and smaller providers impacted by COVID may close. Cuts disproportionately hurt the most vulnerable including Tribal Communities and Communities of Color, homeless and children. Oregon has one of the highest rates of mental illness and addiction in the USA; suicide is the leading cause of death for children. We would see an increase in costly services including EDs, inpatient care and pressure on a health system that doesn't have capacity to address the need. Oregon would be at increased risk for non-compliance with current lawsuits, audit findings and increase the risk of more judicial oversight.
-2.79%	6	Medicaid	Further reduce Medicaid inflation for managed care and fee-for-service from 3.0% to 2.7% per year.	N	(24,400,000)	0	(58,200,000)	(82,600,000)			This reduction is removing inflation that was built into the CSL 2021-23 budget to meet the anticipated program growth. Removing this inflation will leave a greater gap between what is able to be reimbursed for Medicaid expenses in comparison to the reimbursement rate by other insurers. If the above inflation reduction were to take place, it would require program expenses to be cut by a corresponding amount. There would be tough decisions to be made about which programs could be reduced or cut to stay with in budgetary constraints. In making these cuts, Medicaid would work to prioritize protection of priority populations, however since Medicaid operates with virtually no reserve it would be impossible not to impact even priority populations. Less reimbursement for Medicaid services may make it harder to recruit providers to serve in demographics that service largely aged, disabled or impoverished areas where provider growth is noted as being needed most.

Accumulative % Reduction of CSL GF	Program Priority	Program Area	Reduction Description	Federal Approval required? (Y/N)	GF & LF	OF	FF	TF	# of Employees Affected	BUDGET FTE	Impact of Reduction on Services and Outcomes (include other program areas, number of clients affected, etc.)
-3.53%	7	Medicaid	Further reduce Medicaid inflation for managed care and fee-for-service from 2.7% to 2.4% per year.	N	(24,300,000)	0	(58,000,000)	(82,300,000)			This reduction is removing inflation that was built into the CSL 2021-23 budget to meet the anticipated program growth. Removing this inflation will leave a greater gap between what is able to be reimbursed for Medicaid expenses in comparison to the reimbursement rate by other insurers. If the above inflation reduction were to take place, it would require program expenses to be cut by a corresponding amount. There would be tough decisions to be made about which programs could be reduced or cut to stay with in budgetary constraints. In making these cuts, Medicaid would work to prioritize protection of priority populations, however since Medicaid operates with virtually no reserve it would be impossible not to impact even priority populations. Less reimbursement for Medicaid services may make it harder to recruit providers to serve in demographics that service largely aged, disabled or impoverished areas where provider growth is noted as being needed most.
-3.91%	8	Medicaid	Eliminate coverage for specific dental services for adult Oregon Health Plan (OHP) clients. The agency would no longer cover the following dental services for adults (including pregnant adults) on OHP: Crowns, full and partial dentures; scaling & root planning. CMS NEGOTIATION AND APPROVAL IS REQUIRED - The Health System Transformation waiver Special Terms and Conditions prohibit the state from reducing eligibility or benefits.	Y	(12,570,007)	0	(47,058,442)	(59,628,449)			Eliminate coverage for specific dental services for adult Oregon Health Plan (OHP) clients, no longer covering the following dental services for adults (including pregnant adults) including: crowns, full and partial dentures, scaling and root planning. CMS negotiation and approval are required. Dental benefit reductions would impact an individual's over-all health. Reductions would create a worsening of chronic diseases such as diabetes, poor pregnancy outcomes, and create a shift in treatment need. Patients not receiving needed dental care would experience need to go to the Emergency Department, possibly elevating need for opioids and/or requests for opioids and higher ED costs. People would lose teeth unnecessarily with no means to replace them. People will experience more difficulty in getting jobs due to poor oral appearance and experience missed days from work due to oral disease and pain. Dental benefit reductions would hinder populations affected by health inequities from achieving health equity or equitable health outcomes. Marginalized populations suffer the highest incidence or oral disease in all categories.
-4.07%	9	Non-Medicaid	Reduce Community Mental Health (CMH) Choice Funding by 50%.	N	(5,226,849)	0	0	(5,226,849)			This is a 50% reduction for Choice Model services which address care coordination needs and bridging services for adults with Serious and Persistent Mental Illness who are: 1) at risk of going to the Oregon State Hospital, 2) are at the Oregon State Hospital and needing discharge coordination into the community, and 3) utilization management of license residential care (residential treatment and adult foster homes). The need for these services is still highly critical. Choice contractors would still be responsible for addressing these needs but efficiency and timeliness would be severely reduced. There would be reduced bridging services which pay for services not covered by Medicaid or between authorizations in order to make transitions from one level of service to another more rapid. This would include: establishing guardianships and payees, funding certification training for peers, paying for placements before authorization or Medicaid is finalized, paying for temporary transitional housing through hotels, paying for off formulary medications and treatments, paying for therapeutic supports that help community integration, etc. The central program outcome is to discharge those who are identified at Oregon State Hospital as Ready To Transition. The goal is for 90% discharged within 20 days. This has been a challenging objective to reach (about 30% of providers are able to achieve this goal so far) but funding reduction will make this an exceptionally difficult goal to reach.
-5.14%	10	Medicaid	Eliminate dental coverage for Oregon Health Plan (OHP) non-pregnant adults. The agency would eliminate the remaining non-pregnant adult dental coverage for the OHP benefit package. LEGISLATIVE ACTION REQUIRED. CMS NEGOTIATION AND APPROVAL IS REQUIRED - The Health System Transformation waiver Special Terms and Conditions prohibit the state from reducing eligibility or benefits.	Y	(35,157,011)	0	(140,760,276)	(175,917,287)			Eliminate dental coverage for OHP non-pregnant adults, which would eliminate all services for non-pregnant adult dental coverage for the OHP benefit package. Dental benefit reductions would impact an individual's over-all health. Reductions would create a worsening of chronic diseases such as diabetes, poor pregnancy outcomes, and create a shift in treatment need. Patients not receiving needed dental care would experience need to go to the Emergency Department, possibly elevating need for opioids and/or requests for opioids and higher ED costs. People would lose teeth unnecessarily with no means to replace them. People would experience more difficulty in getting jobs due to poor oral appearance and experience missed days from work due to oral disease and pain. Dental benefit reductions would hinder populations affected by health inequities from achieving health equity or equitable health outcomes. Marginalized populations suffer the highest incidence or oral disease in all categories.

Accumulative % Reduction of CSL GF	Program Priority	Program Area	Reduction Description	Federal Approval required? (Y/N)	GF & LF	OF	FF	TF	# of Employees Affected	BUDGET FTE	Impact of Reduction on Services and Outcomes (include other program areas, number of clients affected, etc.)
-5.14%	11	Medicaid	Eliminate all leverage.	Y	0	(110,236,762)	(175,444,192)	(285,680,954)			This reduction would eliminate all leveraged Medicaid funds from the following programs: Disproportionate Share (DSH) – Oregon Health Sciences University (OHSU); Graduate Medical Education (GME) - the leverage portion (OHSU), not GME supported by General Fun; University Medical Group (UMG) - OHSU; Poison Control - OHSU; Child Development and Rehabilitation Center (CDRC) – OHSU; School-Based Health Services (SBHS); Medicaid Administrative Claiming (MAC); Behavioral Rehabilitation Services (BRS); and, Targeted Case Management (TCM). These programs would likely cease to exist without being able to utilize Federal Funds (FF). These programs serve populations with the most disparate health outcomes, including: high-risk factor children, children with disabilities, the elderly, pregnant women, Tribes, and individuals experiencing substance abuse disorder and mental health disorders. Oregon's most at-risk populations would be negatively affected with the loss of this funding. Eliminating the Federal Funds contribution for the OHSU QDP would negatively impact Medicaid clients access to the high-quality specialty care and support activities provided by Oregon's only public academic health center.
-6.13%	12	Medicaid	Further reduce Medicaid inflation for managed care and fee-for-service from 2.4% to 2.0% per year.	N	(32,300,000)	0	(77,200,000)	(109,500,000)			This reduction is removing inflation that was built into the CSL 2021-23 budget to meet the anticipated program growth. Removing this inflation would leave a greater gap between what is able to be reimbursed for Medicaid expenses in comparison to the reimbursement rate by other insurers. If the above inflation reduction were to take place it would require program expenses to be cut by a corresponding amount. There would be tough decisions to be made about which programs could be reduced or cut to stay with in budgetary constraints. In making these cuts, Medicaid would work to prioritize protection of priority populations, however since Medicaid operates with virtually no reserve it would be impossible not to impact even priority populations. Less reimbursement for Medicaid services may make it harder to recruit providers to serve in demographics that service largely aged, disabled or impoverished areas where provider growth is noted as being needed most.
-6.87%	13	Medicaid	Further reduce Medicaid inflation for managed care and fee-for-service from 2.0% to 1.7% per year.	N	(24,200,000)	0	(57,600,000)	(81,800,000)			This reduction is removing inflation that was built into the CSL 2021-23 budget to meet the anticipated program growth. Removing this inflation would leave a greater gap between what is able to be reimbursed for Medicaid expenses in comparison to the reimbursement rate by other insurers. If the above inflation reduction were to take place it would require program expenses to be cut by a corresponding amount. There would be tough decisions to be made about which programs could be reduced or cut to stay with in budgetary constraints. In making these cuts, Medicaid would work to prioritize protection of priority populations, however since Medicaid operates with virtually no reserve it would be impossible not to impact even priority populations. Less reimbursement for Medicaid services may make it harder to recruit providers to serve in demographics that service largely aged, disabled or impoverished areas where provider growth is noted as being needed most.
-7.60%	14	Medicaid	Further reduce Medicaid inflation for managed care and fee-for-service from 1.7% to 1.4% per year.	N	(24,100,000)	0	(57,400,000)	(81,500,000)			This reduction is removing inflation that was built into the CSL 2021-23 budget to meet the anticipated program growth. Removing this inflation would leave a greater gap between what is able to be reimbursed for Medicaid expenses in comparison to the reimbursement rate by other insurers. If the above inflation reduction were to take place it would require program expenses to be cut by a corresponding amount. There would be tough decisions to be made about which programs could be reduced or cut to stay with in budgetary constraints. In making these cuts, Medicaid would work to prioritize protection of priority populations, however since Medicaid operates with virtually no reserve it would be impossible not to impact even priority populations. Less reimbursement for Medicaid services may make it harder to recruit providers to serve in demographics that service largely aged, disabled or impoverished areas where provider growth is noted as being needed most.

Accumulative % Reduction of CSL GF	Program Priority	Program Area	Reduction Description	Federal Approval required? (Y/N)	GF & LF	OF	FF	TF	# of Employees Affected	BUDGET FTE	Impact of Reduction on Services and Outcomes (include other program areas, number of clients affected, etc.)
-8.58%	15	Medicaid	Further reduce Medicaid inflation for managed care and fee-for-service from 1.4% to 1.0% per year.	N	(32,000,000)	0	(76,400,000)	(108,400,000)			This reduction is removing inflation that was built into the CSL 2021-23 budget to meet the anticipated program growth. Removing this inflation would leave a greater gap between what is able to be reimbursed for Medicaid expenses in comparison to the reimbursement rate by other insurers. If the above inflation reduction were to take place it would require program expenses to be cut by a corresponding amount. There would be tough decisions to be made about which programs could be reduced or cut to stay with in budgetary constraints. In making these cuts, Medicaid would work to prioritize protection of priority populations, however since Medicaid operates with virtually no reserve it would be impossible not to impact even priority populations. Less reimbursement for Medicaid services may make it harder to recruit providers to serve in demographics that service largely aged, disabled or impoverished areas where provider growth is noted as being needed most.
-8.59%	16	PHD/NHS	Elimination of the USDA/WIC Farmer's Market Food Voucher Program	N	(268,075)	0	(1,327,003)	(1,595,078)			Provides vouchers to 25,300 low income WIC participants each summer to purchase locally grown fresh fruits and vegetables. Additionally, there would be reduced income to local farmers as over 90% of the dollars go directly to 500+ local Oregon farmers; and reduced access to healthy food choices for this vulnerable population. This program supports the SHIP priority: Slow the increase of obesity, Strategy 4: improve availability of affordable, healthy food and beverage choices for two identified target groups, 2-5 year olds and adults. USDA does require state fund administrative match requirement to participate in this grant.
-8.59%	17	PHD/NHS	Elimination of the USDA/Senior Farmer's Market Program	N	(6,169)	0	(1,639,748)	(1,645,917)			Provides vouchers to 43,000 low income seniors each summer to purchase fresh locally grown fruits and vegetables. Additionally, there would be reduced income to local farmers as over 90% of the dollars of directly to 500+ local farmers; biennium; and reduced access to healthy choices for this population at risk for inadequate intake of fruits and vegetables and food insecurity. This program supports the SHIP priority: Slow the increase of obesity, Strategy 4: improve availability of affordable, healthy food and beverage choices for adults, a primary target group.
-9.26%	18	Medicaid	Cover 25 fewer lines on Prioritized List of Health Services. Oregon Health Plan (OHP) coverage is based on the Prioritized List of Health Services, which ranks treatment and condition pairs in order of effectiveness. Starting July 1, 2021, OHP would cover lines 1 through 446. The agency would seek federal approval to no longer cover lines 447 through 471 for the OHP benefit packages. LEGISLATIVE ACTION REQUIRED. CMS NEGOTIATION AND APPROVAL IS REQUIRED - The Health System Transformation waiver Special Terms and Conditions prohibit the state from reducing eligibility or benefits.	Y	(22,016,198)	0	(51,661,390)	(73,677,588)			This reduction would eliminate coverage of 25 lines on the Prioritized List representing important medical and vision services for conditions on the Oregon Health Plan, including children and pregnant women. The reduction includes services for children's vision services, certain mental health conditions, services that can prevent blindness and prevent fatal aneurisms. Failure to cover these services could result in other conditions that are more expensive to treat and lead to more emergency department visits. This reduction could cause disability, more serious mental health conditions, and death. Eliminating coverage for these services would result in sicker Oregonians that are unable to work or may experience more missed work days due to untreated conditions. Children with vision problems would experience barriers to quality education. This reduction would result in a loss of revenue to hospitals, physicians, and mental health providers.
-10.00%	19	Medicaid	Reduce the covered lines on the Prioritized List of Health Services by an additional 15 lines. Oregon Health Plan (OHP) coverage is based on the Prioritized List of Health Services, which ranks treatment and condition pairs in order of effectiveness. Starting July 1, 2021, OHP would cover lines 1 through 432. The agency would seek federal approval to no longer cover lines 433 through 446 for the OHP benefit packages. LEGISLATIVE ACTION REQUIRED. CMS NEGOTIATION AND APPROVAL IS REQUIRED - The Health System Transformation waiver Special Terms and Conditions prohibit the state from reducing eligibility or benefits.	Y	(24,204,581)	0	(54,639,883)	(78,844,464)			This reduction would eliminate coverage of 15 lines on the Prioritized List (for a total of 40 when including 25 lines in a separate reduction package) representing important medical and mental health services for conditions on the Oregon Health Plan, including children and pregnant women. The reduction includes services for hearing loss, severe skin conditions, common painful women's health conditions, certain mental health conditions, and cancer of the gallbladder. Failure to cover these services could result in other conditions which are more expensive to treat and cause more emergency department visits. This reduction could cause disability, more serious mental health conditions, and death. Eliminating coverage for these services will result in sicker Oregonians that are unable to work or may experience more missed work days due to untreated conditions. Children with hearing problems will experience barriers to quality education. These changes would result in a loss of revenue to hospitals, physicians, and mental health providers

Accumulative % Reduction of CSL GF	Program Priority	Program Area	Reduction Description	Federal Approval required? (Y/N)	GF & LF	OF	FF	TF	# of Employees Affected	BUDGET FTE	Impact of Reduction on Services and Outcomes (include other program areas, number of clients affected, etc.)
-10.00%	20	PEBB	PEBB self-insured and fully insured plan reductions	N	0	(378,522,266)	0	(378,522,266)		-	PEBB contracts with insurance carriers for employee benefit plans. The operating budget for PEBB is 0.50%. The remaining 99.5% is program budget, which is dedicated funding for payment of self-insured and fully insured benefit plans. Taking reductions at any level may potentially default PEBB in its contractual obligations with carriers. Major plan design changes could possibly hit the reduction targets but it would take a major reduction in medical plan coverage and would jeopardize the stabilization of the statewide risk pool. A major shift in cost sharing between employee and employer could also potentially hit the reduction target but the reductions would have to be taken at the state agency budget level, as it passes employee benefit dedicated dollars through to PEBB.
-10.00%	21	OEBB	OEBB plan reductions	N	0	(306,940,096)	0	(306,940,096)			OEBB contracts with insurance carriers for Entity and Self-Pay member benefit plans. The operating budget for OEBB is 0.5%. The remaining 99.5% are dedicated funds for payment of fully-insured benefit plans that OEBB is contractually obligated to pass-through to carriers. The pass-through premiums include other taxes and fees at the state and federal level. Taking reductions at any level may potentially default OEBB in its contractual obligations with carriers. Premium shifts to members will not change the pass-through budget dollars needed to meet contractual obligations with carriers.
-10.00%	22	OHA	Federal Funds reductions		0	0	(470,534,190)	(470,534,190)			OHA is eligible for and receives federal matching funds from a variety of programs, including Medicaid and Children's Health Insurance Program (CHIP). The agency also receives Federal Funds from many other grant opportunities for public health and behavioral health programs. This $470 million reduction in Federal Funds limitation is provided to meet the required 10% reduction target. No specific program cuts are identified.

Oregon Health Authority Revenue Narrative
2021-23 Agency Request Budget

Revenue for the Oregon Health Authority (OHA) comes from multiple funding sources classified as the state General Fund, Other Funds, Lottery Funds and Federal Funds. Most General Fund revenue is used as match to receive Federal Funds, particularly for the Oregon Health Plan (OHP), Oregon's Medicaid program. General Fund is also the primary funding source for the Oregon State Hospital. In addition to Medicaid, Federal Funds support a variety of grant programs across OHA. Lottery Funds finance gambling addiction, prevention and treatment services. Other Funds revenues come from various sources, including hospital and insurer assessments, tobacco taxes, Tobacco Master Settlement Agreement funding, retail marijuana taxes, beer and wine taxes, licensing fees, grants, estate collections, health care premiums, third party recoveries, pharmaceutical rebates, and charges for services.

Forecast methods and assumptions

There are several methodologies used to project OHA revenues:

To estimate Federal Funds from Medicaid and Children's Health Insurance Program (CHIP), OHA uses caseload forecasts, cost per person, match rates, and state and federal policy changes. To estimate Federal Funds from block grants, OHA considers grant cycles and where they fall within the biennium. Assumptions around prior grant averaging and the anticipated effect of federal budget changes are made to project the amount of funds OHA will receive. The historical receipt trends method is used for Other Funds sources such as collections of overpayments and fees, unless the agency has additional information including anticipated special projects that would increase revenue. Where appropriate, reports from the Office of Economic Analysis are used (Tobacco Tax and Lottery Funds, for example) and analysis from other state agencies that collect revenues for distribution to OHA, such as beer and wine tax revenues.

OHA projects revenues based on assumptions that take into account:

- Essential packages that adjust the existing base budget to the 2021-23 modified current service level (MCSL) for all legislatively approved programs, where those adjustments would have an impact on revenues. Essential packages include phasing in or out program changes, one-time costs, Department of Administrative Services inflation factor, mandated

caseload changes, and any needed fund shifts.

- Applicable federal funding limits and requirements, including the availability of state funds to meet matching or maintenance of effort (MOE) requirements.
- Changes in federal policies that affect federal revenues available for OHA programs;
- Policy packages that generate new sources of revenue.
- Expected non-mandated program caseload changes.
- Any recent changes in state or federal statutes and regulations that will affect the availability or timing of revenue receipts.

Fee schedules and proposed increases

OHA utilizes many fees as funding sources. Most of these fees are in Public Health. See Fee Listing Report for details.

For the 2021-23 biennium, the Public Health Division proposes increasing the fee authority in programs to support current operations in these programs: Radiation Protective Services, Cosmetology and Respiratory Therapist and Polysomnographic Technologist Boards, ambulance licensing, Oregon Environmental Laboratory Accreditation Program, and the Prescription Drug Monitoring Program. In addition, the division proposes a statewide Tobacco Retail Licensure program, paid for with a new licensure fee, to enforce tobacco sale laws. The division also proposes an increase in the Beer, Wine and Cider Tax to address alcohol addiction and other behavioral health challenges. See the policy package narratives for details.

Significant known revenue changes or risk factors

Significant federal funding changes occurred in the 2019-21 biennium in response to the COVID-19 pandemic. OHA assumes additional federal funding for the pandemic response effort will cease prior to the start of the 2021-23 biennium, although it is uncertain how long the public health emergency will last. In the 2021-23 biennium, the division anticipates decreases in many of its funding streams due to the economic downturn associated with COVID-19. In particular, impacted funding streams will likely be those associated with individuals' ability to spend on taxable products and those associated with health care provider net patient revenue and insurer premiums revenue. This will be accompanied by increased demand on services through the Oregon Health Plan, as enrollment increases due to economic hardships.

OHA federal revenues for the 2021-23 biennium will see a variety of significant changes including declines in tobacco tax and lottery revenues, Oregon Medical Marijuana Program fee revenues, and ending of federal grants. The Legislature referred to voters in the November 2020 ballot legislation to increase the state's cigarette tax by a $2.00 per pack, extend the existing wholesale tax on other tobacco products to vaping products and increase other non-cigarette tobacco taxes. The proposed increase in tobacco taxes is not included in the Agency Request Budget.

Over the past three biennia, the CHIP federal match rate has changed significantly. The CHIP match rate for the first quarter of the 2015-17 biennium was approximately 75 percent. Effective October 1, 2015, the Affordable Care Act (ACA) increased the CHIP match rate by 23 percentage points to 98 percent. For the 2017-19 biennium, the CHIP rate remained at about 97 percent. Effective October 1, 2019, the match rate increase reduced from 23 percentage points to 11.5 percentage points. Effective October 1, 2020, states will no longer receive an increase.

The Oregon Medical Marijuana Program (OMMP) fee revenue has steadily declined as a result of the legalization of recreational marijuana. In 2015-17, Public Health's local communicable disease services were entirely funded by OMMP fee revenue. As a result of decreasing revenues, the services in 2019-21 could only be partially funded by OMMP fee revenue. For 2021-23, the Public Health Division is requesting General Fund to fully support local communicable disease services.

At the Oregon State Hospital, Non-General Fund revenue is derived from services billed to patient's insurance benefits and/or Medicare eligibility, when applicable. The hospital's primary source of service revenue is Medicare Part A, which provides limited days of lifetime coverage per patient, regardless of length of stay or number of admissions. A decline or increase in patients with available benefits will correlate to a decline or increase in hospital revenue.

Two notable recent or upcoming changes in federal grant funding will impact the budget in the 2021-23 biennium. Early in the 2019-21 biennium, OHA ended participation in the Title X grant, which provided funding in Public Health's Reproductive Health Program. In the 2021-23 biennium, Federal health IT funding through the Health Information Technology for Economic and Clinical Health (HITECH) Act, which provided at 90/10 match, is sunsetting for all states in 2021. In policy package #320,

OHA proposes continuing OHIT's work at a 75/25 Medicaid Enterprise Systems (MES) federal match rate (with some staff transitioning to 50/50 or 39/61 match).

Major funding sources

The following section identifies the major funding sources for OHA. All references to a grant "Title" are referencing the originating statute in the federal Social Security Act (SSA).

Federal Funds

On March 18, 2020, the President signed into Law H.R. 6021, the Families First Coronavirus Response Act (FFCRA) which provided a temporary increase to each state's Federal Medical Assistance Percentage (FMAP) effective January 1, 2020 and extending through the last day of the calendar quarter in which the public health emergency terminates. OHA assumes the increased FMAP will last through December 2020 and will not have be in effect during the 2021-23 biennium.

Medicaid (Title XIX)

Medicaid provides reimbursement to states for medical care and related services to low income and other medically needy individuals. This includes financing for:

- Health care services provided under the Oregon Health Plan.
- Private insurance premiums.
- Long-term care in institutional and community-based care settings.
- Some client care provided in state hospitals.
- Residential treatment services to adults and youth.
- Central administration of alcohol and drug programs.
- Medical and non-medical transportation for Medicaid eligible individuals.
- Family planning services for individuals not enrolled in the Oregon Health Plan.
- Uncompensated care provided by hospitals serving a high proportion of Medicaid and uninsured individuals.

State General Fund or Other Funds must be used to match federal Medicaid dollars for administration and direct service payments. For Medicaid staffing and administrative expenditures, the match rate is generally 50 percent, but the agency can claim a 75 percent match rate for administrative activities directly related to eligibility determinations and enrollment. A 75 percent match rate is also available for skilled professional medical personnel, certification of nursing facilities, and related information systems activities, including the Medicaid Management Information System (MMIS) computer system support and Preadmission Screening and Resident Review (PASRR) activities.

Since 2009, OHA's health information technology (IT) efforts have been almost exclusively funded by federal 90/10 Medicaid match, under the HITECH Act, as well as some funding from Medicaid Enterprise Systems (MES) federal (formerly MMIS) matching dollars, and state general fund. More than half of the Office of Health Information Technology (OHIT) 2019-21 budget was federal funding through the HITECH Act to provide incentive payments to Oregon hospitals and providers under Oregon's Medicaid EHR Incentive Program. Incentive payments are 100 percent federally funded. In 2021-23, the Medicaid EHR Incentive Program will end, with all federal incentive payments disbursed by the end of 2021.

Federal health IT funding, which provided at 90/10 match, is sunsetting for all states in 2021. OHIT's work is poised to transition to ongoing 75/25 MES federal match (with some staff transitioning to 50/50 or 39/61 match). Federal match rates depend on several factors, including whether the money is spent on planning, implementation or operations. This means that for every state dollar invested, between five and nine federal matching dollars are drawn into the Oregon economy.

The average federal Title XIX match rate for service payments to providers is 60.64 percent for the 2021-23 biennium, down from the 2019-21 average match rate of 64.35 percent. The Title XIX match rate applies to OHP (non-ACA expansion), emergency medical care for non-citizens (CAWEM), and Qualified Medicare Beneficiary (QMB) caseloads. The 2021-23 average match rate for the ACA expansion population is 90 percent, down from the 2019-21 average match rate of 90.75 percent. The cost of services and supplies for family planning is matched at 90 percent. The Breast and Cervical Cancer Treatment program, which is an optional Medicaid program, will receive the regular CHIP Title XXI match rate of 72.45 percent for the 2021-23 biennium, a decrease from the 2019-21 average enhanced rate of 75.05 percent.

Most of these services in Oregon are provided through Medicaid programs that require waivers of federal requirements. The

Oregon Health Plan is the largest of these waiver programs under Section 1115 of the SSA, followed by six waivers operated under Section 1915(c) authority. OHA must obtain approval from the federal Centers for Medicare and Medicaid Services (CMS) to make changes to its Medicaid program whether the changes are Medicaid state plan services or waiver services. This approval process can be lengthy, sometimes affecting the timing of program changes and the receipt of federal revenues.

Medicaid currently funds services in all OHA program areas. The projection method used to calculate funding is expenditures based on caseload forecasts, cost per person, match rates, and state and federal policy changes.

Children's Health Insurance Program (Title XXI)

The Children's Health Insurance Program (CHIP) provides federal matching funds to the state for medical care of children through age 18 who do not have insurance but whose parents earn too much for traditional Medicaid. These services are covered through the Oregon Health Plan administered by the Health Systems Division. The average enhanced federal Title XXI match rate for the 2021-23 biennium is 72.45 percent, down from 83.67 percent in the 2019-21 biennium.

The projection method used to calculate available funds are expenditures based on caseload forecasts, cost per person, match rates, and state and federal policy changes.

Temporary Assistance for Needy Families (TANF; Title IV-A)

Under the Personal Responsibility and Work Act of 1996 (PRWOA), Oregon is eligible to receive an annual Temporary Assistance for Needy Families (TANF) federal block grant. OHA uses TANF revenue to fund Non-Medicaid programs in the Health Services Division such as alcohol and drug treatment services. The Department of Human Services (DHS) uses TANF revenues to fund cash assistance for single and two parent families, domestic violence emergency assistance, and employment and training (JOBS) services. Other agencies use TANF revenue to fund transportation, and housing assistance for homeless persons. Administrative and direct service costs can also be reimbursed using TANF revenues. Administrative costs are limited to no more than 15 percent of total TANF expenditures, with certain limited exceptions.

To qualify for this grant, states must expend a minimum of state and local revenues on TANF-related services to meet federal maintenance of effort requirements (MOE). The block grant concept also places restraints on service delivery. Federal Funds

are capped, which means no federal revenue is available for increasing program costs. This limitation on revenue requires Oregon to essentially self-fund any program increases. The method used to project revenue is the grant cycle.

Center for Mental Health Services block grant (CMHS)
Federal CMHS funds are granted to states to carry out activities for providing comprehensive community mental health services. The program targets adults with serious mental illness and children with serious emotional disturbances in the Health Systems Division. Funds for children are contracted in all counties throughout the state. At least ten percent of the funding must support evidence-based programs that address the needs of individuals with early serious mental illness. The funding projection is based on the grant cycle.

Maternal and Child Health Grant (Title V)
The Maternal and Child Health Grant (MCHG) enables states to maintain and strengthen their leadership in planning, promoting, coordinating and evaluating health care for pregnant women, mothers, infants, and children, including children with special health care needs. Grant funds also promote leadership in providing health services for mothers and children who do not have access to adequate health care. MCHG is a formula grant partially based on the state's population of children in poverty. States must expend $3 for every $4 of Federal Funds they receive.

This grant currently funds Public Health Division programs. The grant will request approximately $12.3 million Federal Funds for the 2021-23 fiscal years. Presently, 30 percent ($3.65 million) of the award is transferred to the Oregon Health Sciences University Institute on Development and Disability (IDD) as an earmark requirement for health services for children with special health care needs.

Nutrition and Health Screening (WIC) program
The Public Health Division Center for Prevention and Health Promotion receives funding through the Nutrition and Health Screening – Woman, Infants & Children (WIC) program, which is a fully federally funded program that provides individual assessment of growth and health as well as education and counseling on nutrition and physical activity. This includes promoting a healthy lifestyle and preventing chronic diseases such as obesity. The program also provides breastfeeding education and support as well as referrals to other preventive health and social services.

Public Health Federal Funds grants

The Public Health Division receives over 72 categorical Federal Funds grants targeting specific activities. The variety of programs administered by Public Health using Federal Funds include, but are not limited to, Cancer Prevention, Emerging Infections, Immunization, HIV prevention and care, Water System Revolving Fund, Beach Safety Assessment and Monitoring, Diabetes Reduction and Disaster Preparedness.

Public Health projects Federal Funds grant revenues using applicable federal funding limits and requirements, including the availability of state funds to meet matching or maintenance of effort (MOE) requirements.

Substance Abuse Prevention Treatment grant (SAPT)

The Substance Abuse Prevention Treatment grant (SAPT) funds alcohol and drug programs and some administrative costs in the Health Systems Division. To qualify for this grant, states must expend a minimum of state and local revenues on SAPT-related services to meet the maintenance of effort requirement. States must also spend 20 percent of the grant on prevention and service levels must be maintained for specified populations, such as women and women with children.

The grant funds projection is based on grant cycle methodology.

Strategic Prevention Framework-Partnership for Success grant

Oregon was one of 21 sub-recipients to receive the 2014 Partnership for Success-Strategic Prevention Framework grant from the Substance Abuse and Mental Health Services Administration (SAMHSA). The five-year grant is funded in the Public Health Division and, after receiving a 9-month extension, ended on June 30, 2020. The Public Health Division has applied for another 5-year project period to continue this funding, to start September 2020. The goal of the grant is to address two of the nation's top substance abuse prevention priorities: underage drinking among persons aged 12 to 20 and prescription drug misuse and abuse among persons aged 12 to 25. Oregon has also prioritized high risk drinking for ages 18-25 to continue the work started with the Strategic Prevention Framework-State Incentive Grant.

The new project period has been applied for at $1,000,000 each year for a total of $5,000,000.

Health Policy and Analytics Federal Funds grants

Health Policy and Analytics has successfully applied for and has been awarded a number of federal grants. The primary grants are from the U.S. Department of Health and Human Services Health Resources and Services Administration (HRSA) that help support a variety of health reform and transformation activities across several areas of OHA. These activities include an ongoing cooperative agreement with HRSA's Primary Care Office to support state efforts to expand access to primary care by helping communities recruit providers and sustain clinical resources. Also, in 2019-21, over half of the Office of Health Information Technology (OHIT) budget came from the federal Health Information Technology for Economic and Clinical Health (HITECH) Act, which provided federal incentive payments to Oregon hospitals and providers under Oregon's Medicaid Electronic Health Record (EHR) Incentive Program with incentive payments 100 percent federally funded. In 2021-23, the Medicaid EHR Incentive Program will end, with all federal incentive payments disbursed by the end of 2021.

The Integrated Care for Kids demonstration model grant provides funding to eight state and partnered local organizations to develop and implement a risk stratification process and pediatric alternative payment methodology that supports targeted and integrated care delivery across the health system and other core child services, with the goal of reducing costs, improving health outcomes, and reducing out-of-home placements. This grant from the Center of Medicare and Medicaid Innovation provides Health Policy and Analytics $1.9 million to $3 million annually for seven years, beginning January 1, 2020, for a total of up to $16 million.

Oregon State Hospital

The largest source of federal funds for the Oregon State Hospital is the Disproportionate Share Hospital entitlement, which grants federal funds to hospitals that serve a large percentage of patients that are unable to meet their expenses through any other source. This is an annual entitlement of $19.98 million that the hospital requests in quarterly distributions of $5 million. These payments are subject to a federal fund match at the FMAP rate, with the hospital receiving federal fund revenue for the FMAP percentage of the $5M quarterly installment. An increase or decrease in the FMAP rate will result in a corresponding decrease or increase in the matching General Fund need, although the quarterly total entitlement remains the same.

The state hospital also receives Medicaid revenue, primarily from the Pendleton campus. As a 16-bed secure residential treatment facility, Pendleton is not subject to the Institute for Mental Disease exclusion that limits revenue from Medicaid at the other two campuses.

Other Funds

Hospital Assessment

The hospital assessment provides funding for the Oregon Health Plan, enhanced reimbursement to hospitals, and qualified directed payments to Type A and Type B hospitals to maintain quality and access for rural hospitals. Under House Bill 2391 (2017), the Legislature extended the hospital assessment to September 30, 2021. House Bill 2391 also revised the structure of the hospital assessment program by establishing an assessment for Type A and Type B rural hospitals and exempting the Oregon Health and Sciences University (OHSU) from the assessment. The bill also increased the assessment rate paid by diagnostic related group (DRG) hospitals from 5.3 percent to 6.0 percent by adding a 0.7 percent true tax. This additional assessment was set to sunset June 30, 2019, prior to the start of the 2019-21 biennium; however, House Bill 2010 (2019) extended the DRG hospital assessment at 6.0 percent, but the additional 0.7 percent will no longer be a true tax. House Bill 2010 also extended both the assessment on DRG and Type A and Type B hospitals through September 30, 2025.

The assessment is imposed on both inpatient and outpatient net revenues of each hospital subject to the assessment. As required by Oregon law, the Director of OHA sets the hospital assessment rate after consulting with hospital representatives. The assessment rate is continually evaluated to determine if any adjustment to the rate is needed to meet funding targets.

Oregon Health and Sciences University (OHSU) Intergovernmental Transfer Program

The Legislature exempted OHSU from the hospital assessment program in House Bill 2391 (2017). In lieu of their participation in the assessment, OHA and OHSU established a separate intergovernmental transfer funding program in 2019-21 collapsing several Medicaid payments into the new program. This change generates additional Other Funds and Federal Funds revenue to support the Oregon Health Plan.

Tobacco Tax

Oregon imposes a per pack cigarette tax, a percent of the wholesale price tax on other tobacco products and cigars, and a per ounce tax on moist snuff, subject to adjustment by the Legislature and collected by the Department of Revenue. A portion of Tobacco Tax funds are used to support the Oregon Health Plan in the Health Systems Division and the Public Health Division.

The Office of Economic Analysis forecasts tobacco tax revenue using a 12-month moving average consumption level developed from the Department of Revenue's tax distribution record data. Price effects and per capita consumption effects are applied, as well as the forecast for the 21-year-old and older population.

Oregon's cigarette tax is one of the lowest in the country at $1.33 per pack. The Legislature referred a bill to voters in the November 2020 ballot to increase the state's cigarette tax by $2.00 per pack, extend the existing wholesale tax on other tobacco products to vaping products and increase other non-cigarette tobacco taxes. The possible increase in tobacco taxes is not included in the Agency Request Budget.

Tobacco Master Settlement Agreement (TMSA)

On November 23, 1998, Oregon and 45 other states, and the four largest domestic tobacco manufacturers (referred to as the Original Participating Manufacturers or OPMs) ended a four-year legal battle over past, present, and future smoking-related claims made by the states by executing the Tobacco Master Settlement Agreement (TMSA). In exchange, the OPMs agreed to make annual payments (due each April) to the settling states in perpetuity beginning with the year 2000. Although not dedicated to medical assistance programs, OHA receives a portion of the settlement to fund programs in Health Systems Division, Public Health Tobacco Prevention and Community Mental Health.

TMSA payments have two main components: (1) the main payment, which is based on a state's allocable share percentage as set forth in the MSA; and (2) a strategic contribution payment. Unlike the main MSA payment which runs in perpetuity, the OPMs were required to make the strategic contribution payment only from April 2008 to April 2017.

The TMSA allows the tobacco companies to withhold funds if they can show that states have not properly enforced the escrow provision of the agreement. The companies have satisfied two of the three provisions for withholding funds.

The Department of Justice administers TMSA settlement funds paid to the state by tobacco manufacturers.

Retail Marijuana Tax

Oregon statutes dedicate 20 percent of the Oregon Marijuana Account to cities and counties. Twenty percent of the remaining funds are distributed to the Health Systems Division, which supports community mental health and community substance use disorder. Oregon statutes also dedicate 5 percent of the remaining funds to alcohol and drug abuse, early intervention and treatment services. Projections are based on amounts provided in the May 2020 revenue forecast from the Department of Administrative Services Office of Economic Analysis.

Insurers Assessment

House Bill 2010 (2019) increased the tax on insurer and managed care premiums from 1.5 percent to 2.0 percent and broadened the tax base by including stop-loss coverage effective January 1, 2020. A portion of these revenues help fund a reinsurance program for eligible health benefit plans, while the remaining revenue supports the Oregon Health Plan. The insurer assessment will sunset on December 31, 2026.

OHA projects the revenue from coordinated care organizations contracted to provide health coverage to Oregon Health Plan members, Oregon Educators' Benefit Board health plans, and Public Employers' Benefit Board self-insured and contracted health plans. OHA projects the revenue based on member enrollment forecasts and cost trends. The Department of Consumer and Business Services projects the revenue from the insurer assessment for commercial insurers.

Beer and Wine Taxes

Beer and wine revenue is collected by the Oregon State Liquor Commission (OLCC) based on a set percentage of tax revenues. Revenue is used for alcohol and drug programs in the Health Systems Division. OLCC provides projections for beer and wine tax revenues. The Public Health division proposes an increase in the Beer, Wine and Cider Tax to address alcohol addiction and other behavioral health challenges. See the policy package narratives for details.

Public Employees' Benefit Board (PEBB) Administrative Assessment and Revolving Fund

PEBB administrative expenses are paid through a 0.70 percent administrative assessment added to medical and insurance premiums and premium equivalents. Per ORS 243.185, the assessment amount cannot exceed two percent of the monthly employer and employee contributions to benefits and is appropriated to the Public Employees' Benefit Account.

ORS 243.167 continuously appropriates to the Public Employees' Revolving Fund balances to cover expenses incurred for the administration of employee benefits. Revenues from this account are used to control costs; subsidize premiums; self-insure, and pay premiums and premium equivalents for medical, dental, and optional benefits.

Revenue estimates are based on an actuarial projection of a premium composite rate per employee per month.

Oregon Educators Benefit Board (OEBB) Administrative Assessment and Revolving Fund

OEBB has two sources of revenue authorized in statute for funding operating expenses and establishing a stabilization fund. ORS 243.880 authorizes the Oregon Educators Benefit Account to cover administration expenses. The account's revenue is generated by a 1.45 percent administrative assessment paid by members along with their premiums. The administrative assessment cannot exceed two percent of total monthly premiums. Per ORS 243.882, the balance in the account cannot exceed five percent of the monthly total of employer and employee contributions for more than 120 days.

ORS 243.884 establishes the Oregon Educators Revolving Fund to pay premiums, control expenditures, provide self-insurance and subsidize premiums. The revenue source is the monthly premium collections which are reconciled and passed-through to the insurance carriers for payment of premiums. The interest earnings retained on the premium collection pass-through enable OEBB to generate a reserve fund for stabilizing premiums.

Health Care Provider Incentive Fund

ORS 676.450 establishes and continuously appropriates to the Health Care Provider Incentive Fund to fund the Health Care Provider Incentive Program for the purpose of assisting qualified health care providers who commit to serving medical assistance and Medicare enrollees in rural or medically underserved areas of this state. Contributions are also received to expand this program.

Health Licensing Office (HLO) Administrative Fees

The office collects fees for applications, examinations, issuance and renewals of licenses and registration, disciplinary actions and other administrative fees. Each board, council and program has its own fees, which are used to cover their administrative costs and HLO. The boards collect more than $7 million in fees, which continues to increase as new boards, programs or license types are added to HLO.

Estimated revenues are based on projected trends in the 2021-23 biennium.

Drug Rebates

The Medicaid Drug Rebate Program includes Centers for Medicare & Medicaid Services (CMS), state Medicaid agencies, and participating drug manufacturers. It helps to offset federal and state costs of most outpatient prescription drugs dispensed to Medicaid patients. Approximately 600 drug manufacturers participate in this program. The program requires a drug manufacturer to enter into, and have in effect, a national rebate agreement with the Secretary of the Department of Health and Human Services in exchange for state Medicaid coverage of most of the manufacturer's drugs. Manufacturers are then responsible for paying a rebate on those drugs. Drug rebate revenues offset General Fund support of the Oregon Health Plan in the Health Systems Division.

The Health Systems Division projects these rebates using past expenditure history and expected future trends. Rebates are collected quarterly for the previous quarter's drug claims and based upon rates CMS transmits to the states. Drug rebate revenue is based on the OHP drug expenditures forecast and uses the historical percentage of revenue compared to expenditures.

Fees and Premiums

The Public Health Division generates Other Funds revenue from fees for activities in such areas as licensing of facilities, including hospital and special inpatient care facilities; registration inspection and testing of X-ray equipment; and testing and certification of Emergency Medical Technicians.

Health Policy and Analytics generates Other Funds revenue from fees. The Other Funds include a fee-supported program for the Conrad J-1 Visa Program (ORS 409.745). Other Funds revenue is also generated from fees for Healthcare Workforce Data Collection and Reporting and Health Care Data Reporting.

Intoxicated Driver Program Fund (IDPF)
Court fines, fees and assessments related to driving under the influence of intoxicants are statutorily dedicated by ORS 813.270 to provide education, treatment, and financial assistance to intoxicated driving offenders and are deposited into the Intoxicated Driver Prevention Fund. This funding is provided to counties for intoxicated driver services, as well as contracting with Guardian Interlock to provide breathalyzer machines for IDPF clients.

Law Enforcement Medical Liability Account (LEMLA)
LEMLA is funded with Other Funds revenue from assessments added to fines and bail forfeitures paid into the courts system. The Health Systems Division makes payments from this account to medical providers for services to persons injured as a result of law enforcement efforts. A small portion of this fund is used to administer the program.

Projections are based on estimates from Department of Revenue and Department of Justice.

Community Housing Trust Account
This trust fund was established with the sale of the Dammasch hospital property (ORS 413.101). Interest from the fund is dedicated to new housing and facility maintenance to benefit people with mental illness. These funds are budgeted in the Health Systems Division.

Third-Party Liability Recoveries
The Third-Party Recovery Program recovers medical portions of the collections from insurance companies, providers, and clients, and cash assistance by filing liens on personal injury settlements when clients are involved in accidents. The state's share of the recovery becomes Other Funds revenue used in Health Systems Division to offset Medicaid expenditures.

Efforts to increase cost avoidance through provider education and an emphasis on up-front payment accuracy and coordination

of benefits will impact recoveries in the coming biennium. The systematic early identification of clients with third-party insurance coverage will increase cost avoidance, reduce program expenditures and directly impact the expected amount of recovery.

Public Health Other Funds Sources

The Public Health Division has more than 120 sources of Other Funds revenue. These revenue sources include negotiated agreements to provide services, lab fees, inspection fees, certification fees, grant awards, client co-pays and other charges. The large number of revenue streams reflects the variety of programs and services administered by Public Health. These diverse programs include: Cavity Prevention, Tobacco Prevention, Juvenile Violence Prevention, Medical Marijuana Certification, Environmental Laboratory Accreditation, Coordinated School Health, Breast Cancer Screening, Radiation Control, Drinking Water Operator Certification, Health Records and Statistics, Newborn Screening, and Cross Connection, Backflow Inspection, and the Health Licensing Office, which regulates over 75,000 authorizations among 16 boards and councils, including 5,300 facilities. See Fee Listing Report for details.

The largest Other Funds revenue source supporting Public Health programs is the non-limited Women, Infants, and Children (WIC) infant formula rebate. Public Health projects Other Funds revenue sources using historic data, contract agreements, anticipated levels of service and changes to fees.

Medicare Revenue

Medicare revenue is based on submitted claims for services rendered to Oregon State Hospital patients. Claims are submitted upon patient discharge or exhaustion of insurance benefits, whichever comes first. These revenues are contingent upon the patients having those benefits and vary based upon payor mix and applicable Medicare provisions.

Local Revenue

The Oregon State Hospital has several areas of Local Revenue that account for a small portion of other fund revenue. These include patient supported employment programs for various activities such as fabrication of wood products and bench work, as well as patient stores, campus cafeterias and coffee shops.

Lottery Funds

One percent of the state's lottery proceeds are allotted by ORS 461.549 to OHA for problem gambling treatment and prevention services in the Health Systems Division. The Oregon Constitution requires that 1.5 percent of lottery proceeds be distributed to the Veterans' Services Fund. In the 2019-21 biennium, OHA received an allocation from this fund to support veterans' behavioral health services. Projections are based on amounts provided by the Department of Administrative Services Office of Economic Analysis.

DETAIL OF FEE, LICENSE, OR ASSESSMENT REVENUE INCREASE

PROPOSED FOR INCREASE/ESTABLISHMENT

Purpose or Type of Fee, License or Assessment	Who Pays	2019-21 Estimated Revenue	2021-23 Agency Request	2021-23 Governor's Budget	2021-23 Legislatively Adopted	Explanation
Ambulance Service License (4 or fewer FTE) - Initial-check fee ($75)	Business owner	150	375			Recover costs related to the licensing of ambulance services-fee increase in rule
Ambulance Vehicle License (4 or fewer FTE) - Initial	Business owner	1,260	3,150			Recover costs related to the licensing of ambulance services-fee increase in rule

Percent Change	30%	-39%	31%	23%	17%	15%

Division overview

Central Services supports the Oregon Health Authority's (OHA) mission by providing leadership in key policy and business areas. It includes:

- Director's Office
- Fiscal Division
- Agency Operations Division
- Equity and Inclusion Division
- External Relations Division

Funding request

The Agency Request Budget of $64.3 million Total Funds for Central Services continues funding at the current service level for the 2021-23 biennium. The budget includes policy packages to invest in the Equity and Inclusion Division and support OHA's 10-year goal of eliminating health inequities in Oregon; create a Tribal Traditional Health Worker program; and create an Enterprise Risk Management unit.

Executive Summary

Program descriptions

The Director's Office is responsible for overall leadership, policy and development, and administrative oversight for the Oregon Health Authority. This office coordinates with the Governor's Office, the Legislature, other state and federal agencies, tribes, partners and stakeholders, local governments, advocacy and client groups, and the private sector.

The Director's Office provides leadership in achieving the agency's mission. In developing OHA's strategic plan, the agency has adopted a 10-year goal of eliminating health inequities by 2030. And, in order to achieve that goal, the agency has adopted the following definition of health equity:

> Oregon will have established a health system that creates health equity when all people can reach their full health potential and well-being and are not disadvantaged by their race, ethnicity, language, disability, gender, gender identity, sexual orientation, social class, intersections among these communities or identities, or other socially determined circumstances.
>
> Achieving health equity requires the ongoing collaboration of all regions and sectors of the state, including tribal governments to address:
> - The equitable distribution or redistribution of resources and power, and
> - Recognizing, reconciling and rectifying historical and contemporary injustices.

OHA still has a clear direction to innovate, improve and transform the state health care system to meet three goals: noted below. However, OHA recognizes, now, more than ever, that the health equity framework has to be incorporated into all components of the work, committees, and action plans to move these three goals forward:

- Improve the lifelong health of all Oregonians.
- Increase the quality, reliability and availability of care for all Oregonians.
- Lower or contain the cost of care so it is affordable to everyone.

Executive Summary

The **Agency Operations Division** provides operational support and human resources services to the Oregon Health Authority. The division includes the following functional areas:

- Central Operations – Supports agency operations including public records requests, facility coordination, performance system management, and shared services coordination with the Department of Human Services.
- Human Resources – Provides recruitment, classification and compensation, employee relations, labor relations, organizational development and business operational support across the agency.

The **Fiscal Division** provides leadership and oversight of financing policies and coordinates budget development and execution for the Oregon Health Authority. The division includes three functional areas: budget, actuarial services, and program integrity.

- Budget – Developing, coordinating, executing, monitoring and managing OHA budgets within divisions and across the agency. Developing and updating the agency budget as it progresses through the statewide budget process, including Agency Request Budget, Governor's Budget, the Legislatively Adopted Budget, rebalance reports and various Emergency Board actions.

While the Actuarial Services Unit and Office of Program Integrity are functionally within the Fiscal Division of Central Services, they are budgeted in the Health Systems Division Program Support and Administration unit.

The **Equity and Inclusion Division** works on behalf of the Oregon Health Authority and the broader health system in Oregon to ensure the elimination of avoidable health gaps and to promote optimal health in Oregon for everyone. The work is carried out in three major work units:

- Equity and Policy
- Diversity, Inclusion, Training, Compliance & Civil Rights
- Business Support and Administration

These units develop programs and initiatives relating to health equity policy and practice, including the social determinants of health and equity; universal access for people with disabilities, people with limited English proficiency, etc.; diversity and inclusion; non-discrimination; the development of culturally and linguistically responsive practices and services; and training

among other work and initiatives. The division engages community partners and stakeholders, and uses data, best practice research and practice-based evidence to carry out its work. The division's policy and program initiatives address contemporary and historical injustices experienced predominantly by racially, ethnically, culturally and linguistically diverse populations, including people with disabilities so that all people can reach their greatest health potential and well-being, and participate in a more robust and inclusive health delivery system. This division has also led the adoption of an anti-racism framework for the agency including anti-racism training, statewide community engagement with diverse communities for the agency's strategic plan and the development of OHA's 10-year goal to eliminate health inequities in Oregon.

The **External Relations Division** has three sub-divisions: Communications, Government Relations, and Member and Stakeholder Support which includes the Community Partner Outreach Program (CPOP), Ombuds Program, and Innovator Agents. Together, they are responsible for building strong relationships with the public, community partners, media, the Legislature, and other agencies at the state and federal levels, as well as creating a broad understanding of the many ways in which OHA contributes to the health and well-being of Oregonians.

- Communications provides accurate and accessible information about OHA's mission and programs, responds to requests for information from the public and media, and produces content for a wide range of agency publications, websites and other channels for keeping the public informed.
- Government Relations provides timely health data and analysis to the Legislature, federal partners, and local elected officials to inform evidence-based health policies and legislation. It also develops OHA legislative concepts to ensure access to quality health care, contain costs of health care, and improve overall health for Oregonians.
- The Community Partner Outreach Program has built a one-of-a-kind network of Community Partner Organizations serving all Oregonians in every county in Oregon. The work CPOP and Community Partners do on behalf of OHA is essential to support health system transformation and adequately serve Oregonians to access the health care they need and address equity and health system barriers.
- The Ombuds Program advocates for Oregon Health Plan (OHP) member access to care and quality of care provided through OHP; uses learnings from individual member issues to elevate OHP member voice through the OHA so Medicaid programs, policies, and operations are based on member experience; and elevates identified issues for system improvement. As required

by legislation the program reports data and recommendations for improvement to the OHA Director, the Oregon Health Policy Board, and the Governor.

- The Innovator Agents work closely with Oregon's 15 Coordinated Care Organizations (CCOs) as required by legislation and Oregon's Medicaid Waiver to coordinate between OHA, the community, and CCOs to ensure local adaptation and implementation of statewide health priorities. They understand the health needs of the region, the strengths and gaps of the health resources in the CCO and articulate these needs and gaps to OHA to ensure statewide and local coordination. They prioritize elevating OHP member voice within CCO operations and in CCO 2.0 they elevate local work with CCOs in health equity, Tribe relationships, behavioral health, and emerging statewide priorities such as the COVID-19 response.

Program justification and link to long-term outcomes

OHA Central Services provide critical business support necessary to achieve the agency's mission: helping people and communities achieve optimum physical, mental and social well-being through partnerships, prevention and access to quality affordable health care.

Program performance

The Agency Operations Division's **Human Resources** activities include but aren't limited to the following (average yearly metrics):

- **6,549** applications for positions, each of which HR manually grades to determine minimum qualifications
- **1,056** hires
- **286** promotions and **24** transfers
- **58** HR investigations, **39** that required corrective action
- **106** manager fact findings, **95** that required corrective action
- **89** managers trained on the *Essentials of HR Management*
- **2,049** performance appraisals
- **136** classification reviews

Executive Summary

The Office of Human Resources serves as a business partner to its customers. Through this partnership HR provides proactive, comprehensive human resource services that support the agency in achieving its mission and goals. HR works closely with internal customers on workforce initiatives and strategies at the program and agency level. It promotes a healthy workplace culture of ongoing development and feedback to ensure the workforce has the needed skills to be successful and engaged. HR is committed to assisting the agency in moving toward the vision of a healthy Oregon.

Within the **Fiscal Division**, budget staff implement and monitor the Oregon Health Authority budget of more than $20 billion Total Funds and more than $2 billion in General Fund dollars. The Health Care Finance staff provided financial oversight of coordinated care organizations, which receive over $4.5 billion dollars annually in gross premiums.
In 2019, the **Equity and Inclusion Division**:

- Fully embedded health equity requirements into Coordinated Care Organization (CCO) contracts with accountability measures, including all policy recommendations from the Traditional Health Worker (THW) Commission.
- Partnered with Health Policy and Analytics to develop an incentivized health equity metric for CCOs to develop language access plans and collect and report language interpreter data.
- Designed with OIS a public facing registry for 715 Health Care Interpreters (HCI) who provide interpretation in over 40 languages throughout the state.
- Delivered HCI training in the Linn Benton area and in underserved rural regions.
- Approved 25 Cultural Competency Continuing Education trainings to serve 23 health care professional boards.
- Analyzed 120 Legislative bills with an equity, diversity and inclusion framework.
- Led the development of a new health equity definition with the Health Equity Committee which was adopted by the Oregon Health Policy Board (OHPB) for OHA and all OHPB committees.
- Led the development of a REAL D measure in the OHA Performance System and OHA Quarterly Performance Review.
- Convened and manage the REAL D Governance Committee to review REAL D workplans and compliance.
- Managed the registry for 3,533 certified Traditional Health Workers.
- Developed an Affirmative Action reporting dashboard in Tableau.
- Commissioned research by Coalition of Communities of Color on Behavioral Health in communities of color.

Executive Summary

- Commissioned research on health inequities including a participatory process with Chuukese and African American/Black communities.
- Co-led the Institutional Bias Subcommittee as one of five priorities for the State Health Improvement Plan.
- Led and conducted with the Community Partner Outreach Program, 24+ community engagement events for input into the OHA strategic plan.
- Presented at national conferences including the THW Conference (Sacramento) and for Princeton/Robert Wood Johnson (webinar), National Academy for State Health Policy (Chicago) and the National Governor's Association (Nashville).
- Evaluated Community Health Improvement Plans for all 16 CCOs.
- Led development, recruitment and finalization of members for the Director's agency-wide Diversity Leadership Team.

The External Relations Division, according to average annual metrics:

- Responds to more than 1,000 media requests per year.
- Issues more than 100 news releases per year.
- Produces a wide variety of publications, including messages from the OHA director and other communications, which are opened by more than 5,000 people per month.

Enabling legislation/program authorization

The Legislature created and authorized the Oregon Health Authority under House Bill 2009 during the 2009 legislative session. All OHA program areas have accompanying federal and state legislative authority for the operations of their respective programs. See program unit summaries for specific enabling legislation.

Funding streams

OHA Central Services receives funding through a federally approved cost allocation plan. A grant allocation module aggregates costs on a monthly basis and charges those costs, as outlined in the federally approved plan, to the various state and federal funding sources.

Executive Summary

Significant proposed program changes from 2019-21

OHA proposes in policy package #402 that the Equity and Inclusion Division, in addition to rightsizing existing staff, grow its expertise in community engagement and outreach capacity. OHA has a unique opportunity and responsibility to engage and form more effective partnerships with communities to identify, analyze, research and address policy and systemic barriers to guide effective implementation of strategic priorities. Investing in continuous and meaningful community engagement is essential to build trust and relationships with communities that experience the greatest health inequities due to structural and institutionalized oppression and racism.

OHA also proposes creating and administering a Tribal Traditional Health Worker program in legislative concept #46 and its corresponding policy package #404. Situated in the Equity and Inclusion Division, the program would include partnering closely with Tribal Affairs, Health Systems Division Tribal Liaisons and the Tribal Health Programs and support the process to develop a curriculum, organize trainings, update the THW registry, assist in the application process and provide technical assistance for certification.

Additionally, OHA proposes creating an Enterprise Risk Management unit to oversee and manage OHA's portfolio of risks, including the infrastructure necessary to oversee and manage an ERM function across OHA. This work aligns with and compliments improvements in the functional alignment of work with the performance system, enhanced transparency, and building processes to improve OHA's culture of accountability.

Oregon Health Authority: Shared Services & State Assessments & Enterprise-wide Costs

Division overview

Shared Services supports the Department of Human Services (DHS) and Oregon Health Authority (OHA) by providing leadership in the delivery of efficient, consistent and coordinated administrative services to all programs in both departments.

OHA Shared Services contains the Office of Information Services.

OHA state assessments and enterprise-wide costs (SA&EC) includes the budget for costs that affect the entire agency.

State government service charges, price list
The Department of Administrative Services (DAS) charges a mandatory assessment to all state agencies (SGSC) and an estimated fee for service charge provided by the following programs and others not listed here:

- DAS – Chief Financial Office (CFO)
- DAS – E-Government Program
- DAS – Enterprise Security Office
- DAS – Chief Human Resources Office
- DAS – Office of the State's Chief Information Officer
- Secretary of State Audits Division
- State Controllers Division
- Enterprise Goods and Services (EGS) – procurement
- Oregon State Library
- Chief Operating Office
- All others

Executive Summary

Risk Management Program, price list

Under ORS 278.405, DAS manages state government risk management and insurance programs. It has responsibility to:

- Provide insurance coverage for tort liability, state property, and workers' compensation.
- Purchase insurance policies, develop and administer self-insurance programs.
- Purchase risk management, actuarial and other required professional services.
- Provide technical services in risk management and insurance.
- Adopt rules and policies governing the administration of the state's insurance and risk management activities.

Enterprise Technology Services (ETS), price list

Enterprise Technology Services, formerly known as the State Data Center, provides and manages a common computing and network infrastructure for state agencies and local governments. ETS provides services in the following service areas:

- Mainframe
- Distributed services
- Midrange
- Disaster recovery
- Storage
- Network

Telecom, price list and usage based

The telecommunications budget is no longer price-list based, as DAS elected to change to IBM as vendor for telecommunication services. The cost per headset budget and DAS financing charges for the new telecommunications system are budgeted here. Expenditures for work contracted to IBM for phone system adjustments is paid out of this budget as well.

Facilities

Facilities provides coordination for DHS and OHA offices. Expenditures include:

- Rent or lease workspace for staff (includes escalations and reconciliation costs).
- Lease building maintenance management (janitorial, repair and maintenance).

Executive Summary

- Fuels and utilities (includes rate increases).
- DAS leasing fees and building rent.
- Copier maintenance.
- Professional services for furniture movers, installers and emergency repairs.
- Attorney General cost for legal sufficiency reviews for leases, negotiations related to legal issues for facility related matters and legal opinions.
- Inventory replenishment.
- Costs of systems furniture reconfigurations, building remodels, facilities relocations and staff moves.

IT direct – internal computer replacement
Lifecycle replacement, repairs, and new computers for new positions. If the agency requests an upgrade or purchase that is not considered replacement, repair or a new computer for an existing employee, the purchase is charged to the program.

Shared Services funding
Funding is based on cost allocation statistics as applied to Shared Services office expenditures. The allocation method determines distribution of expenditures between OHA and DHS and the revenue distribution by General Fund, Lottery Funds, Other Funds or Federal Funds.

Debt service
Debt service is the obligation to repay principal and interest on funds borrowed through the sale of certificates of participation (COPs) and bonds. The state uses proceeds of COPs and bonds to build and improve its facilities. They also are used to provide staff support for related activities including project management, community development coordination and fiscal services support. Repayment periods range from 6 to 26 years depending on the nature and value of the project. The Department of Administrative Services Capital Investment Section provides schedules of debt service obligations for each sale; these are the values used to develop the budget. Occasionally, the Capital Investment Section can refinance existing debt, which can reduce or delay debt obligations.

Executive Summary

Mass transit
Transit taxes are employer taxes used to fund a mass transit district. These are not deducted from employee pay. The transit tax is imposed directly on the employer. The tax is figured only on the amount of gross payroll for services performed within the TriMet or Lane Transit Districts. This includes traveling sales representatives and employees working from home. The Oregon Department of Revenue administers tax programs. Nearly every employer who pays wages for services performed in these districts must pay transit payroll tax. It is based on state-only (General Fund) funding.

Unemployment insurance
Benefits provide temporary financial assistance to workers unemployed through no fault of their own who meet Oregon's eligibility requirements. Invoiced and paid quarterly.

Office of Administrative Hearings
The Employment Department bills all state agencies for actual expenses incurred due to utilization of Administrative Hearings.

Funding request

The Agency Request Budget of $236.7 million Total Funds continues funding for the Office of Information Services for 2021-23 at current service level, plus policy packages. The policy packages for Improving Data Integrity and Compliance, Statewide CIE, Critical Systems, Modernization of Financial Systems, Integrated Eligibility Maintenance & Operations (M&O), Provider Time Capture M&O, Risk Audit Remediation, Remote Access, Increase IT Project Capacity, IE Modernization, and Compass Modernization were also included in the Agency Request Budget. This dollar figure also includes the State Assessment and Enterprise-wide Cost budget for 2021-23 operations.

Program descriptions

Office of Information Services (OIS) is a shared service provider for DHS and OHA. It provides information technology (IT) systems and services for nearly 16,000 agency and partner staff at 162 local offices, Oregon State Hospital locations, and the public health laboratory.

Executive Summary

OIS provides support for more than 17,000 desktop computers and 2,600 printers. The Service Desk responds to more than 14,000 service requests each month.

OIS provides information systems and services to DHS and OHA staff and partners statewide in support of programs that:

- Determine client eligibility.
- Provide medical, housing, food and job assistance.
- Provide addiction, mental health, and vocational and rehabilitative services.
- Protect children, seniors and people with physical and developmental disabilities.
- Process claims and benefits.
- Manage provider licensing and state hospital facilities.
- Promote and protect public health.
- Respond to and coordinate statewide disasters and health emergencies and support Health Alert Network and emergency preparedness activities.

OIS also supports partners around the state that use DHS and OHA systems. Many of the IT systems used by DHS, OHA and agency partners are needed 24 hours a day, seven days a week.

OIS now also provides a sub-section of services which were formerly provided by the Information Security and Privacy Office (ISPO), primarily the IT security functions, as the over-arching Security & Privacy functions moved to DAS in the 2017-19 biennium.

Program justification and link to long-term outcomes

OHA Shared Services provides critical business supports necessary for OHA programs to achieve the agency's mission.

Its budget is structured and administered according to the following principles:

Executive Summary

Control over major costs. OHA centrally manages many major costs. Some, such as many DAS charges, are essentially fixed to the agency. Others, such as facility rents, are managed centrally to control the costs. OHA Shared Services supports both DHS and OHA by providing leadership in the delivery of efficient, consistent and coordinated administrative services to all programs within both departments.

Customer-driven shared services. With the creation of separate agencies, DHS and OHA agreed to maintain many administrative functions as shared services to minimize costs, avoid duplication of effort, maintain centers of excellence, and preserve standards that help the agencies work together.

DHS and OHA govern their shared services through a board of the two agencies' operational leaders. This approach ensures that shared services are prioritized and managed to support program needs. The board and its chartered subgroups have:

- Established service-level agreements and performance measures for each service.
- Selectively implemented mandated budget cuts.
- Managed staff within the shared services to deliver services in a rational way.

Begun implementing more integrated systems to support the performance of all our employees.

Program performance

OIS performance measures focus on customer service, system performance, responsiveness and information security. Other support areas have their own performance measures based on their systems and the services they provide.

Enabling legislation/program authorization

House Bill 2009 created the Oregon Health Authority in 2009.

Funding streams

Funding streams in support of Shared Services are billed through a federally approved cost allocation plan. The model contains a billing allocation module and a grant allocation module.

Executive Summary

The billing allocation module first allocates Shared Services costs to the two agencies. The billing module then allocates the costs to customers within each agency. The grant allocation module allocates those costs to their respective state and federal funding sources.

Both modules allocate aggregated costs monthly as outlined in the federally approved plan.

Significant proposed program changes from 2019-21

Only the investment into the above-mentioned Policy Packages as investments to the infrastructure.

Oregon Health Authority

2021-23

Agency Request Budget

Oregon Health Authority

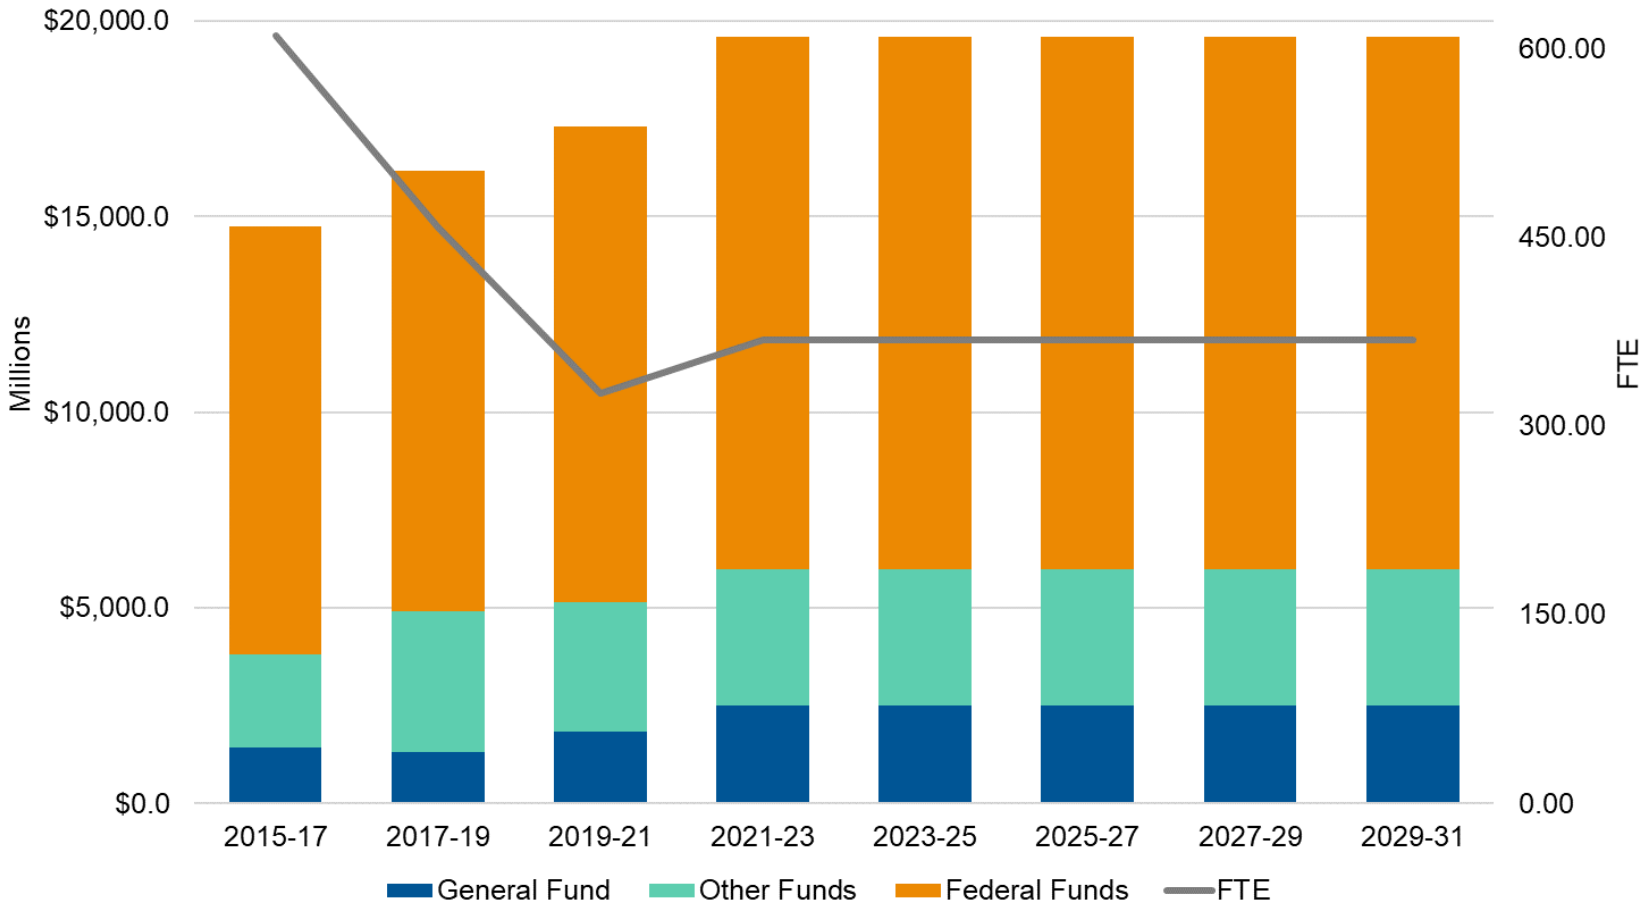
Oregon Health Authority: Health Systems Division

Executive Summary

Program Contact: Margie Stanton, Director
503-947-2658



Executive Summary

Division overview

A statewide system of integrated physical, behavioral and oral health care supports the triple aim of better health, better care, and lower costs by increasing access to preventive, coordinated care for Oregon's medical assistance program members and behavioral health consumers.

Funding request

The Agency Request Budget of $19,585.0 million Total Funds continues funding for the Health Systems Division's (HSD) Medicaid and Non-Medicaid programs at the current service level for the 2021-23 biennium and includes seventeen policy packages, which would:

- Establish Indian Managed Care Entities.
- Extend outpatient dialysis coverage to CAWEM clients.
- Address gaps in the behavioral health continuum of care for children, youth, and adults.
- Improve the health care delivery system for Oregon Health Plan (OHP) fee-for-service (FFS) members.
- Strengthen the Oregon Health Authority's ability to oversee behavioral health contracts.
- Modernize behavioral health data collection and information technology.
- Augment HSD's ability to meet oversight and quality assurance responsibilities for CCO 2.0 deliverables.
- Support access for all OHP members to dental health care and ground emergency medical transportation.

Program descriptions

The Health Systems Division's (OHA-HSD) mission is to build and advance a system of care to create a healthy Oregon. The OHA-HSD vision is a coordinated, responsive and integrated system of care that serves and respects the diversity, cultures and languages spoken in each Oregon population and community.

OHA-HSD works with the federal government, local and tribal programs, and other state agencies to maintain and improve access to physical, behavioral and oral health care. HSD administers state and federal funds to deliver and pay for health care services to

over 1 million people in Oregon, primarily through the OHP. Enrollment in OHP contributes to Oregon achieving one of the lowest uninsured rates in the nation.

HSD also administers community mental health and addiction programs statewide. During 2019 more than 145,400 Oregonians accessed non-Medicaid behavioral health services.

Services are delivered through Tribal programs, community mental health programs, individual health care provider agreements, coordinated care organizations (CCO), other managed care plans, and funding opportunities to support additional housing for individuals with severe and persistent mental illness.

HSD's major cost drivers are:

- Increased demand for community-based behavioral health services and affordable housing, in tandem with shortages in those resources.
- Rising health care costs, including the continued increase in prescription drug costs.
- The cost of new and emerging technology.

Program justification and link to long-term outcomes

Funding and promoting a statewide, integrated system of care helps drive down (behavioral and physical) health care costs and improve outcomes through increasing access to quality physical and behavioral health care. HSD incentivizes evidence-based, preventive practices through quality payments to CCOs and hospitals.

HSD works with partners to develop and strengthen culturally and linguistically responsive services aligned with social determinants. Examples of this include the Medicaid Program's implementation of OHA's Tribal Consultation Policy to inform decision-making on behalf of the tribes and the state; the Problem Gambling Program's partnership with Asian-American and Latino advisory councils; and applying the Race, Ethnicity, Language and Disability (REAL D) data collection standards mandated by House Bill 2134 (2013) to better inform equitable service delivery.

Executive Summary

Program performance

HSD measures behavioral health system performance through the Oregon Performance Plan, which monitors key indices such as access, utilization, quality, effectiveness and family/patient engagement. CCO metrics measure the success of the coordinated care model in increasing preventive care visits and services.

Enabling legislation/program authorization

Chapters 413, 414, 426, 427, 428 and 430 of the Oregon Revised Statutes authorize the Oregon Health Authority to administer Oregon's medical assistance and behavioral health programs. Federally funded programs, such as Medicaid, the Children's Health Insurance Program, and programs funded through federal grants, are implemented according to federal laws and requirements.

Funding streams

For the 2021-23 biennium, HSD's budget comprises 55 percent Federal Funds, 36 percent General Fund, 8 percent Other Funds, and 1 percent Lottery Funds. Federal revenue sources include Medicaid (approximately 1,100,000 OHP members), the Children's Health Insurance Program (approximately 91,000 OHP members) and various federal mental health and substance use disorder grants.

HSD's Other Funds include a hospital tax, insurers tax, an intergovernmental transfer from Oregon Health & Sciences University, tobacco taxes, the Tobacco Master Settlement Agreement, recreational marijuana taxes, the Community Housing Trust Fund, beer and wine taxes, the Intoxicated Driver Program Fund and state lottery revenues.

In the 2021-23 biennium, the division anticipates decreases in many of its funding streams due to the economic downturn associated with COVID-19. In particular, impacted funding streams will likely be those associated with individuals' ability to spend on taxable products and with health care provider net patient revenue and insurer premiums revenue. This will be accompanied by an increased demand on services through the Oregon Health Plan, as enrollment increases due to economic hardships.

Executive Summary

Significant proposed program changes from 2019-21

In the 2021-23 biennium, HSD will further integrate health care delivery systems and increase access to physical, behavioral and oral health care by advancing in the following areas:

- **Medicaid Programs:** Compared with 2019-21, HSD's goals will remain the same but have even greater significance. HSD will continue progress on cost containment strategies, value-based payments, metrics associated with population health and health outcomes, automation of systems related to service delivery, and overall health system transformation through the coordinated care model, which are imperative with the expected budget shortfalls. This includes expanding CCO responsibilities to further integrate behavioral health care; pursue alternate payment methodologies; address the social determinants of health, including housing; and further integrate health care delivery systems into communities to expand the opportunities for partnership and collaboration.
- **Behavioral Health Programs:** Integration expected within the Medicaid system is also expected between Medicaid and Non-Medicaid funded behavioral health system. OHA expects to continue updating and evolving the behavioral health system to fit within today's health care system and better integrate with Medicaid funding. This is expected to result in changes in how Non-Medicaid services are funded and accounted for through increased monitoring of outcomes.

Program Support and Administration

Expenditures by fund type, positions and full-time equivalents

	General	Other/Lottery	Federal	Total Funds	Positions	FTE
Leg. Approved 2019-21	$84.93	$24.00	$120.50	$229.43	337	325.79
Agency Request 2021-23	$107.26	$25.97	$165.86	$299.08	385	368.75
Difference	$22.33	$1.97	$45.35	$69.65	48	42.96
Percent Change	26%	8%	38%	30%	14%	13%

The Agency Request Budget of $299.1 Total Funds continues funding for Program Support and Administration at the current level for the 2021-23 biennium and includes seven policy packages to:

- Policy package #414 would continue the Compass Modernization portfolio projects to improve behavioral health data collection, reporting, and analysis as well was caseload forecasting.
- Policy package #419 would augment the division's capacity to meet oversight and quality assurance responsibilities, which have been significantly increased with the implementation of CCO 2.0 on January 1, 2020.
- Policy package #431 would support an enhanced full continuum of care delivery system for individuals with substance abuse disorders.
- Policy package #438 would provide staff and expenditure limitation to administer the ground emergency medical transportation directed payment program.
- Policy package #442 would ensure the Office of Program Integrity has the ability to investigate whether industry accepted standards of care are being utilized in delivery of services.
- Policy package #443 would modernize, streamline and expand the capacity of the Office of Program Integrity to conduct audits of the Oregon Health Plan providers and investigate referrals for potential beneficiary and member fraud.
- Policy package #444 would allow the Office of Program Integrity to keep pace with modern and changing electronic health records (EHR) technology by investigating digital record keeping and operation of EHR systems.

Program Support and Administration

Activities, programs and issues in the program unit base budget

The Program Support and Administration budget includes funding for administrative support, services and oversight for the Health Systems Division (HSD), including both Medicaid and Non-Medicaid (Behavioral Health) programs. The Division is supported by Business Operations, Government and Process Improvement, the Actuarial Services Unit, and the Office of Program Integrity.

This budget also includes staff supporting the Oregon Health Plan, including Medicaid Programs, Provider Services, Eligibility Policy, and Quality Assurance and Hearings. For Non-Medicaid Behavioral Health, this budget includes staff for Addiction Treatment, Recovery and Prevention Services; Adult Mental Health and Housing Services; Behavioral Health Policy; Child and Family Behavioral Health Services; and Licensing and Certification. It also includes funding and staff for information systems, such as the Medicaid Management Information System (MMIS) and the Community Outcome Management and Performance Accountability Support System (COMPASS).

Division administration and support

Business Operations

The Business Office oversees the administrative budget, program budget, position management, hiring and facilities, office management, complaints and both program and administrative invoices and settlements.

The Contracts Unit oversees county contracts and grants that fund mental health and substance use disorder programs. These include intergovernmental agreements with local mental health authorities (LMHA) and community mental health programs (CMHP), direct contracts with tribes and tribal organizations, and contracts administered by the Oregon Health Authority (OHA). Program Support and Administration works directly with staff, program, leadership, community mental health programs and other agency partners to support effective programs and successful agency outcomes.

Program Support and Administration

Governance and Process Improvement

The Governance & Performance Improvement unit has several areas of work: Issues in the form of audits, issues resolution, and complaints; Performance System; Governance & Compliance; and Project Management.

The Issues portion of this unit works to ensure audit findings are resolved, complaints are handled appropriately and timely, and issues on the Issues Resolution list are completed thoroughly. Process documentation is integral to the scope of this work.

The Performance System is a methodology adopted by OHA to ensure coordination of work priorities with the agency's vision. This methodology includes metrics development and coordination across the agency horizontally and vertically. This unit supports the Performance System actions for HSD, working closely with the Tier 1 team and consultants from Mass Ingenuity.

HSD's Governance & Compliance program focuses on Medicaid and Behavioral Health oversight with the intent of ensuring all state and federal regulations are met. This includes process overview, ensuring the adoption of new rules, and evaluating deliverables. The unit works closely with the Medicaid and Behavioral Health teams to ensure they complete requirements as efficiently as possible. It also supports the development of compliance programs within the different areas and will facilitate process development and brainstorming as needed.

The Project Management team focuses on the highest priority and most complex HSD projects. They utilize project management tools to facilitate operationalizing projects within HSD. The Mental Health Residential Rate Standardization project was a high-profile project that went live July 2019.

Business Information Systems

The **Business Information Systems (BIS)** team includes business-related functions and expenditures for information technology to support the Health Systems Division. The team provides overall coordination, monitoring and evaluation of technology initiatives and cross-system IT activities. BIS is responsible for helping guide Enterprise-wide modernization efforts related to the Medicaid Enterprise System in a manner that strategically leverage existing systems and available funding

sources. As a significant source and customer of enterprise data, BIS is also working on OHA and enterprise-wide data quality and integrity projects with DHS and OIS including coordination of efforts with the Oregon State Data Officer to support efforts to eliminate health inequities and provide a 360 degree view of Oregonians receiving services.

Its functions also include Medicaid Management Information System Business Support Unit (MMIS) and Community Outcome Management and Performance Accountability Support System Unit (COMPASS).

The **MMIS team** manages benefits, drug and pharmacy programs, enrollment, claim processing, provider portal, prior authorizations and plans of care issues, user training, MMIS security protocols, including system access agreements, third party liability functions, and payments for services delivered through the Oregon Health Plan. The MMIS also issues payments to coordinated care organizations (CCO) and individual providers.

MMIS staff coordinate system changes mandated by state and federal requirements, as well as system improvements. This work includes the design, planning, testing and implementation of enhancements. Staff work to ensure proper processing of claims and support mandated and business-critical changes and activities. To accomplish these functions staff work with multiple state agencies and the contracted MMIS vendor, DXC, to make these changes.

For MMIS, the major cost drivers are the number of and rising cost for required MMIS system changes, and the increased number and scale of changes that have been mandated over the past 3 years. The existing system requires a variety of changes to implement any single policy or benefit change, as well as intensive work by MMIS staff and DXC. Some examples include:

- Changes to the MMIS are driven in a descending order of priority, by federal requirements, followed by state rules and legislatively mandated changes, and finally by business need. Recent examples of mandated changes are the legislatively mandated REAL D changes and changes to conform to federal Transformed Medicaid Statistical Information System (TMSIS) reporting guidelines.
- Transition of Care

- Drug Rebate changes mandated by the Centers for Medicare and Medicaid Services (CMS)
- COVID-19 changes in claims coding and rules, and financial configurations in MMIS

The **Compass Team** collects and reports data on behavioral health, substance use disorder, and problem gambling services provided to people in Oregon through approximately 400 behavioral health agencies and providers. COMPASS staff collaborate with the Office of Information Services, HSD Behavioral Health program staff, MMIS team members, and behavioral health providers to maintain the systems and improve data submission quality. The COMPASS team supports eight data systems that include the following:

- The Measures and Outcomes Tracking System (MOTS) is used by providers to submit client status and non-Medicaid service data for required state and federal reporting for continued funding and to report client trends and outcomes. As of December 1, 2018, MOTS tracks over 132,000 people with an active behavioral health treatment status.
- Oregon Web Infrastructure for Treatment Services (OWITS) is an open-source Electronic Behavioral Health Record (EBHR) system available to providers to use for their client assessment and clinical practice to promote data availability and exchange necessary for quality care. HSD pays the EBHR contractor, Focused E-health Innovations (FEI), to host the EBHR data. The providers using OWITS contract directly with FEI for EBHR maintenance and updates. OHA supports OWITS by answering provider questions about OWITS, resetting passwords, and paying FEI to host the EBHR data.
- Acute Care Reporting System (ACS) is the system used by acute care hospitals to submit client information for civil commitment admissions and discharges to HSD.

The Compass team functions also include the ongoing portfolio of work to modernize the behavioral health data systems. This work includes leading projects, gathering and prioritizing IT system requirements that align with federal and state policies and determining short and long-term technology strategies that support OHA's goals.

The Program Support and Administration budget also includes the following analytical and oversight units supporting HSD's Medicaid and Behavioral Health programs.

Program Support and Administration

Actuarial Services Unit

OHA's Fiscal Division of Central Services oversees the Actuarial Services Unit (ASU), which develops OHA's capitation rates for the Program of All-inclusive Care for the Elderly (PACE) and supports rate development for Medicaid managed care entities (coordinated care organizations and dental care organizations). Also known as a "per member per month" payment, capitation rates are based on the cost of care and services provided to the members each organization serves.

ASU supports OHA and CCOs through data analysis and collaboration; communication of rates-related and financial information; budgetary impact analyses for legislative and program change proposals; support for grant applications; calculating and publishing qualified directed payments to hospitals; development and implementation of cost-containment strategies; review and analysis of fee-for-service reimbursement rates; evaluation of alternative payment methodologies; and policy development in support of Oregon's health system transformation. ASU also collects, reviews, consolidates, and publishes CCOs' financial reports. Under CCO 2.0, ASU is scheduled to regulate CCOs' financial solvency under NAIC standards, design and potentially establish a reinsurance program for CCOs, and implement a performance-based reward system as a component of CCO capitation rates.

Office of Program Integrity

Part of the Fiscal Division of Central Services, the Office of Program Integrity (OPI) ensures Oregon's Medicaid program and its providers, either through contract or by fee-for-service, follow federal and state Medicaid service and billing regulations. OPI also oversees programs supported by state funds only. OPI detects, prevents and investigates Medicaid and non-Medicaid fraud, waste and abuse.

OPI's work is pivotal to ensuring public resources maximize the health care benefits delivered to the people of Oregon. Investment in this office enables OHA to mature and improve its programs for investigating Medicaid and non-Medicaid fraud, waste and abuse; provide better oversight of how the state's health care partners spend public resources; and comply with federal and state Medicaid regulations and requirements.

Program Support and Administration

Non-Medicaid (behavioral health)

Addiction Treatment, Recovery and Prevention Services promote treatment for addictive disorders, recovery and prevention, coordinate state opioid use and misuse initiatives, houses the State Opioid Treatment Authority, and oversees the training and certification of the people who monitor Driving Under the Influence of Intoxicants (DUII) offenders, and DUII treatment programs. Effective SUD treatment results in decreased criminal activity and recidivism rates for individuals who complete treatment. This work includes:

- Oversight of intoxicated driver services.
- Oversight of problem gambling treatment and prevention programs in all 36 counties in Oregon through community mental health programs and by for-profit and non-profit providers. The state also has one residential treatment program for people with gambling disorders.
- Funding, development and oversight of several initiatives to address opioid use and misuse issues, in partnership with the Public Health Division and community partners throughout the state. This includes increasing patient access to Naloxone and office-based opioid treatment options, especially in underserved, rural and frontier areas.
- Oversight of peer-delivered addiction treatment and recovery services. This is an evidence-based practice that uses trained and certified recovery mentors as part of a comprehensive recovery support team. This budget also includes sobering centers, a vital component of the safety net system for people struggling with substance use disorders.
- Oversight of outpatient, crisis, and residential treatment programs for people with substance use disorders. The goal of SUD treatment is to help individuals stop substance use and allow them to lead active lives in their family, workplace, and community. The current system of care in Oregon includes outpatient, intensive outpatient, and residential treatment services throughout the state. Counselors provide individualized treatment at many different program sites, including health clinics, community mental health clinics, counselors' offices, hospital clinics, and local health department offices. Many meet in the evenings and on weekends so participants can go to school or work.

Program Support and Administration

Adult Mental Health Services promote the health, well-being and safety of Oregonians over age 18 living with mental illness. The unit:

- Supports community-based crisis intervention services such as transportation, assessment, de-escalation and referral to treatment. This helps people experiencing a mental health crisis avoid needing a higher level of care their community may not offer.
- Monitors, funds and develops strategies to expedite discharge of Oregon State Hospital (OSH) residents and prevent re-hospitalization. This includes ensuring safety and stability in housing, employment and community integration. This unit works with the Psychiatric Security Review Board, OSH treatment teams and community mental health programs to ensure individuals are placed in the appropriate level of care and receive the treatments and services needed to live as independently as possible. Supports the provision of evidence-based practices including Assertive Community Treatment, Supported Employment, Suicide Prevention, and Peer Delivered Services.
- Oversees the Senior Behavioral Health Investment and provides technical assistance to 24 care coordinators throughout Oregon. The coordinators help seniors and people with disabilities access care, navigate multiple systems and learn about the resources in their community.
- Funds and monitors evaluation and restoration services for people with mental illness who have been accused or convicted of a crime. For people accused of a crime, restoration services can be court-ordered to restore them to a condition in which they can assist in their defense. For those convicted of a crime, restoration services divert them from jail and into treatment. Restoration services can be provided in the community or at the Oregon State Hospital.

Behavioral Health Medicaid, Policy and Analytics provides overall policy direction for behavioral health services. This unit:

- Plans and administers federal behavioral health block grants for non-Medicaid services.
- Ensures consumers provide input into the planning and delivery of services and supports at state and local levels through the Office of Consumer Activities.
- Monitors and directs the implementation of the services to reach metrics identified in the US-DOJ Oregon Performance Plan, which seeks to improve mental health services for adults with serious and persistent mental illness.

Program Support and Administration

- Develops and supports policies that foster the integration of behavioral and physical health care.
- Advances policies and supports implementation of behavioral health integration through CCOs to improve the behavioral health system.
- Assesses the needs of the behavioral health workforce and develops policies and a strategic plan to improve the quality and availability of the behavioral health workforce to ensure all Oregonians have access to behavioral health care.
- Plans, administers, develops and directs lottery dollars associated with veteran behavioral health programming.
- Provides coordination between systems serving veterans and military service members.
- manages administrative rulemaking for Behavioral Health programs.

This unit includes the State Opioid Authority (SOTA). The SOTA is responsible for:

- Federal oversight of 19 state and federally licensed opioid treatment programs (OTPs) in Oregon, insures compliance with state and federal regulations regarding medication assisted treatment (MAT) in the OTP setting, including site visitation, technical assistance, diversion prevention, and approval of clinically appropriate requests for deviation from Federally regulated take-home medication limits.
- Training, education, and work with a variety of federal agencies to support patient care in the OTP setting and MAT throughout Oregon, including approving Substance Abuse and Mental Health Services Administration (SAMHSA) certifications for OTPs in Oregon.
- Primary ATRP and HSD point of contact for topics related to opioid use, misuse, and treatment in Oregon, including working with internal and external stakeholders on topics such as expansion of MAT in residential and primary care settings, prescription and illicit opioid overdose prevention, community awareness of opioid misuse, evidenced based treatment and education around opioid use and misuse.
- Principal investigator/subject matter expert on the State Opioid Response (SOR) and State Targeted Response (STR) grants, increasing capacity to address opioid use disorder (OUD) through enhanced treatment, prevention and recovery services.

Program Support and Administration

Child and Family Behavioral Health Services use System of Care values and principles, developmental science, and trauma-informed approaches and best practices to champion effective and efficient statewide behavioral health services, supports and safety for Oregonians ages 0 to 25 and their families.

- System of Care is "a spectrum of effective, community-based services and supports for children and youth with or at risk for mental health or other challenges and their families, that is organized into a coordinated network, builds meaningful partnerships with families and youth, and addresses their cultural and linguistic needs, in order to help them to function better at home, in school, in the community, and throughout life." [1]
- Serving children, youth and their families in their local communities through robust community-based interventions that can safely support youth, including assessing them for suicide risk, in their homes; and that can reinforce out of home care, including foster homes and residential-based interventions, serving those who need specialized or substitute care.

The unit does this through:

- Support for the Governor's System of Care Advisory Council created by Senate Bill 1 (2019) and tasked with forming policy for improving Oregon's System of Care.
- Funding and oversight of technical support in coordinating care for children, youth and young adults with emotional and behavioral disorders served across multiple systems such as the juvenile justice, education, child welfare, and mental health.
- Promoting peer-delivered services, where a person with lived experience provides supports and services to parents, caregivers and youth experiencing behavioral health challenges.
- Funds a statewide Parent/Caregiver/family audio and virtual help line to support positive solutions to parenting issues and connection with formal and informal resources to reduce the use of crisis services by de-escalation of tension and stress.
- Reporting, coordination and oversight to implement the 117 action items in Oregon's Youth Suicide Intervention and Prevention Plan, 2016-2020 per ORS 418.704. This includes contract management and coordination of the Big Six[2] suicide

[1] Source: https://gucchd.georgetown.edu/products/Toolkit_SOC_Resource1.pdf (accessed Dec. 13, 2018).
[2] Mental Health First Aid, Sources of Strength, Question, Persuade, Refer, safeTALK, Applied Suicide Intervention Skills Training (ASIST), Connect: Postvention

prevention programs, suicide prevention work with school districts, and evaluation efforts. The 2021-2025 Youth Suicide Intervention and Prevention Plan is scheduled to be released July 1, 2021.

- Funding, promotion and oversight of effective interventions that improve outcomes for children and their families experiencing parent-child relationship problems, behavioral problems, or Mental Health/addiction disorders to include addiction and problem gambling.
    - Parent-Child Interaction Therapy (PCIT) is a preferred treatment for families with young children.
    - Collaborative Problem Solving reduces the use of seclusion and restraint in child programs and improves parent-child communication.
    - "Triple P" is an evidence-based positive parenting program utilized to prevent behavioral and emotional problems for children and youth at home, in school and in the community, creating family environments that encourage children to realize their potential.
    - Parent Management Training of Oregon (PMTO)
    - Trauma Focused Cognitive Behavioral Treatment (TFCBT)
    - Wraparound
- Investments that support early identification and community-based treatment, such as the Early Assessment Support Alliance for young adults with psychosis and the Oregon Psychiatric Access Line about Kids (OPAL-K) and the Oregon Psychiatric Access Line about Adults (OPAL-A) to provide clinical consultation to primary care physicians about their patients' behavioral health needs.
- Funding community mental health programs to bring behavioral health care to children and their families in the schools through School Based Mental Health services and supports.
- Funding of the Commercial Sexual Exploitation of Children residential program, which works with law enforcement, child welfare, Oregon Youth Authority, faith-based organizations, service providers, survivors and advocates to disrupt exploitation and provide survivors with skills and opportunities which hopefully prevent further victimization upon return to the community.

Program Support and Administration

- Funding of juvenile Fitness to Proceed services for youth who have been charged with a crime and have been found to be not competent to fully participate in their court process, due to their inability to understand the nature of the court proceedings, inability to assist and cooperate with counsel, and/or ability to participate in their own defense. This program provides Restorative Services to assist youth in gaining competency in these areas.
- Funding Crisis and Acute Transition Services (CATS), a community- based alternative to psychiatric hospitalization for children and their families presenting with a mental health crisis to the emergency room. CATS providers respond to the emergency room within 3 hours of referral and work directly with the child and family to assess the clinical and safety needs of the family. The CATS team develop a safety plan in collaboration with the child and family to enable the child to remain in their community, and provides interim mental health therapy, family support services and 24/7 crisis response to the family while connecting the child and family to community resources and supports. CATS providers provide services for up to 45 days from referral.
- Provision of Intensive In-Home Behavioral Health Treatment (IIBHT) – which is a new level of care serving children and youth up to age 17. IIBHT offers intensive mental health treatment for children and their families to children with complex mental health needs who are at risk of being placed out of their home or who are stepping down from facility-based care. IIBHT services may include individual and family therapy, family support services, skills training, psychiatric services and 24/7 crisis response.
- Engaging youth and their families in policy development, planning and oversight of youth behavioral health programs and systems through engagement with the Children's System Advisory Council and the Youth and Young Adult Engagement Advisory group.
- Provide funding and technical assistance to local communities for mental wellness, mental health promotion and prevention, and reduction of stigma for utilizing behavioral health and peer-delivered services when needed. This includes but is not limited to suicide prevention, addiction prevention, and community connections which enhance social and emotional determinants of health, provide support and prevent isolation and other types of marginalization.

Program Support and Administration

The Licensing and Certification Unit regulates provider compliance with state laws related to residential and outpatient behavioral health facilities and programs. This includes licensing, certification and oversight of over 1,100 behavioral health providers, including:

- Adult Foster Homes
- Child and Adolescent Programs: Intensive Treatment Services (ITS) and Children's Emergency Safety Intervention Specialists (CESIS)
- Civil Commitment, including Training and Certifying Examiners and Investigators
- Community-Based Structured Housing
- Outpatient Programs: Mental Health, Substance Use Disorders, and Problem Gambling; Alcohol and Other Drug Screening Specialists (ADSS); suicide risk assessment, lethal means counseling and safety planning
- Residential Treatment Facilities: Mental Health Adult Residential Treatment Homes and Facilities and Secure Residential Treatment Facilities; Adolescent and Adult Substance Use Disorders and Problem Gambling programs
- Sobering Facilities

Medical Assistance Programs

Medicaid Programs staff are responsible for all aspects of maintaining and managing the more than 27 Oregon Administrative Rules divisions, over 500 rules, that govern OHP-covered health care services, eligible health care providers and participating managed care plans, including CCOs.

Staff work with provider associations, community partners, the federal Centers for Medicare and Medicaid Services, DHS, other state agencies, and other OHA divisions to implement and promote changes to benefits or programs. Recent efforts include establishing policy and issuing guidance for COVID-19 response. This response included adding OHP coverage for COVID testing and treatment, expanding access to telehealth services, and working with providers and partners to address financial challenges. COVID response has been an all-hands-on-deck effort that came on top of the tremendous work involved

with implementing new CCO 2.0 contracts and several other major initiatives. Other notable efforts include working with Oregon's tribes to develop first in the nation Indian Managed Care Entities, working with DHS and OYA to update rates and improve operations for the Behavioral Rehabilitation Services program serving vulnerable youth, and launching the ONE eligibility system.

The Medicaid program oversees the following elements of Oregon's medical assistance program administration:

- Implementation and monitoring of the CCO contracts including the new CCO 2.0 contracts that began January 1, 2020.
- The policies, rules and processes that govern Oregon Health Plan eligibility, covered health care services, eligible health care providers and participating managed care health plans, including CCOs.
- Contracts and agreements with CCOs, health care providers, and other vendors that approve, coordinate and/or deliver care to members.
- Changes to Oregon's Medicaid and CHIP State Plans and the Medicaid 1115 Demonstration Waiver. Combined, these documents explain how Oregon administers its federally funded medical assistance programs and the requirements for members and providers to participate in these programs.
- The state's Medicaid Management Information System (MMIS), which manages benefits, enrollment, claim processing and payments for services delivered through the Oregon Health Plan. The MMIS also issues payments to managed care entities (coordinated care organizations, dental care organizations and mental health organization), individual providers and organizational providers.
- Customer service for participating health care providers and plans to ensure they meet state and federal requirements. This includes provider enrollment, a provider services call center, clinical review staff, claim processing and reporting.
- Customer service for members.
- Contested case hearings for OHP members who disagree with a state or CCO decision to deny, reduce or end coverage of a specific health care service.
- Administrative reviews for OHP providers who disagree with a state or CCO decision to deny, reduce or end coverage of a specific health care service.

The Medicaid program also provides administrative oversight of all Medicaid-funded programs operated by the Department of Human Services, including, but not limited to Long-Term Services and Supports (LTSS) and developmentally disabled (DD).

Additionally, Medicaid staff work with CCOs, community partners, OHA's Tribal Director and the OHA Equity and Inclusion Division to develop and strengthen culturally and linguistically responsive services and applying the Race, Ethnicity, Language and Disability (REAL D) data collection standards mandated by House Bill 2134 (2013) to better inform equitable service delivery.

Other successes include system improvements, benefit expansions, value-based payments to reduce rural health costs, investments in Oregon's tribes, investments in improving FFS dental access and implementation of CCO 2.0 Request for Application (RFA) process and member transition.

With CCO 2.0, social determinants of health will be a primary focus for the Medicaid program. As part of CCO 2.0, HSD will be involved in the implementation and operationalization of social determinants of health activities as they relate to the CCO service delivery system. HSD is responsible for assuring that social determinants of health activities undertaken by the agency, and for which Medicaid funding is claimed, align with the goals and requirements set forth in the 1115 OHP Demonstration Waiver. This is a critical function to ensure ongoing compliance and continued federal Medicaid-funding.
The RFA for CCO 2.0 specifically called out the following areas:

1. **Community Engagement:** Engaging key stakeholders including OHP consumers, community-based organizations that address disparities and social determinants of health, providers within the delivery system, local public health authorities, Tribes, and other partners.
2. **Social Determinants of Health and Equity Spending, Priorities, and Partnership:** Investing in services and initiatives to address the Social Determinants of Health and Health Equity in line with community priorities through a transparent decision-making process that involves the CCO's CAC and other partners. For the first two years of Social Determinants of Health and Health Equity spending, priority for spending has been designated on housing related services and supports.

Program Support and Administration

Provider Services staff provide customer service for over 99,000 health care providers. Services include but are not limited to clinical and technical review of health care claims and requests to approve payment of health care services; enrollment of participating providers; and the Provider Services customer service line for help with billing, provider enrollment, prior authorization requests and MMIS access.

Provider Services staff also work with Oregon's contracted managed care entities to ensure they submit data about the health care encounters they coordinate for OHP members, and review provider appeals of OHA and CCO coverage decisions through claim redeterminations and administrative reviews.

