Oregon Health Authority
2021-23 Policy Package

Division: Oregon Health Authority
Program: Health Systems Division
Policy package title: CCO 2.0 Quality Assurance & Improving Data Collection
Policy package number: 419
Related legislation: None

Summary statement:

The Oregon Health Authority (OHA) Health Systems Division (HSD) lacks sufficient staff, process automation, and digitization of paper-based processes to meet the agency's oversight and quality assurance responsibilities due to the implementation of CCO 2.0 on January 1, 2020. CCO 2.0 significantly increased the volume and complexity of requirements for CCOs, which are designed to help achieve the Triple Aim of better health, better care, and lower costs while improving health equity. To meet many of these requirements, CCOs will be submitting more deliverables to OHA for evaluation, tracking and analysis than ever before. OHA requests four additional staff to enable full implementation of CCO 2.0 requirements through the development of CCO deliverables, communication and guidance to CCOs in achieving the requirements and extensive evaluation of CCO deliverables. This policy package would also purchase additional licenses and contractor time to design and build the online templates, interfaces, and supporting data infrastructure and include staff training to facilitate CCO reporting and other OHA data collection efforts. During the COVID-19 emergency it has been difficult to collect and review the required information as it is primarily paper-based and a challenge to transition to a remote work environment.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$870,172**	**$0**	**$1,152,584**	**$2,022,756**	**4**	**4.00**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

The Oregon Health Authority (OHA) Health Systems Division (HSD) lacks sufficient staff, process automation, and digitization of paper-based processes to meet the agency's oversight and quality assurance responsibilities. This under resourcing has been exacerbated due to the implementation of the second round of five-year contracts for coordinated care organizations, known as "CCO 2.0", on January 1, 2020. CCO 2.0 significantly increased the volume and complexity of requirements for CCOs, which are designed to help achieve the Triple Aim of better health, better care, and lower costs while improving health equity. To meet many of these requirements, CCOs will be submitting more deliverables to OHA for evaluation, tracking and analysis than ever before.

Currently, the four-person Quality Assurance and Compliance team does not have the capacity to fully develop the guidance for these requirements and the associated deliverables, or to evaluated submitted deliverables. Development of guidance is a key step in the quality assurance process and informs the way contract deliverables are evaluated. These evaluations help OHA measure CCO performance throughout the state and are crucial tools for ensuring positive member outcomes. As an example, the Quality Assurance and Compliance team establishes guidance for Notices of Adverse Benefit Determinations (NOABDs). These notices are issued to members who have had requested services denied, and they are used to explain the rationale for denial. The Quality Assurance and Compliance team applies evaluative criteria to these notifications ranging from notice readability, notice delivery date, to other areas of contract compliance. Evaluation of NOABDs can reveal operational practices which fail to meet compliance and result in poor member outcomes. NOABDs are reviewed to ensure they are not written using language that members may not understand. This in turn could dissuade them from exercising their right to appeal. The need for additional staffing was exacerbated by the COVID-19 emergency, as staff time was reprioritized to focus on addressing

needs arising from the emergency. As a result, OHA delayed or waived a substantial portion of deliverables in 2020. Collaborative work between CCOs and OHA in the development of the guidance and templates associated with deliverables were also put on hold.

Further challenging the efficiency of the Quality Assurance and Compliance team and staff across the Health Systems division, many of the divisions' processes are manual and paper-based. Internally, this contributes to having inaccurate data and data that is difficult to analyze and leads to an inefficient use of resources. Some of these issues are identified in repeat audit findings. Externally, members, providers and CCOs are often not able to access and submit forms online using available technology. It has been especially challenging to perform manual, paper-based processes during the COVID-19 emergency: it has been difficult to collect and review the required information and transition to a remote work environment.

2. What would this policy package buy and how and when would it be implemented?

This proposal would fund four permanent Operations & Policy Analyst 3 positions to support quality assurance and compliance efforts associated with CCO 2.0. The additional staff will enable OHA to fully implement CCO 2.0 requirements through the development of CCO deliverables, communication and guidance to CCOs in achieving the requirements and extensive evaluation of CCO deliverables.

Funding in this policy package would also purchase additional licenses and contractor time to design and build the online templates, interfaces, and supporting data infrastructure and include staff training. This would support HSD ability to begin migrating paper-based processes to paperless, online processes using tools already purchased by Shared Services.

3. How does this policy package further OHA's mission and align with its strategic plan?

CCO 2.0 was developed to operationalize all four of the governor's priority areas: improving the behavioral health system, increasing value and making use of pay for performance, focusing on social determinants of health and health equity, and maintaining sustainable growth. While the work of the compliance team supports all four of these priorities, it is critical to successfully addressing improvements to the behavioral health system and focusing on social determinants of health. This team has been and will continue to work with CCOs and OHA subject matter experts in turning contractual requirements into tangible deliverables. Whether it is the development of a template, report, plan or guidance document, the compliance team is responsible for creating the quantitative and qualitative basis for assessing CCO progress toward their contractual requirements.

The online tools for data collection support the Governor's policy priorities and OHA strategic plan by ensuring efficient data collection, improving access to forms and information, assisting with system integration, and improving data reporting for Oregonians. It also supports the Governor's goals to be user-friendly, reliable, and secure as OHA modernizes its IT systems. Online tools will also allow OHA to more quickly implement data collection and reporting for social determinants of health and other areas that impact health equity.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

The federal Office of the Inspector General (OIG) conducted an audit in 2018-2019 of select OHA-contracted CCOs for 2016 and 2017. The OIG conducted the review because (a) Oregon was one of the first states to establish CCOs, (b) access to care had consistently been the highest reported grievance category, and (c) most CCOs had difficulty meeting their access to care performance measures. The preliminary findings from the audit were (1) OHA provided insufficient oversight and guidance to the CCOs and (2) CCOs provided insufficient oversight and guidance to their subcontractors. Many of the requirements included in CCO 2.0

were intended to address this issue. In order to fully implement these new requirements, more quality assurance and compliance staff are required. Additionally, manual data processing errors has been identified as an issue in past HSD audit findings.

Quantifying results

5. How will OHA measure the success of this policy package?

OHA would have an auditable process for submission and review of CCO reporting deliverables. Success would be measured in completeness of deliverables, timeliness of responses back to CCOs after initial deliverable submissions, and quality of service delivery. Another measure of success would be percentage of deliverables being submitted electronically that are able to feed data structures for analysis.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

This policy package indirectly ties to many of the legislative Key Performance Measures for OHA. It directly ties to a number of OHA performance measures:

- Increase Partner Satisfaction
- Document Processes
- Measure Improvement
- Reduce Health Disparity
- Improve Population Health
- Improve Quality of Care
- Improve Care Experience
- Lower Health Care Cost

7. What are the long-term desired outcomes?

- Improved compliance
- More timely evaluations
- Reduced errors
- Improved data accuracy
- Improved usefulness of data
- Better data analysis and integration
- Improved partner satisfaction

8. What would be the adverse effects of not funding this policy package?

Collection of data and CCO deliverables will continue in the existing manner resulting in the same issues with data errors and limited usability of data. Without additional staffing, the processing times for the expanded CCO reporting deliverables will extend beyond what the agency has identified as a timely manner.

If OHA is unable to evaluate and deliver meaningful evaluation of contractually mandated deliverables it runs the risk of failing to comply with federal (CMS requirements and 1115 waiver) and state provisions (OAR and CCO contractual requirements). For a number of requirements, OHA must complete the evaluation process within a specified period of time. This would also be at risk without adequate staffing.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

The division had planned to use costs savings to fund four limited duration positions to try to address the expanded CCO reporting deliverables. These positions were intended to support compliance work through June

30, 2021. However, due to current budgetary concerns, these positions have not been filled and likely will not be filled.

Regarding data collection and process improvement, work is being done to map and streamline manual, paper-based processes. This effort has also been supplemented with a pilot implementation of data collection technology. However, without technology to enable online data submission the front-end of the processes will remain manual and paper-based.

Limited progress has been made with existing tools to support data collection and remote work during the COVID emergency, but the available software tools do not allow for easily collecting data in a usable electronic manner.

10. What alternatives were considered and what were the reasons for rejecting them?

1. Do nothing. HSD rejected this option as the staffing level, with the loss of the limited duration positions, would not allow for reasonable response times for CCO deliverables. This alternative would leave HSD with its existing issues of manual and paper-based processes that will continue to result in data errors and inefficient use of time.
2. Delay, Alter or Waive CCO Requirements. Although this would temporarily address the staff shortage, this would compromise the agency's ability to implement CCO 2.0 requirements.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

None.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

CCOs are collaborating on this policy package to help improve and streamline reporting processes for deliverables.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

There are a number of new CCO requirements in CCO 2.0 specifically intended to address health inequities, including the requirement that each CCO develop a Health Equity Plan. This data would also help inform Oregon policies and other responses to help achieve health equity.

Staffing and fiscal impact

Implementation date(s): July 1, 2021

End date (if applicable): Not applicable

15. What assumptions affect the pricing of this policy package?

The federal match rate for software licenses and contracting assumes CMS will approve an Advance Planning Document that will be prepared by OHA.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

No. This will enable the Quality Assurance and Compliance Unit to perform existing responsibilities that were recently expanded as part of CCO 2.0.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

Currently there are four program staff available to conduct deliverable acceptance, review, evaluation and reporting on a total of 885 total deliverables. Adding the four requested positions would ensure CCO contractual requirements are thoroughly evaluated and meaningful responses to CCO deliverables are provided in a timely manner.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

Four permanent, full-time Operations and Policy Analyst 3 positions.

20. What are the start-up and one-time costs?

None.

21. What are the ongoing costs?

- Personnel costs including employee services, supplies, shared services and State Assessments & Enterprise-wide Costs.
- Annual software licensing fees.

22. What are the potential savings?

OHA may realize long-term savings in OHP expenditures due to comprehensive evaluations of CCO requirements resulting in more cost-effective, high-quality care being delivered to OHP members. To the extent savings occur, they will be reflected in subsequent years' CCO rates, which are based on past expenditures, and incorporated into OHA's budget as part of the capitation rates for CCO-enrolled OHP members.

OHA also anticipates that improved data collection would allow some staff to transition to higher level work, potentially avoiding the need to hire additional staff in the future.

23. What are the sources of funding and the funding split for each one?

For the software and contract costs, HSD estimates one third would be 100 percent General Fund and two-thirds would be eligible for 90 percent Federal Funds Medicaid match. The actual split between General Fund and Federal Funds would depend on the percentage of the costs that are tied to addressing functions eligible for Medicaid match.

The four positions would be funded with 45 percent General Fund and 54 percent Federal Funds Medicaid/CHIP administrative match.

Oregon Health Authority: 2021-23 Policy Package

Oregon Health Authority
2021-23 Policy Package

Division:	Health Systems Division
Program:	Quality Incentive Program
Policy package title:	CCO Quality Pool Withhold
Policy package number:	420
Related legislation:	None

Summary statement:

To increase accountability, flexibility, alignment with CCO 2.0 policy aims, and to solidify longer term financial stability and appropriately reflect the Quality Pool in the Minimum Medical Loss Ratio, this POP alters the CCO Quality Pool from an incentive to a withhold arrangement.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$34,044,088**	**$0**	**$87,109,154**	**$121,153,242**	**0**	**0.00**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

From 2013 to 2020, Coordinated Care Organizations (CCO) received Quality Pool payouts after year end for achieving incentive measures as defined by the Metrics and Scoring Committee. Starting in 2020, Quality Pool payouts were to be paid to CCOs through a withhold rather than an incentive. A withhold is preferable to an incentive arrangement in that it:

- Increases CCO accountability
- Increases flexibility
- Is aligned with CCO 2.0 policy aims
- Results in longer-term financial stability for the Quality Pool
- Ensures the Quality Pool is appropriately reflected in the Minimum Medical Loss Ratio (MMLR).

Operationalizing this structure requires General Fund appropriation to ensure suitable cash flow due to the timing inherent in a withhold arrangement (see below for detail on timing). The withhold process differs from an incentive arrangement, which is funded in a lump sum in June following the calendar year, as opposed to funding the withhold portion of CCO capitation payments on a concurrent monthly basis. Though budgeted and accounted for differently, operationalizing a withhold structure would not change the long-term cost of the Quality Pool program.

The withhold structure will be paused in 2021 because the funding required for this transition was not included in OHA's 2019-21 Legislatively Adopted Budget and was not appropriated during the 2020 legislative session. This POP allows the withhold to restart in 2022 and continue into future years by accelerating the cash flow needed to fund the withhold as capitation rates are paid throughout the calendar year. If this POP is not enacted, OHA will not be able to implement a withhold in 2022 or 2023.

Detail on timing issue:

- Under the prior CCO quality pool structure, the OHA budget is built to support two quality pool payouts each biennium. For example, in the 2017-19 biennium, OHA paid out the 2017 quality pool in June 2018 and the 2018 quality pool in June 2019.
- According to accounting principles and Centers for Medicare & Medicaid Services (CMS) claiming rules, a withhold is a component of each capitation rate paid for each member each month and must be recorded as an expenditure each month.
- For the 2021-2023 biennium, OHA will pay out the 2021 quality pool in June 2022. In moving to a withhold structure, OHA will pay 2022 and 2023 withheld amounts into dedicated reserve accounts on a monthly basis. The result is that 30 months of quality pool payments will be budgeted for the 2021-2023 biennium.
- This POP requests the budget to allow for the accelerated cash flow timing required by this change.
- The long-term cost to the state of the Quality Pool program does not change.

2. What would this policy package buy and how and when would it be implemented?

A withhold arrangement is preferable to an incentive arrangement in that it:

- **Increases CCO accountability and incentivizes expenditure of Quality Pool funds in alignment with OHA priorities.** With an incentive arrangement, CCOs are not required to report how they spend their Quality Pool funds. However, a shift to a withhold means that CCOs must report how those funds are passed to providers and other organizations involved in improving care related to the metrics included in the Quality Pool, as well as account for any funds that the CCO does not distribute. In addition, as part of the withhold arrangement, CCOs are required to report how they make decisions regarding Quality Pool dollars. Furthermore, under a withhold arrangement, CCO expenditures on rewarding quality become part of the pool that informs future years' capitation rates; if CCOs spend less of the Quality Pool on providers, that will tend to reduce funding for future years' capitation rates. In short, a withhold arrangement

incentivizes CCOs to push Quality Pool dollars to providers and community-based organizations working to improve care and health.

- **Increases flexibility – nimbly responding to needs in system.** A withhold arrangement provides OHA greater flexibility in terms of reacting to needs as they arise in the system. For example, the withhold arrangement in place for 2020 allowed OHA to react nimbly to a need in the system resulting from the COVID-19 pandemic by suspending the withhold.
- **Increases flexibility – options for other incentive programs outside capitation rates in support of CCO 2.0 goals.** Funding the Quality Pool through a withhold allows OHA to increase the share of CCO global budgets tied to performance. This in turn could increase the percentage of payments to CCOs that reward quality, value, or efficiency, as well as fund investments in social determinants of health and health equity. Specifically, CMS restricts incentive programs to no more than 5% of capitation rates. With the Quality Pool funded as a withhold, that entire 5% is open for other incentive programs, such as the COVID Targeted Response Fund (CTR Fund) currently under consideration by OHA leadership.[1]
- **Ensures the Quality Pool is appropriately reflected in the Medical Loss Ratio (MLR).** If the quality pool is paid as an incentive, the MLR calculation is skewed. CCOs get credit for Quality Pool spending in the MLR numerator, but Quality Pool revenue is not considered in calculating CCO income in the denominator. An artificially inflated MLR allows CCOs to have significantly higher profit margins without refunding money to the state.
- **Financial stability of Quality Pool program**. A withhold arrangement increases the long-term financial stability of the Quality Pool in relation to fluctuations in the state budget. Independent evaluation of 2012-17 Medicaid Demonstration found a strong association between the incentive program and improvements

[1] The COVID Targeted Response Fund (CTR Fund), if implemented, would incentivize CCOs to target critical gaps and areas of community need caused by the COVID-19 pandemic, including social supports. This fund is subject to legislative approval and general/state fund contribution and would be intended to fill gaps in funding from other federal, state, and local emergency funds.

in CCO metric performance[2]. Improvement was significantly greater on measures included in the incentive program, versus those tracked by OHA, but not incentivized. Recommendations from the evaluation included increasing the proportion of total CCO payment awarded for quality, access, and raising the bar for awards. The financial stability of the program is therefore very important in ensuring it can continue during times of budgetary constraints.

3. How does this policy package further OHA's mission and align with its strategic plan?

In alignment with CCO 2.0 goals, a withhold arrangement:

- Will result in greater transparency and accountability in that CCOs must report on how they distribute (or do not distribute) the Quality Pool dollars they earn to providers and partners in their communities, and capitation rate funding is informed by actual spending on rewarding quality.
- Will allow OHA substantial room to create other incentive arrangement-based programs to address the social determinants of health and increase health equity.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

In a withhold arrangement CCOs must report on how they distribute Quality Pool funds to providers and other community partners.

[2] https://www.oregon.gov/oha/HPA/ANALYTICS/Evaluation%20docs/Summative%20Medicaid%20Waiver%20Evaluation%20-%20Final%20Report.pdf

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

Yes. Two OHA performance measures are directly tied to this policy package:

- **Purchasing for Health Care Value** which includes the process measure "Payments to CCOs tied to quality."
- **Improving Clinical and Population Health** that includes the process measure "Language access, ADA and other civil rights complaints," which is related to an incentive measure being developed to address health equity that is focused on access to qualified and certified health care interpreters.

7. What are the long-term desired outcomes?

Long term, OHA expects to see:

- Improved transparency in how CCOs distribute their Quality Pool earnings.
- Increases in the proportion of Quality Pool funds CCOs share with providers and community partners, which in turn contributes to stabilization of the health care delivery system in the long term. Moving the Quality Pool inside the capitation rates helps incentivize CCOs to invest their Quality Pool earnings on programs and provider incentives in their community. Specifically, Quality Pool expenditures are reflected in future years' rates development, whereas Quality Pool funds retained in profits do not feed into future years' rates development.
- A more accurate reflection of the Quality Pool in the medical loss ratio (MLR). CMS requires that CCOs calculate and report a MLR each year, which shows the proportion of revenue spent on delivering services, improving health care quality, or investing in health care information technology. If the quality pool is paid as an incentive, the MLR calculation is skewed. Under CMS regulations, CCOs get credit for Quality Pool spending in the MLR numerator, but Quality Pool revenue is not considered in calculating

CCO income in the denominator. An artificially inflated MLR allows CCOs to have significantly higher profit margins without refunding money to the state.

8. What would be the adverse effects of not funding this policy package?

If this package is not approved, the Quality Pool will move back to an incentive arrangement and CCOs will not be required to report how and if they distribute their Quality Pool funds. This will reduce program transparency as those distributions are to be publicly reported. There will also be less motivation for CCOs to invest their earnings on programs and provider incentives in their community because under an incentive arrangement Quality Pool funds retained as profits do not feed into rate development (versus a withhold, where there *is* an impact). In addition, while a withhold arrangement remains budget neutral for CCOs, there may be more of a psychological "push" with a withhold versus an incentive arrangement.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

During the last legislative session there was an effort to receive General Fund appropriation for the cash flow timing issue resulting from a change to a withhold (which *does not* increase long-term cost to the state). However, the legislative session ended without approval of the adjustment.

10. What alternatives were considered and what were the reasons for rejecting them?

The Quality Pool can either be funded as a withhold or as an incentive. Returning to the incentive funding structure was rejected in favor of a withhold for the reasons stated above.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

None.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

None currently. CCOs and other community partners were extensively engaged as part of the formal stakeholder engagement process for CCO 2.0 policy development, which included moving the Quality Pool to a withhold.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[3] or equitable health outcomes?

This policy could significantly address inequities insofar as it results in pressure on CCOs to invest their Quality Pool earnings in community-based organizations led by and/or supporting historically underserved communities. For example, Health Share is funding the Oregon Community Health Workers Association (ORCHWA) to create a sustainable infrastructure that supports Community Health Workers (CHWs) in connecting underserved populations to health care and other services. The goal of this investment is to improve health and reduce health disparities among communities of color in the Portland metro region.

[3] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

Staffing and fiscal impact

Implementation date(s): January 1, 2022

End date (if applicable): Not applicable at this time.

15. What assumptions affect the pricing of this policy package?

The assumptions that affect the pricing are:

- The withhold requiring additional funding through this policy package is for the period of January 1, 2023 to June 30, 2023.
- The average caseload forecasted for January 1, 2022 through June 30, 2023 is from the Spring 2020 Caseload Forecast.
- Eighty-four percent of the forecasted caseload will be enrolled in CCOs.
- Statewide average 2020 capitation rates and inflation of 3.4 percent per year until 2023.
- The quality pool payments remain at 4.25 percent and the Managed Care Organization (MCO) Tax at 2.00 percent.
- Applies the Federal Medical Assistance Percentages (FMAPs) for January 1, 2022 through June 30, 2023 as published March 2020.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

Staff will need to review the additional reporting on CCO Quality Pool expenditures. Existing staff are prepared to do so for the 2020 Quality Pool reporting.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This work is already built into the workload of OHA's Fiscal and Operations Division and Health Policy and Analytics Division.

20. What are the start-up and one-time costs?

There are no start-up costs. The transition to a withhold would be a one-time cost of $121 million Total Funds, all of which would be for the accelerated cash flow timing required by this change. The long-term cost to the state of the Quality Pool program would not change.

21. What are the ongoing costs?

The long-term cost to the state of the Quality Pool Program would not change. Therefore, there would no ongoing costs in future biennia.

22. What are the potential savings?

While no direct savings are projected as part of this POP, CCO rebates due to low MLRs would be more likely apply under a withhold approach.

23. What are the sources of funding and the funding split for each one?

The sources of funding will be $34 million General Fund and $87 million federal Medicaid matching funds. The federal funding is based on the average split of eligibility types of CCO enrollees. The corresponding Federal Medical Assistance Percentage (FMAP) rates for January 1, 2022 to June 30, 2023 are applied and used to calculate the federal match of each type of enrollee. The calculations of General Fund and Federal Funds assumes the Quality Pool will remain 4.25 percent of CCO's capitation rates and the MCO tax will remain at 2.00 percent.

Oregon Health Authority
2021-23 Policy Package

Division:	Oregon State Hospital
Program:	Salem Campus and Pendleton Cottage (State Delivered SRTFs)
Policy package title:	Deferred Maintenance
Policy package number:	421
Related legislation:	None

Summary statement:

The Salem campus of the Oregon State Hospital consists of 1.2 million square feet of buildings and interior court yards and has a Current Replacement Value (CRV) as reported to the Capital Advisory Board (CPAB) of $363.3 million. This makes the Oregon State Hospital among the highest replacement value of any single facility owned by the state. The Pendleton cottage facility has a current replacement value of $2.8 million and is presenting considerable deferred maintenance due to the age of the campus. Funding the requested deferred maintenance requests would eliminate the current critical deferred maintenance needs for the Salem and Pendleton campuses and maximize the lifespan of the state's investment and public trust.

Policy package pricing:	**$1,907,943**	**$1,425,000**	**$0**	**$3,332,943**	**0**	**0.00**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

Oregon State Hospital (OSH) campuses in Salem and Pendleton have unfunded deferred maintenance that could result in health and safety issues for staff and patients if not resolved. Good stewardship of the state's resources is at the forefront of the building maintenance program at OSH to proactively maintain the state's assets and ensure compliance with Joint Commission and Centers for Medicare and Medicaid Services (CMS). We have seen the results of years of deferring maintenance resulting in loss of accreditation and deplorable conditions in the old hospital that was eventually demolished.

Maintaining critical operational continuity and providing 24-hour hospital level of care to patients needing intensive psychiatric treatment for severe and persistent mental illness is part of the mission of the Oregon Health Authority and Oregon State Hospital. Deferring critical maintenance is not an option in a hospital facility and can result in higher costs to replace or repair systems under emergency situations, health and safety issues for patients and staff, and loss of accreditation and CMS reimbursement.

2. What would this policy package buy and how and when would it be implemented?

This package would address current large expenditure deferred maintenance in advance of equipment and infrastructure failure. Funding for deferred maintenance would ensure maintenance of the facility to the highest standard and avoid more costly future maintenance, align with regulatory compliance and stewardship of the state's assets, and result in a safe and secure treatment and work environment.

Implementation would follow the normal state of Oregon procurement processes for deferred maintenance projects with the list of projects and components requested below in the "start-up and one-time costs" section.

3. How does this policy package further OHA's mission and align with its strategic plan?

OSH strives to achieve the highest standards and outcomes in all aspects of our work . Good stewardship of the public trust and the public dollar includes maintaining the facility to the highest standards and making regulatory and infrastructure improvements to meet the needs of patients and staff. OSH serves one of the most marginalized populations, the mentally ill. Maintaining well-kept and functioning treatment environments for these individuals contributes towards OHA's mission of ensuring all people and communities can achieve optimum physical, mental, and social well-being through partnerships, prevention, and access to quality, affordable health care; and aligns with the OHA strategic plan of eliminating health inequities.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No. Prior to this request, the OSH Salem and Junction City campuses are the only state-owned facilities that do not have any current substantial "Deferred Maintenance" as reported annually to the Capital Projects Advisory Board (CPAB) and cited in the March 2020 Secretary of State audit. Funding for this package would ensure maintenance of the facility and avoid more costly future maintenance, while maintaining regulatory compliance and excellence in stewardship of the State's assets.

Quantifying results

5. How will OHA measure the success of this policy package?

Measurements of success would include:

- Reporting to the Capital Projects Advisory Board
- Continued compliance with regulatory requirements as surveyed by the Joint Commission.
- Continued compliance with Fire/Life safety and building codes.
- Lower security risks to patients and staff

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

No.

7. What are the long-term desired outcomes?

Lower future maintenance costs, operational sustainability and continued compliance with regulatory requirements, and good stewardship of state assets to provide a safe and therapeutic environment of care to some of Oregon's most vulnerable populations, as well as a safe work environment for staff.

8. What would be the adverse effects of not funding this policy package?

- Possible loss of accreditation from the Joint Commission and loss of CMS reimbursement.
- Noncompliance with state regulatory requirements.
- Inability to provide adequate treatment support infrastructure.
- Higher future maintenance costs.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

OSH uses a computerized maintenance management software system that lists every piece of equipment and assigns manufacture recommended preventative maintenance schedules. OSH is actively monitoring and performing preventative and predictive maintenance according to manufacturer's recommendations on all assets and equipment. This request would fund large expenditure projects not in the normal operating budget.

10. What alternatives were considered and what were the reasons for rejecting them?

Where available, operations have treated scenarios as break/fix to restore to usable state. However, this continued deferral can no longer restore some infrastructure to operationality without greater attention. A specific example being the sidewalks on the Pendleton campus.

Deferring critical maintenance is not a truly viable option in a hospital facility and results in higher costs to replace or repair systems under emergency situations and could result in health and safety issues for patients and staff. Loss of accreditation and CMS funding is also a risk.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

None.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

None.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

The investment in critical maintenance helps ensure a safe, secure and therapeutic environment for treating some of Oregon's most vulnerable populations.

Staffing and fiscal impact

Implementation date(s): January 2022

End date (if applicable): June 2025

15. What assumptions affect the pricing of this policy package?

Estimates are rough order of magnitude (ROM) and may vary slightly from actual expenses as the standard procurement processes are followed.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

No.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No. Although infrastructure for services provided would be improved.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This package would utilize the Limited Duration Construction Project Manager 2 position requested within policy package #423, if that package is also approved. Current OSH staff associated with specific trade skills would be utilized where possible.

20. What are the start-up and one-time costs?

Requests in this package total $3.1 million and are broken down into construction/renovation of infrastructure to restore or modify the functionality, and components of systems that are "mostly" operational, but in need of maintenance to restore functionality and prevent complete replacement.

Construction or renovation project components and approximate costs:

1. Salem backflow preventer system, $250,000
2. Pendleton asphalt replacement, $400,000
3. Pendleton concrete sidewalk replacement, $100,000
4. Pendleton building demolish, $100,000
5. Pendleton parking lot construction, $200,000
6. Pendleton water damage repair, $350,000

Total deferred maintenance construction projects: $1.4 million

Components of systems needing replaced and their approximate costs:

1. Salem patient room floor covering, $150,000
2. Salem patient room cabinetry, $400,000
3. Salem generator controls, $46,000
4. Salem security cameras and switches, $600,000
5. Salem asphalt sealing, $150,000
6. Salem electrical system components, $120,000
7. Salem Kirkbride building carpeting, $100,000

Total deferred maintenance component replacement: $1.6 million

21. What are the ongoing costs?

Projects within this package are self-contained. When completed, minor upkeep and maintenance may be necessary, but is not deemed significant.

22. What are the potential savings?

No budgetary savings are expected as a result of this package. However, efficiency would be gained in the overall environment of care being improved by the projects requested.

23. What are the sources of funding and the funding split for each one?

The portions of deferred maintenance that are capitalizable are also being requested for XI-Q Bond financing, along with a portion of the limited duration Project Manager position, representing the amount of time that position would spend on the projects related to this package. The portion of this package requested for bond financing at the par amount (cost of bond plus bond issuance) is $1.43 million, with an additional $62,000 in interest for the 2021-23 biennium.

Oregon Health Authority
2021-23 Policy Package

Division: Oregon State Hospital
Program: Oregon State Hospital Operations
Policy package title: Asset Replacement
Policy package number: 422
Related legislation: None

Summary statement:

The Oregon State Hospital (OSH) Salem facility began construction in 2009, was completed in 2011 and is now over 10 years old. The Junction City facility is now over 5 years old. As aging occurs, much of the expendable property and capital assets in operation have outlived or have soon expiring useful lives. Replacement of these items is necessary to provide a safe and secure environment for patients and staff, as well as maintain critical continuity of hospital operations.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$1,774,192**	**$4,429,599**	**$0**	**$6,203,791**	**0**	**0.00**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

OSH campuses in Salem and Junction City have a considerable volume of depreciable assets at or near the end of their useful lifecycle that must be replaced to maintain critical operational continuity and provide 24-hour hospital level of care to patients needing intensive psychiatric treatment for severe and persistent mental illness.

Lifecycle replacement of equipment is part of the requirement for accreditation by the Joint Commission and for Medicare reimbursement through the Centers for Medicare and Medicaid Services. Much of the existing equipment was purchased at the time of hospital opening, while other pieces were transferred from the old facility. This equipment has experienced the wear and tear of a production environment and is requiring upkeep or replacement beyond existing budget resources.

OSH completed a very successful survey of the facility from the Joint Commission in 2017 in which OSH was recognized as one of the leading psychiatric hospitals in the nation and was encouraged to seek national recognition through the Malcolm Baldrige National Quality Award. Having gained the recognition and achieved the standard of service for that recognition, this package would help to ensure that OSH does not take a "step back" in patient care and condition of the facility.

2. What would this policy package buy and how and when would it be implemented?

This package would address immediate large expenditure equipment lifecycle replacement in advance of equipment breakdown. As a one-time package, it would essentially re-start the lifespan cycle for the needed equipment. Funding for asset lifecycle replacement would ensure maintenance of the facility to the highest

standard and avoid more costly future maintenance, comply with regulatory requirements and stewardship of the state's assets, and a safe and secure environment and optimal treatment services.

Implementation would follow the normal state of Oregon procurement processes for depreciable asset replacement and use in-house trades staff to install most equipment.

Specific equipment requests are listed in the "one-time or start-up costs" below.

3. How does this policy package further OHA's mission and align with its strategic plan?

OSH strives to achieve the highest standards and outcomes in all aspects of our work. Good stewardship of the public trust and the public dollar includes maintaining the facility to the highest standards and making regulatory and infrastructure improvements to meet the needs of patients and staff contributing towards OHA's mission of ensuring all people and communities can achieve optimum physical, mental, and social well-being through partnerships, prevention, and access to quality, affordable health care.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

The expected lifecycle for hospital assets has been determined by the consensus of experienced representatives from the leading appraisal companies and respected hospitals and health care systems as published in the 2018 edition of *Estimated Useful Lives of Depreciable Hospital Assets* by the American Hospital Association.

Replacement of equipment is part of the expectation of accreditation by the Joint Commission and for the Centers for Medicare and Medicaid Services reimbursement.

Measurements of success would include:

- Continued compliance with regulatory requirements as surveyed by the Joint Commission.
- Continued compliance with food safety standards.
- Continued compliance with OSHA regulations.
- Continued compliance with Fire/Life safety codes.
- Lower security risks to patients and staff.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

This package is indirectly related to treatment outcomes and, in many cases, directly related to environment of care. It is not directly related to KPMs.

7. What are the long-term desired outcomes?

Continued compliance with regulatory requirements and good stewardship of state assets to provide a safe and therapeutic environment of care to some of Oregon's most vulnerable populations.

8. What would be the adverse effects of not funding this policy package?

- Possible loss of accreditation from the Joint Commission and loss of CMS reimbursement.
- Noncompliance with state regulatory requirements.
- Inability to provide adequate infrastructure to support treatment.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

OSH has attempted to use budgetary resources to resolve lifecycle issues in a break/fix capacity, as budget constraints did not allow a resolution for the quantity of items in need of replacement. A preventative maintenance plan has been established to include lifecycle equipment replacement schedules projected out 25 years to predict future lifecycle funding needs.

10. What alternatives were considered and what were the reasons for rejecting them?

There are no viable alternatives to lifecycle asset replacement and preventative maintenance replacement.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

None.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

None.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

The replacement of critical depreciable assets helps ensure a safe, secure and therapeutic environment for treating some of Oregon's most vulnerable populations.

Staffing and fiscal impact

Implementation date(s): September 2021

End date (if applicable): June 2023

15. What assumptions affect the pricing of this policy package?

Standard procurement practices may impact purchasing and some implementation dates. Assets that are eligible for Bond financing are priced at par amounts (the cost of the bond with issuance).

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

No new responsibilities.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

No staff positions are needed for this package. If policy package 501 for Capital Improvements is accepted, the limited duration Project Manager within that package may be utilized to assist in equipment planning and deployment within this package.

20. What are the start-up and one-time costs?

One-time costs total $5.5 million, as specified in the below list:

Salem Campus			
Asset	**Qty**	**Est. Cost**	**Total**
Boiler (Water heater)	2	$32,000	**$64,000**
Patient exercise equipment lifecycle replacement		$134,000	**$134,000**
Musical equipment lifespan replacement		$10,000	**$10,000**
Televisions	50	$600	**$30,000**

2 door freezers	2	$3,800	**$7,600**

2 Door refrigerators	2	$3,600	**$7,200**
PT/OT Clinic exercise equipment		$21,187	**$21,187**
Court room mics and recording system		$15,000	**$15,000**
Sensory room music sound system replacement		$20,000	**$20,000**
EKG Machine		$2,000	**$2,000**
Dental - Cavitron ultrasonic		$6,170	**$6,170**
Dental - X-Ray prosensor intra-oral, large		$5,999	**$5,999**
Dental - Autoclave (sterilizers) (2 @ $6K each)		$12,000	**$12,000**
Dental - Dental chairs	4	$18,000	**$72,000**
Dental - hand pieces, electric motors	4	$1,400	**$5,600**
Worker's Comp information system replacement	1	$26,500	**$26,500**
Commercial Mower/Grounds equipment		$75,000	**$75,000**
Warehouse forklift	1	$20,000	**$20,000**
Rationale Oven Small- for satellite kitchens	2	$13,200	**$26,400**
Kitchen Grills	2	$6,500	**$13,000**
Salem Automated Dispensing Cabinets	34	$83,333	**$2,833,333**
Total Salem Campus:			**$4,129,589**
Junction City Campus			
Asset	**Qty**	**Est. Cost**	**Total**
Unit ice makers	5	$3,500	**$17,500**
Washers	26	$1,200	**$31,200**
Dryers	26	$1,200	**$31,200**
Flat Top (Café 48")	1	$5,300	**$5,300**
Sandwich coolers	3	$4,200	**$12,600**
Ice machines	2	$3,800	**$7,600**

Servers for Lenel access control, ONSSi camera system and PLS touch screens	1	$195,000	**$195,000**
Security Cameras-PZT	20	$2,400	**$48,000**
Rational Oven	2	$45,000	**$90,000**
Steam Kettle	2	$22,000	**$44,000**
Blodget 40G Tilt Skillet	1	$24,000	**$24,000**
Turbo Chef	1	$14,000	**$14,000**
Air Curtain Merchandiser Grab N Go cooler	1	$6,100	**$6,100**
Blast Chiller	1	$40,000	**$40,000**
Deep Fryer	1	$23,000	**$23,000**
Hobart Dishwasher	1	$43,000	**$43,000**
Hustler Mower	1	$13,000	**$13,000**
Blodget Gas Oven Stack Unit (Elite)	1	$21,000	**$21,000**
DDC server & software	1	$33,000	**$33,000**
JC Automated Dispensing Cabinets	8	$83,333	**$666,667**
Total Junction City Campus:			**$1,366,167**

21. What are the ongoing costs?

Equipment replacement is a one-time expense.

22. What are the potential savings?

This package would not result in any direct savings but would prevent over-spending on emergency repairs.

23. What are the sources of funding and the funding split for each one?

OSH is seeking XI-Q Bond Financing for the capital assets present in this request, the par amount (cost of the bond with the cost of the bond issuance) for the eligible assets is $4.4 million, with associated interest in 2021-23 of $186,000. The bond funding and the remaining expendable property would be General Fund.

Oregon Health Authority
2021-23 Policy Package

Division:	Oregon State Hospital
Program:	Salem Campus
Policy package title:	Oregon State Hospital Capital Improvement
Policy package number:	423
Related legislation:	None

Summary statement:

The Oregon State Hospital (OSH) Salem Campus is the primary state psychiatric facility serving some of Oregon's most vulnerable populations. OSH has identified three critical capital improvement projects that would provide:

- A self-sustainable facility that could maintain a safe and secure environment of care throughout loss of city water and or contamination of city water such as the 2018 cyanotoxin event.
- Expanded staff space by building a second floor within an existing area.
- Enhanced treatment capability by repurposing existing space.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$719,933**	**$6,980,000**	**$0.0**	**$7,699,933**	**1**	**0.88**

Oregon Health Authority: 2021-23 Policy Package

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

This policy package would provide capital improvement investment to the Oregon State Hospital (OSH) to fund high priority infrastructure projects determined critical to hospital operations. The primary issues addressed within this package are:

1. **The ability for the hospital to sustain itself in the event of a catastrophe or other emergent situation**. OSH currently has emergency generators capable of supplying power to the entire facility indefinitely and a propane backup system to provide heating and cooking fuel in the event of curtailment of natural gas. This package would include a backup water supply to provide drinking water or water for sanitation in the event of supply contamination such as the recent Cyanotoxin contamination in 2018 or disruption in the city water supply. As evidenced by the COVID-19 pandemic, we must be prepared to adapt to emergency situations that impact the health and safety of a population essentially restricted to a single confined area. The Oregon State Hospital Salem campus has the capacity for 592 patients, resulting in a minimum of 725 people on the campus during any one shift, with a maximum of over 1,600 staff, visitors, and/or vendors. Loss of water for an extended time at the Oregon State Hospital could result in significant medical and sanitary issues and, if sustained, could eventually result in equipment and critical technology failure.

2. **Providing additional program space within the secure perimeter of the hospital** in order to both move staff out of the non-ADA compliant residential cottages on campus into the hospital as well as providing additional treatment space for staff to interact with patients directly on the units.

2. What would this policy package buy and how and when would it be implemented?

This package requests funding and approval for three distinct projects, all located on the Salem campus. These projects include the following, in order of priority:

1. Construction of a well water treatment facility and potable water storage tanks would provide a backup water supply to the hospital in the event of disruption or contamination of the city water supply. OSH is an entirely self-contained facility except for backup water. OSH has backup generators that provide electricity for the entire facility during a power outage event and has a backup propane system for heating and cooking during the event of a loss of natural gas. OSH has one single point of connection to city water that is fed through a 1950's era 10" steel underground pipe. This leaves the hospital vulnerable to a complete loss of domestic water and water for sanitation including flushing toilets.

   Loss of water could also shut down critical systems such as cooling which would then lead to overheating server rooms that could damage or require shutting down essential technology systems and access control. OSH is requesting funding for a potable water treatment and storage facility on the Salem campus to remove these concerns.

   Estimated cost: $4,380,000

2. The hospital has an identified administrative and program staff space shortage in the secure perimeter where treatment staff can be close to the patients and the milieu allowing them to build greater professional understanding and collaboration with other treatment team members. Current conditions require the placement of staff and programs in non-ADA compliant cottages located on the campus. To address this space need, OSH commissioned SRG architects to perform a feasibility study and budget proposal to infill an existing space within the secure perimeter that would add 2,700 square feet of office space. This package would accommodate 32 staff and include a conference room, copy room, and unisex toilet room by constructing a second floor into an area that currently has existing "ceiling" space.

   Estimated cost: $1,643,386

3. The hospital has identified a need to repurpose the existing therapy tub rooms on the units that are no longer used for patients due to ligature risks. The hospital proposes to remodel the existing 24 tub rooms to create additional treatment space for staff to interact with patients. This space is currently planned to be used for Interdisciplinary Teams (IDTs) to be able to meet with and treat patients.

   Estimated cost: $500,000

   To support the success of these projects, a limited duration (LD) Construction Project Manager 2 is requested to assist in the oversight and management of the projects above. OSH is also proposing Deferred Maintenance projects, as presented in the associated Oregon Health Authority policy package #421. This additional support is needed to ensure project management capacity is resourced at the right level for the projects in both packages. The current OSH Operations Director has over 25 years of experience in construction, construction management and state government construction contracting and will be providing direct oversight of the projects and of this position.

Implementation timelines of the items in this package would vary from project to project. Generally, the procurement process and the initiation of hiring for the LD position would determine the respective start dates.

3. How does this policy package further OHA's mission and align with its strategic plan?

OHA's mission of achieving optimum physical, mental and social well-being is at the forefront of all that OSH does. Implementation of this policy package ensures the steadiness of that mission and increased sustainability and flexibility through:

- Self-sufficiency and a safe water supply in the event of a disruption in city water for any reason.
- Safe and ADA compliant environment for patients and staff.

- Additional space providing for both current and future needs of staff and clinical treatment programs that directly and indirectly support Hope, Safety and Recovery for patients at the Oregon State Hospital.
- Continuity of operations and resource efficiency leading to improved business rigor.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

- Success of the installation of a backup water supply to the hospital would be measured by the safety and reliability of our water supply.
- Success of the additional space would be measured by workspace utilization. Currently, some workspaces are over-crowded or non-ADA compliant.
- Success of the repurposing of existing space would be measured by standard treatment protocols and the potential for enhanced treatment.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

This package supports the OHA performance measures related to continuity of operations (1ASP2.7) and managing OHA workforce safety and security (1ASP3.9).

7. What are the long-term desired outcomes?

The primary long-term desired outcomes are that OSH has the capability to provide care during and through the course of an external emergent situation, and that the hospital has appropriate space to provide treatment to patients and conduct business.

8. What would be the adverse effects of not funding this policy package?

Critical system shut down: OSH has one source for domestic water supplied by the City of Salem. In the event of a complete loss of city water supply, OSH would lose all ability to provide critical sanitation including flushing toilets. Loss of sanitation for any amount of time could prove to be catastrophic in a psychiatric hospital setting. Additionally, OSH provides over 2,500 meals a day to patients and loss of domestic water will have a severe impact on the ability to provide for nutritional needs of patients.

Staff have been moved to the residential cottages on the hospital grounds due to lack of administrative and program space within the secure perimeter of the hospital. Adequate ADA compliance is not feasible in the residential cottages and having staff working outside the secure perimeter of the hospital creates issues with access to hospital infrastructure and programming. Given the circumstances of the COVID-19 pandemic, possible OSHA complaints due to inadequate social distancing in some workspaces may result.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

Discussion with the city has occurred to supply options for the water situation. Currently, the only existing option is one of self-sustainability. OSH has completed a preliminary engineering study, design and engineer's cost estimate to verify feasibility of using the existing well to support backup water needs for the hospital.

OSH has attempted to redeploy staff and reimagine available working space as needs have emerged. In some cases, this has led to non-ideal usage of space that fills a need but does so in a less efficient capacity, or without options for social distancing, now a critical element in our environment. Preliminary design and engineer's cost estimates were completed for the additional office space project to help OSH acquire the central office space it needs.

10. What alternatives were considered and what were the reasons for rejecting them?

OSH considered adding an additional point of connection to city water from Center Street. The City of Salem system development charges (SDCs) exceed $750,000 to connect to Center Street, OSH determined that although this option would provide some insurance for loss of water due to line breakage on 24th Street, it would not provide self-sustainability and do nothing to protect from contamination of the city water supply.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

None.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

None.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

The investment in capital improvement helps ensure a safe, secure and therapeutic environment for treating some of Oregon's most vulnerable populations and provide infrastructure improvements to ensure OSH is a self-sustaining facility that can provide necessary health and sanitation in the event of city water contamination or shutdowns due to system failures or catastrophic events such as earthquakes.

Staffing and fiscal impact

Implementation date(s): November 2021

End date (if applicable): Estimated November 2023

15. What assumptions affect the pricing of this policy package?

Estimates are rough order of magnitude (ROM) and may vary slightly from actual expenses as the standard procurement processes are followed. Pricing of the LD position is assumed to be a portion of both of the next two biennia. Bond financing par amounts (the project cost plus the cost of the bond issuance, or the cost of the bond at maturity) are used for package total.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

No.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No. Although infrastructure for services provided would be improved, which may improve the efficiency of those services.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

One full-time, limited duration Construction Project Manager 2 position (0.88 FTE for 2021-23). Current OSH staff associated with specific trades would be utilized where possible.

20. What are the start-up and one-time costs?

This package is entirely project related, one-time expense.

21. What are the ongoing costs?

The limited duration position is expected to extend into the 2023-25 biennium to encompass the scope of the projects being managed. The cost for the position is expected to total $201,675 for the 2021-23 biennium and $229,643 for the 2023-25 biennium.

Of recurring expenditures, the water storage project is expected to require $6K per biennium, or $250 per month, for monthly water quality testing and routine maintenance following the implementation of the project.

22. What are the potential savings?

No savings are anticipated.

23. What are the sources of funding and the funding split for each one?

XI-Q bond financing is being requested for the entirety of this package, including the position.
The water treatment project would have a par amount (cost of project plus bond issuance) of $4.55 million, with 2021-23 interest of $234,000.
The addition of second floor office space would have a par amount of $1.8 million, and interest of $58,000.
The remodel of therapy tub rooms would have a par amount of $650,000, and interest of $18,000.

Total for this policy package

Oregon Health Authority
2021-23 Policy Package

Division:	Health Policy & Analytics
Program:	Office of Health Information Technology
Policy package title:	Health IT Programs Support
Policy package number:	424
Related legislation:	None

Summary statement:

Health IT infrastructure is critical to support COVID response and recovery, including CCO and provider coordination and support for quarantined individuals. Because the 90 percent federal match rate sunsets in 2021, without additional General Fund, OHA will have to end existing work: the Oregon Provider Directory and the Clinical Quality Metrics Registry programs and reduce the HIT Commons and Medicaid PreManage programs. These programs support critical stakeholder participation in health system transformation, including care coordination, operational efficiencies, value-based payment, quality improvement, and addressing social determinants of health and health equity. Programs have strong support across providers, hospitals, health plans and CCOs, including OHLC, OAHHS, OMA. The requested General Fund would continue existing, established programs and retain current positions that will otherwise be eliminated. No new work is proposed in this policy package.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$3,483,633**	**$0**	**$12,105,133**	**$15,588,766**	**9**	**8.13**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

The COVID-19 crisis has highlighted the critical value of health IT infrastructure – to connect systems, increase efficiencies, fill gaps in the data and infrastructure needed to support coordination in real time across hospitals, providers, CCOs, and health plans. Health IT can also connect health care stakeholders to social service providers that can help vulnerable Oregonians when they need safety net programs and other supports to quarantine or self-isolate safely.

OHA's health IT programs, designed to support stakeholders' participation in health system transformation, are helping these same stakeholders coordinate efforts and share real-time data, including supporting stakeholders' access to patient and health system data needed to respond to the COVID pandemic. OHA's programs are rooted in stakeholder support and partnership, including with the Oregon Health Leadership Council (OHLC), Oregon Association of Hospitals and Health Systems (OAHHS), Oregon Medical Association (OMA), Oregon Primary Care Association (OPCA), Office of Rural Health, Association of Community Mental Health Programs (AOCMHP), and many others.

OHA's health IT efforts have been funded since 2009 by 90/10 federal Medicaid match, under the HITECH Act,[1] which is sunsetting for all states in 2021. OHA's work is poised to transition to ongoing 75/25 Medicaid match (with some staff transitioning to 50/50 or 39/61 match). Reducing the federal match rate requires additional state funding. Some of this transition cost can be accommodated by reducing scope and focusing on only the most essential work. However, critical health IT programs and staff will be eliminated without additional GF to sustain these existing programs and the significant time and resources invested in them.

[1] The Health Information Technology for Economic and Clinical Health (HITECH) Act, enacted as part of the American Recovery and Reinvestment Act of 2009, was signed into law on February 17, 2009, to promote the adoption and meaningful use of health information technology.

Prioritization for this policy package: Without additional funding in 2021-23, OHA has made difficult decisions about what work would remain with only base General Fund at lower rates of federal match. In making these decisions, OHA prioritized work required by federal, state or contract requirements, and prioritized the staff needed to support that work. Priorities include:

- Statutorily mandated work related to the Health IT Oversight Council (HITOC).
- Managing CCO 2.0 health IT contractual requirements.
- Completing and wrapping up the federal Medicaid Electronic Health Record Incentive Program.

OHA reviewed the remaining budget with the goal of retaining services under OHA's statutorily required Oregon Health IT Program. Oregon Health IT Program services each include significant contractor and vendor costs, which are eligible for 75/25 federal matching funds after 90/10 HITECH funding ends. Although all services within the Oregon HIT Program are operational, the remaining General Fund was insufficient to retain either the Oregon Provider Directory (OPD) or the Clinical Quality Metrics Registry (CQMR) programs due to the contractor costs. Only the HIT Commons and Medicaid PreManage programs could be retained under reduced funding.

Without additional funding in 2021-23, OHA will have to eliminate established, critical statewide health IT infrastructure: the OPD and CQMR programs and reduce the HIT Commons and Medicaid PreManage Programs. The consequences are far-reaching.

<u>Oregon's health system and providers would be negatively impacted in a time of acute need.</u>
Without these health IT programs, providers, including physical, behavioral and oral health providers, rural and safety net providers, hospitals and health systems – and CCOs and health plans would have disconnected systems with duplication, cost and administrative burden, and an inability to leverage statewide data and tools that support value-based payment and address health inequities, including social determinants of health. OHA and DHS programs would face burden and continued siloes, disconnected from health care providers and payers. Oregonians with chronic health issues, substance abuse and mental health issues, and those facing

inequities due to discrimination would lack informed, coordinated care supported by health information and effective analytics tools. As Oregon's health care system faces massive challenges in responding to COVID, including systemic shifts to telehealth, connecting data and systems to each other becomes more critical than ever.

Oregon would lose the benefit of six years' investment in health IT programs.
OHA has made significant investments in staff, contractors, and hundreds of health care stakeholders have been engaged in OPD, CQMR, HIT Commons, and Medicaid PreManage programs over the past 6 years and has benefitted from millions of dollars of federal matching funds. OPD and CQMR programs both launched in 2019, after OHA, DAS, and LFO invested several years implementing these programs with the oversight required for technology procurements and implementation projects. These investments would be wasted without continuation funding.

- These programs are foundational for health system transformation and Oregon's health IT strategic plan – both of which would be set back. These programs provide critical statewide health IT infrastructure needed to support connecting systems, quality improvement, administrative efficiencies, value-based payment, and support for addressing health inequities and social determinants of health.
- HIT Commons is Oregon's public-private partnership designed to accelerate and advance health IT adoption and use across the state. HIT Commons two main initiatives, Emergency Department Information Exchange (EDie) and Prescription Drug Monitoring Program (PDMP) Integration, are in use by thousands of health care providers and care coordinators across the state. HIT Commons work is jointly funded by CCOs, health plans, and hospitals – however OHA's state share has been a cornerstone and allowed for planning and development of work currently sustained through shared funding. The long-term sustainability of HIT Commons and its initiatives could be at risk without continued state contribution.
- OHA's Medicaid PreManage program would face substantial reductions for the CCO portion of the program, which would shift costs to CCOs. Given the economic environment it is likely that some CCOs

would be unable to cover unanticipated costs, setting back considerable gains related to statewide connectivity for CCOs, OHA and DHS and adding duplicative costs while leaving federal match on the table.

Stakeholder expectations for state support for health IT infrastructure would need to re-conceived.
CCOs have supported OHA's development of these programs, including through $3m Transformation Fund investment in 2013 that would otherwise have gone to CCOs. OHA leveraged this investment to draw down 90/10 federal match and implement the OPD, CQMR, HIT Commons, EDie and Medicaid PreManage programs, as part of an agreement with all CCOs. Without these programs or full funding, CCOs will need to take on costs and potentially duplicative technology investments.

Ending these programs would also cause significant concern from federal partners, including the Centers for Medicare & Medicaid Services and the Office of the National Coordinator for Health IT. CMS would be unlikely to support new funding requests for this same work in the future, and federal concern about wasted resources may impact support for future health IT work.

OHA's ability to achieve its goal of eliminating health inequities would be impaired.
HIT Commons and Medicaid PreManage programs support all CCOs, health plans and hospitals across Oregon, as well as patient-centered primary care homes, safety net clinics, tribal clinics, behavioral and oral health providers to ensure that individuals at risk of high-utilization of hospitals, including emergency departments, do not fall through the cracks of in a disconnected health care system. Providers and CCOs instead have the benefit of data and tools needed to manage and coordinate care for these high-risk populations, including many that typically face disparities due to racism and other social factors.

Oregon communities are leading the way to addressing social determinants of health through new Community Information Exchanges, which connect CCOs, health plans, hospitals and health care providers to social services. These technology platforms provide social service resource directories, closed loop referrals to social

services, and data and analytics capabilities that have unprecedented ability to support vulnerable populations and help target local and statewide investments. HIT Commons works to plan and coordinate statewide Community Information Exchanges and bring critical data and infrastructure to connect health care and culturally specific social service agencies across Oregon's communities. The OPD is poised to support a centralized, statewide resource directory of social services providers, programs, and agencies – removing the burden of constantly managing and updating individual directories and supporting statewide users like 211info.

Data on race, ethnicity, language and disability can be sourced and shared from health IT systems, including electronic health records and via health information exchange tools. The OPD indirectly supports sourcing these data by enabling health information exchange, population management and analytics.

The OPD can help identify culturally appropriate care by providing statewide data on providers' race/ethnicity/language characteristics, as well as information about specialty focus areas (like expertise working with specific populations) and information about facility accommodations for physical disabilities. It also contains location information that can identify where there may be gaps or capacity/access issues across the state to populations impacted by health inequities.

Population management tools supported by state health IT infrastructure allow CCOs, health plans, and providers to assess quality of care and target resources to individuals facing the greatest need and barriers and demonstrate the impact of programs on populations including those facing inequities. The CQMR enables efficient and sustainable collection of quality metrics data on clinical outcomes, including moving toward patient-level data that can provide insights into the health outcomes and quality of care received for populations facing inequities.

See Question 8 below for further detail on adverse consequences of not funding this policy package.

2. What would this policy package buy and how and when would it be implemented?

This policy package supports ongoing work that is at risk of ending when federal 90/10 HITECH funding ends. The policy package provides the additional General Fund needed for continuation of existing programs that transition to ongoing Medicaid funding at lower match rates and it reinstates current positions that would otherwise be eliminated. Continuation funding for existing staff and contractors would begin 10/1/2021, with the exception of 3 months limited duration position (7/1/2021 through 9/30/2021), funded with HITECH 90/10. Transitioning to ongoing Medicaid match will impact all OHIT staff and programs (see more detail in questions 19 and 21). However, without additional GF, critical programs will be eliminated or reduced, and 8 FTE will be eliminated. There is no new work proposed in this policy package.

Oregon Provider Directory (OPD) – without continuation funding, OHA will have to end this program. As a result of many years of effort between OHA and hundreds of stakeholders, the OPD was successfully implemented in 2019. If this program were to end, OHA stands to waste its investment of 6 years and about $15 million in the OPD. Ending this program would include eliminating an estimated 4 FTE, shuttering the established technology platform, and terminating contracts with established vendors.

The OPD collects statewide data on providers (e.g., provider specialties, practice location, contact information, affiliations, etc.) to be shared with health care and OHA and DHS stakeholders to advance operational efficiencies, care coordination and health information exchange, and analytics, population management, and accountability efforts. Oregon's Provider Directory includes more than 20,000 organization records and 100,000 provider records and is in process of rolling out statewide in support of initial use cases.

The OPD provides an interoperable, statewide infrastructure needed for:

Efficient collection of provider data: Efficient reporting of and access to provider data needed by state programs, CCOs/payers, health information exchanges and other technology partners, provider groups, and

research/analytics organizations. OPD supports administrative and operational efficiencies for state programs that require provider data, including Medicaid (e.g., collecting CCO and contractor provider network files), behavioral health, public health, and other programs.

The OPD provides a centralized source for accessing program data, including information about providers enrolled in the Prescription Drug Monitoring Program (PDMP). OHA's Public Health statute requires prescribers to be enrolled in the PDMP, but clinic administrators, CCOs and others face challenges accessing information about which providers have enrolled. The OPD is used to quickly compare the providers in an organization to the providers enrolled in the PDMP and to identify providers who were not in compliance. Because of this, clinics have been able to work with their providers and ensure they take steps to enroll in the PDMP.

Administrative efficiencies and operations: The OPD improves administrative and operational processes for providers, CCO and health plans to maintain accurate health plan/CCO provider network rosters. Health plans and CCOs face significant challenges and costs managing provider network directories that display which providers are covered by their health plan products. In response to inaccurate provider directories, Medicare Advantage plans face significant penalties from CMS for having outdated information in their public provider network directories. OPD provides relief for clinics that face significant burden for reporting their current provider rosters to multiple health plans in many formats and many siloed systems. The OPD serves a centralized hub – where clinics can update once and meet the needs of all their contracted health plans.

Accurate data for consumer-facing directories: OPD supports consumers/Oregonians seeking accurate information from CCOs and health plans on providers in network, a critical component of selecting an appropriate health plan or CCO. While the OPD is not anticipated to be public facing at this time, it serves as an efficient source of truth for CCOs and health plans to verify their network directory data, ensuring the data patients are depending on for care are reliable.

- In particular, the OPD provides the solution to the widespread problem of inaccurate patient-facing provider directories. It is a centralized hub that ingests provider data from multiple sources, validates those data, and provides quality data that streamlines today's clunky processes. Oregonians are frustrated when they learn that the provider they want to see is no longer on their health plan, or the information about that provider is inaccurate. They should be able to turn to their health plan's provider directory, but because provider data change often – providers move, phone numbers change, etc., the data are quickly outdated.
- Health plans request updated information from clinics monthly or quarterly. While clinics try to stay on top of requests for updates, they typically contract with a dozen or so plans, who then request information via different formats ranging from a variety of spreadsheets, portals that are not interoperable to phone calls, faxes, or paper forms. This type of administrative burden takes time away from important patient care, and often results in outdated information for health plan directories.
- In fact, OHA found OPD provided significant value in this area during OPD's soft launch. Upon onboarding new data from the providers and payers during soft launch, the OPD data team identified significant data discrepancies and gaps in the data ranging from 10 percent to 30 percent of the data. Types of issues included organization was closed, provider retired, organization address changed, wrong phone number, wrong identifier. The OPD drew on its validated data to identify these issues and provide a list of data corrections. One of the data sources was a health plan who had faced steep fines from CMS for inaccurate directory data in the past and found immediate value from the Provider Directory.

Care coordination and health information exchange: Providers frequently need to share health information with another provider outside their organization but lack updated contact information and electronic addresses for each other. The OPD program provides a monthly, centralized listing for electronic addresses (e.g., Direct Secure messaging addresses) that are used to exchange patient information, like care summaries and lab results and basic contact information to coordinate care. Before the OPD, there was no single source for electronic addresses – clinics had to maintain contact lists, spreadsheets, or sticky notes to connect with each other – making it difficult to coordinate care.

Demographic information about providers: OPD helps identify culturally appropriate care by providing data on providers' race/ethnicity/language characteristics, cultural competency, gender, as well as information about specialty focus areas (like expertise working with specific populations) and information about facility accommodations for physical disabilities.

Quality, analytics, and research information about providers:

- Provides the "denominator" of providers and organizations in Oregon. This allows a specific program like Medicaid who has data on their own providers, a resource to find and contact other non-Medicaid providers (and encourage them to become Medicaid providers).
- Provides attribution data – which providers are linked to which organizations and the relationships of organizations to other organizations. This information is not collected in a single location today. Attribution supports analysis of value-based payment arrangements, including population management tools that identify patients at risk for poor health outcomes and assess the effectiveness of interventions, as well as identify and track health disparities by providing essential data that attributes providers to their practices and groups.
- Supporting quality improvement, research and analytics work by aggregating data from multiple sources, providing matching identifiers, and managing provider affiliations, specialties, and other key data that allow for claims and clinical metric data analysis, generating quality dashboards, and evaluating the effectiveness of health care policies.
- Supporting cost growth target, evaluation of CCO 2.0, and other health policy initiatives that rely on provider/practice affiliation data to assess impact, calculate costs, and address other analytic factors.

Addressing social determinants of health and support COVID response: OPD is poised to provide a common social services resource directory needed for an effective statewide Community Information Exchange, as well as critical support for 211info's resource directory to ensure Oregon can address social determinants of health,

deliver on health system transformation, and connect individuals to social services (e.g., food pantries) and other resources in response to COVID.

Clinical Quality Metrics Registry (CQMR) - without continuation funding, OHA would have to end this program. As a result of many years of effort between OHA and hundreds of stakeholders, the CQMR was successfully implemented in 2019. If this program were to end, OHA stands to waste its investment of 6 years and about $12.5m. Ending this program would include eliminating an estimated 4 FTE, shuttering the established technology platform, and terminating contracts with established vendors. OHA would be unlikely to return and relaunch it again in the future.

The CQMR collects robust electronic clinical quality metrics data for Oregon's Medicaid program and value-based payment under CMS, CCOs, and commercial health plans in Oregon. Oregon's approach to support aligned value-based payment across payers increasingly relies on clinical metrics to assess patient outcomes and monitor quality without the lag involved with claims or administrative data. Clinical metrics data at the patient-level can provide insights into the health outcomes and quality of care for populations facing inequities.

The CQMR provides the statewide infrastructure needed for:

Ensuring quality in the Medicaid program through Oregon's Medicaid CCO quality incentives, as required under Oregon's Medicaid 1115 waiver with CMS and a critical component of Oregon's health system transformation efforts. By tying CCO quality incentive dollars to performance, CCOs are incentivized to work with providers to implement quality improvement initiatives or new interventions for their Medicaid members to improve clinical outcomes. CCO quality metrics increasingly include clinical metrics as determined by the Metrics and Scoring Committee and the Health Plan Quality Metrics Committee. CCOs must meet performance targets on quality metrics to receive millions of dollars of incentive funding, which is a core driver of transformation of the health care system. CQMR also supports reporting for federal health IT and quality programs including the Medicaid EHR Incentive Program (federally funded but operated by OHA) and CMS

Medicare programs such as the Merit-based Incentive Payment System (MIPS) and the Comprehensive Primary Care Plus (CPC+) program.

Clinical metrics from electronic health record systems (EHRs) are uniquely able to reflect clinical outcomes for individuals. This spring, CCOs used the CQMR to report on clinical quality metrics from primary care providers that cover roughly 744,000 Oregon Medicaid members (about 75 percent of all Medicaid members in Oregon). CCO reporting included the six CCO incentive measures that are EHR-based:

- Diabetes HbA1c poor control – ensuring diabetic members are keeping their blood sugar under control
- Controlling high blood pressure – ensuring members with high blood pressure are keeping their blood pressure in control
- Depression screening and follow-up – ensuring members who are depressed receive care
- Weight assessment and counseling for children and adolescents – addressing obesity amongst children and adolescents
- Smoking prevalence – reducing smoking for Oregonians on Medicaid
- Drug and alcohol screening (SBIRT) – ensuring members are screened and have brief intervention and referral for treatment for drug and alcohol issues

Aligned reporting, administrative efficiencies and reduced burden for providers in reporting clinical metrics to OHA, CMS, CCOs and other payers. The CQMR is foundational for Oregon's aligned reporting and decreased provider reporting burdens. Oregon providers are increasingly expected to report clinical metrics to payers, creating significant duplication and burden alleviated by centralized reporting through the CQMR. This emphasis on clinical metrics is only expected to grow in the future.

Nationally, there is a movement to leverage EHR data in quality measurement. CMS uses electronic clinical quality measures in the Medicaid core set of quality measures reported by states and in provider reporting

programs including the Merit-based Payment System (MIPS) and CPC+. The National Committee for Quality Assurance (NCQA) has launched a new set of health plan HEDIS measures, Electronic Clinical Data Systems (ECDS), that use EHR data as a preferred data source.

Managing value-based payment arrangements between CCOs, health plans, or other payer contracts with clinics that seek to change payment incentives to reward managing populations and achieving clinical outcomes. Clinics increasingly need to manage to clinical metrics within these arrangements and leverage population management tools that identify patients at risk for poor health outcomes and assess the effectiveness of interventions, as well as identify and track health disparities.

Quality improvement and analytics work including clinical metric data analysis, connecting patient-level clinical outcome data to other utilization data, generating quality dashboards, and evaluating the effectiveness of health care policies.

Insights into disparities and progress on health equity. Clinical metrics data at the patient-level can provide insights into the health outcomes and quality of care received for populations facing inequities.

HIT Commons - without continuation funding, OHA would reduce funding to HIT Commons. The HIT Commons' work launched in 2014 as a result of many years of effort between OHA and co-sponsor, the Oregon Health Leadership Council, as well as all hospitals, major health plans, CCOs, and other stakeholders. Reductions to this program's budget would shift costs to external partners including CCOs, hospitals, and health plans, which may reduce participation and jeopardize sustainability of this important work.

HIT Commons is a public/private partnership, co-sponsored by OHA and the Oregon Health Leadership Council. The HIT Commons accelerates and supports specific statewide health IT efforts and is jointly funded by OHA, all Oregon hospitals, all CCOs and all major health plans in Oregon. HIT Commons supports key health IT initiatives and has the ability to target efforts and bring key stakeholders to the table, including recent

work mobilizing support for COVID-19 response efforts. HIT Commons was formally established in 2018, transitioning from the EDie Utility (2015-2017), and it provides governance, coordination, technical assistance and support for the following three programs – EDie, PDMP Integration, and CIE.

The Emergency Department Information Exchange (EDie)/PreManage (aka Collective Platform)– connects all Oregon hospitals and health systems, CCOs, health plans, skilled nursing facilities, primary care and other clinics, and OHA/DHS programs to real-time hospital admit/discharge data to coordinate and improve care and health outcomes.

- EDie allows emergency departments (EDs) in real-time to identify patients with complex care needs who frequently use the emergency room for their care. In addition, EDie provides succinct but critical information to ED physicians, such as: security alerts, care guidelines entered by the patient's CCO or primary care provider, Physician Orders for Life Saving Treatment (POLST) forms, and contact information for case managers.
- PreManage (aka the Collective Platform) is a companion software tool to EDie. PreManage brings the same real-time hospital event notifications to health plans, CCOs, primary care providers, behavioral and oral health providers, tribal clinics and OHA/DHS programs.

EDie and PreManage connects real-time hospital data across hundreds of organizations, including:

- All hospitals with emergency departments (excepting the VA) in Oregon are live with EDie.
- All CCOs and all major health plans, all Dental Care Organizations serving Medicaid members.
- 68 percent of Oregon's Patient-Centered Primary Care Home clinics.
- 30 percent of licensed behavioral health agencies.
- Four of nine Tribes' tribal clinics.
- Half of Oregon's skilled nursing facilities.
- Many others, including OHA and DHS programs (see Medicaid PreManage program below).

The statewide EDie/PreManage programs have been singularly effective in bringing real time data to providers and health plans/CCOs across Oregon. Broad use of this program has led to some astounding results. Emergency department visits by high utilizers decreased by 34 percent in the 90 days following the initial creation of a care guideline in EDie/PreManage. Reducing ED utilization happens because EDie/PreManage allows everyone working with a patient to know when they have been in the ED or hospital, follow up promptly, connect individuals with better services and supports, and coordinate their care across their primary care, CCO, behavioral health team, and hospital.

EDie/PreManage provides a statewide utility infrastructure needed for:

CCO, health plans and provider care coordination and follow up: to identify individuals with chronic or unresolved issues resulting in high ED utilization, members with mental illness accessing hospital services, and avoidable ED visits which can be reduced by patient outreach and engagement. This transparency can reduce unnecessary tests and procedures often caused by lack of transparency around patient hospital visits.

Hospital and emergency departments' need to identify:

- Patients that over utilize EDs and require more focused coordination with CCOs and follow up with the appropriate providers.
- Patients with a Physician Order for Lifesaving Treatment (POLST) form on file to ensure patient end of life preferences are honored across all settings of care.
- Patients who have had security events at other hospitals - which inform the hospital on how best to ensure safety of staff.
- Patients who have been prescribed high amounts of opioids or risky co-prescribing of controlled substances. About two-thirds of Oregon's hospitals are receiving PDMP data (see below) within their EDie alerts.
- Critical incident support in hospitals during an emergency or pandemic, e.g., knowing if a patient has a known COVID-19 diagnosis and didn't disclose at check-in due to wanting a second opinion.

Insights into disparities and progress on health equity, including supports for CCOs and their contracted providers in meeting incentive metrics specific to ED utilization and ED disparity, increasing care coordination around Medicaid members with chronic or challenging health and social issues and improving health outcomes.

- Quality reporting and dashboards which enable providers, CCOs and health plans to manage care across their population of patients or members and make informed decisions on outreach and engagement, as well as drill down capabilities for patient-level care.
- Skilled Nursing Facilities and long-term services and supports: Half of Oregon SNFs are live and are seeing outstanding results – Marquis Company has reduced its hospital readmission rate by approximately 60 percent. Housecall Providers, one of the highest-performing CMS Independence at Home sites, credits PreManage for reducing administrative burden of caring for 2,300 patients. PreManage alerts help automate the communication staff has with neighboring hospitals and, in turn, helps streamline patient follow-up and transitions of care by identifying patients recently in the ED or hospital.
- Interstate data sharing: EDie/PreManage includes hospital event data across Oregon, Washington, Alaska, parts of Idaho and California, and increasingly in other states.

Prescription Drug Monitoring Program (PDMP) Integration initiative provides all Oregon prescribers and pharmacists with electronic access to PDMP data within their workflows, to better inform prescribing of controlled substances including opioids. This program complements Oregon's Public Health PDMP program and works closely with public health PDMP leadership and staff. Oversight of this program by HIT Commons could be impacted if HIT Commons business model becomes unsustainable due to lack of state funding contributions. *Note: OHA's Office of HIT funds the Medicaid share of HIT Commons governance, technical assistance, and other support activities, while Public Health supports the matching funds for the PDMP Integration vendor costs (not included in this policy package) – both will need to transition from 90/10 to 75/25.*

PDMP Integration provides a statewide infrastructure which:

- Supports safer, more informed opiate prescribing: Provides access to prescribers and pharmacists to controlled substance prescription data from PDMP registries within their own electronic workflow – either integrated into their electronic health record, or in their EDie Alert or other health information exchange tool. With PDMP Integration, providers do not need to log into the PDMP web-portal, remember their password, search for their patient, decide which patient record might be relevant, and view the PDMP data if any exist. Instead, providers use one-click from within a patient's EHR chart to open the PDMP data attributed for that individual. This convenience removes the hassle and leads to more consistent use of PDMP data in prescribing decisions.
- Supports PDMP alignment with state/federal priorities: Aligns with broader state and federal effort to increase the use of PDMPs, including the 2018 Secretary of State PDMP audit recommending integrated PDMP access, and the Substance Use-Disorder Prevention that Promotes Opioid Recovery and Treatment (SUPPORT) for Patients and Communities Act, enacted on October 24, 2018 and requiring PDMPs be "Qualified" to receive future federal funding. Part of the qualification is enabling integrated access by providers to PDMP data.
- Improves patient outcomes: Supports overall goals to reduce inappropriate prescriptions, improve patient outcomes, and promote more informed prescribing practices. Better access to PDMP data, along with other changes in prescribing guidance for controlled substances, and support by provider and health plan associations (OHLC, OMA and others), has led to reductions in risky prescribing.[2]
- Accelerated adoption of this tool quickly across Oregon: Launched in 2019, now more than 20,000 prescribers at 158 organizations (health systems, clinics) and more than 350 pharmacies in Oregon now benefit from "one-click" access to controlled substance prescription data in Oregon's PDMP.

Statewide Community Information Exchange (CIE) connects health care to social services. HIT Commons' role includes planning, governance, coordination, and support for implementation. *Note: OHA has a separate policy package for bringing this tool to OHA/DHS and supporting integration and centralized services to connect local CIEs to create a statewide CIE network.* Oversight of this program by HIT Commons could be impacted if HIT Commons' business model becomes unsustainable due to lack of state funding contributions.

Oregon communities are leading the way to addressing social determinants of health through new Community Information Exchanges, which connect CCOs, health plans, hospitals and health care providers to social services providers. These CIE technology platforms provide social service resource directories, closed loop referrals to social services, and data and analytics capabilities that have unprecedented ability to support vulnerable populations and help target local and statewide investments. Nearly every CCO is investing in CIE in their community, often partnering with hospitals, county public health, and social services agencies.

HIT Commons Statewide CIE work provides a coordinated statewide CIE data and infrastructure to:

- Address social determinants of health, health disparities, and COVID response: Connecting health care and culturally specific social service agencies through CIE can help ensure Oregon can address social determinants of health, deliver on health system transformation, and connect individuals to social services (e.g., food pantries) and other resources in response to COVID. For example, primary care providers can use CIE to refer a patient for housing, food, transportation, or other social services – which are often critically important for that individual to manage their health or chronic conditions. A closed-loop referral means the provider is notified when their patient receives social services.
- Improve statewide information on social services resources and support 211info: In partnership with the HIT Commons, the Oregon Provider Directory is poised to support a centralized, statewide resource directory of social services providers, programs, and agencies – removing the burden of constantly managing and updating individual directories and supporting statewide users like 211info.

- Better inform future investments in social services: CIEs provide analytic data on social service needs and gaps. CCOs, communities and the state can leverage coordinated data through HIT Commons' efforts to better inform financial investments and policy decisions.

Medicaid PreManage Program– without continuation funding, OHA would reduce funding to the Medicaid PreManage program. Oregon's Medicaid PreManage program successfully launched in 2016 and connects Medicaid stakeholders to the EDie/PreManage (aka Collective) platform managed by the HIT Commons. EDie/PreManage deliver real-time hospital admit/discharge data to coordinate and improve care and health outcomes. Oregon's Medicaid PreManage program supports all CCOs, 13 Assertive Community Treatment Teams (for individuals with severe mental illness at risk of institutionalization), 4 Tribes' tribal clinics, Oregon State Hospital, Medicaid fee-for service care coordination through KEPRO, and all DHS field offices and contractors related to DHS's Aging & People with Disabilities and Intellectual/Developmental Disabilities programs. While OHA has covered the CCO portion of the PreManage subscription, all of Oregon's CCOs today cover costs to extend their Medicaid subscription down to their contracted clinics, extending this tool to hundreds of primary care, behavioral health, and oral health providers.

Reducing OHA's funding for this program would reduce the CCO portion, requiring CCOs to take on additional costs to maintain this critical service. Given the economic environment, it is likely that some would choose not to participate, reducing the effectiveness of having a statewide system. CCOs that choose to continue at their cost would lose the benefit of OHA's leveraging 75 percent federal match across all CCOs for this portion. The program is foundational to the overall EDie Utility/HIT Commons work, without which, Oregon's health care system and Medicaid stakeholders revert to disconnected, isolated systems.

Care coordination: OHA's Medicaid PreManage program assists CCOs and Medicaid providers in avoiding duplicative tests and procedures, reducing costly and avoidable hospital stays, and increasing referrals of high-risk patients to more appropriate care. It also assists in identifying potential gaps in services (e.g. mental and behavioral health) that may result in unnecessary and prolonged ED stays for individuals experiencing

behavioral health crisis. All CCOs use PreManage for health information exchange support for contracted providers, which helps them meet OHA's CCO 2.0 requirements related to health IT and care coordination.

Supporting the Oregon State Hospital (OSH): OSH's social work, admissions, benefits, and forensic evaluation teams all use PreManage to gather hospital event information and history for OSH patients.

Ensuring safety and supporting vulnerable DHS clients: DHS programs use PreManage to meet federal requirements, as well as reviewing medical history and utilization which supports:

- Review when a client dies to help ensure there are no concerns about inadequate healthcare
- Staying connected to and apprised of the needs of high-risk individuals with patterns of high emergency department and hospital utilization, and
- Coordinating care for vulnerable members who have a combination of factors that place them at high risk for complications due to a lack of integrated care.
- In addition, DHS's Intellectual and Developmental Disabilities program uses PreManage to inform reproductive health care education for their clients.

Addressing social determinants of health: EDie/PreManage tools support all users across the state with a flag showing if an individual is homeless or housing insecure to ensure appropriate triage and discharge planning takes place.

3. How does this policy package further OHA's mission and align with its strategic plan?

As mentioned above, Oregon's transformed health care system increasingly relies on access to patient information and the health IT infrastructure to share and analyze data. In particular, health IT strategies are called out in:

- The Oregon Health Policy Board's Action Plan for Health Refresh: 2017-2019[3], as well as the work of OHPB's committees:
  - Health IT supports all 7 key strategies in the OHPB Action Plan for Health Refresh. Health IT and health information exchange support is specifically called out as strategy 5.2 under "Enhance care coordination."
  - The OPD and CQMR provide key infrastructure for the data strategy related to implementing the Sustainable Health Care Cost Growth Target and the metrics strategies of the Health Plan Quality Metrics Committee and Metrics and Scoring Committee, and both support improved data resources important for the work of the Health Equity Committee.
  - HIT Commons work directly supports public health objectives in responding to COVID, opioid crises, and social determinants of health.

- State Health Improvement Plan. Health IT-related strategies include:[4]
  - Improve electronic health record coordination and data sharing among providers.
  - Use electronic health records to promote delivery of preventive services.
  - Create a statewide community information exchange to facilitate referrals between health care and social services.

- OHA's Health Information Technology Oversight Council's (HITOC) Strategic Plan for 2017-2020, approved by the Oregon Health Policy Board.[5] HITOC has begun its work to update the Strategic Plan for 2021-2025. Current HITOC Goals include:
  - Oregonians have their core health information available where needed so their care team can deliver person-centered, coordinated care.

---

[3] See pg. 15, Action Plan for Health Refresh: 2017-2019: https://sharedsystems.dhsoha.state.or.us/DHSForms/Served/le9963.pdf

[4] These strategies fall under "Access to equitable preventive health care - Goal 3: Implement systemic and cross-collaborative changes to clinical and community-based health related service delivery to improve quality, equity, efficiency and effectiveness of services and intervention." See https://www.oregon.gov/oha/PH/ABOUT/Documents/ship/2020-2024_SHIP_Strategies.pdf

[5] Oregon's HIT Strategic Plan (2017-2020) is found here: https://www.oregon.gov/oha/HPA/OHIT/Documents/OHA%209920%20Health%20IT%20Final.pdf

- Clinical and administrative data are efficiently collected and used to support quality improvement and population health management and incentivize improved health outcomes. Aggregated data and metrics are also used by policymakers and others to monitor performance and inform policy development.
- Individuals and their family's access, use and contribute their clinical information to understand and improve their health and collaborate with their providers.
- HITOC has identified a fourth emerging area for its Strategic Plan update in 2021: HIT needed to support addressing social determinants of health and health equity.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

OHA measures success of our health IT programs in coordination with HITOC which has legislative responsibility for oversight of the Oregon HIT Program, and also must report on improvements in health IT adoption and use across stakeholders. To support this responsibility, OHA collects EHR and health IT adoption data and will be partnering with CCOs in 2021 to increase collected data as required under CCO 2.0. OHA also regularly reports to the legislature on its progress.[6] HITOC's 2019 data report shows significant advancements in the adoption and use of health IT across Oregon stakeholders.[7] Measures of success of OHA's Health IT Programs include:

[6] See OHA's Health IT 2019 Report to the Legislature - https://www.oregon.gov/oha/HPA/OHIT/Documents/2019_OfficeofHealthIT_AnnualReport.pdf
[7] HITOC 2019 Data Report, https://www.oregon.gov/oha/HPA/OHIT-HITOC/Documents/2019HITReport_HIEOverview_TwoWorlds_Combined.pdf

- Increased adoption and use of electronic health records, health information exchange, and health IT tools across hospitals, primary care, behavioral health, other physical health, and oral health providers, including safety net clinics and tribal clinics.
    - Oregon's Medicaid EHR Incentive Program has supported strong adoption of high functioning electronic health record systems, bringing more than $200m in federal incentives to 60 Oregon hospitals and more than 3,800 Oregon providers.
- Aligned use of clinical quality metrics for value-based payment arrangements – clinical metrics (using data from EHRs as opposed to claims or chart review) provide unique insight into clinical outcomes and improve the ability of payers (OHA, CCOs, health plans) to support quality, coordinated care
- Improved administrative simplification for provider and clinical metric reporting
- Improvement in performance on CCO clinical quality metrics and other quality improvement driven by the effective use of clinical metrics and analytics supported by health IT infrastructure
- Improved system connections and use of health information exchange supported by health IT infrastructure, including sharing information related to COVID management, opioid (PDMP) data, and other chronic conditions
- Improved use of social services and referrals from health care, including for 211info, supported by health IT infrastructure
- Improved health outcomes supported by value-based payment, population management, and effective use of health IT infrastructure

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

Health IT Programs contribute to all OHA's key goals. Health IT programs used by OHA and DHS staff support operational excellence, and work facilitates effective partnerships while addressing inequities, lowering costs, improve health, and provide better care.

Several of the Health IT Programs contribute indirectly to OHA's Member Health Status Key Performance Measure. The HIT Programs work directly and indirectly addresses OHA's Performance System Outcome Measures:

- 1AOM2. Increase Partner Satisfaction
- 1AOM6. Reduce Health Disparity
- 1AOM7. Improve Population Health
- 1AOM8. Improve Quality of Care
- 1AOM9. Improve Care Experience

7. What are the long-term desired outcomes?

OHA's investments in health IT programs and policy work under HITOC directly support health system transformation efforts that are expected to result in better health, better care, and lower costs.

Health Information Exchange supports better coordinated care by helping providers across different disciplines share clinical data. To coordinate care, a patient's physical, behavioral, and oral health providers must be able to share information. HIE can provide real-time access to patient information at the point of care, promoting safer and better-informed clinical decisions, especially when it is easily accessible within the clinician's workflow. HIE also supports referrals, notifications about critical health events, and access to prescription or other important clinical patient information.

- *Oregon's HIT Commons leadership and governance of these efforts has led to accelerated, coordinated adoption of EDie/PreManage and PDMP Integration.*
- *Oregon's Provider Directory supports the infrastructure needed for efficient health information exchange by providing key information on provider affiliations, location, contact information, whether they are accepting new patients, their specialty, language, gender, and health information exchange addresses. Today, identifying appropriate, culturally competent care for patients is difficult - each organization uses their own rolodex, sticky notes, and spreadsheets to compile contact sheets with varying degrees of completeness and accuracy, as provider data is quickly out of date.*

HIT supports population health management and value-based payment (VBP). Oregon's health care transformation model is moving toward making most payments through value-based arrangements –70 percent of CCO payments by 2024. In addition to supporting care for individual patients, HIT helps:

- Providers, CCOs, and health plans share clinical data for large sets of patients, which can support analytics, population management, and value-based payment arrangements.
- Organizations gather clinical data to identify patients at risk for poor health outcomes, identify gaps in needed care, and assess the effectiveness of interventions. This data can also identify/track health disparities.
- CCOs, health plans, and primary care clinics manage value-based payment arrangements by ensuring clinical information is available. Additional health IT tools and analytics activities are needed to manage value-based payment arrangements.
- *Oregon's Clinical Quality Metrics Registry and Oregon Provider Directory are key supports for addressing provider burden related to reporting clinical metrics needed for value-based payment, and for enabling efficient analytics and operations related to provider data. These statewide services can replace the fragmented, inefficient and incomplete systems that currently are scattered across the state.*

In the next five years, HIT has the potential to better support complex care coordination, including addressing social determinants of health which is essential if OHA is to reach its goal of eliminating health inequities in 10 years. To manage new VBP contracts, providers, health plans, and CCOs need to share information about care goals, plans of care, and information about risks and social factors that impact health outcomes. Connecting health care and social services sectors through health IT has the potential to support better health outcomes and help policymakers better understand social determinants of health gaps so public investments can be allocated to ensure that social services needs are being met.

- *Oregon's Provider Directory can support the common social services resource directory needed for an effective statewide Community Information Exchange, as well as critical support for 211info resource*

directory needs to ensure Oregon can address social determinants of health and deliver on health system transformation.

- *Oregon's HIT Commons leadership and governance bring all major stakeholders together to focus on Community Information Exchange and other initiatives needed to ensure Oregon can deliver on health system transformation.*

8. What would be the adverse effects of not funding this policy package?

Without additional funding in 2021-23, OHA would have to eliminate established, critical statewide health IT infrastructure: the OPD and CQMR programs and reduce the HIT Commons and Medicaid PreManage Programs. The consequences would be far-reaching.

Without these health IT programs:

- Providers, including physical, behavioral and oral health providers, rural and safety net providers, hospitals and health systems – and CCOs and health plans would have disconnected systems with duplication, cost and administrative burden, and an inability to leverage statewide data and tools that support value based payment and address health inequities, including social determinants of health. As Oregon's health care system faces massive challenges in responding to COVID, including systemic shifts to telehealth, connecting data and systems to each other becomes more critical than ever.
- Oregonians with chronic health issues, substance abuse and mental health issues, and those facing inequities due to discrimination would lack informed, coordinated care supported by health information and effective analytics tools.
- OHA and DHS programs would face burden and continued siloes, disconnected from the health care providers and payers.

OHA has made significant investments in staff, contractors, and hundreds of health care stakeholders have been engaged in OPD, CQMR, HIT Commons, and Medicaid PreManage programs over the past 6 years and has

benefitted from millions of dollars of federal matching funds. These investments would be wasted without continuation funding.

- These programs are foundational for health system transformation and Oregon's health IT strategic plan – both of which would be set back. These programs provide critical statewide health IT infrastructure needed to support connecting systems, quality improvement, administrative efficiencies, value-based payment, and support for addressing health inequities and social determinants of health.
- OPD and CQMR programs would be eliminated without continuation funding in this policy package.
- HIT Commons work is jointly funded by CCOs, health plans, and hospitals – however OHA's state share has been a cornerstone and allowed for planning and development of work that is sustained through shared funding. The long-term sustainability of HIT Commons and its initiatives could be at risk without continued state contribution.
- OHA's Medicaid PreManage program would face substantial reductions for the CCO portion of the program, which would shift costs to CCOs. Given the economic environment it is likely some CCOs would be unable to cover unanticipated costs, setting back considerable gains related to statewide connectivity for CCOs, OHA, and DHS and duplicatiing costs while leaving federal match on the table.

Without these programs, stakeholder expectations for state support for health IT infrastructure would need to re-conceived and health care stakeholders would be adversely impacted. CCOs have supported OHA's development of these programs, including through $3m Transformation Fund investment in 2013 that would otherwise have gone to CCOs. OHA leveraged this investment to draw down 90/10 federal match and implement the OPD, CQMR, HIT Commons, EDie and Medicaid PreManage programs, as part of an agreement with all CCOs. Without these programs or full funding, CCOs will need to take on costs and potentially duplicative technology investments.