Member services staff assist all members. Client Services Unit (CSU) assists members in getting access to care, explaining OHP coverage and how to navigate the care OHP covers, and connects members with their CCOs as appropriate. CSU assists members with billing concerns and helps resolve any complaints. Client Enrollment Services (CES) ensures accurate and timely enrollment of members into CCOs.

Eligibility Policy staff work with Medicaid Programs and Department of Human Services staff to coordinate updates in state policies, programs and information systems when federal Medicaid and CHIP eligibility rules change. Staff inform system enhancements, such as "automated renewal" functionality in November 2017, Hospital Presumptive Eligibility in April 2018, and an upgrade to an integrated eligibility system in 2020. These enhancements have not only improved accuracy but have also allowed for faster, more automated, and more consistent determinations.

Hearings staff work with members, health care providers, CCOs and Oregon's Office of Administrative Hearings to coordinate the contested case hearing process for Oregon Health Plan members. From July 2018 through June 2019, staff processed over 1,800 hearing requests.

Program Support and Administration

Quality Assurance staff work with Oregon's External Quality Review Organization (EQRO) to provide technical assistance and oversight to help CCOs demonstrate compliance with state and federal requirements.

Claims and Encounter Data Services staff work with CCOs on submitting encounter data. This includes enrolling CCO providers, identifying and correcting errors and submitting necessary backup documentation. The unit also includes staff who work on fee-for-service claims and appeals that need to be handled manually. Electronic Data Interchange is also housed within CEDSU. Those staff work with providers and clearinghouses on being set up, testing and production issues around the submission and retrieval of electronic claims, enrollment and eligibility data. Other functions in this unit are enrollment and capitation reconciliation with the CCOs, Administrative Reviews requested by providers who disagree with claims determinations made by CCOs and running queries of DSSURS data utilized internally by other teams within HSD.

Background information

Program Support and Administration provides the following services to support administrative, behavioral health and Medicaid programs:

- Administrative support for nearly 300 permanent full-time employees.
- Oversight and support for Medicaid, non-Medicaid services and administrative budget and invoices.
- Development and support for over 270 non-Medicaid contracts and grants.
- Managing and monitoring the implementation of legislative initiatives.
- Monitoring and improving division compliance and performance.
  Development and management of capitation rates.
- Ensures Oregon's Medicaid program and its providers, either through contract or by fee-for-service, follow federal and state Medicaid service and billing regulations
- Development and maintenance of behavioral health and Medicaid data and reporting systems.

Program Support and Administration

Medicaid Management Information System (MMIS)
Currently provides more than 120 annual trainings to end users and completes hundreds of system changes per year. In the next few years, the MMIS system will undergo modular changes, which will allow for future changes without replacing an entire system. Modularity is approved and encouraged by CMS and will also affect the cost of change requests and change orders.

Community Outcome Management and Performance Accountability Support System (COMPASS)
Provides more than 30 annual trainings to end users and up to three monthly reports to 250 behavioral health agencies.

For COMPASS, the outdated computer systems require time-consuming and costly manual work-arounds to meet the data and reporting needs of OHA-HSD Behavioral Health Programs. Existing information systems do not easily integrate with providers' external systems (including electronic health records systems) or with OHA internal systems, which affects reporting frequency and accuracy. Upgrading these systems will decrease system and administrative costs for Behavioral Health Programs and their partners. COMPASS will also be migrating the CANS assessment (Child and Adolescent Needs and Strengths) from a paper-based system to an electronic system to facilitate data collection and reporting. The 2021-23 Agency Request Budget includes funding to modernize these systems in policy package #414.

Revenue sources and changes

The 2021-23 budget for Program Support and Administration comprises 53 Federal Funds, 37 percent General Fund, 9 percent Other Funds, and 1 percent Lottery Funds.

General Fund revenue funds administrative support, staffing, services and supplies, and the maintenance and operations of the information technology systems for the division's Medicaid and behavioral health programs.

Program Support and Administration receives Federal Funds through Medicaid administrative match, small amounts of federal block grants to meet administrative requirements, and other federal grants to fulfill the grant obligations. Medicaid provides a

Program Support and Administration

50:50 match on staff and administrative expenditures that support the Medicaid program and a 75:25 match for administrative expenditures directly related to eligibility determinations and enrollment.

Other Funds include allocations from Medicaid and non-Medicaid funding sources, including:

- The Tobacco Master Settlement Agreement.
- Tobacco taxes.
- Marijuana taxes.
- A portion of court fines, fees and assessments related to Driving Under the Influence of Intoxicants program.
- Licensing revenue and small contracts for data reporting to the federal government and education about the U.S. Supreme Court's *Olmstead* decision.

Proposed new laws that apply to the program unit

None.

Medicaid

Expenditures by fund type, positions and full-time equivalents

	General	Other/Lottery	Federal	Total Funds	Positions	FTE
Leg. Approved 2019-21	$1,427.47	$3,101.28	$11,959.89	$16,488.64	0	0
Agency Request 2021-23	$2,011.79	$3,299.03	$13,158.13	$18,468.95	0	0.00
Difference	$584.32	$197.76	$1,198.24	$1,980.32	0	0
Percent Change	41%	6%	10%	12%	N/A	N/A

The Agency Request Budget of $18,469 million Total Funds continues funding for Oregon's medical assistance programs at the current service level for the 2021-23 biennium and includes funding for:

- Policy package #401 to enable the monitoring, compliance, communication and enforcement of CCO contract requirements through additional staffing and the development of online templates, interfaces and supporting data infrastructure.
- Policy package #403 to establish and support Indian Managed Care Entities.
- Policy package #405 to extend outpatient dialysis, medication for kidney transplant and additional related services coverage to CAWEM clients.
- Policy package #407 to operate the Medicaid Fee-for- Service (FFS) delivery system like a coordinated care organization (CCO). Includes funding for FFS Interpreter Services, transition services, Behavior Rehabilitation Services home rates, Enteral/Parenteral -Intravenous rates, and Applied Behavior Analysis rates.
- Policy package #420 to alter the coordinated care organization (CCO) Quality Pool from an incentive to a withhold arrangement to increase accountability, flexibility, and alignment with CCO 2.0 policy aims; solidify longer term financial stability; and appropriately reflect the Quality Pool in the Minimum Medical Loss Ratio.
- Policy package #435 to increase dental fee-for-service reimbursement rates by 30 percent to incentivize provider enrollment and increase service access.

- Policy package #438 to increase Other Funds and Federal Funds limitation to continue administering the ground emergency medical transportation (GEMT) program.
- Policy package #441 to transition mental health residential services to CCOs' global budgets.

Activities, programs and issues in the program unit base budget

The Medicaid budget includes state and federal funds used to deliver and pay for health care services to over 1 million Oregon Health Plan (OHP) members of which 43 percent are children. The OHP includes Medicaid, the Children's Health Insurance Program (CHIP), Cover All Kids, Reproductive Health Equity Act (RHEA), and other related services. Payments are made to individual health care providers as Fee-for-Service (FFS) and to the coordinated care organizations (CCOs) in the form of a global budget. CCOs serve over 90 percent of all OHP members.

The Medicaid budget is based on caseload forecasts and cost estimates projected for the coming two years. Because of the budget's size, even minor changes from forecasted caseload numbers to actual caseload numbers can result significant changes from the projected budget—either shortfalls or savings. For all medical assistance program recipients, as of Spring 2020, OHA projects the 2021-23 biennial average caseload to be 1,079,846 individuals, which is relatively unchanged from the 2019-21 biennial average. This forecast does not include the impact of the COVID-19 pandemic on the caseload.

The managed care plans capitation rates are also a significant budget driver. According to federal managed care regulations, OHA cannot set the capitation rates. Instead, each calendar year an independent actuary certifies the capitation rates and the federal government approves for actuarial soundness.

Background information

In July 2012, the Centers for Medicaid and Medicare Services (CMS) approved Oregon's 1115 Medicaid Demonstration waiver that was necessary to implement coordinated care organizations and initiate health system transformation for the Oregon Health

Plan. This initial waiver was for a five-year period, running from July 2012 through June 2017. Oregon's Medicaid Demonstration renewal request was approved by CMS and runs from January 12, 2017 through June 30, 2022.

The renewal continues and expands on elements of the 2012 waiver, particularly around integration of behavioral, physical and oral health care, and has included a focus on social determinants of health, population health, and health care quality. Under the agreement, Oregon will continue to provide integrated physical, behavioral and oral health care services to OHP members through CCOs; advance the coordinated care model to improve quality and outcomes; and offer evidence-based benefits through the state's prioritized list of services. The agreement also includes a commitment to an ongoing sustainable rate of growth and adopting a payment methodology and contracting protocol for CCOs that promotes paying for value rather than volume of services and advances the use of value-based payments.

In addition to continuing the core components of Oregon's existing coordinated care model, the waiver allows Oregon additional flexibility to:

- **Promote increased investments in health related and flexible services**. The waiver provides clarity on how non-traditional services that improve health are accounted for in global budgets. CCOs will be encouraged to invest in services that improve quality and outcomes, and CCOs that reduce costs through use of these services can receive financial incentives to offset those cost reductions.
- **Promote primary care and pay for value**. Oregon will advance the use of value-based payments by CCOs. The state received authority to provide new performance incentive payments to primary care providers under the "Patient-Centered Primary Care" medical homes and "Comprehensive Primary Care Plus" initiative.
- **Advance Tribal Health Programs**. The Tribal Uncompensated Care Program (UCCP) was transitioned to become a Medicaid benefit, making the program easier to manage for tribes. Important services and protections for American Indians and Alaska Natives in Oregon were strengthened.

- **Expand access to coordinated care**. The state received authority to make enrollment into a coordinated care organization easier for Oregonians who are dually eligible for both Medicaid and Medicare. This expands coverage into high quality, cost effective, person-centered care for some of Oregon's most vulnerable population.

In 2018, under Senate Bill 558, Oregon expanded Oregon Health Plan coverage to low-income children who previously lacked health coverage. The implementation of the bill led to the transition of some CAWEM members into the Cover All Kids program, which is funded by General Fund, while the remaining CAWEM members maintained Medicaid funding.

Revenue sources and changes

The 2021-23 Medicaid budget comprises 72 Federal Funds, 9 percent General Fund, and 19 percent Other Funds.

General Fund revenue supports Oregon's medical assistance programs. The Medicaid program (OHP) receives Federal Funds for services provided to Medicaid-eligible individuals through the following sources:

- The Medicaid Title XIX entitlement provides a 61:39 match on health care services to Medicaid members. This means for every dollar OHA spends on health care services to Medicaid members, the federal Centers for Medicare & Medicaid Services (CMS) funds 61 cents and OHA funds the rest.
- The Children's Health Insurance Program (CHIP) Title XXI entitlement provides a 72:18 match on health care services to CHIP members.
- Medicaid Title XIX provides a 90:10 match for health services for low-income adults (expansion population).

Other Funds revenues include tobacco tax revenues, hospital assessments, an intergovernmental transfer agreement with the Oregon Health & Science University (OHSU), insurers assessments, grants, third party recoveries, pharmaceutical rebates, and the Tobacco Master Settlement Agreement (TMSA). For the 2021-23 biennium, tobacco tax revenues may increase if voters approve legislation referred by the Legislature in the November 2020 ballot that would increase Oregon's cigarette tax by $2.00

per pack, extend the existing wholesale tax on other tobacco products to vaping products and increase other non-cigarette tobacco taxes.

Proposed new laws that apply to the program unit

None.

Oregon Health Authority: Health Systems Division

Non-Medicaid

Expenditures by fund type, positions and full-time equivalents

	General	Other/Lottery	Federal	Total Funds	Positions	FTE
Leg. Approved 2019-21	$316.84	$175.95	$97.46	$590.25	0	0
Agency Request 2021-23	$393.52	$155.42	$268.06	$817.00	0	0.00

The Agency Request Budget of $817 million Total Funds continues funding for Non-Medicaid Behavioral Health programs at the current service level for the 2021-23 biennium. It includes policy packages #406, #409, #411, and #414 to improve the behavioral health system for all people in Oregon. The programs and services in the policy packages are designed to address disparities in health outcomes and achieve OHA's health equity goals. Furthermore, these packages attempt to support the behavioral health system given the impacts of COVID-19; underlying health conditions, homelessness, and inconsistent access to the health system leave many with behavioral health issues particularly vulnerable to the health and health system impacts of COVID-10. These investments include:

- Policy package #416 to expand mobile crisis response to children, young adults, and their parent and/or caregiver.
- Policy package #409 to do the following:
  - Establish a center for training and technical assistance for youth and young adult behavioral health.
  - Expand the young adult in transition residential system.
  - Develop psychiatric residential treatment capacity.
  - Expand the Early Assessment and Support Alliance (EASA) program to provide additional statewide early psychosis intervention for adolescents and young adults.
  - Establish a young adult hub in every county to engage marginalized and disconnected young adults.
  - Provide the supports needed to prevent substance use disorder and sustain long-term recovery, including crisis intervention, peer support services, outreach and education to help individuals in recovery find and keep housing.

  - Develop peer-run respite pilot to provide culturally informed, voluntary, short-term residential support in a home like setting to adults who are experiencing acute mental health or emotional distress.
  - Establish state Certified Community Behavioral Health Clinics into Oregon's full continuum of care.
  - Fund components of the Tribal Behavioral Health Strategic Plan.
  - Implement the Alcohol and Drug Policy Commission Strategic Plan.
  - Develop a payment methodology to fund integrated co-occurring disorder treatment.
  - Create an incentive fund for the behavioral health workforce to increase the workforce and improve recruitment and retention.
  - Expand Mobile Permanent Supportive/Supported Housing (PSH) team model, remove barriers to housing through tenant based rental assistance and flexible funds to help people stay in their homes, and provide renovation funds for residential living.
- Policy package #411 to increase local capacity to serve the "Aid and Assist" population to reduce long-term costs and address capacity challenges at the Oregon State Hospital.

Activities, programs and issues in the program unit base budget

Non-Medicaid Behavioral Health programs help all Oregonians achieve physical, mental and social well-being through access to mental health and addiction services and support (including housing services) for adults and children. Ongoing supports and services improve a person's ability to be successful with their family, education, employment, and in their community. This often reduces public safety problems, negative health-related consequences and suicide risk. Timely access to behavioral health care is a critical aspect for increasing protective factors and reducing risk factors that lead to suicide.

Services and supports include those delivered by peers, such as help establishing personal relationships, obtaining employment or education, and independent living skills training such as cooking, recreation and cultural activities, and shopping and money management. They also include residential treatment services or adult foster care and supervision of people in the community who

have committed crimes but were found "Guilty Except for Insanity." Services are provided in local mental health clinics, doctor offices and clinics, schools, drop-in centers and homes.

Non-Medicaid Behavioral Health programs use numerous partnerships to develop and administer a community-based continuum of care delivered in outpatient, residential, school, acute, hospital, and criminal justice and community settings. In partnership with coordinated care organizations (CCOs), county governments, local community stakeholders and consumers, Behavioral Health programs provide funding and technical support for service provision to ensure investments and legislative mandates are implemented.

Cost drivers
Issues driving cost for behavioral health services in the current base budget include:

- A youth suicide rate that has been increasing since 2011.
- Stigma and bias present barriers to black, indigenous and people of color (Tribal Communities and Communities of Color) communities seeking or receiving behavioral health care.
- Growth in demand for services.
- Need for more community-based care.
- The number of individuals entering mental health treatment through crisis services.
- The number of individuals entering treatment who have multiple and complex physical and mental health needs.
- Behavioral health workforce shortage across all provider types.
- Access to heroin and other opioid drugs, which drives social problems including death and the demand for addiction treatment.
- Lack of safe, affordable and drug-free housing.
- The cost of emergency room visits and treatment for addiction services.
- The need to serve people being released from prisons and local jails.
- Ease of access to highly addictive gambling games.

- Community norms that minimize the effects of gambling by young people, and norms in particularly Latino and Asian communities that stigmatize seeking help for gambling disorders.

The number of people sent to OSH for "Aid and Assist" services has grown significantly over the past several years, putting a significant burden on General Fund dollars. As OSH shifts resources for this growing population, they must use housing units not designed for their specific needs. One way to address this issue is through collaboration among OSH, community partners, and the provider community to implement new systems that would make data available in a timelier manner and allow a better understanding of how to improve the quality of services. Behavioral health mapping is a critical piece of this work.

The 2021-23 continuing caseload is forecast for a biennial average of 55,752 clients, which is 11.1 percent higher than the 2019-21 biennium. The caseload includes clients in forensic, aid and assist, guilty except for insanity (GEI), civil commitments, previously committed, never committed populations.

Opportunities for improvement
Opportunities to improve behavioral health performance include:

- Increasing Tribal Communities and Communities of Color members in our stakeholder and advisory groups to create an equitable behavioral health system.
- Revising the County Financial Assistance Agreements.
- Increasing consumer engagement.
- Expanding access to a range of mental health services that engage individuals in the community with the services and supports they need, when they need them, where they need them, and at the right intensity.

Background information

In 2019, over 145,400 individuals received mental health services and over 42,600 received SUD treatment and support services.

Non-Medicaid

Addiction Treatment, Recovery and Prevention Services

Problem Gambling Services

- Ongoing funding of 50 treatment programs through 34 agencies, ensuring problem gambling treatment services are offered in every county. These programs include traditional outpatient, residential, respite, home-based, and prison-based programs as well as a full-service help line.
- Ongoing funding of 37 prevention programs, ensuring that problem gambling prevention services are offered in every county.
- In FY 2018-19, 1,026 Oregonians received problem gambling treatment services, including individuals with gambling disorders and their family members at a cost of $1,743 per case. Of the individuals in outpatient services, 28 percent successfully completed treatment. Of those who completed treatment, 33 percent reported they were still abstaining from gambling six months later and 45 percent reported gambling much less.
- In FY 2018, partnered with the Department of Corrections to conduct a prevalence study that found individuals in the criminal justice system are at greater risk for disordered gambling. Three statewide prison-based problem gambling treatment programs served 95 incarcerated individuals who were more racially and ethnically diverse than the overall criminal justice system population.
- In FY 2018-19, awarded special project funding to problem gambling prevention providers to conduct community readiness assessments to obtain metrics to guide future planning.

DUII

- 115 certified DUII Services Providers
- 50 certified Alcohol & Other Drug Screening Specialists
- Approximately 12,000 screenings/referrals to treatment conducted each year
- Approximately 3,000 individuals (DUII & MIP) served by Intoxicated Driver Prevention Funds (IDPF) between July 1, 2017 to June 30, 2019
- Conducted 5 Regional trainings on DUII OARs – trained approximately 350 people in 2018.

- Provided access to 10 hours of American Society of Addiction Medicine (ASAM) Criteria training to 350 DUII clinicians in 2017-2019 biennium.

Opioid State Targeted Response

- Two recently opened Opioid Treatment Programs in rural Oregon are now providing services: Springfield and Pendleton.
- Through Project ECHO, over 200 providers (including MDs, DOs, PA and NPs) have been trained in buprenorphine waiver management and working with high-risk patients in clinical settings.
- Two coordinated housing service providers in rural Oregon funded to provide access to individuals to Intensive Outpatient and Day Treatment for Opioid Use Disorders (OUD) in conjunction with housing coordination.
- Increased access to naloxone, a life-saving drug that can reverse overdoses. Eight counties have received funding to distribute naloxone and train law enforcement in naloxone administration.
    - In Lane County, the Harm Reduction Program distributed approximately 1,700 doses of naloxone to individuals with OUD. In Lane County, 121 overdoses have been reversed through this distribution alone.
    - In Multnomah, Clatsop, Columbia, Washington and Clackamas counties, 927 individuals have been trained in naloxone distribution and provided with naloxone for distribution. Through these new avenues for naloxone distribution, 331 individuals have been referred to OUD treatment.
- All 9 tribes and Oregon's Urban Indian Program are developing Medication Assisted Treatment (MAT) implementation models to fit into their Tribal wellness model.
- Partnered with the Department of Corrections to train 8 inmates as Substance Use Disorder peer mentors in Coffee Creek Correctional Institution and will train more inmates in Pendleton's Eastern Oregon Correctional Institution. The Yamhill County Jail Medicaid-Assisted Treatment (MAT) Grant and Peer program connected 41 individuals in Yamhill County Jail to OUD treatment while incarcerated and to MAT through Certified Peers upon release.

Non-Medicaid

State Opioid Response

- Twenty-three recently opened rural SUD providers qualify for the National Health Service Corps Substance Use Disorder Workforce Loan Repayment Program. This program supports the recruitment and retention of health professionals to expand access to SUD treatment and prevent overdose deaths in underserved areas. Seven of these providers are also funded through federal opioid grants to implement and expand MAT and associated wraparound services in the areas they serve. These resources are increasing the behavioral health workforce.
- One new OTP on the Oregon North Coast, in Seaside, a region with one of the consistently highest rates of opioid overdose and hospitalization in the state.
- Expansion of access to MAT programming within the non-OTP SUD provider network, in Southern, South Central and Eastern Oregon, providing better access to rural and frontier SUD impacted populations through the existing SUD treatment system.
- Increasing integration of MAT into Oregon's tribal behavioral health system, with two tribes now offering MAT directly through their tribal behavioral health programs.
- Continued support for Oregon's first jail-based buprenorphine maintenance programs in Yamhill County, resulting in high rates of treatment engagement upon release from custody and improved outcomes.
- PRIME+ Project (Peer Recovery Initiated in Medical Establishments + Infectious Disease Testing and Linkage to Care)
    - The aim of the PRIME pilot in Coos, Jackson, Marion and Multnomah counties was to link people who presented to hospital emergency departments (ED) with evidence-based substance use treatment and community resources. Following the success of the pilot and leverage of federal SAMHSA State Opioid Response (SOR) funds, in 2019 the PRIME pilot expanded in scope to: (1) include people hospitalized for SUD related complications; and (2) add an additional 14 counties, including Columbia, Clatsop, Tillamook, Lincoln, Lane, Douglas, Josephine, Deschutes, Klamath, Morrow, Umatilla, Wallowa, Baker and Malheur.

Non-Medicaid

Adult Behavioral Health and Housing Services

- Evidence-based programs including Assertive Community Treatment (ACT) provide services to over 1,200 individuals in their homes and communities. Supported Employment (SE) is also available statewide and currently serves over 730 individuals.
- Mobile Crisis and Jail Diversion services are provided in every county to assist individuals in getting services prior to encounters with law enforcement and to encourage treatment options instead of jail. Mobile crisis provides face-to-face visit with skilled clinicians for a more thorough risk assessment and recommendations for additional services. Mobile crisis teams work proactively alongside first responders such as police with individuals who have a mental health issue and are at high risk for police contact, providing an option outside of Emergency Department to access such services.
- To address Aid and Assist population growth, HSD is working with each Community Mental Health Program to ensure community consultations are completed as required in statute and restoration services are available when needed in community settings.
- HSD and Oregon Housing and Community Services (OHCS) are engaged in an ongoing collaborative effort to expand Permanent Supportive Housing, which will result in 101 additional supportive housing residential units in the 2017-19 biennium. This partnership has multiple additional rounds of funding to be disbursed in the 2019-21 biennium as OHCS and OHA work together to refine the training institute and focus further rounds of funding on hardest to reach populations.
    - This investment corresponds to the planned construction of 500 new units to be completed by the last six months of the biennium. Part of this funding will be transferred to OHCS to provide rental assistance.
- Rental assistance is available statewide for up to 1,254 individuals, which includes providing rental supports (teaching skills related to being a renter and connection to community resources to help with housing needs), rental services to help individuals address barriers to housing (such as payment of outstanding electric bills or resolving a past eviction) and rental assistance in permanent supported housing.
- 114 Residential Programs serve 869 individuals in the community in various levels of licensed care including Residential Treatment Homes and Facilities as well as Secure Residential Treatment Homes.

- Older Adult Programs sponsor 24 Behavioral Specialists working in communities statewide to ensure services are available and federally mandated Preadmission Screening and Resident Review evaluations are completed.
- CHOICE services are provided to assist individuals diagnosed with severe and persistent mental illness who are needing coordination of care to move from acute care hospitalization through the system of residential supports into more independent settings with the right treatment and services available.

Behavioral Health Medicaid, Policy and Analytics

- The Governor's Behavioral Health Advisory Council (GBHAC) is a 47-member council established by Executive Order 19-06 and represents a broad range of perspectives and experiences of Oregon's behavioral health system. The Governor called upon the council to develop an action plan that includes concrete actions, policies and potential investments needed to preserve and improve services and supports for youth and adults with serious mental illness, including those with co-occurring substance use disorders.
- Oregon Behavioral Health Access System is a statewide system to simplify access to behavioral health care. The system includes a COVID 19 emotional wellness line, a people of color emotional wellness line, expanded crisis line capacity to respond to behavioral health concerns during COVID-19. Additionally, this system builds out a provider network web portal so that consumers can find a provider in their community, in their primary language, and a bed capacity system.
- Behavioral health media campaign to decrease stigma and increase awareness of behavioral health resources.
- A single point of access for behavioral health web page, which links directly to the Oregon Behavioral Health Access System resources and is advertised through the above media campaign.
- Collaborated with stakeholders to develop the Rapid Engagement system, which will allow providers to issue a preliminary diagnosis while they engage with new consumers. This allows the clinician and consumer to build rapport, meet the immediate and most pressing needs of the consumer and has been found in other states to increase retention and engagement.
- Developed telehealth policies and guidance to ensure access to treatment during COVID-19.
- Applied for COVID-19 behavioral health funding, including CARES Act and FEMA.

- Made significant progress on meeting the objectives of the US-DOJ Oregon Performance Plan.
- Developed the Behavioral Health Quality Improvement Plan to continually monitor behavioral health system performance.

Child and Family Behavioral Health Services:

- The Governor's System of Care Advisory Council was created by Senate Bill 1 (2019) and tasked with forming policy for improving Oregon's System of Care, which is "a spectrum of effective, community-based services and supports for children and youth with or at risk for mental health or other challenges and their families, that is organized into a coordinated network, builds meaningful partnerships with families and youth, and addresses their cultural and linguistic needs, in order to help them to function better at home, in school, in the community, and throughout life." (Source: https://gucchd.georgetown.edu/products/Toolkit_SOC_Resource1.pdf (accessed Dec. 13, 2018)). OHA staffs the Council and is overseeing the creation of the children's System of Care Data Dashboard.

Early and Young Childhood

- Parent Child Interaction Therapy (PCIT): OHA funded PCIT programs added 16 PCIT locations in July 2019. Families can access PCIT services at 66 locations in 22 Oregon counties. Most PCIT therapists have continued to provide PCIT services via telehealth during the pandemic. 945 parent-child pairs (dyads) received PCIT services between January 1, 2019 and December 31, 2019. (595 dyads were still participating in PCIT as of December 31, 2019; these dyad outcomes were not yet available for this report). Of those dyads attending four or more PCIT sessions, more than 62 percent of parents reported that their child's symptoms and problem behaviors improved and were in the typical range for children of the same age.
- Child-Parent Psychotherapy (CPP) is a dyadic evidence-based mental health therapy for young children and their caregiver(s). OHA has been funding one training cohort per year since 2014. As of April 2020, 30 programs in 22 counties have one or more clinicians trained to provide CPP services, including seven agencies currently participating in an 18-month training and consultation program.
- Generation PMTO (Parent Management Training-Oregon Model) is a brief, well-supported evidence-based therapy for children ages 2-17 yrs. and their parent(s). The first OHA funded training began in January 2020 and quickly switched to

virtual training. 15 clinicians are participating in 12 months of training and consultation while providing Generation PMTO to families in seven counties via telehealth. OHA is now accepting Requests for Grant Applications until July 14 for a small number of additional programs to receive funding to implement Generation PMTO.

School Based Mental Health

- In 2014 OHA received initial investment funds to provide school-based mental health services in nine counties. In 2019 eight counties were awarded grants to expand access to school-based mental health services under POP 402, bringing services to 17 total counties (Benton, Clatsop, Columbia, Coos, Gilliam, Harney, Lake, Linn, Jefferson, Klamath, Malheur, Morrow, Sherman, Tillamook, Union, Wallowa, and Wasco).
- Clinicians from county community mental health programs are placed directly in local schools to provide person-centered, trauma informed, rapid crisis and clinical interventions directly to youth and families, and to assist teachers with mental health related issues in their classrooms. Access to mental health services for youth has increased by 39 percent as a result of this investment. During 2018-2019, 5,660 students received crisis and clinical services in 62 schools and 28 school districts through this program funding.

Peer Delivered Services for All Ages

- Three regional facilitation centers were established to provide technical assistance, training and "tool kits" of best practices for providing peer-delivered services. The populations selected for research and best practices are medically assisted treatment, people who have been incarcerated, people without homes, rural (poverty), seniors, and young adults in transition.
- Parents and families expressed a need to have a central point of contact to ask other parents for support and how to access assistance for their child. In January 2020, OHA contracted with Oregon Family Support Network and its other funding partners to develop and provide statewide telephone and chat access for parents and caregivers. ReachOut Oregon (833-932-2467 or 833-REACHOR) enables parents and caregivers to receive support and information about parenting concerns regarding their child or children who experience emotional/behavioral health, physical health, intellectual/developmental disabilities, or educational issues. The statewide service is staffed by local certified family support specialists, specially trained individuals with personal experience in parenting children with emotional,

developmental or physical health concerns. The HelpLine connects parents with their local Family Support Specialist for individual and group support and parenting classes.

Supports for Children's Mental Health

- Collaborative Problem Solving (CPS) is a relationship promoting strategy that involves caregivers and youth working out a mutual solution through collaborative processes. OHA contracts with Oregon Health & Sciences University (OHSU) for training, consultation and coaching to multiple organizations, including Behavior Rehabilitation Services providers, over 100 members of the CPS Foster Care Coalition, Doernbecher Children's Hospital, Oregon State Hospital, Education Service Districts (ESDs), the Department of Human Services and Oregon Youth Authority.
    - Because of the contractual relationship with OHSU to provide these trainings, 67 organizations have trainers or mentors on staff and an additional 56 organizations have staff trained in CPS. One such organization, Oregon Family Support Network (OFSN), has 5 parents certified in CPS providing peer support, with 4 more training who will be able to train other parents in the model.
    - Oregon is home to almost half of all Think: Kids certified trainers and nearly 25 percent of the Think: Kids certified community.
- The Oregon Psychiatric Access Line about Kids (OPAL-K) makes psychiatric consultation for children up to age 18 available to primary care providers and mental health clinicians in need of psychiatric expertise. OPAL-K has received over 3,500 calls from medical providers throughout Oregon since it began services in June 2014. Over 1,900 medical providers have enrolled, with numbers increasing daily. OPAL-K also provides case reviews for children who are in the foster care system and have been prescribed complex psychiatric medications. As of March 2020, 276 foster care cases have been reviewed. 79 DHS/Oregon State University pharmacy case reviews have been conducted.
- The Oregon Psychiatric Access Line about Adults (OPAL-A) for those 18 and over began services on October 1, 2018. Since inception, the call center has received 981 consult calls from medical providers caring for their adult patients in different regions of Oregon. 1,603 providers have enrolled for the OPAL-A service since November 2018. 11 calls have been received directly from an emergency department. These services increase a provider's ability to manage complex cases, improve effective use of medications and facilitate connections with additional mental health treatment when needed.

- Senate Bill 944 (2017) required the formation of a call center to address barriers accessing intensive behavioral health services for youth, including admission to higher levels of care. Youth with high acuity behavioral health needs often have difficulties accessing appropriate care when their symptoms bring them to an Emergency Department.
    - The Acute Care Line, operated by Lines for Life, creates a centralized process to support accessing appropriate treatment for youth with intensive mental health needs.
    - The Line initially focused on youth in emergency departments; with the onset of the COVID-19 crisis, Lines for Life extended access to the Acute Care Line to assist in triaging referrals from the community.
    - Lines for Life has received 123 referrals to the Acute Care Line from its inception in October 2018 to April 2020 and facilitated 77 percent of referrals in accessing a higher level of care.

Youth and Young Adult Supports and Services

- The Early Assessment and Support Alliance (EASA) is a clinical, team-based program serving young adults ages 12 to 25 experiencing symptoms consistent with early or initial onset of psychosis. Oregon is the first U.S. state to commit to universal access to early psychosis intervention and is an established national leader. EASA programs reduce the need for more institutionalized and expensive care, while promoting recovery. As of February 2020, there are 28 EASA programs serving 35 counties across the state. From 2008 through 2019 EASA served 3,191 new individuals. EASA currently serves close to 500 people at any one time.
- OHA contracts with Morrison Family Services to provide a long-term stabilization and treatment program for survivors of commercial sexual exploitation (CSEC). The program, called SAGE (Support, Achieve, Grow, and become Empowered), helps female-identified youth ages 11-16.5 years with high level mental health, medical, and substance use services in a secure residential setting. SAGE recently opened four additional beds, increasing the program capacity to 16. The additional capacity will increase access to the community for youth as they transition and empower themselves for eventual return to living in their communities.
- Crisis and Acute Transition Services (CATS) started in 2014 with 4 sites and has expanded into 9 counties statewide. CATS services were developed as an alternative to inpatient psychiatric services with a focus on reducing emergency room "boarding". CATS providers respond quickly to the emergency room and work with the child and family to assess their

needs, create a crisis and safety plan, and work to reintegrate the child or youth back home as quickly as possible. CATS services include: 24/7 crisis response, interim mental health therapy, family support services and care coordination. CATS providers are able to work with the family for up to 45 days, while working to identify and connect the child or youth and family with appropriate long- term community resources.

- CATS Data Summary (January through December 2019)
  - Nine counties provided CATS which included: Benton, Clackamas, Deschutes, Jackson, Klamath, Linn, Marion, Multnomah, Washington.
  - Hospital/Crisis Clinic partnerships included: Providence Willamette Falls, Providence Milwaukie, Legacy Children's Hospital, OHSU, Samaritan Health, St. Charles, Salem Hospital, Hawthorn Walk-in Clinic, Cascadia Walk-in, and Clackamas Co. Walk-in.
  - 667 children and youth were served, of which 256 identified as Male, 380 as Female, and 31 as Trans, Non-Binary, or Other.
  - 548 youth were 12 to 17 years of age.
  - 369 were enrolled in the Oregon Health Plan, 271 had private insurance, and 50 were uninsured or other.
  - CATS diverted 630 youth from the ED within 48 hours of referral and only 66 youth returned to the ED or required a higher level of care while enrolled in CATS.
  - 430 youth enrolled in CATS presented at intake with suicidality (suicide attempt, suicide plan, or suicidal ideation), 523 had a diagnosable mental health condition and 42 youth had a known substance use disorder
  - 560 of the referrals were seen by the clinical team within three hours of referral and were in CATS for an average of 35 days.
  - CATS provided 1,954 hours of Family Support Services (FSS) to 167 families.
- The 2019-21 budget includes a $3.1 million General Fund investment for crisis and transition services. At this time $1.7 million has been awarded to enhance existing CATS sites and for establishing one new CATS site beginning July 1, 2020. The remaining funds will be distributed through a Request For Proposals (RFP) to expand four new CATS providers in

Eastern Oregon and rural communities experiencing a high volume of youth behavioral health crisis in hospitals and Emergency Departments.

- Young Adult Hubs are regionally unique projects designed to engage marginalized and disconnected young adults through accessible, holistic, non-stigmatizing and developmentally appropriate services. There are four HUB sites serving approximately 400 young people (ages 14 to 25) each quarter. The HUB sites provide a team-based approach to supporting young people transitioning to adulthood, through behavioral health services, peer support services, educational support, vocational support and case management.
- Juvenile Fitness to Proceed, also known as Juvenile Aid and Assist or Restorative Services: this program provides court ordered services to youth who have been charged through the juvenile justice system and are found to be "not fit" or "not competent" to stand trial. The goal of these services is to assist youth to restore or gain fitness to move through the court process. During 2019, there were 30 youth discharged from the Restorative Services program. Youth ranged in age from 11 to 18 and represented 13 different counties. 21 of the youth were served in a community-based setting only, four were served in an inpatient setting only, and five youth were served at both a community-based setting and inpatient setting. The length of stay ranged from 62 days to 403 days with an average of 196 days. 22 of these youth were restored to competency; seven youth were deemed not restorable and one youth had their charges dismissed prior to completion the Restorative Services program.
- Juvenile Psychiatric Security Review Board (JPSRB): Provides oversight and monitoring to youth that have been found through the juvenile court to be Responsible Except for Insanity. OHA provides funding for monitoring, security, and supervision for youth under JPSRB jurisdiction. During 2019, there were five individuals under JPSRB jurisdiction.
- Young Adults in Transition Residential Treatment Homes (YAT RTH). Young Adults in Transition (YAT) Residential Treatment Homes (RTH) are for young adults (ages 17.5 to 25 years) who experience complex behavioral health challenges. YAT RTH's provide 24-hour supervision and support, focusing on helping residents develop the skills needed to manage their mental health symptoms and transition into adulthood through a variety of services and supports including but not limited to: therapy and medication management, case management, skill development, and recreational and social activities. The length of stay varies from a minimum of six months to 18 months. During 2019 we had 110

referrals for the 34 beds available. The leading referral sources include DHS child welfare, Oregon Youth Authority, Community Mental Health Programs, and Acute Psychiatric hospital units.

- Fidelity Wraparound is a care coordination model serving people ages 0 to 18. Now implemented statewide, Wraparound is being monitored and supported for fidelity through technical assistance, and adherence through administrative rules (OAR). Wraparound offers support to youth and their families experiencing complex needs who are involved in multiple child-serving systems. The team-based planning process improves collaboration across multiple agencies, while centering the youth and family. At present, there are approximately 1,100 young people and their families participating in Wraparound.
- Psychiatric Residential Capacity: Since 2016, Oregon has experienced a shortage of beds for youth under age 18 at the intensive psychiatric residential level of care. OHA is actively working with the Department of Human Services on capacity, developing a short-term strategy to address needs. Additionally, OHA and DHS are engaging CCOs, counties, stakeholders and partners in investigating mid- to long-term solutions for meeting the intensive service needs of our youth and families in the state while conceptualizing alternatives to the current model.
- The short-term strategy prioritized capacity building for Oregon's child and family behavioral health system's Psychiatric Residential Treatment Services (PRTS). Accordingly, at the end of 2019, two psychiatric residential programs were identified and committed to expansion. 1) Kairos New Beginnings in southern Oregon opened a unit with seven additional beds in March 2020. Kairos is working toward running at a full capacity of nine residents for this new unit by September. 2) OHA is working with a provider in eastern Oregon to develop additional PRTS services for youth 12 and younger. This program is slated to have capacity to serve 14 children and their families.

Opportunities to build on one-time funding allocated by the Legislature for youth suicide prevention in 2018 are included in policy package 402, adopted in 2019. These essential activities for implementation of the Youth Suicide Prevention and Intervention Plan, include:

- Full funding of Lines for Life, Oregon's statewide crisis line
- Creation and expansion of "Big Six" Suicide Prevention programs, which launched in March 2020 and include collaboration between, comprehensive evaluation of, and support for all the following programs:

  - Sources of Strength: upstream prevention, youth-driven program.
  - Mental Health First Aid: an eight-hour course that teaches the average person how recognize mental health problems.
  - Question, Persuade, Refer (QPR): a short workshop to learn how to recognize signs of suicide and refer to help.
  - safeTALK: a three- to four-hour workshop to learn how to recognize signs of suicide and refer to help.
  - Applied Suicide Intervention Skills Training (ASIST): a two-day workshop to intervene with someone having thoughts of suicide.
  - CONNECT: a four-hour workshop to teach communities how to respond after a suicide death.
- Hired a second youth suicide prevention and intervention coordinator.
- Hired a full-time school based mental health coordinator.
- Hired an adult suicide prevention coordinator through adult behavioral health.
- Contracted with Trauma Informed Oregon to develop resources for individuals with lived experience with suicide as loss survivors or attempt survivors.
- Contracted support for school districts to write or revise suicide prevention plans to comply with SB 52 (2019), which includes consultation and mini grants, available March 2020.
- Data and evaluation plan for new statewide programs in collaboration with University of Oregon's Suicide Prevention Lab.
- Targeted effort to address safe online spaces for youth through contract with Lines for Life.
- Elementary-age programming for suicide prevention.
- Developing statewide plans for psychological autopsy work in partnership with local suicide prevention work.
- Tribal mini grants to be disbursed to tribes and Urban Indian Program of $45,000 each to enhance or provide new suicide postvention and prevention activities in their local communities.

Work on Senate Bill 561 (2015) regarding suicide reporting and administrative rules, Senate Bill 48 (2017) regarding continuing education for designated professional groups and completed work under Senate Bill 707 (2019) regarding the functioning of the Oregon Alliance to Prevent Suicide, an advisory group to OHA.

Non-Medicaid

Licensing and Certification

- Responded to 397 annual new program onsite inspections, renewal onsite visits, unannounced visits, complaint visits, follow-up visits, and requests for technical assistance.
- Implemented the Community-based structured housing (CBSH) registry.
- Developed process improvements including a desk-audit system for ADSS certification and standardized complaint resolution process.
- Improvements have increased the unit's on-time license and certificate renewal rate to approximately 98 percent.

Revenue sources and changes

The 2021-23 Non-Medicaid Behavioral Health revenues include 54 percent General Fund, 28 percent Other Funds, 16 percent Federal Funds, and 2 percent Lottery Funds. General Fund revenue supports Oregon's behavioral health programs.

Behavioral health programs receive Federal Funds through the following federal grants:

- The Substance Abuse and Mental Health Services Administration (SAMHSA) Substance Abuse Prevention and Treatment (SAPT) Block Grant
- The SAMHSA Community Mental Health Services Block Grant
- The SAMHSA Projects for Assistance in Transition from Homelessness formula grant
- The Department of Health & Human Services Temporary Assistance for Needy Families (TANF) Block Grant

Other Funds revenues include:

- Statutorily dedicated funds under the Tobacco Use Reduction Account (TURA), Intoxicated Driver Prevention Fund (IDPF), Driving Under the Influence of Intoxicants (DUII) fund, Community Housing Trust Funds, and Lottery Fund.
- Tax revenue from beer, wine, tobacco and marijuana sales.
- Miscellaneous revenue from contract settlements, sponsored travel reimbursements, and the Tobacco Master Settlement Agreement (TMSA).

Lottery funds are frequently reduced in times of economic decline and there has been a recent decline in TMSA funds. Continued decline will require reductions to programs or new revenue sources to support current service levels.

Proposed new laws that apply to the program unit

Governor's Behavioral Health Advisory Council Legislative Concept placeholder Governor Brown issued an Executive Order to convene the Behavioral Health Advisory Council. The council is tasked with developing recommendations aimed at improving access to effective behavioral health services and supports for all adults and transitional-aged youth with serious mental illness or co-occurring mental illness and substance use disorders. OHA may need to develop LCs to support or implement these policies. This LC is a placeholder.

DUII system services modernization Legislative Concept Oregon's DUII service system was created in 1981 and conflicts with federal privacy (42 CFR Part 2 and HIPAA). This LC proposes convening a stakeholder group to develop recommendations to improve Oregon's DUII system and prevent DUII recidivism.

System of Care Advisory Council Legislative Concept placeholder The System of Care (SOC) Advisory Council is directed under Senate Bill 1 (2019) to improve the effectiveness and efficacy of child serving state agencies and the continuum of care that provides services to youth ages 0 to 25 by providing centralized and impartial forum for statewide policy development, funding strategy recommendations and planning. The recommendations to the legislature and agency directors are highly likely to include the need for new legislation and changes or updates to existing statutes in order to address continuum of care gaps and needs and develop and more functional SOC for Oregon.

Medical examiner and law enforcement reporting of deaths suspected to be suicide and uniform postvention response ORS 418.735 does not require medical examiners or law enforcement to report a suspected suicide death to the local mental health authorities (LMHAs), which creates inconsistent and unreliable suicide postvention responses. Currently, postvention response varies widely across the state – and in some counties there is no postvention response from the local mental health authority. This LC proposes changing the ORS 418.735 to address these concerns.

Agency Request Budget

Oregon Health Authority

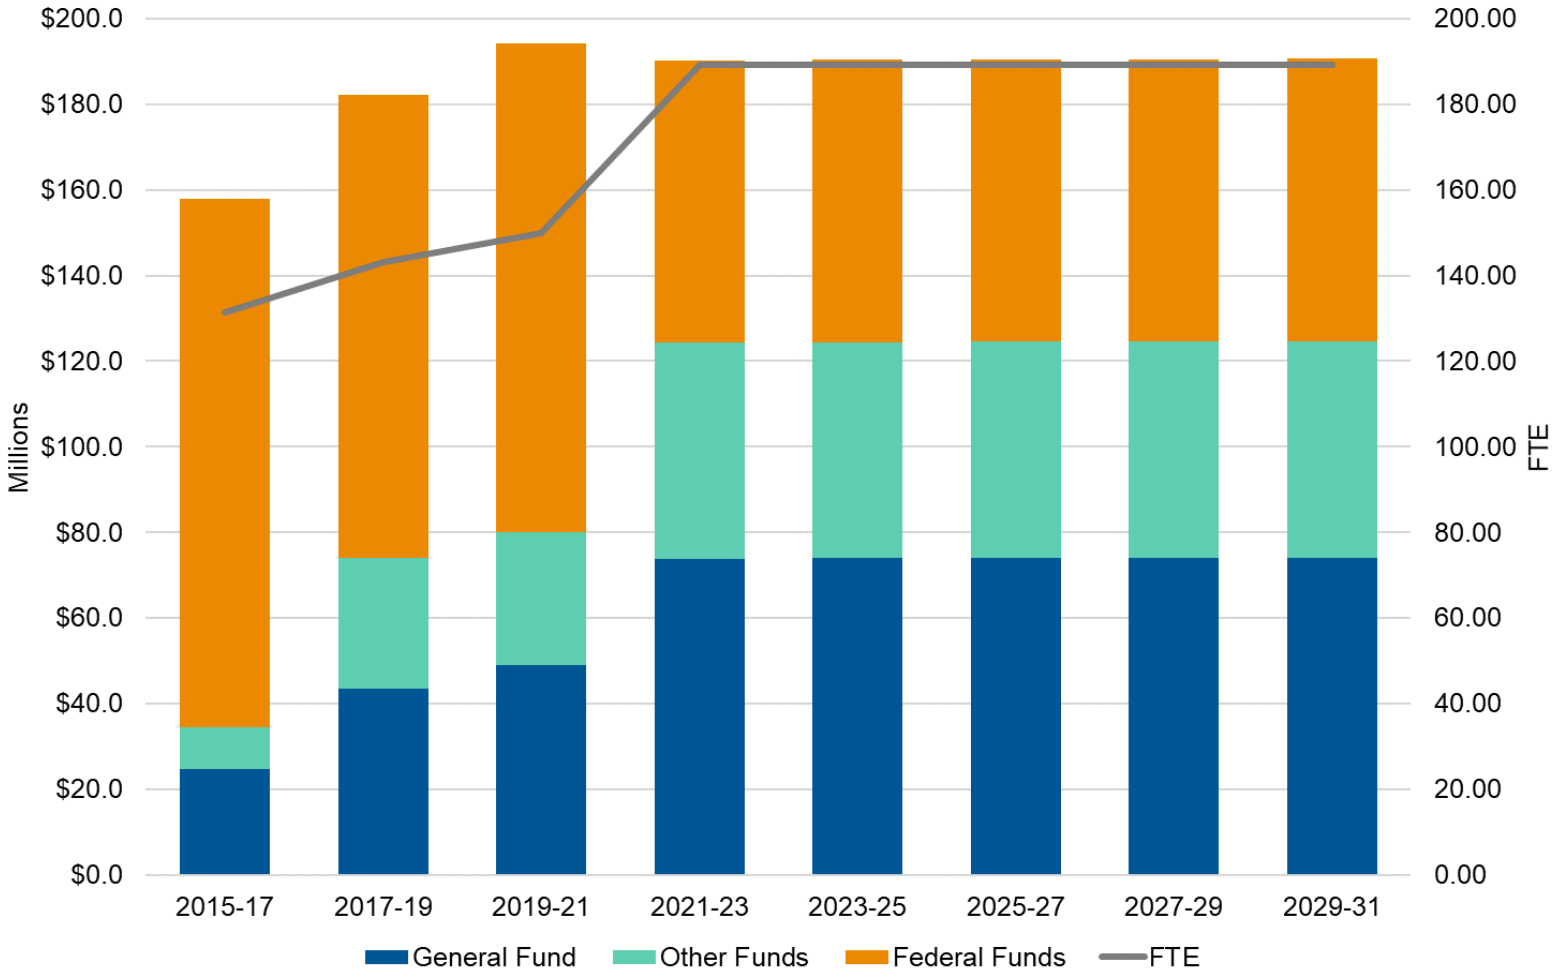
Oregon Health Authority: Health Policy & Analytics

Executive Summary

Program Contact: Jeremy Vandehey, Director of Health Policy & Analytics
(971) 304-8433



Executive Summary

Division overview

The Health Policy and Analytics Division develops and implements innovative approaches to lowering health care costs and achieving better health and better health care, while keeping a central focus on health equity. This is accomplished through six main functions:

- The Office of Health Policy.
- The Office of Delivery Systems Innovation.
- The Office of Health Analytics.
- The Office of Health Information Technology.
- The Public Employees Benefit Board and the Oregon Educators Benefit Board (each are budgeted separately from HPA).
- The Office of Business Operations.

These offices provide agency-wide policy development, strategic planning, clinical leadership, statewide delivery system technology tools to support care coordination, health system transformation support, and health system performance evaluation reports. Together these offices provide services and support focused on achieving health equity through the triple aim of better health, better care, and lower costs.

The Health Policy and Analytics Division is accountable for leading the next phase of health system transformation against the backdrop of COVID-19 and justified demands for addressing systemic racism by:

- Supporting and incentivizing payments for value, moving away from paying for service volume and incentivizing investments in better health for all communities.
- Supporting the Oregon Health Policy Board's work including its plans to operationalize OHA's Health Equity Definition and reimagine a health care system capable of achieving health equity.
- Focusing on social determinants of health in addition to medical care.
- Providing the clinical leadership to shape the management of high cost pharmaceuticals.
- Innovating and implementing integration across behavioral health, oral health, physical health and social services using health information technology.

Executive Summary

- Implementing legislative directives to align metrics and supporting new and innovative metrics for equity and social determinants of health.
- Facilitating multi-payer alignment to stabilize critical provider services and rebuild a health care system capable of achieving health equity.

Funding request

The Agency Request Budget of $194.2 million Total Funds continues funding for the Health Policy and Analytics Divisions at the current service level for 2021-23, with the exception of the Office of Health Information Technology (OHIT) which is reduced due to a Federal Funds revenue shortfall. This request includes policy package requests to continue OHIT programs at the current level, provide incentives to behavioral health providers to implement or improve their Electronic Health Records, and invests in policy development to achieve the triple aim of better health, better care, and lower costs.

Program descriptions

The division's **Director of Health Policy and Analytics** coordinates with the Governor's office, the Legislature, other state and federal agencies, partners and stakeholders, local governments, advocacy and client groups, and the private sector to achieve health equity and a stable healthcare system while remaining focused on the triple aim of better health, better care, and lower costs.

The **Office of Delivery Systems Innovation** (DSI) is designed to align and integrate clinical resources and policies to support implementation of the coordinated care model throughout all provider and payer organizations including OHA. The chief medical officer's focus is to direct and guide implementation of clinical services, so they support quality improvement outcomes and integrate delivery of behavioral, physical, and oral health care as well as pharmacy purchasing. This role includes oversight of the Transformation Center, Patient Centered Primary Care Home program, the Health Evidence Review Commission, and the Quality Council.

The **Office of Health Policy** provides policy analysis, development, and evaluation services to support the health system transformation work of the Oregon Health Policy Board and its Committees, OHA programs, and other stakeholders. The office

Executive Summary

provides technical assistance on topics such as primary care workforce development, resource leveraging, and grant development for health system transformation projects.

The **Office of Health Analytics** collects, stores, integrates and statistically analyzes utilization, quality, and financial data. It does this in order to:

- Evaluate OHA program performance.
- Provide data to support health system and program planning and implementation.
- Analyze trends across all payers and claims data.

The **Office of Health Information Technology** is responsible for providing coordination across programs, departments, and agencies in developing policies and procedures that:

- Accelerate state and federal health reform goals through organized support for adoption, implementation and integration of health information technologies.
- Leverage health IT funding opportunities from federal agencies, philanthropic organizations and the private sector to improve Oregon's health IT capacity.
- Increase collaboration and communication among state agencies and across programs for enhanced planning and shared decision making, leveraged IT purchases, and coordination of service delivery.

The **Public Employees' Benefit Board and the Oregon Educators Benefit Board** have made a priority of transforming the health care delivery system, advancing health care transformation with plans that coordinate care, and managing the cost of care. They accomplish this through offering value-added plans that provide high quality care and services, implementing measurable programs that support member health status improvement, encourage members to take responsibility for their own health outcomes, and capping annual per-member-per-month cost increases at 3.4 percent.

Both boards offer core benefit plans that include medical, dental, vision and life insurance. Additional benefits include short-term and long-term disability, flexible spending accounts, commuter savings accounts and supplemental life insurance.

Executive Summary

While operationally situated in HPA, PEBB and OEBB each have their own budgets and are not included in the HPA budget.

The **Office of Business Operations** is responsible for all of the division's operational functions. The office partners closely with various Shared Services offices and acts as a liaison to internal and external stakeholders related to operational functions. These operational functions include:

- Program contracts management.
- Program staffing.
- Program grants management.
- Operational and project budget management.
- Facilities management.
- Program policy and rulemaking management.
- Administrative and executive support.
- Program technical support.
- Project management.
- Risk management.

Program justification and link to long-term outcomes

All of the Health Policy programs directly support the long-term outcomes of Healthy People and Health Equity. Together, the offices help to establish the common vision, define the outcomes, measure fiscal accountability, measure the effects of investment in various health care strategies, and inform all aspects of Oregon's health care decision- and policy-making efforts. In essence, these offices recommend the policy direction, measure the results, and suggest strategies for improving all health-related outcomes. Recently, HPA has focused on monitoring and developing strategies around:

- Reducing per capita costs.
- Leveraging public purchasing power to drive value-based payments and coordinated care models
- Reducing the number of uninsured Oregonians.
- Improving specific health measures tracked by the CCOs.

Executive Summary

Program performance

These offices provide technical and subject matter expertise, analytic capacity, technical assistance, and the ability to secure funding and support of federal and national agency partners. They do not deliver program-specific services.

Enabling legislation/program authorization

Program authorization legislation and applicable federal and state mandates are listed by office in the Program Unit narratives.

Funding streams

Health Policy and Analytics is supported primarily by General Funds matched with Medicaid Administrative and Medicaid Health Information Technology Federal Funds. The match rates vary depending on the type of work being performed. The office also receives 100 percent Federal Funds from the Health Resources and Services Administration (HRSA) Primary Care Office grant, HRSA Oral Health Workforce grant, the Integrated Care for Kids (InCK) grant, and Center for Medicare & Medicaid Services (CMS) Health Information Technology Electronic Health Record funds. It receives Other Funds from fees (workforce, inpatient data, ambulatory surgical data, All Payer All Claim, J1 Visa, Oregon Prescription Drug Program) and the Health Care Incentive Fund.

Significant proposed program changes for 2021-23

LC 016, LC 017 – PLACEHOLDER: Employer Responsibility Program: Provides funding for greater access to health benefits for those who may be underinsured, uninsured or struggling to pay out-of-pocket costs, including priority populations traditionally underserved by the health care system.

LC 025 – VBP Adoption & Alignment: Supports the development and implementation of an Oregon VBP Roadmap--created via an OHA-led multi-stakeholder Advisory Committee--which will ensure increased adoption and alignment of VBP across the state Oregon's health delivery system and support provider sustainability, post-COVID.

LC 018 – Strengthen Purchasing Power of the Marketplace: Transfer the Marketplace from DCBS to OHA.

Executive Summary

LC 022 – Mergers and Acquisitions Review: PLACEHOLDER: The OHPB approved a framework for OHA to use when reviewing and approving mergers and acquisitions relating to CCOs. This expands that review to include review of proposed mergers and acquisitions across multiple books of business in the health care sector.

Office of Business Operations

Expenditures by fund type, positions and full-time equivalents

	General	Other/Lottery	Federal	Total Funds	Positions	FTE
Leg. Approved 2019-21	$2.28	$0.37	$1.96	$4.61	22	21.16
Agency Request 2021-23	$3.28	$0.41	$2.71	$6.40	28	27.41
Difference	$0.99	$0.04	$0.75	$1.79	6	6.25
Percent Change	44%	11%	38%	39%	27%	30%

Activities, programs and issues in the program unit base budget

The Office of Business Operations develops and maintains operational processes and procedures on behalf of the Health Policy and Analytics division. It acts as liaison with other parts of OHA, including business operations offices in other divisions, Central Services, the Director's Office, and the Shared Services offices.

HPA's business operations are organized into three program units: Contracts and Project Management; Budget, Grants Management and Technology Management; and Staffing and Administrative Support.

Contracts and Project Management:

- Manages the division's portfolio of contracts.
- Administers the process of contract initiation, amendments and renewal including the use of interagency agreements and memos of understanding.
- Manages the division's operational project portfolio and provides project management assistance to the division's programs.
- Manages the division's risk management function.

Office of Business Operations

Budget, Grants Management and Technology Management:

- Leads the initial biennial budget build and projections process for the division and each of its offices.
- Provides rebalance and reshoot budget tracking for the division budget.
- Builds and maintains active operating budgets for each program area in the division.
- Builds, monitors and maintains project budgets for the division's high-level projects.
- Provides all accounts payable and receivable services for the division.
- Supports the division's technology including SharePoint, Web development, deskside support, asset management, etc.
- Provides rule making and policy writing services for the division and tracks legislation during the legislative sessions.
- Provides grant maintenance services including documentation and version control, carry-over process, operational setup and maintenance, and closeout.

Staffing and Administrative Support:

- Manages the hiring process for the human resources in the division.
- Manages HR issues related to position management concerns.
- Establishes and maintains a workforce strategy, succession plan and training plan for the division aligning with the agency diversity recruitment policy.
- Provides administrative support to the division's programs and executive support for the directors of each office.
- Provides support for all the division programs' committees.
- Manages and supports all inter-office moves.
- Maintains the division's record keeping and archiving.

Background information

The Office of Business Operations has focused on consolidating, identifying, documenting and maintaining the division's operational processes. The office is identifying meaningful metrics for each process, benchmarking the current state of the

measures for those processes and setting goals for improvement. The focus will be incremental improvements using a maturity model and pinpointing the processes deemed to be of most importance by the collective input of the division.

As the Office of Business Operations provides the foundational operating process structure, the office's workload mirrors the demands of the division's programs. As the workloads of individual programs grow the demands of the operational support structure expand as well.

Revenue sources and changes

Funding streams in support of the Office of Business Operations are allocated through a federally approved cost allocation plan. A grant allocation module aggregates costs monthly, as outlined in the federally approved plan, to its respective state and federal funding sources.

Proposed new laws that apply to the program unit

None.

Health Policy and Delivery Systems Innovation

Activities, programs and issues in the program unit base budget

Health Policy Office

The Health Policy Office analyzes and develops policy options, facilitates stakeholder discussions, coordinates strategic and implementation planning efforts, and evaluates health services research and policy for the Governor's Office, the Legislature, the Oregon Health Policy Board (OHPB), OHA, and other participants in Oregon's health system transformation. These services help Oregon Health Authority identify opportunities, articulate program options, implement policy, and assess its progress toward achieving the triple aim. The Office of Health Policy serves three key functions:

1. Research, Analysis, and Policy Development

- Track emerging national and state health policy trends and issues, and their impacts in Oregon.
- Conduct research and analysis and develop policy.
- Provide senior-level policy advice to Health Policy and Analytics (HPA) and OHA leadership.
- Respond to priority incoming requests for research, analysis, presentations and talking points.

2. Coordination & Tracking

- Track and coordinate, when needed, policy development and implementation across HPA and OHA to ensure alignment with strategic direction.

- Coordinate and synthesize responses to proposed federal regulations and legislation, incorporating feedback from across HPA (and OHA when needed).
- Coordinate development of legislative concepts; coordinate analysis on priority legislation; and track and support implementation of legislation.
- Staff OHPB, coordinate committees of OHPB, and provide staff and policy leadership to OHPB committees to ensure committee work is connected to OHPB vision and direction.
- Help maintain consistent strategic direction and vision between OHPB, HPA, and OHA.

3. Partnerships

- Support external partnerships and engagement, including developing and giving presentations and staffing convenings of health care leaders and other partners and stakeholders.
- Develop presentations or policy documents that help HPA and OHA leaders inform the public, media, and stakeholders about health policy.
- Partner with analysts across HPA to help translate technical information into clear, concise summaries of trends and their meaning to the public and policy makers.

Additionally, the Health Policy Office houses the Oregon Integrated Care for Kids (InCK) model team, funded by the Centers for Medicare and Medicaid Innovation (CMMI). The InCK team supports activities of the demonstration model in a five county service area that aims to improve health outcomes, reduce out-of-home placements, and reduce costs associated with unnecessary ER visits and inpatient stays for children/youth age 0-21 who are eligible for Medicaid.

Office of Delivery Systems Innovation

In 2015, OHA shifted existing clinical staff, programs and resources into a new unit under the direction of the chief medical officer (CMO). The purpose of the Office of Delivery Systems Innovation was to better align medical management practices and coordinate clinical policies across coordinated care organizations (CCOs), the fee-for-service population, other plans and

payers, and all OHA departments. The goals of the CMO and the Office of Delivery System Innovation (formerly known as the Office of Clinical Services Improvement) are to:

- Integrate clinical policies and resources to support the coordinated care model.
- Align and coordinate strategies to improve health care delivery and systems throughout OHA.
- Pursue further integration of behavioral, physical and oral health care.
- Support innovation and quality improvement within Oregon's health system transformation efforts.
- Establish and maintain effective working relationships with Oregon's providers and health care delivery system representatives.
- Coordinate quality improvement and transformation efforts across OHA, PEBB- and OEBB-contracted plans, CCOs, and other entities involved in quality improvement.

One goal of the CMO and the Office of Delivery Systems Innovation is to focus the agency's clinical knowledge and expertise on achieving transformation, quality, and cost containment goals. The CMO directly supervises several existing positions in OHA that have historically reported through a variety of chains of command. These include the:

- Statewide dental director.
- Transformation Center director.
- Health Evidence Review Commission (HERC) director.
- Quality Improvement director.
- Oregon Prescription Drug Program and pharmacy purchasing director.

This unit also coordinates with the Public Health and Health Systems divisions to align OHA's clinical policies and program strategies. This involves working with the behavioral health director, the Medicaid medical director, and the state health officer and epidemiologist. The unit also coordinates with the OHA Equity and Inclusion division to better integrate health equity strategy and practice into its work.

Background information

The CMO oversees the HERC. Among other responsibilities, the HERC:

- Conducts research into comparative effectiveness and benefit design to inform public and private sector transformation efforts.
- Performs medical technology reviews.
- Develops clinical and coverage guidelines based on clinical evidence.
- Maintains the Oregon Health Plan's Prioritized List of Health Services.
- Disseminates information on the clinical- and cost-effectiveness of medical treatments and technologies.

A key strategy for the Office of Delivery System Innovation is applying HERC research to policy development, implementation, and evaluation for OHA, the CCOs, and PEBB- and OEBB-contracted plans.

The Office of Delivery System Innovation also sponsors performance improvement projects overseen by the Quality Improvement Director and oversees the Transformation Center to coordinate and support health system transformation and quality improvement across Oregon's health system. The Transformation Center shares key health care trends to share with our partner agencies, the Department of Human Services, the Department of Consumer and Business Services Insurance Division, the Governor's Office, and the Legislature.

The Transformation Center identifies, supports and shares innovation at the system, community and practice levels. It does this by identifying and disseminating evidence-based and emerging best practices with CCOs and other health system partners through technical assistance, learning collaboratives and other convenings. The Transformation Center also includes the Patient-centered Primary Care Home Program.

In addition, the CMO oversees the Pharmacy and Therapeutics committee and Oregon Prescription Drug Program. The Office of Delivery System Innovation pharmacy role also includes evaluating and monitoring pharmacy benefits across Medicaid

populations covered via CCOs and traditional fee-for-service. The office also leads development of strategies for fiscally sustainable administration of pharmacy benefits, including multi-state consortia and multi-agency collaboration.

The CMO also oversees the work of the statewide dental director, focusing on innovations for improving oral health outcomes, including dental pilot projects and oral health integration. The dental program is coordinated across the Public Health, Health Systems, and Health Policy and Analytics divisions.

Enabling Legislation

The Office of Delivery System Innovation supports the following state mandates:

- Health Evidence Review Commission (ORS 414.688-704)
- Pain Management Commission (ORS 413.570-599)
- Palliative Care and Quality of Life Interdisciplinary Advisory Council (ORS 413.270-273)
- Patient-Centered Primary Care Home Program (ORS 442.210, 414.655) and 414.655 adds CCOs under PCPCH program
- Oregon Prescription Drug Program (ORS 414.312, 414.314, 414.318, and 414.320)
- Pharmacy and Therapeutics Committee (ORS 414.351 to 414.414)
- Mental Health Clinical Advisory Committee (ORS 414.337)
- Office of the Statewide Dental Director (ORS 413.083)

Revenue sources and changes

Health Policy and Delivery Systems Innovation leverage Medicaid administrative match for eligible programs and activities including Medicaid-related health system transformation, the Medicaid Advisory Committee, research and evaluation, and staffing. The office receives Federal Funds from the Health Resources and Services Administration (HRSA) Primary Care grant, HRSA Oral Health Workforce grant and the Integrated Care for Kids (InCK) cooperative agreement. The Other Funds include a fee-supported programs for the Conrad J-1 Visa Program (ORS 409.745) and the Health Care Provider Incentive Fund

established January 2018 (House Bill 3396; ORS 676.450 and House Bill 3261). OPDP generates nominal revenue from the discount card program which is collected and purposed according to ORS 414.314 & 414.318.

Proposed new laws that apply to the program unit

LC 025 – Statewide VBP Adoption, Alignment and Infrastructure: Supports the development and implementation of an Oregon VBP Roadmap--created via an OHA-led multi-stakeholder Advisory Committee--which will ensure increased adoption and alignment of VBP across the state Oregon's health delivery system and support provider sustainability, post-COVID.

LC 023 – Pharmacy Omnibus: PLACEHOLDER: 1) State prior-authorization authority. 2) Authority to pursue the best approach to managing pharmacy benefit. 3) Resources and authority to expand OHAs role to a multi-agency pharmacy

LC 020, LC 021 – Public Option/Medicaid Buy-in: PLACEHOLDER: Senate Bill 770 (2019) requires OHA to develop a proposal for a Medicaid buy-in/public option program.

Office of Health Information Technology

Expenditures by fund type, positions and full-time equivalents

	General	Other/Lottery	Federal	Total Funds	Positions	FTE
Leg. Approved 2019-21	$3.58	$0.00	$88.80	$92.38	34	29.95
Agency Request 2021-23	$9.30	$0.00	$32.59	$41.89	26	24.72
Difference	$5.73	$0.00	-$56.21	-$50.49	-8	-5.23
Percent Change	160%	N/A	-63%	-55%	-24%	-17%

The Agency Request Budget for the 2021-23 for the Office of Health Information Technology includes the following policy packages:

- **Policy package #424: HIT Programs Support** - $15.5 million Total Funds ($3.5 million General Fund), 8.13 FTE. This policy package supports General Fund needed due to shift in federal funding match to continue existing, established health IT programs and it reinstates current positions that would otherwise be eliminated. There is no new work proposed in this policy package.
- **Policy package #410: Behavioral Health Electronic Health Record Incentive Program** - $5.5 million Total Funds (~$2.2 million General Fund), 1.00 FTE. By creating a Behavioral Health EHR Incentive Program, this policy package would promote a more connected behavioral health system and allow behavioral health providers to catch up to their physical health peers in terms of health information technology (HIT).
- **Policy package #202: Statewide Community Information Exchange** - $6.2 million Total Funds (~$620k General Fund), 6.00 FTE. This policy package supports a Statewide Community Information Exchange (CIE) that will electronically connect health care and social services to support Oregon Health Plan and DHS clients in need.

Activities, programs and issues in the program unit base budget

To be effective, Oregon's transformed health care system increasingly relies on access to patient information and the HIT infrastructure to share and analyze data. HIT affects nearly every aspect of coordinated care including care transitions and management; population health management; integration of physical, behavioral, and oral health; accountability, quality improvement and metrics; value-based payment methodologies; and patient engagement. Health IT tools are needed to share information, aggregate data effectively, and provide patients with tools and data.

The Office of Health Information Technology (OHIT) develops and supports effective health information technology (IT) policies, programs and partnerships that enable improved health for all Oregonians.

- Health IT is computerized storage, retrieval and sharing of clinical health information and data. A good example is electronic health records (EHRs) used by hospitals and health care providers.
- Health information exchange (HIE) is the electronic sharing of health information among health care providers, patients, or other users of health IT systems. This can include finding (query); sharing (send) and exchanging (receive) patient information. Health information exchange may also sometimes refer to an organization that provides HIE technology services.

OHIT is working with Oregon's health care community to improve health and support health system transformation efforts by supporting policies, programs, and public/private partnerships that bring tools for securely sharing patient information across providers, health plans and individuals. These tools and programs provide critical infrastructure to make care more efficient and effective and are even more critical as Oregon faces the COVID-19 pandemic as well as focuses sharp attention on health equity.

- In particular, health IT infrastructure is needed to connect systems, increase efficiencies, fill gaps in the data and infrastructure needed to support coordination in real time across hospitals, providers, CCOs, and health plans.
- Health IT can also connect health care stakeholders to social service providers that can help vulnerable Oregonians when they need safety net programs and other supports to manage quarantine or self-isolation safely.

Office of Health Information Technology

- Health IT is a critical component of OHA's efforts to end health inequities across the state.

OHIT's core technology programs will be eliminated or reduced without continuation funding under policy package #424, which supports additional General Fund needed as federal funding sources shift from 90/10 to 75/25 match for these programs. Policy package #424 includes no new work and reinstates 8.00 FTE and continues one limited duration position for 3 months in 2021-23.

OHA is statutorily required to staff the Health IT Oversight Council (HITOC) and operate the Oregon HIT Program, which includes health IT services and other supports needed to ensure our health system transformation efforts are successful. OHA's programs are rooted in stakeholder support and partnership, including with the Oregon Health Leadership Council (OHLC), Oregon Association of Hospitals and Health Systems (OAHHS), Oregon Medical Association (OMA), Oregon Primary Care Association (OPCA), Office of Rural Health, Association of Community Mental Health Programs (AOCMHP), and many others. HITOC and OHA's health IT programs have:

- **Created statewide health IT vision and goals, health IT strategic and operational plans, environmental scans, and policy recommendations,** under HITOC and its workgroups and committees. HITOC reports regularly to the Oregon Health Policy Board and oversees the Oregon HIT Program. A 2019 HITOC Data Report[1] provided comprehensive information on EHR and HIE adoption and use in Oregon and support for HITOC's upcoming work to update the 5-year Oregon Health IT Strategic Plan. HITOC charters a Behavioral Health HIT Workgroup and a Health IT/HIE Panel and is focusing on strategic planning to support social determinants of health and using health IT to support OHA's goal of health equity.
- **Supported strong adoption of high functioning electronic health record systems since 2011**, bringing more than $200 million in federal incentives to 60 Oregon hospitals and more than 3,800 Oregon providers. In the 2019-21 biennium, more than half of OHIT's budget was Federal Funds to incentive payments under Oregon's Medicaid Electronic Health

[1] HITOC 2019 Data Report: https://www.oregon.gov/oha/HPA/OHIT-HITOC/Documents/2019HITReport_HIEOverview_TwoWorlds_Combined.pdf

Record (EHR) Incentive Program. These funds cover 100 percent of incentives paid to Oregon providers and hospitals that adopt and use certified electronic health records in a meaningful way. The program sunsets at the end of 2021. *Policy package #410 would provide EHR incentives for Oregon's behavioral health providers who have largely been excluded from the federal Medicaid EHR Incentive Program which has been geared to hospitals, physicians and dentists.*

- **Established nimble public/private partnership to accelerate health IT use** – through Oregon's HIT Commons, jointly funded by OHA, all Oregon hospitals, major health plans and CCOs, and co-sponsored by OHA and the Oregon Health Leadership Council. HIT Commons supports critical health IT initiatives and has the ability to target efforts and bring key stakeholders to the table, including recent work mobilizing support for COVID-19 response efforts. Current efforts have:
    - **Connected real-time hospital data across hundreds of organizations** – Oregon's Emergency Department Information Exchange (EDie)/PreManage (aka Collective Platform) is now used by all hospitals, CCOs, major health plans, 68 percent of Oregon's Patient-Centered Primary Care Home clinics, 30 percent of licensed behavioral health agencies, half of Oregon's Skilled Nursing Facilities, and many others, including OHA and DHS programs. This program provides real-time alerts about hospitalizations and emergency department use so that care can be coordinated and individuals receive appropriate care and follow up.
    - **Reduced emergency department visits for high utilizers -** Broad use of EDie/PreManage across Oregon has led to some astounding results. Emergency Department visits by high utilizers decreased by 34 percent in the 90 days following the initial creation of a care guideline in EDie/PreManage. This program allows everyone working with a patient to know when they have been in the ED or hospital, and coordinate their care across their primary care, CCO, behavioral health team, and hospital.
    - **Helped reduce risky prescribing of opiates** – by connecting Oregon prescribers to data on controlled substance prescriptions, through their EHR. The Prescription Drug Monitoring Program (PDMP) Integration initiative has been an important factor in sustained reduction of risky opioid prescribing patterns, including prescribing of high quantities or multiple types of controlled substances.[2] Integration of PDMP access into the prescriber's EHR

[2] HITOC 2019 Data Report, page 27
https://www.oregon.gov/oha/HPA/OHIT-HITOC/Documents/2019HITReport_HIEOverview_TwoWorlds_Combined.pdf

removes the need to remember passwords and log into the PDMP portal. More than 20,000 prescribers at more than 150 organizations (health systems, clinics) and more than 350 pharmacies in Oregon now benefit from "one-click" access to controlled substance prescription data in Oregon's PDMP.

- **Connected health care and social services to address social determinants of health** - Include assessing the Oregon landscape and roadmap planning for statewide Oregon Community Information Exchange (CIE), in partnership with OHA and other stakeholders. CIEs support connecting social service organizations and health care providers to access an electronic directory and facilitate closed-loop referrals to services that address the social determinants of health needs. *OHA's policy package #202 would support statewide infrastructure needed to connect across CIEs in communities and bring these important tools to OHA and DHS users.*

- **Tackled administrative burden and supported Oregonians' need for accurate provider data** - Oregon's Provider Directory includes more than 20,000 organization records and 100,000 provider records and includes more than 17,500 HIE addresses from across more than 895 unique health care organizations (primary care, hospital, behavioral health, dentistry, FQHC, etc.). Health plans and clinics struggle to share and update provider information, causing significant burden related to managing provider data. Oregonians are often frustrated when they learn that the provider they want to see is no longer on their health plan, or find that important information about that provider (including cultural competency, languages spoken) is missing. The Provider Directory provides one central place for reporting and identifying erroneous or missing data, and supports CCOs health plans, providers, state programs, and others.
- **Supported the quality and accountability for Oregon's Medicaid program** - by providing a tool, the Clinical Quality Metrics Registry, to collect quality metrics from primary care providers that cover roughly 744,000 Oregon's Medicaid members (about 75 percent). Under Oregon's CCO quality incentive program, CCOs are financially incentivized to work with providers to implement quality improvement initiatives or new interventions for their Medicaid members to improve clinical outcomes. Clinical metrics from EHRs are uniquely able to reflect clinical outcomes for Medicaid members, such as metrics showing whether diabetic members are keeping their blood sugar under control.
- **Connected Medicaid providers to their local community-based health information exchange**. OHA's HIE Onboarding Program leverages 90 percent federal matching funds to support the one-time costs of connecting to Reliance

eHealth Collaborative's community based HIE. About half of Oregon's CCOs participate in Reliance, and federal funds available through September 2021.

- **Clarified complex requirements related to behavioral health information sharing** with the Confidentiality and Privacy Toolkit in response to a recognized need for more information around when and with whom providers can share information about their patients to facilitate care. The toolkit has sample consent form templates, FAQs, links to further information, and some examples of use cases for information sharing. As of June 2020, the draft Toolkit is in final stages of review and the final version will be promoted and available on OHA's website after fall 2020.

Background information

In 2009, the legislature established HITOC and soon after, OHA established the Office of Health Information Technology to support HITOC and health IT policy work and leverage new federal funding to bring health IT infrastructure to Oregon. Major milestones include:

- 2009: Federal HITECH Act passes, creating several programs including: federal EHR incentive programs, state HIE cooperative agreements (ended in 2014), and 90/10 match for state health IT efforts to support HITECH incentive program objectives.
- 2010: **HITOC** establishes the State HIT Strategic and Operational plans as required for federal HITECH funding.
- 2011: Launch of federal EHR incentive programs (either Medicare or Medicaid). As of June 2020, more than $535 million in federal Medicare and Medicaid incentive payments have been disbursed to all Oregon hospitals and nearly 8,500 Oregon providers. Included in that total, **Oregon's Medicaid EHR Incentive Program** has disbursed more than $208 million to eligible hospitals and health care providers.
- 2013: All CCOs agreed that OHA should leverage $3 million Transformation Fund (General Fund) investment to draw down 90/10 federal match and implement several statewide health IT programs/services, including: Oregon Provider Directory, Clinical Quality Metrics Registry, health information exchange including EDie/PreManage, and EHR/HIE technical assistance for Medicaid providers (through the **Oregon Medicaid Meaningful Use Technical Assistance Program (OMMUTAP)** that concluded in May 2019).

- 2014: OHA partners with the Oregon Health Leadership Council to establish the **Emergency Department Information Exchange (EDie) Utility**, a public/private partnership. The EDie Utility officially launches in 2015, with financial support by OHA, all Oregon hospitals, and all major health plans.
- 2015: OHA establishes the **Oregon HIT Program** mandated by House Bill 2294 (2015) to connect and support community and organizational HIT efforts where they exist, fill gaps where these efforts do not exist, and ensure all providers on a care team have the means to participate in basic sharing of information needed to coordinate care.
    - Currently, the Oregon HIT Program includes the programs described in this narrative – the Medicaid EHR Incentive Program, HIT Commons, EDie/PreManage, PDMP Integration initiative, Oregon Provider Directory, Clinical Quality Metrics Registry, HIE Onboarding Program. Past programs include OMMUTAP and CareAccord, a HIPAA-compliant Direct secure messaging service.
- 2017: HITOC updated its Strategic Plan for HIT/HIE[3], with approval from the Oregon Health Policy Board. The updated plan includes strategies to achieve statewide health information sharing, leveraging existing regional, statewide and national HIE networks. HITOC is scheduled to update the Strategic Plan again in 2021.
- 2018: OHA and the Oregon Health Leadership Council transition the EDie Utility to a broader public/private partnership, the **HIT Commons**, to provide long-term sustainability for statewide HIT efforts. The HIT Commons governs two initiatives:
    - **EDie/PreManage (aka Collective Platform):** EDie connects all Oregon hospitals and provides emergency rooms with critical, concise information about patients who are high utilizers of emergency department (ED) services and patients with complex care needs. PreManage, a companion service to EDie, brings real-time hospital event notifications from EDie to participating CCOs, health plans, providers, and OHA/DHS programs who subscribe to receive real-time information when their patient, member, or client has a hospital event in any hospital in Oregon or Washington.

[3] https://www.oregon.gov/oha/HPA/OHIT-HITOC/Documents/OHA%209920%20Health%20IT%20Final.pdf

- All of Oregon's eligible hospitals have made their ED and inpatient data available in EDie, adding Oregon's data to the data from Washington and other states. In 2019, Oregon's Skilled Nursing Facilities (SNFs) were able to join EDie, and today about half of SNFs in Oregon participate.
- Today, all CCOs and major health plans are subscribed to PreManage, most of whom extend this service to their key contracted physical, behavioral and oral health clinics. Today, 68 percent of Oregon's Patient-Centered Primary Care Home clinics, 30 percent of licensed behavioral health agencies, and four of nine Tribes' tribal clinics participate, as well as all of Oregon's Dental Care Organizations.
- OHA supports the **Medicaid PreManage program**, which supports CCOs, Tribal clinics, OHA/DHS programs and others. OHA/DHS programs also use PreManage – including Medicaid and behavioral health staff coordinating care, Oregon State Hospital teams, DHS long-term services and supports program staff including all Type B Area Agency on Aging and Aging & People with Disability District offices, and DHS Intellectual & Developmental Disability program staff and contractors.

- **The Oregon PDMP Integration Initiative,** launched in 2018, provides all Oregon prescribers, pharmacists and their eligible delegates electronic access to PDMP data within their workflows, to better inform prescribing of controlled substances including opioids.
- **Statewide Community Information Exchange**: Oregon communities are leading the way to addressing social determinants of health through new Community Information Exchanges (CIEs), which connect CCOs, health plans, hospitals and health care providers to social services. These technology platforms provide social service resource directories, closed loop referrals to social services, and data and analytics capabilities that have unprecedented ability to support vulnerable populations and help target local and statewide investments.
  - HIT Commons works to plan and coordinate CIEs across the state and bring critical data and infrastructure to connect health care and culturally specific social service agencies across Oregon's communities.
  - The Oregon Provider Directory is poised to support a centralized, statewide resource directory of social services providers, programs, and agencies – removing the burden of constantly managing and updating individual directories and supporting statewide users like 211info.

    - *OHA's policy package #202 would support statewide infrastructure needed to connect across CIEs in communities and bring these important tools to OHA and DHS users.*
- 2019: CCO 2.0 Contracts include more specific health IT requirements to ensure CCO support of physical, behavioral, and oral health providers' health IT needs in four areas: EHR adoption, HIE for care coordination, hospital event notifications (e.g., through EDie/PreManage), and health IT to support value-based payments. All CCOs have OHA-approved HIT Roadmaps and will report annually on progress metrics and Roadmap updates.
- 2019: OHA launched the **HIE Onboarding Program** aims to increase Medicaid providers' capability to exchange health information. This program supports the costs to onboard high-priority physical, behavioral, and oral health Medicaid providers, and their major trading partners, to Reliance eHealth Collaborative, a community-based HIE. As of June 2020, seven CCOs are participating in bringing this program to their clinics. Federal funding for this program ends in 2021.
- 2019: OHA launched the **Oregon Provider Directory (OPD)** collects data on providers (e.g., provider specialties, practice location, contact information, affiliations, etc.) to be shared with health care and OHA/DHS stakeholders to advance operational efficiencies, care coordination and health information exchange, and analytics, population management, and accountability efforts. Oregon's Provider Directory includes more than 20,000 organization records and 100,000 provider records and is in process of rolling out statewide in support of initial use cases. The OPD provides an interoperable, statewide infrastructure needed for:
    - Efficient collection of provider data: Efficient reporting of and access to provider data needed by state programs, CCOs/payers, health information exchanges and other technology partners, provider groups, and research/analytics organizations. OPD supports administrative and operational efficiencies for state programs that require provider data, including Medicaid (e.g., collecting CCO and contractor provider network files), behavioral health, public health, and other programs.
    - Administrative efficiencies and operations: The OPD improves administrative and operational processes for providers, CCO and health plans to maintain accurate health plan/CCO provider network rosters. Health plans and CCOs face significant challenges and costs managing provider network directories that display which providers are covered by their health plan products. In response to inaccurate provider directories, Medicare Advantage plans face significant penalties from CMS for having outdated information in their public provider network directories.

OPD provides relief for clinics that face significant burden for reporting their current provider rosters to multiple health plans in many formats and many siloed systems. The OPD serves a centralized hub – where clinics can update once and meet the needs of their contracted health plans.

- Accurate data for consumer-facing directories: OPD supports consumers/Oregonians seeking accurate information from CCOs and health plans on providers in network, a critical component of selecting an appropriate health plan or CCO. While the OPD is not anticipated to be public facing at this time, it serves as an efficient source of truth for CCOs and health plans to verify their network directory data, ensuring the data patients are depending on for care are reliable.
- Care coordination and health information exchange: Providers frequently need to share health information with another provider outside their organization but lack updated contact information and electronic addresses for each other. The OPD program provides a monthly, centralized listing for electronic addresses (e.g., Direct Secure messaging addresses) that are used to exchange patient information, like care summaries and lab results and basic contact information to coordinate care. Before the OPD, there was no single source for electronic addresses – clinics had to maintain contact lists, spreadsheets, or sticky notes to connect with each other – making it difficult to coordinate care.
- Demographic information about providers: OPD helps identify culturally appropriate care by providing data on providers' race/ethnicity/language characteristics, cultural competency, gender, as well as information about specialty focus areas (like expertise working with specific populations) and information about facility accommodations for physical disabilities.
- Quality, analytics, and research information about providers: Supporting quality improvement, research and analytics work, cost growth target, evaluation of CCO 2.0, and other health policy initiatives by aggregating data from multiple sources, providing matching identifiers, and managing provider affiliations, specialties, and other key data that allow for claims and clinical metric data analysis, generating quality dashboards, and evaluating the effectiveness of health care policies.
- Addressing social determinants of health and support COVID response: OPD is poised to provide a common social services resource directory needed for an effective statewide Community Information Exchange, as well as critical

support for 211info's resource directory to ensure Oregon can address social determinants of health, deliver on health system transformation, and connect individuals to social services (e.g., food pantries) and other resources in response to COVID.

- 2019: OHA launched the **Clinical Quality Metrics Registry (CQMR)** collects robust electronic clinical quality metrics data for Oregon's Medicaid program and value-based payment under CMS, CCOs, and commercial health plans in Oregon. CQMR also supports reporting for federal health IT and quality programs including the Medicaid EHR Incentive Program (federally funded but operated by OHA) and CMS Medicare programs such as the Merit-based Incentive Payment System (MIPS) and the Comprehensive Primary Care Plus (CPC+) program. Oregon's approach to support aligned value-based payment across payers increasingly relies on clinical metrics to assess patient outcomes and monitor quality without the lag involved with claims or administrative data. The CQMR provides the statewide infrastructure needed for:
    - Ensuring quality in the Medicaid program through Oregon's Medicaid CCO quality incentives, as required under Oregon's Medicaid 1115 waiver with CMS and a critical component of Oregon's health system transformation efforts. By tying CCO quality incentive dollars to performance, CCOs are incentivized to work with providers to implement quality improvement initiatives or new interventions for their Medicaid members to improve clinical outcomes. CCO quality metrics increasingly include clinical metrics as determined by the Metrics and Scoring Committee and the Health Plan Quality Metrics Committee.
        - Clinical metrics from electronic health record systems (EHRs) are uniquely able to reflect clinical outcomes for individuals. This spring, CCOs used the CQMR to report on clinical quality metrics from primary care providers that cover roughly 744,000 Oregon Medicaid members (about 75 percent of all Medicaid members).[4]
    - Aligned reporting, administrative efficiencies and reduced burden for providers in reporting clinical metrics to OHA, CMS, CCOs and other payers. The CQMR is foundational for Oregon's aligned reporting and decreased

[4] The CCO Clinical Metrics for 2019 include: Diabetes HbA1c poor control – ensuring diabetic members are keeping their blood sugar under control; Controlling high blood pressure; Depression screening and follow-up; Weight assessment and counseling for children and adolescents; Smoking prevalence; and Drug and alcohol screening (SBIRT).

provider reporting burdens. Oregon providers are increasingly expected to report clinical metrics to payers, creating significant duplication and burden alleviated by centralized reporting through the CQMR. This emphasis on clinical metrics is only expected to grow in the future.

- Managing value-based payment arrangements between CCOs, health plans, or other payer contracts with clinics that seek to change payment incentives to reward managing populations and achieving clinical outcomes. Clinics increasingly need to manage to clinical metrics within these arrangements and leverage population management tools that identify patients at risk for poor health outcomes and assess the effectiveness of interventions, as well as identify and track health disparities.
- Quality improvement and analytics work including clinical metric data analysis, connecting patient-level clinical outcome data to other utilization data, generating quality dashboards, and evaluating the effectiveness of health care policies.
- Insights into disparities and progress on health equity. Clinical metrics data at the patient-level can provide insights into the health outcomes and quality of care received for populations facing inequities.

Revenue sources and changes

Since 2009, OHA's health IT efforts have been almost exclusively funded by federal 90/10 Medicaid match, under the HITECH Act,[5] as well as some funding from Medicaid Enterprise Systems (MES) federal (formerly MMIS) matching dollars, and state general fund. More than half of OHIT's 19-21 budget is federal funding through the HITECH Act to provide incentive payments to Oregon hospitals and providers under Oregon's Medicaid EHR Incentive Program. Incentive payments are 100 percent federally funded. In 2021-23, the Medicaid EHR Incentive Program will end, with all federal incentive payments disbursed by the end of 2021.

[5] The Health Information Technology for Economic and Clinical Health (HITECH) Act, enacted as part of the American Recovery and Reinvestment Act of 2009, was signed into law on February 17, 2009, to promote the adoption and meaningful use of health information technology.

Unfortunately, federal 90/10 health IT funding is sunsetting for all states in 2021 (HITECH state funding is attached to the Medicaid EHR Incentive Program). OHA's work is poised to transition to ongoing 75/25 MES federal match (with some staff transitioning to 50/50 or 39/61 match). Federal match rates depend on several factors, including whether the money is spent on planning, implementation or operations. This means that for every state dollar invested, between five and nine federal matching dollars are drawn into the Oregon economy.

Reducing the federal match rate requires additional state funding. Some of this transition cost can be accommodated by reducing scope and focusing on only the most essential work. However, critical health IT programs and staff will be eliminated without additional General Fund to sustain these existing programs and the significant time and resources invested in them. *Policy package #424 requests the General Fund needed to transition existing work and reinstating 8.13 FTE needed for this work. Without this funding, OHA will eliminate the Oregon Provider Directory, Clinical Quality Metrics Registry, and reduce funding for the HIT Commons and Medicaid PreManage programs.*

Enabling Legislation

In the 2009 regular session, House Bill 2009 established the HIT Oversight Council (HITOC), which coordinates Oregon's public and private statewide efforts in EHR adoption, health IT and HIE. Since its creation, HITOC has created strategic and operational plans for achieving statewide electronic HIE and other health IT needed to support Oregon's health system transformation objectives. In the same session, House Bill 3650, defined health care transformation in Oregon. It included significant HIT requirements, including that CCOs use HIT for care coordination. It also requires OHA ensure the appropriate use of electronic health information by CCOs to improve health and health care.

In the 2013 regular session, Senate Bill 604 required OHA establish a common credentialing database and program as well as establish fees for the sustainability of the program. The program is intended to provide a common credentialing solution to streamline the process of applying for and maintaining credentialing information for Oregon practitioners. Today practitioners must complete credentialing applications and provide supporting documentation for each credentialing organization. Senate Bill 594 (2015) updated that legislation by allowing OHA to establish the program start date by rule. In July 2018, OHA made the

difficult decision to suspend the implementation of the program, after consultation with stakeholders and legislators. *In 2021, OHA anticipates housekeeping legislation will remove the remaining statutory language related to this program.*

In 2015, Oregon passed legislation to align health IT efforts with health system transformation goals, formalize and support OHA's health IT efforts, and improve OHA's ability to advance the necessary health IT to support CCOs and the spread of the coordinated care model. House Bill 2294 (2015) updated the original HITOC components of House Bill 2009 (2009) to account for changes since 2009. It has three major components:

- Established the Oregon HIT Program within OHA, allowing the agency to offer services beyond Medicaid to the private sector. Participation is voluntary and OHA may charge user fees for such services to cover costs and ensure sustainability.
- Provided OHA greater flexibility in working with stakeholders and partners. It allows OHA to enter into partnerships or collaboratives when other entities in Oregon are establishing statewide health IT infrastructure tools.
- Moved HITOC under the Oregon Health Policy Board to ensure statewide health IT efforts align with and support health system transformation.

Proposed new laws that apply to the program unit

None.

Activities, programs and issues in the program unit base budget

The Office of Health Analytics coordinates and produces financial, quality, and performance data about Oregon's health care system, and analyzes these data for the Oregon Health Authority (OHA) and the Oregon Health Policy Board (OHPB). The office supports OHA's and OHPB's management and budget decisions and evaluates the impact of those decisions.

The office collects and analyzes data on the performance of Oregon's health care system to support and inform sound policy development and decision making. Examples include hospital utilization, costs and financial data; licensed health care workforce; insurance coverage; and administrative health insurance claims through the All Payer All Claims (APAC) database and the Medicaid Management Information System (MMIS). The office also collects and analyzes OHA program performance data, including behavioral health services evaluation and Coordinated Care Organization (CCO) incentive metrics.

Office of Health Analytics

The Office of Health Analytics is organized into four complementary work units. HA staff and contractors work together to accomplish the following:

The Behavioral Health Analytics Unit collects, analyzes and reports behavioral health data to other OHA programs through:

- Analysis and reporting for the Metrics Unit.
- Analysis, reporting and development of dashboards for Health Services Division, Behavioral Health Office and Medicaid Assistance Programs.
- Extraction and submission of client-level treatment episode data (TEDS) for the Substance Abuse and Mental Health Services Administrations' Behavioral Health Services Information System (BHSIS).
- Data extractions and summarized analyses for external research and evaluations.

The Medicaid Analytics and Data Integration Unit collects, analyzes and reports Medicaid operations data to other OHA programs, and provides technology, system and infrastructure support for the Office of Health Analytics through:

- Analysis and reporting for the Metrics Program.
- Analysis, reporting and development of dashboards for Health Services Division, Medicaid Office.
- Data governance, privacy and security.
- Data request tracking and data access requests.
- Cross-agency data strategy, integration and coordination.
- Data systems and infrastructure – data warehousing, server management, data documentation and business intelligence.

The Metrics Unit facilitates implementation and evaluation of the quality metrics program and publishes results through:

- Evaluation of Coordinated Care Organization performance using the CCO incentive metrics, state quality metrics and CMS Core metrics.

- Program evaluations, including the Oregon Health Plan Medicaid demonstration waiver.
- Consumer surveys, including the Consumer Assessment of Health Providers and Systems Survey (CAHPS) of Medicaid members, the Mental Health Services Improvement Program (MHSIP) surveys for adults and children receiving mental health services, and the Oregon Health Insurance Survey (OHIS) conducted among all people living in Oregon.
- Metrics development to track the most innovative aspects of the health care transformation, including social determinants of health and health equity.

The Research and Data Unit supplies data and analytics services to state government and external partners through:

- Maintenance of Oregon's APAC database – collecting, compiling, releasing to approved users and reporting claims and administrative data.
- Collection, analysis, reporting and development of dashboards of health care workforce data from licensees of 17 health care licensing boards.
- Collection, analysis, reporting and development of dashboards of hospital inpatient, outpatient data and emergency department data; hospital financial data; and other critical hospital information.

Background information

The Office of Health Analytics provides reports and recommendations so that OHA leadership, the Governor, and the Legislature can better understand and improve the performance of OHA programs and the quality of Oregon's health system. Health Analytics:

- Collects and analyzes data to inform policy development, program implementation, and system evaluation.
- Collaborates with professional researchers to develop a body of knowledge that can be used to help lower and contain costs, improve quality, and increase access to health care to improve the lifelong health of Oregonians.
- Provides important information that individuals can use to help inform their care decisions.

Office of Health Analytics

Health Analytics' primary roles are:

- To develop analyses, data strategies, and monitoring tools to assess the performance Oregon's health care systems.
- To support OHA policy development, implementation, and evaluation.

Revenue sources and changes

The Office of Health Analytics leverages Medicaid administrative match for eligible programs and activities, including Medicaid-related health system transformation, research and evaluation, and staffing.

Several programs within Health Analytics, including the health care workforce reporting program, hospital reporting program, APAC and TEDS BHSIS data submissions receive some other funds.

Proposed new laws that apply to the program unit

Oregon Health Authority

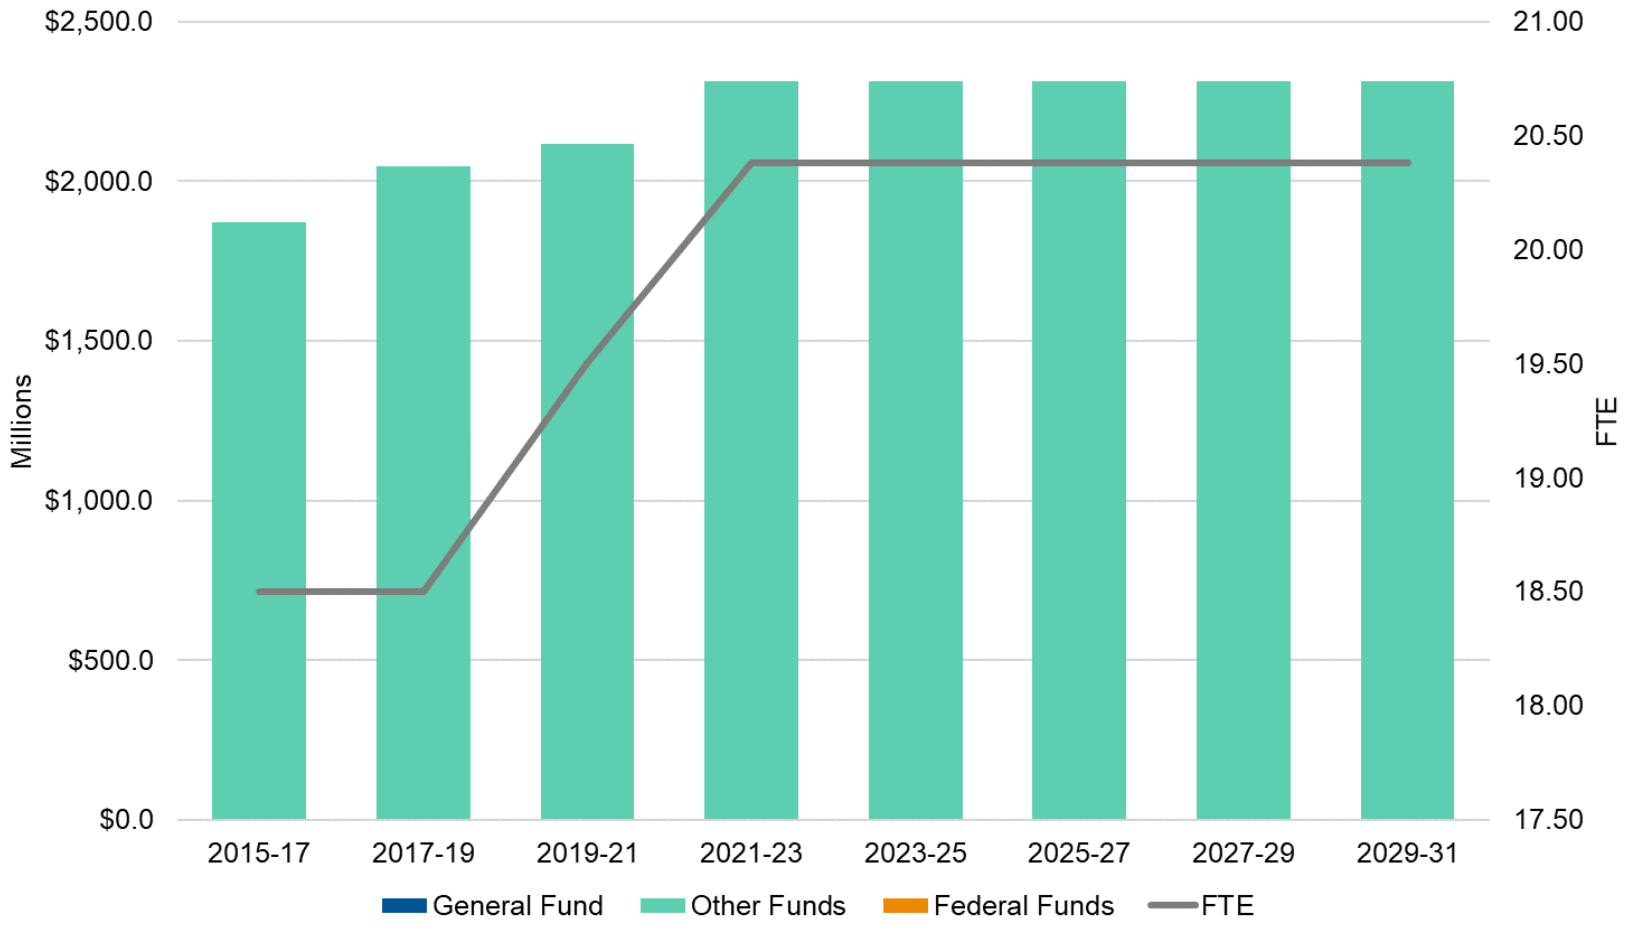
Oregon Health Authority: Public Employees' Benefit Board

Executive Summary

Program Contact: Ali Hassoun, Director
503-378-2798



Executive Summary

Division overview

The Public Employees' Benefit Board (PEBB) is a division of the Oregon Health Authority (OHA). PEBB supports the goals of transforming the health care system in Oregon and fundamentally improving how care is paid for and delivered. PEBB's mission is to provide high-quality health plans and other benefits for state employees at a cost that is affordable to both the employees and the state.

Funding request

The 2019-21 PEBB Agency Request Budget includes the Stabilization Fund budget for expenditures related to PEBB's self-insured and fully insured plans as well as PEBB's operating budget. The request also includes a policy package to fund PEBB's portion of the cost to replace both the PEBB and OEBB benefits management systems. All PEBB expenditures are categorized as Other Funds Limited. PEBB's Stabilization Fund budget expenditure growth is capped at 3.4 percent annually by the Legislature on a per-employee-per-month (PEPM) basis. The 2019-21 Agency Request Budget is built on a PEPM basis.

Program descriptions

PEBB designs, contracts for and administers medical, dental, vision, life, disability, and accidental death and dismemberment plans and flexible spending accounts for PEBB members. More than 140,000 members are enrolled in PEBB coverage. They include active employees, retirees, spouse and domestic partner dependents, child dependents up to age 26, and adult children with disabilities over age 26. They are drawn from state agencies, universities, Lottery and semi-independent agencies, and local governments and special districts.

PEBB's major cost driver is rising health care costs, which is mainly driven by unit health care cost inflation which makes controlling premium costs a major challenge. PEBB has always sought ways to manage costs through innovative plan designs and payment strategies. PEBB has incorporated "value-based" payments into plan design and aligned VBP targets with CCO goals to drive use of high-value services with aspirational goals.

Executive Summary

Program justification and link to long-term outcomes

Transforming health care

The PEBB board has made transforming the health care delivery system a priority and advances transformation with plans that coordinate care. PEBB has partnered with its "sister program" the Oregon Educators Benefit Board (OEBB) in the shared innovation strategy referred to as "Coordinated Care Model" plans. Both boards are continuing to expand these systems of care throughout the state with a focus on integrated care and reducing health care costs and health disparities.

Value-based benefits

Traditional fee-for-service models provide payment for each health care visit, service, or test. Value-based payments shift focus from volume to value by rewarding providers for delivering high quality care that supports improved outcomes and slower cost growth. As shown in the table below, OEBB and PEBB health plans currently incorporate a variety of value-based payment strategies to incentivize provider quality and efficiency. Many of the general strategies used align with value-based payment approaches also used by coordinated care organizations (CCOs) serving Oregon's Medicaid population.

Many of the strategies used by PEBB & OEBB align with value-based payment approaches also used by Coordinated Care Organizations (CCOs) serving Oregon's Medicaid population

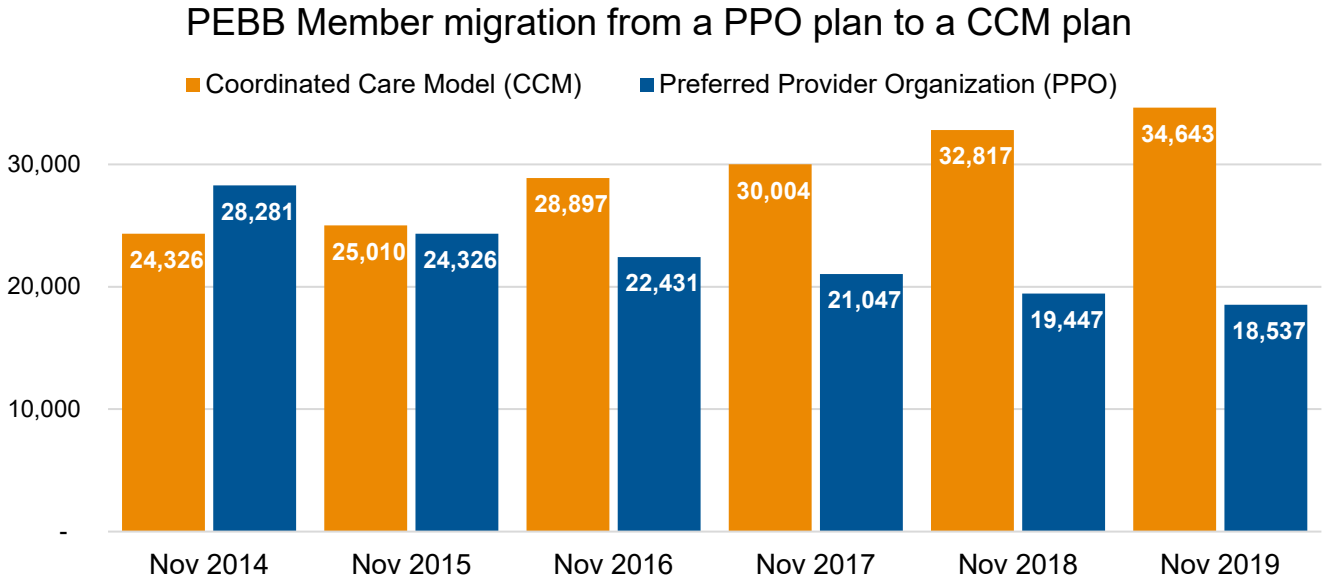
	OEBB	PEBB	CCO
Infrastructure payments	■	■	■
Pay for reporting	■	■	■
Pay for performance	■	■	■
Shared savings with upside risk	■	■	■
Shared savings upside and downside risk	■	■	■
Condition-specific population-based payment			■
Comprehensive population-based payment	■	■	■
Integrated finance and delivery system	■	■	■

PEBB and OEBB continue to work toward increasing the percentage of total health care payments that use value-based approaches and have identified future year targets that generally align with those established for CCOs. PEBB and OEBB currently have approximately 47 percent of total medical expenditures in a VBP arrangement with a goal of 70 percent by 2024, thereby matching the goals as defined in CCO 2.0.

Executive Summary

Wellness initiatives and promoting member health

PEBB supports prevention and member wellness by offering members access to no-cost wellness programs. Wellness programs help members living with chronic conditions build self-management skills; provide emotional, social and financial health services; support development of healthier behaviors; help members overcome tobacco use; and help members develop healthy eating habits and achieve weight-loss goals.



PEBB also offers members opportunities to improve their health and contain costs through participation in the Health Engagement Model (HEM) program. The HEM program allows participants the opportunity to learn more about their own personal health risks and take actions to reduce them. Participants earn financial incentives by annually completing a private health assessment on their medical plan's secure website and completing two health-related activities.

Over the past four years increasing numbers of PEBB members have moved from less-coordinated PPO medical coverage to Coordinated Care Model plans.

Executive Summary

PEBB quality measures and fees-at-risk

In the 2021-23 biennium PEBB will continue to include quality measures and performance targets in health plan contracts to support movement toward better health, better care, and lower cost. The specific quality measures selected will be based on the Statewide Aligned Quality Measures menu developed by the Health Plan Quality Metrics Committee for Coordinated Care Organizations (CCO), PEBB and OEBB plans, and the Oregon Health Insurance Marketplace.

Program performance

PEBB has met the 3.4 percent overall expenditure increase and annual premium increase "test" nearly every year since 2012 (see below). Fulfilling the growth cap has been done by executing on cost containment strategies and promoting program efficiencies. PEBB face challenges in meeting the 3.4 percent tests as a payer in the commercial market in battling trend, provider market leveraging and the timing of the annual growth cap.

Year	Composite Rate Using Prior Year's March Census	% Change	Composite Rate Using Plan Year's March Census	% Change From Prior Composite
2014	$1,333.58		$1,327.47	
2015	$1,321.53	-0.9%	$1,313.06	-1.5%
2016	$1.356.47	2.6%	$1,347.31	2.0%
2017	$1,416.93	4.5%	$1,405.13	3.6%
2018	$1,464.20	3.3%	$1,452.68	2.5%
2019	$1,513.98	3.4%	$1,495.83	2.2%
2020 (w/ Premium Tax and 2.676% funding assessment)	$1,594.86	5.3%	$1,588.17	4.9%
2021 (prior to potential funding assessment)	$1,611.97	1.1%		
2021 with PEBB Admin increase (prior to potential funding assessment)	$1,618.71	1.5%		

Executive Summary

PEBB offers members in all 36 Oregon counties choice between the statewide Preferred Provider Organization (PPO) plan and at least one regional Coordinated Care Model plan. Coordinated Care Model plan choices are available at a lower cost to both members and the state.

PEBB medical benefit design did not change significantly between 2019 and 2020. PEBB still continues to cover:

- The first four visits to primary care, with no deductible.
- The full cost of certain chronic condition and substance abuse visits, with no deductible, copayment or coinsurance.
- Nationally recommended preventive services.
- No-cost outpatient mental health services when provided in network.
- Alternative Care including massage therapy

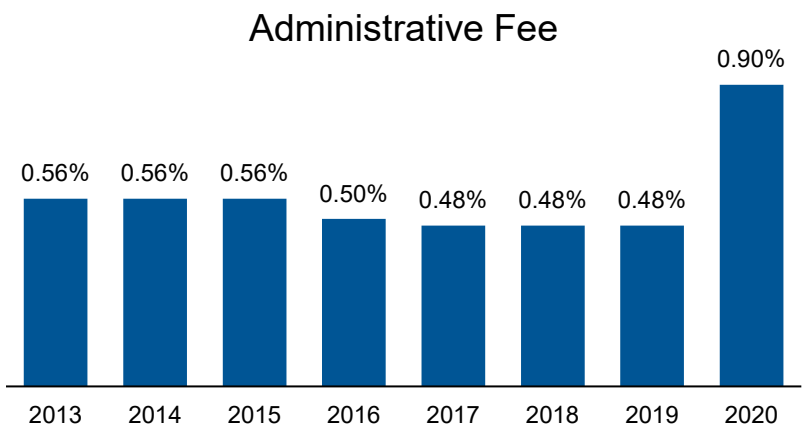
PEBB also offers non-traditional and culturally responsive benefits and services, e.g., the use of doulas and other traditional health workers, Christian Science and Native American healers and alternative care such as acupuncture, massage, naturopathic and spinal manipulation services.

Enabling legislation/program authorization

The Public Employees' Benefit Board authority lies in ORS 243.061 through ORS 243.302.

Funding streams

Other Funds revenue pays for PEBB administration through an administrative assessment added to medical and insurance premiums and premium equivalents. By statute (ORS 243.185), PEBB can collect an amount that equals up to 2 percent of total premiums to meet administrative and operational costs.



Executive Summary

PEBB maintains two accounts within its **Revolving Fund**.

- Stabilization Account: PEBB has authority to use this account to control costs, subsidize premiums and self-insure. The primary source of Other Funds revenue is unused employer contributions for employee benefits. This account also holds proceeds generated when PEBB's life insurance carrier changed from a mutual organization to a public corporation.
- Flexible Spending Account: PEBB operates two flexible-spending-account programs and two commuter programs for employees and maintains an account for their administrative costs. The primary Other Funds revenue source for these programs is forfeitures from participants.

Significant proposed program changes from 2019-21

Changes from the 2019-21 biennium include two policy packages, #426: PEBB-OEBB Benefit Management System (BMS) and #425: Coordinated Care Model (CCM) also legislative concept 26.

Policy package #426: BMS, would allow PEBB and OEBB to combine enrollment system, enhance and modernize members and administrator experience. Top modernization goals include:

- The ability to implement and maintain latest security best practices.
- Mobile app compatibility.
- Compatibility with commonly used browsers, operating systems and devices.
- Flexibility to accommodate business partners' and customers' needs.
- Expanded automated error checking and data validation.
- Availability of on-demand enrollment and training tools for members and administrators.
- Self-service tools and features for members and administrators.
- Automated dependent eligibility verification among and between PEBB and OEBB member groups.

Executive Summary

Policy package #425 CCM (LC 26), would align the purchasing power across OEBB, PEBB and other public purchasers.

What does this mean for consumers and taxpayers?

An affordable, stable, predictable health system: Health care costs no longer outpace family and household incomes, freeing up funding for wage growth and other important state services.

Improved quality and population health: The health care system is working together to keep patients healthy and improve the quality of care they receive.

Improved patient experience: All patients have timely access to high quality care. They receive right care at the right time in coordinated system that puts patients in the center.

Local flexibility: Employers have access to sustainable, high value health care with flexibility to provide unique benefit offerings.

What does this mean for providers?

Stable, predictable revenue: By moving from a system that pays for volume of care to one that pays for value, providers will have more stable, predictable revenue that grows within a sustainable rate of growth.

Administrative streamlining and efficiency: By aligning payment models and metrics, providers can spend more time helping their patients and less time on paperwork.

Local flexibility and accountability: The State will set broad expectations but allow local communities to innovate to best meet the goals within a sustainable budget.

Public Employees' Benefit Board

Expenditures by fund type, positions and full-time equivalents

	General	Other/Lottery	Federal	Total Funds	Positions	FTE
Leg. Approved 2019-21	$0.00	$2,116.60	$0.00	$2,116.60	20	19.5
Agency Request 2021-23	$0.00	$2,312.19	$0.00	$2,312.19	21	20.38
Difference	$0.00	$195.59	$0.00	$195.59	1	0.88
Percent Change	N/A	9%	N/A	9%	5%	5%

The 2021-23 requested budget includes $2,312 Total Funds, which covers current service levels and includes funding to replace the PEBB benefits management system and resources to continue to transform the delivery system in alignment with the coordinated care model.

Activities, programs and issues in the program unit base budget

The Public Employees' Benefit Board (PEBB) is a division of the Oregon Health Authority (OHA). PEBB supports the goal of transforming the health care system in Oregon and fundamentally improving how care is paid for and delivered. PEBB's mission is to provide high-quality health plans and other benefits for state and university employees at a cost that is affordable to both the employees and the state. Oregon Revised Statutes create an eight-member board whose members are appointed by the Governor and confirmed by the Senate. PEBB serves broadly diverse constituencies including the State of Oregon (as an employer), public universities, employees who live and work in every county of the state, the Legislature, taxpayers, labor unions and health policy groups.

PEBB designs, contracts for and administers health plans, group policies and flexible spending accounts for PEBB members. Approximately More than 140,000 Oregonians are enrolled as PEBB members. They include active employees, spouse and domestic partner dependents, child dependents up to age 26, and adult children with disabilities over age 26, from state agencies, universities, Lottery and semi-independent agencies, and local governments and special districts.

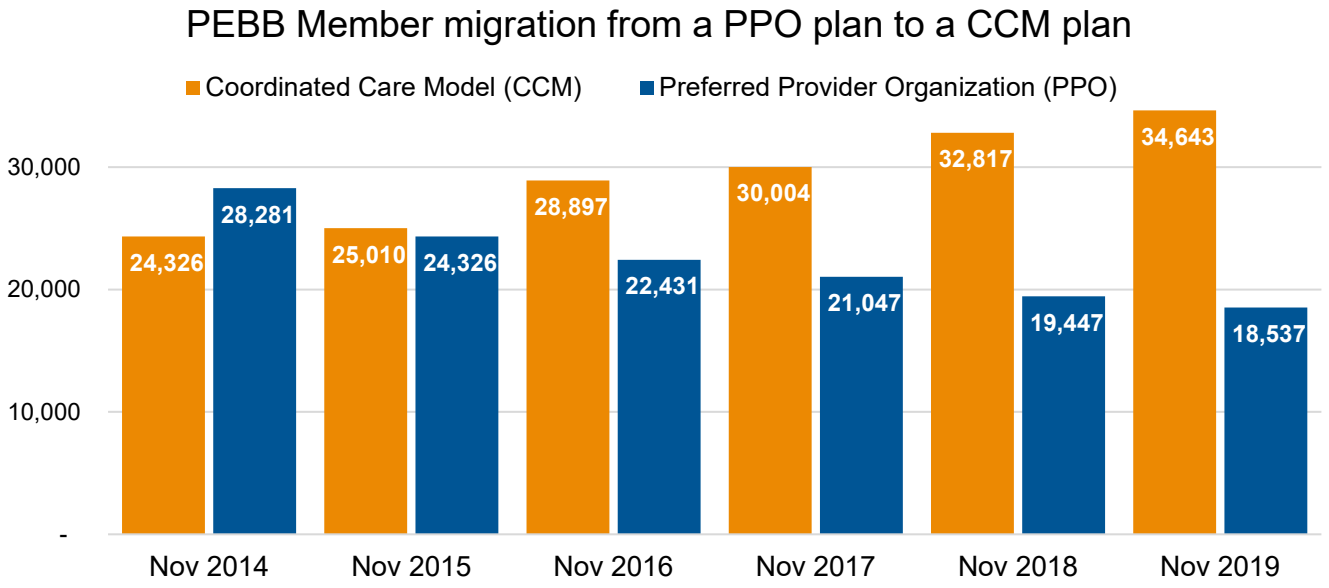
Public Employees' Benefit Board

The PEBB Board serves diverse populations and provides a critical public service to the taxpayers of Oregon. The board offers medical, dental, vision, life, disability and accidental death and dismemberment benefit plans. PEBB is a federal IRS Section 125 Cafeteria Plan benefits program that is required to offer the same benefits to all members.

Transforming health care

The Public Employees' Benefit Board (PEBB) is mandated to redesign the health care delivery system so public employees have access to high quality plans at a lower price, defined in Senate Bill 1067 (2017) as no more than 3.4 percent growth annually. How to stay at or under a 3.4 percent annual growth trend when the Oregon commercial insurance market trend averages 6-7 percent -- which equates to an annual savings requirement of $30 to $40 million -- is without a doubt PEBB biggest challenge.

The PEBB Board has made transforming the health care delivery system a priority and advances this transformation with plans that coordinated care. PEBB has partnered with its "sister program" the Oregon Educators Benefit Board (OEBB) in the shared innovation strategy referred to as "Coordinated Care Model" plans. Both boards believe the coordinated care model (CCM) is essential for achieving success in managing overall costs. PEBB offers coordinated care model health plans that use patient-centered medical homes to improve quality, enhance member experience, and contain costs. Both boards are continuing to add these systems of care throughout the state with a focus on integrated care and reducing health care costs and health disparities. The boards would like to further pursue plans and providers that use creative and innovative evidence-based practices.



PEBB's implementation of coordinated care model plans focuses on:

- Promoting alternative payment methodologies such as risk sharing and global payments for obstetrics and joint replacements.
- Integrating behavioral and physical health.
- Supporting the use of medical homes.
- Improving payments for primary care.
- Putting fees at risk for meeting agreed-upon outcome metrics.
- Managing costs to a 3.4 percent annual increase.

PEBB cost containment programs

Another shared innovation strategy revolves around the use of alternative payment models (APMs) to help control premium costs. Premium costs are affected by external drivers such as member utilization; lack of care coordination; inflation in health care costs, such as high prescriptions costs; and sedentary occupations that lead to long-term risks and chronic conditions.

The traditional method of controlling premium increases is to increase cost to members through higher deductibles, higher copayment or coinsurance, or increased premium share. PEBB has always sought ways to reduce costs through innovative plan designs. Both PEBB and OEBB have incorporated "value-based" benefit attributes into plan design to encourage use of high-value services including:

- Value prescription drug formularies.
- Waived copayments for office visits related to certain chronic conditions.
- Self-management programs for weight and diabetes prevention available at no out-of-pocket cost to members.
- No-cost tobacco use cessation support.

Value-based benefits

Both OEBB and PEBB have implemented value-based benefit plans. Services that have been shown to reduce health care costs have a lower copayment or coinsurance. Members pay more for services that have less-expensive alternatives. Members are encouraged to talk to their medical providers about alternatives to these higher-cost options. Examples of these benefits include:

- No or lowered costs for visits for diabetes, coronary artery disease, asthma and chronic obstructive pulmonary disease. Regular office visits keep people with these diagnoses out of the emergency room and hospital.
- No or lowered costs for medications that help prevent or manage chronic diseases such as statins for cholesterol, asthma inhalers and depression medications.
- Additional copayment for endoscopies, sleep studies and advanced imaging technologies (CT, MRI, PET scans).
- Additional copayment for shoulder and knee arthroscopic surgery, total knee and total hip joint replacement surgery.

- PEBB and OEBB continue to work toward increasing the percentage of total health care payments that use value-based approaches and have identified future year targets that generally align with those established for Coordinated Care Organizations. PEBB and OEBB currently have approximately 47 percent of total medical expenditures in a VBP arrangement with a goal of 70 percent by 2024, thereby matching the goals as defined in CCO 2.0.

Wellness initiatives and promoting member health

PEBB supports prevention and member wellness by offering members no-cost programs through carrier contracts and direct vendor contracting.

- Better Choices Better Health helps people living with a chronic condition to live healthier lives.
- The Employee Assistance Program (EAP) provides emotional, social and financial health services.
- Healthy Team Healthy U offers members a foundation of knowledge and skills to help members live a healthier lifestyle.
- Quit For Life and other tobacco cessation resources help members overcome tobacco use.
- Weight Watchers is designed to help members achieve and maintain weight-loss goals.

Providing direct incentives to members outside of plan benefits comes with upfront costs to fund and administer. This appears as a direct cost to the program for each year the incentive is provided. Several years of claims data are needed to analyze whether the incentive has a measurable, sustained impact on participant health care claims costs. This type of analysis is possible and may show an impact on costs. However, any potential savings would not be realized until future years after the upfront costs of the incentive have been incurred.

PEBB also offers members opportunities to improve their health and contain costs through participation in the Health Engagement Model (HEM) program. The HEM allows program participants to learn more about their own personal health risks and how to reduce them. Participants earn financial incentives by annually completing a private health assessment on their carrier's secure website and completing two health-related activities.

Public Employees' Benefit Board

PEBB quality measures and fees-at-risk

In the 2021-23 biennium PEBB will continue to include quality measures and performance targets in health plan contracts to support better health, better care, and lower cost. The specific quality measures selected will be based on the Statewide Aligned Quality Measures menu developed by the Health Plan Quality Metrics Committee for CCOs, PEBB and OEBB plans, and the Oregon Health Insurance Marketplace. PEBB and OEBB contracts will include performance improvement targets on each measure and will require that health plans put at risk a portion of administrative fees or premiums paid to them, with retention of at-risk dollars contingent on the plan achieving its targets. Performance improvement targets established for each measure will consider the health plan's current performance in comparison to national benchmarks, gold standard performance rates, and organizational priorities to achieve identified rates of improvement in specific areas of health care quality.

Additional budget drivers

- Legislative cap on premium rate increases: The PEBB Board will continue to work with carriers to explore strategies to keep renewal rate increases at or below the Legislature's 3.4 percent growth cap.
- Implementing benefit mandates as required.

Joint PEBB and OEBB Innovation Workgroup

- PEBB and OEBB formed the joint Innovation Workgroup (IWG), made up of PEBB and OEBB board members and legislators to analyze cost drivers, measure access and quality, and explore joint alternative payment models that bring true value and the potential for big savings.

Public Employees' Benefit Board

Background information

House Bill 2037 (2019 Legislative Session) Long Term Care:
This bill allows PEBB to make available long-term care insurance plans at the boards' discretion rather than as a statutory requirement. This change aligns all optional plan benefits offered to employees.

House Bill 2266 (2019 Legislative Session) cost containment bill (repealed portions of Senate Bill 1067 (2017). The most significant changes for PEBB are:

- Maintains the "opt-out" incentive for employees.
- Maintains the "double-coverage" option for employees.
- Requires PEBB impose a surcharge for employees who enroll as a subscriber on an OEBB or PEBB plan when already enrolled as a dependent on another OEBB or PEBB plan. The surcharge amount will be decided by the Board.
- PEBB will conduct dependent eligibility reviews, as opposed to a third-party administrator, with the frequency of review based on a consultant's recommendation of commercial best practice.
- Revised the in-network and out-of-network reimbursement cap for hospitals so that the cap does not apply to hospitals outside of the state.
- Requires that PEBB/OEBB report to the Legislature by December 31, 2019 on:
    - Actions, strategies and challenges for meeting the 3.4 percent growth cap.
    - Purchasing power maximization and total cost reduction strategies.
    - Previous and upcoming renewal rates.

Revenue sources and changes

Other Funds revenue pays for PEBB administration through an administrative assessment added to medical and dental insurance premiums and premium equivalents. By statute (ORS 243.185), PEBB can collect an amount that equals up to 2 percent of total premiums to meet administrative and operational costs.

Public Employees' Benefit Board

PEBB maintains two accounts in its **Revolving Fund**.

- Stabilization Account: PEBB has authority to use this account to control costs, subsidize premiums and self-insure. The primary source of Other Funds revenue is unused employer contributions for employee benefits. This account also holds proceeds generated when PEBB's life insurance carrier changed from a mutual organization to a public corporation.
- Flexible Spending Account: PEBB operates two flexible-spending-account programs and two commuter programs for employees and maintains an account for their administrative costs. The primary Other Funds revenue source for these programs is forfeitures from participants.

Proposed new laws that apply to the program unit

Policy package #426: OEBB-PEBB Benefit Management Replacement System

PEBB and OEBB are requesting additional funding to continue with the Benefit Management System (BMS) replacement project. Staff in have finished the system gathering requirements for the new combines benefits management system. Next steps are to submit a request for proposal (RFP) for competitive bidding by third party entities able to fulfill the business need. This new system would allow PEBB and OEBB to modernize all its members' and administrators' user experience. Top modernization goals include:

- The ability to implement and maintain latest security best practices.
- Mobile app compatibility.
- Compatibility with commonly used browsers, operating systems and devices.
- Flexibility to accommodate business partners' and customers' needs.
- Expanded automated error checking and data validation.
- Availability of on-demand enrollment and training tools for members and administrators.
- Self-service tools and features for members and administrators.
- Automated dependent eligibility verification among and between OEBB and PEBB member groups.

Public Employees' Benefit Board

Policy package #425: Coordinated Care Model (CCM) (LC 26), would align the purchasing power across OEBB, PEBB and other public purchasers.

What does this mean for consumers and taxpayers?

An affordable, stable, predictable health system: Health care costs no longer outpace family and household incomes, freeing up funding for wage growth and other important state services.

Improved quality and population health: The health care system is working together to keep patients healthy and improve the quality of care they receive.

Improved patient experience: All patients have timely access to high quality care. They receive right care at the right time in coordinated system that puts patients in the center.

Local flexibility: Employers have access to sustainable, high value health care with flexibility to provide unique benefit offerings.

What does this mean for providers?

Stable, predictable revenue: By moving from a system that pays for volume of care to one that pays for value, providers would have more stable, predictable revenue that grows within a sustainable rate of growth.

Administrative streamlining and efficiency: By aligning payment models and metrics, providers can spend more time helping their patients and less time on paperwork.

Local flexibility and accountability: The state would set broad expectations but allow local communities to innovate to best meet the goals within a sustainable budget.

Oregon Health Authority

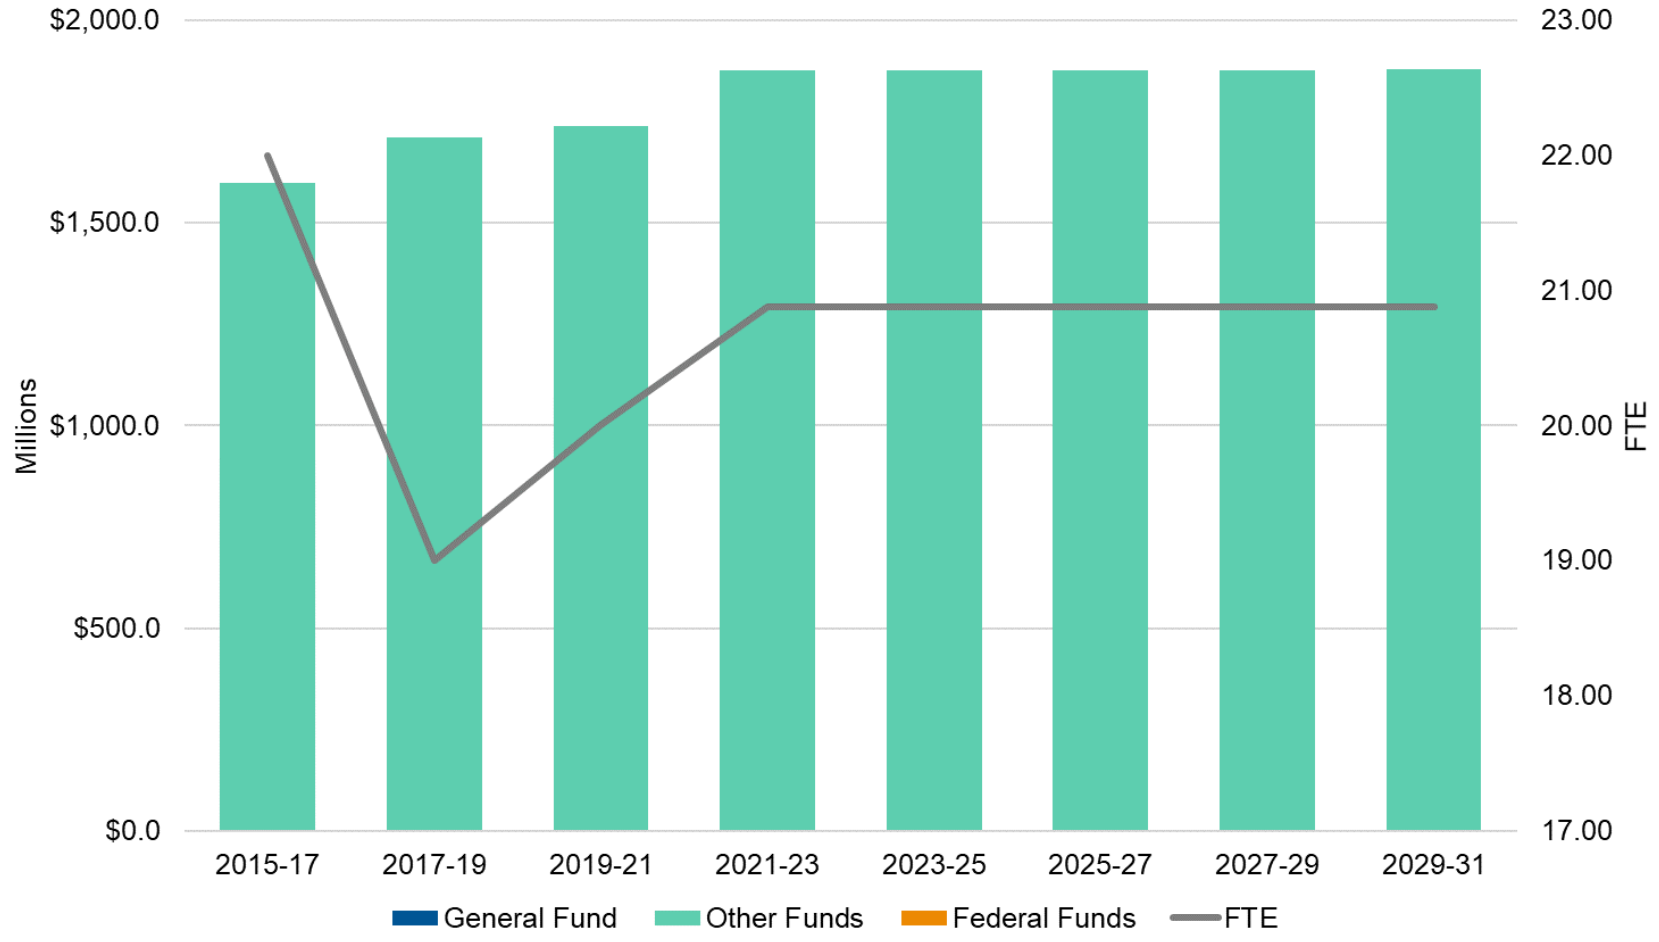
Oregon Health Authority: Oregon Educators Benefit Board

Executive Summary

Program Contact: Ali Hassoun, Director
503-378-2798



Executive Summary

Division overview

The Oregon Educators Benefit Board (OEBB) is a division of the Oregon Health Authority (OHA). It provides a comprehensive selection of benefit plan options for most of Oregon's K-12 school districts, education service districts and community colleges, as well as a number of charter schools and some counties and special districts. OEBB's plans are designed to be flexible and accommodate the needs of employers and members.

Funding request

The OEBB requests funding for the 2021-23 biennium to continue current service levels, which includes cost growth for OEBB medical premiums at 3.4 percent for both the 2021-2022 and 2022-2023 plan years. The request also includes OEBB's portion of replacement costs for both the OEBB and PEBB benefits management systems. All OEBB expenditures are categorized as Other Funds Limited.

Program descriptions

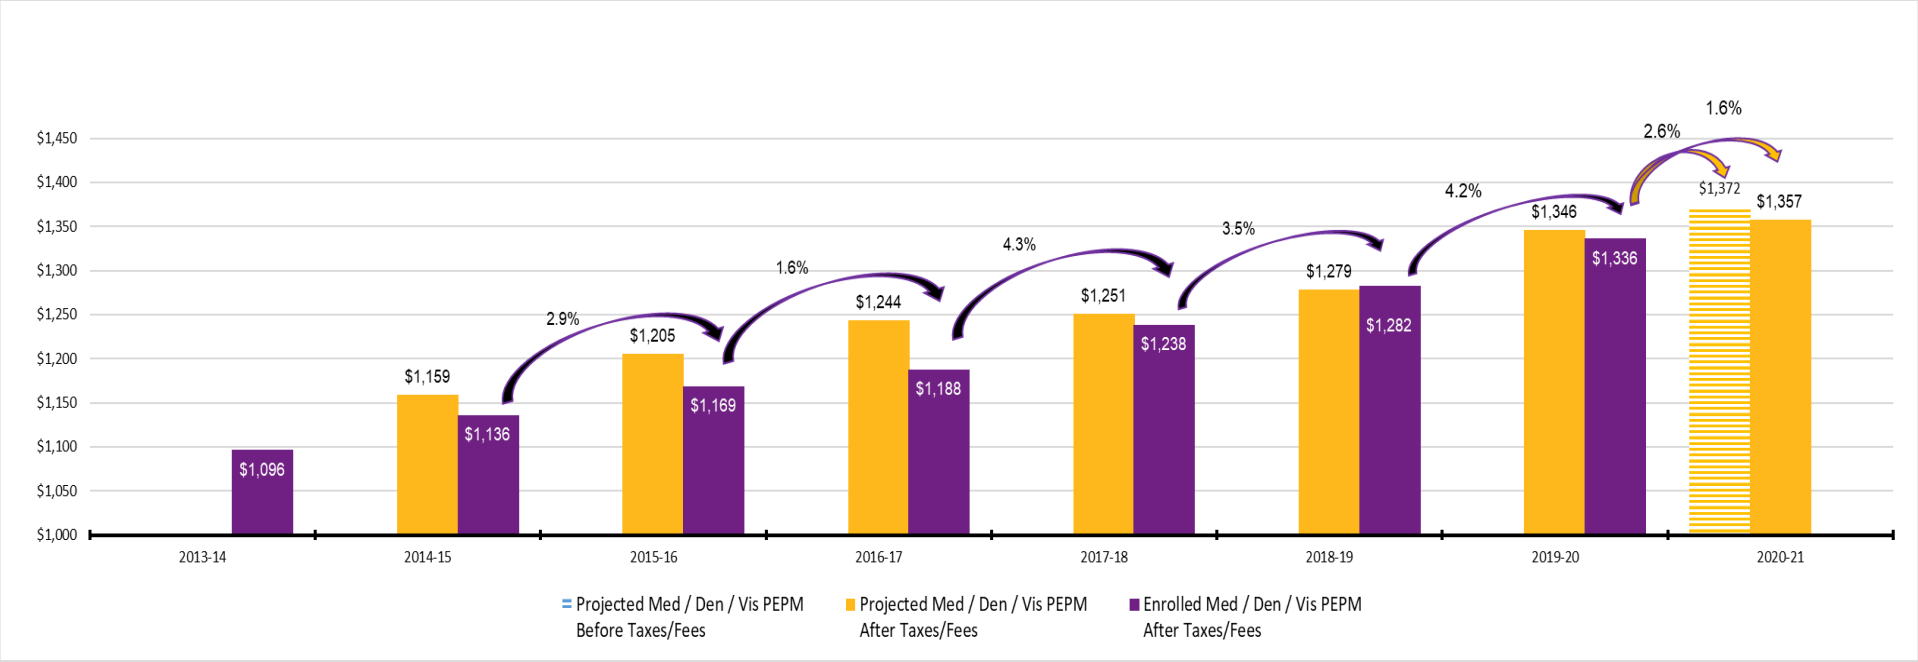
OEBB serves more than 155,000 members (employees, early retirees and their family members) in more than 251 publicly-funded entities throughout Oregon. OEBB serves its members and entities year-round.

The OEBB board designs and maintains a full range of benefit plans for eligible publicly funded entities to offer to their employees and early retirees. Plans include medical, dental, vision, life, disability, accidental death and dismemberment, long term care, an employee assistance program, a health savings account and flexible spending accounts.

Rising health care costs are a primary cost driver for OEBB. OEBB has recognized and taken steps to provide incentives for appropriate care and condition management through benefit plan design with the goal of containing costs and using alternative payment models to control costs. OEBB strives to keep benefit plans affordable and stable while providing quality care to members. OEBB has managed benefit costs to well below national trend throughout its history and continues to meet a legislatively capped annual 3.4 percent increase on premiums and costs on behalf of members.

Executive Summary

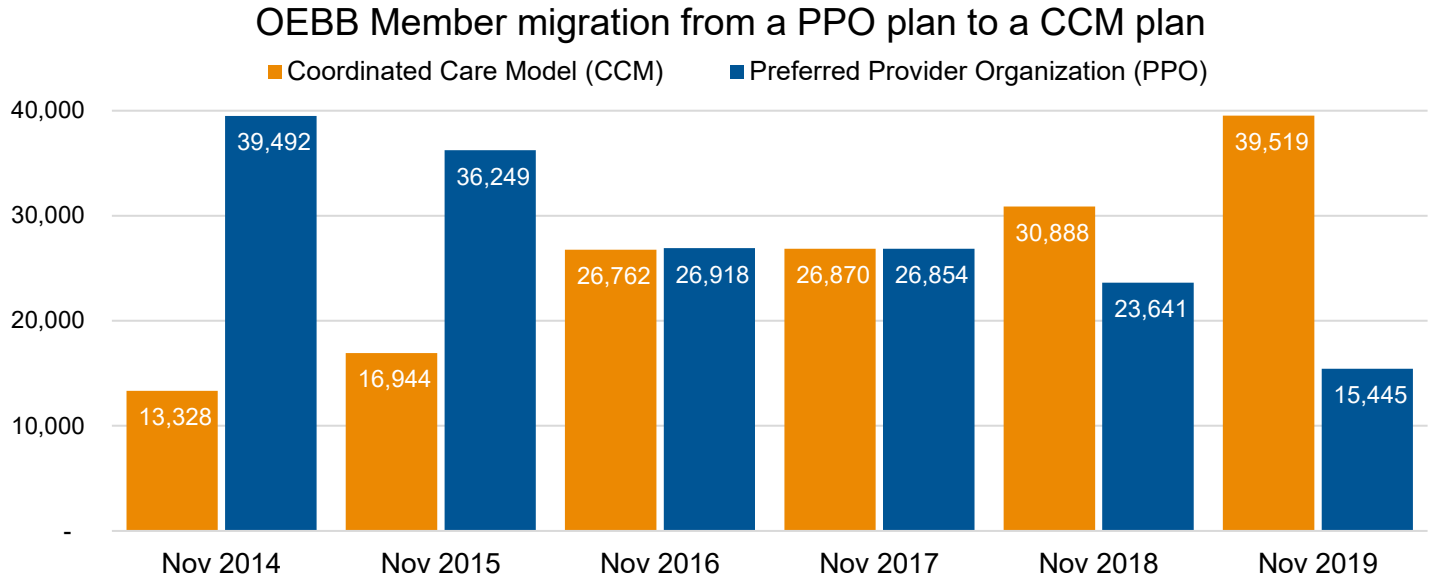
Senate Bill 1067 (2017) established the cost growth cap on OEBB's annual aggregate costs for medical, dental and vision plans combined that should not increase by more than 3.4 percent over prior year costs. This test applies to premium costs excluding the impact of increases or decreases in state or federal premium tax changes. OEBB beat the required test in 2020-21, as aggregate premiums are expected to increase by 2.65 percent before applying the change in federal premium taxes. Because the Affordable Care Act (ACA) premium tax has been discontinued, the projected total change in aggregate OEBB premium is expected to be an increase of 1.58 percent. OEBB has met the legislative test for several years, even as the Commercial Market Insurance trend hovers in the 6 to 7 percent range.



Executive Summary

Program justification and link to long-term outcomes

OEBB was established to eliminate the wide-ranging disparities among health plans offered by educational entities and for responding to the rapidly rising costs of health care. A statewide pool such as OEBB creates purchasing power and avoids unstable premium swings. Streamlining administration and eliminating third-party fees and duplication of work were also large cost savers upon the formation of OEBB. Educational entities benefit from cost predictability and controlling of expenditures year-over-year.



Transforming health care

The OEBB board has made transforming the health care delivery system a priority and envisions advancing health care transformation with plans that coordinate care. OEBB has partnered with its "sister program" the Public Employees' Benefit Board (PEBB) in the shared innovation strategy referred to as the "Coordinated Care Model" (CCM). Both boards are continuing to add these systems of care throughout the state with a focus on integrated care and reducing health care costs and

health disparities. In 2018, the boards joined to create a sub-group called the "Joint Innovation Workgroup" consisting of PEBB and OEBB board members as well as state legislators.

Success indicator: The graphic above illustrates OEBB members moving from a preferred provider organization (PPO) plan to a coordinated care model plan with a lower premium share.

OEBB quality measures and fees at risk
In the 2021-23 biennium OEBB will continue to include quality measures and performance targets in health plan contracts to support better health, better care, and lower cost. The specific quality measures selected will be based on the Statewide Aligned Quality Measures menu developed by the Health Plan Quality Metrics Committee for Coordinated Care Organizations (CCOs), PEBB and OEBB plans, and the Oregon Health Insurance Marketplace.

Wellness initiatives and promoting member health
OEBB supports prevention and member wellness by offering members access to no-cost wellness programs. Wellness programs help members in a variety of ways, including helping people with chronic conditions live healthier lives, helping prevent the onset of diabetes; providing emotional, social and financial health services; helping overcome tobacco use; and helping achieve and maintain weight loss goals.

Program performance

OEBB is incorporating key elements of the coordinated care model into all OEBB medical plans. They are particularly evident in the structure of the Moda Health PCP 360 plans, as well as the health care delivery system inherent in the Kaiser Permanente plans.

Strategies for success
The OEBB board and staff are committed to our mission and guiding principles and have developed strategies to achieve long-term results:

- Offer high-quality, affordable health plans.

Executive Summary

- Support member wellness and population health.
- Create streamlined operations and organization effectiveness.
- Provide enhanced member outreach and communications.
- Create a financially sustainable organization.

Benefit highlights for the 2020-21 plan year

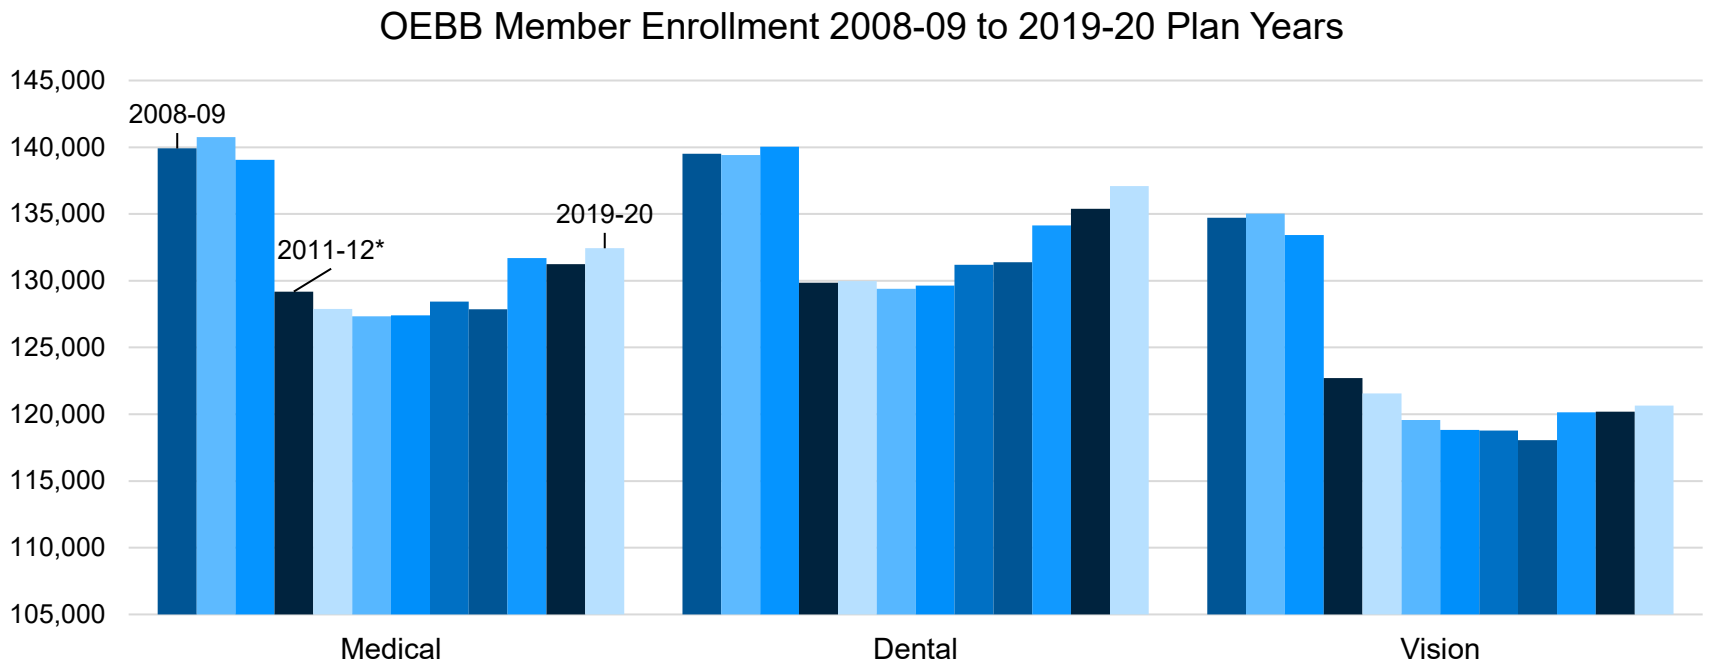
- OEBB will continue to offer the same medical, dental and vision plans through Moda, Kaiser, Willamette Dental and VSP for the 2020-21 Plan Year. All deductible levels, copayments, coinsurance levels and out-of-pocket maximums will continue.

- All medical plans will include an enhanced virtual telehealth service.

- Moda plans will see some exciting new changes with the implementation of a new member concierge service, Moda360. Moda360 provides OEBB members with specialized service navigators to provide extra assistance to get the care they need, find quality providers, resolve claims or billing issues, schedule appointments or find health care resources. Moda360 includes additional services such as expanded telemedicine, diabetes care programs and enhanced behavioral health services.

- Double Coverage Surcharge – In response to a legislative requirement, OEBB will assess a $5 monthly surcharge for each subscriber who elects to cover a dependent on their OEBB medical plan who is also covered as a subscriber under their own OEBB or Public Employees' Benefit Board (PEBB) medical plan.

Executive Summary



*drop in enrollments in plan year 2011-12 was due to a recession.

Enabling legislation/program authorization

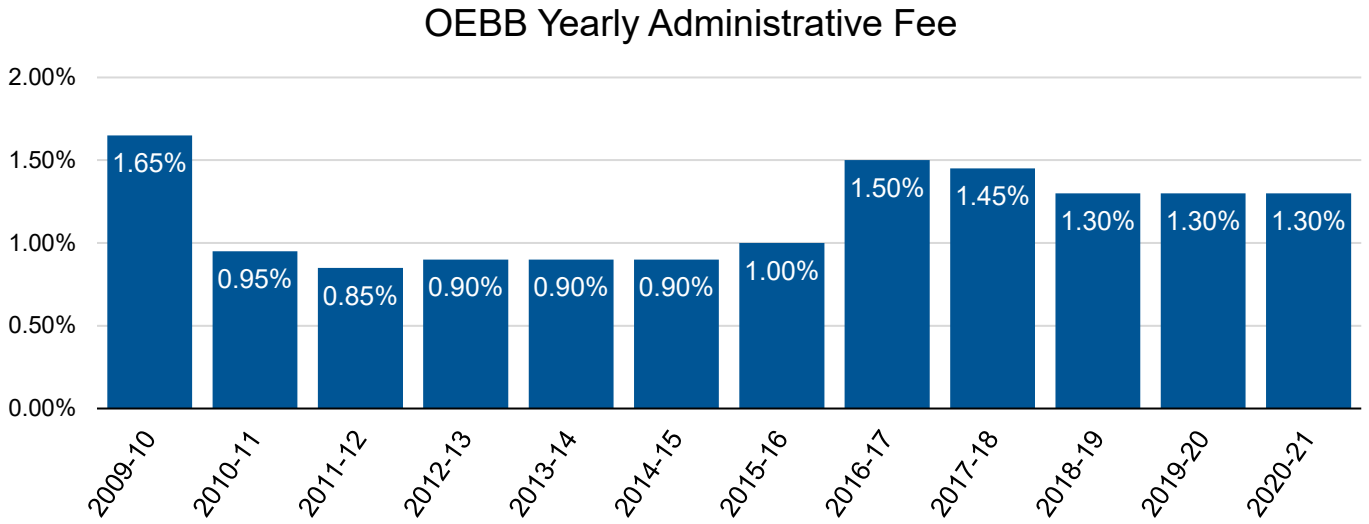
OEBB was established by Senate Bill 426 (2007). House Bill 2279 (2013) expanded participation eligibility to include local governments and special districts. The OEBB board functions and responsibilities are authorized by ORS 243.860 to 243.886.

Funding streams

OEBB is funded entirely with Other Funds. ORS 243.880 authorizes the Oregon Educators Benefit Account to cover administration expenses. The account's revenue is generated by an administrative assessment paid by members along with their premiums. The administrative assessment cannot exceed 2 percent of total monthly premiums. The administrative fee is the sole source of revenue for the OEBB benefits program.

Executive Summary

ORS 243.884 authorizes the Oregon Educators Revolving Fund to pay premiums, control expenditures, provide self-insurance and stabilize premiums.



Significant proposed program changes from 2019-21

Changes from the 2019-21 biennium include two policy packages: #426 OEBB-PEBB Benefit Management System (BMS) and #425 Coordinated Care Model (CCM), which is tied to legislative concept 26.

Policy package #426 BMS would allow OEBB and PEBB to combine enrollment system, enhance and modernize members and administrator experience. Top modernization goals include:

- The ability to implement and maintain latest security best practices.
- Mobile app compatibility.
- Compatibility with commonly used browsers, operating systems and devices.
- Flexibility to accommodate business partners' and customers' needs.

Executive Summary

- Expanded automated error checking and data validation.
- Availability of on-demand enrollment and training tools for members and administrators.
- Self-service tools and features for members and administrators.
- Automated dependent eligibility verification among and between OEBB and PEBB member groups.

Policy package #425 CCM (LC 26) would align the purchasing power across OEBB, PEBB and other public purchasers.

What does this mean for consumers and taxpayers?

- An affordable, stable, predictable health system: Health care costs no longer outpace family and household incomes, freeing up funding for wage growth and other important state services.
- Improved quality and population health: The health care system is working together to keep patients healthy and improve the quality of care they receive.
- Improved patient experience: All patients have timely access to high quality care. They receive right care at the right time in coordinated system that puts patients in the center.
- Local flexibility: Employers have access to sustainable, high value health care with flexibility to provide unique benefit offerings.

What does this mean for providers?

- Stable, predictable revenue: By moving from a system that pays for volume of care to one that pays for value, providers would have more stable, predictable revenue that grows within a sustainable rate of growth.
- Administrative streamlining and efficiency: By aligning payment models and metrics, providers can spend more time helping their patients and less time on paperwork.
- Local flexibility and accountability: The state would set broad expectations but allow local communities to innovate to best meet the goals within a sustainable budget.

Oregon Educators Benefit Board

Expenditures by fund type, positions and full-time equivalents

Difference	$0.00	$135.56	$0.00	$135.56	1	0.88
Percent Change	N/A	8%	N/A	8%	5%	4%

Activities, programs and issues in the program unit base budget

The Oregon Educators Benefit Board (OEBB) was established by the 2007 Legislature. OEBB provides a comprehensive selection of benefit plan options for most of Oregon's K-12 school districts, education service districts and community colleges, as well as a number of charter schools and local governments across the state. OEBB provides benefits for approximately 155,000 individuals, including actively employed and retired subscribers and their dependents. OEBB offers a multitude of plans that resemble an "exchange." OEBB started offering medical, dental, and vision coverage in 2008 and has since added a broad range of additional benefits including life, accidental death and dismemberment (AD&D), short-term and long-term disability and long-term care insurance, as well as an employee assistance program (EAP), a health savings account (HSA), flexible spending accounts (FSAs), and commuter savings accounts. Each of the 251 employer entities OEBB serves maintains a unique service area, eligibility requirements, cost sharing with employees, and diverse populations. OEBB's plans are designed to be flexible and accommodate the needs of all employers participating in OEBB and the members enrolled in OEBB plans.

OEBB was created to eliminate the wide-ranging disparities between health plans offered by school districts and to respond to the rapidly rising costs of health care. House Bill 2279 (2013) expanded participation eligibility to include local governments and special districts. A statewide pool, such as OEBB, creates purchasing power and avoids unstable premium swings

experienced by school districts with volatile claims experience. Streamlining administration and eliminating third-party fees and duplication of work were also large cost savers upon the formation of OEBB. School districts benefit from cost predictability and controlling of expenditures year-over-year. For the 2020-21 Plan Year, 83% of OEBB subscribers will experience a rate change for their medical plan of 2.4% or lower. Twenty-five percent (25%) of OEBB subscribers will have a decrease in medical rates. In addition to OEBB's cost goals, OEBB plans emphasize coordinated care model features. Coordinated care means the member's primary care physician works with specialists, hospitals and other providers in a coordinated fashion to ensure optimal and efficient care for members. All the plan design changes implemented for the 2020-21 Plan Year focus on advancing preventive care and coordinated care principles.

Key components of the OEBB program include:

- Value-added plans that provide high-quality care and services at an affordable cost to members.
- Collaboration with districts, members, carriers and providers that ensures a focused approach on the design and delivery of benefit plans and services.
- Support of improvement in members' health status through a variety of measurable programs and services.
- Implementing measurable goals and programs that hold carriers and providers accountable for health outcomes.
- Encouraging members to take responsibility for their own health outcomes.
- Top-of-class customer service.

Transforming Health Care

The OEBB board has made transforming the health care delivery system a priority and envisions advancing health care transformation with plans that coordinate care. OEBB has partnered with its "sister program" the Public Employees' Benefit Board (PEBB) in the shared innovation strategy referred to as "Coordinated Care Model" plans. OEBB and PEBB believe the coordinated care model (CCM) is essential for achieving success in managing overall costs. For the 2020-21 plan year, OEBB further enhanced the CCM offering with "health navigators". Health navigators are personal health coaches that provide members with assistance in scheduling appointments, billing questions, claims and appeals, care programs and prior authorizations allowing members to better coordinate their health care. Both boards continue to add these systems of care

throughout the state with a focus on integrated care and reducing health care costs and eliminating health disparities. The boards would like to further pursue plans and providers that use creative and innovative evidence-based practices, specifically in the area of social determinants of health.

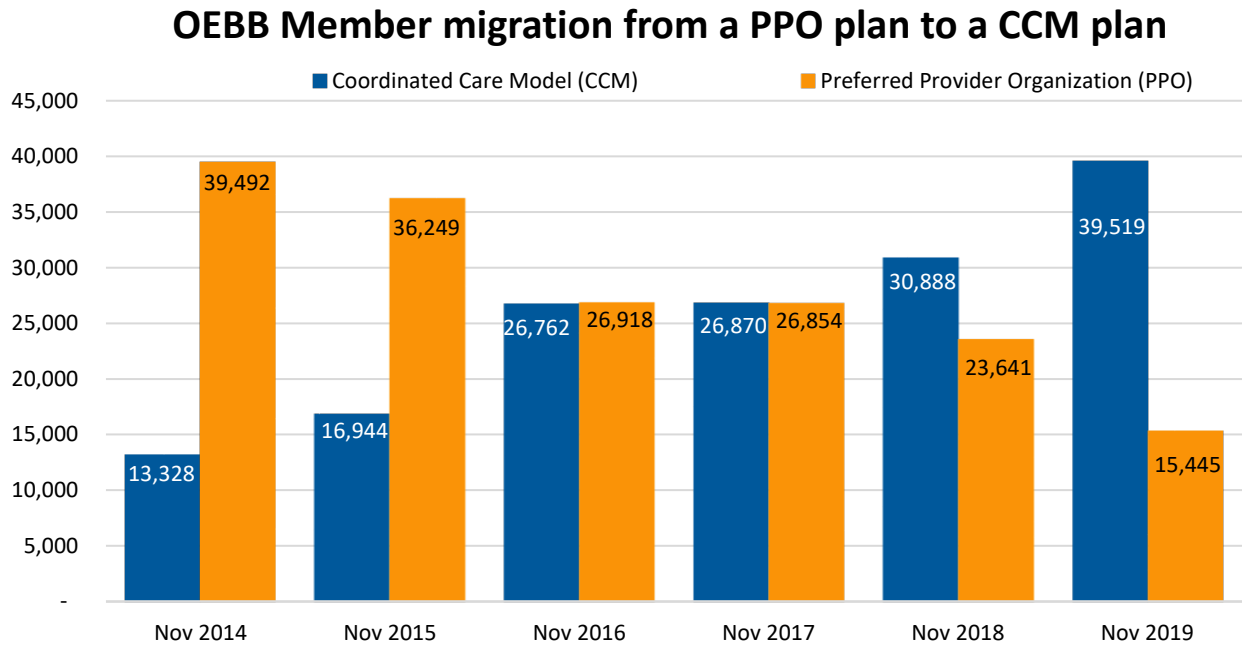
As the board evaluates plan offerings in an annual contract renewal with plans, it focuses on maintaining sustainable, affordable, equitable and high-quality benefit plan options across the entire state. Strategies include:

- Engage employers at regular intervals to ensure the affordability definition remains relevant to all participating entities.
- Monitor and audit utilization and plan performance to ensure high quality benefits.
- Incorporate criteria specific to legislative cost requirements (3.4 percent renewal increase cap) into carrier contracts.
- Require proposers to outline their plans and specific steps they will take to promote these criteria in medical offices and care locations around the state.
- Incentivize coordinate care plans and improve access to culturally-specific services across the state.
- Integrate coordinated, patient-centered care – physical, mental and dental.
- Demonstrate improved health outcomes.
- Embrace alternative payment models.

OEBB also actively engages in OHA committees, including:

- Primary Care Payment Reform Collaborative.
- Health Plan Quality Metrics Committee to support adoption of aligned quality incentives.
- Pharmacy Cost Collaborative.

The board is dedicated to moving away from a “fee-for-service” model and incentivizes members to enroll in a Coordinated care model plan. The following graphic illustrates OEBB members moving from a preferred provider organization (PPO) plan to a coordinated care model (CCM) plan with a lower premium share:



OEBB cost containment programs

OEBB has recognized and taken steps to provide incentives for appropriate care and management of chronic conditions through benefit plan design with the goal of containing costs:

- Members have no copayment, coinsurance, or deductible for office visits associated with management of certain chronic conditions (asthma, diabetes, cardiovascular disease and congestive heart failure).
- Value pharmacy benefit provides medications used to manage common chronic conditions with no copayment.
- Condition management and prevention programs offered at no out-of-pocket cost to members under OEBB and PEBB medical plans, including evidence-based programs for members living with a chronic condition and prevention programs that specifically target members at risk of developing diabetes.

- Additional copays were included to discourage the use of certain procedures and treatments that had less-invasive options that were equally effective.

OEBB has also used alternative payment models to control cost including:

- Reference pricing for joint replacement and gastric bypass services.
- Shared risk payment models for its Moda PCP 360 medical plans.

OEBB quality measures and fees at risk

In the 2021-23 biennium OEBB will continue to include quality measures and performance targets in health plan contracts to support better health, better care, and lower cost. The specific quality measures selected will be based on the Statewide Aligned Quality Measures menu developed by the Health Plan Quality Metrics Committee for Coordinated Care Organizations (CCO), PEBB and OEBB plans, and the Oregon Health Insurance Marketplace. PEBB and OEBB contracts will include performance improvement targets on each measure and will require health plans put at risk a portion of administrative fees or premiums paid to them, with retention of at-risk dollars contingent on the plan achieving its targets. Performance improvement targets for each measure will consider the health plan's current performance in comparison to national benchmarks, gold standard performance rates, and organizational priorities to achieve identified rates of improvement in specific areas of health care quality.

Wellness initiatives and promoting member health

OEBB supports prevention and member wellness by offering members no-cost programs:

- Better Choices Better Health helps people living with a chronic condition to live healthier lives.
- The Employee Assistance Program (EAP) provides emotional, social and financial health services.
- Healthy Team Healthy U offers members a foundation of knowledge and skills to help them live a healthier lifestyle.
- Tobacco cessation resources help members overcome tobacco use.
- Weight Watchers is designed to help members achieve their weight-loss goals and maintain them.

Oregon Educators Benefit Board

OEBB's carriers strive to beat local trend averages – Coordinated care efforts and advanced plan management features in place with OEBB's carriers and approved by the board have resulted in favorable outcomes. OEBB medical, dental and vision plans have performed better than local plan trends of 7.9%1, according to an annual survey of insured plan trends conducted by Willis Towers Watson. This good performance, as well as the reduction in insurance taxes, has resulted in favorable rate changes for OEBB plans for the 2020-21 Plan Year.

Background information

House Bill 2037 (2019 Legislative Session) Long Term Care:
This bill allows the OEBB board to make available long-term care insurance plans at the boards' discretion rather than as a statutory requirement. This change aligns all optional plan benefits offered to employees.

House Bill 2266 (2019 Legislative Session) cost containment bill (repealed portions of Senate Bill 1067 (2017). The most significant changes for OEBB are:

- Maintains the "opt-out" incentive for employees
- Maintains the "double-coverage" option for employees
- Requires OEBB implement a surcharge for employees who enroll as a subscriber on a PEBB or OEBB plan when already enrolled as a dependent on another PEBB or OEBB plan. The surcharge was determined by the Board to be $5 per month.
- Maintains the dependent eligibility review be complete in OEBB with frequency based on the consultant's recommendation.
- Revises the cap for reimbursement for both in-network and out-of-network hospitals so that it does not apply to hospitals outside of the state.
- Requires that PEBB/OEBB report to the Legislature by 12/31/2019 on:
    - Actions, strategies and challenges for meeting the 3.4% growth cap
    - Purchasing power maximization and total cost reduction strategies

- Previous and upcoming renewal rates

Revenue sources and changes

Oregon Revised Statute (ORS) 243.880 established the Oregon Educators Benefit Account to cover administration expenses. The account's revenue is generated through an administrative fee included in premiums for OEBB medical, dental and vision benefits, which is considered Other Funds revenue. By statute, the administrative fee cannot exceed 2 percent of total monthly premiums. ORS 243.882 prohibits the balance in the account from exceeding 5 percent of the monthly total of employer and employee contributions for more than 120 days.

ORS 243.884 established the Oregon Educators Revolving Fund to pay premiums, control expenditures, provide self-insurance and subsidize premiums.

Proposed new laws that apply to the program unit

Policy Package 425 Coordinated Care Model (CCM), Legislative Concept 26:

This policy package will align the purchasing power across PEBB, OEBB and other public purchasers.

COVID-19 has exposed the inequities in Oregon's healthcare system. The state can better leverage the public purchasing power in order to contain costs on a statewide basis. Currently:

- Health care coverage remains insufficient and unaffordable for many. In 2017, 8 percent of families had problems paying medical bills.
- With health insurance coverage at record highs and uncompensated care for providers at record lows, there's an opportunity for Oregon to leverage its purchasing power to contain costs for more Oregonians.
- The PEBB and OEBB boards have taken steps to align on several initiatives with the goal of enhancing their purchasing power. PEBB and OEBB have also merged the administrative staff of both programs into one unit.
- The state however, has not yet maximized the opportunities to fully align benefits and purchasing across other programs and look to expand the purchasing power beyond just PEBB and OEBB.

- Reducing health care costs allows resources to go to wages and other critical investments.
- The result to consumers and taxpayers is a much more sustainable health care system for the entire state, in line with the Triple Aim and the Governor's policy priorities as well as OHA's strategic plan.

The purpose of this policy package is to give the PEBB and OEBB boards more authority on procurement outside the RFP process to meet purchasing needs. This would include the authority for the boards to function as a single board if desired. The composition of one board is yet to be determined.

There is a real potential to leverage purchasing power by aligning financial incentives with other publicly-funded programs to improve care and lower costs across the Oregon Health Plan, public employee programs, the Marketplace and other local governments.

Conceptually, the boards could contract with a plan proposed to the boards outside the RFP process if the plan demonstrates:

- The plan(s) and its providers are willing to serve all members in state markets (Medicaid, PEBB, OEBB, Marketplace), proportional to the market.
- It will offer unified provider contracts across all state markets that promote the same high standards of access and quality for all patients, regardless of where they obtain their insurance.
- Aligned core set of metrics for access and quality.
- Aligned payment methodologies across all state markets that move providers to shared savings/shared risk and population-based payments.

Policy Package 426 OEBB-PEBB Benefit Management Replacement System

OEBB and PEBB are requesting additional funding to continue with the Benefit Management System (BMS) replacement project. Staff in have finished the system gathering requirements for the new combines benefits management system. Next steps are to submit a Request for Proposal (RFP) for competitive bidding by third party entities able to fulfill the business

need. This new system would allow OEBB and PEBB to modernize all its members' and administrators' user experience. Top modernization goals include:

- The ability to implement and maintain latest security best practices.
- Mobile app compatibility.
- Compatibility with commonly used browsers, operating systems and devices.
- Flexibility to accommodate business partners’ and customers’ needs.
- Expanded automated error checking and data validation.
- Availability of on-demand enrollment and training tools for members and administrators.
- Self-service tools and features for members and administrators.
- Automated dependent eligibility verification among and between OEBB and PEBB member groups.

Oregon Health Authority

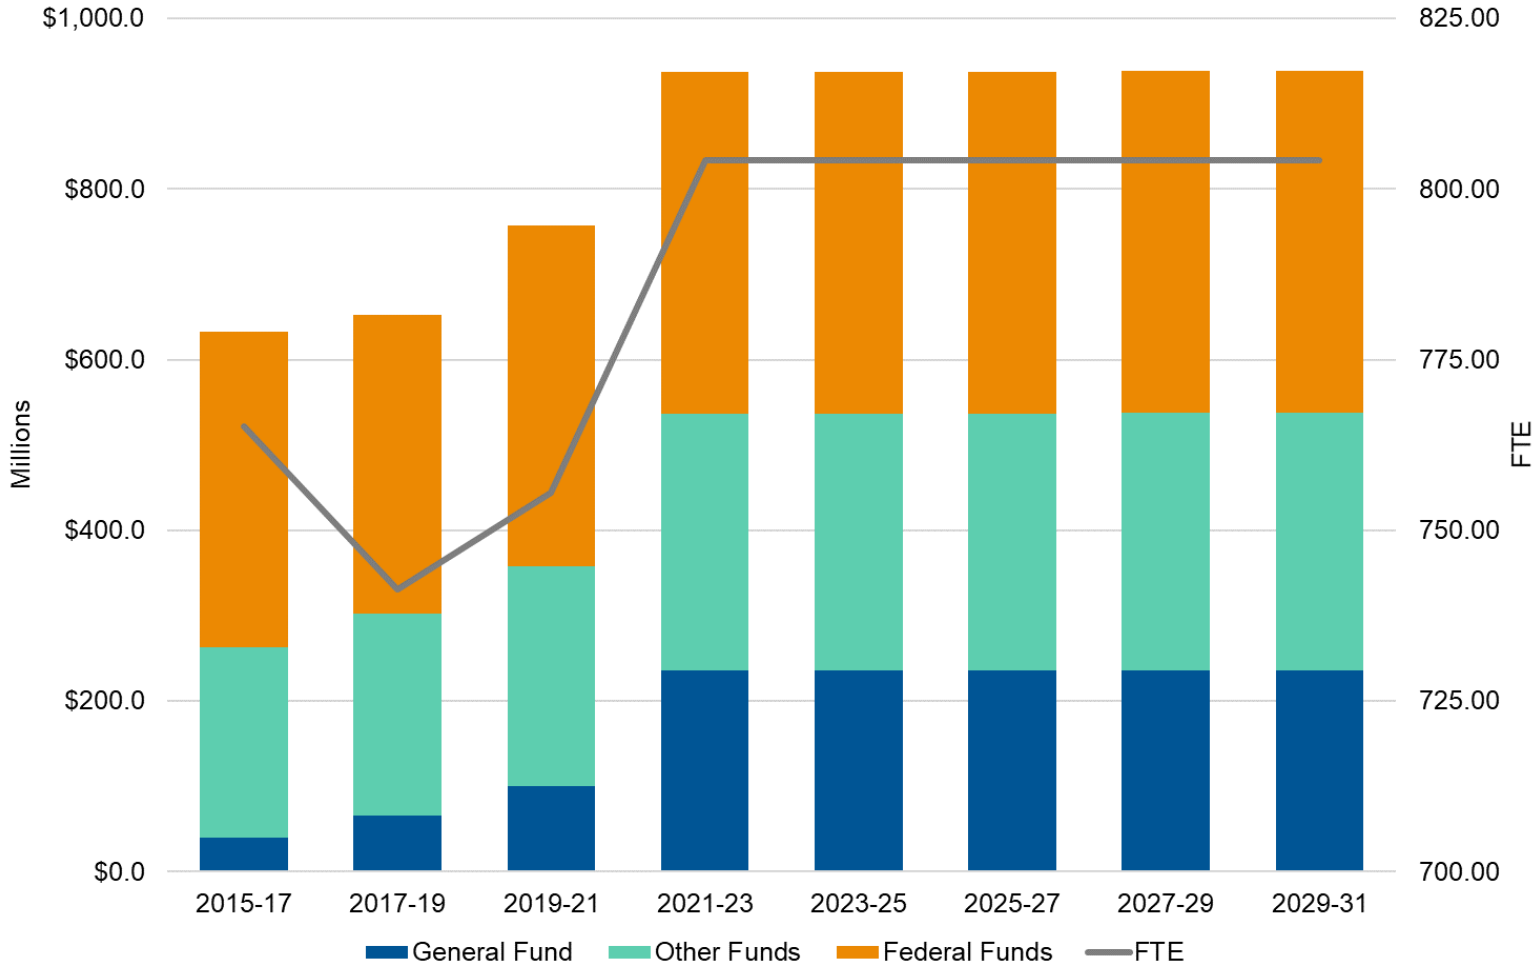
Oregon Health Authority: Public Health Division

Executive Summary

Program Contact: Lillian Shirley, Public Health Director
971-673-1298



Executive Summary

Division overview

Public health is a proven cost-effective means to promote health, improve care and lower or contain health care costs by preventing the leading causes of death, disease and injury in Oregon.

Funding request

The Agency Request Budget of $937 million Total Funds for Public Health continues funding at the current service level for the 2021-23 biennium. This request includes policy package requests for fee increases and investments to improve the lifelong health of all Oregonians, preventing leading causes of death, injury and disease.

Program descriptions

The Public Health Division (OHA-PHD) mission is to promote health and prevent the leading causes of death, disease and injury in Oregon. The OHA-PHD vision is lifelong health for all people in Oregon. OHA-PHD's modernization strategic plan priorities are to expand partnerships to maximize collective action; address health priorities using foundational capabilities; and demonstrate impact through metrics and evaluation. State population health indicators are updated annually and serve as the backbone for the division's reporting of OHA-PHD's key metrics, including key performance measures, Oregon's State Health Improvement Plan (SHIP) measures, and public health accountability measures. OHA-PHD continues to implement the REAL D law and support the use of data to identify and meaningfully address health inequities. Development of the 2020-2024 SHIP incorporated the State Health Assessment and feedback from communities across Oregon to identify the following five priorities for the 2020-2024 SHIP:

- Institutional bias
- Adversity, trauma and toxic stress
- Economic drivers of health (including issues related to housing, living wage, food security and transportation)
- Access to equitable preventive health care
- Behavioral health (including mental health and substance use)

Executive Summary

The 2020-2024 SHIP will be finalized in August 2020 with community-led implementation plans to follow. OHA-PHD will engage Oregon communities and make data and progress transparent and accessible through its new website, www.healthiertogetheroregon.org.

OHA-PHD is a part of the governmental public health system, which includes the federal government, local and Tribal public health authorities. Public health services are delivered either directly from PHD or through contracts with local and Tribal public health authorities, clinics and community-based nonprofit organizations. The major cost drivers to Oregon's public health system are the increasing volume of public health threats and a consistent decrease in federal funding over time.

Oregon's public health modernization effort includes rethinking of business practices so they align with current public health threats. The public health infrastructure developed as a result of public health modernization has been essential to Oregon's response to COVID-19. Specifically, Oregon has benefited from additional state and local epidemiologists to track data, and quickly manage and respond to outbreaks. The ongoing focus on health equity and cultural responsiveness by the public health system has allowed better engagement with community members and community-based organizations. Staff hired with state, local and tribal public health modernization funds have supported the COVID-19 response.

Program justification and link to long-term outcomes

Public health programs and interventions contribute to reductions in health care costs and improved health outcomes through the prevention of disease and injury. OHA-PHD uses evidence-based and culturally appropriate interventions to perform its work. OHA-PHD collects health data to determine what populations and conditions need to be prioritized in order to have the greatest impact, and to evaluate and improve quality and effectiveness of population-based programs and interventions.

Program performance

OHA-PHD has a system of performance measurement and quality improvement to inform program implementation, including data related to the return on investment. Specifically, OHA-PHD collects and reports annually on SHIP health outcome measures, which are also reflected in the Oregon Health Authority Key Performance Measures; public health accountability

measures; and OHA-PHD Strategic Plan measures. Return on investment data are available for the full range of public health programs.

Enabling legislation/program authorization

The Oregon Health Authority plays a central role in ensuring the health of all people in Oregon. Chapters 431 and 433 of Oregon Revised Statutes set forth hundreds of code sections enabling a wide range of public health activities carried out by state public health and its county partners. Federally-funded public health programs are implemented according to federal laws.

Funding streams

For the 2021-23 biennium, OHA-PHD's budget comprises 77 percent General Fund, 17 percent Federal Funds and 6 percent Other Funds. The federal revenue includes not only entitlement grants such as Medicaid (with 90-10 match for contraceptive care) but more than 72 grants that are categorically dedicated to public health programs such as emergency preparedness and hospital preparedness, cancer prevention and control, and safe drinking water.

As a part of COVID-19 response, OHA-PHD has received over $110 million in funding from federal grants to address both the immediate pandemic and long-term strategic planning to create systems that will be able to address this pandemic and any other outbreak in the future.

In addition, OHA-PHD's Other Funds revenue sources include fees for activities in such areas as newborn screening tests (including test services for two other states); licensing of facilities including hospital and special inpatient care facilities; registration inspection and testing of X-ray equipment; testing and certification of emergency medical technicians; fees for issuing certified copies of vital records; and statutorily dedicated funds from the Tobacco Use Reduction Account. Other Funds fees generally are dedicated to entirely support the program that assesses the fee, except medical marijuana program funds, which were legislatively approved to support additional programs.

Executive Summary

Significant proposed program changes from 2019-21

In the 2021-23 biennium, the OHA-PHD is proposing to continue advancements in public health modernization by moving into other high priority areas for the public health system. COVID-19 has highlighted the critical foundational capabilities and systems necessary to make Oregon a healthy place to live. Continued investment in the modernization of the public health system is necessary to achieve the vision of life-long health for all Oregonians.

OHA-PHD proposes to continue to implement and scale up the next phase of Universally offered Home Visiting (UoHV) in Oregon. This continues the phased-in approach of implementing this program.

In order to sustain the costs of service delivery in these programs, Radiation Protective Services, Cosmetology and Respiratory Therapist and Polysomnographic Technologist Boards, ambulance licensing, Oregon Environmental Laboratory Accreditation Program, and the Prescription Drug Monitoring Program, OHA-PHD is proposing fee changes.

OHA-PHD is putting forward a policy package to address funding for the State Support for Public Health (SSPH). This program provides local public health authorities (LPHAs) with basic capacity for communicable disease control investigation and response for diseases. This policy package requests General Fund replace Oregon Medical Marijuana Program fee revenue so that basic communicable disease capacity can be maintained across LPHAs.

OHA-PHD is requesting legislative concepts to address Radiation Protection Services, revising fee authority in statute; Environmental Public Health Lead Paint Contamination Clean-up which will give OHA-PHD authority to require cleanup of homes, schools and day cares contaminated with lead paint; and Emergency Management Services, establishes a new statewide Emergency Healthcare Advisory Board and Regional Boards, which will create state and regional plans to ensure optimal care for all time-sensitive emergency health conditions such as trauma, stroke, pediatrics and cardiac disease.

Finally, OHA-PHD will be phasing in additional legislative work approved in the 2019 session, including ten School-Based Health Center planning grants, addressing the opioid crisis, improvements and changes to the prescription drug monitoring

Executive Summary

program, numerous suicide prevention bills as collaboration with other entities to respond to suspected suicide of school-aged children and young adults, requiring local mental health authorities notify local systems (e.g. schools, justice, alcohol and drug treatment) within 24 hours of the suspected suicide of any student with whom the system had contact, directing school districts to adopt policy requiring a comprehensive district plan on student suicide prevention. OHA will work in collaboration with the Oregon Department of Education (ODE) to implement the Student Success Act and the companion bill to the UoHV work will establish the voluntary universal newborn nurse home visiting statewide with services covered by health benefit plans. The 2019 session also referred a measure to the November 2020 ballot around cigarette tax.

OHA-PHD continues to be primarily funded through federal grants. During 2017-19, several federal grants have decreased or remained flat funded. This decline in federal funding is expected to continue during 2019-21, and the programs will need to adjust services accordingly.

Office of the State Public Health Director

Expenditures by fund type, positions and full-time equivalents

	General	Other/Lottery	Federal	Total Funds	Positions	FTE
Leg. Approved 2019-21	$27.75	$8.53	$18.05	$54.32	57	55.56
Agency Request 2021-23	$91.39	$7.55	$19.45	$118.39	77	76.50
Difference	$63.65	-$0.98	$1.40	$64.07	20	20.94
Percent Change	229%	-11%	8%	118%	35%	38%

The Agency Request Budget of $118.4 million Total Funds continues funding for the Office of the State Public Health Director programs at the current service level for 2019-21. This budget also includes two policy package requests. The first package requests $1.5 million to backfill State Support to Local Public Health and the second requests $67.6 million for public health modernization.

Activities, programs and issues in the program unit base budget

The Office of the State Public Health Director (OSPHD) guides the strategy, operations, scientific activities, communication and policies of all public health programs and ensures that Oregon's public health system is effective, efficient and coherent. The office sets state and division-wide public health priorities in collaboration with state and local agencies and organizations. The work of the office includes providing leadership for the division and governmental public health in health equity and cultural responsiveness. Under the leadership of the OSPHD, the state public health system is organized by three centers: Center for Public Health Practice, Center for Prevention and Health Promotion, and Center for Health Protection.

OSPHD provides scientific, fiscal, policy and operations leadership to all public health programs and is organized into three units: Fiscal and Business Operations, Science and Epidemiology, and Policy and Partnerships.

Office of the State Public Health Director

The Fiscal and Business Operations Unit manages the Oregon Health Authority Public Health Division (OHA-PHD) budget process, fiscal management, legislation, contracts, human resources, building operations, risk and safety, business continuity, volunteer coordination, quality improvement activities and workforce development. The fiscal staff have been instrumental in addressing COVID-19 financial responsibilities as part of the Incident Management Team.

The Operations section leads division wide initiatives that improve the effectiveness of a modern public health system by focusing on five priorities:

- Maintain PHD's national accreditation status; support local and tribal health departments in the national accrediting process.
- Provide strategic oversite and coordination across PHD's Health Information Technology projects, including data visualization, to ensure data interoperability across PHD and OHA data operating systems; and increase transparency and use of data to improve population health.
- Guide the implementation of PHD's modernization change plan as part of OHA's performance management system and PHD's quality improvement priorities.
- Guide the implementation of PHD's Workforce Development plan, with a focus on health equity and the foundational capabilities of a modern public health system.
- Provide leadership and guidance on developing and implementing PHD's Continuity of Operations Plan, safety procedures and practices, and coordination of general logistics and program operations across the division.

The Science and Epidemiology Unit includes population health data collection and reporting, program evaluation, clinical aspects of state public health service delivery, and ethical review of public health studies involving human subjects through the OHA-PHD Institutional Review Board.

The Policy and Partnerships Unit leads the development and execution of strategic initiatives to improve health equity and cultural responsiveness across governmental public health practice. The unit is responsible for supporting legislative policy

strategy and administrative rulemaking and executing division and statewide plans, which support OHA-PHD's nationally-accredited status, including Oregon's State Health Improvement Plan (SHIP) and the OHA-PHD Strategic Plan. The unit develops systems across OHA-PHD to build health equity policy and practice; coordinates with the Legislature; and cultivates strategic partnerships with local public health authorities, federally-recognized tribes, community-based organizations, coordinated care organizations and other state agencies.

The Policy and Partnerships Unit leads efforts to further advance health equity across OHA-PHD by facilitating a division-wide health equity workgroup charged with accomplishing three broad goals:

1. Fostering a shared understanding of and will to achieve health equity, cultural responsiveness, and trauma-informed approaches in the Public Health Division.
2. Adopting organizational structures, policies, and systems as described in the Public Health Modernization Manual to advance health equity, diversity, and cultural responsiveness in OHA-PHD.
3. Adopting policies, systems, and structures to engage non-dominant groups as described in the Public Health Modernization Manual to co-create objectives and metrics for goals in the health equity workgroup work plan.

The work to accomplish these goals includes:

- Revisiting previous health equity assessments and plans to identify gaps.
- Developing and implementing a communication plan to advance health equity.
- Collaborating with the OHA Office of Equity and Inclusion, regional health equity coalitions, and affected communities and populations regarding comprehensive health equity planning and development.
- Assessing OHA-PHD's ability to detect and locate inequities in communities.
- Finding opportunities to increase the collection of race, ethnicity, language and disability (REAL D) data, highlighting the most striking inequities, and communicating those to key stakeholders and partners.
- Examining data on the social determinants of health by race, ethnicity and language, gender identity, place, and poverty status.

- Selecting, designing, implementing and evaluating additional health equity strategies for Oregon's SHIP and applying equity impact assessments to all proposed strategies to determine their likelihood of effectively impacting targeted disparities.
- Building PHD organizational structures, policies and supports to promote workforce diversity.

Background information

OSPHD responds to public health issues by providing leadership and oversight to public health programs that:

- Protect health through public health regulations.
- Identify and respond to disease outbreaks.
- Develop public health policies, systems and environmental changes that prevent disease and promote health with a focus on the structural determinants of health, including systemic racism, oppression and institutional bias, and the social determinants of health like housing, education and employment.

OSPHD works to ensure that decisions and priorities set in Oregon are data-driven and use best practice. As more Oregonians have access to health care, public health's activities continue to transition away from providing safety-net health care services toward population-wide policy, systems and environmental changes. This work includes extensive coordination with Oregon's local public health authorities and federally recognized tribes. State public health programs also partner with a range of state and local agencies and organizations, health care providers, insurers, coordinated care organizations, community-based organizations, federal agencies and the private sector. Within state government, the office's staff work closely with and serve as liaisons between public health programs and the state departments of Transportation, Education, Environmental Quality, Land Conservation and Development, Corrections and other divisions within OHA in order to work collaboratively on health equity and the structural and social determinants of health across state and local government.

Office of the State Public Health Director

Strategic planning and accountability

OSPHD is responsible for maintaining OHA-PHD's status as a nationally accredited health department. This includes development of an annual report and ongoing support for three prerequisites: a state health assessment, a state health improvement plan, and an organizational strategic plan, developed every five years. In 2018, OSPHD published Oregon's second State Health Assessment, which includes a set of quantitative state population health indicators. State population health indicators are updated annually and serve as the backbone for OSPHD's reporting of OHA-PHD's key metrics, including key performance measures, Oregon's State Health Improvement Plan (SHIP) measures, and public health accountability measures. OSPHD continues to implement the REAL D law and support the use of data to identify and meaningfully address health inequities. From 2018-2020, OSPHD convened the PartnerSHIP, a multisector charged with guiding the development of the 2020-2024 SHIP. The PartnerSHIP used the State Health Assessment and feedback from communities across Oregon to identify the following five priorities for the 2020-2024 SHIP:

- Institutional bias
- Adversity, trauma and toxic stress
- Economic drivers of health (including issues related to housing, living wage, food security and transportation)
- Access to equitable preventive health care
- Behavioral health (including mental health and substance use)

Currently, OSPHD is finalizing the 2020-2024 SHIP through subcommittees of the PartnerSHIP that have been meeting since August 2019 to develop goals, strategies and process measures to hold OHA-PHD accountable for implementation of the SHIP. The PartnerSHIP subcommittees have included 97 individuals representing 62 different organizations. Current efforts for public review and comment on the draft SHIP include mini grants with culturally-specific organizations across the state to ensure the SHIP prioritizes the needs of Oregon's diverse communities.

The 2020-2024 SHIP will be finalized in August 2020 with community-led implementation plans to follow. OHA-PHD will engage Oregon communities and make data and progress transparent and accessible through its new website, www.healthiertogetheroregon.org.

To implement the SHIP, OSPHD will work closely with community-based organizations, state, local and tribal government agencies and OHA programs and staff. OSPHD partners with the OHA Health Policy and Analytics Division to support implementation of community health improvement plans by local public health authorities, coordinated care organizations and nonprofit hospitals so that these plans can also be used to achieve statewide health outcomes.

Public health modernization
Since 2013 OSPHD has provided leadership for Oregon's public health modernization initiative. This effort began with House Bill 2348 (2013), which established the Task Force on the Future of Public Health Services, recommendations from which were used to create House Bill 3100 (2015). Since then, the Office of the State Public Health Director has worked to implement House Bill 3100, which:

- Adopted a series of foundational capabilities and programs for governmental public health, including cultural responsiveness and health equity.
- Changed the composition and role of the Oregon Public Health Advisory Board on January 1, 2016.
- Required an assessment of how foundational capabilities and programs are provided and what resources are needed to achieve full implementation.
- Requires local public health authorities to submit plans for implementing the foundational capabilities and programs no later than December 2023.

Further refinements to the implementation of public health modernization were made with the passage of House Bill 2310 (2017). For the 2017-19 biennium, the Legislature made an initial $5 million General Fund investment in public health

modernization. In the 2019-21 biennium, the Legislature added an additional $10 million General Fund investment for public health modernization. In October 2019 OSPHD awarded $10 million of this investment to local public health authorities to:

- Continue to enhance regional infrastructure created during the 2017-19 biennium, including regional epidemiologist positions, data analysis and surge capacity agreements.
- Build local public health authority work related to health equity and cultural responsiveness, leadership and organizational competencies, and communicable disease and environmental health interventions.

OSPHD has also awarded $1.1 million to federally-recognized tribes to:

- Conduct public health modernization assessments and develop public health modernization plans.
- Begin implementation of tribal public health modernization plans.

OSPHD is using the remaining public health modernization General Fund investment to:

- Provide technical assistance and support to local and public health modernization grantees and coordinate statewide communicable disease control efforts.
- Provide staff support and capacity building for health equity and cultural responsiveness.
- Update public health surveillance systems to be co-designed with communities and researchers of color, incorporate new data collection methods and provide more granular levels of data.
- Evaluate the effectiveness of the public health modernization investment, including annual collection and reporting of public health accountability measures.
- Upgrade public health data systems.

Per ORS 431.123, the Public Health Advisory Board, a 17-member committee of the Oregon Health Policy Board, supports implementation of public health modernization. The Public Health Advisory Board also oversees Oregon's State Health

Assessment, SHIP and the Preventive Health and Health Services Block Grant. The Public Health Advisory Board has two subcommittees:

- The Incentives and Funding Subcommittee is charged with developing a formula for distributing state funds for local public health authorities using the criteria set forward in ORS 431.380.
- The Accountability Metrics Subcommittee manages a series of quality measures for which state and local public health authorities will be financially accountable through the implementation of public health modernization.

The public health infrastructure developed as a result of public health modernization has been essential to Oregon's response to COVID-19. Specifically, Oregon has benefited from additional state and local epidemiologist positions to track data to quickly manage and respond to outbreaks. The ongoing focus on health equity and cultural responsiveness by the public health system has allowed better engagement with community members and community-based organizations. Staff that have been hired by state, local and tribal public health modernization funds have supported the COVID-19 response. Finally, work to prevent communicable disease transmission in high risk settings including long-term care facilities and homeless shelters was already underway across the state before the COVID-19 pandemic hit Oregon, so those relationships have been leveraged to respond to COVID-19.

The Public Health Advisory Board has adopted a health equity policy and procedure to ensure all board decisions promote equity and do not promote or further health inequities. The local public health authority funding formula includes several variables related to health equity so that future General Fund resources can be targeted to communities experiencing the greatest burden of poor health outcomes.

OSPHD continues to lead OHA-PHD's work on the OHA Performance System, including measure specification, data collection, and quarterly performance reviews.

Revenue sources and changes

The 2021-23 budget for the Office of the State Public Health Director is composed of 77 percent General Fund, 17 percent Federal Funds (primarily through the agency's federally approved cost allocation plan), and 6 percent Other Funds.

Of the General Fund, 51 percent is pass-through funding to local health departments to support local communicable disease outbreak surveillance. The remaining General Fund is used to fund new positions to support the implementation work of modernization, data and collection, and enhancements to critical data systems at the state.

The Legislature appropriated an additional $10 million General Fund in the 2019-21 biennium, building on a $5 million General Fund investment in the previous biennium, to support the ongoing implementation of public health modernization. Most of this new investment will fund local and tribal public health authorities to carry out public health interventions in communities experiencing the greatest burden of poor health outcomes. A smaller portion will fund positions and contracts at the state level that are essential for the effective and efficient delivery of public health protections and coordination across the public health system.

The Legislature also appropriated $5.5 million General Fund to continue support for local communicable disease outbreak surveillance at the current service level. This General Fund reduced the Oregon Medical Marijuana Program (OMMP) obligation to support the work.

The office also receives federal funding from the Centers for Disease Control Preventive Health and Health Services Block Grant to address state-determined public health priorities.

In March 2020, OSPHD received a $5 million General Fund investment in the public health system response to COVID-19, including case investigation. A total of $4 million was allocated to local public health authorities and tribes through

amendments to existing contracts. The remainder was allocated to expenses for testing supplies and equipment at the Oregon State Public Health Laboratory.

In July 2020, OSPHD received $94.2 million in additional funding through the Federal Coronavirus Aid, Relief, and Economic Security (CARES) Act to support culturally and linguistically responsive community engagement and education, case investigation, contact tracing and social services and wraparound supports related to isolation and quarantine. These funds are being allocated to all local public health authorities, tribes and a network of community-based organizations to support the next six months of the COVID-19 response.

Proposed new laws that apply to the program unit

Legislative Concept 3 – Local Public Health Authority is designed to clarify existing statutory language and definitions related to local public health authority and governing body of the local public health authority.

Legislative Concept 5 – Public Health Housekeeping includes minor changes to statutes to correspond with program implementation.

Legislative Concept 6 – Public Health Modernization is a placeholder to accompany policy package #417 – Public Health Modernization. This LC may be used to further refine implementation of public health modernization.

Center for Protection

Expenditures by fund type, positions and full-time equivalents

	General	Other/Lottery	Federal	Total Funds	Positions	FTE
Leg. Approved 2019-21	$12.00	$39.31	$19.00	$70.31	226	218.92
Agency Request 2021-23	$16.49	$42.84	$19.76	$79.09	232	230.75
Difference	$4.49	$3.53	$0.76	$8.78	6	11.83
Percent Change	37%	9%	4%	12%	3%	5%

The 2021-23 Agency Request Budget of $79 million Total Funds continues funding for some of the Center for Health Protection programs at the current service level. The budget includes fee changes through policy packages in three sections. Radiation Protection Services (RPS) policy package #448 ensures that RPS continues conducting radiological health and safety regulatory inspections, issue licenses, and meet emergency response requirements. The Emergency Medical Services program in Health Care Regulation and Quality Improvement Section, policy package #450, fee increase allows the program to continue to conduct on-site licensing surveys of ambulance agencies and vehicles, and complaint investigations to ensure that ambulance agencies and vehicles provide high-quality and safe services; and the Cosmetology policy package #447 and Respiratory Therapist Boards policy package #452 in the Health Licensing Office both ensure the boards are able to issue licenses to applicants in a timely manner and protect the public from potential health and safety violations.

Activities, programs and issues in the program unit base budget

The Center for Health Protection (CHP) protects the health of individuals and communities by establishing, implementing, and ensuring compliance with regulatory and health-based standards. CHP protects people in Oregon from environmental health hazards including those that may occur in drinking water, through exposure to radiation, in recreational waters, and through food. The center establishes, applies and ensures compliance with critical areas of health care policy, in support of Oregon's triple aim. It requires patient safety efforts and quality improvement activities by health care providers. The center's six sections partner with local public health authorities, communities affected by environmental health hazards, private practitioners and

medical experts. When requested and as resources allow, the center also provides state agency partners with evidence-based information about public health and health equity implications of their policies and programs.

Radiation Protection Services (RPS) protects workers, patients, and the public from unnecessary and unhealthy radiation exposure. This is accomplished through on-site facility inspections, licensing of radioactive materials, and registration of X-Ray and tanning devices, environmental monitoring, and radio analytical laboratory services. This section provides Oregon's sole public resource for radiation-related incidents, whether accidental or intentional. In addition, the section collaborates with licensing boards to ensure operators and workers are properly trained and credentialed.

Drinking Water Services (DWS) ensures the safety of drinking water provided by all public water systems in Oregon. The program administers and enforces state and federal safe drinking water quality standards; prevents contamination of public drinking water systems by protecting drinking water sources; ensures public water systems meet standards for design, construction and operation; certifies and trains water system operators; inspects public water systems and ensures that identified deficiencies are corrected; and provides technical assistance to public water suppliers to solve operational problems. DWS also provides low-cost financing to communities to construct safe drinking water infrastructure, including funding assistance to underserved and economically disadvantaged communities for these projects.

Environmental Public Health (EPH) identifies, assesses and reports on threats to human health from exposure to environmental hazards. It also advises the people and communities of Oregon about potential risks where they live, work, learn and play. EPH works closely with local, state and federal natural resource management, occupational safety, environmental and other agencies to understand risks to human health posed by changing conditions, policies and practices. EPH recognizes that communities of color and lower-income communities are disproportionately at risk for environmental exposures and prioritizes its work accordingly. EPH's priorities are that all people in Oregon benefit from healthy air and water; healthy homes and neighborhoods; communities that are resilient to flood, fire, drought and other changing climate effects; land-use and built-environment policies that support health; and rules that ensure safe food, lodging, and recreational facilities.

Center for Protection

Oregon Medical Marijuana Program (OMMP*)* administers the Oregon Medical Marijuana Act (OMMA). The OMMP oversees the medical marijuana cardholder registry for patients and regulates medical marijuana dispensaries, processing sites, growers and grow sites. The program ensures compassionate and responsible access to medical marijuana products. This includes the timely review of cardholder registry applications and maintaining and ensuring patient confidentiality. The program's compliance and enforcement unit ensure compliance with OMMA and administrative rules by medical marijuana dispensaries, processing sites, growers, and grow sites. To comply with OMMA, the program administers a database for registering patients, growers and facilities, and for reporting and tracking the production and transfer of medical marijuana products.

Health Care Regulatory and Quality Improvement (HCRQI) ensures safe and high-quality health care through assessment, education and regulation for an array of health facilities and providers through two programs; the Health Facility Licensing and Certification program and the Emergency Medical Services and Trauma Systems (EMS/TS) program.

The Health Facility Licensing and Certification program licenses and certifies health care facilities, providers and suppliers in acute care and community-based programs. These include hospitals, hospital nurse staffing, home health agencies, in-home care agencies, hospice programs, ambulatory surgical centers, rural health clinics, kidney dialysis facilities, birthing centers, hemodialysis technicians, and many other state and federal providers.

The EMS/TS program ensures the effectiveness and coordination of the state’s emergency medical response system for illness and injury. The program encourages improvements in the emergency care of pediatric patients and regulates systems that provide emergency care to people who experience a sudden illness or traumatic injury.

Health Licensing Office (HLO) is a central licensing and regulatory office that oversees multiple health and related professions. HLO protects the health, safety and rights of Oregon consumers by ensuring that only qualified applicants are authorized to practice. HLO reviews and approves applicant qualification, conducts examinations, inspects thousands of

licensed facilities and independent contractors, responds to and investigates consumer complaints, and disciplines licensees who violate state requirements.

Center for Health Protection programs are engaged in or working toward the following health equity and inclusion strategies:

- Increasing cultural competency among staff and advisory board members.
- Increasing workforce diversity.
- Providing funding assistance for safe drinking water system construction projects in underserved and economically disadvantaged communities.
- Leading integration of health equity as a core priority in the Public Health Division's Environmental Health Modernization plan and providing equity leadership in state agency collaborations such as the 23-agency Climate Adaptation Framework initiative.
- Reviewing regulatory and compliance procedures to address discrimination issues.
- Collecting and reporting data that are disaggregated by race, ethnicity, language and disability status (REAL D).
- Conducting health equity impact analyses on new and existing efforts.

Background information

Most Center for Health Protection programs are grounded in the principles of population-based public health, providing services and regulatory oversight for all people in Oregon.

Radiation Protection Services (RPS) licenses or registers more than 14,000 sources of radiation statewide. It routinely inspects those radiation sources in more than 4,200 facilities including hospitals, dental and medical clinics, radiation oncology clinics, tanning salons, high tech manufacturing firms, academic and research facilities, paper and pulp processing plants, foundries, and mineral extraction facilities. These facilities are located across all 36 counties. Several RPS staff members also support OHA's state-wide COVID response efforts by serving as contract tracers and in the agency Incident Management Team (IMT) roles.

Center for Protection

Drinking Water Services (DWS) regulates nearly 3,400 public water systems statewide. The section certifies 1,700 public water system operators and 1,500 backflow device testers and specialists. Contracts with county health departments and the Oregon Department of Agriculture provide for local regulation of smaller public water systems served by groundwater sources. DWS regulates larger public water systems and those with treatment systems and provides technical assistance to water systems and partners. DWS provides technical expertise and best management practices related to emerging contaminants that may affect drinking water quality, including Harmful Algal Blooms, Per and polyfluoroalkyl substances (PFAS) and Legionella. Additionally, DWS staff participated in OHA's IMT COVID-19 response including contact tracing.

Environmental Public Health (EPH) protects Oregon communities from health risks in the environment and is the state's primary point of scientific and technical expertise on health concerns pertaining to built and natural environments. EPH is organized into regulatory, assessment and surveillance units. During 2019-21, the program saw increased workloads in its role implementing the Oregon Department of Environmental Quality's new "Cleaner Air Oregon" regulatory program, and in work related to climate change and health. This included analyses to inform policymakers' understanding of impacted communities, and leading health equity work for a multi-agency update of the state's Climate Adaptation Framework. Beginning in March 2020, the program's Food, Pool and Lodging Health and Safety Program assumed a major new workload as the source of technical expertise, rule writing and guidance development, interagency memoranda of understanding development, and liaison to local public health authority environmental health programs for implementation and enforcement of numerous elements of the Governor's Executive Orders to respond to the coronavirus pandemic for both closure and reopening.

EPH's primary regulatory program is Food, Pool and Lodging Health and Safety, which assists local health departments to ensure safety for more than 20,000 full-service and temporary restaurants, public pools, and tourist accommodations. Other programs regulate clandestine drug lab clean-up (2,100 cleaned up since 1990) and lead-based paint-related activities. This unit also includes the Toxic-Free Kids program, which regulates hazardous chemical reporting and removal by manufacturers of children's products.

Center for Protection

EPH assessment programs evaluate areas of environmental concern to ensure impacts to human health are included in action plans for air quality, contamination from hazardous waste sites, brownfield redevelopment plans, transportation and land use plans, hazards related to climate change and fish consumption. Assessments and stakeholder engagement activities take into consideration that some communities face greater risks or are more vulnerable to risks and make recommendations to address environmental health inequities.

EPH surveillance programs monitor data on lead poisoning, radon, pesticide exposures, occupational health, domestic well safety, beach safety, harmful algae blooms and other environmental hazards leading to potential related health outcomes. The surveillance programs inform people in Oregon about measures to prevent and respond to exposures to these environmental hazards. EPH uses an equity lens to identify and direct efforts to priority populations at disproportionate risk from environmental health hazards.

Oregon Medical Marijuana Program (OMMP) serves medical marijuana patients and their caregivers, and regulates medical growers, grow sites, dispensaries, and processing sites. The program continues to undergo major changes as the Legislature works to define the regulatory scheme for both the medical and retail marijuana markets. Senate Bill 1057 (2017) required OMMP medical dispensaries, processing sites and specific grow sites to begin using the Oregon Liquor Control Commission's (OLCC) cannabis tracking system (CTS) by July 1, 2018, to track the propagation of marijuana. OLCC inspects these grow sites and refers violations to OMMP for enforcement. The program is also responsible for enforcing reporting requirements for growers at locations required to report into the state's Oregon Medical Marijuana Online System (OMMOS). House Bill 2198 (2017) established the Oregon Cannabis Commission within OHA. The commission is tasked with advising OHA and OLCC on the administration of medical and recreational cannabis regulations.