Ending these programs would also cause significant concern from federal partners, including the Centers for Medicare & Medicaid Services and the Office of the National Coordinator for Health IT. CMS would be

unlikely to support new funding requests for this same work in the future, and federal concern about wasted resources may impact support for future health IT work.
In addition, eliminating this established health IT infrastructure affects critical support for COVID response, efforts to address social determinants of health and efforts to help populations impacted by health inequities achieve health equity.

See Question 1 and Question 14 for additional consequences in relation to OHA's goal of eliminating health inequities across the state.

Oregon Provider Directory (OPD) – without continuation funding, OHA would have to end this program. If this program were to end, OHA stands to waste its investment of 6 years and about $15m in the OPD. Ending this program would include eliminating an estimated 4 FTE, shuttering the established technology platform, and terminating contracts with established vendors.

- OHA (and other payers) would continue expensive, duplicate, fragmented process collecting provider data using numerous systems or spreadsheets for different programs, including from CCOs, health plans, hospitals, health systems and providers. This would result in ongoing administrative burden, inefficient use of staff time, unnecessary cost to providers, and associated data quality and matching issues.
- OHA (and other research/analytic partners) would lack an efficient source of provider data needed for analysis, quality improvement, research and evaluation, making it difficult to pull in to answer questions about certain characteristics for providers and organization.
- Providers and health information exchanges would lack the opportunity for efficient, quality provider data needed for care coordination and reduced provider abrasion.
- Payers and CCOs who are responsible for accurate patient facing directories would continue to struggle to manage them and keep them up to date, resulting in duplicative work across different organizations and potential fines from CMS and complaints from patients.

- Stakeholders investing in Community Information Exchange, including 211info, would lose the opportunity for centralized social services resource directory, resulting in lack of efficient, quality data needed for social service referrals.

Clinical Quality Metrics Registry (CQMR) - without continuation funding, OHA would have to end this program. If this program were to end, OHA stands to waste its investment of 6 years and about $12.5m. Ending this program would include eliminating an estimated 4 FTE, shuttering the established technology platform, and terminating contracts with established vendors. OHA would be unlikely to return and relaunch it again in the future.

- Without a tool to efficiently collect clinical quality measures, the administrative burden and cost of reporting may drive payers and programs to rely less on clinical metrics data, even though these data are uniquely able to demonstrate clinical outcomes in many cases (e.g., measuring whether a diabetic patient's blood sugar level is poorly controlled, not just measuring whether a blood sugar test was performed).
- Clinics would face continuing administrative burdens without "one stop" reporting for multiple programs.
- OHA would reduce or lose the ability to ensure quality in the Medicaid program, as would CCOs and other health plans across Oregon who would benefit from efficient, aligned clinical metrics reporting. The CQMR is an important component of moving to the next stage of Oregon's CCO Incentive Metrics program.
- OHA would reduce or lose the ability to achieve goals of value-based payment in the Medicaid program and statewide across markets, and efforts across CCOs, health plans would be set back. OHA's goals for value-based payment would be more difficult to achieve without a reporting tool for electronic clinical quality measures. As value-based payment increases, traditional claims data will be less available for measure calculation, and clinical data will be increasingly important to measure the quality of care and outcomes.

HIT Commons - without continuation funding, OHA would significantly reduce funding for this important public/private partnership, which could threaten the sustainability of HIT Commons' governance, coordination, planning, and technical assistance support for several critical programs. Although HIT Commons could attempt to increase assessments to other users (hospitals, health plans, CCOs also pay a share of costs), those users are also making difficult financial decisions at this time.

- EDie/PreManage (aka Collective Platform) – Failure to coordinate, govern, and support this incredible statewide infrastructure would lead to duplication, lack of efficiency, lower adoption (or adoption of tools that remain unused), and the inability to leverage this statewide infrastructure for care coordination and responding to crises such as COVID.
- PDMP Integration initiative – Failure to coordinate, govern and support this statewide resource would leave prescribers and pharmacists unconnected to efficient use of the PDMP and could result in an increase in risky prescribing and increase in opioid addiction and overdose deaths.
- HIT Commons plays a key role in the exploration, planning, and coordination of Community Information Exchange in Oregon – to connect health care and social services sectors. Failure to coordinate local CIE efforts across the state will lead to increased burden to community-based organizations, fragmentation of services and data leading to gaps in delivery, under or overestimated needs, ultimately leaving our most vulnerable Oregonians at risk of situations that perpetuate inequity.

Medicaid PreManage program- without continuation funding, OHA would significantly reduce funding for this important tool which today provides robust hospital event notification across disparate providers and ensures patient care coordination is happening, in real time, and in partnership across care teams. CCOs already contribute a significant amount to ensure their contracted providers have access to Collective. Asking them to take on a significant portion of their own cost may result in CCOs choosing to discontinue use of the tool or be out of compliance with CCO 2.0 contracts. Currently all CCOs and their networks are using PreManage. Should this change, the entire EDie/PreManage system, which functions with all of a patient's care team having access to the patient information, will be adversely impacted.

- Patient care may go back to being siloed and uninformed when it comes to hospital or skilled nursing facility events. Current users of the platform will be disconnected from other health care providers and payers.
- A gap in usage of this tool across CCOs may result in Oregonians with chronic health issues, substance abuse and mental health issues, and those facing inequities due to discrimination lacking informed, coordinated care supported by health information and effective analytics tools.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

- OHA has completed a sustainability assessment and discussions with CMS to confirm that all ongoing health IT programs can move to 75/25 funding for contract and related staff costs. HIT Policy and HITOC work will be funded at the 50/50 rate for Medicaid-focused work, and at 39/61 for statewide policy work.
- CMS expects states to continue investments in health IT programs initiated with 90/10 HITECH funding and has outlined how program work should transition to 75/25 and 50/50 match rates.
- OHA has worked closely with external stakeholders, including hospitals, health systems, health plans, CCOs, provider groups, counties, OHPB, HITOC, and others to ensure health IT programs are directionally correct and have stakeholder support for ongoing operations.

10. What alternatives were considered and what were the reasons for rejecting them?

Alternative One: Eliminate one health IT program and associated funding for a smaller policy package funding request – OHA would support either the OPD or CQMR and eliminate the other program, including at least 4 affiliated staff positions. OHA rejected this alternative given the investment and value of both health IT programs and significant waste in ending either of them.

Alternative Two: Shift costs to CCOs, hospitals, providers and other stakeholders through charging fees – OHA has the legislative authority to charge fees for Oregon HIT Program services. OHA envisions a future where OPD and CQMR programs are partially supported by fees – to cover non-Medicaid uses of these programs, such as participation by commercial health plans. Both programs have recently rolled out for Medicaid purposes and do not have commercial health plan participation at this time. Medicaid uses of these programs are supportable by 75 percent Federal Funds ongoing, and state matching funds must come from General Fund or other state funds separate from the organizations who stand to directly benefit from the federal match – thus OPD or CQMR fees would not be able to support the state's 25 percent match. Shifting these state/federal funding sources to fees would require about $10 million in fees be generated to cover the biennium contractor costs, as opposed to about $2.5 million in state funds to cover the 25 percent match. Given the economic environment it is unlikely that enough stakeholders would participate in fees at this stage of maturity for these programs, which would undermine the sustainability of these health IT programs and lead to their elimination.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

OHA, DHS, tribal clinics, local public health agencies, and other contracted organizations like CCOs and Medicaid Fee for Service care coordination entities (KEPRO and CareOregon) would receive the continued benefit of OHA's health IT programs.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

OHA's health IT programs support all Oregon health care stakeholders, as well as OHA and DHS programs. In particular, OHA has the support of the following stakeholders for the OPD and CQMR:

- Health plans and CCOs, including those participating in value-based payment collaboratives (CPC+)
- Hospitals and health systems including OAHHS
- Oregon Health Leadership Council
- HIT Commons Governance Board
- Providers and many provider associations including OMA, OPCA, Office of Rural Health and others
- Social services and Community Information Exchange stakeholders including 211info
- Technology and data quality partners such as Comagine, Reliance eHealth Collaborative, OCHIN

OHA has support of the following stakeholder for HIT Commons and the OHA Medicaid PreManage programs:

- Health plans and CCOs, including CCO Oregon, Dental Care Organizations
- Hospitals and health systems, including OAHHS
- Oregon Health Leadership Council and its committees
- HIT Commons Governance Board and various committees
- Providers and many provider associations including OMA, OPCA, Office of Rural Health and others
- Behavioral Health agencies and associations including AOCMHP
- Social services and Community Information Exchange stakeholders including 211info
- Technology and data quality partners such as Comagine, Reliance eHealth Collaborative, OCHIN
- Oregon retail pharmacies
- Skilled Nursing Facilities including, Marquis, Avamere and Prestige

In addition to OHA stakeholders, OHA's Office of Health IT (OHIT) has coordinated with DHS executives and programs to ensure the value of HIT Programs support DHS.

- HIT Commons and OHIT staff provide subject matter expertise on Health IT and technical assistance to DHS programs including Type B Area Agency on Aging, Aging and People with Disabilities, Intellectual and Developmental Disabilities, Child Welfare staff and local offices or contractors (AAA, Brokerages)

related to OHA's Medicaid PreManage program. This tool enables DHS programs to view hospital and emergency department admit and discharge data on DHS clients, which is used for managing residential and long-term care placements, identifying quality and abuse concerns, and managing effective DHS programs.

- HIT Commons and OHIT staff also support social determinants of health work across DHS with Community Information Exchange planning efforts, which would ultimately support electronic referrals and resource look-up for social services statewide. *Implementation of a state Medicaid subscription to Community Information Exchange is covered in a separate policy package.*

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[8] or equitable health outcomes?

Health IT programs, policies, governance and coordination are critical for supporting populations impacted by health inequities. Health IT plays several critical roles directly and indirectly in this area:

- HIT Commons and Medicaid PreManage programs support all CCOs, health plans and hospitals across Oregon, as well as patient-centered primary care homes, safety net clinics, tribal clinics, behavioral and oral health providers to ensure that individuals at risk of high-utilization of ED/hospitalization do not fall through the cracks of a disconnected health care system. Providers and CCOs instead have the benefit of data and tools needed to manage and coordinate care for these high-risk populations, including many that typically face disparities due to racism and other social factors.
- Oregon communities are leading the way to addressing social determinants of health through new Community Information Exchanges, which connect CCOs, health plans, hospitals and health care providers to social services. These technology platforms provide social service resource directories, closed loop referrals to social services, and data and analytics capabilities that have unprecedented ability to support vulnerable populations and help target local and statewide investments. HIT Commons work to

[8] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

plan and coordinate statewide Community Information Exchanges bring critical data and infrastructure to connect health care and culturally specific social service agencies across Oregon's communities. The OPD is poised to support a centralized, statewide resource directory of social services providers, programs, and agencies – removing the burden of constantly managing and updating individual directories and supporting statewide users like 211info.

- Data on race, ethnicity, language and disability can be sourced and shared from health IT systems, including electronic health records and via health information exchange tools.
- Population management tools supported by state health IT strategies and programs allow CCOs, health plans, and providers to assess quality of care and target resources to individuals facing the greatest need and barriers and demonstrate the impact of programs on populations including those facing inequities.
- Health IT subject matter expertise and leadership under HITOC is critical to ensure that Oregon's health system transformation efforts are supported by the data and infrastructure needed to achieve health equity and address barriers for populations facing inequities. HITOC coordinates with the Health Equity Committee as well as OHA programs seeking to improve REALD data and leverage technology.
- The OPD can help identify culturally appropriate care by providing statewide data on providers' race/ethnicity/language characteristics, as well as information about specialty focus areas (like expertise working with specific populations) and information about facility accommodations for physical disabilities. It also contains location information that can identify where there may be gaps or capacity/access issues across the state to populations impacted by health inequities.
- The CQMR supports quality metrics data on clinical outcomes, including moving toward patient-level data that can provide insights into the health outcomes and quality of care received for populations facing inequities.

Staffing and fiscal impact

Implementation date(s): 10/1/2021, except 3 months LD 7/1 through 9/30/2021

End date (if applicable): Ongoing

15. What assumptions affect the pricing of this policy package?

CMS approves OHA request to transition funding from HITECH 90/10 to Medicaid Enterprise Services at 75/25 match and Medicaid Administrative costs at 50/50. OHA has worked with our regional CMS point of contact to ensure eligibility of OHA staffing and contractor costs for enhanced 75/25 match. CMS has outlined how program work can be transitioned to 75/25 and 50/50 match rates for all states' continued health IT work and is very interested in continuing to support state health IT programs initiated under the HITECH funding.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

No – this is for continuation of existing work.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No new responsibilities or impact on shared services, with the exception of Shared Services Facilities – increase General Fund share of rent from 90/10 to 50/50 match, requiring approximately $135,000 new General Fund in 2021-23.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This policy package restores the eight positions eliminated in package #070. However, all health IT positions will need to transition to ongoing funding. All staff and positions reflected in this package are existing positions, with the exception of a 3-month LD position in 2021-23 (extending a current OPA3 LD position through 9/30/21 and leveraging HITECH 90/10 funding). Given OHA already has position authority on 25 permanent positions, this policy package requests increased General Fund support to offset the decrease in federal match rates. In total, 25.13 FTE would be impacted, of which 20.13 FTE are in OHIT.

Agency	FTE	Classification	Duration	Position Type	Position Authority
OHA	1.0	PEM H	Ongoing	Permanent	Existing
OHA	3.0*	PEM F	Ongoing	Permanent	Existing
OHA	7.0	OPA4	Ongoing	Permanent	Existing
OHA	6.0*	OPA3	Ongoing	Permanent	Existing
OHA	2.0*	RA4	Ongoing	Permanent	Existing
OHA	1.0	PM2	Ongoing	Permanent	Existing
OHA	1.0*	RA3	Ongoing	Permanent	Existing
OHA	2.0	OPA2	Ongoing	Permanent	Existing
OHA	1.0	AS2	Ongoing	Permanent	Existing
OHA	1.0	ESS2	Ongoing	Permanent	Existing
OHA	0.13	OPA 3	7/1/21-9/30/21	LD	New/Continuation
Total	**25.13**				

*Includes underfills or positions filled at a different classification at the same level.

Since nearly all positions require shifting federal funding, it is not possible to reduce a portion of each position. To determine which positions to include in Package 070, OHA prioritized work required by federal, state or contract requirements, and prioritized the staff needed to support that work. Priorities include:

- Statutorily mandated work related to the Health IT Oversight Council (HITOC).
- Managing CCO 2.0 health IT contractual requirements.
- Completing and wrapping up the federal Medicaid Electronic Health Record Incentive Program.
- Although all services within the Oregon HIT Program are operational, the remaining base funding was insufficient to retain the OPD or the CQMR programs due to the contractor costs (despite the ability to garner 75/25 federal match). Only the HIT Commons and Medicaid PreManage programs could be retained under reduced funding.

20. What are the start-up and one-time costs?

Not applicable.

21. What are the ongoing costs?

All costs in this package are ongoing costs with established positions and contracts and include no new work. Costs are projected as the difference between expected costs and OHIT base budget. **Costs listed below include the full OHIT budgeted costs, however only the difference associated with transitioning from 90/10 to lower match rates is included in this policy package. Please refer to Package 070 for specifics about budget and position reductions related to reduced federal funding. This policy package restores positions and budget for ongoing work listed below.**

OHA expects modest fund shift adjustments in 2023-25 based on potential changes to federal funding qualifications for enhanced match, and potential adjustments to underlying work, especially as HITOC updates the Oregon HIT Strategic Plan in 2021, in response to COVID and to further address health inequities.

This policy package supports staffing and contracts costs listed below, as well as approximately $135,000 General Fund for Shared Services Facilities for OHIT rent transitioning from 90/10 to 50/50 match. In addition, OHA has reduced our contract budget to reflect the change in project phase to operational programs, as well as reduced other planning, evaluation, and consultant contracts to the minimum needed for ongoing, priority work.

The table below represents the total staff and contract costs associated with each program/body of work under the Office of Health IT. In particular:

- **Program or Body of Work:** Program name or body of work under the Office of Health IT that shows the contract and staff associated with specific work.
- **FF/GF match rate:** Federal Funds match rate for work associated with the program category.
- **Contract:** Type of contract associated with the program or body of work.
- **Contract Total Funds with full funding:** Total contract costs associated with the program or body of work, assuming full funding of this policy package.
- **Contract General Funds with full funding:** General Fund portion of contract costs associated with the program or body of work, assuming full funding of this policy package.
- **Total FTE with full funding:** Total FTE associated with the program or body of work, assuming full funding of this policy package.
- **Remaining resources without policy package:** Resources that would remain if this policy package were not funded, including total FTE associated with the program or body of work, and notes about the impact to contract costs.

Oregon Health Authority: 2021-23 Policy Package

Program or Body of Work	**FF/GF match rate***	**Contract**	**Contract Total Funds** with full funding	**Contract General Funds** with full funding	**Total FTE** with full funding	**Remaining resources** without policy package
OHIT-wide staff	Blended				4.0 FTE	3.0 FTE
HIT Policy/ HITOC work & CCO 2.0 work	Blended and 39/61	Strategic Consultants	$140,000	$38,000	6 FTE plus 3 mos. LD at 90/10 funding	6.0 FTE (no LD), same contracts
Oregon Provider Directory**	75/25, 90/10 for enhancements	Vendors	$5,400,000	$1,020,000	3.5 FTE	None
Clinical Quality Metrics Registry**	75/25 90/10 for enhancements	Vendors, consultant/ TA	$5,700,000	$1,900,000	2.0 FTE in OHIT 1.0 FTE in Health Analytics (leads CQMR & metrics work)	1.0 FTE in Health Analytics remains for other metrics work, no contracts
HIT Commons**	75/25 (90/10 for development)	Governance, coordination, planning, TA	$2,260,000	$480,000	3.0 FTE	3.0 FTE, reduce contract by $275,000 GF
Medicaid PreManage Program**	75/25 ongoing	Collective Medical Technologies	$2,660,000	$665,000	Same staff as support HIT Commons	Same staff for HIT Commons, reduce contract $277k GF
Medicaid EHR Incentive Program (program will end in 2021-23)	90/10	DXC vendor for MAPIR application	$200,000	$20,000	1.5 FTE (one staff shared w/ OPD moves to ongoing work) 1.0 FTE – HSD^	2.0 FTE (end during 2021-23), 1.0 FTE – HSD, Same contract
Other HPA Staffing outside OHIT^	Blended				3.0 FTE HPA-wide in business operations	1.0 FTE HPA-wide
Total FTE					**25.13 FTE**	**17.00 FTE**

* Blended rates include a mix of 75/25 (related to IT programs like HIT Commons, OPD, CQMR), 50/50 (Medicaid Admin match), and some are 39/61 (for statewide health policy-related work that is partially 50/50 matched).

**Without policy package funding, the OPD and CQMR programs would end, the HIT Commons and Medicaid PreManage programs would be reduced, and 8 FTE would be eliminated.

^These positions have been 90/10 funded and need to convert to regular ongoing funding as they transition to regular HPA work, including administrative and business operations support for OHIT and other HPA offices. The HSD position has been shared between OHIT and HSD to support the DXC/MAPIR application and will end all remaining OHIT-related duties by 6/30/2023, then revert to 100 percent HSD work.

22. What are the potential savings?

Does not apply.

23. What are the sources of funding and the funding split for each one?

Currently funded by CMS 90/10 HITECH funds, contracts are shifting to 75/25 Medicaid Enterprise Systems (CMS) funding, and staff are shifting to 75/25, 50/50 Medicaid Administrative match or 39/61 (blended health policy Medicaid match rate) depending on the work. Note: 90/10 funding continues to be available for development, design, and implementation work, including enhancements.

Total for this policy package

Oregon Health Authority
2021-23 Policy Package

Division:	Health Policy & Analytics
Program:	Public Employees' Benefit Board and Oregon Educators Benefit Board
Policy package title:	Aligning Purchasing Power Across PEBB/OEBB and Other Public Purchasers
Policy package number:	425
Related legislation:	Legislative Concept 26

Summary statement:

One of the most important levers OHA has for spreading change across the healthcare marketplace is aligning the state's purchasing power across PEBB and OEBB along with other public purchasers. This policy package provides a pathway to expand PEBB and OEBB's statewide enrollment footprint of 300,000 covered lives. It allows for additional special procurement authority for joint purchasing initiatives and adds resources to continue to transform the delivery systems in alignment with coordinated care organizations (CCO) and the coordinated care model. Both boards have fully committed to advancing the coordinated care model and exploring innovative, long-term solutions to stay under a 3.4 percent annual trend cap. Under their current legal structures, the boards' procurement authority does not allow for the flexibility needed to directly contract with plans who can meet specific criteria as determined by the boards, without issuing a request for proposal. This policy package will grant expanded procurement authority to explore opportunities in innovation as they are presented to the boards.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE

Oregon Health Authority: 2021-23 Policy Package

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

Over the next two years, Health Policy and Analytics (HPA) expects to be responding to the enormous disruption of COVID-19 by adopting targeted policy and program changes that stabilize the health system and coverage and allow us to rebuild a more sustainable and equitable system for the longer term. One of the most important levers we have for spreading change across markets is aligning the state's purchasing power across PEBB/OEBB and other public purchasers. COVID-19 has exposed the inequities in Oregon's healthcare system. The state can better leverage the public purchasing power in order to contain costs on a statewide basis. Currently:

- Health care coverage remains insufficient and unaffordable for many. In 2017, eight percent of families had problems paying medical bills.
- With health insurance coverage at record highs and uncompensated care for providers at record lows, there is opportunity for Oregon to leverage its purchasing power to contain costs for more Oregonians.
- The PEBB and OEBB boards have taken steps to align on several initiatives with the goal of enhancing their purchasing power. PEBB and OEBB have already merged the administrative staff of both programs into one unit.
- The state, however, has not yet maximized the opportunities to fully align benefits and purchasing across other programs and expand the purchasing power beyond PEBB and OEBB.
- Reducing health care costs allows resources to go to wages and other critical investments.

The purpose of this policy package is to give the PEBB and OEBB boards more authority on procurement outside of the Request for Proposal (RFP) process to meet purchasing needs. The boards are often not able to act when innovative ideas are brought to them without conducting an arduous RFP process that can extend over one year. The current procurement authority within the PEBB and OEBB legal structures does not grant

the flexibility to directly contract with plans who can meet the specific criteria as determined by the boards when sought. This policy package and accompanying legislative concept would include the authority for the boards to function as a single board if desired.

By starting with the merger of the PEBB and OEBB benefit boards, there is potential to align financial incentives with other publicly-funded programs to improve care and lower costs across the Oregon Health Plan, public employee programs, the Marketplace and other local governments.

Conceptually, with expanded procurement authority the board could contract with an insurance plan outside of the RFP process if the plan demonstrates:

- Its providers are willing to serve all members in state markets (Medicaid, PEBB, OEBB, Marketplace), proportional to the market.
- It will offer unified provider contracts across all state markets that promote the same high standards of access and quality for all patients, regardless of where they obtain insurance.
- An aligned core set of metrics for access and quality.
- Aligned payment methodologies across all state markets that move providers to shared savings/shared risk and population-based incentive payments.
- It will accept global budget (capitation) payments from the state for all lives covered across state markets. It would be willing to contract for a global budget model that is budget-neutral, with blended rates across markets, with an annual growth rate at or below the statewide cost growth target, as established in Senate Bill 889 (2019). Plans would be free to negotiate rates with providers.
- It is willing to offer plans to any new employers that join PEBB and OEBB, with a willingness to provide varying benefits and cost-sharing structures within the plan that do not interfere with collective bargaining agreements.

2. What would this policy package buy and how and when would it be implemented?

This policy package and accompanying Legislative Concept (LC 26) would provide the legal resources ($300,000 Other Funds) to transition the statutory authority of the boards, the consultant/actuarial resources ($800,000 Other Funds) to guide and execute on board strategy, and two Operations and Policy Analyst 3 positions ($470,709 Other Funds). Staff would be hired in October 2021. DOJ and consultant work would begin in September 2021. The positions would act as an Insurance Producer and a Policy Analyst liaison to expand PEBB/OEBB's footprint with other public purchasers and orient them to the coordinated care model.

Consultants working with staff, would establish an aligned core set of metrics measuring access and quality, and aligned payment methodologies across all markets that move providers to shared savings/shared risk arrangements and population-based payments like "total cost-of-care" initiatives on a per employee basis.

Plans would be encouraged to negotiate the best rates with providers. PEBB and OEBB could act as an "public exchange" function for other public employers that allows these employers to provide varying plan offerings, benefits and cost-sharing, without impact to collective bargaining agreements.

3. How does this policy package further OHA's mission and align with its strategic plan?

The desired outcome for this policy package is that consumers and taxpayers have access to an equitable, more sustainable health care system for the entire state, in line with the Triple Aim of lower cost, higher quality benefits that offer better care. This aligns with the Governor's policy priorities, OHA's strategic plan and the guiding principles of the PEBB and OEBB boards.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

Success will be measured in 3 ways 1) statewide enrollment migration from fee-for-service plans to coordinated care model plans, 2) volume of enrollment increases in PEBB and OEBB by local governments, special districts and other public payers, and 3) flexibility in procurement enabling the boards to meet the 3.4% annual increase test every year.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

Key Performance Measure: Customer Service. This policy package delivers a level of customer service to school districts that they lost when OEBB was formed by adding an insurance broker service that can assist them in their contribution strategies and plan offering selections. This would also be desired by local governments outside of PEBB and OEBB.

7. What are the long-term desired outcomes?

What does this mean for consumers and taxpayers?

- Contributes to an affordable, stable, predictable health system: with a global budget health care costs no longer outpace family and household incomes, freeing up funding for wage growth and other important state services.

- Improved quality and population health: The health care system is working together to keep patients healthy and improve the quality of care they receive.
- Improved patient experience: All patients have timely access to high quality care. They receive the right care at the right time in a coordinated system that puts patients in the center.
- Local flexibility: Employers have access to sustainable, high-value health care with flexibility to provide unique benefit offerings.

What does this mean for providers?

- Stable, predictable revenue: By moving from a system that pays for volume of care to one that pays for value, providers will have more stable, predictable revenue that grows within a sustainable rate of growth.
- Administrative streamlining and efficiency: By aligning payment models and metrics, providers can spend more time helping their patients and less time on paperwork.
- Contracting flexibility: the ability to approach PEBB and OEBB with innovative programs without an RFP.

8. What would be the adverse effects of not funding this policy package?

A continued lack of procurement flexibility and accountability. The boards and the state will set broad ambitious goals but will be hamstrung to innovate to best meet the goals within a sustainable budget.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

The PEBB and OEBB boards have merged administratively but are still separate and distinct boards. A joint policy workgroup was conceived in 2018 called the "PEBB/OEBB Innovation Workgroup" to consider joint

policy initiatives shared by the two boards, opportunities for leveraging their purchasing power and data, and for strategizing how to meet the 3.4 percent annual test.

10. What alternatives were considered and what were the reasons for rejecting them?

The alternative is to remain separate boards that operate independently. This is a less desirable option when there are opportunities to advance the coordinated care model across the state and add additional local governments.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

Yes. Current authority does not allow for direct contracting with vendors. LC 26 would provide new statutory authority for the board's procurement authority.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Local governments can already participate in PEBB and OEBB. This policy package would help support their information and support needs when they inquire about participating in PEBB or OEBB plans.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

None.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

This policy package would allow PEBB and OEBB to be responsive in contracting with providers in under-served areas in Oregon without being subject to a long RFP process that can stretch over 12 months. It also offers the boards with a tool to enhance accountability with current providers for achieving outcome-related goals under health equity.

Staffing and fiscal impact

Implementation date(s): July 1, 2021

End date (if applicable): Ongoing

15. What assumptions affect the pricing of this policy package?

Legal Department of Justice costs, consultant/actuarial costs and two new position costs have been taken into consideration in development of the policy package over the course of the 2021-23 biennium.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

With the passage of the policy package, both PEBB and OEBB will have new program responsibilities. Two new Operations and Policy Analyst positions will act as an insurance producer and as a policy liaison to expand PEBB and OEBB's enrollment footprint with other public purchasers, and ensure they are on-boarded

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

as efficiently as possible. The positions would develop standards for bringing new entities into the PEBB and OEBB family of benefits and create innovative approaches to sales and service delivery.

17. Will there be new responsibilities for or an impact on Shared Services?

None.

18. Will there be changes to client caseloads or services provided to population groups?

None.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

Two new permanent full-time Operations and Policy Analyst 3 positions to act as an Insurance Producer (without commissions) and a Policy Analyst liaison with other public programs working on plan brokering, cost analysis, outcome metrics and purchasing strategies.

20. What are the start-up and one-time costs?

None.

21. What are the ongoing costs?

Ongoing costs include personnel costs including employee services, supplies, shared services and State Assessments & Enterprise-wide Costs. It also includes professional services and Department of Justice costs.

22. What are the potential savings?

In five years, one model showed that by eliminating waste, redundancy, and purchasing healthcare as one statewide purchaser, results have shown improvements in quality of care, patient satisfaction and health status while saving $2.2 billion.

23. What are the sources of funding and the funding split for each one?

Revenue source is the OEBB and PEBB Administrative Fee attached to premiums. One hundred percent Other Funds. This policy package will be split evenly between PEBB and OEBB.

Total for this policy package

Oregon Health Authority
2021-23 Policy Package

Division:	Health Policy and Analytics
Program:	Public Employees' Benefit Board & Oregon Educators Benefit Board
Policy package title:	Benefits Management System (OEBB-PEBB BMS) Replacement
Policy package number:	426
Related legislation:	None

Summary statement:

The current benefit management systems (BMS) used by the Oregon Educators Benefit Board (OEBB) and Public Employees' Benefit Board (PEBB) no longer support all current business needs since their respective introductions in 2008 and 2003. OEBB and PEBB, along with the OEBB and PEBB boards, are seeking to integrate the administration and support of the two systems, with improved user experience and customer care, into a single platform to meet the legislative direction provided under Senate Bill 1067 (2017). Not prioritizing and supporting a replacement effort for the current system will result in the continued use of end-of-lifecycle technology that is fragmented, non-standard, difficult to support, and is not scalable. Approximately 300,000 covered lives would be at risk for benefits interruption if a replacement system is not identified and procured prior to the expiration of existing vendor support in 2022.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$0**	**$8,182,928**	**$0**	**$8,182,928**	**0**	**0.00**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

Over the next two years, Health Policy and Analytics (HPA) expects to be responding to the enormous disruption of COVID -19 by adopting targeted policy and program changes that stabilize the health system and coverage and allow us to rebuild a more sustainable and equitable system for the longer term. One of the most important levers we have for spreading change across markets is aligning the state's operational and support processes to provide demonstrably improved services with increased efficiency and sustainable effectiveness, and a fundamental step to activate that lever is alignment across OEBB and PEBB. Replacing the antiquated and independent operating systems for benefit management in the two programs with a single, modernized and efficient system is a necessary step toward integration and alignment of benefits.

The current benefit management systems used by OEBB and PEBB (MyOEBB and pebb.benefits respectively) no longer support all current business needs since their respective introduction in 2008 and 2003. These needs include the ability of OEBB and PEBB subscribers in securely accessing and changing their personal account information; updating family member eligibility with legal documentation which may include personally identifiable information (PII) data; modernized, secured communications between subscribers and OEBB/PEBB support staff, and enhanced remote capabilities for school district/university/state hospital benefits administrators to properly manage accounts for their organizations and employees.

OEBB and PEBB, along with the OEBB and PEBB boards, are seeking to integrate the administrative and support of the two systems, with improved user experience and customer care, into a single platform to meet the legislative direction provided under Senate Bill 1067 (2017). Section 25 of the bill specifies the need for increased efficiency, reduction of duplication and merging of the two separate PEBB and OEBB oversight boards into one function as essential to driving cost reductions and driving operational improvements consistent with applicable law and administrative rule.

Both systems were built on, and still maintained with antiquated legacy technologies utilizing extensive custom code using development languages, tools and infrastructure which are well past the end of their product lifecycle. High turnover of the current support staff further increases the urgency of this project as replacement staff require increasing amounts of time to become familiar with the old architecture before reaching a level of sufficient competency to address issues.

In addition, the continued Operations and Maintenance (O & M) support of an aging, complex and highly customized system (by essentially the same vendor under different names) has led to an increased dependency on this single vendor. The current contract ends June 30, 2022.

Finally, OHA's 2015 Benefit Management System Technical Assessment Report noted that both systems are at the end of their lifecycles and continue to be supported with obsolete technologies. The report recommended implementing system upgrades in the short term and replacing the entire system as quickly as feasible to allow OEBB and PEBB to meet their statutory responsibilities.

2. What would this policy package buy and how and when would it be implemented?

This policy package is for the replacement of the antiquated MyOEBB and pebb.benefits (PDB) systems that currently require significant business resources to maintain. Processing of invoices, importing and exporting large amounts of data to/from external partners, mailing list generation, financial and accounting report generation, retroactive adjustments (to name a few), all of which would benefit greatly from automation.

At this time a full market analysis, including both state contracted technical vendors and external market providers specializing in the benefits management industry, is being completed with the results to be forwarded to the OEBB-PEBB executive steering leadership for consideration and selection of the best implementation strategy. The following solutions are being considered:

- Upgrade/enhance current OEBB/PEBB systems (including consolidation of core processes and reporting methods) by current support vendor.
- Incorporation of BMS reporting and management into the current WorkDay Human Resource Management platform.
- Outsourcing of operations and support to a third-party entity (e.g., Infrastructure as a Service (IaaS), Software as a Service (SaaS), Business Processes as a Service (BPaaS), External Service Provider / Integrator (ESP, ESI).
- Internal custom development and support of a state-funded, self-maintained software package and hardware platform (an "in-house" product).
- Development and release of a Request for Proposal (RFP) for competitive bidding by third-party entities able to fulfill business, technical and sustainability requirements of the State.
- Transfer/leverage solution already in use by another public sector organization in Oregon or another state.

The cost basis estimate for this proposal includes external service providers (including BMS integration, Operations & Maintenance services, Quality Control and Assurance oversight), and BMS product licensing. Gartner and InfoSys market analysis reports were also used to determine a median cost of BMS providers servicing states and large corporations in line with the size and demographics of our serviced population.

3. How does this policy package further OHA's mission and align with its strategic plan?

PEBB and OEBB goals are the same – provide a modernized, centralized, standardized, supportable, and scalable solution to replace both OEBB's and PEBB's benefit management systems for public employees, with the ability to accommodate the administrative and organizational changes subsequent to Senate Bill 1067 (2017), while implementing and maintaining more rigorous security best practices.

Alignment with the DHS / OHA Strategic Technology Plan (STP) Initiatives includes:

Business Automation

While the current Benefit Management System (BMS) solutions have provided significant efficiency gains, the multitude of options now available provide greater functionality and capability to further automate and streamline essential business processes, including support of dependent eligibility verification.

Dynamic Needs Supported by Seamless Technology Services

OEBB and PEBB's existing systems have been continuously enhanced to meet the needs of the member populations served, and the program staff responsible for overseeing benefits administration; replacement solutions provide for additional capabilities including modularity, agility, reusability, and incorporation of best practices in benefit administration.

Enables Connectivity Anytime, Anywhere, in Multiple Ways

The current solutions provide connection capability via multiple interfaces, but alternative solutions offer expanded capabilities to better meet member, staff, and partner needs through inclusion of mobile devices.

Trusted Source for Health & Human Service Data

The member information collected in the existing systems is organized in such a way as to allow searching and reporting capabilities, but lacks the ability to provide predictive analytics, which may be available with more modern solutions. The proper use of predictive analytics would allow for a strong improvement of customer service and support, reduce unnecessary insurance risks based on more reliable interpretation of provider data, assist in detecting possible fraud, enable better marketing and facilitation of currently available options as well as new, innovative wellness and healthcare options, all while helping strengthen accessibility to improved healthcare and meet the insurance expectations of a highly diverse population of clients and their families.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

OHA's 2015 Benefit Management System Technical Assessment Report noted that both systems are at the end of their lifecycles and continue to be supported with obsolete technologies. Vulnerabilities in security, operational support and sustainability were also highlighted in this report with a recommendation to modernize these systems as quickly as is possible.

Quantifying results

5. How will OHA measure the success of this policy package?

Success of this policy package will be validated by the following outcomes being met:

- Business process improvements and cost containment/recovery upon system implementation shall be quantitatively and measurably improved relative to their respective initial baseline measurement.
- System performance and reliability shall be measurably improved relative to their initial baseline measurement.
- Data integrity and security shall fully meet all state and federal Health Insurance Portability and Accountability Act (HIPPA), Producer Price Index (PPI) and Personally Identifiable Information (PII) security standards.
- Reports and notifications to both internal and external partners and customers shall be complete, correct, and verifiable against currently held account and personal information to ensure correctness and timeliness of distribution.
- Security access shall be verifiably controlled (by role access) and limited to the appropriate agency representatives.
- Disaster recover stand-up and on-line accessibility shall meet or exceed their currently observed level with 99.5 percent reliability and database management redundancy.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

This policy package is tied to Goal 3 of the PEBB business plan approved by PEBB's previous agency – the Department of Administrative Services: Efficient and Effective Government Infrastructure. The goal is to provide appropriate oversight and cost containment processes by maintaining and modifying enterprise processes for use by staff, agencies, universities, school districts and other entities and their covered employees.

This policy package is also tied directly to one of the objectives outlined in Senate Bill 1067 (2017). Section 26 directs the executive director to combine administrative functions and operations of the Public Employees' Benefit Board and the Oregon Educators Benefit Board to the greatest extent practicable to avoid duplication of effort and to promote efficiency, to the extent the combination of functions and operations is consistent with applicable law and administrative rule.

7. What are the long-term desired outcomes?

A new combined Benefit Management System (BMS) would allow OEBB and PEBB to modernize its members' and administrators' user experience. Among the top modernization goals:

- Ability to implement and maintain latest security best practices.
- Mobile app compatibility.
- Compatibility with commonly used browsers, operating systems and devices.
- Flexibility to make changes to accommodate business partners and customers.
- Expanded automated error checking and data validation.
- Availability of on-demand enrollment, and training tools for members and administrators.
- Self-service tools and features for members and administrators.

- Automated dependent eligibility verification among, and between OEBB and PEBB member groups.

In replacing the existing systems with a modernized, centralized, sustainable, and scalable benefits management solution it is anticipated the new system will provide features including, but are not limited to:

- Role-based access for internal OEBB and PEBB access, as well as for external groups including:
  - Plan carriers
  - Members
  - Entity administrators
  - Wellness vendors
  - Other state and local government agencies
- Compliance with federal and state security and privacy requirements.
- Reporting (e.g. canned, ad hoc, and self-service for carriers, entities, school districts, and other state agencies) .
- Contact management (e.g. comments, chat, integration with phone system, member profile, appeals, dependent eligibility verification, communications tracking, help desk ticketing, etc.)
- Online Help for OEBB and PEBB staff, members, carriers, and other vendors.
- Self-service administrative capabilities (e.g. OEBB and PEBB would have the ability to manage the history of changes to qualifying events, etc.)
- Expanded automated error checking / data validation.
- Compatibility with commonly used browsers, devices, mobile applications, and operating systems.
- Ability to import data into, and export data from solution, in multiple formats.
- Financial management including invoicing to entity-customers, individual subscribers, COBRA benefits administrator, and other third parties.
- Solution allows OEBB and PEBB to reconcile back to carrier payments.
- Notifications (e.g. COBRA, reminders for those who haven’t enrolled during open enrollment, and other required notices, etc.)

- Dependent eligibility verifications among, and between OEBB and PEBB member groups.
- Integrated appeals process.
- Open Enrollment support tools:
  - Plan comparison tool integrated into solution for OEBB and PEBB to show premium amounts, plan benefits, and other items required for Open Enrollment
  - Provider searches
  - Medical home searches
  - Health assessments
  - Premium quotes
- Trainings and webinars integrated into solution for OEBB and PEBB.
- Integrated reference pricing (information based on plan for services).

8. What would be the adverse effects of not funding this policy package?

OEBB and PEBB's BMS are not meeting all current business needs, which have grown since their original implementations in 2008 and 2003 respectively. Not prioritizing and supporting a replacement effort for the current OEBB-PEBB BMS system will result in the continued use of end-of-lifecycle technology that is fragmented, non-standard, difficult to support, and is not scalable. Approximately 300,000 covered lives would be at risk for benefits interruption if a replacement system is not identified and procured prior to the expiration of existing vendor support in 2022.

Additionally, the anticipated increase of personal customer information (including PPI and potentially protected health information (PHI)) being added to the two systems poses a risk to the state in the event of a data security breach. While the current systems have been fortified against data intruders as a result of the 2015 security review, penetration tools used by system intruders have become more and more sophisticated and may outstrip the security protocols supportable by the use of antiquated technologies.

9. What actions have occurred to resolve the issue prior to requesting a policy package?

PEBB and OEBB have sought advice from technical experts within the Oregon Office of Information Services (OIS) and Oregon Office of the State Chief Information Officer /Enterprise Information Services OSCIO/EIS. OEBB and PEBB have continued to contract, with little negotiating leverage due to the antiquated technologies involved, for maintenance and operations support to maintain basic system functions. OEBB and PEBB staff must either rule out or be very selective about enhancements to the systems as new functionality adds to the custom-made complexity of each system and could introduce new security risks.

In 2015, PEBB and OEBB contracted to have an in-depth security penetration test conducted to identify and help in addressing any discovered risks and issues. Recommendations proposed by the 2015 Benefit Management System Technical Assessment Report were followed, including implementing hardware and software system upgrades to remedy issues identified in the report, and to allow OEBB and PEBB to continue meeting their statutory responsibilities until the replacement solution could be implemented.

10. What alternatives were considered and what were the reasons for rejecting them?

Status quo was considered. However, the current OEBB and PEBB benefit management systems were built on antiquated legacy technology. OEBB-PEBB recently had an independent security assessment conducted. Future security assessments and remediation would be conducted biannually but the risk of a browser-based penetration attack is increased with the older technology.

Because of the custom nature of the systems, transition time related to contractor staff turnover puts programs more at risk as it takes new staff a much longer period of time to understand the systems well enough to address identified issues. The continued contractual relationship with the same vendor from the initial build to current maintenance and operations has resulted in an increased dependency on a handful of key knowledgeable individuals employed by the contractor due to the age, customization and complexity of the

systems. Transitioning to a new vendor could be both cumbersome and costly in terms of maintenance and operations. In addition, the architecture of the systems, implemented over a decade ago, relies on server side, data base driven procedures and modernization of current systems to accommodate newer technology and program goals would be costly.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

All the benefit and payroll processes of state agencies, universities, school districts, education service districts and community colleges would be impacted: either by benefiting from a new benefit management system or adversely impacted if the benefit systems were not maintained, maintenance costs increased substantially due to the reliance on a single vendor, or if the systems became no longer viable.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

None. OEBB and PEBB are in the planning stages and have received endorsements from the boards. Other agencies, programs, and stakeholders will be involved with any implementation of a new system.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

This policy package assumes equity of benefit enrollment and management services across geographic areas and demographically diverse populations (including First Nation and Native Peoples, People of Color (POC) LGBTQAI+, Aged and Infirmed, Developmentally Challenged and others) and ensuring those services are provided equitably to all (including considerations of vision/hearing impairment, language differences and alternative presentation formats) to enable and provide accessibility, support and delivery of benefits services to all subscribed customers and their families.

Additionally, Race, Ethnicity, Language and Disability (REAL D) Standards demographic data will be provided to carriers during the enrollment process, which grants healthcare providers better information in rendering services to OEBB and PEBB members, as well as their covered dependents. Strategic planning activities undertaken by both boards and their representatives will better allow OEBB and PEBB to include all stakeholders in the planning for the replacement, including the Equity and Inclusion Division.

Staffing and fiscal impact

Implementation date(s): July 1, 2021

End date (if applicable): _____

15. What assumptions affect the pricing of this policy package?

The cost basis estimate for this proposal includes external service providers (including BMS integration, O&M services, Quality Control and Assurance oversight), and BMS product licensing. Gartner and InfoSys market

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

analysis reports were also used to determine a median cost of BMS providers servicing states and large corporations in line with the size and demographics of our serviced population.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

No new responsibilities are assumed at this time, however it is possible there will be new responsibilities in the future depending on the final solution chosen.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No new responsibilities or impact on Shared Services is anticipated unless the option to internally develop and maintain a new system is chosen. This is not likely due to the current, and anticipated, lack of technical resources which can be recruited and assigned in a timely manner to the OEBB and PEBB organization.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No changes anticipated to caseload, both services are expected to be enhanced with better communications, mobile access, security management and customer support capabilities.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This project will be implemented with current staff. The staffing level will fluctuate between 4-12 (OEBB-PEBB) and from 2-4 (OIS) depending on the phase the project is in during development and delivery.

20. What are the start-up and one-time costs?

Initial development costs including license purchases, software/hardware/security management, a contracted strategic advisor and documentation tools are estimated to be $8.2 million.

21. What are the ongoing costs?

The ongoing costs of this policy package is for increased Operations and Maintenance (O & M) of the new system. The increased O & M are estimated to be $3.2 million per year. Costs will be based on industry standards. Costs and the timing of the transition from implementation to O & M will be dependent on the alternative chosen and subsequent contract negotiations. This policy package includes one year of O & M because it is assumed a portion of the population will "go live" with the new system in July 2022.

22. What are the potential savings?

Potential savings will be better known and realized after a new solution has been selected by the steering committee. It is anticipated, at a minimum, ongoing O & M costs will be lower due to retirement of technical debt, more agile response to business requests, reduced development and testing time plus consolidation and redesign of supporting business and technical processes. Potential savings likely will not be realized until several years after implementation.

If the current O & M contractor lost key staff due to turnover or if a security vulnerability was exposed in our outdated systems, the recovery costs would be very high. Avoidance of these potential costs through system replacement could yield significant potential savings.

23. What are the sources of funding and the funding split for each one?

Funding sources are Other Funds revenue from Administrative Fees assessed on PEBB and OEBB Core Benefits. The Administrative Fee is paid by members and state agencies through an assessment added to medical and insurance premiums and premium equivalents. A greater percentage is allocated to PEBB as it is assumed the BMS will be implemented and transition to O & M for PEBB before OEBB.

Oregon Health Authority
2021-23 Policy Package

Division:	Health Policy & Analytics
Program:	Office of Health Policy
Policy package title:	Oregon State Option & Coverage Stabilization
Policy package number:	427
Related legislation:	Legislative Concept 20

Summary statement:

This policy package would enable the Oregon Health Authority (OHA) to refine the details of health insurance reforms that would be intended to increase access to health insurance while reducing premiums paid by consumers, potentially through a public option or a "Medicaid buy-in" plan as envisioned by Senate Bill 770 (2019).

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE

Oregon Health Authority: 2021-23 Policy Package

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

Over the next two years, Health Policy and Analytics (HPA) expects to be responding to the enormous disruption of COVID -19 by adopting targeted policy and program changes that stabilize coverage and the health system overall and allow us to rebuild a more sustainable, equitable system for the longer term. While Oregon's uninsured rate had declined considerably as a result of the implementation of the Affordable Care Act, progress largely stalled in the years leading up to the pandemic, leaving approximately 6 percent of the state without health coverage pre-COVID-19.

COVID-19 and its aftereffects are likely to impact coverage cost and availability in ways yet to be determined. It will be important for OHA to report on the changes to coverage and reassess the options for addressing barriers to access, particularly for communities hard hit by structural and historical racism who are now bearing a disproportionate rate of infection with COVID-19. OHA has submitted legislative concept placeholder #20, with a relating clause of "health care" or "health insurance" to provide HPA with the authority to call for a report from the Oregon Health Policy Board in this critically important area. This policy package details the resources that would be needed to produce a report similar in scope to that produced for the public option report issued to comply with Senate Bill 770 (2019).

2. What would this policy package buy and how and when would it be implemented?

This policy package would enable OHA to refine the details of health insurance reforms that would be intended to increase access to health insurance while reducing premiums paid by consumers, potentially through a public option or a "Medicaid buy-in" plan as envisioned by Senate Bill 770 (2019). The term "public option" broadly refers to a health insurance plan set up or backed by a public entity (such as the state) while "Medicaid

buy-in" refers more specifically to a publicly available plan that uses the Medicaid infrastructure, such as the coordinated care organizations (CCOs).

3. How does this policy package further OHA's mission and align with its strategic plan?

This policy package would further OHA's mission as is relates to expanding health insurance coverage and access to health care services for Oregonians who are currently uninsured and help address affordability issues for those who currently have coverage. Additional policy development work enabled by this policy package would also allow OHA to focus efforts to design a public option program explicitly reduce health disparities and to invest in efforts to improve health equity. Additional policy development would enable OHA to more explicitly consider the equity challenges highlighted by COVID-19 pandemic and to refine initial proposals to prioritize health equity goals and reducing health disparities.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

OHA seeks to develop health coverage policy that increases health insurance coverage rates in Oregon while also increasing affordability for Oregon residents. Without further policy development in the wake of COVID-19, Oregon residents may lose health insurance coverage or face increased insurance premiums and deductibles.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

Yes, increases in coverage would impact all KPMs associated with diagnosis and treatment of illnesses and conditions, KPMs related to preventive care, and eventually those related to health status.

OHA performance measures would also be impacted, specifically outcome measures related to Outcome 1AOM7 - Improve Population Health, including quality of life, premature death, mortality from drug overdose, tobacco use and obesity.

7. What are the long-term desired outcomes?

The long-term desired outcome is to increase the percentage of Oregonians who have health insurance broadly but also to increase the ability of Oregon residents to use their insurance to obtain health care services when they are needed.

8. What would be the adverse effects of not funding this policy package?

Without adequate resources, OHA will not be able to invest staff time to develop forward-thinking health coverage policy that moves Oregon closer to achieving universal health insurance coverage and access to health care services.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

Prior to the COVID-19 crisis, OHA had been developing a report on the potential for a public option or Medicaid buy-in to increase health insurance coverage in Oregon along with access to health insurance

services. In the wake of COVID-19, additional policy development will be needed to address the forthcoming challenges that may not be readily apparent in the middle of the crisis.

10. What alternatives were considered and what were the reasons for rejecting them?

The COVID-19 emergency has caused OHA to re-examine policy proposals and to develop more timely policy ideas to address underlying health coverage challenges in a new, more uncertain environment.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

The policy development work does not require statutory changes, however there is an accompanying legislative concept to this policy package which is a placeholder to allow for legislation calling for a report to issue from the Oregon Health Policy Board.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

The goal of this policy package is to enable further analysis and development of health coverage policy that increases coverage and access to care. If this policy development is successful, local and tribal governments would benefit from having more residents with health coverage and access to health care services when they are needed.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

Staff and leadership from the Department of Consumer and Business Services (DCBS) has been working with OHA on the development of the report on a public option or Medicaid buy-in requested by Senate Bill 770.

Agency staff from DCBS would continue to participate in further policy development based on their role regulating health benefit plans and overseeing Oregon's health insurance marketplace.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

Increasing health insurance coverage and the affordability of health insurance and health care services would be of substantial benefit to Oregon residents who do not currently have health insurance coverage. Ongoing policy development work is underway to develop a public option or Medicaid buy-in in a way that advances health equity and increases affordability to communities currently unable to afford necessary health care services.

Staffing and fiscal impact

Implementation date(s): To be determined

End date (if applicable): To be determined

15. What assumptions affect the pricing of this policy package?

There is significant uncertainty related to the impact of COVID-19 on health insurance carriers, health care providers, and consumers.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

Policy development in the Office of Health Policy would be necessary to evaluate the needs of the health care system and Oregonians in the wake of the COVID crisis.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

To be determined based on policy choices.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

Policy development could be carried out by existing staff in conjunction with outside consultants or by new full time staff.

20. What are the start-up and one-time costs?

This policy package includes funds for consulting work to build on policy development work associated with Senate Bill 770 to develop plans for a public option or "Medicaid buy-in" program.

21. What are the ongoing costs?

None are included in this policy package; however future policy decisions could necessitate ongoing resources.

22. What are the potential savings?

To be determined based on policy decisions.

23. What are the sources of funding and the funding split for each one?

General Fund only. There is a possibility some or all of this work could receive federal Medicaid matching funds at the administrative rate of 50 percent state funds and 50 percent Federal Funds.

Oregon Health Authority
2021-23 Policy Package

Division:	Public Health Division
Program:	Office of the State Public Health Director
Policy package title:	State Support for Public Health
Policy package number:	428
Related legislation:	None

Summary statement:

State Support for Public Health (SSPH) provides local public health authorities (LPHAs) with basic capacity for communicable disease control investigation and response for diseases. In the 2015-17 biennium, General Fund for SSPH was converted to fee revenue from the Oregon Medical Marijuana Program (OMMP). OMMP fee revenue has steadily declined and current revenue cannot sustain expenses in the program and fund the SSPH. This policy package requests General Fund replace OMMP fee revenue so that basic communicable disease capacity can be maintained across LPHAs. Not funding this risks the loss of LPHA communicable disease nursing and other staff that provide the infrastructure for Oregon's ability to respond locally to threats, including COVID-19. The loss of these staff can mean the quick spread of communicable diseases that otherwise could be contained through traditional public health investigation and control measures. The impacts of these types of cuts to public health programs would have a disproportionate impact on communities of color and low-income communities.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$1,495,538**	**$(1,495,538)**	**$0**	**$0**	**0**	**0.00**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

This policy package replaces Oregon Medical Marijuana Program (OMMP) fee revenue liability with General Fund for the State Support for Public Health (SSPH) program. In the 2015-17 biennium, General Fund for SSPH was converted to fee revenue from OMMP. In the 2019 legislative session, policy package 417 transferred $5,480,601 from OMMP fees to General Fund, leaving $1,495,538 remaining as an obligation for SSPH to be funded with OMMP fees for the 2019-21 biennium. OMMP fee revenue has steadily declined and current revenue cannot sustain expenses in the program and fund the SSPH. SSPH provides basic communicable disease capacity through a per capita funding formula to local public health authorities. With patient numbers lower than 2012 and fee revenues declining monthly, OMMP does not have the revenue to replace the $1,495,538 needed to fully fund SSPH. OMMP is currently projected to have a negative ending balance/shortfall of $560,000 by the end of the 2019-21 biennium.

2. What would this policy package buy and how and when would it be implemented?

SSPH provides basic capacity to all LPHAs to report, investigate and respond to cases and outbreaks of communicable diseases, including measles, tuberculosis, Hepatitis A and B, pertussis, E. Coli, listeriosis, HIV, chlamydia, syphilis and gonorrhea. These funds support communicable disease nurses and other staff that are specially trained to conduct communicable disease investigation and response in accordance with OHA investigative guidelines. These funds contribute to the LPHA's ability to meet statutory requirements related to communicable disease control.

This policy package would continue the funding of these critical functions.

3. How does this policy package further OHA's mission and align with its strategic plan?

Communicable diseases disproportionately impact communities of color and can lead to death and disability if not quickly controlled. The international COVID-19 pandemic is an example of how quickly a novel communicable disease can cause death, disability and long-lasting economic hardship with a disproportionate impact on communities most impacted by systemic racism and oppression. The COVID-19 pandemic also illustrates the importance of a strong governmental public health infrastructure to quickly identify the spread of communicable disease trends and apply public health science and best practices to control infections. SSPH provides some of the basic capacity that has allowed Oregon's public health system to quickly stem the spread of COVID-19. LPHA staff that are funded by SSPH have been used to respond to COVID-19 while maintaining responsibilities for other communicable diseases.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

OHA would measure the success of this package through achievement of public health accountability measures for communicable disease control, including incidence of gonorrhea and two-year old immunization rates.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

This policy package supports OHA performance system measures including:

- Health indicator reporting

- REAL-D implementation
- Timeliness of translations during emerging public health events

7. What are the long-term desired outcomes?

Long-term desired outcomes for this policy package are sustainable basic capacity for communicable disease control across all LPHAs and an ability to respond in a timely manner to communicable disease threats.

8. What would be the adverse effects of not funding this policy package?

Not funding this policy package risks the loss of LPHA communicable disease nursing and other communicable disease staff that provide the infrastructure for Oregon's ability to respond locally to threats, including COVID-19. The loss of these staff can mean the quick spread of communicable diseases that otherwise could be contained through traditional public health investigation and control measures. The impacts of these types of cuts to public health programs would have a disproportionate impact on communities of color and low-income communities.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

OHA does not have another federal or other fund sources to cover the cost of the remaining OMMP fee liability to SSPH. In the January 2020 rebalance, OHA requested the replacement of OMMP Other Funds revenue to General Fund to support SSPH. As the 2020 legislative session ended early, this request was not addressed.

10. What alternatives were considered and what were the reasons for rejecting them?

OHA could continue to allocate OMMP fee revenue to SSPH, however, the OMMP fee revenue declines monthly with patient load lower than 2012. At the end of the 2019-21 biennium, the OMMP fee account is projected to have a negative ending balance/shortfall of $560,000.

OHA could reduce funding to support SSPH which risks basic communicable disease prevention in the state.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

If not funded, local governments would be forced to redirect or cut LPHA staff currently funded by SSPH.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

Coalition of Local Health Officials (CLHO).

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

This policy package retains basic communicable disease capacity within LPHAs so that diseases can be reported, investigated and responded to quickly before they spread and cause disproportionate health burden on populations most impacted by health inequities. A primary example is with tuberculosis, which primarily impacts foreign-born individuals. LPHA staff are able to utilize these funds for tuberculosis control. Another example are sexually transmitted infections, which disproportionately impact populations impacted by health inequities. LPHAs can utilize SSPH to support their communicable disease staff working to prevent and treat these infections.

Staffing and fiscal impact

Implementation date(s): July 1, 2021

End date (if applicable): None

15. What assumptions affect the pricing of this policy package?

This policy package requesting General Fund is based on the remaining OMMP fee liability to keep the SSPH investment whole.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

There will not be any new responsibilities for OHA. These funds are administered and overseen by OHA staff paid by other sources.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

There will not be any new responsibilities for Shared Services.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

There will not be any changes to client caseloads or services.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

There are no new staff requested to implement this policy package. It would be managed by existing OHA staff paid by other sources.

20. What are the start-up and one-time costs?

There are no start-up or one-time costs.

21. What are the ongoing costs?

The ongoing cost is the ongoing investment in LPHAs for SSPH.

22. What are the potential savings?

There are potential savings to Medicaid, PEBB and OEBB through reduced health care costs when communicable diseases are avoided or treated early before more serious health issues arise.

23. What are the sources of funding and the funding split for each one?

General Fund and a reduction in Other Funds limitation.

Total for this policy package

Oregon Health Authority
2021-23 Policy Package

Division:	Health Policy & Analytics
Program:	Transformation Center
Policy package title:	Statewide Value-based Payment Adoption, Alignment, and Infrastructure
Policy package number:	429
Related legislation:	Legislative Concept #25

Summary statement:

To leverage the Oregon Health Authority's (OHA) leadership role in establishing a statewide value-based payment (VBP) roadmap and requisite technical assistance infrastructure to support increased adoption and alignment of VBP across Oregon.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$946,781**	**$0**	**$605,319**	**$1,552,100**	**1**	**0.88**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

The move from a predominantly fee-for-service (FFS) payment system to one based on value using value-based payment (VBP)—which supports more holistic, patient-centered care—is a priority across Oregon's health systems, including within Medicaid, the Oregon Educators' Benefits Board (OEBB), Public Employees Benefits Board (PEBB), and commercial payers. In fact, the importance of VBP has become increasingly evident during the COVID-19 crisis, as clinics that rely on FFS struggle with financial viability due to decreased visit volume. In the coming years, OHA will be focused on rebuilding the health system, post COVID-19, while simultaneously working toward our long-term health system reform goals, including VBP.

While there existed a need for a statewide leadership on VBP prior to the COVID-19 pandemic, the crisis has amplified the need for VBP leadership. Much of the state's VBP work is fragmented and uncoordinated. Oregon lacks a cohesive statewide VBP vision, set of strategies, and supportive infrastructure, thereby creating risk for provider burnout, clinic unsustainability, and ineffective approaches that fail to contribute to OHA's health system goals.

2. What would this policy package buy and how and when would it be implemented?

The solution is for OHA to play a leadership role in in ensuring successful VBP adoption and alignment across all markets by convening a statewide, multi-stakeholder VBP Advisory Committee that would develop an Oregon VBP Roadmap, which would include (1) statewide VBP targets and expectations for VBP alignment across all payers and providers; (2) supporting statewide VBP infrastructure, including statewide, data-driven technical assistance (TA) for payers and providers, identification of VBP models for statewide adoption, and evaluation of VBP model effectiveness; and (3) recommendations for resourcing the infrastructure over the longer term.

Resources would be needed to develop a VBP infrastructure during the initial rollout of the VBP Roadmap (before long-term resourcing has been secured) via contracts in the following areas:

- TA: Contractor(s) would develop and provide a robust system of TA to payers, health systems, and providers, ranging from VBP contracting to practice transformation associated with VBP adoption.
- Research and analysis: Contractor(s) would oversee VBP model evaluation and identify VBP models for statewide adoption.

In addition, one new OPA 4 position will be needed to:

- Staff the VBP Advisory Committee.
- Oversee and closely monitor the multiple contracts identified above.

3. How does this policy package further OHA's mission and align with its strategic plan?

This policy package would support development and implementation of an Oregon VBP Roadmap, which would ensure increased adoption and alignment of VBP across Oregon's health delivery system, leading to a more sustainable delivery system. This would, in turn, help further OHA's mission of "a healthy Oregon" through supporting the triple aim—improved health, better care, and lower costs for Oregonians—by promoting higher quality care as a result of (a) tracking of metrics tied to care delivery, and (b) giving providers increased flexibility to provide holistic, patient-centered care.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

Success of this policy package would be measured as follows:

- Development of a statewide VBP Roadmap by January 1, 2022 that is ultimately adopted by all payers across the state and includes VBP targets, expectations for VBP model implementation alignment, and a timeline for adoption.
- Creation of an infrastructure to support VBP adoption and alignment, including statewide, data-driven TA for payers and providers, VBP models required for statewide adoption, and an evaluation of VBP model effectiveness.
- Recommendations for, and endorsement by, all VBP Advisory Committee members, as codified within the VBP Roadmap, for resourcing the VBP infrastructure beyond the biennium.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

This policy package is linked to the following areas in OHA's performance system:

- Key goals of "better health," "lower care," and "lower costs"
- Outcome Measure 8, "improve quality care"
- Core Process (OP 4), "purchasing for health care value"

7. What are the long-term desired outcomes?

Increasing adoption of VBP, and incorporating models that have been proven effective, would lead to the following long-term outcomes:

- Financial sustainability of health system providers as a result of consistent payment which is divorced from patient visits and services volume.
- Improved patient care and patient outcomes, due to the increased flexibility in care provision associated with VBP.
- Decreased provider burnout due to alignment of VBP payment models and metrics.

8. What would be the adverse effects of not funding this policy package?

- Adoption of VBP will be slowed, continuing the inefficient use of FFS and preventing the sustainable funding approach so needed for health system recovery and sustainability, post-COVID.
- There will be minimal alignment of VBP requirements, including metrics, which creates further system inefficiencies and puts additional stress on providers.
- Patients will not benefit from the holistic, patient-centered care supported via the flexibility afforded by VBP.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

The activity to increase adoption and alignment of VBP across Oregon have thus far been piecemeal. For example, the Primary Care Payment Reform Collaborative, established through Senate Bill 231 (2015) and Senate Bill 934 (2017), was established to increase VBP adoption and alignment, but is only focused on primary care. In addition, VBP targets established through CCO 2.0 only focus on Medicaid. In order to realize statewide impacts of VBP, stakeholders representing all facets of the health system, including all payers, hospitals, specialists, behavioral health, and primary care must collaboratively develop expectations through a VBP roadmap.

10. What alternatives were considered and what were the reasons for rejecting them?

The alternative would be to support statewide VBP adoption and alignment with current staff; however, given other demands on OHA's VBP work related to CCO 2.0, this is not possible. Further, resources for funding statewide VBP infrastructure are not available.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

Section 2, Chapter 575, Oregon Laws 2015 may need to be modified to adjust and expand the requirements for the Primary Care Payment Reform Collaborative, making it applicable to all payers and for all service areas.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

VBPs can result in higher-quality care, leading to a healthier population that requires fewer health and social service resources over the long term. Thus, the decrease in costs that can result from greater use of VBP can lead to lower state health and tribal program budgets, meaning additional resources may be available for other governmental programs as well as tribal agencies throughout Oregon.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

This policy package would require collaboration with the various VBP adoption efforts currently occurring across the state, including those within PEBB, OEBB, the Department of Consumer and Business Services, and the Oregon Health Leadership Council.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

VBPs can cause unintended consequences on equity by incentivizing providers to limit care provision to patients who have relatively challenging health needs, since some VBP models hold providers to a fixed budget. Conversely, VBPs can support equitable health outcomes due to the flexibility associated with some VBP models which allows for providers such as traditional health workers (i.e., doulas or community health workers), which have been associated with addressing health disparities, to be more easily incorporated into standard care delivery approaches.

Staffing and fiscal impact

Implementation date(s): July 1, 2021

End date (if applicable): Not applicable.

15. What assumptions affect the pricing of this policy package?

The full-time Operations and Policy Analyst 4 position is needed for the first biennium to launch the VBP Advisory Committee and manage the various VBP infrastructure contracts identified above. After that, the contracts should be funded through other sources, but the OPA 4 would be needed to manage the contracts as well as the VBP Advisory Committee.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

Standing up and staffing a statewide VBP Advisory Committee and overseeing contracts required for a statewide VBP infrastructure would be a new responsibility for OHA.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

One permanent, full-time position would be needed to implement this policy package.

20. What are the start-up and one-time costs?

The statewide VBP infrastructure (i.e., TA and research and/or analysis contracts) would be start-up costs over one biennium; the VBP Advisory Committee would develop recommendations for long-term resourcing of the VBP infrastructure.

21. What are the ongoing costs?

The Operations and Policy Analyst 4 position would be an ongoing cost.

22. What are the potential savings?

Increased use of VBP can result in decreased costs for both OHA (in the Oregon Health Plan, OEBB, and PEBB) and commercial health systems across the state. For example, Tennessee Medicaid's episode-based payment strategy reduced perinatal costs by 3.4 percent, or almost $5 million, over the first year of implementation.

OHA may realize long-term savings in OHP expenditures due to more cost-effective, high-quality care being delivered to OHP members. To the extent savings occur, they will be reflected in subsequent years' CCO rates, which are based on past expenditures, and incorporated into OHA's budget as part of the capitation rates for CCO-enrolled OHP members.

23. What are the sources of funding and the funding split for each one?

This package includes 61 percent General Fund and 39 percent Federal Funds from Medicaid match.

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE

Oregon Health Authority
2021-23 Policy Package

Division:	Public Health Division
Program:	Health Security, Preparedness and Response
Policy package title:	PPE & Medical Supply for State Inventory Reserve (SIR)
Policy package number:	430
Related legislation:	To be determined

Summary statement:

OHA would lead an effort to develop a coordinated and effectively managed State Inventory Reserve (SIR) of personal protective equipment (PPE) and medical supplies to ensure Oregon is equipped to respond to future public health crises.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$60,635,821**	**$0**	**$0**	**$60,635,821**	**1**	**0.75**

Purpose

1. **Why does OHA propose this policy package and what issue is OHA trying to fix or solve?**

   Recent supply chain challenges that resulted from the COVID-19 pandemic illustrate the need for a more robust strategy as it relates to the Oregon's PPE and Medical supply State Inventory Reserve (SIR). Without adequate acquisition and management of SIR resources, Oregonians are at risk. This package would ensure Oregon would be equipped with necessary PPE and supplies to address critical medical needs in the face of future emergencies or imminent threats such as a resurgence of COVID-19. Oregon also sees equitable access to PPE as a key element that must be addressed when considering our ability to respond to future public health threats and crises.

2. **What would this policy package buy and how and when would it be implemented?**

   It is critical to have an adequate and effectively managed SIR that serves Oregonian's essential needs in the face of future threats to the public's health. Working with existing state agency partners, hospital systems, and other large health systems, OHA would coordinate a SIR management solution that ensures acquisition of acceptable and vetted PPE and supplies, and ensures the inventory is rotated to prevent expiration. This policy package would establish all needed resources to order and manage controlled medical supplies within the OHA. The OHA and other partners would establish plans to ensure the health needs of populations that have historically suffered health disparities and inequities are appropriately prioritized.

   OHA, in coordination with the Department of Administrative Services (DAS), the Office of Emergency Management (OEM), and other key agencies, would work together to establish an effective SIR management solution that leverages regional health and hospital system partnerships. This resource would be implemented over the first 12 months with engagement of partners within the first 60 days.

3. How does this policy package further OHA's mission and align with its strategic plan?

Having an effectively managed and sufficient SIR of PPE and medical supplies aligns with helping people and communities achieve optimum physical, mental and social well-being in the face of public health crises. Having adequate PPE and medical supplies in the face of a public health emergency aligns with the agency's overall guiding principle of maintaining access to appropriate care. Furthermore, a collaborative approach to managing the SIR leverages another guiding principle of engaging in collaborative partnerships achieving more together.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

Oregon would be better prepared to support first responders, health care providers, and other key personnel that respond to future public health crises, which would give Oregon time to adapt to supply chain challenges.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

No.

7. What are the long-term desired outcomes?

The desired outcome is to establish and maintain a preparedness resource that delivers adequate supplies and PPE for all future events.

8. What would be the adverse effects of not funding this policy package?

Without key PPE and medical supplies during a statewide response, Oregonians on the frontlines would face the challenge without adequate protection. The absence of adequate supplies translates to Oregon's first responders, health care providers, and other key personnel being exposed and/or infected and undermines the state's response.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

State agencies and partners have been reacting and responding to the many shortages and supply chain challenges. In the effort to address the COVID-19 pandemic, opportunities have been uncovered that should be seized via this policy package to improve Oregon's ability to respond in the face of future public health threats.

10. What alternatives were considered and what were the reasons for rejecting them?

No alternatives are plausible. Contracting with private enterprise such as a wholesaler would not improve Oregon's position if a future public health event threatens the supply chain. It is likely a wholesaler may not adequately hold SIR sufficient for the state and allocations would limit the contractor's ability to respond.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

There may be a need to develop statute regarding OHA's ability to order and maintain stock of FDA regulated items, particularly medical supplies that have associated medications.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Tribes, Counties, and cities all are impacted by having access to adequate PPE and supplies. It is critical that OHA and other agencies are working collaboratively to ensure key responders are adequately equipped to minimize the negative health impacts to them and the Oregonians they serve.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

We should be working with DAS, OEM, DOC and large health systems.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

This policy package pays particular attention to populations historically impacted by health disparities and inequities. This policy calls out the need to develop a response and plan to address the needs of these specific populations.

Staffing and fiscal impact

Implementation date(s): July 1, 2021

End date (if applicable): Ongoing

15. What assumptions affect the pricing of this policy package?

Size of the reserve, ability and/or need to rotate the inventory.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

OHA would have an expanded role and responsibilities as it relates to coordinating the management of the SIR with other agencies and partners.

PHD, Health Security, Preparedness and Response (HSPR) would likely be best suited to take on the role of managing and maintaining this program and SIR. Close coordination with DAS procurement as well as other agency partners and health system partners would be required.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

There could be an impact on Shared Services if they were needed to transport and store inventory.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

Health systems and state agencies would have access to the SIR.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This policy package requests one permanent, full-time Operations and Policy Analyst 4 position to oversee partnerships, coordinate procurement across all agencies to ensure rotation of SIR inventory and establish supply chain relationships. This position would also be responsible for overseeing the health equity and disparity mitigation strategies as it relates to supporting these populations in crises.

20. What are the start-up and one-time costs?

The largest ongoing cost would be the initial procurement of the physical PPE and medical supplies ($60.6 million). OHA would need to establish some physical infrastructure to warehouse SIR and assist with SIR rotation with partners.

21. What are the ongoing costs?

The largest ongoing cost would be the annual procurement of approximately 10 percent of the physical PPE and medical supplies. The stock rotated out of the stockpile each year would be purchased from the state only at the cost of processing it (not at replacement cost). A software solution that interfaces with DAS, other agencies and partners would also be required for the OHA to sufficiently manage SIR and rotation of inventory ($200,000). Warehouse and transport costs ($2.6 million). Staffing would be a small ongoing cost.

22. What are the potential savings?

Providing an adequate strategy for responding to public health threats protects Oregon from the cost of treating and managing adverse health outcomes.

23. What are the sources of funding and the funding split for each one?

This policy package is General Fund only; however, Public Health would investigate whether Federal matching funds or grants could offset some of the costs.

The pricing model was based on minimum, steady state and active phase reserve levels. This policy package is priced at the steady state inventory reserve to provide the level of inventory the state should maintain.

	Active Phase Inventory Targets	Steady state Inventory Reserve Target	Minimum reserve level
Gloves	10,000,000	6,500,000	3,500,000
N95 Respirator	6,500,000	4,000,000	2,000,000
Procedural Masks	6,000,000	4,000,000	2,000,000
Gowns	3,000,000	2,000,000	1,000,000
Face Shields	550,000	300,000	150,000

The active phase becomes the target inventory level during an event and proclamation of a public health emergency. The steady state is the standard inventory level target. The minimum level is the inventory we should always maintain and if inventory goes to that level, it would trigger an all-out effort to regain the steady state targets in the respective category.

Oregon Health Authority
2021-23 Policy Package

Division:	Health Systems Division
Program:	Behavioral Health
Policy package title:	Substance Use Disorder 1115 Waiver State Plan Amendment
Policy package number:	431
Related legislation:	None

Summary statement:

Oregon has submitted a substance use disorder (SUD) 1115 Waiver and will shortly submit a state plan amendment (SPA) to the Centers for Medicare & Medicaid Services (CMS) to support an enhanced full continuum of care delivery system for individuals with SUD. If the waiver and corresponding SPA are approved, the Oregon Health Authority (OHA) would be able to utilize additional Medicaid dollars to pay for residential treatment for more Oregonians with SUD. If approved, this would provide the supports needed to prevent and treat SUD and sustain long-term recovery, including crisis intervention, peer support services, outreach and education to help individuals in recovery find and keep housing. This policy package would staff the SUD waiver implementation and would provide funds to contract for an evaluation to measure the effectiveness of the implementation process and waiver at creating desired outcomes.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$31,511,910**	**$0**	**$166,509,066**	**$198,020,976**	**1**	**1.00**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

Substance use disorder (SUD) is a chronic health condition that requires long-term comprehensive care and support. Oregon's current Medicaid SUD treatment system faces significant barriers to providing the services Oregonians need due to limitations put in place through federal regulations:

- Medicaid funds cannot be used to pay for residential treatment provided in facilities with more than 16 beds. A majority of Oregon's residential treatment facilities have more than 16 beds. Oregon pays for services in these residential treatment facilities with General Fund dollars.
- Medicaid only allows for treatment; however, an effective and comprehensive SUD system requires prevention, outreach, treatment and ongoing maintenance and support.

These limitations are restricting the number of Oregonians who can access the help they need, when they need it. The lack of comprehensive supports is creating unnecessary suffering, increasing emergency department use and hospitalizations, which further burdens the treatment system. Emergency department and hospitalizations related to SUD cost Oregon nearly $13 million in 2017 and 2018.

Often the burden of implementing equity, diversity and inclusion strategies in health systems falls on the shoulders of those who belong to historically marginalized communities. Oregon is committed to ensuring that advancing racial and health equity in the system becomes a collaboration of all regions and sectors in the state, including tribal governments. This waiver provides a unique opportunity to support health equity by increasing recovery supports and other critical services such as crisis intervention to individuals disproportionately affected by substance use within historically marginalized communities. Expanding the spectrum of covered substance use disorder services is an important part of treating the "whole person", a treatment paradigm that is compatible with culturally specific services.

COVID-19 has brought an increased strain on Oregonian's behavioral health. Underlying health conditions, homelessness, and inconsistent access to the health system leave many with behavioral health issues particularly vulnerable to the economic, health and health system impacts of COVID-19. additionally, social isolation and financial instability could trigger worsening symptoms or crises. The needs for those using substances are anticipated to become even greater as we move through the ever-evolving situation. This waiver will ease the pressure placed on the substance use system by providing critical services to address gaps and provide long term support to those in recovery. By expanding the access to these critical services and recovery supports, we anticipate individuals will have access to appropriate levels of care; reducing need for repeat visits to higher levels of care and increasing the support available to assist with housing security and maintain recovery.

Oregon has submitted a SUD 1115 Waiver and will shortly submit a state plan amendment (SPA) to the Centers for Medicare & Medicaid Services (CMS) to support an enhanced full continuum of care delivery system for individuals with SUD. If the waiver and corresponding SPA are approved, the Oregon Health Authority (OHA) would be able to utilize additional Medicaid dollars to pay for residential treatment for more Oregonians with SUD. If approved, this would provide the supports needed to prevent SUD and sustain long-term recovery, including crisis intervention, peer support services, outreach and education to help individuals in recovery find and keep housing.

2. What would this policy package buy and how and when would it be implemented?

This policy package would purchase one full time staff for the Health Systems Division to lead the implementation of the SUD waiver. The SUD 1115 Waiver Application process is currently being managed by staff borrowed from other positions. This means the work normally assigned to these staff has been temporarily put on hold and must be resumed. Demand on Medicaid and Behavioral Health staff has increased as OHA responds to the COVID-19 pandemic; staff working on the waiver do not have capacity to implement the

waiver demonstration once the application is approved. Implementation of the waiver demonstration will require one full-time position to manage the varying components to the implementation, including working across the agency internally and with external partners including coordinated care organizations (CCO), SUD treatment providers, recovery service providers and advocates, and Peer Run Organizations. If we do not receive authority for this position, we risk not fulfilling the waiver demonstration requirements, repayment of funds, and the inability to receive federal match and/or increased federal match for services provided at an institution for mental disease (IMD). This could negatively impact Oregon's ability to provide adequate services to those in need.

This implementation would require Medicaid rule change and updates. This would include 90 days for tribal consultation, time frames for rules advisory committee, and a 30-day public comment period.

This policy package requests funding for:

- Contracting with an external partner to provide CMS-required evaluation design and reporting requirements to gain approval for the Waiver demonstration project.
- One permanent, full-time SUD 1115 Waiver Coordinator (Operations and Policy Analyst 3) within the Health Systems Division (HSD) to support the success of these activities. This position would serve as the program lead and manager and would be responsible for overseeing the implementation of the SUD 1115 Waiver Demonstration SPA and implementation plan ensuring compliance with all requirements including reporting internally and externally.
- Beginning July 1, 2021 FFS and CCOs would begin rate increases on select services such as residential and methadone administration services in addition to the increase in new services to create a full continuum of care of care to those with substance use disorder. In alignment with the Mental Health Parity and Addiction Equity Act of 2008, which requires insurers and group plans to provide the same level of benefits for mental and substance use treatment and services that they for medical/surgical care. This

package would expand services and treatments in behavioral health and addictions services to reflect the needs of the community. Parity of services is a priority, through this policy package services currently only available for mental health would be available for those with substance use services such as case management, skill restoration and crisis intervention.

- Beginning July 1, 2021 recovery support services only available during treatment would be expanded to provide support pre and post treatment as needed. This would provide supports to those pre and post treatment and will assist in sustaining long-term recovery.
- By July 2022 to continue supporting those in long term recovery a new OHP provider type would be created (Peer Run Organizations). This would allow current and future Peer Run Organizations the option to provide OHP members with recovery supports. This would increase the capacity of the recovery support system to expand the access of those with SUD to receive the support needed to sustain long-term recovery outside of traditional treatment.

3. How does this policy package further OHA's mission and align with its strategic plan?

This policy package aligns with the Governor's policy priorities and executive order declaring addiction and substance use a public health crisis in the state of Oregon. The declaration aims at raising public awareness about the challenges the state faces in dealing with SUD, along with prevention, treatment, and recovery to turn the tide on the opioid epidemic.

This policy package aligns with OHA's strategic plan though the creation of healthier environments for Medicaid members with SUDs. Building a full continuum of care promotes health equity, reduces comorbidity in health and psychopathology, and aligns with state and federal policies for public health modernization and would support the long-term recovery of Oregonians.

This policy package is supportive of OHA's commitment to eliminate health disparities in Oregon by 2030, as people of color and other minority populations are disproportionately impacted by the effects of substance misuse.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

Success would be measured by the increase in services and decrease in cost demonstrating quality improvement across the full continuum of care for those with substance use and ensuring the system has an increase in capacity for services. It would also assist with cross education, knowledge level increase and partnerships with behavioral health and Medicaid/physical health professionals related to substance use awareness and identification and referral leading to better integration of services within the behavioral health system and guaranteeing we are treating the "whole" individual with no wrong door entry into services whether through prevention, treatment or recovery supports.

Oregon has developed a draft evaluation plan to be submitted and approved by CMS. Upon approval of the demonstration and evaluation plan, an independent party would be contracted to conduct an evaluation of the demonstration to ensure the collection and analysis of the demonstration. This evaluation would be done independently and in alignment with the CMS-approved, draft evaluation design. Every effort would be made to follow the design when conducting analyses, evaluations and reporting. Some of the metrics to be measured will be; shorter duration between screening and treatment, reduced SUD readmissions to hospital at same or

higher level of care and coordinated care transitions between levels of care. Intended outcomes are: Improved member quality ratings, increased treatment engagement, and decreased fatal and non-fatal overdoses.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

This policy package aligns with the legislative Key Performance Measures (KPM), Initiation of Alcohol and Other Drug Dependence Treatment- which is measuring the percentage of members with a new episode of alcohol or other drug dependence who received initiation of AOD treatment within 14 days of diagnosis. With the expansion of services serving those with substance disorder, especially the early and brief intervention, it is anticipated individuals would be able to use, engage and receive services earlier supporting long-term recovery and reducing the number of new episodes of alcohol or other drug dependence.

7. What are the long-term desired outcomes?

The development of the full continuum of care for those with substance use disorder would increase access and expand needed services before, during and post treatment. Increased access enhances the current SUD benefit packages covered by CCOs. As a result of activities described in the 1115 SUD waiver and SPA, OHA anticipates:

- Reductions in the number of individuals with mental disorders and shorter life expectancies resulting from lack of SUD treatment.
- Establishment of an optional statewide SUD-specific Performance Improvement Project.
- Increased access to supports for housing and skills needed to sustain sobriety.
- Increased access to services outside of substance treatment for those most vulnerable to relapse.
- Reductions in overdose and overdose deaths due to opioids.
- Reduced utilization of emergency room departments and inpatient hospital settings for SUD treatment.

- Improved access to care for outreach, initiation, treatment and recovery.
- Expanded access for those in need of long-term recovery supports.

The SUD 1115 Waiver and SPA presents a unique ability for health reform. It creates a full continuum of care where health disparities may be addressed for individuals with SUDs through enhanced services such as early intervention and recovery support services. SUD services would be delivered in a seamless and integrated manner, while meeting the Triple Aim objectives of better health, better care, and lower costs.

8. What would be the adverse effects of not funding this policy package?

Without funding for this policy package, OHA risks not fulfilling the demonstration requirements. This could affect Oregon's ability to provide adequate services to those who need them. If Oregon is unable to fulfill demonstration requirements OHA could be required to repay federal funds and/or not be able to receive federal matching funds or increased federal match for services currently funded with General Fund.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

Over the last several years, OHA has been exploring opportunities to enhance and improve the state's provider delivery system for SUD treatment. The goal is to address the growing opioid crisis and provide a robust person-centered approach that supports long-term recovery with a full continuum of care for individuals with SUD. Oregon is transforming its SUD delivery system by creating a full continuum of care, improving access and utilization of high-quality treatment, increasing rates of identification and engagement in treatment, reducing recurrent visits to equal or higher levels of care including ED and inpatient admissions related to substance use, and improving the quality of care and population outcomes for individuals with SUD. Recent efforts include:

- Coverage of peer-delivered services as part of the OHP benefits package.
- Working with the nine federally recognized tribes of Oregon and the Urban Indian Health Program to identify mechanisms to help ensure tribal health care objectives are achieved while respectfully honoring Tribal Based Practices, which may be reimbursed by the Oregon Health Plan.
- Implementation of block grant funds and SAMHSA Medication Assisted Treatment-Prescription Drug and Opioid Addiction (MAT-PDOA); State Targeted Response (STR) and the State Opioid Response (SOR) grants to provide support and funding for prevention, treatment and recovery.
- Amending Oregon administrative rules and Medicaid rules to require licensed and certified providers to offer MAT services.

10. What alternatives were considered and what were the reasons for rejecting them?

The alternative is to continue to pay General Fund for these services. Currently residential services provided in an IMD for SUD are paid with state General Fund, because Oregon recognizes the necessity of these services for those with substance use disorder.

The Medicaid IMD exclusion prohibits the use of federal Medicaid financing for care provided to most patients in mental health and substance use disorder residential treatment facilities larger than 16 beds. The exclusion is one of the very few areas where Medicaid law prohibits the use of federal financial participation (FFP) for medically necessary care furnished by licensed medical professionals to enrollees based on the health care setting providing the services. The exclusion applies to all OHP beneficiaries under age 65 who are patients in an IMD, except for payments for inpatient psychiatric services provided to beneficiaries under age 21 and has long been a barrier to efforts to use Medicaid to provide nonhospital inpatient behavioral health services.

The only option available to receive FFP for services provided within an IMD is to apply for an 1115 Waiver. Receiving this waiver and the FFP would provide an opportunity to expand access to critical services that are

currently limited due to the sole use of General Fund dollars to provide this service. It is required to meet certain milestones to apply for the waiver, these milestones are included within the full continuum of care.

In addition to receiving the IMD waiver, providing a full continuum of care would allow individuals to receive the level of care needed before higher levels of care. Currently OHP offers only peer delivered services within the context of a treatment episode when client is enrolled in a substance use disorder treatment program. A waiver is needed to explore alternatives such as recovery supports before and after enrolling in a treatment program to reduce recidivism into higher levels of care and support the long-term recovery of those with substance use disorder.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

This policy package would improve access to substance use services for the nine-federally recognized tribes and the Urban Indian Program, OHP members and provide local community mental health programs (CMHPs) and the coordinated care organizations the resources to provide the full continuum of care to OHP members.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

Collaboration on this policy package includes but is not limited to the nine-federally recognized tribes and Urban Indian Program, consumers and those utilizing services, Medicaid providers, CCOs, peer-delivered services community, local community mental health programs (CMHPs), Oregon Council Behavioral Health (OCBH), Oregon Recovers, OHP members, Medicaid Advisory Committee (MAC), Quality and Health

Outcomes Committee (QHOC), Oregon Consumer Advisory Council (OCAC), Health Policy Board, Alcohol Drug Policy Commission (ADPC), Addictions and Mental Health Planning and Advisory Council (AMPHAC)

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

Oregon is committed to ensuring advancing racial and health equity in the system becomes a collaboration of all regions and sectors in the state, including tribal governments. This waiver provides a unique opportunity to support health equity by increasing recovery supports and other critical services such as crisis intervention to individual's disproportionately affected by substance use within historically marginalized communities. These services would provide opportunities to fill needed gaps in services and provide access to services outside of the traditional treatment model, such as housing supports for those with substance use disorder transitioning out of residential treatment or are chronically houseless, supporting especially communities of color and other historically marginalized communities.

Staffing and fiscal impact

Implementation date(s): July 1, 2021

End date (if applicable): Not applicable

15. What assumptions affect the pricing of this policy package?

- Fee-for-service utilization would increase 8 percent as a result of adopting the waiver. This assumption underlies the estimated cost for the fee-for-service rate increases seen in the first year of implementation.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

- Necessary work can be completed by one Operations and Policy Analyst 3 position.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

HSD would be responsible for overseeing the implementation of the SUD 1115 Waiver Demonstration, which includes facilitating the steering and advisory committees, coordination across the agency and public, coordinating with the Consumer Activities in creating the Peers Delivered Services State Plan to certify peer run organizations, working on the technical assistance for CCOs, and management of statewide SUD community integration services.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

There would be an initial FFS 8 percent client caseload increase across the board to the population groups served by this policy package. After the initial caseload increase as a result of the waiver, new caseload increases are not expected. There would be some new services offered to OHP members to fulfill the full continuum of care for substance use services.

SUD Waiver Activities
Community Integration Services: providing housing support services for those who are in transition and/or chronically homeless in need of support.

IMD Match: increase access to substance use residential services by receiving federal match for IMD services.

Peer Delivered Services:

- Current providers provide peer-delivered services outside of the traditional treatment plan as needed to support long term recovery.
- New provider type, peer run organizations will provide peer-delivered services outside of the traditional treatment plan as needed to support long term recovery within peer run organizations.

SPA Activities

Crisis Intervention is an intensive, short-term, brief service to stabilize an individual so they can cope with and overcome crisis.

Community Integration; Skills Restoration is a range of integrated and varied life skills restoration (e.g., housing assistance, employment, health, hygiene, nutritional issues, money management) provided in a wide array of settings, including residential, community, and outpatient, for Medicaid and CHIP enrollees intended to promote improved functioning and treatment retention, to minimize the risk of relapse and to increase the community tenure for the individual.

Early Intervention Services activities are sub-clinical or pre-treatment and designed to explore and address problems or risk factors that appear to be related to substance use, and/or to assist individuals in recognizing the harmful consequences of unhealthy substance use.

Prevention Services activities are related to screening, education, psychoeducation, and outreach designed to assist individuals in discovering and addressing problems or risk factors that are related to substance use, to assist in their recognizing harmful consequences or unhealthy substance use prior to use.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This policy package requests one new permanent, full-time Operation and Policy Analyst 3 position (SUD 1115 Waiver Coordinator) within HSD to support the success of the waiver activities. This position would serve as the program lead and manager and would be responsible for overseeing the implementation of the SUD 1115 Waiver Demonstration SPA and Implementation plan and ensuring compliance with all requirements including reporting internally and externally.

20. What are the start-up and one-time costs?

A contract with OHSU to provide program evaluation ($775,000) and initial recruitment and onboarding costs of for one new position.

21. What are the ongoing costs?

Ongoing costs include the position, new SUD services in fee-for-service, increased CCO capitation rates to cover the new SUD services, rate increases for current SUD services in both FFS and CCO rates, and new community and recovery supports.

2021-23 ongoing costs in millions	General Fund	Federal Funds	Total Funds
Fee-for-service SPA/related codes	$0.8	$2.5	$3.3
Fee-for-service rate increases	$13.9	$41.6	$55.5
CCO SPA/related codes	$2.9	$8.7	$11.6
CCO rate increases	$14.4	$43.2	$57.6
Fee-for-service community & recovery supports	$3.0	$13.0	$16.0
CCO community & recovery supports	$10.0	$43.0	$53.0
Operations and Policy Analyst 3 position	$0.1	$0.1	$0.3
Total	**$45.1**	**$152.1**	**$197.2**

22. What are the potential savings?

This policy package incorporates a savings of $14.0 million General Fund as a result of gaining approval for federal matching funds for services provided in IMDs, which are currently supported entirely by General Fund.

The SUD 1115 Waiver may reduce recidivism into more expensive, higher levels of care over the course of the five-year demonstration due to improved access to less costly, lower levels of treatment as well as post-treatment services and supports that promote long-term recovery. Any potential savings from shifting services from higher to lower levels of care, however, could be all or partially offset by increased access to and use of residential treatment beds.

OHA anticipates potential long-term reductions in OHP expenditures due to from declines in SUD-related emergency department admissions and hospitalizations; however, to the extent savings occur, they will be reflected in subsequent years' CCO rates, which are based on past expenditures, and incorporated into OHA's budget as part of the capitation rates for CCO-enrolled OHP members.

23. What are the sources of funding and the funding split for each one?

The sources of funding are General Fund and Medicaid matching funds. The funding split for the services provided by the new and increased codes would be 75 percent Federal Funds and 25 percent General Fund. The funding split for the requested position and the Oregon Health & Sciences University (OHSU) Evaluator Agency would be 50 percent Federal Funds and 50 percent General Fund.

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE

Oregon Health Authority
2021-23 Policy Package

Division:	Oregon State Hospital
Program:	Oregon State Hospital
Policy package title:	Electronic Health Record Replacement Planning
Policy package number:	432
Related legislation:	None

Summary statement:

The Oregon State Hospital's (OSH) current electronic health record (EHR), does not adequately support the clinical or business needs of the hospital. Since 2011, the current system has been in a continuous state of development, preventing OSH from fully eliminating the paper processes and tracking systems. The system lacks a functional revenue cycle management element which presents challenges for billing and reconciling claims and necessitating use of additional ancillary systems. This package requests funding to begin a multi-biennia process of replacing the current OSH EHR.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$1,815,628**	**$0.0**	**$0.0**	**$1,815,628**	**5**	**4.40**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

Electronic Health Records (EHRs) contain the medical and treatment history of patients and allow access to evidence-based tools that providers can use to make decisions about patient care. EHRs are real-time, patient-centered records that make information available instantly and securely to authorized users.

OSH's current EHR, based on Avatar (a Netsmart product), does not adequately meet the needs of the hospital. This system was purchased as part of the OSH replacement project in 2011 and has been in a continuous state of development since that time. Netsmart's overall technical support of the Avatar system is insufficient for a hospital of OSH's size both on a clinical and administrative level. Some of the clinical issues include:

- Avatar does not allow integration with other health care facilities that treat our patients across the behavioral health continuum of care.
- While technically capable of being adapted to include necessary functionality, in practice the design and implementation of these updates occurs in fits and starts.
- Day to day operations require additional time and effort to navigate the program and lead to potential data entry issues, such as data being placed in incorrect fields as new functionality is incorporated, or in direct time lost by clinicians spent entering information or notes in a non-intuitive system rather than treating patients.
- Avatar has poor security restrictions on information and access, while other existing systems are more robust.
- Due to processes that must be supported outside of the system due to limitations or deficiency, it is a struggle to contain protected health information (PHI) within the EHR.

Administrative issues include:

- Avatar has revenue cycle and billing limitations as well. The system does not have a true temporary accounts receivable (A/R) function, forcing the accounting period close to lag at least 60 days behind real time due to limitations in functionality. This time lag results in delayed revenue cycle data analytics, making it difficult to forecast revenue collections and react in real time.
- Avatar is difficult for OSH contract physicians to use, resulting in lost revenue for on-site specialty visits, as well as missed opportunities for care coordination.
- Some ancillary services provided cannot be billed out due to system limitations.
- Similar to the clinical side, the system limitations drive extra work to maintain billing compliance.
- Avatar does not measure administrative staff productivity.

2. What would this policy package buy and how and when would it be implemented?

This request is to research and plan for the adoption of a more widely used, robust EHR system. Actions would include identification and evaluation of potential long-term solutions, identification of the business strategy, market research, and creation of a roadmap and acquisition and/or procurement plan.

The desired outcome would be an OSH EHR system that would allow nimble and efficient data transfer to patient care partners and increased care coordination. This system would align with and leverage utilization of existing partners' EHR systems, existing ancillary systems, and other components integral to hospital operations.

Activities within the effort would include:

- Market research with other hospitals to inform how OSH technology use is similar to, and different from, that of major Oregon hospitals (both acute-care and inpatient-psychiatric facilities) to develop choices about changing OSH processes to conform to a partner EHR, or adapting the partner EHR to conform to OSH processes.

- Document a technical Business Case document defining high level requirements, scope, alternatives, approach and estimated costs.
- Identify a procurement approach, roadmap and detailed plan for EHR adoption. This roadmap would set timelines for implementation.
- Ensure alignment with DHS/OHA's Office of Information Services (OIS) strategies for system consolidation and data-analysis capabilities.
- Encourage partners to provide "hands on" exposure to a Proof of Concept version of the EHR, including physician, nursing, and pharmacy functionality.
- Document the requirements to be met by the EHR system, including detailed and demonstrated specifics to allow an objective evaluation of how the system meets the documented requirements.
- Draft a procurement scoring approach designed to maximize the retention of capabilities which are met by Avatar currently, as well as additional functionality, and compare products.
- Deliver a ready-for-publication request for proposal (RFP) to solicit a partnership that meets the identified requirements.
- Develop a 2023-25 policy package with estimates for one-time and recurring costs.

3. How does this policy package further OHA's mission and align with its strategic plan?

Good data and information are key to meeting the OHA mission and overall 10-year strategic plan to eliminate health disparities in Oregon. An EHR with better data collection capability and analytics, that could interact with other EHRs that house OSH's patients' data, would allow OSH to enhance care coordination and provide better person-centered care. Better data and metrics would allow OSH to measure progress related to person-centered care and financial key performance indicators. With access to a better technical care coordination tool, it would allow OSH to engage stakeholders and community partners more easily on the behalf of OSH patients. In line with the Governor's key strategy to achieving lower costs, better outcomes and better health by reducing silos in healthcare, OSH being part of a community EHR system would be a step in the right direction

for psychiatric health care for some of Oregon's most clinically challenging and fragile patients. These outcomes would also align with OHA Core Values of Health Equity, Service Excellence, Integrity, Partnership, Innovation and Transparency.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

This package is not being requested as a result of audit, though the Secretary of State has cited concerns (2014) around a "hybrid" EHR model that utilizes both electronic and paper files.

Quantifying results

5. How will OHA measure the success of this policy package?

Short term success would be measured by the successful creation of a procurement plan and identification of an EHR that meets OSH requirements and demonstrates successful proof of concept as well as the development of 2023-25 policy package for implementation.

Long term success would be measured by implementation of an integrated, intuitive, robust EHR system that meets both clinical and administrative needs and increases functionality and care coordination.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

This policy package aligns with and directly supports two of the Governor's policies:

1. *"Modernize and standardize critical statewide systems."*
2. *"Optimize service delivery to the public and internally by modernizing agency-specific and cross-agency systems."*

Of the Key Goals within the OHA Fundamentals Map, this package would align with:

1. Effective Partnerships by researching an electronic health record that functions within OSH as well as providing necessary data to healthcare partners and more efficient coordinated care.
2. Better Health and Better Care are both impacted by a more robust and effective health record.
3. In turn, these would help meet the desired outcomes of Increased Partner Satisfaction, Improved Population Health, Improved Quality of Care and Improved Care Experience.

7. What are the long-term desired outcomes?

A more widely used community EHR would allow for better data collection and better care coordination between Oregon State Hospital and other providers. It would mitigate and lessen risks associated with a system that is currently built on workarounds, making it difficult to audit and verify compliance.

Further, many OSH physicians are familiar with the EHR packages utilized in acute care and community settings. This should allow for expedited implementation and a high level of user acceptance, also mitigating the current risk situation associated with an incomplete EHR system. Existing clinical capability would be greatly enhanced through existing software modules, requiring normal software configurations instead of vendor creation of any new module required for OSH use. An enhanced ease-of-use should contribute to better physician data.

Finally, a system with more robust revenue cycle capability, validated by substantial market penetration among private-sector hospitals, would allow OSH to maximize revenue collection.

8. What would be the adverse effects of not funding this policy package?

If this policy package is not funded, OSH will continue to use Avatar as its EHR, and to deploy State and Netsmart resources making gradual improvements in the technology and its configuration for OSH.

The existing compromises will persist, continuing to hamper the efficient treatment of patients at OSH. Existing challenges to recruitment, onboarding, and continuing education of clinicians will continue. Compliance, information security, and privacy issues will continue to burden the hospital, instead of being addressed by a more robust EHR already in use by partner health care institutions.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

Several workarounds are currently in place to mitigate compliance and billing deficiencies. Workflow analysis has been performed and manual processes and monitoring have been put in place attempting to make up for non-existent or subpar functionality. Heavy usage of Excel spreadsheets to track data and plug performance gaps in the Avatar system have been implemented. A recent "health-check" performed by Netsmart and a cross-functional team convened to address deficiencies and plan and prioritize the numerous required upgrades.

The modality and functionality that is not present in Avatar is also clinically mitigated through separate trackers and sub-systems. This necessary input detracts from patient care through time spent performing administrative functions or duplicate record entry. Duplicating record entry also increases likelihood of errors in treatment and/or documentation creating significant risk to patients and the organization.

10. What alternatives were considered and what were the reasons for rejecting them?

Avatar mitigations have been pursued each year since the initial Avatar "go live" in November 2011, and these have not resulted in satisfaction by clinicians, nor by hospital operations.

Other state agencies in Oregon also maintain medical records, notably the Oregon Youth Authority and the Department of Corrections. However, their systems are not optimized for the needs of inpatient hospitals. They also are not currently seeking partnerships with other organizations, while at least four major private-

sector hospitals in Oregon are seeking such partnerships with OSH (OHSU, Legacy, Providence, and Salem Health).

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

This package requires no statutory alteration.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

This package would have no impact. Implementation of a new EHR would impact all populations served by OSH equally, providing improved patient care.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

DHS/OHA's Office of Information Services (OIS) is collaborating on this policy package.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

OSH's Avatar implementation was a valiant attempt to implement software appropriate for this specific institution. However, this has hindered OSH's ability to adapt to changing requirements and reflect emphases on equitable health outcomes for patients affected by severe and persistent mental illness, who all experience health inequities. Adoption of "best practices" integrated into EHR software would also assist in providing equitable care.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

Staffing and fiscal impact

Implementation date(s): October 1, 2021

End date (if applicable): June 30, 2023 (end of planning phase)

15. What assumptions affect the pricing of this policy package?

Cost of staffing determined using current OHA approved position pricings at a duration of 21 months.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

This package will not increase OHA responsibilities.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

There is no new impact on Shared Services as the Technical Analyst will report directly through OSH.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

Caseloads and services are not impacted by this package.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This planning effort would be staffed by five limited duration, full-time positions:

- One Physician Specialist to provide clinical design expertise and workflow establishment.
- One Mental Health Registered Nurse Informaticist to document existing workflows and requirements.

- One Business Analyst (Operations and Policy Analyst 3) to document non-clinical workflows and requirements.
- One Business Technology Analyst (Information Systems Specialist 7) to focus on technological considerations, including network and laptop/desktop requirements and information security and privacy.
- All supported in this work by one Project Manager 3 coordinating the work and assembling the individual contributions into an integrated whole.

If a 2023-25 policy package is approved to continue this work, these limited duration staff would be eligible for permanent positions, allowing OSH to retain the expertise gained over the course of initial development and research. They would be strongly considered for liaison roles between OSH clinicians and the partner's informaticists, technologists and governance bodies, as well as configuration specialists charged with optimizing OSH's use of the partner's EHR.

20. What are the start-up and one-time costs?

The entirety of this request is one-time, providing the foundation for a subsequent 2023-25 policy package to proceed with the developed scope of work. Costs for this package would consist of limited duration staffing to facilitate the research, planning and procurement strategy detailed earlier in the narrative.

21. What are the ongoing costs?

Ongoing costs will be determined by a subsequent 2023-25 policy package. Ongoing costs are assumed to be software and/or licenses related to adoption of a more versatile and integrated EHR, along with the staff required to support the system.

22. What are the potential savings?

There are no anticipated savings for this package.

23. What are the sources of funding and the funding split for each one?

This package would be funded by General Fund only.

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE

Oregon Health Authority: 2021-23 Policy Package

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

Oregon State Hospital's (OSH) technology infrastructure, software, and staffing levels are insufficient to support the demands of enhancements in patient care and treatment.

Healthcare, like most other fields of work, is becoming more reliant on mobile devices, increasingly sophisticated software, and data-driven processes. OSH's response to the COVID-19 emergency has included telework by non-patient-care staff, and telehealth services by outside providers and OSH physicians—highlighting the benefits of tech-intensive processes. Adapting to current technologic standards, along with the relatively new need to attract and retain tech-savvy clinicians, will require OSH to accelerate adoption of evolving technologies.

This package increases the rigor and accountability of technology administration at the hospital, providing a more robust treatment environment and ease of use for OSH patient care.

2. What would this policy package buy and how and when would it be implemented?

This package funds a wide variety of technical enhancements related to overall accessibility, functionality and ease of use.

Components would consist of an expansion to the Wi-Fi coverage at the hospital to allow wireless access to equipment throughout the hospital – primarily promoting videoconferencing and access to shared drives or the Electronic Health Record (EHR) for real-time entries. Estimated cost of $1 million.

Multiple improvements to the current Electronic Health Record (EHR) are requested. This includes a transition to the hosting of the application to the vendor platform, which would remove the hosting burden from the State Data Center and remove the currently contracted cost for disaster recovery capacity at a secondary contracted data center in Beaverton. Functional improvements would also be requested within the EHR. These would allow OSH staff to:

- Directly enter medication orders into the system as well as provide the medication orders to outpatient pharmacies for patients at discharge.
- Enable vital records and bed-checks access on iPhones.
- Add Key Performance Indicator data analysis and visualization tools.
- Create a portal to allow patients to view their own medical records and enhanced speech to text capabilities for dictations.
- Provide additional information about previous patient health care encounters and allow information about OSH healthcare to be shared with community providers as patients discharge.
- Update the International Classifications of Diseases record within the system.
- Perform the 10-year upgrade/overhaul of the software.
- Expand EHR use at the Pendleton Cottage campus, which currently is current using a paper-based system.

Estimated total cost of $1.9 million.

This package would also fund numerous sub-system improvements. It would purchase a Radiology Information System (Picture Archiving System) to replace film-based x-ray images. It would upgrade the Medical Review service in use for Utilization Management to increase efficiency and accuracy of insurance/payor authorizations. It would enhance the software interface of the medication dispensing cabinets to optimize use and allow review of all medication orders from any cabinet location (in conjunction with cabinet replacement within OHA Policy Package 502). It would update OSH's timekeeping software to provide analytics to optimize staffing levels based on patient requirements and permit system access and

controls from smart phones. And, it would upgrade the Incident Reporting/Infection Surveillance (IRIS) system to provide improved tracking for hospital risk management. Estimated cost of $730,000.

Finally, it would fund some equipment upgrades and enhancements in the form of completing the rollout of hospital message boards and replace the "VCON" systems at the hospital with more economical systems compatible with Skype and Microsoft Teams. Estimated cost of $108,000.

Total estimated cost, excluding position needs, of $3.8 million.

3. How does this policy package further OHA's mission and align with its strategic plan?

This package aligns with the Governor's priority on Healthy and Safe Communities by contributing to the treatment of one of Oregon's vulnerable populations. It also aligns well with the OHA Core Values of Health Equity, Service Excellence, Partnership and Innovation.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

Two of the OPA3 Clinical Informaticists are accountable for addressing an outstanding Secretary of State audit finding from 2016, by designing new, OSH-specific screens within existing software applications to enhance clinical care and facilitate transition of patients from OSH into community placements. This would also achieve the full transition of paper elements of the medical record to electronic retention.

Quantifying results

5. How will OHA measure the success of this policy package?

- New mobile technologies implemented after the completion of the Wi-Fi coverage upgrade would be tracked to demonstrate project completion.
- OSH radiology would rely exclusively on electronic images, rather than the current use of film, an obsolete technology.
- Avatar EHR uptime would be tracked to confirm improvement.
- Pendleton Cottage would have their EHR implemented by April 1, 2022.
- All OSH hearing rooms, and 5 OSH conference rooms, would have videoconference equipment compatible with Microsoft Teams and/or Skype for Business by July 1, 2022
- Interqual would be upgraded, all Omnicell cabinets would have been successfully upgraded, API analytics and mobile apps would be in use, and eight new Avatar components would be implemented by June 30, 2023.
- At each monthly check from January 1, 2022 through June 30, 2023, 95 percent of Message Boards would be found to be fully operational.
- OSH would have implemented the Risk Management component of the Incident Reporting / Infection Surveillance system by March 31, 2023.
- OSH would eliminate the paper charts from the patient care units.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

This package is not tied directly to an OHA KPM but aligns well with the OHA core values of Health Equity, Service Excellence and Innovation. In addition, it aligns with the following OHA performance measures:

1AOM7.b. Quality of life-poor mental health: the software improvements support improving care for patients during their stay at OSH, including:

- A portal providing patients access to their medical record and increasing patient engagement in recovery and/or treatment process.
- Electronically sending discharge medications to community pharmacies.

SP1Managing Risk: companion to IRIS application.

SP2.2 Managing IT systems & services and SP2.6 Ensuring information privacy & security: additional Application Administrators; comprehensive Wi-Fi; EHR enhancements; and Pendleton Cottage EHR.

SP2.4. Managing public records: Clinical Informaticists, including elimination of paper elements of the medical record as OSH deploys EHR document-management functionality.

SP2.7 Managing continuity of operations, preparedness, disaster response & recovery efforts: shifting hosting of EHR platform to vendor for increased up-time.

SP3 Developing & Supporting the Workforce: Technical Writer, message boards, API mobile app, software upgrades and optimization, and videoconferencing upgrades.

OP1 Engaging Community, Stakeholders, Members & Partners: Health information exchanges, Radiology RIS/PACS from film x-rays.

OP2 Collecting, Analyzing & Sharing Data: EHR and API analytics modules; and Report Writers for Data & Analysis.

OP6 Regulating & Ensuring Compliance: update of International Catalog of Diseases in EHR.

7. What are the long-term desired outcomes?

OSH technology is maintained at modernization levels comparable to other mid-sized inpatient hospitals in both public and private sectors, to facilitate service delivery to patients, optimize patient outcomes, and support timely community reintegration.

8. What would be the adverse effects of not funding this policy package?

Aging OSH infrastructure and technology would continue to decline, impeding service delivery to patients, requiring manual workarounds, compromising patient outcomes, and complicating timely community reintegration.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

OSH has worked with the OHA Office of Information Services (OIS) and the state of Oregon Enterprise Information Services (EIS) to add specific isolated Wi-Fi service to especially critical areas but has been unable to fund comprehensive Wi-Fi coverage.

OSH licenses a limited number of software components through existing operating funds but is unable to acquire the components necessary for complete functionality, resulting in inefficient “workarounds” in key areas.

10. What alternatives were considered and what were the reasons for rejecting them?

OSH has tried using “hot spots” to convert direct cellular signals to Wi-Fi but was unsuccessful due to the concrete and steel composition of the building structures required to make OSH secure.

Inexpensive and free/open-source software packages, when available, are evaluated, but these often lack key features required by OSH, and/or require more technical expertise than is available or justified by the functionality.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

No.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

OIS would be involved in each of the specified projects. OIS believes some of the positions requested are Information Security and Privacy Office (ISPO) positions. Planning conversations will be conducted to ensure OIS/ISPO standards are upheld, while OSH expectations are met.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

Oregon State Hospital's vision statement is, "We are a psychiatric hospital the inspires hope, promotes safety, and supports recovery for all." Often the people receiving OSH's services are some of the most marginalized

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

members of our society. Enhancing technology supports quality care for all patients, allowing additional focus on the patient and their individual needs rather than cumbersome administrative systems.

Staffing and fiscal impact

Implementation date(s): October 1, 2021

End date (if applicable):

15. What assumptions affect the pricing of this policy package?

- All vendor prices are derived from 2020 estimates by vendors and/or contractual agreements with vendors.
- The videoconferencing components of this package are eligible for bond financing as capital outlay and are priced at par amount (the cost of the bond with the cost of the bond issuance), with the associated 2021-23 debt service interest amount.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

No new responsibilities.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

Additional responsibility for expanded technology infrastructure may occur within both EIS and OIS, up to and including Wireless Access Point, servers, firewall, software support, etc.

This package would reduce the utilization of some State Data Center servers by OSH.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

Two Research Analyst 4 Report Writers for the Data and Analysis team to support internal and external data requests.

Four Operations and Policy Analyst 3 positions to serve as an informaticist to non-clinical areas, informaticists for customized EHR screens for enhancement of clinical care and electronic record retention, and a web designer for increased intranet functionality and messaging.

Seven Operations and Policy Analyst 2 positions to serve as a technical writer for the training department, business analysts to configure custom EHR screens, business analysts to support conversion and training in new software platforms, a business analyst to support custom database creation and usage, and business analyst to support EHR utilization at Pendleton Cottage.

Three Operations and Policy Analyst 1 positions to serve as an application administrator and shift that role from higher classifications, and to monitor OSH applications to ensure information security and privacy standards as well as HIPAA compliance.

One Principal Executive Manager D to serve as deputy to the Technology Services director at OSH, to supervise approximately 13 of the 27 non-manager positions.

Total positional requests of 17 permanent, full-time positions, 14.96 FTE for 21 months of the biennium.

20. What are the start-up and one-time costs?

Comprehensive WiFi coverage on both campuses	$492,000
Improved uptime for the Avatar EHR and its associated systems	$525,000
Radiology	$50,000
Additional components for Avatar, Omnicell, Interqual, and API	$623,000
Pendleton Cottage EHR	$100,000
Hearing Room and Conference Room videoconferencing upgrades	$59,000
Enterprise Risk Management Software	$50,000
One-time Costs Total	**$1,899,000**

21. What are the ongoing costs?

Comprehensive WiFi coverage on both campuses	$552,000
Radiology	$100,000
Additional components for Avatar, Omnicell, Interqual, and API	$975,000
Equipment refresh for Message Boards	$49,000
Pendleton Cottage EHR	$65,000
Enterprise Infection Prevention, Critical Incident and Risk Management Software	**$160,000**
Technology Total	**$1,901,000**
Position-Related Costs Total (21 months in 2021-23)	**$3,223,000**
Ongoing Costs Total	**$5,123,000**

22. What are the potential savings?

None.

23. What are the sources of funding and the funding split for each one?

This package is General Fund. A minor amount (approximately $58,000) has been requested for bond financing within this package, related to the component to update the hearing and conference room equipment.

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Personal Services	$2,927,935			$2,927,935	17	14.96

Oregon Health Authority & Department of Human Services
2021-23 Policy Package

Division:	Shared Services
Program:	Office of Financial Services
Policy package title:	Modernization: Financial Systems
Policy package number:	204
Related legislation:	None
Summary statement:	The Department of Human Services (DHS) and Oregon Health Authority (OHA) comprise the largest Oregon state agencies disbursing ***billions*** of dollars of state and federal support services to Oregonians. The agencies need an integrated, federally compliant financial management system for budgeting, payments, allocations and reconciliations. The current financial environment is extremely limited. No budget system exists. Spreadsheets are used to develop and manage budgets and track funding. Financial payments use over 20 systems and interfaces pre-dating the turn of the century. Payment and reconciliation systems are end-of-life COBOL Mainframe with duplicative functionality, augmented by spreadsheets and paper processes. Data uniformity between systems is lacking, reconciliation is difficult and expensive, financial business rules are inconsistent, error tracing is manual. Re-keyed financial data results in increased errors. Financial complexity has grown commensurately with agency growth yielding the untenable environment of today. The lack of modern financial management capabilities must be addressed to mitigate financial and data risk for the agencies.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
DHS	$883,459	$771,823	$565,564	$2,220,846	3	3.00
OHA	$1,185,519	$1,853,236	$291,786	$3,330,541	4	4.00
Total policy package:	**$2,068,978**	**$2,625,057**	**$857,350**	**$5,551,385**	**7**	**7.00**

Purpose

1. Why does DHS/OHA propose this policy package and what issue is DHS/OHA trying to fix or solve?

The lack of a Financial Management System compromises the multi-billion-dollar budgeting and expenditure tracking required by the Department of Human Services (DHS) and the Oregon Health Authority (OHA). A cohesive financial system can help the organization identify potential savings and support budget reduction exercises by helping identify fragmented spending across different entities to enable consolidated purchasing, spending and achieve cost savings. The agencies are burdened with continually increasing maintenance costs and inefficiency interfacing multiple systems into the official state systems. Some of the issues include:

- No common system platform; consequently, data between systems are inconsistent, reconciliations are extremely challenging, and the disparate environments are difficult to maintain.
- Providing comprehensive data to state and federal funding partners and responding to legislative and agency questions is challenging, inefficient and complex.
- Providers receive payments and 1099s from multiple agency systems creating confusion and inconsistency.
- Systems are not all built on the same set of financial business rules.
- Reconciliation is challenged by situations where payments to providers are made from one system while simultaneously establishing accounts receivable to the same provider in another system.
- Information contained in Oregon Budget Information Tracking System (ORBITS) is not available readily to staff outside of agency budget units and may not be at the level of granularity needed by program areas to support everyday management.

Other challenges include:

- Lack of electronic document workflow. Payment and other requests are paper-based and routed with multiple handoffs. Paperless processing of routine, low-dollar spending (e.g. travel, office expenses) enables

cost efficiencies as the current manual processing often represents a higher cost than the value of the transactions.

- Lack of automated reporting to link expenditure information with budget authority used to support operational and planning decision-making. Currently spreadsheets are used to support this activity.
- Multiple complex spreadsheets are used daily to support multiple program areas. Each represent high risk because they have been created by individual analysts without the benefit of standardized programming, formulas, functions or the documentation typically found in a robust financial system.
- Multiple paper processes and re-keying of information results in increased risk of errors. Tracing of errors and performing reconciliation is highly manual and inefficient requiring analysis across multiple disparate systems

2. What would this policy package buy and how and when would it be implemented?

This request is for a planning effort to develop a cross-agency financial system and modernize the underlying technology supporting DHS and OHA budgeting and financial management. Costs include professional consulting resources to guide and support planning, identification and evaluation of potential long-term solutions. Activities include identification of the business strategy, conducting market research, creating a business case, roadmap, and acquisition/procurement plan.

The goal is to establish a sustainable modular financial system that integrates with existing legacy systems and aligns to and leverages the State accounting (SFMA) and budget (ORBITS) systems and any future state-level financial systems modernization. This would not replace but rather integrate with existing state enterprise systems. Alignment to and leveraging of other agency and state-level modernization efforts would be incorporated. Activities include:

- Solicitation for and procurement of expert public sector financial subject matter consulting services to guide and support the efforts outlined in this package.

- Market research to identify other state's financial systems and identification of products aligned to DHS and OHA's needs.
- A Business Case defining high level requirements, alternatives, approach and estimated costs.
- A procurement approach, roadmap and detailed plan for procurement and implementation of a modern financial planning, budgeting and financial execution solution. The roadmap would set timelines for implementation of solutions supporting financial planning and execution needs across DHS and OHA, provide a plan for integration with existing systems and guidelines for implementation of new solutions into the shared agency framework.
- Identification of and alignment with modernization efforts including OIS' efforts to modernize mission and critical systems that are at (or beyond) end-of-life.
- An RFP to solicit for solutions meeting DHS and OHA financial system requirements for a Financial Management System the agencies can incrementally grow into.
- A Proof of Concept and/or implementation of 1+ modules within the new system.

3. How does this policy package further DHS/OHA's mission and align with its strategic plan?

Timely, accurate and consistent data and information are key to meeting the OHA mission and overall 10-year strategic plan to eliminate health inequities in Oregon in 10 years. Budget data and financial information is part of helping link how OHA and DHS are spending funds and how that links to the mission, vision, and strategic plan of both agencies. This policy package provides the building blocks toward how the agencies can track budget to meeting our strategic plan goals. The proposed new system would increase DHS and OHA's stewardship of resources, streamline the financial and budgeting processes and automate financial and budget related systems. These systems are used to provide management information on budget and financial related issues to support informed decision making.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No, this package is not being requested due to an audit. However, issues related to the complexity of the current systems and processes has consistently been highlighted in agency risk assessments.

Quantifying results

5. How will DHS/OHA measure the success of this policy package?

Success would be measured by:

- Near term identification and procurement of a viable solution meeting agency requirements and a successful Proof of Concept and/or implementation of 1+ modules within the new systems.
- Long term implementation of an integrated, federally compliant financial management system, reduction or elimination of duplicate payments systems, comprehensive integrated budgeting and financial planning capabilities replacing disparate spreadsheets, manual and paper processes and other side-systems.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or a DHS/OHA performance measure? If yes, identify the performance measure(s).

This policy package aligns with and directly supports two of the Governor's policy:

1. "Modernize and standardize critical statewide systems"
2. "Optimize service delivery to the public and internally by modernizing agency-specific and cross-agency systems"

7. What are the long-term desired outcomes?

The long-term vision is implementation of a comprehensive financial system for DHS and OHA performing financial functions from budget entry through payment processing, accounts receivable, cash receipting, client payroll, accounts payable, tax reporting, trust accounting, grant accounting, budget to actuals, etc. This roadmap sets timelines for a new solution and a plan for integrating existing capabilities and new solutions into the agency's framework.

The goal is to leverage and align with state level and other agency modernization efforts and yield a single, seamless, integrated agency financial system for all DHS and OHA financial transactions that is flexible, compliant, market-tested, easily supported and user friendly.

8. What would be the adverse effects of not funding this policy package?

If this policy package is not funded, the existing compromises, error-potential, inefficiencies, duplication of work efforts and data, difficulties aligning budget to actual will persist and continue to hamper and compromise the agencies. Risks of financial errors will continue to grow as funding becomes ever-more complex. Gaps in knowledge are certain as staff retire, change jobs or leave the agencies.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

Several efforts have been undertaken to improve the current situation including:

- Created business rules to standardize financial subsystem development. Newer systems have been developed with these rules and use a set of "common tables" reducing the amount of accounting coding configuration required in each system. This has improved the efficiency of the systems but, it has not reduced data and system duplication.
- Developed macros to reduce re-keying and improve accuracy.
- Developed reports/queries to detect errors for correction after the fact.
- Started use of Excel PowerQuery and PowerPivot to reduce manual entry and manipulation in spreadsheets to streamline the monthly Financial position reports it produces. These are one-off approaches dependent on individual knowledge and skills of analysts and thereby not feasible to automate or establish as broad, repeatable solutions.

- Moved several at-risk financial systems (e.g. Check Reconciliation and Accounting Interface) into an interim Mainframe solution. This helped stabilize those systems but is not a long-term sustainable solution.
- Work has begun collaboratively between the Office of Financial Services and the Office of Information Services to develop a technology roadmap supporting an enterprise approach to financial functionality.

10. What alternatives were considered and what were the reasons for rejecting them?

1. Do nothing.
   This is not a viable option as the current situation has become untenable and is costing the agencies time, credibility and money. Error handling and reconciliations are convoluted and complex leaving ample opportunities for persisting or exacerbating the situation.
2. Wait until the state develops and implements a comprehensive enterprise level financial management solution that can be tailored to meet agency's needs.
   Timing for a state solution is indeterminate. It is unknown if or what will be developed at a state level and questionable if it could meet the specific financial management needs of DHS and OHA which are very specific to their service delivery and funding sources.
3. Outsource all financial management functions to an external entity.
   This approach is untested and uncertain with a low probability of success as it is unlikely a private sector entity would have the requisite tools and experience managing the myriad funding streams, allocations, reconciliations and error tracking required by federal and state funding partners and able to understand the complex financial functions managed within the agencies.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

OHA and DHS are the primary stakeholders and beneficiaries of the improvements outlined in the policy package. Federal and state funding partners would also benefit as agency timeliness and accuracy will be improved by implementing a financial management solution.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

This is a collaborative effort between OHA and DHS. Department of Administrative Services (DAS) manages the statewide budget system (ORBITS) and the data warehouse (SFMA) would need to be involved as a stakeholder in the process to mitigate non-conformity issues between systems.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

This policy package reduces financial risks by lowering errors in payments, reduced reconciliation issues, and timely and accurate allocation of federal and state grants and other funds to the appropriate programs, thus ensuring continuity of funding for critical programs supporting health and health care.

Staffing and fiscal impact

Implementation date(s): July 1, 2021

End date (if applicable): This is anticipated to be a multi-biennia effort completing in 4-6 years from commencement.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

15. What assumptions affect the pricing of this policy package?

Cost of professional services is assumed to be in alignment with other comparable efforts.
Cost of staffing is assumed to be relatively constant.
Federal enhanced funding will be available and leveraged for all Medicaid-related efforts.
Resources with the necessary skills will be available.
Viable cloud-based SaaS Financial Management systems will be available and aligned to agency requirements.
Estimated monthly licensing costs for a cloud-based SaaS solution will be within 10 percent of the estimates identified in this policy package.

16. Will there be new responsibilities for DHS/OHA? Specify which programs and describe their new responsibilities.

There would be no new responsibilities for this shared service. The intent is to set up more streamlined and modern finance and budget systems that can be integrated with long-term DAS solutions and lessen the volume of manual entries. The agencies also anticipate gaining reporting functionality not currently available and a potential increase in requests looking deeply at how budgets are put together and tracked. The OHA budget office would help lead this effort.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

This is a Shared Services system supporting both DHS and OHA through the shared Office of Financial Services and Central Budget Unit in addition to the central budget shops for each agency. Key experts from these areas and the Office of Information Services (OIS) for technical expertise and support would be heavily involved in this process.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This policy package requests funding for 7 permanent, full-time positions. Positions would be new and would work collaboratively as a small team to represent DHS and OHA financial needs and ensure the consultant's work and roadmap efforts align to agency priorities.

- Senior level leadership providing strategic and operational direction for this work effort – **one Principle Executive Manager E position (DHS/OHA – Shared Services, Office of Financial Services)**
- Develop RFPs, document requirements, perform analysis, support market research, oversee product testing – **two Operations and Policy Analyst 4 positions (one in DHS OFS and one OHA COO)**
- Provide subject matter expertise, participate in analysis, market research, product testing – **two Operations and Policy Analyst 3 (one in DHS OFS, one in OHA COO)**
- Provide technical expertise, programming support, technical requirements, product testing – **one Information Systems Specialist 8 position and one Information Systems Specialist 7 position (OIS)**

20. What are the start-up and one-time costs?

- $1.0 million for professional services including market research, tool analysis, planning, business case development, technical analysis, design recommendations and reviews, guidance on best practices.
- $90,000 for one year of monthly licensing costs for a cloud-based financial management system Proof of Concept (estimated at $250 per user per month for up to 30 users).

21. What are the ongoing costs?

It is too early in the process to accurately estimate ongoing costs but expected costs would include licensing fees assuming a cloud-based financial management system is the preferred solution choice. Ongoing costs would be identified in subsequent policy package requests in future biennia.

22. What are the potential savings?

- Reduced financial errors
- Reduced overpayments and need for reconciliation
- Increased efficiency in budget planning and management
- Reduced duplication of data and efforts
- Increased data and information consistency and availability
- Enhanced ease knowledge transfer
- Greater financial planning capabilities for DHS and OHA

23. What are the sources of funding and the funding split for each one?

Federal (enhanced) funding has yet to be negotiated with federal partners. DHS/OHA plan to request enhanced funding where applicable. Funding would be a combination of state and federal funding. The splits and level of participation would specifically come from Medicaid, IV-E, SSBG, IV-B part 1 and 2, SNAP, TANF, CCDF and others. A rate of participation for entitlement grants would be negotiated; block grants may be General Fund only.

DHS Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Personal Services	$2,804	$699,625	$0	$702,429	3	3.00
Services & Supplies	$49,034	$40,933	$33,168	$123,135		
Special Payments	$831,621	$31,263	$532,396	$1,395,280		
Total	**$883,459**	**$771,821**	**$565,564**	**$2,220,844**	**3**	**3.00**

Fiscal impact by program

	Oregon Health Authority				
	OIS	COO	SAEC	Dept. of Human Services	**Total**

Oregon Health Authority
2021-23 Policy Package

Division:	Health Services Division / Office of Information Services
Program:	Medicaid
Policy package title:	Modularity
Policy package number:	205
Related legislation:	None

Summary statement:

Support continued availability of the mission critical Medicaid Management Information System (MMIS). The majority of this request focuses on replacement of end-of-life servers. Efforts also include continued development of a strategic plan and roadmap for modernization and modularization of the Medicaid System in compliance with Centers for Medicaid and Medicare Services (CMS). Non-compliance could shift $26 million in biennial costs to the state if CMS reduces enhanced funding for maintenance and operation (M&O) of the MMIS due to non-compliance[1]. This package also enables Oregon to meet CMS requirements by updating the Medicaid Information Technology Architecture State Self -Assessment (MITA SS-A), initiate creation of a Program Management Office providing a standardized approach to manage the pending modularization projects and solicitation for Systems Integrator services for Medicaid module implementation.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$3,143,626**	**$0**	**$19,862,663**	**$23,006,289**	**2**	**1.50**

[1] Maintenance & Operational Support for the MMIS is $48 million/biennium; enhancements are $20 million/biennium. 75% of M&O costs and 90% of enhancement costs are funded by CMS.

Purpose

1. Why does DHS/OHA propose this policy package and what issue is DHS/OHA trying to fix or solve?

This request funds continuation of multi-biennial efforts to modernize and modularize the Medicaid Management Information System (MMIS) for Oregon. This effort is required by the Centers for Medicaid and Medicare (CMS) to continue receiving enhanced federal funding for maintenance & operations (M&O) and major enhancements. For the 2021-23 biennium, the primary focus will be replacing the end-of-life servers and hardware the core MMIS system resides on. This work must be completed by 2024 or security of data and system access will be compromised.

2. What would this policy package buy and how and when would it be implemented?

This package:

- Replaces end-of-life servers – this effort will be completed within the 2021-23 biennium.
- Continues work on developing a strategic plan and roadmap for modernization and modularization of the Medicaid system in compliance with CMS requirements.
- Updates the Medicaid Information Technology Architecture State Self-Assessment (MITA SS-A) in compliance with CMS requirements.
- Initiate creation of a Program Management Office establishing standards and practices providing standardized approach for managing the pending array of modularization projects.
- Solicit for Systems Integrator services providing expertise, staffing and consulting services for Medicaid module implementation.

3. How does this policy package further DHS/OHA's mission and align with its strategic plan?

Medicaid Modularity supports OHA's mission by investing in a modern and renewable infrastructure for the Medicaid system and planning for modernizing and modularizing one of the state's largest and most complex information systems. This initiative also aligns with the Governor's goal to *"Create a statewide data strategy to improve data analysis, data quality, information sharing and overall decision making"* through long-term improvements to interoperability and availability of health related data achieved through improved alignment between the Medicaid systems and other state health information technologies.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No. This policy package is directly related to two imperatives:

1. The hardware upon which the core Medicaid Management Information System (MMIS) resides is at end-of-life and must be replaced with a more sustainable solution. OHA's plan is to move to the now standard Amazon Cloud Services environment being utilized by other states supported by DXC. This move will modernize our Medicaid systems infrastructure, prepare for future modular implementations and provide a stable platform for long term support.
2. The Centers for Medicaid and Medicare (CMS) mandated all states to modernize and modularize their Medicaid systems. CMS provides enhanced funding for all states pursuing Medicaid Modularity but also expects states to progress towards the federal goals. Non-compliant states run the risk of losing not only enhanced funding for modularity work, but for all other enhancements as well as for maintenance and operations (M&O). CMS currently covers 75 percent of the M&O costs and between 75-90 percent of innovation costs.

Quantifying results

5. How will DHS/OHA measure the success of this policy package?

Success will be measured by:

1. Successful transition of the existing infrastructure to a cloud environment within or under the estimated cost defined in this package.
2. Successful engagement of a Strategic Advisor and the development of a strategic roadmap for modernization and modularization of the Medicaid systems.
3. Updates to the Medicaid Information Technology Architecture State Self-Assessment (MITA SS-A).
4. Initiation of a Program Management Office with preliminary focus on standards and practices to build the foundation for support long-term Medicaid Modularity Program initiatives.
5. Development of the RFP to solicit for Systems Integrator services.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or a DHS/OHA performance measure? If yes, identify the performance measure(s).

Investment in this package positively supports several OHA performance measures including:

1. KPM #20 – Access to Care
2. KPM #21 – Member Experience of Care
3. KPM #32 – Eligibility Processing Time

7. What are the long-term desired outcomes?

1. Movement of the Medicaid Management Information System's infrastructure to a Cloud environment providing a renewable and sustainable infrastructure.
2. Development of an executable strategic plan and roadmap to guide long-term modularization efforts for Medicaid systems.

3. An updated MITA SS-A.
4. PM standards, planning approach for on-going Medicaid initiatives.

8. What would be the adverse effects of not funding this policy package?

Without this policy package, funding to support server replacement and progress Medicaid Modularity will be compromised. Server replacement is mandatory and must occur in the 2021-23 biennium or the MMIS system will be a significant risk of security and data breaches. CMS may determine progress is not sufficient towards modularity and reduce or remove enhanced funding for enhancements, innovation and M&O.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

- CMS commitment for continued enhanced funding for this long-term initiative has been secured contingent on the state providing the associated matching funds.
- Preliminary Medicaid Modularity program planning has been completed.
- Significant market research into other states' Modularity efforts has been performed.
- Several key positions to lead and support Modularity efforts have been filled.

10. What alternatives were considered and what were the reasons for rejecting them?

1. Do nothing. This option is rejected as the existing MMIS system resides on an end-of-life infrastructure and lack of progress towards modernization and modularization is non-compliant with CMS dictates and may result in Oregon losing enhanced funding support from CMS for maintenance and operations support as well as for major enhancement efforts.
2. No other viable alternatives have been identified.

11. Does this policy package require any changes to existing statute(s) or require a new statute?

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

This policy package will also affect the Department of Human Services (DHS). In this phase of Medicaid Modularity, all OHA and DHS programs that touch Medicaid systems will be expected to have subject matter experts (SMEs) available as needed for the MITA-SSA works. Program leaders will also be expected to participate in discussions regarding the strategic plan and roadmap.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

This package is a collaborative effort between OHA's Health Services Division and the Office of Information Services. DHS programs such as Developmental Disabilities are also stakeholders in this long-term program.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[2] or equitable health outcomes?

This package helps populations impacted by health inequities by ensuring Medicaid services are available without gaps in service continuity.

[2] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

Staffing and fiscal impact

Implementation date(s): Efforts started in 2017-19 with pre-planning activities and are expected to continue for multiple biennia.

End date (if applicable): To be determined

15. What assumptions affect the pricing of this policy package?

CMS enhanced funding will be available.

16. Will there be new responsibilities for DHS/OHA? Specify which programs and describe their new responsibilities.

In this phase of Medicaid Modularity, all OHA and DHS programs that touch Medicaid systems will be expected to have subject matter experts available as needed for the MITA-SS-A. Program leaders will also be expected to participate in discussions regarding the strategic plan and roadmap. OHA will also have additional system testing requirements as parts of our Medicaid Enterprise System are replaced and moved to the cloud.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

There is no additional impact on Shared Services.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

Existing positions approved in prior biennia will continue to support this initiative. For the 2021-23 biennium, two additional permanent, full-time positions (an Operations and Policy Analyst 2 and Operations and Policy Analyst 3) are needed to support near-term testing on the movement of the MMIS infrastructure to a cloud environment as well as for the on-going modularity efforts. Establishing a core team of testers able to help define requirements, develop test cases and execute testing allow other modularity resources to focus fully on other Modularity workstreams including planning, Medicaid Enterprise System development and MITA-SSA efforts.

20. What are the start-up and one-time costs?

Start up and one-time cost include funding for hardware, software and labor for migration of the core MMIS system to Amazon Cloud Services totaling $18.1 million. Additional costs of $4.5 million will fund the development of a long-term strategic plan and Modularity roadmap including updates to the MITA-SSA and launch of a Project Management Office foundation to support on-going future Medicaid Modularity initiatives.

21. What are the ongoing costs?

Ongoing costs include contracted M&O support for the core Medicaid System (the MMIS) as well as internal support for agency-managed systems will be consistent with current costs.

22. What are the potential savings?

Moving the infrastructure to a cloud service is expected to provide a more sustainable environment where upgrades and security patches are maintained as part of the service. This move will eliminate the need for future hardware/infrastructure replacements.

Additionally, moving our infrastructure to a tier 1 infrastructure hosting service potentially increases our security, stability and support, and reduces our reliance on a single vendor for MMIS support.

23. What are the sources of funding and the funding split for each one?

Funding sources include federal Medicaid funds which will provide 75 percent funding for hardware, training and M&O costs and 90 percent funding for professional services, software and enhancements.

Total for this policy package

Oregon Health Authority
2021-23 Policy Package

Division:	Oregon State Hospital
Program:	Safety and Security – Salem Campus
Policy package title:	Secure Transport
Policy package number:	434
Related legislation:	None

Summary statement:

Oregon State Hospital (OSH) is required to transport patients to receive required medical care outside of the scope of OSH's internal medical clinic. Patients who fall under Oregon Revised Statue (ORS) 161.295 (Guilty Except for Insanity [GEI]), ORS 462.701 (Extremely Dangerous Persons) or those committed under ORS 161.370 (Aid and Assist) without off-grounds privileges must be transported with custody restraints. To conduct transports with custody restraints by approved Joint Commission standards, OSH is required to have medical staff and two (2) other escorting staff present and available for any patient transport. This is not feasible within current staffing and budget levels. This package would allow OSH to contract with law enforcement to conduct required patient transport services to ensure patient safety and security and to comply with Joint Commission standards.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	$1,700,000	$0	$0	$1,700,000	0	0.00

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

The Joint Commission inspectors conducted a follow-up inspection for Oregon State Hospital's (OSH) accreditation in July 2016. During the inspection, the Joint Commission (TJC) found that OSH was non-compliant with multiple violations of Code of Federal Regulations (CFR) entries under § 482.13 (Condition of participation: Patient's Rights) and Standards PC.03.05.01- PC.03.05.19 and Standard CTS.05.06.33. TJC found that OSH transported and escorted certain patient populations with custody restraints without licensed staff to monitor and conduct quality checks. These transports were considered a seclusion and restraint event, which requires specific recordkeeping and documentation, consistent with practices used during these events on the units. To conduct transports with custody restraints by approved Joint Commission standards, OSH is required to have medical staff and two (2) other escorting staff present and available for any patient transport, for any patient that:

1. Lacks off-grounds privileges and is committed under Oregon Revised Statue (ORS) 161.295 (Guilty Except for Insanity [GEI]) or ORS 462.701 (Extremely Dangerous Persons) or is committed under ORS 161.370 (Aid and Assist); and
2. Represent a significant risk of elopement or a significant safety risk to the general public.

OSH is not adequately staffed or funded to provide such resource during patient transports.

OSH has utilized an agreement with county law enforcement to successfully meet TJC requirements without taxing hospital positional resources. However, this has created overspend within services and supplies that has required funding through rebalance requests. This package rectifies that situation and permanently funds this required service.

2. What would this policy package buy and how and when would it be implemented?

This package would fund an agreement with law enforcement to provide transport services necessary to obtain medical care for patients requiring custody restraint transports while adhering to the Joint Commission standards for Center for Medicare and Medicaid Services (CMS) compliance. Implementation would be immediate as an agreement currently exists.

3. How does this policy package further OHA's mission and align with its strategic plan?

Both the Governor's priorities and OHA Mission involve access to health care and equitable health care for all. Patients at OSH, a psychiatric facility, are reliant upon transportation to facilities that are equipped to treat emergent medical conditions that OSH is unable to appropriately care for on-site.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No, this policy package is not being requested because of an Oregon Secretary of State or internal audit. However, this service is necessary to maintain compliance with The Joint Commission (TJC) standards and avoid further findings as received in 2016.

Quantifying results

5. How will OHA measure the success of this policy package?

Success of this POP is measured by the provision of safe and timely transport of patients and overall access to necessary healthcare while in OSH care. In addition, success will allow OSH to maintain compliance with TJC without going over the approved budget.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

KPM – 20. ACCESS TO CARE – Percentage of members who responded "always" or "usually" to getting care quickly.

7. What are the long-term desired outcomes?

Safe and secure transport of forensic patients to receive necessary medical care and services in a manner compliant with TJC requirements and within OSH budget authority.

8. What would be the adverse effects of not funding this policy package?

If this policy package was not funded, OSH would still be required to adhere to Joint Commission's standard of transporting patients for routine or acute medical treatment. OSH would be at high risk for budget overspend resulting in continued budget rebalance requests.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

OSH staff communicated with TJC to provide alternative methods to transport patients with custody restraints. TJC informed OSH that a law enforcement agency would be exempted from the requirements and could provide custody restraint transport without medical staff present. OSH solicited various local law enforcement agencies before implementing an agreement. Due to the nature of Joint Commission follow-ups and the necessity for compliance, this agreement was implemented prior to the opportunity to request it in budget, as findings either require an Evidence of Standard Compliance submission within 45 days (for direct impact standards) and/or 60 days (for indirect impact standards). OSH has tried to work within the 2017-19 and 2019-21 budget to offset these costs to no avail.

10. What alternatives were considered and what were the reasons for rejecting them?

An alternative for meeting the goal of providing custody restraint transport with medical staff would require an increase in staffing and development of a specialized transporting team. This team would consist of a registered nurse and two mental health aides to transport patients with custody restraints. OSH would have to create two or more teams to provide transport during normal business hours (Monday through Friday from 0800 to 1700). Also, OSH would have to create a standby of two or more teams for after-hours, weekends, and holidays for medical transports to acute-healthcare facilities. OSH would not be able to use nurses assigned to units or treatment areas because this would remove nurses from direct patient care areas. The members on the standby teams would not be assigned to a unit or treatment area during their shift resulting in an inefficient and expensive use of staff. This scenario would require one Registered Nurse and two Transporters for each transportation event, available at any time of day. Assuming all three shifts are covered daily with minimum transporting staff, this would equate to ~five nurses and ~nine transporters at a cost of ~$3 million per biennium. This cost could increase dependent on actual patient need per shift.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No, this policy package does not require any changes to existing statute(s) or require a new statute.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

No other state, tribal and/or local government agencies would be affected by this policy package.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

This policy package only relates to OSH, no other OHA program areas or other agencies are involved.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

This policy package will have a positive impact on OSH patients by promoting health equity and individual medical care while under OSH care. All patients can continue to have access to routine, urgent, and specialized medical care while receiving mental health treatment and stabilization.

Staffing and fiscal impact

Implementation date(s): July 1, 2021

End date (if applicable): Ongoing

15. What assumptions affect the pricing of this policy package?

OSH is experiencing an increase of Aid and Assist patients who require this type of transport. Many of these patients have untreated medical conditions and require treatment and stabilization while in OSH care. If additional patient capacity is added to OSH, this may also result in additional transport instances and an additional funding need.

The fluctuation of patient population needs will affect the future pricing for fixed and variable costs. Variable costs may also arise from an influx of "off hours" transport needs, perhaps due to patient injury or other emergent needs. Extreme severity in the medical need, for instance requiring overnight observation of a patient, will also add to pricing fluctuation. The current agreement is the best available resource that OSH could determine and retain compliance.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

No new responsibilities for OHA or changes to the current process.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No new responsibilities for or an impact on Shared Services.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No changes to client caseload or services provided to population groups.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

No changes to current staffing, positions, or process changes for this policy package.

20. What are the start-up and one-time costs?

None.

21. What are the ongoing costs?

This policy package consists of only the law enforcement agreement component, currently projected at $1.7 million. If additional patient capacity is added to OSH, this may also result in additional transportation funding need. Ongoing costs are for the agreement and would be expected to be covered within the personal services above standard inflation, with possible adjustments for unforeseen exigencies.

22. What are the potential savings?

No savings are expected. This policy package would allow OSH to remain complaint with TJC standards and requirements for transporting OSH patients in custody restraints in the most cost-efficient manner.

23. What are the sources of funding and the funding split for each one?

OSH is requesting the policy package to be funded completely through the General Fund.

Oregon Health Authority
2021-23 Policy Package

Division:	Health Services Division (HSD)
Program:	Medicaid Fee-for-Service (FFS) Dental Program
Policy package title:	Fee-for-Service (FFS) 30 percent Dental Reimbursement Rate Increase Request
Policy package number:	435
Related legislation:	None

Summary statement:

Oregon ranks 30th in national Medicaid Fee-For-Service (FFS) reimbursement for oral health, known as Oregon Health Plan (OHP) in Oregon. Ninety to ninety-five percent of OHP members are covered for dental services through managed care. The FFS program covers the rest with 375 participating providers. Less than half of the 375 participating providers routinely bill for services. This does not support the OHA values, vision or mission. Increasing dental FFS reimbursement rates by 30 percent incentivizes provider enrollment and increases service access, better ensuring Oregon's most vulnerable receive necessary oral health services. Through inaction, the delivery system could continue to dwindle; Oregon Health Professional Shortage Areas could grow throughout the state. The oral health system has suffered adverse effects due to COVID-19. Providers, if reopening at all, are reopening on shaky ground. Initiating this rate increase would reflect that Oregon is doing everything possible to aid in putting the system on a strong foothold to carry forward the work of the triple aim.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$306,929**	**$0**	**$756,221**	**$1,063,150**	**0**	**0.00**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

Dental service utilization for the OHP/Medicaid Open-Card Fee-For-Service (FFS) program is currently very low. There are a multitude of factors behind the low utilization of services. It is believed one of these factors is the low dental Open-Card reimbursement rates, which have not been updated for many years. Compared with coordinated care organizations (CCOs), Oregon Open-Card dental reimbursement rates are lower by 32.4 percent overall. Compared with western states (California, Washington, and Alaska), Open-Card rates are lower by 30.1 percent. Compared with a five-state average (California, Washington, Alaska, New York, and Idaho), Open-Card rates are lower by 22.8 percent.

Clients in many service areas find it is difficult to receive care due to lack of provider access. Clients with FFS dental benefits frequently are not established with a dental home and have unmet dental needs. FFS providers tend to treat these individuals on an episodic basis, from one urgent/emergent episode to the next, if the client doesn't present at the emergency department, thus elevating Medicaid costs.

The state of Oregon is a dental Health Professional Shortage Area in 32 of the 36 counties throughout the state. Dental coverage is provided through CCOs, Dental Care Organizations (DCOs), and the Open-Card FFS programs. About 90-95 percent of OHP/Medicaid members are covered by either CCOs or DCOs for dental benefits. Managed Care members with Third Party Resources are enrolled in DCOs. New Oregon Health Plan (OHP) eligible patients in hospitals are enrolled in DCOs.

The remaining OHP/Medicaid clients are covered by the Open-Card FFS program. As of April 2020, the FFS program has only 375 participating providers for the entire state. Historically, less than half routinely bill for services to members.

Oregon is ranked 30th in national Medicaid reimbursement for oral health. This does not align with the Oregon Health Authority (OHA) vision, mission, or values. One cannot segregate the mouth, diminish its standard of care, and expect outcomes for the rest of the body and mental status to thrive. We will not achieve the lowest possible costs in the healthcare delivery system as long as there is still an avenue of the body unattended through lack of care and inequity of consideration.

Increasing dental FFS reimbursement rates will not be the cure-all for this situation, but it will, coupled with other efforts being made within OHA, enhance the chances of increased new dental provider enrollment and provide access opportunity for those most vulnerable Oregonians where it didn't exist previously. Health Policy and Analytics data shows that in 2018, only 43 percent of OHP members utilized any dental service. We need to do better. This may be the impetus to make that happen.

2. What would this policy package buy and how and when would it be implemented?

A 30 percent reimbursement rate increase for all dental services for use in payments to FFS dental providers for service provision. Increases would go straight to service reimbursement, with a flat 30 percent increase across all dental services effective July 1, 2021.

3. How does this policy package further OHA's mission and align with its strategic plan?

Enabling better oral health care through increased access supports the concept of treating the whole person and promoting the triple aim of better health, better quality and lower costs for all Oregonians.

Vision: Lifelong health for all people in Oregon. Having a dental provider and on-going oral health care is one of the best ways to ensure lifelong health for the people of Oregon. The mouth is the gateway to the rest of the body.

Mission: Promoting health and preventing the leading causes of death, disease and injury in Oregon. Oregon has some of the highest rates of decay in the country. We need to do everything possible to change this dynamic. A rate increase for dental benefits could go a long way in showing the value OHA places on oral health.

Values: Service excellence, leadership, integrity, partnership, innovation and health equity. OHA is not currently meeting this mark. There is a need to do everything possible to take a leadership role in attaining provider access for our most vulnerable Oregonians. We need to ensure health equity for all throughout the state by ensuring access to quality oral health care. Increasing the dental reimbursement rate is a step forward in the right direction.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

An increase in the number of FFS dentists enrolled in OHP/Medicaid over time would be the means to measure success of this policy package. Secondly, an uptick in oral health utilization should be reflected, as dentists would have more incentive to provide care.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

Yes, this policy package supports 2FOP5E - Network adequacy, as an OHA Core Performance Measure for the Health Services Division.

7. What are the long-term desired outcomes?

An increased reimbursement amount will put OHA dental reimbursement at a level more enticing to dental providers. Increased reimbursement rates coupled with administrative reforms have led to significant increases in provider participation in several other states. Would it encourage existing providers to "open" more slots to OHP clients, possibly increasing OHP enrolled dental provider participation? Yes.

This increase will promote more FFS dental provider enrollment, better provider and dental service access in OHP client's immediate communities. Clients would be more inclined to establish a dental home because the provider is local to their community, promoting on-going oral health care. On-going care encourages better oral health, better quality and keeping costs down.

8. What would be the adverse effects of not funding this policy package?

An already anemic OHP/Medicaid FFS oral health delivery system could continue to dwindle in numbers, further reducing OHP dental access. Oregon could continue to see oral health Provider Shortage Areas become more pervasive and severe throughout the state. The oral health system has suffered a severe adverse effect due to the COVID-19 pandemic, almost to its undoing. Providers, if reopening their doors at all, are in many cases reopening on shaky footings. Not implementing this rate increase would reflect OHA not doing everything possible to aid in putting the system on a strong foothold to carry forward the work of the triple aim.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

- January 2017 teleconference with providers within Oregon Dental Association membership. This call was to query providers regarding their interest in becoming OHP/Medicaid dental providers and to inquire about any perceived barriers to becoming OHP/Medicaid dental providers.
- Phase I of the FFS Dental Incentive - FFS dental rate increase for diagnostic, preventive (10 percent) and specified oral surgery services (30 percent), effective February 1, 2018.
- Phase II of the FFS Dental Incentive – Monthly supplement payments to qualified providers, effective January 1, 2019.
- Dental Director singular outreach to Oregon providers.
- Provider communications and education/educational materials, as recently as late 2019.

10. What alternatives were considered and what were the reasons for rejecting them?

None.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No changes required in statute.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

According to Public Health, local public health authorities (LPHAs) are experiencing budget shortfalls and may reduce the services that they offer. Increasing the FFS rates may incentive LPHAs that are currently

providing dental services to continue to do so.

Every LPHA does not offer dental services. Increasing the FFS rates may encourage new LPHAs to begin providing dental services.

According to the Health Services Division's (HSD) Tribal Liaison, Tribes that provide dental services are typically reimbursed at either their Indian Health Service or Prospective Payment System (PPS), which is a method of calculating the encounter (all-inclusive) rate used by Federally Qualified Health Centers (FQHCs), Rural Health Clinics (RHCs), and tribal programs, should they elect they to use it. This rate is used in lieu of the separate rates for each service that typical providers receive.

A change to the dental rate schedule would have little impact on tribal health programs providing dental services. There are a few instances in which services are reimbursed outside of PPS, but this is not typical.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

OHA Budget has worked on the budget aspects of this policy package and an inquiry made of Public Health and HSD Tribal regarding impact on other state, tribal, and or local government agencies. (See number 12.)

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

This increase should promote better provider and dental service access in OHP client immediate communities. Most particularly in under-served communities, where the Black, African American, African immigrant,

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

African refugee, and Afro-Latinos, Latinas, and Latinx communities tend to be the hardest hit. They are frequently on FFS for numerous reasons. Clients would be more inclined, because the provider is local to their community, to establish a dental home, promoting on-going oral health care. On-going care will encourage better oral health, better quality and keeping costs down.

Staffing and fiscal impact

Implementation date(s): July 1, 2021

End date (if applicable): Not applicable

15. What assumptions affect the pricing of this policy package?

- A 2018 increase was applied to some dental service codes. The difference between the approved increase in 2018 and the current proposal is a total of 30 percent. All other dental service codes have been assumed with a 30 percent increase.
- Assumed a 50 percent utilization increase.
- The average Federal Medical Assistance Percentages (FMAPs) for the 21-23 biennium as published March 2020.
- This pricing would not impact the CCO/DCO rates.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

The policy package will require no new on-going OHA or HSD responsibilities. There will, however, be start up activities related to MMIS system dental fee schedule changes to be carried out by Business Information Systems within HSD/OHA, changes to the posted fee schedule carried out by Health Policy Analytics/OHA

and provider notification needs created by the Medicaid Dental Policy Analyst and finalized by External Relations/OHA. All other activities will be completed with current OHA resources and staff.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

Not applicable. No new responsibilities for Shared Services.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

None anticipated.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

All activities will be completed with current OHA resources and staff.

20. What are the start-up and one-time costs?

Staff time for activities related to MMIS system dental fee schedule changes to be carried out by Business Information Systems within HSD/OHA, changes to the posted fee schedule carried out by Health Policy Analytics/OHA and provider notification needs created by the Medicaid Dental Policy Analyst and finalized by External Relations/OHA.

21. What are the ongoing costs?

Payments to dental providers.

22. What are the potential savings?

There are not expected to be short-term cost savings.

Long-term cost savings may be derived from:

- Enrollment of and access to more OHP FFS oral health providers due to higher reimbursement rates.
- Higher utilization of services in dental office settings rather than dental encounters occurring in the emergency department.
- Cost savings from oral health services being provided at the earliest opportunity in the disease cycle. This would be result of patients having dental homes and oral health access in their own communities, rather than having to travel to another community/locale.

23. What are the sources of funding and the funding split for each one?

The sources of funding will be $306,929 General Fund (GF) and $756,221 Federal Funds (FF). Funding is enrollee specific. The federal funding is based on the split of eligibility types (Oregon Health Plan Plus, Affordable Care Act, Children's Health Insurance Plan, and Other) in FFS. The corresponding average Federal Medical Assistance Percentage (FMAP) rates for July 2021-June 2023 are used to calculate the federal match of each type of enrollee.

Oregon Health Authority
2021-23 Policy Package

Division:	Health Policy and Analytics (HPA)
Program:	Oregon Prescription Drug Program
Policy package title:	Pharmacy Omnibus
Policy package number:	436
Related legislation:	Legislative Concept 23

Summary statement:

This policy package equips the Oregon Health Authority (OHA) with staffing and clarified statutory authority to support and manage pharmacy purchasing in a collaborative and innovative manner. Without this policy package, OHA will be limited in its ability to effectively innovate and keep pace with the dynamic and quickly evolving pharmacy marketplace and supply chain.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$939,262**	**$(75,215)**	**$(23,138)**	**$840,864**	**4**	**3.52**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

This policy package and associated legislative concept addresses three critical problems:

1. PDL Enforcement Authority. OHA's explicit authority to enforce a medical assistance Preferred Drug List (PDL) through prior authorization "sunset" January 2018. This change caused confusion and undermined OHA's efforts to enforce its PDL. PDL enforcement is essential to meeting the legislative directive to minimize the net cost of our pharmacy benefit program while ensuring clients have access to needed pharmaceuticals.

2. Pharmacy Cost and Risk Management in Medicaid. Since 2001 legislation directed OHA to create a PDL, the legislation has been interpreted and operationalized to only apply to the state's fee-for-service (Federal Funds) program. As such, coordinated care organizations (CCOs) currently manage their own PDLs. However, in September 2015, a negative rule determination concluded that OHA is prohibited from allowing CCOs to administer their own PDLs. In 2018, the Oregon Health Policy Board (OHPB) recommended increasing the alignment between Federal Funds and CCO PDLs but did not recommend a single PDL for all.

3. Office of Pharmacy Purchasing. The COVID-19 emergency is creating an enormous disruption to health systems and coverage and is exacerbating preexisting health disparities. This disruption impacts pharmacy programs in many ways, including supply shortages of critical medications and medical supplies. Oregon agencies do not currently have a central office with pharmaceutical supply chain experts who can consult and help coordinate. Such expertise will be especially critical as new COVID-19 treatments become available. Apart from the current public health emergency, prescription drugs continue to be one of the most significant cost drivers in health care spending. Oregon currently has little collaboration in multiagency or multistate

pharmacy purchasing. This results in missed savings opportunities and administrative inefficiency. Current statute restricts the OPDP from directly contracting with wholesalers and pharmacy benefit managers (both important elements of the pharmacy supply chain), which limits administrative efficiency.

2. What would this policy package buy and how and when would it be implemented?

1. PDL Enforcement Authority. All stakeholders would immediately have clarity that OHA is authorized to manage drug costs by requiring prior authorization before covering a higher cost alternative. OHA would continue to minimize the net cost of our pharmacy benefit program while ensuring members have access to needed pharmaceuticals.

2. Pharmacy Cost and Risk Management. New OHA staffing would support a new Pharmacy and Therapeutics advisory subcommittee. This advisory committee would collaborate with CCOs to establish and maintain a partially aligned PDL. The anticipated result would be simplified prescribing and lower net cost.

3. Office of Pharmacy Purchasing. Funding would allow OHA to establish and staff a new "Office of Pharmacy Purchasing." The new office would support cross-agency and multi-state collaborative pharmacy purchasing innovations and drive down costs. It would also provide all Oregon agencies ready access to pharmacy operations and supply chain experts with active wholesaler relationships. OPDP would gain increased capacity to support expansion of the program and generate more savings for participating public and private entities. Expansion would also include modernization of the discount card component of OPDP to improve access to a resource that lower the cost of prescription drugs for under-insured and uninsured Oregonians.

3. How does this policy package further OHA's mission and align with its strategic plan?

This policy package is in alignment with OHA's mission to help people achieve optimum physical, mental, and social well-being through partnership, prevention and access to quality, affordable health care. Clarifying statutory authority for PDL enforcement would strengthen the established legislative purpose and creating a partially aligned PDL would support collaboration and transparency between OHA and CCOs.

This policy package contributes to OHA's strategic plan of eliminating health inequities by implementing strategies and policy changes that could stretch the pharmacy budgets for Medicaid as well as other agencies, which would support access to medications for Medicaid populations and target other populations who have historically suffered health disparities and inequities.

This policy package would improve capacity for OHA to fully support the Governor's call for leading the Multi-Agency Pharmacy Purchasing Collaborative and support alignment efforts across OHA and other agencies and entities able to participate.

Finally, the policy package would enhance OHA's ability to respond to future statewide emergencies, like COVID-19. Establishing a centralized Office of Pharmacy Purchasing would more readily mobilize supply chain experts to the forefront to support solutions to public and private medication and supply shortages.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

1. PDL Enforcement Authority. There would be consistent, widespread understanding of OHA's authority to enforce the PDL through prior authorization.

2. Pharmacy Cost/Risk Management. OHA would estimate savings from the partially aligned PDL.

3. Office of Pharmacy Purchasing. Specific metrics to document success could include number of lives served under coordinated purchasing and amount saved by entities choosing collaborative approaches led by the Office of Pharmacy Purchasing. Continued tracking and monitoring of costs paid by all OPDP participating entities would allow for analysis of cost trends.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

No.

7. What are the long-term desired outcomes?

1. PDL Enforcement Authority. OHA would have clear, explicit authority to enforce the PDL and fulfill legislative directives. This would avoid confusion by interested parties and obviate the need for OHA to explain the authority.

2. Pharmacy Cost and Risk Management. OHA would slow the trend in increased net cost of Oregon's medical assistance pharmacy program. Prescribers would become familiar with a statewide aligned PDL for designated drug classes, which would lead to better health and a better experience of care.

3. Office of Pharmacy Purchasing. OHA would be equipped to adapt to the dynamic and rapidly changing pharmacy supply chain and Oregon would be positioned as a leader in the area of collaborative and efficient pharmacy purchasing.

8. What would be the adverse effects of not funding this policy package?

1. PDL Enforcement Authority. This item doesn't require funding; however, without clear enforcement authority in statute, OHA could be subject to legal challenges and questions.

2. Pharmacy Cost and Risk Management. The negative rule determination would remain unresolved and OHA would be obligated to work toward a single, statewide PDL for Federal Funds and CCOs. This would conflict with Oregon Health Policy Board recommendations, which were informed by the Myers and Stauffer report. That report remains the best guidance we currently have. CCOs would be required to make major changes to their individual PDLs to comply. This would mean more treatment disruption and greater administrative burden, but it would not generate significant additional savings.

3. Office of Pharmacy Purchasing. Without an Office of Pharmacy Purchasing, OHA lacks the resources to effectively support multi-agency and multi-state innovations that could leverage purchasing power and drive savings. Additionally, OHA would continue to struggle to respond to future emergencies and disasters that impact the pharmacy supply chain. Current OPDP staffing levels are insufficient to support the Office of Pharmacy Purchasing described in this policy package.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

1. PDL Enforcement Authority. OHA responded to questions to explain the agency's continued authority to enforce the PDL.

2. Pharmacy Cost/Risk Management. OHA engaged CCOs and consulted with Myers & Stauffer on the costs and benefits of a partially aligned PDL. OHA presented the results of this work to the Oregon Health Policy Board, including their recommendation to include a partially aligned PDL in the initial CCO 2.0 plan. Full implementation required legislative change through House Bill 2678 (2019), but the bill did not pass.

3. Office of Pharmacy Purchasing. OHA directed the OPDP Director to oversee Medicaid Pharmacy programs to allow his position to be federally matched at a 50 percent rate. This is problematic long-term if the OPDP Director is to lead non-Medicaid work as well, including statewide pharmacy responses to emergencies such as COVID-19. The OPDP Operations Manager position has been offset partially by OPDP discount funds, but only for a couple of months each calendar year. The OPDP Director is currently taking actions to leverage statutory authority to better establish a funding stream for OPDP staffing. However, this revenue stream will not be established until January 2022. The OPDP has had to rely on a third-party administrator to manage wholesaler and pharmacy benefit manager relationships, which has minimized the OHA's influence and ability to directly represent OHA interests.

10. What alternatives were considered and what were the reasons for rejecting them?

1. PDL Enforcement Authority. OHA considered keeping the status quo but rejected the option because it would cause continued uncertainty and confusion for stakeholders.

2. Pharmacy Cost/Risk Management. OHA considered each of the options below:

- Request legislative authority to continue the status quo (i.e., to allow CCOs to continue to administer their own PDLs). OHA rejected this option because the best current guidance shows it would be a missed savings opportunity.
- Carve out all pharmacy benefits from CCO global budgets and cover those benefits directly on a Federal Funds-basis. OHA rejected this because we do not yet know the potential savings, client and provider impacts, CCO impacts, resource demands, or other advantages or disadvantages of this approach.

3. Office of Pharmacy Purchasing. Contracting for this body of work would introduce potential conflict of interest as most firms possess a bias that favors one or more element of the supply chain.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

Yes. Changes are described in the associated Pharmacy Omnibus Legislative Concept, and include amendments to ORS 414.325, 414.334 and 414.337.

For the new Office Pharmacy Purchasing and OPDP to forge wholesaler relationships, ORS 414.312 (7)(b) would need to be amended. Similarly, ORS 414.312 (7) (a) should be amended to allow OHA to directly contract with PBMs to reduce administrative costs.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

The Office of Pharmacy Purchasing and OPDP could assist other agencies choosing to engage in multi-agency innovations around purchasing. Additionally, multi-state innovations could provide mutual benefit to interstate agreements and the consortium established by OPDP with Washington Prescription Drug Program.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

No other agencies, programs or stakeholders are collaborating on this policy.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

The Office of Pharmacy Purchasing would help establish programs that support all vulnerable and marginalized populations who suffer from health inequities. The Office of Pharmacy Purchasing would work with OPDP, which already works with Oregon's medical assistance program and serves some of Oregon's most vulnerable citizens.

Staffing and fiscal impact

Implementation date(s):	The aligned PDL would be incorporated into CCO contracts starting January 1, 2022. The Office of Pharmacy purchasing could be stood up within six months.
End date (if applicable):	Ongoing

15. What assumptions affect the pricing of this policy package?

New OPDP contract commences January 1, 2022 through end of 2026 (eligible for up to five additional years), which could include an improved revenue stream to generate Other Funds.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

OHA would collaborate with CCOs to adopt and maintain a partially aligned PDL. This would occur through a newly formed subcommittee to the current Pharmacy and Therapeutics (P&T) Committee. OHA would incorporate necessary CCO capitation and contract changes.

The Office of Pharmacy Purchasing would be established with specific responsibilities as outlined in this policy package. There would be additional responsibilities for the Medicaid program and P&T Committee to establish a PDL and changes to pharmacy program administration.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

None.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No caseload or service changes are anticipated as a result of this policy package.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

All requested new positions are permanent, full-time and priced for 23 months of the 2021-23 biennium.

1. PDL Enforcement Authority: None.

2. Pharmacy Cost/Risk Management: Establish one Administrative Specialist 2 position to support the subcommittee.

3. Office of Pharmacy Purchasing:

Existing Staff:

- Shift funding for the OPDP Director (Principle Executive Manager G) from 50 percent General Fund and 50 percent Federal Funds to 75 percent General Fund and 25 percent Federal Funds. This shift would allow the OPDP Director to expand beyond Medicaid pharmacy work and allow the director to lead on Non-Medicaid pharmacy work and lead statewide pharmacy responses to emergencies.
- Reclassify the OPDP Operations Manager from an Operations and Policy Analyst 3 to an Operations and Policy Analyst 4 classification and shift funding from 100 percent Other Funds to 25 percent General Fund and 75 percent Other Funds because current Other Funds revenue cannot support the additional costs associated with the reclassification.

New staff:

- Establish one Operations and Policy Analyst 4 position to support multi-agency and multi-state policy and programs.
- Establish one Operations and Policy Analyst 3 position to support contract administration of multiple intra-agency, intergovernmental agreements. Assist with policy and program operations and oversight of contractors.
- Establish one Operations and Policy Analyst 2 to support the day-to-day operations of the various programs and stakeholder inquiries coming into the Office Pharmacy Purchasing.

Due to the uncertainty regarding the ongoing demands on staff related to the COVID-19 emergency and the potential to onboard other states into the Consortium, which would put further demand on staff time and program resources, further staffing or contracting resources could be required.

20. What are the start-up and one-time costs?

There are no known start-up or one-time costs.

21. What are the ongoing costs?

Staffing costs for three new positions, as identified above, would be ongoing.

22. What are the potential savings?

1. PDL Enforcement Authority. None.

2. Pharmacy Cost/Risk Management. Expected savings, but indeterminate. Without further study to determine how many clients utilize the drugs on the PDL, the impact the increased costs would have on CCO rates, the additional administrative costs, and the amount of drug rebates cannot be calculated to determine the potential savings. To the extent savings occur, they will be reflected in subsequent years' CCO rates, which are based on past expenditures, and incorporated into OHA's budget as part of the capitation rates for CCO-enrolled OHP members.

3. Office of Pharmacy Purchasing. While multi-agency and multi-state collaboration around purchasing could decrease net costs to the state, quantifying this amount is difficult. However, through its 13-year history, the NW Prescription Drug Consortium has demonstrated that, in working together, Washington and Oregon have provided services at a fixed and predictable administrative cost, and designed a pharmacy benefit management

product that delivers 100 percent passthrough of rebates collected, and passes through all overperformance on pricing guarantees to participating entities, resulting in substantial savings.

23. What are the sources of funding and the funding split for each one?

1. PDL Enforcement Authority. No costs are associated with this policy clarification.

2. Pharmacy Cost and Risk Management. Position would be eligible for 50 percent federal Medicaid match.

3. Office of Pharmacy Purchasing. Federal matching funds would be from Medicaid and Other Funds would be from OPDP fees.
   - OPDP Director (PEM G) would be funded with 75 percent General Fund and 25 percent Federal Funds.
   - OPDP Operations Manager (OPA 4) would be funded with 25 percent General Fund and 75 percent Other Funds.
   - The three new positions would be funded with 100 percent General Fund.

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE

Oregon Health Authority
2021-23 Policy Package

Division:	Health Policy & Analytics
Program:	Health Policy
Policy package title:	Strengthen Purchasing Power of the Marketplace
Policy package number:	437
Related legislation:	Legislative Concept 18

Summary statement:

This policy package would move the health insurance Marketplace from the Department of Consumer and Business Services (DCBS) to the Oregon Health Authority (OHA), creating greater opportunities for aligned policy, which would utilize all state levers to maximize opportunities for greater alignment in pursuit of the triple-aim.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$1,516,499**	**$18,048,275**	**$0**	**$19,564,774**	**19**	**19.00**

Oregon Health Authority: 2021-23 Policy Package

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

Over the next two years, Health Policy and Analytics (HPA) expects to be responding to the enormous disruption of COVID -19 by adopting targeted policy and program changes that stabilize the health system and health insurance coverage and allow us to rebuild a more sustainable and equitable system for the long term. One of the most important levers for spreading change across markets is aligning the state's purchasing power across public purchasers.

Oregon needs to better leverage the state's health care purchasing power in order to contain costs.

- Health care coverage remains insufficient and unaffordable for many. In 2017, 8 percent of families had problems paying medical bills.
- With health insurance coverage at record highs and uncompensated care for providers at record lows, there's an opportunity for Oregon to leverage its purchasing power to contain costs for more Oregonians.
- The state has not maximized opportunities to fully align benefits and purchasing across all public programs and looks to expand the purchasing power available to the Oregon Health Insurance Marketplace (Marketplace). The Oregon Health Authority (OHA) is unable to "move the market" by utilizing all public payer levers available to support health care policy reforms because the Marketplace is apart from OHA, in the Department of Consumer and Business Services (DCBS).
- Reducing health care costs allows resources to go to wages and other critical investments.

This policy package would move the Marketplace to OHA to create greater opportunities for aligned policy that utilizes all state levers to maximize opportunities for alignment in pursuit of the Triple Aim of better health, better care, and lower costs.

2. What would this policy package buy and how and when would it be implemented?

The policy package would provide OHA with greater opportunities for aligned policy by utilizing all state public health care payors to maximize opportunities for greater alignment in pursuit of the triple-aim. Transferring the marketplace will assist in this by providing OHA with leverage over a larger population pool.

3. How does this policy package further OHA's mission and align with its strategic plan?

The result to consumers and taxpayers is a much more sustainable health care system for the entire state, in line with the Triple Aim and the Governor's health care policy priorities as well as OHA's strategic plan.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

Success is expected to yield no gaps in services for Marketplace stakeholders. Services include:

- Ensuring Oregonians can access qualified health plans through the Oregon health insurance exchange.
- Reviewing health plans to determine whether they meet certification/recertification standards required for and sale through the exchange as qualified health plans.
- Determining whether a health benefit plan offered by an employer provides affordable minimum essential coverage.
- Assisting individuals to enroll in qualified health plans.
- Facilitating community-based assistance with enrollment by awarding grants to entities certified as navigators or in-person assisters and application counselors.

- Facilitating enrollment via operating a call center.
- Administering the COFA Premium Assistance Program.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

To be determined.

7. What are the long-term desired outcomes?

For Oregonians:

- An affordable, stable, predictable health system: Health care costs no longer outpace family and household incomes, freeing up resources for wage growth and important state services.
- Improved quality and population health: The health care system is working together to keep patients healthy and improve the quality of care they receive.
- Improved patient experience: All patients have timely access to high quality care. They receive the right care at the right time in a coordinated system that puts patients in the center.
- Local flexibility: Employers have access to sustainable, high-value health care with flexibility to provide unique benefit offerings.

For providers:

- Stable, predictable revenue: By moving from a system that pays for volume of care to one that pays for value, providers will have more stable, predictable revenue that grows within a sustainable rate of growth.
- Administrative streamlining and efficiency: By aligning payment models and metrics, providers can

spend more time helping their patients and less time on paperwork.

- Local flexibility and accountability: The State will set broad expectations but allow local communities to innovate to best meet the goals within a sustainable budget.

8. What would be the adverse effects of not funding this policy package?

Health care policymaking is fragmented given the Marketplace's housing within DCBS. This inhibits OHA's ability to "move the market" by utilizing all public payer levers available to support health care policy reforms. The result is fractured public-payer policy implementation.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

OHA and DCBS have worked together to deliver the State's health care policy goals, including expanded coverage, aligned quality measures and payment reforms designed to improve quality and reduce costs. However, these efforts have had limited effectiveness in "moving the market" due to the divided leverage over public payers between DCBS and OHA.

10. What alternatives were considered and what were the reasons for rejecting them?

See Question 9 response.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

Yes. This policy package supports legislative concept #18 that transfers the Marketplace from DCBS to OHA. The concept would amend the following statutes: ORS 413.011, 735.601, 735.608, 735.611, 735.617, 741.002,

741.003, 741.004, 741.101, 741.102, 741.105, 741.108, 741.220, 741.222, 741.310, 741.390, 741.400, 741.500, 741.510, 741.520, 741.540, 741.802, and 741.900. It would repeal ORS 735.611.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

No affect.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

Department of Consumer and Business Services

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

Transitioning the Marketplace to OHA would better align policy making and purchasing power for the state's public-payers, leading to a more stable health care solution and potentially lower, more stable Marketplace premiums.

Staffing and fiscal impact

Implementation date(s): July 1, 2021

End date (if applicable): Ongoing

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

15. What assumptions affect the pricing of this policy package?

Assumes the transfer to OHA of all the moneys in the funds established under ORS 735.617 and 741.102 and any unexpended balances of amounts authorized to be expended by the Department of Consumer and Business Services, from revenues dedicated, continuously appropriated, appropriated or otherwise made available for the purpose of administering and enforcing the duties and functions are transferred to the Authority exclusively for the purpose of administering and enforcing the duties and functions of the Marketplace including the COFA Premium Assistance Program.

Assumes moneys appropriated to the COFA Premium Assistance Fund and Marketplace Fund for the 2019-21 biennium are not decreased by the legislature for the 2021-23 biennium.

Assumes all employees of the Department of Consumer and Business Services Marketplace, including the COFA Premium Assistance Program, become employees of the Oregon Health Authority Marketplace in their same capacities, positions, classifications and steps.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

OHA would assume ownership and responsibility from DCBS for implementing and maintaining all the duties and functions associated with operating the Marketplace. All DCBS staff working on the Marketplace would be transferred to OHA to perform the current duties associated with the Marketplace.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

Assumes no new responsibilities beyond the standard impact of new positions.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

Client caseload associated with the Marketplace is assumed to be at the same level as currently served by DCBS.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

The following Marketplace permanent, full-time positions would be transitioned to OHA:

- One Principal Executive Manager G position
- One Principal Executive Manager E position
- Eight Operations & Policy Analyst 4 positions
- One Operations & Policy Analyst 3 position
- One Operations & Policy Analyst 2 position
- One Program Analyst 3 position
- Five Program Analyst 2 positions

20. What are the start-up and one-time costs?

None identified at this time.

21. What are the ongoing costs?

All positions and program costs.

22. What are the potential savings?

Any potential savings resulting from the transfer is unknown at this time.

23. What are the sources of funding and the funding split for each one?

The Oregon Health Marketplace is funded by assessments paid by insurance companies on plans purchased by Oregonians through the marketplace on HeathCare.gov, 100 percent Other Funds.

In addition to General Fund appropriated to the COFA Premium Assistance Program Fund, 100 percent Other Funds that would also be transferred from DCBS to OHA.

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Personal Services		$5,104,723		$5,104,723	19	19.00

Oregon Health Authority
2021-23 Policy Package

Division:	Health Systems Division
Program:	Medicaid
Policy package title:	Ground Emergency Medical Transportation (GEMT)
Policy package number:	438
Related legislation:	House Bill 4030 (2016)

Summary statement:

This policy package requests Other Funds and Federal Funds limitation as well as position authority for two positions needed to manage the Ground Emergency Medical Transportation (GEMT) program. Statute prevents the Oregon Health Authority (OHA) from using General Fund for the GEMT program and instead grants OHA the authority to charge fees to participating providers. OHA made this request during the 2020 legislative session, but due to developments in the legislative process the request was not approved. Not approving this policy package would put an estimated $33.7 million in Federal Funds at risk.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$0**	**$22,458,774**	**$33,721,446**	**$56,180,220**	**2**	**2.00**

Oregon Health Authority: 2021-23 Policy Package

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

In House Bill 4030 (2016), the Legislature required the Oregon Health Authority (OHA) to develop and implement an intergovernmental transfer (IGT) program to help offset uncompensated costs associated with providing emergency medical transport services. Statute prevents OHA from using General Fund to manage the program and allows OHA to charge an administrative fee to participating providers. In 2019, after developing the framework of the program, the Health Services Division (HSD) has gained a better understanding of the workload involved in the implementation and management of the program. OHA made this request during the 2020 legislative session, but due to developments in the legislative process the request was not approved.

2. What would this policy package buy and how and when would it be implemented?

This policy package requests Other Funds and Federal Funds limitation as well as position authority for two positions needed to manage the Ground Emergency Medical Transportation (GEMT) program. House Bill 4030 set up two separate IGT programs: one to work with providers who provide services to fee-for-service (FFS) clients and another to work with providers who contract their services through coordinated care organizations (CCOs). Participation in this program is voluntary for the providers.