Registrations and associated fee revenues continue to decline since legalization of marijuana in 2015. Many factors have contributed to this decline, including:

- An influx of medical patient, dispensary, and processor applications right before legalization that temporarily inflated the number of registrants in the medical program.

- No longer any medical processing sites and few dispensaries provide marijuana products other than flower to patients.
- New laws for the tracking and reporting of marijuana that reduced the number of growers growing for multiple patients.

The continued transition of registered medical facilities to licensed recreational facilities with OLCC has significantly affected revenue. The number of registered OHA medical dispensaries has fallen from 423 to 3. Processing sites declined from 178 applications to zero in 2020. Additionally, the number of patients paying full price for medical cards has decreased as most applicants now pay a reduced fee. Currently approximately 24,015 patients, 9,884 growers, and 8,245 grow sites are registered with OMMP. Additionally, OMMP staff participated in OHA's IMT COVID-19 response including contact tracing and assisted with guidance and enforcement of the Governor's Executive Orders related to COVID-19 and Oregon's re-opening.

Health Care Regulatory and Quality Improvement (HCRQI*)* oversees an array of health facilities, providers, the Health Facilities Planning and Safety program, and the Certificate of Need program. The Health Facility Licensing and Certification program oversees approximately 94 ambulatory surgical centers, 14 birthing centers, 77 dialysis facilities, 713 hemodialysis technicians, 71 home health agencies, 61 hospice agencies, 65 hospitals and hospital nurse staffing programs, 178 in-home care agencies, 104 rural health clinics, and 10 other provider types.

The Health Facilities Planning and Safety unit works to ensure that newly constructed or remodeled facilities are safe and effective and meet nationally accepted building standards. This program reviews design and construction plans and issues project approvals for approximately 200 health facility projects annually. The Certificate of Need program evaluates whether a proposed service or facility is needed and works to control the rapidly escalating costs of health care through planning and regulation. This unit also provides review for facilities regulated by Department of Human Services.

Emergency Medical Services and Trauma Systems (EMS/TS) Program works with partners and nine advisory boards using three statewide EMS/TS public health data systems to monitor and improve the emergency care systems. The program licenses 136 ambulance service agencies, 740 ambulances, approximately 11,996 Emergency Medical Services Providers (EMSPs): 1,609 Emergency Medical Responders (EMR), 5,357 Emergency Medical Technicians (EMT), 694 EMT-Intermediate, 204

Advanced EMTs and 4,132 Paramedics. It also certifies all EMT training courses and its Mobile Training Unit provides 8,700 hours of continuing education to over 4,000 EMSPs in nearly 200 rural and frontier communities. The Trauma program inspects 45 designated trauma centers.

HCRQI also serves as the pass-through entity for the authorized $1.95 million General Fund to support the Early Discussion & Resolution program at the Oregon Patient Safety Commission and receives funds to support a contract with Oregon Health and Sciences University for administration of the Oregon Physician's Orders for Life Sustaining Treatment (POLST) Registry.

Additionally, the section worked in OHA's and the state's COVID-19 Incident Management Teams and pandemic response to provide regulatory guidance and flexibility options for affected health care facilities and providers during the initial surge and again during Oregon's reopening.

Health Licensing Office (HLO) works with 16 boards, councils and programs: Art Therapy; Athletic Trainers; Behavior Analysis; Certified Advanced Estheticians; Cosmetology; Denture Technology; Dietitians; Direct Entry Midwifery; Electrologists and Body Art Practitioners; Environmental Health Specialists; Hearing Aid Specialists; Lactation Consultant; Long Term Care Administrators; Music Therapy; Respiratory Therapy and Polysomnography; and Sexual Offense Treatment. In 2019, HLO administered 8,864 examinations, issued 9,105 licenses and registrations, renewed 46,349 licenses and registrations, conducted 6,463 inspections, investigated 362 complaints, and monitored 5,531 facilities and 41,723 licensees. In 2020 HLO staff assisted with guidance and enforcement of the Governor's Executive Orders related to the COVID-19 response and Oregon's re-opening.

Revenue sources and changes

The 2021-23 Center for Health Protection budget comprises 54 percent Other Funds, primarily in the form of fees for services, 25 percent Federal Funds, and 21 percent General Fund. Funding for each program is described below.

Center for Protection

Radiation Protection Services (RPS) receives funding from three fee-based regulatory programs. They are the X-Ray Machine Program, Radioactive Material Licensing Program and the Tanning Device Program. All three collect fees by licensing or registering devices that produce or contain radiation sources. Gross fees total approximately $4.3 million per biennium. Individual or business entities that own these devices pay the fees. RPS has fee increase requests for all fees through policy package #448. Without additional revenues, RPS budget solvency will be threatened in 2021-23, leading to significant program staff and service reductions and breaching of inter-agency agreements.

Drinking Water Services (DWS) receives funding from federal grants, fees and the General Fund. In the 2019-21 biennium DWS received an allocation of $4.4 million from the General Fund. DWS also collects fee revenue from four sources/programs, totaling roughly $4 million per biennium: Backflow Tester/Specialist Certification, Water System Operator Certification, Water System Plan Review fees and Water System Annual Fees. The latter Annual Fee was provided for by Senate Bill 27 passed by the 2019 Legislature. Increases of the Annual Fee are capped at 3 percent per year. Revenue from fees and the General Fund contribute to the required state match for federal grants.

DWS receives two federal grants from the Environmental Protection Agency (EPA) which together constitute the largest source of program revenue: The Drinking Water Primacy grant ($3.2 million per biennium) and the Drinking Water State Revolving Fund (DWSRF) capitalization grant. The DWSRF includes support for infrastructure project financing (69 percent) and set-asides for specific program functions (31 percent). DWSRF set-asides contribute roughly $9 million per biennium to supporting specified program costs.

Environmental Public Health (EPH) receives most of its funding from federal grants and fees, with small amounts of additional funding coming from intergovernmental agreements for collaborative projects with state agency partners and the General Fund.

EPH receives Federal Funds revenue from the Centers for Disease Control and Prevention (CDC) grants for Climate and Health, Environmental Public Health Tracking, Domestic Well Safety, and Childhood Lead Poisoning Prevention. It also

receives the National Institute for Occupational Safety and Health grant for Occupational Public Health; CDC's Agency for Toxic Substances and Disease Registry (ATSDR) grant for Environmental Health Assessment; and Environmental Protection Agency (EPA) grants for monitoring and public outreach for radon, beach monitoring, and lead-based paint programs.

EPH receives Other Funds revenues through intergovernmental agreements with county health authorities that collect license fees on OHA's behalf to support foodborne illness, public pool, and tourist facility health and safety activities. (The 2019-21 Legislatively Adopted Budget increased these fees, which were last revised in 2003.) OHA health risk assessment and communication work to support the Oregon Department of Environmental Quality's (DEQ) Cleaner Air Oregon industrial air toxics regulatory program is funded through a DEQ-OHA interagency agreement. The Pesticide Exposure Safety and Tracking Program is funded through an interagency agreement with Oregon Department of Agriculture, while brownfields projects may be funded through Business Oregon. Fee-based revenue also supports the Clandestine Drug Lab Program and some lead-based paint activities.

The section also receives a small amount of General Fund to help support its assessment and surveillance efforts, the Toxic Free Kids Act (TFKA) program authorized in Senate Bill 478 (2015) and an Emerging Environmental Health Threats position funded through the legislature's 2019 Public Health Modernization investments, for which the current priority is supporting cross-agency and interagency wildfire and health-related activities.

Oregon Medical Marijuana Program (OMMP) section collects fees for issuing medical marijuana cards to qualifying patients and maintains a registry of those patients. The program also collects fees for the registration of grow sites, dispensaries and processing sites and collects a pass-through fee for entities required to use the OLCC cannabis tracking system. Program revenue continues to decline since the legalization of recreational marijuana. Each year since legalization in 2015, the number of patients applying to the program has decreased an average of 23% from the year before. In 2017-19, this program transferred $7.1 million in revenue to support State Support for Public Health (SSPH), reducing SSPH's General Fund need. In 2019-21 the support for SSPH, was reduced to $1.5 million. However, the program cannot sustain that cost and in 2021-23, the section will not be able to support its own operating expenses. Policy package #428 is included in the director's office which will increase

General Fund for SSPH and remove the obligation from OMMP. The section also receives $228,000 General Fund, to support the Oregon Cannabis Commission. Revenue impacts from COVID-19 on the state budget will likely result in budget cuts from this fund.

Health Care Regulation and Quality Improvement (HCRQI) section receives federal funding from the Centers for Medicare and Medicaid Services to perform health facility surveys and certification. The section also has several regulatory responsibilities supported by fees and some regulatory work with hospital nurse staffing and in-home care agencies that is supported by the General Fund. The Health Facility Licensing and Certification program funding sources that are fee based include: certificate of need, health facility and long-term care facility plans review, hospitals, ambulatory surgery centers, birthing centers, dialysis facilities, home health agencies, hospice, in-home care agencies.

Emergency Medical Services and Trauma Systems (EMS/TS) program within HCRQI receives federal funding from the Health Resources & Services Administration to administer the Oregon EMS for Children program. In addition to Federal Funds, EMS/TS has four primary funding sources. Fees support the licensing and oversight of emergency medical services providers and ambulance services. EMS/TS also receives about $3.2 million General Fund per biennium and roughly $331,000 per biennium from the Criminal Fines and Assessment Account, as provided by ORS 137.

HCRQI also receives $1.95 million General Fund as a pass-through to support the Oregon Patient Safety Commission's Early Discussion and Resolution program and receives funds to support a contract with Oregon Health and Sciences University for administration of the Oregon Portable Orders for Life Sustaining-Treatment (POLST) Registry.

The Health Licensing Office (HLO) collects fees for applications, examinations, issuance and renewals of licenses and registration, disciplinary actions and other administrative fees. Each board, council and program have its own fees, which are used to cover their administrative costs and HLO. They collect more than $7 million in fees, which continues to increase as new boards, programs or license types are added to HLO.

Proposed new laws that apply to the program unit

Legislative Concept 8 and Policy Package #448 — Radiation Protection Services (RPS) would revise fee authority to sustain program funding and operating costs. The legislative concept and policy package restructures the RPS X-ray registrant user-fee model, institutes X-ray vendor licensing fees, and implements tanning registrant and radioactive material licensing user-fee increases. Without the revised fee authority and additional revenue, RPS's mission and regulatory obligations are threatened with a large funding gap resulting in significant reductions in regulatory and safety services and staffing. The proposed funding measures will allow the section to maintain current staff levels and services and eliminate a funding deficit that would result in inadequate radiation protection and safety for all Oregonians.

Legislative Concept 5 — Environmental Public Health (EPH) Lead Paint Contamination Clean Up would give OHA authority to require cleanup of homes, schools and day cares contaminated with lead paint. Currently, when a landlord, property manager, school district, or child-care operator has created a risk of exposure to lead paint inside or outside a residence or facility (lead dust, paint chips), OHA can levy a civil penalty for failure to implement lead-safe renovation, repair and painting practices spelled out in federal rules the state has incorporated by reference. However, OHA cannot require the responsible party to clean up the property. The legislative concept gives the agency statutory authority to issue a stop-work order for ongoing unsafe work, and to require certain parties responsible for lead-based paint contamination of a residence, school or childcare facility to properly assess and decontaminate the residence or facility.

Legislative Concept 9 and Policy Package #450 — Health Care Regulation and Quality Improvement (HCRQI) EMS Modernization would expand existing structures to create an integrated and comprehensive Emergency Healthcare System that recognizes emergency care issues determines which services are needed and then delivers those resources where they are needed; Right Care, right time and right place. The concept establishes a new statewide Emergency Healthcare Advisory Board and Regional Boards, which will create state and regional plans to ensure optimal care for all time-sensitive emergency health conditions such as trauma, stroke, pediatrics and cardiac disease. The proposal also includes patient registries for all time-sensitive emergencies and an EMS Mobilization Plan for surge during disasters.

Oregon Health Authority: Public Health Division

Center for Prevention and Public Health Promotion

Expenditures by fund type, positions and full-time equivalents

	General	Other/Lottery	Federal	Total Funds	Positions	FTE
Leg. Approved 2019-21	$43.10	$73.22	$252.46	$368.78	203	201
Agency Request 2021-23	$48.50	$105.59	$264.61	$418.71	222	216.36
Difference	$5.41	$32.37	$12.15	$49.93	19	15.36
Percent Change	13%	44%	5%	14%	9%	8%

The 2019-21 Agency Request Budget of $419 million Total Funds continues funding for most of the Center for Prevention and Health Promotion programs at the current service level. The budget includes additional funding to expand Universally offered Home Visiting through policy package #418; a fee increase for the Perscription Drug Monitoring Program (PDMP) policy package #453. The fee ensures that PDMP continues as a crucial health care tool that allows prescribers to ensure they are fully informed of the prescription history of their patients when prescribing controlled substances. Two new programs are being proposed, legislative concept and policy package #401 Beer, Wine, and Cider Tax which creates an alcohol and other drug abuse prevention and education program; and policy package #408 Tobacco Retail Licensure, which would establish a strong statewide licensing system for retailers that sell tobacco products and inhalant delivery systems.

Activities, programs and issues in the program unit base budget

The Center for Prevention and Health Promotion's mission is to help Oregon's communities and residents achieve and sustain lifelong health, wellness and safety through partnership, science and policy. The center's work is essential to Oregon's health system transformation and achieving the triple aim of better health, better care and lower costs. The center has five sections that work to achieve its mission through:

- Ensuring the health and well-being of school-aged youth and young adults.
- Preventing child developmental delays.
- Ensuring adolescent health and well-being.
- Provision of adequate nutrition and access to healthy foods.
- Prevention of injuries, overdose, suicide, toxic stress, violence and unsafe relationships.

- Access to client-centered, culturally responsive preventive clinical services including reproductive health and breast and cervical cancer screening.
- Prevention of risks leading to lifelong and costly chronic diseases, including substance use disorders.
- Oral health across the lifespan.

The center promotes population-based strategies and policy, environment and system changes to:

- Increase capacity for K-12 schools to provide school health services, health education, and be a safe and supportive environment.
- Increase stability and safety in families.
- Increase equitable access to healthy options and preventive health services.
- Decrease the burden of health inequities borne by historically marginalized communities of color.
- Increase access to healthy food and increase healthy eating and physical activity for all people in Oregon.
- Reduce overdose and risky prescribing of opioids.
- Reduce suicide.
- Reduce tobacco, alcohol and other drug use.
- Prevent and reduce secondary impacts of COVID-19 and support recovery.

In collaboration with stakeholders and partners, the center invests resources to prevent and address health problems and inequities statewide. Those partners and stakeholders include:

- Governmental entities, including local public health authorities and community mental health programs.
- Early child care, early learning, primary and secondary education systems.
- K-12 school systems including school district leaders, school boards, teachers, staff, and administrators.
- Health care systems and providers (including dental, mental health and primary care systems).
- Substance use disorder treatment programs.
- Emergency departments and hospitals.
- Food systems and anti-hunger organizations.
- Domestic and sexual violence agencies.
- Community-based organizations led by and centering Tribal Communities and Communities of Color and other populations experiencing health inequities.
- Aging services.
- Land use and transportation agencies.
- Emergency medical service providers.
- Law enforcement.

- Oregon's Nine Federally Recognized Tribes, urban American Indians and Alaska Natives.
- Academic institutions.
- Employers.
- Parents, families and youth.
- Regional health equity coalitions.
- School health providers (i.e. school nurses, school counselors etc).

The center is engaged in addressing numerous upstream social determinants of health which affect health equity and inclusion strategies as reflected in Oregon's State Health Improvement Plan (SHIP). These are: institutional bias; adversity, trauma and toxic stress; economic drivers of health including housing and transportation; access to equitable preventive health care; and behavioral health, including substance use and mental health services.

Background information

CP & HP has the following five sections that work to achieve its mission:

Adolescent, Genetics and Reproductive Health (AGRH) promotes health, well-being and quality of life for all people in Oregon through the development and use of evidence-based policies, tools, educational resources, programs and clinical preventive services to support adolescent, sexual and reproductive health across the lifespan. AGRH commits to working towards racial equity by addressing racism, acknowledging implicit bias, and shifting how we do what we do. We:

- Monitor the health status of adolescents by race and ethnicity, sex, gender identity, sexual orientation and geography.
- Encourage the adoption of evidence-based programs and practices that support positive youth development and promote authentic youth engagement.
- Collaborate with Oregon Department of Education, school districts, educational service districts, and K-12 schools to uplift health services, increase implementation of K-12 health education, survey students, and inform local and state policy development.
- Promote the ability of all individuals to have reproductive autonomy.
- Reduce breast, cervical and hereditary cancer inequities by supporting equitable access to early detection and surveillance.

- Engage collaboratively with partner organizations and community membersto inform policies, clinical services and activities that address systemic, structural, and institutional injustices and advance health equity.
- Support and ensure the provision of culturally and linguistically appropriate practices and services at the state and local levels through funding and establishment and endorsement of standards of care.
- Develop public health systems and public-private partnerships that provide high-quality guidelines-based preventive health services for adolescents, women of reproductive age and individuals at high risk from genetic conditions.
- Provide access to essential preventive health services through a statewide network of school-based health centers (SBHCs), reproductive health clinics, school nurses, mental health providers and ScreenWise providers regardless of gender identity, sexual orientation, race, sex, disability or immigration status.
- Recognize the role of trauma and resilience in health behavior and outcomes and createe prevention policy and programming that acknowledges trauma and adverse experiences while building on and enhancing developmental strengths and protective factors.
- Work with health systems to increase breast, cervical and hereditary cancer screening and early detection through evidence-based interventions.
- Use innovative approaches to respond to emerging or unique needs resulting from a changing health and policy landscape (e.g., Public Charge Rule, COVID-19).
- Seek program planning that supports COVID-19 recovery efforts and helps mitigate harm across our shared communities.
- Fund community-specific organizations that center Black, indigenous, and people of color in addressing structural barriers to care borne from institutional bias, oppression, trauma and toxic stress.

Health Promotion and Chronic Disease Prevention (HPCDP*)* works with communities and tribes to increase the opportunities for all Oregonians, no matter where they live in the state, to eat better, move more, live tobacco-free, drink less alcohol and take charge of their own health. HPCDP does this by:

- Analyzing and monitoring the occurrence of chronic diseases and their risk factors by demographic characteristics such as gender, race, ethnicity, geography, income, disability, education, age, etc.

- Developing and administering programs and promoting policies to prevent chronic diseases and associated risk factors.

Chronic diseases include asthma, arthritis, cancer, diabetes, heart disease and stroke. Risk factors for chronic conditions include tobacco use, alcohol and drug misuse, physical inactivity, and poor nutrition. Examples of HPCDP's strategies to prevent and manage chronic disease include:

- Equipping tribes, local public health authorities, and other diverse communities with the strategies, data, guidance and support they need to make the best decisions about sustainable policy solutions for their communities to reduce tobacco use, alcohol and drug misuse, and increase access to healthy eating and physical activity.
- Funding for local public health authorities, tribes, regional health equity coalitions and coordinated care organizations (CCOs) to work on evidence- and community-based strategies to address the CCO chronic disease incentive metrics.

Injury and Violence Prevention (IVPP) prevents injuries and deaths due to violence, suicide, prescription and illicit drugs, motor vehicle crashes, child maltreatment, youth sports concussion, sexual violence, and unintentional injuries. Some strategies include:

- Providing the web-based Prescription Drug Monitoring Program, which serves more than 29,000 prescribers, pharmacists and their delegates to support clinicicians in making safe prescribing decisions.
- Promoting opioid prescribing and tapering guidelines and working within CCOs and other health systems to use them to improve patient safety, reduce incidence of opioid use disorder, improve pain care, and reduce overdoses from prescription and illicit opioids.
- Working with health systems. media and insurers to improve pain care and promote non-pharmacological pain care options, and supporting this work with public media.
- Working with pharmacies, employers and community human services organizations to make naloxone rescue universally available to prevent deaths due to opioid overdose.
- Maintaining web-based data dashboards that are interactive, queriable, accessible to the public and contain information from a variety of sources on the topics of opioid and stimulant prescribing, prescription drug overdose and naloxone rescue; suicide; firearm-related mortality, and sexual violence prevention.

- Working with diverse communities, tribal health clinics, and health care and behavioral health care agencies to track suicide attempts and reduce suicide.
- Improving patient care and care coordination regarding opioid prescription and pain management.
- Coordinating the State Child Fatality Review Team to identify systems level changes to reduce child fatalities.
- Evaluating statewide policies intended to: 1) reduce the burden of sexual violence among youth, 2) reduce the burden of traumatic brain injury among youth participating in sports, and 3) reduce alcohol-related motor vehicle crashes and injuries.

IVPP manages the Oregon Violent Death Reporting System and provides injury surveillance and epidemioligic study of the leading causes of injury. Recent initiatives have made closer to real-time information available to track trends in overdose and suicide attempt to inform COVID-19 response through policy, prevention practice, academic research, and program and policy evaluation. Data on outcomes and performance are used to track key information on the health status of Oregonians.

Maternal and Child Health (MCH) promotes health across the lifespan of individuals and families by investing in preconception, pregnancy, and early childhood health. Its programs address perinatal health (before, during and after pregnancy), infant and child health, newborn hearing screening, home visiting, oral health, and family violence prevention. Through partnerships with local public health, other state agencies, and health care and early learning providers, MCH serves Oregon's population in general, as well as those most vulnerable to poor health outcomes.

To better understand and identify changing problems and population needs, the program monitors the health of Oregon's pregnant women and families with three-year-old children through the Pregnancy Risk Assessment and Monitoring System (PRAMS) and Early Childhood Health in Oregon (ECHO) surveys; monitors the prevalence of birth anomalies through our Birth Anomalies Surveillance System (BASS) and monitors the state of oral health through the Oregon Oral Health Surveillance System. The program manages data systems for infant hearing screenings, the home visiting system and its programs, and statewide oral health, disaggregating data by race and ethnicity. For example, the Oral Health Unit has implemented the REAL D standards in its school-based program forms and data collection.

Center for Prevention and Public Health Promotion

MCH houses Oregon's Title V Maternal and Child Health Services block grant programs that support promoting and improving the health and well-being of mothers, children, and their families. Oregon's Title V programs focus on well-women care, breastfeeding, child injury prevention, positive youth development/anti-bullying, establishing a medical home, transition into adulthood, reducing toxic stress and trauma, addressing social determinants of health, and provision of culturally and linguistically responsive services. Title V supports activities such as:

- Assessment and monitoring of maternal and child health needs and disparities.
- Policy and program development.
- Workforce development.
- Program assurance through technical assistance and oversight.
- Coordination with state agencies and community partners.
- Systems development to better address the needs of Oregonians, including children and youth with special health needs.
- Statewide health promotion activities.

MCH received supplemental COVID-19 funding for our Rape Prevention and Education/Intimate Partner Violence prevention work to support virtual training and education opportunities and outreach at the community level. In addition, all our Title V work will be framed around health equity and COVID-19 to ensure both are integrated into the strategies and activities.

Maternal and Child Health is also the home for Oregon's universally offered home visiting system. This system works toward ensuring every family of a newborn receives the opportunity to have 1 to 3 nurse home visits during the first few months of the newborn's life. This also provides an opportunity to connect families with resources and supports around COVID-19. Senate Bill 526 requires OHA to design, implement and sustain a statewide evidence-based nurse home visiting system to families who choose to accept the service, and requires commercial health benefit plans to pay for this service.

Nutrition and Health Screening (NHS) provides a foundation of health and prevention for the future of participating children and society at large. The Special Supplemental Nutrition Program for Women, Infants and Children (WIC) safeguards the health of over 138,000 low-income women, infants, and children up to age five each year who are at nutritional risk by providing nutritious foods to supplement diets, information on healthy eating and referrals to health care. Oregon WIC participants use an electronic benefit transfer (EBT) system to purchase healthy foods. In addition, the Oregon Farm Direct

Nutrition Program (FDNP) also provides over 25,000 WIC participants and 43,000 low-income seniors with FDNP checks once a year to purchase fresh, locally grown fruits, vegetables and cut herbs directly from local farmers. WIC services are delivered through public health, tribal health clinics and non-profit programs. They focus on:

- Maternal and child growth and health.
- Breastfeeding education and support, including peer-to-peer breastfeeding support through the WIC Breastfeeding Peer Counseling Program.
- Nutrition-focused counseling.
- Promotion of a healthy lifestyle and prevention of chronic diseases including obesity.
- Culturally and linguistically appropriate services and materials.

NHS program staff provide a variety of training to local paraprofessional staff who deliver WIC services, including annual civil rights training. The WIC program also influences the availability of nutritious foods in Oregon's communities by requiring large and small WIC authorized grocery stores in all areas of the state to carry a minimum stock of healthy foods including low-fat milk, whole grains, low-sugar cereals, and produce. The foods available through WIC offer a variety that is culturally appropriate for the wide range of families served. The Oregon FDNP program collaborates with farmers and farmers markets statewide to provide vouchers for fresh produce for WIC families and low-income seniors. WIC also provides critical data on the maternal and child population by race, and ethnicity and other demographics; and evaluates programs and carries out competitively funded research studies.

Revenue sources and changes

The Center for Prevention and Health Promotion revenues include 12 percent General Fund, 39 percent Federal Funds Limited, 24 percent Federal Funds Non-Limited, 25 percent Other Funds Limited, and 9 percent Other Funds Non-Limited. General Fund revenue supports the School-Based Health Centers program and adolescent health promotion, Oregon Contraceptive Care program (1115 family planning Medicaid demonstration waiver), and the Oregon Reproductive Health Equity Act (RHEA) to provide coverage for a full range of reproductive health services, including female sterilization and abortion. General Fund also

supports the Youth Suicide Prevention Program. General funds also support the Family Connects Oregon universally offered home-visiting program.

The center receives Federal Funds through the following federal grants and programs:

- The Centers for Disease Control and Prevention grants for arthritis, cancer, diabetes, heart disease and stroke, obesity, tobacco, sodium, cancer registry.
- Core Injury and Violence Prevention, National Violent Death Reporting System, Overdose Data to Action, Emergency Department Surveillance of Nonfatal Suicide Related Outcomes.
- Promoting Adolescent Health through School-Based HIV/STD Prevention and School-Based Surveillance.
- The Substance Abuse and Mental Health Services Administration (SAMHSA) grants for Youth Suicide Prevention and Early Intervention and Substance Abuse, Prevention and Treatment.
- COVID-19 specific funding from the CDC includes funds for suicide and adverse childhood experiences prevention through and supplemental COVID-19 funding for Rape Prevention and Education and Intimate Partner Violence prevention.
- U.S. Department of Agriculture WIC Nutritional and Health Screening Program.
- Health Resources & Services Administration (HRSA) for Maternal & Child Health Title V and Home Visiting programs.
- The Medicaid Title XIX entitlement supporting the Oregon Contraceptive Care program (1115 family planning Medicaid demonstration waiver), which provides a 9:1 Medicaid match through the Centers for Medicare and Medicaid Services.
- Administration for Children and Families for Personal Responsibility Education Program.
- Centers for Medicare & Medicaid Services (CMS) Meaningful Use HIT/E for Emergency Medical Services (EMS) & Trauma Data Systems and integration of the Prescription Drug Monitoring Program into clinical electronic health record systems.
- Funding to support opioid overdose prevention by means of grants awarded to other programs within the Oregon Health Authority via the SAMHSA State Targeted Response grant (OHA Health Systems Division).

Federal grant award amounts remained flat or declined through the 2019-21 biennium. This trend is expected to continue during the 2021-23 biennium. Since the Center is primarily funded through competitive federal grants, the Center will need to adjust program service levels accordingly.
The Center's Other Funds revenues include statutorily dedicated funds under the Tobacco Use Reduction Account (TURA), and the Electronic Prescription Monitoring Fund as well as marijuana tax revenues for alcohol and other drug prevention.

Proposed new laws that apply to the program unit

Legislative Concept 1 — Flavored Tobacco Sales Prohibition: This legislative concept will reduce the youth appeal of flavored tobacco products, including IDS, and youth access to these products. The legislative concept accomplishes this through two components: A ban on the sale of all flavored tobacco products and IDS. The flavor ban would include mint and menthol, as well as "concept flavors" such as "jazz" and "red", that are popular with young people. A ban on the online and telephonic sales of all tobacco products to Oregon addresses. This would create parity with cigarettes and smokeless tobacco.

Legislative Concept 2 and Policy Package #408 — Tobacco Retail Licensure: This policy package requires tobacco and inhalant delivery system retailers in Oregon to obtain a license. Retailer licensing fees and any civil money penalties for violations cover the cost of administration and enforcement of the license. This includes retailer education and yearly inspections. OHA estimates there are 4,000 tobacco product and IDS retailers operating brick and mortar locations in the state. Licensing fees would go into effect on the following January 1. This policy package would equip OHA-PHD with new tools to educate retailers about tobacco laws and hold tobacco retailers that sell tobacco illegally to underage persons accountable. It would support OHA's goal to reduce the burden of tobacco-related disease and death across the state, especially among communities of color.

Legislative Concept 7 and Policy Package #453 — Prescription Drug Monitoring Program Licensing Fees would change the PDMP fund type to allow comingling with other OHA funds. Increases PDMP user fees paid by each licensing board in order to maintain sufficient capacity for program operations and database functions. The PDMP fee impacts all licensees regardless of program registration or program use.

Center for Prevention and Public Health Promotion

Legislative Concept 4 — Oral Health Placeholder: This placeholder concept would remove the sunset date for Dental Pilot Projects and continue the work if resources allow.

Legislative Concept 11 and Policy Package #401 — Beer, Wine and Cider Tax: This legislative concept and policy package is intended to increase the tax on beer, wine, and cider, with exemptions for small producers. Ten percent of new revenues would be directed to OHA-PHD for alcohol and other drug prevention and education. This funding would be used to develop, implement, and evaluate projects in raising public awareness, identifying policy priorities, and building upon an existing public health infrastructure to address and prevent excessive alcohol consumption in Oregon. It would support OHA's goal to reduce the burden of alcohol-related disease and death across the state, especially among vulnerable populations including communities of color and those with substance use disorders.

Center for Public Health Practice

Expenditures by fund type, positions and full-time equivalents

	General	Other/Lottery	Federal	Total Funds	Positions	FTE
Leg. Approved 2019-21	$16.92	$119.01	$92.26	$228.19	281	280.05
Agency Request 2021-23	$79.48	$126.09	$78.21	$283.78	282	280.59
Difference	$62.56	$7.09	-$14.05	$55.60	1	0.54
Percent Change	370%	6%	-15%	24%	0%	0%

The 2021-23 Agency Request Budget of $283.8 million continues funding for most of the Center for Public Health Practice programs at the current service level. The budget includes policy package #449 to increase fees in the Oregon Environmental Laboratory Accreditation Program (ORELAP). The Laboratory is also included in the modernization policy package #417 to support communicable disease testing at the Oregon State Public Health Laboratory in order to respond to novel strains of disease, natural disasters, foodborne outbreaks and other health emergencies.

Activities, programs and issues in the program unit base budget

The Center for Public Health Practice protects the health of individuals and communities through the prevention and control of infectious diseases, provision of integrated care and treatment for persons living with HIV, issuing Oregon vital records, monitoring population health, and ensuring emergency public health services in natural and human-caused disasters. The center's programs provide many of the essential services in the state public health's Continuity of Operations Plan and have played a key role in Oregon's response to the COVID-19 pandemic. The center's work is central to Oregon's achievement of the triple aim and health system transformation.

The center has six sections:

- Center for Health Statistics, also known as vital records – birth, death and marriage certificates (CHS).
- Acute and Communicable Disease Prevention (ACDP).

Center for Public Health Practice

- Oregon State Public Health Laboratory (OSPHL).
- HIV, Sexually Transmitted Diseases and Tuberculosis Prevention (HST).
- Immunizations.
- The federally funded programs for Health Security, Preparedness and Response (HSPR).

In collaboration with stakeholders, the center invests resources to reduce the burden of disease and health inequities across the state. The center's programs work with local and tribal governments, a wide range of community partners, health care providers, and affected communities to prevent, investigate and control infectious diseases. The center coordinates interventions to control disease outbreaks; screens all newborn infants for biochemical disorders to prevent disability or death; and collects and analyzes vital record data needed to understand and plan for health trends. As part of public health emergency preparedness, the center conducts testing for biological agents of mass destruction (e.g., anthrax, plague) and emerging public health events and diseases such as the COVID-19 pandemic.

The Center for Public Health Practice delivers core public health services necessary to maintain a healthy population, respond to, and recover from disasters. Preventable disease vaccine programs ensure children are healthy enough to attend school regularly and learn successfully. Its interventions for influenza and foodborne disease outbreaks (e.g., salmonella, hepatitis, E. coli) allow parents to attend work and sustain a healthy economy. The center's HIV/STD and tuberculosis programs work with local partners and the community to prevent and eliminate disease transmission. Its HSPR programs track the surge capacity of hospitals and public health agencies to respond in health emergencies (e.g., COVID-19, floods, wildfires and earthquakes). The center's services are delivered every day of every week throughout the year. Duty officers are on call 24/7 to provide technical support at the public health lab, for epidemiology guidance, and for assessing the initial stage of a public health incident and coordinating responders.

Center for Public Health Practice

Programs in the Center for Public Health Practice are engaged or working toward the following health equity and inclusion strategies:

- Increasing cultural competency of staff.
- Increasing workforce diversity.
- Conducting health equity impact analyses on new and existing efforts.

Additional program-specific strategies are identified in section narratives.

Background information

Center for Public Health Practice program activities are described below.

Center for Health Statistics is responsible for registering, certifying, amending, and issuing Oregon vital records, including:

- Maintaining approximately 6.5 million vital records for birth, death, marriage, divorce, fetal death.
- Registering 130,000 vital events that occur in Oregon annually.
- Issuing 166,000 certified copies of records and 40,000 amendments annually.

Vital records and statistics are part of the Assessment and Epidemiology foundational capability of Oregon's modern public health practice framework. Information from vital records is used to assess the health of people in Oregon and identify health disparities so that public health programs can develop programs to improve health equity.

Acute and Communicable Disease Prevention (ACDP) works to identify and prevent the spread of communicable diseases that cause significant illness and death, including salmonellosis, *E. coli* O157 infection, meningococcal disease, influenza, hepatitis, antibiotic-resistant bacteria, healthcare-associated infections and vector-borne diseases. ACDP collaborates with a large array of stakeholders to reduce disease transmission through various pathways including food, water, animals, insects, human contact, and in health care. The section works with Oregon's local health departments, tribal health jurisdictions, health

care providers, and community members to identify diseases, collect case information, identify risk factors and transmission routes, protect exposed individuals, and control disease transmission. ACDP is a key resource for all of Oregon to gather and use important data to implement strategies to prevent the spread of communicable diseases.

Communicable disease control is a foundational program of Oregon's public health practice framework, and ACDP's work integrates all the foundational capabilities. ACDP works to identify and prevent disparities in groups disproportionately affected by communicable disease. It does this by collecting data and intervening on any diseases identified as disproportionately affecting people of color, people with limited English proficiency, people with access and functional needs, and people in the lesbian, gay, bisexual, transgender and queer communities.

The Oregon State Public Health Laboratory performs 10.4 million tests on 332,000 human specimens annually, including newborn screening of all infants born in Oregon. The lab's specimens come from 34 local health departments and 68 hospital and clinical labs in Oregon, as well as 3,000 individual medical practitioners in the region. The Laboratory Compliance section oversees certification of clinical laboratories and accredits environmental laboratories. This includes laboratories that monitor the safety of drinking water, cannabis, and the environment in Oregon. The OSPHL is also responsible for emergency laboratory response to COVID-19 and other emerging pathogens and biological and chemical threats throughout Oregon. The lab supports the OHA mission through the following statewide and multi-state activities:

- Medical laboratory tests for state and local health department communicable disease control programs for purposes of disease diagnosis, prevention, surveillance, and treatment.
- Tests for food, water and other environmental samples for evidence of microbial contamination.
- Providing 10.3 million tests annually on 253,000 newborn babies for genetic disorders of body chemistry that can cause severe intellectual disability or death if undetected.
- Providing highly specialized reference tests that are unavailable elsewhere, especially for diseases of public health significance (e.g., rabies, anthrax, botulism, tuberculosis, *E. coli* serotyping, Zika and newly identified pathogens).
- Responding to public health emergencies including outbreaks of infectious diseases and bioterrorism.

- Regulation to ensure the quality of testing in medical, marijuana, environmental, and drug screening laboratories throughout Oregon.

The HIV, Sexually Transmitted Diseases and Tuberculosis section (HST) works collaboratively with local public health authorities, health care providers, community-based organizations and planning entities to prevent the transmission of HIV/STD and TB disease and improve health outcomes. The primary program functions include prevention and communicable disease control, surveillance and monitoring.

The HST section specifically monitors the incidence and prevalence of disease, using data to develop public health policy and interventions. The section develops rules, policy, procedure, and standards of care, and provides training, consultation and technical assistance for outreach, testing, disease investigation, outbreak response, linkage to care, and treatment. The section's client population includes individuals at risk for or diagnosed with HIV, STDs or TB. The section specifically targets resources to populations that are disproportionately affected, such as people who inject drugs, men who have sex with men, people of color, immigrants and refugees. Services funded promote the elimination of HIV/STD/TB transmission and improved health outcomes and include locally based outreach and education, testing, condoms, lab costs, medications, case management and adherence support.

The **Immunization** section works with local public health authorities, immunization providers and local coalitions, which include a diverse range of participants and focus on meeting vaccination needs in vulnerable populations, to reduce the incidence of vaccine-preventable disease in Oregon by:

- Supporting the state's immunization infrastructure.
- Identifying and promoting evidence-based public health practices.
- Collecting immunization data (available by age, gender, and race) from health care providers and making these data available to local entities to achieve complete and timely immunization of all people in Oregon.
- Maintaining the federal Vaccines For Children (VFC) entitlement program.

Center for Public Health Practice

The Immunization section maintains the ALERT Immunization Information System (IIS), provider compliances to the federal VFC program; school immunization law; and vaccine-preventable disease readiness and epidemiology, which includes serving as a CDC IIS Sentinel Site. Immunization promotes the health of all people in Oregon by investing in activities that ensure access to vaccines for all. These efforts include the work of the VFC program, which provides vaccine at no cost to 62 percent of Oregon's children, who might not otherwise be vaccinated due to inability to pay. It also includes partnering to ensure vaccine opportunities for underrepresented communities; the use of the ALERT IIS data to identify pockets of need across gender, race or ethnicity; supporting the Boost Oregon coalition, and an equity workgroup that is developing a diversity-based internship for a bachelor- or master-level student in hopes of broadening the diversity of candidates who apply to work with the section.

The Health Security, Preparedness and Response (HSPR) section develops public health systems to prepare for and respond to threats and emergencies that affect the health of people in Oregon. Public health emergency preparedness is a foundational capability of a modern public health practice framework and is the cornerstone of the HSPR section. HSPR emphasizes cultural responsiveness through partnerships with tribal governments, hospitals and health care systems, emergency medical services, law enforcement, fire and local public health authorities to build community resiliency through emergency preparedness planning, training, exercises and coalition development. These partnerships include funding for health care and public health programs in local and tribal agencies, as well as support for essential public health functions related to communications, laboratory services and communicable disease control. The program works to ensure equitable inclusion of persons with limited English proficiency and other language and access needs in planning activities. Current activities address:

- COVID-19 pandemic.
- Cascadia subduction zone earthquakes.
- Emerging infectious diseases.
- Mass casualty response.
- Health equity planning.
- Seasonal hazards such as wildfires, floods, heat waves, and drought.

HSPR also manages:

- The State Emergency Registry of Volunteers in Oregon, with 2,600 registered licensed health professionals providing 560 hours of emergency services in the past year and participating in 5,120 hours of exercises and training to help all communities during a disaster.
- The AmeriCorps VISTA program, which places new public health professionals in public health and nonprofit agencies for one year of national service to build public health capacity and eliminate poverty. HSPR oversees 60 national service volunteers annually.
- Critical public health information platforms such as the Health Alert Network and Hospital Capacity System, which allow for 24/7/365 mass communication and situational awareness between public health and health care organizations with the option for hearing-impaired communication.

Revenue sources and changes

The 2021-23 Center for Public Health Practice revenues include 44 percent Other Funds, 28 percent General Fund, and 28 percent Federal Funds.

In response to the COVID-19 pandemic, the center received $110 million of federal funding for a broad range of response activities, including case investigation and contact tracing, laboratory testing, healthcare system infection control capacity, and vaccine distribution.

While the center has been successful in writing grants, much of its funding is categorical, finite and directed toward federal priorities, which do not always align with state-defined priorities. Given that the center's work to protect the people in Oregon is funded mostly by CDC and HRSA, our staff focus must be on federally prescribed deliverables. The center's programs have responded creatively to state-directed work while continuing to meet grant objectives. This is particularly true in the areas of communicable disease prevention and immunization, which require a base level of infrastructure to operate effectively.

Center for Public Health Practice

The center's General Fund is used to pay for staff, supplies and equipment necessary to coordinate and deliver services to people in Oregon. The center pays counties to deliver the Vaccines for Children program, using Medicaid matching funds and leveraged by General Fund.

In the HST section, federal funding for HIV care and treatment programs has remained flat in recent years; however, the Ryan White program has available funding due to its pharmacy model. Approximately $83 million restricted Other Funds carryover balance from the 2019-21 to 2021-23 biennium is expected. The program prioritizes these resources to pay for medical services and medications for persons living with HIV. Additionally, program has obligated $60 million of these restricted Other Funds carryover balance to projects that support Oregon's five-year initiative that aims to eliminate new HIV infections in Oregon, End HIV Oregon. The End HIV Oregon initiative has resulted in enhanced statewide services to include new HIV early intervention services, increased housing services, behavioral health, enhanced case management support and other supportive services that prevent the transmission of HIV and improves the health outcomes of persons diagnosed with HIV.

State funding supports three critical areas for the Immunization section: support for local public health as pass-through dollars to the local public health authorities; a maintenance and support contract with Enterprise Services LLC for ALERT immunization information system; and general staff and infrastructure support. Due to the overall growth of ALERT, the maintenance and support contract continues to increase and strains program resources. Increasing CDC requirements attached to the Immunizations cooperative agreement also strain the program's ability to meet requirements while maintaining our support for Oregon counties. In response to the COVID-19 pandemic, Immunizations received $1.7 million to address vaccine campaigns in the influenza season.

The ACDP section receives about $20 million Federal Funds per biennium from the CDC, primarily through the Emerging Infections Program and the Epidemiology and Laboratory Capacity grants. Along with roughly $1 million General Fund, these grants support communicable disease monitoring, outbreak investigation, interventions and evaluation activities. The program maintains Orpheus, a statewide case reporting and outbreak information system, as well as ESSENCE, a statewide syndromic surveillance system that monitors all emergency department visits (data available by race and ethnicity via a medical record or

using CDC-specified designations). As of July 2020, ACDP is receiving approximately $98.9 million to support COVID-19 case investigation and disease control across Oregon.

The Oregon State Public Health Laboratory's revenues for the 2019-21 are approximately $30 million Total Funds, of which 11 percent is General Fund, 20 percent Federal Funds, and 69 percent Other Fund fee revenue. In recent biennia, increasing operating costs have begun to outpace revenues, leading to a variety of efforts to reevaluate OSPHL's fee rates and structures.

OSPHL implemented a fee increase for the newborn screening program on April 1, 2018, following the results of a fee structure evaluation conducted in 2016.

Recently, revenue generated from communicable disease testing fees has not kept pace with increasing costs, prompting OSPHL to review those fee structures. Communicable disease testing increases access to health care by providing testing regardless of ability to pay or insurance coverage. Primary submitters are local health departments and community clinics. OSPHL bills for as many tests as possible using the Medicaid fee-for-service fee schedule but does not recover enough revenue to fund the testing. New laboratory technology is changing the number and types of specimens sent to OSPHL, shifting the workload to OSPHL without corresponding funding to support the testing. OSPHL is also experiencing increased costs associated with maintaining laboratory information systems to support electronic data collection and transmission among local, state and federal partners. Policy package #417, Modernization, includes funding to ensure communicable disease testing is addressed.

Evaluations of additional fee structures will continue in the 2021-23 biennium.

The Center for Health Statistics' revenues include mostly Other Funds, primarily in the form of fees for services, and some Federal Funds, in the form of deliverable-based contracts for timely and accurate birth and death data. Other Funds include payments from state agencies that use vital records information to conduct their business. Fees from the sale of birth certificates

comprise most of the fee revenue. The remaining revenue comes from sales of other types of certificates and extra fees for expedited processing and amendments.

The Health Security, Preparedness and Response section is funded through three federal grants, the Crisis Cooperative Agreement, Public Health Emergency Preparedness and the Healthcare Preparedness Program. These funds support state and local health department preparedness staff and activities, regional health care coalitions, and grants to partners for innovative community planning and response. HSPR is receiving approximately $9.5 million in funds to build capacity for the COVID-19 response across the public health system and with healthcare and community partners.

Proposed new laws that apply to the program unit

Legislative Concept 12 — Immunizations placeholder: The goals to be achieved from this placeholder are: Increase the vaccination rate in Oregon, reduce or prevent the spread of diseases that are preventable by vaccines, protect the health of Oregonians, especially those who cannot be immunized, by increasing herd immunity, close the loophole of non-medical exemptions from vaccination, strengthen the relationship between patients and physicians regarding vaccinations.

Indirect Cost Rate

Expenditures by fund type, positions and full-time equivalents

	General	Other/Lottery	Federal	Total Funds	Positions	FTE
Leg. Approved 2019-21	$0.00	$18.00	$17.31	$35.31	0	0.00
Agency Request 2021-23	$0.00	$18.77	$18.05	$36.83	0	0.00
Difference	$0.00	$0.77	$0.74	$1.52	0	0.00
Percent Change	N/A	4%	4%	4%	N/A	N/A

The 2021-23 Agency Request Budget of $36.8 million continues to provide the limitation needed to implement and operate an indirect cost rate for the Public Health Division at the current service level.

Activities, programs and issues in the program unit base budget

As part of pursing the implementation of a division-wide indirect cost rate, Public Health has a Detail Cross-Reference Number (DCR) specific to the indirect cost rate and separate from the program Centers and Office of the State Public Health Director. This functions as budgetary structure to house needed limitation and does not contain any program areas.

The technical accounting entries required to operationalize an indirect cost rate will produce duplicative expenditure data in an internal services fund specific to tracking and reconciling indirect costs assessed to Public Health. Limitation is in Federal Funds and Other Funds to cover the duplicative costs and accommodate the necessary accounting processes. There are no additional "real" expenditures, and the duplicated costs will be excluded from statewide reporting by excluding the internal services fund.

Background information

Public Health has been working to implement a division-wide indirect cost rate, with an initial proposal submitted from the Oregon Office of Financial Services, Cost Allocation Unit to the Department of Health & Human Services, Cost Allocation Services in July

of 2018. Public Health has continued work with the Cost Allocation Unit to keep the plan updated as revisions are completed and as negotiations occur with Cost Allocation Services.

Revenue sources and changes

The indirect cost rate DCR limitation is composed of 51 percent Other Funds and 49 percent Federal Funds.

Proposed new laws that apply to the program unit

None.

Oregon Health Authority

Oregon Health Authority: Oregon State Hospital

Executive Summary

Division overview

Oregon State Hospital (OSH) is an essential part of the statewide behavioral health system, providing the highest level of psychiatric care for adults from all 36 counties. The hospital's primary goal is to help people recover from their mental illness and return to life in the community, contributing to healthy and safe communities for all people in Oregon. Oregon State Hospital promotes public safety by treating people who are dangerous to themselves or others in a secure, therapeutic setting. The hospital works in partnership with the other divisions of the Oregon Health Authority including the Health Systems Division (HSD), the Psychiatric Security Review Board (PSRB), regional hospitals, community mental health programs, advocacy groups and other community partners to ensure people with mental illness get the right care, at the right time, in the right place.

OSH operates two campuses with the capacity to serve up to 708 Oregonians, with 592 beds in Salem and 100 beds in Junction City. Services are provided 24 hours per day, seven days a week. Oregon's only state-operated secure residential treatment facility also reports to the superintendent of OSH. Pendleton Cottage, a 16-bed facility, is located on the grounds of the former Eastern Oregon Training Center in Pendleton. The secure mental health treatment program provides a community treatment setting for people who need a secure level of care as their first step out of the state hospital.

Funding request

Oregon State Hospital is requesting $936.8 million Total Funds for the 2021-23 biennium to continue current service levels and investments in facilities, equipment, staffing and technology to preserve the hospital's ability to provide high-quality care as well as address capacity challenges.

Program descriptions

Oregon State Hospital's role is to provide services and treatment to individuals that will prepare them for discharge when they no longer require hospital level of care. Services include 24-hour on-site nursing, psychiatric and other credentialed professional services, treatment planning, pharmacy, laboratory, food and nutritional services, and vocational and educational services. The

Executive Summary

hospital is accredited by the Joint Commission on the Accreditation of Health Organizations and all 24 hospital-licensed units (21 on the Salem Campus and 3 in Junction City) are certified by the Centers for Medicare & Medicaid Services (CMS). Services are provided by psychiatrists, nurses, and mental health professionals. Upon discharge, people transition to the community with improved skills to better understand and manage their symptoms, fully participate and live in their local community in a variety of community-based settings, and when able, hold a job.

Services are delivered through Interdisciplinary Treatment Teams of which patients and designated family members are team members. Treatment teams collaborate with patients to develop individualized treatment care plans to identify and achieve short- and long-term goals. These goals address potential safety risks, mitigate illness and promote recovery. Treatment care plans indicate which treatments a patient needs such as individual therapy, treatment therapy groups, medications, activities of daily living (cooking, personal finance), community integration and vocational rehabilitation or paid work. Treatment teams also work with each patient to ensure their individual needs are met, including but not limited to, culture, language, religion, LGBTQ+ status, or disability. If the need cannot immediately be met within the hospital's existing resources, the team will find a contractor, such as an interpreter or faith practitioner, to deliver these services for the patient.

Personal Services costs are the main budget driver for the Oregon State Hospital. Salaries, taxes and benefits for staff comprise 86 percent of OSH's 2019-21 Legislatively Approved Budget. Of the 2,309 positions currently budgeted for the Oregon State Hospital, 76 percent are direct-care staff such as nurses, psychiatrists, psychologists, etc. Per ORS 441.154 and ORS 441.155, the staffing plan for OSH is set by the nurse staffing committee, composed of both nurse management and AFSCME-RN union members. The number of staff the hospital needs is based on the level of acuity (the severity of symptoms, direct care needs) and commitment type (civil, guilty except for insanity, aid and assist). Sufficient staffing is key to OSH's ability to provide adequate mental health care, and to remain compliant with the United States Department of Justice's (USDOJ's) guidelines for the Civil Rights of Institutionalized Persons Act, specifically those areas related to adequate nursing care, adequate protection from harm, and appropriate use of seclusion and restraint.

Oregon Health Authority: Oregon State Hospital

Executive Summary

Program justification and link to long-term outcomes

OSH's key goals identify our core business, what we strive to do each day as we live our mission, vision and values. Our key goals are identified on our Fundamentals Map, including outcome measures for accountability. The OSH Fundamentals map supports the OHA Fundamentals Map and newly implemented agency-wide performance system.

OSH's key goal are:

- Excelling in recovery-oriented care and treatment.
- Ensuring safety in all environments.
- Improving processes and performance.
- Recruiting and engaging outstanding staff.
- Employing information technology effectively.

Program performance

OSH uses Lean methodology as the primary foundation for continuous improvement and organizational performance. Through Lean, OSH has a robust system to align and link all the services it provides with organizational goals and desired outcomes. OSH also tracks performance metrics throughout each level of the hospital using the Lean Daily Management System (LDMS) and the OSH Performance System. This framework provides a clear line of sight to ensure the work is achieving the desired outcomes.

Lean Daily Management System
LDMS is implemented in more than 90 sites throughout the hospital to provide structure for teams to make continuous improvement a part of their everyday work. Work teams track metrics on LDMS boards that are then linked to the OSH Performance System and key organizational goals. LDMS gives each work group a common system for communicating, acting and evaluating results.

Executive Summary

Performance System

The OSH Performance System focuses on the hospital's fundamental work processes and desired outcomes, while enforcing discipline around measurement and metrics. The Performance System helps the hospital generate targeted breakthrough initiatives and use problem-solving techniques to address areas where performance is poor. The OSH Fundamentals Map supports the overarching OHA Tier One Fundamentals Map.

The performance system scorecard monitors the hospital's outcome and process measures from the Fundamentals Map, which show progress toward key goals. The scorecard is a way for hospital leadership to manage data, monitor progress and identify achievements. Having this data available enables the hospital to proactively assign resources to continuous improvement teams early enough to make vital improvements that affect patient outcomes, improve safety and reduce costs.

Some examples of metrics tracked on the scorecard are:

- Incidents of aggression
- Patient and staff injuries
- Incidents and duration of seclusion and restraint
- Length of stay
- Admissions wait times
- Hospital funding – non-General-Fund
- Time between placement on the Ready-to-Transition List and discharge
- Staff turnover

OSH holds quarterly performance reviews (QPRs) every three months to check the status of our organizational health using the scorecard. QPRs create the discipline to review the status of the routine work (fundamentals) and initiatives (breakthroughs), and to drive problem solving as needed to achieve the goals of the organization.

Executive Summary

Enabling legislation/program authorization

The hospital operates under ORS 161.295-400, 179.321, ORS 426, and ORS 443. These statutes provide the authority to operate, control, manage and supervise the Oregon State Hospital campuses and state-delivered residential treatment facilities.

Funding streams

The Oregon State Hospital (OSH) budget of $936.8 million is made up primarily of General Fund revenues, 90 percent. OSH generates Other Fund revenue through billing of services to Medicare for eligible patients, 6 percent. Medicaid funds make up the Federal Funds portion of the budget, 4 percent.

Significant proposed program changes from 2021-23

OSH is a critical component of the behavioral health system in Oregon. At OSH, we strive to meet the needs of each patient while remaining nimble and responsive to the demands for beds and services across the three patient populations. We reconfigure internally to meet the demand for hospital level of care services across the continuum realizing the interplay of service needs across our continuum partners.

OSH Salem campus has continued to make beds available to serve individuals under Aid and Assist orders, focusing on those needing hospital level of care, and ensuring appropriate program and unit designation to address psychiatric acuity, commitment discharge needs and patient-centric care. In the fall of 2019, the OSH Junction City campus activated an additional ten hospital level of care (HLOC) beds for patients under civil commitments. At the same time, two cottages (8 beds/cottage) were opened at the residential treatment facility (RTF) level of care for individuals under civil commitment no longer requiring HLOC. This allowed for additional throughput while individuals were awaiting the availability of residential beds in the community. The division is requesting funding through a policy package to continue this program and convert it to a secure residential treatment facility (SRTF) to better meet the needs of individuals transitioning from hospital care. The division is also proposing the opening of two additional units, bringing the Junction City Campus to full capacity, in 2021.

Salem Campus

Expenditures by fund type, positions and full-time equivalents

	General	Other/Lottery	Federal	Total Funds	Positions	FTE
Leg. Approved 2019-21	$418.27	$58.55	$33.70	$510.52	1,886	1,885.82
Agency Request 2021-23	$524.55	$32.95	$26.26	$583.76	1,998	1,992.46
Difference	$106.29	-$25.61	-$7.45	$73.23	112	106.64
Percent Change	25%	-44%	-22%	14%	6%	6%

The Agency Request Budget of $510.52 million Total Funds continues funding for the Oregon State Hospital - Salem Campus services at the current service level for the 2021-23 biennium. This budget also includes the following nine policy packages:

#413 Person Directed Transition Team: Funds the team tasked with transitioning patients who have the greatest difficulty discharging from OSH.

#416 Position Conversions: Establishes permanent position authority financed by existing contract services funding.

#421 Deferred Maintenance: Critical maintenance projects to prevent equipment or infrastructure failure.

#422 Asset Replacement: Replaces outlived or expiring useful life equipment and assets.

#423 Capital Improvement: Critical infrastructure projects to make the hospital more sustainable and expand useable space.

#432 Electronic Health Record Replacement: Research and planning to begin the transition to a more robust Electronic Health Record system at OSH.

#433 Technology Modernization: Variety of technical enhancements related to overall accessibility, functionality and ease of use.

Salem Campus

#434 Secure Transport: Funds contract services to provide patient transport in compliance with Joint Commission standards.

#439 Complex Case Management Team (Acuity Team): Establishes a roving clinical response team to intervene in instances of patient behavioral crises.

Activities, programs and issues in the program unit base budget

Salem Campus detail

- Capacity: 24 units (592 beds)
- Operating: 24 units (554 beds)
- Population served: civil commitment (includes voluntary commitments by guardian), neuropsychiatric (high medical need), guilty except for insanity (GEI), aid and assist
- Census: 528.3 (Daily average population for 2019)
- Square feet: 1.3 million

Background information

Populations served

Oregon State Hospital serves adults who need intensive psychiatric treatment for severe and persistent mental illness. With 24-hour on-site nursing and psychiatric care, the hospital helps patients gain the skills they need to successfully transition back to the community.

The Salem campus serves individuals under three different commitment types:

- **Civil** – People who come to Oregon State Hospital through a civil commitment require 24-hour care that is not available through community programs. These patients have been found by the court to be a danger to themselves or others, or unable to provide for their own basic needs – such as health and safety – because of a mental disorder.

Salem Campus

- **Guilty Except for Insanity (GEI)** – People who come to Oregon State Hospital who have successfully pleaded Guilty Except for Insanity (GEI) for crimes related to their mental illness. These patients are under the jurisdiction of the Psychiatric Security Review Board.

- **Aid & Assist** – People who come to Oregon State Hospital through a court order under Oregon law (ORS 161.370) for treatment that will help them understand the criminal charges against them and to assist in their own defense.

Treatment programs – Oregon State Hospital serves patients in the program that best meets their treatment and psychiatric acuity needs. Each program is designed to treat a specific segment of our patient population.

- **Crossroads** – Two units of the Crossroads program provide progressive care services for people who have been civilly committed or voluntarily committed by a guardian. Patients each have an individual treatment care plan and attend treatment mall groups every weekday. These groups are designed to help patients learn how to manage their symptoms and medications, develop coping and recreational skills, budget and manage their money, and plan and prepare meals. Community reintegration is the focus of weekly group trips to community settings. Treatment groups also include educational support, psychotherapy and help for alcohol and drug abuse. A third unit provides progressive care services for people under Aid and Assist court orders. With continued stabilization, patients gain the ability to cooperate with attorneys, understand the charges against them, and participate in their own defense.

- **Springs** – The Springs program serves patients from all three commitment categories. These patients experience co-occurring mental and physical illnesses that often require hospital-level care for dementia or organic brain injuries. Patients each have individual treatment care plans and attend treatment mall groups every weekday. Treatment groups feature sensory and behavioral therapy, focusing on daily living skills, coping and problem-solving skills, and medication management.

Salem Campus

- **Archways** – The Archways program serves people under Aid and Assist court orders. This program helps patients stabilize, gain the ability to cooperate with attorneys, understand the charges against them, and participate in their own defense. Patients each have individual treatment care plans and attend treatment mall groups every weekday. Treatment groups primarily focus on understanding the court system and learning basic legal terminology. Other treatment groups and resources include a law library, legal assistance, symptom management, anger management, physical fitness, medication management and drug and alcohol education. During their stay, patients are periodically evaluated to determine if they are able, never able or not yet able to stand trial.

- **Harbors** – Four units of the Harbors program provide intensive care services to patients under Aid and Assist orders, and two units provide acute care psychiatric treatment across all commitment types. Patients each have individual treatment care plans and attend treatment mall groups every weekday. Treatment groups are designed to achieve psychiatric stabilization in order to transition to lower levels of psychiatric care within the hospital. Treatment groups also focus on symptoms management, medication management, legal skills acquisition, and practicing coping skills.

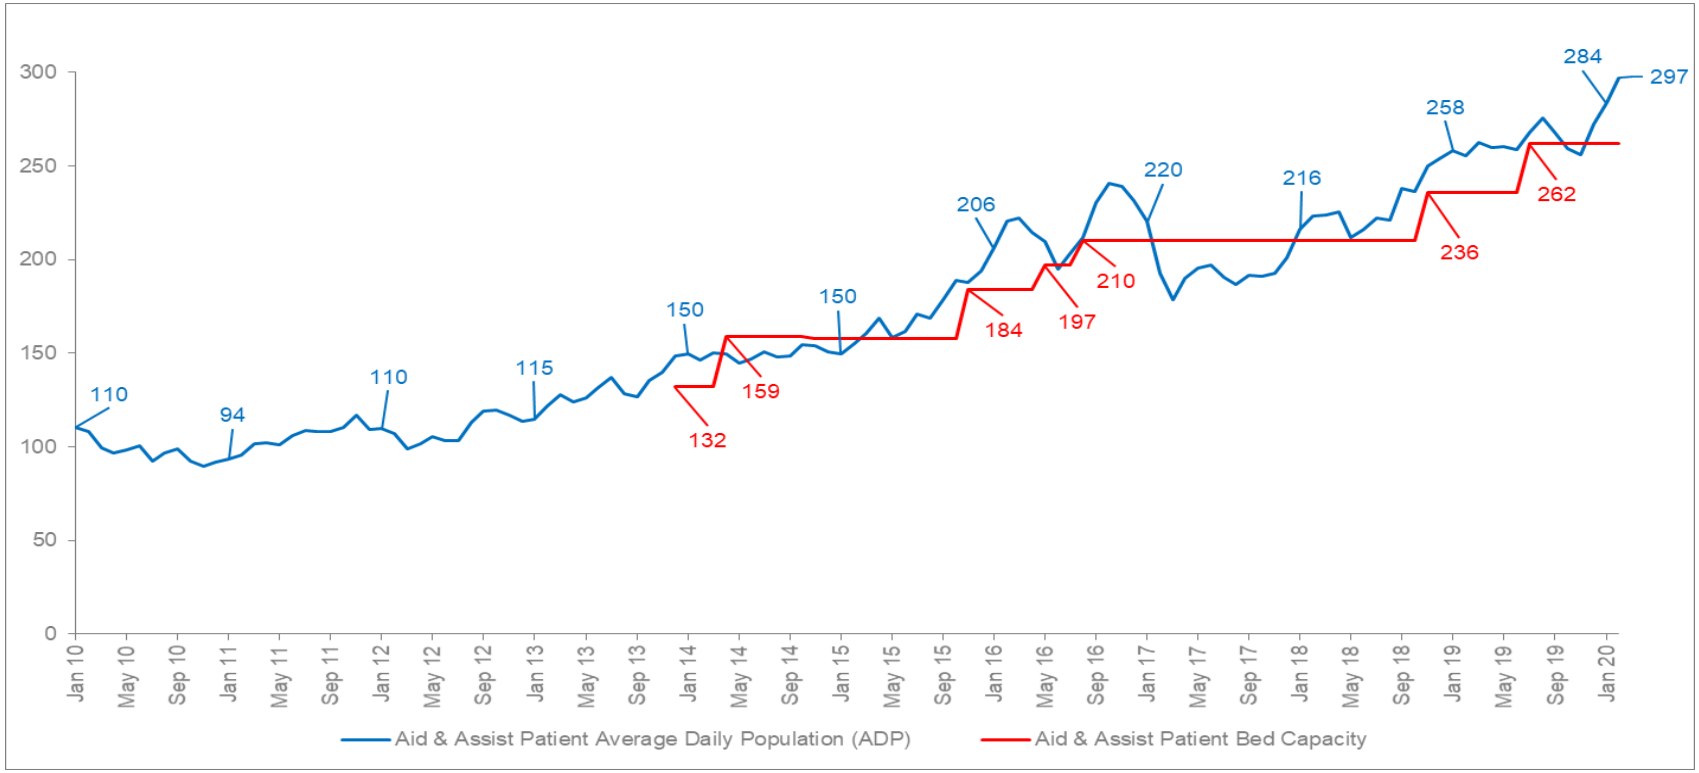
- **Pathways/Bridges** – Pathways/Bridges is a combined program. Pathways primarily serves the GEI population for people who have progressed in their recovery. The Pathways program also serves a limited number of the Aid and Assist population when hospital bed space is unavailable within the Archways program due to census pressure. Bridges serves people in GEI population patients who are preparing to transition back to the community. Bridges units are licensed at the secure residential treatment level of care. The goal is to help patients achieve their highest level of health, safety and independence as they prepare for discharge or conditional release to a less-restrictive community setting. Individuals work on living skills through daily treatment mall activities, classes and approved outings. They also participate in discharge planning with their treatment team members.

Increasing Aid and Assist population

The number of people sent to OSH to be restored to competency so they can assist in their own defense has grown significantly over the past several years. To serve this growing population OSH has consolidated units, converted units and opened units.

Salem Campus

In 2015, the Salem campus converted one unit from serving people who have been civilly committed to serving people under Aid and Assist orders. Then, in April 2016, the Salem campus closed two cottages and used their staff to open its last vacant unit (26 beds) to meet Aid and Assist population demands. The Aid and Assist population at OSH spiked dramatically in October 2018, forcing the hospital to convert a 26-bed civil commitment unit to an Aid and Assist unit. In July 2019, OSH again converted an additional 26-bed civil commitment to and Aid and Assist unit. These unit conversions provided hospital bed capacity to serve people under Aid and Assist orders that are waiting in jail to receive psychiatric care and competency restoration services. The unit conversions also reduced the hospital's capacity to serve people who have been civilly committed after a judge found them to be a danger to themselves or others.



Salem Campus

Key to addressing this issue is developing a robust array of community services, including crisis interventions – such as mobile crisis teams and assertive community teams – that enable law enforcement and other community partners to connect people with mental health services, rather than arrest them. Additionally, community capacity for competency restoration must expand via diversion pre-hospitalization and post-hospitalization for those who do not require hospital level of care. The Oregon Health Authority (OHA), including the Health Systems Division (HSD) and OSH, is working with community partners to strengthen and expand these services.

USDOJ/Olmstead

Since 2016, Oregon State Hospital has operated under the Oregon Performance Plan (OPP) that was developed by the Oregon Health Authority and approved by the United States Department of Justice. This plan outlined expectations and measures for ensuring people under civil commitment receive behavioral health services in a community setting when hospital level care was no longer required. The OPP reporting period ended June 2019 and OHA began transitioning to the development of the Behavioral Health Quality Performance Improvement Plan (BHQPIP) for ongoing reporting purposes, continued adherence to metrics established by the OPP, and to further the gains achieved through the OPP by establishing realistic and achievable goals. The BHQPIP is expected to be finalized in 2020-21.

Nurse Staffing

Adequate nurse staffing is fundamental for effective treatment and patient and staff safety at OSH. Per Oregon Revised Statute 441.154 and 441.155, the staffing plan for OSH is set by the Nurse Staffing Committee, composed of both nurse management and AFSCME-RN union members. On average, about 13.4 percent of the OSH direct-care staff (registered nurses, licensed practical nurses, and mental health technicians) are absent each day. This does not include planned absences such as vacation or personal business, nor does it reflect the absentee rate since the COVID-19 pandemic began. To meet the staffing plan's minimum staffing requirements, the hospital asks direct-care staff to volunteer for overtime. If not enough people volunteer, the hospital must mandate staff to work overtime. However, even with overtime shifts, the hospital's staffing needs are not always met.

Salem Campus

In addition to back-filling unplanned absences, OSH nursing staffing requirements are affected by:

- Acuity – The hospital needs a greater staff-to-patient ratio to maintain a patient-centric and effective treatment in a safe environment to accommodate for the severity of illness in the patient population.
- Precautions – The hospital needs additional staff to carry out physician-ordered patient "precautions," which is when one staff is assigned to monitor and engage an individual patient who the physician has assessed as having a medical risk or risk of harming themselves or others.

Per statute, the OSH Nurse Staffing Committee established a Nurse Staffing Plan in April 2017 (revised most recently in late 2019). In addition to meeting the requirements of the law regarding the length of shifts, lunch-break coverage, mandatory overtime, etc., the staffing plan also ensures the hospital meets the standards needed to maintain Centers for Medicare & Medicaid Services (CMS) certification.

The prevalence of staff call-outs (unplanned absences) and physician-ordered patient precautions has driven staffing needs well beyond the Nurse Staffing Committee's staffing plan. Historically and currently, OSH has relied on overtime as the primary means to meet staffing needs when direct-care staff are absent and to staff patient acuity/precaution needs. Over the past three years, OSH has averaged 22,594 hours and $880,555 in monthly overtime to fill planned and unplanned direct-care staff vacancies.

However, the 2015 Secretary of State audit of OSH overtime practices pointed out that *"Excessive overtime creates safety risks because it can lead to fatigue, affecting nursing staffs' ability to deliver good patient care, making good clinical decisions, and communicating effectively. Fatigued nursing staff could make errors, take unnecessary risks, be forgetful, and be in a poor mood."*

Further, in 2016, The Joint Commission visited OSH to follow up on concerns of inadequate staffing levels. The surveyor investigated the following standard: *EP 3 §482.62(d)(2) - (B150) - (2) There must be adequate numbers of registered nurses,*

licensed practical nurses, and mental health workers to provide the nursing care necessary under each patient's active treatment program. Because the surveyor observed the high level of unplanned direct-staff absences at OSH, she found that: "*This Standard is NOT MET as evidenced by: Observed in Record Review at Oregon State Hospital (2600 Center Street, NE, Salem, OR) site for the Psychiatric Hospital deemed service. In 35 of 112 shifts reviewed, staffing was noted not to meet the organization's expected staffing matrix."*

OSH established a nurse staffing float pool composed of limited duration positions and increased its use of agency contract nursing staff to fill in staffing gaps. These strategies help ensure adequate nurse staffing to provide active treatment, a therapeutic milieu, and a safe environment. The cost for these limited duration (LD) positions and increased nurse agency staffing is not budgeted and has been a driver of shortfalls in 2017-19 and in 2019-21 as the division has only partially afforded to make up costs from its existing budget allocation.

Revenue sources and changes

The Oregon State Hospital Salem Campus receives 82 percent of its funding from the General Fund. Other Funds revenues consisting of service revenues generated through the billing of Medicare and third-party insurance and local revenue from the hospital café, coffee shop, and patient made wood products sales account for 11 percent of the budget. Finally, Federal Funds from Medicaid and Disproportionate Share Hospital (DSH) payments make up the remaining 7 percent.

One of the financial impacts of a shifting population at Oregon State Hospital is lower numbers of patients on Medicare being admitted. This has reduced the collection of Medicare revenue necessitating fund shift adjustments for the 2021-23 biennium. DSH payments have also declined due to adjustments in the Federal Medical Assistance Percentage (FMAP) rate.

Salem Campus

Proposed new laws that apply to the program unit

Concept Subject: Advance Directives

Advance directives are required by statute to be given to patients within 5 days of admission. OSH's patients tend to be too ill to benefit from the information that advance directives provide until they have stabilized. Providing this information to patients whose symptoms are severe can negatively impact their recovery. OSH should be required to deliver information regarding medical advance directives and mental health advance directives after the patient has stabilized. OSH wants to assist its patients with advance directives when patients are better able to articulate their treatment needs.

Concept Subject: Aid and Assist Placeholder

The purpose of this placeholder bill is to address unforeseen issues regarding aid and assist during the 2021 session.

Concept Subject: Petitioner to Commit an Extremely Dangerous Person

Only District Attorneys may file petitions under ORS 426.701. OSH cannot always communicate patient information to District Attorneys or interest District Attorneys in filing petitions regarding OSH patients. Thus, OSH cannot utilize (i.e. file petitions) ORS 426.701 for some patients who would benefit from it. This legislative concept proposes an amendment to the statute so that Assistant Attorneys General may file petitions under ORS 426.701.

Concept Subject: Exception for OSH Forensic Evaluation Services from performing mental health evaluations of minors

This legislative concept would prohibit courts from ordering OSH/FES to conduct Senate Bill 1008 (2019) evaluations. Senate Bill 1008 (2019) is the new juvenile law, which took effect January 1, 2020, requiring mental health evaluations of minors charged with crimes before they may be adjudicated in adult court. The evaluators do not have to be certified, but OSH's Forensic Evaluation Service is already receiving inquiries from courts to have FES conduct these time-consuming evaluations (which have nothing to do with the youth's ability to aid and assist or culpability). FES does not have the bandwidth nor the expertise in adolescents to assist the juvenile delinquency system. Moreover, OSH and FES do not serve minors.

Concept Subject: Circumstances in which a physician or provider may disregard a declaration
This legislative concept would add ORS 426.701 to the types of commitments includes in ORS 127.720. ORS 127.720 provides that a physician may provide mental health treatment in a manner contrary to the patient's wishes, as expressed in a declaration for mental health treatment, if the patient is committed to the Oregon Health Authority pursuant to a list of statutory types of commitments. ORS 127.720 fails to include ORS 426.701 in the list of types of commitments. This is probably because ORS 426.701 is a relatively new type of commitment that was created after ORS 127.720.

Concept Subject: Modify "cost of care" statutes related to Oregon State Hospital to include costs of outpatient services
OSH patients often need to be taken out into the community to receive medically necessary outpatient medical and/or dental services. OSH pays these community provides for the services furnished to OSH patients. Current statute prohibits the cost of this care from being included in the patient's cost of care. Due to this, OSH must take care to exclude from Medicare and Medicaid cost reporting, as well as not being able to pass these costs to patients that can afford to pay them. This legislative concept would amend the cost of care statutes to include the costs of outpatient services provided to OSH patients would allow OSH to be compensated by insurers and patients that can afford to pay for these costs appropriately, as well as reduce the administrative burden of keeping these costs separate from OSH's overall cost of service provision.

Senate Bill 1575 (2020 Regular Session)

Senate Bill 1575 did not pass during the 2020 Regular Session; however, it was introduced to make improvements to Senate Bill 24 (2019). This bill was a product of the Senate Bill 24 Implementation Workgroup and will be brought again during the 2021 session with additional changes proposed by the Oregon Judicial Department.

Senate Bill 1575 redefined terms related to fitness to proceed and reorganized the fitness to proceed statutes. It modified procedures and criteria for committing a defendant charged with a felony to OSH in order to gain or regain fitness to proceed and required courts to find that defendant required a hospital level of care due to public safety concerns or acuity of symptoms of defendant's mental disorder, and that the appropriate community restoration services are not provided. Senate Bill 1575 modified procedures

and criteria for committing a defendant charged with a misdemeanor to OSH in order to gain or regain fitness to proceed and required either a recommendation from a certified evaluator that defendant required a hospital level of care and statement from community mental health program director concerning whether community restoration services are available or for the court to make certain findings concerning severity of defendant's symptoms and if they present public safety concerns and whether appropriate community restoration services are provided. Senate Bill 1575 modifies procedures when circumstances authorizing commitment of a defendant no longer exist and provides that if defendant is charged with a felony, the superintendent of OSH may notify the court when the hospital level of care is no longer necessary. Senate Bill 1575 authorizes a community mental health program director to notify the court if community restoration services become available for a committed defendant charged with felony or misdemeanor.

State-Delivered Secure Residential Treatment Facility

Expenditures by fund type, positions and full-time equivalents

	General	Other/Lottery	Federal	Total Funds	Positions	FTE
Leg. Approved 2019-21	$6.96	$0.42	$2.07	$9.45	42	42.00
Agency Request 2021-23	$8.36	$0.23	$2.62	$11.20	42	42.00
Difference	$1.40	-$0.19	$0.54	$1.75	0	0
Percent Change	20%	-45%	26%	19%	0%	0%

The Agency Request Budget of $11.2 million Total Funds continues funding for the Oregon State Hospital - Pendleton Cottage, a 16-bed state-delivered secure residential treatment facility, at the current service level for the 2021-23 biennium. This request also includes funding for some critical deferred maintenance projects in policy package #421.

Activities, programs and issues in the program unit base budget

Pendleton Cottage is a state-operated secure residential treatment facility in Pendleton, Oregon. With the capacity to serve up to 16 people, Pendleton Cottage provides 24-hour mental health treatment services for adults in a residential setting. In 2018, the facility averaged a 97 percent occupancy rate, with an average daily population of 15.67. The mission of Pendleton Cottage is to help people recover from their mental illness by focusing on positive life experiences, self-confidence and community integration. Pendleton Cottage is often the first step for people transitioning from the state hospital to a life in the community.

Background information

People served

Pendleton Cottage serves people who have been civilly committed or who are under the jurisdiction of the Psychiatric Security Review Board. Residents no longer require hospital level of care and still need 24-hour care and a higher level of supervision due to the status of their mental illness, safety and security concerns, and/or the severity of their offense.

State-Delivered Secure Residential Treatment Facility

Treatment philosophy

Pendleton Cottage uses the recovery model for person-centered treatment planning in which residents direct their own treatment. Together, residents and their treatment teams create an integrated service and support plan that incorporates the resident's residential service plan, treatment care plan, and the resident's self-stated dreams, desires and goals.

Residents who are under the jurisdiction of the Psychiatric Security Review Board also must meet the expectations outlined in their conditional release plan. To align with the self-directed treatment approach used at Pendleton Cottage, residents are encouraged to determine how they will meet their conditional release requirements and are offered opportunities for choice.

Pendleton Cottage services

- On-site and telemedicine psychiatric services.
- Individual therapy.
- Vocational services including on-site paid employment opportunities.
- Recreational services, both on- and off-site.
- In-house case management.
- Medication administration, monitoring and teaching.
- Nursing services for individuals who have significant medical needs, such as diabetes, chronic obstructive pulmonary disease, or physical disabilities.

Facility

Opened in 2009, Pendleton Cottage consists of two separate houses, allowing for the opportunity to serve both men and women. One house has the capacity to serve up to four women and four men, and the other house serves up to eight men. The property also includes a greenhouse and park for the residents to use.

State-Delivered Secure Residential Treatment Facility

In October 2016, Pendleton Cottage opened the Lane Activity Center, a new treatment space where residents participate in leisure and therapeutic group activities. The center enhances the facility's ability to offer active treatment and help individuals develop the skills they need to successfully move to a lower level of care.

Staffing
Pendleton Cottage has 42 staff, including the administrator, to meet the residents' complex behavioral and medical needs. The average staffing ratio is three staff to eight patients, with at least three direct-care staff and one nurse on every shift. Staff provide:

- Resident supervision.
- Therapeutic interventions.
- Medical assistance.
- Clinical work.
- Case management.
- Liaison to Psychiatric Security Review Board, including monthly progress reports.

Revenue sources and changes

Revenue sources for Pendleton Cottage include 74 percent General Fund. Other Funds revenues consisting primarily of private payment Room and Board, with additional revenues for Veteran's transportation reimbursement and meal tickets, account for 6 percent of the budget. Federal Funds revenue make up the remaining 22 percent and consist of the federal match of Medicaid claim billing. The change from per diem to fee for service billing has resulted in a minor increase in Federal Funds revenue and is represented in the 2021-23 fund shift adjustment.

Proposed new laws that apply to the program unit

None.

Oregon Health Authority: Oregon State Hospital

Junction City Campus

The Agency Request Budget of $126 million Total Funds continues funding for Oregon State Hospital - Junction City Campus at the current service level for 2021-23. This budget also includes a policy package request to expand hospital bed capacity by opening the remaining two treatment units at the facility.

Activities, programs and issues in the program unit base budget

Junction City Campus Detail

- Capacity – 6 units, (150 beds)
- Operating – 4 units, (96 beds)
- Populations served – civil commitment (includes voluntary commitments by guardian), guilty except for insanity (GEI)
- Census – 90.7 (Daily average population for 2019)
- Square feet – 220,000

Junction City Campus

Background information

Populations Served

Oregon State Hospital serves adults who need intensive, psychiatric treatment for severe and persistent mental illness. With 24-hour, on-site nursing and psychiatric care, the hospital helps patients gain the skills they need to successfully transition back to the community.

The Junction City campus serves individuals under two commitment types:

- **Civil** – People who come to Oregon State Hospital through a civil commitment require 24-hour care that is not available through community programs. They have been found by the court to be a danger to themselves or others, or unable to provide for their own basic needs – such as health and safety – because of a mental disorder. A subset of this population is called *Voluntary by Guardian*. Working through the court system, legal guardians may commit their wards who meet civil commitment criteria.
- **Guilty Except for Insanity (GEI)** – Oregon State Hospital serves patients who have successfully pleaded Guilty Except for Insanity (GEI) for crimes related to their mental illness. These patients are under the jurisdiction of the Psychiatric Security Review Board.

Treatment program

Because of its small size, the Junction City campus has only one treatment program. The Junction City campus provides varied treatment mall and group therapy offerings. The program's intent is to help patients achieve their highest level of health, safety and independence as they prepare for discharge or conditional release to a less-restrictive community setting. Individuals work on living skills through daily treatment mall activities, classes and approved outings. Patients also participate in discharge planning with their treatment team.

Although the campus admits people from all 36 counties, an emphasis is put on serving seven southern counties – Lane, Curry, Klamath, Douglas, Jackson, Coos and Lake.

Junction City Campus

Revenue sources and changes

The Junction City campus of the Oregon State Hospital receives 12 percent of its funding from the General Fund and 63 percent Federal Funds. Other Fund revenues comprise the remaining 25 percent of funding, which consist of service revenues generated through the billing of Medicare and third-party insurance as well as local revenues derived from the hospital café and coffee shop.

Proposed new laws that apply to the program unit

Concept Subject: Advance Directives

Advance directives are required by statute to be given to patients within 5 days of admission. OSH's patients tend to be too ill to benefit from the information that advance directives provide until they have stabilized. Providing this information to patients whose symptoms are severe can negatively impact their recovery. OSH should be required to deliver information regarding medical advance directives and mental health advance directives after the patient has stabilized. OSH wants to assist its patients with advance directives when patients are better able to articulate their treatment needs.

Concept Subject: Petitioner to Commit an Extremely Dangerous Person

Only District Attorneys may file petitions under ORS 426.701. OSH cannot always communicate patient information to District Attorneys or interest District Attorneys in filing petitions regarding OSH patients. Thus, OSH cannot utilize (i.e. file petitions) ORS 426.701 for some patients who would benefit from it. This legislative concept proposes an amendment to the statute so that Assistant Attorneys General may file petitions under ORS 426.701.

Concept Subject: Circumstances in which a physician or provider may disregard a declaration

This legislative concept would add ORS 426.701 to the types of commitments includes in ORS 127.720. ORS 127.720 provides that a physician may provide mental health treatment in a manner contrary to the patient's wishes, as expressed in a declaration for mental health treatment, if the patient is committed to the Oregon Health Authority pursuant to a list of statutory types of

commitments. ORS 127.720 fails to include ORS 426.701 in the list of types of commitments. This is probably because ORS 426.701 is a relatively new type of commitment that was created after ORS 127.720.

Concept Subject: Modify "cost of care" statutes related to Oregon State Hospital to include costs of outpatient services

OSH patients often need to be taken out into the community to receive medically necessary outpatient medical and/or dental services. OSH pays these community provides for the services furnished to OSH patients. Current statute prohibits the cost of this care from being included in the patient's cost of care. Due to this, OSH must take care to exclude from Medicare and Medicaid cost reporting, as well as not being able to pass these costs to patients that can afford to pay them. This legislative concept would amend the cost of care statutes to include the costs of outpatient services provided to OSH patients would allow OSH to be compensated by insurers and patients that can afford to pay for these costs appropriately, as well as reduce the administrative burden of keeping these costs separate from OSH's overall cost of service provision.

Junction City Residential Treatment Facility

Expenditures by fund type, positions and full-time equivalents

	General	Other/Lottery	Federal	Total Funds	Positions	FTE
Leg. Approved 2019-21	$0.00	$0.00	$0.00	$0.00	0	0.00

Percent Change	N/A	N/A	N/A	N/A	N/A	N/A

The Junction City Residential Treatment Facility is not part of Oregon State Hospital's current service level budget for the 2021-23 biennium. A policy package to establish this program as a secure residential treatment facility is priced at $12.2 million.

Activities, programs and issues in the program unit base budget

The Junction City Residential Treatment Facility (RTF), named Rivers Run, comprises two eight-bed suites on the Junction City Campus. The program currently serves people under civil commitments and people with voluntary and voluntary by guardian status who no longer need hospital level of care and are awaiting transition to a community placement.

Rivers Run services feature skills building (cooking, activities of daily living, navigating public transportation, etc.) and group treatment (substance use treatment, symptom management, etc.) focused on preparing people to successfully transition from the highly structured State Hospital environment to an integrated home in the community. Discharge planning for individuals at the Oregon State Hospital begins at admission. Rivers Run continues the transition planning while providing people an opportunity to build skills living in a home-like environment of increased choice and autonomy while maintaining safety with the support of the hospital next door. The Rivers Run staff work with residents and their support network – family members, friends, peers, and community partners – to help them build the skills they need to discharge to the least-restrictive and most-integrated setting possible.

Junction City Residential Treatment Facility

Background information

Oregon continues to experience an unanticipated increase in numbers of defendants who have been deemed unable to aid and assist in their own defense. Most of these defendants receive competency restoration services at the Oregon State Hospital. Oregon Health Authority opened this residential treatment facility (RTF) in the fall of 2019 as part of a strategy to make more hospital beds available to serve the increasing number of people under aid and assist orders being directed to Oregon State Hospital's Salem campus. This strategy included creating space for transitioning patients under civil commitment served at the Salem Campus to Junction City to open capacity at the Salem Campus to service people under aid and assist orders.

The Rivers Run program, a 16-bed Residential Treatment Facility (RTF) consisting of two 8-bed suites, was created to provide a system for patient throughput allowing people immediate access to lower levels of care while waiting for a permanent placement in the community.

Revenue sources and changes

There are no current revenue sources for this program. A policy package requesting General Fund appropriation is proposed for the 2021-23 biennium.

Proposed new laws that apply to the program unit

None.

2021-23 Oregon Health Authority — Agency Request Budget Policy Packages (POPs)

POP #	Legislation	Program Area	Policy Package Title	Official Title (45 Character Limit)	Description	General Fund	Lottery Funds	Other Funds	Federal Funds	Total Funds	POS	FTE	Due to an audit?
070	No	HPA	**Health IT Programs Shortfall**	Health IT Programs Shortfall	Removes positions and reduces FF expenditure limitation to align with revenues available at the current service level for OHA Health IT Programs. These programs have been funded by a 90% FF match from the HITECH Act, which sunsets in 2021. Package #320 requests GF to continue work at a lower federal match rate (75, 50, or 39 percent depending on work performed). Without funding to backfill the reduction in FF revenue, OHA will end health IT programs and eliminate 8 full-time positions.	$ -	$ -	$ -	$ (17,543,925)	$ (17,543,925)	(8)	(8.00)	No
070	No	PH	**Public Health Revenue Shortfalls**	Revenue Shortfall	This Pkg 070 is a combination of 8 separate, fee-related Pkg 070 revenue reductions which also have POP buy-backs: Tobacco Tax (no POP buyback), Ambulance License Fees (POP 450), RPS Radioactive Material Licensing (POP 448), ORELAP (POP 449), HLO RT (POP 452), PDMP (POP 453), HLO Cosmetology (POP 447), and Home Health Agencies Licensing (POP 451).	$ -	$ -	$ (5,208,300)	$ -	$ (5,208,300)	-	-	No
070	No	HSD	**HSD Revenue Shortfalls**	Revenue Shortfall	The 21-23 Lottery Forecast from June 2020 predicts that Lottery Revenue distributions to the Health Systems Division will be less than originally budgeted and approved in the 19-21 LAB Lottery Revenue budget.		$ (1,678,296)			$ (1,678,296)	-	-	
081	No	HSD	**HSD April 2020 e-board rollup**	April 2020 e-board	April 2020 e-board funding increased the HSD non-Medicaid budget for non-state workers for 07/01/2020 through 06/30/2021. Because this e-board happened after the 2021-23 Base budget was set, a Pkg 081 "rollup" package is required to account for this legislatively approved increase in the 2021-23 budget. It includes the same 3 types of inflation as other mandated caseload has.	$ 1,199,536	$ -		$ 1,847,109	$ 3,046,645	-	-	
401	LC 11	PH	**Beer, Wine and Cider Tax**	Beer, Wine and Cider Tax	Oregon faces a great unmet need for behavioral health services. At the same time, alcohol imposes large and avoidable costs on the health of all people in Oregon, and on Oregon's economy, communities and health care systems. This policy package would increase the tax on beer, wine, and cider by an amount yet to be determined. The additional revenues generated by the tax would be primarily used to address behavioral health, including substance use disorder prevention and treatment. *This policy package includes $293 million new Other Funds revenue.*	$ -	$ -	$ 29,000,000	$ -	$ 29,000,000	7	7.00	No
402	LC 37 & 38	CS, SAEC	**Strategic/Structural Health Equity Innovation and Implementation**	Health Equity Innovation & Implementation	OHA has limited capacity to complete current baseline equity and inclusion work for agency and Oregon, specifically related to health system transformation. This POP not only addresses current structural and resource deficits but is also necessary to meet the needs of the agency to fulfill the 10-year strategic goal of eliminating health inequities in Oregon, including strategic planning development and implementation.	$ 5,825,829	$ -	$ 509,764	$ 946,685	$ 7,282,278	17	15.08	No
403	No	HSD	**Indian Managed Care Entity**	Indian Managed Care Entity	Establish and support Indian Managed Care Entities at the request of Oregon's Federally recognized Tribes, which would provide critical care coordination services to American Indian/Alaska Native enrollees in OHP.	$ 1,365,071	$ -	$ -	$ 10,731,035	$ 12,096,106	-	-	No
404	LC 46	CS, SAEC	**Tribal Traditional Health Worker**	Tribal Traditional Health Worker	Funds for the creation of a sixth, separate Traditional Health Worker category for Indian Health Care Providers (IHCP) which would allow the Oregon Tribes and Urban Indian Health Program to develop a program to use in their communities. This would include developing curriculum, training staff, and certification. Once certified, IHCPs would be able to receive Medicaid reimbursement recognizing tribal based practices and other culturally specific services under this new worker type. Approval of the new provider type would occur via the State Plan Amendment process.	$ 171,706	$ -	$ 15,025	$ 27,901	$ 214,632	1	0.88	No
405	No	HSD	**CAWEM ESRD Outpatient Dialysis Coverage**	CAWEM ESRD Outpatient Dialysis Coverage	Covers the costs for dialysis, antirejection medication for kidney transplant, and additional related services and supplies to individuals eligible under Citizen/Alien Waived Emergency Medical (CAWEM) coverage. Currently, individuals covered under CAWEM are only able to access dialysis in an emergency setting. Medical assistance coverage for other, not CAWEM, Medicaid eligible recipients under the Oregon Health Plan includes inpatient and outpatient dialysis settings and antirejection medication for kidney transplant, and additional related services and supplies. Funding this policy package directly aligns with OHA's strategic vision of eliminating health inequities in Oregon in the next 10 years. Conversely, not funding this policy package would mean the CAWEM end stage renal disease (ESRD) population would continue to experience inequity by not receiving adequate renal dialysis services. The CAWEM ESRD population will continue to seek treatment in the emergency room setting which is more costly than in an outpatient setting.	$ 1,143,012	$ -	$ -	$ 1,757,251	$ 2,900,263	-	-	No
406	LC 35	HSD	**Children's Mobile Response and Stabilization Services**	Children's Mobile Crisis	Institutes a 24/7 365 day a year Children's Mobile response and stabilization program designed to deliver mobile response to support children, young adults and their parents and/or caregivers, as well as youth at risk for and in the custody of Child Welfare. Oregon has a mobile crisis response program for adults, but no such program is offered to children, youth and their parents and/or caregivers. This upstream, early intervention program would be available to parents and/or caregivers through use of a centralized referral system. Mobile response and stabilization staff would be able to support young people and their parents and/or caregivers in stabilizing the crisis situation and averting unnecessary emergency department visits, out-of-home placements, placement disruptions, arrests/incarceration and in reducing overall system costs.	$ 11,144,135	$ -	$ -	$ 4,329,183	$ 15,473,318	-	-	No
407	No	HSD	**Operate Fee-For-Service Like a CCO**	Operate FFS Like a CCO	Funds nine new positions to improve the OHP FFS program operations and address several identified program gaps by aligning the fee-for-service delivery system with that of a coordinated care organization. The adverse effect of not funding this package is that program gaps will persist, OHP members in FFS will continue to have a health plan that is inferior to CCO plans, and important policy work, such as fee schedule and rule updates, will continue to be delayed. Avoidable problems with OHP payment to providers will continue to occur.	$ 12,057,223	$ -	$ -	$ 20,137,313	$ 32,194,536	9	6.75	No
408	LC 2	PH	**Tobacco Retail Licensure**	Tobacco Retail Licensure	Tobacco is the leading preventable cause of death and disease in Oregon, costing the state $2.9 billion and nearly 8,000 lives every year. Moreover, the burden of tobacco use is not distributed evenly, falling heavily on Oregonians with low incomes, African Americans, Native Americans and Alaska Natives, and those who identify as LGBTQ+. This policy package would establish a strong statewide licensing system for retailers that sell tobacco products and inhalant delivery systems. It would equip OHA-PHD with new tools to educate retailers about tobacco laws, and – critically – to hold tobacco retailers that sell tobacco illegally accountable. Without statewide tobacco retail licensure, Oregon cannot robustly enforce tobacco laws such as the minimum legal sales age. A retail license could make it easier to enforce other tobacco sales laws such as tax collection compliance, counterfeit product sales, and compliance with federal laws (for example, no single cigarette sales or self-service displays of tobacco products).	$ -	$ -	$ 2,078,226	$ -	$ 2,078,226	12	7.86	No
409	LC 32 & 34	HSD, HPA	**Community Behavioral Health Services**	Comprehensive BH Services	Strategies and recommendations from the Governor's Behavioral Health Advisory Council to improve the behavioral health system for adults and transitioned-aged youth who experience serious mental illness and co-occurring substance use disorders.	$ 99,733,070	$ -	$ -	$ 94,771,895	$ 194,504,965	8	6.13	No
410	No	HPA	**Behavioral Health Electronic Health Records Incentives Program**	BH Electronic Health Record Incentives	Improving the behavioral health system is one of the Governor's top priorities; COVID-19 further highlights this need. While many behavioral health providers are experiencing inefficiencies related to health information (e.g. using paper charts and faxing records), many physical health providers are leveraging electronic health record (EHR) technology for improved efficiencies and patient care. By creating a Behavioral Health EHR Incentive Program, this POP would promote a more connected behavioral health system and allow behavioral health providers to catch up to their physical health peers in terms of health information technology (HIT). Incentivizing investments in EHR technology and other related HIT will provide the building blocks for care coordination, health information exchange, electronic reporting, patient care, and value-based payments. Oregon's vision of health system transformation cannot be achieved if behavioral health agencies do not have adequate tools and resources.	$ 2,233,876	$ -	$ -	$ 3,233,867	$ 5,467,743	1	0.75	No
411	No	HSD, HPA	**Community Mental Health Aid and Assist**	CMH Aid and Assist	OHA requests additional General Fund, Federal Fund limitation, and to establish 6 new positions. Funds will be used to increase community services to meet the immediate needs of people who have been arrested and court-ordered for services under Oregon's "Aid and Assist" laws (ORS 161.365 & 161.370). Additional OHA staff will ensure better coordination between courts, the Oregon State Hospital (OSH) and Community Mental Health (CMH) and Substance Use Disorder (SUD) service providers for people who have intensive behavioral health service needs When people have access to the proper behavioral health services at the proper time, Oregon will be in a stronger position to remain in compliance with Constitutional requirements that have been emphasized in the 2003 US Court of Appeals "Mink" decision and the 1999 US Supreme Court "Olmstead" decision. Failure to provide adequate OSH and CMH Program Services to this population could hinder OHA's ability to meet obligations under the MINK Order and Olmstead Requirements.	$ 19,268,531	$ -	$ -	$ 3,376,104	$ 22,644,635	6	4.50	No
201	No	Shared, HSD, SAEC	**Improving Data Integrity and Compliance**	Improving Data Integrity and Compliance	Data is an organization's most valuable asset, after its people. All services provided by OHA DHS depend on data and the ability to access, manipulate and integrate information. OHA and DHS lack a cohesive plan to secure, protect, manage, govern and support data - this must change. The difficulties faced by the Children's Health Complexity project are good examples of the difficulties faced trying to analyze current OHA and DHS data. A data strategy to improve data security and protection, and to perform data analysis, quality, governance, classification, integrity and management and meet legislatively mandated criteria defined by House Bill 2134 (2013) and the open data standards criteria required by House Bill 3361 (2017) is required. To address this situation, a sustained effort with the right resources, professional support and tools is essential.	$ 5,008,415	$ -	$ 3,785,884	$ 7,069,443	$ 15,863,742	19	17.25	No

2021-23 Oregon Health Authority – Agency Request Budget Policy Packages (POPs)