The requested limitation would only cover providers who serve fee-for-service clients. The supplemental payment under the IGT covers the gap between the eligible GEMT providers total allowable costs for providing GEMT services as reported on the Centers for Medicare and Medicaid Services (CMS) approved cost report and the amount of the base payment, mileage, and all other sources of reimbursement. Total reimbursements, including the supplemental payment, must not exceed one hundred percent of actual costs. The supplemental payments would be made annually on a lump-sum basis after the conclusion of each state

fiscal year. These payments are not an increase to current fee-for-service (FFS) reimbursement rates. CMS approved the Oregon state plan amendment (SPA) effective July,1, 2017, making state fiscal year 2018 the first year providers were eligible to claim reimbursement. For state fiscal year 2018, a total of 43 providers submitted the necessary cost reports. An additional 20 providers have expressed an interest to participate but have not submitted the necessary reports at the time of writing.

The second portion of the bill was designed for providers contracted with CCOs. This portion of the program is in development and has not yet received approval from CMS. We do not anticipate any payments under this program until at least the second half of 2021-23, if approved by CMS. Upon approval this OHA will request limitation specific to this portion of the program.

3. How does this policy package further OHA's mission and align with its strategic plan?

OHA's mission is ensuring all people and communities can achieve optimum physical, mental, and social well-being through partnerships, prevention, and access to quality, affordable health care. GEMT providers are a critical component of Oregon's health care system. This policy package would provide much needed federal funding to support their valuable work.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

Success would be demonstrated in terms of smooth operation of the program. Providers would receive clear direction and useful technical support. Their payments would be on time and accurate.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

No.

7. What are the long-term desired outcomes?

Improved financial stability for eligible GEMT providers and dependable service for OHP members across the state.

8. What would be the adverse effects of not funding this policy package?

Under House Bill 4030 (2016) the agency is obligated to set up and manage this intergovernmental transfer, leveraged program. This policy package would grant authority for the agency to collect and expend state share and administrative fees from participating providers for the purpose of managing this program. Without the requested limitation and position authority to manage the program, an estimated $33.7 million Federal Funds would be put at risk and the agency would not be able to comply with House Bill 4030 and could be open to potential litigation from the affected parties.

9. What actions have occurred to resolve the issue prior to requesting a policy package?

HSD requested the necessary limitation and two positions to manage this program during the 2020 legislative session, but due to developments in the legislative process, the request was not approved.

10. What alternatives were considered and what were the reasons for rejecting them?

OHA has limited alternatives. Statute prevents OHA from using General Fund to manage the program and the position is necessary to continue administering the fee-for-service and CCO GEMT programs.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Local government agencies are the eligible GEMT providers. Through the IGTs they would be able to receive significant federal funding.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

None.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

This program would have a broad positive impact for OHP members and their communities; however, it is not designed to target inequities or specific disadvantaged populations.

Staffing and fiscal impact

Implementation date(s): July 1, 2021

End date (if applicable): Not applicable

15. What assumptions affect the pricing of this policy package?

- After the first round of payments for uncompensated expenditures, all FFS providers would decide to participate.
- The distribution of clients across different eligibility groups would remain constant.
- The proportion of uncompensated expenditures would remain constant relative to providers' expenditures.
- The rate of change of Federal match (FMAP) rate would remain relatively the same.
- Any increased costs, due to additional participation, may result in further limitation requests.
- The CCO portion of the program is in development and has not yet received approval from CMS. We do not anticipate any payments under this program until at least the second half of 2021-23, if approved by CMS. This request does not include the CCO portion of the program.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

Yes. The Health Systems Division would:

- Collect and review the cost reports from participating providers from across the state.
- Coordinate with all participating providers.
- Produce an estimate of fees (both a state share fee and an administrative fee), to be collected from each provider.
- Collect fees and issue payments to participating providers.
- Develop a GEMT program for providers who serve CCO clients.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

Shared Services, Office of Financial Services, would collect revenues, process payments and reconcile all transactions by category. These activities can be accomplished with the existing resources.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

- One permanent, full-time Operations and Policy Analyst 2 position to direct and lead day-to-day work associated with the GEMT program, including ensuring payment integrity, developing administrative rules

and state plan amendments, monitoring for compliance, providing technical support and resolving issues as they arise.

- One permanent, full-time Fiscal Analyst 2 position to review quarterly GEMT cost reports from providers and approve or deny based on criteria. Prepare and execute GEMT supplemental payments.

20. What are the start-up and one-time costs?

None.

21. What are the ongoing costs?

The costs for two positions to administer this program.

22. What are the potential savings?

None.

23. What are the sources of funding and the funding split for each one?

This program is funded by two different fees paid by participating providers: an administrative fee and state contribution fee (both Other Funds), and the Federal contribution (match). The rate of federal contribution (FMAP rate) is based on the eligibility category of the clients served.

Oregon Health Authority: 2021-23 Policy Package

Oregon Health Authority
2021-23 Policy Package

Division:	Oregon State Hospital
Program:	Salem Campus
Policy package title:	Complex Case Management Team (Acuity Team)
Policy package number:	439
Related legislation:	None

Summary statement:

Oregon State Hospital is proposing the addition of a highly skilled complex case management team to respond to patients experiencing a behavioral emergency secondary to mental illness. This team would assist with development of individualized interventions through their observations of patients in behavioral crisis and work with direct care staff by providing expertise in milieu management.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$3,204,043**	**$0**	**$0**	**$3,204,043**	**15**	**13.20**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

Patients are admitted to the Oregon State Hospital with complex co-morbidities and treatment resistant mental illness. These patients require highly skilled staff and resources to address their precarious symptomology, including physical aggression toward staff and other patients that can result in staff and patient injuries. The resources required to effectively treat these individuals includes a team of highly trained staff to assist in the development, education and implementation of highly specialized interventions to address the symptoms of a patient's illness and subsequently decrease the risk for violence.

Historically, OSH has relied on Enhanced Supervision (also referred to as "Precautions" or "Constants"), assigning additional staff for specific periods of prescribed time to assist solely with managing patient symptoms on various patient to staff ratios. However, this resource intensive intervention has recently been limited, as it lacked the clinical focus necessary to successfully address the problem behavior.

2. What would this policy package buy and how and when would it be implemented?

This current package attempts to address the underlying complex clinical issues and treatment resistant symptoms that result in safety concerns. This policy package would establish a roving clinical team of highly trained and skilled staff to intervene in times of crisis to assist with the assessment of the behavioral emergency, development of specialized interventions, and staff education directed at treating the underlying conditions. With this clinical team, OSH would be able to more effectively identify triggers and reduce the risk for staff and patient injuries. Supporting patients and others in this way would lead to positive patient progress and recovery. The package allows OSH the opportunity to provide a more person-centered, trauma informed approach to treatment of the individual presenting with complex mental illness.

This package would establish 15 positions, which would ensure a roaming acuity team is available 24 hours a day and 7 days a week. This team would be comprised of mental health therapists, behavioral health specialists, training and development specialists, Registered Nurses, and a psychologist. This team would not be stationed on an individual unit but would respond as necessary to new admissions, complex patient cases, or critical rising acuity to offer milieu stabilization and support. The team would be proficient in direct patient engagement, Collaborative Problem Solving, Motivational Interviewing, Safe Together, de-escalation techniques, milieu management, and teaching and coaching nursing staff.

Implementation would include recruiting and hiring the positions. The roving team would be deployed based on identified clinical thresholds of seclusion and/or restraint, acts of aggression towards other patients, staff, or attempted self-harm and suicidal ideation. They would also respond on duty during behavioral emergencies to assist with de-escalation, milieu management and development of highly individualized interventions to treat the those suffering from the most complex symptoms and co-morbidities.

3. How does this policy package further OHA's mission and align with its strategic plan?

OSH as an institution provides specific care to a marginalized population. This package specifically attempts to help minimize behavioral episodes that prevent that care for a period of time both during and after the episode that will vary according to the severity of the episode that occurred. Containing these episodes impacts care across the milieu and helps to provide more equitable care across all population types. Early intervention and de-escalation by skilled staff will likely reduce restrictive events such as seclusion, restraint and hands-on intervention. In turn, this will reduce the rate of staff injuries with a corresponding decrease in days away from work. Reduction in these events will reduce traumatizing experiences for both patients and staff and better support quicker and more sustained recovery.

This package aligns with OHA's mission to ensure all people and communities can achieve optimum physical, mental, and social well-being through partnerships, prevention, and access to quality, affordable health care.

Containing any behavioral incident early in the process promotes a better therapeutic environment for both patients impacted – including the one experiencing the behavioral incident, and OSH staff. This package also supports one of OSH's four cornerstones: patient and staff safety, by increasing the likelihood of avoiding any escalation to physical aggression.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

OSH would use the following metrics to determine the success of this complex case management team: number of Seclusion/Restraint, duration of Seclusion/Restraint, duration of 1 to 1 Enhanced Supervision (precaution) orders, number of staff and patient injuries, rate of recidivism, rate of transfers to a higher level of care. OHA anticipates the metrics identified above would decrease as a result of the work of this team.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

This package aligns with the OHA core values of Health Equity, Service Excellence, Leadership, and Innovation by seeking an improved response to a complex situation and promotion of independence and recovering in the least restrictive environment as possible. The package aligns with the OHA Core Processes of Improving Clinical and Population Health; as this package both identifies desired outcomes and opportunities for innovation and prevents health challenges while promoting whole person health.

7. What are the long-term desired outcomes?

OHA anticipates the following long-term outcomes would be experienced by both patients and staff:

- Fewer restrictive events such as seclusion, restraint and hands-on intervention.
- Reduced rate of staff injuries with a corresponding decrease in days away from work.
- Fewer traumatizing experiences for both patients and staff.
- Faster delivery of high-quality support for and more sustained recovery from crises and behavioral emergencies.

8. What would be the adverse effects of not funding this policy package?

Without this funding, current processes will continue. Oregon State Hospital will continue to try and manage these highly complex patients with multiple co-morbidities and associated traumas in higher levels of care. Additionally, it would negate the ability to increase the therapeutic value of individualized interventions, especially in the time of crisis, increasing the likelihood of continued aggression resulting in injuries and extended stays in the most acute units.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

The use of 2:1 and 3:1 staff to patient ratios in Enhanced Supervision (Precautions) was an attempt to address complex symptoms of mental illness, most notably violent outbursts resulting patient and staff injuries as identified above. However, this intervention did not effectively treat the underlying conditions and symptoms as not all nursing staff executing the interventions have the clinical skill to independently interpret, and therapeutically execute, clinical interventions with the most complex patients. The protocol resulted in budget overspend without a proportional increase in treatment or safety. Through evaluation of this intervention, it was identified that while additional staff performing direct enhanced supervision may increase the perception of

safety, the data do not support that enhanced supervision improves actual safety. Recently, there has been a clinical emphasis to reduce to the use of 2:1 and 3:1 intervention due to the level of restrictiveness and lack of therapeutic value.

OSH has also attempted to manage these highly complex cases through patient care conferences and Program Executive Team Reviews, however, this has not been wholly effective as it adds additional patient caseload to teams, specifically clinical practitioners that already carry a full caseload.

Attempts to create this team with current positions have been made in the past. Due to the current capacity of clinicians and others who possess the desired skill set of the requested team, the effort has failed at sustaining the necessary focus and development of individualized interventions during crisis to have a marked impact on the desired metrics. The Program Executive Teams continue to review cases and Oregon State Hospital continues to have Patient Care Conferences in attempts to meet this need, however, this work requires prioritization on behalf of clinicians who have many competing demands.

10. What alternatives were considered and what were the reasons for rejecting them?

Available alternatives consist of either re-implementation or expansion of the actions described above, some of which would require more costly additions to clinical practitioner staff. This has led to the development of this package and the desire to pursue the concept with a specific team of dedicated employees.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

None.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

None.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

This package would significantly help those suffering from severe mental illness, who present with complex cases including medical co-morbidities as they are often under-served due to lack of resources and/or homelessness. Oregon State Hospital is intent on building skills within these individuals that will have a lasting impact on their ability to live successfully at the lowest level of care possible.

Staffing and fiscal impact

Implementation date(s): October 1, 2021

End date (if applicable): Ongoing

15. What assumptions affect the pricing of this policy package?

Pricings are based on the positional needs previously discussed priced at 21 months of the 2021-23 biennium and assume recruitment is completed at that time. Registered Nurse positions are priced at step 5 (as base).

16. Will there be new responsibilities for OHA?

No.

17. Will there be new responsibilities for or an impact on Shared Services?

No.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

Any adjustment in services or caseloads would only be internal to Oregon State Hospital.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This package would establish a total of 15 new permanent, full-time positions, divided into the various days and shifts to be present 24 hours a day and 7 days a week, to serve as a roaming acuity team. This team would be comprised of:

- Five Mental Health Therapist 2 positions
- Three Behavioral Health Specialist 2 positions
- Three Training & Development Specialist 2 positions
- Three Registered Nurse positions
- One Psychologist position

20. What are the start-up and one-time costs?

There are no one-time costs associated with this policy package.

21. What are the ongoing costs?

All costs are associated with the requested positions and would be ongoing.

22. What are the potential savings?

While OSH would not be able to attribute savings associated with this policy package. OSH expects this package would contribute to overall health and safety at the hospital, possibly decreasing medical expenses and overtime or other related coverage expense resulting from reductions in staff time off due to injury. OSH is unable to estimate when these savings would occur.

23. What are the sources of funding and the funding split for each one?

This package would be General Fund only.

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE

Oregon Health Authority
2021-23 Policy Package

Division:	Health Policy and Analytics
Program:	Health Policy
Policy package title:	Employer Health Care Responsibility
Policy package number:	440
Related legislation:	Legislative Concepts 16 and 17

Summary statement: This policy package would develop and implement employer health care responsibility program.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$443,272**	**$0**	**$0**	**$443,272**	**2**	**1.76**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

Too many workers are ineligible for or not offered health coverage through their employers. Despite Oregon's health insurance coverage rate of 94 percent, too many Oregonians remain uninsured or underinsured and struggle to pay for coverage and out-of-pocket health care costs. At the same time, public programs are subsidizing employers that pay relatively low wages and do not provide health care coverage or whose workers cannot afford the coverage offered through their employer.

Of the 1 million workers in Oregon who are employed by large employers (companies with 50 or more employees), approximately one in four are either ineligible or not offered health care coverage through their employer. Another 150,000 are offered but not enrolled in employer health care coverage. In the third quarter of 2017, approximately 90,000 Oregonians working part-time to full-time for large employers were enrolled in the Oregon Health Plan. These employees are most likely to work in industries such as health care, retail, food service and hotels.

2. What would this policy package buy and how and when would it be implemented?

This policy package accompanies a 2021 legislative concept to create an employer health care responsibility program that would require large employers to spend a certain amount on health care for each worker. The concept is designed to increase employer investment in their employees' health care and to provide new coverage options for individuals who cannot afford or who are not offered health coverage through their employer. The legislative concept would also create a potential funding mechanism for the Oregon Health Plan (OHP) and for a new state subsidy for individual health insurance.

This policy package would enable OHA to further develop and refine the details of an employer health care responsibility program and the accompanying program to offer new coverage options to the workers of employers that choose to pay into a state fund rather than spend directly on their employees' health care.

3. How does this policy package further OHA's mission and align with its strategic plan?

This policy package is designed to support OHA's efforts to increase health insurance coverage in Oregon and to bolster the financial sustainability of the Oregon Health Plan. Additional financial stability of the Oregon Health Plan could enable greater state investment targeted at improving health equity broadly and access to health care services specifically. Furthermore, additional policy development would be needed to ensure employer responsibility provisions are implemented in a way that improves health equity and protects people working for employers subject to the requirement.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

Success of the policy package would be determined if OHA is able to launch an employer responsibility program that increases health coverage in Oregon, either by increasing employer investment in their employees or by enabling more Oregonians without employer-sponsored coverage to purchase coverage on their own. Success would also be measured by the Oregon Health Plan being more financially secure.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

This policy package would not affect the operation of the Oregon Health Plan. However, implemented properly, a program to increase employer investment in the health and health care of their employees could achieve several outcomes that are the focus of OHA's Performance Management System. In particular, the policy package and associated legislative concept could help reduce health disparity, improve population health, improve quality of care, improve care experience, and lower health care cost.

7. What are the long-term desired outcomes?

The long-term desired outcome is to increase fiscal stability for OHP, to reduce instances of employers shifting health care cost to the state and increase health coverage options for employees both with and without employer-sponsored insurance. The employer cost-shifting refers to instances where workers receive health insurance coverage through the Oregon Health Plan as opposed to through an employer-sponsored plan. This can happen when employers do not offer coverage at all but can also occur because workers choose to enroll in Medicaid due to its lower premiums and cost-sharing requirements. This proposal does not seek to prevent workers from enrolling in OHP, but rather to establish a path for employers to contribute towards the cost of the program.

8. What would be the adverse effects of not funding this policy package?

Without this policy package, OHA would not be able to develop the policy details that would enable the state to effectively implement an employer health care responsibility program.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

OHA has invested considerable staff time to develop and analyze potential details of an employer responsibility program as directed by the Governor's Office. Several challenges and hurdles have been identified that would necessitate additional resources and policy development to solve. Implementing an employer responsibility program would require further analysis and detailed policy development to ensure successful implementation in a way that minimizes unintended consequences for OHP enrollees and other workers at employers that do not comply.

10. What alternatives were considered and what were the reasons for rejecting them?

OHA considered alternatives but these options were rejected due to federal law preemption.

OHA considered ideas previously considered by the legislature such as creating a financial penalty for employers based on the number of their workers enrolled in Medicaid. Creating such a penalty was rejected for several reasons, including concerns related to OHP-enrollee privacy concerns that could stem from their employers knowing they are enrolled in OHP, risk of employers seeking to hold employees liable for the financial penalty issued to the employer, and the risk that employers could change hiring practices to limit hiring of OHP enrollees.

OHA also considered issuing more direct coverage requirements for employers in Oregon, but the state is prevented from doing so by federal law know as the Employee Retirement Income Security Act of 1974 (known commonly as ERISA).

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

This policy package is being sought in conjunction with a legislative concept to statutorily establish an employer responsibility to spend on employee health care.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

The initial legislative concept would exempt public employers from new spending requirements, but if that exemption is removed then local governments and state agencies would be responsible for complying with the new spending requirement. This could increase administrative costs for public employers. Similarly, for tribal governments – if they are subject to the spending requirement they could face additional administrative and compliance costs.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

Several other state agencies would play a role in the implementation of the legislative concept that accompanies this policy package, including the Department of Revenue, Department of Consumer & Business Services, the Employment Department, the Treasury, the Department of Labor, and potentially others.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

This policy package is designed to increase affordable access to health insurance coverage. Low-income populations are less likely to have affordable health coverage options through their employers and the

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

accompanying legislative concept would establish their right to employer health care spending. At the same time, there are potential unintended consequences if employers alter hiring practices to limit their financial liability and there's significant uncertainty as to how such employer responses could affect populations impacted by health inequities.

Staffing and fiscal impact

Implementation date(s): October 1, 2021

End date (if applicable): Not applicable.

15. What assumptions affect the pricing of this policy package?

It could take OHA and other state agencies a year or more to develop rules and program structures to implement an employer responsibility program if one is enacted by the Legislature. Additional administrative costs could emerge in future years based on the specifics of any program enacted.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

OHA would likely have a major role in setting the employer spending requirement in the accompanying legislative concept. This would require additional analysis to estimate potential employer contributions to a newly created fund and to estimate employer response and how the response affects the Oregon Health Plan and Oregon's workers generally.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

It is impossible to determine how OHP caseloads could be affected by this policy, especially given the current economic situation in the wake of the COVID-19 pandemic.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

Additional Operations and Policy Analyst position in the Office of Health Policy would be needed to oversee policy associated with the employer spending requirement and the employer responsibility program broadly. Staff would be needed to perform analysis on the impact of setting a specific spending requirement and to determine the proper spending requirement.

20. What are the start-up and one-time costs?

Not applicable.

21. What are the ongoing costs?

Staff would be needed continually to oversee the program and the spending requirement.

22. What are the potential savings?

The accompanying legislative concept includes a potential revenue source to fund the Oregon Health Plan. The potential amount of this revenue would depend on the final structure of the accompanying concept and the employer response to its requirements. It is unclear whether potential revenue envisioned by the concept would be received during the 2021-23 biennium.

23. What are the sources of funding and the funding split for each one?

General Fund.

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE

Department of Human Services and Oregon Health Authority
2021-23 Policy Package

Division:	DHS & OHA
Program:	Integrated Eligibility (IE) / integrated ONE
Policy package title:	IE Maintenance and Operations Post-Implementation
Policy package number:	206
Related legislation:	None

Summary statement:

This policy package requests permanent resources for DHS and OHA/OIS to support the transition from the IE project to the integrated ONE program through the 2021-23 biennium and into the future biennia. The requested resources and funding will provide stability and continued support for the Integrated Eligibility (IE) program. The Integrated Eligibility initiative is a multi-biennium effort to develop a comprehensive unified system called integrated ONE that integrates eligibility determination for MAGI and Non-MAGI Medicaid, Supplemental Nutrition Assistance Program (SNAP), Temporary Assistance for Needy Families (TANF) and Employment Related Day Care (ERDC) benefits. The IE program represents an essential lifeline to vulnerable Oregonians in need.

It should be noted that the integrated ONE system will be implemented statewide before July of 2021. Following implementation there will be a substantial stabilization period to resolve defects and to help staff adjust to the new system. As the project transitions to Maintenance and Operations (M&O), the resource gaps must be addressed to sustain this substantial investment.

This policy package is meant to address three critical areas:

Resource Gaps and Staffing Challenges
To sustain this substantial investment, this policy package is addressing the resource gaps not recognized in the 2019-21 biennium for M&O.

Stabilization and Post-Implementation Support
This policy package requests permanent resources for DHS and OHA/OIS to support the transition from the IE project to the integrated ONE program through the 2021-23 biennium and into future biennia.

Funding to Support M&O
M&O is key to making sure that the system support Oregonians and that DHS/OHA can continue to receive funds under the maintenance and operational federal match.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
DHS	$54,114,124	$0	$79,310,358	$133,424,482	24	24.00
OHA	$518,347	$11,072,142	$726,694	$12,317,183	39	39.00
Total Policy Package:	**$54,632,471**	**$11,072,142**	**$80,037,052**	**$145,741,665**	**63**	**63.00**

Purpose

1. Why does DHS/OHA propose this policy package and what issue is DHS/OHA trying to fix or solve?

This policy package requests permanent resources to fill resource gaps and funding for DHS and OHA/OIS to support the transition from the IE project to the integrated ONE program through the 2021-23 biennium and into the future biennia. The requested resources and funding will provide stability and continued support for the Integrated Eligibility (IE) program. The Integrated Eligibility initiative is a multi-biennium effort to develop a comprehensive unified system called integrated ONE that integrates eligibility determination for Non-MAGI Medicaid, Supplemental Nutrition Assistance Program (SNAP), Temporary Assistance for Needy Families (TANF) and Employment Related Day Care (ERDC) benefits. The IE program is an umbrella under which multiple complex inter-dependent, yet disparate, bodies of work fall, and it represents an essential lifeline to vulnerable Oregonians in need.

Funding and position authority were received in the 2019-2021 session for some M&O activities; however, after two years and the system close to go-live, more is known as to what the required ongoing support needs are. It is important to note that M&O activities that are currently being filled by limited duration resources, rotational staff or contracted staff need to be filled by permanent staff to reduce expenses, high turnover and lost productivity.

The integrated ONE system will be implemented statewide before July of 2021. Following implementation there will be a substantial stabilization period. As a result, the following permanent resources and funding will be needed to support the IE program:

- Subject matter experts, testers, analysts, test case writers, site support, coordinators and leadership will need to continue to provide support services into the 2021-23 biennium

- Defect resolution experts and coordinators to manage the code releases in multiple environments
- Site support resources to help staff adjust to the new system
- Ongoing support of the Legacy systems relied upon by IE, such as:
- Changes made to the IE core system typically require changes to the legacy systems, which ultimately pays out benefits for Oregonians
- Test environments created to support user acceptance testing (UAT) and ongoing support and maintenance for the existing automated test suite were not included in previous funding requests
- Additional resources will be needed to ensure the environment and tools can support system changes, system enhancements and testing
- Disaster Recovery functionality for the IE core needs to remain intact and tested annually
- Duties that have been transitioned to OHA/OIS from DHS that the IE program is dependent upon:
- Ongoing support of the ONE VEC call center, which is relied upon by the IE Program
- PMO administrative services, such as, calendar management, receiving and sending correspondence, and providing reports
- Program Office resources to manage and support a program office versus a project office. The program will need resources to manage cost, scope, schedules, risks and issues, system change requests, deliverable management, testing, site support, reporting needs, governance, administrative support, quality control, and complex communications across several domains.
- On-going M&O support will be provided by Deloitte for the core system. Funding is requested through this policy package for those M&O expenses.

The IE program must meet the needs of the Oregonians in which it serves and as the project transitions to Maintenance and Operations (M&O), the resource gaps must be addressed to sustain this substantial investment.

In summary, this policy package is meant to address three critical areas:

Resource Gaps and Staffing Challenges
To sustain this substantial investment, this policy package is addressing the resource gaps not recognized in the 2019-21 biennium for M&O.

Stabilization and Post-Implementation Support
This policy package requests permanent resources for DHS and OHA/OIS to support the transition from the IE project to the integrated ONE program through the 2021-23 biennium and into future biennia.

Funding to Support the M&O Contract
M&O is key to making sure that the system support Oregonians and that DHS/OHA can continue to receive funds under the maintenance and operational federal match.

2. What would this policy package buy and how and when would it be implemented?

This policy package seeks a total of 63 permanent FTE (DHS-24, OIS-39) and funding for M&O for the IE program.

Permanent Positions to support the Program by filling resource gaps and to provide post-implementation support
The 2019-21 policy package provided limited duration positions and contractors to fill key positions during the design, development and implementation phase. Using limited duration and contractors for a large multi-year project, created significant staffing challenges. In general contractors are three times more expensive than permanent employees and some staffing contracts only allowed contractors to work 1,040 hours per year. Staff in limited-duration positions continue to look for permanent employment creating instability in the workforce

supporting this program. These challenges impact the business in the following ways: 1) High turnover rate 2) Loss of unique knowledge that is specific to DHS / OHA 3) Project team members had to train new contractor's continuously 4) Additional workload is assigned to already over-loaded staff.

Investing in permanent staff for the IE Program will help the organization achieve its strategic goals by providing resources that will be invested in stabilizing a critical system that delivers critical services to Oregonians, which are required by our Federal Partners (e.g., Centers for Medicaid and Medicare, Food and Nutrition Services, etc.).

High-Level Implementation Plan:

- Prioritize needed positions and begin hiring permanent staff immediately upon approval
- Establish the IE Program Management Office and transition from a project office to a program office, based on the M&O transition plan
- Execute the M&O program support and transition plan
- Issue the approved funding to the M&O contractor that supports the core system
- Stabilize the ONE system and provide post-implementation support

3. How does this policy package further DHS's and/or OHA's mission and align with its strategic plan?

The Integrated ONE solution will assist Oregonians achieve well-being and independence by providing timely and efficient eligibility determinations. It will allow a self-service option for Oregonians to apply through the applicant portal at times that are convenient for them, which in turn, would minimize the amount of time needed in DHS field offices to complete the application process. The system will generate notices in seven languages and five alternate formats, helping to reduce barriers for traditionally underserved populations. Integrate ONE solution improves access to program eligibilities and program benefits to some of Oregon's

most vulnerable populations. Reducing any wrong doors and consolidating access to services, providing individuals and households with greater opportunity to access benefits and services though the venue of their choice, online, by phone or within a single office space. Integrated ONE brings the disparate IT systems together, provides previously unavailable opportunities for service delivery improvements and moves the agency closer towards a no-wrong-door approach.

Operations of the Integrated ONE solution will require complex coordination systems, data and processes at an Enterprise level across multiple key program areas and agencies. Permanent resources will assist Oregonians from start to finish in providing timely and efficient eligibility determinations for the IE Program from a field office or a virtual eligibility center. Staff resources are required to support the technology enhancements, maintain the existing 150 system interfaces and support the system. The Applicant Portal is self-service for end-users, but backend work is required to ensure availability.

Performing this level of coordination improves access to care, safety, security and stability to Oregonians and moves us closer to sustaining a no-wrong-door approach.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will DHS/OHA measure the success of this policy package?

Success will be measured by using the following*:

- Customer Satisfaction: Through the use of surveys, the majority of Oregon citizens using the integrated ONE system will respond with a positive reply of good or excellent.
- Employee Engagement: Through the use of surveys, the majority of staff report medium or high levels of positive engagement with customers
- Accuracy: The integrated ONE programs, Non-MAGI Medicaid, SNAP, TANF, and ERDC show a 95 percent or better-quality control review rating
- Availability: The integrated ONE system has an uptime of 99.99 percent or better and any potential issues can be forecasted and addressed before they impact Oregon citizens
- Reporting: Through the use of several reporting methods that include ad hoc and federally required reporting.

* This policy package lays the foundation of the people and tools to be able to collect and analyze the data used for measuring success.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an DHS and/or OHA performance measure? If yes, identify the performance measure(s).

This policy package aligns with and directly supports three areas of the Governor's policy:

1. "Modernize and standardize critical statewide systems"
2. "Optimize service delivery to the public and internally by modernizing agency-specific and cross-agency systems" by providing a modern, accessible system enabling clients broader access to services and quantifiable measurements around outreach and quality of services.
3. Create better health through good jobs

7. What are the long-term desired outcomes?

Continue to enhance the integrated ONE system that enables Oregonians to self-serve by accessing their benefits through a web portal. Oregonians will continue to be able to access their benefits by phone, by mail, by fax, or in person.

The new system will provide self-service to Oregonians by enabling applications through the applicant portal at times that are convenient to them. It provides a more dignified and private option to apply and minimizes wait times in DHS field offices to complete the process. Currently, in person engagement requires staff to use three different agencies using seven different systems to determine eligibility for Oregonians.

The Integrated ONE system will improve efficiency and access to eligibility-based services for Oregonians who will no longer have to visit multiple locations and for staff who will not have to enter information into multiple systems for multiple programs. This solution will increase accuracy in our benefit determinations as program information, notification of changes, Federal and State interfaces, automation logic and a rules engine will standardize practices across multiple programs. The system also generates notices in multiple languages and formats, helping reduce barriers for traditionally underserved populations. It also gathers and stores applicants preferred race and ethnicity values allowing for culturally competent care.

8. What would be the adverse effects of not funding this policy package?

If this policy package is not funded, support for one of Oregon's largest IT investments will not be at a level required to make sure that Oregonians relying on the IE program for critical services can be met, which might directly affect eligibility and/or benefit accuracy and customer satisfaction. In addition, lack of support increases the likelihood of staff overloads, longer than expected delays in responding to issues, inability to provide federally mandated reports, lack of predictive mitigation of issues as staff will be too busy just keeping

the system running versus being able to address potential issues before they become a reality and impact Oregonians.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

Funding and position authority were received in the 2019-2021 session for some M&O, ongoing project management and support activities. This is a new environment and one of the largest, most complex IT systems Oregon has ever implemented. Now, with the system close to go-live, more is known as to what the ongoing support needs will be. This policy package is the result of what has been learned and what is needed to support what will be Oregon's largest IT system going forward.

10. What alternatives were considered and what were the reasons for rejecting them?

Alternatives include:

1. Do nothing.
   This is not a viable option. With what is known today, the previous M&O support estimate will only keep the IE program at minimal levels at best, at worst, it will negatively impact both Oregonians and staff. Oregonians may suffer through delays and availability, while staff deal with negative experiences with customers and work overloads.

2. Hire Contracted or Limited Duration Resources and Continue to With Current Staff.
   This is not a viable option. Over the last five years, the two agencies have used contracted staff and limited duration resources to fill its resource gaps. This strategy is not the most effective or efficient method for IT services. Hiring contractors using the IT Professional Services contract can be up to three times more expensive than permanent employees and some staffing contracts limit contractors to 1,040 hours per year.

Staff in limited-duration positions continue to look for permanent employment creating instability in the workforce supporting the IE program. These challenges result in the following impacts:

- Contracted staff can cost up to three times more; thus, impacting Oregonians bottom line
- High turnover rate
- Additional workload is assigned to already over-loaded staff
- Permanent staff must continuously train new hires
- Loss of unique knowledge that is specific to the IE program and/or OIS
- Reduced productivity.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

OHA and DHS are the primary stakeholders and beneficiaries outlined in this policy package. In addition to OHA and DHS, the following agencies are affected:

- DAS - Equipment and services at ETS are required to support this policy package
- DOJ - The IE program will need to interface with the Child Support system
- OED - The IE program will have interfaces with the Employment Department
- ODE - The IE program will interface with systems that make payments to Early Learning Division Child Care Providers.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

This is a collaborative effort between DHS and OHA.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

This policy package, if approved, will ensure that Oregonians can continue to achieve wellbeing and independence by providing timely and efficient eligibility determinations for the IE programs that are relied upon. In addition, it continues support for the following:

- Allow Oregonians to self-service by applying through the applicant portal at times that are convenient for them, minimizing time needed in field offices to complete the process
- Generate notices in seven languages and in five alternate formats, helping to reduce barriers for traditionally underserved populations
- Gather, and store applicants preferred race and ethnicity values allowing for culturally competent care.

Staffing and fiscal impact

Implementation date(s): July 1, 2021

End date (if applicable): Ongoing effort anticipated for each biennium to ensure that both DHS and OHA have the resources to support the IE program and Oregonians.

15. What assumptions affect the pricing of this policy package?

- Cost of professional services is assumed to be in alignment with other comparable efforts

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

- Cost of staffing is assumed to be relatively constant
- Federal funding will be available and leveraged for all DHS & OHA efforts where available
- Resources with the necessary skills will be available

16. Will there be new responsibilities for DHS/OHA? Specify which programs and describe their new responsibilities.

No.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

The following duties have been transitioned to OHA/OIS from DHS that the IE program is dependent upon:

- Ongoing support of the ONE VEC call center, which is relied upon by the IE Program
- Administrative services, such as, calendar management, administrative support, receiving and sending correspondence, and/or providing reports

Additional scope was added over the last two years:

- Maintenance of Legacy test environments
- Disaster Recovery support

Additional permanent resources are needed to support the above work efforts for OHA/OIS.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This policy package requests funding for 63 permanent positions. The positions are new and will work collaboratively within DHS and OIS to support M&O for the IE program.

DHS - Funding for 24 permanent positions to provide support in various key roles:

- SSP Program Support: Funding and permanent position authority for 4 FTE (4-OPA4) to support Virtual Eligibility Center operations
- OBIS Support: This package reclasses 1-PEMD to PEME (1018540), and provides funding and permanent position authority for 19 FTE (2-OPA4 MMN, 1-OPA3, 8-OPA2, 8-OPA1) for resources to support testers and test case writers, to ensure system functionality remains synchronized and in-tact, IE program infrastructure including data dictionary management, report writing, release management, and the ONE Helpdesk
- Administrative staff: Funding and permanent position authority for 1 FTE (1-AS2)

OIS Technical - Funding for 26 permanent positions to address technical expertise gaps not requested previously. These include:

- Business Intelligence Developer: Funding and permanent position authority for 1 FTE (1-ISS8) to develop, deploy, and maintain BI interfaces for data visualization, interactive dashboards, ad hoc reporting, and data modeling
- AD / Express Route System Architect: Funding and permanent position authority for 1 FTE (1-ISS8) to support complex infrastructure that crosses multiple domains
- Database Administrator: Funding and permanent position authority for 1 FTE (1-ISS8) to provide expertise in-house for a complex and large database that consists of 1,700 tables

- Senior Privacy / Risk Coordinator: Funding and permanent position authority for 1 FTE (1-ISS8) to coordinate between the vendor and EIS CSS on applications for privacy, risk and compliance
- Test Environments / Batch scheduler support: Funding and permanent position authority for 2 FTE (1-ISS7, 1-ISS6) to provide ongoing support and maintenance of the new infrastructure created during the project to support testing and training
- JV Support: Funding and permanent position authority for 1 FTE (1-ISS7) to join the JV financial system support team
- Operations Support: Funding and permanent position authority for 3 FTE (3-ISS7) to coordinate change requests and triage activities for legacy system changes
- Legacy Mainframe Team: Funding and permanent position authority for 3 FTE (PEME, 1-ISS8 mainframe architect, 1-ISS8 Interface Architect) to support ongoing IE M&O to the legacy systems
- Compliance Specialist: Funding and permanent position authority for 1 FTE (ISS8) to manage compliance and audit activities with SOS, federal partners and oversight analysts
- Increased coverage for test environment: Funding and permanent position authority for 3 FTE (1-ISS7, 2-ISS6) to increase support of the test environment to 6pm-10pm plus 8am-8pm Saturday / Sunday
- Legacy Integrated Test Environment Manager: Funding and permanent position authority for 1 FTE (1-PEMD) to manage complex environments that crosses multiple domains
- Call Center Support: Funding and permanent position authority for 8 FTE (8-ISS4) to support the integrated call center

<u>OIS Program Office - Funding for 13 permanent positions to transition from a project office to a program office, while also supporting an ongoing administrative function and backfilling modernization positions, limited duration positions and contractors</u>:

- Program Management support is needed to backfill two positions that are on rotation: Program Management Office (PMO) Director (1-PEMF) and PMO Manager (1-PEMD)

- Senior Project Manager (1-PM3) and Project Coordinators (2-PM2) are needed to backfill staff who are on rotation or who are in Limited Duration positions that manage cost, scope, schedules, risks and issues, system change requests, deliverable management, testing, site support, reporting needs, governance, quality control, IE TEAMS site, IE SharePoint and help manage complex domains across several domains.
- Business System Analysts (3-ISS7) provide a critical function and are needed to fill a resource gap by helping gather technical requirements, deliver technical documentation and implement technical reports
- PMO Administration (4-PM1) and an Executive Assistant (1-ESS2) are needed to provide program management support that includes: administrative support, calendar management and complex communications across several domains.

20. What are the start-up and one-time costs?

N/A.

21. What are the ongoing costs?

IT Professional Services: $63.6 million
Software: $8 million
Hosting: $18 million
Hardware: $4 million
ESS Costs: $9 million (28,000 hours)

22. What are the potential savings?

N/A.

23. What are the sources of funding and the funding split for each one?

General Funds with Medicaid Match federal funds.

DHS Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE

Oregon Health Authority
2021-23 Policy Package

Division:	Health Systems Division
Program:	Medicaid – Coordinated Care Organizations (CCO)
Policy package title:	Mental Health Residential Services Transition to CCOs
Policy package number:	441
Related legislation:	None

Summary statement: Transition mental health residential services to coordinated care organizations' global budgets effective January 1, 2022.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$14,867,434**	**$0**	**$27,171,461**	**$42,038,895**	**0**	**0.00**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

Oregon's 1115 waiver encompasses coordinated care organizations (CCO) integration of care coordination, which includes transition of the current fee-for-service carve-out of mental health residential treatment services to CCOs no sooner than 2022 (excludes Adult Foster Homes (AFH) under SEIU collective bargaining agreement). Currently the CCOs are still responsible for coordination of their members' care even while the member is in a residential program, but they are not involved in the payment or utilization management of the actual residential stay. The transition would give the CCOs full control over utilization and coordination, which should have a positive impact on outcomes.

While the residential care setting is carved out from CCOs, CCO integrated care coordination is not readily accessible to Oregon Health Plan (OHP) eligible enrollees without additional data sharing and explicit agency and CCO efforts at individual enrollee's level.

2. What would this policy package buy and how and when would it be implemented?

Pursuant to Oregon's 1115 waiver, OHA expects CCOs would provide integrated care coordination that includes residential treatment services (excluding AFH services) for persons with serious and persistent mental illness. HSD will be amending CCO contracts for CCOs to care coordinate individuals hospitalized in acute inpatient psychiatric while approved on the wait list for the Oregon State Hospital, effective January 1, 2021. Accompanying risk sharing strategies for the state hospital wait list and for state hospital coordination and discharge planning will engage CCOs in these vulnerable individuals' continuum of care. To transition residential treatment services except AFH services, CCO administrative capitation funding is required to support the expanded services scope of residential services to the CCO global budgets.

3. How does this policy package further OHA's mission and align with its strategic plan?

The policy package aligns with Oregon's 1115 waiver, the Governor's priorities and the OHA strategic plan. As noted earlier, this would ensure CCOs are responsible for managing the full continuum of care for individuals needing residential services. This helps maintain and manage access and outcomes associated with those services.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

Two main measures would be utilized: 1) readmission into higher levels of care after discharge and 2) decreased length of stay in various residential levels of care, including the state hospital. By giving CCOs responsibility for managing adult mental health residential care the flow of clients through those services should be improved and decrease length of stay, which is often inflated for people due to lack of coordination. In addition, OHA anticipates discharge planning would improve and reduce the likelihood members would need to be readmitted to the same or higher levels of care.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

Not applicable.

7. What are the long-term desired outcomes?

- More integrated care for CCO-enrolled individuals with Serious and Persistent Mental Illness (SPMI) through increased medical and behavioral health services coordination and continued OHP eligibility and CCO enrollment through individuals' transitions between different levels of care.
- Maintain and stabilize individuals with SPMI through integrated coordinated care where episodic and higher levels of care including hospitalization are reduced.
- Sustainable increased client-centered transitions to least restrictive settings.
- Stable, statewide residential treatment system capacity as a component of the behavioral health services continuum.
- Improved coordination among providers and care settings may improve individuals' stabilization and improve individual outcomes for community integration and least restrictive settings.

8. What would be the adverse effects of not funding this policy package?

Mental health residential treatment services will continue to be carved out of CCO and integrated care coordination, which risks care gaps for these enrollees, and fragmented delivery of services from fee-for-service, community mental health programs, behavioral health providers and CCOs. This lack of coordination keeps the system from approaching the member's care in a wholistic manner and providing care efficiently, which would ultimately benefit the health care system as well as the member.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

Necessary predecessors to transitioning residential treatment services to CCOs:

- HSD has standardized mental health residential treatment services rates effective July 1, 2019.

- HSD has contracted with a new vendor, Comagine, as the State Plan required Behavioral Health Independent Qualified Agent (IQA) for independent conflict-free assessments for Home and Community Based Services (HCBS). 1915i eligible services including residential and home settings, effective July 1, 2020.

These activities have set the stage for the CCOs to eventually take over the services. Previously, the rate setting process for these services was not based on any given set of rules, which would make contracting for the services under a managed care scenario very difficult. The IQA provides a standard way of accessing the members' medical needs, allowing a CCO to better coordinate services when they become responsible for member residential care.

10. What alternatives were considered and what were the reasons for rejecting them?

Programs in the Department of Human Services (DHS) covering residential and community settings are carved out from CCO-contracted services, including DHS AFH and long-term care settings. The payment structures and regulations associated with these services would not allow for easy integration within the CCO payment structures.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

- Tribal impact is at the member level whether the member has chosen CCO enrollment.

- Community mental health programs at the county level may be impacted (a) to the degree CMHP exceptional needs care coordinators are currently working to assist an enrollee, or (b) where a CMHP is directly operating a residential treatment setting. These instances may require CCO provider contracting considerations. This would be a positive outcome, since the current coordination between CMHPs and residential programs is one of the barriers to better integration of care for individuals in residential programs.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

Community mental health program CHOICE contractors assist enrollees in their transitions between settings, which differs from the CCO integrated care coordination. OHA is currently working on how this would impact the need for some services currently provided by CHOICE contractors. This could create an opportunity for re-investment elsewhere in the behavioral health system.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

CCO integrated care coordination supports federal mental health parity requirements for all individuals. Using the CCOs as the single entity coordinating care for residential services would require they ensure equal access to these services to be demonstrated by policy statements and data that support equal access.

Staffing and fiscal impact

Implementation date(s): January 1, 2022

End date (if applicable): N/A

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

15. What assumptions affect the pricing of this policy package?

- Medicaid State Plan required Independent Qualified Agent (IQA) will continue to assess conflict free services that facilitate services at the least restricted level of care for enrollees.
- Transition of residential treatment services excludes AFH services.
- Risk share implementation of OSH wait list and OSH admission.
- The Federal Medical Assistance Percentages (FMAPs) for January 2022- June 2023 as published in March 2020.
- Inflation of 3.4 percent.
- Ninety percent of clients in OHP are enrolled in CCOs.
- Ten percent of CCO costs would be administrative.
- Quality pool payments remain at 4.25 percent and the Managed Care Organization (MCO) Tax at 2.00 percent.
- The quote provided by DXC to change and update the Medicaid Management Information System (MMIS) includes a 50 percent contingency.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

No.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

CCO capitation rate setting will include an analysis reviewing historical experience of residential services and result in the final capitation changes to include this service in the CCO rates going forward. Work will be performed by existing staff and vendor resources.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

Mental health residential services will be incorporated into the CCO capitation rate setting performance performed by existing staff in the Actuarial Services Unit and supported by existing vendor resources.

20. What are the start-up and one-time costs?

- Initial administrative capitation.
- Lag payments of fee-for-service claims moving to CCOs during 2022 to account for services rendered prior to transitioning payment responsibilities to CCOs ($14.7 million) .
- A one-time system change cost of approximately $788,000 for contracting expenses with DXC to update MMIS with a new benefit plan and funding requirements.

21. What are the ongoing costs?

Capitation for residential treatment services and quality pool payments, which would be larger given the increased service responsibility.

22. What are the potential savings?

OHA anticipates this policy package would result in cost avoidance for the following reasons:

- CCO integrated care coordination with residential services transitions would enable CCO intensive case management for persons with SPMI and high acuity needs, including congregate settings, to be managed

for improved health and outcomes toward community integration and least restrictive settings while maintaining stable support and care. This integrated care coordination may reduce emergency department visits and acute inpatient hospitalization.

- Adding inpatient hospitalization risk share to CCO global budgets would incentivize CCOs to maintain integrated care coordination and person-centered care.

OHA may realize long-term savings in OHP expenditures due to more cost-effective, high-quality care being delivered to OHP members. To the extent savings occur, they will be reflected in subsequent years' CCO rates, which are based on past expenditures, and incorporated into OHA's budget as part of the capitation rates for CCO-enrolled OHP members.

23. What are the sources of funding and the funding split for each one?

The funding sources would be $14.9 million General Fund and $27.2 million Federal Funds from Medicaid match. For fee-for-service and CCO capitation rates, the blended FMAP rate is 64.44 percent and is based on the eligibility types of CCO enrollees. The contract costs funding sources would be approximately $197,000 General Fund and $591,000 Federal Funds, which is 25 percent General Fund and 75 percent Federal Funds.

Total for this policy package

Oregon Health Authority
2021-23 Policy Package

Division:	Fiscal and Operations Division
Program:	Office of Program Integrity (OPI)
Policy package title:	Auditing Standards of Care
Policy package number:	442
Related legislation:	None

Summary statement:

The provision of services that do not meet the highest levels of industry accepted standards of care (that are not evidence-based) are wasteful and in extreme cases, fraudulent or abusive. As OHA moves toward a value-based payment model in the Oregon Health Plan (OHP)/Medicaid program, it becomes increasingly important OHA develop methodologies to ensure those services comply with federal guidance and state administrative rules for safe, high quality, and effective care. Although the OHP/Medicaid program has high standards of care that are outlined in the Health Evidence Review Commission (HERC) Prioritized List and Guideline Notes, OHA does not currently have the ability to investigate whether these standards are being utilized in the delivery of services. This means that individual Medicaid providers using wasteful and potentially dangerous sub-standard treatments are currently going undetected. The Office of Program Integrity is proposing to expand the Program Integrity Audit Unit's audit process, for both fee-for-services provider audits and managed care participating provider audits, to include auditing for provider standards of care.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$277,537**	**$0**	**$832,570**	**$1,110,107**	**3**	**2.64**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

The policy package is proposed to reduce the provision of services that do not meet Code of Federal Regulations (CFR) required, industry accepted, standards of care (that are not evidence based), are wasteful, and in extreme cases, fraudulent or abusive. When sub-standards of care are used, the cost to treat a member multiplies quickly; not only are the initial treatments not helpful, they could also be harmful. The costs quickly grow to include the initial, ineffective treatment, the subsequent effective treatment and any treatment needed to correct or mitigate the ineffective and potentially harmful treatment.

While there are efforts to increase and monitor the quality of OHP/Medicaid services through performance measures, External Quality Review Organization (EQRO) reports, etc., these are higher level efforts designed to look at a limited number of care components. There are currently no efforts to comprehensively examine the standards of care being used in detail, at the member and provider level which means that currently, individual providers, using wasteful and potentially dangerous sub-standard treatments are going largely undetected.

In addition to meeting CFR requirements regarding quality of care in the OHP/Medicaid program, including managed care entities, this policy package will ensure future value-based method (VBM) payments, which are based on historical claims data, are free of overpayments due to fraud or waste. Otherwise, artificially inflated VBM payments will create systemic overpayments.

2. What would this policy package buy and how and when would it be implemented?

Requirements for Auditing Provider Standards of Care

- The development and implementation of processes for reviewing provider's standards of care, while performing program integrity audits.

- The establishment and adoption of criteria to evaluate OHP/Medicaid provider compliance with evidence-based or highest industry-accepted level of care.
- Standard of Care reviews by clinical professionals, one physician, one dentist, and one psychologist who have knowledge of and access to the highest industry-accepted standards of care.
- Access via license to professional databases containing standards of care such as Up-To-Date and others.
- The development and implementation of educational outreach materials to educate providers on industry-accepted standards of care and where to find them.

Implementation & Timeline

- On-boarding of clinical professional staff and the development of evaluation process would begin in October of 2021.
- Development and implementation of the Standards of Care evaluation and audit program, including stand-alone and integrated evaluations and audits, and the creation of foundational documents such as policies, procedures and applicable guidance would begin following approval of the policy package and budget authority, and continuing in the second quarter of the state fiscal year 2022.

3. How does this policy package further OHA's mission and align with its strategic plan?

- CFR, federal guidance and state administrative rules require OHP/Medicaid services to be high quality and consistent with current professional standards
- High quality, industry-accepted services are essential for the implementation of the triple aim (ensuring better care, improving patient experience and lowering costs), ensuring patient safety and providing a solid foundation for value-based payments
- This policy package aligns directly with OHA's mission by ensuring members have access to quality care. It also aligns with several areas in the OHA Performance System, starting with the core values of integrity

and transparency; building toward the goal of operational excellence; with the direct investment in the core processes of regulating and ensuring compliance, and managing risk.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No, however this policy package is risk-mitigating in that it decreases the chance of audit findings covering adequate monitoring and oversite of Oregon Medicaid providers (both fee-for-service and coordinated care organizations), and general oversite of fraud, waste and abuse in the OHP/Medicaid system.

Quantifying results

5. How will OHA measure the success of this policy package?

- Increase in utilization of high quality, industry-accepted care for the OHP/Medicaid population.
- Improvement in the quality of care as assessed by the EQRO.
- An increase in total number and amount of overpayments recouped by audit.
- An increase in the amount of cost avoidance, where overpayments have been prevented through educational efforts, etc.
- Return-on-investment (ROI) calculation – where the costs of supporting standard-of-care audit activities are compared against recoveries from overpayments and cost avoidance. A typical ROI for OPI is 4.5:1.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

- Purchasing for Healthcare Value
- Improving Clinical and Population Health

- Regulating and Ensuring Compliance
- Health Equity
- Managing risk

7. What are the long-term desired outcomes?

Adoption and consistent utilization of high quality, industry-accepted practices by all providers rendering services to, and receiving payment for, members enrolled in OHP/Medicaid. This will lead to reduced fraud and waste in the Oregon Medicaid system and ultimately to the implementation of fraud and waste-free value-based payments throughout the OHP/Medicaid system.

8. What would be the adverse effects of not funding this policy package?

High quality, industry-accepted services are essential for ensuring patient safety and providing a solid foundation for value-based payments. Federal guidance and state administrative rules require OHP/Medicaid services to be high quality. Not developing a methodology and process to evaluate services has a direct impact on the quality of care that members receive and may result in OHA paying providers for services that do not meet high quality, industry-accepted standards and in the worst-case scenario, in beneficiaries receiving sub-standard care that is harmful.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

OHA's external quality review organization conducts an annual review of coordinate care organization (CCO) compliance with adoption and implementation of evidence-based clinical practice guidelines. This has resulted in some improvement; however, the focus of this review is the managed care entity rather than specific providers or types of services. An evaluation of individual Medicaid providers would ensure, at the individual

provider and member level, that OHP/Medicaid services are delivered using high quality, industry-accepted (and often evidence-based) standards of care and can uncover cases of fraud, waste and abuse that are currently going undetected because they otherwise comply with coding standards and administrative rule.

10. What alternatives were considered and what were the reasons for rejecting them?

There are no alternatives to implementing Standard of Care audits other than to not implement them at all. OHA does not currently have standard of care audits and have anecdotal evidence of poor standards of care that otherwise comply with coding standards and other Oregon Administrative Rules that go undetected unless they are directly harmful to a member. The implementation of standard of care audits will reduce these cases, will allow OHA to identify cases where providers are delivering standards-of-care that are less harmful but still cost money in the long run and would provide us the opportunity to reduce all instances of sub-standard care through educational outreach.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No. This policy package does not require changes to existing statutes or new statutes.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Where services and providers overlap with Oregon Department of Human Services (DHS), there is potential for impact on those OHP/Medicaid beneficiaries and services. However, DHS is not currently conducting this type of review and the Office of Program Integrity's audits would be limited to OHP/Medicaid providers and services. Furthermore, DHS would be positively impacted to the extent that the Medicaid services they

manage are audited for adequate standards of care. DHS should see a reduction in costs as fraud and waste is detected and removed from the system, through audits and educational efforts.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

None.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

Auditing is one method for ensuring that high quality, industry-accepted care and services are available to all populations under the OHP/Medicaid program and supports OHA's 10-year goal of health equity leading to improved health outcomes. This policy package would ensure that providers delivering goods and services to OHP/Medicaid members are following high quality, industry-accepted practices that are based on current industry, federal and state standards. Industry standards, best practices and evidence-based practices have become more equitable over time as the development of these standards has included input from diverse communities. Reviewing these standards will help OHA ensure that providers are adopting and utilizing current standards in their practices that incorporate this health equity lens.

Staffing and fiscal impact

Implementation date(s): October 1, 2021

End date (if applicable): Ongoing

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

15. What assumptions affect the pricing of this policy package?

The Standard of Care reviews will be integrated into existing Office of Program Integrity (OPI), Program Integrity Audit Unit, audit process. Neighboring states have successfully implemented processes to review standards of care, while performing program integrity audits. OPI anticipates this model can be successfully replicated in Oregon.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

Auditing the standards of care used by OHP/Medicaid providers will not be a new responsibility for OHA, as CFR requires states to ensure services are safe, high-quality and effective. However, the Standard of Care evaluations and audits would be an extension of OPI auditing capabilities, allowing OPI to specifically investigate the standards of care being used by OHP/Medicaid providers for the first time.

17. Will there be new responsibilities for or an impact on Shared Services?

No.

18. Will there be changes to client caseloads or services provided to population groups?

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

In order to perform a more comprehensive program integrity efforts, OPI is requesting the following permanent, full-time equivalent positions beginning October 1, 2021 for the Standard of Care audits:

- One Physician (Physician Specialist)
- One Psychologist (Clinic Psychologist 1)
- One Dentist (Dentist)

20. What are the start-up and one-time costs?

None.

21. What are the ongoing costs?

Personnel cost including employee services, supplies, shared services and State Assessments & Enterprise-wide Costs.

22. What are the potential savings?

The current return-on-investment in OPI is approximately 4.5:1. There will also be significant cost avoidance savings once this program is operational and mature. Current cost avoidance in OPI is approximately $1 to $1.5 million per year.

23. What are the sources of funding and the funding split for each one?

The funding split is 46 percent General Fund and 54 percent Medicaid and CHIP federal matching funds.

Oregon Health Authority
2021-23 Policy Package

Division:	Fiscal and Operations Division
Program:	Office of Program Integrity (OPI)
Policy package title:	Medicaid Beneficiary Fraud Investigators and Self-Audit Program Auditors
Policy package number:	443
Related legislation:	None

Summary statement:

This policy package is proposed to modernize, streamline and expand the capacity of the Office of Program Integrity to conduct audits of Oregon Health Plan (OHP)/Medicaid fee-for-service and managed care providers and investigate referrals for potential beneficiary and member fraud. There are two keys areas for expansion:

- Investigate Medicaid beneficiary and member fraud referred from managed care entities, fraud tip-lines, and other internal and external sources. The program will be specifically designed to work closely with local law enforcement and district attorneys to develop, implement and monitor a cost-effective process for formal engagement to hold beneficiaries and members accountable for their fraudulent behaviors.
- Develop and implement a comprehensive self-audit program for OHP/Medicaid providers or contractors who are either a marginal threat for fraud and abuse, or who, due to operational needs, would benefit from the opportunity to perform a directed and monitored self-audit program.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$464,519**	**$0**	**$545,306**	**$1,009,825**	**5**	**4.40**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

Beneficiary Fraud Investigators: The U.S. Government Accountability Office (GAO) has determined Medicaid is a high-risk program for provider and beneficiary fraud, waste and abuse. Office of Program Integrity (OPI) has developed an effective and growing provider fraud, waste and abuse operation, and is summitting this policy package to do the same on the beneficiary side. Beneficiary fraud includes eligibility fraud, medical ID theft, card sharing, doctor shopping (usually for multiple prescriptions), non-emergent medical transportation (NEMT) ride sharing to gain multiple reimbursements for mileage, and drug diversion (taking prescriptions intended for legal uses to illegal uses). Oregon Health Authority (OHA) does not have an effective nor efficient beneficiary fraud prevention, detection and prosecution operation. OHA currently utilizes the Fraud Investigations Unit (FIU) within Office of Payment Accuracy and Recovery (OPAR) to address Medicaid beneficiary fraud, however, Medicaid beneficiary fraud is not a focus of the FIU. This program will work directly with providers, coordinated care organizations (CCOs), local law enforcement and the district attorneys to cost effectively hold the beneficiary accountable for fraudulent activities. The program will engage and educate local law enforcement on the costs and risks associated with beneficiary fraud. The program will also work internally to detect, investigate and refer joint beneficiary/provider fraud. In cases where a beneficiary and provider are working jointly to commit fraud, the case will be referred to the Medicaid Fraud Control Unit (MFCU) of the Department of Justice (DOJ). MFCU does not have jurisdiction to investigate and prosecute Medicaid beneficiary fraud unless it is associated with a Medicaid provider. Adding beneficiary fraud under the OPI umbrella would provide Oregon Medicaid and OHA with the increased ability to uncover, investigate and refer joint beneficiary/provider fraud cases to the proper authorities. OHA is seeing an increase in the reporting of potential beneficiary fraud, especially from the CCO's. Not funding this operation will 1) continue to allow beneficiaries working on their own to commit fraud, waste and abuse absent of fear of prosecution, 2) cost the Oregon Health Plan (OHP) and the CCO's for fraudulent beneficiary activities, 3) continue to frustrate the provider and CCO community as they refer potential beneficiary fraud

and see no OHA directed response, and 4) leave OHA and OHP vulnerable to scrutiny from regulatory bodies aware of beneficiary fraud activities.

Self-Audit program: There are over 94,000 active OHP providers enrolled in Oregon, and the Program Integrity Audit Unit (PIAU) can formally audit approximately 150 – 200 of those providers annually identified through data analytics and verifiable referrals. Currently, only a small number of OHP providers are subject to a self-audit at the request of OPI. These self-audits are generally associated with a very limited number of provider self-referrals, or as a condition of a settlement agreement. This allows many marginal providers to go unnoticed. These providers still demonstrate a vulnerability and risk to the integrity of the OHP program annually. This policy package will develop and implement a comprehensive self-audit program for OHP providers or contractors who are either a marginal threat for fraud, waste and abuse, or who, due to operational needs, would benefit from the opportunity to perform a directed and monitored self-audit program. Not funding this self-audit program will continue to 1) allow multiple improper payments of moderate amounts to go undetected, 2) limit OPI's audit operations to desk and on-site audits, delaying attention to marginal providers, 3) allow marginal providers to operate under the radar of OPI analytic thresholds, and 4) limit provider education, self-directed monitoring and early intervention into the suspect provider billing practices.

2. What would this policy package buy and how and when would it be implemented?

Preventing, Detecting and Prosecuting Beneficiary Fraud

In addition, this policy proposal implements a process and adds three Compliance Specialist 2 (CS2) positions to allow OPI to appropriately and systematically investigate, review and refer cases of potential beneficiary and member fraud of individuals already receiving the benefits. These positions, working together with the vital law enforcement and district attorney relationships, will also develop sufficient evidence to prosecute those cases. OHA is seeing an increase in the reporting of beneficiary fraud, especially by the CCOs and providers, and these referrals and reports will be immediately worked.

Self-Audit Program

There are over 94,000 active Medicaid providers enrolled in Oregon, and the Program Integrity Audit Unit (PIAU) can formally audit approximately 150–200 of those providers annually identified through data analytics and verifiable referrals. Under the direction and guidance of two new Government Auditor 3 (GA3) positions, employing a valid self-audit process created by those positions, a provider would audit itself due to either a provider identified potential improper payment, or an issue detected by OPI analytics. Expanding the PIAU capacity to include provider self-audits, PIAU would increase the number of audits by an estimated 50 - 75 in the first year of operation, growing to an estimated 150 or more conducted in any given year. Providers or contractors who are either a marginal threat for waste and abuse of the OHP/Medicaid program, or who, due to operational needs, would benefit from the opportunity to perform a directed and monitored self-audit, would be the primary focus of this program.

This Medicaid Beneficiary Fraud Investigators and Self-Audit Program Auditors proposal adds three Compliance Specialist 2 positions for the beneficiary fraud program and two Governmental Auditor 3 positions for the Self-Audit program.

Implementation Timeline

- Develop the hiring process and on-boarding of GA3 and CS2 audit and investigations staff positions would begin following approval of policy package and budget authority, with hiring projected to be completed by December 2021.
- Development of the self-audit program and the creation of the foundational documents such as policies, procedures, manual, audit working papers, Oregon Administrative Rules, and others would begin following approval of the policy package and budget authority and hiring and continue throughout the first year of operations.
- Implementation of process for investigation of beneficiary fraud would begin in second quarter of state fiscal year 2022. Transition of beneficiary and member fraud investigations from FIU to OPI would begin

following the approval of the policy package, budget authority, and conclusion of the hiring and onboarding of the new staff.

3. How does this policy package further OHA's mission and align with its strategic plan?

- Federal regulations and state administrative rules require OHP/Medicaid payments be made for covered services that are medically necessary and compliant with program rules.
- Audits of providers and exclusion of beneficiaries who commit fraud are essential for the implementation of two prongs of the triple aim (ensuring better care and lowering costs). Developing and maturing OHA audit abilities will allow the agency to keep pace with modern and ever-evolving fraud, waste and abuse schemes perpetrated against the Medicaid program.
- This policy package highlights attributes of the OHA Performance System, starting with the core values of integrity and transparency; building toward the goal of operational excellence; with the direct investment in the core processes of regulating and ensuring compliance and managing risk.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No. However, this policy package is consistent with the U.S. Government Accountability Office (GAO) framework for managing fraud risk in federal programs, which encourages state's Medicaid agencies to consider the benefits and costs of activities and make investments in Program Integrity activities that offer the most cost-effective investment of resources. Therefore, this policy package can be considered risk-mitigating in that it modernizes, streamlines and expands the capacity of the Office of Program Integrity to conduct audits of OHP/fee-for-service and managed care providers and investigate referrals for potential beneficiary and member fraud.

Quantifying results

5. How will OHA measure the success of this policy package?

The success of this policy packages will be measured by:

- An increase in the number of referred beneficiary fraud allegations accepted by law enforcement as credible allegations.
- Cost avoidance for the beneficiary fraud program based on the savings incurred as a result of detecting fraudulent beneficiary activity and return on investment by comparing the cost of the beneficiary program to the cost avoidance.
- An increase in the number of OHP/Medicaid provider audits conducted each year.
- An increase in the identification and recovery of overpayments from OHP/providers due to increased audits of questionable provider behavior.
- Fewer improper payments to providers due to educational and training opportunities, resulting in additional cost avoidance.
- Identifying other providers with similar problems or compliance concerns who can be further investigated through the program.
- Return on Investment - calculated for provider self-audits by balancing the costs of supporting provider self-audit activities against recoveries from overpayments and claims adjustments or cost avoidance resulting from clear and up-to-date billing policies and improved provider practices and education.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

Lower Healthcare Costs
Regulating and Ensuring Compliance
Managing risk

7. What are the long-term desired outcomes?

Ultimately, the expected long-term outcome will be a greater awareness of program integrity concepts in the provider community and beneficiary population. In general, the desired outcome is successful recoupment of improper payments made to OHP/Medicaid providers and members, and a corresponding decrease in fraud, waste and abuse activities in the OHP/Medicaid program. Success long term also means successful implementation and execution of more robust program integrity strategies, including the detection, identification and prosecution (and removal from OHP/Medicaid) of beneficiaries and providers who commit fraudulent actions, and recoupment of the funds associated with those actions.

8. What would be the adverse effects of not funding this policy package?

When OHA makes improper payments to fraudulent, wasteful and financially abusive providers, either directly or through managed care plans:

- OHP/Medicaid funds are diverted from their intended purpose.
- Future OHP/Medicaid value-based payments are constructed using wasteful services as their baseline, leading to higher costs.
- Beneficiaries who need services may not receive them.
- Beneficiaries who do not need services may be harmed by unnecessary care.

OHA must continue to develop smart, strategic and targeted methods to keep pace with the constantly evolving and maturing provider and beneficiary fraud, waste and abuse schemes. The strategies represented in this policy proposal include expanding PIAU's audit activities to include an active beneficiary fraud investigation program and provider self-audits and operated under the OHA Office of Program Integrity.

Not expanding PIAU capabilities to include provider self-audits will result in only 150-200 of the over 94,000 active OHP/Medicaid providers enrolled in Oregon undergoing formal audit annually.

Not having an efficient beneficiary fraud prevention, detection and prosecution operation is preventing prosecution of beneficiaries who commit fraudulent acts/activities and recoupment of improper OHP/Medicaid payments. In 2019, not one of the beneficiary fraud cases referred by FIU to law enforcement were accepted by local District Attorneys and prosecuted. In the long term, this results in diversion of Medicaid funds to fraudulent services and in continued enrollment of beneficiaries who commit fraudulent actions.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

Prior to requesting a policy package, the Office of Program Integrity has:

- Increased the number of auditors employed by the Office of Program Integrity and invested in training and education of its workforce.
- Invested in the creation of a custom SAS system which will enable OPI to better identify, monitor and audit provider and beneficiary fraud, including real-time visualization and other advanced analytical capabilities.
- Coordinated with the Fraud Investigations Unit (FIU) within Office of Payment Accuracy and Recovery (OPAR) to address OHP/Medicaid beneficiary fraud. OPI's Administrator and MFCU have both engaged with FIU to provide technical assistance, policy/regulatory and operations guidance and coordination. None of these repeated efforts have resulted in effective measures to adequately address beneficiary and member fraud.
- Engaged in a limited number of provider self-audits, each as a result of a regulatory requirement for provider self-referral. Those audits have proven successful albeit on a limited basis. The self-audits were

only a result of the provider complying with federal law regarding self-disclosure at the risk of being found liable of fraud.

10. What alternatives were considered and what were the reasons for rejecting them?

Beneficiary and member fraud require a singular focus due to the unique fraudulent practices which are unrelated to provider fraud, waste and abuse activities. OPI needs dedicated and skilled staff to efficiently and effectively perform to achieve greater results. OPI has overseen the limited number of self-audits. However, expanding to an effective level of intervention cannot be accomplished in the current staffing environment. OPI does not have the capacity to expand without additional resources.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No. This policy package does not require changes to existing statute(s) or a new statute.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Under this policy package, OHA would no longer delegate OHP/Medicaid beneficiary fraud investigations to the Office of Payment Accuracy and Recovery (OPAR), Fraud Investigations Unit (FIU), which is less than 5 percent of their workflow. This is anticipated to provide the specific focus on OHP/Medicaid beneficiary and member fraud, waste and abuse that is needed to effectively address the issue and would free-up FIU staff to conduct other social service program fraud investigation for the Department of Human Services. No transfer of positions is being requested.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

Not applicable.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

Auditing is one method to ensure the quality and equitable access of services provided to OHP/Medicaid members are consistent with regulatory and health equity standards. When OHA pays fraudulent providers, either directly or through managed care plans, the entire beneficiary population suffers as:

- OHP/Medicaid funds are diverted from their intended purpose.
- Beneficiaries who need services may not receive them.
- Access may be compromised.
- Beneficiaries who do not need services may be harmed by unnecessary care.

Staffing and fiscal impact

Implementation date(s): October 1, 2021

End date (if applicable): Ongoing

15. What assumptions affect the pricing of this policy package?

Office of Program Integrity assumes that some of the proposed process and activities can be integrated into existing audit processes.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

There will be new responsibilities for Office of Program Integrity in investigating beneficiary fraud. This is an existing a federal requirement under Medicaid, however this is currently achieved by the Agency through delegation rather than direct OHA actions/activities. Developing the comprehensive self-audit program will be also be a new responsibility for OHA/OPI.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

In order to perform a more comprehensive program integrity efforts, OPI is requesting the following positions:

- Self – Audit Program – two Governmental Auditor 3 (GA3)
- Beneficiary Fraud Program – three Compliance Specialist 2 (CS2)

20. What are the start-up and one-time costs?

None.

21. What are the ongoing costs?

Personnel cost including employee services, supplies, shared services and State Assessments & Enterprise-wide Costs.

22. What are the potential savings?

The current return-on-investment in OPI is approximately 4.5 to 1. There will also be significant cost avoidance savings once both programs are operational and mature. Current cost avoidance in OPI is approximately $1.0 to $1.5 million per year.

23. What are the sources of funding and the funding split for each one?

The funding split is 46 percent General Fund and 54 percent Medicaid and Children's Health Insurance Program (CHIP) federal matching funds.

Total for this policy package

Oregon Health Authority and Department of Human Services
2021-23 Policy Package

Division:	DHS Shared Services
Program:	Security and Privacy Services Office (SPSO)
Policy package title:	Criminal Justice Information Services (CJIS) Security
Policy package #:	209
Related legislation:	None

Summary statement:

Critical problems to be addressed:
CJIS Security: FBI CJIS Security Policy includes many intensive physical and data security requirements for any DHS or OHA staff or contractors, and systems accessing and/or using CJI. DHS and OHA programs use criminal justice information (CJI) for over 200,000 background and safety checks per year. These checks are completed for: DHS and OHA employees, volunteers, and contractors; child protective services; care providers for children, home care and personal support workers; foster and adoptive parents; traditional health worker certification; fraud investigations; licensing of service providers; emergency medical and trauma services, and others.

Complying with these requirements requires substantial worksite infrastructure, personnel, and IT solutions across DHS and OHA offices.

Security and Privacy Services Office (SPSO): The Security and Privacy Services Office provides awareness and solutions to achieve compliance with Federal and Oregon privacy and security laws, rules and policies while supporting DHS|OHA programs to develop and improve business systems, provide key services, communicate and collaborate with partners and stakeholders, and insure the public trust. SPSO staff

acquire in-depth understanding of key program services and systems in order to achieve more customized solutions for collaborating services even as they achieve current privacy and security postures.

As the majority of DHS|OHA CJIS services, systems and staff reside with DHS, SPSO would also include the CJIS Local Agency Security Officer (LASO) role for DHS|OHA. The CJIS LASO is a role designated in the FBI CJIS Security Policy responsible for implementing and maintaining CJIS compliance across also CJIS services for both agencies.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
DHS	$4,294,411	$7,928,405	$3,009,733	$15,232,549	8	7.04
OHA	$250,337	$38,513	$96,284	$385,134	0	0.00
Total policy package:	**$4,544,748**	**$7,966,918**	**$3,106,017**	**$15,617,683**	**8**	**7.04**

Purpose

1. Why does DHS/OHA propose this policy package and what issue is DHS/OHA trying to fix or solve?

There are two items to resolve via this policy option package (policy package):

1. FBI Criminal Justice Information Services (CJIS) Security Policy is the federal guidance from the FBI to all agencies using criminal justice information (CJI) for any business. The security requirements include considerable lifts for both physical and data security. The 2018 FBI audit identified the physical security compliance as a core finding against DHS. If DHS and OHA fail to meet these requirements, DHS and OHA programs using CJI for safety, investigative, employment, licensing and certification background checks on over 200,000 individuals per year may have their access to FBI criminal history records removed. Access to CJI for patient purposes in the Oregon State Hospital may also be removed. This would compromise health, safety and/or employment for hundreds of thousands of Oregonians per year.
2. The second item creates the Security and Privacy Services Office (SPSO). SPSO provides awareness and solutions to achieve compliance with Federal and Oregon privacy and security laws, rules and policies. The CJIS LASO would reside within the SPSO.

   Core programs (ex., Child Welfare, Self Sufficiency, Aging and People with Disabilities, Developmental Disabilities, and Vocational Rehabilitation) are not as easily able to maintain awareness of federal and state program privacy and security requirements while also maintaining real-time knowledge of changes to non-program specific federal and state security and privacy laws and policies. Some of those changes can be highly technical or nuanced and require understanding of both program business systems and processes and the security or privacy protocols involved with federal and state requirements. This creates confusion for program staff on when and how best to share information (if it can be shared) with families, partners and stakeholders. This confusion leads not only to unnecessary delays in sharing key information, but also potentially to avoidable privacy incidents and security breaches. Delays in sharing crucial information can affect the health and welfare of individuals and families. Incidents and breaches can erode the public trust in

DHS and OHA programs and come with federal penalties and/or compliance action plans that cost millions, further reducing stretched program budgets. SPSO staff would help translate business and technical requirements between IT staff and those responsible for program services in order to improve program outcomes while reducing privacy/security incidents.

2. What would this policy package buy and how and when would it be implemented?

The CJIS portion of the policy package provides necessary funding for physical security refits in approximately 60 Child Welfare and Central and Shared Services offices around the state to comply with federal CJIS requirements. It also provides an additional facilities coordinator to project-manage the construction and funds a CJIS Local Agency Security Officer (LASO) position for DHS and OHA. CJIS Security Policy requires that each federal, state, local government, or tribal agency using criminal justice information (CJI) have a CJIS LASO to work on CJIS-related physical and IT security and privacy compliance for their agency. The CJIS LASO would assist the facilities coordinator with CJIS-related project management, as well as work with DHS and OHA programs using CJI in maintaining CJIS compliance in present business processes and systems, and those being developed.

The policy package also creates the Security and Privacy Services Office (SPSO) within DHS|OHA Shared Services. SPSO positions would provide compliance awareness combined with an imbedded knowledge of each specific DHS|OHA programs' business processes and systems, key services, and partners and stakeholders to tailor and streamline guidance and consultation on compliance work at all program levels in the most efficient manner. SPSO staff would remain aware of coming changes in privacy and security requirements from federal and state legislation and help guide programs in preparing accurate and proactive timelines for changes to business processes and data management systems to achieve timely compliance. In addition, SPSO staff would create guides, trainings, workshops and other privacy and security awareness and education resources to DHS and OHA programs, partners and stakeholders as needed. The overall SPSO goal is to maximize compliance while supporting business needs, reducing roadblocks, waste, and penalties for

privacy incidents and security breaches to better serve the public trust. The CJIS LASO would be part of the SPSO.

Funding for the CJIS-related changes is required as soon as possible, preferably July 1, 2021 to immediately commence facility and other compliance work in coordination with the next FBI audit cycle of Oregon in summer 2021. Funding of the non-CJIS SPSO positions is also recommended for July 1, 2021 to maximize efficiencies from the work of those positions.

3. How does this policy package further DHS's mission and align with its strategic plan?

Privacy and security requirements help protect and preserve dignity for clients, consumer-employers, and others served by DHS and OHA from release of information that could cause physical, mental, reputational, and/or financial harm. Incidents may detrimentally affect anywhere from one person to hundreds of thousands of individuals or families. Whether the information be CJI, Social Security Administration (SSA) data, Federal Tax Information (FTI), Protect Health Information (PHI), Food and Nutrition Service (FNS) data, or Administration for Child and Families (ACF) data, streamlining info-sharing and business processes, and providing improvements and innovations in data systems while improving security all support DHS values of stewardship, integrity, respect, accountability, and service equity.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

The CJIS portions are being requested as part of a compliance action plan resulting from the 2018 FBI audit, and ongoing changes in CJIS security policy requirements that will affect the 2021 FBI audit.

Quantifying results

5. How will DHS/OHA measure the success of this policy package?

DHS/OHA would measure the success of the Facilities investment by the following annual assessments:

- # of CJIS-related physical security projects across the state completed timely;
- # of resolved physical security CJIS compliance issues.

DHS/OHA would measure the success of the SPSO and CJIS LASO by the following annual assessments:

- % of audit risks assessed and resolved prior to next audit cycle;
- # of open findings resolved;
- # of program engagements completed;
- # of privacy/security projects completed.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an DHS and/or OHA performance measure? If yes, identify the performance measure(s).

Improving privacy and security awareness in business services and systems will accelerate and improve secure communications, case coordination, and support systems between partners, community services, and providers for older adults needing long term care services (KPM 1 and 2), children in foster care (KPM 5-8), individuals with developmental disabilities (KPM 9 and 11), families in crisis (KPM 14-16), and Vocational Rehabilitation consumers seeking employment (KPM 17-20). More agile secure communication and coordination of partners and services will also assist in prevention services for children, people with physical and cognitive disabilities, and the elderly being abused, and the speed of delivery for trauma-informed services when abuse cannot be prevented (KPM 3, 4, and 12). Lastly, eligibility determination will be timelier for all programs due to improved, privacy-informed sharing agreements and business processes between partners in eligibility processes (KPM 9).

7. What are the long-term desired outcomes?

Assess and resolve audit findings prior to subsequent audit cycles. Assist programs in improving business operations, service delivery, and service equity while increasing compliance to federal and state security and

privacy laws and policies. Assist in the project management and successful completion of privacy and security projects that improve compliance. Reduce privacy incidents and security breaches.

8. What would be the adverse effects of not funding this policy package?

If DHS and OHA fail to meet FBI CJIS Security Policy requirements, DHS and OHA programs using CJI for safety, investigative, employment, licensing and certification background checks on over 200,000 individuals per year may have their access to FBI criminal history records removed. Access to CJI for patient purposes in the Oregon State Hospital and by Behavioral Health may also be removed. This loss would compromise health, safety and/or employment, licensing, and certification processes for hundreds of thousands of Oregonians per year.

Lack of certainty or confusion on privacy and security policies will continue to create unnecessary delays in sharing key information, privacy incidents, and potentially security breaches. Delays in sharing crucial information can affect the health and welfare of individuals and families. Incidents and breaches can erode the public trust in DHS and OHA programs and come with federal penalties and/or compliance action plans that cost millions, further reducing stretched program budgets.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

Within the current facility budget, some CJIS physical security projects have been completed where minimal changes were made or could be incorporated into already scheduled moves or builds. However, the majority of CJIS sites require additional significant construction to bring DHS and OHA sites into compliance. Current Facilities staffing are insufficient to cover CJIS-related project management workload over the next two biennia.

Projects and business processes requiring privacy and security guidance, research, risk assessment, and policy and procedure development exceed current staffing and program familiarity of current staffing resources. A project managed CJIS compliance workgroup assisted in moving forward certain audit requirements but workload to staffing was insufficient to maintain movement. Within the last 9 months a CJIS LASO and privacy/security services position has been carved out from existing FTE to provide more consistent direction. However additional staffing is necessary to keep all privacy and security business (including CJIS) timely and compliant for current needs, and current staffing levels prevent proactive planning and development.

10. What alternatives were considered and what were the reasons for rejecting them?

As related in question 9, workgroups utilizing fractions of FTE from different programs staff assisted in assessing CJIS compliance requirements and moving forward some work related to CJIS audit findings. However, CJIS-related workload for membership exceeded what could be apportioned out amidst the core workload of the members. Some CJIS-related facilities work was completed within existing budgets at limited sites where CJIS compliance could be incorporated as part of already planned site moves, builds, or renovations. The majority of remaining site remodels were not funded nor sufficiently staffed to workload.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Data-sharing and service delivery interagency agreements would be brought into better compliance with federal requirements. Better compliance will improve audit measures, thereby reducing negative audit effects (penalties, compliance action plans, etc.) to partner governments. The SPSO would also be able to support

partners by supplying them with any curriculums or materials that have been developed for staff privacy and security awareness and training.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

DHS and OHA are collaborating on CJIS compliance projects both in facilities remodels and IT security requirements. DHS and OHA are also collaborating with Oregon State Police (OSP) and the Department of Administrative Services (DAS) in achieving CJIS compliance.

14. How does this policy package help, or potentially hinder, populations impacted by inequities or disproportionalities from achieving health, well-being and independence?

By improving awareness of proper information sharing, access controls, and business processes, partnership with local and tribal governments is maximized, and services to and collaborations with all communities around the state are improved in timeliness and service equity.

Staffing and fiscal impact

Implementation date(s): July 1, 2021

End date (if applicable): N/A

15. What assumptions affect the pricing of this policy package?

The core assumptions are as follow:

- CJIS Security Policy and other federal requirements guided by the National Institute of Standards and Technology (NIST) will continue to expand over the next decade as they have over the last decade.

- Core CJIS facility compliance work will continue out over the 2021-2025 biennia. Changes to NIST physical security guidance will result in ongoing remodel requirements over coming biennia as other federal agencies increase their security requirements.
- Privacy and security requirements will continue to broaden with greater nuances between federal data types resulting in increasing value of privacy and security subject matter experts simultaneously knowledgeable in program services and needs that can assist programs to stay within security and privacy guidelines without compromising service delivery and equity.

16. Will there be new responsibilities for DHS? Specify which programs and describe their new responsibilities.

There are consistently expanding CJIS-related responsibilities for all OR-Kids using groups including but not limited to Child Welfare, Office of Training, Investigations, and Safety, and specific teams within Budget, Finance Services, and the Office of Payment Accuracy and Recovery. Other DHS units affected by increasing CJIS requirements are the Background Check Unit, the Fraud Investigations Unit, Human Resources, and Public Records. Depending on the nature of an audit, an appeal to an employment or licensing process, or other decision involving criminal justice information, other Central and Shared Services teams may also be affected. As other federal programs continue to add more National Institute of Standards and Technology (NIST) requirements, privacy and security policies could begin to affect non-CJIS programs and functions in Aging and People with Disabilities, Central and Shared Services, Developmental Disabilities, Self Sufficiency, and Vocational Rehabilitation.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

Please see question 16 for certain responsibilities. Facilities and the SPSO are currently structured within Shared Services, so all budget and staffing funding from this policy package will directly affect Shared Services.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No, unless dictated by new federal security or privacy requirements.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

Facilities additions:

- [new] 1.0 FTE permanent Facility Operations Specialist 2 position as of July 1, 2021 to manage CJIS-related facility changes throughout DHS|OHA offices over the 2021-2023 biennium and onward.

Security and Privacy Services Office (SPSO) additions:

- [new] 1.0 FTE permanent Operations and Policy Analyst 4 position as of July 1, 2021 to serve as DHS|OHA CJIS LASO and provide targeted awareness and education, and privacy and security consultation and project management to Child Welfare.
- [new] 4.0 FTE permanent Operations and Policy Analyst 3 positions as of July 1, 2021 to provide targeted awareness and education, and privacy and security consultation and project management to the Self Sufficiency, Aging and People with Disabilities, Office of Developmental Disability Services, Vocational Rehabilitation, Shared Services and Central Services programs.
- [new] 1.0 FTE permanent Executive Support Specialist 1 as of July 1, 2021 to provide administrative support, and meeting, training, and event coordination for the SPSO team.
- [existing] Move permanent 1.0 FTE Principle/Executive Manager E from Background Check Unit to SPSO to serve as manager of the SPSO.

20. What are the start-up and one-time costs?

N/A. All costs are ongoing beyond the 2021-23 biennium.

21. What are the ongoing costs?

In addition to the staff-related funding, ongoing costs include:

- **$6,000,000** for Services and Supplies (SS) costs covering facility changes necessary to bring DHS|OHA into compliance with CJIS Security Policy.
- **$37,975** per biennium for CJIS clearance fees. This includes $12.50 for fingerprinting, $28 for OSP fees and $13.75 for FBI fees per person based on 700 clearances per biennium due to a 10% annual attrition in DHS|OHA CJIS-cleared staff from retirement, promotion, and other factors.
- **$150,000** for site visits and inspections, training and awareness/education materials, and providing trainings, workshops, and other related costs including site, services, lodging, and transportation costs.

22. What are the potential savings?

Short-term savings will be primarily around increasing security and compliance to federal requirements, thereby avoiding federal compliance plans and/or penalties that may be costly. Long-term benefits will not only include avoiding federal penalties, but reducing potential costs dealing with privacy incidents and security breaches and providing services to those affected thereafter (which can reach millions of dollars). In addition, through SPSO services, privacy and security requirements will be inculcated in broader business processes and systems at all levels of the agency. This will include incorporation of better privacy and security process development in Requests for Proposals and the business processes that surround both service and IT contracts. The net result will be a reduction in costly incidents and breaches.

23. What are the sources of funding and the funding split for each one?

General Funds matched with Medicaid Match are the underlying funding for the non-add Other Funds limitation for the Shared Services costs.

DHS Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE

Oregon Health Authority
2021-23 Policy Package

Division:	Fiscal and Operations Division
Program:	Office of Program Integrity (OPI)
Policy package title:	Forensic Digital Investigators
Policy package number:	444
Related legislation:	None

Summary statement:

Electronic health records (EHR) systems and the digital record keeping environments have become common place with health care providers. The construction, capabilities and capacities of these systems vary widely, and create multiple levels of questionable digital issues as related to the audits performed by Program Integrity Audit Unit (PIAU). Not possessing the ability to perform forensic digital audits and develop and mature this capacity to keep pace with modern and changing technology will place the Office of Program Integrity OPI) and the Oregon Health Plan (OHP)/Medicaid behind in its capabilities and sophistication for auditing in today's digital world. This proposal adds two forensic digital auditors to investigate digital record keeping and operation of EHR systems. These investigations will focus on the capability and operational aspects of the EHR through a systematic and in-depth look at the digital audit trail produced by provider operators.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$206,638**	**$0**	**$242,578**	**$449,216**	**2**	**1.76**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

This policy package is proposed to modernize and expand the capacity of the OPI to conduct forensic audits of the multiple digital record keeping environments and software platforms used by OHP/Medicaid providers. The growth in digital record keeping technology has proven highly successful when employed appropriately, however OPI has found over the past few years the construction, capabilities and capacities of the numerous EHRs vary widely, as does the technological sophistication to operate and manage them. This variability poses a real threat to the integrity of the OHP/Medicaid program due to the questionable reliability, dependability and operator accuracy of the systems used for documenting services in a capable way. The PIAU has consistently been challenged in audits due to the lack of digital capacity to verify findings, validating digital records and forensically investigate the digital audit trail.

This policy proposal adds two forensic digital auditors who will perform their own digital audits independently or will work side-by-side with the Government Auditor 2 positions on existing audits, to investigate the digital record keeping and the operation of the technology used by OHP/Medicaid providers. These investigations will focus on the capability and operational aspects of the EHR through a systematic and in-depth look at the digital audit trail produced by provider operators.

2. What would this policy package buy and how and when would it be implemented?

This proposal adds two permanent full-time positions with digital subject matter expertise to allow Office of Program Integrity auditors to examine OHP/Medicaid provider's Electronic Health Records (EHR) systems and the digital record keeping environments that have become common place with health care providers. Either from their own independent audits, or during the course of an existing audit, the forensic digital auditors will request and research the OHP/Medicaid provider's EHR "digital audit log" with the goal to validate and verify

the accuracy of the established digital record. In the beginning, most of this work will require either on-site or remote access to the provider's system. With experience and familiarity, more of the work may be performed in office or through remote access.

Implementation Timeline

Develop the hiring process and on-boarding of the two Information Systems Specialist 6 staff positions would begin following approval of the policy package and budget authority with hiring projected to be completed by December 2021.

- Development of the forensic digital auditor program and the foundational documents such as policies, procedures, manual, audit working papers, OARs, and others would begin following approval of the policy package and budget authority and continue throughout the first year of operations.
- Implementation of side-by-side process would be immediately after hiring and onboarding. The independent forensic digital audits would begin in second quarter of state fiscal year 2022.

3. How does this policy package further OHA's mission and align with its strategic plan?

- Federal regulations and state administrative rules require that OHP/Medicaid payments made for covered services that are medically necessary and compliant with program rules.
- Forensic digital investigations and auditing supports OHA's mission to ensure all people and communities are achieving optimum physical, mental and social well-being, and have access to quality care.
- This policy package aligns with the value of integrity, the key goal of effective partnerships, the core process of regulating and ensuring compliance, and with the value of stewardship and accountability.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No; however, this policy package is consistent with the U.S. Government Accountability Office (GAO) framework for managing fraud risk in federal programs, which encourages state's OHP/Medicaid agencies to consider the benefits and costs of activities and make investments in Program Integrity activities that offer the most cost-effective investment of resources.

Quantifying results

5. How will OHA measure the success of this policy package?

The success of this policy packages will be measured by:

- An increase in the number of audits with the digital forensic audit component.
- Identification and cataloging of common EHR and digital record keeping issues to benefit provider learning and proficiency.
- Number of provider level EHR system corrective action plans developed, executed and concluded in order to avoid continuing digital record issues.
- An increase in the overpayments recovered from OHP/Medicaid providers due to EHR issues.
- Decrease in fewer incorrect payments to providers, resulting in additional cost avoidance.
- Identifying other providers with similar digital problems or compliance concerns who can be further investigated through the program.
- Return on Investment against recoveries from overpayments and claims adjustments, or cost avoidance resulting from clear EHR operational expectations and up-to-date billing and improved provider practices and education.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

Lower Healthcare Costs.
Regulating and Ensuring Compliance.

7. What are the long-term desired outcomes?

In general, the desired outcome is successful recoupment of improper payments made to OHP/Medicaid providers and a decrease in fraud, waste and abuse activities within Oregon's OHP/Medicaid program. Adding capability to perform digital forensic audits will allow OPI to keep pace with modern and changing technology. Developing and maturing OPI audit abilities will allow the OHA to keep pace with modern auditing in today's digital world.

8. What would be the adverse effects of not funding this policy package?

When OHA makes improper payments to fraudulent or wasteful providers, either directly or through managed care plans, these improper payments require OPI intervention. In the course of auditing providers with EHR's over the years, OPI has observed a significant increase where the EHR system and the operation of the system becomes a defense or rationale for the improper payments, (e.g. payments for services not provided, were not medically necessary, or not documented following regulatory guidance).

Not funding the digital forensic investigator policy package will continue to allow providers to not address the improper operations, limitations or actual system defects in the chosen EHR, hence allowing improper payments to go unchecked. It will also promote a false sense of compliance in providers, who due to the lack of technological sophistication, may not have the ability to know the limitations or weaknesses of their EHR.

OHA must continue to develop smart, strategic and targeted methods to keep pace with Oregon's OHP/Medicaid providers. The approach of this policy option proposal focuses on expanding PIAU's audit activities to include digital forensic audits thereby meeting the modern and ever-changing technology with a specific digital strategy. Not possessing the ability to perform forensic digital audits and develop and mature this capacity to keep pace with modern and changing technology, will place the OPI behind in its capabilities and sophistication for auditing in today's digital world.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

Auditors have requested the "audit log" inherent in EHR solutions; however, the findings are suspect, and the auditors are not trained and skilled in information systems to be able to fully validate the information provided. There have been issues related to the validity of the audit logs and if they can be manipulated to represent inaccurate or fraudulent information.

10. What alternatives were considered and what were the reasons for rejecting them?

An alternative considered was having discussions with the EHR companies regarding their systems, however with the multiple number of systems and the companies asserting operator error, these alternatives proved ineffective. Specifically, OAR 407-120-1505(19) holds the provider accountable for their chosen EHR system yet establishing the difference between operator error and intentional deceptive and fraudulent practices would remain impossible to detect without the digital forensic auditors.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No. This policy package does not require changes to existing stature(s) or a new statute.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

No other state agency would be effected by this policy. Tribal governments employing EHRs would be audited as they are currently and would be subject digital forensic audit of this policy package.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

Not applicable.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

Auditing is one method for ensuring the quality of services provided to OHP/Medicaid members are consistent with regulatory standards. When OHA pays fraudulent or wasteful providers, either directly or through managed care plans, for services that the providers did not furnish or for services they did furnish to beneficiaries they knew had no need for the services:

- OHP/Medicaid funds are diverted from their intended purpose
- Beneficiaries who need services may not receive them
- Beneficiaries who do not need services may be harmed by unnecessary care

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

Staffing and fiscal impact

Implementation date(s): October 1, 2021

End date (if applicable): Ongoing

15. What assumptions affect the pricing of this policy package?

Office of Program Integrity assumes that some of the proposed process and activities can be integrated into existing audit processes.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

Developing and implementing the digital forensic investigator program will be a new responsibility for OPI. There are numerous federal and state regulations regarding service documentation regardless of using hard copy or digital systems. This package is focused on EHR functionality, operator aspects, and the impact on the actual OHP/Medicaid documentation record elements.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This policy package is requesting two new permanent full-time Information Systems Specialist 6 positions.

20. What are the start-up and one-time costs?

None.

21. What are the ongoing costs?

Personnel cost including employee services, supplies, shared services and State Assessments & Enterprise-wide Costs.

22. What are the potential savings?

The current return-on-investment in OPI is approximately 4.5:1. There will also be significant cost avoidance savings once the program is operational and mature. The policy package will also reduce provider abrasion as they understand more completely their EHR and its operational elements.

23. What are the sources of funding and the funding split for each one?

The funding split is 46 percent General Fund and 54 percent Medicaid and CHIP federal matching funds.

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Personal Services	$166,584		$195,558	$362,142	2	1.76

Oregon Health Authority
2021-23 Policy Package

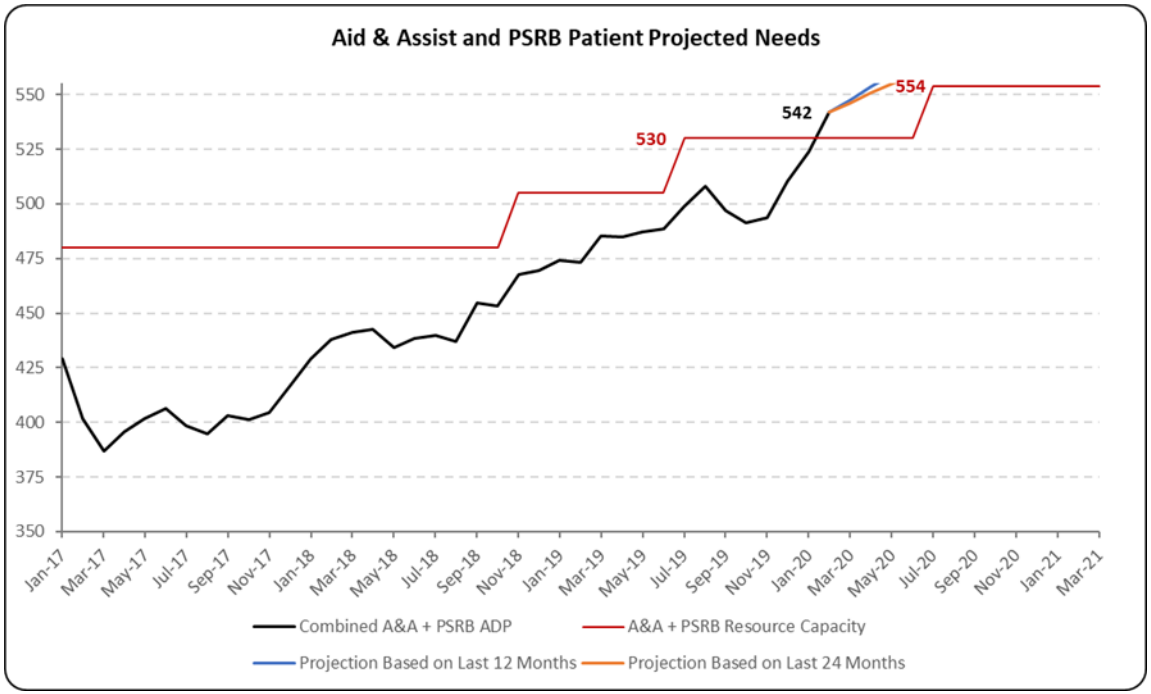
Division: Oregon State Hospital
Program: Oregon State Hospital
Policy package title: Expanded Capacity
Policy package number: 445
Related legislation: None

Summary statement: This policy package opens the two remaining vacant treatment units on the Junction City campus, increasing OSH service capacity by 24 Hospital Level of Care (HLOC) beds and 24 Secure Residential Treatment Facility (SRTF) beds, allowing for movement of patients between campuses to yield space on the Salem campus to better meet the demand for treatment of individuals under Aid and Assist orders.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$30,009,638**	**$0**	**$0**	**$30,009,638**	**122**	**112.24**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?



The Oregon State Hospital (OSH) is experiencing a surge in its patient population resulting in the need for increased bed and treatment capacity. Current OSH projections show an increase in admissions for Aid and Assist defendants and defendants found Guilty Except for Insanity (GEI).

Oregon State Hospital is legally mandated to admit individuals with Aid and Assist court orders within 7 days of receipt of the order. These patients are served on the Salem campus. In addition, OSH is required to admit individuals under the jurisdiction of the Psychiatric Security Review Board (PSRB), GEI patients, when the board determines they need hospital level of care, at either the Salem or Junction City campus. When the referral rate of Aid and Assist and GEI patients exceeds the available bed capacity, OSH has very few options and opening additional beds becomes necessary to mitigate legal sanctions in federal and county courts.

The OSH resource capacity for the Aid and Assist and GEI populations is 530 beds. At the 2020 legislative session, Senate Bill 5204A was recommended at Ways and Means (Capital Construction subcommittee) with a "do pass" to open an additional unit at the Junction City campus to bring that capacity to 554 beds. Projections at that time showed that patient need at OSH would exceed that 554-bed capacity two months prior to the unit being opened, in May 2020. The legislative session ended prior to funding this recommendation and the unit did not open. In March 2020, OSH temporarily limited admissions to the state hospital in response to the coronavirus pandemic and the need to protect its vulnerable cohabitating patient population. During this time the need for state hospital beds continued to rise, resulting in people experiencing longer stays in jail and acute care hospitals. As the pandemic recedes and operations normalize, the demand for bed space at the hospital may be greater than ever because of the building backlog and timelines for treatment.

Bringing these 48 beds online maximizes OSH's ability to provide needed services within the behavioral health continuum. Additionally, it provides OSH with greater flexibility across two campuses at both the hospital and SRTF levels of care to meet the needs, across patient populations, for clinical progress and throughput.

2. What would this policy package buy and how and when would it be implemented?

This policy package would do two things: it would operationalize the last two remaining state hospital units on the Junction City campus (Forest 1 and 3) and add 48 beds to the Oregon State Hospital system. Forest 1 would open as a Secured Residential Treatment Facility (SRTF) for people under the jurisdiction of the PSRB. The second unit, Forest 3, would open as a Hospital Level of Care (HLOC).

Operationalizing the entirety of Junction City is a statistical necessity to meet the inpatient state hospital needs of the people of Oregon. Opening two levels of care (SRTF and HLOC) will maximize the utilization of the hospital as a system, allowing more versatility to OSH and the response to population demands. As the Junction City campus opens units, additional staffing is required at varying thresholds. Opening the Forest 1

SRTF unit would require approximately 27 unit-specific staff and 28 clinical and support personnel. Forest 3, the HLOC unit, would require approximately 34 unit-specific staff, 33 clinical and support personnel. Some staffing for timekeeping, forensic evaluation and human resources would be located within Oregon Health Authority – Central Services.

3. How does this policy package further OHA's mission and align with its strategic plan?

The Governor prioritizes Healthy and Safe Communities, of which OSH plays a definitive role in the treatment of its patient populations and access to specialized care that cannot be found elsewhere in the state. The package also aligns with the OHA Core Values of Health Equity, Service Excellence, Partnership, and Innovation.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

This package is not being requested as a result of an Oregon Secretary of State or internal audit.

Quantifying results

5. How will OHA measure the success of this policy package?

Oregon State Hospital, Salem campus, would meet the 7-day admission requirement for people under Aid and Assist orders thereby avoiding Federal and County legal actions against the hospital and OHA.

Timely admissions for patients under GEI orders.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

This policy package aligns with the OHA Performance Measures of Improving Population Health, Improving Quality of Care as well as the Process Measures of Regulating and Ensuring Compliance and Delivering Coordinated High Quality & Culturally Responsive Health Services.

7. What are the long-term desired outcomes?

This package would allow OSH to admit the maximum number of patients the Junction City campus was designed to accommodate. Opening one unit as a HLOC would allow versatility in population management, as patients requiring a SRTF level of care can be housed on a HLOC unit, but not the other way around. This package maximizes OSH's contribution to the behavioral health continuum of care supporting the right care, in the right place, at the right time.

8. What would be the adverse effects of not funding this policy package?

Oregon State Hospital would be unable to meet its legal mandates of admitting people with Aid and Assist or GEI orders in the timeframes required. This would result in people remaining in jails and not receiving the treatment they need to begin their recovery and, additional legal actions in federal and county courts. OSH would need to restrict availability of treatment to other patient populations to meet the legal mandates.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

Oregon State Hospital has finite bed capacity to manage the surge in people referred and/or mandated to the hospital. Unit realignments and population management has occurred within the confines of treatment and

levels of care available. The continued increase in patients with Aid and Assist orders and GEI commitments has necessitated the conversion of resources for civilly committed individuals to serve the forensic population.

10. What alternatives were considered and what were the reasons for rejecting them?

Oregon State Hospital has very few alternatives to opening additional units to meet the increased demand due to legal requirements to admit individuals with Aid and Assist and GEI orders and to only discharge people under the jurisdiction of the PSRB who no longer pose a risk to themselves or others due to a mental illness.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

This policy package does not require any changes to existing statute(s) or require a new statute.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

By the nature of its business, Oregon State Hospital touches every county, tribal and state behavioral health agency; municipal and circuit courts; state and local law enforcement agencies; jails; and the PSRB to name a few. Expanding the capacity of OSH and opening the final two units on the Junction City campus would enable people to receive the care and services they need in a timely fashion.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

This policy package was developed by OSH as a direct result of increased demand for state hospital services.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

Oregon State Hospital's vision statement is, "We are a psychiatric hospital that inspires hope, promotes safety, and supports recovery for all." Often the people receiving OSH's services are some of the most marginalized members of our society. Expanding the capacity of OSH would better meet the growing demand for state hospital mental health services for the people of Oregon on their journey to wellness.

Staffing and fiscal impact

Implementation date(s): September 1, 2021

End date (if applicable): Not applicable

15. What assumptions affect the pricing of this policy package?

The pricing of this policy package is based on salary projections and services and supplies. Pricing reflected in summary is for 22 months of the 2021-23 biennium.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

There would be no new responsibilities for OHA.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

Shared Services, including OIS will be impacted by the increase in personnel. This package assumes a Human Resource Analyst position for OHA Central Services to support Oregon State Hospital. Replacement cycle computers and other standard expenses are incorporated within the position pricings.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

This package would increase capacity at the Junction City campus by 48 beds. This capacity will allow for the transfer of additional GEI and civil patients from services in Salem to services in Junction City, allowing OSH to meet the growing needs of patients under aid and assist orders in Salem.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This policy package would establish a total of 122 permanent, full-time positions. It includes 55 positions for the Forest 1 Secure Residential Treatment Facility (SRTF), of which 2 positions would be at the Salem campus for compliance and timekeeping support. It also includes 67 positions for Forest 3 Hospital Level of Care (HLOC), of which 2 positions would be for forensic evaluation services and human resources.

Grand Total		**55**	**Grand Total**		**67**

20. What are the start-up and one-time costs?

This package has start-up costs related to retrofitting both units with up to date anti-ligature hardware and furnishings such as door hardware, patient beds, modifications to patient room built in cabinets, soap and towel dispensers and other various safety improvements. These anti-ligature updates were performed on all open units of Oregon State Hospital in 2018 after a Joint Commission Survey found the existing hardware and furnishing a safety and ligature risk. These anti-ligature improvements are estimated to cost approximately $230,000 per unit or $460,000 for both.

21. What are the ongoing costs?

Reoccurring costs to operate Forest 1 Secure Residential Treatment Facility (SRTF) are $13.2 million. Reoccurring costs to operate Forest 3 Hospital Level of Care (HLOC) are $16.5 million.

22. What are the potential savings?

Patients receive service at the right time, and at the right level of care, avoiding possibility of further illness that may prolong the length of their stay at OSH.

23. What are the sources of funding and the funding split for each one?

This package would be General Fund only.

Oregon Health Authority: 2021-23 Policy Package

Oregon Health Authority
2021-23 Policy Package

Division:	Central Services
Program:	Fiscal and Operations
Policy package title:	OHA Enterprise Risk Management
Policy package number:	446
Related legislation:	None

Summary statement:

The Oregon Health Authority (OHA) continues to build the internal systems of control to manage a variety of risks to its programs and systems, and continuously improve the level of transparency about how OHA manages those risks. The federal government has mandated all federal agencies develop an Enterprise Risk Management (ERM) program and designate a Chief Risk Officer to oversee the program. To ensure the efficient and effective use of state resources, OHA requires a similar unit to oversee and manage OHA's portfolio of risks, including the infrastructure necessary to oversee and manage an ERM function across OHA. This work aligns with and compliments improvements in the functional alignment of work with the performance system, enhanced transparency, and building processes to improve OHA's culture of accountability.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$527,087**	**$46,115**	**$85,657**	**$658,859**	**3**	**2.25**

Oregon Health Authority: 2021-23 Policy Package

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

The Oregon Health Authority's (OHA) recently finalized 10-year strategic plan focuses on eliminating health inequities by 2030. In order to meet this goal, OHA requires a better understanding of the internal and external risks to achieving that strategic goal from across the portfolio of systems and programs OHA administers. In addition, through the implementation of the OHA performance system, OHA requires a dedicated unit to focus on how risk is being managed across OHA, to understand how resources can be allocated in an efficient manner to mitigate those risks, and to identify the internal and external challenges to efficient and effective program implementation.

2. What would this policy package buy and how and when would it be implemented?

This policy package would buy expertise and dedicated staff to assess, understand and communicate to leadership the risks to program implementation. Risk management activities would be initiated six months into the biennium for an 18-month cost estimate due to the time necessary to fill the positions.

3. How does this policy package further OHA's mission and align with its strategic plan?

This package is a key component of the new strategic plan and will help assure that with equity at its core, OHA is meeting its many and varied mission areas. Integrating risk management into every aspect of the agency will impact how effectively managers are assessing the success of their programs, improving understanding about what will enable those programs to succeed or fail, allow managers to get ahead of issues and mitigate risks proactively, and will be key to the success of the OHA mission.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

While not directly responsive to a specific internal or Secretary of State audit, the ability to better assess and monitor risks and implement effective systems of control to minimize the likelihood of negative audit findings as part of a broader Enterprise Risk Management culture is a key tenet of auditing and successfully managing programs. OHA looks forward to partnering with internal audit and the Oregon Secretary of State's office in making this program a success in OHA.

Quantifying results

5. How will OHA measure the success of this policy package?

Quantification of risk and analysis of that risk is key to the success of any Enterprise Risk Management effort. OHA will use risk logs and other analytical tools to better determine where problems could occur upstream, rather than just react to issues as they occur. Risk logs are a quantification of risk scores that ranks the overall enterprise risks to the success of OHA programs. These risk logs can help the agency focus time and resources at putting in prevention and mitigation tools to stop bad outcomes from occurring. Other analytical tools include building a more dynamic network model of risk – one depicting how risks are interrelated through technology, workflow process, or funding mechanism – which would allow managers and leadership to identify a "center of gravity" where a high concentration of similar issues exist. This would enable more informed decision making around resource allocation, improved visibility into where existing oversight structures are not functioning effectively, and better prioritization of risks by showing the true impact of an issue across multiple parts of the agency. The current approach to documenting risks does not capture these relationships, which perpetuates a siloed approach to solving problems.

The success of this policy package would be a functional ERM program that supports and improves decision-making at all levels of the agency.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

This policy package is integral in successfully implementing the OHA performance system and is one of the current process measures that OHA is tracking to measure the success of agency processes. The ERM program will expand the current risk management process measure into a broader look at enterprise risk.

7. What are the long-term desired outcomes?

For the long-term, OHA needs the capability to identify and mitigate risks and explore upstream root causes to known issues in order to prevent problems that come from reactionary management. ERM has real benefits. For example, a system defect in MMIS has the potential to impact the scope and recoupment during a provider audit, the underlying soundness of capitation rate development, the validity of data populated in DSSURS that is used to calculate metrics, and the appropriate draw down of federal financial match, among other things.

If a Change Request does not capture all of these risks in the narrative, a correction may take years to work through the queue alongside other priorities. A business owner not using ERM concepts, who is responsible for writing the narrative and presenting to the IT committee, would have no visibility into any of the issues described above. If the entities downstream are not aware the defect created a problem in the first place, they will not know how to control for the error when using the data from that timeframe, compounding the problem.

ERM can help the agency better understand the risks that impact decisions made by individual managers like the above example and larger strategic decisions made at the executive level. The long-term outcome is that ERM will help OHA meet its 10-year strategic plan goal of eliminating health inequities by better managing

resource allocation, identifying risks and opportunities in advance, and making strategic decisions based on that information.

8. What would be the adverse effects of not funding this policy package?

OHA would continue to not put adequate resources into understanding the upstream root causes and underlying risks to program success. The directive that all federal agencies create ERM plans recognizes that federal agencies have typically done a poor job of looking at underlying risks, and putting prevention steps in place. If OHA is not funded for this work, there will be less concerted effort at monitoring and managing underlying enterprise risks and more reactive management.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

OHA has realigned resources to begin this work as part of the performance system and started to educate managers around OHA about the importance of risk management.

10. What alternatives were considered and what were the reasons for rejecting them?

OHA considered using existing resources, but the current agency staff lack the capacity and necessary expertise to perform the ERM work.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

None.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Risk-informed decision-making at OHA would improve the agency's ability to effectively partner with all its stakeholders, including other government agencies. The ERM program would help ensure state, tribal, and local government agencies understand the risks to successfully implement OHA programs.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

None.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

This package will help OHA achieve the 10-year strategic goal of eliminating health inequities by better focusing the resources of risk management on barriers to achieving this goal. Understanding upstream challenges is key to meeting health equity goals.

Staffing and fiscal impact

Implementation date(s): January 1, 2022

End date (if applicable): Not applicable

15. What assumptions affect the pricing of this policy package?

None.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

The three new positions will be situated in the Central Services Fiscal Division but will perform risk management functions across the entire agency.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

Good collaboration opportunities with internal audit, but no additional responsibilities.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

None.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

The ERM program would include three new permanent, full-time positions: one Operations & Policy Analyst 4, one Operations & Policy Analyst 3 and one Principle Executive Manager F.

20. What are the start-up and one-time costs?

None.

21. What are the ongoing costs?

Personal services costs for the new positions.

22. What are the potential savings?

While the agency does not anticipate savings as a direct result of this policy package, an effective ERM program would ensure the effective and efficient utilization of resources and would prevent potentially costly problems from occurring.

23. What are the sources of funding and the funding split for each one?

Funding for personal services in OHA Central Services, including the Fiscal Division, are determined by an agency-wide cost allocation methodology. The budgeted funding splits are as follows, General Fund at 80 percent, Other Funds at 7 percent and Federal Funds at 13 percent. Federal funding sources include primarily Medicaid matching funds and other federal grants.

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Personal Services	$441,200	$38,604	$71,696	$551,500	3	2.25
Services & Supplies	$85,887	$7,0511	$13,961	$107,359		
Capital Outlay

Oregon Health Authority
2021-23 Policy Package

Division:	Public Health Division
Program:	Health Licensing Office (HLO)
Policy package title:	Board of Cosmetology Licensing Fees
Policy package number:	447
Related legislation:	None

Summary statement:

The Board of Cosmetology licensing fees must be increased to cover the cost of licensing and regulating the board's professionals and protecting the public.

The board's current fees cannot sustain the program. Revenue and expense forecasts predict the board to slip into a budget deficit in 2020 that will continue in 2021-23. Without an increase in fees, the Health Licensing Office (HLO) will not be able to issue licenses to applicants in a timely manner and protect the public from potential health and safety violations. This would have an extremely negative impact on this board and HLO. In addition, the Legislature's mandate to protect the public would be compromised.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$0**	**$1,562,547**	**$0**	**$1,562,547**	**0**	**0.00**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

The Board of Cosmetology licensing fees must be increased to cover the cost of regulating the board's professionals and protecting the public.

The Health Licensing Office (HLO) has been tasked by the Legislature with administering 16 boards and programs, regulating tens of thousands of licensees, and dozens of professions. The Board of Cosmetology is by far the largest program, with more than 66,000 licenses in hair, nails, barbering, natural hair care, and esthetics, as well as licenses that cover facilities and independent contractors.

House Bill 2074 (2013) moved the independent Oregon Health Licensing Agency under the Oregon Health Authority, creating the Health Licensing Office (HLO). This changed the indirect costs from funding in an independent small agency to being part of the Oregon Health Authority (OHA). HLO now contributes to OHA's and Public Health's cost allocation, which distributes shared costs among divisions. This increased the expenses to the board without an increase in fees to offset the additional costs. Each board pays these shared costs based on the number licenses provided by HLO and the services provided to licensees. The Board of Cosmetology carries more than 90 percent of the total cost allocation due to the number of licenses HLO administers. The current fees are no longer adequate to cover the costs.

The fees charged by the board have not changed since June 1, 2011.

The board's current fees cannot sustain the program. Revenue and expense forecasts predict the board to slip into a budget deficit in 2020 that will continue in 2021-23. Without an increase in fees, HLO will not be able to issue licenses to applicants in a timely manner and protect the public from potential health and safety violations.

This would have an extremely negative impact on this board and HLO. In addition, the Legislature's mandate to protect the public would be compromised.

2. What would this policy package buy and how and when would it be implemented?

HLO and the board designed the fees to be less for individuals entering the profession and more for individuals who were established along with businesses. The fees for individuals who are entering the profession out of school increased on an average of $10 and the fees for individuals renewing or coming from another state increased an average of $20. Applications for business licenses (facility, independent contractors, freelance, etc.) increased an average of $34 and business license renewals increased an average of $43. These fee increases would go into effect January 1, 2022.

3. How does this policy package further OHA's mission and align with its strategic plan?

OHA's mission is to ensure all people and communities can achieve optimum physical, mental and social well-being through partnerships, prevention, and access to quality, affordable health care. The focus of the Health Licensing Office is on helping its applicants have healthy and safe communities and a thriving statewide economy.

Raising the Board of Cosmetology's fees would support the administration of the board, which is tasked with protecting the public from unqualified practitioners and practitioners violating health and safety requirements. The fee increase has a direct impact on the agency's ability to ensure public health and safety for people who receive services by cosmetology licensees.

The board also oversees tens of thousands of licensees who depend on the license to make a living and contribute to the economy of Oregon.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

OHA will measure the success of the policy package through metrics associated with OHA performance measures. Specifically, with the foundational capabilities related to OP6, "Regulating & Ensuring Compliance" core processes and meeting timely Regulatory Compliant Investigations (2KOP6F) and completion of Inspections and Surveys (2KOP6G) performance metrics.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

This policy package allows achievement of OHA foundational capabilities related to OP6, "Regulating & Ensuring Compliance" core processes. Specifically, meeting timely Regulatory Complaint Investigations (2KOP6F) and completion of Inspections and Surveys (2KOP6G) performance metrics, including Regulatory Complaint Investigations, Inspections & Surveys.

7. What are the long-term desired outcomes?

The Board of Cosmetology's revenue will stabilize. The board and HLO will continue its mission to protect Oregonians who receive services from these professionals. Once revenues are stabilized the board will be able to cover expenses without affecting the other boards within HLO. The revenue collected will cover the cost of licensing practitioners, inspecting facilities, administering qualifying examinations in several languages, investigating complaints and protecting the public.

8. What would be the adverse effects of not funding this policy package?

The board will not have enough revenue to continue to operate efficiently. Without the needed revenue, HLO would have insufficient staff to process applications timely and license practitioners so they can begin working. HLO would also have insufficient staff to inspect facilities throughout Oregon to make sure facilities are abiding by the safety and sanitation rules adopted by the board.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

HLO is a cost-conscious organization, constantly streamlining and trying to reduce administrate costs. With the Board of Cosmetology, HLO had offered a fee discount in July 2015 for renewing licenses online, as it takes less staff time to process online renewals but stopped offering the discount in December 2019 to address the revenue shortfall. The number of licenses issued under this board remains steady with little growth over the years, so revenues are not increasing enough to cover administrative costs.

10. What alternatives were considered and what were the reasons for rejecting them?

HLO worked to reduce cost by streamlining administrative processes however, that did not reduce expenditures enough to allow the Board of Cosmetology to cover expenses.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

None.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

None.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

Increased revenue will continue to allow HLO to serve diverse populations such as administering the qualification examinations in several different languages, having forms translated and hiring bilingual staff.

Staffing and fiscal impact

Implementation date(s): January 1, 2022

End date (if applicable): Ongoing

15. What assumptions affect the pricing of this policy package?

Analyzing revenue and expenditure trends since the HLO moved under the administration of OHA. This proposal amounts to a fee increase of approximately 39 percent across 60 distinct fees. The increase will be collected in two renewal cycles in the 2021-23 biennium and will offset a projected cash shortfall.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

No.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

No new positions would be needed, nor would the existing positions need to be modified. This policy package would maintain the current staffing levels.

20. What are the start-up and one-time costs?

None.

21. What are the ongoing costs?

Cost of administering the program.

22. What are the potential savings?

None.

23. What are the sources of funding and the funding split for each one?

Other Funds from fees paid by Board of Cosmetology licensees.

Oregon Health Authority
2021-23 Policy Package

Division:	Public Health Division
Program:	Radiation Protection Services (RPS)
Policy package title:	Radiation Protection Services Fee Increase
Policy package number:	448
Related legislation:	Legislative Concept 8

Summary statement:

The purpose of this policy package is to ensure that Radiation Protection Services (RPS) can continue providing adequate radiation health and safety of Oregonians by creating 2021-2023 financial stability and adequate biennia funding through user-fee increases.

Without additional revenues, RPS budget solvency will be threatened, leading to significant program staff and service reductions resulting in increased potential for harmful radiation exposure and injury to patients, workers and the public; and breaching of inter-agency agreements.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$0**	**$1,408,249**	**$0**	**$1,408,249**	**3**	**2.25**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

OHA is proposing this policy package to ensure that Radiation Protection Services (RPS) can continue conducting radiological health and safety regulatory inspections, issue licenses, and meet emergency response requirements by creating critical sustainable biennia funding. RPS needs the means to eliminate unfunded liabilities in order to address the below issues.

Inadequate funding has resulted in a significant service gap. Out of 3,850 X-ray and tanning bed registrant facilities in Oregon, there is an inspection backlog of 676 facilities (652 and 24 respectively) which continues to increase. This means that RPS is unable to achieve OHA foundational capabilities related to OP6, "Regulating & Ensuring Compliance" core processes and comply with Oregon Revised Statutes (ORS 453).

Current service levels allow only six of eight) cross trained RPS Radiation Health Physicist inspectors to conduct on-site facility inspections. In 2019, RPS completed 1,148 total facility inspections including 844 X-ray, 96 tanning, 102 mammography and 106 radioactive material licensing (RML) inspections. Additional inspectors are needed to address the backlog.

A lack of funding has meant that for medical registrants and licensees, RPS is not able to effectively complete timely investigations and mandate corrections of mis-administrations of radiation involving patient cancer treatments or diagnostic procedures. OHA/RPS is not be able to ensure that tanning facilities are being operated properly, including that operators have met training requirements and underaged tanning is not taking place. Furthermore, inadequate funding would mean that RPS has reduced staffing and less capacity to provide the Oregon Department of Energy with an ORS-mandated radiological emergency response team for mitigating radiological incidents.

The Radioactive Material Licensing (RML) program is also in jeopardy of breaching the agreement between the United States Nuclear Regulatory Commission (NRC) and the state of Oregon's Governor's letter of certification to comply with the provisions of Section 651(e) of the Energy Policy Act of 2005. Since 1965, Oregon has been an Agreement State (AS) through the Governor's decree. As such, RPS enforces federal regulations and Oregon's statutes and administrative rules relating to Oregon's radioactive material licensees. RPS is required to satisfy NRC performance indicators which hold the state accountable for staffing levels, regulatory practices, incident response, and investigation performance.

RPS has limited capabilities to conduct consumer complaint follow up; train local and state radiological emergency first responders-receivers; offer radioanalytical laboratory services to test agricultural products or complete environmental surveillance activities.

Originally, RPS was supported by State of Oregon, General Fund. However, several years ago, the funding mechanism changed to a user-fee model. Since 1989, RPS has implemented four Legislatively approved user-fee increases (most recently 25 percent for its X-ray and RML programs, and 50 percent for the tanning program in 2015). Unfortunately, current user-fees have not been able to keep pace with inflation and increasing program/staffing expenses. This has had a direct impact on how our agency tries to ensure radiation health and safety of Oregonians. Over the past 12 years there has been a 30 percent staff reduction (22 to 16 members).

2. What would this policy package buy and how and when would it be implemented?

RPS needs to ensure adequate funding through 2023-2025 to maintain its licensing, inspection and emergency response capabilities. A 2021-2023 policy package will generate additional biennial revenue. This will provide RPS financial stability and ensure adequate radiation health and safety of Oregonians. Studies of comparable RML state and federal funding mechanisms indicate that increased fees and new revenue streams are warranted.

Effective January 1, 2022, RPS is proposing to 1) institute radioactive material licensing (RML) user-fee increases, 2) restructure the agency X-ray registrant user-fee model, 3) implement X-ray vendor licensing fees, and 4) implement tanning registrant user-fee increases.

1) Implement a 30 percent fee increase for Radioactive Material Licensees who pay less than a current $3,000 licensing fee, and a 50 percent fee increase for licensees who pay a current $3,000 or more licensing fee to recover unfunded program costs and properly reapportion the fee structure (based upon past user-fee cap inequities). The fee-change properly reapportions all licensee fees and is projected to generate $559,241 additional biennial revenue.

2) Restructure the 2021-2023 X-ray registrant fee schedule to be "tube based", rather than the existing facility machine control panel fee. This would align Oregon's fee structure with the states of Washington and California tube-based fee models. This would assure that RPS is being appropriately compensated and that Registrants are paying a registration fee based upon RPS staff's inspection time required to ensure safe machine operation and to reflect higher tube energy levels which present potential for increased patient/operator/public harm. The above fee schedule is projected to generate $1,228,198 additional biennial revenue.

3) Initiate a new annual $500 X-ray vendor licensing fee for vendors that are licensed for Sales, Services, and Consultation for Radiation Machines in order to recover unfunded staff costs associated with processing license applications, vetting vendor qualifications, and reviewing/approving training curriculums. The vendor license fee is projected to generate $60,000 additional biennial revenue.

4) Implement a 33 percent tanning registrant annual user-fee cap increase to $200 per device to recover unfunded program costs. This fee cap increase is projected to generate $135,563 additional biennial revenue.

Implementation of the above 2021-2023 RPS program funding strategies is projected to increase revenue by $1,983,002 biennially and avert a significant staff/service reduction, reverse inadequate Section funding, eliminate a deficit, and ensure financial sustainability and staffing through 2025-2027.

With increased funding and position authority during 2021-2023, RPS will establish three new positions, effective January 1, 2022, with RML inspection, licensing, emergency response and administrative functional responsibilities. This will allow RPS to be at 76 percent of Conference of Radiation Control Program Directors, Inc. recommended staffing levels (19 versus 25), which is essential to meet state and federal RML mandates relating to radiation public health and safety.

Implementation of 2021-2023 RPS program funding strategies will avert a significant staff and service reduction, reverse inadequate Section funding, and eliminate a deficit. RPS will also be able to add two Environmental Health Specialist 3s (EHS3) who will act as Radiation Health Physicists cross trained to complete RML, X-ray and tanning facility inspections and an Administrative Specialist 1 (AS1) to administer a new database for a new X-ray tube-based fee schedule. The increased revenue is projected to exceed increased staffing costs, creating a reserve/ending balance of $131,557 for 2021-2023. Because of the increased funding and elimination of an accrued deficit, the revenue versus expense projected reserve/ending balance would improve to $416,893 for the 2023-2025 biennium.

3. How does this policy package further OHA's mission and align with its strategic plan?

This policy package aligns with the Governor's policy priorities, including to "control cost growth in health care spending," and "modernize public health." It also aligns with the OHA strategic plan to promote and

protect safe, healthy and resilient environments to improve quality of life and prevent disease, and strengthen public health capacity to improve health outcomes.

The policy package helps ensure OHA/Radiation Protection Services (RPS) can offer adequate, essential staffing/services that promote the health and safety of all Oregonians. It directly impacts the triple aim of better health, better care, and lower cost for all Oregonians.

Through RML safety regulation of service providers, patients achieve better health and care. A stable RPS/ RML program also allows for public health modernization efforts. Radiation emerging technologies are evaluated and approved for use in Oregon by RML staff, and new radiation operators (practitioners) are approved to use new radiation modalities which improve patient healthcare.

As a result, progress toward achieving triple aim goals and health equity is made because financially challenged patients are afforded more opportunities to receive high-quality, high-tech health care. Health equity is also improved for rural communities in that high-quality, lower cost patient care is more readily accessible.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

OHA will measure the success of the policy package through metrics associated with the OHA performance measures and the foundational capabilities related to OP6, "Regulating & Ensuring Compliance" core processes. Specifically meeting timely Regulatory Compliant Investigations (2KOP6F) and completion of Inspections and Surveys (2KOP6G) performance metrics, including meeting Timely & Accurate Report submissions, Monitoring Contracts & Grants, Remediating Audit Findings, Licensure & Certifications, Regulatory Complaint Investigations, Inspections & Surveys, and Rule Reviews.

In addition, success regarding the RPS radioactive material licensing program will be measured by NRC, "Integrated Material Performance Evaluation Program" (IMPEP) formal audit results which include performance indicators for staffing levels, regulatory practices, incident response, and investigation performance.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

This policy package allows achievement of OHA foundational capabilities related to OP6 "Regulating & Ensuring Compliance" core processes. Specifically, meeting timely Regulatory Complaint Investigations (2KOP6F) and completion of Inspections and Surveys (2KOP6G) performance metrics, including meeting Timely & Accurate Report submissions, Monitoring Contracts & Grants, Remediating Audit Findings, Licensure & Certifications, Regulatory Complaint Investigations, Inspections & Surveys, and Rule Reviews.

Additionally, this policy package is related to RPS' role with the, *"Oregon Emergency Comprehensive Plan, Emergency Support Function (ESF) #8, Public Health and Medical Services"* for radiation incidents.

7. What are the long-term desired outcomes?

The overall expected result is that OHA/RPS will have adequate revenue to support protecting Oregonians from unnecessary and harmful radiation and, at the same time, improve the health of its citizens through regulating safe and appropriate use of radioactive sources.

Additional funding gives RPS the capability to conduct timely radiation incident mitigation and consumer complaint follow up; training of local and state radiological emergency first responders/receivers; testing of agricultural products through radioanalytical laboratory services and completing environmental monitoring activities.

With adequate funding, the Radioactive Material Licensing (RML) program can maintain its good standing as a Nuclear Regulatory Commission (NRC) Agreement State (AS) member and properly enforce NRC safety regulations for Oregon radioactive material licensees. RPS will be able to satisfy NRC performance indicators which address minimal inspection and license reviewer staffing levels, standards for inspections and licensing actions, and emergency response/incident investigation minimum requirements. Even with a fee increase, there are health care system cost-savings because as an AS member, OHA/RPS licensing fees will still be significantly lower than if licensees were regulated directly by the NRC.

ORS 469.533 requires OHA/RPS to provide the Oregon Department of Energy with a 24/7 radiological emergency response team trained/equipped to mitigate radiological transportation events and provide environmental sampling assistance for potential Columbia Generating Station/Hanford Reservation radiological release events which cross into Oregon. Increased funding will more fully support operational staffing and equipment expenses to meet mandated emergency response team requirements.

The health and safety of every Oregonian is impacted by appropriate uses of radiation. Examples include Gamma Knives and other radiation therapies used to treat cancers, gauges containing radioactive materials for food manufacturing and road construction, and industrial radiography cameras to ensure building steel girder integrity.

Increased financial stability means that OHA/RPS will be able to provide timely, effective regulation and safety inspections and licensing of 400 Radioactive Material Licensing (RML) facilities that use approximately 1,500 radioactive sources, and more than 3,600 X-ray facilities that use over 12,000 machines for medical, academic, industrial, and research applications; and 316 tanning facilities that use approximately 1,299 devices. Virtually, all Oregonians benefit from radiation sources and devices and OHA/RPS programs.

8. What would be the adverse effects of not funding this policy package?

Overall, without additional funding, RPS will have to significantly reduce staff and services which will increase the potential for harmful radiation exposure and injury to patients, workers and the public. RPS will not be able to complete facility inspections of all registrants to ensure radiation devices/sources are being used safely and within manufacturer specifications, or conduct timely licensing activities, radiological environmental surveillance and emergency response services.

Current staffing will most likely reduce from 16 full-time equivalent (FTE) to 8 FTE, deteriorating to a level of nominal services (i.e., device registry only programs and no regulatory work to protect health and safety). As such, RPS and the RML program will also be in jeopardy of breaching interagency responsibilities including 1) an agreement between the United States Nuclear Regulatory Commission and the state of Oregon's Governor's letter of certification to comply with the provisions of Section 651(e) of the Energy Policy Act of 2005, 2) an ORS 469.533 mandate to have radiological emergency preparedness/response capabilities, and 3) a long-

standing FDA services contract to inspect all mammography facilities in Oregon. RPS, as the only State of Oregon radiation control agency, would be rendered ineffective to provide adequate radiation use and safety.

Based upon 2023-25 biennium revenue/expenditure projections, RPS will be in a significant deficit position ($2.2 million), unless revenues are increased. The existing legislatively approved RPS registration and licensing fee schedules place RPS in a fragile position because of its sole reliance upon user fees to meet budgetary responsibilities.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

To compensate for inadequate funding, RPS has reduced its staff. Over the past 12 years there has been a 30 percent staff reduction (22 to 16 members). RPS has also utilized LEAN principles to fully maximize its productivity and efficiency through staff reconfigurations, on-site facility inspection frequency changes, and use of new IT equipment. Via cross-training, other tanning/X-ray facility inspection staff have taken on added RML functions including performing inspections, emergency response, and environmental surveillance/radioanalytical lab responsibilities.

Based upon risk evaluation, selected facility inspection frequencies have been decreased. RPS instituted electronic field reporting for inspections, created new databases for monitoring regulatory functions and generating new radioactive material licenses, and smart phone technology has been utilized, combined with new radiation detection software, to enhance emergency response/environmental surveillance.

All options have been exhausted to maximize existing funding.

10. What alternatives were considered and what were the reasons for rejecting them?

Initially, RPS considered a policy package allowing establishment of additional service fees for hazardous material response; however, it was determined that further legal review was required to determine if RPS possesses the appropriate statutory authority. This alternative was not rejected, but the time constraints of research would threaten implementation in the next biennium.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

Yes. Legislative Concept (LC) 8, "RPS Fee Increases" does the following:

1) Amends ORS 453.757(1) to establish a new X-ray tube-based registration program.
2) Amends ORS 453.729(2) to increase the tanning registration cap fee.
3) Creates a new ORS for X-ray vendor licensing fee.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Other agencies could be affected negatively if the policy package is *not* implemented as part of LC 8. RPS would be in jeopardy of breaching interagency responsibilities including 1) an agreement between the US Nuclear Regulatory Commission (NRC) and the State of Oregon, Governor's letter of certification to comply with the provisions of Section 651(e) of the Energy Policy Act of 2005, 2) the Oregon Department of Energy (ODOE), via an ORS 469.533 mandate to have radiological emergency preparedness/response capabilities, and 3) a long-standing Food and Drug Administration (FDA) RPS services contract to inspect all mammography facilities in Oregon.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

The State Radiation Advisory Committee (RAC) is a primary stakeholder group representing all Registrants and Licensees and provides guidance to RPS regarding Oregon Administrative Rule revisions and budgetary issues. It has been very supportive of past fee changes. The RAC would be an influencer of any proposed fee structure change. They are unanimous in supporting the need for more revenue.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

The policy package will have a significant impact in sustaining RPS functions and capabilities for the benefit of all populations in the state, specifically to address health equity issues, including advancement of triple aim objectives. RPS efforts serve economically challenged patients, improve rural health accessibility to medical services, and facilitate physician extender opportunities.

Examples include:

- Working with manufacturers to approve the sale of hand-held dental X-ray devices used for dental care of indigent people and improving rural service accessibility through communities offering mobile urgent/dental care clinics.
- Ensuring that emerging technologies, like superficial radiation therapy devices, are evaluated/approved for safe use by new groups of medical practitioners (e.g., dermatologists), to increase general and rural community accessibility to skin cancer treatments.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

- Facilitating an inter-agency process to evaluate/approve fluoroscopy training requirements for Advanced Practice Registered Nurses to serve as physician extenders offering pain management treatments to general and rural populations that do not have ready access to physicians.

RPS is challenged to provide timely facility inspections to rural community registrant /licensees. A significant number of the back-logged X-ray facility inspections are in rural and hard-to-reach communities. Due to the added travel time and a lack of RPS staff to complete rural facility on-site inspections, including radiation use and safety education, many medical service providers do not have an opportunity to learn diagnostic and therapeutic imaging techniques which can decrease radiation exposure for their patients.

RPS also serves a select Oregon population, namely, incarcerated citizens and the correction officers who provide security by ensuring the safe use of body scanners in Oregon's correctional facilities. X-ray body scanners improve overall safety and security through detection of contraband and other destructive and dangerous devices.

Finally, this policy package addresses health equity issues in that RPS gives medical practitioners opportunities to treat economically challenged and rural community patients with new diagnostic and therapeutic radiation modalities. This is accomplished through RPS facilitating inter-organizational efforts to evaluate formal radiation education curriculums and their approval as new operator training programs.

Staffing and fiscal impact

Implementation date(s): July 1, 2021

End date (if applicable): Ongoing

15. What assumptions affect the pricing of this policy package?

The pricing assumes the number of licensees will remain approximately the same.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

No.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

Development of a new X-ray tube-fee schedule database. This work will be completed with existing resources, so no additional funding necessary.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

Three new permanent full-time positions, effective January 1, 2022, including two Environmental Health Specialist 3s (EHS3) who will act as Radiation Health Physicists cross trained to complete RML, X-ray and tanning facility inspections and an Administrative Specialist 1 (AS1) to administer a new database for a new X-ray tube-based fee schedule.

20. What are the start-up and one-time costs?

No.

21. What are the ongoing costs?

The personal services and service and supplies expenditures for the three permanent positions.

22. What are the potential savings?

N/A

23. What are the sources of funding and the funding split for each one?

Other Funds limitation requested to support increased revenue from fees paid by Radiation Protection Service licensees.

Oregon Health Authority
2021-23 Policy Package

Division:	Public Health Division
Program:	Oregon State Public Health Lab, Oregon Environmental Laboratory Accreditation Program (ORELAP)
Policy package title:	Oregon Environmental Laboratory Accreditation Program (ORELAP)
Policy package number:	449
Related legislation:	None

Summary statement:

The Oregon Environmental Laboratory Accreditation Program (ORELAP) was established in 1999 and is statutorily mandated. ORELAP accredits Oregon drinking water, environmental and cannabis laboratories based on international standards to ensure laboratories are following federal and state regulations. ORELAP is a fee-based program and is experiencing a budgetary shortfall. This policy package will support a fee increase and an update to the ORELAP fee structure for simplification and to ensure fees are appropriate for the work required to perform laboratory accreditations of differing complexity. A fee increase is needed to ensure ORELAP can provide timely and quality accreditations that meet established standards and regulatory requirements to best serve ORELAP's clients and protect the health of all Oregonians.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$0**	**$896,094**	**$0**	**$896,094**	**0**	**0.00**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

Environmental laboratories conduct analysis of air, drinking water, wastewater, solid and chemical waste, biological tissue and, in Oregon, cannabis. Analyses performed by these laboratories are used to determine compliance with federal, state and local regulations and may have a direct effect upon human health and the environment.

The Oregon Environmental Laboratory Accreditation Program (ORELAP) was established in 1999 and operates under ORS 438.605 to 438.620 and ORS 475B.565. ORELAP accredits laboratories based upon standards established by the National Environmental Laboratory Accreditation Program (NELAP) and under the guidance of the Clean Air Act, Clean Water Act, Safe Drinking Water Act, the Resource, Conservation and Recovery Act and Oregon statute related to cannabis.

ORELAP accredits Oregon drinking water, environmental and cannabis laboratories as well as provides primary and secondary accreditation to laboratories outside of Oregon. ORELAP provides an on-site assessment for accredited laboratories every two years and for new laboratories seeking accreditation to ensure they are complying with accreditation standards.

ORELAP is a fee-based program within the Oregon State Public Health Laboratory that supports a team of six. Funding of ORELAP is accomplished using fees to reimburse the program for cost of performing all accreditation activities performed by ORELAP staff to ensure compliance to all TNI (The NELAC Institute) standards, federal regulations and state rules and statutes. The program also receives a small amount of federal funding for its drinking water work.

ORELAP is projected to have a budget shortfall in the next biennium. ORELAP's current fees are some of the lowest in the country and have not increased for in-state laboratories since the inception of the program in 1999. A fee revision is needed to ensure that ORELAP can provide timely and quality accreditations that meet established standards and regulatory requirements to best serve ORELAP's clients and protect the health of Oregonians. In addition, there are proposed changes to the ORELAP fee structure for simplification and to ensure fees are appropriate for the work required to perform laboratory accreditations of differing complexity. Importantly, the policy package will help ORELAP accredit laboratories that respond to critical emerging needs, such as cyanotoxin exposures from algal blooms and Per- and polyfluoroalkyl substances (PFAS) chemicals in drinking water.

2. What would this policy package buy and how and when would it be implemented?

The policy package is proposing changes to the ORELAP fee structure and increases to its fees. ORELAP's fees use a complex tiered structure that scales up based on each laboratory's accreditation needs. The proposed fee increases are wide-ranging and impact all of ORELAP's clients; the proposed fees include a switch to a five-tier system from three tiers in order to better address the disparity in program time required to assess small laboratories as compared to very large laboratories. In-state annual application fees would increase by $750 to $4,200. Biennial on-site assessment fees would increase by $210 to $500 for the first program in each field of accreditation, while a biennial "Trip Fee" for on-site assessments would be eliminated. Out-of-state application fees would see increases of $1,450 to $7,190. Out-of-state assessment fees would be brought in line with in-state fees through increases of $60 to $440. These proposed changes would ensure the sustainability of ORELAP and support current ORELAP staff to perform timely and quality accreditations of drinking water, environmental and cannabis laboratories to established national and state standards to protect the health of Oregonians.

The proposed fee increase would be implemented November 1, 2021 upon completion of a rule update.

The policy package will support:

- ORELAP staff, including the below activities:
  - Preparing for and conducting on-site assessments for accredited laboratories every two years, when a new laboratory seeks accreditation and when a laboratory adds a new testing method to ensure laboratories are compiling with established testing standards.
  - Writing and responding to assessment corrective actions to ensure deficiencies found during the on-site assessment are addressed.
  - Review of proficiency tests to ensure testing at accredited laboratories are performed accurately.
  - Providing client services to laboratories regarding accreditation, including addressing questions related to obtaining and maintaining accreditation and providing recommendations for improvement. Assessors may assist laboratories with technical questions related to laboratory operations.
  - Training for ORELAP assessors to be certified in advanced testing methods advance testing technologies laboratories request for accreditation. ORELAP assessors are highly skilled in advanced testing technologies needed to support and accredit laboratories to international standards.
  - Billing services to ensure billing is timely and accurate.
  - Investigating and collaborating with other agency partners regarding complaints.
- Information Technology (IT) support for the ORELAP electronic database.
  - The ORELAP Data Input and Edit (ODIE) state database application is the interface between ORELAP and accredited laboratories and support will improve ORELAP operations and ensure ease of usability by clients.
- Travel associated with on-site assessments.

- ORELAP accredits laboratories throughout Oregon and other states to ensure all Oregonians have access to accredited laboratory services to protect and promote the health of their communities.

3. How does this policy package further OHA's mission and align with its strategic plan?

A key goal of the OHA strategic plan is to eliminate health inequities in Oregon with a vision of a healthy Oregon. In addition, OHA's mission is ensuring that all people and communities can achieve optimum physical, mental, and social well-being through partnerships, prevention and access to quality, affordable health care.

ORELAP serves all drinking water, environmental and cannabis laboratories in the state, including laboratories that support rural communities. For example, upon a real estate transaction containing a well, the well water needs to be tested for nitrates, arsenic and total coliform at an ORELAP accredited laboratory to inform the safety and health of communities sourcing water from wells.

ORELAP plays a vital role in protecting and promoting the health of all people and communities by helping ensure the water we drink, the air we breathe and the environment we live in is free of chemicals, toxins and other substances that impact health. Specifically, ORELAP-accredited laboratories have played a critical role in testing for lead in school drinking water and cyanotoxins from harmful algae blooms. In addition, ORELAP helps protect public health by ensuring that laboratories testing cannabis for solvents and pesticides are performing quality and accurate testing.

Importantly, ORELAP helps respond to critical public health events by accrediting laboratories that test for emerging contaminants that impact health, such as cyanotoxin exposures from algal blooms and exposure to PFAS chemicals.

Promoting the sustainability of ORELAP is critical for protecting the health and ensuring the safety of all Oregon communities.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

The Secretary of State Audits Division completed an audit report of the Oregon Health Authority marijuana programs entitled *Oregon's Framework for Regulating Marijuana Should Be Strengthened to Better Mitigate Diversion Risk and Improve Laboratory Testing* (2019-04). Two findings from the report may be assisted by this policy package:

Key Finding #3: *All recreational marijuana in Oregon must be tested for pesticides and solvents, but most medical marijuana is not required to be tested. Also, OHA does not require heavy metal and microbiological testing, in contrast to some other states. These contaminants could pose a risk to consumers.*

The inclusion of heavy metals and microbiological testing will require ORELAP to offer new fields of accreditation for cannabis testing laboratories. This policy package will help sustain ORELAP staff, potentially supporting the addition of these new fields of accreditation for cannabis laboratories.

Key Finding #4: *Without a mechanism for verifying test results, Oregon's marijuana testing program cannot ensure that test results are reliable, and products are safe. Limited authority, inadequate staffing, and inefficient processes reduce OHA's ability to ensure Oregon marijuana labs consistently operate under accreditation standards and industry pressures may affect lab practices and the accuracy of results.*

The update to the fee structure and fees proposed in this policy package will help support ORELAP staff to be able to examine and work to address the findings of the Oregon Secretary of State, particularly the assessment of potential process improvements.

Quantifying results

5. How will OHA measure the success of this policy package?

ORELAP is projected to have a budget shortfall. Current program fees do not support the programmatic work needed to complete timely accreditations and the work needed to investigate complaints regarding ORELAP accredited laboratories. The proposed option package would update the fee structure to reflect fees that are appropriate for the work required to accredit laboratories of different complexities and increase fees to ensure ORELAP is sustainable. OHA will be able to measure the success of the policy package by determining whether the updated fee structure and fees support programmatic expenses to continue providing quality services to accredited laboratories and protect the health of Oregonians.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

ORELAP accredits drinking water, cannabis and environmental laboratories to ensure they are in compliance with established standards and they are meeting regulatory requirements for the protection of the health of Oregonians. In addition, in partnership with other agencies, ORELAP is involved in the investigation of complaints against ORELAP accredited laboratories. This policy package will support ORELAP in the quality, timely execution of these activities.

This policy package strongly aligns to the Operating Process 6 (OP6), “Regulating and ensuring compliance” in the OHA Performance System Fundamentals Map. In OP6, this policy package supports the sub-processes of: Setting, communicating and implementing standards to ensure compliance; Monitoring and managing compliance; Reporting compliance; Providing technical assistance and Developing and implementing process improvements. In particular, it impacts the Process Measures, Percent of external audit findings remediated; Regulatory complaints investigations and inspections and surveys.

Some of the OHA Key Goals are:

- Effective Partnerships
  - ORELAP works closely not only with other state agencies, such as the Oregon Liquor Control Commission (OLCC), the Department of Environmental Quality (DEQ) and the Oregon Department of Agriculture (ODA), but also with ORELAP accredited laboratories. ORELAP has regular meetings with the ORELAP Technical Advisory Committee (OTAC) that is comprised of different ORELAP accredited laboratories to share information and receive feedback regarding accreditation standards and processes. This policy package will help allow ORELAP staff continue these important partnerships.
- Operational Excellence
  - ORELAP is continually pursing process improvements to create efficient and effective operations. This policy package will support ORELAP building increased quality assurance processes into workflows, updating the ORELAP electronic database for efficiencies and ease of use, and ensuring the accreditation process is streamlined for timely services.
- Equity and Inclusion
  - ORELAP accredits all drinking water, cannabis, and environmental laboratories in Oregon to confirm state and federal regulations and established standards are being meet and assists all areas of the state having access to accredited laboratory services needed to protect public health.
- Better Health
  - ORELAP has been critical in the response to critical public issues, such as lead in the drinking water of schools and cyanotoxins from harmful algae blooms. This policy package will help ensure the safety of drinking water, cannabis and our environment as well as help support ORELAP in being able to respond to emerging health issues to protect and promote the health of all Oregonians.

7. What are the long-term desired outcomes?

Environmental laboratories, in part, perform tests on air, drinking water, environmental and cannabis samples to measure microbiology analytes, compounds, chemicals and other substances that could potentially affect the environment and the health of individuals. This testing also helps ensure compliance with federal, state and local regulations. Some of the test compounds include pesticides and solvents in cannabis products, lead in drinking water, cyanotoxins in water, PFAS in environmental samples and asbestos in commercial and residential setting.

ORELAP accredits the laboratories performing these tests to federal and state standards to certify that test results produced are accurate, therefore promoting the safety of drinking water, cannabis products and the environment. The fee increase would ensure fees are appropriate for work performed so ORELAP is sustainable and able to provide quality, timely accreditations to protect the health of Oregonians.

8. What would be the adverse effects of not funding this policy package?

ORELAP is a fee-based program and is projected to have a budget shortfall. Without the support of this package, the sustainability of ORELAP would be in jeopardy; therefore, ORELAP's compliance with its statutory mandates, the accreditation of laboratories to established standards throughout the state, assurance of compliance to established testing standards and state and federal laws, and the safety of public health would also be at risk.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

ORELAP has implemented several process improvements to make operations more efficient and utilize existing resources as best as possible. These include:

- Reorganizing how ORELAP assessors are sent on on-site assessments to reduce the number of ORELAP assessors traveling per on-site assessment.
- ORELAP conducted a six-month touch-time analysis to determine the true time and cost to accredit laboratories and the other work necessary to perform accreditations to established international standards. This analysis helped inform programmatic decisions and the proposed fee changes in this policy package.
- Enhancement of the ORELAP Data Input and Edit (ODIE) state database application (the interface between ORELAP and accredited laboratories) to improve ORELAP operations and ensure ease of usability by clients.
- Reorganization and delegation of ORELAP staff job duties to streamline the accreditation process.
- Notifying international clients, and out-of-state clients involved in radiochemistry testing, that they will need to seek primary accreditation through another accrediting body other than ORELAP to ensure staff resources are utilized most efficiently.

10. What alternatives were considered and what were the reasons for rejecting them?

ORELAP recently completed a touch-time analysis where time spent on all activities was recorded for 6 months. The purpose of this project was to better understand the time and associated costs required for different accreditation processes and complexity of laboratories to inform program strategic and business plans. This also included researching other state's fee structures and fees. The data from this analysis helped inform the discussions and decisions that formed the proposed updates to the ORELAP fee structure and fees.

Some of the different fee structures and program changes that were considered were a fee-for-service fee structure, a fee based on how many different methods a laboratory needs to be accredited and examining ORELAP's client base.

Ultimately, the proposed fee structure was determined to be the most appropriate based on the work required to accredit laboratories of different complexities, the simplest and most familiar for clients for incorporating changes and suitable to ensure ORELAP is sustainable to be able to perform timely, quality accreditations and support accredited laboratories and their clients.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

There is no associated legislative concept with this policy package.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

ORELAP accredits laboratories throughout Oregon to ensure that communities have access to needed accredited laboratory services, including a non-profit environmental laboratory owned and operated by The Klamath Tribes. ORELAP may also accredit environmental laboratories performing work for tribal entities. In addition, ORELAP accredits municipal laboratories performing analysis of drinking water, wastewater, and solid waste. All accredited laboratories would experience increased fees under the proposed policy package.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

The ORELAP Executive Team consists of the OSPHL Laboratory Director, DEQ Laboratory Director, and ODA Laboratory Manager. This team guides the strategic direction of ORELAP. During the analysis of the ORELAP fee structure and fees the ORELAP Executive Team provided input and helped determine the final decision on the proposed policy package to ensure it reflects the best strategy for ORELAP, stakeholders, clients and the health of Oregonians. These agencies are not requesting funding in relation to this policy package.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

ORELAP serves drinking water, environmental and cannabis laboratories throughout the state, including laboratories that support rural communities and tribes. Fees would be increased for all laboratories based on the work needed to accredit a laboratory for the number and complexity of the methods being accredited. The policy package would ensure ORELAP is sustainable to accredit all laboratories in Oregon to established standards for the protection of health of all communities.

Staffing and fiscal impact

Implementation date(s): November 1, 2021

End date (if applicable): Ongoing

15. What assumptions affect the pricing of this policy package?

The key assumption of this package is that the ORELAP program will retain the bulk of its current client base after increasing its fees, thereby generating additional revenue. Although fees charged by other NELAP accrediting bodies use a wide variety of structures that are difficult to directly compare to ORELAP's, the program's analysis indicates that the increased rates would remain competitive in the industry. Other assumptions include continued partial funding of the ORELAP program by the EPA Drinking Water Primacy grant, approximately $90,000 per biennium.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

There will be no new responsibilities for OHA associated with the policy package. It would promote the sustainability of ORELAP and support current ORELAP staff to perform timely and quality accreditations to international standards and in accordance to ORELAP's mandate ORS 438 and 475B.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

There are no new anticipated responsibilities for Shared Services. The Office of Information Services (OIS) supports the technology maintenance and enhancements for the ORELAP electronic database that is the interface between ORELAP and clients. This policy package will provide for OIS staff to support the ORELAP electronic database to maintain its operations as well as make enhancements to the system to make ORELAP's workflow more efficient and improve client's usability.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

This policy package will not directly result in a change to the ORELAP client caseload.

Currently ORELAP accredits over 140 laboratories. This policy package will help support the services provided to these laboratories by ensuring timely and accurate accreditations and performance reviews (PTs); highly trained assessors that can accredit to national and state standards; and support services regarding accreditation.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This policy package does not require new positions or modifications to existing positions. It will support current ORELAP staff and ensure the sustainability of ORELAP to provide quality services to accredited laboratories and protect the health of Oregonians.

20. What are the start-up and one-time costs?

None.

21. What are the ongoing costs?

The ongoing costs are personnel costs including employee services, supplies, travel, shared services, and State Assessments & Enterprise-wide costs.

22. What are the potential savings?

None.

23. What are the sources of funding and the funding split for each one?

The policy package is requesting Other Funds limitation to support a fee increase paid for by laboratories needing accreditation.

Oregon Health Authority
2021-23 Policy Package

Division:	Public Health Division
Program:	Health Care Regulation and Quality Improvement (HCRQI)
Policy package title:	Ambulance Licensing Fees
Policy package number:	450
Related legislation:	Legislative Concept 9

Summary statement:

The Health Care Regulation and Quality Improvement section regulates both ambulance service agencies and vehicles to ensure the quality and safety of services provided to Oregonians. Revenues generated from current fees no longer support the cost of associated regulatory work. Pursuant to ORS 682.085, the program conducts on-site licensing surveys of ambulance agencies and vehicles, and complaint investigations to ensure that ambulance agencies and vehicles provide high-quality and safe services and comply with associated state licensing regulations. Failure to increase fees would jeopardize the program's ability to meet its licensing requirements which may jeopardize the quality of available emergency and nonemergency care and place patients and Emergency Medical Services (EMS) providers at risk. It would also threaten the ability to maintain a fiscally sustainable budget, which is necessary to meet the agency's overall fiscal and operational goals.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$0**	**$106,237**	**$0**	**$106,237**	**0**	**0.00**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

The Health Care Regulation and Quality Improvement, Emergency Medical Services (EMS) and Trauma System (TS) program regulates both ambulance service agencies and ambulance vehicles to ensure the quality and safety of services provided to Oregonians. The EMS and TS program uses licensing fees to recover the direct cost of operational and administrative functions related to the regulation of ambulance service agencies and vehicles. However, revenues generated from current ambulance service and vehicle fees no longer support the cost of associated regulatory work. Fees have not increased since 1997.

There are currently 136 licensed ambulance service agencies and 740 ambulance vehicles in Oregon. Pursuant to ORS 682.085, the EMS and TS program conducts on-site licensing surveys of each ambulance service and ambulance vehicle, as well as complaint investigation inspections. These inspections and the prompt investigation of complaints, ensure that Oregon's licensed ambulance service agencies and the ambulance vehicles they operate provide high-quality and safe services and comply with associated state licensing regulations.

This policy package proposes to raise both initial licensure and renewal fees for ambulance service agencies and ambulance vehicles established in ORS 682.047 (1997).

2. What would this policy package buy and how and when would it be implemented?

Funding will be used to support current service levels, permanent staff and operating costs. Current services include initial and renewal licensing activities, on-site licensing surveys, on-site complaint investigations, enforcement activities and technical support services expected by licensees and other interested parties including patients and members of the public.

The fee increases are as follows:

- Ambulance service having a maximum of four full-time paid positions – license fees for both initial and renewal:
    - Service license: from $75 to $190
    - Vehicle license: from $45 to $115
- Ambulance service having five or more full-time paid positions – license fees for both initial and renewal:
    - Service license: from $250 to $625
    - Vehicle license: from $80 to $200

3. How does this policy package further OHA's mission and align with its strategic plan?

The Oregon Health Authority's Health Care Regulation and Quality Improvement section furthers the agency's mission by providing regulatory oversight of prospective and licensed ambulance service agencies and ambulance vehicles. These activities directly improve the health and safety of all Oregonians by ensuring that ambulance service agencies and ambulance vehicles are safe and comply with current regulatory standards. This proposal would sustain regulatory and oversight functions at current service levels.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

The agency will measure the success of this policy package by the percentage of on-site licensing surveys completed annually that satisfy applicable OHA performance system measures.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

This policy package is not tied to a legislative Key Performance Measure nor one of the 10 Key OHA performance measures. However, it is related to OHA performance process OP6, "Regulating and Ensuring Compliance."

7. What are the long-term desired outcomes?

The fee increase would maintain a fiscally sustainable budget and would sustain regulatory and oversight functions at current service levels ensuring that ambulance service agencies and ambulance vehicles are safe and comply with current regulatory standards.

8. What would be the adverse effects of not funding this policy package?

Failure to increase licensure fees would jeopardize the ability to meet on-site initial and complaint investigation requirements and may jeopardize the quality of available emergency and non-emergency care, as well as place patients and EMS providers at risk. It would also threaten the ability to maintain a fiscally sustainable budget, which is necessary to meet the agency's overall fiscal and operational goals.

9. What actions have occurred to resolve the issue prior to requesting a policy package?

The EMS & TS program has improved effectiveness through administrative efficiencies, the use of technology (online licensing), and process improvements when doing on-site surveys and complaint investigations**.**

10. What alternatives were considered and what were the reasons for rejecting them?

Alternatives in lieu of the proposed fee increase, include:

- A limit on the type of regulatory requirements reviewed during initial and/or re-licensure surveys.
- Limiting the type of complaint investigations the program would investigate.
- Reducing the frequency of on-site surveys.
- Reducing the scope of complaint investigations.

Each of these alternatives may jeopardize the ability to ensure that ambulance service agencies and ambulance vehicles meet existing regulatory standards and fail to reduce overall operational costs.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

Yes. Amendments will need to be made to ORS 682.047.
Legislative concept 9 proposes to modernize the Emergency Medical Services and Trauma System in Oregon by creating an integrated emergency healthcare system that recognizes problems, determines which services are needed and deliver a patient to those resources (right assessment, right care, right time, and right place.) The coordination of emergency care in Oregon will lead to better healthcare, through the establishment of regionalized systems of care. The LC also includes a fee increase for the ambulance agency licensing and oversight program.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Two tribes would be directly impacted by this package requiring payment of increased fees. Several Oregon cities and counties have licensed ambulance services that would be impacted by this package requiring payment of increased fees.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

None.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

The proposed fee increase described in this document would apply to all ambulance service agencies and ambulance vehicles licensed by and operating within the state and foster the state program to regulate care to vulnerable populations. By adequately surveying, licensing, and following up on complaints for all ambulance service agencies and ambulance vehicles helps to ensure that the most vulnerable populations' health and safety is protected and that they receive quality emergency and non-emergency care and transport. It also helps to ensure safe and reliable transport for rural and low-income communities.

Staffing and fiscal impact

Implementation date(s): January 1, 2022

End date (if applicable): Ongoing

15. What assumptions affect the pricing of this policy package?

The pricing of this policy package was established by projecting expenditures vs. revenues needed to support current service levels. This pricing reflects 18 months of additional fee revenue.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

No new responsibilities are being proposed.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No .

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

No new staff are needed nor will existing positions be modified.

20. What are the start-up and one-time costs?

No start-up costs will be incurred.

21. What are the ongoing costs?

Current personal services and supply costs will continue and are ongoing.

22. What are the potential savings?

No potential savings have been identified.

23. What are the sources of funding and the funding split for each one?

Other Funds limitation requested to support increased revenue from fees paid by ambulance licensees.

Oregon Health Authority
2021-23 Policy Package

Division:	Public Health Division
Program:	Health Care Regulation and Quality Improvement (HCRQI)
Policy package title:	Home Health Agencies Licensing Fees
Policy package number:	451
Related legislation:	Legislative Concept 3

Summary statement:

This policy package increases home health agency licensure fees to support existing regulatory and complaint investigation activities and to ensure the quality of client care provided by home health agencies. This policy package is dependent upon the passage of Legislative Concept #44300-003. Failure to approve the fee increase would jeopardize the program's ability to meet its statutory obligations including on-site initial and relicensure survey and complaint investigation requirements and may place persons at increased risk of unsafe or ineffective care. It would also jeopardize the program's ability to maintain a fiscally sustainable budget, which is necessary for the program to meet the agency's overall fiscal and operational goals.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$0**	**$51,265**	**$0**	**$51,265**	**0**	**0.00**

Oregon Health Authority: 2021-23 Policy Package

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

The Oregon Health Authority's Health Care Regulation and Quality Improvement Section is responsible for the licensure, certification and oversight of multiple non-long term care health care facilities, including those defined in ORS chapters 442 and 443. These regulated facilities include home health agencies which the Authority is responsible for ensuring the quality of client care, complaint investigations and triennial surveys. The Authority uses licensing fees to recover the costs of these regulatory functions. Revenues generated from these licensing fees no longer support the cost of associated regulatory works. Fees have not been increased since 2009.

The Authority has 67 licensed home health agencies that serve patients across Oregon. As the number of licensees increase and the client population increases in size, the amount of work necessary to ensure safe, home-based medical nursing services and therapeutic services increases.

This policy package proposes to raise both initial and renewal licensing fees for home health agencies established in ORS 443.035 as follows:

- Initial licensing fee from $1,600 to $4,000
- Renewal licensing fee from $850 to $2,125
- Change of ownership fee from $500 to $1,250

2. What would this policy package buy and how and when would it be implemented?

Funding will be used to support current service levels, permanent staff and operating costs. Current services include: onsite complaint investigations, initial licensure surveys, routine onsite relicensure surveys, and technical support services expected by licensees, clients and other interested parties including the public.

3. How does this policy package further OHA's mission and align with its strategic plan?

The Authority's Health Care Regulation and Quality Improvement Section furthers the agency's mission and strategic plan by providing regulatory oversight of prospective and currently licensed home health agencies. These activities directly improve the health and safety of all clients by ensuring that home health services are safe, equitable and comply with current regulatory standards.

Oregon home health agencies provide services to vulnerable individuals in their home. Home health services are necessary to assist individuals in order to maintain these individuals in their homes and include skilled medical nursing services and other therapeutic services that impact clients' ability to maintain and improve health in a comfortable and familiar setting.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

The agency will measure the success of this policy package by the percentage of surveys completed that satisfy applicable state performance measures.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

No.

7. What are the long-term desired outcomes?

Sustain current service levels, meet statutory and rule-based regulatory requirements, complete onsite survey work and complaint investigations appropriately, and provide accurate and timely technical guidance to licensees and other interested parties.

8. What would be the adverse effects of not funding this policy package?

Failure to increase home health licensure fees would jeopardize the program's ability to meet its statutory obligations including on-site initial and relicensure survey and complaint investigation requirements and may place vulnerable patients at increased risk of unsafe or ineffective care in their homes. It would also jeopardize the program's ability to maintain a fiscally sustainable budget, which is necessary for the program to meet the agency's overall fiscal and operational goals.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

The program has maintained the current service level, but as the number of home health agencies increases, this will be unsustainable.

10. What alternatives were considered and what were the reasons for rejecting them?

The program considered several alternatives in lieu of the proposed fee increase, including:

- Imposing a limit on the type of regulatory requirements reviewed during required relicensure and/or initial licensure surveys.
- Imposing a limit on the type of complaint investigations that the program would agree to investigate.
- Reducing the frequency of required relicensure surveys in violation of statutory requirements.

- Reducing the frequency of complaint investigations.
- Reducing the scope of regulatory activities performed for other types of health care facilities regulated by the program.
- Increasing travel and workload requirements for existing staff.

Each of these solutions was determined to either jeopardize the program's ability to ensure that licensed Home Health Agencies meet existing regulatory standards or failed to reduce the program's overall Home Health Agency operational costs.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

Yes. Amendments will need to be made to ORS 443.035.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

None.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

The stakeholder engagement plan will be developed with government relations team. We will start with these organizations and add additional stakeholders as they arise.

- Oregon Hospice and Palliative Care Association
- Oregon Health Care Association
- Leading Age Oregon
- Oregon Rural Health Association

- OHA – Health Systems Division (for purposes of OHP home health services program)
- DHS – Home Care Commission
- Coordinated care organizations (CCO)
- Licensed HH agencies

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

There are no known racial or ethnic inequities associated with this policy package. The proposed fee increase described in this document would apply equally to all home health agencies licensed by and operating within the state and foster the state program to regulate care to vulnerable populations.

Staffing and fiscal impact

Implementation date(s): January 1, 2022

End date (if applicable): Ongoing

15. What assumptions affect the pricing of this policy package?

The pricing of this policy package was established by projecting expenditures vs. revenues needed to support current service levels.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

No.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

No new staff are needed nor will existing positions be modified.

20. What are the start-up and one-time costs?

No start-up costs will be incurred.

21. What are the ongoing costs?

Current personal services and supply costs will continue and are ongoing.

22. What are the potential savings?

No potential savings have been identified.

23. What are the sources of funding and the funding split for each one?

Other Funds limitation request to support increased revenue from fees paid by Health Care Regulation and Quality Improvement licensees.

Oregon Health Authority
2021-23 Policy Package

Division:	Public Health Division
Program:	Health Licensing Office (HLO)
Policy package title:	Respiratory Therapist and Polysomnographic Technologist Licensing Board Fees
Policy package number:	452
Related legislation:	None

Summary statement:

The Respiratory Therapist and Polysomnographic Technologist Licensing Board licensing fees must be increased to cover the cost of licensing and regulating the board's professionals and protecting the public.

Without the increased revenue, the Health Licensing Office (HLO) will have insufficient staff to process applications timely and license practitioners to begin working in Oregon. HLO would also have insufficient staff to investigate complaints received relating to practitioners not following the regulating rules and statutes.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$0**	**$232,342**	**$0**	**$232,342**	**0**	**0.00**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

The Respiratory Therapist and Polysomnographic Technologist Licensing Board licensing fees must be increased to cover the cost of regulating the board's professionals and protecting the public.

The Health Licensing Office (HLO) has been tasked by the Legislature with administering 16 boards and programs and regulating tens of thousands of licensees and dozens of professions. The Respiratory Therapist and Polysomnographic Technologist Licensing Board has over 2,200 licenses in respiratory care and polysomnography (sleep tech). Polysomnography is also referred to as a sleep study, which is a test used to diagnose sleep disorders.

The fees charged by the board have not changed since January 1, 2012. In 2013, House Bill 2074 moved the independent Oregon Health Licensing Agency under the Oregon Health Authority, creating the Health Licensing Office. This changed the indirect costs from funding in independent small agency to being part of Oregon Health Authority (OHA). HLO now contributes to OHA's and Public Health's cost allocation, which distributes shared costs among divisions. This increased the expenses to the board without an increase in fees to offset the additional expenditures. Each board pays these shared costs based on the number licenses provided by HLO and the services provided to licensees.

The board's current fees cannot sustain the program; revenue and expense forecasts predict the board to slip into a deficit in 2020 meaning that the board and HLO could not issue licensees to applicants in a timely manner and protect the public from potential health and safety violations. This would have an extremely negative impact not just on this board, but HLO, and the Legislature's mandate to protect the public would be compromised.

2. What would this policy package buy and how and when would it be implemented?

By increasing fees, the Respiratory Therapist and Polysomnographic Technologist Licensing Board's revenue could cover the cost of administering the program by licensing practitioners, administering qualifying exams, investigating complaints, and protecting the public.

HLO's successful model is for boards and programs license fees to sustain operations without needing general funds. For Respiratory Therapist and Polysomnographic Technologist Licensing Board to work in HLO's model, their fees must increase. The application, license and renewal fees will go from $50 to $100 beginning January 1, 2022.

3. How does this policy package further OHA's mission and align with its strategic plan?

OHA's mission is to ensure all people and communities can achieve optimum physical, mental and social well-being through partnerships, prevention, and access to quality, affordable health care. The focus of the Health Licensing Office is on helping its applicants have healthy and safe communities and a thriving statewide economy.

Raising the Respiratory Therapist and Polysomnographic Technologist Licensing Board's fees would support the administration of the board, which is tasked with protecting the public from unqualified practitioners and practitioners violating health and safety requirements. The fee increase has a direct impact on the agency's ability to ensure public health and safety for people that receive services by these licensees.

The board also oversees over two thousand licensees who depend on the license to make a living and contribute to the economy of Oregon.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

OHA will measure the success of the policy package through metrics associated with OHA performance measures. Specifically, with the foundational capabilities related to OP6 "Regulating & Ensuring Compliance" core processes, and meeting timely Regulatory Compliant Investigations (2KOP6F) and completion of Inspections and Surveys (2KOP6G) performance metrics.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

This policy package allows achievement of OHA foundational capabilities related to OP6, "Regulating & Ensuring Compliance" core processes. Specifically, meeting timely Regulatory Complaint Investigations (2KOP6F) and completion of Inspections and Surveys (2KOP6G) performance metrics, including Regulatory Complaint Investigations, Inspections & Surveys.

7. What are the long-term desired outcomes?

The Respiratory Therapist and Polysomnographic Technologist Licensing Board's revenue will stabilize, the board will support itself, and HLO will continue its mission to protect Oregonians who receive services from these professionals. The revenue will cover the cost of administering the program by licensing practitioners, administering qualifying exams, investigating complaints, and protecting the public.

8. What would be the adverse effects of not funding this policy package?

The board will not have enough revenue to continue to operate efficiently. Without the needed revenue, HLO would have insufficient staff to process applications timely and license practitioners so they can begin working in Oregon. HLO would also have insufficient staff to investigate complaints received relating to practitioners not following the regulating rules and statutes.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

HLO is a cost-conscious organization, constantly streamlining and trying to reduce administrative costs. With the Respiratory Therapist and Polysomnographic Technologist Licensing Board, HLO began offering a fee discount effective January 2012 for renewing licenses online, as it takes less staff time to process online renewals but stopped offering the discount in in December 2019 to address the revenue shortfall. Unfortunately, the board's license volume is not showing enough growth that would boost revenue to cover expenditures.

10. What alternatives were considered and what were the reasons for rejecting them?

HLO has worked on streamlining administrative processes, however that has not reduced expenditures enough to allow the Respiratory Therapist and Polysomnographic Technologist Licensing Board to cover expenses with the current revenue.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

None.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

None.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

The revenue from this policy package will help ensure qualified Respiratory Therapists and Polysomnographic Technicians are able to provide medical services to all Oregonians.

Staffing and fiscal impact

Implementation date(s): January 1, 2022

End date (if applicable): Ongoing

15. What assumptions affect the pricing of this policy package?

Looking at the revenue and expenditure trends since the HLO moved under the authority of OHA and projected expenditures and revenue to cover the board costs. This proposal is a fee increase of approximately 90 percent across 18 distinct fees. The increase will be collected in two renewal cycles in the 2021-23 biennium and will offset a projected cash shortfall.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

16. Will there be new responsibilities for OHA?

No.

17. Will there be new responsibilities for or an impact on Shared Services?

No.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

No new positions would be needed, nor would the existing positions need to be modified. This policy package would maintain the current staffing levels.

20. What are the start-up and one-time costs?

None.

21. What are the ongoing costs?

Cost of administering the program.

22. What are the potential savings?

None.

23. What are the sources of funding and the funding split for each one?

Other Funds limitation requested to support increased revenue from fees paid by Respiratory Therapist and Polysomnographic Technician licensees.

Oregon Health Authority
2021-23 Policy Package

Division:	Public Health Division
Program:	Injury and Violence Prevention, Prescription Drug Monitoring Program
Policy package title:	Prescription Drug Monitoring Licensing Fees
Policy package number:	453
Related legislation:	House Bill 3440 (2017), House Bill 4124 (2016), House Bill 2257 (2019), House Bill 4143 (2018)

Summary statement:

Increase fees paid by each healthcare licensee to fund the Prescription Drug Monitoring Program (PDMP). Funding is necessary in order to maintain sufficient capacity for program operations and database functions. The PDMP fee impacts all licensees regardless of program registration or program use.

If alternate funding is not made available, the quality of the Oregon PDMP will decrease as the number of staff is decreased and emerging evidence-based services are not implemented. This will result in decreased PDMP use by prescribers and pharmacists and less informed prescribing.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$0**	**$657,936**	**$0**	**$657,936**	**0**	**0.00**

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

The Prescription Drug Monitoring Program (PDMP) is mandated by statute and is a crucial health care tool in Oregon that allows prescribers to ensure they are fully informed of the prescription history of their patients when prescribing controlled substances. The PDMP is continually customized and enhanced to align its practices with evidence best suited to addressing the evolving opioid epidemic and improve healthcare of Oregonians. As the program has grown, additional staff have been added to address requirements. These required enhancements and added staff have increased the cost of program operations. The $25 annual fee currently paid by Oregon healthcare licensees is not sufficient to sustain expenditures.

The fees for PDMP have not been raised since implementation of the program in 2009. Without a fee increase, revenue and expense projections for the 2021-23 biennium show expenses will exceed fee revenue.

2. What would this policy package buy and how and when would it be implemented?

This policy package would increase funding to the existing Prescription Drug Monitoring Program (PDMP) and ensure the current level of service and functionality is sustainable. This includes maintaining a fully staffed program to provide technical and user support and advanced analytics; and maintaining the high-quality Information Technology (IT) contract to provide the PDMP's primary functions. The $25 fee paid by Oregon licensed prescribers and pharmacists as part of their licensing fees would be increased to $35 effective January 1, 2022.

3. How does this policy package further OHA's mission and align with its strategic plan?

The Oregon Public Health Division works to protect and promote lifelong health for all Oregonians and the communities where they live, work, play and learn. The opioid epidemic continues to impact the health of

Oregonians and the PDMP is a crucial tool in addressing it. As the epidemic continues, a robust PDMP tool will need to be customized and expanded. This policy package allows us to keep the PDMP in line with legislative mandates and with emerging best practices.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

The policy package will be a success if OHA is able to fulfill the legislative requirement to provider prescribers with continuous access to the PDMP with full functionality and high-quality data.

The PDMP use metrics will be used to measure the success of this policy package by demonstrating the continued reliance and use of the PDMP by Oregon prescribers.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

Yes, it is tied to an OHA Performance Measure: Improve Population Health, OP5. Improving Individual and Population Health, Top prescribers in PDMP.

7. What are the long-term desired outcomes?

The long-term desired outcome is program sustainability and consistent fulfillment of the legislative mandates to maintain the program and have it available to prescribers. The program will continue to pursue grant funding to supplement the program budget, however, this fee increase can provide long-term sustainability.

8. What would be the adverse effects of not funding this policy package?

If alternate funding is not made available, he quality of the Oregon PDMP will decrease as the number of staff is decreased and emerging evidence-based services are not implemented. This will result in decreased PDMP use by prescribers and pharmacists and less informed prescribing.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

OHA completed a budget analysis and created PDMP budget revenue and expenditure projections to allow for a streamlined spending plan to be created. OHA has and continues to look for ways to cut costs. However, with the required enhancements to the PDMP costs will continue to grow.

10. What alternatives were considered and what were the reasons for rejecting them?

OHA continues to pursue additional grants to supplement the PDMP budget, however, grant funding is not guaranteed and is not a long-term solution.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

Yes, 431A.880 Licensing information; fees; rules.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

Not applicable.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

None.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

The Prescription Drug Monitoring Program is a healthcare tool and assists providers in identifying those with substance use disorder, this policy will assist in maintaining this program.

Staffing and fiscal impact

Implementation date(s): January 1, 2022

End date (if applicable):

15. What assumptions affect the pricing of this policy package?

Program operational costs will continue at current or increased level in the future, including current level of staffing and IT contract costs. All licensees are required to pay the fees as part of their renewal, and this assumes a steady number of licenses renewed yearly.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

No.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

No new position would be added. This policy would allow for sustainable funding for existing positions.

20. What are the start-up and one-time costs?

There will be no start-up costs in the 2021-23 biennium.

21. What are the ongoing costs?

The ongoing costs are personnel, services and supplies to maintain the program.

22. What are the potential savings?

There will be no direct cost savings for the agency by implementing this policy.

23. What are the sources of funding and the funding split for each one?

Other Funds limitation requested to support increased revenue from fees paid by Oregon healthcare licensees.

Oregon Health Authority
2021-23 Policy Package

Division:	Health Policy & Analytics
Program:	Health Policy
Policy package title:	Mergers & Acquisitions Review
Policy package number:	454
Related legislation:	Legislative Concept #22, Senate Bill 1041 (2019)

Summary statement:

Expands the Oregon Health Authority's (OHA) authority to review and approve mergers & acquisitions in the health care sector to ensure any significant proposed changes result in achieving the triple aim of better care, better health, and lower costs and advancing equity. As smaller providers confront financial challenges due to COVID-19, there is a risk they will be acquired by larger providers, leading to further consolidation in the provider market. Without this policy package it is likely Oregon's health care sector will become less well equipped to achieve the triple aim and advance equity.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Policy package pricing:	**$758,284**	**$0**	**$0**	**$758,284**	**3**	**2.88**

Oregon Health Authority: 2021-23 Policy Package

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

Over the next two years, Health Policy and Analytics (HPA) expects to be responding to the enormous disruption of COVID-19 by adopting targeted policy and program changes that stabilize the health system and coverage and allow us to rebuild a more sustainable and equitable system for the longer term. As smaller providers confront financial challenges, there is a risk they will be acquired by larger providers, leading to further consolidation in the provider market.