POP #	Legislation	Program Area	Policy Package Title	Official Title (45 Character Limit)	Description	General Fund	Lottery Funds	Other Funds	Federal Funds	Total Funds	POS	FTE	Due to an audit?
202	No	Shared, HPA	**Statewide Community Information Exchange**	Statewide CIE	Supports a Statewide Community Information Exchange (CIE) that would electronically connect health care and social services to support OHP and DHS clients in need. This statewide initiative leverages CIEs implemented by CCO and provides OHA and DHS with CIE platforms to screen Oregonians in need, locate community resources, and make referrals. It integrates local CIE networks, creates a centralized resource directory, and coordinates tools and standardizes data and measures. Without funds OHA and DHS staff would lack the tools to respond to the increased needs of OHP members and DHS clients after the enormous disruptions of COVID-19. Without funds to connect local CIE networks and standardize tools, the result would be an increased burden on community-based organizations, fragmented services, and gaps in service delivery. Without meaningful coordination and follow-up on social service referrals, health disparities would persist, the system would perpetuate inequities, and ultimately our most vulnerable Oregonians would be left behind.	$ 936,557	$ -	$ 517,533	$ 5,166,172	$ 6,620,262	4	3.68	No
412	No	HSD	**Expansion of Capacity for HSD Contract Development**	Capacity for Contract Development	HSD program and operations are an essential part of expanding and refining Medicaid & Behavioral Health programs and services throughout Oregon. HSD currently maintains oversight of 550 active contracts, processing over 850 contract action requests—new contracts, amendments, and solicitations—each calendar quarter. In order to better serve Oregonians, HSD must expand its capabilities and capacity in order to manage the increasing demands and meet crucial service levels for new contract requests, solicitations and contract amendments.	$ 237,898	$ -	$ 10,476	$ 248,382	$ 496,756	2	1.50	No
413	No	OSH	**Person-Directed Transition Team**	Person-Directed Transition Team	Funds the Person Directed Transition Team (PDTT), to both continue the established work of the PDTT for persons with a civil commitment to OSH and expand PDTT services to persons committed under the Psychiatric Security Review Board (PSRB) and under Aid and Assist orders for competency restoration. The PDTT has demonstrated its efficacy in motivating patients to participate in aftercare planning and supporting successful community transitions for patients that are civilly committed. Both patients under the PSRB and Aid and Assist restoration orders have been identified as sharing common barriers with the civil population and would benefit from PDTT services. If PDTT is not funded, OSH's need for intensive and individualized transition services for the most complex patients at OSH will go unmet. Such patients could be more likely to remain at OSH when treatment in the community in a less costly and less restrictive environment is appropriate and required by Department of Justice guidelines.	$ 1,853,883	$ -	$ -	$ -	$ 1,853,883	8	7.40	No
203	No	Shared, SAEC	**Critical Systems**	Critical Systems	The current state of the DHS and OHA's legacy systems are a serious risk to the agencies' service delivery. Many of the mission critical applications are 20-40 years old. These foundational, hub systems are relied on by many other systems within DHS and OHA and by other agencies. The systems are rapidly reaching an unsustainable state due to their outdated technology and inability to obtain people with the programming skills necessary to support them. DHS and OHA have implemented major solutions under the Modernization umbrella including the ONE MAGI system and the pending Integrated Eligibility system. Now attention must be paid to modernizing the legacy systems with an emphasis on the Mainframe. This policy package continues modernization efforts to improve access to services, automate processes and modernize aging systems.	$ 2,625,464	$ -	$ 7,939,795	$ 810,138	$ 11,375,397	19	19.00	No
414	No	HSD, Shared	**Compass Modernization**	Compass Modernization	Continues the Compass Modernization portfolio projects approved and partially funded in the 2019-21 biennium to address data integration and reporting issues. OHA behavioral health data are currently submitted on paper or to siloed systems and cannot be integrated to create a more accurate view of health and service inequities and areas of need across Oregon. OHA is unable to provide adequate data for forecasting or mandated state and federal reporting. This leaves the agency at risk of losing state and federal funding. OHA and DHS continue to fall short of the expectations of advocates by failing to meet the needs of transitioning clients, leaving the agencies at continuing risk of investigation and potential litigation for failure to meet legal requirements. This impacts the Oregonians we serve through poor coordination of care/services, leading to clients "falling through the cracks" and having to repeat levels of care. Data in the data warehouse would be used to improve the health system by increasing coordination and access to timely, appropriate and equitable health care.	$ 2,320,585	$ -	$ 1,669,288	$ 5,407,953	$ 9,397,826	6	6.00	No
415	No	OSH	**Rivers Run Conversion to Secure Residential Treatment Facility**	Rivers Run Conversion to SRTF	This proposal would create additional OSH treatment capacity, in the form of a Secure Residential Treatment Facility on the Junction City campus, for patients stepping down from hospital level of care. Increased SRTF capacity would allow the state hospital to serve individuals who no longer need hospital level of care but who are not yet ready to transition to an unsecure environment.	$ 12,206,366	$ -	$ -	$ -	$ 12,206,366	50	48.64	No
416	No	OSH	**Position Conversions**	Position Conversions	OSH has continuously been presented the duality of providing the appropriate levels of patient care within the restrictions of the number of personnel within the budget. To meet that patient care need, OSH has been forced to augment budgeted employees with alternative solutions - usually contracted through either direct professional services, temp agency contractors, locum/nursing agency or the Oregon Health Sciences University; but also including solutions such as limited duration or non-budgeted positions. This resource gap exists between a variety of roles and responsibilities throughout the hospital, primarily within the Psychiatry department. This policy package seeks to budgetarily would shift funding for existing contracts budgets to permanent position authority.	$ -	$ -	$ -	$ -	$ -	34	34.00	No
417	LC 6	PH	**Public Health Modernization**	Public Health Modernization	Since 2013, Oregon has been on a path to fundamentally shift its practice to ensure essential public health protections are in place for all Oregonians through equitable, outcomes-driven and accountable services. The groundwork laid through initial investments in public health modernization have been critical to Oregon's management of the COVID-19 pandemic. However, the COVID-19 response has highlighted continued gaps in the public health system, specifically centering all work in health equity and cultural responsiveness and apply equity principles across all areas of public health practice. This policy package supports implementation of key public health programs in state, local and tribal public health authorities and communities and creates mechanisms for increased accountability for equitable health outcomes. Not funding this policy package risks OHA's ability to ensure basic public health protections guaranteed in statute are available to every person in Oregon and challenges OHA in continuing to meet the deliverables and timelines prescribed in House Bill 3100 (2015).	$ 68,875,348	$ -	$ (465,178)	$ (752,016)	$ 67,658,154	28	28.00	No
418	No	PH	**Universally Offered Home Visiting**	Universally Offered Home Visiting	Continues to provide resources required to implement and scale up the next phase of universally offered home visiting (UoHV) in Oregon. This continues the phased-in approach of implementing this program, continuing with the early adopter communities and the next cohort. If the UoHV Initiative is not funded, it would result in the inability to fully implement the program as statutorily mandated. This would undermine the goal of establishing a more cohesive and comprehensive home-visiting system that is evidence-based and connects every family with a newborn in Oregon with local resources that are individualized, non-stigmatizing and meet them where they are with what they need. As the program would be implemented at the local level there would be an impact of reduced capacity to adequately serve families during the biennium.	$ 5,126,565	$ -	$ -	$ 3,180,526	$ 8,307,091	4	3.50	No
419	No	HSD	**CCO 2.0 Quality Assurance & Improving Data Collection**	CCO 2.0 Quality Assurance Compliance	HSD lacks sufficient staff, process automation, and digitization of paper-based processes to meet the agency's oversight and quality assurance responsibilities due to the implementation of CCO 2.0 on January 1, 2020. CCO 2.0 significantly increased the volume and complexity of requirements for CCOs, which are designed to help achieve the Triple Aim of better health, better care, and lower costs while improving health equity. To meet many of these requirements, CCOs will be submitting more deliverables to OHA for evaluation, tracking and analysis than ever before. OHA requests four additional staff to enable full implementation of CCO 2.0 requirements through the development of CCO deliverables, communication and guidance to CCOs in achieving the requirements and extensive evaluation of CCO deliverables. This policy package would also purchase additional licenses and contractor time to design and build the online templates, interfaces, and supporting data infrastructure and include staff training to facilitate CCO reporting and other OHA data collection efforts. During the COVID-19 emergency it has been difficult to collect and review the required information as it is primarily paper-based and a challenge to transition to a remote work environment.	$ 870,172	$ -	$ -	$ 1,152,584	$ 2,022,756	4	4.00	No
420	No	HSD	**CCO Quality Pool Withhold**	CCO Quality Pool Withhold	To increase accountability, flexibility, alignment with CCO 2.0 policy aims, and to solidify longer term financial stability and appropriately reflect the Quality Pool in the Minimum Medical Loss Ratio, this policy package alters the CCO Quality Pool from an incentive to a withhold arrangement.	$ 34,044,088	$ -	$ -	$ 87,109,154	$ 121,153,242	-	-	No
421	No	OSH, SAEC	**Deferred Maintenance**	Deferred Maintenance	The Salem campus of OSH consists of 1.2 million square feet of buildings and interior court yards and has a Current Replacement Value as reported to the Capital Advisory Board of $363.3 million. This makes the Oregon State Hospital among the highest replacement value of any single facility owned by the state. The Pendleton cottage facility has a current replacement value of $2.8 million and is presenting considerable deferred maintenance due to the age of the campus. Funding the requested deferred maintenance requests would eliminate the current critical deferred maintenance needs for the Salem and Pendleton campuses and maximize the lifespan of the state's investment and public trust.	$ 1,907,943	$ -	$ 1,425,000	$ -	$ 3,332,943	-	-	No
422	No	OSH, SAEC	**Asset Replacement**	Asset Replacement	The OSH Salem facility began construction in 2009, was completed in 2011 and is over 10 years old. The Junction City facility is now over 5 years old. As aging occurs, much of the expendable property and capital assets in operation have outlived or have soon expiring useful lives. Replacement of these items is necessary to provide a safe and secure environment for patients and staff, as well as maintain critical continuity of hospital operations.	$ 1,774,192	$ -	$ 4,429,599	$ -	$ 6,203,791	-	-	No
423	No	OSH, SAEC	**Oregon State Hospital Capital Improvement**	OSH Capital Improvement	The OSH Salem Campus is the primary state psychiatric facility serving some of Oregon's most vulnerable populations. OSH has identified 3 critical capital improvement projects that would provide: 1) a self-sustainable facility that could maintain a safe and secure environment of care throughout loss of city water and or contamination of city water such as the 2018 Cyanotoxin event, 2) expanded staff space by building a second floor within an existing area, 3) and the repurposing of existing space to provide enhanced treatment capability.	$ 719,933	$ -	$ 6,980,000	$ -	$ 7,699,933	-	-	No

2021-23 Oregon Health Authority — Agency Request Budget Policy Packages (POPs)

POP #	Legislation	Program Area	Policy Package Title	Official Title (45 Character Limit)	Description	General Fund	Lottery Funds	Other Funds	Federal Funds	Total Funds	POS	FTE	Due to an audit?
424	No	HPA	**Health IT Programs Support**	Health IT Programs Support	Health IT infrastructure is critical to support COVID response and recovery, including CCO and provider coordination and support for quarantined individuals. Because the 90 percent federal match rate sunsets in 2021, without additional General Fund, OHA will have to end existing work: the Oregon Provider Directory and the Clinical Quality Metrics Registry programs and reduce the HIT Commons and Medicaid PreManage programs. These programs support critical stakeholder participation in health system transformation, including care coordination, operational efficiencies, value-based payment, quality improvement, and addressing social determinants of health and health equity. Programs have strong support across providers, hospitals, health plans and CCOs, including OHLC, OAHHS, OMA. The requested General Fund would continue existing, established programs and retain current positions that will otherwise be eliminated. No new work is proposed in this policy package.	$ 3,483,633	$ -	$ -	$ 12,105,133	$ 15,588,766	9	8.13	No
425	LC 26	PEBB/OEBB	**Aligning Purchasing Power Across PEBB/OEBB and Other Public Purchasers**	Aligning Purchasing Power Across PEBB/OEBB	One of the most important levers OHA has for spreading change across the healthcare marketplace is aligning the state's purchasing power across PEBB and OEBB along with other public purchasers. This policy package provides a pathway to expand PEBB and OEBB's statewide enrollment footprint of 300,000 covered lives. It allows for additional special procurement authority for joint purchasing initiatives and adds resources to continue to transform the delivery systems in alignment with coordinated care organizations (CCO) and the coordinated care model. Both boards have fully committed to advancing the coordinated care model and exploring innovative, long-term solutions to stay under a 3.4 percent annual trend cap. Under their current legal structures, the boards' procurement authority does not allow for the flexibility needed to directly contract with plans who can meet specific criteria as determined by the boards, without issuing a request for proposal. This policy package will grant expanded procurement authority to explore opportunities in innovation as they are presented to the boards.	$ -	$ -	$ 1,570,708	$ -	$ 1,570,708	2	1.76	No
426	No	PEBB/OEBB	**Benefit Management System Replacement Project for PEBB/OEBB**	PEBB/OEBB BMS Replacement Project	The current benefit management systems (BMS) used by OEBB and PEBB no longer support all current business needs since their respective introductions in 2008 and 2003. OEBB and PEBB, along with the OEBB and PEBB boards, are seeking to integrate the administration and support of the two systems, with improved user experience and customer care, into a single platform to meet the legislative direction provided under SB 1067 (2017). Not prioritizing and supporting a replacement effort for the current system will result in the continued use of end-of-lifecycle technology that is fragmented, non-standard, difficult to support, and is not scalable. Approximately 300,000 covered lives would be at risk for benefits interruption if a replacement system is not identified and procured prior to the expiration of existing vendor support in 2022.	$ -	$ -	$ 8,182,928	$ -	$ 8,182,928	-	-	OHA
427	LC 20 & 21	HPA	**Oregon State Option & Coverage Stabilization**	Public Option/ Medicaid Buy-In	Enables OHA to refine the details of health insurance reforms that would be intended to increase access to health insurance while reducing premiums paid by consumers – potentially through a public option or a "Medicaid buy-in" plan as envisioned by SB 770 (2019).	$ 200,000	$ -	$ -	$ -	$ 200,000	-	-	No
428	No	PH	**State Support for Public Health**	State Support for Public Health	State Support for Public Health (SSPH) provides local public health authorities (LPHAs) with basic capacity for communicable disease control investigation and response for diseases. In the 2015-17 biennium, General Fund for SSPH was converted to fee revenue from the Oregon Medical Marijuana Program (OMMP). OMMP fee revenue has steadily declined and current revenue cannot sustain expenses in the program and fund the SSPH. This policy package requests General Fund replace OMMP fee revenue so that basic communicable disease capacity can be maintained across LPHAs. Not funding this risks the loss of LPHA communicable disease nursing and other staff that provide the infrastructure for Oregon's ability to respond locally to threats, including COVID-19. The loss of these staff can mean the quick spread of communicable diseases that otherwise could be contained through traditional public health investigation and control measures. The impacts of these types of cuts to public health programs would have a disproportionate impact on communities of color and low-income communities.	$ 1,495,538	$ -	$ (1,495,538)	$ -	$ -	-	-	No
429	LC 25	HPA	**Statewide Value-based Payment Adoption, Alignment, and Infrastructure**	Statewide VBP Infrastructure and Alignment	To leverage OHA's leadership role in establishing a statewide value-based payment roadmap and requisite technical assistance infrastructure to support increased adoption and alignment of VBP across Oregon.	$ 946,781	$ -	$ -	$ 605,319	$ 1,552,100	1	0.88	No
430	No	PH	**PPE & Medical Supply for State Inventory Reserve (SIR)**	PPE and Medical Supply for State Reserve	OHA will lead effort to develop a coordinated and effectively managed State Inventory Reserve (SIR) of PPE and medical supplies to ensure Oregon is equipped to respond to future public health crises.	$ 60,635,821	$ -	$ -	$ -	$ 60,635,821	1	0.75	No
431	No	HSD	**Substance Use Disorder 1115 Waiver State Plan Amendment**	SUD 1115 Waiver	Oregon is submitting a substance use disorder (SUD) 1115 Waiver and state plan amendment (SPA) to CMS to support an enhanced full continuum of care delivery system for individuals with SUD. If the waiver and corresponding SPA are approved, OHA would be able to utilize additional Medicaid dollars to pay for residential treatment for more Oregonians with SUD. If approved, this would provide the supports needed to prevent SUD and sustain long-term recovery, including crisis intervention, peer support services, outreach and education to help individuals in recovery find and keep housing.	$ 31,511,910	$ -	$ -	$ 166,509,066	$ 198,020,976	1	1.00	No
432	No	OSH	**Electronic Health Records Replacement Planning**	EHR Replacement	OSH's current electronic health record (EHR), does not adequately support the clinical or business needs of the hospital. Since 2011, the current system has been in a continuous state of development, preventing OSH from fully eliminating the paper processes and tracking systems. The system lacks a functional revenue cycle management element which presents challenges for billing and reconciling claims and necessitating use of additional ancillary systems. This package requests funding to begin a multi-biennia process of replacing the current OSH EHR.	$ 1,815,628	$ -	$ -	$ -	$ 1,815,628	5	4.40	No
433	No	OSH, SAEC	**Technology Modernization**	Technology Modernization	This comprehensive technology modernization and enhancement package increases the rigor and accountability of technology administration at OSH to further improve service delivery to patients.	$ 6,985,095	$ -	$ 60,401	$ -	$ 7,045,496	17	14.96	SOS
204	No	Shared, CS, SAEC	**Modernization: Financial Systems**	Modernization: Financial Systems	DHS and OHA comprise the largest Oregon state agencies disbursing billions of dollars of state and federal support services to Oregonians. The agencies need an integrated, federally compliant financial management system for budgeting, payments, allocations and reconciliations. The current financial environment is extremely limited. No budget system exists. Spreadsheets are used to develop and manage budgets and track funding. Financial payments use over 20 systems and interfaces pre-dating the turn of the century. Payment and reconciliation systems are end-of-life COBOL Mainframe with duplicative functionality, augmented by spreadsheets and paper processes. Data uniformity between systems is lacking, reconciliation is difficult and expensive, financial business rules are inconsistent, error tracing is manual. Re-keyed financial data results in increased errors. Financial complexity has grown commensurately with agency growth yielding the untenable environment of today. The lack of modern financial management capabilities must be addressed to mitigate financial and data risk for the agencies.	$ 1,185,519	$ -	$ 1,853,236	$ 291,786	$ 3,330,541	4	4.00	No
205	No	HSD	**Modularity**	Modularity	Ensure continued availability of the mission critical Medicaid Management Information System (MMIS) for Oregonians through funding of this multi-biennium Medicaid Modularity initiative. Efforts include: 1) Replace end-of-life system servers, which must be completed by 2024 or security of data and access to the system will be compromised. 2) Continue to develop a strategic plan and roadmap for modernization and modularization of the Medicaid system in compliance with CMS. Non-compliance with CMS directive to modernize and componentize Medicaid systems could shift $26m in biennial costs to the state if CMS reduces their enhanced funding for maintenance & operations (M&O) of the MMIS. 3) Meet CMS requirements by updating the Medicaid Information Technology Architecture State Self-Assessment. Non-compliance may impact CMS enhanced funding for M&O and development efforts. 4) Begin to establish a Project Management Office to manage long-term Medicaid Modularity initiatives supporting successful execution of multiple projects in future biennia. 5) Engage Systems Integrator services providing expertise, staffing and consulting services to begin implementing Medicaid modules. Without this POP, state match funds from OHA's budget would be needed. Server replacement is mandatory and must occur in 2021-23 or the MMIS will be at significant risk of security and data breaches. The majority of the funds requested are for server replacement.	$ 3,143,626	$ -	$ -	$ 19,862,663	$ 23,006,289	2	1.50	No
434	No	OSH	**Secure Transport**	Secure Transport	OSH is required to transport patients to receive required medical care outside of the scope of OSH's internal medical clinic. Patients who fall under ORS 161.295 (Guilty Except for Insanity), ORS 462.701 (Extremely Dangerous Persons) or those committed under ORS 161.370 (Aid and Assist) without off-grounds privileges must be transported with custody restraints. To conduct transports with custody restraints by approved Joint Commission standards, OSH is required to have medical staff and two (2) other escorting staff present and available for any patient transport. This is not feasible within current staffing and budget levels. This package would allow OSH to contract with law enforcement to conduct required patient transport services to ensure patient safety and security and to comply with Joint Commission standards.	$ 1,700,000	$ -	$ -	$ -	$ 1,700,000	-	-	No
435	No	HSD	**Fee-for-Service (FFS) 30% Dental Reimbursement Rate Increase**	Dental FFS Rate Increase	Oregon ranks 30th in national Medicaid Fee-For-Service (FFS) reimbursement for oral health, known as Oregon Health Plan (OHP) in Oregon. Ninety to ninety-five percent of OHP members are covered for dental services through managed care. The FFS program covers the rest with 375 participating providers. Less than half of the 375 participating providers routinely bill for services. This does not support the OHA values, vision or mission. Increasing dental FFS reimbursement rates by 30 percent incentivizes provider enrollment and increases service access, better ensuring Oregon's most vulnerable receive necessary oral health services. Through inaction, the delivery system could continue to dwindle; Oregon Health Professional Shortage Areas could grow throughout the state. The oral health system has suffered adverse effects due to COVID-19. Providers, if reopening at all, are reopening on shaky ground. Initiating this rate increase would reflect that Oregon is doing everything possible to aid in putting the system on a strong foothold to carry forward the work of the triple aim.	$ 306,929	$ -	$ -	$ 756,221	$ 1,063,150	-	-	No
436	LC 23	HPA	**Pharmacy Omnibus**	Pharmacy Omnibus	Equips OHA with staffing and clarified statutory authority to support and manage pharmacy purchasing in a collaborative and innovative manner. Without this POP OHA will be limited in its ability to effectively innovate and keep pace with the dynamic and quickly evolving pharmacy marketplace/supply chain.	$ 939,262	$ -	$ (75,215)	$ (23,183)	$ 840,864	4	3.52	No

2021-23 Oregon Health Authority — Agency Request Budget Policy Packages (POPs)

POP #	Legislation	Program Area	Policy Package Title	Official Title (45 Character Limit)	Description	General Fund	Lottery Funds	Other Funds	Federal Funds	Total Funds	POS	FTE	Due to an audit?
437	LC 18	HPA	**Strengthen Purchasing Power of the Marketplace**	Strengthen Purchasing Power of the Mktplace	Moves the Marketplace from DCBS to OHA, creating greater opportunities for aligned policy, which would utilize all state levers to maximize opportunities for greater alignment in pursuit of the triple-aim.	$ 1,516,499	$ -	$ 18,048,275	$ -	$ 19,564,774	19	19.00	No
438	No	HSD	**Ground Emergency Medical Transportation (GEMT)**	GEMT	Requests Other Funds and Federal Funds limitation as well as position authority for two positions needed to manage the Ground Emergency Medical Transportation (GEMT) program. Statute prevents the Oregon Health Authority (OHA) from using General Fund for the GEMT program and instead grants OHA the authority to charge fees to participating providers. OHA made this request during the 2020 legislative session, but due to developments in the legislative process the request was not approved. Not approving this policy package would put an estimated $33.7 million in Federal Funds at risk.	$ -	$ -	$ 22,458,774	$ 33,721,446	$ 56,180,220	2	2.00	No
439	No	OSH	**Complex Case Management Team (Acuity Team)**	Complex Case Management Team (Acuity Team)	OSH proposes adding a highly skilled complex case management team to respond to patients experiencing a behavioral emergency secondary to mental illness. This team would assist with development of individualized interventions through their observations of patients in behavioral crisis and work with direct care staff by providing expertise in milieu management.	$ 3,204,043	$ -	$ -	$ -	$ 3,204,043	15	13.20	No
440	LC 16, 17, &/or 21	HPA	**Employer Health Care Responsibility**	Employer Health Care Responsibility	Develops and implements employer health care responsibility program.	$ 443,272	$ -	$ -	$ -	$ 443,272	2	1.76	No
206	No	Shared	**Integrated Eligibility Supporting the Post-Implementation System and Major Enhancements**	Integrated Eligibility	To provide stability and continued support for the Integrated Eligibility (IE) program. The Integrated Eligibility initiative is a multi-biennium effort to develop a comprehensive unified system called ONE that integrates eligibility determination for Non-MAGI Medicaid, Supplemental Nutrition Assistance Program (SNAP), Temporary Assistance for Needy Families (TANF) and Employment Related Day Care (ERDC) benefits. This system represents an essential lifeline to vulnerable Oregonians in need. The IE program is an umbrella under which multiple inter-dependent yet disparate bodies of work fall. The Integrated Eligibility (IE) program must meet the needs of the Oregonians in which it serves. Enhanced Federal funding will continue to be available to finance a portion of the requests outlined for enhancements. Items that are for maintenance and operations or not new development are not eligible for enhanced funding but can receive funds under the maintenance and operational federal match.	$ 518,347	$ -	$ 11,072,142	$ 726,694	$ 12,317,183	39	39.00	No
441	No	HSD	**Mental Health Residential Services Transition to CCOs**	MH Residential Services Transition to CCOs	Transition mental health residential services to coordinated care organizations' global budgets effective January 1, 2022.	$ 14,867,434	$ -	$ -	$ 27,171,461	$ 42,038,895	-	-	No
207	No	Shared, SAEC	**Maintenance & Operations of Provider Time Capture**	Provider Time Capture M&O	DHS and OHA in-home care programs need a system that will increase program integrity and comply with the federal 21st Century CURES Act for Electronic Visit Verification System and the U.S. Department of Labor Fair Labor Standards Act. This would be done with the implementation of a time, attendance and payment system for the program's Home Care Workers and Personal Support Workers (HCW/PSW). The drivers for this work include a need for: 1. Improved timeliness and accuracy of data 2. Improved compliance with federal, state, and bargaining requirements 3. Increased efficiency and internal controls 4. Decreased duplication of efforts across agencies 5. HCW/PSW to accurately and timely report services provided across programs 6. Decrease dependency on outdated legacy systems This POP requests General Fund to implement ongoing maintenance and enhancements that build upon a base system implemented in the 2021-23 biennium that would result in an integrated solution that meets the 21st Century Cures Act criteria and helps protect vulnerable Oregonians. Not funding this POP would limit Oregon's ability support the system.	$ 58,615	$ -	$ 824,214	$ 18,246	$ 901,075	3	3.00	No
442	No	HSD	**Auditing Standards of Care**	Auditing Standards of Care	The provision of services that do not meet the highest levels of industry accepted standards of care (that are not evidence-based) are wasteful and in extreme cases, fraudulent or abusive. As OHA moves toward a value-based payment model in the OHP/Medicaid program, it becomes increasingly important OHA develop methodologies to ensure those services comply with federal guidance and state administrative rules for safe, high quality, and effective care. Although the OHP/Medicaid program has high standards of care that are outlined in the Health Evidence Review Commission Prioritized List and Guideline Notes, OHA does not currently have the ability to investigate whether these standards are being utilized in the delivery of services. This means that individual Medicaid providers using wasteful and potentially dangerous sub-standard treatments are currently going undetected. The Office of Program Integrity is proposing to expand the Program Integrity Audit Unit's audit process, for both fee-for-services provider audits and managed care participating provider audits, to include auditing for provider standards of care.	$ 277,537	$ -	$ -	$ 832,570	$ 1,110,107	3	2.64	No
443	No	HSD	**Medicaid Beneficiary Fraud Investigators and Self-Audit Program Auditors**	Beneficiary and Self-Audit	Proposes to modernize, streamline and expand the capacity of the Office of Program Integrity to conduct audits of OHP/Medicaid fee-for-service and managed care providers and investigate referrals for potential beneficiary and member fraud. There are two keys areas for expansion: 1) Investigate Medicaid beneficiary and member fraud referred from managed care entities, fraud tip-lines, and other internal and external sources. The program will be specifically designed to work closely with local law enforcement and district attorneys to develop, implement and monitor a cost-effective process for formal engagement to hold beneficiaries and members accountable for their fraudulent behaviors. 2) Develop and implement a comprehensive self-audit program for OHP/Medicaid providers or contractors who are either a marginal threat for fraud and abuse, or who, due to operational needs, would benefit from the opportunity to perform a directed and monitored self-audit program.	$ 464,519	$ -	$ -	$ 545,306	$ 1,009,825	5	4.40	No
209	No	SAEC	**Criminal Justice Information Services (CJIS) Security**	CJIS Security	CJIS Security: FBI CJIS Security Policy includes many intensive physical and data security requirements for any DHS or OHA staff or contractors, and systems accessing and/or using CJI. DHS and OHA programs use criminal justice information (CJI) for over 200,000 background and safety checks per year. These checks are completed for: DHS and OHA employees, volunteers, and contractors; child protective services; care providers for children, home care and personal support workers; foster and adoptive parents; traditional health worker certification; fraud investigations; licensing of service providers; emergency medical and trauma services, and others. Complying with these requirements requires substantial worksite infrastructure, personnel, and IT solutions across DHS and OHA offices. The Security and Privacy Services Office (SPSO) provides awareness and solutions to achieve compliance with Federal and Oregon privacy and security laws, rules and policies while supporting DHS|OHA programs to develop and improve business systems, provide key services, communicate and collaborate with partners and stakeholders, and insure the public trust. SPSO staff acquire in-depth understanding of key program services and systems to achieve more customized solutions for collaborating services even as they achieve current privacy and security postures.	$ 250,337	$ -	$ 38,513	$ 96,284	$ 385,134			No
444	No	HSD	**Forensic Digital Investigator**	Forensic Digital Investigator	Electronic health records (EHR) systems and the digital record keeping environments have become common place with health care providers. The construction, capabilities and capacities of these systems vary widely, and create multiple levels of questionable digital issues as related to the audits performed by Program Integrity Audit Unit. Not possessing the ability to perform forensic digital audits and develop and mature this capacity to keep pace with modern and changing technology will place the Office of Program Integrity OPI) and the OHP/Medicaid behind in its capabilities and sophistication for auditing in today's digital world. This proposal adds two forensic digital auditors to investigate digital record keeping and operation of EHR systems. These investigations will focus on the capability and operational aspects of the EHR through a systematic and in-depth look at the digital audit trail produced by provider operators.	$ 206,638	$ -	$ -	$ 242,578	$ 449,216	2	1.76	No
445	No	OSH	**Expanded Capacity/ Caseload**	Expanded Capacity/ Caseload	Opens the two remaining vacant treatment units on the Junction City campus, increasing OSH service capacity by 24 hospital level of Care beds and 24 Secure Residential Treatment Facility beds, allowing for movement of patients between campuses to yield space on the Salem campus to better meet the demand for treatment of individuals under Aid and Assist orders.	$ 31,009,638	$ -	$ -	$ -	$ 31,009,638	122	112.24	No
446	No	CS, SAEC	**OHA Enterprise Risk Management**	OHA Enterprise Risk Management	OHA continues to build the internal systems of control to manage a variety of risks to its programs and systems, and continuously improve the level of transparency about how OHA manages those risks. The federal government has mandated all federal agencies develop an Enterprise Risk Management (ERM) program and designate a Chief Risk Officer to oversee the program. To ensure the efficient and effective use of state resources, OHA requires a similar unit to oversee and manage OHA's portfolio of risks, including the infrastructure necessary to oversee and manage an ERM function across OHA. This work aligns with and compliments improvements in the functional alignment of work with the performance system, enhanced transparency, and building processes to improve OHA's culture of accountability.	$ 527,083	$ -	$ 46,114	$ 85,657	$ 654,812	3	2.25	No
447	No	PH	**Board of Cosmetology**	Board of Cosmetology	The Board of Cosmetology licensing fees must be increased to cover the cost of licensing and regulating the board's professionals and protecting the public. The board's current fees cannot sustain the program. Revenue and expense forecasts predict the board to slip into a budget deficit in 2020 that will continue in 2021-23. Without an increase in fees, the Health Licensing Office (HLO) will not be able to issue licenses to applicants in a timely manner and protect the public from potential health and safety violations. This would have an extremely negative impact on this board and HLO. In addition, the Legislature's mandate to protect the public would be compromised.	$ -	$ -	$ 1,562,547	$ -	$ 1,562,547	-	-	No
448	LC 8	PH	**Radiation Protection Services Fee Increase**	Radiation Protection Services Fee Increase	Ensures Radiation Protection Services (RPS) can continue providing adequate radiation health and safety of Oregonians by creating 2021-23 financial stability and adequate biennia funding through user-fee increases. Without additional revenues, RPS budget solvency will be threatened, leading to significant program staff and service reductions resulting in increased potential for harmful radiation exposure and injury to patients, workers and the public; and breaching of inter-agency agreements.	$ -	$ -	$ 1,408,249	$ -	$ 1,408,249	3	2.25	No

2021-23 Oregon Health Authority — Agency Request Budget Policy Packages (POPs)

POP #	Legislation	Program Area	Policy Package Title	Official Title (45 Character Limit)	Description	General Fund	Lottery Funds	Other Funds	Federal Funds	Total Funds	POS	FTE	Due to an audit?
449	No	PH	**Oregon Environmental Laboratory Accreditation Program (ORELAP)**	Oregon Environ Lab Accreditation Program Fees	The Oregon Environmental Laboratory Accreditation Program (ORELAP) was established in 1999 and is statutorily mandated. ORELAP accredits Oregon drinking water, environmental and cannabis laboratories based on international standards to ensure laboratories are in compliance with federal and state regulations. ORELAP is a fee-based program and is experiencing a budgetary shortfall. This policy package will support a fee increase and an update to the ORELAP fee structure for simplification and to ensure fees are appropriate for the work required to perform laboratory accreditations of differing complexity. A fee increase is needed to ensure ORELAP can provide timely and quality accreditations that meet established standards and regulatory requirements to best serve ORELAP's clients and protect the health of all Oregonians.	$ -	$ -	$ 896,094	$ -	$ 896,094	-	-	No
450	LC 9	PH	**Ambulance Licensing Fees**	Ambulance Licensing Fees	The Health Care Regulation and Quality Improvement section regulates both ambulance service agencies and vehicles to ensure the quality and safety of services provided to Oregonians. Revenues generated from current fees no longer support the cost of associated regulatory work. Pursuant to ORS 682.085, the program conducts on-site licensing surveys of ambulance agencies and vehicles, and complaint investigations to ensure that ambulance agencies and vehicles provide high-quality and safe services and comply with associated state licensing regulations. Failure to increase fees would jeopardize the program's ability to meet its licensing requirements which may jeopardize the quality of available emergency and nonemergency care and place patients and Emergency Medical Services providers at risk. It would also threaten the ability to maintain a fiscally sustainable budget, which is necessary to meet the agency's overall fiscal and operational goals.	$ -	$ -	$ 106,237	$ -	$ 106,237	-	-	No
451	LC 390	PH	**Home Health Agencies Licensing Fees**	Home Health Agencies Licensing Fees	This policy package increases home health agency licensure fees to support existing regulatory and complaint investigation activities and to ensure the quality of client care provided by home health agencies. Failure to approve the fee increase would jeopardize the program's ability to meet its statutory obligations including on-site initial and relicensure survey and complaint investigation requirements and may place persons at increased risk of unsafe or ineffective care. It would also jeopardize the program's ability to maintain a fiscally sustainable budget, which is necessary for the program to meet the agency's overall fiscal and operational goals.	$ -	$ -	$ 51,265	$ -	$ 51,265	-	-	No
452	No	PH	**Respiratory Therapist and Polysomnographic Technologist Licensing Board**	Resp Therapist Polysomnographic Tech Fees	The Respiratory Therapist and Polysomnographic Technologist Licensing Board licensing fees must be increased to cover the cost of licensing and regulating the board's professionals and protecting the public. Without the increased revenue, the Health Licensing Office (HLO) will have insufficient staff to process applications timely and license practitioners to begin working in Oregon. HLO would also have insufficient staff to investigate complaints received relating to practitioners not following the regulating rules and statutes.	$ -	$ -	$ 232,342	$ -	$ 232,342	-	-	No
453	LC 7	PH	**Prescription Drug Monitoring Licensing Fees**	PDMP Licensing Fees	Increase fees paid by each healthcare licensee to fund the Prescription Drug Monitoring Program (PDMP). Funding is necessary in order to maintain sufficient capacity for program operations and database functions. The PDMP fee impacts all licensees regardless of program registration or program use. If alternate funding is not made available, the quality of the Oregon PDMP will decrease as the number of staff is decreased and emerging evidence-based services are not implemented. This will result in decreased PDMP use by prescribers and pharmacists and less informed prescribing.	$ -	$ -	$ 657,936	$ -	$ 657,936	-	-	No
454	LC 22	HPA	**Mergers & Acquisitions**	Mergers & Acquisitions	Expands OHA authority to review and approve mergers & acquisitions in the health care sector to ensure that any significant proposed changes result in achieving the Triple Aim of better care, better health, and lower costs and advancing equity. As smaller providers confront financial challenges due to COVID-19, there is a risk that they will be acquired by larger providers, leading to further consolidation in the provider market. Without this policy package it is likely that Oregon's health care sector will become less well equipped to achieve the Triple Aim and advance equity.	$ 758,284	$ -	$ -	$ -	$ 758,284	3	2.88	No
210	No	Shared, SAEC	**Risk Audit Remediation**	Risk Audit Remediation	In 2017, SB 90 was approved. This bill's intent was to enable the Department of Administrative Services Enterprise Security Office to provide broader security support across more agencies. However, the responsibility for all system level security, data privacy compliance and addressing risks and audit findings remain with the agencies. For DHS and OHA the impact of SB90 impact was significant. The Information Security and Privacy Office was cut by 40%, leaving inadequate resources to support agency information risk and privacy management. DHS and OHA remain responsible for the protection of their regulated data. The breadth, volume and scope, and associated compliance, risk, information and privacy standards are much greater than most other state agencies. Vendor supported systems also fall under agency responsibility. DHS and OHA must invest in resources and tools to strengthen this essential area, address Secretary of State audit gaps and mitigate breaches.	$ 821,390	$ -	$ 2,611,786	$ 253,938	$ 3,687,114	4	4.00	No
211	No	Shared, SAEC	**Remote Access**	Remote Access	The COVID-19 pandemic highlights the critical need to improve emergency preparedness for DHS OHA. To serve vulnerable populations more effectively and deliver services under any conditions without risking the health and well-being of staff or clients, the agencies' staff and clients must be able to access systems and services from any location, including their homes. Access must be dependable, secure and available 24/7. Systems must be increasingly available outside regular business hours. Technical staff to support expanded system availability is required. This is the new normal and these capabilities must be embedded in the technologies supporting the day-to-day workforce.	$ 3,705,709	$ -	$ 5,628,956	$ 1,691,712	$ 11,026,377	20	20.00	No
212	No	Shared, SAEC	**Increase IT Project Capacity**	Increase IT Project Capacity	Current project support is not enough to meet the needs for DHS & OHA and we often find that projects are vying for support from project managers, business analysts and technical experts. Increased business requests and the need to accelerate the modernization of our existing systems has led the leadership of both agencies to ask for increased technology project capacity and to continue to find ways to reduce the time from project inception to completion, while also reducing risk to project success. The ability to meet the needs of the business for additional technology projects is one of the top "dis-satisfiers" in a recent Business Leaders survey. In addition, an internal audit has been set forth to analyze the roadblocks for IT projects. OIS listened and heard the top three project dis-satisfiers. This policy package has been established to provide real results quickly and to fix three of the top project dis-satisfiers for the agencies we serve:	$ 2,042,779	$ -	$ 5,903,024	$ 629,487	$ 8,575,290	19	19.00	OHA
213		Shared, SAEC	**IE Modernization**	IE Modernization	This policy package requests permanent resources for DHS and OHA/OIS for modernization and enhancement services for the integrated ONE program, which includes the initial creation of the OregonEligibility ONE system for Modified Adjusted Gross Income (MAGI) Medicaid in 2015 and the Integrated Eligibility System, through the 2021-23 biennium and into the future biennia. The requested resources and funding will support enhancements, automation and system consolidation that will drive the integrated ONE program to a more sustainable and future focused solution.		$ -	$ 4,456,184		$ 4,456,184	16	16.00	No

Oregon Health Authority
2021-23 Policy Package

Division:	Health Policy & Analytics
Program:	Office of Health Information Technology
Policy package title:	Health IT Programs Shortfall
Policy package number:	070 (see corresponding policy package #424)
Related legislation:	None

Summary statement:

This policy package removes positions and reduces Federal Funds expenditure limitation to align with revenues available at the current service level for the Oregon Health Authority's (OHA) Health IT Programs. These programs have been funded by a 90 percent Federal Funds match from the Health Information Technology for Economic and Clinical Health (HITECH) Act, which sunsets in 2021. Without funding to backfill the reduction in Federal Funds revenue, OHA will end health IT programs and eliminate eight full-time positions. Policy package #424 requests General Fund to continue work at a lower federal match rate (75, 50, or 39 percent match depending on the work performed).

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$0**	**$0**	**($17,543,925)**	**($17,543,925)**	**(8)**	**(8.00)**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

This policy package is required by the Department of Administrative Services (DAS) to reduce Federal Funds expenditure limitation and positions to align the Oregon Health Authority's (OHA) budget with revenues available at the current service level. OHA's Health IT Programs have been funded by a 90 percent Federal Funds match from the Health Information Technology for Economic and Clinical Health (HITECH) Act, which sunsets in 2021. Without funding to backfill the reduction in Federal Funds revenue, OHA will end health IT programs and eliminate eight full-time positions. Policy package #424 requests General Fund to continue work at a lower federal match rate (75, 50, or 39 percent match depending on the work performed).

2. What would this policy package buy and how and when would it be implemented?

This policy package reduces Federal Funds expenditure limitation to align with the projected Office of Health IT base budget without the additional funding and retention of positions requested in policy package #424. Health IT Programs currently operating under 90/10 HITECH match will be cut or reduced to operate within base budget with lower federal matching rates (75, 50, or 39 percent federal match depending on the work performed) for both staff and contracts.

Changes in federal match rates affects 25 positions and most Office of Health IT contracts. However, without replacement funding, OHA would eliminate or reduce the following programs and staff and use its base budget to cover remaining staff and contracts at the lower federal match rates:

- The Oregon Provider Directory will be eliminated.
- The Clinical Quality Metrics Registry will be eliminated
- HIT Commons will be reduced.
- Medicaid PreManage subscription will be reduced.

- Eight positions will be eliminated.

For more information, see policy package 424 narrative.

3. How does this policy package further OHA's mission and align with its strategic plan?

This policy package is required by DAS to reduce Federal Fund expenditure limitation and to reduce positions.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

Not applicable.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

See policy package #424.

7. What are the long-term desired outcomes?

Not applicable.

8. What would be the adverse effects of not funding this policy package?

Not applicable.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

Some of cost associated with transitioning to lower federal match rates will be accommodated by reducing scope and focusing on only the most essential work. Still, critical health IT programs and staff will be eliminated without additional GF to sustain these existing programs and the significant time and resources invested in them.

10. What alternatives were considered and what were the reasons for rejecting them?

See policy package #424. This policy package is required by DAS to reduce Federal Fund expenditure limitation and positions.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

See policy package #424.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

See policy package #424.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

See policy package #424.

Staffing and fiscal impact

Implementation date(s): July 1, 2021

End date (if applicable): Not applicable

15. What assumptions affect the pricing of this policy package?

The enhanced federal match from the HITECH Act sunsets in 2021.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

No.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

The following existing positions will be eliminated:

- One (1) Executive Support Specialist 2 position
- One (1) Research Analyst 3 position
- One (1) Research Analyst 4 position
- Two (2) Operations and Policy Analyst 2 positions
- Two (2) Operations and Policy Analyst 3 positions
- One (1) Operations and Policy Analyst 4 position

20. What are the start-up and one-time costs?

None.

21. What are the ongoing costs?

Not applicable. This policy package is required by DAS to reduce Federal Fund expenditure limitation and positions.

22. What are the potential savings?

Not applicable. This package is required by DAS to reduce Federal Fund expenditure limitation and positions.

23. What are the sources of funding and the funding split for each one?

The Federal Funds reduced are due to the end of the 90 percent Federal Funds match from the HITECH Act.

Oregon Health Authority
2021-23 Policy Package

Division:	Public Health Division
Program:	Health Promotion and Chronic Disease Prevention
Policy package title:	Beer, Wine, and Cider Tax
Policy package number:	401
Related legislation:	Legislative Concept 11

Summary statement:

Oregon faces a great unmet need for behavioral health services. At the same time, alcohol imposes large and avoidable costs on the health of all people in Oregon, and on Oregon's economy, communities and health care systems.

This policy package would increase the tax on beer, wine, and cider by an amount yet to be determined. The additional revenues generated by the tax would be primarily used to address behavioral health, including substance use disorder prevention and treatment.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package expenditures:	**$0**	**$29,000,000**	**$0**	**$29,000,000**	**7**	**7.00**
Policy package revenues:	**$0**	**$293,000,000**	**$0**	**$293,000,000**		

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

Behavioral Health

Over the last decade, Oregon has made significant strides in transforming and strengthening our overall health care system, but our progress has not been even across all components of the health care delivery system. Behavioral health systems remain largely fragmented and separate from the rest of health care. One of the largest deficits in the behavioral health system is a shortage of culturally appropriate behavioral health services for communities of color. These communities understand the problem at the local level, and we need to be providing them the support they need to address the issues in a culturally responsive way. We have fallen short of adequately addressing the unique needs of Oregonians with serious and complex behavioral health conditions.

- People with behavioral health challenges have untreated physical health conditions, resulting in an average life expectancy for people with serious mental illness that is 20 years less than those without.
- There are insufficient community supports available to those who seek behavioral health care but do not desire or require a hospital or emergency department level of intervention.
- Some individuals are uncomfortable and will not seek treatment with traditional clinical facilities due to unmet cultural needs, systemic racism, or historical trauma related to health care.
- There is a statewide workforce shortage for all behavioral health provider types, including Traditional Health Workers, licensed and unlicensed providers, and prescribers.

This has tragic consequences. Oregon experiences some of the highest rates of serious mental illness, substance use disorders, and suicide in the country. Behavioral health challenges frequently affect communities of color including tribal communities disproportionately. Now is the time to build on Oregon's health care

transformation efforts to ensure we have timely and straightforward access to integrated behavioral health services.

To take another step on this path, Governor Brown convened a Behavioral Health Advisory Council, which identified a set of critical gaps in providing for the behavioral health needs of Oregonians, including:

- Residential treatment for youth and young adults, with peer and social support
- Person-centered, community-based behavioral health programs and services, outside of traditional clinical facilities and emergency departments
- A larger behavioral health workforce that earns a livable wage
- Housing with behavioral health supports
- Culturally responsive services and workforce

The Council's work informed this policy package for the behavioral health system.

Alcohol Misuse

Alcohol misuse both contributes to and results from many behavioral health issues. Most substance use disorders in Oregon involve alcohol (National Survey on Drug Use and Health). Excessive alcohol use places a heavy burden on Oregon's already underfunded mental health and addiction services system.

Excessive alcohol use and many of the problems it causes are on the rise. In Oregon, alcohol-related deaths have increased by more than one-third since 2001 – killing more than 1,900 people in 2017 alone. Excessive alcohol use is the third leading cause of preventable death in the state (Oregon Vital Records).

Alcohol use is interrelated with many of Oregon's most pressing health and social challenges. According to the Centers for Disease Control and Prevention (CDC), excessive alcohol use fuels domestic violence, child abuse

and neglect, adverse childhood experiences (ACEs), risky sexual behavior, stillbirths, miscarriages, fetal alcohol syndrome disorders and other birth defects, car crashes, serious injuries, lower educational outcomes, heart disease, liver disease, cancer, drug and alcohol dependence, and a host of other health and social problems. We also know that social and economic circumstances can lead to greater alcohol and other substance misuse – including economic recession and job loss.

Alcohol-related harms disproportionately affect communities already experiencing other health and economic disparities, especially among American Indian and Alaska Native communities.

Meanwhile Oregon's beer, wine, and cider taxes are among the lowest in the country. Oregon has not increased its tax on beer since 1977 or its tax on wine since 1983.

2. What would this policy package buy and how and when would it be implemented?

This policy package would increase the tax on beer, wine, and (alcoholic) cider by an amount yet to be determined. Raising taxes such as these is an evidence-based practice, environmental strategy recognized by the Center for Substance Abuse Prevention-Substance Abuse and Mental Health Services Administration and Centers for Disease Control and Prevention.

As a placeholder only, this policy package estimates $293 million in new revenue for the 2021-2023 biennium. This policy package distributes new revenues from the proposed beer, wine, and cider tax as follows:

- Ten percent to OHA Public Health Division for substance use prevention and education.
- The remainder to be distributed to support access to behavioral health services.

The behavioral health services to be funded could include:

- Community behavioral health services, including substance use disorder access, as described in OHA policy package #409 (currently shown as funded by General Fund)

- The recommendations of the Governor's Behavioral Health Advisory Council (which were not final when policy package #409 was completed)
- Other behavioral health priorities as identified by the Governor

3. How does this policy package further OHA's mission and align with its strategic plan?

This policy package aligns with:

- OHA's mission to help people and communities achieve optimum physical, mental and social well-being through partnerships, prevention and access to quality, affordable health care.

- Oregon Alcohol and Drug Policy Commission's 2020 Statewide Strategic Plan, which would serve as the substance use portion of the behavioral health priority area in the new State Health Improvement Plan (SHIP).

- Recommendations from multiple behavioral health work group, task force, and committee efforts over the last five years, including:
  - The 2015-2018 Behavioral Health Strategic Plan.
  - Behavioral Health Collaborative Recommendations.
  - The Farley Center workforce report and recommendations.
  - The Oregon Native American Behavioral Health Collaborative's[1] 2019 Tribal Behavioral Health Strategic Plan.
  - The goals, principles and recommendations of the Governor's Behavioral Health Advisory Council.

[1] The Oregon Native American Behavioral Health Collaborative includes representatives from Oregon's nine federally recognized tribes, the Native American Rehabilitation Association, the Northwest Portland Area Indian Health Board, the Oregon Health Authority and the Oregon Department of Human Services Tribal Affairs.

- Public Health Modernization Strategic Plan goals to promote and protect safe, healthy and resilient environments to improve quality of life and prevent disease – with a priority to prevent and reduce alcohol and substance abuse. When alcohol costs more, fewer people drink excessively and there are fewer alcohol-related harms to individuals, families, and communities.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

For alcohol, OHA would look to the following metrics to measure the success of this policy package, in addition to the youth-related Key Performance Measures detailed in response to question 6:

- Initiation of alcohol and other drug treatment (coordinated care organization metric)
- Alcohol-related deaths (State Public Health Indicator)
- Alcohol-related motor vehicle deaths (PHD Strategic Plan metric)
- Per capita alcohol consumption (PHD-HPCDP Strategic Plan metric)
- Binge drinking among Oregon adults (State Public Health Indicator)

Additional behavioral health and health equity measures would also apply based on the final package of behavioral health services to be funded. See OHA policy package #409 on community behavioral health services for examples.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

This package would support the following KPMs:

1. **Initiation of alcohol and other drug dependence treatment** - Percentage of members with a new episode of alcohol or other drug dependence who received initiation of AOD treatment within 14 days of diagnosis.
2. **Engagement of alcohol and other drug dependence treatment -** Percentage of members with a new episode of alcohol or other drug dependence who received two or more services within 30 days of initiation visit.
3. **Follow-up after hospitalization for mental illness** - Percentage of enrollees 6 years of age and older who were hospitalized for treatment of mental health disorders and who were seen on an outpatient basis or were in intermediate treatment within seven days of discharge.
4. **Mental, physical, and dental health assessments for children in DHS custody** - Percentage of children in DHS custody who receive a mental, physical, and dental health assessment within 60 days of the state notifying CCOs that the children were placed into custody with DHS (foster care).
5. **Follow-up care for children prescribed with ADHD medication (initiation)** - Percentage of children newly prescribed attention-deficit/hyperactivity disorder (ADHD) medication who had at least three follow-up care visits within a 10-month period, one of which was within 30 days of when the first ADHD medication was dispensed
6. **Follow-up care for children prescribed with ADHD medication (continuation and maintenance)** - Percentage of children newly prescribed attention-deficit/hyperactivity disorder (ADHD) medication who had at least three follow-up care visits within a 10-month period, one of which was within 30 days of when the first ADHD medication was dispensed.

7. **30-day alcohol use among 6th graders** - Percentage of 6th graders who have used alcohol in the past 30 days.
8. **30-day illicit drug use among 8th graders** - Percentage of 8th graders who have used illicit drugs in the past 30 days.
9. **30-day alcohol use among 8th graders** - Percentage of 8th graders who have used alcohol in the past 30 days.
10. **30-day illicit drug use among 11th graders** - Percentage of 11th graders who have used illicit drugs in the past 30 days.
11. **30-day alcohol use among 11th graders** - Percentage of 11th graders who have used alcohol in the past 30 days.
23. **Rate of tobacco use (population)** - Rate of tobacco use among adults.
24. **Rate of tobacco use (Medicaid)** - Percentage of CCO enrollees who currently smoke cigarettes or use tobacco every day or some days.

7. What are the long-term desired outcomes?

In summary, the intended outcomes are to:

- Provide increased access to behavioral health services to Oregonians in need, especially in communities that are disproportionately affected by behavioral health challenges.
- Improve the mental, social, and emotional wellbeing of youth and young adults across Oregon by increasing youth-oriented behavioral health service capacity, sustaining youth engagement with the behavioral health system as they transition from childhood to adulthood, and promoting the skills needed for independent living, stable housing and employment.
- Creates lower cost, person-centered, trauma-informed, and culturally responsive alternatives to emergency room visits or hospitalization for individuals experiencing mental or emotional distress.

- Reduce excessive alcohol use among Oregonians, especially youth because they are more sensitive to price changes.
- Reduce alcohol-related harms to individuals and communities, and especially to reduce burden of alcohol-related harms in communities that are disproportionately affected.

Detailed positive short and long-term health and safety outcomes include:

Shorter term

- Generate additional funding for behavioral health services, including alcohol and substance misuse treatment, recovery, education, and prevention.
- An increase in the price of beer, wine and cider would reduce consumption of these products. Research shows price increases would have a greater effect among people who drink excessively.

Longer term

- Reduce the unmet need for behavioral health services in Oregon, in turn avoiding health costs of untreated behavioral health challenges and the financial cost of emergency care for Oregonians in a behavioral health crisis.
- Eliminate the inequities associated with behavioral health challenges, including substance abuse disorders, and ensure the availability of culturally appropriate services.
- Reduce a wide range of health harms and consequences of alcohol misuse among all age groups. Higher alcohol taxes are consistently associated with substantial decreases in motor vehicle crashes (5 to 17 percent) and fatalities; alcohol-impaired driving (7 to 8 percent among adults; 13 to 21 percent among youth); all-cause mortality; crime and violence, including youth suicide; deaths from liver cirrhosis (8 to 13 percent); alcohol dependence; and sexually transmitted diseases.
- Save costs related to lost productivity and absenteeism, premature death, health care, crime, motor vehicle crashes and fetal alcohol syndrome due to the projected decline in excessive drinking.

8. What would be the adverse effects of not funding this policy package?

Without funding, our progress in improving our behavioral health systems will continue to fall short of adequately addressing the unique needs of Oregonians with serious and complex behavioral health conditions. Oregonians will continue to lack timely and straightforward access to integrated behavioral health services and supports that are responsive to their needs and lead to meaningful improvements in their lives.

- Youth and young adults would continue to experience insufficient access to quality behavioral health care.
- Implementation of the Tribal Strategic Plan and the ADPC would be at risk.
- Oregon's CCBHC program would end due to lack of funding. This would result in job loss and ending services for some of our most vulnerable populations.
- The behavioral health workforce shortage would continue.
- Shortages of stable and affordable housing would remain. People experiencing homelessness, who are more likely to have underlying health conditions, would remain highly vulnerable to COVID-19 exposure and infection because shelters and congregate settings would continue to struggle with physical distancing measures.
- The health and social problems resulting from alcohol misuse will continue to impose direct and indirect burdens on Oregonians.

9. What actions have occurred to resolve the issue prior to requesting a policy package?

To help build community-based behavioral health programs and services, OHA activities include CCBHC implementation, the Tribal Behavioral Health Strategic Plan, the Alcohol and Drug Policy Commission (ADPC) Strategic Plan, a behavioral health workforce recruitment and retention plan, and supportive/supported housing.

Legislation on the general topic of alcohol taxes has been introduced in previous years, including:

- Senate Bill 1049 (2005) Malt Beverage Cost Recovery Fee

- House Bill 2535 (2007) Malt Beverage Cost Recovery Fee
- House Bill 2461 (2009) Prevention, treatment and recovery tax on malt beverages
- House Bill 2125 (2019) Taxes imposed on alcoholic beverages
- A policy package was put forward by OHA in 2018 for the 2019 Legislative Session (LC389).

Local and state alcohol prevention interventions in Oregon are primarily funded through a combination of federal and state funds with scarce resources for state infrastructure and interventions. This results in a fragmented landscape, rather than a coordinated continuum of care across prevention, treatment and recovery. With limited resources, prevention interventions, services and programs have historically centered on interventions such as educational programming, student assistance programs or other alternative activities.

While treatment systems and recovery supports are under-resourced in Oregon, there continues to be a disproportionate emphasis on treating excessive alcohol use through behavioral health and criminal justice systems. Treatment alone will not have an impact on the multitude of health and community problems excessive drinking causes. Investments in primary prevention policies and programs, along with treatment, are essential to promoting health, supporting recovery and preventing substance use and disorders in Oregon.

10. What alternatives were considered and what were the reasons for rejecting them?

Alternative funding mechanisms for this package would include:

- General Fund – OHA policy package #409, related to community behavioral health services, proposes a General Fund investment. Using a dedicated tax for that package would provide a more consistent ongoing funding source.
- Other taxes – To reduce alcohol use, price increases such as may occur from a tax increase are the most effective way to reduce excessive alcohol use and related harms. Oregon has not increased taxes on beer

for over 40 years and wine for over 32 years. Substituting other taxes would not achieve the benefits of taxes on alcohol in reducing alcohol consumption.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

Yes. Key elements desired to be included in the final legislative concept include:

Wine and Malt Beverage Privilege Tax ORS 473.030; Cider Privilege Tax 473.035

- Increase the existing tax on wines, malt beverages, and cider, or impose an additional separate tax, in an amount to be determined, and adjust the tax in the future based on the consumer price index (ORS 473.030 and ORS 473.035).
- Distribute the resulting revenues in a manner to be determined.
- Ensure current recipients of tax revenue from wines, malt beverages, and cider receive enough of the new revenue to keep them whole in case the tax increase reduces consumption of these products.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Many state agencies experience the costs related to behavioral health needs and/or alcohol harms and would be affected by this policy package, including:

- Oregon Liquor Control Commission
- Oregon Department of Transportation
- Oregon State Police
- Department of Revenue
- Oregon Youth Authority
- Oregon Department of Education
- Alcohol and Drug Policy Commission
- Department of Human Services

In some cases, reducing the negative effects of excessive alcohol use is explicitly a part of state agency strategic goals. For transportation agencies and partners, increasing the price of alcohol is an evidence-based

strategy to affect alcohol-related transportation and safety outcomes such as alcohol-related driving and motor vehicle crashes and deaths.

13. **What other agencies, programs or stakeholders are collaborating on this policy package?** The Governor's Behavioral Health Advisory Committee is preparing recommendations on a package of behavioral health investments, which currently do not have an identified funding source. The 47-member council represents a broad range of perspectives and experiences in Oregon's behavioral health system, including CCOs, CCBHC, Tribal Communities and Communities of Color Community Mental Health Programs, state legislators, MDs, judges, sheriffs, consumers, advocates for Tribal Communities and Communities of Color communities and tribal leaders. The council also invited consumers to participate in and inform the development of policies.

    OHA coordinated with OLCC staff in 2018 on legislative concept tax revenue projections and continue to coordinate with OLCC on 2021-23 tax revenue projections.

    OHA staff provided input and price recommendations to the Alcohol and Drug Policy Commission's (ADPC) strategic plan, which would serve as the substance use portion of the behavioral health priority area in the new State Health Improvement Plan (SHIP).

14. **How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[2] or equitable health outcomes?**

    The Governor's Behavioral Health Advisory Council adopted OHA's Health Equity Statement as their overall vision of health equity in behavioral health and supported principles that strive for a behavioral health system that is simpler to access, more responsive to individuals' needs, and produces more meaningful outcomes. Furthermore, these proposals attempt to support the behavioral health system given the impacts of COVID-19.

[2] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

Underlying health conditions, homelessness, and inconsistent access to the health system leave many with behavioral health issues particularly vulnerable to the health and health system impacts of COVID-19. What's more, social isolation and financial instability could trigger worsening symptoms or crises.

Behavioral health challenges disproportionately affect lower income communities and communities of color. For example, American Indian/Alaska Native persons report more days of poor mental health in a month (6.1) than any other racial/ethnic group, with African American persons at 5.9 and White persons at 4.8 days per month. Despite that, among Oregon Health Plan members, White persons are more likely to access behavioral health services than American Indian/Alaska Native or African American persons.

There is a shortage of culturally appropriate behavioral health services for communities of color. The proposed alcohol tax funding would provide revenues for increased behavioral health in general, with much of it directed to culturally appropriate services.

Paradoxically, many of the negative health consequences of excessive alcohol use fall disproportionately on lower income communities, and especially on communities of color, even if they do not consume more alcohol per-capita than other communities. This is because communities of color tend to experience other health inequities due to social determinants of health, which are exacerbated by alcohol use, and they tend to have less access to alcohol abuse treatment or support services.

The rate of alcohol-related deaths in Oregon is more than double among American Indians and Alaska Natives (86 per 100,000) compared to any other racial or ethnic group (41 per 100,000 among non-Hispanic whites). (Oregon Vital Records) Among youth, American Indian and Alaska Native youth are more likely to drink alcohol and binge drink compared to other racial and ethnic groups (Oregon Healthy Teens Survey).

The tax increase would also make more funds available to work with culturally specific community partners to develop and implement culturally specific behavioral health services and alcohol and other drug abuse

prevention and education. Additional resources can support the development of culturally appropriate communications materials and the statewide provision of tailored trainings and technical assistance.

Staffing and fiscal impact

Implementation date(s): July 1st, 2021

End date (if applicable): Ongoing

15. What assumptions affect the pricing of this policy package?

Though the proposed tax is yet to be determined, as a placeholder this policy package estimates the impact of increasing the tax would generate an additional $293 million revenue in the 2021-23 biennium. Assumptions and methods for this revenue estimate are as follows:

- Revenue forecasts were generated using models that account for past beer and wine sales, population growth, employment, and income.
- Revenue forecasts for this policy concept are based on beer and wine privilege tax reporting data through 2019 from the OLCC.
- Estimates assume a price elasticity of -0.17 for beer and -0.30 for wine (Wagener et. al 2009).
- Estimates assume 100 percent of new taxes are passed on to consumers (1:1 pass-through).

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

The allocation of funds for behavioral health services, assuming it went fully or partially to OHA, would expand or create new responsibilities with OHA Health Systems Division. The exact responsibilities would depend on the final package of behavioral health investments.

The allocation of funds for alcohol and other drug prevention and education would not create any new responsibilities; it would expand existing programming for alcohol and other drug prevention within OHA Public Health. Public Health Division staff implement state and community interventions, provide training and technical assistance, resource materials, media and communications interventions, leadership, coordination, and report results and outcomes.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

Standard minimal impacts that would result from hiring new staff.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

Please refer to policy package #409 Community Behavioral Health Services, for the impact of funds allocated for behavioral health services and alcohol and other drug addiction treatment and recovery.

Regarding alcohol, at a funding level of an additional $29 million/biennium for prevention, Oregon's infrastructure to implement a comprehensive alcohol prevention and education program would almost double, reaching individuals, families and communities in Oregon with population-level prevention interventions. The funding would be used to develop, implement, and evaluate projects in raising public awareness, identifying policy priorities, and building upon an existing substance misuse and public health infrastructure to address alcohol prevention. These projects would be conducted through a coordinated PHD initiative as well as through community partners in all tribes, counties and Regional Health Equity Partnerships.

Specifically, this would amplify program resources serving all tribes, mental health authorities and county health departments, Regional Health Equity Coalitions, schools and community-based organizations serving

populations at highest risk for alcohol misuse and its secondhand effects, to implement evidence-based and practice-based evidence interventions tailored to community needs and for provider/workforce development and training necessary to implement such interventions.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

Please refer to policy package #409 Community Behavioral Health Services, for staff and positions related to behavioral health services and alcohol and other drug addiction treatment and recovery.

The amount of a tax increase is yet to be determined. Under the placeholder rate and the placeholder funding level for alcohol prevention and education only, the following seven permanent, full-time positions would be proposed:

- One Principal Executive Manager E position
- Three Operations and Policy Analyst 3 positions
- One Research Analyst 4 position
- One Research Analyst 3 position
- One Fiscal Analyst 2 position

20. What are the start-up and one-time costs?

None.

21. What are the ongoing costs?

Ongoing costs for expansion of OHA behavioral health and alcohol and other drug prevention programs would be based on the revenue from the yet to be determined tax increase for the biennium.

22. What are the potential savings?

Increasing the price of beer, wine and cider at the placeholder level assumed in this policy package and funding the Public Health Division's alcohol and other drug prevention programs would save an estimated $143 million in annual costs to Oregon's economy related to lost productivity and absenteeism, premature death, health care, crime, motor vehicle crashes and fetal alcohol syndrome due to the projected decline in excessive drinking. Additional savings would likely accrue from behavioral health programs in a similar manner, depending on the final package to be funded.

23. What are the sources of funding and the funding split for each one?

Other Funds revenue from an alcohol tax increase.

Oregon Health Authority
2021-23 Policy Package

Division:	Central Services
Program:	Equity and Inclusion Division
Policy package title:	Strategic/Structural Health Equity Innovation and Implementation
Policy package number:	402
Related legislation:	LC #37 Health Care Interpreter; LC #38 Regional Health Equity Coalitions

Summary statement:

The Oregon Health Authority has limited capacity to complete current baseline equity and inclusion work for agency and Oregon, specifically related to health system transformation. This policy package not only addresses current structural and resource deficits but is also necessary to meet the needs of the agency to fulfill the 10-year strategic goal of eliminating health inequities in Oregon, including strategic planning development and implementation.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$5,825,829**	**$ 509,764**	**$ 946,685**	**$7,282,278**	**17**	**15.08**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

The Oregon Health Authority has systemic capacity limitations which have impeded equity and inclusion driven work related to health system transformation. Without a more robust infrastructure to address social and health inequities and achieve health equity for communities disadvantaged by historical and structural racism, OHA will not meet agency initiatives or fulfill its mission to provide better health for all. OHA will fail to reach its 10-year strategic goal of eliminating health inequities in Oregon and populations of people in Oregon will continue to suffer preventable illness, chronic illness and premature death.

The problem of working without sufficient resources and the clear mandate to achieve greater health equity in Oregon health and health care delivery is longstanding. While the need for health equity work continues to grow in scope, visibility and priority, it is ultimately confined and constricted by an ongoing lack of resources. This POP literally implements a component of OHA's recently adopted definition of health equity, by seeking to redistribute resources and power within OHA to address health inequity and deliver on the Governor's long-range goal to achieve improved health equity.

Hence, this POP addresses current structural and resource deficits within OHA and connects the agency's new and evolving initiatives for addressing the COVID-19 pandemic and furthering health care reforms with innovative community engagement strategies as developed by the Equity and Inclusion Division, Community Partner Outreach Program (CPOP) and Tribal Affairs. Additionally, the disparate impact of COVID-19 has only intensified the need for a robust and interconnected OHA resource for strategic community engagement with impacted communities in order to inform:

- The state's long-term response to the COVID-19 pandemic

- The state's strategies for addressing structural health inequities more broadly, as reflected in CCO 2.0 policy goals, the 2021 State Health Improvement Plan, and the state's 2022 1115 waiver.

2. What would this policy package buy and how and when would it be implemented?

The policy package is an investment in infrastructure within the Equity and Inclusion division, including positions, position classification realignment and programmatic funding. It would first right-size the division and positions to meet current demands and build the infrastructure needed to support the agency's fulfillment of the 10-year goal to eliminate health inequities in Oregon. This policy package addresses that infrastructure-gap through additional positions, the reclassification of current management positions and additional programmatic funds. All are necessary to enhance the current infrastructure of the Equity and Inclusion division by deepening the bench to include more people to do the work. The work under this policy package is immediately implementable because of existing structure in the OHA Equity and Inclusion division.

This POP buys critical resources needed for the Equity and Inclusion division which is responsible to lead the work necessary to operationalize the ***health equity definition*** adopted by the Oregon Health Policy Board and OHA in October 2019:

> ***Oregon will have established a health system that creates health equity when all people can reach their full health potential and well-being and are not disadvantaged by their race, ethnicity, language, disability, gender, gender identity, sexual orientation, social class, intersections among these communities or identities, or other socially determined circumstances.***
>
> ***Achieving health equity requires the ongoing collaboration of all regions and sectors of the state, including tribal governments to address: The equitable distribution or redistribution of resources and power; and recognizing, reconciling and rectifying historical and contemporary injustices.***

The principles of the health equity definition must be integrated as an essential part of OHA's strategic plan framework including but not limited to ongoing community engagement on new policies and programs in the next 1115 Waiver; CCO 2.0 implementation and 3.0 development; public health modernization; the State Health Improvement Plan implementation and COVID-19 stabilization and sustainability work to come. This undertaking requires more staff with the capacity to develop expertise in ongoing health care transformation, public health modernization and COVID response and recovery within OHA. The agency also requires further development of both innovation, as well as the expansion of existing innovative strategies and programs. This includes the development and tracking of metrics and REALD data, health equity, non-discrimination and ADA policy and practice, culturally responsive community engagement and the expansion of Regional Health Equity Coalitions and Language Access, Health Care Interpreters and Traditional Health Worker programs. This work is necessary to develop capacity and operationalization across multiple divisions of the agency and the state, and right-size that capacity to meet the 10-year goal of the agency and the Governor's goals related to health equity.

Right-size Equity and Inclusion Division:

This policy package adds the following ten positions: one Research Analyst 3, three Operations & Policy Analyst 3 positions, two Operations & Policy Analyst 4 positions, two Program Analyst 3 positions, one Program Analyst 4 position, and one Executive Support Specialist 2 position. This request does not preclude the identification of additional positions that could work as specific liaisons with or be embedded in behavioral health, communications, Human Resources training and development, and the Ombud's program.

Add New and Right-size Managerial Positions:

This policy package adds two managerial positions: a Health Equity Innovation/Implementation Manager (PEM F) and an Operations Deputy (PEM E), and reclassifies two existing management positions to PEM F and reclassification of the Equity and Inclusion Director to PEM H.

Community Engagement:

In addition to rightsizing, the policy package also buys increased expertise in community engagement and outreach capacity. Community engagement and outreach is not only communication but is a practice-based expertise related to health equity which includes outreach, engagement, development and follow-up in a continuous loop of communication. OHA has a unique opportunity and responsibility to engage and form more effective partnerships with communities to identify, analyze, research and address policy and systemic barriers to guide effective implementation of strategic priorities. Investing in continuous and meaningful community engagement is essential to build trust and relationships with communities that experience the greatest health inequities due to structural and institutionalized oppression and racism. These include communities of color, people with disabilities, LGBTQ communities, immigrants, refugees, people with limited English proficiency, Tribes, and communities at the intersection of these identities. Additionally, it is critical that OHA shift away from models where interactions with communities are transactional and largely occur when the agency needs input, information or feedback for initiative-specific purposes. This model creates long-lasting barriers and mistrust. Instead, the agency needs to develop models for continuous community engagement capable of building long-term trust and relationships with communities.

Specifically, this policy package adds one of each the following five positions: Operations & Policy Analyst 1, Operations & Policy Analyst 3, Operations & Policy Analyst 4, one Program Manager 3, one Program Analyst 3, and one Administrative Specialist 2. These positions will bring a specific expertise in equity-focused community engagement and policy development and will coordinate across the entire agency and all divisions.

3. How does this policy package further OHA's mission and align with its strategic plan?

With Health Equity as its core value, the Oregon Health Authority has embarked on a strategic planning process to identify priorities and achieve the goal of improving the health of all people in Oregon. In that context, OHA has a unique opportunity and responsibility to engage and form partnerships with communities to address policy and

systems barriers and guide effective implementation of its strategic priorities. This policy package is imperative to the development and implementation of the OHA strategic plan and the 10-year goal of eliminating health inequities in Oregon. It creates the internal programmatic, resource, operational and staffing capacity to support the development and implementation of the strategic plan and necessary community engagement. In addition, the policy package also generates staffing expertise in both the evolving content of OHA's health system transformation and COVID-19 response and recovery strategies, as well as innovative and robust community engagement initiatives as implemented by the Equity and Inclusion division in partnership with Community Partner Outreach Program. As a result, OHA will have the infrastructure to make meaningful progress toward its 10-year goal of eliminating health inequities, addressing health disparities and achieving health equity in populations and communities most impacted by health inequities. Overall, the requested resources will enable OHA to better understand the full context of population-specific health inequities and meaningfully advance health equity in Oregon.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

This policy package ensures and sustains capacity for strategic and structural health equity innovation and implementation to achieve OHA's 10-year goal of eliminating health inequities in Oregon. To that end, OHA will develop a set of measures to drive efforts to reduce health inequities. The measures will align with five-year goals currently under development to inform and align with the broader set of 10-year strategic plan measures. There are also several process and outcome measures developed as part of the OHA Performance System. For this purpose, measures used to evaluate the success of this policy package will include existing indicators, indexes, and

composite measures as well as those that will be developed to provide clear direction, spur actions and reflect progress toward achieving health equity. The measures will be broadly focused in the following areas:

- Understanding and addressing the social determinants of health and health equity including structural drivers such as systemic racism and oppression.
- Developing, implementing and investing in continuous and meaningful community engagement to build trust and relationships with communities impacted by the greatest health inequities.
- Identifying and prioritizing community needs, and ultimately developing additional innovative and sustainable solutions to achieve health equity in all communities across the state.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

Yes. It is closely connected with the purpose of the OHA Performance System, which is to increase effectiveness in OHA's work to transform health and health care for the people of Oregon. The OHA Performance System is a framework that identifies and improves processes that will ultimately increase effectiveness in accomplishing the strategic goals, mission and values of the agency. Health Equity has been identified as a core value for the agency and therefore, Equity and Inclusion as a key goal has been woven throughout the outcomes and core operating and supporting processes in the OHA Performance System. This policy package will help OHA reach that desired outcome of health equity as an actively pursued value and goal across the agency and the state, including for example the expansion of the Regional Health Equity Coalition program. The Performance System, by identifying processes and measures, will help work toward that outcome and evaluate progress.

7. What are the long-term desired outcomes?

- Development and implementation of the community engagement work for the strategic plan and ongoing community engagement work for the agency.

- Development and implementation of the OHA strategic plan, including five-year goals and 10-year goal of the strategic plan.
- Expansion of Regional Health Equity Coalitions.
- Expanded capacity to support research and analysis in support of health equity programmatic and engagement needs and to connect across divisions within OHA to bridge health care reform initiatives and community engagement strategies.
- The elimination of health inequities in Oregon by 2030/31.
- Long-term savings to the overall health delivery system as health inequities are eliminated over the 10-year period.

8. What would be the adverse effects of not funding this policy package?

The problem of working without sufficient resources but the clear mandate to achieve greater health equity in Oregon health delivery is a long and historical one. While the need for this kind of work continues to grow in scope, visibility and priority, it is ultimately confined and constricted by a lack of sufficient resources. This policy package literally implements a component of OHA's recently adopted definition of health equity, by seeking to redistribute resources and power within OHA and the state to address health inequity and deliver on the Governor's long-range goal to achieve improved health equity. Therefore, without additional resources, it will be very difficult, if not impossible, to fully operationalize the fundamentals of the health equity definition within the agency and across the state. The lack of additional resources will also hinder the development of organizational and shared ownership of health equity as an actively pursued value and will ultimately prevent OHA from fully actualizing the 10-year goal to eliminate inequities in Oregon's health system.

This policy package is also significant for the communities facing inequities as communities will have opportunities to engage and share the barriers and challenges they experience. This will help the agency to better understand population-specific inequities. As a result, creative and sustainable solutions will be created to more

meaningfully address the conditions and needs that impact people's capacity to be healthy across the state. To make this meaningful with a significant equity impact, sustained, long-term efforts with dedicated fiscal investment are needed. Hence, without the additional resources through this policy package there will be a detrimental effect on OHA's ability to address health equity challenges at the community level.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

Over multiple biennia, the Equity and Inclusion division has reprioritized work and has reallocated two positions to support work related to health equity innovation within health system transformation. Focus areas for these positions include development of an Oregon-grown measure of health equity for CCO incentivization and CCO 2.0 contractual deliverable guidance and related support that focuses on newly mandated CCO contractual obligations related to health equity.

In 2016 the division worked with a LEAN specialist to apply LEAN practices to the work and structure. Recommendations were applied along with results of an operational assessment in 2015, by outside consultants. In 2019, community engagement work was assessed by an external consultant. Additionally, two staff members of the division were reassigned and dedicated almost exclusively to develop, plan and coordinate the agency's Community Engagement events/sessions for the 10-year strategic plan. This has worked short-term but is not sustainable medium to long-term.

10. What alternatives were considered and what were the reasons for rejecting them?

In 2015, under previous agency administration, seven positions were eliminated. Since then the division has reprioritized work and pursued efficiencies as described above, but unfortunately continues to lack sufficient capacity to meet current needs. Staff have been working in overdrive. With OHA's adoption of the 10-year goal to

eliminate health inequities, there are no viable alternatives except to invest the additional funds described in this policy package.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

While statute changes are not inherently required to implement this policy package, programs related to Traditional Health Workers, Health Care Interpreters, Race, Ethnicity, Language and Disability data collection and Regional Health Equity Coalitions would benefit from legislation that strengthens existing standards and requirements.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Strengthening community engagement, Regional Health Equity Coalitions (RHECs) and Traditional Health Worker (THW) programs will enhance resources for Tribal Governments. It also Increases opportunities for local/county governments and health system, including coordinated care organizations (CCOs) to partner with RHECs and offer technical assistance and training to build capacity around health equity and the social determinants of health.

For example, a RHEC-capacity building grant to Warm Springs Confederated Tribes has successfully shown that additional RHECs run by Tribal Governments can enhance equity work with Tribes. Additionally, the ongoing collaboration between the division and Tribal Governments has resulted in the identification of a potential new THW worker category specific within the Tribes where there will also be additional benefit.

Another example is when Mid-Columbia Health Equity Advocates (MCHEA) successfully advocated to County Commissioners for a county ID card for all community members regardless of barriers related to age, housing

transportation, immigration status and cost. Having an official ID improves access to basic services and helps make law enforcement interactions less frightening.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

The Equity and Inclusion division is collaborating with the Health Policy and Analytics (HPA) division and the Oregon Health Authority Leadership Team.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

This policy package is solely focused on achieving health equity and equitable health outcomes for priority populations that are most disadvantaged by historical and contemporary racism and oppression, which are the root causes of health inequities. This policy package advances the operationalization of the agency's health equity definition and advancement toward the 10-year goal to eliminate health inequities.

Staffing and fiscal impact

Implementation date(s): July 1, 2021

End date (if applicable): None

15. What assumptions affect the pricing of this policy package?

The assumption that health equity and the 10-year agency goal are indeed priorities for the agency and the state.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

No, all aspects of the policy package fit within existing responsibilities of the agency including compliance with state and federal law, the current mission of the agency and the 10-year goal of the agency's strategic plan.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No, our work is not delivered in a caseload or service unit context.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This policy package would establish 17 permanent, full-time positions:

- Research Analyst 3, Research and Analytics
- Operations & Policy Analyst 4, Accessibility Coordinator
- Operations & Policy Analyst 3, Public Investigator
- Operations & Policy Analyst 4, Regional Health Equity Coalition Lead (based on expansion Legislation)
- Program Analyst 3, Regional Health Equity Coalition (based on expansion Legislation)
- Program Analyst 4, Traditional Health Worker program
- Program Analyst 3, Health Care Interpreter program

- Operations & Policy Analyst 3, Strategic Coaching and Technical Assistance
- Executive Support Specialist 2
- Principle Executive Manager E, Operations Deputy

Reclassed Positions:

- Two Principle Executive Manager E positions to Principle Executive Manager F positions
- One Principle Executive Manager G to Principle Executive Manager H

Community Engagement:

- Operations & Policy Analyst 3
- Operations & Policy Analyst 4
- Administrative Specialist 2
- Project Manager 3
- Program Analyst 3
- Operations & Policy Analyst 1

20. What are the start-up and one-time costs?

None.

21. What are the ongoing costs?

All costs are ongoing, as they are staffing and programmatic in nature.

22. What are the potential savings?

Savings will be long-term to the health delivery system.

23. What are the sources of funding and the funding split for each one?

Funding for personal services in OHA Central Services, including the Equity and Inclusion division, are determined by an agency-wide cost allocation methodology. The budgeted funding splits are as follows, General Fund at 80 percent, Other Funds at 7 percent and Federal Funds at 13 percent. Federal funding sources include primarily Medicaid matching funds and other federal grants.

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Personal Services	$2,584,791	$ 226,183	$ 420,040	$3,231,014	17	15.08

Oregon Health Authority
2021-23 Policy Package

Division:	Health Systems Division
Program:	Medicaid, Tribal Affairs
Policy package title:	Indian Managed Care Entities
Policy package number:	403
Related legislation:	None

Summary statement:

Establish and support Indian Managed Care Entities at the request of Oregon's Federally recognized Tribes, which would provide critical care coordination services to American Indian/Alaska Native enrollees in the Oregon Health Plan.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$1,365,071**	**$0**	**$10,731,035**	**$12,096,106**	**0**	**0.00**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

In September 2018, during formal tribal consultation for the development of CCO 2.0, representatives of Oregon's nine Federally recognized tribes and urban Indian health program made a formal written request to OHA Leadership. This request was to assist in the creation of Indian Managed Care Entities (IMCEs), which would provide critical care coordination services to American Indian/Alaska Native (AI/AN) enrollees in the Oregon Health Plan. Section 1932(h) of the Social Security Act and federal regulations at 42 CFR §438.14 gives the state the authority to create Indian Health Care Entities. These IMCEs, when approved by the Centers for Medicare and Medicaid Services (CMS) via state plan amendment, would be the very first IMCEs in the nation. Other states and tribes have explored developing IMCEs but to date none have been created.

Work has continued since September 2018 in partnership with tribal health directors and staff to develop this proposal and move toward implementation. This vital priority requires a significant dedication of staff time, expertise, and agency resources across many different divisions and units. As of June 2020, four Tribes and the urban Indian health program are moving forward with establishing a total of five IMCEs, however ongoing effort, technical assistance, and resources are required to support implementation of these five IMCEs, as well as an additional four IMCEs that may move forward if these Tribes also decided to join this initiative.

The IMCEs are a non-risk-based program where Indian health care entities may provide managed care services as a Primary Care Case Management model and receive a Primary Care Case Management payment on a Per Member Per Month basis. Tribes are anticipated to receive 100 percent Federal Funds, and the urban Indian health program would be anticipated at a minimum to receive federal matching funds based on their clients' enrollment. A State Plan Amendment will be submitted. Federal matching funds is based on approval of that

SPA. This program will assist in reducing health disparities by ensuring the delivery and sustainability of coordinated, culturally responsive health care for American Indians and Alaska Natives.

2. What would this policy package buy and how and when would it be implemented?

OHA would procure technical assistance for the Tribes and urban Indian health program in designing and implementing the IMCE program in their health clinics. We are currently receiving technical assistance from two contractors – this request for continued technical assistance would continue this support through 2021-2023. Although it is not known precisely when we would receive CMS approval and have OHA implementation ready to support IMCEs, this request for assistance would ensure OHA is supporting the preparation necessary to establishing this program.

OHA would also ensure each IMCE receives their full Per Member Per Month (PMPM) payment for each AI/AN patient enrolled in the IMCE, regardless of the level of federal financial participation. It is likely that this program will be in place and making PMPM payments to IMCEs in 2021.

3. How does this policy package further OHA's mission and align with its strategic plan?

This proposal would further the triple aim of better health, better care, and lower costs by supporting IMCEs to deliver and coordinate, culturally responsive health care for their tribal populations served. This proposal would also help achieve the agency's goal of eliminating health disparities within ten years by improving the delivery and availability of health services that are limited to AI/AN OHP members, who are disproportionally fee-for-service and experience a dearth of specialty care and limited care coordination services. Full funding of this initiative would help further the Governor's goal of ensuring that we fully integrate health equity, tribal, and racial justice into our focus on social determinants of health.

All IMCEs will perform, at minimum, the following six functions:

- Provision of Telephonic or Face-To-Face Case Management
- Development of Enrollee Care Plans
- Provision of Enrollee Outreach and Education Activities
- Operation of a Customer Service Call Center
- Implementation of Quality Improvement Activities Including Administering Satisfaction Surveys
- Conduct Outcome Measurement and Provide Outcome Reports to OHA

Additional services may be provided at the option of the IMCE. By allowing tribal members to receive culturally responsive care coordination services from tribes and the urban Indian health program, from a nurse practitioner or physician assistant, and arranging transportation and arranging for services on site, this would allow tribal members to access health care while remaining connected to their community. Additionally, this program would provide funding for the Tribes and urban Indian health program to hire professional level staff to assist in on-site coordination of patient care.

By further integrating health care delivery for tribal members, this would also allow for Federal reimbursement for tribal based practices, which are culturally responsive services that have demonstrated effectiveness in improving health outcomes in tribal communities.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

The technical assistance is designed to help the Tribes stand up their IMCEs, so success would be measured by the timely and successful establishment of this program. Successful delivery of the technical assistance to Tribes would result in the establishment of IMCEs that meet the Tribes' community needs. Successful technical assistance to OHA would result in the successful submission and acceptance of the State Plan Amendment by CMS to establish the program. The benefits of this program would manifest as reduced health disparities among AI/AN. By honoring this request by tribes, it reinforces the agencies commitment to our government to government relationship.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

Yes. Within the OHA Performance System, "Health Equity" and "Partnership" have been identified as core values for the agency and "Equity and Inclusion" and "Effective Partnerships" as key goals have been woven throughout the outcomes, core operating and supporting processes in the OHA Performance System. This policy package would help OHA reach the desired outcomes of health equity and effective partnership by ensuring Oregon's AI/AN OHP members receive effective and culturally responsive health care.

Specifically, this policy package is closely tied to the "Engaging Community Stakeholders, Members and Partners" core process, which includes the following sub-processes:

- Building and maintaining relationships.
- Understanding, assessing, and responding to needs, concerns, and issues.
- Integrating inclusive and culturally responsive practice.

IMCEs also support the "Improving Clinical and Population Health" core process, which includes the following sub-processes:

- Evaluating and applying evidence of health service effectiveness, accessibility, and quality.
- Delivering coordinated, high quality and culturally responsive health services.
- Coordinating care.
- Providing technical assistance and improving quality of services and systems.

There is also a specific measure that tracks OHA's compliance with the Tribal Consultation and Urban Indian Health Confer Policy. Since this request was received during consultation it is important, we follow through to the best of our ability.

7. What are the long-term desired outcomes?

Implementing this policy package would help maintain good partnerships between the Oregon Health Authority and the nine Federally recognized Tribes. Moreover, this policy package will compensate the Tribes and urban Indian health program for providing culturally responsive care coordination services for the American Indian/Alaska Native community. Culturally responsive services coordinated by Tribes, including tribal based practices, have a demonstrated efficacy in Native communities and will help to reduce health disparities among AI/AN Oregonians. Ultimately, this will result in better health, better care, and lower costs for healthcare for Oregon's AI/AN OHP-members.

8. What would be the adverse effects of not funding this policy package?

Failure to fund this package would result in OHA continuing to move forward with honoring the Tribes' request, although without the necessary financial supports and technical assistance to ensure successful

implementation. Moreover, without additional support for Per Member Per Month payments, there will an impact on General Fund revenues that will create budget challenges as a result of the COVID-19 pandemic.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

OHA is moving forward with this project in partnership with the nine Federally recognized Tribes, the urban Indian health program, and our consultants and contractors. This policy package would provide financial support for this effort to ensure success.

10. What alternatives were considered and what were the reasons for rejecting them?

Not applicable. OHA Leadership accepted the Tribes' request to develop and implement this proposal.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

The four tribal governments and urban Indian program will be initially involved in implementing this program. The remaining five tribal governments may choose to implement later. This policy package would help maintain good relations between Oregon and the nine Federally recognized Tribes. OHA Leadership has committed resources to the implementation and success of the Tribes' proposal, and the successful implementation of this policy package will increase trust and improve the government to government

relationship between the Tribes and the state. Failure or delay in successfully implementing this proposal would strain these important relationships.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

No.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

This proposal would help to improve the health status and reduce health disparities among the Oregon's AI/AN communities. Compensating Tribes for care coordination of tribal members would ensure that tribal members are directed to culturally responsive and tribal-based practices, which are shown to improve health outcomes in tribal communities.

Staffing and fiscal impact

Implementation date(s): July 1, 2021

End date (if applicable): Not applicable

15. What assumptions affect the pricing of this policy package?

The assumptions used for the pricing are:

- Four Tribes and the urban Indian health program, also known as the Native American Rehabilitation Association (NARA), would participate in the implementation of the initial IMCEs.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

- The enrollment methodology for IMCEs is currently being developed by the tribes and urban Indian health program, and federal financial participation for these enrollees' care coordination services is currently unknown and will be subject to CMS input and review. This IMCE proposal is the first in the nation, and IMCE proposals have never been submitted to CMS, so there is uncertainty about the precise details of federal approval. Therefore, this pricing assumes IMCEs established by the Tribes would receive PMPM payments funded at 100 percent federal match, just as Medicaid services do. The IMCE established by the Urban Indian Health Program would receive a blended rate comprised of General Fund and Federal Funds. These assumptions cover the 2021-23 biennium.
- The total members were based on the number of Tribal FFS clients as of March 2020.
- The per member per month (PMPM) cost is $39.65. The PMPM calculation used a blend of the average salaries of a doctor, physician's assistant, nurse practitioner, and nurse midwife in Oregon to determine staffing costs of $35.75, with an assumption that one full-time IMCE staff person could coordinate the care of 500 members. The PMPM would include $3.90 for a 24-hour nursing triage line.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

OHA's Health Systems Division would be responsible for contracting with the Tribes and consultants, calculating and dispersing payments to Tribes, developing technical assistance and policy guidance and regulations, and facilitating member communication and enrollment in the IMCEs.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

System changes to MMIS to issue payments and enroll patients would need to be developed and automated, which would require additional resources. It may be necessary to create new business processes and procedures

to allow Enrollment/Eligibility staff to honor requests for enrollment in an IMCE. This may request additional funding for system changes and staff support.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

This policy package would not impact the OHP caseload but would impact services for a portion of OHP members. A portion of the estimated 12,153 AI/AN fee-for-service population would be enrolled in the IMCEs, depending on a methodology determined by the Tribes and urban Indian health program. The number of enrolled patients is likely to range from 5,000 to 10,000 AI/AN OHP members. OHP members enrolled in IMCEs would receive culturally responsive care coordination services.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

Existing HSD Medicaid staff would be responsible for the operation of this program.

20. What are the start-up and one-time costs?

The one-time costs would be $532,000 Total Funds ($243,000 General Fund). This includes consulting on how to implement an IMCE ($150,000 General Fund) and 24 months of care coordination to the Tribes and NARA until the IMCEs were up and running ($70,000 General Fund). It also includes an additional one-time cost of approximately $92,000 Total Funds to make updates to the Medicaid Management Information System that modifies the current enrollment and capitation processes for the IMCEs ($23,000 General Fund).

21. What are the ongoing costs?

The ongoing costs would be PMPM payments to IMCEs for AI/AN patients. General Fund for NARA and General Fund for a contractor to provide care coordination until the IMCEs are fully established and operational.

22. What are the potential savings?

Improvements in health outcomes and reduction in health disparities for AI/AN OHP members would result in additional health savings for OHA.

23. What are the sources of funding and the funding split for each one?

Total funds would be approximately $1.4 million General Fund and $10.7 million Federal Funds. The four federally-recognized Tribes would receive 100 percent Federal Funds. NARA's funds would be a blended rate of 72.45 percent Federal Funds and 27.55 percent General Fund. The contracting costs would be split 50-50 between General Fund and Federal Funds. The contracting costs of DXC would be split 75 percent Federal Funds and 25 percent General Fund.

Oregon Health Authority
2021-23 Policy Package

Division:	Central Services
Program:	Equity & Inclusion Division, Tribal Affairs
Policy package title:	Tribal Traditional Health Worker
Policy package number:	404
Related legislation:	Legislative Concept #46

Summary statement:

This policy package would fund the creation of a sixth, separate Traditional Health Worker category for Indian Health Care Providers (IHCP) which would allow the Oregon Tribes and Urban Indian Health Program to develop a program to use in their communities. This would include developing curriculum, training staff, and certification. Once certified, IHCPs would be able to receive Medicaid reimbursement recognizing tribal based practices and other culturally specific services under this new worker type. Approval of the new provider type would occur via the State Plan Amendment process.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$171,706**	**$15,025**	**$27,901**	**$214,632**	**1**	**0.88**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

Indian Health Care Providers (IHCPs) provide critical health services to their tribal members, families and communities. Traditional Health Workers (THWs) are community members who also understand health issues and the health care system and are uniquely positioned to work with communities to identify and address the underlying causes of health problems. THWs became formally recognized as a valued element of community health through Oregon's healthcare transformation efforts. Some of the IHCPs and current tribal-based practices do not currently fit within the five existing THW categories.

2. What would this policy package buy and how and when would it be implemented?

This policy package would fund one full-time position for the Equity and Inclusion Division (OEI) to create and administer this new program, and its ongoing work. Partnering closely with Tribal Affairs, Health Systems Division Tribal Liaisons and the Tribal Health Programs, the position would support the process to develop a curriculum, organize trainings, update the THW registry, assist in the application process and provide technical assistance for certification moving forward. The position would assist in contracting with an organization to create the curriculum in partnership with Oregon Tribes and Urban Indian Health Program and funding to support tribal representatives to be trained in the new curriculum. To date, one curriculum and training specific to Family Support Specialists has been created for tribal communities by Oregon tribal representatives with support from OEI and Tribal Affairs. It was a good first step to create something that could be built upon. Now we would like to continue to honor the tribes' request and expand this important work. Additional funding to support this work would be for the 2021-23 biennium.

3. How does this policy package further OHA's mission and align with its strategic plan?

This proposal would help achieve the agency's goal of eliminating health disparities within ten years. American Indians and Alaska Natives (AI/AN) experience some of the most significant health disparities among Oregonians, a direct result of colonization, termination, and relocation. Funding this initiative would help further the Governor's goal of ensuring OHA fully integrate health equity, tribal, and racial justice into its focus on social determinants of health. This proposal would further the triple aim of better health, better care, and lower costs by ensuring the delivery of culturally responsive health care for American Indians and Alaska Natives.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

Success of this program will be measured by the increase in utilization of traditional health workers in tribal communities and the culturally relevant services they provide to assist in reducing health disparities in tribal communities.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

Within the OHA Performance System, "Health Equity" has been identified as a core value for the agency and "Equity and Inclusion" as a key goal has been woven throughout the outcomes, core operating and supporting processes in the OHA Performance System. This policy package would help OHA reach the desired outcome

of health equity by ensuring Oregon's Native OHP members receive effective and culturally responsive health care.

Specifically, this policy package supports the "Engaging Community Stakeholders, Members and Partners" core process, which includes the following sub-processes:

- Understanding, assessing, and responding to needs, concerns, and issues.
- Integrating inclusive and culturally responsive practice.

Tribal Traditional Health Workers would also support the "Improving Clinical and Population Health" core process, which includes the following sub-processes:

- Delivering coordinated, high quality and culturally responsive health services.
- Coordinating care.

7. What are the long-term desired outcomes?

Long term outcomes would include increased access to culturally specific health care services along with reducing adverse health outcomes within tribal communities.

8. What would be the adverse effects of not funding this policy package?

If this package goes unfunded it would be very difficult to implement this new program as we do not currently have the staff to take on this additional work that has been requested by Oregon tribal representatives. The ongoing disproportionality and over representation of American Indian/Alaska Natives health disparities will continue.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

This concept was originally developed by an Oregon Tribal Member working in their tribal clinic. Tribal Affairs has been supporting the concept by collaborating with tribal representatives and the Equity and Inclusion Division to create the Family Preservation Training. This curriculum was written for tribal communities by tribal members as a training for Family Support Specialists in collaboration with the Oregon Family Support Network and with support from the Northwest Portland Area Indian Health Board. Although still a new program it has been utilized in several Oregon Tribal communities with success. Building on that success is one reason OHA would like to expand the idea to create a Tribal Traditional Health Worker category to address the additional ongoing issues IHCPs face with their services not fitting in the existing THW model.

10. What alternatives were considered and what were the reasons for rejecting them?

Continue utilizing the current Traditional Health Worker categories. This does not meet all the needs for Tribal Health Programs.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

Yes, legislative concept (LC) #46 would amend ORS 414.665 Section 1 to add: "(f) A tribal traditional health worker".

It would also amend ORS 414.025 to add the definition of tribal traditional health worker:

"**Tribal traditional health worker**" means an individual who meets qualification criteria adopted by the authority under ORS 414.665 (Traditional health workers utilized by coordinated care organizations) and who: (a) Has expertise or experience in tribal health;

(b) Works in a tribal or urban Indian community, either for pay or as a volunteer in association with a local health care system;
(c) To the extent practicable, shares ethnicity, language, socioeconomic status and life experiences with the residents of the community where the worker serves;
(d) Assists members of the community to improve their health, including physical, behavioral, and oral health, and increases the capacity of the community to meet the health care needs of its residents and achieve wellness;
(e) Provides health education and information that is culturally appropriate to the individuals being served;
(f) Assists community residents in receiving the care they need;
(g) May give peer counseling and guidance on health behaviors; and
(h) May provide direct services including tribal-based practices.

The LC would also amend ORS 413.600 Section 2(a) to add: "(f) tribal traditional health workers, as defined in ORS 414.025".

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Tribal Governments would see an increase in the workforce of culturally specific health care workers and an increase in Medicaid reimbursement for these services as many of these services are currently not eligible for reimbursement.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

OHA Tribal Affairs, OHA Equity and Inclusion Division, OHA Tribal Liaisons, Oregon Tribes and the Urban Indian Health Program. Tribal Based Practices are also a strategic pillar in the Oregon Tribal Behavioral Health Strategic Plan, supported by the Alcohol and Drug Policy Commission Strategic Plan and the Governor's Behavioral Health Advisory Council.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

American Indians and Alaska Natives (AI/AN) continue to be impacted by health inequities due to historical and intergenerational trauma. Tribal Health Programs provide culturally specific health services that have demonstrated efficacy in tribal communities, which assists in achieving health equity. OHA would be honoring the government to government relationship to support Tribal Governments to create programs that best meet the needs of their people. This proposal would improve the health of American Indians and Alaska Natives and appropriately reimburse the tribes for health services they have provided to their communities for generations.

Staffing and fiscal impact

Implementation date(s): July 1, 2021

End date (if applicable): Not applicable.

15. What assumptions affect the pricing of this policy package?

The assumption that health equity and the 10-year agency goal are indeed priorities for the agency and the state.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

Yes, the Equity and Inclusion Division and OHA Tribal Affairs and Tribal Liaisons will be responsible for creating this new program. Working closely with the Tribal Health Programs to create a curriculum, organize trainings, make updates to the THW registry, assist in the application process, and provide technical assistance for certification moving forward and Medicaid reimbursement.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

This policy package would not impact the Oregon Health Plan caseload but would result in an increase in services to patients/clients served by Indian Health Care Providers.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This proposal requests one new permanent, full-time Program Analyst 3 position for the Equity and Inclusion Division to create this new focus of the THW program.

20. What are the start-up and one-time costs?

Not applicable.

21. What are the ongoing costs?

All costs are ongoing, as they are staffing and programmatic in nature.

22. What are the potential savings?

OHA may realize long-term savings due to more cost-effective, high-quality care being delivered to OHP members.

23. What are the sources of funding and the funding split for each one?

Funding for personal services in OHA Central Services, including the Equity and Inclusion Division, are determined by an agency-wide cost allocation methodology. The budgeted funding splits are as follows, General Fund at 80 percent, Other Funds at 7 percent and Federal Funds at 13 percent. Federal funding sources include Medicaid matching funds and other federal grants.

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Personal Services	$141,292	$ 12,364	$ 22,960	$176,616	1	0.88
Services & Supplies	$30,414	$2,661	$4,941	$38,016

Oregon Health Authority
2021-23 Policy Package

Division:	Health Systems Division
Program:	CAWEM
Policy package title:	CAWEM ESRD Dialysis Coverage
Policy package number:	405
Related legislation:	None

Summary statement:

This policy package would cover the costs for dialysis, antirejection medication for kidney transplant, and additional related services and supplies to individuals eligible under Citizen/Alien Waived Emergency Medical (CAWEM) coverage. Currently, individuals covered under CAWEM are only able to access dialysis in an emergency setting. Medical assistance coverage for other, not CAWEM, Medicaid eligible recipients under the Oregon Health Plan includes inpatient and outpatient dialysis settings and antirejection medication for kidney transplant, and additional related services and supplies. Funding this policy package directly aligns with OHA's strategic vision of eliminating health inequities in Oregon in the next 10 years. Conversely, not funding this policy package would mean the CAWEM end stage renal disease (ESRD) population would continue to experience inequity by not receiving adequate renal dialysis services. The CAWEM ESRD population will continue to seek treatment in the emergency room setting which is more costly than in an outpatient setting.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$1,143,012**	**$0**	**$1,757,251**	**$2,900,263**	**0**	**0.00**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

The Citizen/Alien Waived Emergency Medical (CAWEM) population receives emergency only coverage in an emergency room setting. CAWEM recipients suffering with kidney disease, do not receive proper treatment to slow the progression, resulting in development of severe symptoms leading to the need for dialysis. Federal law gives state Medicaid programs latitude to define which conditions can be covered under their individual emergency Medicaid programs. Oregon has determined that dialysis can be covered under the broad definition of emergency Medicaid, through administrative rule.

2. What would this policy package buy and how and when would it be implemented?

Medical assistance coverage for Medicaid eligible recipients under the Oregon Health Plan includes inpatient and outpatient dialysis and antirejection medication for kidney transplant, and additional related services and supplies. This policy package would cover the costs to provide these medical services to individuals eligible under CAWEM. Currently, individuals covered under CAWEM are only able to access dialysis on a very limited basis when they are in crisis. This would allow provider reimbursement for:

- ESRD services for CAWEM members.
- Cost of surgery for installing a fistula for CAWEM members. This is inclusive of professional and facility costs, a week before and a week after the actual surgery to cover pre- and post-surgery care.
- Monthly dialysis cost per CAWEM member.
- Drug for induction of transplants and post drug maintenance for CAWEM clients.

3. How does this policy package further OHA's mission and align with its strategic plan?

OHA's mission is ensuring all people and communities can achieve optimum physical, mental, and social well-being through partnerships, prevention, and access to quality, affordable health care. This policy change and

associated investment would be directly in line with those priorities by increasing medically necessary care to individuals covered under CAWEM.

The policy change and associated investment would cover outpatient renal dialysis services to a population that currently only has limited crisis services available to them. This would result in increased equity for the CAWEM population in accessing dialysis services and post-drug maintenance.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

OHA program policy team will work with the Health Policy and Analytics team to develop data strategies and monitoring tools to assess reimbursement performance and cost saving measurements.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

OHA performance measurer OM6 is to Reduce Health Disparities. This policy package is an important investment to achieve this outcome. A core process for the Health Systems Division, 2FOP5.5 is to identify and address social determinants of health and health gaps. We have identified a health gap for this underserved population. This policy package will fund our efforts to address it.

7. What are the long-term desired outcomes?

The long-term desired outcomes are:

- Covering outpatient renal dialysis services to a population that currently only has limited crisis services available to them, providing better access to care
- Increased equity for the CAWEM population
- Quality of life for the CAWEM ESRD population
- Decrease costs in the emergency room setting

8. What would be the adverse effects of not funding this policy package?

The CAWEM ESRD population would continue to experience inequity by not receiving adequate renal dialysis services. The CAWEM ESRD population will continue to seek treatment in the emergency room setting which is more costly than in an outpatient setting. Receiving renal dialysis services regularly allows for quality of life.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

House Bill 4114 introduced in the 2020 short session, sponsored by Representative Salinas, would have directed OHA to pursue this policy change. The bill did not make it out of its committee of origin in House Health Care.