Senate Bill 1041 (2019) grants OHA the authority to review and approve mergers and acquisitions relating to coordinated care organizations (CCO) in compliance with OHA's statutory mission and the triple aim of better care, better health, and lower costs. However, COVID-19's impact is not limited to the Medicaid market, and OHA does not currently possess the authority to approve mergers and acquisitions not relating to CCOs. HPA is proposing this policy package to provide broader authority to review mergers and acquisitions so the agency can adequately assess provider consolidations that impact system-wide stabilization goals.

2. What would this policy package buy and how and when would it be implemented?

This policy package would generate Other Funds to cover costs associated with consultant review of mergers and acquisitions. This policy package provides resources for three positions to coordinate the expert services (paid for by entities proposing to merge or acquire) needed for the analysis and review of the transactions as well as to conduct quantitative and qualitative analyses pertaining to market share, cost growth, health care quality, equity, and other issues.

Three new staff would lead all work related to reviewing proposed mergers and acquisitions, including: gathering and reviewing proposed merger and acquisition materials, guiding the work of the retained vendor, conducting quantitative analysis pertaining to market share and cost growth, and managing vendor contract.

The Oregon Health Policy Board (OHPB) approved a framework for OHA to use when reviewing and approving mergers and acquisitions relating to CCOs. This policy package would expand that review to include review of proposed mergers and acquisitions across multiple books of business in the health care sector.

The framework approved by OHPB specifies a robust public input process. The requested new staff would coordinate the analysis, solicit input from stakeholders and the public, and coordinate with other OHA efforts to ensure alignment and connection to OHA's broader goals such as achieving a more equitable, sustainable, and stable health care system.

3. How does this policy package further OHA's mission and align with its strategic plan?

The purpose of reviewing proposed mergers and acquisitions is to ensure any significant changes in the health care sector help the state achieve the triple aim and advance equity, both of which are core to the Governor's policy priorities and OHA's strategic plan.

As Oregon's health care system responds to and eventually recovers from the current COVID-19 crisis, we must ensure mergers and acquisitions do not further destabilize the health care system or decrease quality or value.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA measure the success of this policy package?

The number of proposed mergers and acquisitions OHA reviews would function as the measurement of success. When OHA allows for a merger or acquisition to occur, the agency may impose conditions that the merging or acquiring entities must achieve, be they specific quality outcomes, equity successes, or other requirements. When OHA denies a proposed merger or acquisition from taking place, it would be on the grounds that the merger or acquisition would not advance or would reverse progress toward the triple aim or exacerbate health inequities. Therefore, the measure of success is the number of reviews the team conducts.

Additionally, one of the guiding principles of the framework approved by the Oregon Health Policy Board is that the proposed merger and acquisition review process be transparent and informed by the public and stakeholders through meaningful engagement. The increased degree of transparency in the health care system as a result of this policy package would be another measure of success.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

Yes. The tier 1 performance measure titled Statewide Sustainable Cost of Care (1AOM10A) is inherently connected to ensuring any future merger and acquisition in Oregon's health care sector does not unjustifiably increase the cost of health care or decrease the quality of care.

7. What are the long-term desired outcomes?

As Oregon recovers from the COVID-19 crisis, it is imperative that our health care regulatory infrastructure support and stabilize the health care system with the primary focus on how changes to the health care system affect Oregonians' access to care, quality of care, and cost of care.

Reviewing all major health care mergers and acquisitions would ensure Oregon's health care system achieves the triple aim and increases health equity.

8. What would be the adverse effects of not funding this policy package?

The Oregon Health Policy Board-approved framework for reviewing CCO-related mergers and acquisitions focuses on the triple aim, transparency, and advancing equity. By not expanding this kind of review to mergers and acquisitions in the broader health care sector, there is a risk for greater consolidation in the market, which may result in increased prices without any increases in value, quality, or equity.

Achieving the triple aim, advancing equity, and increasing transparency are important goals during normal times. COVID-19 and its impact on the health care system makes these goals crucially important. As smaller providers confront financial challenges as a result of COVID-19, there is a risk they will be acquired by larger providers, leading to further consolidation in the provider market. Without this policy package it is possible that Oregon's health care system will develop in such a way that moves away from achieving the triple aim.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

The Department of Consumer and Business Services regulates parts of the commercial health insurance market but does not evaluate proposed mergers and acquisitions based on their impact on the triple aim or equity. Granting OHA additional authority to review proposed mergers and acquisitions would allow for more comprehensive analysis.

Secondly, the Sustainable Health Care Cost Growth Target program that OHA is developing as per Senate Bill 889 (2019) will focus on cost and cost growth in the health care sector, but being able to review *proposed*

mergers and acquisitions – before they occur – would greatly increase the likelihood that prices for health care services remain sustainable.

10. What alternatives were considered and what were the reasons for rejecting them?

No alternatives were considered.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

Yes. This policy package would build off Senate Bill 1041 (2019) and require amendments to ORS 413.032, 413.037, 413.181, 414.625, 414.651 and 414.652. Changes to statute are intended grant OHA the authority to review and approve mergers and acquisitions that meet the following review criteria (modeled from Massachusetts law):

- A merger or affiliation with, or acquisition of or by, a carrier.
- A merger with or acquisition of or by a hospital or hospital system.
- Any other acquisition, merger, or affiliation (such as a Corporate Affiliation, Contracting Affiliation, or employment of Health Care Professionals) of, by, or with another Provider, Providers (such as multiple Health Care Professionals from the same Provider or Provider Organization), or Provider Organization that would result in an increase in annual Net Patient Service Revenue of the Provider or Provider Organization of $10 million or more, or in the Provider or Provider Organization having a near-majority of market share in a given service or region.
- Any Clinical Affiliation between two or more Providers or Provider Organizations that each had annual Net Patient Service Revenue of $25 million or more in the preceding fiscal year; provided that this shall not include a Clinical Affiliation solely for the purpose of collaborating on clinical trials or graduate medical education programs.

- Any formation of a partnership, joint venture, accountable care organization, parent corporation, management services organization, or other organization created for administering contracts with Carriers or third-party administrators or current or future contracting on behalf of one or more Providers or Provider Organizations.

Changes to statute should also provide OHA with the authority to charge the acquiring entity a fee to cover the cost of work associated with reviewing the transaction, similar to the mechanism provided for similar activity when undertaken by DCBS and as provided in Senate Bill 1041 (2019) for OHA with regard to CCO-related transactions. OHA would be required to report summarized findings on the impact of the merger or acquisition on the triple aim, in accordance with the framework approved by the Oregon Health Policy Board.

Additionally, the statute should grant OHA the authority to:

- Suspend a proposed transaction while conducting an analysis of the impact on the triple aim.
- Obtain otherwise confidential documents as part of the analysis.
- Coordinate with the Department of Justice so findings from OHA's analysis informs any legal action the Department of Justice may take.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

OHA would partner with the Department of Consumer and Business Services and the Department of Justice to align regulatory oversight of reviewing proposed mergers and acquisitions. Local and tribal governments would not be directly affected by this policy package. All Oregonians and all purchasers of health care would indirectly benefit from achieving the triple aim and ensuring market consolidation does not result in cost increases.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

No other agencies are collaborating on this policy package.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

Equity analysis is a core component of the merger and acquisition review framework the Oregon Health Policy Board approved. Applying this same equity analysis to the broader health insurance system would ensure all proposed mergers and acquisitions are analyzed for their impacts on equity. Moreover, this policy package would operationalize a process that would move the health system to at least consider health equity as an important element in any significant system change. This could dramatically improve health equity over the long term in Oregon and represents a paradigm shift in merger and acquisition review.

Staffing and fiscal impact

Implementation date(s): August 2021

End date (if applicable): Ongoing

15. What assumptions affect the pricing of this policy package?

This policy package assumes the Oregon Legislative Assembly passes a bill with an emergency clause, thereby allowing OHA to begin the program in August 2021, as opposed to January 2022.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

Yes. Health Policy and Analytics would have new responsibilities for analyzing proposed mergers and acquisitions, managing the public and stakeholder input process, publishing findings from the analysis, promulgating rules pertaining to the above activities, and coordinating with other state agencies as needed.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No impact on Shared Services other than the usual onboarding of new staff, creating new user profiles on the network and other tasks related to new staff.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

Not applicable.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This policy package requests three new permanent, full-time positions for 23 months of the 2021-23 biennium:

- One Operations and Policy Analyst 4 position to lead the Mergers and Acquisition team and work, guide the work of the retained vendor, and manage the vendor contract.
- One Operations and Policy Analyst 3 position to collect, manage and review proposed merger and acquisition materials and analyze implications.
- One Economist 3 position to conduct quantitative analysis pertaining to market share, cost growth, and other issues.

20. What are the start-up and one-time costs?

OHA has already onboarded a vendor to assist with some of the review analysis in order to comply with the authority granted to OHA in Senate Bill 1041. No other start-up or one-time costs are expected.

21. What are the ongoing costs?

Each proposed merger and acquisition review would entail a public and stakeholder input process. As such, a small budget for space and public meeting logistics would be needed for ongoing costs. The estimate for this policy package assumes approximately six public meetings per year to fulfill this need.

22. What are the potential savings?

No expected savings would directly result from this work. However, by reviewing and potentially blocking mergers or acquisitions that would have resulted in increased costs for Oregonians and the state, there are potential long-term, indirect savings for state agency budgets, as purchasers of health care services, and for all Oregon residents paying for health care via premiums or out-of-pocket spending.

23. What are the sources of funding and the funding split for each one?

General Fund only.

Oregon Health Authority: 2021-23 Policy Package

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Personal Services	$636,418			$636,418	3	2.88
Services & Supplies	$121,866			$121,866

Oregon Health Authority and Department of Human Services
2021-23 Policy Package

Division: Oregon Health Authority: Office of Information Services
Program: Privacy and Security
Policy package title: Risk Audit Remediation
Policy package number: 210
Related legislation: Senate Bill 90 (2017)

Summary statement:

Senate Bill 90 (2017) enabled the Department of Administrative Services Enterprise Security Office to provide broader security support across more agencies. However, the responsibility for all system level security, data privacy compliance and addressing risks and audit findings remain with the agencies. For the Department of Human Services (DHS) and Oregon Health Authority (OHA) the impact of Senate Bill 90 impact was significant. The Information Security and Privacy Office was cut by 40 percent, leaving inadequate resources to support agency information risk and privacy management. DHS and OHA remain responsible for the protection of their regulated data. The breadth, volume and scope, and associated compliance, risk, information and privacy standards are much greater than most other state agencies. Vendor supported systems also fall under agency responsibility. DHS and OHA must invest in resources and tools to strengthen this essential area, address Secretary of State audit gaps and mitigate breaches.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
DHS:	$824,827	$31,919	$513,948	$1,370,694	0	0.00
OHA:	$821,390	$2,611,786	$253,938	$3,687,114	4	4.00
Policy package pricing:	**$1,646,217**	**$2,643,599**	**$767,886**	**$5,057,702**	**4**	**4.00**

Oregon Health Authority: 2021-23 Policy Package

Purpose

1. Why does DHS/OHA propose this policy package and what issue is DHS/OHA trying to fix or solve?

This policy package enables the Department of Human Services (DHS) and the Oregon Health Authority (OHA) to have the staff and tools necessary to address remediation of risk and audit findings by closing some of the staffing gaps resulting from Senate Bill 90 (2017). The volume of highly private data, complexity of the systems environments that house the data and the compliance criteria that must be met in protecting the data remain the responsibility of DHS and OHA. More effective mechanisms to protect and secure the environment are essential to mitigate future breaches of agency data.

The consolidation of data into solutions like Oregon Eligibility allows for greater access to services for consumers, but also greater risks from bad actors. Data integration can translate into more severe data compromise in the event of a breach. Preventing, detecting and mitigating privacy and security incidents will become even more critical as the integration of systems and data continues.

The aggressiveness and proficiency of “bad actors” intent on phishing, scamming and compromising organizations will continue to increase. The recent dramatic increase in remote access and expansive use of mobile devices to support telecommuting by DHS and OHA employees heightens the need for rigorous controls and oversight. Over 70 percent of cybersecurity threats originate at endpoints, like email and mobile applications.

2. What would this policy package buy and how and when would it be implemented?

This policy package provides a small number of permanent positions to stabilize support for agency level Information Risk and Privacy Management. The additional staff would address several critical staffing gaps

including a senior level leadership role. These positions are essential for the agencies to have capacity to respond to Audit and Risk management findings and enhance protection of data and systems for the agencies.

3. How does this policy package further DHS/OHA's mission and align with its strategic plan?

This policy package directly supports two of the Governor's priorities by:

1. Ensuring DHS/OHA's data is secure, private and uncorrupted, the agencies support *"Create and manage a statewide data strategy to improve data analysis, data quality, information sharing and overall decision making to be done by the …Chief Data Officer for the State."*

2. Proactively managing system and data access, implementing automated tools to help track access and increasing foundational security support such as proactive reviews of audit logs, the agencies support *"Increase IT security by adding enhancements to the State's Enterprise Security Office, including improvements in intrusion and detection."*

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

Yes. Oregon Secretary of State is currently auditing DHS and OHA for compliance with implementation of six Center for Internet Security (CIS) Security Controls[1]. Many of these have known existing gaps and will likely be identified as issues requiring remediation through this audit.

[1] These include Inventory Control of Hardware and Software Assets, continuous Vulnerability Management, Controlled use of Administrative Privileges, Secure Configuration of Hardware & Software on mobile devices, laptops, workstations and servers, and Maintenance Monitoring & Analysis of Audit Logs.

Quantifying results

5. How will DHS/OHA measure the success of this policy package?

The increase in risk and privacy management from more staff and tools would improve the remediation of audit findings, decreasing the number and duration of open findings. This would enable the team to focus not just on critical risk findings, but also high and medium risk findings.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or a DHS/OHA performance measure? If yes, identify the performance measure(s).

Yes, the OHA performance measures under 1ASP1 - Managing Risk and OIS performance measures under OP6 - Manage and Mitigate Risk are tied directly to this policy package.

7. What are the long-term desired outcomes?

- Improved and more proactive focus on protecting agency data increases the ability to maintain confidentiality of information. This leads to increased trust by Oregonians to provide accurate health information, leading to more reliable and comprehensive population-based health information.
- Increased compliance with CIS Security Controls, which would provide increased functionality, protection and capabilities.
- Utilizing tools and staff resources to provide more proactive information protection and privacy of agency data reduces the risk of data breaches. Data breaches not only carry significant financial penalties but they deteriorate public trust in the agencies. If DHS and OHA cannot safeguard our client's data, it would be significantly more difficult to acquire the data we need from them in order to provide services to Oregonians.

- Every dollar spent on data breaches takes away from other spending on service delivery. In the past year, breaches have cost DHS/OHA over $2 million. The March 2020 breach will cost an additional $300,000 to $500,000 in the next few months.

8. What would be the adverse effects of not funding this policy package?

Not funding this policy package puts DHS and OHA's data and systems at significant risk. It also compromises the agencies' ability to respond to and remediate Oregon Secretary of State Audit findings. Enhanced federal funding could be at risk if the agencies are non-compliant with federal security requirements.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

- ISPO performs audit logging and vulnerability management reactively when a problem with information protection or risk occurs but they lack staffing to provide proactive management.
- One of the current goals from the state CIO's office is the implementation of the CIS first six security controls. Control #1 is the implementation of Inventory and Control of Hardware Assets. ISPO is actively working in collaboration with OIS IT Asset Management and Customer Service and Support on implementation of a Hardware Asset Management solution. Target for implementation is late 2020 as part of the existing CA tools used in OIS. This would be followed by a project to implement the Software Asset Management solution.
- The original ISPO Director position was shifted to the Enterprise Security Office to satisfy Senate Bill 90 (2017) during the 2017-19 biennium. However, after the position was moved, the work that remained within the agencies was more than originally anticipated. OIS and the Office of the State CIO (OSCIO) validated that the position was still needed to support DHS and OHA. A permanent double fill was created

using another peer level position with the intent that the agencies would ask for a Principle Executive Manager F (PEM F) Director position in a future policy package to resolve the double fill. That request is reflected in this policy package.

- The Interim Chief Information Risk Officer has requested and received a log of all users with administrator privileges and is assessing ways to manage access risk but this effort is limited by the lack of industry tools.

10. What alternatives were considered and what were the reasons for rejecting them?

1. Do nothing.
   This is not a viable option as the responsibility for managing data privacy and maintaining system level protections remains the responsibility of DHS and OHA. Without additional staff, breaches, particularly in these troubled times where phishing has increased even more, represent an enormous risk to the agencies and the state.
2. Rely on contracted resources to fill gaps.
   This is periodically used on a selective basis to augment analysis. Long term, this is a cost-prohibitive solution and problematic on several levels. The Privacy and Risk Management team requires a permanent, dedicated senior level leader to support their work. This role cannot be filled by a contracted resource. The minimal staffing request of four additional positions represents a far lower cost than trying to fill those roles with contracted resources. Contract mechanisms available for securing resources limits the duration of their work which results in continual loss of knowledge and skill and is a losing proposition.
3. Outsource the Privacy and Risk Management function.
   This approach was partially pursued with the transfer of multiple OIS positions to the Enterprise Information Security Office. Full outsourcing is problematic as intimacy with DHS and OHA's business and computing environment are critical to supporting this key function.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

The amount of data, types of data and protection requirements of DHS and OHA require significant resources, time and tools to maintain. The more demands that DHS and OHA put on the state CyberSecurity Services group, the less those resources are available to other state agencies. This policy package enables DHS and OHA to be more self-sufficient in maintaining data protection and managing risk.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

Although OIS is sponsoring this policy package, it benefits both DHS and OHA as well as community partners such as Area Agencies on Aging (AAA).

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[2] or equitable health outcomes?

Enhancing agency information protection and ensuring highly confidential health data is protected is incumbent on DHS and OHA. This policy package helps improve protection of this data and thereby provides positive support for populations impacted by health inequities.

[2] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

Staffing and fiscal impact

Implementation date(s): July 1, 2021

End date (if applicable): Ongoing

15. What assumptions affect the pricing of this policy package?

- Cost of professional services is assumed to be in alignment with other comparable efforts.
- Cost of staffing is assumed to be relatively constant.
- Federal enhanced funding would be available and leveraged for all Medicaid related efforts.
- Resources with the necessary skills would be available.

16. Will there be new responsibilities for DHS/OHA? Specify which programs and describe their new responsibilities.

No.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This policy package requests four permanent, full-time positions:

- One Principle Executive Manager F position, Chief Information Risk Officer
- Three Information Systems Specialist 8 positions:
  - Information Risk & Privacy Incident Leader
  - Coding Practices Compliance Analyst
  - Information Risk Management Advisor

20. What are the start-up and one-time costs?

- Funding to procure and implement a risk management system ($75,000).
- Funding for additional modules and licensing of SolarWinds administrator privileges tool ($300,000).
- Funding for professional services to provide contracted analysts ($400,000).
- Funding for security software to automate security code reviews ($300,000).

21. What are the ongoing costs?

Ongoing costs include staffing, annual licensing fees for tools and SaaS risk management solutions.

22. What are the potential savings?

Significant cost avoidance by reducing risks of data breaches. Avoiding one breach like the 2019 incident protects highly confidential client data from exposure, sustains trust in agency and state security practices and avoids substantial penalties, fines and other costs.

23. What are the sources of funding and the funding split for each one?

Office of Information Services is requesting 100 percent Other Funds limitation. Shared Services Funding allocates to 55.49 percent DHS and 44.51 percent OHA, with a blended rate of 63.36 percent General Fund, 6.50 percent Other Fund, and 30.14 percent Federal Fund.

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Personal Services		$1,314,621		$1,314,621	4	4.00
Services & Supplies	$80,957	$1,168,560	$23,462	$1,272,979		
Capital Outlay						
Special Payments	$1,565,260	$160,418	$744,424	$2,470,102		
Other						
Total	**$1,646,217**	**$2,643,599**	**$767,886**	**$5,057,702**	**4**	**4.00**

Fiscal impact by program

	OHA Shared Services	OHA SAEC	OHA SSF	DHS SSF	Total

Federal Funds		$23,462	$230,476	$513,948	**$767,886**
Total Funds	$2,470,102	$117,498	$1,099,408	$1,370,694	**$5,057,702**
Positions	4				**4**
FTE	4.00				**4.00**

Oregon Health Authority and Department of Human Services
2021-23 Policy Package

Division:	Oregon Health Authority and Department of Human Services Shared Services
Program:	Office of Information Services
Policy package title:	Remote Access
Policy package number:	211
Related legislation:	None

Summary statement:

The Covid-19 pandemic Oregon and the world are dealing with highlights the critical need to improve emergency preparedness for the Department of Human Services (DHS) and Oregon Health Authority (OHA) to be able to reach vulnerable populations more easily and deliver services under any conditions without risking the health and well-being of staff or clients.

DHS and OHA require the ability for staff and clients to access systems and services from any location, including their home. Access must be dependable, secure and available 24/7. Systems must be increasingly available outside of regular business hours. Technical staff to support expanded system availability is required. This is the new normal and these capabilities must be embedded in the technologies supporting the day-to-day workforce.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
DHS	$1,744,452	$67,575	$1,086,951	$2,898,978	0	0.00
OHA	$3,705,709	$5,628,956	$1,691,712	$11,026,377	20	20.00
Total Policy Package:	**$5,450,161**	**$5,696,522**	**$2,778,663**	**$13,925,346**	**20**	**20.00**

Purpose

1. Why does DHS/OHA propose this policy package and what issue is DHS/OHA trying to fix or solve?

Currently, significant gaps exist in multiple areas that are essential to supporting remote access capabilities and ensuring critical systems services are available on-demand. These gaps include:

1. **Inadequate support for broad remote access for the DHS/OHA workforce** – additional leadership and staffing is needed to address significant increases in diversity of workforce access and continued increasing complexity of tools and the infrastructure environment.
2. **Lack of adequate staffing to meet customer support needs** – weekly analysis of Microsoft updates is required to assess impact to business and systems. The current team size is inadequate to meet this demand. Nearly 10,500 smart phones are deployed across the agency. 13,000 Citrix licenses are available for teleworking. As the agencies invest in remote working options for emergencies and for increased efficiency, OIS must provide threat and information protection. Additional permanent positions are needed to support this.
3. **Inadequate support for mobile computing** – demand has increased considerably for email/Teams/Skype/Video Conferencing administration support as well as for Intune support (replacing Maas 360) for managing/administering all Desktop, Laptops, Tablets, Smart Phones and Applications for security, deployment, management maintenance and enhanced threat/information protection management for desktop/laptops/tablets/phones.
4. **Remote/Virtual Access Support** – additional resources are needed to support remote access capabilities and increased demand. OIS has only one staff person with the expertise to support the secure connection port into the network for anyone working remotely. This represents a significant risk to large-scale teleworking. Teleworking will be significantly impaired or disabled if this resource is unable to do their job. Adding staff supports agency needs and lowers risk.

5. **Azure (Cloud) Support & Subscription** – staffing and funding for training and professional support are required to setup and use the Azure environment and manage the billing structure. DAS Enterprise Information Services (EIS) is driving movement of services to the cloud, but significant work will be delegated back to agencies. These new capabilities are not supportable by current staffing. Azure provides new capabilities but does not decommission existing infrastructure or OIS work.
6. **Software Tool Support** – current staffing levels are inadequate to keep software development tools updated and secure. Additional positions will close existing gaps in maintaining these tools. Broader remote access increases security risks and amplifies the need to keep tools current.
7. **Lack of Disaster Recovery Support** – mission critical systems are in dire need of disaster recovery support but staffing is inadequate to support infrastructure disaster recovery needs.
8. **Improve customer support** – coordination, education and communication of technology changes requires increased staffing to support, facilitate and manage these efforts. Policies, processes, system upgrades and other work OIS does may impact program areas. OIS lacks adequate staffing to help connect with internal business partners to educate and collaborate on these impacts. These positions will provide information for end-users to adapt and leverage new capabilities and improve response times to stay abreast of increased volume of business requests.

2. What would this policy package buy and how and when would it be implemented?

Funding this policy package enables OIS to:
<u>Expand and Strengthen Technical Support</u>

- Add staff to expand and strengthen remote support for a mobilized workforce and ensure access to systems is reliable
- Leverage professional services to enhance knowledge and expertise to leverage cloud capabilities and staff to setup and use the Azure environment and manage the billing structure
- Support increased service demand, stabilize Service Desk support, and enhance Office 365 support

Mitigate Risk to Technology Environment

- Reduce single points of failure for key areas such as supporting the secure connection port into the network for remote access
- Close gaps in maintaining Software Development tools
- Reduce Disaster Recovery risks by adding resources to ensure every business and mission critical application has a formal recovery plan and it is tested on an annual basis through table-top exercises
- Support customers more effectively with business-centric education and communication about technology changes impacting business use

3. How does this policy package further DHS/OHA's mission and align with its strategic plan?

Ensures access to core services regardless of location enables OHA and DHS to continue to serve Oregon citizens.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

As OHA and DHS adopts more Microsoft 365 features and tools, this policy package will provide security enhancements that will be implemented to ensure communication and collaboration is secure and reliable for remote workforce. These security enhancements such as Advanced Threat Protection, Azure Information Protection and FIPS 140-2 will comply to any current and future Oregon Secretary of State as well as federal and internal audits.

Quantifying results

5. How will DHS/OHA measure the success of this policy package?

Success will be measured by:

- Leadership capacity to maintain focus and continue to enhance and innovate in the areas of mobile computing, remote access, desktop services to meet business needs.
- Remote access for mobile workforce is dependable 24/7 from all locations
- Microsoft 365 is adequately supported
- Service Desk support is stable enough to meet demand
- Remote/Virtual access is dependably available
- Azure Cloud services are available to meet agency demands
- Software tools are updated and secure
- Disaster Recovery infrastructure needs are supported
- Customer support is improved

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or a DHS/OHA performance measure? If yes, identify the performance measure(s).

This policy package ties to a number of key performance measures for OIS including:

- OP4 – Develop Solutions. Includes acquiring, designing, architecting, enhancing products and services to meet business requirements, managing the lifecycle of products and services.
- OP5 – Deliver Solutions. Includes transition new or modified products to operations & maintenance, managing change, configuration and releases, managing IT services and the acquisition & delivery of hardware and software.
- OP6 – Manage and Mitigate Risk. Includes managing information security & privacy incidents, facilitating compliant data use and system access agreements, producing actionable IT risk assessments.
- SP1 – Continuous Improvement. Includes defining & documenting key processes, evaluating and improving established processes, managing performance metrics and reporting, assessing outcomes, maintaining security standards and practices.

- SP2 – Manage Operations. Includes management of finances, procurement, contracts, responses to legislative requests, management of hardware & software IT assets.

7. What are the long-term desired outcomes?

- Access to expanded Cloud capabilities
- Secure and reliable network access
- Ability to monitor, control and maintain devices connected to the network
- Ability to quickly troubleshoot using remote access
- Ability to define access rights to files and folders for different categories of users entering the network remotely
- Support business continuity by providing access to systems and data anytime, from anywhere

8. What would be the adverse effects of not funding this policy package?

If this policy package is not funded, remote access to systems and services essential to DHS and OHA service delivery will be compromised. Progress leveraging Cloud capabilities will be static. Disaster Recovery will continue to represent a major gap for the agencies. Mobile computing will not be adequately supported and the existing single point of failure will persist. Service Desk support will be inadequate leading to longer wait times for internal customers impacting service to clients. DAS Enterprise Information Services (EIS) is driving movement of services to the cloud and Microsoft 365, but significant work will be delegated back to agencies. These new capabilities are not supportable by current staffing.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

OIS has taken a number of steps to improve in the areas outlined above:

- Existing resources are leveraged to their maximum capacity (and beyond). People work overtime. Service desk schedules have been adjusted to expand hours and provide more expansive system coverage. Contractors fill gaps and staff are cross trained as much as possible. Critical functions are diversified across multiple resources where possible to reduce single points of failure.
- OIS is trying to standardize tools and keep tools and software current but is understaffed in this area and unable to keep up.
- OIS introduced Service Desk Chat service in 2019 providing additional ways customers can get help: online chat, online submission of problems, call back, etc. Demand through that channel has grown over 500% in just over a year.
- CSS implemented Microsoft Office 365, providing much more robust security and reliability and developed a roadmap of actions to improve the technical environment. Moving from Microsoft Exchange to Microsoft Exchange Online in the Cloud yielded significant reliability gains and reduced on-site server maintenance. Other benefits include increased security, built in redundancy, and the ability to keep systems current. All data produced using desktop productivity applications: Email, Word, Excel, Visio, SharePoint saved to the network remains available even if something catastrophic happens.

10. What alternatives were considered and what were the reasons for rejecting them?

1. Do nothing.
   This is not a viable option as it represents profound risk to sustaining remote access for a mobilized workforce. Doing nothing leaves the agencies at risk that a new Microsoft release may inadvertently corrupt or compromise existing capabilities; that Remote Access availability may be compromised; software tools will continue to represent a security vulnerability, Disaster Recovery will continue to be a major gap, Customer Support will be negatively impacted and knowledge and ability to leverage Azure (Cloud) capabilities will be postponed.
2. Use contracted resources to fill gaps in technical positions.

This is a very expensive alternative and is not sustainable. The cost of hiring contractors to perform staff work is extremely expensive and the contract mechanisms available for securing resources limits the duration of their work. This results in continual loss of knowledge and skill and is a losing proposition.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

OHA and DHS has partnership with other states, tribal and local governments. There is a need for continuous collaboration and information sharing between different levels of the organizations allowing essential services to be delivered to Oregonians in a timely fashion. If this policy package is not funded, remote access to systems and services essential to other states, tribal and local government service delivery will be compromised. Progress leveraging Cloud capabilities will be static. Collaboration tools capabilities will be limited.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

Although OIS is sponsoring this policy package; DHS and OHA are the primary stakeholders and beneficiaries of the improvements outlined here. Additionally, AAA Community Partners as well as agencies which rely on access to DHS and OHA systems benefit from the strengthening of remote access capabilities.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

This policy package reduces significant risk to remote access of systems thereby ensuring access to key information housed in agency systems continues to be available to the programs and services across DHS and OHA. This includes Public Health systems, the Medicaid Management Information System, Child Welfare, Adult Protective Services, etc.

Staffing and fiscal impact

Implementation date(s): July 1, 2021

End date (if applicable): Ongoing

15. What assumptions affect the pricing of this policy package?

Cost of professional services is assumed to be in alignment with other comparable efforts.
Cost of staffing is assumed to be relatively constant.
Federal enhanced funding will be available and leveraged for all Medicaid related efforts.
Resources with the necessary skills will be available.

16. Will there be new responsibilities for DHS/OHA? Specify which programs and describe their new responsibilities.

No.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

17. Will there be new responsibilities for or an impact on Shared Services?

No.

18. Will there be changes to client caseloads or services provided to population groups?

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This policy package request funding for 20 permanent positions in OIS. Positions are new and include:

- Provide senior level leadership to address significant increase in diversity of workforce access and complexity of tools and infrastructure environment – **1 PEM F**
- Enhanced Microsoft 365 support for modern desktop and mobile administration, threat analysis and information protection of agency data and devices – **3 ISS7, 1 ISS6**
- Stabilize support for increased use of agency Email/Teams/Skype/Video Conferencing for collaboration and communication – **2 ISS5**
- Support remote access capabilities and increased demand – **1 ISS8, 1 ISS6**
- Setup and use the Azure environment and manage the billing structure – **1 ISS8, 2 ISS7, 1 FA2**
- Close gaps in maintaining Software Development tools – **1 ISS7, 1 ISS6**
- Support DR infrastructure needs – **1 ISS6, 1 ISS5**
- Improve internal customer education, communication, coordination about technology changes – **2 OPA3**
- Support infrastructure project efforts – **1 PM3**

20. What are the start-up and one-time costs?

$250,000 for training and professional services to setup and use the Azure environment and Microsoft 365.

21. What are the ongoing costs?

Ongoing costs include licensing for software development tools, Azure provisioning of licensing and subscriptions and on-going training for staff to maintain core competency. Actual costs will depend on usage and the number of licenses required.

22. What are the potential savings?

- Reduced staffing risks – increased system security and availability
- Increased software development tool security
- Greater resiliency for DHS and OHA in times of crisis; ability to access services without geographic barriers anywhere, anytime on any network ensures business continuity and access to critical information including health related.
- Health care, health care systems and OHA/DHS operations benefit from improved system/data access, reduced security and support risks.

23. What are the sources of funding and the funding split for each one?

Office of Information Services is requesting 100% Other Funds limitation. Shared Services Funding allocates to 55.49% DHS and 44.51% OHA, with a blended rate of 63.36% General Fund, 6.50% Other Fund, and 30.14% Federal Fund.

DHS Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Special Payments	$1,744,452	$67,575	$1,086,951	$2,898,978		
Total	**$1,744,452**	**$67,575**	**$1,086,951**	**$2,898,978**	**0**	**0.00**

Fiscal impact by program

	OHA Shared	OHA SAEC	OHA SSF	DHS SSF	**Total**
General Fund	$0	$395,260	$3,310,449	$1,744,452	**$5,450,161**

Oregon Health Authority and Department of Human Services
2021-23 Policy Package

Division: OHA & DHS Shared Services

Program: All Programs within DHS and OHA

Policy package title: Increase IT Project Capacity

Policy package #: 212

Related legislation: None

Summary statement:

Current project support is not enough to meet the needs for DHS & OHA and we often find that projects are vying for support from project managers, business analysts and technical experts. Increased business requests and the need to accelerate the modernization of our existing systems has led the leadership of both agencies to ask for increased technology project capacity and to continue to find ways to reduce the time from project inception to completion, while also reducing risk to project success.

The ability to meet the needs of the business for additional technology projects is one of the top "dis-satisfiers" in a recent Business Leaders survey. In addition, an internal audit has been set forth to analyze the roadblocks for IT projects. OIS listened and heard the top three project dis-satisfiers. This policy package would provide real results quickly and to fix three of the top project dis-satisfiers for the agencies we serve:

1. **Improve IT Project Capacity** by adding 19 additional permanent resources, which would allow the business to add 5 IT projects under $1 million to its overall project portfolio.
2. **Improve timeliness for projects** by adding business system analysts and contract administrators to reduce resource conflicts. In addition, business system analysts can tackle critical roadblocks that are causing project delays.
3. **Improve operational efficiency** by automating reports and adding additional staff to provide effective and accurate testing.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
DHS:	$1,853,945	$71,783	$1,155,185	$3,080,913	0	0.00
OHA:	$2,042,779	$5,903,024	$629,487	$8,575,290	19	19.00
Total policy package:	**$3,896,724**	**$5,974,807**	**$1,784,672**	**$11,656,203**	**19**	**19.00**

Oregon Health Authority: 2021-23 Policy Package

Purpose

1. Why does OHA propose this policy package and what issue is OHA trying to fix or solve?

Over the past few biennia, DHS and OHA have averaged 20 active technology projects over $1M occurring simultaneously, to meet the business demands and federal/state mandates to enhance existing systems, replacement of legacy systems and mobile and modern solutions. The Department of Human Services (DHS) and Oregon Health Authority (OHA) are two of the largest Oregon state agencies with a $500M+ portfolio. The agencies are in need of additional resources to provide the support needed for upcoming critical business initiatives (e.g., emergency preparedness initiatives due to the pandemic; small IT projects that are required to be implemented quickly for child safety, healthcare, etc.; increased reporting for public transparency).

Current project support is not enough to meet the needs of these two large agencies, and we often find that projects are vying for the same resources, such as, business system analysts, project managers, testers, and technical experts. Increased business requests and the need to accelerate the modernization of our existing systems has led the leadership of both agencies to ask for increased technology project capacity and to continue to find ways to reduce the time from project inception to completion, while also reducing risk to project success. The ability to meet the needs of the business for additional technology projects is one of the top “dis-satisfiers” in a recent Business Leaders survey. In addition, an internal audit has been set forth to analyze the roadblocks for IT projects.

OIS listened and heard the top three project dis-satisfiers. This policy package has been established to provide real results quickly and to fix three of the top project dis-satisfiers for the agencies we serve:

1. **Improve IT Project Capacity** by adding 19 additional permanent resources, which would allow the business to add 5 additional IT projects that are under $1M to its overall project portfolio.
2. **Improve timeliness for projects** by adding business system analysts and contract administrators to reduce resource conflicts. In addition, business system analysts can tackle critical roadblocks that are causing project delays.
3. **Improve operational efficiency** by automating reports and adding additional staff to provide effective and accurate testing.

2. What would this policy package buy and how and when would it be implemented?

This policy package seeks permanent FTE and funding that would increase support IMMEDIATELY upon hire for critical business initiatives. These resources would support the OIS Project Solutions team and Project Management Office, utilizing a standard project management methodology and working closely with the Department of Administrative Services' Enterprise information services oversight team to ensure adherence to state stage gate processes and principles for the successful delivery of technology projects.

Permanent staff would immediately, upon hire, reduce contracting risks, increase project stability, increase project success, support 5 additional small project, improve testing efficiency and increase the project delivery rate. In addition, automated reporting would increase the operational efficiency for DHS & OHA, which ensures that Oregonians receive the services they need in the most efficient method possible.

This policy package enables OIS to add permanent staff to IMMEDIATELY upon hire:

- Support additional business initiatives and technical projects for DHS and OHA.
- Reduce the time from project inception to completion (timeliness).
- Continuously improve practices and processes.
- Expand and strengthen its technical project support pool (e.g., contract administrators, business system analysts, project managers).
- Improve operational efficiency by automating reports and adding additional staff to provide effective and accurate testing.

At a high-level implementation plan would be to hire permanent staff immediately upon approval; establish a dedicated project solutions team that would oversee and implement small IT projects; and add five small IT projects to the IT project portfolio within the first three months of the policy package being approved. OIS would also establish a dedicated test team to purchase testing software and tools, train staff, and develop a proof-of-concept using an existing project to demonstrate the added value for future growth of this proposed service strategy.

3. How does this policy package further OHA's mission and align with its strategic plan?

Empowers DHS & OHA to continue to serve Oregon citizens by ensuring that their large business/technical initiatives are supported, resourced, delivered timely and are successful.

Additionally, this policy package aligns with and directly supports the Governor's policy in five areas:

1. Prioritize price when evaluating contractors.
2. "Modernize and standardize critical statewide systems".
3. "Optimize service delivery to the public and internally by modernizing agency-specific and cross-agency systems".
4. Improve overall software system development transparency by posting project health status summaries online.
5. Create better health through good jobs.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

Yes, in parallel with the feedback we received from surveying our business partners, an agency risk assessment included concerns about the timeliness of their business initiatives and projects. An internal audit has started and would include reviewing the project processes from inception to completion. The key areas that would be evaluated are:

- Resource Capacity / Resource Conflict
- Timeliness
- Quality
- Effectiveness
- Project Prioritization

Quantifying results

5. How will OHA measure the success of this policy package?

Success would be measured by using key performance indicators (KPI) to measure the following:

- Timeliness
  - Improved project delivery rate/cycle time. Establish a baseline and compare each year to evaluate timeliness
  - Ensure that resources are properly allocated and resource conflicts have been reduced or eliminated
  - Projects are not waiting for more than 4 months to start
- Quality
  - Improve stakeholder satisfaction by using a poll to gather the required data after every project (Customer Satisfaction)
- Effectiveness
  - Tally the number of project milestones completed on-time that receive sign-off vs. the number of project milestones that have not been completed on-time (Milestones Completed On-Time)

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA performance measure? If yes, identify the performance measure(s).

This policy package provides resources that will support large IT initiatives/projects and will ultimately support many of the performance metrics for OHA and/or DHS. OHA and DHS prioritize their IT projects through a governed process, and they ensure that each project aligns with the agency's vision, mission, key goals and performance measures.

Some examples of performance metrics that large IT initiatives can support are provided below:

<u>OHA Examples:</u>

1. Increase OHA Workforce (1AOM1)
2. Increase Partner Satisfaction (1AOM2)
3. Document Processes (1AOM3)
4. Measure Improvement (1AOM4)
5. Improve Workforce Equity & Inclusion (1AOM5)
6. Reduce Health Disparity (1AOM6)
7. Improve Population Health (1AOM7)
8. Improve Quality of Care (1AOM8)

9. Improve Care experience (1AOM9)
10. Lower health care cost (1AOM10)

DHS Examples:

1. Consumers are safe (Aging & People with Disabilities)
2. Child well-being (Child Welfare)
3. Service eligibility (Intellectual /Developmental Disabilities)
4. Food security (Self-Sufficiency Programs)
5. Percentage of clients closed from plan employed during 2nd quarter following closure (Vocational Rehabilitation)

7. What are the long-term desired outcomes?

Deliver projects rapidly, improve the number of projects completed during a biennia, establish a sustainable enterprise resource management system for the multiple IT modernization efforts that are reforming the mission critical systems across the agencies, reduce the turnover, retain the technical knowledge within OIS by providing good jobs, and to automate reporting to improve the transparency for the Oregonians we serve.

8. What would be the adverse effects of not funding this policy package?

If this policy package is not funded, it will negatively affect the number of business initiatives that OIS can support for DHS and OHA. The business will need to prioritize which projects can move forward and which projects will have to remain in the queue or not get done.

Some additional adverse effects:

- The business will continue to be dis-satisfied with the IT Project Capacity.
- Resource conflict will continue, which results in project delays. Common resource needs or dependencies will disrupt other projects that are waiting for the same resources.
- Delays will ultimately increase costs for Oregonians.

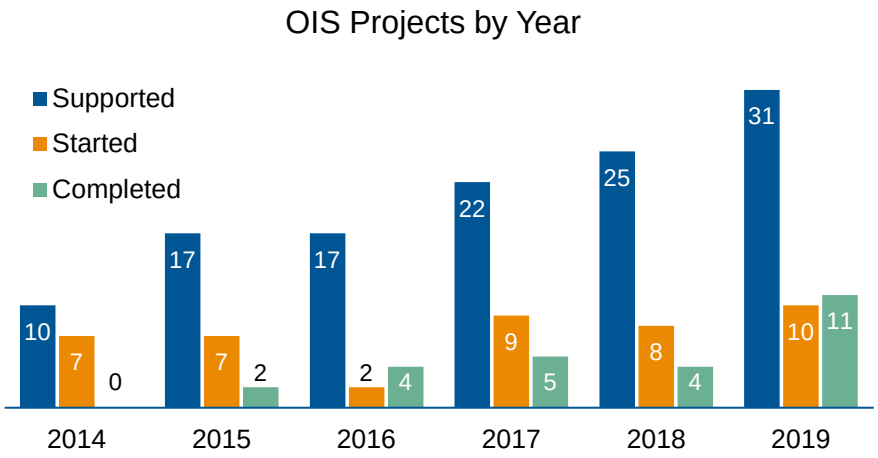
- Resources will continue to be spread thin over the OHA & DHS IT portfolio, which will cause projects to miss deadlines and possibly lead to federal fines.

In summary, OIS will not be able to quickly deliver value for critical initiatives and, unfortunately, will not be as responsive to its customers as the organization would like.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

Several efforts have been undertaken to improve the current situation. The following actions have taken place:



- OIS has partnered with DHS and OHA to establish governance and prioritization of technology initiatives. Requests by each program area are tracked and triaged. Governance ensures resources are focused on the priorities set by the business.
- OIS has created a dedicated Project Solutions team which oversees and implements all major (>$1 million) technology projects.
- OIS has created an Enterprise Project Management Office that ensures all projects follow a standard project management methodology based on industry best practices.
- OIS project support capacity has increased significantly since 2014. In 2014 there were 10 active projects, 7 starting, 0 completed. By 2019, the numbers increased dramatically to 31 active projects, 10 started, 11 completed. This is due to adding more project managers, reducing project length, applying agile methodologies that improve the overall delivery speed and piloting a “quick hit” team to work on smaller projects.

10. What alternatives were considered and what were the reasons for rejecting them?

Alternatives include:

1. Do nothing.
   This is not a viable option. Project delays and manual reporting increase the bottom line for Oregonians and continue to be a dis-satisfier for the businesses we serve. In addition, manual reporting is an inefficient use of resource utilization and extends project delivery dates.

2. Hire Contracted or Limited Duration Resources and Continue to Conduct Manual Reporting.
   This is not a viable option as the current situation has become unsustainable and is costing the agencies' time, credibility and money. DHS and OHA do not have the funding to pay for high dollar resources that can cost up to three times more than permanent positions.

3. Hiring contracted or limited duration resources: Over the last five years, the two agencies have used contracted staff and limited duration resources to fill its resource gaps. This strategy is not the most effective or efficient method for IT services. Hiring contractors using the IT Professional Services contract can be up to three times more expensive than permanent employees and some staffing contracts limit contractors to 1,040 hours per year. Staff in limited-duration positions continue to look for permanent employment creating instability in the workforce supporting the critical business initiatives. These challenges impact the business in the following ways:
   - Contracted staff can cost up to three times more; thus, impacting Oregonians bottom line
   - High turnover rate
     - Additional workload is assigned to already over-loaded staff
     - Permanent staff must continuously train new hires
   - Loss of unique knowledge that is specific to the program and/or OIS
   - Reduced productivity

4. Manual Reporting: Additional contracted resources will be needed to provide manual reports for any new systems that will be implemented over the next biennia.

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

OHA and DHS are the primary stakeholders and beneficiaries outlined in the policy package. Federal and state funding partners would also benefit as agency timeliness, automated reporting and increased project stability are improved to reduce the limited critical technology resource pool to meet the demands of the business.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

This is a collaborative effort between OHA and DHS.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

This policy package would reduce project delays, thus improving the bottom line for Oregonians. Moreover, DHS and OHA would be able to deliver its services to Oregonians in a more efficient, effective and timely manner by improving its resource utilization and providing advanced reporting. DHS and OHA have a $500 million IT project portfolio that ensures continuity of funding for critical programs supporting health and health care including Public Health systems, the Medicaid Management Information System, Child Welfare, etc.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

Staffing and fiscal impact

Implementation date(s): July 1, 2021 start date

End date (if applicable): Ongoing

15. What assumptions affect the pricing of this policy package?

- Cost of professional services is assumed to be in alignment with other comparable efforts.
- Cost of staffing is assumed to be relatively constant.
- Federal enhanced funding would be available and leveraged for all DHS & OHA project efforts.
- Resources with the necessary skills would be available.

16. Will there be new responsibilities for OHA? Specify which programs and describe their new responsibilities.

No.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

No.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

No.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This policy package requests authority and funding to establish 19 permanent, full-time positions. The positions are new and would work collaboratively within OIS to represent the critical business initiatives across DHS and OHA.

Contract Administration: Two Contract Administrators would provide contract and vendor management oversight.

- Two (2) Operations and Policy Analyst 3 positions

Project Stability: Five Project Managers would allow five additional IT projects to start and eliminate the use of six current limited duration positions that are either managing or supporting existing projects.

- Two (2) Project Manager 3 positions
- Three (3) Information Systems Specialist 8 positions

Business Systems Analysts: Five positions to support data quality, requirements gathering, process modeling and testing, tackle project roadblocks and/or critical business initiatives:

- One (1) Principle Executive Manager E position
- Two (2) Information Systems Specialist 7 positions
- Two (2) Operations and Policy Analyst 4 positions

Business Intelligence: Four positions to develop Business Intelligence (BI) reports for report automation.

- One (1) Principle Executive Manager E position
- One (1) Information Systems Specialist 8 position
- Two (2) Information Systems Specialist 7 positions

Automated Testing: Funding and permanent position authority for 3 FTE testers (1 ISS8, 2 ISS7) plus $90,000 for software automation tools, $70,000 for 2 years of infrastructure costs to support automated testing on projects

20. What are the start-up and one-time costs?

- $90,000 for best practice software automation tools
- $70,000 for two years of infrastructure costs to support the automation software

21. What are the ongoing costs?

It is too early in the process to accurately estimate ongoing costs. However, estimated costs are provided below that include licensing fees.

- $26,400 per year ($22 per user on a monthly basis) for a pilot group that would consist of 100 users.

22. What are the potential savings?

Reduce project delays by improving the limited resource pool with permanent staff vs. hiring contracted staff that can be three times more expensive.

Deliver small projects timely by assigning technical Project Managers to initiatives under $1.0 million, which need planning, tracking and reporting.

Reduce contracting risks by providing full-time Contract Administrators to manage DDI and iQMS contracts. Each Contract Administrator can manage 1 DDI or 2+ iQMS contracts.

Increase project stability by replacing limited duration project management positions with permanent FTE leading to reduced project risk through lower PM turnover.

Increase success by funding Business Systems Analyst positions to support technology projects by ensuring analytic knowledge continuity through the life of the project.

Support the increased volume of business requests and provide expedited response times.

Improve efficiency, accuracy and speed by using Project Online to plan work across the project portfolio, so that informed decisions can be made around resources and when it is the best time to initiate a project.

Improve testing accuracy by using testers that understand the businesses needs and rules. Contractors are inefficient for the first few months of a project, costly, require huge learning curves and, overall, do not provide accurate results.

Improve reporting for project trends, project workflows and overall project reports. Automated reporting would increase data consistency and transparency.

23. What are the sources of funding and the funding split for each one?

Office of Information Services is requesting 100 percent Other Funds limitation. Shared Services Funding allocates to 55.49 percent DHS and 44.51 percent OHA, with a blended rate of 63.36 percent General Fund, 6.50 percent Other Fund, and 30.14 percent Federal Fund.

Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Personal Services		$4,990,974		$4,990,974	19	19.00
Services & Supplies	$378,505	$623,224	$111,444	$1,113,173

Department of Human Services and Oregon Health Authority
2021-23 Policy Package

Division:	DHS & OHA
Program:	Integrated Eligibility (IE) / ONE program
Policy package title:	IE Modernization
Policy package number:	213
Related legislation:	None

Summary statement:

This policy package requests permanent resources for DHS and OHA/OIS for modernization and enhancement services for the integrated ONE program, which includes the initial creation of the OregonEligibility ONE system for Modified Adjusted Gross Income (MAGI) Medicaid in 2015 and the Integrated Eligibility System, through the 2021-23 biennium and into the future biennia. The requested resources and funding will support enhancements, automation and system consolidation that will drive the integrated ONE program to a more sustainable and future focused solution.

The Integrated Eligibility initiative was a multi-biennium effort to develop a comprehensive unified system called integrated ONE that integrates eligibility determination for Non-MAGI Medicaid, Supplemental Nutrition Assistance Program (SNAP), Temporary Assistance for Needy Families (TANF) and Employment Related Day Care (ERDC) benefits. The ONE program represents an essential lifeline to vulnerable Oregonians in need.

It should be noted that the integrated ONE system will be implemented statewide before July of 2021. This policy package is to address resources, procurements and tools for major enhancements to the system that will be needed to add functionality that was not included in the original system requirements set in 2016.

Modernization and Post-Implementation Enhancements

This policy package requests permanent resources, procurements and tools for DHS and OHA/OIS to modernize and support post-implementation enhancements, which will be key to making sure that the system provides Oregonians the right services in the most efficient way while leveraging Oregon's largest IT investment.

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
DHS	$8,461,033	$0	$16,859,199	$25,320,232	42	31.50
OHA	$0	$4,456,184	$0	$4,456,184	16	16.00
Total Policy Package:	**$8,461,033**	**$4,456,184**	**$16,859,199**	**$29,776,416**	**58**	**47.50**

Purpose

1. Why does DHS/OHA propose this policy package and what issue is OHA trying to fix or solve?

This policy package requests permanent resources for DHS and OHA/OIS through the 2021-23 biennium and into future biennia to address modernization and major enhancements to the ONE system that will be needed to add functionality that was not included in the original system requirements or scope. The intent of these changes is to continue to focus on the key main goals of the initial ONE implementation and IE project, which are Integrity and Stewardship for Oregonians, efficiency and standardization and serving the citizens of Oregon. These key goals will be addressed through updates which include:

- Programmatic updates requested by the Oregon State Legislature, federal government, or various work groups, which have been not carried forward, due to the pandemic and policy freezes set by the department(s)
- Increased functionality for operational efficiency to ensure Oregonians receive the services they need in the most efficient method possible
    - Report creation and automation to reduce cost efficiencies for DHS/OHA. The agencies are relying on manual work to provide reports for government bodies (e.g., federal, state, Legislature), auditors and operations
    - Mandated federal changes for Asset Verification Services, which will shorten verification response times for Oregonians and provide the ability to expedite application processing timeframes for eligibility determinations
    - Mandated changes that have been passed nationally regarding the SNAP or Medicare program

  - Integration of the federal Public Assistance Reporting Information System (PARIS) to allow Oregon to share eligibility information and identify improper payments to minimize fraud and abuse
  - Creation of automated workflow systems, utilized by other states, to answer questions and assist individuals in applying for benefits without worker intervention
- Modernize systems to improve organizational agility, performance and efficiency
  - Building new interfaces that integrate with the ONE system that will improve and streamline processes for overburdened staff that have to currently utilize external systems for verification; such as, Oregon DMV and OregonSaves. Integration provides opportunities to sunset legacy applications, automate workflows for workers and boost knowledge worker productivity

- Training, organizational change and communication personnel to address the changes for all programs. For example:
  - Cross program training
  - Transition plans and change management (e.g., change guides, schedules, targeted support, etc.)
  - Development of new processes and structures
  - Community and partner communications
  - News advisory and public service announcements
- User Acceptance Tools need to be upgraded to support further enhancements. For example, Microsoft's Team Foundation Server must be upgraded to the latest version before it reaches end-of-life. All UAT activities are currently supported by the state and are not provided by Deloitte
- Tools for improving productivity for a remote workforce

It is important to note that a lot of the resources on the IE project were limited duration resources, rotational staff and contracted staff. The resources that are needed to modernize and enhance the ONE system will have

already left the project by July of 2021. The result of continuing to hire limited duration and contracted resources is high turnover, because resources of this type continue to look for permanent and stable employment. This causes the state to be in a continuous loop of hiring and training throughout the project; thus, reducing productivity in other workstreams.

2. What would this policy package buy and how and when would it be implemented?

Funding this policy package enables the IE Program to add permanent staff and the ability to expand and strengthen the integrated ONE program by:

- Modernizing and enhancing the ONE integrated eligibility system
- Addressing service needs for APD, DD, SSP, OHA, etc.
- Enhancing and improving eligibility determinations
- Enhancing the system to support increased service demands
- System and tool modernization to improve productivity and efficiency
- Tools for improving productivity for a remote workforce

Investing in permanent staff for the integrated ONE Program will help the organization achieve its strategic goals, deliver critical services to the business and develop new capabilities that are required by our federal partners (e.g., Centers for Medicaid and Medicare, Food and Nutrition Services, etc.).

Over the next year, DHS will be engaging in a competitive procurement for the ongoing maintenance and operation of the ONE system. This approach will allow DHS and OHA to determine the work, cost and responsibility for each vendor across the biennia. In partnership, both agencies will form a governance model that will support the prioritization efforts tied to metrics and key outcomes, as well as the items that are either mandated or requested by the Legislature and federal partners.

Funding for the enhancements and/or modernization efforts will either be through the Advanced Planning Process and Cost Allocated or charged directly to a funding group based on the programs involved. The funding model will be determined based on the program (e.g., APD, SSP, OHA, etc.), type of enhancement and/or modernization effort. Due to the blended program structure, participating federal agencies may need to be involved. Moreover, the updated MITA framework and definitions from the Centers for Medicare and Medicaid Services (CMS) will allow Oregon to potentially leverage 90% federal funding for Medicaid related items that impact health outcomes and, of which, can be measured by the state.

DHS and OHA will treat the prioritized enhancements as modular updates to continuously improve the system(s) functionality. Like building and other assets, the state owns, the IT systems also need to be consistently supported and modernized to ensure that it meets the strategic goals for both DHS and OHA, and not creating avenues of deficiency or vulnerability.

It is important to note that some work, depending upon the M&O procurement model that is chosen over the next year, the enhancements or modernization efforts may require additional procurements. The procurement efforts will be competitive to create cost savings and transparency throughout each endeavor.

High-Level Implementation Plan:

- Prioritize needed positions and begin hiring permanent staff upon approval
- Complete procurement for the ongoing M&O of the ONE system and onboard a vendor
- Establish DHS/OHA Enterprise Governance for modernization and enhancement efforts
- Develop a Business Case which includes analysis, requirements, alternatives, approach, estimated costs, return on investment and success metrics
- Acquire buy-in and approval from all programs

- Secure funding and approval for the enhancement and modernization efforts that are prioritized for the 21-23 biennium
- Develop a detailed plan for implementation, which includes scope, timeline and budget
- Execute to the plan.

3. How does this policy package further DHS'/OHA's mission and align with its strategic plan?

Empowers DHS & OHA to continue to serve Oregon citizens by enhancing and modernizing key programs used by some of Oregon's most vulnerable populations.

4. Is this policy package being requested because of an Oregon Secretary of State or internal audit? If so, provide further information.

No.

Quantifying results

5. How will OHA/DHS measure the success of this policy package?

Success will be measured by using the following:

- Customer Satisfaction: Through the use of surveys to determine the satisfaction level of the Oregon citizens we serve
- Accuracy: The integrated ONE programs, Non-MAGI Medicaid, SNAP, TANF, and ERDC show a 95% or better-quality control review rating
- Availability: The integrated ONE system continues to meet the service level agreements that are in place with each vendor the vendor

- Reporting: Through the use of several reporting methods that include ad hoc and federally required reporting.

6. Is this policy package tied to a legislative Key Performance Measure (KPM) and/or an OHA/DHS performance measure? If yes, identify the performance measure(s).

This policy package aligns with and directly supports three of the Governor's policy:

1. "Modernize and standardize critical statewide systems"
2. "Optimize service delivery to the public and internally by modernizing agency-specific and cross-agency systems" by providing a modern, accessible system enabling clients broader access to services and quantifiable measurements around outreach and quality of services
3. Create better health through good jobs

7. What are the long-term desired outcomes?

- Secure permanent resources who will assist Oregonians from start to finish in providing timely and efficient eligibility determinations
- Ability to modernize and enhance the system to serve Oregonians
- Establish an Enterprise Governance model between two agencies that is responsive, can easily adapt, scale and move in new directions quickly
- Adopt a multi-vendor model, as Gartner recommended, to modernize integrated ONE, while also reducing the reliance of a single vendor which could gain the competitive procurement advantage over-time
- Enhancing the system to support increased services for Oregon citizens
- Modernize tools to improve productivity and efficiency.

8. What would be the adverse effects of not funding this policy package?

If this policy package is not funded, modernization and enhancements for Oregon's largest IT investment will not be at a level required to make sure that Oregonians relying on the integrate ONE program for critical services can be met, which directly effects potential loss of customer satisfaction.

How achieved

9. What actions have occurred to resolve the issue prior to requesting a policy package?

There was no funding and position authority received in the 2019-2021 session for future modernization and enhancements for the integrated ONE program. This is a new environment and one of the largest, most complex IT systems Oregon has ever implemented. Now, with the system close to go-live, enhancements have already started to be gathered.

This policy package, upon approval, will help modernize Oregon's largest IT system and continue to invest into the future for Oregonians.

10. What alternatives were considered and what were the reasons for rejecting them?

Alternatives include:

1. Do nothing.
   This is not a viable option. With what is known today, there will be several enhancements required, some Federally mandated, that will need to be implemented during the 21-23 biennium for the integrated ONE program. By not providing enhancements or modernizing outdated technology, we will negatively impact both Oregonians and staff. Oregonians may suffer through delays and availability of new required services

or lost efficiencies that could have been implemented while staff deal with negative experiences with customers and work overloads.

2. Hire Contracted or Limited Duration Resources and Continue to With Current Staff.
This is not a viable option. Over the last five years, the two agencies have used contracted staff, limited duration resources, and staff on rotation to fill its resource gaps. By July 2021, the contracted staff and limited duration staff will have reached the end of their contract and will have found employment elsewhere. Additionally, staff on rotation will also have completed their rotational duties and have gone back to their permanent jobs that they were hired for. This strategy is not the most effective or efficient method for work efforts, such as, modernization projects, IT services or User Acceptance Testing.

Moreover, hiring contractors using the IT Professional Services contract can be up to three times more expensive than permanent employees and some staffing contracts limit contractors to 1,040 hours per year. Staff in limited-duration positions continue to look for permanent employment creating instability in the workforce. These challenges result in the following impacts:

- Contracted staff can cost up to three times more; thus, impacting Oregonians bottom line
- High turnover rate
- Additional workload is assigned to already over-loaded staff
- Permanent staff must continuously train new hires
- Loss of unique knowledge that is specific to the integrated ONE program and/or OIS
- Reduced productivity

11. Does this policy package require any changes to existing statute(s) or require a new statute? If yes, identify the statute and the legislative concept.

No.

12. What other state, tribal, and/or local government agencies would be affected by this policy package? How would they be affected?

OHA and DHS are the primary stakeholders and beneficiaries outlined in this policy package. Other entities that may be affected will depend on the type of enhancements that would be implemented. It is likely that DAS - Equipment and services at DCS will be required to support this policy package.

13. What other agencies, programs or stakeholders are collaborating on this policy package?

This is a collaborative effort between DHS and OHA.

14. How does this policy package help, or potentially hinder, populations impacted by health inequities from achieving health equity[1] or equitable health outcomes?

This policy package, if approved, will ensure that Oregonians can continue to achieve wellbeing and independence by providing timely and efficient services that are relied upon by Oregonians in need.

[1] Health Equity: When all people can reach their full potential and well-being and are **not disadvantaged by their race, ethnicity, language, disability,** gender, gender identity, sexual orientation, social class, intersections among these communities or identities or other socially determined circumstances.

Staffing and fiscal impact

Implementation date(s): July 1, 2021 start date

End date (if applicable): Ongoing effort anticipated for each biennium to ensure both DHS and OHA have the resources and tools to modernize and enhance the integrated ONE program in support of Oregonians

15. What assumptions affect the pricing of this policy package?

- Cost of professional services is assumed to be in alignment with other comparable efforts
- Cost of staffing is assumed to be relatively constant
- Federal funding will be available and leveraged for all DHS & OHA efforts where available
- Resources with the necessary skills will be available
- Ability to procure multiple vendors to remove the competitive advantage of a single vendor; thus, reducing the costs for modernization efforts

16. Will there be new responsibilities for OHA/DHS? Specify which programs and describe their new responsibilities.

Unknown at this time, as it depends on the enhancement.

17. Will there be new responsibilities for or an impact on Shared Services? If so, describe the impacts and indicate whether additional funding is necessary.

Unknown at this time, as it depends on the enhancement.

18. Will there be changes to client caseloads or services provided to population groups? Specify how many in each relevant program.

Unknown at this time, as it depends on the enhancement; however, it would only be in a positive direction.

19. Describe the staff and positions needed to implement this policy package, including whether existing positions would be modified and/or new staff would be needed.

This policy package seeks a total of 59 permanent FTE (DHS-42, OIS-17) positions and funding for modernization and enhancements for the IE program. The positions are new and will work collaboratively within DHS and OIS to prioritize and implement needed enhancements for the integrated ONE program.

<u>DHS - Funding for 42 permanent positions to provide enhancement services and support in various key roles:</u>

- Eligibility Transformation (ET) Team: 38 FTE
  - Administrative staff and Managers: 3 FTE (1-PEMF, 1-PEMD, 1 ESS2) to manage and oversee the additional personnel required for enhancement efforts
  - Eligibility Policy Analyst: 4 FTE (4-OPA4) to ensure new functionality meets the program needs. These efforts will continue across multiple biennia
  - Support Staff: 1 FTE (1-OS2) to assist in areas where work efforts peak in demand
  - Business Analyst: 2 FTE (2-OPA1) to provide subject matter expertise and business analysis for major enhancements, which will continue across multiple biennia
  - Change Leaders: 19 FTE (19-OPA3 MMN) to replace the staff that are on rotation to ensure that a solid platform is in place to support the vision and change within the organization
  - Statewide Change Manager / Data Analyst: 1 FTE (1-OPA4 MMN) to manage and lead the change agents within the integrated ONE program

    - Public Affairs Specialist: 1 FTE (1-PAS3) is needed to handle campaigns, relief efforts and promotional outreach
    - Trainers: 7 FTE (1- OPA3, 5-TSD1, 1-TDS2) to lead and assist in training. 1 lead worker and 6 trainers are needed to create training documentation and to deliver training for new and pending enhancements
- APD Program Support: 4 FTE (2-TDS1, 1-OS1, 1-AS1) to lead and support enhancements related to the Aging People and Disabilities program

<u>OIS Technical - Funding and permanent position authority for 7 FTE that include:</u>

- Test Automation: 2 FTE (1-ISS8, 1-ISS7) to research and prototype automated testing for the mainframe
- Business Systems Analyst: 1 FTE (1-ISS7) to create and maintain enhancement related technical documentation and associated change requests
- ONE Call Center Support: Funding and permanent position authority for enhancing the integrated ONE call center (4-ISS4)

<u>OIS Program Management Office - Funding and permanent position authority for 10 FTE that include:</u>

- Azure DevOps: 1 FTE (1-ISS7) for the 2021 Microsoft Team Foundation Server upgrade and to provide on-site expertise/training for the complex test suite
- Technical Report Team: 3 FTE, Technical Report Lead (1-ISS8) and Report Developers (2-ISS7) to create and maintain business intelligence reporting
- Senior Project Manager: 2 FTE (2-PM3) to manage data conversion cleanup, enhancements, infrastructure enhancements, and reporting needs
- Contract Administrator: 1 FTE (1-OPA4) to manage related enhancement service contracts and deliverables

- Business Systems Analyst: 3 FTE (3-ISS7) to create and maintain enhancement related technical documentation, write design specs for change requests and enhancement efforts

20. What are the start-up and one-time costs?

N/A.

21. What are the ongoing costs?

IT Professional Services: $2 million
Hardware/Software: $1 million
Contractor Costs: $10 million

22. What are the potential savings?

Unknown at this time, but there are savings as Legacy systems expire.

23. What are the sources of funding and the funding split for each one?

Funding for the enhancements and/or modernization efforts will either be through the Advanced Planning Process and Cost Allocated or charged directly to a funding group based on the programs involved. The funding model will be determined based on the program (e.g., APD, SSP, OHA, etc.), type of enhancement and/or modernization effort. Due to the blended program structure, participating federal agencies may need to be involved. Moreover, the updated MITA framework and definitions from the Centers for Medicare and Medicaid Services (CMS) will allow Oregon to potentially leverage 90% federal funding for Medicaid related items that impact health outcomes and, of which, can be measured by the state.

DHS Total for this policy package

	General Fund	Other Funds	Federal Funds	Total Funds	Pos.	FTE
Personal Services	$2,248,922	$0	$4,176,519	$6,425,441	42	31.50

SUBJECT: **2021-23 XI-Q Request for Deferred Maintenance**

The following information is intended to assist you in preparing an Agency Request Budget that incorporates funding for the Deferred Maintenance projects as outlined in your request dated May 15, 2020. In preparing the following estimate, we anticipated an October 2021 XI-Q bond sale (see attached estimated debt service & COI schedule for further details).

If you decide to move forward with this project a policy package will be required. The policy package should include the project costs, issuance costs and any 2021-23 debt service. Consult with your assigned Chief Financial Office (CFO) Analyst to determine the appropriate packages.

Category	Appropriated Fund	ORBITS Compt Srce #	Amount
Project Proceeds			
Revenue	3020 OF Capital Construction	0555 (GF Bonds)	$1,385,300
Expense - Capital Outlay	3020 OF Capital Construction	5XXX (Capital)	$1,385,300
Cost of Issuance			
Revenue	3400 OF Limited	0555 (GF Bonds)	$39,700
Expense - S&S	3400 OF Limited	4650 (Other S&S)	$39,700
Debt Service: 2021-23			
Revenue	8030 GF Debt Service	0050 (GF Appropriation)	$191,943
Expense - Principal	8030 GF Debt Service	7100 (Principal-Bonds)	$130,000
Expense - Interest	8030 GF Debt Service	7150 (Interest-Bonds)	$61,943

Over the life of the financing, your agency will be responsible for on-going financing costs such as fiscal agent fees, arbitrage calculation fees and an assessment for Oregon State Treasury (OST) Debt Management Division. The non-OST financial costs are estimated at $3,000/year for each bond sale. OST financial costs can be found in the Price List under OST assessments.

Please email me at Rhonda.nelson@oregon.gov or call me at (503) 378-8927 if you need additional information.

Overview

The Oregon State Hospital proposes two capital improvement projects for the 2021-23 biennium: Equipment Replacement (policy package #422) and Remodel Therapy Tub Rooms (policy package #423). These projects would be financed with Article XI-Q Bonds issued October 2021 and May 2022 respectively.

Project costs and purpose

The costs described below are for the 2021-23 biennium. Following each project's implementation plan, all bond issuance is expected to occur during the 2021-23 biennium, with no additional financing required in future biennia. Debt service would end in the 2027-29 biennium for the Equipment Replacement project and would extend into the 2029-31 biennium for the Remodel Therapy Tub Rooms project. Debt service for both projects would be funded with General Fund.

The Equipment Replacement project, for the 2021-23 biennium, is expected to cost $1.1 million, which includes approximately $899,000 for project costs, $37,000 for bond issuance, and $158,000 for debt service, as estimated by the Department of Administrative Services (DAS). This project would address immediate large expenditure equipment lifecycle replacement in advance of equipment breakdown. Funding for asset lifecycle replacement would ensure maintenance of the facility to the highest standard and avoid more costly future maintenance, comply with regulatory requirements and stewardship of the state's assets, and a safe and secure environment and optimal treatment services.

Oregon State Hospital Capital Improvement

The Remodel Therapy Tub Rooms project, for the 2021-23 biennium, is expected to cost $728,000, which includes approximately $613,000 for both remodeling costs and a portion of a Construction Project Manager position; $37,000 for bond issuance; and $78,000 for debt service, as estimated by DAS. This project would include remodeling 24 existing therapy tub rooms on the hospital units that are no longer used for patients to create additional treatment space for staff to interact with patients. Currently, OSH plans to use the space for Interdisciplinary Teams to be able to meet with and treat patients.

Oregon State Hospital Capital Construction/Acquisition

Overview

The Oregon State Hospital proposes four capital construction/acquisition projects for the 2021-23 biennium: Well Water Treatment Facility (policy package #423), Additional Office Space (policy package #423), Deferred Maintenance (policy package #421), and Automated Dispensing Cabinets (policy package #422). All projects would be financed with Article XI-Q Bonds issued October 2021 (May 2022 for Additional Office Space).

Project costs and purpose

The costs described below are for the 2021-23 biennium. Following each project's implementation plan, all bond issuance is expected to occur during the 2021-23 biennium, with no additional financing required in future biennia. Debt service would extend into the 2029-31 biennium and would be funded with General Fund.

The **Well Water Treatment Facility** project is expected to cost $5.0 million, which includes approximately $4.5 million for project costs, $62,000 for bond issuance, and $484,000 for debt service, as estimated by the Department of Administrative Services (DAS). This would fund the construction of a well water treatment facility and potable water storage tanks to provide a backup water supply to the hospital in the event of disruption of contamination of the city water supply. OSH has one single point of connection to city water that is fed through a 1950's era 10" steel underground pipe. This leaves the hospital vulnerable to a complete loss of domestic water and water for sanitation including flushing toilets. Loss of water could also shut down

critical systems such as cooling which would then lead to overheating server rooms that could damage or require shutting down essential technology systems and access control.

The **Additional Office Space** project is expected to cost $1.9 million, which includes approximately $1.7 million for project costs, $41,000 for bond issuance, and $158,000 for debt service, as estimated by DAS. This would fund the construction of a second floor in an area that currently has existing "ceiling" space. The project would add 2,700 square feet of office space within the secure perimeter to accommodate 32 staff and include a conference room, copy room, and unisex toilet room.

The **Deferred Maintenance** project is expected to cost $1.6 million, which includes approximately $1.4 million for project costs, $40,000 for bond issuance, and $192,000 for debt service, as estimated by DAS. This project would address current large expenditure deferred maintenance in advance of equipment and infrastructure failure. Funding for deferred maintenance would ensure maintenance of the facility to the highest standard and avoid more costly future maintenance, align with regulatory compliance and stewardship of the state's assets, and result in a safe and secure treatment and work environment.

The **Automated Dispensing Cabinets** project is expected to cost $3.6 million, which includes approximately $3.5 million for project costs, $55,000 for bond issuance, and $474,000 for debt service, as estimated by DAS. Automated dispensing cabinets (ADC) are the method by which drugs are dispensed at the state hospital. They are integrated with electronic health records and control access to medications at the individual patient level to ensure patients receive the correct medication, in the proper dosage, at the right time. This project would replace 41 ADCs deployed throughout patient care areas on the Salem and Junction City campuses. The computers in each cabinet use the Windows 7 operating system, which is no longer supported by Microsoft or the Office of Information Services. Replacing the ADCs would address security risks related to using equipment without product support and avoid needing to immediately hire additional pharmacists and pharmacy assistants to manually provide medication to OSH patients.

Major Construction/Acquisition Project Narrative

	$ -		$ 3,500,000	

Description of Agency Business/Master Plan and Project Purpose/Problem to be Corrected

The automated dispensing cabinets (ADCs) are the method by which drugs are dispensed at Oregon State Hospital. These devices are integrated with the electronic health record and control access to medications at the individual patient level. These devices promote patient safety by requiring a bar code scan of the medication prior to administration to ensure patients receive the correct medication, in the proper dosage, at the right time.

Oregon State Hospital currently has 41 ADCs deployed throughout patient care areas on the Salem and Junction City campuses. These devices were purchased in 2012 and are nearing the end of their 10-year service life. The ADCs each have a computer that uses the Windows 7 operating system, which is no longer supported by Microsoft or OIS. This lack of support increases risk for security as well as ongoing product support. The ADCs serve a mission critical function at OSH. Without these cabinets, OSH would be passing medication manually, requiring immediate hire of additional pharmacists and pharmacy assistants.

Project Scope and Alternatives Considered

Project scope would include procurement and roll-out of new machinery at the Salem and Junction City campuses. Because of the deemed security risk to state systems, the only viable alternative to this project is manual pharmaceutical dispensing, requiring additional Pharmacists to be available on each unit; which increases cost, time, and the risk of human error in medication distribution.

	$ -		$ 1,385,300	

Description of Agency Business/Master Plan and Project Purpose/Problem to be Corrected

Oregon State Hospital (OSH) campuses in Salem and Pendleton have unfunded deferred maintenance that could result in health and safety issues for staff and patients if not resolved. Good stewardship of the state's resources is at the forefront of the building maintenance program at OSH to proactively maintain the state's assets and ensure compliance with Joint Commission and Centers for Medicare and Medicaid Services (CMS). We have seen the results of years of deferring maintenance resulting in loss of accreditation and deplorable conditions in the old hospital that was eventually demolished.

Maintaining critical operational continuity and providing 24-hour hospital level of care to patients needing intensive psychiatric treatment for severe and persistent mental illness is part of the mission of the Oregon Health Authority and Oregon State Hospital. Deferring critical maintenance is not an option in a hospital facility and can result in higher costs to replace or repair systems under emergency situations, health and safety issues for patients and staff, and loss of accreditation and CMS reimbursement.

Project Scope and Alternatives Considered

Construction or renovation project components and approximate costs:

1.Salem backflow preventer system
2.Pendleton asphalt replacement
3.Pendleton concrete sidewalk replacement
4.Pendleton building demolish
5.Pendleton parking lot construction
6.Pendleton water damage repair

Where available, operations have treated scenarios as break/fix to restore to usable state. However, this continued deferral can no longer restore some infrastructure to operationality without greater attention. A specific example being the sidewalks on the Pendleton campus.

Deferring critical maintenance is not a truly viable option in a hospital facility and results in higher costs to replace or repair systems under emergency situations and could result in health and safety issues for patients and staff. Loss of accreditation and CMS funding is also a risk.

	$ -		$ 4,492,750	

Description of Agency Business/Master Plan and Project Purpose/Problem to be Corrected
OSH is an entirely self-contained facility except for backup water. OSH has one single point of connection to city water that is fed through a 1950's era 10" steel underground pipe. This leaves the hospital vulnerable to a complete loss of domestic water and water for sanitation including flushing toilets. In May of 2018 the City of Salem water supply was contaminated with Cyanotoxins from an algae bloom in Detroit lake and issued a water advisory for at risk individuals.OSH took immediate steps to provide bottled water to all patients and staff since many of our patients and staff could be in the vulnerable categories and all of their medical histories are not known and we needed to ensure that there was a safe source of potable water. We also had to provide thousands of gallons of potable water for cooking patient meals. The total cost of the event to the hospital was $81,882.00. The installation of a backup water system would also provide for sanitation in the event of a disruption of city water that could occur due to multiple reasons including contamination, waterline repairs and or replacement and an earthquake event that could leave the hospital without water for an extended period. Loss of water for sanitation in a secure facility with 620 psychiatric patients and corresponding staff 24-7 would be catastrophic. Loss of water could also shut down critical systems such as cooling which would then lead to overheating server rooms that could damage or require shutting down critical computer systems.

Project Scope and Alternatives Considered
OSH commissioned the services of Affiliated Engineers NW, Inc in 2018 to complete a concept study, preliminary engineering and cost estimate and the study recommends a below grade water storage system in the non-historical area to the SE of the main campus supplemented by the existing well (with significant upgrades) at an estimated total construction cost of $4,380,000. A blackwater storage system was also studied but is a more expensive proposition and meets a less-likely need. The estimated construction cost for this system is $6,330,000 and is only recommended if OSH feels strongly that it meets a likely need. OSH is requesting funding for the potable water treatment and storage facility

			$ 1,733,586	

Description of Agency Business/Master Plan and Project Purpose/Problem to be Corrected
The hospital has identified an administrative and program staff space shortage and have had to move staff and programs to the cottages on campus and have identified future space needs requiring additional staff space. OSH proposes the conversion of empty, useable overhead space in a storage area to a second floor. This new second floor would be designated for and built as additional office space to meet current and future needs.

Project Scope and Alternatives Considered
OSH Commissioned SRG architects to perform a feasibility study and budget proposal to infill an existing space within the secure perimeter that would add 2700 square feet of office space that would accommodate 32 staff and include a conference room, copy room, and unisex toilet room.

Biennium		Facility Name	Description
21-23		Pendleton	Demolition of Building #108 ($100,000)

Definitions:

Position Count: **1** Total Legislatively Approved Budget (LAB) Position Count assigned to (home location) each building or lease as applicable.

RSF **2** Rentable SF per BOMA definition. The total usable area plus a pro-rated allocation of the floor and building common areas within a building.

USF **3** Usable Square Feet per BOMA definition for office/administrative uses. Area of a floor occupiable by a tenant where personnel or furniture are normally housed plus building amenity areas that are convertible to occupant area and not required by code or for the operations of a building. If not known, estimate the percentage.

O&M **4** Total Operations and Maintenance Costs for facilities including all maintenance, utilities and janitorial.

Facilities Maintenance

Key drivers of facility needs and measuring demand

Oregon State Hospital is subject to standards set by the Centers for Medicaid and Medicare Services (CMS) and reviewed and accredited through the Joint Commission on Accreditation of Healthcare Organizations (JCAHO). In addition to standard repair and maintenance of buildings and equipment, the hospital may be required to meet more stringent facilities requirements as determined by those governing bodies. These will be related to patient and staff safety, such as anti-ligature efforts.

The occupancy of the hospital is primarily determined by the judicial system. Periodic legislative changes impact the types and number of patients to be admitted to OSH. Depending on the changes in law, this can drive an increase or decrease to the facility demand, partially determined by the level of care required for new patient admissions and the associated adaptation of existing hospital space. Space requirements are therefore fluid. The measurement of space is done through monitoring of legislative and regulatory requirements, with associated increases or decreases to staffing dependent on shifting requirements and the needs of the patients.

Challenges over next 10 years

- Construction or renovation to ensure efficient hospital utilization and sustainability.
- Lifecycle replacement of high value equipment and assets.
- Responding to regulatory changes requiring facility improvements.
- Ensuring a 5- and 10-year equipment replacement cycle is maintained.
- Funding to develop life cycle costing, and budget for life cycles in advance of equipment breakdown.
- Ensure upgrades are made to equipment to extend life cycles.
- Above standard wear and tear of a facility partially occupied by persons not invested in long term facility care.

What is needed to meet challenges

- Receive budgetary funding adequate to meet these challenges.
- Ensure related technology resources are adequate and available.
- Update and maintain associated maintenance software.

Affirmative Action Report

This report summarizes the progress that the Oregon Health Authority (OHA) has made in accomplishing its Affirmative Action goals for the 2017-19 biennium and identifies the agency's goals for 2019-21.*

Accomplishments: 2017-19

The Oregon Health Authority continues to work to develop a diverse and inclusive organization. The agency will continue to build upon its successes to achieve a more culturally competent workforce, create culturally appropriate and effective programs and service delivery systems, develop quality improvement strategies with a focus on diversity, and create inclusive environments for our diverse client base and staff. The Office of Equity and Inclusion (OEI), a Division of OHA, leads, advises and oversees strategic initiatives that equip the OHA workforce to meet the needs of Oregon's increasingly culturally and linguistically diverse population. The OHA Affirmative Action Plan is a key component of the agency's ongoing diversity and inclusion efforts.

Notable accomplishments during this reporting period included: the expansion of the OHA Employee Resource Group program, the adoption of the OHA REALD policy that standardizes collection of race, ethnicity, language and disability data, and the hiring of the first Diversity Liaison at the Oregon State Hospital. In addition, when the agency sought feedback on plans for the next phase of the coordinated care organizations (CCO) model, or CCO 2.0, OHA visited 13 communities across Oregon, convened three individual Tribal consultations and one collective Tribal consultation to gather input from a culturally and geographically diverse group of Oregon Health Plan members, health care providers, public health agencies, community leaders and legislators.

* Data to update the report will be available in December 2020. OHA will provide an updated report on accomplishments for the 2019-21 biennium and goals for the 2021-23 biennium in the 2021-23 Governor's Budget document.

Progress Towards Affirmative Action Goals

The following is updated information highlighting some of the significant strategies and progress made toward achieving OHA's 2017-19 goals[†]:

1. Meet and exceed parity in all EEO job categories and subcategories.

Diversity recruitment

- OEI and the Office of Human Resources attended a variety of job fairs and networking events. Examples include: City Career Fair, Hispanic Metropolitan Chamber Career Fair, Incight Career Expo, NAYA Native Professionals & Friends Night, OHSU Night for Networking, OSU Diversity Career Symposium, Say Hey!, Urban League of Portland's Career Connections Job Fair. In addition, the Office of Human Resources attended more than 20 college career fairs.
- OEI and the Office of Human Resources co-presented at two panel sessions: Public Health Week 2018 and at a Workforce Equity Forum with Public Health Division staff to share information on the agency's recruitment process and diversity recruitment best practices.
- OEI engaged with organizations that support historically marginalized job seekers. Examples include: Amplify!, DHS Employment First!, Incight, Interstate Disability Employment Alliance Forum, Oregon Commission for the Blind, and the Urban League of Portland's Urban Tech Jobs Program.

Training and information sharing

- OEI facilitated an Inclusive Leadership workshop with the OHA Executive Leadership Team.

[†] The examples are partial listings of OHA activities. Many of the activities fulfill multiple goals and may not always be listed.

- With consultation and technical assistance from OEI, OHA newsletters featured articles on unconscious bias, employee resource groups, accessibility best practices and using personal pronouns and inclusive language in the workplace.

Community engagement
OEI on behalf of OHA awarded $74,150 in sponsorship funding to community-based organizations throughout the state, facilitating OHA staff participation in a variety of community events. Examples include: Asian Health and Service Center Community Health Fair, Columbia River Inter Tribal Fish Commission Fishers Memorial Salmon Bake and Art Sale, Native American Youth and Family Center Gala, Oregon Latino Health Equity Coalition Annual Dinner, Pan African Festival of Oregon, and Urban League of Portland Equal Opportunity Dinner.

2. Increase recruitment and retention of a workforce that represents Oregon's changing demographics. This includes all underrepresented categories.

Internship and mentorship programs
In summer 2018, OHA launched an agency-wide internship program to provide opportunities to individuals currently enrolled, or recent graduates of academic programs. In addition, there were several decentralized internship/volunteer programs operating across the agency that hosted approximately 1,270 volunteers and interns.

Employee resource groups
The OHA Employee Resource Group (ERG) Program expanded to include a total of four active ERGs: Autism Workforce, Acceptance, Resources & Education (AWARE); Differently Abled Workplace Network (DAWN); Healthy Families ERG; and People of Color (POC). In late 2017, OHA leadership approved a formalized ERG Policy that reinforces support for the program and authorizes full-time employees to use up to eight hours of work time per month to participate in ERG activities.

Accommodations
The agency developed a pilot program to provide centralized funding for reasonable accommodations for employees. Through collaboration with the chief financial officer, the chief operating officer, OEI and the Office of Human Resources, this project will inform how the agency can distribute financial costs of accommodations.

Training and information sharing
OEI consulted on developing and delivering equity and inclusion-related information at the New Employee Orientation in Public Health, at the Oregon State Hospital and for the overall agency.

3. Increase OHA implementation and practice of equity, diversity and cultural competency in services and the workplace.

Training and information sharing
- OHA sponsored the 2016, 2017 and 2018 statewide Diversity Conference.
- OEI, on behalf of OHA, sponsored and planned the 2016, 2017 and 2018 Northwest Public Employees Diversity Conference in Portland.
- OHA is collaborating with Shared Services Human Resources and the Oregon Department of Human Services to develop Leadership Academy curricula related to individual unconscious bias and institutional unconscious bias.
- OEI presented trainings by request to various OHA programs, such as Respectful and Discrimination-Free Workplace and Bystander Intervention.

- OEI presented workforce diversity data and affirmative action initiatives to agency managers, the Oregon State Hospital Diversity Committee, the Public Health Division Health Equity Workgroup and employee resource groups.
- The following agency trainings are in development: unconscious bias, preventing sexual harassment, ACA Section 1557, language access, and planning accessible events.

Diversity awareness programs

- The Oregon State Hospital, in collaboration with OEI, hired its first Diversity Liaison in March 2018. This position is tasked with coordinating the OSH Diversity Committee, which oversees four subcommittees that provide services and support to diverse patient populations within the hospital.
- Since 2016, the Public Health Division Health Equity Work Group increased the division's focus on health equity, workforce diversity and community engagement to advance Public Health's foundational capability of health equity and cultural responsiveness.

Community engagement

- In 2018, the agency held 14 public forums in communities throughout the state with approximately 800 people. In addition, OHA also convened meetings with Oregon's Federally Recognized Tribes, including three individual Tribal consultations and one collective Tribal consultation. Lastly, the agency organized webinars and arranged meetings with representatives of community-based organizations serving culturally specific communities.
- One focus area for OEI during 2017–19 was strengthening and expanding relationships with community-based organizations throughout Oregon. To facilitate that process, OEI conducted relationship-building tours across

the state to connect with new and existing partners. This has generated more than 850 new community and organizational contacts since January 2017.

- Community engagement is a core activity and value across OEI programs, which collectively support increased cultural competency across Oregon's health systems and health-related services:
    - On behalf of OHA, OEI provided $74,150 in sponsorship funding to community-based organizations throughout the state focused on equity, diversity and inclusion.
    - OHA-sponsored regional health equity coalitions delivered 178 trainings and education events, reaching 1,041 organizations and 8,000 individuals across Oregon.
    - The Developing Equity Leadership through Training and Action (DELTA) program graduated 52 individuals from 44 organizations in health equity leadership.
    - 3,234 traditional health workers (THW) were certified, and 36 THW trainings and continuing education programs were approved.
    - 530 health care interpreters (HCI) were qualified/certified, working in all regions of the state representing approximately 42 languages.

4. Increase ability to measure, evaluate and set benchmarks of data, documenting barriers to achieving progress on affirmative action goals.

- In January 2018, OHA launched an Employee Engagement Survey, which the agency will disseminate annually along with quarterly pulse surveys starting in early 2019.
- In July 2018, OHA adopted the Race, Ethnicity, Language and Disability (REALD) and ACA 1557 Data Collection Standards Policy.

5. Maintain and improve communication and collaboration to achieve affirmative action goals.

- OEI and the External Relations Division collaborated to share agency-wide information on affirmative action initiatives, such as employee resource groups.
- Upon request, OEI presented on affirmative action data as well as diversity and inclusion best practices at agency management meetings, lunch-and-learn events, a Workforce Equity Forum and a workforce diversity panel discussion during Public Health Week.

Statistical Summary

OHA continues to work to create a diverse and inclusive organization. OHA will continue to build upon its successes to achieve a more culturally competent workforce, create culturally appropriate and effective programs and service delivery systems, develop quality improvement strategies with a focus on diversity, and create inclusive environments for our diverse client base and employees.

In OHA as of June 30, 2018:

- There were 4,093 state government employees in OHA.
- People of color represent 22 percent of all OHA employees.
- People with disabilities represent 3 percent of all employees in OHA.‡
- Women represent 62 percent of all OHA employees.

‡ The numbers represent only those employees who voluntarily disclose disability status.

Since 2016, the agency has experienced:

- **No change** in the workforce representation of people of color;
- A **1 percent increase** in the workforce proportion of people with disabilities[‡]; and
- A **2 percent increase** in the proportion of women in the workforce.

Statistical data for people with disabilities are dependent on voluntary self-identification. Because measures of the workforce representation of people with disabilities rely on voluntary self-identification, the actual number of OHA employees with disabilities remains unknown.

A summary of OHA workforce parity trends between July 1, 2016, and June 30, 2018, are as follows:

OHA workforce

Compared to the Oregon population:

- The OHA workforce is *representative* of the African American/Black, American Indian & Alaska Native and Asian populations, and women.
- The Hispanic/Latinx[§] and Native Hawaiian/Pacific Islander[**] populations, and people with disabilities are *underrepresented* in the OHA workforce.

[§] For this report, ethnicity is broken out in two categories - Hispanic or Latinx and Non-Hispanic or Latinx. The following groups are categorized as Non-Hispanic/Latinx: African American/Black, American Indian & Alaska Native, Asian and Native Hawaiian & Pacific Islander.

[**] Note: employees were invited to use this code beginning July 16, 2016; however, few existing staff have updated their code. Only incoming staff have self-identified using this code.

Workers at salary range 24 and higher
Compared to the Oregon population:

- The African American/Black and Asian populations, and women are *represented*.
- The American Indian & Alaska Native, Hispanic/Latinx and Native Hawaiian & Pacific Islander populations, and people with disabilities are *underrepresented*.

New hires
Compared to the Oregon population:

- The African American/Black, American Indian & Alaska Native and Asian populations, and women are *represented*.
- The Hispanic/Latinx and Native Hawaiian & Pacific Islander populations and people with disabilities are *underrepresented*.

Promotions
Compared to OHA's current workforce composition:

- The Hispanic/Latinx population and women are *represented*.
- The African American/Black, American Indian & Alaska Native, Asian and Native Hawaiian/Pacific Islander populations, and people with disabilities are *underrepresented*.

Voluntary separations
Compared to OHA's current workforce composition, the American Indian & Alaska Native and Hispanic/Latinx populations and people with disabilities are *overrepresented*.††

†† Underrepresentation (less than 115 percent) in this measure is desirable.

Data Interpretation Considerations

To calculate parity estimates for this report OHA compares the composition of its workforce to the current Oregon population.[‡‡]

Some limitations of the data include:

- When comparing Oregon population data to OHA's workforce, there is a lack of accounting for industry, occupation and/or educational attainment.
- Because demographic information is collected from OHA employees during onboarding, there is no centralized process for standardizing data throughout the agency. It is anticipated that the implementation of Workday will have a self-service feature for employees to voluntary update their EEO status.
- Data available for the overall OHA workforce was limited to the following populations: African American/Black, American Indian & Alaska Native, Asian, Hispanic or Latinx, Native Hawaiian & Pacific Islander, people with disabilities and women.

Percentages presented below represent the relative percentage of OHA employees of color, of female binary gender, and with a disability compared to the Oregon population of working age adults from the same demographic groups. For example, OHA employs 46 percent of the number of Hispanic or Latinx employees expected given the number of Hispanic/Latinx working age adults in Oregon.

[‡‡] Source: U.S. Census Bureau, 2010–2014 American Community Survey 5-Year Estimates ACS_14_5YR_B03002 HISPANIC OR LATINO ORIGIN BY RACE, American Community Survey 5-Year Estimates, B01001 SEX BY AGE, series (A-I), ACS 5YR B18101 series (A-I), AGE BY DISABILITY STATUS AND RACE, ACS 5YR B21001 and C21001 series (A-I), SEX BY AGE BY VETERAN STATUS FOR THE CIVILIAN POPULATION 18 YEARS AND OVER.

OHA workforce parity estimates

African American/Black

Compared to the Oregon population:

- Represented in overall OHA workforce (204 percent)
- Represented in salary range 24 and higher (140 percent)
- Represented in new hires (203 percent)

Compared to OHA workforce:

- Underrepresented in promotions (74 percent)
- Represented in voluntary separations (77 percent)[§§]

American Indian & Alaska Native

Compared to the Oregon population:

- Represented in overall OHA workforce (107 percent)
- Underrepresented in salary range 24 and higher (98 percent)
- Represented in new hires (121 percent)

Compared to OHA workforce:

- Underrepresented in promotions (67 percent)
- Overrepresented in voluntary separations (118 percent)[§§]

[§§] Underrepresentation (less than 115 percent) in this measure is desirable.

Asian
Compared to the Oregon population:

- Represented in overall OHA workforce (159 percent)
- Represented in salary range 24 and higher (161 percent)
- Represented in new hires (130 percent)

Compared to OHA workforce

- Underrepresented in promotions (70 percent)
- Represented in voluntary separations (64 percent)[§§]

Hispanic or Latinx
Compared to the Oregon population:

- Underrepresented in overall OHA workforce (46 percent)
- Underrepresented in salary range 24 and higher (26 percent)
- Underrepresented in new hires (54 percent)

Compared to OHA workforce:

- Represented in promotions (100 percent)
- Overrepresented in voluntary separations (164 percent)[§§]

Native Hawaiian & Pacific Islander[**]
Compared to the Oregon population:

- Underrepresented in overall OHA workforce (27 percent)
- Underrepresented in salary range 24 and higher (21 percent)
- Underrepresented in new hires (28 percent)

Compared to OHA workforce
- Underrepresented in promotions (0 percent)
- Represented in voluntary separations (1 percent)[§§]

People with Disabilities
Compared to the Oregon population:
- Underrepresented in overall OHA workforce (18 percent)
- Underrepresented in salary range 24 and higher (18 percent)
- Underrepresented in new hires (16 percent)

Compared to OHA workforce
- Underrepresented in promotions (65 percent)
- Overrepresented in voluntary separations (149 percent)[§§]

Women
Compared to the Oregon population:
- Represented in overall OHA workforce (123 percent)
- Represented in salary range 24 and higher (119 percent)
- Represented in new hires (132 percent)

Compared to OHA workforce
- Represented in promotions (114 percent)
- Represented in voluntary separations (112 percent)[§§]

Affirmative Action Goals for 2019-21

The 2019–21 OHA Affirmative Action Plan continues to focus on remedying the underrepresentation of people of color and people with disabilities in the upper- and middle-management and professional categories, and people with disabilities in most categories. Many in OHA have advocated for setting hiring goals to reflect the demographics of the communities we serve in addition to basing our goals on the local labor market availability or parity. This is an exemplary goal and represents the agency's long-term direction in advancing affirmative action. We will promote the agency goal of surpassing parity, focusing on strategies to achieve parity areas that have historically not met the goals.

OHA is confident it is integrating strategies and accountability measures into its core and foundation via implementing the equity and inclusion policy and health systems transformation. This will help OHA continue to develop a culturally competent, diverse and inclusive organization. OHA is working thoughtfully and intentionally to integrate this work so the agency can move steadily toward progress.

That said, OHA reaffirms the primary goals of its 2017–19 Affirmative Action Plan:

1. Meet and exceed parity in all EEO job categories and subcategories.
2. Increase recruitment, retention and promotion of a workforce that represents Oregon's changing demographics. This includes all underrepresented categories.
3. Increase OHA implementation and practice of equity, diversity, inclusion and cultural competency in services and in the workplace.
4. Increase ability to measure, evaluate and set benchmarks of data, documenting barriers to achieving progress on affirmative action goals.

Examples of notable activities planned for the 2019-21 biennium include: developing relationships with diverse community groups and Tribes across the state, operationalizing diversity recruitment best practices and partnering with employee resource groups to launch a diversity leadership team.

Mandatory Special Report on Community Mental Health

Treasury Account Report

July 2019 to June 2021

Per ORS 426.506 Community Mental Housing Fund; Community Housing Trust Account

Restricted Funds- Permanent Fund Principle		$5,726,586
Unrestricted 17-19 Balance Forward		1,478,806
Prepayment of Funds		94,271
Interest:	Actual July 2019 through May 2020	147,756
	Projected June 2020 through June 2021 (13 months @ $8,500)	110,500
	Total Revenue	**$7,557,919.00**

	Total Expenditures	**$7,557,919.00**

* Per HB 5050 up to $1.5 million in available funds are to be used for Aid & Assist projects. Currently the funds available are authorized to be used for a Psychiatric Residential Treatment Services project for children and adolescents in Wasco County.

Oregon Health Authority
Gender Equity Report

The Oregon Health Authority (OHA) Gender Equity Report provides progress and plans in achieving equal access to appropriate services for males and females under the age of 18. This report is required by ORS 417.270 (House Bill 3576 Equal Access to Appropriate Services for Girls and Boys).

OHA's efforts are more program specific than agency wide, due to the nature of our work as it relates to the requirements of the statute. This report focuses on the Health Systems Division (HSD), the Public Health Division (PHD) and the DHS-OHA Office of Contracts & Procurement (OC&P). This report covers updates on program activities, plans and data between **July 1, 2018** through **June 30, 2019.**

Health Systems Division

The Health Systems Division supports equal access to appropriate services and treatment for individuals of all gender identities under 18 years of age.

Easy access to mental health care in a school setting addresses barriers such as cost, transportation, and concerns surrounding confidentiality that often keep children and youth from seeking mental health services. OHA Health System Division funds school based mental health services in seventeen counties, staffed by therapists in local schools without a School Based Health Center. Therapists work with students with a variety of concerns including truancy, anxiety, and suicidality. They develop safety plans, avert crises in the school setting, and help students remain in school when possible. They also consult with teachers and other school staff to provide information and mental health awareness for student issues.

Women's Treatment Services programs provide alcohol and other drug treatment services for women that meet specific standards. These standards address assessment, provision or coordination of services specific to women, and referral to other services. Individuals whose services are funded by the Substance Abuse Prevention and Treatment (SAPT) Block Grant receive services according to the following order:

(A) Women who are pregnant and using substances intravenously;
(B) Women who are pregnant;
(C) Individuals who are using substances intravenously; and
(D) Women with dependent children.

In addition, adolescent providers deliver services that support gender-related developmental issues such as Boys' and Girls' Empowerment and Girls Empowerment and Diversity groups. These adolescent-serving providers maintain relationships and work with agencies that provide culturally specific services in order to ensure diversity awareness within the organization, as well as provide clients with a range of culturally specific options for pre-social support. Many programs implement "Seeking Safety" as a gender-specific program for individuals with trauma and substance use disorders.

Public Health Division

The Public Health Division (PHD) has several initiatives addressing youth services.

Center for Prevention & Health Promotion: Adolescent, Genetic and Reproductive Health Section

The Reproductive Health (RH) Program works with 150 clinics throughout Oregon to offer free or low-cost reproductive health services and birth control for women, men and teens who need them. The program seeks to reduce unintended pregnancy by providing access to information, services and resources necessary to ensure all pregnancies are healthy, well-timed and intended. In Fiscal Year (FY) 2019, a total of 50,852 clients were served at RH Program clinics statewide. Of these, 5,199 (10.2%) were under the age of 18. Males under the age of 18

represented less than 1% of the total clients served while females under the age of 18 represented 9.8% of the total clients served.

Limited contraceptive methods for males means fewer services are available for male clients. National standards for preventive services include more reproductive health screenings for females than for males.

The RH Program also supports clinics throughout the state in best practices and quality care through training, technical assistance, and resource development and distribution.

FY 2019 activities included:

- May 2019: the RH program held a webinar for RH coordinators state-wide on Working with Youth;

- Fall 2018: RH Coordinators meeting was convened, offering sessions on trauma-informed care, human trafficking, outreach to youth, and services for immigrants; and

- Spring 2019: RH further expanded their social media presence by adding Instagram. Using colorful graphics and clinical information in plain language supports both the RH program and RH clinics with community outreach.

The Adolescent & School Health program supports school health services through its School-Based Health Center Program and School Nurse Consultant position, and health education through the Youth Sexual Health program.

The School-Based Health Center (SBHC) Program certifies and supports SBHCs throughout Oregon. SBHCs are a unique health care model for comprehensive physical, mental and preventive health services provided to youth and adolescents either within a school or on school property. Easy access to health care in a school setting reduces barriers such as cost, transportation, and concerns surrounding confidentiality that often keep children and youth from seeking health services they need. SBHCs provide a full range of physical, mental, reproductive and

preventative health services to students regardless of their ability to pay. Each SBHC is staffed by a primary care professional who may be a doctor, nurse practitioner or physician's assistant, other medical or mental health professionals and support staff, such as a receptionist. During fiscal year 2019, SBHCs in 25 counties served 28,193 youth ages 0 to 17 representing 74% of all SBHC clients. Of those clients, 54% were female, 46% were male and fewer than 1% were transgender.

The State School Nurse Consultant provides technical assistance and professional development to nurses working in Oregon schools. The State School Nurse Consultant works to achieve gender equity by supporting school nurse services that are easily accessible to all students, and which address the needs of all genders. Notable activities in FY 2019 includes:

- Revisions to the Oregon School Nurse Manual expanded focus areas related to gender equity and gender-responsive care, with increased emphasis on Social Wellbeing, Mental, Behavioral, and Sexual Health in Oregon. In collaboration with the School Nurse Advisory Group, the State School Nurse Consultant revises and updates the Oregon School Nurse Manual, which is provided to nurses during School Nurse Orientations.

- School Nurse Orientations in 3 locations around the state reached 46 nurses whose collective school caseloads include approximately 79,000 students. State School Nurse consultant prepares and facilitates School Nurse Orientations in collaboration with the ODE School Health Specialist. These workshops emphasize recommended practices for nurses in the school setting. Workshop topics related to gender include Oregon law and ODE regulations such as Erin's Law and Adi's Act; nurse role addressing gender-specific risks and protective factors; care issues related to gender identity and sexual orientation as reported by Oregon youth; and therapeutic communication techniques for nurses to support all students.

- In collaboration with the Oregon School Nurses' Association, the State School Nurse Consultant supports professional development opportunities for school nurses, including Spring and Fall Conferences. School nurse conferences in FY 2019 reached almost 200 registered nurses, who collectively serve schools with

approximately 300,000 of Oregon's students. Professional development increases knowledge and skill in care provision, and can increase retention, ensuring nurses are well-prepared and available to serve all students.

The Youth Sexual Health Program works to achieve gender equity by:

- Supporting K-12 comprehensive sexuality education inclusive of gender and sexual orientation as a solution to multiple public health issues, including child sexual abuse prevention, suicide prevention, and sexual violence prevention. This work also supports school districts implementation of Erin's Law, the Healthy Teens Relationship Act, and Human Sexuality Education laws.
    - Led by the Oregon Department of Education alongside the Department of Human Services and local partners, the Oregon Teacher Training Institute (OTTI) was developed and launched in Medford and Astoria to further support K-5 teachers in building competence and confidence in meeting Oregon's Health Education Standards and Performance Indicators.
    - In January of 2019 we partnered with PHD's Injury and Violence Prevention Program and the Oregon Department of Education and released an interactive mapping tool connecting local level data regarding youth sexual health and comprehensive sexuality education policy implementation in local school districts.
    - With the passage of Adi's Act (SB 52) in April of 2019, the Youth Sexual Health program is supporting the Oregon Department of Education, public health programs, community-based organizations and school districts in aligning their sexuality education policy and suicide prevention efforts and mental health supports to be inclusive and affirming of young people' varied identities, particularly as it relates to gender.
- Provided training, technical assistance, and guidance to local public health authorities, non-profits, CCOs, school districts, and youth-serving agencies related to the five goals of the Oregon Youth Sexual Health Plan.

Oregon is one of the first states in the nation to adopt a comprehensive and inclusive measure of gender identity in its youth survey, Oregon Healthy Teens, to ensure every youth has their identity counted. In response to youth

comments regarding health-related topics the survey should address, in 2016 the Oregon Healthy Teens (OHT) Advisory Committee explored the feasibility of including a more expansive gender identity question in the OHT Survey. With support from Adolescent & School Health staff, the OHT Survey Workgroup partnered with universities, community organizations, and members of LGBTQ communities to select and refine indicators to best measure gender identity and gender expression among Oregon's youth.

The expanded gender question debuted in the 2017 Oregon Healthy Teens (OHT) Survey with data analysis done in 2018. The question allowed multiple response options for those who identify as neither exclusively male nor female, including a place to write or type in their identity. Multiple responses attempted to capture the fluid and diverse nature of gender identities.

The majority of 8th and 11th grade students identified as either exclusively female or male. About one in 25 8th and 11th grade students (3.9%) identified as transgender, gender nonconforming/genderqueer, gender fluid/not exclusively male or female, not sure of their gender, or indicated multiple gender identities.

The Oregon Healthy Teens Survey revealed what we already know; gender diverse youth face numerous challenges throughout Oregon and are more likely to experience a variety of health disparities and risk factors, such as:

- A disability
- Food insecurity
- Missing school because they felt unsafe
- Being threatened with a weapon at school
- Being bullied
- Experiencing depressed mood
- Having unmet mental or emotional health needs
- Contemplating suicide in the last 12 months

The Adolescent and School Health Program also analyzes Oregon Healthy Teens (OHT) survey data on positive youth development, a framework for measuring students' resilience and social connectedness. This analysis looks at OHT data to identify trends and disparities in positive youth development (PYD) by gender identity, race/ethnicity, and sexual orientation. To meet the PYD benchmark, youth must answer five out of the six items positively (excellent, very good or good, or very much true, pretty much true). Based on 2019 OHT survey data, among 11th graders:

- Significantly higher rates of male students met the PYD Benchmark (63%) compared to females (53%). Even fewer transgender and gender diverse students (33%) met the benchmark compared to their cisgender peers.
- There are significant differences on achieving the PYD Benchmark by sexual orientation. 62% of 11th graders who identify as straight achieved the benchmark, compared to 40% of youth who identify as gay or lesbian and 36% of youth who identify as bisexual.
- By race/ethnicity:

Race/ethnicity	% who met Positive Youth Development Benchmark
African American or Black	64%
American Indian or Alaska Native	47%
Asian	58%
Hispanic or Latinx	52%*
Middle Eastern/North African	71%
Native Hawaiian or Pacific Islander	59%
Two or More Races	54%
White	59%

*statistically significant compared to white ($p<.05$)

Center for Prevention and Health Promotion: Maternal and Child Health Section

The PHD Maternal and Child Health (MCH) Section works to address health issues across the lifespan of individuals and families. We believe preconception, pregnancy and early childhood experiences create and influence a path for lifelong wellness. The MCH Section represents many public health disciplines and has multiple funding streams. Funds are distributed through partnerships with local health departments, Tribes, and public and private agencies for a wide variety of clinical and supportive community-based health services.

The MCH Section conducts the following activities:

- Implemented promising practices to promote healthy relationships with on-going funds from the Centers for Disease Control and Prevention (CDC) for Rape Prevention and Education (RPE). While rape affects both genders, most often girls and women are the victims of the abuse and it is commonly used to exert power and control over women. Funds support the work of the Sexual Assault Task Force and four local sites to change social norms among youth and support healthy relationships using proven prevention strategies. New funds from CDC are used to begin addressing policy and community level approaches to prevent violence. An anti-oppression framework is used in the planning and implementation of these prevention strategies.

- Collects data on gender-based violence including Intimate Partner Violence, harassment, and rape using the Behavioral Risk Factor Surveillance System (BRFSS), Oregon Healthy Teens (OHT), and Pregnancy Risk Assessment Monitoring System (PRAMS) surveys to track prevalence and identify risk and factors. Public Health also maintains the violent death reporting system.
- Implements the Futures without Violence Project Connect model in four community college sites. This model provides intensive screening for Intimate Partner Violence and sexual coercion, referral and follow-up at four Oregon Community Colleges and is funded by the Support to Expectant and Parenting Students Grant (STEPS). While the intervention is for all female clients of reproductive age, there is an intentional focus on reaching out to students who are pregnant or parenting. The STEPS grant uses the Futures without Violence “Hanging Out or

Hooking Up" curriculum which is designed for staff in a variety of settings who want to better serve sexually active female adolescents.

- In partnership with the Adolescent and School Health Program, the Title V Block Grant collected information on the needs of LGBTQ youth, with a special focus on transgender youth, as a part of its five-year needs assessment. A mini grant was provided to OHSU, who utilized a mixed methodology approach to collect information on the health needs of the youth, through an online survey, a focus group, and phone interviews. Needs of transgender youth identified included access to medical specialty care for gender identity, mental health care, and bullying and violence prevention.

- Public Health Nurse Home Visiting programs (Babies First! and Nurse Family Partnership) aims to offer services to new parents with identified needs including pregnant and parenting people under 18 years of age.

Center for Public Health Practice: HIV/STD and TB Section

Chlamydia is the most common reportable disease in Oregon with 15.2% of cases occurring in those 18 and under. Gonorrhea is the third most common reportable disease with 5.3% of cases occurring in those 18 and under during the same period. Females represented the majority of infections in those under 18 (78.5% for chlamydia and 73.8% for gonorrhea). Left undiagnosed and untreated both infections can cause serious short- and long-term health consequences including pelvic inflammatory disease, infertility, ectopic pregnancy, and an increased risk for acquisition of HIV infection. The Oregon STD Prevention Program subsidizes gonorrhea and chlamydia screening for adolescents and young adults under 24 at safety net clinics (e.g. local county health departments, juvenile detention facilities, school-based health centers, Planned Parenthood, etc.). Individuals who are uninsured or underinsured are eligible to receive subsidized screening. During this reporting period, 25% of the 8,164 safety net tests were for individuals 18 and under. Of these approximately two thirds were in women and one third were in men.

Both the HIV and STD Prevention Programs also distribute large quantities of condoms and lubricants to each local county health department for dissemination within their communities. In several counties, these condoms are

distributed to clinics and organizations serving youth including school-based health centers, youth services programs, and community health clinics.

Center for Public Health Practice: Immunizations Section

Immunization Services include population-based services including public education, enforcement of school immunization requirements, and technical assistance for healthcare providers who provide vaccines to their client populations; as well as vaccine administration to vulnerable populations with an emphasis on ensuring access and equity in service delivery. The Immunization Program provides vaccines to over 600 clinics across Oregon, including all School-Based Health Centers, Community Health Centers, Local Public Health Authorities and Rural Health Clinics in Oregon, Oregon Youth Authority facilities, and vaccines provided by the Vaccines for Children (VFC) program to many private practitioners across the state.

The Immunization Program manages the ALERT Immunization Information System (IIS). Using data from ALERT, the program measures immunization rates among children, including measuring adolescent HPV immunization rates by gender, facilitating interventions at the local or clinic level. The IQIP (Immunization Quality Improvement for Providers) program offers providers assessments of immunization rates for two-year-olds and for adolescents, helping practices strategize simple interventions to increase their rates. It is anticipated that ALERT IIS will be set up to capture non-binary gender data in the next biennium.

Office of Contracts and Procurement

The Office of Contracts and Procurement (OC&P) is a shared service between OHA and the Department of Human Services (DHS). The office addresses gender equity within OHA Contracts, including OHA requests for proposals (RFPs) through the following processes and mechanisms:

- Program staff can request contracts or RFPs to include services to clients, with specific guidance surrounding gender specific expectations. RFP template language includes:

- The State of Oregon promotes equal opportunity for all individuals without regard to age, color, disability, marital status, national origin, race, religion or creed, sex or gender, sexual orientation, or veteran status.
- In the Pay Equity Compliance paragraph: Commencing on January 1, 2019, Contractor must comply with ORS 652.220 as amended and shall not unlawfully discriminate against any of Contractor's employees in the payment of wages or other compensation for work of comparable character on the basis of an employee's membership in a protected class. "Protected class" means a group of persons distinguished by race, color, religion, sex, sexual orientation, national origin, marital status, veteran status, disability or age. Contractor's compliance with this section constitutes a material element of this Contract/Price Agreement and a failure to comply constitutes a breach that entitles Agency to terminate this Contract/Price Agreement for cause.
- In the Nondiscrimination in Employment paragraph: As a condition of receiving the award of a Contract/Price Agreement under this RFP, Proposer must certify by their Signature on Attachment C - Proposer Information and Certification Sheet, in accordance with ORS 279A.112, that it has in place a policy and practice of preventing sexual harassment, sexual assault, and discrimination against employees who are members of a protected class. The policy and practice must include giving employees a written notice of a policy that both prohibits, and prescribes disciplinary measures for, conduct that constitutes sexual harassment, sexual assault, or unlawful discrimination.

- Training to new and existing OC&P staff is provided regarding contracts and solicitations. Information regarding Gender Specific Services provisions has been incorporated.

Limitations Regarding Data

Current mechanisms used do not always track data to capture specific percentages of funds allocated to and expended for males compared to females who are under the age of 18.

Additionally, the absence of standard data collection methods around gender identity presents a barrier to OHA consistently reporting on programs and services for youth who identify as Transgender, Non-Binary and Two Spirit.

The OHA Equity and Inclusion Division will continue to work with OHA programs serving populations referenced in the status to refine data collection and tracking to identify and report potential inequities in the allocation of services and funds.

Recommendations

It is recommended that ORS 417.270 be revised with a gender expansive framework, to ensure services and programs provided or funded by the State of Oregon promote equal access to all youth—including individuals who are Transgender, Non-Binary, Two Spirit, and other identities that are outside of the gender binary.

DHS|OHA 2021-2023 Budget Prioritization Matrix

		Enterprise - Active Projects			Enterprise - POP Projects			DHS - Active Projects		OHA - Active Projects			OHA - POP Projects	
		Enterprise Collection Mgmt System (ECMS)	Integrated Eligibility (IE)	MMIS Modularity	Critical Systems Modernization	Financial Systems Modernization	Improving Data Integrity and Compliance	Provider Time Capture (PTC)	CCWIS Modernization	BH Data Warehouse (Compass)	MOTS Replacement (Compass)	OEBB-PEBB Benefits Mgmt System (BMS)	Community Information Exchange (CIE)	OSH Tech Modernization
TOTAL PROJECT SCORE (0-100)		**64**	**100**	**93**	**75**	**66**	**93**	**97**	**93**	**97**	**97**	**82**	**84**	**91**
CRITERIA (Weight)	SCORING GUIDE	PROJECT SCORES												
Technology & Strategic Alignment (35%)	**WEIGHTED SUBTOTAL & % OF TOTAL SCORE**	17 27%	35 35%	35 38%	23 31%	23 35%	35 38%	35 36%	35 38%	35 36%	35 36%	23 28%	35 42%	29 32%
Alignment to Strategic Plans Does the Agency adhere to the Governor's Strategic Plan (*Action Plan: User Friendly, Reliable and Secure: Modernizing State Information Technology Systems and Oversight*) and the Enterprise Information Services Strategic Plan? Does the investment align with IT best practices (e.g. transparency by design, easily retrievable data, early value delivery, modular implementation, security principles, modern hosting technologies such as cloud, configuration over customization, etc.) How does this investment integrate into the agency's strategic plan?	**3 - Mastery (High)** Investment incorporates multiple elements of state technical vision, is strategically consistent with agency strategic vision and IT best practices. Proposed solution is technically consistent with State vision for User-friendly, Reliable and Secure systems. **2 - Competent (Medium)** Mostly aligned with Mastery **1 - Adequate (Low)** Partially aligned with Mastery **0 - Insufficient (None)** Investment is inconsistent with elements of the Enterprise and/or Agency state technical vision and does not incorporate the state's technical values or consider IT best practices.	2	3	3	3	3	3	3	3	3	3	3	3	3
Diversity, Equity, Inclusion, and Accessibility Does the Agency adhere to the Governor's Office of Diversity, Equity, Inclusion/Affirmative Action mission and objectives? Does the Agency have processes in place ensuring Oregon's government develops, maintains, and embeds a diverse and inclusive culture throughout state systems, institutions, and deliverables and plan to incorporate them into this investment? Does the Agency address how the solution will meet or exceed Oregon Accessibility Standards?	**3 - Mastery (High)** Agency intentionality makes equity, inclusion and accessibility a priority in change management, customer service, leadership development, and community engagement. Investment demonstrates and incorporates diligence in employment, from hiring to retention, promotion, and succession planning. Agency plans to work with Procurement on COBID certified firms. Project substantially benefits underserved communities-including rural communities, low income communities or communities of color. **2 - Competent (Medium)** Mostly aligned with Mastery **1 - Adequate (Low)** Partially aligned with Mastery **0 - Insufficient (None)** Agency does not have adequate existing processes to intentionally promote diversity, equity, inclusion or accessibility and has only nominally considered incorporating them in to this investment.	1	3	3	1	1	3	3	3	3	3	1	3	2
Business & Customer Driven Technology (25%)	**WEIGHTED SUBTOTAL & % OF TOTAL SCORE**	17 26%	25 25%	25 27%	22 29%	19 29%	25 27%	25 26%	25 27%	25 26%	25 26%	22 27%	22 26%	25 27%
Customer Centered Approach How does this technology investment take into consideration the number of users and place an emphasis on providing customer value? If the investment addresses public facing technology, is it customer-focused? If the investment is for agency use, does it improve the agency users' experience? Does the implementation plan focus on user experience/feedback?	**3 - Mastery (High)** Investment is focused on providing customer value. For public services, the customer experience is primary. Potential for use by all Oregonians. For agency investments, provides tangible benefits to agency users. Investment plan includes customer stakeholders and addresses methods to incorporate user experience/feedback. **2 - Competent (Medium)** Mostly aligned with Mastery **1 - Adequate (Low)** Partially aligned with Mastery **0 - Insufficient (None)** Investment is being implemented in isolation from customers and end users or will not be used by many users.	2	3	3	3	2	3	3	3	3	3	3	3	3
Business Process Transformation Does this technology investment contribute to business process improvement/transformation? How does this technology investment intersect with measurable business outcomes including the return on investment, if applicable?	**3 - Mastery (High)** Business outcomes will be improved as a result of this investment. Investment implementation is being driven by business process transformation to improve service delivery. If public facing, customer interaction with business process is improved as a result of this investment. Solution will modernize processes. Specific examples of measurable business improvements are provided in the business case (i.e. cost savings, streamlined processes, improved controls, access to information). Investment is consistent with the agency's internal strategic plan and direction. **2 - Competent (Medium)** Mostly aligned with Mastery, includes measurable outcomes **1 - Adequate (Low)** Partially aligned with Mastery, does not include measurable outcomes. **0 - Insufficient (None)** Investment implementation is nominally considering business processes and their integration with technology. Investment has no relationship with an agency's business processes. Agency is thinking 'tool first' to solve business problems. Investment does not cohere with agency strategy.	3	3	3	2	3	3	3	3	3	3	2	2	3
Investment Risk Does this investment need to be implemented during this budget cycle? What is the impact of not doing this investment during this cycle? Would the agency, state, or its customer be exposed to a risk or impact if the service/product is not offered (e.g., security, safety, legal, funding source, or any other related risk)? Is an existing service at risk? Do other current services/products depend on it?	**3 - Mastery (High)** Investment addresses a currently unmet, time sensitive mandate (legislative, federal, state) or risk, and/or addresses audit findings requiring urgent action or not implementing this solution puts existing services at risk. **2 - Competent (Medium)** Mostly aligned with Mastery **1 - Adequate (Low)** Partially aligned with Mastery **0 - Insufficient (None)** Investment provides an opportunity to improve services, but does not introduce new capability or address imminent risks.	1	3	3	3	2	3	3	3	3	3	3	3	3

DHS|OHA 2021-2023 Budget Prioritization Matrix

		Enterprise - Active Projects			Enterprise - POP Projects			DHS - Active Projects		OHA - Active Projects			OHA - POP Projects	
		Enterprise Collection Mgmt System (ECMS)	Integrated Eligibility (IE)	MMIS Modularity	Critical Systems Modernization	Financial Systems Modernization	Improving Data Integrity and Compliance	Provider Time Capture (PTC)	CCWIS Modernization	BH Data Warehouse (Compass)	MOTS Replacement (Compass)	OEBB-PEBB Benefits Mgmt System (BMS)	Community Information Exchange (CIE)	OSH Tech Modernization
TOTAL PROJECT SCORE (0-100)		**64**	**100**	**93**	**75**	**66**	**93**	**97**	**93**	**97**	**97**	**82**	**84**	**91**
CRITERIA (Weight)	SCORING GUIDE	PROJECT SCORES												
Agency Readiness & Solution Appropriateness (40%)	**WEIGHTED SUBTOTAL & % OF TOTAL SCORE**	30 47%	40 40%	33 36%	30 40%	23 35%	33 36%	37 38%	33 36%	37 38%	37 38%	37 45%	27 32%	37 40%
Organizational Change Management How does this technology investment impact operations throughout the organization? What are the agency plans to address and mitigate risk through formal Organizational Change Management? (Organizational Change Management (OCM) is a framework for managing the effect of new business processes or systems.)	**3 - Mastery (High)** Investment demonstrates complete consideration and resources for OCM. Efforts are proportional to the size of the change taking place. **2 - Competent (Medium)** Mostly aligned with Mastery **1 - Adequate (Low)** Partially aligned with Mastery **0 - Insufficient (None)** Investment dramatically underestimates OCM requirements for this effort, or OCM efforts inadequate to address the impact of the change in the organization.	2	3	2	2	1	2	3	2	2	2	3	1	2
Solution Scale What is the scope and size of the agency's proposed technology investment? Is this the right-sized appropriate scaled type of solution to address this problem?	**3 - Mastery (High)** Investment is appropriate size and scale for the agency's business needs. The investment addresses the agency's needs sufficiently and holistically. Criteria evaluation focuses on how this specific solution is right sized for the agency's need. **2 - Competent (Medium)** Mostly aligned with Mastery **1 - Adequate (Low)** Partially aligned with Mastery **0 - Insufficient (None)** Investment is inappropriately sized to address agency need. Investment narrowly targets agency needs and the proposed solution does not serve all areas that would be impacted by the investment.	2	3	3	3	2	3	3	3	3	3	2	3	3
Capacity Has the Agency given consideration for adequate staffing inclusive of project resources, subject matter experts (SMEs), leadership availability and capability to effectively support this technology investment? Will this technology investment detract from the Agency's ability to deliver on its core business functions? Has the Agency addressed capacity requirements needed to effectively resource this initiative to cover core business functions?	**3 - Mastery (High)** Investment has completely considered SME availability and resource backfilling. Investment and agency normal business is adequately staffed for duration of project. Availability of resources include: project team, SMEs, other technical resources, and backfilled resources. **2 - Competent (Medium)** Mostly aligned with Mastery **1 - Adequate (Low)** Partially aligned with Mastery **0 - Insufficient (None)** Investment has only nominally considered resource availability. Investment is not adequately staffed for duration of project.	2	3	2	2	2	2	2	2	3	3	3	2	3
Governance Processes What elements do the Agency's project governance process consist of? Project Governance standards are inclusive of executive sponsorship and steering, vendor/contract management, change control, Quality Assurance, Independent Verification & Validation (IV&V), stakeholder feedback for decision making.	**3 - Mastery (High)** Agency has existing governance processes in place or is introducing new ones to adequately oversee this investment. Processes include multiple of the following elements: engaged executive sponsorship, steering committees, vendor and contract management, change control, QA, IV&V, and stakeholder representation processes. **2 - Competent (Medium)** Mostly aligned with Mastery **1 - Adequate (Low)** Partially aligned with Mastery **0 - Insufficient (None)** Agency does not have adequate existing governance processes and has only nominally considered incorporating them in to this investment.	3	3	3	2	2	3	3	3	3	3	3	2	3

Executive Summary

The mission of the DHS Child Welfare Department is to improve family capacity to provide safe and permanent living environments for children. It is a goal to reduce the number of children who experience foster care and to promote children's safety in their homes or other family environments. Some of the other goals of the department are:

- Help children who are unable to live safely in their homes live in settings that provide safety, stability and continuity with their families and begin the healing process.
- Secure safe, nurturing and legally permanent families for children who cannot be raised by their families.
- Expand program partnerships and increase the cultural competency of DHS staff and partners to better serve Oregon's diverse communities

The DHS Child Welfare Department has been under scrutiny in recent years for being disorganized, inconsistent, and representing a high risk for children in the system's care. An audit released by the Secretary of State's office in 2018 found that DHS and Child Welfare struggled with chronic and systemic management shortcomings, lacked sufficient placement options to meet the needs of at-risk children, and faced staffing challenges that compromised the program's ability to perform essential Child Welfare functions. In April 2019, the Governor issued Executive Order 19-03, *ESTABLISHING AN OVERSIGHT BOARD TO ADDRESS THE CRISIS IN OREGON'S CHILD WELFARE SYSTEM.* This Executive Order established a Governor's Oversight Board and crisis team to make and implement recommendations at DHS Child Welfare Department related to:

- Out-of-state foster child placements;
- Compliance with the Oregon Public Records Law;
- Implementation of laws prescribing the Critical Incident Response Team ("CIRT");
- Hiring and human resources practices generally;
- Building capacity for therapeutic and general foster care, as well as for a continuum of care in behavioral health services for foster children and youth that is accessible, trauma-informed and family and child-focused;
- Development of adequate in-home capacity for children and youth of color, youth with intellectual and developmental disabilities, and LGBTQ+ youth;
- Development of recommendations to address workforce challenges in provision of services to foster youth;
- Ensuring that accurate and timely data is available to improve operations and processes; and
- Other operational challenges.

OR-Kids is the State of Oregon's legacy child welfare information system, which was originally implemented to comply with the SACWIS (State Automated Child Welfare Information System) Federal framework. SACWIS systems were single centralized systems designed to help case workers manage their caseloads through automation and to comply with federal reporting requirements. Oregon will be transitioning OR-Kids into a new Federal framework known as CCWIS (Comprehensive Child Welfare Information System) that considers new child welfare practices and technologies. The CCWIS framework has been adopted by the Administration of Children and Families (ACF). ACF is the major federal partner of Child Welfare Services and provides a 60% funding match for all software development following the CCWIS guidelines. The gradual modernization and replacement of specific modules will not be a rapid process, likely requiring 4-5 years being completed in June 2023, based on the current and expected resource commitments and the scope of the work.

In addition to the change in recommended software design framework from our Federal partner, the Secretary of State's office completed an audit of the Child Welfare Information Systems (OR-Kids) and the enhancements needed to improve usability. Some of the findings from the audit to improve OR-Kids usability and data quality for Case Mangers and other Child Welfare staff include:

- continue to engage with program staff and other users to address usability concerns;
- implement a data governance function;
- fully identify critical data;
- improve the OR-Kids training programs; and
- to ensure processes and controls are in place to successfully transition OR-Kids to a Comprehensive Child Welfare Information System, the department should acquire a qualified program manager and maintain engagement with project oversight entities.

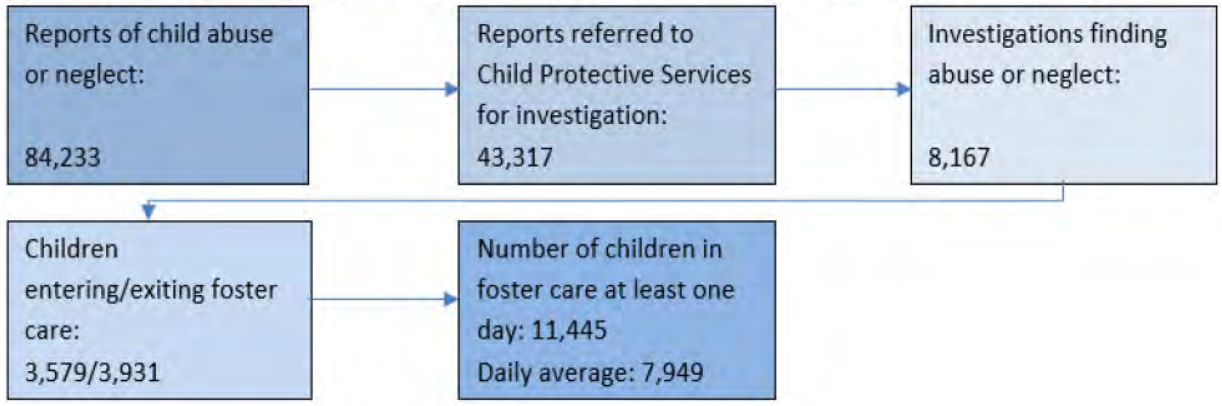
CCWIS transition and modernization will provide Oregon the opportunity to redesign the life cycle of child welfare and ultimately improve outcomes for children and families through better data interoperability, modularity, and data quality. The transition to the CCWIS framework will make OR-Kids in compliance with the guidelines of the Administration of Children and Families (ACF). ACF is a division of the Department of Health and Human Services and promotes the economic and social well-being of children, families, and communities with leadership and resources for effective delivery of human services. ACF is our federal partner and provides funding to build software that meets the CCWIS framework.

The Child Welfare Department did consider other options before embarking on this course of action. Child Welfare looked at purchasing a new OR-Kids system, but availability of commercial products was limited, the funding options available were limited, and the perceived desire for another large system implementation by the department was very low. Retaining the OR-Kids system as it was also considered. The issues identified were that it would not be CCWIS compliant, federal funds would only be available at a lower matching rate for new development and O&M, and we would not be able to meet business and reporting needs on an older technology platform. Due to these reasons it was decided that transitioning the existing OR-Kids information systems to the newer CCWIS framework provided the best option and greatest chance for success.

Current State

In the federal fiscal year ending September 30, 2018, Child Welfare served 11,445 children who spent at least one day in foster care. During that same time period, DHS received and reviewed 84,233 reports of abuse and neglect and referred 43,317 reports to Child Protective Services (CPS) workers for investigation.

Figure 1: Of the 84,233 reports, investigators in Oregon found over 8,100 instances of abuse or neglect



Source: 2018 Child Welfare Data Book

When investigators determine abuse or neglect occurred, a CPS caseworker may decide to close the investigation because the child is safe, open the case and implement an in-home safety plan, or remove the child from the home. If removed, the child enters state custody and is assigned a permanency caseworker to manage and monitor their case. After removal, the caseworker may return the child to the home with a period of monitoring, though most are placed with foster families or relatives. High-needs children and teens may be placed in more restrictive institutional settings or behavior rehabilitative programs.

A local court decides whether and for how long the child stays in state custody. Upon leaving state custody, the child may be returned to their home, become available for adoption through foster care, or enter long-term foster care or guardianship.

In addition to ensuring children are in safe and positive environments, caseworkers must also maintain voluminous documentation to satisfy state and federal requirements. The agency must comply with federal program standards, including those governing Child and Family Services; Child Support; Foster Care, Adoption Assistance and Guardian Assistance; Medicaid; Social Services Block Grant; and Emergency Assistance programs. The DHS Child Welfare program also must adhere to state laws and regulations, such as the Strengthening, Preserving and Reunifying Families law and the Interstate Compact on the Placement of Children. These laws and standards are ever-changing; for example, the Governor's recent Executive Order 19-03 established a Child Welfare Oversight Board to make and implement recommendations related to out-of-state foster child placements, building capacity for foster care, and availability of data.

DHS Child Welfare has been under scrutiny in recent years for being disorganized, inconsistent, and representing a high risk for children in the system's care. DHS and Child Welfare has struggled with chronic and systemic management shortcomings, lacked sufficient placement options to meet the needs of at-risk children, and faced staffing challenges that compromised the program's ability to perform essential Child Welfare functions. In 2018, an audit by the Secretary of State Office found that poorly planned and implemented initiatives, including the 2011 implementation of OR-Kids, undermined caseworkers' and managers' efforts to improve child safety. In addition, the ability by Child Welfare Managers to extract data for status reports and performance metrics was hampered by the convoluted software design of OR-Kids as well as the aging technology. For example, the screen size of the OR-Kids application is only two-thirds the normal size of a modern software application and the application does not have responsive design for various screen sizes and devices. Status reporting is extremely difficult because there was no data validation tools available in the older software design and critical data elements were never defined by the Program Managers. Due to the audit findings, the Governor issued Executive Order 19-03, *ESTABLISHING AN OVERSIGHT BOARD TO ADDRESS THE CRISIS IN OREGON'S CHILD WELFARE SYSTEM.*

In short, the OR-Kids information system is functional for basic case management, in that it facilitates the storage and retrieval of case information. However, it is difficult to use, which decreases caseworker efficiency and puts Child Welfare data quality at risk.

Overview and Background

Program Scope

DHS needs a robust computer system to track and manage thousands of Child Welfare cases, reports of abuse and neglect, and subsequent investigations; the agency's computer system, OR-Kids, serves this purpose. Some of the dozens of Child Welfare program functions supported by the system include provider certification, adoption work, eligibility determinations, case planning and tracking, payment processing, and federal reporting. The system's database currently contains over 400 tables containing more than 10,000 fields, which collectively contain over 600 million records, including approximately 1.8 million people associated with over 448,000 closed and 31,000 open cases.

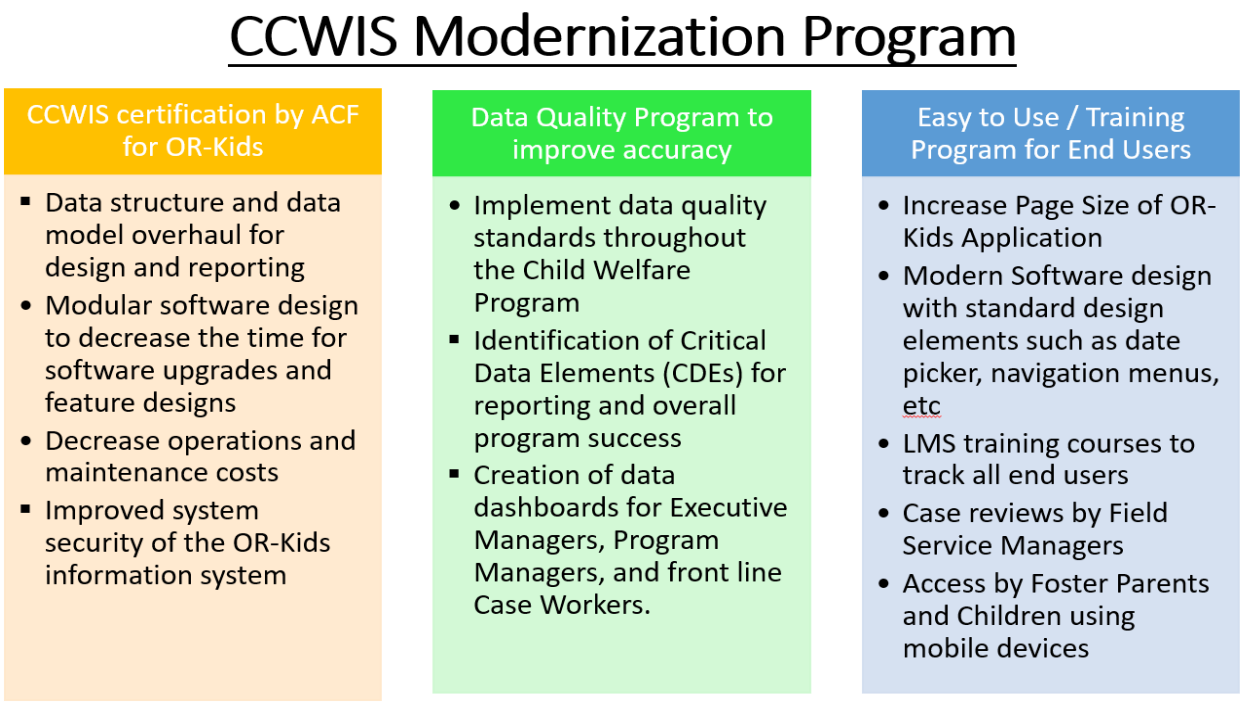
OR-Kids is the primary application for all case workers and other staff working for the Child Welfare program. With the transition to the newly recommended software design framework, OR-Kids needs to transition to a CCWIS design architecture to still be eligible for funding from ACF. This will be a multi-year effort to design OR-Kids in a more modular architecture than the current system. While there will be an opportunity to implement new features in the software, the primary concern is to transition existing features and capabilities into a CCWIS certified architecture.

The Federal Administration for Children and Families (ACF) has recently recommended a new software architecture. The new CCWIS model recommends software applications be more modular in design to allow for more flexibility of new technologies and updates/modifications to existing systems. By using the new CCWIS architecture model improvements to the OR-Kids system should lead to:

- Improved Data Quality
- Data Driven Decisions
- Reduced system overhead
- Improved User Interfaces
- Modular Components
- Public interfaces
- Reduction of Data Fixes
- Higher usability by field staff

All of these goals can be categorized into three basic areas of emphasis – data governance, user training and usability, and modern software design. OR-Kids software application should be built in such a way that the operation and maintenance cost of supporting the software is reduced, that the software use public interfaces and data standards to exchange with other information systems, and to provide high quality data trusted by all stakeholders to make data driven decisions. While these efforts may be independent efforts, they must work together to achieve a successful transition to a CCWIS compliant system.

The scope of the program is shown in the diagram below and includes the following activities:



- Data Quality Plan and implement data quality standards throughout the Child Welfare Program
- Data structure and data model overhaul for design and reporting
- Implementing a modular software design to decrease the time necessary for software upgrades and feature designs, as well as decrease operations and maintenance costs of the software application.
- Improved system security of the OR-Kids information system
- Phased replacement of OR-Kids functions with newer functionality and modular design
- Identification of Critical Data Elements (CDEs) for reporting and overall program success
- Creation of data dashboards for Executive Managers, Program Managers, and front-line Case Workers.

The program will oversee projects and work efforts to complete the transition of OR-Kids to an easy to use, fully CCWIS compliant information system. These projects will have little cross over and may not relate to each other directly, but they should work to improve the OR-Kids application. For example, one of these projects is for the Data Quality team and Executive Steering to define the Critical Data Elements (CDEs) that are used to measure success of the Child Welfare Program. Once these CDEs have been identified, then data dashboards will be built so executives and managers can review overall performance areas. A Workforce Development and Training Program Manager position were recently added to standardize business processes and to create a user training program to ensure data is entered accurately. This position will also create a standard process to implement new technology throughout the Child Welfare Department. As end users report problems where the application is too complex or difficult to record the CDEs, then the Business Analysts team can work with the end user to improve software function and design. At the same time, the software development projects such as "Family Reports" and “Foster Family Recruitment" are new modules built within OR-Kids and incorporate these features and functionality to make the new OR-Kids systems CCWIS compliant and easier for all people to use – Case Workers, Field Service Managers, Providers, Foster Families, etc.

All these projects will be approved by the Executive Steering Committee at the Program level and be coordinated throughout the Child Welfare division instead of independent data silos. The Program will provide the oversight and implementation of each of these projects coordinating each team so the new OR-Kids application is a seamless information system that captures data to be used to evaluate performance and drive policy and operational decisions.

The scope of the program does not include:

- Software maintenance releases
- System enhancements that do not support CCWIS accreditation

The following areas of scope are uncertain or have not been fully defined. More details for these projects are included in the Appendix

- Mobile solution for staff to work out of field offices while meeting clients
- Data exchange standards to facilitate sharing of structured data across multiple State systems outside of Child Welfare.
- Other projects not yet defined, that are required to achieve CCWIS accreditation.

Measurable Benefits

The CCWIS Modernization program plans will focus in the near-term on achieving CCWIS compliance, improving data structure and quality issues, and making continued enhancements for end users. Longer term, OR-Kids begins to transform into a more modern application that can meet program requirements. The team envisions a 3-year period to achieve CCWIS transition and compliance, followed by a slow process to upgrade in a modular fashion over a period of 3-4 years. Some of the benefits the program will measure are:

- Transform OR-Kids into an application about which end users consistently feel confident in completing their daily work.
- OR-Kids data is viewed as a reliable and valid basis for decision making around child safety and strategic planning for involved stakeholders.
- Business and program needs are met in weeks and months, not months and years, as OR-Kids is developed in a more modular fashion.
- Receive CCWIS accreditation and therefore still be eligible for federal matching funds for ongoing support of the OR-Kids Systems.

Identify Critical Data Elements

The Data Quality Team will work with the Child Welfare Program managers and the CCWIS Executive Steering Committee to identify a set of critical data elements to measure the success of the Child welfare program. Once these data elements are identified, a Data Dashboard showing business managers the current status of the Child Welfare system will be developed as part of the CCWIS Program. These data elements will be reviewed on an annual basis and may change as the Child Welfare requirements change over time and area of emphasis.

Training and Usability of OR-Kids Software

The Child welfare department and CCWIS program will contain training records of all Child Welfare staff and Child Welfare providers. These records will ensure that training requirements of staff members are tracked and kept current. It will also provide a training resource for new providers and provide reminders to providers when annual or new types of training are required.

Future State

The OR-Kids Business and Technical teams ("The Team") have begun to coalesce around a vision to move the application forward. Over the past 11 months, the OR-Kids Team, along with support from Oregon DHS leadership and central management, have sought to plan for the future of the application while simultaneously sharpening focus on the day to day needs of the application's 2500+ daily users. The OR-Kids staff have been successful in more deeply aligning and integrating system enhancement and planning efforts into weekly division-wide executive meetings. Going forward, a goal will be to continue to work to align improvement efforts with agency-wide goals, both internal and external, including the CFSR, APSR, and AFCARS 2.0 enhancements.

As part of a nascent agency-wide effort to focus on becoming more data-informed, and in keeping with CCWIS requirements, the Child Welfare Division has created our initial Data Quality Plan, which will inform efforts over the next biennium to address issues of validity, consistency, and timeliness with regard to critical data elements and measures important to the operation of Child Welfare and the agency's efforts to plan for the future.

Assumptions & Constraints

The project assumptions identified for this program would include the following:

- More than 60% of the program funding will be provided by ACF
- Match funding will be secured
- Establishment of a Program-level Executive Steering Committee including all Child welfare program Managers
- Establishment of a “Data Steward” program with key persons identified in each Field Service office
- Identifying and hiring the right technical resources to transition OR-Kids to modularity
- Add 9 additional positions to the Business Analyst Team
- Add 6 additional positions to the Technical Development Team

Alternatives Analysis

Options Considered:

Option	Pros	Cons
Replace OR-Kids with new CCWIS system	Not Applicable	- Commercial availability of product options is very low. - Federal match funding is not available. - Perceived low organizational appetite for another large system implementation effort.
Invest in a gradual transition of OR-Kids into a CCWIS-compliant system	- Builds on the success of a recent server modernization effort - Retains investment in the base SACWIS system - Enables leverage of the .Net investments already made in other OIS development teams - Bi-directional skill transition from Java to .Net is proven in our current staffing model	- Frequent compliance overhead, constant shifting of resources to meet new laws, regulations, and policies - The high cost of technology investment is significant to meet deadlines. - Requires dual development maintaining the current system and develop a new system simultaneously
Retain OR-Kids with no transition to CCWIS compliance	- Little compliance overhead	- Would only be able to match Federal funds at the lowest maintenance and operations level - Would not address business needs for usability, reporting and data quality. - Retains a stale technology platform.

Conclusions:

Moving into 2020, the Team intends to continue on the course of enhancing the existing the OR-Kids application in ways that are aggressively targeted at improving daily life for field end users, reducing duplicate and redundant data entry, and eliminating work-arounds that involve external tracking and systems. Simultaneously, the Team is engaged in the work of reformatting and structuring the application's data model, including bedrock Person and Case data, and starting to initiate a program to deliver the first modules, including Recruitment/Home Inquiry, Financial Processing, and a "BA" module intended to allow faster, simpler corrections to alleviate end user waits.

The 2019-20 APD outlined a number of planned initiatives to be pursued as part of initial efforts to move toward CCWIS compliance, along with long-awaited and sorely needed foundational and end-user specific enhancements.

Table 1 - Activity and Current Status

Activity	Current Status
a. CCWIS Transition Efforts are prioritized by DHS executive stakeholders	The OR-Kids modernization effort has received the strong support of Child Welfare's executive stakeholders, including the new Child Welfare Interim Director Rebecca Jones-Gaston, Child Welfare Deputy Director Jana Mclellan and DHS Director Fariborz Pakseresht. The executive team has received matching funds for

Activity	Current Status
	the 2019-21 biennium to support continued efforts toward system improvement and modularization. *A prioritized list needs to be completed by the Executive Steering Committee.*
b. Program Manager retained to lead CCWIS Transition Effort	A program manager to shepherd the many disparate parts of the CCWIS effort was completed in March 2020
c. Data Quality Plan complete and data stewardship activities underway	The Data Quality Plan was completed in January 2020 and a Data Quality Team has been established *A data stewardship program still needs to be implemented at each Field Office*
d. Role Based Dashboards for Line Managers and Staff	This effort is in process. Currently working with Data Quality Team to define Critical Data Elements and working with ORRAI to determine reporting responsibility
e. New Data Models for Person Foster Recruitment/Home Inquiry	*Expected to be completed in Q3 2020*
f. Family Report Module (Including Court Document): The Family Report represents the largest change in OR-Kids functionality around case planning and documentation since the application was implemented in 2011. A new OR-Kids Page, built in Angular JS, will allow the replacement of three existing modules (Case Plan, Child Specific Case Plan, and Court Report) and coalesce all the functions into a single workflow and document. The new function is being developed following significant staff outreach and engagement, and reflects a modern view of what stakeholders need.	This is the first module in the new CCWIS framework. The planned "Go Live" date is May 4, 2020 *Expected to be completed in Q2 2020*
g. Feasibility Study: A contracted resource will be brought in to review, assess, and provide direction around The Team's efforts to move OR-Kids towards modularity and CCWIS compliance.	Contract was awarded in March 2020. Currently, we are working with contractor to determine statement of work and start date. *Expected to be completed in Q4 2020*
h. Recruitment/Home Inquiry Module (Phase 1): A top priority for Child Welfare and the Governor, this effort will seek to improve the current workflow for staff charged with engaging and developing potential foster parents from first contact through to application and certification. i. Current OR-Kids functions do not provide a seamless view of the recruitment/ inquiry process and do not allow for all necessary data to be recorded. This enhancement will provide front-line staff with a new module/function, built in .NET, that supports their work, provides feedback on progress, nudges them to complete tasks, and supports Oregon's goal of adding and retaining new foster parents.	*Expected to be completed in Q3 2020*

Investment Name:	Child Welfare CCWIS Modernization Program	Date:	6/1/2020
Agency:	DHS	Owner / Sponsor:	Rebecca Jones-Gaston
Agency Division:	Child Welfare	Business Contact:	Lee Brown
Related Program:		IT Contact:	Mike Callaghan
Policy Option Package:		Mandate:	

Investment Type: ☐ Non-Project ☐ Project ☒ Program Initiation

Estimated Scope / Description:

Summary:

OR-Kids is the State of Oregon's legacy child welfare information system, which was originally implemented to comply with the SACWIS (State Automated Child Welfare Information System) Federal framework. SACWIS systems were single centralized systems designed to help case workers manage their caseloads through automation and to comply with federal reporting requirements. Oregon will be transitioning OR-Kids into a new Federal software framework known as CCWIS (Comprehensive Child Welfare Information System) that considers new child welfare practices and technologies. CCWIS will provide Oregon the opportunity to redesign the life cycle of child welfare and ultimately improve outcomes for children and families through better data interoperability, modularity, and data quality

OR-Kids is the primary application for all case workers and other staff working for the Child Welfare program. With the transition to the newly recommended software design framework, OR-Kids needs to transition to a CCWIS design architecture to still be eligible for funding from ACF. This will be a multi-year effort to design OR-Kids in a more modular architecture than the current system. While there will be an opportunity to implement new features in the software, the primary concern is to transition existing features and capabilities into a CCWIS certified architecture.

The Federal Administration for Children and Families (ACF) has recently recommended a new software architecture. The new CCWIS model recommends software applications be more modular in design to allow for more flexibility of new technologies and updates/modifications to existing systems. By using the new CCWIS architecture model improvements to the OR-Kids system should lead to:

- Improved Data Quality
- Data Driven Decisions
- Reduced system overhead
- Improved User Interfaces
- Modular Components
- Public interfaces
- Reduction of Data Fixes
- Higher usability by field staff

All these goals can be categorized into three basic areas of emphasis – data governance, user training and usability, and modern software design. OR-Kids software application should be built in such a way that the operation and maintenance cost of supporting the software is reduced, that the software use public interfaces and data standards to exchange with other information systems, and to provide high quality data trusted by all stakeholders to make data driven decisions. While these efforts may be independent efforts, they must work together to achieve a successful transition to a CCWIS compliant system.

Problem Definition:

An audit released by our office in 2018 found that DHS and Child Welfare struggled with chronic and systemic management shortcomings, lacked sufficient placement options to meet the needs of at-risk children, and faced staffing challenges that compromised the program's ability to perform essential Child Welfare functions. In April 2019, the Governor issued Executive Order 19-03, ESTABLISHING AN OVERSIGHT BOARD TO ADDRESS THE CRISIS IN OREGON'S CHILD WELFARE SYSTEM. This Executive Order established a Governor's Oversight Board and crisis team to make and implement recommendations at DHS Child welfare Department related to:

- Out-of-state foster child placements;
- Compliance with the Oregon Public Records Law;
- Implementation of laws prescribing the Critical Incident Response Team ("CIRT");
- Hiring and human resources practices generally;
- Building capacity for therapeutic and general foster care, as well as for a continuum of care in behavioral health services for foster children and youth that is accessible, trauma-informed and family and child-focused;
- Development of adequate in-home capacity for children and youth of color, youth with intellectual and developmental disabilities, and LGBTQ+ youth;
- Development of recommendations to address workforce challenges in provision of services to foster youth;
- Ensuring that accurate and timely data is available to improve operations and processes; and
- Other operational challenges.

Opportunity Definition:

Modernizing the OR-Kids Information System makes DHS eligible to receive Federal match funding for software development costs for the life of this program.

Alternatives:

The Child Welfare Department did consider other options before initiating this program.

- Child Welfare looked at purchasing a new OR-Kids system, but availability of commercial products was limited, the funding options available were limited, and the perceived desire for another large system implementation by the department was very low.
- Retaining the OR-Kids system as it was also considered. The issues identified were that it would not be CCWIS compliant, federal funds would only be available at a lower matching

rate for new development and O&M, and we would not be able to meet business and reporting needs on an older technology platform.

Due to these reasons it was decided that transitioning the existing OR-Kids information systems to the newer CCWIS framework provided the best option and greatest chance for success.

Program Approach:

The CCWIS Modernization Program will be managed to align with the goals of the two main stakeholders. The State of Oregon Child Welfare Department is the first stakeholder with the goal of building an easier to use information system that helps with business workflow, identification of key data elements that can be used by senior managers for program reviews, data driven policy decisions, and to meet state and federal reporting requirements. The Administration of Children and Families (ACF) is the second stakeholder with their goal being to create an information system that meets CCWIS guidelines. ACF is requiring the OR-KIDS information system to transition from a large complex system to a smaller system of inter-related modules that share data elements between them and across modules. The goals of ACF are to allow states to build systems that meet their business needs, foster innovation, to allow for data to be shared between related systems (child welfare, health courts, financial, etc.), and to reduce the overall maintenance costs to support the software and information system. Each of these stakeholders have a defined process for project prioritization, oversight and review of on-going work for the CCWIS Modernization.

ACF has key requirements and an annual planning process that combine for the overall program review. ACF required that a Technology Road Map be created showing the various projects that are part of the CCWIS modernization effort and a high-level plan of how Child welfare plans to transition from the current OR-Kids software architecture to the CCWIS software architecture. ACF also required Child Welfare to create a Data Quality Plan to identify critical data that can be measured for reports and to determine success of the new system as we build it. Lastly, ACF requires Child Welfare to submit an Annual Planning Document (APD) detailing the work that was created in the past 12 months and identifying the work that is planned to occur in the next 12 months. Any modifications that occur in between the APD submission are approved as an addendum. In addition, there are monthly conference calls to review Child Welfare progress on current projects.

Child Welfare has an ISMC that meets monthly to prioritize all IT projects within the child welfare. The CCWIS Modernization program is part of this prioritization effort and several the other projects are related to OR-Kids and/or required data integration with OR-Kids. There are 3rd party interfaces that are included in the CCWIS Modernization program that are also needed with other Child Welfare projects. The ISMC reviews the CCWIS Modernization Road map and will prioritize different modules that are required by the CCWIS Modernization as well as other projects that Child Welfare is working on. For example, Child Welfare is creating an Electronic Records Management System (ERMS) to store all active case files and archive closed case files instead of storing paper files in warehouses. The ERMS project requires a data interface with OR-Kids and the same interface is required by CCWIS Modernization. This is something that the ISMC will consider when they prioritize projects. The ISMC will also consider project funding when prioritizing projects. ACF will provide 60% project funding for any project that meets Tile-IV E requirements.

EIS *IT Investment form*

The overall CCWIS Modernization Program will be comprised of several smaller projects as each module or data interface is built. The CCWIS Program will maintain oversight at the program level with a Program Management Plan, Governance Plan, Communications Plan, etc. Each of the projects will have an ITI completed and submitted to EIS for oversight. Depending on the scope and complexity of each project will determine the level of oversight required by EIS.

Assumptions:

The program assumptions identified would include the following:

- The time required to adequately research, document, design, plan and implement the program will be available.
- The Business understands and can articulate the outcome measures they require.
- Legislative mandate changes will not significantly affect the program deliverables.
- The program will be able to deliver a system that will meet all CCWIS software framework design requirements.

Estimated Schedule: Start Date: 7/1/2019 End Date: 6/30/2024

Estimated Budget:

Implementation Cost		5 –Year Operating Cost	
Hardware:	$ 57,000	Hardware:	$ 65,000
Software:	$ 255,500	Software:	$ 25,000
Contracts/Services:	$1,752,000	Contracts/Services:	$1,000,000
Personnel:	$2,555,000	Personnel:	$ 60,000
Total:	$4,619,500	Total:	$1,150,000
Funding Source:	ACF (60%) / Gen Fund 40%)	Total Cost*:	$5,769,500
Contract NTE:			

* Total cost includes implementation plus 5 years of operating cost

Security Considerations:

The data within OR-Kids is Level 3 data. Most of the data is sensitive in nature as it deals with children throughout the State of Oregon, however in certain case files there may be HIPAA protected data or CJIS information. The CCWIS Modernization Program will follow the same security guidelines as the OR-Kids Information System.

Applicable Oversight Threshold(s): (DAS Policies 107-004-130 and 107-004-150)

- ☒ ≥$150k Total Cost*
- ☒ ≥$1m Total Cost*, Internal Development
- ☒ ≥Level 3 Information Classification
- ☐ Cloud / Hosted and High Remediation Cost
- ☐ Cloud / Hosted and System of Record
- ☐ EIS Required

Instructions:

This form should be filled out early in the governance process. The information in this form helps the agency and Enterprise Information Services (EIS) appropriately resource the investment for planning and oversight purposes.

EIS *IT Investment form*

The ITI form is predominantly an on-boarding form for Senior IT Portfolio Manager (SIPM) and Business Information Security Officer (BISO) engagement.

For Project and Program investments, the information in the ITI form may be high-level or preliminary. It is expected that agency certainty regarding details will increase over time. That certainty should be reflected in additional documentation (i.e. Project Management Plan) as the project or program progresses. This document does not need to be updated unless specifically indicated by EIS.

For Non-Projects, the information in the ITI should be more thorough as the agency will likely have greater certainty about investment details. In some cases, this ITI may be the single scope/justification related artifact required for EIS endorsement, consequently it is expected that the form provide sufficient detail for future readers to understand the justification, scope, and benefit from the proposed investment.

Field	**Definition**
Investment Name	A unique name for the IT Investment.
Agency	The name of the agency.
Agency Division	The name of the department of division of the agency requesting the investment.
Related Program	If applicable, reference any related EIS approved program (defined as a group of related projects).
Policy Option Package	If applicable, reference any related Policy Option Package (POP).
Date	The date of initial ITI submission.
Owner / Sponsor	The primary owner of the IT Investment, often the Sponsor, and approving authority.
Business Contact	The primary business contact for investment questions.
IT Contact	The primary IT contact for investment questions. Typically, an IT Manager.
Mandate	If applicable, indicate the appropriate investment mandate (Federal, Legislative, Governor, etc.). If needed, use the Estimated Scope / Description space for additional mandates or supporting information.
Non-Project	An IT investment which may include purchases, subscriptions, contracts, contract amendments, contract renewals, etc. Some activities such as development of an implementation or communication plan may be required; it is expected that these activities represent a minority of non-project investment work. Typically, this work involves a limited resource commitment (i.e. fewer than 80 hours of staff time or similar threshold established by agency governance).
Project	A “temporary endeavor undertaken to create a unique product, service, or result.” (PMBOK Guide, 6th edition, p.715) Typically, projects have project

	managers assigned, are approved by agency governance, and are officially chartered.
Program Initiation	Indicate if this ITI is an initial submission for a new Program. A Program is "defined as a group of related projects, subsidiary programs, and program activities managed in a coordinated manner to obtain benefits not available from managing them individually." (PMBOK Guide, 6th edition, p.11) Programs may include any number of project and non-project investments. Typically, individual program investments will share a program-level Business Case.
Estimated Scope / Description	Provide a brief description of the investment. This should detail, at a high level, the estimated scope of the investment and provide a brief justification for the investment. A more thorough justification should be included when a corresponding Business Case is not expected, for example when an investment is part of a program or when infrastructure/lifecycle level 1 oversight is likely.
Start Date	For Projects this represents the estimated date of Project Charter. For Non-Projects this represents the estimated date of contract signature, purchase, subscription start, etc. For Programs this represents the estimated date of Program Charter.
End Date	For Projects this represents the estimated date of Project close-out. For Non-Projects this represents the estimated date of contract signature, purchase, subscription start, etc. For Programs this represents the estimated date of Program close-out.
Hardware	The cost, either initial or 5-year operating, for estimated hardware purchases. *
Software	The cost, either initial or 5-year operating, for estimated software purchases. *
Contract/Service	The cost, either initial or 5-year operating, for estimated contracting costs. This cost should include maintenance contracts, subscriptions, development contracts, etc. *
Personnel	The cost, either initial or 5-year operating, for estimated personnel costs. *
Total	The total cost, either initial or 5-year operating, for all estimated expenses. *
Funding Source	Indicate the primary funding source for the investment.
Total Cost	The total of initial and 5-years operating cost estimates. Do not include potential revenue or savings. *

EIS *IT Investment form*

Contract NTE	For Non-Project Investments related to a contract (contract, contract amendment, contract renewal, etc.), include the Not-To-Exceed amount of the current contract and amendments.

Security Considerations	Briefly describe the following: ▪ Expected security controls required to protect state data against unauthorized access (Confidentiality, Integrity, and Availability) ▪ Any known business requirements for availability (e.g. acceptable downtime) ▪ Cloud / Hosted environment: hosted inside or outside the United States ▪ Highest level of data classification (Reference Policy 107-004-050) o Level 1 – Published: Information that is not protected from disclosure, that if disclosed will not jeopardize the privacy or security of the agency employees, clients, and partners. o Level 2 – Limited: Information that may be protected from public disclosure, but if made easily and readily available, may jeopardize the privacy or security of agency employees, clients or partners. o Level 3 – Restricted: Information intended for limited business use that may be exempt from public disclosure because, among other reasons, such disclosure will jeopardize the privacy or security of agency employees, clients, partners, or individuals who otherwise qualify for an exemption. Information may be accessed and used by internal parties only when specifically authorized to do so in the performance of their duties. External parties requesting this information for authorized agency business may be under contractual obligation of confidentiality with the agency prior to receiving it. o Level 4 – Critical: Information that is deemed extremely sensitive and Is intended for use by named individual(s) only. This information is typically exempt from public disclosure because, among other reasons, such disclosure would potentially cause major damage or injury up to and including death to the named individual(s), agency employees, clients, partners, or cause major harm to the agency. ▪ Restricted data types: o HIPAA (Protected Health Information) o CJIS (Criminal Justice Information) o IRS Publication 1075 (Federal Tax Information) o FERPA (certain education records) o PCI DSS (Payment Card Industry Data Security Standard) o SSA (Social Security Administration) o FISMA (Federal Information Security Modernization Act) o MARS-E (Minimum Acceptable Risk Standards for Exchanges) o OCIPA (Oregon Consumer Information Protection Act) o Other (identify the specific rule or standard)

EIS *IT Investment form*

≥$150k Total Cost	Investments exceeding a cost of $150,000, unless the investment is an agency-staffed application development project. **
≥$1m Total Cost, Internal Development	IT Investments exceeding a cost of $1,000,000 for agency-staffed application development projects. **
≥Level 3 Information Classification	It will store, process, or transmit data of Information Asset Classification Level 3 (Restricted; reference Policy 107-004-050) or higher, or information for which special protection standards apply by law or contract. ***
Cloud / Hosted and System of Record	It will be the authoritative source for information that is difficult, expensive, or infeasible to replace or recreate. ***
Cloud / Hosted and High Remediation Cost	A sustained interruption of the Service would have a significant impact on agency operations and/or those served by the agency. ***
EIS Required	Any IT Investments where EIS determines that oversight, review, or approvals is in the best interest of state government. **

* IT Investment is the planned or actual commitment of funds for IT-related expenditures including, but not limited to personnel, contractors associated with projects, products, services, or contracts and contract renewals and other amendments. **Cost of an IT Investment includes the cost of any services and/or supplies purchased and five years of anticipated operational costs** (e.g., licensing costs, and hardware/software maintenance).

** For more detail on oversight thresholds see DAS Policy 107-004-130

*** For more detail on Cloud and Hosted thresholds see DAS Policy 107-004-150

1. Business Case Summary

1.1. Executive Summary

COMPASS (Community Outcome Management and Performance Accountability Support System) is a collaborative information technology approach to the administration, planning and monitoring of Substance Use Disorder and Mental Health treatment programs. The purpose of COMPASS is to collect data from a variety of internal and external data systems and electronic health records systems and provides multi-functional reporting to support OHA, treatment providers and state and federal stakeholders. By aligning business processes and data, the system will facilitate cooperation and collaboration between stakeholders and improve reporting of, and access to contract and client encounter information in compliance with HIPAA and 42CFR regulations.

The current COMPASS software applications are running on a mixture of platforms and languages. Most are outdated and in need of upgrading or decommissioning. The underlying data storage for the applications is incomplete, insular, outdated, and expensive to maintain. The current database design contains some gaps in which referential integrity has been compromised, creating data quality issues. These data design issues have been masked by their current applications, creating a heavy reliance on these applications to provide the necessary context for the data. This makes integration and reporting from the data difficult, inaccurate, and time consuming.

Modernization of the COMPASS universe would significantly improve interoperability of OHA's data systems and could be leveraged across numerous program areas. The current lack of integration with other state data systems creates barriers and challenges for service providers to report data to OHA. In addition, OHA personnel have additional workload and must manually perform required tasks to meet agency, state, and federal reporting requirements.

The COMPASS modernization project supports the following initiatives, missions and strategic technology plans by ensuring efficient data collection, management, system integration, and data reporting on behavioral health service outcomes for Oregonians.

1. Governor's Executive Order 18-01: Building Oregon's commitment to addiction prevention, treatment, and recovery priorities, and setting deadlines for statutory requirements, and declaring a public health crisis.

2. Health and Human Services Agencies Information Resource Management 2017-2019, Governor Brown's Strategic Initiatives for Healthy, Safe Oregonians:
    a) Ensure that every Oregonian who needs alcohol and other drug treatment or mental health services can easily get it.
    b) Ensure all Oregonians have equitable and appropriate access to affordable, high quality health care.
    c) Keep communities safe through mindful law enforcement and using data and analytics to balance accountability, reformation and treatment in order to reduce recidivism and prevent future victimization.

3. OHA Mission: Helping people and communities achieve optimum physical, mental, and social well-being through partnerships, prevention and access to quality, affordable health care.

4. DHS/OHA Strategic Technology Plan:
    a) Provide Trusted Services for accurate health care outcomes data by effectively collecting, maintaining, and organizing information to enable informed decision-making and support internal and external data sharing.
    b) Enable Business Automation via workflows and business rules, reducing manual, paper-based processes while increasing effectiveness.
    c) Enable Connectivity Anytime, Anywhere, in Multiple Ways by providing self-service, role-based capabilities with remote access to information meeting the diverse needs of staff and partners.
    d) Use Dynamic Services Supporting Dynamic Needs by supporting provider modular, common services and capabilities, which promote agility, reuse, and best practices leveraging enterprise capabilities.

Improved data collection and integration of the COMPASS software applications would allow the agency to improve reporting on outcomes, expenditures and contract compliance as well as collaborate with providers to track the implementation and effectiveness of services, identify service gaps, predict the specific timing of service needs, and better request and allocate funding to facilitate individual's progress through the system.

2. Background

COMPASS is a collaborative information technology approach to the administration, planning and monitoring of Substance Use Disorder and Mental Health treatment programs. The purpose of COMPASS is to collect data from a variety of internal and external data systems and electronic health records systems and provides multi-functional reporting to support OHA, treatment providers and state and federal stakeholders. By aligning business processes and data, the system will facilitate cooperation and collaboration between stakeholders and improving reporting of, and access to contract and encounter information securely and in compliance with HIPAA and 42CFR regulations.

The Oregon Health Authority (OHA) requires complete and accurate data to meet mandatory reporting requirements at the federal and state level. The agency is required to make available information related to:

1. Substance Abuse and Mental Health Services Administration (SAMHSA) Block Grant.
2. U.S. Department of Justice (USDOJ) Performance Plan.
3. Oregon State Police reporting to the NICS database for background checks.
4. Treatment Episode Data Set (TEDS), including National Outcome Measures (NOMs)

OHA has been unable to comply with the monthly data submissions required by SAMHSA. Continued noncompliance with this requirement places millions of dollars for mental health and addictions services at risk.

The behavioral health care delivery system in Oregon has changed dramatically with the integration of new partners into a comprehensive care model. Additionally, recent legislative changes require that the agency find a solution for real time tracking of the availability of some behavioral health services. The emphasis on Coordinated Care Organization (CCO) metrics and the ability to track both quality of care and service outcomes makes the ability to gather and analyze data across systems an integral need for OHA programs.

The COMPASS constellation is comprised of many data systems used internally by OHA and externally by contracted partners. See *Appendix A – Current Business System Areas Supported* for a complete list of systems and their respective area of focus. The COMPASS applications are intended to be an essential behavioral health data collection system for the Health Systems Division (HSD). Originally designed to improve data collection for Medicaid and non-Medicaid behavioral health care provided by programs licensed by the Health Systems Division, the stand-alone systems are aging and exist on platforms that are outdated, expensive to service or modify, and difficult to acquire technical support.

A new solution is required to collect necessary data from multiple sources, consolidate data systems, interface with external systems, and integrate into the enterprise environment. Existing data systems need to be retired and a new solution implemented with the agency's long-term enterprise technology strategy.

2.1. Stakeholders

Primary stakeholders include, but are not limited to:

1. OHA, Health Systems Division
2. OHA, Health Policy & Analytics
3. OHA, Oregon State Hospital
4. OHA, Office of Information Services
5. OHA, Office of Budget and Forecasting
6. OHA, Office of Contracts and Procurement
7. Federal partners: Substance Abuse and Mental Health Services Administration (SAMHSA) and U.S. Department of Justice (USDOJ)
8. Oregon State Police
9. Electronic Health Record (EHR) and other software providers
10. Providers of behavioral health services
11. Clients receiving behavioral health services
12. Providers of substance use treatment services
13. Clients receiving substance use treatment services

2.2. Other Considerations/Drivers

The agency is at risk of losing grant funds, including the State Targeted Response grant, the Medication Assisted Treatment – Prescription Drug and Opioid grant (both dealing with opioid addiction), and not being able to forecast general fund need accurately and in a timely manner. The agency is currently behind or using complicated and time-consuming workarounds to meet mandatory federal reporting of behavioral health data for SAMHSA, both the mental health substance abuse block grants (NOMs/TEDS) and the USDOJ Oregon Performance Plan.

Recent reviews and process changes at OHA determined that COMPASS systems are not receiving and maintaining sufficient documentation to support data being provided to Oregon State Police (OSP) for the National Instant Criminal Background Check System (NICS). A scheduled audit in June 2018 by the Federal Bureau of Investigation (FBI) could result in penalties or sanctions against the agency for failing to address the flawed data systems.

3. Problem and Opportunity Definition

3.1. Problem Definition

With Oregon's Health Care Transformation, the introduction of Coordinated Care Organizations (CCOs), and investments in Electronic Health Record (EHR) systems, the current data environment does not allow for data integration to meet the need for reporting on treatment outcomes and investment efficiency. Many of the COMPASS systems were designed to measure outcomes based on a different funding model from the service element model currently in use. In addition, the system requirements and data elements were not fully defined in the original build.

In 2017, the OHA COMPASS Task Force identified issues with disjointed and siloed data from systems for HSD Contracting, Licensing and Certification, and Client Outcomes. Additional operational deficiencies were noted in the following areas of the COMPASS universe:

1. Contract deliverables are not met and/or enforced and data is not validated as accurate;
2. Subcontractors cannot be identified in collected data;
3. Provider licensing and certification is not integrated with current data systems;
4. Data systems lack defined relationship and correlation between data elements;
5. Missing data elements in collection and reporting process;
6. Difficulty assessing if contracted services are provided in compliance with contract.

OHA is unable to conduct mandated state and federal reporting. OHA and our partners at DHS continue to fall short of the expectations of advocates by failing to meet the needs of transitioning clients; this leaves the agency with continuing risk of additional investigation and potential litigation. OHA remains unable to adequately forecast service need or coordinate treatment for individuals entering and leaving the state hospital. *Olmstead v. LC*, a US Supreme Court ruling, requiring states to ensure that persons with disabilities receive services in the most integrated setting appropriate to their needs. Inability to appropriately forecast need for state

hospital resources puts the agency at risk of losing needed budget and Oregonians at risk of inadequate care.

The COMPASS data systems lag behind OHA business partners who are further down the integrated systems path. The file structure and business process are a couple of generations behind the EHR industry and has proven challenging for some partners to provide data to OHA for that reason. Separate work flows are required for COMPASS data applications as they do not compliment or integrate with normal EHR operations.

The current Health Systems Framework applications are running on ColdFusion. The underlying data storage for the COMPASS applications resides in several DB2 databases running on AIX servers, which are outdated and expensive to maintain. The current database design contains gaps in which referential integrity has been compromised, creating data quality issues. These design problems have been masked by the application, creating heavy reliance on the application to provide necessary context for the data.

The tightly-coupled relationship between the database and the application makes improvement and integration projects more difficult because it restricts the developer within the confines of both an aging toolset and a flawed data model. This data model makes integration with other systems and utilization of the data for reporting by Business Objects and other reporting engines more problematic. As new projects are undertaken using the tightly-coupled architecture in COMPASS, they will become riskier as the number of records and users increase, while the toolset falls further out of support.

Over time, the IT system-related risks will increase as the number of developers knowledgeable in older Cold Fusion/DB2 development projects dwindles, and it becomes a specialty realm for contract support. Add to this the growing number of retiring mainframe, Rbase and other legacy applications that will need to be integrated into the Health Systems Framework, and the question of available qualified in-house resources becomes critical going forward.

3.2. Opportunity Definition

Alignment with client need, the ability to track available resources, CCO reporting requirements and the analysis and tracking of behavioral health data across systems will be critical to the successful integration of behavioral health treatment into the CCO environment.

Modernization of the COMPASS universe of systems will:

1. Increase the agency's ability to measure and report on behavioral health outcomes.
2. Increase the agency's ability to tie reporting deliverables to payment.
3. Improve the standardization of data in the agency.
4. Increase the agency's ability to track outcomes by client, demographic group, or location of clients.
5. Permit the agency to meet required reporting responsibilities.
6. Develop a standardized reporting system for behavioral health services.
7. Support the provision of more timely, appropriate, cost-effective services for Oregonians.
8. Reduce the administrative burden on contracting providers.

9. Streamline and update business processes
10. Improve the standardization of data in the agency.
11. Collect data to increase the agency's ability to measure and report on behavioral health outcomes.
12. Implement a solution that includes data elements necessary for tracking outcomes and providing non-Medicaid data for a 360 view of the client.
13. Permit the agency to meet required reporting responsibilities.
14. Build a data warehouse that allows interfaces from a variety of systems to meet data quality standards, to create a 360 view of the client, and to include data necessary for accurate cross-agency reporting.

The 2017 COMPASS Task Force report provided opportunities including:

1. Replace COMPASS systems to reflect the present continuity of care model and reexamine old business processes.
2. Improve and update business processes to better align with COMPASS systems.
3. Align siloed systems to integrate CCO data into the service delivery environment.

OHA envisions a data management and processing system for behavioral health service outcomes that can hold millions of individual records, directly interface with a variety of internal and external data systems, and electronic health records systems, and provide multi-functional reporting to support state and federal requirements. Additionally, the work is expected to support improved treatment outcomes for Oregonians through the exchange, analysis and reporting of data; support improved business practices and reduced administrative burden for OHA through the ability to better analyze and forecast outcomes and need; and support improved customer service and reduced administrative burden to providers.

The project and resulting system should provide a variety of business support functions including the following:

1. Compliance with Personally Identifiable Information (PII) Privacy Act;
2. Compliance with Health Insurance Portability and Accountability Act (HIPAA);
3. Compliance with Health Information Technology for Economic and Clinical Health (HITECH) Act;
4. Reduce silos around system maintenance in OHA's OIS team;
5. Increase the agency's ability to tie contract deliverables / reporting responsibilities to payment;
6. Improve the standardization of data in the agency;
7. Increase the agency's ability to measure behavioral health outcomes for individual clients and groups;
8. Reduce the administrative workload on contracting providers and staff;
9. Create integrated and adjustable reports that meet federal reporting requirements;
10. Upgrade requirements for federal and state legislation, rules, and business needs;

11. Migrate data from or interface with multiple data collection systems including, but not limited to: Consolidated Database (CDB), Acute Care Reporting (ACR), Medicaid Management Information System (MMIS);
12. Streamline and update business processes;
13. Provide ongoing maintenance and support; and
14. Support required functionality for 5 – 10 years.

The redesign of the COMPASS constellation provides OHA with an opportunity to examine and update business process and better align to the agency's current vision and the continuity of care model. Part of this business process alignment will include the interface of provider reporting and contracting requirements, ensuring that the agency is better tracking the services it is paying for and that Oregonians are receiving the benefit of service dollars contracted through the agency. OHA has the opportunity to reduce silos and begin the process of integrating CCO's into the behavioral health service delivery model.

The COMPASS modernization project supports the following missions and strategic technology plan by ensuring efficient data collection, management, system integration, and data reporting on behavioral health service outcomes for Oregonians.

1. Governor's Executive Order 18-01: Building Oregon's commitment to addiction prevention, treatment, and recovery priorities, and setting deadlines for statutory requirements, and declaring a public health crisis.

2. Health and Human Services Agencies Information Resource Management 2017-2019, Governor Brown's Strategic Initiatives for Healthy, Safe Oregonians:
    a) Ensure that every Oregonian who needs alcohol and other drug treatment or mental health services can easily get it.
    b) Ensure all Oregonians have equitable and appropriate access to affordable, high quality health care.
    c) Keep communities safe through mindful law enforcement and using data and analytics to balance accountability, reformation and treatment in order to reduce recidivism and prevent future victimization.

3. OHA Mission: Helping people and communities achieve optimum physical, mental, and social well-being through partnerships, prevention and access to quality, affordable health care.