10. What alternatives were considered and what were the reasons for rejecting them?

The alternative would be to keep the status quo; limiting dialysis coverage for the CAWEM population to crisis only. This option will not address the inequity for CAWEM population or avoidable emergency room visits.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

None are anticipated.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

An Oregon Health and Sciences University (OHSU) provider has been an outspoken advocate for this policy change and has engaged with OHA, the Governor and legislators on this matter, reaching out for status updates on this issue.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

The policy change would cover outpatient renal dialysis services to a population that currently only has limited crisis services available to them. This would result in increased equity for the CAWEM population in accessing dialysis services and drug maintenance.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

Staffing and fiscal impact

Implementation date(s): January 1, 2022

End date (if applicable): Ongoing

15. What assumptions affect the pricing of this policy package?

- Assumptions that affect the pricing of this policy package are:
- Pharmacy costs based on AAAC Reimbursement for Fee-for-Service Pharmacies (Actual Average Acquisition Cost) average cost.
- Average cost of immunosuppression kidney transplant drugs to prevent rejection.
- Average professional and facility costs a week before and a week after the actual surgery to cover pre and post-surgery care for those that can acquire funding for kidney transplant based on actual expenditures.
- Average cost of surgery for installing a fistula for dialysis.
- Population estimate based on United States renal data system trends in standardized ESRD incidence rate, by Hispanic ethnicity, in the U.S. population, 2000-2016 and unauthorized immigrant population estimates by state as of 2016.
- Average dialysis costs based on 2016-2019 actual expenditures.
- Assumes 40 CAWEM clients will utilize this service with an average utilization growth rate of 7.9% per calendar year.
- Pricing assumes an influx of clients during the first 6 months.
- Assumes 1 CAWEM client will receive a transplant each year.
- CAWEM emergency services are eligible to receive Title 19 federal match and this rate is applied to the pricing.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

There will need to be implementation including program policy, Business Services Unit (BSU), financial, and health analytics. Operationalizing this policy change would require a rule change, and configuring the claims adjudication system, MMIS, to allow payment for members with the CAWEM benefit and our financial system to draw state and federal funds appropriately. This change would also need to be communicated to members, providers and other stakeholders. Once implementation is in place there will be continued work to sustain the program, within the same units. To ensure recipients receive these services and to analyze the data from this population.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

Pricing assumes an influx of clients during the first 6 months, January 1, 2022 through June 30, 2022. This is anticipated to be minimal, fewer than 40 individuals, and allows for new enrollees accessing care.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This workload will not require new staff. It can be managed by current staff.

20. What are the start-up and one-time costs?

There are no initial start-up or one-time costs.

21. What are the ongoing costs?

Ongoing costs are fee-for-service claims to providers for:

- Pharmacy costs based on AAAC Reimbursement for Fee-for-Service Pharmacies (Actual Average Acquisition Cost) average cost.
- Immunosuppression drugs of a kidney transplant to prevent rejection.
- Professional and facility costs a week before and a week after the actual surgery to cover pre and post-surgery care for those that can acquire funding for kidney transplant.
- Cost of surgery for installing a fistula for dialysis.
- Dialysis costs.

22. What are the potential savings?

Savings are possible due to less emergency room utilization, however due to the complex utilization patterns of this population, it is not possible to quantify savings reliably.

23. What are the sources of funding and the funding split for each one?

The funding split is 39 percent General Fund and 61 percent Medicaid federal matching funds.

Policy package title:	Children's Mobile Response and Stabilization Services
Policy package number:	406
Related legislation:	Senate Bill 1 (2019)

Summary statement:

This policy package seeks to institute a 24/7 365 day a year Children's Mobile response and stabilization program designed to deliver mobile response to support children, young adults and their parents and/or caregivers, as well as youth at risk for and in the custody of Child Welfare. Oregon has a mobile crisis response program for adults, but no such program is offered to children, youth and their parents and/or caregivers. This upstream, early intervention program would be available to parents and/or caregivers through use of a centralized referral system. Mobile response and stabilization staff would be able to support young people and their parents and/or caregivers in stabilizing the crisis situation and averting unnecessary emergency department visits, out-of-home placements, placement disruptions, arrests/incarceration and in reducing overall system costs.

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

National data shows 1 in 5 young people experience diagnosable mental health conditions in any given year. In the last three years on average, 8,250 Oregonians on the Oregon Health Plan ages 0 to 25 with behavioral health diagnoses were treated in emergency departments (EDs). In 2018, there were over 7,600 young people in foster care, and of these young people 60 percent experienced a disruption in their foster home which led to the need for a new foster home, placement in a shelter or going to an ED. An emergency department's primary role is to address physical and not behavioral health needs and they are adult-oriented. This lack of specialized expertise to effectively respond to and successfully stabilize children and youth experiencing a behavioral health crisis often leads to an extended stay in an ED or potential discharge without effective safety planning.

With the increased potential for trauma response in the wake of the COVID-19 pandemic, the entire population of young people are at risk for added stress. Safety and health are a top priority during this unique time of physical distancing and this need poses significant interruption in daily routines that impact access to support and care. Children and teens will be disproportionately impacted for months and years to come, even after a vaccine is found and particularly with the prospect of future outbreaks. This will heighten existing mental health symptoms and create additional symptoms, including post-traumatic stress disorder. These additional stressors will contribute to increased rates of abuse and neglect as people experience overwhelm and isolation. This has been previously measured and documented in areas experiencing natural disasters. Among the top concerns are Oregon's most vulnerable youth, who are at risk, or already living in a foster home. Oregon must prepare to meet this need to support children, young people and families and provide resources and support at the right time. Adequate response to COVID-19 issues requires the creation and utilization of early intervention strategies and trauma informed mobile response and stabilization services, and an increase in the coordination of the service network.

The guiding vision for Oregon is children can be at home, in school and in their community because they receive the right services, at the right time and for the right duration. National best practice for System of Care shows early intervention for children's behavioral health crises is a cornerstone of a strong, effective System of Care. Oregon's current service array does not support early intervention, nor does it adequately serve young people and families when they are in crisis or after they have stabilized. Additionally, there is a lack of cross-system collaboration, flexibility and responsiveness that results in avoidable crises and inappropriate placements, including for children involved with child welfare. The current system lacks a clear delineation of roles, responsibilities and accountability around emerging and urgent issues for children and families experiencing intensive behavioral health needs and has neither the capacity nor a sustainable funding structure, to keep them in a family setting and in school.

Child-serving systems, service providers, and families and youth, recognize that Oregon lacks a fully coordinated, effective network of services to support Oregon's more than two million children. More than 20,000 of these children are being served by multiple systems. The Governor and Legislature have established several initiatives to address this system challenge, including the Children and Youth with Specialized Needs Workgroup (2018), the Governor's Behavioral Health Advisory Council (2019–2020) and the statewide System of Care Advisory Council (Senate Bill 1, 2019).

2. What would this policy package buy and how and when would it be implemented?

Mobile Response and Stabilization Services (MRSS) are designed specifically to meet the needs of children, youth, and their parents and/or caregivers in order to deescalate and ameliorate a situation before more restrictive and costly interventions become necessary. MRSS creates connections to necessary services and supports. Children's Mobile Response and Stabilization Services would be available 24/7 and be provided in the home or any setting where the need may be occurring. In most cases, a two-person responder team is on call and available to respond within one to three hours, depending on location. The team may be comprised of

professionals and paraprofessionals (including peer support providers), who are trained in child and family mental health and crisis intervention skills and in serving as the first responders to children and families needing help on an emergency basis. In addition to assisting the child and family to resolve the issues identified by the youth and their family and/or caregiver team works with them to identify potential triggers of future situations and learn strategies for effectively dealing with potential future situations that may arise. Youth and families and/or caregivers do not need to be experiencing a crisis in order to receive support from MRSS providers.

MRSS would offer phone and in-person response services including an initial response and assessment, then face to face interventions, telehealth, and stabilization services for 72 hours or for up to 8 weeks. Individual therapy, family therapy, peer delivered services, medication management and skills training are offered as a part of stabilization services. The 8 weeks of support would link children, youth and their parents/caregivers to necessary supports and services within their community. After the initial issues and concerns are addressed, staff would facilitate the youth and parent and/or caregiver's transition into identified supports, resources and services consistent with their treatment needs and support a sustainable plan. This may involve linking the family with Fidelity Wraparound, Intensive Care Coordination, outpatient services, community-based supports and supports drawn from a youth and family's community

MRSS would be used to support youth and families at risk of child welfare involvement by supporting youth to live at home with their parents, at risk of, and placed into temporary lodging, youth in foster care as they are placed into a new home, and youth in existing foster care placements. Evidence from other states shows that MRSS services and supports dramatically increase the stability of youth residing in foster homes. MRSS provides ongoing support to foster youth and their caregivers to reduce crises and thus decrease the number of times a youth may need a change in foster placements.

MRSS would provide coordination of specialized services to also address the needs of youth with co-occurring intellectual and/or developmental disabilities as well as substance use disorders. Further evidence from other states shows MRSS can successfully decrease police involvement and emergency room use, while providing treatment to youth and their families in their home and community. States who have implemented MRSS have invested the savings from MRSS into community-based mental health services or to expand MRSS.

Program Specifics

- Hiring staff for a statewide MRSS program for children, youth, their parents and/or caregivers in collaboration with the Department of Human Services (DHS) Child Welfare program.
- Contract funding for a vendor to operate a centralized referral line.

This program would require 8 to 10 months to implement in order to write and implement temporary administrative rules, set up a centralized referral call center, hire and train staff, and apply for a state plan amendment. MRSS would have a staggered statewide roll out that would begin in 5 regional areas representing rural, urban and frontier communities. Eighteen months later, data informed implementation strategies would be used to begin a statewide implementation.

3. How does this policy package further OHA's mission and align with its strategic plan?

Governor's Executive Order 18-01: Building Oregon's commitment to addiction prevention, treatment, and recovery priorities, and setting deadlines for statutory, and declaring a health crisis.

Governor Brown has previously made Behavioral Health a priority as evidenced by:

- The Children's System of Care Advisory Council established by Senate Bill 1 (2019) to create System of Care policies for youth and families that experience complex behavioral health needs. System of Care creates and supports the array of mental health services and supports and organizes them into a

coordinated network so young people and their parents and/or caregivers can receive the right care, at the right time, for the duration needed.
- The Governor's Behavioral Health Advisory Council includes a focus on young adult behavioral health needs.
- The Governor's Children's Cabinet has a focus on youth in foster care and children's behavioral health.

OHA Mission: Helping people and communities achieve optimum physical, mental, and social well-being through partnerships, prevention and access to quality, affordable health care. MRSS is a prevention program specifically designed to support children and their families and/or caregivers before situations turn into a crisis. A free and mobile mental health service removes barriers to accessing care. Care that can be critical to daily functioning, community safety and well-being. This trauma-informed program would also provide support to children and their families in their home, their schools and in the communities.

MRSS is aligned with OHA's mission to provide services and supports that are defined by equity. "Oregon will have established a health system that creates health equity when all people can reach their full health potential and well-being and are not disadvantaged by their race, ethnicity, language, disability, gender, gender identity, sexual orientation, social class, intersections among these communities or identities, or other socially determined circumstances."

MRSS aligns with OHA's prioritization and expansion of the children's behavioral health service array and policy packages put forward in the past three years. HSD's Behavioral Health Director, Steve Allen, is the current chair for the Governor's Behavioral Health Council, which recently agreed to shift focus to youth and young adults ages 12 to 25, to include children's behavioral health needs in the council's work and he is a member of the System of Care Advisory Council.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

Implementation analysis and outcome measures would be established to ensure individual child and family outcomes are monitored and measured against the goals of MRSS which:

- Prevent the disruption of a child or youth from their current living arrangement.
- Prevent hospitalization or re-hospitalization whenever possible.
- Respond to the crisis within established timeframes.
- Ensure family members have a connection with clinical or peer support services.
- Deliver trauma informed services within the community.

This data would be managed via the proposed Behavioral Health Data Warehouse (BHDW), a data base and linking with the call center and MRSS staff. OHA would monitor the effect of MRSS with a provider data system that would track enrollment, utilization and length of stay, and track changes to the average utilization and length of stay for youth in residential and department use. This can be accomplished by monitoring the demand for residential treatment and subacute services. OHA would continue to monitor overall usage and the average length of stay in each level of care. OHA would work with coordinated care organizations (CCO) to monitor mental health service utilization. OHA would partner with DHS Child Welfare to track foster youth who receive MRSS, the number of foster home changes, number of referrals from the child abuse hotline, youth entering foster care and youth in temporary lodging. Youth involved with Oregon Youth Authority (OYA) would be tracked for arrests, probation violations and detention center utilization and length of stay.

The Child and Family Behavioral Health Unit is coordinating with the COMPASS Modernization project POP, in order to implement a multi-functional reporting system to support OHA program staff, data analytics staff, treatment providers, and state and federal stakeholders by allowing direct interface with a variety of internal and external data systems and electronic health records systems. Behavioral health data would be collected by MRSS in a secure system such as REDCap and integrated into the proposed Behavioral Health Data Warehouse (BHDW) for outcomes analysis. In BHDW, MRSS data would be tracked alongside other behavioral health data for a clearer picture of outcomes and continuity of care.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

There are three KPM tied to this policy package:

#3 Follow up after hospitalization for mental illness who were seen on an outpatient basis or were in intermediate treatment within seven days of discharge. MRSS can provide stabilization support post-hospitalization and a point of contact for coordinating ongoing care needs.

#20 Access to care – Percentage of members who responded “always” or “usually” to getting care. Families and youth who access MRSS will get immediate phone and direct services within 1-3 hours, followed by a plan of care. This will impact the of members and reduce barriers to accessing care.

#22 Member health - % of CAHPS survey respondents with positive self-reporting of overall health. Rapid access and support provide early intervention and self-efficacy.

7. What are the long-term desired outcomes?

This policy package aims to provide support to youth and their families before a crisis situation occurs while providing youth with the right service, at the right time for the right duration. Through the children's System of Care data dashboard, which will combine OHA, OYA and DHS data, OHA would monitor MRSS's impact on systems serving children. MRSS's preventative approach would decrease rates of avoidable emergency department visits, intensive mental health services, as well as reduce detention center use, the number of foster home placements, and the length of time children and youth are in foster care.

System Results:

1. Ensure that all children and their families have access to crisis, stabilization, and intervention services and supports.
2. Whenever possible, maintain youth in their homes and communities and prevent placement in restrictive care settings such as emergency departments, inpatient hospitalization, arrest, and incarceration.
3. Increase community awareness of behavioral health needs by providing prevention- and treatment-oriented education and outreach to families, schools, and communities.

Behavioral Health Provider Results

1. Provide behavioral health crisis and stabilization services that are mobile and responsive to child and family needs.
2. Provide appropriate screening, early identification, and assessment of suicide risk, trauma exposure, substance use, exposure to and risk of violence, eating disorders, and other clinical presentations.
3. Include family members and informal supports in all aspects of the planning and treatment process.

Child /Family Results

1. Address the presenting issue as defined by the child, youth, family and caregiver, instead of waiting for the issue to develop into a crisis.
2. Promote and enhance emotional and behavioral functioning.
3. Link to existing providers or facilitate linkage and transfer to appropriate level of services and supports.
4. Empower children and families to monitor, manage, and cope with situations that may lead to further crises.

MRSS programs have shown notable savings and opportunities for reinvestment:

In Eugene an MRSS program called Crisis Assistance Helping Out on the Streets (CAHOOTS) handled 18% of the 133,000 calls to 911 in 2019. The program operated on a $2 million in 2019 year and saved the Eugene-Springfield area about $14 million in costs of ambulance transport and emergency room care.

In King County, Washington, the Children's Crisis Outreach Response System (CCORS) diverted 81 percent of child hospitalizations at local emergency departments in 2012, which translated into a savings of about $1 million in inpatient costs. It was also reported that in 2011, 62 percent of previously unengaged families were linked with community providers at the conclusion of the CCORS intervention.

8. What would be the adverse effects of not funding this policy package?

Not funding this policy package would keep the children's service array focused on being reactive, rather than preventive. Youth would continue using emergency departments to meet their psychiatric needs. At a time when EDs are under significant strain from individuals with COVID-19, it is critical to provide resources to all children, youth and their families with upstream support and care. Oregonians are going to be faced with increased mental health needs as the world continues to physically distance, experience stressors related to poor health, loss of social connection and increased financial instability.

With the current wait list for residential treatment beds, we need more innovative services and resources in Oregon. These waitlists create a gap in services that cause families to wait more than 6 weeks for assessment appointments resulting in increased likelihood of a crisis emergency department visit and worsening health of the family. Utilizing MRSS would provide supports to would prevent disruptions, interactions with law enforcement, foster care and higher levels of mental health care.

Oregon's System of Care aims to improve the effectiveness of state agencies serving Oregon's children and improve the continuum of care that provides services to youth, ages 0 to 25 so that mental health care is community based, family driven, effective, community based and culturally and linguistically responsive. Achieving this will require changes to the current systems and the filling of gaps in the continuum of services available to children and young adults. Filling the early intervention gap with MRSS would decrease demand for higher levels of service and preserve foster placements for young people involved with DHS Child Welfare.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

The children's system has been historically focused on response to intensive treatment needs for children and young adults. No previous efforts have been made to create an MRSS system.

This area has come into greater focus as a true System of Care is envisioned for Oregon, where a child receives the right service at the right time and for the right duration. Many behaviors and conditions can be ameliorated or managed with early identification and treatment, decreasing the severity and long-term impact. A statewide System of Care approach highlights this gap in the continuum of care.

Previous investments in the system support children and youth with complex behavioral health challenges with an array of outpatient, day treatment, intensive in-home, subacute, residential services and acute care include:

Crisis and Acute Transition Services (CATS) are designed to provide a community-based alternative to emergency department "boarding" for children, youth, and young adults in need of acute psychiatric treatment, who are awaiting inpatient psychiatric hospitalization. The program includes and requires brief crisis services, stabilization, and transition to community-based supports and services when individuals from birth through age 18 present to emergency departments or crisis centers and are at risk of admission for psychiatric or behavioral crises. Programs must serve all individuals presenting in the settings indicated above, including those with public, private, or no insurance. The CATS program has served over 1,300 youth and their families in 9 counties in 2019. Approximately 78 percent of youth are discharged from the emergency department within 24 hours, and 92 percent within 48 hours.

Fidelity Wraparound is an intensive care coordination model and a fidelity process that supports young people and their families with complex behavioral health needs who are multi-system involved. Wraparound is a voluntary process, guided by youth and their families, that connects them to the supports and services needed to improve health and wellbeing. Wraparound reduces the use of emergency rooms, higher levels of care, reduces episodes of psychiatric hospitalization, improves school attendance and provides significant support to youth involved in child welfare and juvenile justice. Wraparound programs were implemented statewide in 2014 and were part of House Bill 2144 (2009), which focused on System of Care and each of Oregon's CCO's are tasked with implementing Wraparound. Most counties and all regions have access to Wraparound care coordinators and peer-delivered service providers with specialized training in supporting youth and their families. Wraparound is a voluntary process, is youth and family guided and connects youth and their families to the supports and services needed to improve health and wellbeing.

Development of Interdisciplinary Assessment centers. During the 2019 session, the legislature passed Senate Bill 1 and set aside funding for OHA, DHS and OYA to coordinate efforts to provide regional interdisciplinary assessment centers in a special purpose appropriation (SPA). IATs are intended to provide a

thorough assessment and make treatment recommendations that support the young person's long-term wellness, with the goal that young people are served in the most appropriate setting for the most appropriate length of time. As of July 2020, IAT's are in statute but not yet funded. A recipient has been selected and once funding is secured the RFP process would move forward.

Development of Intensive In-Home Behavioral Health Treatment. This is a new level of care in Oregon that will become available beginning Jan 1, 2021. This service will require a combination of intensive therapy, skills training, and case management delivered in a youth's home or community. It will also involve a team planning process and includes the availability of 24/7 crisis supports. This is an intensive intervention designed to divert youth with acute mental health needs away from requiring residential intervention.

10. What alternatives were considered and what were the reasons for rejecting them?

1. Using the adult system to provide mobile crisis response.
   - Developmental difference between children and adults requires different strategies.
   - Behavioral health issues constituting the reason for a request for help can be very different.
   - Role of the caregiver for a child, both from a legal and decision-making perspective.
   - Crisis response is different from MRSS, as a situation does not have to be a crisis for a parent or youth to receive support.

2. Status quo.
   - Early intervention decreases stigma, enables early intervention and better outcomes.
   - Emergency department are often inappropriate and do not provide treatment.
   - Professionals with no or little mental health training or training to work with young people are responding to emergency calls through the 911 system.

- Early intervention decreases the number of children and youth who become involved with child welfare and the justice system.

There are no equivalent alternatives to a Mobile Response and Stabilization Service program, it is unique to behavioral health services and provides upstream interventions and aligns with System of Care philosophy. States who have implemented MRSS have been able to close state hospitals, detention centers and drastically reduced length of stay of youth in the foster care system.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

- County mental health programs, CCO's, and service providers would be affected by this investment. Early intervention programs, diversion from emergency departments and the appropriate use of intensive services frees capacity in an already strained system.
- DHS Child Welfare is committed to supporting MRSS for youth in foster care. For this population, MRSS would become a routine part of a youth entering a home, aiming to immediately stabilize placements, shown to be successful in other states.
- OYA is interested in MRSS for youth involved in both juvenile justice and OYA, recognizing the benefit of rapid behavioral health crisis intervention and stabilization in multiple settings.

- The Oregon Department of Education (ODE) is committed to keeping young people in school and in their community and would benefit from access to this resource.
- Would be available for all youth in Oregon's Confederated Tribes.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

- DHS strongly supports this program and has been collaborating with OHA on this policy package.
  - Business Information Systems unit is also submitting a policy package for the COMPASS modernization project, which would support MRSS in being able to track outcomes with a database and data warehouse.
  - Families have requested a program like MRSS rather than using an emergency department or law enforcement when they do not have timely outpatient clinical and peer support services.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

This policy package helps populations impacted by health inequities by decreasing stigma by receiving mental health supports outside of a clinical setting and by removing transportation as barriers to accessing care. Barriers to accessing a disjointed and siloed behavioral health system disproportionately impact African-American, Latinx, Asian, and Indigenous communities, non-English speakers, persons with disabilities, and LGBTQ+ communities. Access barriers are exacerbated by a lack of culturally responsive services and representative providers, historical trauma related to health care and the unconscious stereotypes that impact service delivery.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

This policy package reduces the need for child welfare, juvenile justice and law enforcement involvement by supporting youth and families when they identify a need for support, before situations impact safety. Due to unconscious stereotypes that impact service delivery, law enforcement is more likely to be contacted in response to an African-American youth and family compared to that of a white youth and family. Due to systemic racism, African-American and Latinx youth and families are disproportionately represented in juvenile justice and child welfare.

MRSS can support African-American, Latinx, and Indigenous by offering mobile response and stabilization by individuals trained to provide trauma informed and culturally and linguistically responsive care to youth and their families. By providing the right services, at the right time for the right duration, MRSS can provide support to all youth and families regardless of language, culture and ethnicity.

Staffing and fiscal impact

Implementation date(s): January 1, 2022

End date (if applicable): Ongoing

15. What assumptions affect the pricing of this policy package?

MRSS would serve all children in Oregon, including children on the Oregon Health Plan and those covered by commercial insurance. The program would start January 1, 2022. This policy package assumes savings in Medicaid will gradually occur after 6 months of this program being implemented. In 2021-23, the percentage of decreasing ED visits, subacute and psychiatric residential treatment services would still be low and slowly increasing in the 2023-25 biennium.

OHA may realize long-term savings in OHP expenditures due to more cost-effective, high-quality care being delivered to OHP members. To the extent savings occur, they will be reflected in subsequent years' CCO rates, which are based on past expenditures, and incorporated into OHA's budget as part of the capitation rates for CCO-enrolled OHP members.

FMAP rates for eligibility groups were based on ED visit actual data to determine the appropriate Medicaid match rate to calculate the Federal Funds amount.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

Existing OHA staff would coordinate this program, with support and consultation from DHS.

Health Systems Division

- The Child and Family Behavioral Health Unit would provide technical assistance to MRSS programs, rule writing, contracting, and ongoing consultation for sites on implementation.
- Licensing and Certification would certify providers for these services and conduct ongoing compliance reviews.
- The Business Services Unit would manage program data via the proposed Behavioral Health Data Warehouse (BHDW) and external services linking with the call center and database.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

Technology support services would use an interface for inputting provider data, a data base and a data warehouse to store data.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

Based on data provided by Health Policy and Analytics (HPA), emergency departments served approximately 8,250 children in OHP and 2,307 Non-OHP children annually. This program is aimed at reducing emergency department utilization by providing mobile response and stabilization services.

MRSS would bring a change for the services available to youth statewide by providing mobile mental health providers and peers that have the ability to address the concerns of youth and family and/or caregiver before they escalate and provide up to eight weeks of stabilization services. MRSS will then offset the number of youth and families who are seeking services and supports while experiencing a mental health crisis. As a result of MRSS caseloads of some mental health providers may rise, but the biggest change would be in the long-term decrease frequency, duration and intensity of services provided for youth.

There would be an increase in community-based crisis response, including more responses to the youth's home.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

Existing staff in the Child and Family Behavioral Health Unit would coordinate MRSS at OHA and provide technical assistance to providers.

20. What are the start-up and one-time costs?

The start-up costs total $187,000.

Start-up costs for MRSS include personnel and infrastructure for a statewide and centralized call center to dispatch staff to children, youth and their families. The call center would require 20 workstations with an estimated one-time cost of $2,000 for a total of $40,000. Start-up costs for data and reporting includes a data base, data analysis, the required equipment, fees and personnel.

Call Center		#	
stations	$ 2,000	20	$ 40,000
Total call center			**$ 40,000**
Data base			$ 3,000
Technology	$ 2,000	72	$ 144,000
Total			**$ 187,000**

For local MRSS programs, staff would be required to have sufficient technology to provide services to youth and families and/or with a cell phone and laptop with sufficient internet access. For youth and families and/or caregivers that do not have sufficient technology to communicate via telehealth, tablets would be offered for use during service provision. In total, technology costs are $144,000 to fund statewide MRSS programs.

21. What are the ongoing costs?

- MRSS for OHP members are covered by Medicaid and would qualify for Title-XIX (Medicaid) and Title XXI (CHIP).
- Maintaining a system for tracking data and outcomes will take resources. This data would be managed via the proposed Behavioral Health Data Warehouse (BHDW).

Below is the breakout for on-going costs: $4,310,100

			ongoing
staff	$ 80,000	20	$ 1,600,000
indirect			$ 426,400
Total call center			**$ 2,026,400**
Marketing			$ 200,000
Data base			$ 75,000
Technology	$ 1,000	72	$ 72,000
Prgram admin	$ 100,000	5	$ 500,000
Total			**$ 2,873,400**
12-month			$ 2,873,400
18-month			**$ 4,310,100**

22. What are the potential savings?

MRSS would create a return on investments flowing from declines in both utilization and lengths of stay in emergency departments, residential treatment centers, subacute, and inpatient psychiatric units. OHA anticipates two significant sources of savings:

1) OHA may realize long-term savings in OHP expenditures due to more cost-effective, high-quality care being delivered to OHP members. To the extent savings occur, they will be reflected in subsequent years' CCO rates, which are based on past expenditures, and incorporated into OHA's budget as part of the capitation rates for CCO-enrolled OHP members.

   Below are the projected OHP FFS savings in 2021-23**:**

		Average 2017-19 FFS ED visits	Projected Percentage	Projected Less visits	estimated Days of stay	FFS cost per visit & daily higher level of care cost	
Annual MH Saving (not for CCO,only FFS)	Estimated 20% less ED visits	1,573	20.00%	(315)		$ 1,068	$ (335,982)
	Estimated 30% less from ED to higher level of care & estimated 40% from ED to higher level of care	1,573	12.00%	(189)	8.00	$ 750	$ (1,132,560)
Annual savings total							**$ (1,468,542)**

The above chart shows that MRSS programs would reduce 20 percent fee-for-service ED visits, which is about 315 visits per year and would save $0.3 million in ED costs per year. MRSS is also projected to prevent 12 percent fee-for-service clients from going to higher levels care which is approximatly189 visits per year and save $1.1 million in higher level of care costs per year. The annual savings total is estimated to be $1.5 million.

23. What are the sources of funding and the funding split for each one?

Non-OHP includes commercial insurance, start-up and ongoing costs, which is all supported by General Fund. OHP includes two categories: Medicaid Fee-For-Service and CCO members. Based on the PERC level data provided by all payor all claims (APAC) unit, each category broke out into Medicaid groups: General Fund, Affordable Care Act, Children's Health Insurance Plan and Medicaid Plus. There is a specific federal medical assistance percentage (FMAP**)** rate to each Medicaid group to calculate the federal fund match. Calculations shows that in FY21-23, Medicaid Fee-for-Service will cost $0.5 million General Fund and $1.4 million Federal Funds. Medicaid CCO would cost $1.2 million in General Fund and $2.9 million Federal Funds. The total of Medicaid FFS and CCO would be $1.7 million General Fund and $4.3 million Federal Funds.

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Personal Services	$0		$0	$0	0	0.00
Services & Supplies	$0		$0	$0		
Capital Outlay	$0		$0	$0

Oregon Health Authority
2021-23 Policy Package

Division:	Health Systems Division
Program:	Medicaid
Policy package title:	Operate FFS Like a CCO
Policy package number:	407
Related legislation:	None

Summary statement:

This policy package would fund nine new positions to improve the Oregon Health Plan (OHP) fee-for-service (FFS) program operations and address several identified program gaps by aligning the fee-for-service delivery system with that of a coordinated care organization. The adverse effect of not funding this package is that program gaps will persist, OHP members in FFS will continue to have a health plan that is inferior to CCO plans, and important policy work, such as fee schedule and rule updates, will continue to be delayed. Avoidable problems with OHP payment to providers will continue to occur.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$12,057,223**	**$0**	**$20,137,313**	**$32,194,536**	**9**	**6.75**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

While the vast majority of Oregon Health Plan (OHP) members are enrolled in a coordinated care organization (CCO), which is a network of all types of health care providers who work together in their local communities, approximately 100,000 OHP members' benefits are administered by the Oregon Health Authority (OHA) through a fee-for-service (FFS) program, also known as Open Card. CCOs improve health outcomes and lower costs by focusing on prevention and helping people manage chronic conditions, like diabetes, which in turn helps reduce unnecessary emergency room visits. Though FFS members are eligible for the same OHP benefits, they do not receive the same level of coordinated care as those enrolled in CCOs. CCO enrollees benefit from CCO staff working with providers in innovative ways to improve the quality and coordination of healthcare. Due to its current level of staffing, the FFS program is unable to devote necessary staff time to working with providers on behalf of members in this way.

To assure the same level of service and care coordination provided to CCO members and better meet the needs of OHP members in FFS, the state must transform the FFS program to operate like a CCO. Due to a lack of resources, including adequate staffing, the state is not currently equipped to transform the FFS program to operate like a CCO. In its role as a FFS delivery system, OHA issues detailed guidance on tens of thousands of medical services covered by OHP. The state does this through administrative rules, by publishing guidance documents and fee schedules, creating forms, developing operations procedures for staff, answering questions, and providing technical assistance. This work will continue and expand as the FFS program transforms to operate like a CCO. Health Plans, and the state in this role, must be nimble and continually update rates and coverage details. The state's ability to meet this need is hampered by its current staffing levels as described below. As a result, providers serving OHP FFS members are often left operating with outdated inaccurate policy details. It is not uncommon for policies to be 3 to 5 years out of date. Out of date rules and policies for

FFS are problematic for the entire Medicaid system because FFS serves as the floor against which CCOs are measured. This can make it difficult for the agency to ensure that CCOs are providing high quality care for their enrollees. Additionally, there are known gaps in FFS programs impacting FFS members that the agency needs funding to solve. These challenges stem from significant changes made to the Medicaid program at the state and federal level over the last few years. These changes have made the Medicaid program much larger and more complex but have not been accompanied by increased investment and additional staffing to manage that complexity and growth. The biggest driver of increased complexity has been the Affordable Care Act expansion in 2014, which more than doubled the Medicaid population served in Oregon. The state went from serving approximately 400,000 individuals to more than 1,000,000- an increase of more than 600,000 members. With the creation of CCOs in 2012, it was assumed that the vast majority of Medicaid enrollees would be served by CCOs. While that has held true, there is still a significant number of Medicaid recipients enrolled in the FFS program. The number enrolled is approximately 100,000 members making the FFS program the third largest "plan" in Oregon. Experience has shown that the FFS program will remain sizeable and will require investment and attention to ensure its members receive the same level of care coordination as CCO members.

2. What would this policy package buy and how and when would it be implemented?

The policy package requests nine additional staff and funding to address several identified program gaps.

Staff:

The nine positions requested include a Physician Specialist, a Manager, and an Operations and Policy Analyst 4 (OPA4) to lead the transformation work that this package would fund. The physician and the manager would provide direction and oversight for the entire FFS program and focus on health equity, robust care coordination and improved access to services for the FFS populations. In operating the FFS program, OHA must frequently consider unique the medical circumstances of its members. There is more work than can be covered by existing

MD and managers as OHA moves into new and transformative areas of health care. The OPA4 staff would focus on the FFS Medicaid behavior health services to ensure they are well coordinated with non-Medicaid programs and members' needs are being met.

The other six positions requested are Operations and Policy Analyst 1 positions (OPA1), a Research Analyst, and a Fiscal Analyst. These positions are to perform critical program maintenance work and provide technical assistance related to coverage and billing within the FFS Medicaid programs. Investing in these additional staff will allow the current professional-level program leads to focus on health outcomes for members in their respective program areas. This will allow existing staff to work at the top of their classification and manage their program areas to best and efficiently meet the needs of the FFS members.

Program gaps:

- Increase rates for Enteral/Parenteral Nutrition and IV supplies. Providers report that rates for these supplies are too low to cover their expenses and as a result they limit the number of FFS OHP members they serve. This package would address this problem by increasing rates to match providers' acquisition costs for these supplies.
- Fund the use of the Lifecourse model in our behavioral health programs. Lifecourse model is designed to capture an individual's experiences, social determinants of health, culture, goals, wants and needs to effectively plan services and supports needed to achieve and maintain a level of independence in their life. Lifecourse model is used in identifying these and other areas in a shared decision-making effort toward person-centered service planning. The goal is for the individual to control and own the details and decisions with regard to the direction of their life. The cost for this is in the staffing request above. It is an example of how we could use our regulatory authority to drive transformation in the FFS program. But to do so we need staff to conduct the oversight and monitoring activities.

- Add transition services and services to assist in obtaining or maintaining employment to the 1915i State Plan and adjust the criteria so additional members will be eligible for 1915i services to meet their needs. Transition services are vital for members to step down from higher levels of support toward independence. To effectively transition, individuals must maintain the skills acquired in higher levels of supports. Transition services are used to educate incoming service providers about successful services and techniques to aid maintenance. Funding would be to cover new services and for increased utilization when more members are eligible for existing services.
- Adding in-home settings as a service location for BRS. Funding is in part included in the staffing increase above to develop and oversee a new in-home service program. This new in-home service program would be used for children returning to their biological home after receiving BRS or residential services, providing needed parent education and services for skill maintenance. Additionally, this service would function as a diversion for those children at risk of out-of-home placement due to behavioral concerns or involvement with juvenile justice. Funding would also be needed because there would likely be some increase in the number of clients in addition to those BRS clients served with the addition of this service location.
- Increase rates in the ABA program. Access to ABA services is below what we expect in the FFS program. Low rates are likely a factor and needs to be addressed to properly serve our members.
- Study delivery of Early Periodic Screening, Diagnosis, and Treatment (EPSDT) for FFS eligible children. EPSDT is a set of federal requirements governing Medicaid coverage for children. From the federal perspective Oregon's program is compliant however this benefit is not well understood by members and providers in Oregon. Funding for this study is included in the staffing above. The study would likely result in OAR revisions, new guidance and FAQs aimed at program improvement.
- Change the payment model for interpreter services in the FFS program. Currently interpreter services are considered a practice expense for FFS providers. This means that OHA has very little influence over the

quality of these services and providers are incentivized to reduce these expenses as much as possible. This package would fund OHP to pay directly for interpreter services in the FFS program. This model is exactly how all CCOs fund these services and it gives them a powerful lever to ensure members receive quality service. OHA needs this lever for the FFS program so it can better serve its limited English-speaking members and reduce health inequities for this vulnerable population.

3. How does this policy package further OHA's mission and align with its strategic plan?

This policy package would allow FFS program staff to focus strategically on ensuring access to quality health care for the FFS population by identifying and addressing gaps. All program areas will benefit but the funding will particularly benefit behavioral health services for the FFS population.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

Many processes and program details are expected to improve with funding for this package but the most important measure would be improved health outcomes for FFS members. Improved health outcomes would be seen in improvement for FFS using the same metrics used for CCOs. Improvement on these metrics would show that OHA has successfully transformed FFS to operate like a CCO.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

Yes. Improving Clinical & Population Health and Developing, Implementing, and Managing Programs are core process for HSD in OHA's Performance System. The Medicaid programs included in this policy package are among the most consequential programs managed by HSD and they are designed to improve the health of Oregonians.

7. What are the long-term desired outcomes?

The long-term desired outcome is for the FFS program's performance to keep pace with CCOs on the same metrics. Particularly metrics measuring health outcomes in the OHP population. The FFS program needs to be operated to drive toward the same outcomes we expect of our CCOs.

8. What would be the adverse effects of not funding this policy package?

HSD will continue to make tough prioritization decisions as we are today. Some important work will be delayed and health disparities will persist unaddressed and some even unidentified. HSD will not be able to operate the FFS to the standards that we expect of our CCOs and OHP FFS members will continue to receive services through a program inferior to CCOs.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

FFS managers actively and strategically assign work and juggle priorities with the staff that we have. We use our discretionary funds to purchase reference materials, computer software, and staff training to enhance efficiency. Despite these efforts this often means doubling up program work for staff and choosing to delay important projects.

10. What alternatives were considered and what were the reasons for rejecting them?

An alternative would be to petition the Federal government to allow the state to end the FFS program and transition all OHP members into CCOs. This alternative is appropriate for approximately 90% of OHP members and OHA continues to work on increasing this percentage however federal law and other considerations, including state law, necessitate that the FFS program will continue to exist. For example, the agency must allow Native Americans the choice to have a FFS program. Individuals with dual Medicare-Medicaid eligibility also have the right to choose to be enrolled in a CCO or the FFS Program.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Some tribal and local government agencies are providers in the FFS network. They would see improved service to their members as a result of more robust care coordination and increased access to providers

13. What other agencies, programs or stakeholders are collaborating on this policy package?

All providers in the OHP FFS network would benefit from this policy package, but none are collaborating with us on this package.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

This policy package would have a direct positive impact for populations with in the FFS membership who are impacted by health inequities because HSD would have staff that can focus on identifying and addressing these needs. Staff would rebuild the FFS program and transform services to be accountable and responsive to member's needs.

Staffing and fiscal impact

Implementation date(s): January 1, 2022

End date (if applicable): Not applicable.

15. What assumptions affect the pricing of this policy package?

E/P IV – Pricing was based on total claims less reimbursed amounts. Rates has not been adjusted for years and experienced a reduction in 2015.

Transition Services - $1,800 rate is based on similar APD Services and 173 count represents statewide behavioral health tier 2 capacity.

Interpretive Services - American Sign Language (ASL) & Non-English (N-E) projected cost per claim is $60. Services for CCO population are covered under the capitation payment. Utilization expected to be at 70 percent for the first 12 months from initial implementation and 100 percent thereafter.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

BRS Home - Community Step Down Proctor is chosen as a base rate as it consists of costs required for the home as a service location. Parent training only therefore proctors in the rates have been removed as foster parents will not be trained. Rate set at $110.98 per day with services anticipated to be 3 times per week for 8 weeks. Projected annual count of 2,700 annually.

ABA Rates – Increase procedure codes 97153 ($44) and 97155 ($52) to $55 per hour. This estimate is representative of the potential annual cost of CCO rates if the fee schedule increase is implemented. The actual CCO cost impact may differ depending on the timing of the increase as well as actual CCO experience.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

All program areas in HSD's FFS program would have new responsibilities to monitor health outcomes and member experience. The program would be rebuilt to be responsive to these identified needs by adjusting and improving.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

This policy package would fund client caseloads or services increases in two program areas.

Transition Services: Funding would cover services for 260 additional members added to the caseload and new services to assist members in obtaining/maintaining employment.

BRS: Funding would cover 2,700 additional members added to the caseload and add a new service location.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This policy package would establish nine permanent, full-time positions.

- One Physician Specialist to provide clinical direction and expertise to inform the administration of the FFS program.
- One Principle Executive Manager G position to oversees all FFS operations and focus on delivering on the promise of health care transformation for FFS members.
- One Operations and Policy Analyst 4 position for the behavioral health program. This analyst would lead the complex coordination between our team, the Non-Medicaid behavioral health team, and various teams under DHS.
- Four Operations and Policy Analyst 1 positions to take over program maintenance tasks currently done by Operations and Policy Analyst 3-level staff; one for hospital, one for behavioral health, one for DME, and one shared for several other programs. The primary duties for these staff would be to keep rates and billing code details current and accurate in MMIS, maintain our Fee Schedules and guidance documents and receive and process documents from providers as part of our oversight and compliance activities.
- One Research Analyst 3 to conduct complex data quarries, to build tools to automate data processes, and to provide data related technical assistance to our team on topics that are highly specific to our work.
- One Fiscal Analyst 3 to lead in-house rate development the FFS team does in coordination with the Actuarial Services Unit. This is primarily for dental and behavioral health programs. It also includes select

services in many other programs in which rates are not set in reference to CMS rates and must be developed in-house.

20. What are the start-up and one-time costs?

None.

21. What are the ongoing costs?

The nine positions requested would be permanent. These positions would create ongoing costs. Funding requested to fill program gaps in the following areas would add services to the OHP benefit, increase rates, or increase utilization of existing services. These would be on-going costs.

- Increase rates for Enteral/Parenteral Nutrition and IV supplies.
- Add transition services and services to the OHP benefit.
- Add in-home settings as a service location for BRS to allow additional utilization of this service.
- Increase rates in the ABA program.
- Change the payment model for interpreter services in the FFS program. Payment for these services would be a new and ongoing cost.

22. What are the potential savings?

No savings are anticipated.

23. What are the sources of funding and the funding split for each one?

General Fund and Federal Funds.

Total for this policy package

Oregon Health Authority
2021-23 Policy Package

Division:	Public Health Division (PHD)
Program:	Health Promotion and Chronic Disease Prevention
Policy package title:	Tobacco Retail Licensure
Policy package number:	408
Related legislation:	Legislative Concept 2

Summary statement:

Tobacco is the leading preventable cause of death and disease in Oregon, costing the state $2.9 billion and nearly 8,000 lives every year. Moreover, the burden of tobacco use is not distributed evenly, falling heavily on Oregonians with low incomes, African Americans, Native Americans and Alaska Natives, and those who identify as LGBTQ+. This policy package would establish a strong statewide licensing system for retailers that sell tobacco products and inhalant delivery systems. It would equip OHA-PHD with new tools to educate retailers about tobacco laws, and – critically – to hold tobacco retailers that sell tobacco illegally accountable. Without statewide tobacco retail licensure, Oregon cannot robustly enforce tobacco laws such as the minimum legal sales age. A retail license could make it easier to enforce other tobacco sales laws such as tax collection compliance, counterfeit product sales, and compliance with federal laws (for example, no single cigarette sales or self-service displays of tobacco products).

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$0**	**$2,078,226**	**$0**	**$2,078,226**	**12**	**7.86**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

Tobacco use remains the top preventable cause of death and disability in Oregon and costs the state $2.9 billion each year in medical costs and lost productivity. Addiction to nicotine nearly always starts in adolescence: Nine out of ten adults who smoke started smoking before turning 18. In 2019, 16 percent of Oregon tobacco retailers illegally sold a tobacco product (cigarette, e-cigarette or little cigar/cigarillos) to a person under the age of 21. The rapid increase of e-cigarette use by youth has contributed to the highest overall high school tobacco use rates since the year 2000. Currently 1 in 4 Oregon high schoolers uses e-cigarettes or other vaping products. Keeping these products out of the hands of children has the potential to prevent a generation addicted to nicotine.

In Oregon, there is no state license required to sell tobacco products or inhalant delivery systems (IDS). Without a state license, the state is missing key tools to enforce the tobacco minimum legal sales age and implement other tobacco sales laws that could prevent youth tobacco use. Regional variation in tobacco licensing exists across Oregon. As of February 2020, two counties have fully implemented tobacco licensure policies with license fees sufficient to cover administration and enforcement. In other jurisdictions, the licensing program policies and associated fees are currently insufficient to allow for implementation of the program. This results in regional inequities where children in communities most impacted by highest rates of tobacco use and industry targeting, particularly Native American and Alaska Native, Latino, and rural Oregonians, do not benefit from a basic level of protection provided by Tobacco Retail Licensure (TRL).

Without a state-wide licensure system, state and local governments do not know exactly who is selling tobacco products and IDS. The recent public health emergency E-cigarette or Vaping Associated Lung Injury (EVALI) made clear that the state was unable to fully identify and reach all tobacco retailers in Oregon for immediate education and enforcement of Executive Order 19-09, which enacted a temporary ban on the sale of flavored

vaping products as well as other sources or additives identified in cased of vaping-related lung injury or death. This was a learning opportunity of the value of licensing for effective policy enforcement.

TRL is also a mechanism to hold retail store owners accountable for illegally selling tobacco to underage persons and for breaking other tobacco laws. Currently, most enforcement action for illegal tobacco sales to minors is taken on a store clerk, which means there is little incentive for retail store owners or managers to reduce illegal sales. Retail stores that regularly sell to underaged persons are well known by youth who seek tobacco. These stores become regular sources of tobacco products for youth at risk of nicotine addiction. This complicates enforcement of underage sales inspections and other tobacco retail laws.

2. What would this policy package buy and how and when would it be implemented?

TRL creates a mechanism to hold retail store owners accountable for selling tobacco illegally to underage persons and for breaking other tobacco laws. This policy package requires tobacco and IDS retailers in Oregon to obtain a license. Retailer licensing fees and any civil money penalties for violations cover the cost of administration and enforcement of the license. This includes retailer education and yearly inspections. OHA estimates that there are 4,000 tobacco product and IDS retailers operating brick and mortar locations in the state. The cost of an annual license is estimated to be between $250-$500 and would go into effect on January 1, 2022.

OHA estimates that administration and enforcement of the license would require 11 permanent positions (4 starting September 2021 and 7 starting January 2022) and 1 limited duration position lasting one year (starting September 2021). This estimate assumes OHA conducts enforcement across the entire state. However, the policy package allows for local jurisdictions to opt into responsibility for enforcement of the state law, and OHA expects some counties will take this option. Licensing costs and cost of administration will depend on the

level of enforcement taken on by local jurisdictions. The program estimates $215,817 for initial one-time costs and $1,862,410 in ongoing costs, which would be covered by program fees.

3. How does this policy package further OHA's mission and align with its strategic plan?

Tobacco use remains the top preventable cause of death and disability in Oregon. Addiction to nicotine nearly always often starts in adolescence: nine out of ten adults who smoke started smoking before turning 18. Due to aggressive targeting by the tobacco industry, rates of youth tobacco use are highest among youth who are lower income, Native American, African American, or LGBTQ+. A tobacco retail license would have the greatest benefit for groups targeted by the tobacco industry and would benefit health equity efforts statewide.

This policy package supports OHA's mission by helping prevent youth tobacco addiction and helping create healthier communities throughout Oregon. It provides a foundational expectation that sales to youth will not be tolerated throughout Oregon, including areas unlikely to adopt tobacco retail policies locally. Additionally, this policy package ensures the equitable enforcement of tobacco laws by holding tobacco retailers responsible for ensuring employees have the skills and tools necessary to abide by laws, creating sustainable change in the workplace for low-wage workers.

Tobacco use costs Oregon about $2.9 billion each year in medical costs and lost productivity. Strong TRL coupled with effective enforcement can reduce youth tobacco use, saving the state significant resources; a step toward achieving the health care triple aim. In addition, tobacco retail licensing can be a foundation for state or local retail policies that would further reduce tobacco use.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

Key indicators of success for this policy package include decreased rate of illegal tobacco sales to minors, fewer youth reporting that tobacco and e-cigarettes are easy to get in Oregon, and ultimately, lower rates of youth tobacco use. In 2019, 16 percent of Oregon tobacco retailers made an illegal tobacco sale to an underage person, and violation rates were higher for products popular with youth. One in five tobacco retailers sold e-cigarettes illegally, and one in four sold cigarillos illegally to underage persons. Rates of 11th grade e-cigarette use in Oregon increased 80 percent from 2017 to 2019, from 13 percent to 23percent. Enforcement of a strong tobacco retail license, paired with other tobacco control interventions, are expected to decrease youth tobacco use.

OHA can also measure the success of this policy package by measuring the number of local policies that build on statewide TRL to further decrease youth tobacco use. The Tobacco Prevention and Education Program (TPEP) funds every Local and Tribal Public Health Authority in Oregon to decrease youth tobacco initiation and support individuals who are attempting to quit. Local TPEP programs will be able to build on a state TRL with other interventions to address tobacco retailer density, price promotions, and other interventions that can reduce youth use and improve health equity.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

Yes. The percent of Oregonians living in a jurisdiction requiring tobacco retail licensure is an OHA-PHD Public Health Accountability Metric. This policy package directly relates to this metric as passing a state tobacco retail license would provide 100 percent coverage to all communities in Oregon.

In addition, reduced adult and youth tobacco use, which are long-term desired outcomes for this policy package, are also included in multiple performance indicators for OHA-PHD. This policy package will help achieve the Public Health Accountability Metric to reduce youth and adult tobacco use, address tobacco use as a priority area from the 2015-2020 State Health Improvement Plan, and improve the OHA-PHD's Health Indicators for current cigarette smoking prevalence and cigarette packs sold per capita. Rates of tobacco use among all adults and among Medicaid recipients are OHA Key Performance Measures.

7. What are the long-term desired outcomes?

When used to enforce effective policies, licensing can reduce the number of Oregon children and young adults who become addicted to tobacco, help current tobacco users quit, and reduce health care costs for the State of Oregon.

A strong retail license system creates a straightforward way to track businesses that sell tobacco products and IDS and manage enforcement of tobacco laws, such as the minimum legal sales age of 21. Laws that prohibit sales to underage persons are important but are not enough on their own to keep kids from using tobacco and nicotine products. To prevent youth initiation of tobacco and e-cigarettes, Oregon needs a comprehensive approach that holds retailers accountable for illegal sales. A license provides an expectation of retailers statewide that illegal sales to youth will not be tolerated. This concept sets in motion an effective tool for reducing the number of Oregon children and young adults who become addicted to nicotine.

8. What would be the adverse effects of not funding this policy package?

Historically, the tobacco industry has aggressively marketed tobacco products to specific cultural and ethnic groups. This perpetuates health disparities and disproportionately harms communities of color, resulting in higher rates of disease and death, especially among African Americans. Additionally, rates of youth tobacco use are highest among youth who are lower income, Native American, African American, or LGBTQ+. If

Oregon does not implement a state tobacco retail license, these disparities will continue. This package will help OHA achieve the 10-year strategic goal of eliminating health inequities. Implementing a state license protects all Oregonian youth, including those in rural areas not currently protected by tobacco retail policies.

Oregon is one of only eight states that does not require tobacco retailers to have a license. Without a state tobacco license, there is no official centralized list of active tobacco retailers and no system in place for effective retailer training and outreach. Without statewide tobacco retail licensure, Oregon cannot robustly enforce tobacco laws such as the minimum legal sales age. In addition, a retail license could make it easier to enforce other tobacco sales laws such as tax collection compliance, counterfeit product sales, and compliance with federal laws (for example, no single cigarette sales or self-service displays of tobacco products).

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

Related Tobacco Retailer Licensing concepts were considered by the Oregon Legislature in prior sessions, obtained support, but never fully cleared the legislative process. Most recently, Senate Bill 1577 in the 2020 legislative session gained significant momentum in response to the EVALI and youth vaping crisis. However, the bill stalled with other legislation at the end of the session.

Local momentum has also built in recent years for this policy package. OHA provides grant funding to local public health authorities to work on tobacco prevention and control policies such as TRL.

In the last five years:

a. Five counties and 12 cities have passed TRL policies for their jurisdiction.
b. As of February 2020, two counties have fully implemented their policies with license fees sufficient to cover administration and enforcement. In other jurisdictions, the licensing program policies and associated fees are currently insufficient to allow for implementation of the program.

10. What alternatives were considered and what were the reasons for rejecting them?

OHA has funded local public health authorities for evidence-based tobacco prevention policies, and many are actively pursuing TRL. Still, the pace of protection of youth and communities through adoption of local TRL policies has been slow. This local policy adoption framework results in protections for only a portion of Oregon youth while other youth live in communities with limited regulation of tobacco retailers. In addition, not all local policies adequately fund enforcement. If every jurisdiction created independent local TRL policies of varying strengths, the patchwork of policies could be complicated for retailers, community, and enforcement agencies to navigate and less protective for youth overall.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

Yes. The policy amends current statute through OHA legislative concept 2. The amended policy will apply to both "Tobacco Products" and "Inhalant Delivery Systems (IDS)." Both are defined in Oregon statute and therefore relevant statutes related to taxation of tobacco products, tobacco sales requirements and related issues may need to be revised (ORS 431A.178 and 431A.183; repealing ORS 431A.180).

OHA recommends basing the language for OHA legislative concept 2 on statute language developed **Senate Bill 1577B engrossed from the 2020 legislative session**. Legislative concept 2 would accomplish the following:

- Create a state-wide Tobacco Retailer License (TRL) system whereby any retailer would need to purchase a license for the privilege of selling tobacco or inhalant delivery system products.
- Provide the State with the authority to penalize licensees not operating in compliance and establish a clear graduated system of accountability for retailers that sell illegally to underage persons, including license suspension and possible revocation.
- Allow local jurisdictions the authority to enforce the state TRL requirements, if so desired.
- Simplify enforcement of administrative tax laws and other state and local tobacco regulations.

- Administer TRL fees that would allow for sustainable administration and enforcement of the program by covering regular inspection and enforcement.
- Allow local communities to adopt stronger tobacco retail regulations, if desired.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

The legislative concept allows for local jurisdictions to opt into responsibility for enforcement of the state law and OHA expects some counties will take this option. Tribal lands and sales are sovereign and not affected by this legislation. While several jurisdictions have adopted a local TRL, only two counties are operating fully and have license fees sufficient to enforce the policy. It is likely that cities and counties that adopt a local TRL would develop agreements with the state to determine appropriate local licensing fee and jurisdictional enforcement.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

Department of Revenue and Department of Justice have been consulted and provided feedback on the TRL policy package. Both agencies would play a collaborative role in the enforcement and administration of a statewide Tobacco Retailer License.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

Historically, the tobacco industry has aggressively marketed tobacco products to specific cultural and ethnic groups. This perpetuates health disparities and disproportionately harms communities of color, resulting in

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

higher rates of disease and death, especially among African Americans. Additionally, rates of youth tobacco use are highest among youth who are lower income, Native American, African American, or LGBTQ+. If Oregon does not implement a state tobacco retail license, these disparities will continue. This package will help OHA achieve the 10-year strategic goal of eliminating health inequities. Implementing a state license protects all Oregonian youth, including those in rural areas not currently protected by tobacco retail policies.

Regional variation in tobacco licensing exists across Oregon. As of February 2020, two counties have fully implemented their policies with license fees sufficient to cover administration and enforcement. In other jurisdictions, the licensing program policies and associated fees are currently insufficient to allow for implementation of the program. Children in communities most impacted by highest rates of tobacco use, particularly Native American and Latino Oregonians, do not benefit from a basic level of protection through TRL.

Statewide legislation will promote equity by ensuring that all Oregon children are protected from harmful tobacco products in the retail environment. Retail stores that regularly sell to underaged persons are well known by youth who seek tobacco. These stores become regular sources of tobacco products for youth at risk of nicotine addiction.

Staffing and fiscal impact

Implementation date(s): September 1, 2021

End date (if applicable): Ongoing

15. What assumptions affect the pricing of this policy package?

The pricing of this policy package assumes the state would be responsible for implementing the TRL until we know more about which counties are willing or able to administer their own program. The pricing also assumes the number of tobacco retailers remains constant from past years, irrespective of economic changes, and that the youth sales age violation rate is consistent with current rates. OHA-PHD and the Department of Revenue may also find new retail locations once there is a licensing requirement, but that is not accounted for in this policy package.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

The new responsibilities for OHA would be to set up and operate a program to enforce a retailer licensing program for tobacco product and IDS sales. OHA would provide technical assistance to local public health authorities (LPHA) regarding the regulation of the retail sale of tobacco products and inhalant delivery systems.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

OHA would purchase a license and user access for licensing software with a tobacco module. The software would:

- Include a tobacco retail licensing-specific module.
- Include a list of licensed tobacco and inhalant delivery system retailers (imported and updated from the licensing program at the DOR).
- Provide for entry, tracking and reporting of data collected from annual enforcement inspections for youth purchase programs.

- Provide for entry, tracking and reporting of annual inspections of all tobacco product and IDS retailers for compliance with the licensing program's laws and rules.
- Provide for online citizen complaints regarding compliance with the licensing program's laws and rules or for when a citizen sees a retailer selling without a license.

Licensing fees and penalties collected from tobacco product and inhalant delivery system retailers for licensure would cover the cost of administration, education and enforcement of the licensing program.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

To implement this policy, the following new staff would be required:

3 Inspectors (Compliance Specialist 3) at full-time, who would: conduct licensing requirement inspections in retailers, conduct underage compliance inspection at retailers, oversee student office workers, document inspections and report results. (Hire date January 2022)

3 Student Office Workers at part-time, who would: accompany Compliance Specialists on underage compliance inspections and provide documentation and testimony, as necessary. (Hire date January 2022)

1 Program Manager (Principal Executive/Manager D) at full-time, who would: manage program staff, oversee program development and ongoing support, and manage program budget. (Hire date January 2022)

1 Training coordinator (Program Analyst 2) at full-time, who would: support ongoing technical assistance to local public health authorities and OHA inspection staff, develop training for staff, and train staff for inspections. (Hire date September 2021)

1 Data analyst (Research Analyst 3) at full-time who would: coordinate, analyze and aggregate data collated through the database system, assess the effectiveness of state and local programs for regulating the retail sale of tobacco and IDS products, and create reports. (Hire date September 2021)

1 Policy and program coordinator (Program Analyst 3) at full-time who would: oversee program activities, including development of inspection protocol, training and ongoing support, provide policy direction including required rulemaking, coordinate with Department of Justice, and oversee technical assistance to local public health authorities. (Hire date September 2021)

1 Operations support staff (Administrative Specialist 1) at part-time, who would: provide general support, support hiring and onboarding staff, and provide administrative duties such as mailings to retailers and web support. (Hire date September 2021)

1 Communications Specialist (Program Analyst 3) at for a 1-year limited duration who would: develop materials for educational outreach to retailers and oversee media-related work such as website, print ads and earned media. (Hire date September 2021)

20. What are the start-up and one-time costs?

$0.2 million - For initial costs for setting up the program include hiring and new staff; developing processes and procedures for the program; creating intergovernmental agreements with the Department of Revenue (DOR) and LPHA for data sharing and coordination; purchase of an electronic database system; analyzing and aggregating data; and creating reports. Other initial costs are for communications related expenses including website updates, print ads, earned media, and educational outreach to retailers including mailings.

21. What are the ongoing costs?

$1.7 million - Ongoing costs to implement enforcement include annual sales to underage persons inspections and annual licensing requirement inspections. Licensing requirement inspections also include enforcement of the flavored IDS product ban. To ensure consistent administration and enforcement, OHA expects to conduct 9,200 inspections annually assuming a 15 percent retailer violation rate. Other ongoing costs are for maintenance of the database system (annual renewal), ongoing training costs and legal support from the Department of Justice (DOJ) for the imposition of civil penalties and contested case hearings.

22. What are the potential savings?

There are potential efficiencies in staff time spent on compiling and verifying retailer locations as this process would be greatly simplified through a license requirement. We anticipate this staff time would be reallocated to tobacco prevention and cessation activities.

In the longer term, there may be savings in health care costs and other tobacco-related costs to the state through reductions in tobacco use.

23. What are the sources of funding and the funding split for each one?

OHA estimates $2.1 million Other Funds, 12 positions (7.86 FTE).

Oregon Health Authority
2021-23 Policy Package

Division:	Health Systems Division
Program:	Behavioral Health
Policy package title:	Community Behavioral Health Services
Policy package number:	409
Related legislation:	Legislative Concepts #32 and #34

Summary statement:

Requests funding to implement strategies and recommendations from the Governor's Behavioral Health Advisory Council to improve the behavioral health system for adults and transition-aged youth who experience serious mental illness and co-occurring substance use disorders.

- Funds community-based services and supports to stabilize housing, increase access to peer delivered services, continue Oregon's Certified Community Behavioral Health Clinics, and build capacity.
- Creates a fund for provider and student incentives to build Oregon's behavioral health workforce in underserved communities.
- Expands housing services and supports to grow Oregon's supportive housing pool and help individuals stay housed.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$99,733,070**	**$0**	**$94,771,895**	**$194,504,965**	**8**	**6.13**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

Oregon's fragmented behavioral health systems inadequately address the unique needs of Oregonians with serious and complex behavioral health conditions. This has led to high rates of serious mental illness, substance use disorders and suicides.

- People with behavioral health challenges have untreated physical health conditions, resulting in an average life expectancy for people with serious mental illness that is 20 years less than those without.
- There are insufficient community supports available to those who seek behavioral health care but do not desire or require a hospital or emergency department level of intervention.
- Some individuals are uncomfortable and will not seek treatment with traditional clinical facilities due to unmet cultural needs, systemic racism, or historical trauma related to health care.
- There is a statewide workforce shortage for all behavioral health provider types, including Traditional Health Workers, licensed and unlicensed providers, and prescribers.

These circumstances leave many Oregonians unwilling or unable to access care until they reach a crisis point, sometimes requiring intervention by law enforcement, crisis response teams, or hospital emergency departments.

Executive Order 19-06, issued by Governor Kate Brown on October 18, 2019, established the Behavioral Health Advisory Council to form strategies and recommendations to improve the behavioral health system for adults and transition-age youth (ages 14 to 25) who experience serious mental illness and co-occurring substance use disorders. The recommendations include concrete actions, policies and potential investments needed to preserve and improve services and supports in Oregon's behavioral health system.

Oregon Health Authority: 2021-23 Policy Package

OHA proposes this policy package to stabilize the current system and address existing issues with capacity and consistency in services across the state. Specifically, this policy package would:

- Fund the three priority areas identified by the council:
  - Behavioral health programs and services: Expand capacity of person-centered, community-based behavioral health care in Oregon.
  - Behavioral health workforce: Make investments to develop a robust behavioral health workforce address health inequities.
  - Housing: Make investments to expand and sustain Oregon's housing supply and provide supports to help individuals access housing and stay housed.
- Enhance services to transition-age youth and young adults using strategies and supports identified through youth engagement in the policy development process. Best practice models are:
  - Community-based, holistic, non-stigmatizing and culturally relevant.
  - Include longer engagement periods, flexibility in programming, integrated use of technology, a strong focus on independent living skills, and an integrated multi-system approach with housing, employment and education support.
  - Include robust peer support and holistic care team relationships.
  - Tailored to the developmental needs of young adults.
  - Integrated between the various state agencies and behavioral health systems.

In addition to addressing the systemic changes required to support preventive, responsive, community-based care throughout Oregon, OHA proposes this policy package to address the issues described below that contribute a significant negative impact to the behavioral health of underserved populations.

Youth and Young Adults

Young adults in transition (ages 14 to 25) are underserved across the continuum of care. They are also at a developmentally unique time in their lives with significant social, emotional, physical, and cognitive changes

taking place. Due to significant differences across the state in access and service availability, many young people are at high risk of failed transition into independent adulthood. Research shows that young adults in transition have high rates of serious mental health concerns with the lowest rates of engagement in mental health services. Furthermore, many young adults previously engaged as children (age 0-18) in the behavioral health system disengage during the transition to the adult behavioral health system. Some studies show disengagement rates as high as 80 percent.

Oregon's current behavioral health system is not sufficiently equipped to respond to the unique developmental needs of this demographic, or to provide timely treatment for youth at recommended levels of care. Oregon has seven Residential Treatment Homes (RTH) with a total of 34 beds that serve this population. Between February 2019 and February 2020, OHA received more than 125 referrals to these homes. This is far more referrals than the current residential system can support. Three Oregon counties provide intensive services to this population, and each county can only support 35 to 40 young people at any one time. Eight counties are served by four Young Adult Hubs, regionally unique programs designed to engage marginalized and disconnected young adults with mental health services, skill building, and occupational support. During the 2017-19 biennium, on average, these programs served 380 young people per quarter. Oregon youth experience delays in accessing all levels of care.

Over the past five years, Oregon has seen a decrease in mental health residential and subacute beds, including at the Psychiatric Residential Treatment Facility (PRTF) level of care[1], which serves ages 6 to 18. Oregon has three types of licensed PRTF facilities, including Psychiatric Residential Treatment Services (PRTS) facilities. In 2019, OHA and DHS performed a joint capacity study that indicated Oregon needs an additional 47 beds at the PRTS level of care to support children with intense mental health needs. Approximately 245,000 children

[1] PRTF is a federal designation of services offered at a non-hospital facility that is accredited by a national accreditation agency such as the Joint Commission on Accreditation of Healthcare Organizations (JAHCO) and the Commission on Accreditation of Rehabilitation Facilities (CARF), directed by a physician, and provides active treatment that is likely to benefit a youth. *42 CFR 441.151 through 42 CFR 441.182.*

and youth in this age group are covered by the Oregon Health Plan (OHP) at any point in time, which equates to 0.6 beds of PRTS capacity for every 1,000 children on OHP. OHP coordinated care organizations (CCOs) must cover PRTS as a required element of the CCO benefit package. This means CCOs must demonstrate that the services, or some equivalent substitute, are available for all who need it as demonstrated by federal medical criteria. Among in-state PRTS providers who contract with commercial insurance carriers and OHP CCOs, OHA estimates that 25 percent of PRTS beds are occupied by children on commercial insurance and the remaining 75 percent are occupied by children on OHP (of which roughly 20 percent are children in the child welfare system)[2].

Housing

When adults and transition age youth with serious mental illness are unhoused or reside in settings that do not provide adequate supports, they are less likely to access treatment and experience stability, and more likely to be court-involved. The effects of Oregon's affordable housing shortage are widespread, but there is a disproportionate impact on those experiencing serious mental illness, who already have other significant barriers to stability. Barriers to culturally and age-appropriate housing and residential settings also disproportionately affect adults and transition-age youth with serious mental illness. The system should adapt services to stabilize individuals in their chosen residential setting. The intensity of services should adjust to meet individual's needs, including support options that do not currently exist in Oregon's system.

2. What would this policy package buy and how and when would it be implemented?

Behavioral health system priorities

Component 1: Peer Respite Care
Component 2: Certified Community Behavioral Health Clinic (CCBHC Program)
Component 3: Staffing to implement the Alcohol and Drug Policy Commission (ADPC) Strategic Plan

[2] These numbers do not reflect children served in out-of-state PRTS programs.

Component 4: Increased Medicaid funding to support underserved populations
Component 5: Workforce development and retention in underserved communities
Component 6: Housing services and supports to provide stability and reduce ED and criminal justice involvement

Youth and young adult supports
Component 7: Center for Training and Technical Assistance
Component 8: Expand Young Adult in Transition Residential System
Component 9: Develop Psychiatric Residential Treatment Services Capacity
Component 10: Expand Early Assessment and Support Alliance (EASA) program
Component 11: Expand Young Adult Hubs

Expanding community-based programs and services

Component 1: Peer Respite Care:
Peer-run respite centers provide culturally informed, voluntary, short-term support in a home-like setting to adults who are experiencing acute mental health or emotional distress. OHA would use $2.9 million General Fund to implement and pilot three non-clinical peer-run respite centers, including a culturally specific program designed to provide services and supports to individuals who are Black, Indigenous, or Persons of Color (Tribal Communities and Communities of Color). These pilot centers would be operated by contracted peer run organizations and staffed by state-certified Peer Support Specialists or Peer Wellness Specialists. Using data gathered from this pilot program and model best practices, OHA would design program fidelity and evaluation standards, provide oversight and technical assistance to pilot sites, and help programs develop strategies for recruitment and retention of a culturally diverse workforce.

Component 2: Certified Community Behavioral Health Clinic (CCBHC Program):
CCBHCs provide access to a quality set of comprehensive and integrated services through a flexible and prospective payment system (PPS) like Federally Qualified Health Centers. Oregon participated in the federal

CCBHC demonstration, where CCBHCs received an increase by over ten percent of federal match, but the enhanced rate was slated to end with the federal demonstration but was extended to November 2020. When the federal demonstration ended, OHA requested, but did not receive the additional General Fund needed to continue this program; however, nine counties agreed to use a portion of the mental health funding they receive from the state to continue funding their local CCBHCs.

OHA would use $31 million General Fund to establish a statewide CCBHC program, increasing access for 25,500 clients who are part of highly vulnerable populations and maximize federal resources for safety net providers in a time of potential financial uncertainty due to COVID-19. State funds would leverage Medicaid match to:

- Resume PPS reimbursement for 12 CCBHCs.
- Further define service array and certification standards.
- Evaluate local CCBHC models to inform best practices and certification standards.

The program would certify clinics based on standards for data measurement and collection, meaningful use EHR requirement, staffing levels, quality, and ability to deliver a comprehensive set of services. These standards would:

- Further define the extent to which services would be available in certified sites.
- Potentially establish additional service requirements, including defining trauma-informed and culturally responsive practice and ensuring intensive coordinated case management for adult.
- Align with Behavioral Health Home quality tiering.

Behavioral health consumers and peer delivered service providers would be engaged in the development and delivery of all pieces of the service array, which includes the seven services required under the federal CCBHC demonstration and the nine service standards required by Oregon's program (including staff cultural competency training and language interpretation).

Component 3: Staffing to implement the Alcohol and Drug Policy Commission (ADPC) Strategic Plan:
The 2020-2025 ADPC Strategic Plan identifies several priority strategies and activities to address the primary structural and other factors that have impeded Oregon's ability to prevent, treat, and help its people recover from substance misuse and SUDs. The plan's goals include:

- Implement a statewide system that ensures that substance misuse policies, practices, investments, and efforts are effective and result in healthy and thriving individuals and communities.
- Increase the impact of substance misuse prevention strategies across the lifespan.
- Increase rapid access to effective SUD treatment across the lifespan.
- Increase access to recovery supports across the lifespan.

Implementing the plan is a vital step in moving toward a full continuum of care in Oregon's behavioral health system. To do this, this policy package requests $0.2 million General Fund and position authority for an ADPC Inventory and Implementation Project Director (OPA 4) and an ADPC Inventory and Implementation Coordinator (OPA 3).

The two positions would focus on the ADPC work and support OHA efforts to align funding sources and task forces with the ADPC Strategic Plan approved by the Governor. Work would include providing funding, guidance, technical assistance, and development support to the substance use disorder continuum of care.

Component 4: Increased Medicaid funding to support underserved populations
This component includes dedicated funding for fee-for-service Medicaid reimbursement of behavioral health services to underserved populations:

- $10.1 million for integrated treatment of co-occurring disorders: Mental health and substance abuse treatment services are provided separately throughout much of the state, in many cases using separate funding streams. As a result, individuals must navigate both systems and may not receive adequate care. Some of these services are currently billable for people with a mental health diagnosis but not for people with substance use disorder. Others pay a lower rate for substance use disorder treatment for similar

services provided by clinicians with similar credentials. To encourage an integrated care model and address financial barriers to treatment, funds would cover reimbursement at an enhanced rate for services provided to treat co-occurring MH and SUD disorders. The enhanced rate would be effective July 1, 2022, upon federal approval of amending Oregon's Medicaid State Plan to add treatment of co-occurring disorder as a covered benefit.

- $0.5 million to fund services provided by tribal-based practices and fund support for Tribal Behavioral Health Workforce.

Component 5: Workforce development and retention in underserved communities

The behavioral health workforce shortage impacts Oregon's ability to address health inequities. American Indian/Alaska Native populations have higher rates of substance use disorder, post-traumatic stress disorder, and suicide. The Black community has higher rates of anxiety and depression coupled with lack of access to appropriate and culturally responsive behavioral health care. To increase the number of Tribal Communities and Communities of Color in the behavioral health workforce, OHA would use $10.2 million General Fund to develop a robust incentive fund to:

- Pay for Bachelor's and Master's level education, certification and/or licensure in behavioral health fields.
- Increase loan repayment and forgiveness opportunities for providers in communities with workforce shortages.
- Offer retention bonuses post-graduation and post-licensure.
- Provide other incentives, including but not limited to housing assistance and tax credits; sign-on bonuses; part-time and flextime; professional development and professional satisfaction initiatives to prevent burnout; and childcare.

This would help OHA reach the goal of having a workforce across Oregon that better reflects the population it serves. To ensure equitable distribution of these funds, OHA and its Office of Equity and Inclusion will partner with Oregon's Federally Recognized Tribes, Tribal Communities and Communities of Color communities, and key stakeholders.

Component 6: Housing services and supports to provide stability and reduce ED and criminal justice involvement

For individuals with serious and persistent mental illness (SPMI), lack of stable and supportive housing has increased ED utilization and involvement in criminal justice systems. To curb this effect, OHA would use $15 million General Fund to increase access to culturally appropriate, stable, and supportive housing and supports through the following avenues:

- $5.7 million for low-barrier, tenant-based rental assistance. This assistance can be paired with supportive services to break the cycle of homelessness, hospitalization, commitment and criminalization that so many Oregonians with serious mental illness face.
- $0.9 million for services to help individuals with serious mental illness overcome other barriers to accessing housing, such as paying utility bills or security deposits. Because private landlords often perceive clients with serious mental illness as high-risk, two funds would mitigate this risk:
    - A barrier removal fund administered by the service provider, for client expenses such as deposits, utility bills and past debts that compromise housing stability.
    - A building improvement fund to reimburse landlords for repairs above and beyond usual wear and tear associated with client action.
- $0.2 million for ongoing needs assessment. Currently OHA's systems do not allow for accurate assessment of statewide needs across residential placement types. OHA would conduct ongoing needs assessments and coordination across multiple systems.
- $5.5 million for renovation of existing facilities and homes to increase the inventory of available residential placements across the continuum for individuals with serious mental illness. Residential facilities across the state require system improvements and renovations to respond to specific needs of the populations they serve. These can be improvements to provide additional security, or capital improvements to add beds.
- $2.5 million to expand supportive services through the Mobile Permanent Supportive/Supported Housing (PSH) team model. This model provides person-centered housing and behavioral health services that

individuals can access even while traveling through multiple housing scenarios providing continuity and crisis mitigation when needed. The model currently serves individuals in supportive housing, residential and less traditional congregate settings. OHA's expansion of this service model would:

- Serve all residential and housing situations for individuals with SPMI.
- Integrate adult peer support/peer wellness specialists and youth support specialists into the multidisciplinary PSH team to allow for cultural agility and ongoing support.
- Support a 15:2 client-to-staff ratio, with multiple community-based teams focused on providing both ongoing supportive services and crisis management support. Services include:
  - Peer support services with a housing navigation focus.
  - Case management to provide continuity and stabilization.
  - Licensed mental health support in collaboration with local mental health programming to provide seamless connection to crisis support and more intensive services when needed.

Youth and young adult supports

To increase capacity and supports for youth and young adults across Oregon's behavioral health system, OHA is requesting $30 million General Fund for the following components:

Component 7: Center for Training and Technical Assistance:

$1 million would fund the development of a solid network of services that spans state agencies and health systems. The center would provide:

- Practice guidelines for Hub programs across the state based on up-to-date evidence-based practices that are developmentally appropriate and culturally relevant.
- Effective data outcome measures and technical assistance in the collection of data.
- Technical assistance for programs that serve youth, young adults, and their families.
- Technical assistance the development of trainings for providers outside the behavioral health system that work with youth, young adults, and their families.

- Continued assessment of best practices.
- Coalition building with all youth and young adult serving programs, including across state agencies.
- Recommendations for programs that are culturally specific.

The Center would be implemented through a request for proposal (RFP) process. It is anticipated that it would take approximately 12 months for the RFP and contracting process to be completed with a plan for the center to open late summer to fall 2022.

Component 8: Expand Young Adult in Transition Residential System:
OHA would use $9.1 million to:

- Provide $5.3 million in one-time startup and development funding to add four 5-bed Residential Treatment Homes (RTH) and one 10-bed Secure Residential Treatment Facility (SRTF) to serve Oregon's young adult population (ages 17.5 to 25), increasing capacity by 30 beds, and
- Add $2.9 million for fee-for-service Medicaid reimbursement and $880,000 for General Fund only reimbursement of YAT residential services.

The RTHs would provide the same services and supports Oregon's current seven homes provide, including but not limited to 24-hour supervision and support; access to therapy and medication management; skill development; access to supported education and employment; recreational and social activities. Skill development would focus on:

- Self-managing emotions and mental health symptoms
- Money and household management
- Nutrition and physical health needs
- Personal hygiene, clothing care, and grooming
- Communication skills for social, health care, and community resources

The SRTF would provide the same services in a secure facility to support more acute referrals that the RTH setting cannot adequately support.

Ongoing costs to support these additional facilities would include:

- Medicaid reimbursement for monthly standardized rate service payments, and daily to weekly rehabilitation needs such as therapy, skills training, and medication management for Medicaid-eligible residents.
- Non-Medicaid reimbursement for services and supports such as Person Incidental Funds and Room and Board for those with no income, and service payments for residents not eligible for Medicaid or commercial insurance.

OHA would implement this expansion through a request for proposal process and would consider location when awarding the contract to expand accessibility to underserved or unserved areas and help young people stay closer to their support networks. OHA anticipates a 15- to 24-month implementation timeline with 6 to 12 months for the RFP and contract process, and 9 to 12 months for building construction and/or renovation. The new homes would be available for services no sooner than late 2022.

Component 9: Develop Psychiatric Residential Treatment Services Capacity:
OHA would use $7.5 million for:

- Ongoing support and capacity infrastructure to sustain a comprehensive continuum of care for children's mental health with a focus on intensive inpatient and residential programs.
- Addressing immediate PRTS capacity shortages by adding 47 new PRTS beds in the 2021-23 biennium and remaining capacity needs in future biennia. In 2021-23, OHA would use a request for proposals process to shape expectations for the new beds, and work with Oregon providers to develop smaller therapeutic settings with an average length of stay of 10 to 12 weeks. The beds would serve approximately 200 children with complex behavioral health needs per year. In future biennia, funds would be used to

augment, upgrade, and maintain existing PRTS capacity to create environments that are trauma informed, support positive outcomes (e.g., reduction in restraints and seclusions), and improve the quality of treatment.

Component 10: Expand Early Assessment and Support Alliance (EASA) program:
The EASA program provides statewide, systematic early psychosis intervention for adolescents and young adults (ages 14 to 25). EASA is a two-year, team-based program that follows a common set of practices based on international and national research. EASA programs are in 35 counties and serve 250 youth. OHA would use $9.2 million to:

- Fund a third year of step-down services to help young people successfully transition from the EASA program. Services would include access to a strengthened peer support component, and enhanced life and self-care elements. ($7.5 million)
- Expand program funding for community outreach, engagement, and education, which are necessary components to reach the target population (including translation and cultural adaptation of engagement and outreach approaches). ($1.3 million for local program staffing, $0.25 million for translation, marketing and campaigning services)
- Fund a vendor contract for one position to provide centralized coordination, message development, and staff training and funding for locally based outreach, engagement and evaluation (staffing, marketing, online materials). Local evaluation would be key to helping understanding barriers to model fidelity. OHA would also consult with tribes and Urban Indian Health programs to support culturally responsive, team-based service for early psychosis interventions in tribal communities. ($0.15 million)

OHA would implement this expansion by adding funding and amending current County Financial Assistance Agreements. This process would take 3 to 6 months to complete, with new expanded services starting with the 2022 contract year.

Component 11: Expand Young Adult Hubs:
OHA would use $3.2 million to expand the Young Adult Hub programs from four Hubs to a Hub in every county. Modeled after the Transition to Independence Process (TIP) model, Hub programs allow young adults who are uninsured, under-insured, or privately insured access to these developmentally responsive programs.

Hub programs are tailored to specific sites and can include the following services:

- Mental health support services
- Case management
- Skills training
- Peer support services
- Educational support services
- Employment support services
- Housing support services

OHA would implement this expansion by adding funding and amending current CFAAs. This process would take 3 to 6 months to complete, with new expanded services starting with the 2022 contract year.

3. How does this policy package further OHA's mission and align with its strategic plan?

To further OHA's mission to ensure that all people and communities can achieve optimum physical, mental, and social well-being through partnerships, prevention, and access to quality, affordable health care, this policy package:

- Ensures all Oregon communities have capacity to upstream programs that offer community-based behavioral health care and manage crisis situations to prevent unnecessary ED or justice involvement.
- Corrects inequities in Oregon's current residential treatment capacity for children and young adults.
- Increases funding to providers in underserved populations.
- Helps to build a culturally diverse behavioral health workforce.
- Establishes quality standards through the CCBHC program and Center for Training and Technical Assistance for adult and youth programs.

Each requested investment in this policy package furthers and builds on the last five years of behavioral health work group, task force, and committee recommendations, including:

- The 2015-2018 Behavioral Health Strategic Plan.
- The ADPC Strategic Plan.
- Behavioral Health Collaborative Recommendations.
- The Farley Center workforce report and recommendations.
- The Oregon Native American Behavioral Health Collaborative's[3] 2019 Tribal Behavioral Health Strategic Plan.
- The goals, principles and recommendations of the Governor's Behavioral Health Advisory Council.

Disjointed and siloed behavioral health systems disproportionately impact communities of color, the tribes and AI/AN population, non-English speakers, people who are unhoused, persons with disabilities, and LGBTQ+ communities. Complex access points are exacerbated by a lack of culturally responsive services and representative providers, historical trauma related to health care, and implicit bias. To help achieve OHA's health equity goals, the programs and services in this policy package are designed to address these disparities.

- The CCBHC and peer respite models seek to provide culturally and linguistically responsive services, regardless of one's ability to pay.
- Peer services, such as peer respite and those offered in the multidisciplinary PHS support service model, can help individuals overcome fear and stigma with traditional clinic-based services by meeting people where they are and helping them to avoid crisis.
- The Workforce Incentive Fund would incentivize the recruitment and retention of providers from Tribal Communities and Communities of Color communities and those who are culturally and linguistically responsive to the communities they serve, including rural residents, people from historically disadvantaged backgrounds, and Tribal Communities and Communities of Color.

[3] The Oregon Native American Behavioral Health Collaborative includes representatives from Oregon's nine federally recognized tribes, the Native American Rehabilitation Association, the Northwest Portland Area Indian Health Board, the Oregon Health Authority and the Oregon Department of Human Services Tribal Affairs.

- Promoting behavioral health care access through Tribal Based Practices and Traditional Health Workers (Peer Support Specialists, Peer Wellness Specialists and Youth Support Specialists) would further increase support for culturally responsive care in tribal communities (see more in question 7).

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

This proposal describes many items related to youth, young adults, community services and the behavioral health workforce. The items in this policy option package can be grouped into three categories:

1. Expansion of services to increase the number of persons served (capacity).
2. Providing funds for strategic plans.
3. Improving the service infrastructure.

Each of the proposed items can be measured through assessment of one or more relevant criteria:

a) Establishing well-defined milestones, deliverables and target dates in a clear implementation plan.
b) Measuring increased capacity.
c) Documented outcomes for individuals and/or improvement in the service delivery infrastructure.

The table below identifies the type of measures for each policy option item. In general milestones would be reported in the first year of funding, capacity increases in the second year and outcomes in the third.

Oregon Health Authority: 2021-23 Policy Package

Policy package component	Milestones-Y1	Capacity-Y2	Outcomes-Y3
Center for training and technical assistance for youth and young adult behavioral health	X	X	X
Expand Young Adult in Transition residential system	X	X	
Develop Psychiatric Residential Treatment Services capacity	X	X	
Expand EASA program	X	X	X
Expand Young Adult Hubs	X	X

State Certified Community Behavioral Health Clinics	X	X	X
Fund components of the Tribal Behavioral Health Strategic plan	X	X	X
Implement the ADPC strategic plan	X		
Payment methodology to fund treatment of SUD/MH	X		
Incentive fund for behavioral health workforce	X	X	X
Expand mobile permanent supportive, supported housing team model	X	X	
Tenant based rental assistance	X		
Barrier removal	X		
Ongoing needs assessment	X		
Renovation funds for residential living	X		

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

The behavioral health system investments requested in this package support the following KPMs:

1. **Initiation of alcohol and other drug dependence treatment** - Percentage of members with a new episode of alcohol or other drug dependence who received initiation of AOD treatment within 14 days of diagnosis.
2. **Engagement of alcohol and other drug dependence treatment -** Percentage of members with a new episode of alcohol or other drug dependence who received two or more services within 30 days of initiation visit.
3. **Follow-up after hospitalization for mental illness** - Percentage of enrollees 6 years of age and older who were hospitalized for treatment of mental health disorders and who were seen on an outpatient basis or were in intermediate treatment within seven days of discharge.
4. **Mental, physical, and dental health assessments for children in ODHS custody** - Percentage of children in ODHS custody who receive a mental, physical, and dental health assessment within 60 days of the state notifying CCOs that the children were placed into custody with ODHS (foster care).
5. **Follow-up care for children prescribed with ADHD medication (initiation)** - Percentage of children newly prescribed attention-deficit/hyperactivity disorder (ADHD) medication who had at least three follow-up care visits within a 10-month period, one of which was within 30 days of when the first ADHD medication was dispensed
6. **Follow-up care for children prescribed with ADHD medication (continuation and maintenance)** - Percentage of children newly prescribed attention-deficit/hyperactivity disorder (ADHD) medication who had at least three follow-up care visits within a 10-month period, one of which was within 30 days of when the first ADHD medication was dispensed
7. **30-day illicit drug use among 6th graders** - Percentage of 6th graders who have used illicit drugs in the past 30 days.

8. **30-day alcohol use among 6th graders** - Percentage of 6th graders who have used alcohol in the past 30 days.
9. **30-day illicit drug use among 8th graders** - Percentage of 8th graders who have used illicit drugs in the past 30 days.
10. **30-day alcohol use among 8th graders** - Percentage of 8th graders who have used alcohol in the past 30 days.
11. **30-day illicit drug use among 11th graders** - Percentage of 11th graders who have used illicit drugs in the past 30 days.
12. **30-day alcohol use among 11th graders** - Percentage of 11th graders who have used alcohol in the past 30 days.
23. **Rate of tobacco use (population)** - Rate of tobacco use among adults.
24. **Rate of tobacco use (Medicaid)** - Percentage of CCO enrollees who currently smoke cigarettes or use tobacco every day or some days.

7. What are the long-term desired outcomes?

These proposals are aimed at improving behavioral health services for people in Oregon by expanding services, increasing the workforce and improving access to housing.

For youth and young adults, the policy package aims to improve the mental, social, and emotional wellbeing of youth and young adults across Oregon by increasing youth-oriented behavioral health service capacity, sustaining youth engagement with the behavioral health system as they transition from childhood to adulthood, and promoting the skills needed for independent living, stable housing and employment.

- The training and technical assistance would help create and operationalize best practice approaches for serving this population and increase Oregon's capacity to provide developmentally responsive behavioral health services regardless of insurance status.

- Increased residential treatment capacity would significantly decrease the wait time for accessing needed services. Timely access to care would in turn decrease the use of higher levels of care, including acute psychiatric units and the Oregon State Hospital, as well as decrease the risk of encounters with the criminal justice system and homelessness.
- Increased PRTS capacity also ensures timely access to quality, appropriate care in Oregon, with continued family supports.
- Equitable access to the right service at the right time for the right duration.

This policy package creates lower cost, person-centered, trauma-informed, and culturally responsive alternatives to emergency room visits or hospitalization for individuals experiencing mental or emotional distress.

- For individuals who do not need a hospital level or emergency department level of support, the peer-run respite concept would fill a gap in the continuum of care for adults who are not comfortable engaging services in traditional treatment settings.
- Funding, technical assistance, training, and education for meaningful and responsive tribal-based services would provide greater sustainability and integration of tribal/urban care providers in the state's behavioral health transformation efforts.
- Behavioral health workforce incentives and investments will build a culturally responsive workforce that encourages Tribal Communities and Communities of Color and other underserved populations to access behavioral health care in their local communities.
- Housing investments and upstream supportive services would improve stability, decrease emergency department utilization, and decrease encounters with the criminal justice system. Better access to culturally appropriate, stable, and supportive housing would increase the use of appropriate and preventive care. It would also shorten hospital stays both in community hospitals and the Oregon State Hospital by addressing the "log jam" effect that exists across the continuum of care.

8. What would be the adverse effects of not funding this policy package?

Not funding this policy package would maintain the status quo for behavioral health in Oregon.

- Youth and young adults would continue to experience insufficient access to quality behavioral health care.
- Implementation of the Tribal Strategic Plan and the ADPC would be at risk.
- Oregon's CCBHC program would end due to lack of funding. This would result in job loss and ending services for some of our most vulnerable populations.
- The behavioral health workforce shortage would continue.
- Shortages of stable and affordable housing would remain. People experiencing homelessness, who are more likely to have underlying health conditions, would remain highly vulnerable to COVID-19 exposure and infection because shelters and congregate settings would continue to struggle with physical distancing measures.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

To support services to Youth and Young Adults, OHA activities include:

- Funding two sites through a SAMHSA Healthy Transitions grant through September 2023. The two sites focus on engagement and serving youth and young adults, especially those who are marginalized and/or disconnected from services. The grant also funds a statewide steering committee and three sub-groups focusing on coordination and collaboration, data and evaluation, and youth and young adult voice. There is no funding to carry on this work after this grant ends.
- Residential rate standardization: To make residential payments equitable across Oregon, OHA moved RTH funding to a Medicaid-funded standardized rate model. OHA has encouraged existing providers to open additional service locations, but they would need additional funds for development. OHA also analyzed existing funds for capacity building, but funding is not currently available to establish additional capacity at this level of care.

- PRTS beds: Twenty-five beds are currently in development through Mental Health Block Grant funding. As of May 2020, seven additional beds have been added. OHA has drafted an RFP to post as funds are identified.
- Youth Hubs: Four regionally unique Young Adult Hubs were started as a pilot project to engage marginalized and disconnected youth and young adults through developmentally responsive services regardless of insurance status. Funding is not currently available to expand capacity for this level of care.

To help build community-based behavioral health programs and services, OHA activities include CCBHC implementation, the Tribal Behavioral Health Strategic Plan, the Alcohol and Drug Policy Commission (ADPC) Strategic Plan, a behavioral health workforce recruitment and retention plan, and supportive/supported housing.

CCBHC implementation: Since their inception in April 2017, Oregon CCBHCs have served a growing, highly complex patient population and provided comprehensive, community-based care. CCBHCs have made significant additions to the services and behavioral health workforce at their sites and made progress in adopting electronic health records and telehealth technology (a particularly useful program feature during COVID-19). The CCBHC demonstration program has increased federal financial participation in Oregon's behavioral health services through an enhanced federal match, which was temporarily increased with the passage of 2020 CARES Act. However, General Fund resources for the program's state Medicaid match lapsed in July 2019. The program was continued by leveraging local matching funds through February 2020. There was proposed legislation during the 2020 short session, but there was not action taken on the legislation and no state matching funds were allocated.

Tribal Behavioral Health Strategic Plan: The plan is in various stages of implementation. For example, Senate Bill 134 (2019) authorized OHA to develop uniform contracting standards that accept and consider tribal-based practice for mental health and substance use prevention, counseling and treatment as equivalent to evidence-based practices. The bill also allows for Medicaid coverage, subject to approval by the Centers for

Medicare and Medicaid Services (CMS), of "tribal-based practices for mental health and substance abuse prevention, counseling, and treatment services for members who are Native American or Alaska Native as equivalent to evidence-based practice for purposes of meeting standards of care and shall reimburse for those tribal-based practices." However, additional funding is necessary to fully implement all provisions of the bill.

Alcohol and Drug Policy Commission (ADPC) Strategic Plan: The 2019 and 2020 legislative sessions directed OHA and the ADPC to complete a statewide inventory of substance use disorder services across the continuum of care and implement a strategic plan. While the ADPC completed its strategic plan in February 2020, the work to implement the plan requires at least five to six years, and a full-time position to complete the objectives and timelines established by the Governor and the Legislature.

Behavioral Health Workforce: Oregon completed an analysis of the current behavioral health workforce and developed a recruitment and retention strategy. The analysis detailed a shortage of behavioral health workforce by all provider types throughout the state, with a maldistribution between urban and rural regions. The recruitment and retention plan focused increasing the workforce, including ensuring a diverse workforce and expanded language access, training and curriculum recommendations to ensure a qualified workforce, and strategies to retain the workforce such as loan repayment and increased wages.

Housing: OHA supports two models of Supportive/Supported Housing within Oregon's continuum of care: Project-Based Supportive Housing that embeds supports within place-based housing models, and Supported Housing, a tenant-based Housing Supports tied to Rental Assistance Dollars. These models are often not fluid or flexible enough to allow for clients to find and maintain stable housing in environments not directly linked to such programs or facilities.

10. What alternatives were considered and what were the reasons for rejecting them?

OHA has been working with partners and stakeholders to identify options for many years. This policy package was developed by looking at national standards and best practices. OHA worked closely with the Governor's Behavioral Health Advisory Council, which considered several alternative policy and funding proposals. This proposal represents ideas that emerged as front runners in group deliberations.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

OHA has put forward Legislative Concepts #32 and #34 as placeholders for the Governor's Behavioral Health Advisory Council and treatment of co-occurring disorders.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Tribes would benefit from the new programs, technical assistance, workforce incentives and service delivery models offered in this policy package. The peer-run respite centers, CCBHCs, increased participation by peers in service delivery models, and the Workforce Inventive Fund each address the need for culturally responsive care in underserved and Tribal Communities and Communities of Color communities. The increased Medicaid funding for tribal health practices also supports the 2019 Tribal Behavioral Health Strategic Plan.

13. What other agencies, programs or stakeholders are collaborating on this policy package? The Governor's Behavioral Health Advisory Council was instrumental in informing this policy package. The 47-member council represents a broad range of perspectives and experiences in Oregon's behavioral health system, including CCOs, CCBHCs, Community Mental Health Programs, state legislators, MDs, judges, sheriffs, consumers, advocates for Tribal Communities and Communities of Color communities and tribal leaders. The council also invited consumers to participate in and inform the development of policies.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[4] or equitable health outcomes?

The Governor's Behavioral Health Advisory Council adopted OHA's Health Equity Statement as their overall vision of health equity in behavioral health and supported principles that strive for a behavioral health system that is simpler to access, more responsive to individuals' needs, and produces more meaningful outcomes. Furthermore, these proposals attempt to support the behavioral health system given the impacts of COVID-19. Underlying health conditions, homelessness, and inconsistent access to the health system leave many with behavioral health issues particularly vulnerable to the health and health system impacts of COVID-19. What's more, social isolation and financial instability could trigger worsening symptoms or crises.

Staffing and fiscal impact

Implementation date(s): Various, see specific component

End date (if applicable): Various, see specific component

15. What assumptions affect the pricing of this policy package?

Component #1 Peer Respite Care: Assumes legislative approval to continue the program in 2021-23 for the 18 months priced for House Bill 2831 (2019).

Component #2 CCBHC Program: Population served and dollars spent, remain the same[5] (approximately 25,000 individuals), with the cost of clinic payments adjusted each year using the Medicare Economic Index

[4] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.
[5] Service population and costs are based on 12 months of fee-for-service (FFS) billing to OHA by the 12 participating clinics, 2017-2019 PPS wraparound payments issued during the demonstration period (April 2017-June 2019), and one CCBHC clinic, Symmetry's report of FFS dollars spent during the demonstration period.

(MEI) of 1.5 percent a year, and assuming the standard Federal Medical Assistance Percentage (FMAP) rate for 2021-23 as published March 2020.

Component #4 Increased Medicaid funding to support underserved communities: Assumed 10 percent of all 2019 OHP fee-for-service outpatient behavioral health claims were for services through Tribes and NARA, and this would remain consistent in 2021-23. For non-Medicaid services, 15 percent would be General Fund for Tribal claims and 51 percent would be General Fund for NARA claims. Claim costs assume MEI of 1.9 percent from 2020-2023, and a 5 percent increase in utilization of Tribal-based practices from 2020-2023.

Component #5 Workforce development and retention in underserved communities: Work would be performed by OHA's Primary Care Office.

Component #6 Housing services and supports: Caps the population served at 300 per month, at a cost of $953 per month for rental assistance, $445 per month for supportive services, and $3,000 per month for barrier removal funds.

- Rental Assistance: assumes monthly rental $1,132 at highest, $775 at lowest for an average cost of $953 for 300 clients each month.
- Supportive Services: Assumed need for two highly-skilled staff at a salary of $80,000 for every 30 people served, resulting in a per-client cost of $445 per month.

Component #8 Expand Young Adults in Transition Residential System: Current YAT/RTH capacity and program staffing, with two facilities in the Portland Metro area. Adjusted 2015 construction and equipment estimates for inflation at 3.4 percent per year through 2021.

- Assumes 90 percent of clients would be Medicaid-eligible at standard Title XIX match rate.
- Assumes 10 percent of clients would be General Fund only with room and board.
- Costs estimated at approximately $0.4 million per RTH facility and $0.8 million per SRTF.

- Includes 20 percent contingency amount for construction.
- Assumed five 2-week periods for salaries and training to get the facilities up and running to equal 3 months.
- Includes 30 percent contingency amount for facility equipment.
- Did not include property costs because there are too many unknown variables.

Component #9 Develop PRTS:

- Assumes ongoing costs per bed of $125,000 for 47 new beds ($5.9 million) of which 25 percent would be contracted for outside of OHA or ODHS services (e.g., through commercial insurers). Of the 75 percent contracted by OHA and ODHS, 80 percent would be allocated to OHA and 20 percent to ODHS. This would result in $3.5 million in ongoing costs for OHA.
- Assumes construction or renovation for added capacity of eight facility serving 5 clients would cost approximately $500,000.

Component #10 Expand EASA program: Service population estimates and per member per year case rates in current County Financial Assistance Agreement service elements remain the same.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

Yes. Below are the components that would require new responsibilities.

- Center for Training and Technical Assistance for Youth and Young Adult Behavioral Health: OHA would need to develop the training, technical assistance, evaluation components, and other resources and supports described in response to question 2.
- Peer-Run Respite: The proposal would require OHA to develop a pilot program, technical assistance and guidance, contractual agreements, and oversight and evaluation of a new program.

- CCBHC: The existing demonstration has created service standards for the CCBHC pilot sites, however, OHA would need to revisit those standards, develop new criteria and certification processes, develop metrics and outcome measures, provide technical assistance and guidance, and develop new program evaluations based on the preceding responsibilities.
- Staffing the ADPC Strategic Plan: Implementation would require new work to coordinate agency resources to implement pieces of the ADPC strategic plan.
- Workforce Incentive Fund: Implementation would require new work to develop plans for the allocation of the funding, application procedures, distribution and administration for the funding and oversight and monitoring.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

Yes. See below for service population expansions for each program where applicable:

- Peer Respite: Access will increase geographically; the caseload impact is indeterminable at this time.
- CCBHC: Increases access to approximately 25,500 people with serious and persistent mental illness (SPMI).
- Workforce Fund: The increase to the number of providers in the field is indeterminable at this time.
- Expansion of Young Adult Residential: Adds 30 beds to serve young adults ages 17.5 to 25.
- Expansion of Psychiatric Residential Treatment Services: Adds 47 beds to serve youth ages 6 to18.
- Expansion of EASA: Will serve about 250 additional youth ages 14 to 25.
- Youth Hubs: Access will increase geographically; the caseload impact is indeterminable at this time.
- Mobile PSH: Will serve an additional 300 people with serious and persistent mental illness (SPMI).

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This policy package includes the following seven permanent, full-time positions to support several components of this request:

Component	Classification	Pos.	FTE
#1: Peer Respite Care	Operations and Policy Analyst 3	1.0	0.88
#2: CCBHC Program	Research Analyst 4 Operations and Policy Analyst 4	2.0	1.50
#3: ADPC Strategic Plan Staffing	Operations and Policy Analyst 3 Operations and Policy Analyst 4	2.0	1.50
#4: Increased Medicaid funding to support underserved populations	Operations and Policy Analyst 3	1.0	0.75
#5: Workforce development & retention in underserved communities	Operations and Policy Analyst 3	1.0	0.75
Total		**7.0**	**5.38**

20. What are the start-up and one-time costs?

- Component #8: Young Adults in Transition Residential: Construction and initial equipment costs ($5.3 million General Fund).

21. What are the ongoing costs?

Except for the construction costs described above, this policy package would be ongoing. For the 2021-23 biennium, ongoing costs would be $94.5 million General Fund and $94.8 million Federal Funds, totaling $194.5 million Total Funds. Please see question #23 for costs by component.

22. What are the potential savings?

There are no measurable savings.

23. What are the sources of funding and the funding split for each one?

This policy package would be funded with General Fund and federal Medicaid matching funds.

Component	General Fund	Federal Funds	Total Funds	Pos.	FTE
#1: Peer Respite Care	$2.4	$0.0	$2.4	1	0.88
#2: CCBHC Program	$31.4	$89.0	$120.3	2	1.50
#3: ADPC Strategic Plan Staffing	$0.2	$0.2	$0.4	2	1.50
#4: Increased Medicaid funding to support underserved populations	$10.6	$1.1	$11.6	1	0.75
#5: Workforce development & retention in underserved communities	$10.2	$0.0	$10.2	1	0.75
#6: Housing services & supports	$15.0	$0.0	$15.0		
#7: Center for Training & Technical Assistance	$1.0	$0.0	$1.0		
#8: Expand young adult in transition residential system	$9.1 ($5.3 one-time)	$4.5	$13.6 ($5.3 one-time)		
#9: Develop psychiatric residential treatment services capacity	$7.5	$0.0	$7.5		
#10: Expand EASA program	$9.2	$0.0	$9.2		
#11: Expand Young Adult Hubs	$3.2	$0.0	$3.2		
Total	**$99.7**	**$94.8**	**$194.5**	**7.0**	**5.38**

Oregon Health Authority and Department of Human Services
2021-23 Policy Package

Division: Department of Human Services and Oregon Health Authority

Program: ODHS Aging & People with Disabilities

Policy package title: Maintenance & Operations of Provider Time Capture

Policy package #: 207

Related legislation: None

Summary statement:

The Department of Human Services and Oregon Health Authority in-home care programs need a system that will increase program integrity and comply with the federal 21st Century CURES Act for Electronic Visit Verification System and the U.S. Department of Labor Fair Labor Standards Act. This would be done with a time, attendance and payment system for the program's Home Care Workers and Personal Support Workers. The drivers for this work include a need for:

1. Improved timeliness and accuracy of data
2. Improved compliance with federal, state, and bargaining requirements
3. Increased efficiency and internal controls
4. Decreased duplication of efforts across agencies
5. HCW/PSW to accurately and timely report services provided across programs
6. Decrease dependency on outdated legacy systems

This policy package would implement ongoing maintenance and enhancements that build upon a base system implemented in the 2021-23 biennium that would result in an integrated solution that meets the 21st Century Cures Act criteria and helps protect vulnerable Oregonians.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
DHS	$2,561,753	$0	$1,747,642	$4,309,395	7	7.00
OHA	$58,615	$824,214	$18,246	$901,075	3	3.00
Total policy package:	**$2,620,368**	**$824,214**	**$1,765,888**	**$5,210,470**	**10**	**10.00**

Purpose

1. Why does ODHS/OHA propose this policy package and what issue is ODHS/OHA trying to fix or solve?

The Department of Human Services (ODHS) and Oregon Health Authority (OHA) programs utilize Home Care Workers (HCWs) and Personal Support Workers (PSWs) to provide in-home care for patients across Oregon and must keep certain records for each HCW or PSW. The requirements apply to HCWs and PSWs who provide personal and home care assistance to older adults and people with disabilities. The Fair Labor Standards Act (FLSA) requires the records include certain identifying information about the HCW or PSW and data on hours worked. The law requires this information be accurate and attested to by both service recipients and providers.

Currently, these records are being captured through manual processes. Paper timesheets are completed by HCWs and PSWs and data is entered manually into state systems by employees at state field offices. These processes are time-intensive, have many manual steps and do not meet federal guidelines for Electronic Visit Verification (EVV) tracking.

2. What would this policy package buy and how and when would it be implemented?

This policy package supports multiple ODHS and OHA programs by funding the implementation, operations and maintenance of an integrated solution for tracking, reporting and payroll for in-home services provided by HCWs and PSWs to support individuals receiving services. Program areas include Aging and People with Disabilities (APD) in ODHS and the Health Systems Division (HSD) in OHA.

Funding would support system operations and maintenance, which would realize efficiencies by training to Provider Time Capture (PTC), maintaining a robust change management process, and providing a continuous review and revision of business process and policies.

This policy package would fund operations and maintenance costs for the PTC system including staffing related to program and support areas (HSD, APD, & OIS) as well as software, platform, and hosting licensing costs for the 2021-2023 biennium.

3. How does this policy package further DHS's and/or OHA's mission and align with its strategic plan?

ODHS and OHA programs utilize HCWs and PSWs to provide in-home care for patients across Oregon. ODHS and OHA must keep certain records for each HCW/PSW. The requirements apply to HCW/PSW's who provide personal and home care assistance to older adults and people with disabilities. The FLSA requires that the records include certain identifying information about the HCW/PSW and data about the hours worked. The law requires this information to be accurate and attested to by both service recipients and providers. Currently, these records are being captured through manual processes. Paper timesheets are completed by HCW/PSW, and data is entered manually into State systems through employees at State field offices. These processes are time-intensive, have many manual steps, and do not meet Federal guidelines for EVV tracking.

The full implementation of such a system would directly contribute to the ODHS Policy Outcome of "Improving our Human Services Systems" by addressing a long-standing gap in data collection and analysis and leading to a more efficient and effective state response to the reported problems with the Consumer Employed Provider program.

The PTC solution would also align with the framework and maturity assessment from Medicaid Information Technology Architecture (MITA), which will assist project decision makers in considering an appropriate path and metrics for success for this IT investment. The PTC project would focus on the maturity of the MITA process: Manage Invoice Payment. The capability maturity measure will move Oregon toward the "To Be" assessment level. The State is currently at Level 1 which is "The process is primarily manual". PTC will strive

to move the State to level 2 which specifies "The State uses a mix of manual and automated processes to accomplish tasks".

By implementing a service across both APD and HSD, this solution will create a common time reporting process across State agencies. Implementing a single time capture and payment process among agencies will align these agencies for potential future enhancements.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

This is part of the response to the Oregon Secretary of State audit in 2019. This report was titled, "Consumer-Employer Provider Program Needs Immediate Action to Ensure In-Home Care Consumers Receive Required Care and Services" completed in February 2019 and numbered Report 2019-05.

Quantifying results

5. How will ODHS/OHA measure the success of this policy package?

ODHS has identified a series of goals and objectives we will perform initial baselines and final metrics collection and analysis to confirm our expected outcomes.

Goal #1: Comply with Federal requirements, including 21st Century Cures Act.	1.1 **Objective:** Establish use of Electronic Visit Verification (EVV) compliant recording mechanism(s).
	1.2 **Objective:** Establish electronic approval of time entries by individuals.
	1.3 **Objective:** Capture the six required data elements for Electronic Visit Verification (EVV).

Goal #2: Improve program integrity.	2.1 **Objective:** Decrease number of time entry/reporting errors.
	2.2 **Objective:** Decrease number of over/under payments.
	2.3 **Objective:** Decrease number of incidents of potential fraud.
	2.4 **Objective:** Decrease number of errors in reporting travel time.
	2.5 **Objective**: Improve reports and tracking of issues with time capture processes available for staff to leverage as part of program integrity operations/processes.
Goal #3: Decrease workload on identified impacted groups.	3.1 **Objective:** Decrease workload for Voucher Clerks (Field Offices) and Provider Relations Unit (PRU) (Central Office) in voucher issuance and reprint processes.
	3.2 **Objective:** Decrease workload for Travel Time Clerks (Central Office) and PRU staff in processing travel time.
	3.3 **Objective:** Decrease workload for field staff in time entry and correction processes (time entry corrections and over/under adjustments).
	3.4 **Objective:** Decrease workload for staff in the payment correction processes (adjustments, exceptions, and corrections). (PRU and BOTS)

	3.5 **Objective:** Decrease workload for providers in submitting time worked.
	3.6 **Objective:** Decrease workload for individuals in approving time entries.
	*3.7 **Objective:** Decrease workload for staff in collecting, updating, and issuing payroll related documentation (W-2, W-4, DD, etc.).
	*3.8 **Objective:** Decrease workload for staff in garnishment and recoupment processes.
Goal #4: Decrease processes within legacy systems functions and/or data.	4.1 **Objective:** Decrease number of functions performed by the existing state systems in the time entry, calculation, and payment processes.
	4.2 **Objective:** Decrease number of validations performed by the existing state systems in the time entry, calculation, and payment processes.
	4.3 **Objective:** Decrease number of business processes that require legacy systems.
Goal #5: Reduce costs associated with manual processes.	5.1 **Objective:** Decrease paper voucher storage costs and physical location needs.
	5.2 **Objective:** Decrease number of time entry claims that are paid solely out of the General Fund.
	5.3 **Objective:** Decrease printing and mailing costs for printed paper vouchers.
	5.4 **Objective:** Decrease Mainframe processing and storage costs.

Goal #6: Maximize user adoption through identified, organized, and prioritized change management, communications, and trainings.	6.1 **Objective:** Decrease stakeholder barriers to adoption.
	6.2 **Objective:** Increased accessibility for successful time entry and approval.
	6.3 **Objective:** Increase user satisfaction for all impacted groups.
Goal #7: Ensure system and processes are clear and understandable for identified impact groups (Individuals, Providers, and Staff)	7.1 **Objective:** Increase number of readily accessible training materials and online documentation.
	7.2 **Objective:** Decrease time for staff in describing/explaining the time entry and approval processes.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an ODHS or OHA performance measure? If yes, identify the performance measure(s).

Yes, this aligns with the 2015-17 approved Key Performance Measure below:

11 – LTC Recipients Living Outside Nursing Facilities
13 – People with Disabilities Living at Home
14 – Supported Employment

7. What are the long-term desired outcomes?

By removing workload from field administrative support of the Consumer Employed Provider program it will allow APD and HSD to shift other work to this body of workers freeing up Case Managers to spend more time on case management and more critical issues for vulnerable Oregonians.

8. What would be the adverse effects of not funding this policy package?

Options were considered for inclusion in current process or expansion of the Legacy systems to capture this information, but it is not considered sustainable nor would it be supported by current staffing levels. Staffing for the project have been sourced from numerous sources including pulling in employees from the Field on limited duration double fill positions. Given the nature of staffing in the field this creates additional strain and does not account for the long-term operations and maintenance required.

Failure to support and successfully implement PTC will have two main areas of impact. The current Collective Bargaining Agreement (CBA) with SEIU that covers the HCWs and PSWs requires implementation by the end of calendar year 2020 for Phase 1 and the end of 2021 for Phase 2.

Additionally, Compliance with the standards required by the 21st Century CURES Act would allow the state to continue to receive federal funding match. Failure to comply will result in a reduction of this funding, along with potential penalties. The percentage of an individual reduction on FMAP for Consumer-based Care and In-Home Care expenditures begins with 0.25 percent on January 1, 2021. Subsequent six-month percentage reductions increase to 0.50 percent by 2022, 0.75 percent by 2023 and 1 percent after 2023.

EVV Penalty pricing In Home Supports

	In Home Projected Expenditures at 21-23 CSL (TF)	% FMAP Reduction Per schedule	Federal Fund Penalty Reduction Estimate (GF Cost)	
1/1/21-6/30/21	$ 275,898,626	0.50%	$1,379,493	19-21
7/1/21-12/31/21	$294,195,880	0.50%	$1,470,979	21-23
1/1/22-6/30/22	$295,127,270	0.75%	$2,213,455	21-23
7/1/22-12/31/22	$297,532,442	0.75%	$2,231,493	21-23
1/1/23-6/30/23	$298,207,326	1.00%	$2,982,073	21-23
21-23 General Fund Cost			$8,898,000	21-23

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

Options were considered for inclusion in current process or expansion of the Legacy systems to capture this information, but it is not considered sustainable nor would it be supported by current staffing levels. Staffing for the project have been sourced from numerous sources including pulling in employees from the Field on limited duration double fill positions. Given the nature of staffing in the field this creates additional strain and does not account for the long-term operations and maintenance required.

10. What alternatives were considered and what were the reasons for rejecting them?

All the PTC alternative approaches were evaluated to determine if they have the ability to solve the business problem defined by the product requirements. The updated business case completed in July of 2019 analyzed 10 options which included a variety of in-house options, custom build, use of existing contracts or Statewide agreements, no action, or a new procurement. Ultimately, a recommendation of a Software as a Service procurement was adopted by Agency leadership based on the reasons identified below.

1. Implement a Software as a Service (SaaS) solution.
   - This option has the benefit of requiring the burden of the development and design activities and long-term operations and maintenance of code on the vendor compared to an in-house or other commercial solution. Additionally, selecting a vendor who has performed this work in other states increases Oregon's chances of capitalizing on lessons learned and efficiencies of scale based on the work already put into the system.

The recommended approach for the PTC Project is to utilize a SaaS solution for the following reasons:

- Ability for advanced configuration, integration with other applications, and possible customization
- Aligns with the direction the software industry is going

- Possibility to expand to other solutions in the future for FMAS, Case Management, Provider Management, etc.
- Fewer technical resources would be required from the State and there would be no dependency on the State Data center
- Possibility of faster implementation
- Workload reduction in the State field offices and Type A and Type B AAA offices
- Moves the Agency away from having sole responsibility for supporting an increasing number of systems
- Ability to access data for reporting
- Several vendors are now offering EVV solutions that are incorporated into their system

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

It does not require statutory changes.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Other agencies affected by this policy package include APD and HSD's Program Partners and those with a business need for payroll or service time worked data, such as:

- Area Agencies on Aging (AAAs)
- County Mental Health Programs
- The Oregon Health Authority / Health Systems Division

These agencies would experience a change in how they receive data and reports from APD/HSD. Access to data would be based on business need and enforced using a role-based security protocol.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

Oregon Home Care Commission, OHA – Office of Information Services, & Health Systems Division.

14. How does this policy package help, or potentially hinder, populations impacted by inequities or disproportionalities from achieving health, well-being and independence?

Depending on the selected vendor the need for providers or individuals to access the solution via the internet or a personal data enabled device could present barriers to some populations. Additionally, depending on the language capacities of the vendor and solution this could pose inequities for individuals and providers whose first language is not English. The Agency is working to ensure the system, training, and support are available in multiple languages to try and mitigate these concerns.

Staffing and fiscal impact

Implementation date(s): Phase 1 12/31/20, Phase 2 12/31/21, Phase 3 TBD

End date (if applicable): N/A

15. What assumptions affect the pricing of this policy package?

These are based on staffing and vendor onboarding assumptions and compliance with the planned phase deadlines.

16. Will there be new responsibilities for ODHS/OHA? Specify which programs and describe their new responsibilities.

ODHS will add the PTC Operations and Maintenance team to their existing support organization., including long-term enhancement and troubleshooting support. Additionally, APD will be responsible for the creation and delivery of training for the long-term solution.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

There is expected to be some maintenance, support, and coordination between developers to troubleshoot and make changes to the various interfaces and systems to support long term success. Additionally, to coordinate and manage contract administration across IT initiatives and services we are requesting a position for contract administration to be housed with OIS. We have coordinated with the Office of Information Services (OIS) to request 3.00 FTE of resources for this support.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No changes anticipated.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

In order to support the long-term operations and maintenance of the system, coordination with the vendor, and training of all impacted stakeholders and staff over the life of the contract with the vendor.

* Class Type	Class Title	* DCR
OAH C0872 AP	Operations & Policy Analyst 3	060-08-03-00000
OAH C0871 AP	Operations & Policy Analyst 2	060-08-03-00000
OAH C0870 AP	Operations & Policy Analyst 1	060-08-03-00000
OAH C0870 AP	Operations & Policy Analyst 1	060-08-03-00000
OAH C1339 AP	Training & Development Spec 2	060-08-03-00000
OAH C1338 AP	Training & Development Spec 1	060-08-03-00000
OAH C0107 AP	Administrative Specialist 1	060-08-03-00000

20. What are the start-up and one-time costs?

The initial project implementation estimates for phase 1 and 2 is approximately $600,000.

21. What are the ongoing costs?

On-going costs outside of staffing are licensing and support costs for the system, which is currently estimated to be $840,000 annually.

22. What are the potential savings?

The use of a mobile app to track time and, potentially, location using location services, would reduce potential fraud in time reporting. While the current amount of fraud in time reporting is difficult to quantify, data provided by the Office of Payment Accuracy and Recovery (OPAR) report a total amount of HCW debt related to potential fraud or client error was $1 million of which $676,000 has yet to be recovered over a five-year period. By using a technology-based product the state could track specific time worked and the geolocation of services provided.

Compliance with the standards required by the 21st Century CURES Act would allow the state to continue to receive federal funding match. Failure to comply will result in a reduction of this funding, along with potential penalties.

23. What are the sources of funding and the funding split for each one?

ODHS: The Federal Funds are Medicaid with CMS providing 90/10 split for the project phase of this work and ODHS is seeking 50/50 match during Operations and Maintenance. The remainder is paid via General Funds.

OHA: Other Funds via direct charge to ODHS.

Oregon Health Authority
2021-23 Policy Package

Division:	Health Policy & Analytics
Program:	Office of Health Information Technology
Policy package title:	Behavioral Health Electronic Health Records Incentive Program
Policy package number:	410
Related legislation:	None

Summary statement:

Improving the behavioral health system is one of the Governor's top priorities; COVID-19 further highlights this need. While many behavioral health providers are experiencing inefficiencies related to health information (e.g. using paper charts and faxing records), many physical health providers are leveraging electronic health record (EHR) technology for improved efficiencies and patient care. By creating a Behavioral Health EHR Incentive Program, this POP would promote a more connected behavioral health system and allow behavioral health providers to catch up to their physical health peers in terms of health information technology (HIT). Incentivizing investments in EHR technology and other related HIT will provide the building blocks for care coordination, health information exchange, electronic reporting, patient care, and value-based payments. Oregon's vision of health system transformation cannot be achieved if behavioral health agencies do not have adequate tools and resources.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$2,233,876**	**$0**	**$3,233,867**	**$5,467,743**	**1**	**0.75**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

Over the next two years, Health Policy and Analytics (HPA) expects to be responding to the enormous disruption of COVID-19 by adopting targeted policy and program changes that stabilize the health system and coverage and allow us to rebuild a more sustainable and equitable system for the longer term. Oregon's behavioral health providers will need focused attention and support given the critical role they will play in addressing heightened demand for mental health and substance use services during and after the pandemic. Incentive programs designed to assist providers in implementing electronic health record (EHR) technology will give healthcare workers the ability to efficiently retrieve and meaningfully use client/patient health information and provide the basis to share this information electronically.

In Oregon, behavioral health providers lag far behind their physical and oral health peers in terms of adoption and use of EHR technology, and the demands of COVID-19 have only exacerbated the consequences of this disparity. Between 2017 and 2019, the Oregon Health Authority's Office of Health Information Technology collected data (including an online survey, in-depth interviews, and a follow-up survey) on behavioral health agencies to better understand their HIT and health information exchange (HIE) adoption, use, needs, and challenges.[1] Key findings include:

- Only 65 percent of Oregon behavioral health agencies with a licensed program have an EHR. By comparison, 90 percent of Oregon's ambulatory physical health providers have an EHR. Further, of the 65 percent of behavioral health agencies with an EHR, less than a third have fully implemented their EHR. This means a vast majority of Oregon's behavioral health agencies are still using paper records and processes, which limits electronic information exchange, causes care coordination challenges, and widens the digital divide between behavioral health and their peer provider types.

[1] See OHA's Behavioral Health HIT Scan results and HIT Workplan here: https://www.oregon.gov/oha/HPA/OHIT-HITOC/Pages/Behavioral-Health-HIT.aspx

- Behavioral health agencies increasingly need high-functioning EHRs, HIE opportunities, and the ability to effectively meet reporting requirements and analyze client data. Even agencies with an EHR report that their systems do not adequately support their needs. For example, almost a third of the 100 agencies who reported having an EHR in OHA's original survey indicated they are unable to use their EHRs to electronically submit required data to Oregon's Measure and Outcomes Tracking System (MOTS) via electronic data interface (EDI) but rather are burdened with manual data entry. This further points to the need for EHR support to build critical reporting capacity.

Unfortunately, financing is an obstacle. Behavioral health providers are not typically eligible to participate in the federally funded EHR incentive programs benefiting many other providers.

- Since 2011, over 8,400 Oregon providers and 61 hospitals have received over $532 million in federally funded EHR incentive payments; however, most of these recipients are physical health providers. Only 13 percent of behavioral health agencies (who are not part of a larger physical health system) participated and received incentive payments to support EHR adoption. As a result, HIT inequities exist between physical health and behavioral health providers.
- In the survey conducted by OHA, financial costs, lack of staff resources, and/or technical infrastructure were repeatedly cited as significant barriers to adopting an EHR. Further, agencies interviewed strongly desired data analytics technology to improve quality, manage client populations, demonstrate return on investment, and engage in value-based payment arrangements – all of which could be supported through an investment in high functioning EHRs.

2. What would this policy package buy and how and when would it be implemented?

This policy package would establish a 3.5-year Behavioral Health EHR Incentive Program to support an estimated 2,000-3,500 behavioral health providers at a minimum of 60 behavioral health agencies making

investments in high functioning EHRs and related HIT. This investment would mitigate the "digital divide" between physical, oral, and behavioral health, increase efficient, electronic reporting to OHA's Measures and Outcomes Tracking System (MOTS), and enable a more efficient response to the impact of COVID-19 across the health system.

The program would begin January 2022 and run through June 2025 and would be operated by the Office of Health Information Technology, which currently operates the federally funded Medicaid EHR Incentive Program. The policy package would fund the following:

- $5 million per biennium (2021-23 and 2023-25) for milestone-based financial incentives to support behavioral health agencies adopting, upgrading, or configuring/customizing EHRs, including costs related to establishing electronic reporting to MOTS.
    - At approximately $75,000 in incentive payments per organization, this would support a minimum of 60 behavioral health agencies or 2,000-3,500 individual providers (with a range of 10 to 184 per agency), potentially more depending on the EHR needs of each agency (some may need to adopt, while others upgrade).
    - Funding would need to be adjusted in future biennia to disburse up to $10 million total over 3.5-year program (January 2022 to June 30, 2025) to support a minimum of 120 behavioral health agencies and up to 4,000-5,000 individual providers, including many smaller agencies currently without an EHR.
    - To qualify for an incentive, a behavioral health organization would submit a request for proposal or application and OHA would approve funding amount based on the organization's size, need, and ability to meet requirements.
- One permanent, full-time Operations and Policy Analyst 4 position to manage program operations starting January 2022.

- Contracted technical assistance to support behavioral health agencies with education and decisions around EHR/HIT investments.

3. How does this policy package further OHA's mission and align with its strategic plan?

This policy package supports OHA's commitment to achieving the Triple Aim of better health, better care, and lower costs through health system transformation. Without sufficient EHR technology, BH agencies are less able to communicate electronically with each other and with physical and oral health providers, which inhibits their ability to coordinate the efficient communication needed to provide the highest quality of care. By helping behavioral health agencies catch up to their physical and oral health peers in terms of health information technology and exchange, we will not only support the infrastructure and building blocks for physical, oral, and behavioral health integration, but also help our healthcare systems move towards patient-centered care coordination and value-based payments.

Improving the behavioral health system is one of the Governor's top priorities for Oregon's Coordinated Care Organizations 2.0 process. A behavioral health EHR incentive program would further the goals of the coordinated care model and promote interoperability and care coordination across a wide range of healthcare settings. Behavioral health information would be able to be collected and shared with OHA and other providers to address continuity of care and improve patient outcomes. This program is intended to support behavioral health agencies serving Oregon's vulnerable populations, including Medicaid. Participating behavioral health agencies would be able to better capture, track, and monitor patient health information, and more easily facilitate needed referrals to address to complex care issues. These goals cannot be met if behavioral health organizations do not have adequate tools and resources.

The importance of addressing behavioral health needs is outlined in:

- The Oregon Health Policy Board's Action Plan for Health

- State Health Improvement Plan https://www.oregon.gov/oha/PH/ABOUT/Pages/ship-process.aspx
- OHA's Health Information Technology Oversight Council's (HITOC) Strategic Plan for 2017-2020 update

This policy package also plays a meaningful role in the Compass Modernization project work, detailed in POP 403 from OHA Health System's Division.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

OHA would initially measure the success of the POP by monitoring participating behavioral health agencies' achievement of the Behavioral Health EHR Incentive Program milestones. For example, OHA knows that only 65 percent of behavioral health agencies with a licensed program currently have an EHR, and nearly a third of those EHRs are not fully implemented; therefore, OHA will establish targets for increased EHR adoption and success will be measured by evaluating progress towards set targets. OHA would also leverage current CCO reporting requirements around behavioral health provider EHR adoption rates to better understand the impact of the POP.

Additionally, OHA knows that only a third of behavioral health agencies with an EHR can use their EHRs to electronically submit required data to MOTS. Another measure of success would be monitoring increased electronic reporting to MOTS. The Office of Health Information Technology would coordinate with the Health Systems Division to evaluate the improvement in EDI submissions to MOTS.

Finally, through surveys, OHA will obtain stakeholder feedback from participating providers, agencies, and CCOs on improvements demonstrated as a result of the Behavioral Health EHR Incentive Program (e.g. improved patient participation, health information exchange, care coordination, and data analytics).

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

The Behavioral Health EHR Incentive Program would contribute to OHA's key goals around effective partnerships while addressing inequities, improving health, and providing better care. It would address the following measures:

OHA's Key Performance Measure:

- Member Health Status
- Initiation of alcohol and other drug dependence treatment
- Engagement of alcohol and other drug dependence treatment
- Follow-up after hospitalization for mental illness
- Mental, physical, and dental health assessments for children in ODHS custody
- Follow-up care for children prescribed with ADHD medication (initiation)
- Follow-up care for children prescribed with ADHD medication (continuation and maintenance)

OHA's Performance System Outcome Measures:

- 1AOM2. Increase Partner Satisfaction
- 1AOM6. Reduce Health Disparity
- 1AOM7. Improve Population Health
- 1AOM8. Improve Quality of Care

- 1AOM9. Improve Care Experience

7. What are the long-term desired outcomes?

The long-term desired outcome of the Behavioral Health EHR Incentive Program is to help participating behavioral health agencies improve the care of Oregonians by eliminating a substantial barrier to coordinating and integrating with physical and oral health and exchanging health information. Recipients of the incentive payments would be able to purchase a new EHR, upgrade or enhance an existing EHR, establish electronic reporting to OHA's MOTS, or potentially acquire an add-on HIT component such as an analytics or population management tool or patient portal application.

Similar to the increased rate of EHR adoption among physical and oral health providers that resulted from the Medicaid and Medicare EHR Incentive Programs, it is expected that adoption and utilization of EHR technology among behavioral health providers would increase as a result of the Behavioral Health EHR incentive program. This would contribute to:

- Improved care delivery and efficiency and reduction of behavioral health disparities, including better management of COVID positive clients with serious mental illness, substance use treatment needs or other behavioral health conditions.
- Increased care coordination and support for integrated physical, behavioral and oral care.
- Improved billing processes and greater potential for participation in value-based payment arrangements.
- Increased rate of and improved data analytics.
- Increased rate of HIE, including supporting improved referrals.
- Improved privacy and security of protected health information (PHI).
- Increased patient participation with their health information (for EHRs with patient portal applications).
- Increased reporting efficiencies, accuracy and compliance, including for OHA-required reporting to the Measures and Outcomes Tracking System (MOTS).

8. What would be the adverse effects of not funding this policy package?

If the proposed program is not developed, behavioral health agencies will continue to experience significant challenges related to HIT and to adopting high-functioning EHRs. These challenges will likely intensify due to the COVID-19 pandemic and the need for providers to adapt to the changing environment around care coordination and health information exchange. As a result, the growth of the existing "digital divide" between the physical health and behavioral health will continue to widen, likely resulting in:

- Continued care coordination challenges
- Limited care integration – continued siloes
- Lack of health information exchange participation and disconnected patient care
- Limited ability to participate in value-based payment arrangements
- Reporting challenges and administrative burden
- Limited patient participation

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

OHA has been able to support some access to HIT tools for behavioral health agencies – but very little support has been available for EHR costs. In the past, OHA hosted a modest EHR for behavioral health agencies, called "OWITS" – the Oregon instance of WITS (an open source certified EHR). OWITS was not robust enough for many agencies' use and there was little uptake. Several agencies chose to use OWITs rather than rely on paper records but had such low levels of resources that they had no other EHR options. The OWITS system required significant funds to maintain current certification, and OHA ultimately stopped supporting OWITS.

Federal incentive payments are available to "eligible providers" but these have largely left out behavioral health agencies, since only specific provider types are eligible (e.g., physician, nurse practitioner, dentist, physician assistant in certain setting). Congress has made multiple attempts to introduce legislation for EHR incentives to behavioral health agencies, and up until recently all have failed. On October 24, 2018 President Trump signed the Substance Use-Disorder Prevention that Promotes Opioid Recovery and Treatment (SUPPORT) for Patients and Communities Act, which contains legislation authorizing the Center for Medicare & Medicaid Innovation (CMMI) to create a demonstration project to incentivize the adoption and use of EHR technology for behavioral health care providers. Timing of project implementation and award recipients were not identified, so in 2019, Oregon sent a letter to CMMI encouraging the implementation of the demonstration and requesting participation. To date, no progress has occurred with the behavioral health EHR incentives demonstration authorized by the SUPPORT Act, so it is unlikely that Oregon behavioral health providers will see any benefit.

In the spring of 2019, OHA established a Behavioral Health IT Workgroup comprised of behavioral health agency representatives from around the state to partner on behavioral health system transformation. Again, the need for improved EHRs and a funding source was at the forefront of conversations. The Behavioral Health HIT Workgroup is fully supportive of an EHR Incentive Program and will continue to collaborate with OHA to address the gaps that exist in the current behavioral health system.

OHA has already explored other avenues for funding and has even secured some funding for technical assistance. OHA applied for and received funding through the Substance Abuse and Mental Health Services Administration (SAMHSA) Block Grant to provide technical assistance to substance use disorder (SUD) providers around adopting or upgrading an EHR and/or adopting HIE tools and is currently planning technical assistance activities. The Center for Medicare and Medicaid Services (CMS) has also been willing to support technical assistance funding in the past.

10. What alternatives were considered and what were the reasons for rejecting them?

Consideration has been given to have CCOs support behavioral health clinics in adoption and technical assistance of certified EHRs, and at least one CCOs has invested in EHR costs for a BH agency. However, CCOs would potentially bear significant costs for each agency to acquire a high-functioning EHR.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Tribal Governments and county mental health agencies would be affected in that behavioral health programs they operate could be eligible to apply for the financial incentives.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

None outside of OHA. Within OHA, the Office of Health Information Technology within the Health Policy & Analytics Division is collaborating with Health Systems Division because this policy package supports the Compass Modernization policy package. Behavioral Health Agencies receiving EHR incentives would be expected to report to Compass/MOTS electronically.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[2] or equitable health outcomes?

Individuals who have severe and persistent mental illness face significant disparities in health outcomes as well as challenges in accessing services; this is also true for the Medicaid population. The agencies involved in treating and supporting these individuals are well-suited to identify social determinants of health issues which can help address disparities and improve outcomes.

Through the Behavioral Health EHR Incentive Program, participating agencies would be able to better capture, track, and monitor patient health information, and more easily facilitate needed referrals to address to complex care issues. As a program requirement, OHA proposes to require participants to utilize EHRs as a behavioral health promotion and prevention tool, with the goal of improving access to behavioral health services for all Oregonians, as well as promoting the coordinated health care system envisioned by Oregon's Behavioral Health Collaborative.

Staffing and fiscal impact

Implementation date(s): January 1, 2022

End date (if applicable): June 30, 2025

15. What assumptions affect the pricing of this policy package?

An assumption affecting the pricing of this POP is that CMS will approve federal match for the incentive payments at the FMAP rate. OHA has been working with CMS and anticipates approval.

[2] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

Yes. The Office of Health Information Technology (OHIT) will manage the operations of the Behavioral Health EHR Incentive Program, which includes managing the technical assistance contract, developing outreach materials, and ensuring the appropriate payment of financial incentives to qualifying agencies.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

One new permanent, full-time Operations and Policy Analyst 4 position starting January 1, 2022.

20. What are the start-up and one-time costs?

Not applicable.

21. What are the ongoing costs?

- $5 million for milestone-based financial incentives to support behavioral health agencies adopting, upgrading, configuring, and/or customizing EHRs, including costs related to establishing electronic reporting to MOTS. Ideally this program would extend into the 2023-25 biennium or beyond with a $5 million investment each biennium. Additional investment over a longer period could be necessary: the model for this program is the Medicaid EHR Incentive Program, which has been operational since 2011.
- One new permanent, full-time Operations and Policy Analyst 4 position to manage program operations starting January 1, 2022.
- $250,000 for contracted technical assistance to support behavioral health agencies with education and decisions around EHR/HIT investments. Assuming this program extends through the 2023-25 biennium, OHA would need an additional $250,000.

22. What are the potential savings?

Providing financial support for behavioral health agency adoption of EHRs and other related HIT will likely result in long-term cost avoidance associated with the following gains:

- Improved patient care and outcomes through more efficient use of patient information and EHRs.
- Increased care coordination and integration with physical and oral health.
- Increased reporting efficiencies, accuracy and compliance, including for OHA MOTS reporting.
- Greater potential for HIE participation, and improved referrals.
- Greater potential for BH agency participation in VBP arrangements.
- Increased efficiencies related to COVID-19 response.

.

23. What are the sources of funding and the funding split for each one?

Funding for the position and technical assistance contractor would be split 50 percent General Fund and 50 percent Federal Funds through Medicaid administrative match. The incentive payments are assumed to receive CMS approval for a FMAP match for incentive payments, at 40 percent General Fund and 60 percent Federal Funds match.

Total for this policy package

Oregon Health Authority
2021-23 Policy Package

Division:	Health Systems Division
Program:	Behavioral Health Non-Medicaid
Policy package title:	Community Mental Health Aid and Assist
Policy package #:	411
Related legislation:	None
Summary statement:	The number of people sentenced under "Aid and Assist" laws has doubled over the past five years. Oregon has traditionally relied on Oregon State Hospital (OSH) as the primary resource to meet the service needs of these people. Recent capacity challenges have been so great that the state fell into a period of non-compliance with the US Federal Court of Appeals ruling (Mink Order) that requires OSH to admit people committed under ORS 161.370 within 7 days of a signed judge's order. Local law enforcement, jails and emergency departments are consistently reporting stresses on their systems as well as frustration with the lack of effective service options. This policy package requests funding and positions to contract with community providers to open additional secure residential treatment facilities (SRTFs) and increase community services to meet the immediate needs of people who have been arrested and court-ordered for services under Oregon's "Aid and Assist" laws; ensure better coordination between courts, OSH and community mental health and substance use disorder service providers for people who have intensive behavioral health service needs; and a comprehensive evaluation to better understand the root causes for the increases and identify long-term strategies to improve services and outcomes. this package is not funded, communities would not have the resources needed to provide proper services for people sentenced under "Aid and Assist" orders and OSH Aid and Assist admissions would continue beyond current capacity.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$19,268,531**	**$0**	**$3,376,104**	**$22,644,635**	**6**	**4.50**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

This policy package would ensure the needs of people sentenced under Oregon's "Aid and Assist" laws are met (Oregon Revised Statute 161.370). At the local level, law enforcement, jails and emergency departments are consistently reporting stresses on their systems as well as frustration with the lack of effective options to serve this population. The Oregon State Hospital (OSH) has seen a doubling of Aid and Assist admissions over the past 5 years that has shown little indication of abating. The resulting OSH capacity challenges have been so great that the state fell into a period of non-compliance in the past year with the U.S. Federal Court of Appeals ruling (Mink Order) that requires OSH to admit people committed under ORS 161.370 within 7 days of a signed judge's order.

This package would invest in community-based interventions that would help address the following barriers to the state's compliance:

Insufficient resources for counties to meet the growing need for services. A recent review by Oregon Health Authority (OHA) staff and Community Mental Health programs found no Oregon counties receive enough funding to support the growing need for services. This issue has been growing over the past several biennia. In 2015, OHA provided new funding to targeted counties. While funds allocated to those targeted counties successfully met the need at the time, they are now insufficient due to continued growth in county caseloads. Funding allocated to the remaining counties, unfortunately, did not meet the need at the time.

Aid and Assist is not budgeted as a mandated population. While people under aid and assist orders are considered a "mandated population" because they are under a court order to receive treatment, the mandated caseload financial formula never included them. This formula is used in determining the Continuing Service Level Budget for community mental health programs. OHA, under a 2019 budget note, has been working with

the Legislative Fiscal Office (LFO), the Department of Administrative Services (DAS) Chief Financial Office (CFO), OSH, and Community Mental Health Programs to improve forecasting and definitions when determining how to integrate budgeting for all mandated caseloads in the community mental health continuing service level budgeting process. Because this is not part of the calculation, fluctuations in the caseload are not reflected in OHA's budget development.

Lack of access to the proper level of treatment for people under aid and assist orders. In 2019, the Oregon legislature passed Senate Bill 24, which requires restorations be provided in community-based settings if hospital level of care is not needed. The bill helped reduce the rate of increased Aid and Assist admissions to OSH, but admissions continue to grow. In addition, demand for aid and assist restoration services in communities is also growing.

Capacity issues at the Oregon State Hospital. There are insufficient community resources to support people who are ready to be discharged from Oregon State Hospital. This creates backlogs and limits OSH's capacity for timely admissions of people who need hospital level of care.

Insufficient state-level support and expertise to coordinate intensive behavioral health services across courts, State Hospital and in communities. Providing additional community-focused aid and assist restoration services in Oregon represents a significant change in orientation, practice and resource allocation. OHA is not currently resourced or structured to effectively assist communities in developing needed capacity and practices.

2. What would this policy package buy and how and when would it be implemented?

Creation of an "Intensive Services Unit"– Staff in this new unit would provide robust clinical and systems support to communities for people who are clinically complex and multi-system involved. By reorganizing

existing staff and investing in the new positions, OHA would improve system accountability and outcomes for individuals and communities. The "Intensive Services Unit" would provide oversight and coordination of community-based behavioral services delivered as a result of an encounter with the judicial system through ORS Chapters 161 and 426, as well as focus on getting services to people before they are arrested. Specifically, the new unit would coordinate and improve communications with the courts, law enforcement, corrections, the state hospital, community treatment programs, and housing, to ensure people with intensive behavioral health treatment needs can access the proper levels of treatment.

Behavioral Health Community Residential Investments

This policy package would fund the development of three 16-bed facilities for a total of 48 Secure Residential Treatment Facility (SRTF) beds to ensure capacity is available where and when needed. Developing and building this capacity requires time to complete design, siting, contracting, construction activities, and staff recruitment and training at the facilities. The facilities would start serving clients approximately six months after construction is complete. Moreover, this policy package would support facility investments needed to bring existing facilities up to current requirements and start-up costs including staff recruitment and training, supplies, utilities and maintenance, as well as SRTF services and client forensic evaluations. One SRTF would be ready for clients in January 2023 and the other two SRTFs would be ready for clients in July 2023.

Development of Community Care Coordination Supports

This request would fund community support services and the development of an equitable model for allocating funding to counties to provide restoration services for each person who requires community-based services under ORS 161.370. Services include legal skills training, community case coordination, community consultations with the courts, behavioral health treatment, local data collection, and coordination of services for county's residents at OSH under ORS 161.370. OHA anticipates this capacity would be available on January 1, 2022.

Evaluation of demand drivers and capacity needs
OHA would assess the root causes behind the increases in the number of people under aid and assist orders and people found guilty except for insanity. The assessment would consider both individual drivers and systemic issues. Systemic issues could be connected to sentencing patterns, transiency, location geographically, or services provided prior to system engagement, recidivism, clinical profiles – including co-occurring substance use disorders, overlaps between the various commitment populations and other critical areas. Identifying individual and systemic drivers of increasing aid and assist orders would help the state and local communities find long-term solutions that ultimately result in better outcomes. This work would begin as soon as possible, which could be as early as July 1, 2021.

3. How does this policy package further OHA's mission and align with its strategic plan?

The mission of the Oregon Heath Authority is helping people and communities achieve optimum physical, mental and social well-being through partnerships, prevention and access to quality affordable health care. Additionally, OHA's strategic plan aims to eliminate health inequities in Oregon. A disproportionate share of patients admitted to the Oregon State Hospital (OSH) are people of color compared to Oregon's population. This disparity exists across all service types but is especially pronounced for people under aid and assist orders: Oregon's non-white population is 15.6 percent, but more than 27 percent of people admitted under aid and assist are non-white. Further, Oregon's Black population represents 1.9 percent of Oregon's population, but is 9.4 percent of the Aid and Assist population. The staffing and evaluation components of this package would allow OHA to gain a better understanding of the underlying issues creating this inequity and to make program improvements to address those causes and ultimately eliminate the inequities.

This policy package would allow each county to develop the service continuum necessary to support transitions of people from the state hospital back to their home communities as soon as hospital level of care is no longer needed. Further, the package would improve OHA's ability to remain in compliance with the 2003 U.S. Court of Appeals decision, which requires proper and timely behavioral health services for people who have been

arrested and await trial. Finally, this package would allow OHA to focus on service delivery and timing for people who have intensive behavioral health service needs, so that fewer people would be arrested and ordered to treatment under ORS 161.370.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

None.

Quantifying results

5. How will OHA measure the success of this policy package?

OHA would measure and expect more timely discharges from the Oregon State Hospital (OSH) once individuals no longer need hospital level of care to result from improved community resources. OHA anticipates more timely discharges from OSH would lead to a cascade of positive, measurable impacts:

- More capacity at OSH and reduce the risk of failing to meet the 7-day admission requirement for people ordered to OSH under ORS 161.370.
- Less frequent limits on admissions to OSH for people who are Civilly Committed.
- Reductions in the length of time and number of people who await admission to the state hospital from local acute care facilities and other locations.
- More people receive services in the most appropriate setting as they are directed to community services sooner once they no longer require a hospital level of care.
- Specifically, more people under aid and assist orders, in each county, would receive services in the community. This will be measured through data that OHA collects from counties through OHA's MOTS system. Staff and evaluation from this package would allow OHA to monitor and ensure contract compliance regarding data completeness and accuracy.

Additionally, in the long-term, this policy package would reduce health inequities. The funding and staff from this package would focus programs and interventions to reduce arrest rates for people who have intensive behavioral health service needs. Evaluation resources from this package would allow OHA to perform special studies in conjunction with the Oregon State Police to evaluate overall arrest patterns for people with intensive behavioral health service needs.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

No.

7. What are the long-term desired outcomes?

- Equitable and adequate access to community restoration, legal skills training, and treatment services for individuals who have been ordered to treatment through ORS 161.370 who do not need hospital level of care.
- Ongoing compliance with 2003 U.S. Court of Appeals decision, which requires admission to the Oregon State Hospital within seven days of an order for competence determination identified in ORS 161.365 and ORS 161.370 to determine an individual's fitness to proceed in their own defense.
- Reductions in the rate of arrest, and concomitant reductions in ORS 161.370 court orders, for people with mental illness, particularly those with intensive service needs and persons of color. Those reductions would be the result of people having access to appropriate behavioral health services at the appropriate time.

8. What would be the adverse effects of not funding this policy package?

- People with intensive behavioral health treatment would likely continue to have unmet treatment needs that result in arrest, homelessness, and other undesired outcomes.

- People with intensive behavioral health treatment needs, who are disproportionately people of color, would continue to be served in less appropriate, and often more expensive, treatment settings.
- Continued unequitable distribution of resources available for community-based restoration and treatment services.
- Oregon may not meet the 2003 U.S. Court of Appeals Requirements of 7-day admissions to OSH for people ordered under ORS 161.370.
- Oregon may not meet 1999 U.S. Supreme Court Olmstead Requirements of placements for individuals in the least restrictive environments.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

For the 2017-19 biennium, OHA received funding for targeted communities to enhance crisis response systems and address community needs for the Aid and Assist population. The 2019-21 biennial budget included funding for OHA to open additional community resources to serve regional community needs for housing, behavioral health treatment, legal skills training to ready people for court, and to coordinate resources and needs for individuals. As a result of that package, OHA contracted with Northwest Regional Reentry Center, Lane County, Multnomah County and Coos County. All of those efforts have been helpful, but the needs are statewide and continue to exceed available resources. Additionally, Senate Bill 24 (2019) requires increased community consultation and local service provision. Oregon State Hospital has reconfigured resources to prioritize admissions for people under ORS 161.370 orders.

Beginning in summer of 2019, OHA staff have redoubled efforts to coordinate with community programs to prioritize discharges from OSH for people who no longer need hospital level of care. Clinical coordination occurs between staff of Oregon State Hospital, the HSD Office of Behavioral Health Services and community

providers. Limited community resources have frustrated efforts to provide appropriate services and housing for people to return to community settings. These efforts continue to be a top priority for the division.

10. What alternatives were considered and what were the reasons for rejecting them?

In 2003, the U.S. Court of Appeals ruled that people who are court-ordered for service to Oregon State Hospital under ORS 161.370 must be admitted within 7 days of the court order. OHA frequently struggles to meet that requirement and would be in a stronger position when more appropriate community capacity is available to expedite discharges for people who no longer need hospital level of care. The alternatives to the investments in this package include increasing capacity at OSH or violating the court order. Increased capacity at the state hospital could help, up to a point. However, it would be more expensive and may not be the most appropriate level of care. If OSH capacity is used for people who do not need hospital level of care, it limits access to hospital level of care for other people who need it. Substantial increases to state hospital capacity would not be supported by client advocates or statewide mental health programs.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

None.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

- Community Mental Health Programs would have resources to provide aid and assist services in their community for individuals who do not need a hospital level of care.
- OHA staff would remain in contact with Oregon Housing and Community Services to coordinate opportunities to enhance housing options for this group of people who are often houseless.

- The staffing that results from this package would allow OHA to better coordinate with the courts, corrections systems and law enforcement agencies to identify community-based treatment alternatives and better methods to engage with people with intensive behavioral health service needs prior to arrest.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

Oregon State Hospital, Association of Community Mental Health Programs, Community Mental Health Programs, community crisis programs, local Courts and Jails.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

Current data show tremendous health inequities for persons with intensive behavioral health needs. As mentioned above, 15.6 percent Oregon's population is non-white, but over 27 percent of people admitted under aid and assist are non-white. Further, Oregon's Black population represents 1.9 percent of Oregon's population, but is 9.4 percent of the Aid and Assist population at OSH. The staffing and evaluation funded through this package would help OHA identify root causes to this inequity and develop policies and adjust programs to eliminate this inequity.

Currently, for people who have been arrested and are determined by a court to be unable to aid and assist in their own defense, community-based restoration and treatment services are not available in every county. This policy package would provide investments so that each county would receive a base level of funding for community-based restoration and treatment services targeted for people who have been committed under ORS

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

161.370. This would create a more equitable distribution of those resources so that people who have been arrested have equitable access to restorative services and legal skills training when needed.

Staffing and fiscal impact

Implementation date(s): July 1, 2021

End date (if applicable): Ongoing

15. What assumptions affect the pricing of this policy package?

- Numbers of individuals needing restoration services in the community and needing hospital level of care, with an assumption of a 20 percent increase in services occurring in the community setting verses OSH.
- Required services needing to be provided, making up the case rate and reporting requirements.
- Median case rate includes 6.92 percent inflation.
- Four percent of clients served at SRTFs are Non-Medicaid eligible.
- All new SRTFs assumed to be in the Portland Metro area.
- One SRTF would ready for clients for the last six months of 2021-23. The other two facilities would be ready July 2023.
- The acuity of the people in the beds will also affect pricing.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

OHA would create an Intensive Service Unit to provide enhanced program development, program evaluation, subject matter expertise, technical assistance, contract development and administration, and utilization management for services provided to Oregon's mandated populations.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

None.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

This policy package would impact the Civil Commitment, Guilty Except for Insanity, Aid and Assist (both those served at OSH and in the community) caseloads. Improved management of services for individuals under aid and assist orders is expected to shift services from OSH to the community level for those who do not require a hospital level of care. This shift may stabilize, and possibly reduce, the Aid and Assist caseload served at OSH and increase the number of people under aid and assist orders served in the community. Further, as access to and coordination of care for individuals with intensive behavioral health care needs improves, OHA anticipates a reduction in the number of arrests of those individuals and therefore the number of individuals with intensive behavioral health care needs under aid and assist orders.

As Aid and Assist caseloads stabilize and/or reduce, OSH would have capacity to admit more patients under civil commitment, reducing the length of time and number of people who await admission to the state hospital from local acute care facilities and other locations.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This request includes six new permanent, full-time positions, priced at 18 months for the 2021-23 biennium.

Intensive Community Services Director – Principle Executive Manager G
The position would direct the full range of community based behavioral health services for people who have entered treatment through Oregon's court systems under ORS 161 and 426.

Court and Corrections Liaison – Operations and Policy Analyst 4
This position would serve as liaison between the Office of Behavioral Health Services and the court system, including judges, district attorneys, and defenders, and the correctional system. This person would focus specifically on the planning, policy and program recommendations for people who have entered the behavioral health system through Oregon's courts as a result of civil commitment, guilty except for insanity, aid and assist, or magistrate hold. The person in this position would identify program policy development needs, including administrative, legislative and funding changes to improve the effectiveness of the services and service delivery system.

Clinical Technical Assistance for Intensive Community Programs – Operations and Policy Analyst 4
This position would serve as clinical expert and treatment liaison between the Office of Behavioral Health Services Intensive Services Unit and the various treatment milieus, including Oregon State Hospital, community treatment programs, and correctional systems. This person would focus specifically on the planning, policy and program recommendations for people who have entered the behavioral health system through Oregon's courts as a result of civil commitment, guilty except for insanity, aid and assist, or magistrate hold. The person in this position would identify program policy development needs, including administrative, legislative and funding changes to improve the effectiveness of the clinical and treatment services and service delivery system. The person in this position would engage stakeholders statewide to improve systems, support policy and program development and collect feedback and work to achieve consensus.

Oregon State Hospital Social Work Liaison – Operations and Policy Analyst 3
The primary purpose of this position would be to serve as liaison and facilitate collaboration between the Office of Behavioral Health Services, community mental health programs, coordinated care organizations, residential treatment providers and the Oregon State Hospital social workers to coordinate admission and discharge planning for people at Oregon State Hospital. This person would focus specifically on the planning, policy, system performance, and program recommendations for people who have entered the behavioral health system through Oregon's courts as a result of civil commitment, guilty except for insanity, aid and assist, or magistrate hold. The person in this position would identify program policy development needs, including administrative, legislative and funding changes to improve the effectiveness of the services and service delivery system. The person in this position would engage a stakeholders to improve systems, support policy and program development and collect feedback and work to achieve consensus.

Co-occurring Treatment Services Specialist – Operations and Policy Analyst 3
This position would to provide leadership, coordination and oversight regarding co-occurring substance use disorder and mental illness within the behavioral health treatment service and delivery systems as they pertain to people who have entered the system through Oregon's courts as a result of civil commitment, guilty except for insanity, aid and assist, or magistrate hold. The employee would focus specifically on policy analysis, evaluates operational issues, project management through implementation of specialized programs and service delivery. The employee would also take the lead in developing improved case management systems and collaborates with physical and public health agencies in addressing issues of coordinated care for these individuals. Staff with specialized clinical and system management skill are necessary in order to appropriately place and maintain these individuals, in community settings.

Research Analyst 4
This position would organize, collect, and analyze data and information about people who utilize intensive behavioral health services to help identify trends, evaluate programs, and determine root causes behind trends.

OHA anticipates five existing positions would also become part of the Intensive Services Unit: three Operations and Policy Analyst 3 positions and two Compliance Specialist 3 positions.

20. What are the start-up and one-time costs?

The one-time costs would be for three 16-bed Secure Residential Treatment Facilities ($7.6 million General Fund) and start-up costs for the facilities ($6.0 million General Fund). The evaluation of demand drivers and capacity needs would be contracted through Program Design and Evaluation Services (PDES) for an estimated one-time cost of $0.5 million General Fund.

21. What are the ongoing costs?

The ongoing costs are OHA staff, community restoration costs, forensic costs, Oregon State Hospital case rate costs, and SRTF per diem rates for 48 clients.

22. What are the potential savings?

No savings are anticipated due to current forecast projections indicating OSH would continue to have capacity issues with the current number of beds available and the projected needs of the three mandated populations; civil commitment, guilty except for insanity and aid and assist.

23. What are the sources of funding and the funding split for each one?

A projected amount of $5.4 million Total Funds in Special Payments is attributed to Medicaid client payments, which receive federal matching funds. The federal match rate applied to these payments is a blended average of the 2021-23 biennium FMAP rates.

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE

Department of Human Services & Oregon Health Authority
2021-23 Policy Package

Division:	Oregon Health Authority / Department of Human Services (OHA/ODHS)
Program:	Health Systems Division, Health Policy & Analytics, Office of Business Information Systems, Office of Reporting, Research, Analytics & Implementation, Office of Information Services
Policy package title:	Improving Data Integrity and Compliance
Policy package number:	201
Related legislation:	None

Summary statement:

Data is an organization's most valuable asset, after its people. All services provided by the Oregon Health Authority (OHA) and Department of Human Services (DHS) depend on data and the ability to access, manipulate and integrate information. OHA and DHS lack a cohesive plan to secure, protect, manage, govern and support data - this must change. The difficulties faced by the Children's Health Complexity project are good examples of the difficulties faced trying to analyze current OHA and DHS data. A data strategy to improve data security and protection, and to perform data analysis, quality, governance, classification, integrity and management and meet legislatively mandated criteria defined by the 2013 HB 2134 and the open data standards criteria required by 2017 HB 3361 is required. To address this situation, a sustained effort with the right resources, professional support and tools is essential.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
DHS	$712,700	$0	$712,637	$1,425,337	7	5.25
OHA	$5,008,415	$3,785,884	$7,069,443	$15,863,742	19	17.25
Total Policy Package:	**$5,721,115**	**$3,785,884**	**$7,782,080**	**$15,863,742**	**26**	**22.50**

Purpose

1. Why does DHS/OHA propose this policy package and what issue is DHS trying to fix or solve?

This is a collaborative policy package between DHS and OHA. OHA and DHS are hampered by lack of standardization of data structures and classification. They deal with major challenges securing data across hundreds of systems; by risks associated with access to data by internal and external resources and by a fundamental lack of knowledge about how to manage and govern data. For example, there are at least six (6) different client indexes for identifying who received services between OHA and DHS. This makes getting a complete picture of the services any one Oregonian receives extremely difficult to ascertain. There are also legacy systems and data structures that need additional tools and linkages in order to be compliant with REALD requirements. These problems are compounded as systems continue to be implemented without addressing the indexing/standardization problem. Periodically, resources are shifted temporarily to attempt developing a strategy and approach. These have occurred in pockets and have not sustained. For OHA and DHS to address this situation, they must commit to a real and sustained investment in resources supported by consulting expertise and tools.

Management of data is a foundational component for improving reporting and obtaining a 360-degree view of the Oregonians we serve. The work in this policy package will also benefit work in a number of areas including Medicaid Modularity, financial systems, critical mainframe systems, and others. The development of standard data structures, consistent with the principles of master data management, will provide future systems with a solid foundation from which further development can take place.

2. What would this policy package buy and how and when would it be implemented?

This policy package includes three major areas of focus:

1. **Planning, assessment, strategic direction:** OHA and DHS need a plan to successfully improve management of their data. This requires external expertise plus dedicated program and OIS resources. Vendors with data expertise will provide guidance, knowledge and perspective supporting development of a data strategy. This work requires the undivided attention and time of program participants who understand the Agencies' data.

   A committed team of OHA, DHS and OIS resources must be invested in and sustained to support these efforts long-term. Funding for consulting services, permanent FTE representing each major program area in OHA and DHS and permanent FTE in OIS who understand where data is warehoused, accessed and secured are required. These resources will be fully engaged in the planning effort and will then lead and work on implementation efforts. Future biennia will require additional funds and resources to execute on the strategies and road maps developed by this cross-agency work group. Direct connection to the Governor's data initiative will be essential. Efforts include:

   A. Create a plan for establishing common indexes for identification across programs (e.g. client and provider identification).
   B. Create a data inventory using manual &/or automated systems for data cataloguing in compliance with the goals of HB 3361.
   C. Build awareness by communicating agency gaps in and availability of data
   D. Target list of data sets to pursue. This is highly resource-intensive with a high value outcome and involves systematically exploring available data sets throughout the organization. This work requires a deep understanding of the agency and its market, the capacity to methodically break down large sets of data into more manageable segments and the ability to focus singularly on this activity.
   E. Invest in data valuation: evaluate internal and external data sources and processes to identify, prioritize and acquire new data sources.
   F. Educate/Communicate: understand & communicate available data assets
   G. Optimize: extract maximum value from data including new or underutilized data

H. Comply: include REALD in strategic and tactical planning activities to ensure a viable approach for compliance with HB 2134 is achieved by OHA and DHS
I. Protect: develop a cohesive plan to eliminate or mitigate risks related to data privacy and protection and acquisition of tools and resources to monitor and protect data

2. **Address current gaps now:**
   A. Plan and implement standardized client identification in a modular manner. Procure and pilot master client identifier software that can be deployed modularly and scaled across the enterprise. This provides the capability to build new systems with standardized client identification and develop a plan for incorporating into existing systems.
   B. Procure enterprise data modeling and management tools and professional services. Fund 2 permanent OIS FTE to create and store master data definitions during application/database design, reverse-engineer existing databases to identify discrepancies, track data flows between applications to pinpoint their origin. These tools enable data comparisons between separate databases, allow for merging and updates across disparate databases and can be used to create and store master data definitions and apply those definitions during application/database design. This is a technical set of tools supporting a fundamental business purpose to enable, manage and enforce the use of meaningful, consistent data standards across the enterprise.
   C. Support business partners on current, specific operational dashboard and reporting needs by funding 2 permanent OIS FTE positions. OIS has staffing capability to only provide the infrastructure support for tools such as Microsoft Business Intelligence and Tableau Data Visualization. Larger programs have resources to leverage those tools, smaller programs have the same need for dashboards and reporting but lack resources to support. These FTE will be dedicated to help fill that gap with the work prioritized through Agency Governance.

3. **Pilot new capabilities:** Pilot an industry standard knowledge management system (Stack Overflow) to early adopter program areas in DHS and OHA. This product provides a self-service environment for business users to access information and mine questions and answers without reliance on OIS resources to

research and provide this data across multiple programs and multiple requests. Piloting and rolling out this product require funding the position request to have staff to establish, configure and support implementation of the tool and end-users. This pilot enables technical information sharing between various groups and programs providing an easy way to access answers or ask technical questions and see other's responses. This pilot can be available within 6 months of receiving funding approval and filling the requested positions.

3. How does this policy package further DHS's mission and align with its strategic plan?

This policy package aligns to and supports the Governor's Goal and Priority to "Modernize and standardize critical statewide systems..." It will "[optimize] service delivery to the public and internally by modernizing agency-specific and cross-agency systems..." and is an integral part of state efforts to "[create] and manage a statewide data strategy to improve data analysis, data quality, information sharing and overall decision making." It does so by building upon and improving the capacity of agencies to effectively use data and turn that data into meaningful information for agencies and stakeholders. It furthers DHS's mission to "help Oregonians in their own communities achieve well-being and independence through opportunities that protect, empower, respect choice and preserve dignity," by improving the Agency's ability to connect data sources to deliver meaningful measurements of outcomes. Existing fundamental outcomes and measures which stand to benefit from the activities of this policy package include Safety, Fiscal Responsibility, Service Equity and Community/Business Partnerships.

This policy package aligns with OHA draft Strategic Health Improvement Plan for 2020 - 2024. The draft plan focuses heavily on ensuring equitable access; improving behavioral health outcomes; mitigating the barriers of institutional bias; preventing trauma, toxic stress and adversity; and addressing economic drivers of health. To accomplish these goals in a data driven manner significant work will need to be completed. OHA and DHS will need to assemble member information for analysis across internal and external systems to inform decision making and track progress. This will require investment in data valuation, identification of target data sources, coordinated procurement of data.

Related policy packages being discussed and presented at this time seek to make use of standardized data to improve agency functions and decision making. As an example, the CCO 2.0 Quality and Data Collection policy package seeks to address the mechanism and manner of contract deliverable evaluations to ensure that contracted organizations are successful in delivering outcomes to Oregonians. Frequently that evaluative process involves reflection on CCO performance against key indicators at a member level. The type of data standardization proposed in this policy package will significantly benefit related packages such as the CCO 2.0 Quality and Data Collection package.

By treating data as an asset this policy package is also supportive of the data-driven decision making implicit in DHS's core values of Integrity, Stewardship, Responsibility, Respect and Professionalism. Supported decisions ensure that outcomes are maximized against expenditures and produce intended results with minimal unforeseen surprises.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

Data quality, integrity, availability and documentation have been cited in 16 audit findings from 2015 – 2019. This includes Statewide audits issued by the Secretary of State's office, as well as targeted audits of Behavioral Health Integration, and MMIS/ONE. As one example, audit findings and recommendations from 19-002 (OHA Behavioral Health Integration Audit) identify opportunity to "improve the quality of [REALD data]" to identify whether outcome disparities are present within the behavioral health delivery system.

The above finding notes that limited data and limited opportunity to incorporate new data sources on behavioral health residential patients' race and language constrains OHA and DHS's ability to identify and mitigate disparity within that environment. The activities described in this policy package will expedite, improve or otherwise strengthen the ability of both OHA and DHS to make and retain gains achieved in their remediation of audit findings such as the example provided above.

Quantifying results

5. How will DHS/OHA measure the success of this policy package?

- A comprehensive strategic direction is defined and documented supporting improvements in data management for OHA and DHS.
- A roadmap is defined charting a course of action for OHA and DHS to follow for ongoing investment in data management.
- Enterprise data modeling and management tools are implemented and leveraged.
- Business partners have improved access to Business Intelligence tools for dashboards and reporting.
- New knowledge management capabilities are piloted providing a self-service environment for business users to access information and mine questions and answer without reliance on OIS.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an DHS performance measure? If yes, identify the performance measure(s).

Though not directly tied to a specific legislative KPM this policy package is supportive of OHA and DHS's ability to accurately report on all KPMs. As a result, all KPMs stand to gain from the activities of this policy package.

This policy package does ties to OHA performance system outcomes by providing improved and connected data in the following areas:

- Increase Partner Satisfaction
- Measure Improvement
- Reduce Health Disparity
- Improve Population Health
- Improve Quality of Care
- Improve Care Experience
- Lower Health Care Cost

7. What are the long-term desired outcomes?

This initiative is anticipated to provide multiple beneficial outcomes including:

- More efficient and accurate reporting of required information to federal and state partners
- Reduced storage of unnecessary data
- Improved view of client information
- Enhanced agency credibility
- Improved customer service
- Increased efficiency and productivity
- Accurate reporting and informed decision making
- Improved adherence to data retention schedules
- Increased understanding of available data and data 'blind-spots'
- Improved strategies for identification and incorporation of new data sources

8. What would be the adverse effects of not funding this policy package?

Not funding this policy package compromises OHA and DHS in their ability to manage their programs and services effectively. The lack of a congruent data environment, massive duplication of data across myriad systems and services, the level of manual effort required to produce accurate, meaningful data in response to federal and state requests for information is untenable. Without the actions outlined in this policy package, the agencies will continue a downward spiral in their efforts to manage and maintain the vast level of data housed and managed by the organizations and will be increasingly unable to meet the growing need for data. This will impact not only administrative or reporting capabilities of agency business but also the overall quality of decision making the result of which will negatively impact the delivery and receipt of human services statewide.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

Multiple efforts have occurred over the past 10 years to try to manage data across both agencies more effectively, but these have been done in isolated ways related to single projects or in individual program area. None have been done in a holistic way nor has a cohesive plan been established. As examples:

- OHA and DHS are required to review and update the standards for collecting and reporting REALD data at least once every two years to ensure efficiency, uniformity and consistency with best practices and to report on "uniform standards for data collection and…implementation of standards across all data systems". To date, isolated efforts have been made such as: a 2015 high level assessment which determined that no systems or intake forms reviewed adhere to the REALD standards; a compliance gap analysis performed in 2016 with limited action in response; MMIS and VR's ORCA systems made required REALD updates in 2017/18; Public Health began work on an evaluation of processes and systems for compliance in 2019. There is an Agency level plan for addressing remediation of identified REALD gaps in compliance with applicable laws, but this is made more difficult due to technological gaps and the lack of a standard client identifier[1].
- Analysts working as part of OHA's Office of Equity and Inclusion have identified a remaining 68 databases which must achieve compliance with REALD. Of these, 10 are currently in an 'on track' status and are making progress toward compliance with REALD, 5 have already achieved compliance. Many of the databases yet to achieve compliance could benefit from linking to centralized or otherwise related REALD data. Achieving compliance through linking data, rather than maintaining data would provide an expeditious pathway toward meeting REAL-D requirements. This strategy is difficult to implement due to technological gaps such as the lack of a standard client identifier.

[1] A 2015 assessment determined no reviewed systems or intake forms adhere to REALD standards. MMIS and ORCA made REALD updates in 2017/18. Public Health began work on a process/system compliance evaluation in 2019.

- Some ad-hoc work, centered around projects has been done or is planned: OR-Kids data model is being re-architected; MOTS/Compass project is incorporating data planning; IE/ME project is implementing an integrated eligibility legacy data warehouse

Over the same period of time gap analyses and reports have been completed which point to many of the same issues and offer recommendations for remediation aligned with those described by this policy package. A September 2016 report on SB440 completed by Q Corp, for example, notes that development of data standards, exploration of funding enhanced data governance functions, and improving transparency and connectivity as key areas for improvement in support of REALD.

10. What alternatives were considered and what were the reasons for rejecting them?

1. Do nothing.
   This is not a viable option as the current situation is unsustainable. Manual data analysis, manipulation and presentation is extremely time-consuming, reliant on highly skilled individuals who retain the undocumented knowledge of how to mine and access the data. As these individuals retire, changes jobs or leave the agency, knowledge is lost. The level of data duplication throughout agency systems is rampant and debilitating to the agencies. Reconciling disparate information and providing credible information is costly and fraught with challenge.

2. Continue relying on project-centric work efforts to pursue a patchwork of data information.
   This is a losing proposition on many levels. This approach inappropriately and unnecessarily burdens these initiatives adding to their schedule, cost and risk. It also persists the very problem that needs to be resolved by producing additional sources of duplicate data.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

- This policy package is in alignment with the Tribal Behavioral Health Strategic Plan for 2019 – 2024 which includes assembling an inventory of Tribal BH data sources, identifying gaps and redundancies, and mitigating those gaps where possible. This policy package will benefit Tribal partners by increasing available resources for data inventorying and acquisition.
- This policy package would support the efforts of the REAL-D Data Governance Committee by providing additional tools to help attain REAL-D compliance across OHA, DHS, and OIS.
- DHS and OIS will have new responsibilities similar to those outlined for OHA in question 16.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

This is a collaborative effort between OHA and DHS and includes engagement and involvement of OIS. This effort will also leverage and align with any related efforts occurring at the state level.

14. How does this policy package help, or potentially hinder, populations impacted by inequities or disproportionalities from achieving health, well-being and independence?

- The inability to accurately record and report longitudinal data for recipients of OHA and DHS services is liable to disproportionally impact historically underserved populations.
- Improvements to OHA and DHS' ability to manage their data will have a direct positive impact on people's health, health care and the health care system. Accurate information will enable health systems to develop

holistic views of patients, health trends, and treatment methods. Accurate information improves communication between health care providers and their patients enhancing health outcomes.

- Improved access to accurate health data and the ability to analyze it is essential for tracking disease trends (such as Covid-19) and risk factors. This information will help inform public health determinations, patterns of care and other crucial monitoring and projections.

Staffing and fiscal impact

Implementation date(s): July 1, 2021

End date (if applicable): On-going, multi-biennia effort resulting in a new way to manage and de-duplicate data for OHA and DHS

15. What assumptions affect the pricing of this policy package?

- Cost of professional services is assumed to be in alignment with other comparable efforts.
- Cost of staffing is assumed to be relatively constant.
- Federal enhanced funding will be available and leveraged for all Medicaid related efforts.
- Resources with the necessary skills will be available.

16. Will there be new responsibilities for DHS? Specify which programs and describe their new responsibilities.

While new responsibilities will not be specifically assigned to OHA or DHS as the result of this policy package, OHA and DHS will be called upon to commit resources and attention to the maintenance of existing responsibilities such as those outlined in the Governor's plan to modernize state information technology systems. As noted above these responsibilities include:

- Modernization and standardization of critical systems, agency-specific and cross-agency systems

- Creating and managing a data strategy to improve data analysis, data quality, information sharing and overall decision making. This includes the broad functions necessary when implementing data governance and master data management.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

In the same way OHA and DHS will not be specifically assigned new responsibilities, no new responsibilities will be specifically assigned to Shared Services. Shared Services will continue to maintain their supportive roles of both agencies.

As this work matures Shared Services will benefit from a reduced demand for ad hoc reporting or research. As described above these gains will help measure the success of this policy package. Furthermore, piloting of a knowledge management system will limit the need for Shared Services to respond to redundant questions by allowing users to self-serve answers to common and uncommon questions alike.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This policy package requests funding for 25.5 permanent positions to support this long-term effort. Positions are new and include:

- Planning, assessment, strategic direction – 15 positions
    - 9 OPA 4 (4 OHA, 4 DHS, 1 OIS)

  - 4 OPA 3 (2 OHA, 2 DHS)
  - 1 ISS8 (OIS)
  - 1 ISS7 (OIS)

- Address current gaps now – 4 positions
  - 2 ISS8, 2 ISS7 (OIS) for database tool specialists and data visualization report writers

- Pilot new capabilities – 6.5 positions
  - 1 ISS8 (OIS)
  - 2 OPA4 (1 OHA, 1 DHS)
  - 3 ISS7 (OIS)
  - .5 PEM D (OIS)

20. What are the start-up and one-time costs?

- $6 million in professional services for a data vendor to guide and support strategic planning, business case development, assessment, market research, solution identification, and piloting.
- $400,000 for IT professional Services and $420,000 for software licensing.

21. What are the ongoing costs?

Additional licensing and other costs may be needed and will be defined as an outcome of the work outlined for the 2021-23 biennium.

22. What are the potential savings?

- Increased staff efficiency from not having to search through multiple systems to find needed data.
- Reduced storage costs from de-duplication of data.
- Faster response time to ad-hoc requests for information from public entities, federal and state partners.

23. What are the sources of funding and the funding split for each one?

General Funds with Medicaid Admin Matched federal funds.

DHS Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Personal Services	$592,525	$0	$592,525	$1,185,050	7	5.25

Oregon Health Authority & Department of Human Services
2021-23 Policy Package

Division:	OHA Health Policy & Analytics and DHS Office of Business Information Services
Program:	Office of Health Information Technology
Policy package title:	Statewide Community Information Exchange
Policy package #:	202
Related legislation:	None

Summary statement:

This policy package supports a Statewide Community Information Exchange (CIE) that will electronically connect health care and social services to support Oregon Health Plan and DHS clients in need. This statewide initiative leverages CIEs implemented by CCOs and provides OHA and DHS with CIE platforms to screen Oregonians in need, locate community resources, and make referrals. It integrates local CIE networks, creates a centralized resource directory, and coordinates tools and standardizes data and measures. Without funds OHA and DHS staff will lack the tools to respond to the increased needs of OHP members and DHS clients after the enormous disruptions of COVID-19. Without funds to connect local CIE networks and standardize tools, the result will be an increased burden on community-based organizations, fragmented services, and gaps in service delivery. Without meaningful coordination and follow-up on social service referrals, health disparities will persist, the system will perpetuate inequities, and ultimately our most vulnerable Oregonians will be left behind.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
DHS	$115,944	$0	$347,816	$463,760	2	1.84
OHA	$936,557	$517,533	$5,166,172	$6,620,262	19	17.25
Total Policy Package:	**$1,052,501**	**$517,533**	**$5,513,988**	**$7,084,022**	**6**	**5.52**

Purpose

1. Why does OHA/DHS propose this policy package and what issue is OHA/DHS trying to fix or solve?

Over the next two years, the Oregon Health Authority (OHA) expects to be responding to the enormous disruption of COVID-19 by adopting targeted policy and program changes that stabilize the health system and coverage and allow us to rebuild a more sustainable and equitable system for the longer term. A statewide Community Information Exchange (CIE) network is a foundational element of rebuilding a more equitable system in Oregon. A statewide CIE network connects Oregon's health care sector (providers, health plans, CCOs) with social service providers across Oregon and supports meaningful efforts to address social determinants of health (SDOH) in communities hard hit by historical and structural disparities. A statewide CIE bring more effective and efficient identification of appropriate social services resources, closed loop referrals to social services, and better data on social service needs and gaps across Oregon.

Addressing these SDOH needs is a top priority for Oregon's health system transformation and the importance has only grown with the COVID-19 crisis. With the health and economic effects of the pandemic disproportionately affecting Oregon's most vulnerable populations, the need for public programs will increase caseload for the Oregon Health Plan and Department of Human Services (DHS) programs. Many Oregonians needing to quarantine to recover from COVID, or those with underlying conditions needing to self-isolate, will also need supports for housing, food, childcare, safe transportation or other services to keep themselves, their families, and their communities safe from COVID. For families and individuals facing inequities in access to care and health outcomes, ensuring social supports are in place will be even more critical. Hospitals and health care providers, as well as Coordinated Care Organizations (CCO) and health plans, will need better avenues to connect their patients and members to the social services they need, and will need better tools to track whether those services have been received. Community based organizations (CBOs) delivering and supporting social

services, including 211info and others, will need better tools to manage referrals and provide the safety net we are all relying on during this economic and public health crisis.

Oregon stakeholders – including leaders across all major health care institutions - have been leading the charge to address social needs through partnerships between health care and community-based organizations. The Oregon Health Leadership Council (OHLC) and Health Information Technology (HIT) Commons have played a coordinating role, but it has been the hospital, CCO, health plan, provider, and health system leadership that have led to conversations about establishing CIEs.[1] The goal of these stakeholders is to help their clients, patients, and members by making electronic referrals to appropriate social services resources to address these needs through the implementation of CIEs throughout the state.

- Community Information Exchanges are enabled through CIE platforms that provide the technology to electronically connect health care, human and social services partners to provide many functions, including a statewide social services directory, shared risk assessment capabilities, real-time closed loop referral management, collaborative care plans, standardized outcomes, and data analysis.
- Nearly all CCOs are in some phase of planning or implementing CIE platforms for their communities along with Kaiser and others.
- Having shared platforms that "close the loop" on referrals, means that a CCO or provider can often hear back whether their patient or member received social supports. This is a critical component that helps health care partners target their care management resources to those that are falling through the cracks.

While the move toward CIEs is driven by our stakeholders, the state must be involved to meet two needs.

[1] For more information on Oregon's Community Information Exchange landscape and HIT Commons/OHLC coordinated efforts, see http://www.orhealthleadershipcouncil.org/oregon-community-information-exchange-ocie//

- First, as our stakeholders press forward with CIE solutions, OHA and DHS staff lack similar technology to assess for needs, identify resources, and track referral status and outcomes in one place. Although our agencies seek to refer and connect clients and OHP members to social services, our current systems and abilities to do so are disjointed. Providing OHA and DHS access to CIE would improve service coordination and efficiency.
- Second, as external stakeholders stand up local CIE solutions, there is a considerable risk of duplication, inefficiencies and added burden to CBOs that would detract from the impact of CIE systems. OHA and state of Oregon leadership and state-funded work is needed to support the implementation of Oregon's CIE Roadmap – which is in development and would lead to statewide integration, coordination and governance, and support for CBOs and health care users in efficiently using CIE solutions.

2. What would this policy package buy and how and when would it be implemented?

Community Information Exchanges are enabled through CIE platforms that provide the technology to electronically connect health care, human and social services partners to provide many functions, including a statewide social services directory, shared risk assessment capabilities, real-time closed loop referral management, collaborative care plans, standardized outcomes, and data analysis. This policy package seeks funding to meet two needs:

First, provide OHA and DHS with CIE platforms, leveraging CIEs being implemented by CCOs and others across Oregon. OHA and DHS programs would use CIE platforms to locate community resources and refer them to appropriate service providers all in shared CIE platforms, see if the individual obtained services, and provide the capability to pull data for analysis to inform decision making.

- An OHA/DHS agency CIE subscription to cover state programs supporting the Medicaid population for:

- DHS and OHA state agency staff
- Potentially other contracted orgs like CCOs, Area Agencies on Aging (AAA), Developmental Disability (DD) Brokerages, tribal clinics, and Fee For Service care coordination entities (Kepro and CareOregon). Although CCOs are currently investing in CIE, a statewide subscription would bring better federal matching funds and potentially a better discounted price.

Second, prevent network fragmentation by supporting integration between CIE networks, interoperability of systems, a centralized resource directory, coordination of screening and assessment tools and the standardization of data definitions, and outcome measures. OHA work supported by this policy package would:

- Connect all major CIE platforms used throughout the state into a larger referral network, in turn connecting OHA/DHS users more effectively.
- Enhance the Oregon Provider Directory to act as a central community resource directory for the major CIE platforms as well as meeting 211info's directory needs.

To support this implementation and operations the following policy and implementation resources are included in this policy package:

- DHS and OHA staff
- A Quality Assurance contractor
- CIE consultant
- HIT Commons (governance, technical assistance), and project support

Planning efforts for a statewide CIE network will begin in 2021 with the anticipation of necessary contracts starting in 2022 and into 2023. For the OHA/DHS CIE platform, procurement would include DAS/OIS/QA oversight processes. For efforts to connect across Oregon CIEs including enhancements to the Oregon Provider

Directory, amendments to existing contracts with HIT Commons and the Oregon Provider Directory vendor would be necessary. The HIT Commons and CIE consultant would assist in the implementation.

3. How does this policy package further OHA's mission and align with its strategic plan?

This effort aligns with Governor Brown's 2019 Healthcare for All Plan as well as supports the Oregon Coordinated Care vision to achieve the triple aim of better health, higher quality, and better use of resources. It also directly aligns with the implementation of HB 3076 Community Benefits spending floor, and CCO 2.0 policy recommendations to focus on SDOH (like housing) and the social determinants of equity towards improving health equity.

The importance of addressing the SDOH is outlined in:

- The Oregon Health Policy Board's Action Plan for Health: 2017-2019 Refresh https://sharedsystems.dhsoha.state.or.us/DHSForms/Served/le9963.pdf
- State Health Improvement Plan https://www.oregon.gov/oha/PH/ABOUT/Pages/ship-process.aspx
    - Specific Strategy: "Create a statewide community information exchange to facilitate referrals between health care and social services" (under Access to equitable preventive health care - Goal 3: Implement systemic and cross-collaborative changes to clinical and community-based health related service delivery to improve quality, equity, efficiency and effectiveness of services and intervention:[2]
- OHA's Health Information Technology Oversight Council's (HITOC) Strategic Plan for 2017-2020 update.

[2] https://www.oregon.gov/oha/PH/ABOUT/Documents/ship/2020-2024_SHIP_Strategies.pdf

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA/DHS measure the success of this policy package?

OHA will know if the policy package was successful by monitoring impact on process and outcome measures, including measures below. HIT Commons would play a major role in reporting to all stakeholders on the progress and success of this work. Considerable data analysis on referrals made and needs met are available within CIE platforms, enabling nimble monitoring of the success of these efforts. Measures of success with implementation of statewide CIE would be:

- Reduced time from social service referral to service delivery
- CIE participants (including DHS/OHA staff and contractors) report spending less time referring clients to services and managing referral status and service outcomes
- CBOs report reduced time managing referral lists and reduced wait time
- Services received by individuals reflect the social needs identified in screenings
- Clients report increase in social needs being addressed and better health, and improved patient experience
- Improved health outcomes via CCO metrics
- SDOH screening after services received show increase in positive health outcomes
- Measure showing narrowing of the equity gap by reducing health disparities
- Satisfaction of CIE participants and increased community collaboration

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

Statewide CIE would contribute to all off OHA's key goals. It would provide a tool that engages staff to participate in operational excellence. The network would facilitate effective partnerships while addressing inequities, lowering costs, improve health, and provide better care. It would address the following measures:

OHA's Key Performance Measure:

- Member Health Status

OHA's Performance System Outcome Measures:

- 1AOM2. Increase Partner Satisfaction
- 1AOM6. Reduce Health Disparity
- 1AOM7. Improve Population Health
- 1AOM8. Improve Quality of Care
- 1AOM9. Improve Care Experience

7. What are the long-term desired outcomes?

The long-term outcome of implementing a statewide CIE network would be an efficient social services referral system that results in better health of Oregonians and reduced health disparities. Additional outcomes would be:

- The disparate and often homegrown lists of social services resources will be eliminated, and stakeholders have a clear picture of services available in communities.

- Health care providers, CCOs and OHA/DHS programs will have transparency into an individual's social services received and outcomes and improve effectiveness and efficiency for managing OHP and DHS caseloads.
- Oregon leadership and policy makers will have data on resource needs, services provided, and outcomes that are comparable across the state. This information will be critical in decision making about appropriating funds to different needs in communities.
- The health care delivery system and OHA/DHS programs will have information on how to better address the health of their patients/members, where to invest funds into local social services, and improve health outcomes.

Supporting a statewide CIE network also directly responds to the COVID-19 crisis. A CIE helps stabilize the health care system by allowing providers to build in the social supports needed for better clinical outcomes, easing discharge bottlenecks for care facilities, and enhancing the ability of OHA/DHS to manage case load increases and addressing health inequities seen by the COVID impact to vulnerable communities. Social services are critical to support vulnerable Oregonians needing to quarantine to recover from COVID, or those with underlying conditions needing to self-isolate, including supports with housing, food, childcare, safe transportation or other services to keep themselves, their families, and their communities safe from COVID.

8. What would be the adverse effects of not funding this policy package?

The state needs to be involved. Putting more burden on social services that are already overtaxed puts Oregon's most vulnerable at greater risk and if OHA does not engage in these activities we risk the following:

- Failure to join our external partners will leave OHA and DHS staff without the tools in responding to the increased the strain on the Oregon Health Plan and DHS.

- Failure to coordinate local CIE networks will lead to increased burden to CBOs, fragmentation of services and data leading to gaps in delivery, under or overestimated needs, and ultimately leaving our most vulnerable Oregonians with the responsibility of navigating the navigators.
- Our vulnerable populations will not have access to more efficiently managed program referrals and perpetuate inequity.
- It would leave the opportunity to access a large portion of federal matching funds which would offset efforts by CCOs, tribes, payers, providers, and health systems.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

Oregon stakeholders have been leading the charge to address this problem and many are beginning to adopt local CIE platforms at CCO, health plan, and community levels. Oregon Health Leadership Council has engaged several systems and payers in a coordinated implementation of the UniteUs CIE platform and HIT Commons has launched a CIE Advisory Group (supported by OHA). Nearly all CCOs have adopted or are in process of adopting a CIE.

OHA has assisted in coordination and planning within the emerging CIE landscape. Efforts include:

- Supporting the development of a CIE Roadmap through HIT Commons to identify recommendations statewide.
- Coordinating an internal OHA/DHS CIE workgroup to track and inform CIE Roadmap and other efforts
- Coordination of screening and assessment tools and the standardization of data definitions
- Exploring the use of the Oregon Provider Directory as a central resource directory for social service providers, 211info, as well as healthcare providers.
-

10. What alternatives were considered and what were the reasons for rejecting them?

Alternative One: Do Nothing

- OHA/DHS allows the market to continue as is and not obtain a subscription for state agencies or directly support integration of networks nor provide policy support or other coordination. This would leave our own agencies without the tools to assist our most vulnerable populations and allow uncoordinated and fragmented networks to grow with only local resources and support leaving sections of the state without any tools available. It would also leave a significant portion of federal match dollars untapped to support CCOs, tribal clinics, and partner agencies to pay 100% of their own funds not at a reduced rate.

Alternative Two: Coordination Only

- OHA/DHS allows the market to continue as is and not obtain a subscription for state agencies or directly support integration of networks. However, OHA and DHS provide policy and analytical support through the HIT Commons CIE Roadmap, bring stakeholders together and make statewide recommendations. This would still leave our own agencies without the tools to assist our most vulnerable populations. Networks may be somewhat less fragmented if statewide recommendations were voluntarily adopted. However, networks would still be limited by local resources and support leaving sections of the state without any tools available. It would also still leave a significant portion of federal match dollars untapped to support CCOs, tribal clinics, and partner agencies – many of whom would be unable to participate financially or would need to pay 100% of their own funds not at a reduced rate.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

DHS field staff, tribal clinics, and other contracted organizations like CCOs, AAA, Developmental Disability Brokerages, and Fee For Service care coordination entities (Kepro and CareOregon) would be offered a Medicaid subscription of CIE platforms to locate community resources, refer them to appropriate service providers, see if individuals obtained services, track outcomes, and pull data for analysis to inform decision making. The network would offer a centralized resource directory, coordination of screening and assessment tools and the standardization of data definitions, and outcome measures. This would greatly serve these organizations with case management programs to help streamline the screening, referral, and delivery of services process. It will require staff training, change management, and a transition from their current processes to utilize the new platform.

There are additional state and local governmental agencies (e.g., corrections, education, housing services) who do not serve Medicaid that may want to participate in a statewide CIE network and would benefit from reduced bundled pricing.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

OHA has assisted in coordination and planning within the emerging CIE landscape. Efforts include:

- An OHA/DHS Internal CIE Advisory Group launched in 2020 to help coordinate and educate around future efforts. This includes representation by each division in DHS, Health Systems Division (Medicaid and Behavioral Health), Public Health, and Health Policy and Analytics.
- Supporting the development of a CIE Roadmap through HIT Commons to identify recommendations statewide.

- Exploring the use of the Oregon Provider Directory as a central resource directory for social service providers, 211info, as well as healthcare providers.

Oregon health care stakeholders – including leaders across all major health care institutions - have been leading the charge to address social needs through partnerships between health care and community-based organizations. The OHLC and HIT Commons have played a coordinating role, but it has been the hospital, CCOs, health plan, provider and health system leadership that have led to conversations about establishing CIEs. The goal of these stakeholders is to help their clients, patients, and members by making electronic referrals to appropriate social services resources to address these needs through the implementation of CIEs throughout the state.

Oregon social services stakeholders are also engaged, including 211info, Continuum of Care agencies, Oregon Food Bank, and other agencies participating in the HIT Commons CIE Advisory Group.[3]

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[4] or equitable health outcomes?

Health starts in the community. However, historical and present-day injustices and institutional bias cause marginalized populations to live in less healthy environments with fewer social and economic opportunities and resources. While clinical care accounts for 20% of a person's health, 80% is influenced by these environment and socioeconomic inequities outside of a doctor's office (County Health Rankings). The 2018 State Health Assessment shows that 1 in 4 children experience food insecurity and over 15,000 adults

[3] See members here: http://www.orhealthleadershipcouncil.org/oregon-cie-advisory-group/
[4] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

experienced homelessness as of January 2019. CIEs allow healthcare provider and social service providers to come together to address these social determinants of health and ameliorate the effects of health inequities.

Staffing and fiscal impact

Implementation date(s): July 1, 2021

End date (if applicable): Ongoing

15. What assumptions affect the pricing of this policy package?

The following assumptions drive the pricing listed in this package:

- OHA/DHS uses can be met through CIE solutions that are being implemented by CCOs and others across Oregon.
- Federal Medicaid matching funds will be available for CIE investments. OHA has engaged CMS to ensure support for Medicaid-related costs related to CIE.
- Pricing assumptions are conservative and based on initial market analysis, but actual pricing may vary.
- Integrations between different CIE platforms will be $75,000 per integration and that we will need up to ten integrations.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

OHA, in partnership with DHS, will be responsible for managing the Medicaid CIE subscription contract, manage the integration of CIE networks, onboarding and offboarding agencies' staff and network partners, and stewarding social service data in the Oregon Provider Directory.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

Temporary project support from OIS will be necessary and is included in the staffing requested. After implementation we anticipate the solution will be provided as Software as a Service (SaaS) and not require significant ongoing support from Shared Services. Procurement and contracting support will be needed to implement this work.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

Agency	FTE	Classification	Duration	Position Type
OHA	1.0	OPA4	Start 2021 and ongoing	Permanent
OHA	1.0	OPA3	Start 2021 and ongoing	Permanent
DHS	2.0	OPA3	Start 2021 and ongoing	Permanent
Shared Service	1.0	PM3	Start 2021 and end in 2023 or 2024	Limited Duration
Shared Service	1.0	ISS7	Start 2021 and end in 2023 or 2024	Limited Duration

20. What are the start-up and one-time costs?

Cost estimates are preliminary and based on initial market research. Actual costs may vary.

- CIE Integrations with state IT systems & other CIEs: $750,000 DDI
- Oregon Provider Directory Enhancements and Integration with CIEs and 211info: $1,800,000 DDI

- Quality Assurance Vendor for DDI: $300,000 across two years
- CIE consultant: $40,000 across two years
- DOJ costs: $100,000 across two years
- Shared Service limited duration staff positions
- OHA and DHS permanent staff positions

21. What are the ongoing costs?

Cost estimates are preliminary and based on initial market research. Actual costs may vary.

- CIE Subscription and Licenses Costs: $800,000 - $1,000,000 per year
- Maintenance of CIE Integrations with state IT systems & other CIEs: $100,000 per year
- Oregon Provider Directory: $250,000 per year
- HIT Commons: $300,000 per year
- All OHA and DHS staff positions

22. What are the potential savings?

The potential fiscal savings as a result of this policy package are unknown but potentially significant. There are anticipated cost savings for case managers' time as this will create a more efficient means to conduct and track referrals. It will also provide the state with data on population needs and resources which may assist policy makers in appropriate budget allocation.

23. What are the sources of funding and the funding split for each one?

Planning and implementation costs (including contractor and staffing) at 90/10 (federal / state).
Ongoing maintenance and operations costs (including contractor and staffing) at 75/25 (federal / state).

Oregon Health Authority
2021-23 Policy Package

Division:	Health Systems Division
Program:	Business Operations, Contracts and Procurement
Policy package title:	Expansion of Capacity for HSD Contract Development
Policy package number:	412
Related legislation:	None

Summary statement:

The Oregon Health Authority Health Systems Division program and operations are an essential part of expanding and refining Medicaid and Behavioral Health programs and services throughout Oregon. HSD currently maintains oversight of 550 active contracts, processing over 180 contract action requests, such as new contracts, amendments, and solicitations, each calendar quarter. In order to better serve Oregonians, HSD must expand its capabilities and capacity in order to manage the increasing demands and meet crucial service levels for new contract requests, solicitations and contract amendments.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$237,898**	**$10,476**	**$248,382**	**$496,756**	**2**	**1.50**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

The Contracts Unit is responsible for processing all contract action requests for the Behavioral Health section, including Adult and Residential Mental Health, Children and Family Mental Health, and Addiction Treatment, Recovery, and Prevention. These services are contracted with a variety of different entities with the highest volume of state funding going to the Local Mental Health Authorities through their Community Mental Health Programs. Medicaid and behavioral health contracts are the mission essential mechanisms for providing health services to Oregonians. At present, there are only three specialists in the Contracts Unit with the skills and qualifications to provide contracting services to the Behavioral Health teams. In addition, this team is processing an average of 35 percent of all the Oregon Health Authority's (OHA) contracting services, which is the highest volume of any division in the agency. This is 10 percent higher than the next closest division (Public Health) and 20 percent more than the three remaining divisions.

In early 2019, HSD and OHA chartered a focused effort to improve the overall contracting process. One of the key criteria was to change the terms of CFAA financial awards and other contracts from two-year to one-year terms, providing HSD the ability to better gage contractor performance and adapt and adjust language. Coinciding with this, OHA has been working to expand Behavioral Health Services in Oregon. This has increased the overall number of contracts and will significantly increase the number future amendments or actions.

HSD is working to develop the appropriate amount of contract development capacity and improve the current paper-based process into a modernized process capable of remotely supporting the business needs, contract development timelines capable of remote management for continuity of operations.

2. What would this policy package buy and how and when would it be implemented?

This policy package would add two permanent positions to the Contracts unit and support the re-licensure of the digital contract lifecycle management system (CLM). HSD would increase its capacity to complete 18 additional contract actions per month and reduce the average throughput times to meet newly set service levels for contract actions: 60 days for new contracts, 90 days for solicitations and 30 days for amendments.

3. How does this policy package further OHA's mission and align with its strategic plan?

The OHA mission to provide equitable access and availability to health care starts with purchasing for health care value. Contracts are the essential mechanism for OHA programs to help people and communities achieve optimum physical, mental and social well-being through the provision and access to quality affordable health care. Managing contracting procurement and grants is a key process identified in the OHA Performance System. The HSD Contracts Unit is one of the largest contracting areas within OHA. The work of the unit accounts for all procurement support for the Behavioral Health and some Medicaid. This policy package would enable a more adaptive, responsive and timely contracting process capable of meeting the agency and program needs to achieve this mission. This also ensures continuity of operations for the contracting process.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

Improved Service Levels
The current baseline to complete a contract action is 80 days for new contracts, 47 days for contract amendments and 112 days for solicitations. The combination of a streamlined process with the additional FTE completing new contract requests will enable HSD to achieve newly set service levels for contract actions: 60 days for new contracts, 90 days for solicitations and 30 days for amendments. HSD has added these metrics to the Performance System Dashboard.

Completed Contract Actions
On average there are 90 contract actions in process. HSD currently averages 34 completed actions each month. The HSD target for completed actions is greater than 50 completed actions per month.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

Not directly. This policy package is tied to the OHA performance management system's "Purchasing for Health Care Value" core process, which includes measures monitor contract cure actions, active contract administration, and payments by other than CCOs tied to quality.

7. What are the long-term desired outcomes?

High performing contracts and procurement process capable of sustaining business needs, exceeding customer service expectations and mitigating agency risk.

8. What would be the adverse effects of not funding this policy package?

Delays in the contracting process adversely impact the ability to provide access to care, availability of services to Oregonians and financially constraints for our service providers.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

Thorough analysis of the contracts, voice of customer exercises conducted to optimize the manual process as much as possible. These did not resolve the capacity concerns and could not mitigate the more modern needs for effective procurement.

10. What alternatives were considered and what were the reasons for rejecting them?

The Contracts unit considered adding staff via short-term, limited duration unbudgeted positions, however, the increased demand is expected to be ongoing. Procurement requires advanced skillsets and training necessitating retention of trained employees. Therefore, the lack of retention makes limited duration an unsustainable long-term solution.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Office of Contract and Procurement and Department of Justice would need training and a license to work within the digital software solution. They would then be able to become part of the streamlining for contract development and execution through digital signatures.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

OHA Directors Office, HSD Leadership, Office of Contracts and Procurement, Department of Justice and other OHA divisions interested in the system solution.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

All HSD program services are dependent on the procurement process. This policy package would help to expedite all contract actions that support improved health equity and equitable health outcomes.

Staffing and fiscal impact

Implementation date(s): April 1, 2020

End date (if applicable): Ongoing

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

15. What assumptions affect the pricing of this policy package?

- Number of FTE as compared to the capacity requirements for contract development.
- Number of licenses necessary to support contract development.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

No.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

The current process for OC&P contract development would change with the digital solution to the use of digital envelopes for contract execution.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

Yes. Two new permanent, full-time Fiscal Analyst 2 positions.

20. What are the start-up and one-time costs?

None.

21. What are the ongoing costs?

Costs for new positions ($349,000), licensure continuation ($59,000 per year), and 4,000 digital envelopes ($29,440).

22. What are the potential savings?

Indeterminant savings resulting timeliness of contract implementation and cost of delay. Better reconciliation for settlement.

23. What are the sources of funding and the funding split for each one?

These positions would be funded through a cost allocation pool that distributes costs by General Fund, Lottery Funds, and Federal Funds.

Oregon Health Authority
2021-23 Policy Package

Division:	Oregon State Hospital
Program:	Oregon State Hospital
Policy package title:	Person Directed Transition Team
Policy package number:	413
Related legislation:	None

Summary statement:

This request is for funding of The Person Directed Transition Team (PDTT), to both continue the established work of the PDTT for persons with a civil commitment to the Oregon State Hospital (OSH) and expand PDTT services to persons committed under the Psychiatric Security Review Board (PSRB) and under Aid and Assist orders for competency restoration. The PDTT has demonstrated efficacy in motivating patients to participate in aftercare planning and supporting successful community transitions for patients that are civilly committed. Both patients under the PSRB and Aid and Assist restoration orders have been identified as sharing common barriers with the civil population and would benefit from PDTT services. If PDTT is not funded, OSH's need for intensive and individualized transition services for the most complex patients at OSH will go unmet. Such patients could be more likely to remain at OSH when treatment in the community in a less costly and less restrictive environment is appropriate and required by Department of Justice guidelines.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$1,853,883**	**$0**	**$0**	**$1,853,883**	**8**	**7.40**

Oregon Health Authority: 2021-23 Policy Package

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

Many patients at OSH are hard to place in the community due to clinical complexity and discharge barriers such as fear of leaving the hospital, community-based skill deficits, and resistance towards engaging in treatment. Highly institutionalized patients may struggle to adapt to life in the community without the consistency of the hospital environment and staff that are familiar with effective, individualized interventions. As the demand for state hospital beds continues to grow, services that encourage and support discharge, and prevent recidivism, must be prioritized.

The primary goal of the PDTT is to provide intensive, individualized, person-directed treatment for patients who have the greatest difficulty discharging from the Oregon State Hospital. The PDTT has demonstrated efficacy in motivating patients to participate in aftercare planning and supporting successful community transitions for patients that are civilly committed.

2. What would this policy package buy and how and when would it be implemented?

The PDTT began as a pilot project at OSH to further support the timely discharge expectations of the Department of Justice (DOJ) agreement known as the Oregon Performance Plan. The work has continued without permanent funding, creating budget challenges, since 2017. The PDTT is currently staffed with a team of four contractors. OSH is seeking funding to establish the PDTT permanently with full-time positions to continue the existing work of the PDTT in serving civilly committed patients at OSH, and to expand and adapt services to both the PSRB and Aid and Assist populations. Aid and Assist refers to people coming to OSH under court order for restoration services to allow them to “Aid and Assist” in their own defense.

The requested would establish eight full-time positions: three occupational therapists (currently contracted), one peer specialist, and four psychiatric social workers (LCSW).

PDTT program oversight will be provided by the current OSH PDTT Contract Administrator and the Director of Social Work in consultation with stakeholders at OSH and the OHA Health Services Division.

Permanent implementation of the PDTT at OSH will increase OHA's ability to meet performance measures on transition timeliness for civilly committed patients. The service expansion to patients, regardless of jurisdiction, would allow the PDTT to serve those most in need of transition services, reducing the length of stay at a hospital level of care and improving patient outcomes in the community.

If approved, the policy package will be implemented July 1, 2021 for the conversion of existing contracted positions to OSH employees, with recruitment and hiring of remaining expanded positions to occur approximately October 1, 2021, depending on standard recruiting processes.

The PDTT utilizes innovative transition services which prioritize person-centered treatment methodologies. The team works with small caseloads of patients who are difficult to engage using traditional approaches and who are at high risk of readmission to OSH. Interventions address patients' internal discharge barriers such as institutionalization, community-based skill deficits, and resistance towards engaging in treatment. The team does this by using a person-directed approach that directs treatment around goals that are meaningful to the patient. This allows the patient to steer the treatment course, increases their motivation, and maximizes engagement. The result is a therapeutic process that centers on community-skill development, supportive transitions, and the cultivation of hope.

3. How does this policy package further OHA's mission and align with its strategic plan?

PDTT use of Person-Centered Care and consumer driven interventions are in line with OSH's mission of health equity, service excellence, and innovation. The team has relied on progressive and evidence-based practices that inform interventions rooted in cultural competence and quality health care. "The Institute of

Medicine identified patient-centered care as one of the six pillars of quality health care and described it as "providing care that is respectful of and responsive to individual patient preferences, needs, and values, and ensuring that patient values guide all clinical decisions." (Brummel-Smith, K., Butler, D., Frieder, M., Gibbs, N., Henry, M., ... & Saliba, 2016).

There is a larger percentile of persons of color hospitalized at OSH, with African Americans making up 7.9 percent of patients compared to only 1.9 percent of Oregon's general population. The PDTT's cultural assessment informs their interaction style, activities, and community recommendations for the patient. This connects individuals facing historical inequities with individualized treatment and services that are appropriate and likely to promote their success in the community.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

5. How will OHA measure the success of this policy package?

OHA will track baseline information for patients that meet the PDTT criteria prior to the start of the program expansion, as well as for patients who are selected as part of the PDTT expansion to measure the beneficial impacts of the program. OHA will also implement pre- and post-program assessments for both the patients selected as part of the PDTT expansion and from the patient's Interdisciplinary Team (IDTs) who oversee each patient's treatment plan. Finally, OHA will also collect personal testimonies to capture the individual impacts of the program on the patients served and their families.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

This program would be directly linked to the OSH's performance measure 2JOM4 (Our Treatment and Care Delivery Are Effective), as well as the OHA performance measures 1AOM6 (Reduce Health Disparity) and 1AOM7 (Improve Population Health). It is also directly linked to OHA KPM 30, relating to patient readmissions within 30 days.

7. What are the long-term desired outcomes?

The PDTT would provide intensive, individualized, person-directed treatment for patients who have the greatest difficulty discharging from the OSH. They would continue to demonstrate their efficacy in encouraging discharge and supporting successful community transitions for patients who have failed with traditional approaches and are at high risk of readmission to OSH. Utilizing a person-centered approach that tailors treatment around goals that are meaningful to the patient, patients have increased motivation and engagement. Treatment will center on community-skill development, supportive transitions, and service connection. The person-centered approach relates to improved clinical outcomes such as reduced use of emergency departments, reduced length of stay, improved self-management of health conditions, and reduced anxiety and depression. We anticipate that connection with the team will reduce the likelihood of readmission to OSH under the PSRB and recidivism rates for Aid and Assist patients that are returned to jail.

8. What would be the adverse effects of not funding this policy package?

If PDTT is not funded, OSH's need for intensive and individualized transition services for the most complex patients at OSH will go unmet. Such patients could be more likely to remain at OSH when treatment in the community in a less costly and less restrictive environment is appropriate and required by DOJ guidelines for the Oregon Performance Plan. Months of cross-disciplinary work, research, and innovation was needed to

create the person-directed planning process, Life History sessions, and other PDTT interventions and practices. This work would be lost.

PDTT's current clients, under civil commitment, have developed close therapeutic relationships with the team. This relationship has been vital in encouraging participation in transition related activities. If unfunded, the clients would lose this connection and may be less willing and prepared to discharge. Failure to meet performance measures on transition time and discharge; could lead to continued oversight from the DOJ or further legal action. Without expansion to Aid and Assist and PSRB populations, there will still be a continued need for increased continuity and support in community transitions for forensic patients.

9. What actions have occurred to resolve the issue prior to requesting a policy package?

The PDTT was implemented as a pilot project with the use of contractors in response to expectations of the agreement reached between OHA and DOJ in 2016. The one-time funding is no longer available to continue services.

10. What alternatives were considered and what were the reasons for rejecting them?

The PDTT was implemented with contract staff and limited funding. The policy package is being requested to continue and expand the existing work of the PDTT with stable funding and permanent staff.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

None.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

OSH, as part of OHA and the behavioral health continuum, engages in many stakeholder community forums with focus on the complexities that present challenges for placement of individuals as they discharge from OSH care. If this policy package is approved and implemented in 2021, additional stakeholder input will be included as the expansion is developed, including but not limited to the OHA Health Services Division, the PSRB and counties directly impacted by the Aid and Assist population.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

PDTT focuses on the self-empowerment of individuals with disabilities and their access to care. This work supports populations impacted by health inequities and helps them receive appropriate treatment in the community. The PDTT's use of Person-Centered Care utilizes interventions and connection to resources informed by cultural and socio-economic awareness. "The importance of cultural awareness, sensitivity and competence, not just in the assessment but also in the entirety of mental health and addictive disorder services, cannot be overstated…understanding this is central to any notion of being person and family centered." (Adams & Grieder, 2014, p. 50). The PDTT assesses the impact of culture, gender identity, language, and socio-economic history as they gather a patient's Life History. They coach staff at OSH on how these factors have shaped the patient's behaviors, presentation, and needs. They celebrate individual values related to food

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

preparation and connection to family through activities. They advocate to stakeholders and provide recommendations to community providers to help address these needs in the community.

Staffing and fiscal impact

Implementation date(s): July 1, 2021

End date (if applicable): Ongoing

15. What assumptions affect the pricing of this policy package?

Because of the success of the PDTT program, an expansion is assumed in this package. Funding for the PDTT program within its current state would consist of 3 Occupational Therapist positions. Funding for the expansion would include those three positions as well as four Social Workers and a Peer Specialist (Program Analyst 2).

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

This package would help meet the current responsibilities of OHA (and OSH), but would not add new responsibilities.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

This package would add the need to recruit and support up to an additional eight positions. It is not anticipated to require additional Shared Services funding.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

This package expands the PDTT program to also serve the remaining patient populations outside of Civil. Exact impact to those populations will depend upon program criteria and current population groups.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This policy package requests eight new permanent, full-time positions:

- Three Occupational Therapist positions (currently contracted)
- One Peer Specialist position
- Four Psychiatric Social Worker positions

20. What are the start-up and one-time costs?

This package contains no start-up costs. All anticipated expenses will be ongoing.

21. What are the ongoing costs?

Ongoing costs to meet the current scope of the Person Directed Transition Team, focused on the Civil population only, would require three Occupational Therapist positions totaling $795 thousand in the 2021-23 biennium. Full biennium funding is being requested, as the program is already operational. Pricing is the same for the 2023-25 biennium, excluding step increases and cost of living adjustments.

To expand the program to the remaining patient populations, an additional five positions consisting of four Psychiatric Social Workers and a Peer Specialist (Program Analyst 2) are being requested totaling $1.0 million in the 2021-23 biennium for 21 months; and totaling approximately $1.2 million in the 2023-25 biennium.

The total cost of the requested positions would total $1.8 million in the 2021-23 biennium and $2 million in the 2023-25 biennium.

22. What are the potential savings?

OHA does not anticipate direct budget savings, though the PDTT contributes to reduced length of stays for hard to transition individuals, which opens OSH's capacity to provide services to those who require hospital level of care.

23. What are the sources of funding and the funding split for each one?

Funding for this package would be General Fund.

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Personal Services	$1,703,930			$1,703,930	8	7.40

Oregon Health Authority and Department of Human Services
2021-23 Policy Package

Division:	Oregon Health Authority – Shared Services and SAEC
Program:	Office of Information Services
Policy package title:	Critical Systems
Policy package number:	203
Related legislation:	None

Summary statement:

The current state of the Department of Human Services (DHS) and the Oregon Health Authority (OHA)'s legacy systems are a serious risk to the agencies' service delivery. Many of the mission critical applications are 20-40 years old. These foundational, hub systems are relied on by many other systems within DHS and OHA and by other agencies. The systems are rapidly reaching an unsustainable state due to their outdated technology and inability to obtain people with the programming skills necessary to support them. DHS and OHA have implemented major solutions under the Modernization umbrella including the ONE MAGI system and the pending Integrated Eligibility system. Now attention must be paid to modernizing the legacy systems with an emphasis on the Mainframe. This policy package continues modernization efforts to improve access to services, automate processes and modernize aging systems.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
DHS	$2,500,428	$96,826	$1,558,002	$4,155,256	0	0.00
OHA	$2,625,464	$7,939,795	$810,138	$11,375,397	19	19.00
Total Policy Package:	**$5,125,892**	**$8,036,611**	**$2,368,140**	**$15,530,643**	**19**	**19.00**

Purpose

1. Why does DHS/OHA propose this policy package and what issue is DHS/OHA trying to fix or solve?

Technology system modernization includes migrating legacy systems to modern, more secure platforms. Since modernization efforts began in 2009 for DHS and 2011 for OHA, primary focus has been responding to federal and state legislation. Outcomes to date include delivery of major solutions such as the ONE MAGI system and a clear path to automated eligibility determination through the Integrated Eligibility Project. Now the legacy systems must be modernized with an emphasis on the Mainframe. These systems are aging and fragile, with many custom-built, non-standard interfaces between systems. The result is a technical environment fraught with challenges to maintain with rampant data duplication and challenges in data sharing. Modernization of these systems will establish a revitalized environment that is architecturally sound, adherent to industry best practices with an emphasis on leveraging SaaS, Cloud and solution configuration over custom development. Duplicate data will be reduced, and data will be maintained in a secure systems environment scalable to business needs.

The age of the 70 mission critical legacy applications supporting DHS and OHA predates many of today's technology innovations. Consider the challenge of connecting a 1970s era TV, VCR or stereo system to a smart TV, blue tooth wireless or streaming. Transmission integrity and the ability to use peripherals like remotes is limited or impossible. Comparable limiting factors affect the maintainability of legacy systems like Client Maintenance (1977), Client Index (1992), Oregon Access (1996), Service Authorization (1992), TRACS (1993) and EBT (1997). Systems such as Client Maintenance (CM) and Client Index (CI) are relied on by hundreds of other systems and services. Their failure will cause major disruption in DHS and OHA and hamper virtually all services to clients. These are representative of the 30 mission critical Mainframe systems. Multiple PowerBuilder and Java systems are also past end-of-life. Over 200 Microsoft business applications built on unsupported and not secure Microsoft versions must also be migrated to current technology. These systems have become unmanageable bottlenecks to faster delivery and represent increased cost, risk, liability and very

real danger of failure for the agencies.

The legacy systems utilize outdated programming languages, primarily COBOL. There are major challenges acquiring skilled COBOL programmers who can understand and support the Mainframe Legacy systems. These staff spend the majority of their time providing maintenance (break-fix). Any system modifications or changes, whether to repair an existing problem or respond to legislative mandates, require extensive testing due to system complexity and interfaces. Changes to any system has a very high probability of impacting others. Resolving system problems is challenging, time consuming and expensive. Support is further complicated by the multitude of platforms and languages used in the various systems requiring staff to be well-versed in a broad variety of computing disciplines. The risk profile for systems support is very high due to difficulties replacing departing staff, the low ratio of staff to systems and the lack of system documentation. It is also extremely difficult to acquire skilled PowerBuilder programmers. Interfacing legacy systems with modern technology is extremely challenging and often not possible. Security vulnerabilities are significant since today's security risks did not exist when the systems were built. Achieving business goals is encumbered by outdated, costly to maintain, complex applications. OIS proposes a multi-faceted approach to address these challenges including a commitment to sustain legacy applications for the next 6-10 years while strengthening Business Intelligence capabilities, preparing for migration to modern, more sustainable solutions such as Cloud and automating testing capabilities.

2. What would this policy package buy and how and when would it be implemented?

This POP provides funding for professional services and 19 permanent positions to:

Plan

- Secure professional services with expertise in legacy system assessment and migration to guide and support cross-agency planning and assessment efforts.
- Perform an Application Assessment including an inventory of legacy applications and data and identification of systems as viable candidates for migration to modern platforms including Cloud, versus re-engineering versus retirement.
- Stakeholder identification and engagement including identification of probable participants from developers to end-users
- Development of a solid business case outlining the decision processes, approaches and alternatives
- Documentation of various application's content and design
- Development of a Modernization Strategy to define the transformation process including the ability to accommodate changes during the modernization process and a technical plan for migration of target systems
- Strategy alignment of the Modernization Strategy with stakeholder needs

Migrate

- Provide technical expertise for modernization efforts
- Outline a detailed roadmap for system remediation of Mainframe, PowerBuilder, Java and Microsoft applications
- Create dedicated teams of permanent[1] resources to migrate vulnerable Mainframe, PowerBuilder, Microsoft and Java outdated/end-of-life applications to modern platforms
- Establish expertise and capabilities to leverage cloud computing
- Begin migration/conversion efforts focused on systems of highest risk with goal of piloting transition of 1-2 systems by end of the biennium

[1] It is nearly impossible to recruit technical staff with the necessary skills into LD positions.

Leverage Tools
- Leverage automated Testing Tools
- Keep Software Development tools current and supported
- Establish a source code repository

Integrate
- Identify opportunities for alignment and leveraging of other modernization efforts including Modernization of Financial Systems and Medicaid Modularity
- Write Application Programming Interfaces (APIs) where needed

Archive/Decommission
- Secure data not regularly used but necessary for referential or historical purposes or because retention is required

Mainframe, Microsoft, PowerBuilder, Java Modernization and Cloud Capabilities:

- $1.5M – IT professional services for planning, technical analysis, design recommendations and reviews, best practices guidance, cloud computing expertise and capabilities
- $800k - test automation, technical analysis, inventory tools, MS Azure licensing
- $50k - new technology training for staff
- 19 positions - dedicated to legacy system migration to modern technologies and to establish cloud software development architecture expertise including work with DHS and OHA for efficiently utilizing cloud services. (9 ISS8, 8 ISS7, 1 PEM E, 1 PEM G)

3. How does this policy package further DHS/OHA's mission and align with its strategic plan?

Moderation of the legacy systems enables DHS and OHA to continue to serve Oregon citizens by ensuring the resident capabilities continue to be available and accessible.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will DHS/OHA measure the success of this policy package?

Success will be measured by:

1. Completion of an inventory/assessment of the current suite of legacy systems and development of a plan for remediation of each system. Remediation may entail conversion to a newer version of the same platform, re-engineering the solution into other existing more modern solutions (e.g. Integrated Eligibility), migration to a new platform (e.g. Cloud) or retirement of the system and plan for warehousing of the relevant data.
2. Hiring of appropriately skilled resources to support the various remediation efforts
3. All mainframe source code will be stored in a source control system which will enable the ability for multiple mainframe projects to be updated in parallel. Lack of a central control system has impacted the mainframe team's ability to work on multiple large projects simultaneously. In the current environment, the mainframe team relies on memory for what code changes have been made in which environments. It is a manual effort to copy and paste programming code into different environments. This also has created multiple single-points-of success and a heavy reliance on a few key team members. When one of them is unavailable (e.g. unexpected out of office) it has been impactful to projects to find and/or redo this work.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or a DHS/OHA performance measure? If yes, identify the performance measure(s).

This policy package ties to a number of key performance measures for OIS including:

- OP4 – Develop Solutions. Includes acquiring, designing, architecting, enhancing products and services to meet business requirements, managing the lifecycle of products and services.

- OP5 – Deliver Solutions. Includes transition new or modified products to operations & maintenance, managing change, configuration and releases, managing IT services and the acquisition & delivery of hardware and software.
- OP6 – Manage and Mitigate Risk. Includes managing information security & privacy incidents, facilitating compliant data use and system access agreements, producing actionable IT risk assessments.
- SP1 – Continuous Improvement. Includes defining & documenting key processes, evaluating and improving established processes, managing performance metrics and reporting, assessing outcomes, maintaining security standards and practices.

7. What are the long-term desired outcomes?

Long term desired outcomes are remediation of all core legacy systems to sustainable solutions without loss of required capabilities or compromises to other systems reliant upon the core system(s). This modernization effort is expected to yield increased mobility and improve citizen experiences by ensuring back-end systems are reliable, available and sustainable. Leveraging modern capabilities will improve response times for legislative or policy driven changes. Lower risks will be achieved by reduced reliance on obsolete skills representative of retiring Baby Boomer programmers. Cybersecurity risks associated with current use of decades old code will be mitigated and the technical deficits currently in place will be reduced significantly. Operational efficiency will improve and turnaround time for addressing internal system change requests will be reduced.

8. What would be the adverse effects of not funding this policy package?

If this policy package is not funded, core mission critical systems supporting DHS and OHA service delivery will become static, changes even to meet legislative needs will not be possible and the systems are likely to fail as the programming skills necessary to keep them functioning will no longer be available and cannot be acquired.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

- Modernization has been an on-going effort within DHS/OHA for over 10 years. Significant progress has been made in responding to Federal and State legislation.
- Major initiatives have resulted in the successful implementation of the ONE MAGI system used for low-income Oregonians to apply for health insurance.
- The Integrated Eligibility project delivers automation of eligibility determination for major benefits programs including Medicaid, Temporary Aid to Needy Families (TANF), Supplemental Nutrition Assistance Program (SNAP) and Employment Related Day Care (ERDC).
- Work is nearing completion on the successful implementation of Salesforce for the Centralized Abuse Management System.
- The agencies successfully implemented Sharepoint for use broadly across both agencies as a collaboration and document management environment.
- More recently, the agencies converted to Office 365 using Cloud capabilities.
- Several at-risk financial systems have been migrated to an interim (JV) solution, but this cannot be maintained long-term.
- Outsourcing of system support has been explored, but no bids were received due to the obsolescence of the environment and lack of system documentation.
- Contracted resources have been leveraged and currently provide 25 percent of the Mainframe support. This comes at a significant cost; one COBOL contracted resources costs over $600,000 per year.

10. What alternatives were considered and what were the reasons for rejecting them?

Alternatives include:

1. Do nothing.

This is not a viable option as certain failure of mission critical systems will occur without remediation. These are core systems upon which multiple other systems and services, including the new solutions outlined above (e.g. ONE MAGI, Integrated Eligibility) and the State's largest service facing system, the Medicaid Management Information System (MMIS) are critically dependent. If the core systems fail, DHS and OHA's ability to serve their constituents will be severely compromised.

2. Continue relying on contracted resources to fill gaps in COBOL programmer availability as existing COBOL programmers retire or leave the agency.
   This is a cost-prohibitive solution on several levels. The overt cost is unsustainable and the contract mechanisms available for securing resources limits the duration of their work. This results in continual loss of knowledge and skill and is a losing proposition.
3. Outsource fully the support of the legacy systems.
   This approach has been attempted but failed as no viable consulting firms even bid due to the obsolescence of the systems and the lack of system documentation.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Other agencies including AAA Community Partners, Oregon Employment Department, Oregon Department of Justice, Commission for the Blind, Children and Families Commission, Department of Education, Oregon Youth Authority, Department of Corrections, State Police and Department of Motor Vehicles will be impacted if these systems fail. Each of these agencies interfaces with or relies on data from these core legacy systems. Additionally, these systems interface various critical federal systems for information such as Social Security

Number (SSN) validation. Oregon Employment Department relies on the DHS/OHA mainframe interface for their access to this information rather than building their own.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

Although the Office of Information Services is leading this effort, it is doing so in close collaboration with DHS and OHA. Opportunities for alignment and leveraging of other modernization efforts within the agencies including Medicaid Modularity and pending Financial Systems modernization will be pursued.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[2] or equitable health outcomes?

This policy package ensures that access to key information housed in the legacy systems including key client information will continue to be available to myriad programs and systems across DHS and OHA. Examples include Medicaid, Child Welfare, DHS eligibility programs. Furthermore, many demographically sensitive requests such as citizenship and SSN validation are sent to Federal hubs via the mainframe legacy systems. It is essential to providing equitable services that these requests are processed accurately, reliably and rapidly.

Staffing and fiscal impact

Implementation date(s): July 1, 2021 start date

End date (if applicable): This effort is anticipated to take 6-10 years to fully complete.

15. What assumptions affect the pricing of this policy package?

Cost of professional services is assumed to be in alignment with other comparable efforts.
Cost of staffing is assumed to be relatively constant.

[2] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

Federal enhanced funding will be available and leveraged for all Medicaid related efforts.
Resources with the necessary skills will be available.
Business partners will have adequate capacity to engage in work efforts particularly around requirements definition, design review and user acceptance testing.

16. Will there be new responsibilities for DHS/OHA? Specify which programs and describe their new responsibilities.

OHA and DHS will need to provide subject matter experts (SMEs) to support analysis, design and testing efforts throughout the lifecycle of this initiative.
OIS will have additional maintenance and support during the modernization and replacement efforts.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

Impact on Shared Services is expected to be limited to providing SMEs to support analysis, testing and design efforts. Entities such as OPAR and Financial Services are likely SME contributors.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This policy package requests funding for 19 permanent positions in OIS. Positions are new and include 9 ISS8s, 8 ISS7s, 1 PEM E, 1 PEM G.

20. What are the start-up and one-time costs?

$8,042,534 million are the start-up costs which includes cost of the 19 permanent positions plus $1.5 million for professional services.

21. What are the ongoing costs?

An outcome of this effort will yield a business case and roadmap for system remediation. Those work products will also identify expected ongoing costs which are indeterminate at this time.

22. What are the potential savings?

- Reduced staffing risks – increased system stability
- Better tools providing faster delivery of reliable, scalable, secure solutions to meet business needs with enhanced protection of highly confidential data.
- Greater resiliency for DHS /OHA in times of crisis; ability to access services without geographic barriers anywhere, anytime on any network ensures business continuity and access to critical information, including health related.
- Health care, health care systems and OHA operations benefit from improved system/data access, reduced security and support risks; quicker time to market for system changes.

23. What are the sources of funding and the funding split for each one?

Office of Information Services is requesting 100 percent Other Funds limitation. Shared Services Funding allocates to 55.49 percent DHS and 44.51 percent OHA, with a blended rate of 63.30 percent General Fund, 0.06 Lottery Fund, 6.50 percent Other Fund, and 30.14 percent Federal Fund.

DHS Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE

Oregon Health Authority
2021-23 Policy Package

Division:	Health Systems Division, Shared Services
Program:	HSD Medicaid, Non-Medicaid, Program Support and Administration; Shared Services Office of Information Services
Policy package title:	Compass Modernization
Policy package number:	414
Related legislation:	None.
Summary statement:	This policy package would continue the Compass Modernization portfolio projects approved and partially funded in the 2019-21 biennium to address data integration and reporting issues. The Oregon Health Authority (OHA) behavioral health data are currently submitted on paper or to siloed systems and cannot be integrated to create a more accurate view of health and service inequities and areas of need across Oregon. OHA is unable to provide adequate data for forecasting or mandated state and federal reporting. This leaves the agency at risk of losing state and federal funding. OHA and the Department of Human Services (DHS) continue to fall short of the expectations of advocates by failing to meet the needs of transitioning clients, leaving the agencies at continuing risk of investigation and potential litigation for failure to meet legal requirements. This impacts the Oregonians we serve through poor coordination of care/services, leading to clients "falling through the cracks" and having to repeat levels of care. Data in the data warehouse would be used to improve the health system by increasing coordination and access to timely, appropriate and equitable health care.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$2,320,585**	**$1,6669,288**	**$5,407,953**	**$9,397,826**	**6**	**6.00**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

This policy package would continue the Compass Modernization portfolio projects approved and partially funded in the current 2019-21 biennium in policy package #404 to address data integration and reporting issues.

With Oregon's health care transformation, the introduction of coordinated care organizations (CCOs), and investments in electronic health record (EHR) systems, the current data environment does not allow for data integration to meet the need for reporting on treatment outcomes and investment efficiency. This policy package aligns with and would support the Behavioral Health Electronic Health Record Incentives policy package, also put forward by OHA for the 2021-23 biennium, by encouraging EHR implementation and electronic data submission by behavioral health providers.

Integrated data from multiple systems would be used to create a more accurate view of health and service inequities and areas of need across the state. OHA would use these data to address these issues in order to create a health system based on access to equitable services and health care. The policy package would also address and coordinate the data collection and storage necessary to meet the reporting requirements of other behavioral health-related policy packages proposed by the OHA Health Systems Division (HSD), such as the Children's System of Care and Mobile Crisis request. OHA is currently unable to conduct mandated state and federal reporting. OHA and our partners at the Department of Human Services (DHS) continue to fall short of advocates' expectations by failing to meet the needs of transitioning clients, leaving the agency with continuing risk of additional investigation and potential litigation. OHA remains unable to adequately forecast service need or coordinate treatment for individuals entering and leaving the state hospital. *Olmstead v. LC*, a US Supreme Court ruling, requiring states to ensure persons with disabilities receive services in the most

integrated setting appropriate to their needs. Inability to appropriately forecast need for state hospital resources puts the agency at risk of being unprepared to meet the need and puts Oregonians at risk of inadequate care.

The COVID-19 pandemic has also revealed the shortcomings of our current behavioral health and substance abuse data collection processes, which are heavily manual and paper-based. These processes have prevented OHA from being able to quickly gather data from community partners and providers in several areas and have made it challenging to transition to a remote work environment.

2. What would this policy package buy and how and when would it be implemented?

The policy package would be used to match Federal Funds for purchase of a Behavioral Health Data Warehouse (BHDW) and a front-end data collection system (to replace the Measure Outcomes and Treatment Services or MOTS system) including 5 years of operations and maintenance, along with an enterprise-wide project for migrating paper-based assessments to an electronic tool (Longitudinal Enterprise Assessment Portal or LEAP). The policy package would address and coordinate the data collection and storage necessary to meet the requirements of other behavioral health-related policy packages proposed by HSD, such as the Children's System of Care and Mobile Crisis policy package. This policy package would fund additional staff in HSD, staff augmentation contractors, six new Shared Services Office of Information Services (OIS) positions to support BHDW operations and maintenance, and an independent quality assurance contractor working on the projects. Implementation for the BHDW would be anticipated in March 2022, the MOTS replacement would be expected in November 2022 and the LEAP system would be available in October 2024.

3. How does this policy package further OHA's mission and align with its strategic plan?

The COMPASS modernization project supports the Governor's policy priorities and OHA strategic plan by ensuring efficient data collection, management, system integration, and data reporting on behavioral health service outcomes for Oregonians.

Improved data collection and integration of the COMPASS software applications would allow the agency to improve reporting on outcomes, expenditures and contract compliance to ensure the agency purchases high-quality and cost-effective care, as well as collaborate with providers to track the implementation and effectiveness of services, identify service gaps, predict the specific timing of service needs, and better request and allocate funding to facilitate individual's progress through the system. OHA would be able to identify and mitigate areas of health inequity by better care coordination for clients and connection with culturally appropriate providers through improved REAL-D data collection.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

For project planning, success would be measured by:

- Release of request for proposal (RFP) and selection of vendor.
- Department of Administrative Services (DAS) Office of the State Chief Information Officer (OSCIO) Stage Gate 3 endorsement.
- Execution of new contract for implementation and 5 years of maintenance and operations.

For project execution, success would be measured by:

- Transfer of data from Oregon Data Center Services (DCS) is completed with minimal disruption of service to data submitters, OHA, and data users.
- All functionality and other requirements described in contract statement of work are delivered and approved by OHA in timeframe outlined.

- All test exit criteria have been met.
- Data submitters are able to submit data with the new technology solution, as necessary.
- OHA has full access to data as outlined in the requirements.

For overall project phases:

- Project scope met within +/-15 percent of the approved budget and schedule.

Long term project benefits would be measured by:

- 95 percent of the time completing SAMHSA reports on time.
- 100 percent of the time completing OHA dashboards and standardized reports on time.
- 100 percent of existing manual reports would be automated or eliminated and also meeting the "Must have" requirements.
- More reliable data as measured by number of data issues identified from current MOTS quality assurance reports.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

The integrated data and ability to create reports across systems would increase the accuracy of the reporting for the behavioral health-related KPMs. More behavioral health data would be available and clients would be identified across systems along with the services provided to them.

KPM #1-12:

1. Initiation of alcohol and other drug dependence treatment - Percentage of members with a new episode of alcohol or other drug dependence who received initiation of AOD treatment within 14 days of diagnosis.

2. Engagement of alcohol and other drug dependence treatment - Percentage of members with a new episode of alcohol or other drug dependence who received two or more services within 30 days of initiation visit.
3. Follow-up after hospitalization for mental illness - Percentage of enrollees 6 years of age and older who were hospitalized for treatment of mental health disorders and who were seen on an outpatient basis or were in intermediate treatment within seven days of discharge.
4. Mental, physical, and dental health assessments for children in DHS custody - Percentage of children in DHS custody who receive a mental, physical, and dental health assessment within 60 days of the state notifying CCOs that the children were placed into custody with DHS (foster care).
5. Follow-up care for children prescribed with ADHD medication (initiation) - Percentage of children newly prescribed attention-deficit/hyperactivity disorder (ADHD) medication who had at least three follow-up care visits within a 10-month period, one of which was within 30 days of when the first ADHD medication was dispensed
6. Follow-up care for children prescribed with ADHD medication (continuation and maintenance) - Percentage of children newly prescribed attention-deficit/hyperactivity disorder (ADHD) medication who had at least three follow-up care visits within a 10-month period, one of which was within 30 days of when the first ADHD medication was dispensed
7. 30-day illicit drug use among 6th graders - Percentage of 6th graders who have used illicit drugs in the past 30 days.
8. 30-day alcohol use among 6th graders - Percentage of 6th graders who have used alcohol in the past 30 days.
9. 30-day illicit drug use among 8th graders - Percentage of 8th graders who have used illicit drugs in the past 30 days.
10. 30-day alcohol use among 8th graders - Percentage of 8th graders who have used alcohol in the past 30 days.
11. 30-day illicit drug use among 11th graders - Percentage of 11th graders who have used illicit drugs in the past 30 days.

12. 30-day alcohol use among 11th graders - Percentage of 11th graders who have used alcohol in the past 30 days.

OHA Performance Measures tied to this policy package:

- OM2 Increase Partner Satisfaction: Address administrative burden and increase accurate reporting for our partners.
- OM4 Measure Improvement: Reporting over time and across systems in order to measure efficacy of solutions.
- OM6 Reduce Health Disparity: Identify areas of disparity and measure efficacy of solutions.

7. What are the long-term desired outcomes?

Modernization of the COMPASS universe of systems would create:

- Increased ability to measure and report on behavioral health outcomes.
- Increased ability to tie reporting deliverables to payment.
- Improved standardization of agency data.
- Increased ability to track outcomes by client, demographic group, or location of clients.
- Ability to meet required reporting responsibilities.
- A standardized reporting system for behavioral health services.
- Reduce the administrative burden on contracting providers and improve external reporting to community partners, CCOs and providers.
- More timely, appropriate and cost-effective services for Oregonians.

8. What would be the adverse effects of not funding this policy package?

Failure to conduct a wide-ranging upgrade of the COMPASS systems and related business processes will result in devastating impacts to Oregon's most vulnerable populations including:

- Poor coordination of care between facilities and providers.
- Delay or failure to receive treatment or services.
- Increased length of hospital commitment.
- Potential for civil rights violations.

Without a change to the current behavioral health data systems, challenges to the state and its external partners will continue to compound in the following areas:

- Increased administrative burden for CCOs and other behavioral health providers.
- Lack of compliance with legal and federal requirements.
- Lack of IT staff resources to support outdated and ineffective data systems.
- Loss of state and federal funding.
- Loss of public trust.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

Manual, paper-based workarounds have been put in place that do not collect the depth of information needed for a 360-degree patient view and the manual collection makes integration of data difficult. Limited progress has been made with existing tools to support data collection and remote work during the COVID pandemic, but the underlying software tools do not allow for easily collecting additional data in an electronic manner.

Projects within the Compass Modernization portfolio have been initiated and business requirements are being gathered to address flexible data collection, storage, and reporting solutions. RFPs for the behavioral health data warehouse and behavioral health data collection system vendors are being written. Vendor selection is expected in March 2021. The Legislature appropriated $1.5 million General Fund for the 2019-21 biennium for planning efforts for this portfolio assuming the portfolio would be implemented using 100 percent General Fund. During 2020, OHA determined this project likely qualifies for federal financial participation and has requested approval for 90/10 match from the Centers for Medicare and Medicaid Services (CMS) and we expect approval by September 2020. If the request is approved, the anticipated federal matching funds would allow the original $1.5 million to go further than anticipated and cover planning and construction of the behavioral health data warehouse and planning for the front-end data collection component. This policy package would fund the continuation of the Compass portfolio projects.

10. What alternatives were considered and what were the reasons for rejecting them?

Alternative 1: Status Quo (Not Selected)
Description: Continue to use existing systems and tools to support programs.

Implementation Duration: 0 months

Total Cost: $8.4 million

- Implementation Cost: $0
- 5 Years of maintenance and operations: $8.4 million

Benefits:

- No changes needed.
- Lower cost in short term.
- Funding can be re-assigned to other behavioral health needs.

Risks:

- Unable to achieve all solution requirements.
- Continue to experience pain points:
  - Not meeting reporting needs
  - Not meeting operational needs
  - Receiving incomplete and inaccurate data
  - Complex manual data submissions
  - Missed grant funding (federal, state, foundation) opportunities because unable to provide reports and outcomes

Alternative 2: Build - Integrate Existing System (Not Selected)

Description: Gathering the business requirements and building (writing code) an interface between existing systems using OIS Resources.

Implementation Duration: 48 months

Total Cost: $17.9 million

- Implementation Cost: $ $9.1 million
- 5 years of maintenance and operations: $8.7 million

Benefits:

- Lower cost
- Lower implementation duration
- Improves the ability to provide data needed for "telling a story" or any future reporting needs.

Risks:

- Existing systems are too old to support APIs or integration and will need extensive re-work to be accomplished.
- Unable to meet all reporting requirements (data elements missing)
- Unable to support scalability for future technology needs. Existing system includes miscellaneous paper, excel, and Survey Monkey which cannot be connected in an efficient manner to enable the data to be used outside of the area it was originally obtained.

Alternative 3: Buy - RFP COTS SaaS (Selected)

Description: Utilize Request for Proposal (RFP) to procure and execute a new contract for development and implementation of a Commercial off the Shelf (COTS)/Software As A Service (SAAS) and modify using OIS resources.

Planning duration: 21 months

- *Note: Implementation duration would be determined through RFP. According to the market analysis research implementation duration provided by a vendor ranges between 12-18 months.*

Total cost: To Be Determined

- Planning cost: $2.0 million
- Implementation cost: TBD through RFP
- 5 years of maintenance and operations: TBD through RFP
- *Note: According to the market analysis research implementation cost provided by a vendor ranges between $1.0 million and $2.5 million and 5 years of maintenance and operations ranges between $2.5 million and $4.0 million.*

Benefits:

- Possibility for lower cost

- Possibility for better support
- Shorter implementation duration
- Use of most up to date technology
- Supports scalability for enterprise needs:
  - Expansion within behavioral health domain
  - Expansion within external agencies (DHS)
  - Supporting Behavioral Health Technology Roadmap

Risks:

- Project takes an additional 6 to 12 months for RFP effort.
- Customizations increase implementation and maintenance and operations costs.
- Technology solution and changes to the system must be made by the vendor which increases costs.

Alternative 4: Build – OIS Development Build (Not Selected)
Description: Build new system using OIS resources.

Implementation duration: 54 months

Total cost: $27.4 million

- Implementation Cost: $15.3 million
- 5 years of maintenance and operations: $12.1 million

Benefits:

- Allocated resources used to support maintenance and operations and enhancements resulting in lower long-term costs.
- Address new regularity requirements faster (no amendments required).

Risks:

- High degree of customization needed which drives up cost and timeline to implement.
- Time to complete the project may increase because same resources provide operations support for these specific state software applications.
- Other higher priority project may affect the resource availability to support the project and extend project timeline.

Alternative 5: Build – Basecamp Development (Not Selected)

Description: Using external contracting resources to build (writing code) a system that would meet all your requirements to do work, run reports and track clients.

Implementation duration: 54 months

Total Cost: $29.1 million

- Implementation cost: $17.0 million
- 5 years of maintenance and operations: $12.1 million

Benefits:

- Allocated resources used to support maintenance and operations and enhancements resulting in lower long-term costs.
- Address new regularity requirements faster (no amendments required).

Risks:

- The following activities increase cost and duration:
    - High Customizations
    - Contract resource turnover
    - Contract administrative support

- Same resources used to support project and maintenance and operations, which may result in project delays.

Alternative 6: Build – Transfer Technology State (Not Selected)
Description: Acquire other state solution and have OIS customize solution.

Implementation duration: 66 months

Total Cost: $29.7 million
- Implementation cost: $17.6 million
- 5 years of maintenance and operations: $12.1 million

Benefits:
- Solution already built and in production with "lessons learned".
- Ability to share knowledge and compare reports with other state organizations.

Risks:
- Longer duration and higher cost.
- May have to customize software because of state laws, process differences.
- May require State to purchase other integrated software not currently owned.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

There would be no change to current agencies that submit behavioral health data to HSD. The expected outcome is for more streamlined processes, consistent accurate data and less duplication in the data submitted.

We are connecting with Oregon Justice Department and Oregon State Police to request access and interagency agreements in order to bring data into the behavioral health data warehouse. This may be done as a file transfer or interface.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

OHA - Oregon Health Information Technology (OHIT)
OHA - Children and Families Behavioral Health
OHA/DHS Shared Services, Office of Information Systems (OIS)
OHA – Health Policy and Analytics
DAS – Department of Administrative Services
EIS – Enterprise Information Services
ODOJ – Oregon Department of Justice

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

The purpose of this POP is to improve and increase the data used to measure client outcomes, identify areas of improvement and contribute to the 360 view of a client. This information would include client demographic

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

data to identify underserved populations and areas in Oregon. With this information OHA and HSD can identify where changes are needed and how to build health equity throughout the state.

Staffing and fiscal impact

Implementation date(s): BHDW- July 2019, MOTS Replacement- July 2019, LEAP- July 2021

End date (if applicable): October 2024

15. What assumptions affect the pricing of this policy package?

We assume the Planning Advanced Planning Document (P-APD) would be approved by CMS and result in a 90/10 federal match for the BHDW, MOTS Replacement and LEAP projects through implementation. Maintenance and operations is assumed to meet the CMS criteria for 50/50 federal match. The cost allocation used in the P-APD would be 80 percent Medicaid, 20 percent non-Medicaid.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

Yes. OHA Health Systems Division (HSD) would need to use the connected data to improve care coordination in fee-for-service and coordinated care organization provided services. The data may also result in the need for HSD to modify policies and rules for the provision of behavioral health services.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

Yes. OIS would take on the responsibility of ongoing operations and maintenance of the data warehouse. This is new work for OIS, as there is currently no data warehouse for OHA.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

In order to effectively build, implement, and provide long-term maintenance and operations for a data warehousing solution, staffing must be appropriate to scale. The positions below would be new, as this work is new and the warehouse is new. OIS does not have capacity to manage ongoing operations and maintenance of a new data warehouse system without additional resources.

During the development phase of the project, we recommend bringing on two staff for OIS-SDD-DRM (Data Resource Management) and one for OIS-SDD-DST (Distributed Services Team). It is important to get new staff on board during the development phase so they have time with the contractor to understand processes and technologies being put into place. These would include three permanent full-time positions:

- Information Systems Specialist 7 Database Developer (DRM)
- Information Systems Specialist 6 Report Writer (DRM)
- Information Systems Specialist 6 Database Administrator (DST)

During the maintenance and operations phase, before the vendor contract is closed, three additional permanent, full-time positions would be required:

- Information Systems Specialist 8 Database Architect (DRM)
- Information Systems Specialist 7 Database Developer (DST)
- Information Systems Specialist 6 Report Writer (DST)

20. What are the start-up and one-time costs?

MOTS Replacement:

- COTS purchase: $2,500,000 + 20% contingency = $3,000,000
- Quality assurance vendor: $298,859 + 20% contingency = $358,631
- 6 months maintenance and operations: $400,000

BHDW:

- COTS Purchase: $500,000 + 20% contingency = $600,000
- Software Purchases: $50,821 + 20% contingency = $60,985
- OIS Staff (new positions) cost: $1,655,809

LEAP:

- Vendor DDI cost: $1,300,000 + 20% contingency= $1,560,000
- Maintenance and operations: $42,292

21. What are the ongoing costs?

MOTS Replacement:

- 5 years of vendor supported maintenance and operations: $2,400,000

BHDW:

- Software licenses (5 years): $50,821
- 5 years maintenance and operations supported by OIS new positions in section 19: $5,574,569

LEAP:

- Vendor maintenance and operations: $50,750
- Business & OIS staff costs: $547,662

22. What are the potential savings?

Unknown.

23. What are the sources of funding and the funding split for each one?

General Fund purchase & implementation: 10%
Federal Funds purchase & implementation: 90%

General Fund maintenance and operations: 50%
Federal Funds maintenance and operations: 50%

Both Purchase & Implementation and maintenance and operations would be cost allocated assuming expenditures are 80 percent Medicaid.

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Personal Services	$0	$1,395,468	$0	$1,395,468	6	6.00

Oregon Health Authority
2021-23 Policy Package

Division: Oregon State Hospital
Program: Junction City Residential Treatment Facility
Policy package title: Secure Residential Treatment Facility
Policy package number: 415
Related legislation: None

Summary statement: This proposal would create additional Oregon State Hospital treatment capacity, in the form of a Secure Residential Treatment Facility on the Junction City campus, for patients stepping down from hospital level of care. Increased SRTF capacity would allow the state hospital to serve individuals who no longer need hospital level of care but who are not yet ready to transition to an unsecure environment.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$12,206,366**	**$0**	**$0**	**$12,206,366**	**50**	**48.64**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

The Rivers Run program, a 16-bed Residential Treatment Facility (RTF) consisting of two 8-bed suites, was opened on the Oregon State Hospital (OSH) Junction City campus in 2019 to optimize the use of Hospital Level of Care (HLOC) beds and provide a system for patient throughput allowing immediate access to lower levels of care while waiting for a permanent placement in the community. Most patients able to discharge to an RTF level of care are directly placed in the community, bypassing the need for a transfer to Rivers Run. For this reason, maintaining full occupancy of both 8-bed suites has been inconsistent and challenging. On any given week, OSH has 8-10 individuals who are ready to discharge from the hospital to a Secure Residential Treatment Facility (SRTF). Due to the scarcity of community SRTF beds, these individuals often wait in the hospital, pending community placement, when they no longer need hospital level of care (HLOC). With OSH's continued capacity issues and increases in Aid and Assist and Guilty Except for Insanity (GEI) orders, this creates a bottleneck for patients and delays admission of people needing HLOC.

2. What would this policy package buy and how and when would it be implemented?

Establishing one, or both 8-bed suites on the Junction City campus as a Secure Residential Treatment Facility (SRTF) would allow the Rivers Run program to serve a wider range of individuals who no longer need hospital level of care but who are not yet ready to transition to an unsecure environment. This expanded capacity would free up hospital level of care beds for people who need them. This would assist OSH in meeting legislative mandates for timely admission to the state hospital and, as importantly, facilitate timely transition to a lower level of care ensuring patients receive care in the right place and with the right supports for continued recovery and safety.

Rivers Run opened in 2019 to meet the increase demand for state hospital beds. Funding for this program was requested by the Oregon State Hospital and Oregon Health Authority during the 2020 legislative session. The legislative session ended prior to acting on the request and the unfunded Rivers Run program became an additional expenditure within the OSH budget.

This policy package would establish permanent funding for the Rivers Run program as a SRTF level of care facility and allow it to better meet the needs of the people in care at the Oregon State Hospital.

3. How does this policy package further OHA's mission and align with its strategic plan?

This policy package aligns with the Governor's policy priority of Healthy and Safe Communities. People who are ready to leave the hospital and who need a secure environment for safety reasons have greater access to the care they need. The policy package also aligns with the OHA core values of Health Equity, Innovation and Service Excellence. People are served in a less restrictive and more integrated environment while they learn skills that will lead to greater independence.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

This policy package is not being requested due to an Oregon Secretary of State or internal audit.

Quantifying results

5. How will OHA measure the success of this policy package?

The success of Rivers Run, and any other specific OSH unit, cannot be individually measured but must be taken as a part of the whole. OSH should see decreased capacity issues and successful transitions of patients through the OSH care environment to community treatment.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

This policy package aligns with the OHA Performance Measures of Improving Population Health, Improving Quality of Care as well as the Process Measures of Regulating and Ensuring Compliance and Delivering Coordinated High Quality & Culturally Responsive Health Services.

7. What are the long-term desired outcomes?

1. People are served at the appropriate level of care.
2. People at the Oregon State Hospital currently waiting for a secure residential treatment facility would be able to more timely transition to this level of care, building skills for lower level community resource.
3. Hospital level of care beds would be available for people who need this level of care.
4. The SRTF bed capacity within the behavioral health continuum of care would increase. Siting for Secure Residential Treatment Facilities is difficult in a community setting and is allowable on state hospital grounds by licensure.

8. What would be the adverse effects of not funding this policy package?

People will continue to occupy HLOC beds when they no longer need this level of care, which will result in a bottleneck for people needing access to the state hospital.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

The continuity of care issue is a larger health care discussion of which Rivers Run is a small part. As indicated in a companion policy package (#445) to this one, to expand the OSH total bed capacity and operationalize the totality of the Junction City campus, demand for hospital beds is outpacing patient treatment and discharge to

community care. Currently the 16 beds in the Rivers Run program are licensed at a Residential Treatment Facility (RTF) level of care to help to accommodate demand. Rivers Run works with individuals who do not need a locked door to remain safe for themselves or for the community. The rules and guidelines of an RTF program limits the clinical complexities of the people who can be admitted to the program and cannot serve people who need a secure setting. This is a limiting factor for patients transitioning from OSH HLOC as they often need a higher level of support and security, at least initially, after discharge.

10. What alternatives were considered and what were the reasons for rejecting them?

Prior to the opening of the Rivers Run program, patients under civil commitment waited in a state hospital bed until an appropriate community placement could be found. The alternative to funding this policy package would be to continue this practice resulting in patients being treated in a more restrictive and costly environment than necessary and preventing timely access into OSH for those needing a hospital bed.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

This policy package does not require any changes to existing statute(s) or require a new statute.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

By the nature of its business, Oregon State Hospital touches all county, tribal and state behavioral health agencies; municipal and circuit courts; state and local law enforcement agencies; jails; and the PSRB to name a few. Expanding the capacity of OSH and funding the Rivers Run program on the Junction City campus would enable people to receive the timely care and services they need, at the appropriate level of care, and expand access for people who need state hospital services.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

This policy package was developed by OSH as a direct result of increased demand for state hospital services.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

Oregon State Hospital's vision statement is, "We are a psychiatric hospital that inspires hope, promotes safety, and supports recovery for all." Often the people receiving OSH's services are some of the most marginalized members of our society. Expanding the capacity of OSH by funding the Rivers Run program would enable the facility to better meet the growing demand for state hospital mental health services for the people of Oregon and help people on their journey to recovery when they no longer need hospital level of care.

Staffing and fiscal impact

Implementation date(s): July 1, 2021

End date (if applicable): Not applicable.

15. What assumptions affect the pricing of this policy package?

- Because Rivers Run is currently operational and non-budgeted, the implementation dates above are for the entirety of the 2021-23 biennium for existing services and are priced below at 24 months.
- Positions necessary for the establishment at the SRTF level of care and the changes to infrastructure are assumed operational for the last 22 months of the 2021-23 biennium.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

- Pricing reflects current operations for 24 months, and expanded operations for 22 months of the 2021-23 biennium.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

There would be no new responsibilities for OHA.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

There would be no new responsibilities for or an impact on Shared Services.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

Client caseloads would not be directly impacted by this policy package, as the beds are already operational. Increasing bed capacity at OSH would increase the overall patient throughput available, allowing an increase in bed utilization.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This package includes staffing needs for the existing 16-bed Rivers Run program (two 8-bed suites): 28.00 FTE, which is current operation on the Junction City campus. Salem staffing consists of 5.00 FTE, related to Admission and Forensic Evaluation.
Additional staffing needs to convert one suite to SRTF level of care: 6 FTE.
Additional staffing needs to convert both suites to SRTF level of care: 11 FTE.

Permanently establishing this program at a higher level of care would require additional staffing – beyond those hired for the non-secure facility, due to the higher acuity needs of the SRTF population and to provide in-house treatment and skills building for those who are not ready for community-based programs. The SRTF funding would be used for additional personnel in order to increase nursing coverage to 7 days a week, run treatment and skills building groups on-site and augment the Mental Health Therapy staff for the increased needs of the residents that an SRTF setting would require. In addition, one-time modifications to the suite(s) and surrounding property will need to be made.

Classifications and counts represent current Rivers Run staffing, by campus:

Campus	Class	Count
JC	Cook 2	1
	Custodian	1
	Mental Health Registered Nurse	1
	Mental Health Therapist 2	7
	Mental Health Therapy Coord	2
	Mental Health Therapy Tech	11
	Physician Specialist	1
	Principal Executive/Manager C	1
	Principal Executive/Manager D	1
	Psychiatric Social Worker	2
Salem	Clinical Psychologist 2	4
	Principal Executive/Manager D	1
Grand Total		**33**

Additional staff need to convert both 8-bed suites to SRTFs:

Campus	Class	Count
JC	Behavioral Health Specialist 3	1
	Institution Teacher-Ma	1
	Licensed Practical Nurse	1
	Mental Health Registered Nurse	2
	Mental Health Therapist 2	2
	Mental Health Therapy Tech	4
Grand Total		**11**

20. What are the start-up and one-time costs?

This package includes approximately $13,000 for one-time costs in Services and Supplies for the infrastructure necessary to convert the operation of the suites to their new use. Necessary physical and environmental modifications include fencing materials ($5,000), locks ($2,000), and secure kitchen ($3,000 per suite, $6,000 total).

21. What are the ongoing costs?

This policy package includes $11.3 million for ongoing costs:

- Ongoing costs for the current Rivers Run RTF program is $6.6 million in Junction City and $1.4 million in Salem, totaling $8 million.
- Additional staff needed to convert one 8-bed suite to SRTF level of care would be $1.5 million. It would cost $2.4 million to convert two suites.
- Recurring unit Services and Supplies would be $0.9 million.

22. What are the potential savings?

SRTF units at OSH do not historically generate Medicare revenue, so there is no direct revenue offset for this package. However, adding additional capacity may create additional capacity on a Hospital Level of Care unit and result in Other Fund revenue increases somewhere else within the OSH system. It is not possible to estimate that impact as it would be determined by specific patients and eligibility.

23. What are the sources of funding and the funding split for each one?

This package would be General Fund only.

Oregon Health Authority: 2021-23 Policy Package

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Personal Services	$10,328,607			$10,328,607	50	48.64

Oregon Health Authority
2021-23 Policy Package

Division: Oregon State Hospital
Program: Oregon State Hospital
Policy package title: Position Conversions
Policy package number: 416
Related legislation: None

Summary statement:

Oregon State Hospital (OSH) has continuously been presented the duality of providing the appropriate levels of patient care within the restrictions of the number of personnel within the budget. To meet that patient care need, OSH has been forced to augment budgeted employees with alternative solutions - usually contracted through either direct professional services, temp agency contractors, locum/nursing agency or the Oregon Health Sciences University; but also including solutions such as limited duration or non-budgeted positions. This resource gap exists between a variety of roles and responsibilities throughout the hospital, primarily within the Psychiatry department.

This policy package would shift funding for existing contracts to permanent position authority.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$0**	**$0**	**$0**	**$0**	**34**	**34.00**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

Like many state agencies, Oregon State Hospital (OSH) has needed to creatively handle the positional need relating to the fulfillment of its caseload and evolving population counts. Because of the demand on hospital bed space, simplistically, the hospital's goals are to help make patients well in as little time as possible with as little resources as possible. However, usually speed and cost can only be reduced if there is either a deterioration of quality, which OSH cannot allow in a clinical setting, or an increase in efficiency, which OSH continuously seeks to review and refine. To meet patient needs, OSH has supplemented existing FTE with a variety of contracted staffing through various procurement methods, as well as limited duration and non-budgeted positions. These positions range from support operations such as custodians, cooks and medical assistants, to patient care positions such as chaplains, psychologists and psychiatrists. Many of these market rate contracted positions are at greater expense than a comparable employee and either directly result in budget overspend or contribute to it.

2. What would this policy package buy and how and when would it be implemented?

This package requests additional position authority to correctly meet the need currently met by non-state vendors. Funds currently spent on procuring staffing through other means, such as contracted services, would be converted to Personal Services (FTE). This conversion supports better managerial oversight and flexibility in ensuring work assignments are aligned with current and future needs, without constraint by a contractual scope of work. This conversion also aligns better with BOLI guidance around professional contractor versus employee designations, and the respective labor unions.

Positions would include psychiatric supervising physicians, psychiatrists, medical assistants, psychologists, chaplains, custodians and cooks.

Implementation would vary by recruitment. Since this is a funding shift from existing budget resources within Services and Supplies, the effective dates would be immediate. The bulk of the positions requested, clinical professionals, are historically difficult to fill and may require more than one biennium to fully implement.

3. How does this policy package further OHA's mission and align with its strategic plan?

This package aligns with the Governor's priority of Healthy and Safe Communities, the OHA Mission of ensuring optimal health care and access and the OHA strategic plan of eliminating health inequity by providing additional invested state employees with correctly aligned management and oversight structures in an environment serving an otherwise stigmatized population.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

This package would remove the pressure to increase contract rates or maximum reimbursements (for direct care staff) that create budget gaps as salaries and benefits would be paid within the state classification system. This allows OSH to accurately gauge and enforce budgetary compliance for the converted positions.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

Not directly, however loosely ties to workforce engagement and satisfaction by creating equitable status and employment and compensation packages for the same work. For patients, it aligns with improving clinical

services through a stronger base of staff continuity with less variation in schedules and length of employment typically occurring with contracted staff. This also impacts patient and staff safety by ensuring adequate staffing resources in patient care areas.

7. What are the long-term desired outcomes?

The result of this position conversion is enhanced flexibility to ensure effective care through replacing contractual scopes of work with managerial oversight and the ability to modify services to any emergent need, without enacting a procurement or amendment process. Converting positions also mitigates risk associated with BOLI requirements governing independent contractors versus direct employment.

Staffing consistency is critically important to patient care, therapeutic relationships and team approach to treatment.

8. What would be the adverse effects of not funding this policy package?

Not funding this package would result in continued overspend to fill the need associated with the duties the contractors are performing. Paying a market value rate instead of an employee rate, especially for highly skilled, in-demand professions such as psychiatry, will result in budgetary overspend in order to meet an equivalent need.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

Most OSH services are part of the overall treatment plan for the patients at the hospital and cannot be reduced. In the past, OSH has attempted to meet the need through consolidation of services when possible. Differentials for things like critical need have been put into place, where a single doctor is paid an increased amount if their

workload includes more than a full caseload. While some of these solutions were able to work short term, they are not feasible in the long term. They are also expensive and far exceed the allotted budget for pay differentials.

OSH also contracts for other services across the hospital, both through agency contracts, such as Galt Industries, and directly with medical assistants, chaplains, psychologists, nurse practitioners, and other patient-serving professionals. These services are governed by a contractual scope of work rather than direct management, and do not always allow nimble responses to emergent needs, as contract language is not equivocal to supervision. Further, the line between contractors and employees is compromised in some of these relationships where it is difficult for the contractor to be fully independent and meet the requirements of OSH.

10. What alternatives were considered and what were the reasons for rejecting them?

OSH has attempted to balance the staffing levels required to meet patient needs against budget and position authority limitations. While converting these contracts to state positions does not provide additional supports beyond what exists today, it is a more cost-effective model of providing service with enhanced performance accountability.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

There is no direct impact on other agencies, only tertiary impact related to the treatment OSH provides.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

None.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

OSH primarily serves vulnerable populations and populations without the ability to otherwise receive services.

Staffing and fiscal impact

Implementation date(s): July 2021

End date (if applicable): Not applicable

15. What assumptions affect the pricing of this policy package?

This pricing is net zero. It assumes that an equivalent amount from the Services and Supplies line items for either Professional Services or Medical Supplies and Services would be transferred to Personal Services.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

No.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

This package assumes the additional recruitment responsibilities can be met within existing resources. Shifting to positions from contracted services will result in the associated support services related to employees.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This policy package requests 34 permanent, full-time positions priced at 24 months for the 2021-23 biennium for three departments:

Psychiatry:

- Four (4) Supervising Psychiatrist positions
- Eighteen (18) Psychiatrist positions
- Five (5) Medical Assistant positions

Spiritual Care:

- Two (2) Chaplain positions

Psychology:

- One (1) Psychologist position

Environmental Services:

- Three (3) Custodian positions

Food and Nutrition Services:

- One (1) Cook position

20. What are the start-up and one-time costs?

None.

21. What are the ongoing costs?

This policy package would be a net zero in the initial biennium, because funding would be transferred from existing budgeted amounts in Services and Supplies to Personal Services. Ongoing costs, in future biennia, would include all costs associated with the established positions, including steps and cost of living adjustments (COLA) for the new employees. Because the initial funding would be derived from Services and Supplies line items that drive above standard inflation, the actual net increase would be the difference between what the current contract employees cost and the amount of the budgetary increase that would have occurred at the above standard inflation rate.

22. What are the potential savings?

When first calculated for rebalance during 2020 legislative session, OSH estimated the savings from this exercise could result in approximately $1.5 million in funds in the first biennium that could either be given up or be applied to other OSH needs. This savings was the aggregate contract services expense over the equivalent state positions. Actual savings would be dependent on when the hiring of state employees actually occurs as contract services backfill would be necessary until that point.

23. What are the sources of funding and the funding split for each one?

Though this policy package does not request additional funding, these positions would be funded entirely by General Fund.

Oregon Health Authority
2021-23 Policy Package

Division:	Public Health Division
Program:	Office of the State Public Health Director
Policy package title:	Public Health Modernization
Policy package number:	417
Related legislation:	LC 6; HB 2348 (2013); HB 3100 (2015); HB 2310 (2017); SB 253 (2019)

Summary statement:

Since 2013, Oregon has been on a path to fundamentally shift its practice to ensure essential public health protections are in place for all Oregonians through equitable, outcomes-driven and accountable services. The groundwork laid through initial investments in public health modernization have been critical to Oregon's management of the COVID-19 pandemic. However, the COVID-19 response has highlighted continued gaps in the public health system, specifically centering all work in health equity and cultural responsiveness and apply equity principles across all areas of public health practice. This policy package supports implementation of key public health programs in state, local and tribal public health authorities and communities and creates mechanisms for increased accountability for equitable health outcomes. Not funding this policy package risks OHA's ability to ensure basic public health protections guaranteed in statute are available to every person in Oregon and challenges OHA in continuing to meet the deliverables and timelines prescribed in House Bill 3100 (2015).

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$68,875,348**	**$(465,178)**	**$(752,016)**	**$67,658,154**	**28**	**28.00**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

The landscape for public health has changed dramatically in recent years as the way that we live, travel, work and recreate has created a series of new and increasingly complex public health issues. These are the circumstances that led to the rapid spread of COVID-19, creating an international pandemic not seen on such a scale in the last 100 years since the 1918 influenza pandemic. At the same time, the COVID-19 pandemic immediately exacerbated widespread existing health inequities borne by systemic racism and oppression. COVID-19 has disproportionately impacted communities of color, low wage workers and individuals in congregate settings like correctional facilities and long-term care facilities. The impacts of historical and contemporary injustices leading to health inequities will require years of a committed public health response and recovery that is co-created with communities.

This policy package considers this context and builds upon previous investments in public health modernization made in the 2017-19 and 2019-21 biennia to center the public health system fully in equity. The demands on Oregon's public health system have continued to increase and will do so in the future as the secondary and tertiary impacts of COVID-19 come to the fore. These immediate health needs are encapsulated with ongoing environmental health risks such as wildfire due to climate change. These compounding health needs require a public health system that is equity-driven, community-based and nimble.

Recognizing the need for a robust public health system to support Oregon's health system transformation and achievement of the Triple Aim, in 2013 the Oregon legislature set a charge to develop a public health system for the future. In 2016, all state and local public health authorities completed a robust assessment of their capacity to implement foundational public health programs. As a part of that assessment, significant gaps were found in the state's ability to center equity and be culturally and linguistically responsive to health and community needs, proactively measure and mitigate environmental impacts to human health, manage new

communicable disease outbreaks and collect and report public health data that is needed to solve new public health problems. Furthermore, the 2016 public health modernization assessment found a $210,000,000 additional biennial need for state and local public health authorities to fully accomplish statutory responsibilities. This policy package supports implementation of the key public health priorities selected by the Oregon Public Health Advisory Board for the 2021-23 biennium, which include health equity, community partnership development, leadership, communications, assessment and epidemiology, communicable disease control, environmental health, emergency preparedness and response and policy and planning.

2. What would this policy package buy and how and when would it be implemented?

This policy package would build critical public health capacity across state, local and tribal public health authorities and community-based organizations to:

- Co-create public health interventions that ensure equitable distribution or redistribution of resources and power and recognize, reconcile and rectify historical and contemporary injustices.
- Establish coordinated systems for preventing and responding to communicable disease and environmental health threats among communities that are disproportionately impacted.
- Protect communities from acute and communicable diseases through prevention initiatives that address health inequities.
- Reduce unhealthy environmental exposures through policy and implementation of environmental health regulatory requirements.
- Build healthy and resilient communities by promoting natural resource, land use and built environment policies and programs that support health.
- Mitigate impacts of climate change on public health with a focus on the health inequities intensified by climate change.

- Implement a statewide system for environmental emergency preparedness.

These special payments must be an ongoing biennial investment in the public health system which is necessary to protect the health of every person in Oregon. Previous public health initiatives have demonstrated that when funds are not sustained, rates of diseases increase and communities of color bear a disproportionate burden of those impacts. OHA anticipates that communicable diseases and environmental health threats will not be solved in the 2021-23 biennium and the public health system must remain vigilant to address these needs.

Further details about each of the special payments is as follows:

- Local public health authorities: Local public health authorities will be responsible for centering all of their local interventions on equity, including workforce diversity, partnership with community-based organizations and internal and external organizational policy changes that shift power to community. Local public health authorities will build upon previous investments in communicable disease control to provide comprehensive communicable disease surveillance, investigation, interventions and evaluation. Local public health authorities will also be responsible for assessing and mitigating environmental risks to human health, including those associated with climate change, focusing on those communities most at risk of the adverse effects of environmental health risks to their health. In order to do this work, local public health authorities must apply outcomes from the COVID-19 response to bolster local emergency preparedness and response systems, which underpin the success of communicable disease and environmental health interventions. Local public health authorities will be funded through the funding formula developed with the Public Health Advisory Board, which will be submitted to Legislative Fiscal Office per ORS 431.380. The local public health authority funding formula not only addresses all statutory requirements, but also includes demographic factors like population diversity, income and education level, language other than English spoken at home which are designed to provide more resources to more diverse counties. At the level included in this policy package, local public health authorities will also receive incentive payments when

they meet accountability measure targets for their jurisdiction and matching funds for county investment in public health services.

- Tribal public health authorities: In accordance with OHA's Tribal Consultation and Urban Indian Program Confer Policy, OHA will fund Tribes using the methodology to which they agree for work in the following areas: health equity and cultural responsiveness, communicable disease control, environmental health and emergency preparedness and response. Funded work for Tribes will help address areas of need based on the 2019-21 Tribal public health modernization assessment process. Funding allocation to Tribes is determined through the Tribal Consultation and Urban Indian Program Confer Policy.
- Community-based organizations: OHA will utilize an existing partnership network of community-based organizations to fund additional work across the state that advances health equity and cultural responsiveness within the public health system while centering equity in OHA and local public health authority communicable disease control, environmental health and emergency preparedness and response interventions. Community-based organizations will submit proposed budgets and work plans for the objectives included in this policy package. OHA will select community-based organizations across the state that also represent the cultural and linguistic diversity of Oregon's population.

A modern public health system is equipped with a set of skills and tools – sometimes referred to as foundational capabilities – that are the pillars for how the public health system protects people from health threats and achieves health for all.

The following seven foundational capabilities achieve the communicable disease and environmental health goals listed above and make progress toward an equitable Oregon.

- Health equity and cultural responsiveness: Ensure public health programs are co-created with communities and public health programs are culturally and linguistically competent.

- Assessment and epidemiology: Analyze data to understand emerging trends for communicable disease and environmental health threats; make data readily available to communities and partners who rely on the information and use data to implement culturally and linguistically responsive interventions.
- Community partnership development: Leverage coordinated care organizations, government agencies and other partners to increase the impact of public health modernization work in communities.
- Emergency preparedness and response: Work with communities and partners to prepare for, respond to and recover from public health threats and emergencies, while ensuring populations most at risk are at the center of planning efforts.
- Leadership and organizational competencies: Develop the public health workforce to be better equipped to nimbly respond to new public health threats; use performance management and quality improvement to ensure public health interventions improve outcomes; spread capacity from public health modernization across public health program areas.
- Communications: Ensure timely risk communications and proactive communications that are culturally and linguistically responsive.
- Policy and planning: Engage with partners, stakeholders and communities to develop and implement policy solutions that are responsive to community needs.

At a broad level, the Public Health Division (OHA-PHD) would convene local and tribal public health authorities, community-based organizations, state agencies and representatives from other sectors to develop evidence-based plans for the prioritization and implementation of funded work to mitigate the highest risk impacts to human health across the state.

The specific work included in this policy package is as follows:

OHA-PHD would provide leadership for a community-based and equity-centered approach to public health in Oregon; manage local and tribal public health authority contracts and grants to community-based organizations; provide technical assistance to local, tribal and community-based organization grantees to support program implementation; maintain and annually report on public health accountability measures; enhance public health and health care data exchange; collect and report population health data for the public health system and its partners; convene partners to develop and implement a framework for using data to identify leading environmental risks to human health and corresponding plans to mitigate risks; implement a statewide plan to manage threats to the environment and human health as a result of changes to Oregon's climate; and coordinate acute and communicable disease outbreak investigations, including communicable disease testing at the Oregon State Public Health Laboratory.

This policy package includes the formation of a new community engagement unit within the Office of the State Public Health Director to manage community-based organization contracts and provide direct partnership and co-creation of health interventions with community. This unit will both manage funds from this policy package for community-based organizations and create the supportive structure within the Public Health Division for other public health programs to work directly with community-based organizations. This request would similarly build out staff within the Environmental Public Health, Acute and Communicable Disease Prevention and Health Security, Preparedness and Response sections to lead state-level interventions and ensure a robust and cohesive public health system.

Local public health authorities would monitor and regulate environmental health risks within communities; convene local stakeholders to develop, exercise and implement emergency preparedness plans; co-create health-related interventions with the community; train clinic staff in culturally and linguistically responsive and evidence-based quality improvement activities; track cases of acute and communicable diseases to ensure

individuals and their partners receive treatment to curb the spread of disease; and implement performance management systems to ensure the work of the local public health authority is continuously improved to drive towards population health outcomes.

Tribal public health authorities would convene local stakeholders to develop, exercise and implement emergency preparedness plans; co-create health-related interventions with the community; track cases of acute and communicable diseases in order to ensure individuals and their partners receive treatment to curb the spread of disease; convene local stakeholders to develop, exercise and implement emergency preparedness plans; and involve communities in the development and execution of health-related interventions.

Community-based organizations would co-create culturally and linguistically responsive public health interventions to ensure alignment with goals to eliminate health inequities and support community resilience and recovery.

3. How does this policy package further OHA's mission and align with its strategic plan?

OHA's mission is to help people and communities achieve optimal physical, mental and social well-being through partnerships, prevention, and access to quality, affordable health care. A robust public health system that is equipped to weather new challenges is essential to OHA's mission. Indeed, ensuring the public health system is appropriately equipped to protect human health has been a leading priority for OHA since 2015.

OHA's strategic plan goal is to eliminate health inequities by 2030. This policy package would shift Oregon's public health system to be community-based and equity-centered in order to achieve OHA's ten-year goal. This policy package would create critical infrastructure within the Public Health Division and with community-based organizations that are essential to centering public health work on equitable outcomes.

This funding request supports Governor Brown's priority for building a more equitable Oregon by equipping state, local and tribal public health authorities and community-based organizations with capacity and resources to identify and respond to physical and environmental health needs in the community.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

OHA will measure the success of this POP through achievement of established public health accountability metrics, which are collected and reported annually. At the proposed funding level, OHA-PHD would provide incentive payments to local public health authorities based on their achievement of process measures established within the funded areas, specifically related to immunization quality improvement efforts, contact investigations for sexually transmitted infections, participation in local transportation and land use planning decision-making and achievement of drinking water quality indicators.

OHA will also be able to measure the success of this POP through health indicators identified, analyzed and interpreted with communities of color through community-specific data collection efforts that began with the 2019-21 legislative investment in public health modernization.

This policy package also includes resources for a robust evaluation by OHA-PHD and local and tribal public health authorities on the successes being realized and where the public health system can improve service delivery to create greater efficiencies and accountability.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

This POP supports several activated Tier 1 OHA performance measures, including:

- Health indicator reporting
- REAL-D implementation
- Timeliness of translations during emerging public health events
- Continuity of Operations Plans

At the Tier 2 level, this POP supports the following activated OHA-PHD performance measures:

- Tribal representative engagement in public health advisory teams
- Representation of those affected in an advisory capacity
- Staff registered in the Health Alert Network

In this biennium, OHA-PHD will continue to align its performance measures with the work included in this policy package.

7. What are the long-term desired outcomes?

The long-term outcomes for this policy package are to eliminate health inequities by working with communities to equitably distribute or redistribute resources and power and recognizing, reconciling and rectifying historical and contemporary injustices. This work would include ongoing engagement of state, local and tribal public health leaders to co-create public health programs with communities. In the medium term, this policy package would reduce the burden of environmental and communicable disease-related health issues by focusing on the root causes of environmental health and communicable diseases. Short term, it would equip state, local, tribal

and community health agencies to apply the foundational capabilities for governmental public health in such a way that centers equity across all health issues.

8. What would be the adverse effects of not funding this policy package?

If this request is not funded, Oregon's governmental public health system would struggle to address the ongoing health and social impacts of COVID-19 on communities. Although Oregon's public health system was able to respond quickly to COVID-19, it fell short of delivering equitable outcomes for communities of color. Not funding for this POP will exacerbate disparities in health outcomes and work against OHA's ten-year goal. Not funding this policy package would risk the Public Health Division's long-term relationships with communities of color and community-based organizations by failing to uphold the request for sustained funding for their work.

Without the support of this policy package, OHA-PHD will likely be in the ongoing position of responding to individual crises rather than being able to work with partners to prevent them in the first place. Not funding this POP leaves the public health system in a position where it will be unable to respond to multiple simultaneous public health crises.

Should this POP not be funded, Oregon can anticipate disparities in the level of public health service available at the local level, particularly as local government budgets struggle to keep up with budget shortfalls as a result of the current recession. This would mean Oregonians would lack essential public health protections based on where they live.

The current focus on gaining efficiencies and improving effectiveness in public health service delivery would subside because there would little incentive to continue working regionally and to focus on delivering outcomes for the community. Recent transitions in local public health service delivery have shown that without sufficient

resources, local governments are more likely to cut, privatize or transfer public health authority to OHA-PHD than to work regionally.

Finally, OHA's ability to foster its relationship with federally recognized Tribes would be hindered by a lack of investment in tribal public health capacity.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

In the 2019-21 biennium, OHA-PHD leveraged federal grants and restructured existing positions to the extent possible to augment the programs implemented with the $15.6M legislative investment in public health modernization. However, the impact of this investment is expected to be proportional to the size of the investment. The Oregon legislature expects the public health system to fully implement its statutory responsibilities, and the current investment will not support expansion of the work needed in health equity, community partnership development, leadership, communications, assessment and epidemiology, communicable disease control, environmental health, emergency preparedness and response and policy and planning.

10. What alternatives were considered and what were the reasons for rejecting them?

OHA-PHD has explored whether federal funding might be available for this work. Based on the way federal public health funds are appropriated by Congress, there is not an immediate option for federal funding for the level of investment needed to implement public health modernization in Oregon. Furthermore, federal financial supports for the areas funded by this POP are likely to continue to or begin to decline as a result of the recession and prior efforts to limit public health spending. Outside of this POP request, OHA will continue to align its funding streams to further support public health modernization to the extent possible based on federal funding restrictions.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

OHA-PHD put forward a legislative concept placeholder for any changes that may need to be made to statute to support this work.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

This policy package would primarily invest in local and tribal public health authorities so they can carry out their public health responsibilities related to health equity, community partnership development, leadership, communications, assessment and epidemiology, communicable disease control, environmental health, emergency preparedness and response and policy and planning. This policy package would also invest for the first time in community-based organizations to co-create public health interventions grounded in equity. In order for OHA-PHD's work funded in this POP to be successful, OHA-PHD will collaborate with several state agencies and the sectors they support, including the Oregon Department of Corrections, Oregon Youth Authority, Department of Environmental Quality, Department of Education, Oregon Department of Agriculture, Oregon Department of Transportation, and the Oregon Department of Land Conservation and Development.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

The direction of this POP is being guided by the Oregon Health Policy Board and the Public Health Advisory Board. Local public health authorities have been engaged through the Conference of Local Health Officials, and federally-recognized Tribes will be engaged through the Senate Bill 770 Health Cluster meeting and, if

requested, formal tribal consultation. Community-based organizations and advocacy organizations will be engaged in developing equity-driven goals for the public health system.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

In the 2016 statewide public health modernization assessment, the most significant gap across state and local public health authorities was in the system's ability to address health equity. Although significant work on health equity began with the initial investments in public health modernization, the COVID-19 pandemic has revealed that there must be a fundamental shift in public health practice in order to rectify grave injustices in health outcomes that have been exacerbated by the disproportionate impact of COVID-19 on communities of color.

This request places equity at the center of a modern public health system by funding state, local and tribal public health authorities and community-based organizations to co-create public health interventions. It would provide funding to local and tribal public health authorities through a funding formula that directs greater resources into communities of color, low income communities, rural communities and communities that speak a language other than English at home.

This policy package would specifically address inequities in outcomes related to environmental health threats and communicable diseases and fosters a resilient public health system through investment in foundational public health capabilities.

Staffing and fiscal impact

Implementation date(s): July 1, 2021

End date (if applicable): Not applicable

15. What assumptions affect the pricing of this policy package?

The key assumption is that Public Health would be fully funded to address the needs of Oregonians through this policy package. The division would have enough revenue to address outbreaks, prevention, and inequities in outcomes for state and local work.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

Public Health

OHA-PHD would be responsible for overseeing all contracts and grants in this policy package in addition to implementing the state-level public health functions needed to improve health outcomes related to health equity, community partnership development, leadership, communications, assessment and epidemiology, communicable disease control, environmental health, emergency preparedness and response and policy and planning.

Equity and Inclusion

The Equity and Inclusion Division would provide content expertise to OHA-PHD to ensure alignment and benefit of health equity work in the community and would consult on community engagement, REAL+D and health equity training initiatives.

Health Policy and Analytics
Staff in Health Policy and Analytics would provide consultation to OHA-PHD on opportunities to align public health accountability metrics with CCO incentive metrics.

Office of Information Services
The Office of Information Services would be responsible for implementing public health data system upgrades that are essential for the public health system to collect and report data to local and tribal public health authorities and other partners so it can be used for program and policy decision-making.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

This policy package includes funding and a new position for the Office of Information Services (OIS). OIS has been consulted throughout the development of this request.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

Yes, it is anticipated this POP will provide an additional level of public health service to all residents in the state through improvements in state, local and tribal public health authorities.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This package requests the 28 permanent, full-time positions listed below, priced at 24 months, that would require position authority and General Fund.

Establishing the Community Engagement unit:

- One Principal Executive Manager D
- Ten Operations and Policy Analyst 2
- One Fiscal Analyst 1
- One Administrative Support Specialist 2

In addition, positions to support the division and center work:

- One Executive Support Specialist 2
- Two Fiscal Analyst 2
- One Operations and Policy Analyst 2
- Five Operations and Policy Analyst 3
- Three Operations and Policy Analyst 4
- One Project Manager 2 (OIS)
- One Epidemiologist 2
- One Principal Executive Manager F

This package also requests General Fund for five existing positions so these staff can perform work essential to modernization that cannot be charged to a federal grant. These positions would not require position authority. The FTE amounts below represent the portion of the positions transitioning to General Fund at 24 months.

- One Public Health Educator 2, 1.0 FTE
- Two Natural Resource Specialist 4, 1.45 FTE
- One Principal Executive Manager D, 0.75 FTE
- One Principal Executive Manager F, 0.5 FTE

20. What are the start-up and one-time costs?

Epidemiologist positions would require statistical analysis software and ongoing software license renewals.

21. What are the ongoing costs?

Ongoing costs are associated with the continued operation and implementation of the work specifically:

- Personnel services for 28 new positions including a new Community Engagement Unit which totals ($2.9 million) and five existing staff, all services and supply expenses and equipment for state priotities for a grant total of $12.2 million.
- Special payments, which fund local public health authorities, Tribes and community-based organizations for local staff dedicated to the ongoing work included in this policy package. Local public health authorities will receive $35.5 million; Tribes, $5.0 million; and community-based organizations $15.0 million totaling $55.5 million.
- Services and supplies, which support the positions included in this policy package.

22. What are the potential savings?

An investment in the prevention of disease and disability is proven to yield significant savings to Medicaid and other payers by decreasing the need for costly health care. Indeed, just a 10 percent increase in per capita public health spending in Oregon would result in:

» 15 fewer infant deaths annually
» 16 fewer diabetes deaths annually
» 202 fewer heart disease deaths annually

23. What are the sources of funding and the funding split for each one?

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Personal Services	$6,645,858	$(408,913)	$(648,075)	$5,588,870	28	28.00
Services & Supplies	$6,329,490	$(56,265)	$(103,941)	$6,169,284		
Capital Outlay	$450,000			$450,000		
Special Payments	$55,450,000			$55,450,000		
Other						
Total	**$68,875,348**	**$(465,178)**	**$(752,016)**	**$67,658,154**	**28**	**28.00**

Oregon Health Authority
2021-23 Policy Package

Division:	Public Health Division
Program:	Maternal and Child Health
Policy package title:	Universally offered Home Visiting
Policy package number:	418
Related legislation:	Senate Bill 526 (2019)

Summary statement:

The policy package proposes to continue to provide the resources required to implement and scale up the next phase of universally offered home visiting (UoHV) in Oregon. This continues the phased-in approach of implementing this program, continuing with the early adopter communities and the next cohort.

If the UoHV Initiative is not funded, it would result in the inability to fully implement the program as statutorily mandated. This would undermine the goal of establishing a more cohesive and comprehensive home-visiting system that is evidence-based and connects every family with a newborn in Oregon with local resources that are individualized, non-stigmatizing and meet them where they are with what they need. As the program would be implemented at the local level there would be an impact of reduced capacity to adequately serve families during the biennium.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$5,126,565**	**$0**	**$3,180,526**	**$8,307,091**	**4**	**3.50**

Oregon Health Authority: 2021-23 Policy Package

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

A safe and healthy environment during childhood forms the foundation for a lifetime of physical and mental well-being and healthy relationships. There is an opportunity to achieve population impact by bringing together community partners to create a preventive system of care and by delivering a universal, short-term, postnatal nurse home visiting program. Population impact is the opportunity for health care systems, agencies and organizations to work together in order to improve the health outcomes of the communities they serve. This is achievable through universal reach, rigorous evaluation, and creating a model for sustaining funding.

Rates of maternal mortality have been on the rise in the United States and there are significant disparities by race/ethnicity. While maternal mortality rates in Oregon are typically not as high as the national average, it is likely Oregon experiences similar disparities to those experienced in other states. Washington State's Maternal Mortality Review Panel included a recommendation to expand efforts to provide early and frequent home visits to prevent pregnancy-related deaths and improve maternal health care.

This universal effort would not replace more intensive targeted home visiting programs, but identify what families need and want from local resources and provide an individualized, non-stigmatizing entry into their community's system of care. Existing home visiting programs play an integral role in preventing adverse childhood experiences (ACEs), which can harm developing brains and increase lifelong risk for many chronic diseases and other serious problems. The existing home visiting programs provide a critical preventive system of care for families; however, these programs are long-term, intensive and don't have enough funding or dissemination strategies required for population change.

In 2019, OHA partnered with the Early Learning Division (ELD) to explore the feasibility of implementing a universal home visiting program. As this work developed, both Senator Elizabeth Steiner Hayward and Governor Kate Brown joined the effort and supported achieving universally offered nurse home visiting to families of newborns in Oregon. As a result, the 2019 Legislature passed Senate Bill 526, which states the Oregon Health Authority (OHA) "shall design, implement and maintain a voluntary statewide program to provide universal newborn nurse home visiting services to all families with newborns residing in this state to support healthy child development and strengthen families. The authority shall design the universal newborn nurse home visiting program to be flexible so as to meet the needs of the communities where the program operates."

Oregon selected the Family Connects model, as it is the only evidence-based model of universal nurse home visiting that meets the criteria set in Senate Bill 526 (2019): Recognized by the Home Visiting Evidence of Effectiveness review project by the US Department of Health and Human Services (HomVEE -https://homvee.acf.hhs.gov/). A policy package to fund implementation of the Family Connects model was introduced as part of Governor Kate Brown's proposed budget and included in the 2019-21 Legislatively Adopted Budget. The initial policy package (#401) was developed and passed with the expectation that additional funding and staffing resources would be needed to plan, develop, and implement, universally offered nurse home visiting services statewide by 2026. It also addressed the critical start-up funding and staffing needs for continued support for the next phase of the project.

Phase I of the project involved a statewide solicitation of Letters of Intent (LOIs) from interested communities who desired to be considered as an early adopter community. This process resulted in the engagement of eight self-selected, early adopter communities to gain lessons learned and apply these lessons to subsequent cohorts across the project lifecycle. Originally, the first early adopter communities were slated to being service delivery July 1, 2020. Due to the Covid-19 pandemic, and local public health, and the health care delivery system being overwhelmed with response work, service delivery in this early adopters cohort will not begin until January 1, 2021.

As anticipated, the early adoption phase has identified some key elements that would ensure successful scaling of implementation and rollout of universally offered nurse home visiting in Oregon for the next biennium:

- Increased state-level staffing capacity and resources.
- A state-level project coordinator.
- Increased financial support at the local level – for community preparation, service delivery, staffing capacity
- Data system alignment and enhancements at the local-level.
- Support capacity for state-level evaluation, data collection and data system alignment.
- Contracting with the home visiting model developer, Family Connects International, to provide continued technical assistance to the Early Adopters Cohort and planning and support for subsequent cohorts.
- Increased funding to local communities to put up as Federal Match - it leverages state and local investment to draw down federal support--37% non-federal investment/63% federal investment - in alignment with the recent Medicaid Targeted Case Management (TCM) reimbursement rate adjustment, effective January 2020. The current Medicaid Targeted Case Management (TCM) State Plan Amendment for Public Health Nurse Home Visiting supports the Babies First!, CaCoon and Nurse Family Partnership programs.

This policy package would provide the resources necessary to deliver these key elements for successful scaling up of the program.

2. What would this policy package buy and how and when would it be implemented?

OHA would continue with Phase 2 of implementing Senate Bill 526, passed during the 2019 state legislative session that created the Universally offered Home Visiting (UoHV) Initiative. With the bill becoming effective July 1, 2019, OHA began project planning and implementation.

The Eight Early Adopter Communities, consisting Local Public Health Authorities (LPHAs), Early Learning Hubs (EL Hubs) and Tribes as Community Leads, with support from the Oregon Health Authority, would continue to implement and

scale up the evidence-based Family Connects model, Family Connects Oregon (FCO), providing service delivery in their respective communities using the model as described below.

In collaboration with hospitals and birth attendants, Community Leads will continue to assure every mother and father of an eligible newborn shortly after birth is offered this service, ideally face-to-face post-delivery to engage the family in services and schedule a home visit. Participation is voluntary for families. If requested, a brief home visit will be conducted by a Public Health Nurse (PHN) in the first week of life to address time-sensitive family needs (e.g., breastfeeding, weight check, postpartum health). A comprehensive home visit will be offered at 2-3 weeks post hospital discharge. The PHN will assess the physical health status of mother and child; assess unique family risks and needs; respond to immediate family needs, such as feeding, weight gain, sleep, parenting stress, substance abuse and mental health; and connect the family with matched local community services and resources based on individually identified needs and family wishes. Service referrals may include medical and dental care, more intensive home visiting (e.g. Healthy Families Oregon, Babies First!, CaCoon, Early Head Start), WIC, TANF, childcare, parenting support behavioral health services and housing. Follow-up visits (0-2 total) and telephone calls as needed, are offered for further assessment, facilitating linkage to community services, and family support. A call will occur 1 month after case closure for customer satisfaction, quality assurance, and confirmation of connections to community resources.

As each community with in a cohort will progress at different rate, we continue to propose a phased-in approach over the next 3-4 biennia with a new cohort beginning the community preparation and service delivery during each biennium.

Due to the impact of the COVID-19 pandemic, initial progress as envisioned for the 2019-21 biennium has slowed. This request is based on a reset timeline that would better match current local capacity and resources resulting from the pandemic. The emergency response to the COVID-19 pandemic has delayed the implementation of the UoHV/Family Connects Oregon Initiative by approximately 9 to 12 months. Prior to the pandemic, the eight Early Adopter communities were on the verge of launching their community preparation efforts that would have poised them to start delivering services in the Summer/Fall 2020. Training for nurses in North Carolina were scheduled, and hospital systems along with

community partners were ready to map the process families would follow to receive their services. All of that stopped as the pandemic hit Oregon and health systems, local public health and community partners responded to the emergency. This has resulted in these Phase 1 activities being pushed back to later in the 19-21 biennium, no sooner than January 1, 2021.

Additionally, the following Phase 1 work has been delayed until Phase 2, to start in the 2021-23 biennium:

- Onboarding of Cohort 1, which includes community needs and implementation planning; community and stakeholder outreach and engagement; data and billing systems alignment; and local level staffing and training
- Establishing a Center of Excellence in Oregon for training new communities on-site within Oregon and
- Begin Program Evaluation (program evaluation planning will still occur in the 2019-21 biennium

This policy package would allow OHA to acquire the additional resources and support to continue with Phase 2 of the implementation of Senate Bill 526. Each element below would be implemented July 1, 2021 except where later dates are listed:

New State-Level Staff:

- One Operations and Policy Analyst 3 position, Workforce Development/Continuous Quality Improvement (CQI) Coordinator (to start July 1, 2022)
- One Project Manager 1 position
- One Operations and Policy Analyst 2 position, Informaticist
- One Principal Executive Manager D position

Payment for Providers of Services:

- Provide service providers with funds to use as Federal Match for the provision of Family Connects Oregon Program home visiting services to Medicaid members for the first half of the 2021-23 biennium before transitioning to become a CCO-covered service.

- Create a Home Visiting Account to reimburse providers of services to Oregonians with health plans not covered by Senate Bill 526 (i.e. self-insured) and the uninsured.

Contracts:

- Family Connects International for statewide technical assistance.
- Program evaluation.
- Community Leads for community alignment and implementation support including staffing capacity, training and certification, and data systems alignment.
- Management Consulting Firm to secure short-term additional subject matter expertise to support project development to supplement and augment identified project knowledge gaps i.e. subject matter expertise in marketing and branding; business processes development; and expertise in hospital and health care system operations.
- Data Systems Interoperability – Create bidirectional support between the Salesforce platform used by Family Connects International for data collection and Maternal and Child Health Section's home visiting data system, Tracking Home Visiting Effectiveness in Oregon (THEO) and electronic health records at the state and local levels.

Local Level Initiative Implementation

- Initial training
- Ongoing workforce development and trainings
- Travel

3. How does this policy package further OHA's mission and align with its strategic plan?

Implementing a universal, short-term, postnatal nurse home visiting program is an upstream approach aimed to further the agency's goal of improving the lifelong health of Oregonians. Science tells us that early childhood is a time of both great promise and considerable risk. Experiences in the earliest years of life form the foundation of brain architecture. Learning, behavior, and health across the lifespan are all built on that foundation. We know today's best programs and practices can

help support child development, but too many children are left behind. By supporting all families in identifying and accessing needed resources and attending to time sensitive family needs in the first month of life, we can promote positive early childhood experiences and lay the foundation for lifelong health. Evaluation of the Family Connects Model has shown that families have:

- More connections to community resources at 6 months
- More positive parenting behaviors with their infant (e.g., hugging, reading) at 6 months
- Less clinical anxiety reported by mothers at 6 months
- Higher quality home environments (e.g., safety, books, toys, and learning materials) at 6 months

In addition, this POP aims to further the agency's goals of lowering and containing health care costs. Evaluation of the Family Connects Model has shown reduced emergency medical care (hospital overnights, emergency department and emergency doctor visits) for infants at 6 months, 12 months, and 24 months. The Family Connects Model estimates that for every dollar invested in the program, there is a $3.17 savings, primarily from reduced infant emergency medical care.

Creating a preventive system of care and delivering an evidence-based universal, short-term postnatal nurse home visiting program also offers the Oregon Health Authority the opportunity to further the mission of the Early Learning Division to support all of Oregon's young children and families to learn and thrive.

Governor's Policy Priorities

Prioritizing children and families have been and continues to be a top policy priority of the Governor. It has become even more critical given the impact of the COVID-19 pandemic on families, particularly in Oregon's Black community and communities of color.

State Health Improvement Plan
The Family Connects Oregon intervention embeds each of the SHIP priorities. Through assessments, screenings and education, families of newborns can be connected with services and supports that address the economic drivers of health (housing, food, transportation, etc.), access to equitable preventive health care, access to behavioral health services, and address trauma and adversity. The universal nature of the model begins to address institutional bias and health disparities.

Modernization
The FCO model is population based, offered to all families of newborns. It supports the Foundational Capabilities of health equity and responsiveness, community partnership development, policy and planning, communication and emergency preparedness and response.

OHA Strategic Plan
This policy package supports the authority's strategic plan goal is to eliminate health inequities by 2030. While the model requires services be offered to all families of newborns, it would not replace intentional efforts to address health disparities. This would provide the opportunity to implement a proportionate universal approach to ensure families receive services based on need. A proportionate universalism approach can address the burden of disease across a number of determinants of health to narrow the health inequality gap. It strategically balances targeted and universal approaches by delivering universalism with an intensity related to the level of social need.

This policy package would move this work forward by building a more complete picture of what equity and health disparities truly look like across Oregon. Maternal and Child Health (MCH) commits to working towards racial equity by addressing racism, acknowledging implicit bias, and building equity-based approaches into our state and local programming. We acknowledge that government has a role in perpetuating inequities that have intentionally harmed Oregon's minority communities, including Black, tribal and indigenous communities. This has led to historical and ongoing trauma. We envision an Oregon where all families thrive, and where all women, adolescents, and children enjoy health and health care free of racial disparities.

This policy package would support the designing and funding of statewide and local strategies that address systemic and institutional racism and create a culture of accountability on issues of health equity. This initiative would be leveraged to develop and commit resources, data and funding to increasing racial equity. We would develop meaningful partnerships with diverse stakeholders who share a commitment to equity and support communities in doing the same.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

The successful implementation of an evidence-based universal, short-term, postnatal nurse home visiting program in Oregon has the potential to impact a number of the metrics for Oregon's Coordinated Care Organizations including: Emergency Department utilization; Childhood immunization status; Cigarette smoking prevalence; Depression screening and follow up plan; Developmental screening in the first 36 months of life; Effective contraceptive use among women at risk of unintended pregnancy; Patient-Centered Primary Care Home Enrollment; and the Timeliness of Postpartum Care. The model's upstream approach to assessing the needs of families and facilitating linkage to community services will further the agency's goals of supporting behavioral health needs and addressing the social determinants of health.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

This POP supports the following OHA Performance System Core Processes:

- Engaging Community, Stakeholders, Members and Partners

- Collecting, Analyzing and Sharing Data
- Developing and Managing Policy
- Improving Clinical and Population Health

7. What are the long-term desired outcomes?

Health Outcomes

Implementing a universal, short-term, postnatal nurse home visiting program is an upstream approach aimed to further the agency's goal of improving the lifelong health of Oregonians. Science tells us that early childhood is a time of both great promise and considerable risk. Experiences in the earliest years of life form the foundation of brain architecture (Harvard University, Center for the Developing Child). Learning, behavior, and health across the lifespan are all built on that foundation. We know today's best programs and practices can help support child development, but too many children are left behind. Supporting all families in identifying and accessing needed resources and attending to time sensitive family needs in the first month of life would promote positive early childhood experiences and lay the foundation for lifelong health. Evaluation of the Family Connects Model has shown families have:

- More connections to community resources at 6 months
- More positive parenting behaviors with their infant (e.g., hugging, reading) at 6 months
- Less clinical anxiety reported by mothers at 6 months
- Higher quality home environments (e.g., safety, books, toys, and learning materials) at 6 months

Research has shown the successful implementation of an evidence-based universal, short-term, postnatal nurse home visiting program for Oregon's Medicaid population would impact several the metrics for Oregon's Coordinated Care Organizations including:

- Emergency Department utilization
- Childhood immunization status
- Cigarette smoking prevalence

- Depression screening and follow up plan
- Developmental screening in the first 36 months of life
- Effective contraceptive use among women at risk of unintended pregnancy
- Patient-Centered Primary Care Home Enrollment
- Timeliness of Postpartum Care

The model's upstream approach to assessing the needs of families and facilitating linkage to community services would further the agency's goals of supporting behavioral health needs and addressing the social determinants of health.

8. What would be the adverse effects of not funding this policy package?

A lack of preventive services for families may increase numbers of children and families needing more intensive services. Existing home visiting efforts lack capacity for additional clients and are not designed achieve population impact.

Lack of funding for the UoHV Initiative funding would result in the inability to fully implement the program as statutorily mandated. Early Adopter communities would not have the funding needed to continue supporting service delivery, which is set to begin in the 19-21 biennium. New communities, set to be selected in the 21-23 biennium, would not have the required funding to support community preparation to prepare to being delivering the Family Connects home visits to their population.

This would undermine the goal of establishing a more cohesive and comprehensive home-visiting system that is evidence-based and connects every family with a newborn in Oregon with local resources that are individualized, non-stigmatizing and meet them where they are with what they need. As the program would be implemented at the local level, there would be an impact of reduced capacity to adequately serve families during the biennium when communities progress to the stage of service provision. Local Public Health would not have the funding and support to leverage federal Medicaid funding and engage commercial health plans to offer universal home visiting for all births in their respective communities. Additionally, reduced or no funding would impact the ability of the program to acquire and receive required technical assistance from the

Family Connect model developer, Family Connects International, which includes community alignment, data and data system alignment, program evaluation, and service delivery.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

Oregon has been working to build a home visiting system and is poised to build on existing evidence-based and evidence-informed home visiting programs. However, the initial connection, coordination and triage for families was missing. Senate Bill 526 (2019) addressed this gap by requiring all families of newborns be offered nurse home visiting services. This policy package is the second phase of designing and implementing the bill.

10. What alternatives were considered and what were the reasons for rejecting them?

Implement a universal short-term, postnatal nurse home visiting program through Oregon's Early Learning Division. LPHAs have experience delivering nurse home visiting programs and the partnerships in place to create the preventive system of care required to support families. The current state plan amendment (SPA) to support the delivery of Targeted Case Management (TCM) by Nurse Home Visiting programs would need expansion and approval by CMS to provide federal support to the delivery of this model.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

- Local Public Health Authorities, Early Learning Hubs and Tribes would be asked to implement this program which would require additional staff and new partnerships.
- The home visiting programs of the Early Learning Division would be integrated into the preventive system of care being created for families.
- Families would be referred to resources and services of the Department of Human Services including TANF and ERDC.
- Department of Consumer and Business Services (DCBS) would be required to continue partnering with OHA to support the commercial health plans' integration of UoHV into their member benefits, reimbursing of service providers, and coverage for Oregonians with plans not covered by Senate Bill 526.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

While OHA is the only state agency requesting funding to address this problem, the following agencies are collaborating on this policy package as key partners:

- Early Learning Division (ELD) has assisted with connections to Oregon's early learning system.
- Department of Consumer and Business Services (DCBS) has assisted with implementation for parents with commercial health benefit plans.
- OHA's Health Systems Division (HSD) and its CCO partners would integrate this service into their member benefits, reimbursing service providers and participating in development and maintenance of a community level system of care for families with newborns.
- OHA's Health Policy and Analytics Division (HPA) has assisted with health policy coordination.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

A universal home visiting program would remove stigma and promote health equity, because unaddressed disparities during the earliest years can lead to intensified health problems and widening social, educational, and economic gaps. The programs plans to achieve health equity through its goals to: create and strengthen community level systems of care for families of newborns; offer support to all new parents in Oregon (regardless of risk and insurance status); increase access to community services and supports; promote collaboration and coordination across Oregon's early childhood and home visiting systems; and improve health outcomes for families across the life-course.

Family Connects has been shown to increase families' connections to community resources and improve parenting behaviors, such as comforting an infant; it has also been found to improve parents' mental health, enhance the quality of home environments, reduce infants' emergency medical care, and increase parents' utilization of higher-quality child care for their children. Also, the model has shown reduced Emergency Medical Care (hospital overnights, emergency department and emergency doctor visits) for infants at 6 months, 12 months, and 24 months.

The model achieves this by addressing social determinants of health that impact health outcomes for the most vulnerable populations by reducing poverty, addressing structural racism, and increasing the access and availability of social supports as some of the outcomes.

Staffing and fiscal impact

Implementation date(s): July 1, 2021

End date (if applicable): Not applicable.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

15. What assumptions affect the pricing of this policy package?

Replication of the Family Connects Model which includes engaging all families post-delivery, 1-3 PHN visits per family to conduct assessments, screenings and referrals appropriate to family needs and a post case closure phone call. On average each family receives two visits. Per model evidence, the cost is about $700 to $800 per birth in the identified community.

Per model evidence, program saturation is 80 percent of the targeted population as this is a voluntary program and not all families will choose to participate. Saturation in Oregon is estimated to be approximately 70,000 infants per biennium, both public and privately insured when the program is fully scaled up.

The phased-in approach with Early Adopter communities would continue in the 21-23 biennium, reaching full-scale during the 23-25 biennium. They are anticipated to serve 10,332 infants during the 21-23 biennium. OHA plans to add one subsequent cohort of 2-4 communities during the 21-23 biennium.

The current Medicaid Targeted Case Management (TCM) State Plan Amendment for Nurse Home Visiting would need to be expanded and approved by CMS to access support for Family Connects services for each community as it begins service provision. It would leverage state investment to draw down federal support — approximately 37 percent state and/or local funds and 63 percent federal investment. As per Medicaid requirements, new communities would need to be added to the State Plan Amendment as they begin service delivery in order to be able to leverage state investment to draw down federal match.

As of January 2020, the current TCM reimbursement rate is $460 per visit. This rate is inclusive of all local level costs associated with the home visit, including the actual home visit and local infrastructure support for the program.

OHA anticipates in the 21-23 biennium Oregon's Coordinated Care Organizations (CCOs) will integrate this service into their member benefits as an in-plan covered benefit, effective contract year 2022. Service would then be included as part of

their capitation rates. TCM utilization would be reduced, used to reimburse services for only those newborns in the fee-for-service program.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

Office of Information Services (OHA) - Office of Information Services would need to provide minimal support to the Tracking Home Visiting Effectiveness in Oregon (THEO) data system and assist with the UoHV Initiative with system interoperability between THEO and the Family Connects database.

- Public Health Division would provide technical support, training and evaluation to support the successful implementation of the model.

- Health Systems Division's (HSD) Medicaid Program – would work with CCOs who would be expected to integrate the service as an in-plan covered benefit for their members. HSD and CCOs would then provide appropriate related supports.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

To be successful, a common data system is needed to track family contact and referral. Family Connects International's data system is built on the salesforce platform and is the system required for use by Family Connects Programs across the country. As the Maternal and Child Health Section (MCH) has implemented Tracking Home Visiting Effectiveness in Oregon (THEO), a data system that collects model specific information as required by our federal MIECHV Grant, it will need to be interoperable with the platform required for data collection for the Family Connects model. Office of Information Services would need to provide minimal support to the Tracking Home Visiting Effectiveness in Oregon (THEO) data system and assist with system interoperability.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

This universal effort would not replace more intensive targeted home visiting programs, but referrals for more intensive home visiting would be made into eligible programs, including Healthy Families Oregon, Early Head Start, Parents as Teachers, Family Spirit, Babies First! and CaCoon. Families enrolled in home visiting programs prenatally (Nurse Family Partnership, Babies First!, Early Head Start and Healthy Families Oregon) would not receive Family Connects services.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

The following full-time positions would be required to provide state-level program support and ensure the model is implemented to fidelity. Positions are permanent and priced for 24 months in 2021-23 unless otherwise noted.

- One Operations and Policy Analyst 3 position, Workforce Development/Continuous Quality Improvement (CQI) Coordinator (12 months) - This position will develop and coordinate workforce development and continuous quality improvement initiatives at the community and state levels
- One Project Manager 1 position, Limited Duration (LD) - The purpose of this position is to provide cross-agency and multi-sector coordination and project management for development, design, and implementation for the Family Connects Oregon (FCO) Program
- One Operations and Policy Analyst 2 position, Informaticist - The Informatics Specialist assures high quality data and appropriate data use and provides consultation and technical assistance in developing a training plan, training materials, and information dissemination guidelines.
- One Principal Executive Manager D position – This position will direct, coordinate, supervise and provide leadership under the direction of the MCH Section Manager in support of the MCH Section and UoHV Initiative.

20. What are the start-up and one-time costs?

Beginning Summer/Fall 2021 through the end of the 2021-23 biennium:

- Consulting ($100,000) - To procure short-term additional subject matter expertise to support project development to supplement and augment identified project knowledge gaps i.e. subject matter expertise in marketing, branding; business processes development; and healthcare knowledge and expertise in hospital and healthcare system operations
- System Interoperability ($500,000) – Create bidirectional support between the Salesforce platform used by Family Connects International for data collection and Maternal and Child Health Section's home visiting data system, Tracking Home Visiting Effectiveness in Oregon (THEO) and electronic health records at the state and local levels

Start-up costs would fade but not immediately as funding supports would be provided to each community as they progress through the implementation process.

21. What are the ongoing costs?

All costs associated with the requested positions would be ongoing ($850,000) as well as program evaluation ($200,000), Family Connects program model licensing ($100,000), and Community alignment costs ($1,000,000) are ongoing costs.

Service delivery costs total $4.6 million, of which $1.7 million is General Fund to serve 6,000 families. These costs would also be ongoing, however when the responsibility to provide the services transfers to CCOs during the 2021-23 biennium, the budget would be transferred from Public Health to the Health Systems Division. The estimated cost is based on the current TCM rate.

22. What are the potential savings?

This policy package aims to further the agency's goals of lowering and containing health care costs. Evaluation of the Family Connects Model has shown reduced emergency medical care (hospital overnights, emergency department and emergency doctor visits) for infants at 6 months, 12 months, and 24 months.

With the demonstration of positive impacts of home visiting on life-long health, the programs have also been proven to be a cost-effective strategy for states. An investment in home visiting programs have shown to offer returns on investment ranging from $1.75 to $5.70 for every dollar spent. This benefit is acquired through savings across the life-course through reduced costs of K-12 special education and grade retention, criminal justice expenses, and child protection. Specifically, the Family Connects® home visiting model, through cost-benefit analyses, has been shown to produce a return on investment of $3.02 for every dollar spent from reduced costs for emergency medical care for ED visits and overnight hospital stays. They estimated a local average of $432 per emergency outpatient visit and $3,722 per hospital night.

23. What are the sources of funding and the funding split for each one?

The federal funding source is Medicaid. Staff (excluding the PEM D position) would be able to utilize Medicaid Administrative Claiming (MAC) at a rate of 50 percent Federal Funds, 50 percent General Fund. For Special Payments, implementing agencies would be able to utilize Targeted Case Management (TCM). The current rate is approximately 63 percent Federal Funds and 37 percent General Fund.

Total for this policy package