4. DHS/OHA Strategic Technology Plan:
    a) Provide Trusted Services for accurate health care outcomes data by effectively collecting, maintaining, and organizing information to enable informed decision-making and support internal and external data sharing.
    b) Enable Business Automation via workflows and business rules, reducing manual, paper-based processes while increasing effectiveness.

c) Enable Connectivity Anytime, Anywhere, in Multiple Ways by providing self-service, role-based capabilities with remote access to information meeting the diverse needs of staff and partners.
d) Use Dynamic Services Supporting Dynamic Needs by supporting provider modular, common services and capabilities, which promote agility, reuse, and best practices leveraging enterprise capabilities.

4. Alternatives Analysis

4.1. Assumptions

The Project assumptions identified would include the following:

1. There is more than one qualified vendor.
2. Total cost of project and 5-year maintenance and operations will be within available funding.
3. Only purchase a solution using OIS supported technology or include funding to for contracted O&M by vendor for operations and maintenance support for the selected technology support.
4. Modular solution with major components as individual modules.
5. Agile approach is preferred in order to receive functionality throughout the system development.
6. The time required to adequately research, document, design, plan and implement the projects as described will be available.
7. The Business understands and can articulate the outcome measures they require.
8. Legislative mandate changes will not significantly affect the project deliverables.

4.2. Constraints

Below is a list of known constraints:

- Internal resources have limited availability (Program Support, Program) to support implementation.
- No funding to support implementation in biennium 2019/2021

4.3. Selection Criteria and Alternatives Ranking

The core criteria that we are using to compare alternatives are:

- Time to implement (duration)
- Cost (both project costs and ongoing annual costs)
- Benefits
- Risks

4.4. Solution Requirements

OHA requires the following system functionality:

- Secure data intake, storage, and output
- Data quality and validation processes that does not let providers enter inaccurate information
- Data gathering processing functions like versioning, creating crosswalks, data dictionary, de-duplication of data submissions.
- Secure, unobstructed, and quick access to data warehouse by role-based credentials
- Multi-functional reporting ability to create accurate reports with reliable data.: scheduled and ad hoc reporting
- Cloud based solution providing the ability to support future program data collecting and behavioral health reporting needs.
- Application Programing Interface (API) for any other data systems to send the data to the BH data warehouse.
- Behavioral Health (BH) data warehouse with the ability to accept data from other data systems.
- Provide training and training material to OHA staff and Providers
- Bi-Directional interface to obtain master client unique ID
- One-way interface with the following existing internal and external data systems:
    - Electronic Health Records (EHR) systems and health information data exchanges (ex. OWITS)
    - AMHI/Choice Model – Community Mental Health
    - Avatar the Oregon State Hospital's Electronic Health Record system.
    - Justice or State Patrol for Criminal History
    - Medicaid Management Information System (MMIS)
- 5 years of on-going operations and maintenance (O&M) support

**For more detailed solution requirements see Behavioral Health Data Warehouse Project Solution requirements and MOTS Replacement solution requirements.*

4.5. Vendor Requirements

OHA seeks to obtain the services of a data vendor with the capacity and technical expertise to perform all Behavioral Health data collection, aggregation, enhancement, and quality assurance functions. This includes but is not limited to: design, development and implementation of the vendor's solution, migrating the existing data hosted at the state Data Center Services (DCS) to the new solution; secure and streamline data collection and aggregation; processing and validating data submissions; providing data access and reports to approved users; and optimizing data for mandated reports. Mandatory tasks include:

Project Planning and Implementation
The Contractor chosen by OHA will be required to provide detailed documentation to OHA including a project plan that includes standard technical documentation covering Design Development and Implementation (DDI) of the proposed solution, a comprehensive transition-in plan and an extensive Data Quality and Business Rules document that details all methodologies used to enhance and validate data submissions. As part of this task, a new Contractor must

securely transfer all data from the DCS and in doing so, retain processed historic data, but also reprocess raw historic data. Finally, the Contractor must provide expert project management and technical support across all activities throughout the contract term.

Data Management
The Contractor will be responsible for all Behavioral Health front-end data collection and aggregation. As part of this task, the contractor must implement and manage data intake processes; perform regular extract, transfer, load (ETL) processes; actively manage data collection; implement pre-load quality assurance checks; and participate in data submitter relations and engagement. After data collection, the contractor must perform data enhancement tasks like creating member, provider, and facility crosswalks; claims processing and de-duplicating; as well as other value-added components like creating benchmarks. Finally, the Contractor must warehouse the processed data and perform post-load quality assurance on the data.

Data Access and Reporting
The Contractor must provide to OHA complete access to all levels of the data warehouse in a secure, unobstructed, and efficient manner. Part of this will be to provide role-based credentials and access to a shared work area within the data environment for users to develop and save tables, cubes, program code, etc. The Contractor must also provide detailed data warehouse documentation, training, and technical support as well as furnish prescribed data sets on a quarterly basis and produce additional data extracts as needed.

Data for Public Mandated Reports
The Contractor must work closely with OHA to optimize the Behavioral Health data for creating and standardizing Mandated reports (SAMHSA) based on stakeholder feedback, content development, and ongoing operations.

4.6. Alternatives Identification

OHA has considered the following alternatives:

- Alternative 1: Status Quo
- Alternative 2: Build - Integrate Existing System
- Alternative 3: Buy - RFP COTS SaaS
- Alternative 4: Build – OIS Development Build
- Alternative 5: Build – Basecamp Development
- Alternative 6: Build – Transfer Technology State

**The Alternatives captured in this analysis is for the Behavioral Health Data Warehouse and MOTS Replacement projects. Alternative Analysis will be completed for each project under the Compass Modernization Portfolio.*

4.7. Alternatives Analysis

Alternative 1: Status Quo (Not Selected)

- Description: Continue to use existing systems and tools to support programs.
- Implementation Duration: 0 months
- Total Cost: $8,432,178
    - Implementation Cost: $0
    - 5 Years of O&M: $8,432,178
- Benefits:
    - No changes needed.
    - Lower cost in short term.
    - Funding can be re-assigned to other Behavioral health needs
- Risks:
    - Unable to achieve all solution requirements
    - Continue to experience pain points:
        - Not meeting reporting needs
        - Not meeting operational needs
        - Receiving incomplete and inaccurate data
        - Complex manual data submissions
        - Missed grant funding (Fed, State, Foundation) opportunities because unable to provide reports and outcomes

Alternative 2: Build - Integrate Existing System (Not Selected)

- Description: Gathering the business requirements and building (writing code) an interface between existing systems using OIS Resources
- Implementation Duration: 48 months
- Total Cost: $17,853,047
    - Implementation Cost: $ $9,131,386
    - 5 Years of O&M: $8,721,661
- Benefits:
    - Lower cost
    - Lower implementation duration
    - Improves the ability to provide data needed for “telling a story” or any future reporting needs.
- Risks:
    - Existing systems are too old to support APIs or integration and will need extensive re-work to be accomplished.
    - Unable to meet all reporting requirements (data elements missing)
    - Unable to support scalability for future technology needs (mis. Paper is one of the systems).

Alternative 3: Buy - RFP COTS SaaS (Selected)

- Description: Utilize Request for Proposal (RFP) to procure and execute a new contract for development and implementation of a Commercial off the Shelf (COTS)/Software As A Service (SAAS) and modify using OIS Resources
- Planning Duration: 21 months
    - *Note: Implementation duration will be determined through RFP. According to the market analysis research implementation duration provided by a vendor ranges between 12-18 months.*

- Total Cost: TBD
  - Planning Cost: $1,979,606
  - Implementation Cost: To Be Determined through RFP
  - 5 Years of Maintenance and Operations: To Be Determined through RFP
  - *Note: According to the market analysis research implementation cost provided by a vendor ranges between $1M - $2.5M and 5 years of O&M ranges between $2.5M-$4M.*
- Benefits:
  - Possibility for lower cost
  - Possibility for better support
  - Implementation duration is less
  - Use of most up to date technology
  - Supports scalability for enterprise needs:
    - Expansion within BH domain
    - Expansion within external agencies (DHS)
    - Supporting BH Technology Roadmap
- Risks:
  - Project takes an additional 6-12 months for RFP effort.
  - Customizations increase implementation & O&M costs
  - Technology solution and data is owned by the vendor and changes to the system must be made by the vendor which increases costs.

Alternative 4: Build – OIS Development Build (Not Selected)

- Description: Build new system using OIS Resources
- Implementation Duration: 54 months
- Total Cost: $27,364,225
  - Implementation Cost: $15,286,399
  - 5 Years of O&M: $12,077,826
- Benefits:
  - Allocated resources used to support O&M and enhancements resulting in lower long-term costs
  - Address new regularity requirements faster (no amendments required)
- Risks:
  - High degree of customization needed which drives up cost and timeline to implement.
  - Time to complete the project may increase because same resources provide operations support for these specific State software applications
  - Other higher priority project may affect the resource availability to support the project and extend project timeline.

Alternative 5: Build – Basecamp Development (Not Selected)

- Description: Using external contracting resources to build (writing code) a system that would meet all your requirements to do work, run reports and track clients.
- Implementation Duration: 54 months
- Total Cost: $29,101,831
  - Implementation Cost: $17,024,005

  - 5 Years of O&M: $12,077,826
- Benefits:
  - Allocated resources used to support O&M and enhancements resulting in lower long-term costs
  - Address new regularity requirements faster (no amendments required)
- Risks:
  - The following activities increase cost and duration:
    - High Customizations
    - Contract resource turnover
    - Contract administrative support
  - Same resources used to support project and O&M which may result in project delays.

Alternative 6: Build – Transfer Technology State (Not Selected)

- Description: Acquire other state solution and have OIS customize solution
- Implementation Duration: 66 months
- Total Cost: $29,703,015
  - Implementation Cost: $17,625,189
  - 5 Years of O&M: $12,077,826
- Benefits:
  - Solution already built and in production with “lessons learned”
  - Ability to share knowledge and compare reports with other state organizations
- Risks:
  - Longer duration and higher cost
  - May have to customize software because of state laws, process differences
  - May require State to purchase other integrated software not currently owned.

4.8. Cost

The below implementation cost analysis and 5 years of O&M includes a breakdown for each alternative by the following categories:

- **Program Resources** are the Behavioral Health program subject matter experts
- **Program Support Resources** are the Business Analysts working with the program subject matter experts. Resources are from the Compass Support team within Oregon Health Authority and Covendis Contractors.
- **State Resources** are the technical resources such as technical manager, project managers, project coordinator, security analyst, DAS procurement services, and OIS Business Operations.
- **Vendor Resource** is for a Quality Assurance vendor.
- **Software** for developing the technology solution (W) MSDN Visual Studio, (W) Visio x 5, (W) Password Agent, (W) Toad, (W) Beyond Compare (W) XML Tool,
- **Hardware** are servers that are currently hosted at the Data Center Services (DCS)
- **DCS Operations** is the service cost for hosting the technology solution.

Implementation Cost and Duration Summary:

COMPASS Modernization Alternatives High Level Cost and Duration Estimates Summary (50%+/-)

	Implementation

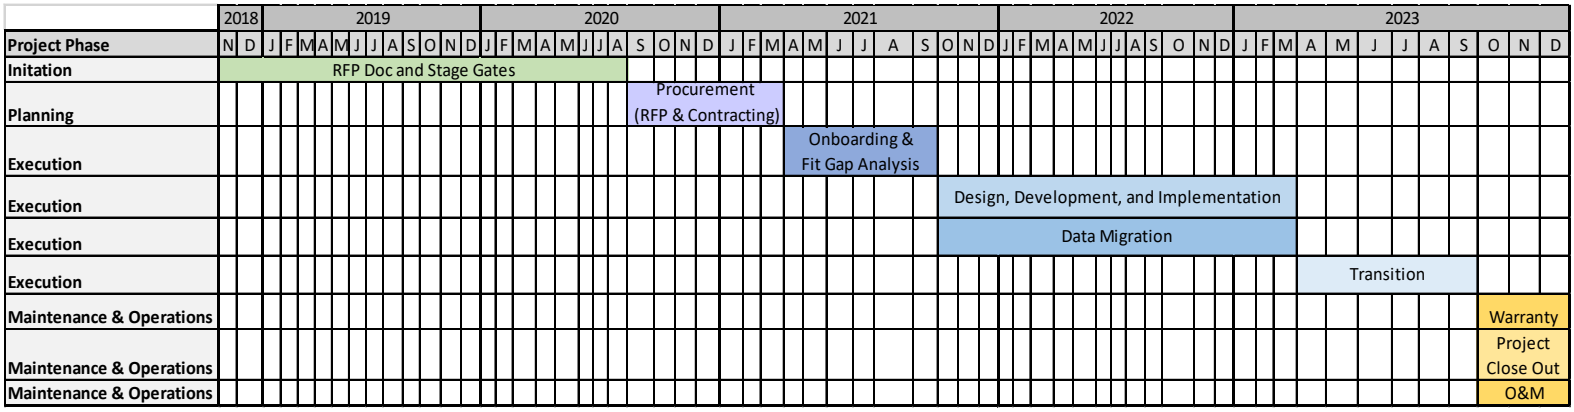
4.1. Timeline

Below is a high-level estimate of the project schedule, and a narrative description of the key activities in each phase.



Stage/Phase	Key Tasks	Description	Timeline
Initiation	• Set up Project • Secure Planning Funds • Create current state process maps and reports • Create solution requirements • Create business case • Market research and alternatives analysis • Develop RFP and secure approvals • Secure Stage Gate endorsement	OHA is required to provide complete and accurate data to meet mandatory reporting requirements at the federal and state level. The agency is required to make available information related to Substance Abuse and Mental Health Services Administration (SAMHSA) Block Grant, U.S. Department of Justice (USDOJ) Performance Plan, Oregon State Police reporting to the NICS database for background checks OHA's main goal with this project is to choose a data vendor that ensures the best overall return on investment. OHA is developing an RFP that outlines the minimum necessary requirements and will help staff evaluate proposals.	November 2018 —August 2020
Planning	• Post RFP • Review proposals • Select vendor • Execute new contract • Finalize Budget and Schedule • Secure Implementation Funding	This phase will see the review and selection of a data vendor based on the proposals received. A new contract will be executed that outlines tasks and deliverables to be supplied to OHA.	September 2020 – March 2021
Execution	• Onboard Vendor to access Project Site • Complete Fit Gap Analysis	Starting in April 2021 the new data vendor will start delivering tasks and products outlined in the new contract.	April 2021 – September 2023

Stage/Phase	Key Tasks	Description	Timeline
	• Transition data from DCS to new data vendor • Monitor kick-off tasks and receive deliverables from new vendor • Quality test new data vendor and its processed data • Monitor transition activities and artifacts such as Finalize Implementation Plan, Transition Plan, User Manuals, Disaster Recovery Plan, Training Plan, etc.	Starting in October 2021 vendor will work with DCS to transfer historic data and processing it using data vendor's methodology. MOTS will continue to collect, load, and process current data submissions until March 2023 which will also eventually be transferred to the new data vendor. During this phase, OHA will be working with the new data vendor to ensure that historic and current data are being transitioned and processed appropriately.	
Project Close	• 90 Day Warranty Period • Lessons learned • Project closeout activities • Start O&M phase of new contract	OHA will embark on evaluation of the project and document successes, failures, and lessons learned and transition to O&M support.	October 2023 – December 2023

4.2. Funding

The project has secured $1.8 million of funding for the Compass Modernization project already; however there are still some decisions that will be made by Legislative in February 2021 short session to obtain the balance of the funds needed for biennium 2019/2021.

Funding sources include:

- General funds - $1.5M

Implementation funds for the project will be requested in a new POP for session 2021/2023.

4.3. Critical Success Factors

For Initiation, success will be measured by:

- Approval of the business case and risk assessment
- Obtain necessary program approvals
- Secure funding
- Completion of RFP
- DAS OSCIO Stage Gate 1 and 2 endorsement

For Project Planning, success will be measured by:

- Release of RFP and selection of vendor
- DAS OSCIO Stage Gate 3 endorsement
- Execution of new contract for implementation and 5 years M&O

For Project Execution, success will be measured by:

- Transfer of data from DCS is completed with minimal disruption of service to data submitters, OHA, and data users
- All functionality and other requirements described in contract Statement of Work are delivered and approved by OHA in timeframe outlined
- All test exit criteria have been met
- Data submitters are able to submit data with the new technology solution, as necessary.
- OHA has full access to data as outlined in the requirements

For Overall Project Phases:

- Project scope met, within 15% +/- approved budget and schedule.

Long term project benefits will be measured by:

- 95% of the time completing SAMHSA reports on time.
- 100% of the time completing OHA dashboards and standardized reports on time.
- 100% of existing manual reports will be automated or eliminated and also meeting the "Must have" requirements.
- More reliable data – measured by number of data issues identified from current MOTS quality assurance reports.

5. Conclusions and Recommendations

5.1. Conclusions

OHA is currently attempting to aggregate data from seven behavioral health reporting systems, including at least three legacy systems and one system designed for reporting on a different funding mechanism than the one currently in use by the agency. The disparate systems further complicate data validation. It is impossible to correlate provider licensing and contracting requirements with treatment outcomes thereby ensuring value for the payment of contracted services. The current administrative burden for providers and OHA staff creates inefficiencies and puts the agency at risk of providing inadequate services to clients and providers, risks losing providers and staff, and risks the agency's image and funding.

A comprehensive analysis of the agency's business need is required with the expectation of creating and implementing a system designed to be flexible and aligned with the enterprise technology vision. This work will create efficiencies for providers and agency program staff; free the agency from committing OIS staff to the maintenance and operations of expensive and outdated systems; allow the agency to meet state and federal requirements to maintain funding; and improve both service delivery and budget forecasting.

5.2. Recommendations

Acquire or construct a technology solution for behavioral health reporting that allows the agency to interface with multiple systems currently in place. This would include:

1. Meeting with Behavioral Health leadership to understand the future vision for behavioral health services in order to promote and align systems work with business vision.
2. Collaborating with business teams on business process improvement and documentation of processes related to contracting and reporting.
3. Collaborating with Behavioral Health teams to define required reporting data for evaluation of contract fulfillment and agency metrics around successful service recipient outcomes.
4. Collaborating with HPA and HSD teams to define reporting requirements for SAMHSA.
5. Collaborating with teams in HPA and HSD to standardize data field definition for entry into the data warehouse and aligning those with contract specifications.
6. Assessing existing “out-of-the-box” systems for suitability for agency use and making recommendations.
7. Assisting with the creation of RFP and scoring model or project plan for procurement of resources if custom build.
8. Assisting with procurement of goods or services to complete project.
9. Assisting with the development of internal and external training resources for successful launch of the new system and business processes.

5.3. Consequences of Failure to Act

Failure to conduct a wide-ranging upgrade of the COMPASS systems and related business processes will result in devastating impacts to Oregon’s most vulnerable population including:

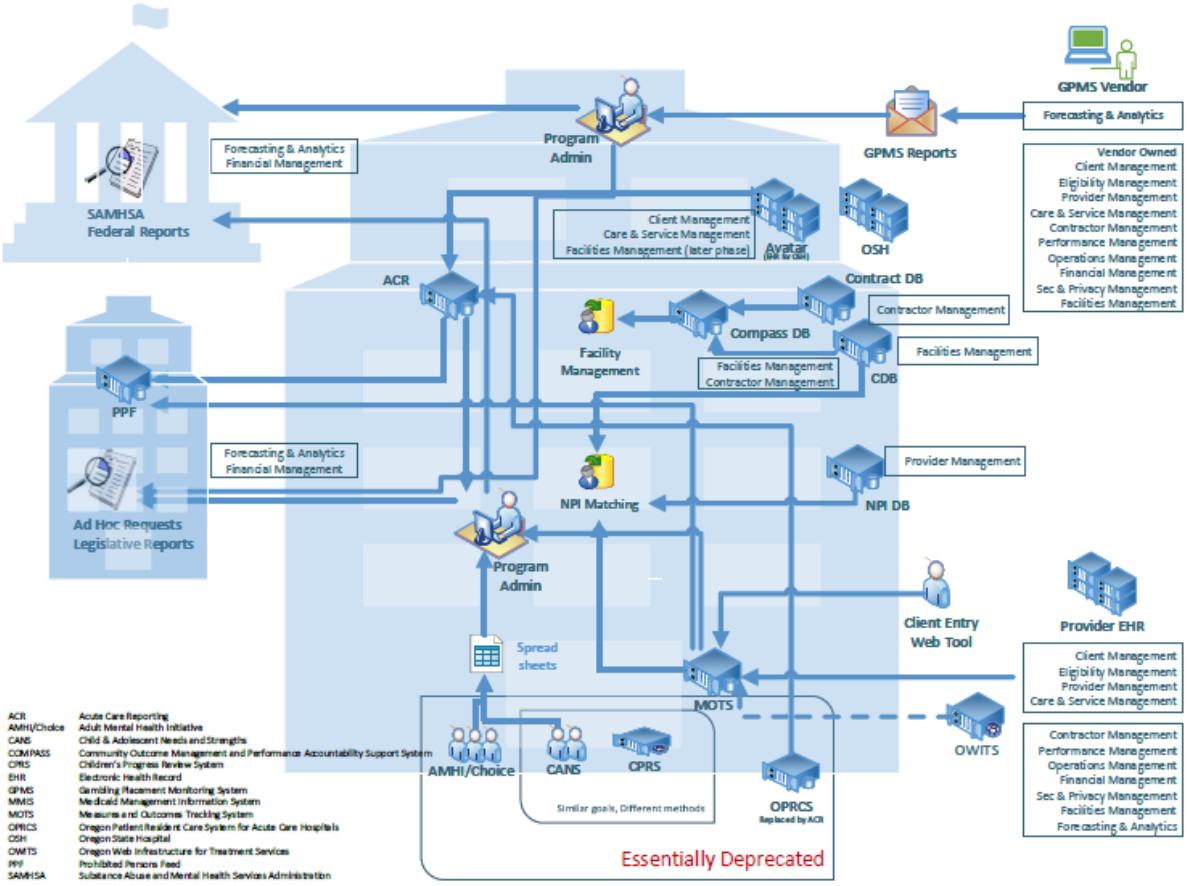
1. Poor coordination of care between facilities and providers
2. Delay or failure to receive treatment or services
3. Increased length of hospital commitment
4. Potential for civil rights violations

Without a change to the current behavioral health data systems, challenges to the State and its external partners will continue to compound in the following areas:

1. Increased administrative burden for CCO’s and other behavioral health providers
2. Lack of compliance with legal and federal requirements
3. Lack of IT staff resources to support outdated and ineffective data systems
4. Loss of state and federal funding
5. Loss of public trust

6. Appendixes and References

Appendix A – Current Business System Areas Supported



Appendix B – COMPASS Task Force Report

The 2017 COMPASS Task Force report is provided externally to this business case.

Information Technology Investment Description (What is being proposed and why):

Summary:

COMPASS (Community Outcome Management and Performance Accountability Support System) is a collaborative information technology approach to the administration, planning and monitoring of Substance Use Disorder and Mental Health treatment programs. The purpose of COMPASS is to provide software that directly interfaces with a variety of internal and external data systems and electronic health records systems and provides multi-functional reporting to support OHA, treatment providers and state and federal stakeholders. By aligning business processes and data, the system will facilitate cooperation and collaboration between stakeholders and improving reporting of, and access to contract and encounter information securely and in compliance with HIPAA and 42CFR regulations.

The current COMPASS applications are running on a mixture of platforms and languages. All are outdated and in need of upgrading or decommissioning. The underlying data storage for the applications is insular, outdated, and expensive to maintain. The current database design contains some gaps in which referential integrity has been compromised, creating data quality issues. These data design issues have been masked by their current applications, creating a heavy reliance on these applications to provide the necessary context for the data. This makes integration and reporting from the data difficult, inaccurate, and time consuming.

Modernization of the COMPASS universe would significantly improve interoperability of OHA's data systems and could be leveraged across numerous program areas. The current lack of integration with other state data systems creates additional workload for service providers and OHA personnel who must manually perform required tasks outside of those systems to meet agency, state, and federal reporting requirements.

The COMPASS modernization project supports the following initiatives, missions and strategic technology plans by ensuring efficient data collection, management, system integration, and data reporting on behavioral health service outcomes for Oregonians.

1. Governor's Executive Order 18-01: Building Oregon's commitment to addiction prevention, treatment, and recovery priorities, and setting deadlines for statutory requirements, and declaring a public health crisis.

2. Health and Human Services Agencies Information Resource Management 2017-2019, Governor Brown's Strategic Initiatives for Healthy, Safe Oregonians:
    a) Ensure that every Oregonian who needs alcohol and other drug treatment or mental health services can easily get it.
    b) Ensure all Oregonians have equitable and appropriate access to affordable, high quality health care.
    c) Keep communities safe through mindful law enforcement and using data and analytics to balance accountability, reformation and treatment in order to reduce recidivism and prevent future victimization.

3. OHA Mission: Helping people and communities achieve optimum physical, mental, and social well-being through partnerships, prevention and access to quality, affordable health care.

4. DHS/OHA Strategic Technology Plan:
    a) Provide Trusted Services for accurate health care outcomes data by effectively collecting, maintaining, and organizing information to enable informed decision-making and support internal and external data sharing.
    b) Enable Business Automation via workflows and business rules, reducing manual, paper-based processes while increasing effectiveness.
    c) Enable Connectivity Anytime, Anywhere, in Multiple Ways by providing self-service, role-based capabilities with remote access to information meeting the diverse needs of staff and partners.
    d) Use Dynamic Services Supporting Dynamic Needs by supporting provider modular, common services and capabilities, which promote agility, reuse, and best practices leveraging enterprise capabilities.

Improved data collection and standardization in the COMPASS systems would allow the agency to improve reporting on outcomes, expenditures and contract compliance as well as collaborate with providers to track the implementation and effectiveness of services, identify service gaps, predict the specific timing of service needs, and better request and allocate funding to facilitate individual's progress through the system.

Problem Definition:
With Oregon's Health Care Transformation, the introduction of Coordinated Care Organizations (CCOs), and investments in Electronic Health Record (EHR) systems, the current data environment does not allow for data integration to meet the need for reporting on treatment outcomes and investment efficiency. Many of the COMPASS systems were designed to measure outcomes based on a different funding model from the model currently in use. In addition, the system requirements and data elements were not fully defined in the original build.

In 2017, the OHA COMPASS Task Force identified issues with disjointed and siloed data from systems for HSD Contracting, Licensing and Certification, and Client Outcomes. Additional operational deficiencies were noted in the following areas of the COMPASS universe:

1. Contracting process, tracking, and enforcement are not integrated with data systems;
2. Subcontractors cannot be identified in collected data;
3. Provider licensing and certification is not integrated with current data systems;
4. Data systems lack defined relationship and correlation between data elements;
5. Missing data elements in collection and reporting process;
6. Difficulty assessing if contracted services are provided in compliance with contract.

The lack of integrated behavioral health treatment data exposes the State to potential federal litigation related to violation of an individual's second amendment rights. Recent reviews and process changes at OHA determined that COMPASS systems are not receiving and maintaining sufficient documentation to support data being provided to Oregon State Police (OSP) for the National Instant Criminal Background Check System (NICS). A scheduled audit in June 2018 by the Federal Bureau of Investigation (FBI) could result in penalties or sanctions against the agency for failing to address the flawed data systems.

Further, OHA is unable to conduct mandated state and federal reporting. OHA and our partners at DHS continue to fall short of the expectations of advocates by failing to meet the needs of transitioning clients; this leaves the agency with continuing risk of additional investigation and potential litigation. OHA remains unable to adequately forecast service need or coordinate treatment for individuals entering and leaving the state hospital. *Olmstead v. LC*, a US Supreme Court ruling, requiring states to ensure that persons with disabilities receive services in the most integrated setting appropriate to their needs. Inability to appropriately forecast need for state hospital resources puts the agency at risk of losing needed budget and Oregonians at risk of inadequate care.

The COMPASS data systems lag behind OHA business partners who are further down the integrated systems path. The file structure and business process is a couple of generations behind the EHR industry and has proven challenging for some partners to provide data to OHA for that reason. Separate work flows are required for COMPASS data applications as they do not compliment or integrate with normal EHR operations.

The current Health Systems Framework applications are running on ColdFusion, which is no longer supported by the vendor. The underlying data storage for the COMPASS applications resides in several DB2 databases running on AIX servers, which are outdated and expensive to maintain. The current database design contains gaps in which referential integrity has been compromised, creating data quality issues. These design problems have been masked by the application, creating heavy reliance on the application to provide necessary context for the data.

The tightly-coupled relationship between the database and the application makes improvement and integration projects more difficult because it restricts the developer within the confines of both an aging toolset and a flawed data model. This data model makes integration with other systems and utilization of the data for reporting by Business Objects and other reporting engines more problematic. As new projects are undertaken using the tightly-coupled architecture in COMPASS, they will become riskier as the number of records and users increase, while the toolset falls further out of support.

Over time, the IT system-related risks will increase as the number of developers knowledgeable in older Cold Fusion/DB2 development projects dwindles, and it becomes a specialty realm for contract support. Add to this the growing number of retiring mainframe, Rbase and other legacy applications that will need

to be integrated into the Health Systems Framework, and the question of available qualified in-house resources becomes critical going forward.

Opportunity Definition:
Alignment with client need, the ability to track available resources, CCO reporting requirements and the analysis and tracking of behavioral health data across systems will be critical to the successful integration of behavioral health treatment into the CCO environment.

Modernization of the COMPASS universe of systems will:

1. Support the provision of more timely, appropriate, cost-effective services for Oregonians.
2. Reduce the administrative burden on contracting providers.
3. Increase the agency's ability to tie reporting responsibilities to payment.
4. Improve the standardization of data in the agency.
5. Increase the agency's ability to track outcomes.
6. Permit the agency to meet required reporting responsibilities.
7. Develop a standardized reporting system for behavioral health services.
8. Eliminate the use of four to five outdated systems, reducing silos around system maintenance in OHA's OIS team.

The 2017 COMPASS Task Force report provided opportunities including:

1. Replace COMPASS systems to reflect the present continuity of care model and reexamine old business processes.
2. Improve and update business processes to better align with COMPASS systems.
3. Align siloed systems to integrate CCO data into the service delivery environment.

OHA envisions a data management and processing system for behavioral health service outcomes that can hold millions of individual records, directly interface with a variety of internal and external data systems, and electronic health records systems, and provide multi-functional reporting to support state and federal requirements. Additionally, the work is expected to support improved treatment outcomes for Oregonians through the exchange, analysis and reporting of data; support improved business practices and reduced administrative burden for OHA through the ability to better analyze and forecast outcomes and need; and support improved customer service and reduced administrative burden to providers.

The project and resulting system should provide a variety of business support functions including the following:

1. Compliance with Personally Identifiable Information (PII) Privacy Act;
2. Compliance with Health Insurance Portability and Accountability Act (HIPAA);
3. Compliance with Health Information Technology for Economic and Clinical Health (HITECH) Act;
4. Reduce silos around system maintenance in OHA's OIS team;
5. Increase the agency's ability to tie reporting responsibilities to payment;
6. Improve the standardization of data in the agency;
7. Increase the agency's ability to measure behavioral health outcomes;

8. Reduce the administrative burden on contracting providers and staff;
9. Create integrated and adjustable reports that meet federal reporting requirements;
10. Upgrade requirements for federal and state legislation, rules, and business needs;
11. Migrate data from multiple data collection systems;
12. Streamline and update business processes;
13. Provide ongoing maintenance and support; and
14. Support required functionality for 5 – 10 years.

The redesign of the COMPASS constellation provides OHA with an opportunity to examine and update business process and better align to the agency's current vision and the continuity of care model. Part of this business process alignment will include the interface of provider reporting and contracting requirements, ensuring that the agency is better tracking the services it is paying for and that Oregonians are receiving the benefit of service dollars contracted through the agency. OHA has the opportunity to reduce silos and begin the process of integrating CCO's into the behavioral health service delivery model.

Alternatives:
A complete alternatives analysis has not been conducted for this project.

Assumptions

The Project assumptions identified would include the following:

1. The time required to adequately research, document, design, plan and implement the projects described will be available.
2. The Business understands and can articulate the outcome measures they require.
3. Legislative mandate changes will not significantly affect the Project deliverables.

Solution Requirements

Solution requirements have not been fully defined at this time.

Alternatives Identification

Alternative 1: No Replacement of Existing COMPASS systems

Alternative 2a: Replace COMPASS with solution developed in house

Alternative 2b: Replace COMPASS with solution procured from third party vendor

Alternatives Analysis

No alternatives analysis completed at this time.

Cost

Initial estimates of cost for the COMPASS modernization project is between $4 and $7 million. Work is ongoing to finalize the project scope, after which we will analyze alternatives. Better cost estimates will be available at that time.

OSCIO IT Investment form

POP 414 has been submitted as part of the Governor's budget for the 2019-2021 State of Oregon Budget. The POP requested amount is $6,739,793.

DHS Oregon Department of Human Services

Oregon Health Authority

DHS/OHA Office of Information Services Issue Brief

Enterprise Collection Management System

DHS/OHA – Shared Services: Shawn Jacobsen OFS, Nicky Jeffreys OPAR

Overview

The Office of Financial Services (OFS) is a Shared Service that provides full financial cycle accounting to the Department of Human Services (DHS) and the Oregon Health Authority (OHA). This work is accomplished through a combination of agency-supported program-specific data systems and the Oregon Statewide Financial Management Application (SFMA). OFS supports programs throughout both agencies to identify, invoice, and manage accounts owed to the agencies. Revenue generated from these activities is essential to meeting outcomes for various services and programs throughout the agency.

The Office of Payment Accuracy and Recovery (OPAR) is a Shared Service that provides recovery and collection services to both the Department of Human Services and the Oregon Health Authority. OPAR ensures program integrity by improving payment accuracy and recovering overpayments of both clients and service providers. Funds recovered by OPAR are returned to the various DHS/OHA programs, allowing these funds to be available for current and future clients.

Both OFS and OPAR are working towards a shared goal of identifying an Enterprise Collection Management solution to replace the Integrated Collection Management System (ICM) currently in use by OPAR. This new Enterprise solution would provide the integration needed for both groups to reduce redundant system updates and manual workarounds to optimize their business deliverables and workload.

OFS requests ISMC approval for a solution that will enable the Enterprise Collection Management System to be the primary source system for accounts receivable transactions generated in the new OFS Enterprise Financial system (as identified in the OFS Policy Option Package) for interfacing with SFMA.

OPAR requests ISMC approval for an Enterprise Collection Mangement System that meets regulatory needs, provides improved automation in order to lower costs, and utilizes state of the art technology to assist in settling collections.

Background

OFS: OFS invoices for agency services such as newborn screening, background checks, licensing and overpayments. The billing and account management requests are received through a variety of methods, such as Excel documents, emails, and the use of payment subsystems. Many DHS/OHA programs manage a portion of the receivables process before referring the account to OFS. These requests can be initiated for at any time during the receivables process. The receivables process is as follows:

- Identification of amount owed, notification to debtor (invoice)
- Management of account notices and repayment options
- Adjusting existing receivables
- Referral for collections to the Department of Revenue – Private Collections

Most of these requests are then entered in SFMA manually or through a macro and then invoices, if needed, are manually generated using a template in Excel. Direct payments are received through a lockbox, meaning

checks sent to bank, or credit card transaction. Transfers from other agencies, including the Department of Revenue, are also received. Posting these payments to accounts in SFMA is a manual process.
Ease of payment is challenging at best. Only two options exist to make payments: checks and credit cards. For credit cards, reaching the portal is outdated and does not retrieve current account information. Requests for account balances for those with payment plans must be created manually.

Many DHS/OHA programs extract information from program databases and send it to OFS, creating unnecessary reentry of data. For programs that require updated payment information to manage their business relationships, read-only access is granted in SFMA and account information is relayed back to the program so the account can be viewed. Otherwise, data reports are generated for the program on demand.

The financial accounting of receivables in our agencies' business environment is complicated due to the federal and state regulations, federal matching rates, and required statewide accounting practices.

OPAR: In 2013 when the FICO system contract was created, the Office of Information Services (OIS) team assisted in developing an in-house application that would support OPAR's needs.
The current FICO system is a robust application for which OPAR only requires a portion of the functionality to execute its program deliverables. The system does not effectively support OPAR business needs and some features of the system are more focused towards an agent debt collection system. FICO does not offer auditing or compliance functionality, critical components of OPAR business flow.
The support received from FICO is very limited and is not meeting OPAR business needs. The OIS Solution Development and Delivery team has had to build around the current FICO system to incorporate smaller in-house applications to meet business needs. The FICO system is used by multiple units within OPAR and causes some of these teams having to manage two different systems to complete their work. Workflow duplications within OPAR would include these systems:

- Personal Injury Liens- MMIS
- Estate Administration Unit - MMIS, DSURS
- Overpayment Writing Unit - PIPS

Future Vision and Scope

OFS: An agency receivables system should meet the needs of our business partners, allowing ease of upload and retrieval of information.

The system should enable:

- Single data entry of account information that can be used to generate invoices
- Manage account balances
- Generate reports
- Research history
- The system must allow for entry of account at any point in the receivables process
- Generate reports, documents and templates, as well as management reports either from the system or from a query tool

- Needs to meet all current OFS business rules
- System must interface with SFMA
- System must be compatible with any future agency-wide financial application
- Must meet all statewide reporting needs including counts and reason codes
- Have the flexibility for modification as data needs change
- The accounting rules for the system will be similar, if not identical, for client and provider billings (OPAR and OFS).

OPAR: In partnership with the OIS Solution Development and Delivery team, a new system could be built to meet all the business needs, incorporate all the smaller add ons that were needed due to FICO not meeting 100% of business needs.

The new solution would include these capabilities:

- Amount owed
- Payments
- Sends notices, automatic, OnDemand
- Day to day activities
- Narration – TRACS
- Maintain workload

Other Considerations/Drivers

OFS: DHS and OHA are currently preparing a Policy Option Package request for a planning effort defining the criteria to develop a cross-agency financial system and modernize the underlying technology.

In developing a receivables system, many agency business partners may be interested in interfacing with other regulatory systems to exchange data and meet their strategic objectives.

OPAR: The current contract with FICO has approximately two years remaining is identified as a two-year project. We may possibly need to amend the current contract again to extend the time, which will add additional costs.

The FICO production site is an issue for the following reasons:

- Written in Java J2EE – This is not a good fit for the team to support as they are not versed in this technology and it no longer aligns with current technology strategy of the organization.
- The system is supported in Windows using technologies that do not support Windows as their primary platform, often requiring installation of custom versions/builds into the computing environment.
- We don’t use the same technologies in other supported systems – this is a “one off” in our current environment.
- We were required to purchase and maintain a costly RedHat subscription for the last and all future upgrades.

DHS/OHA Office of Information Services Issue Brief

Enterprise Collection Management System

DHS/OHA – Shared Services: Shawn Jacobsen OFS, Nicky Jeffreys OPAR

- Additional Java licensing will be required for any future upgrades.
- We currently use less than 30% of the existing functionality.
- The Debt Manager product is geared towards private collections. It is moving further away from programming that adheres to governmental needs. Each new upgrade brings with it features that, while useful to other companies, cause additional complications to our agency.
- The older versions of software required for FICO Debt Manager creates technical debt for Shared Services necessitating expensive rework as versions are deprecated.
- The system has poor data entry edits, necessitating OIS to create compensating software outside FICO Debt Manager to help monitor data quality and integrity
- The vendor only provides full support for the current version of Debt Manager. Updates released multiple times a year, OIS staff must constantly rebuild and reinstall FICO Debt Manager in order to upgrade the system and take full advantage of our support agreements.
- Upgrade packages for FICO Debt Manager often contain incomplete, out-of-date, or missing documentation, making updates very risky and error prone.
- Upgrades for FICO Debt Manager have a high degree of complexity, since FICO Debt Manager bundles over two dozen 3rd-party software products (both commercial and open-source) that are needed to operate the system.
- FICO only provides bug fixes for previous versions of FICO Debt Manager in extraordinary circumstances.
- FICO introduced a new, vendor-owned rules engine (Blaze) into the product with our most recent upgrade replacing a previous, 3rd party rules engine. This required the agency business rules to be rewritten to the new product.
- FICO had issues providing training on the new rules engine to agency staff. The agency had to pay FICO for conversion of the rules to the new engine since training could not be provided.
- FICO has not been able to provide bug fixes or mitigations for all issues that have been discovered in FICO Debt Manager. As a result, some issues have remained open with FICO for multiple years, with currently very little expectation of resolution.
- FICO does not have a normal practice of communicating known bugs and issues to customers. When the agency discovers a bug or other issue, some of these are only communicated as previously known issues after a support ticket has been opened and potentially charged to the agency.
- The agency currently has 5 outstanding product modification requests for FICO Debt Manager that date back to 2013.

Proposed Approach, Actions and Outcomes

The proposed approach for this request is to develop a new Enterprise Collection Management System that supports an updated and integrated modular solution to address the needs of OFS and OPAR, to meet regulatory needs, and adhere to business rules. If ISMC approval is reached, this request would be reviewed for approval at the DHS Technology Council for prioritization for OIS resource assignment.

DHS/OHA Office of Information Services Issue Brief

Enterprise Collection Management System

DHS/OHA – Shared Services: Shawn Jacobsen OFS, Nicky Jeffreys OPAR

Estimate for Proposed Action

Estimating this project to span over a two-year timeframe, utilizing the resources below +/- 100%:

Technical Resources:

- ISS8 Architect, fully loaded – 10% Team Lead and COLA included for 24 months = $342,502 Hourly = $82.33
- ISS8 Developer, fully loaded – top step with COLA included for 24 months = $308,256 Hourly = $74.10
- ISS7 Developer, fully loaded – top step with COLA included for 24 months = $291,393 Hourly = $70.04
- ISS7 BA/Developer, fully loaded – top step with COLA included for 24 months = $291,393 Hourly = $70.04
- PM3 at 90%, fully loaded – top step with COLA included for 24 months = $267,387.00 Hourly = $71.42
- PM1 at 50%, fully loaded – step 2 with COLA included for 24 months = $91,684.00 Hourly = $44.08
- **Total = $1,592,615.00**

OPAR Business Resources:

- Revenue Agent 2 – Tester
- Operation & Policy Analyst 2/ICM SME – 85%
- Operation & Policy Analyst 2/ICM SME – 75%

Estate Administration Unit:

- Administrative Specialist 1 LW – 15%
- Compliance Specialist 2 LW – 15%
- Compliance Specialist 3 LW – 15%

Personal Injury Liens Unit:

- Compliance Specialist 2 – 15%
- Administrative Specialist 1 – 15

OFS Business Resources:
Systems

- Operations and Policy Analyst 3/Systems SME – 85%
- Accountant 2/Systems SME – 85%

Accounts Receivable

- Accountant 3/AR SME – 75%
- Accountant 2, tester
- Accountant 1, tester

Receipting

- Accountant 3/Receipting SME – 75%

1 Business Case Executive Summary

1.1 Overview

The purpose of the Oregon Department of Human Services (DHS) OregONEligibility Integrated Eligibility & Medicaid Eligibility (ONE IE & ME) Project or, the "Project," is to extend the Modified Adjusted Gross Income (MAGI) Medicaid enrollment and eligibility determination functionality to include Non-MAGI Medicaid, Supplemental Nutrition Assistance Program (SNAP), Temporary Assistance for Needy Families (TANF), and Employment-Related Day Care (ERDC). Combining these disparate systems into a single, integrated solution, will create a seamless end-to-end service offering with multiple access methods for eligible enrollees. This new system will also provide checks and balances to ensure that Oregonians who qualify for benefits receive accurate and timely payments, and to ensure that those who don't qualify for services do not receive benefits.

This business case update is intended to articulate changes in Project scope, schedule, and budget to inform the Project Team, governing bodies, stakeholders, and decision-makers of changes that deviate from prior versions of this document.

The last iteration of the Project schedule indicated completion of design, development, and implementation (DDI) on Non-MAGI Medicaid, SNAP, TANF, and ERDC in June 2019. This update describes an extension of this timeline to commence Pilot implementation in late August 2019. The Pilot implementation will be deployment of the new system to both Jackson and Josephine Counties, followed by a statewide roll-out in three waves that will be completed in late July 2020. This added duration of the Project was the combined result of extending System Integration Testing (SIT) from two months to five months, extending User Acceptance Testing from four months to six months, extending the Pilot phase from three months to five months, adding a one-month stabilization period after each of the three roll-out waves, and increasing the number of data conversion mock runs from three to five.

As many of the System Integrator (SI) Deliverables were shifted from the 17-19 biennium to the 19-21 biennium, the Project Team is estimating an ending balance for this biennium to be approximately $30 million, with a Project spend of approximately $165 million vice the budgeted $195 million. The Project Team is estimating the need for $144 million in the 19-21 biennium for data conversion, testing, and implementation, and an additional $44 million for Maintenance and Operations (M&O) and enhancements after Project close.

With the expiration of the OMB A-87 cost allocation exception in December 2018, the Team is projecting the Federal portion of this $188 million for the 19-21 biennium to be approximately $134.8 million. If approved, the State funding will consist of approximately $39.2 million in bond sales and approximately $15.6 million General Fund.

1.2 Background

In January 2015, a project was initiated to modernize MAGI Medicaid eligibility determinations and enrollment. This was called OregONEligibility, or simply the "ONE" system. This system development was approached by utilizing code similar in desired functionality from the State of Kentucky, which they call *kynect*.

In June 2015 during the ONE system Design, Development, and Implementation (DDI), House Bill (HB) 2219 was signed into law. This bill directed DHS to convene a work group with staff

DRAFT

from human service agencies, including: The Housing and Community Services Department, the Oregon Health Authority, the Department of Education, the Employment Department, the Office of Child Care (inside the Early Learning Division), and the Higher Education Coordinating Commission, as well as, the State Chief Information Officer and other individuals who the department deemed necessary. The work group was to study how to create a consolidated application process for residents of the state to apply for and obtain assistance in accessing food, housing, medical care, education, employment services, child care and other social services. The work group was tasked with developing and submitting a recommendation to the Legislative Assembly by September 15, 2016.

In December 2015, the ONE system was placed into production. Also in December 2015, version 1.1 of this business case was submitted to the Office of the State CIO (OSCIO) and to the Legislative Fiscal Office (LFO). It was this version of the business case that received Stage Gate 2 endorsement to continue planning to extend the functionality of the ONE system to include Non-MAGI Medicaid, SNAP, TANF, and ERDC programs. A copy of business case v1.1 is attached as Appendix D.

In August 2016, an update to this business case, version 2.0, was submitted to the OSCIO and LFO, and was used to obtain Stage Gate 3 approval to commence execution of the new ONE IE & ME Project. Again, the software development methodology was to capitalize on additional code from the State of Kentucky they had used to assimilate similar programs. Kentucky called this integrated eligibility system *benefind*, which they have shared with the State of Oregon. A copy of business case v2.0 is attached as Appendix E.

Also in August 2016, the Project Team reported back to the Legislative Assembly on HB 2219 with recommendations including the development of a single application for financial eligibility for the Department of Human Services (DHS) and Oregon Health Authority (OHA) programs. Consolidating the application process for multiple programs among two large state agencies was an incremental step in the vision towards a single application for all health and human service programs. A copy of this report is attached as Appendix F.

In late 2016 and early 2017, the pace of the Project slowed while there were leadership changes at the Director level in both DHS and OHA, and with the Independent Project Director (IPD). In March 2017, a Memorandum of Understanding (MOU) was signed by Agency Directors and by the State CIO to jointly govern the Project as the Joint Governance Board (JGB). In May 2017, the Project Team received go-forward authorization from the Executive Steering Committee (ESC) and the JGB. It was soon thereafter that negotiations commenced to update SI and QA contracts. These Amendments are now complete (pending federal approval of the QA Amendment) and the Team has re-baselined the Project's scope, schedule, and budget accordingly. These Amendments effectively pushed the Production Pilot and roll-out to September 2019, completing implementation across the State in July 2020.

1.3 Problem Definition

This Project is about serving the most vulnerable of Oregonians in their times of need. Oregon, like most of the nation, has continued to work through the cyclical nature of recessions and budgetary uncertainty. Most of the financial benefits DHS and OHA provide to Oregonians is off-cycle. When the State is in a recession and budgets are tight, DHS and OHA often require more funding to provide safety net and stabilization services for Oregonians. This balancing can place strain on any system.

Oregon is also continuing to grow both in age and in the general population served. Since 2010, Oregon has experienced a 3% per year growth rate over the national average in the population over the age of 65. Oregon's total population has grown by 1.6%. Like previous years, the majority of this growth (88%) is coming from people moving or migrating to Oregon.

DHS and OHA have seen policy shifts with the implementation of MAGI Medicaid, Cover All Kids, and other program policy changes which continue to provide opportunities for more individuals to receive services. In parallel with this population growth, the complexity of the rules and those served continues to grow. DHS and OHA serves over a million Oregonians through Medicaid, which has multiple programs with different rules about how to determine income, what sources to use, what to include, what to look at, and when to look at it. Family dynamics continue to change, with more and more multi-generational family groups and cases where parents and children can be in multiple households and geographic locations.

DHS and OHA staff currently use multiple systems for eligibility determination for Medicaid, SNAP, TANF and ERDC benefits. Eligibility data are often duplicated within multiple, disparate systems and are not easily shared between these systems. As such, eligibility determinations are not made in a standardized and timely manner and, in some cases, an individual's data needs to be manually entered in more than one system. There are currently few checks and balances across systems to ensure those who are eligible for benefits receive them and, conversely, those who are not eligible don't receive benefits. Some of the systems were designed and implemented in the 1970s and early 1980s. Many have been repeatedly modified from their original format to address the vast number of eligibility, service authorization and payment changes that have occurred over the decades following initial release. Business process improvements have been stifled because of keeping these antiquated systems operational and in compliance with policy changes.

These factors lead to issues with accuracy and access. Oregonians today must go to multiple offices to apply for the same benefits. They provide verifications to multiple sources and are often confused about who needs what, who has shared what, and what their next steps are. While Oregon has continued to remain below the national average for errors in traditional Medicaid systems and the SNAP program, there have been increasing quality control issues causing public discussions on the accuracy of Medicaid determinations. The latter has been an issue of trying to coordinate between IT systems and various agencies to solve who is providing which services and where an individual is being served, causing issues around capitation and reimbursement.

Over the last two years, DHS leadership have heard from staff, advocates, and community members the words, "I don't know". This includes families in crisis looking for services, who cannot answer a question about who they are working with. They receive letters from multiple local offices and messaging from various systems, all directing them to either call, come in, or go on-line. This leaves Oregonians confused, unsure of benefits, afraid of failing or taking the necessary steps to become more self-reliant, or to leave an abusive situation because they don't know what is available, who to talk to, or where to go for help. Staff have also complained about having to say, "I don't know." During the roll-out of MAGI Medicaid, over 1,000 Oregonians a month would come into DHS offices to ask about their MAGI benefits. Some Workers couldn't see into the ONE system, and many of them had their access to MMIS removed because they were not considered a covered entity. This created a system where

DRAFT

workers would have to say, “I don’t know,” and place the Oregonian on hold for long periods of time, or needing to fax information to the branch processing MAGI Medicaid.

1.4 Opportunity Definition

The ONE system is currently being used to process eligibility determinations for MAGI Medicaid. Oregon has taken the opportunity to extend ONE for eligibility determinations of additional programs by utilizing updated code from the State of Kentucky called *benefind*. Additionally, the Office of Management and Budget (OMB) circular A-87 exception to cost allocation rules was extended by CMS from December 2015 to December 2018. This provides the State of Oregon the opportunity to provide enrollment and eligibility determination services with a single, integrated system utilizing enhanced federal funding for much of the Project cost.

ONE IE & ME SYSTEM	6-Year TCO			Funding Sources		
	DDI	M&O	Total	Federal	State GF	Bonds
15-17 Actuals	33.6	0.0	33.6	28.5	0.5	4.6
17-19 Projected Actuals	164.7	0.0	164.7	148.0	2.3	14.4
19-21 Budgeted	146.0	43.6	189.6	134.8	15.6	39.2
Total Project Cost	**344.3**	**43.6**	**387.9**	**311.3**	**18.4**	**58.2**

DHS and OHA serves over 1 million Oregonians through the Medicaid program. These agencies also serve over 308,000 kids, over 81,000 Children’s Health Insurance Program (CHIP) kids, over 20,000 Foster Medical kids, over 128,000 aged, blind, or disabled Oregonians through traditional Medicaid, and an additional 420,000 adults or parent-caretaker relatives through MAGI Medicaid. On top of this is an additional 41,000 Citizen/Alien-Waved Emergency Medical (CAWEM) individuals, and over 150,000 Oregonians receiving assistance with their Medicare through a Medicare Savings Program, including Dual Eligible individuals. Each of these systems are requiring more complex logic to determine what information to accept and when. This requires worker intervention at an increasing rate.

Beyond Medicaid, there is SNAP, TANF, and ERDC which serve approximately 400,000 Oregonians. In a calendar year, DHS and OHA will serve approximately 1.6 million Oregonians, with individuals coming on and off programs, processing around 2.1 million applications each year. Over 65% of these individuals are applying for multiple programs.

Applicants must apply to multiple offices with multiple workers through various channels, and must provide the same information over and over, which is then stored in different systems that don’t interoperate well. By integrating our systems and service delivery model, Oregon has an opportunity to coordinate benefits. These benefits are currently calculated manually. Workers take information and put it into various systems. There are over 30 Legacy systems needed to complete the work related to these programs, followed by manually determining which exclusions to apply, what benefits should be associated, what the outcome is, and what notices to be sent.

While Oregon has had relatively high accuracy rates in contrast to national averages, moving into a system with automated rules provides opportunities for DHS to work on standardization and coordination to limit the risks identified.

The greatest opportunity is that DHS will be able to better serve Oregonians. Any integration of systems is difficult but with the integration of enrollment and eligibility systems, there will exist standardized processes to apply for Medicaid, SNAP, TANF, and ERDC. Oregonians will be able to apply online or in an office, provide changes and updates from their homes, and see a single coordinated output of what benefits they are eligible for. They will be able to talk to workers who will be cross-trained on programs and able to view information from a single system for most of the financial eligibility benefits individuals are applying for. DHS and OHA will have an updated platform that can conform to federal and State expectations, and allow for opportunities over the next decade to increase automation and access for Oregonians in ways that cannot be offered today. Ultimately this solves the greatest problem and provides the greatest opportunity for eliminating an answer of, “I don’t know.” A single system, a coordinated approach to eligibility, and a stable platform of care for Oregonians that is about serving them in the way they want to be served, will allow us to focus on accurate and effective customer service for some of the most vulnerable Oregonians.

1.5 Alternatives Analysis

Both business case versions 1.1 and 2.0 explored the four Alternatives identified below:

1. Implement Non-MAGI Medicaid Eligibility Determination into the ONE System
2. Implement Integrated Eligibility Determination into the ONE System
3. Acquire External Eligibility Determination Services from another State
4. Do Nothing

Alternative #1 was originally estimated to cost $80.3 million and conclude in December 2018. Additional costs would be incurred now because the *benefind* code would have to be reworked to eliminate the functionality associated with SNAP, TANF, and ERDC. There would be the loss of a significant investment already made in terms of fit-gap, design, development, and human resource to incorporate these additional programs into an integrated system.

Alternative #2 was selected in both cases and the Project Team proceeded accordingly. Given that this Project is now approximately 35% complete, with initial system design nearly complete, and with code development in progress, there is significant risk and cost associated with each option that deviates from the current course, or Alternative #2.

Alternative #3 is not a viable option as there are no service models across the nation that support Oregon acquiring services from another State.

Alternative #4 would require continued spending for Project shutdown activities and vendor contract resolution but the cost of system design and development would be stopped. This Alternative would likely prompt several federal audits that would jeopardize current program funding streams until complete. Oregon would likely be required to pay back federal funds expended to date. Overall, this is the least desirable Alternative of those identified.

DRAFT

1.6 Conclusions and Recommendations

Continuing with Alternative #2 DDI is the best option at this stage of the Project. It is supported by agency leadership and Project governance. Given the ONE system as a stable base to build from and the shared code from Kentucky (*benefind)*, the methodology employed has been proven successful, using the ONE System as an example. With continued availability of enhanced federal funding, timing is right to offset significant Project cost ($282.1 million federal funding of the estimated $342.1 million total Project cost). The Project Team can now also manage the Project against a solid and actionable scope, schedule, and budget. Failure to act now on this opportunity would have significant adverse effects, such as:

- Service delivery would continue in the current model, meaning the same frustration with the system from end-users and clients would persist, as well as error rates and lack of checks and balances.
- There would be a loss of federal funding and it is likely audits would be triggered.
- There would be a loss of confidence in the State's ability to execute a modernization program.
- There would be damage to the reputation of the State of Oregon.
- There may be accompanying increases in operational costs because of lost federal funding and continuing to operate antiquated systems.
- There would be a loss of the investment already made in delivering intended functionality to Oregonians.

The Project Team is highly recommending continuation of Project execution in alignment with Alternative #2. Cost detail for this Alternative can be found in the Project Budget attached as Appendix C.

DRAFT

2 Background

2.1 Current State of DHS Eligibility Work

Most of the systems supporting DHS eligibility determination processes were designed and built in the 1970s and early 1980s. Many of these systems have been modified repeatedly to address the vast number of eligibility, service authorization, and payment rule and policy changes that have occurred since then.

2.2 MAGI Medicaid Eligibility Operations

2.2.1 Kentucky Transfer System (*kynect*)

In 2013, Kentucky's Cabinet for Health & Family Services (CHFS) embarked on an ambitious information technology (IT) modernization program to replace a collection of legacy systems that supported Health and Human Services programs. The cabinet's goal was to modernize IT solutions to improve delivery of services and increase worker productivity while maximizing the funding opportunities available from the Affordable Care Act and CMS 90/10 funding. The modernization program, called Kentucky Connect (kynect) included implementation of a state-based Health Insurance Market Place, an eligibility and enrollment system for MAGI Medicaid applicants, and several other enterprise IT capabilities. Kentucky will realize the following outcomes as a direct result of the modernization program:

- *Streamlined Field Operations*– Increased worker productivity, simplified process steps, reduced case processing cycle times, and reduction in total administrative costs of delivering benefits.
- *Transformed Service Delivery* – Transformed service delivery, providing multiple channels of access (walk-in, online, mail, call centers, fax, mobile, imaging, etc.), and interactive processing across geographic units.
- *Program Compliance and Monitoring of Fraud and Error* – Flexibility for worker performance while maintaining strict adherence to program mandated compliance through checkpoints and controls for measurement and proactive response.

As Oregon's designated Medicaid agency, OHA recently implemented a new system for MAGI Medicaid eligibility determinations. That system is called OregONEligibility, or ONE, and is the result of the State of Kentucky sharing the *kynect* code base with the State of Oregon. Originally built by Deloitte Consulting, *kynect* operated as the MAGI Medicaid eligibility determination system of record for more than a year before OHA signed an agreement with the Kentucky Cabinet for Health & Family Services to share their code and associated documentation with the State of Oregon. Oregon then performed a Fit-Gap analysis on Kentucky's code in relation to Oregon's needs. The transferred code was modified as necessary and is now operating as a production system in Oregon's State Data Center. The ONE system will be used by OHA to make approximately 900,000 individual MAGI Medicaid eligibility determinations and redeterminations each year.

OHA accepted the *kynect* production system as meeting the bulk of its business needs and therefore made very few technical changes to the system, instead focusing on making policy and process changes to its business wherever feasible to minimize the risk with the initial system implementation in Oregon.

DRAFT

2.2.2 Phased Implementation

OHA implemented the ONE system in phases. First, in December 2015, it enabled the Worker Portal for use by eligibility workers to determine MAGI Medicaid eligibility for applicants who apply by mail, fax, phone, or through the Federally Facilitated Marketplace (FFM) at Healthcare.gov.

In February 2016, it implemented a customer facing Applicant Portal, initially limiting access to certain community partners that help Oregonians with MAGI Medicaid benefits and to report changes. The Applicant Portal went live to all Oregonians in December 2016. The Applicant Portal allows Oregonians and community partner assistors to enter and update income, family composition, address and other eligibility-related information, upload documents, communicate with workers assigned to their cases, and participate in re-certification activities, all without having to fill out paper forms, visit a field office, or contact a call center. Over 850,000 Oregonians are now receiving benefits through the ONE system.

2.3 *kynect* becomes *benefind*

The Kentucky state-based marketplace preferred *kynect* to have the look and feel of searching for private insurance rather than state programs, so they developed a separate applicant portal for other human service programs and called it *benefind*. The *benefind* system code was also shared with the State of Oregon as the basis for extending eligibility and enrollment determinations to include Non-MAGI Medicaid, SNAP, TANF, and ERDC. See Appendix G for functionality included in the *kynect/benefind* system. Appendix H, comparing Oregon's needs to Kentucky's *benefind* system, was used to determine if there were enough similarities between the two state's programs to justify obtaining this code as a transfer solution and performing the subsequent Fit-Gap Analysis.

2.4 Non-MAGI Medicaid Eligibility Operations

DHS and AAA staff make more than 150,000 Non-MAGI Medicaid eligibility determinations every year. DHS and OHA's Forecast for the 2017-2019 Biennium estimates the following caseloads:

- Clients of Aged, Blind, and Disabled programs (84,533 cases as of December 2017)
- Clients of the Old Age Assistance program (44,418 cases as of December 2017)
- Clients of the Qualified Medicare Beneficiaries program (27,469 cases as of December 2017)
- Medicare Part A and Medicare Part B supplemental payments (103,461 cases as of December 2017)

Roughly half of those determinations are made by DHS staff in local offices of the department's Aging and People with Disabilities (APD) program. The remainder are made by Area Agency on Aging (AAA) staff in Marion, Polk, Yamhill, Tillamook, Clatsop, Multnomah, Lane, Linn, Lincoln and Benton counties. (Area Agencies on Aging are typically county-chartered organizations that provide assistance and services for people over the age of 65 and people with disabilities who need assistance. In the Oregon counties listed above, AAA deliver DHS's APD Medicaid program under contract with the department, including making initial and ongoing financial eligibility determinations.)

DRAFT

The Non-MAGI Medicaid eligibility caseload is projected to grow about nine percent over the next four years. Without any improved efficiency in making eligibility determinations, the added case load could require 25 or more eligibility workers at a cost of over $2 million annually to be hired, trained, and deployed across the state to come into standard with the current workload model.

The process of taking applications, reviewing them, and making Non-MAGI Medicaid eligibility determinations is often expensive, slow, and error-prone. For example, recent measures of Non-MAGI Medicaid cases found workers spend an average of 28 minutes screening each application and taking another 110 minutes to make the eligibility determinations. This is for a case that doesn't take coordination. If the case has a connection to a MAGI or medical case, then there is an average of 5 touches back and forth between different workers before a decision to move forward is completed. After the coordination is completed there is, according to a program integrity review, at least a 15% chance that the change won't take effect because of system issues in attempting to integrate across multiple systems (ONE, IE, CM, ORKids, and MMIS).

2.5 Integrated Eligibility (SNAP, TANF, ERDC) Operations

DHS and AAA staff make approximately 130,000 SNAP eligibility determinations every year for APD program clients. (Those 130,000 households include roughly 155,000 individuals.)

Self-Sufficiency Program (SSP) staff make the remainder of the eligibility determinations for SNAP, and make eligibility determinations for the TANF and ERDC programs. The SSP caseload is approximately:

- SNAP: ~285,000 cases (~580,000 individuals)
- TANF: ~23,800 cases (62,800 individuals)
- ERDC: ~7,700 cases (23,545 individuals)

The Spring 2016 DHS/OHA Caseload Forecast predicts a decline in the average number of SNAP cases between the 2015-2017 biennium and the 2017-2019 biennium (from roughly 406,000 households to approximately 371,000 households). The proportion of SNAP cases that are managed in APD/AAA offices is expected to continue to grow. The forecast projects a decline in the number of TANF cases from roughly 23,500 to 20,600 over the same period.

Errors occur in these programs as well. Recent internal quality control review data for the SNAP program found that in a sample of cases where applicants were determined to be ineligible, that decision was inaccurate more than 19 percent of the time. In a sample of SNAP-eligible cases, the difference between the benefit amount awarded and the correct amount averaged a little less than 3 percent of the benefit amount. (Some errors were overpayments. Others were underpayments.) In the TANF program, the difference between the amount awarded and the correct amount exceeded 28 percent of the benefit amount.

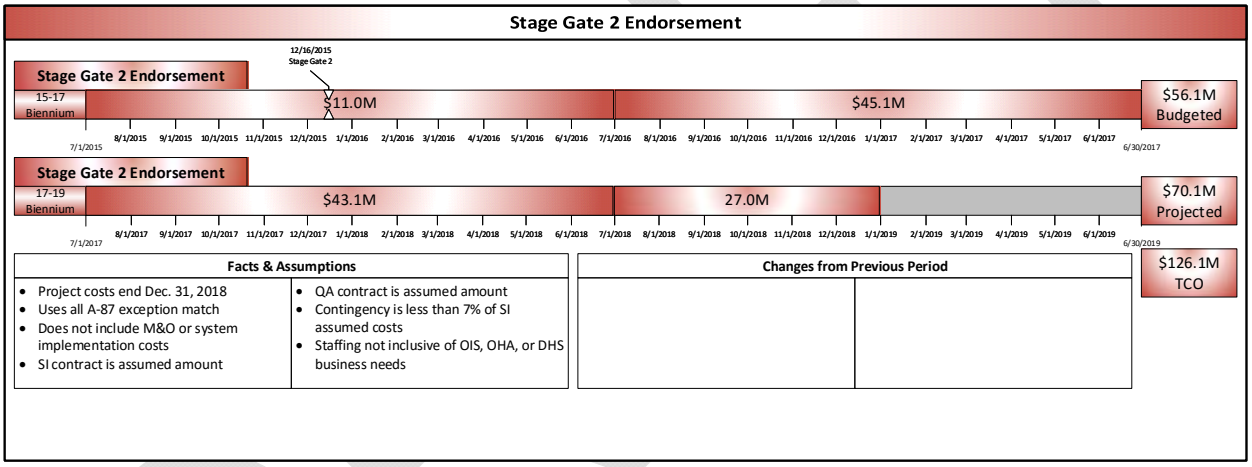
2.6 Schedule Changes Since Last Update

The project timeline has been updated from previous submissions. As Oregon explored work through the iterative design sessions, it became apparent that we needed a shift in our operational model. A decision was made to delegate all Medicaid eligibility determination work

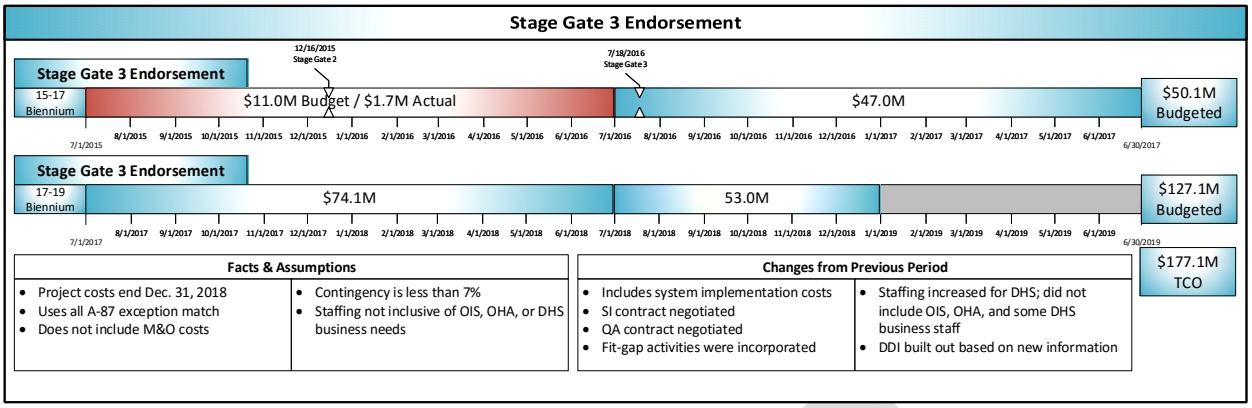
to DHS. As OHA and DHS further engaged with the design and explored opportunities and lessons learned from the initial ONE implementation and other States' experience, Oregon updated the schedule. Additional time for pilot, testing, and the wave roll-outs were added to the schedule. Oregon also contracted with Deloitte to assist with the Legacy Design work with the intent of insuring that Oregon's Office of Information Services (OIS) understands the total scope of work needed and to avoid issues that other States experienced with their projects. As this work continues, Oregon may adjust the Project schedule to ensure that we are accounting for all the opportunities we need to consider in ensuring a quality product is delivered and ultimate accountability to our federal partners and Oregonians is met.

2.7 Project Changes Since Initiation

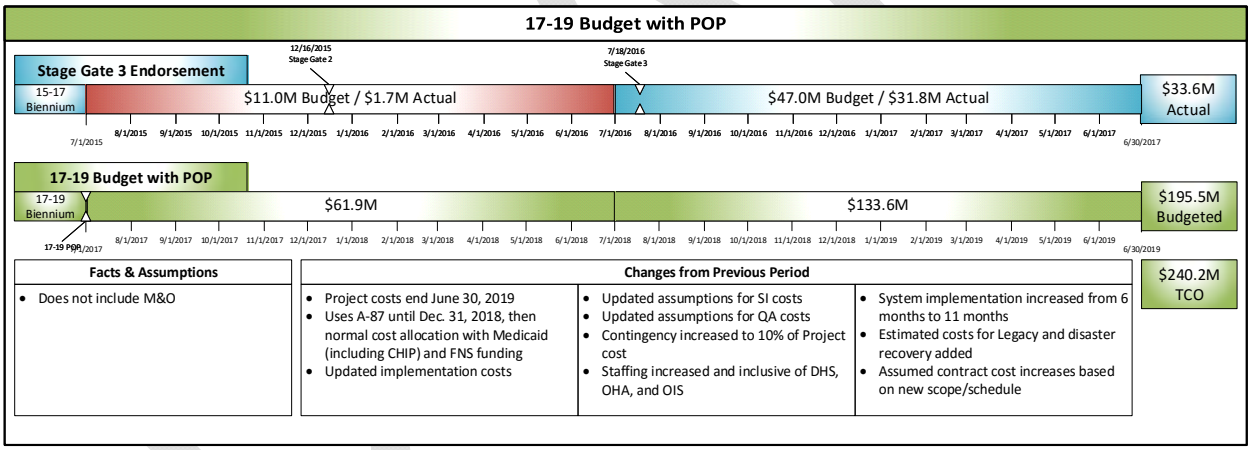
Business Case version 1.1, dated December 16, 2015, was utilized for Stage Gate 2 endorsement. As indicated in the graphic below, there was an estimated Project cost of $126 million with a plan for product availability in December 2018. Product implementation and people readiness activities were not incorporated in this version.



Business Case version 2.0, dated July 18, 2016, was an update for Stage Gate 3 endorsement. The graphic below estimates Project cost to be $177.1 million with a plan for implementation through December 2018. This plan refined SI and QA contract costs and incorporated fit/gap activities. In this estimate were increased staffing for DHS but did not include many needed OIS or business resources from OHA and some of DHS.

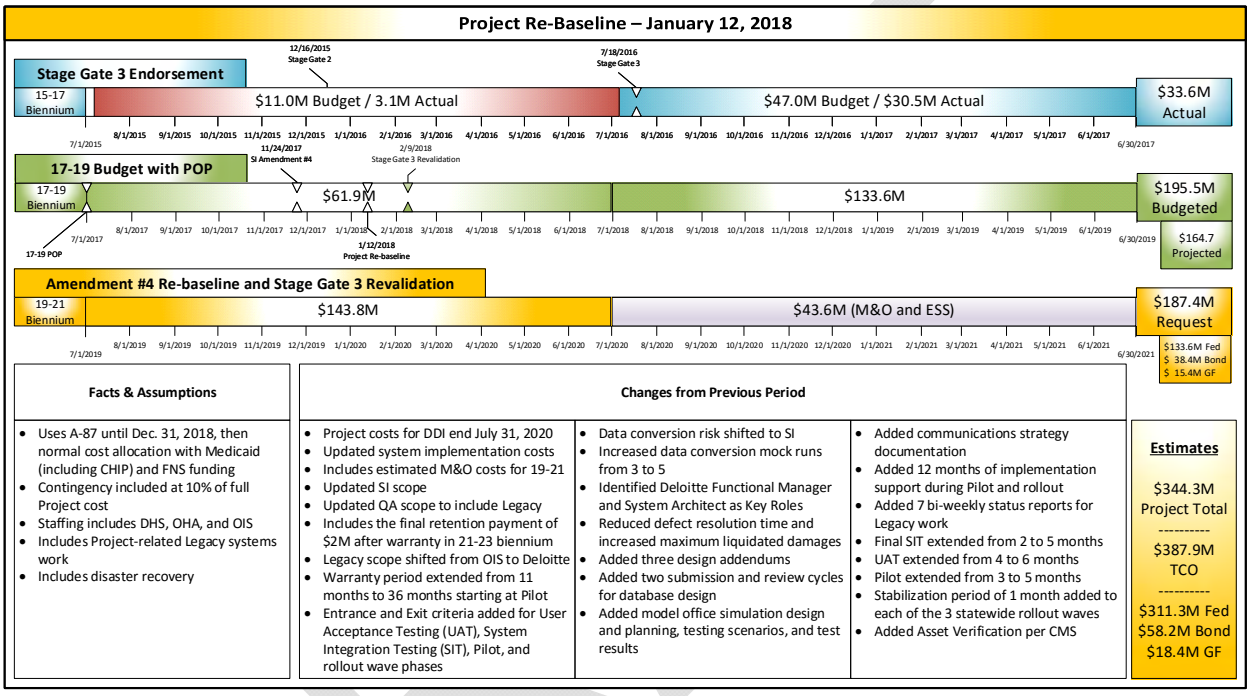


In the 17-19 budget development process, the Project Team received go-forward approval from Project governance after an impact analysis and risk assessment were conducted to validate the viability of a go-forward option. There was an additional $63 million cost identified to extend the Project duration to June 2019, and to incorporate additional staffing needed for an implementation that was increased from 6 months to 11 months. Additionally, Legacy systems design and development were added for both the State and the SI, as well as funding needed for disaster recovery. The SI contract Amendment amount was approximated. Contingency funds were also added to the budget to reflect a 10% prudent person reserve. The total Project cost was estimated to be $240.2 million with $195 million needed for the 17-19 biennium.



The SI contract Amendment was completed in November 2017. The duration of the Project was again extended such that Pilot implementation will begin in September 2019, followed by 3 one-month waves of roll-out and one month stabilization period between each wave. This schedule indicates a complete state-wide deployment by the end of July 2020. There were also extensions of time by adding two extra data conversion mock runs (from 3 to 5), adding 3 design addendums, increasing final System Integration Testing (SIT) from 2 months to 5 months, Pilot implementation from 3 months to 5 months, and User Acceptance Testing (UAT) from 4 months to 6 months. Other additions to scope included the addition of Model office simulation design and planning, communications strategy documentation, updates to QA scope to include ONE/ESS and Legacy design and development, warranty period extension from 11

months to 36 months, and other items identified in the graphic below. These changes increased the Project cost from $240.2 million to an estimated $344.3 million, but with the schedule extension, some of the SI and QA deliverable costs were shifted from the 17-19 biennium to the 19-21 biennium. As such, the Project Team is estimating an ending balance of approximately $30 million at the end of the 17-19 biennium. The 19-21 budget request will be further refined prior to the budget development process but acknowledges there will be funding needed to complete testing and implementation, as well as for Maintenance and Operations (M&O) and Enhancement Support Services (ESS).



3 Problems and Opportunity Definition

3.1 Problems

One of the most common complaints from both clients and workers is the lack of integration between and across DHS and OHA systems, resulting in the need for the same information to be provided and entered into multiple systems. Clients are frequently frustrated with having to provide the same demographic and financial information over and over when applying for different program benefits. Caseworkers are frustrated by the lack of client and case visibility across programs. That forces them to open many systems and juggle many views into those systems simultaneously as they interview clients and process cases. Oftentimes, they don't have access to systems or parts of systems that are needed to support clients effectively.

A good example of this is cases where a worker in an APD/AAA office evaluates a client's eligibility for medical assistance and SNAP and determines the client is SNAP-eligible only. This case will be referred from the APD/AAA office to an SSP office for ongoing case management. The information system used in the APD office (OregonAccess) does not have an interface to the system used in the SSP office (TRACS) so data must either be transferred with a cut-and-paste operation, re-entered from a paper application, or collected from the client again.

Case transfers in the opposite direction (from an SSP office to an APD or AAA office) are also problematic. Anecdotal reports include times where these transferred cases went unnoticed for three to six months. This problem should be resolved by integrating the systems such that handoffs to other agency processing centers is no longer required. Additionally, the new system is tasked based vice case based, meaning workers will monitor a queue that is shared by all. Other reports noted that the likelihood of fraud increases when a household is split between an SSP branch and an APD/AAA branch due to the absence of connections between the systems.

Similar, and often more complicated, coordination problems arise for clients of the Intellectual and Developmental Disabilities (IDD) program. The case managers who provide case coordination for long term care or support in the IDD program are predominantly employees of local county-run Community Developmental Disabilities Programs (CDDP) and Adult Support Service Brokerages. While these offices are under contract with DHS to provide case coordination for IDD services, they do not manage the Medicaid financial eligibility case for their clients. This leaves clients and their families in the position of having to contact and work with the APD or AAA branch closest to their home location. Because service cases are managed in multiple legacy systems, which differ from the systems in which the medical eligibility cases are managed, complex and time-consuming human intervention is required to assure both medical and long-term service benefits are maintained and managed correctly.

3.2 Opportunities

In an integrated solution, the problems described above no longer exist because caseworkers will enter client data once for all in-scope eligibility determinations and they will be cross-trained on these DHS and OHA eligibility-based systems such that clients do not need to be redirected to a different field office. There are other factors identified below that make now the right time to continue expanding the ONE system to include eligibility and enrollment functionality for Non-MAGI Medicaid, SNAP, TANF, and ERDC systems, at a minimum.

DRAFT

3.2.1 MAGI Medicaid Eligibility System

The ONE system has been in production since December 2015 and has undergone many enhancements and upgrades since that time. There is now opportunity to extend this system to align with the intended outcomes of the IE & ME Project. Examples include:

- Oregonians can set-up an account, apply for and receive real-time eligibility determinations for Medicaid (both MAGI and Non-MAGI), SNAP, TANF, and ERDC using a single application via the Applicant Portal
- Coordination of eligibility determination work between DHS and OHA for mixed households
- Electronic verification information sources minimize documentation that the client will be required to provide
- Operational reports that will allow for workload management across eligibility determination caseloads
- Single system for eligibility determination data for accurate reporting to federal partners
- Centralized and verified enrollment data available for Coordinated Care Organizations for MAGI & Non-MAGI clients
- Consistent high-quality data source for reporting CMS-mandated operational statistics
- Automating manual processes in order to:
    - Reducing the elapsed time between completing an application and making an eligibility determination
    - Reducing staff time spent creating, reviewing, and acting on each application
    - Reducing error rates in making eligibility determinations

3.2.2 Federal Partnership

3.2.2.1 A-87 Cost Allocation Exception

On August 10, 2011, three federal agencies, CMS, FNS, and ACF announced a time-limited, specific exception to the cost allocation requirements set forth in Office of Management and Budget (OMB) Circular A-87 (Section C.3) and Section 200.405 of the superseding “Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards” (2 CFR 200 issued December 19, 2014). These provisions generally require the costs associated with building shared state-based information technology systems to be allocated across all benefitting programs. The exception reflected a federal focus on streamlining enrollment and eligibility determinations in health and human services programs while leveraging funding efficiencies at the state-level.

3.2.2.2 Timeline Extension

The original timeline allowed human services programs to benefit from investments in the design and development of state eligibility-determination systems for state-operated Marketplaces, Medicaid, and the Children’s Health Insurance Program (CHIP), through December 31, 2015. On July 20, 2015, the three agencies extended that timeline for an additional 3 years, through December 31, 2018.

The A-87 exception extension, along with an indefinite extension of enhanced Federal funding for Medicaid systems, will enable states to fund the initial development costs needed to retire their legacy eligibility determination systems and to integrate this functionality into new and improved systems. Moreover, the extension will provide states more time to develop, refine, or test integrated systems to fully comply with Affordable Care Act requirements.

DRAFT

In support of DHS' integrated ONE IE & ME Project, CMS will fund all system components necessary for Medicaid eligibility determinations, including those components that also serve other programs, at its 90/10 match rate. FNS will fund SNAP-only components at its 50/50 match rate, and ACF will allow the state to utilize TANF and ERDC funds to support the development of components that were confined to those programs. After December 2018, CMS will continue to fund Medicaid components at the 90/10 match rate but functionality benefitting all enrollment and eligibility determination programs will need to be allocated at 90/10 Medicaid and 50/50 for SNAP, TANF, and ERDC.

CMS and FNS approved federal fiscal year 2017 funding for project design and development work. The Project Team has regular monthly status reports and status meetings with these federal partners.

3.2.3 System Design

IE & ME Core Design, Conversion Design, and Legacy Design is approximately 90% complete with scheduled completion at the end of March 2018. There is now a greater understanding of system functionality, requirements, and outcomes.

3.2.4 Contract Amendments

3.2.4.1 System Integrator Contract Amendment #4 with Deloitte Consulting.

The SI Amendment #4 to Statement of Work (SOW) #2 for design, development, and implementation (DDI) of the ONE IE & ME system was crafted to capture changes that had been presented to the Legislature during the 17-19 biennium budget process in the form of a Policy Option Package (POP) that extended the duration of the Project and associated costs. This Amendment effectively shifted design scope of the larger and/or more complex Legacy systems from State staff to the SI. Additionally, this Amendment provided the following benefits:

- Contract language position improvements:
    - Warranty Period extended from 11 months to 36 months starting at Pilot.
    - Entrance and Exit criteria added for User Acceptance Testing (UAT), System Integration Testing (SIT), Pilot, and rollout wave phases.
    - Data conversion risk reduction:
        - If the data conversion approach fails to deliver results in accordance with the design or the mock run targets, then the SI will bear its own costs relating to revisions in the data conversion design and the data conversion source code.
        - Increased the number of data conversion mock runs from three to five.
        - Resolved differing opinions regarding the scope of the SI's data conversion extraction and transformation services for Other Related Individuals.
    - Identified two additional SI roles (Functional Mnaager and System Architect) as Key Persons.
    - Service Level Agreements (SLAs): Reduced resolution time for Severity Level 3 Defects and increased the maximu liquidated ddamages per incident form some metrics.
- Deliverable adjustments:

DRAFT

  - Added three design addenda to incorporate limited functional modifications, as prioritized by the State, to meet business requirements and complete system implementation.
  - Added two submission and review cycles for the Database Design – Data Dictionary, Logical Design, and Physical Design.
  - Added Model Office Simulation design and planning, testing scenarios, and test results.
  - Added communications strategy documentation.
  - Added twelve months of implementation support services during the Pilot and statewide rollout.
  - Added seven bi-weekly status reports to the legacy documentation and design work (SOW #3).
- Increase to Other Support Services:
  - Added $6 million to the Other Support Services funds.
- Schedule adjustments:
  - Final SIT duration extended from two months to five months and aligned with legacy system availability to enable end-to-end testing.
  - UAT duration extended from four months to six months.
  - Pilot duration extended from three months to five months.
  - A one-month stabilization period has been added to each of the threed statewide rollout waves.

The cost for SI services with this Amendment increased from $100 million to $166 million.

Responsibilities between the State and Deloitte in the execution of this Amendment are included as Appendix J.

3.2.4.2 Quality Assurance Contract Amendment #3 with Public Knowledge, LLC.

The QA Amendment #3 to SOW #2 expanded the scope of QA services provided by Public Knowledge, LLC to include modifications to impacted legacy systems, the incorporation of the ONE System Enhancements, and other changes to align with the revised scope and schedule of the Project. ONE System Enhancements means enhancements made to the ONE System through either maintenance and operations (M&O) releases or enhancement support services (ESS) releases. This Amendment has been approved by CMS. FNS approval is pending.

The cost for QA services with this Amendment increased from $4 million to $8.6 million.

DRAFT

3.2.5 Re-Baselined Scope, Schedule, and Budget.

With the Amendments above, the scope, schedule, and budget were re-baselined. These Project artifacts are attached as Appendices A, B, and C respectively.

3.2.6 *benefind* Code Availability.

As the State of Kentucky expanded their enrollment and eligibility services from their *kynect* product, new functionality they called *benefind* became available for State of Oregon use. This transfer solution is being put in place to the maximum extent practicable in the build of Oregon's new integrated system.

3.2.7 House Bill 2219 (2015) – Single Streamlined Application for Human Service Programs

HB 2219, effective June 2, 2015, required DHS to convene a work group consisting of "human service agencies" to study consolidation of application processes for human and social services and to report recommendation to the Legislative Assembly. This report was submitted to the Legislature on August 15, 2016. In this report, four recommendations were identified and are summarized below:

> Recommendation 1: Develop a single application for financial eligibility for DHS and OHA programs. Convene a cross organization recommending body to develop criteria for the sequence and addition of other agency programs.
>
> Recommendation 2: Take the opportunity with the IE & ME Project to review and revise the application language. Application assistors have provided feedback that current application language can be confusing and potentially trigger trauma for applicants.
>
> Recommendation 3: Utilize the HB2219 work group to research the health and human services program screening tool(s) currently being used in Oregon and explore their functionality, accuracy, maintenance and usage.
>
> Recommendation 4: Continue the HB2219 work group to research and explore the possibility of sharing basic applicant information across programs/agencies, when applicable, to reduce duplication and enhance services to Oregonians.

The consolidated application will allow people to apply for and obtain assistance in accessing food, housing, medical care, education, employment services, child care and other social services. A consolidated application process is expected to: 1) decrease the time an applicant spends filling out similar paperwork for different programs, 2) decrease the time agency staff spend processing paperwork, 3) reduce the burden on applicants to navigate their own way through a complex system of programs, and 4) correctly and appropriately determine eligibility through a common, standards-based process. Eligible Oregonians would get a quick and accurate determination, and those who are not eligible would be promptly notified.

DRAFT

3.2.8 Meeting Citizen Expectations

Today's consumers increasingly communicate in real time via web-based services accessed from virtually anywhere. Technological advances and experiences in consumer marketplaces have resulted in DHS customer expectations that are much higher than they were just a few years ago. Citizens expect to be able to access information about government programs simply and quickly. They expect to be able to find information and connect with programs without needing to first figure out which programs and benefits are administered by which agencies and levels of government. Some people are beginning to demand virtual "one stop shops" where they can connect with government programs from all agencies that serve people in circumstances like theirs. They expect to access benefits and services without having to report physically to a field office or having to fill out paper forms. They expect online government services to set and meet the highest possible standards for security, confidentiality, and data privacy.

With the new integrated system and associated Applicant Portal, Oregonians will be able to apply for benefits, update case information, upload documents, and determine eligibility across multiple systems from anywhere in the world that they can obtain Internet connectivity.

3.2.9 Field Operations Efficiencies

Eligibility decisions will occur in a timelier fashion with the delivery of an integrated eligibility system. Workers will not be downloading paper applications, manually entering information into multiple screens, or performing manual verification checks in multiple systems. This will result in fewer processing errors and greater integrity of the data in the system. Accuracy of eligibility decisions and benefit amounts will also increase with automation of these activities.

DHS and OHA will be updating the service delivery model to include two levels of office interaction. Virtual Eligibility Centers (VEC) will be established in rural communities where workers will process information coming through the phone or an online application. This creates rural jobs and will build an infrastructure to support the growing movement away from brick-and-mortar offices. Oregonians will continue to have access to offices where services are currently provided. They will also have 24-hour access to information about the status of their eligibility cases. The ability for customers to update their own personal information, with automated processing of those updates, will save worker time in the DHS offices. It will also allow for more efficient communications between workers and their assigned customers, with the ability for customers to email their worker at any time of the day with information or questions about their case.

Staff in DHS and AAA offices will be able to spend more time with people, assisting them with their needs, and less time with paper processes and files. Additionally, DHS staff who are serving customer needs in their own homes, or places of residence, will be able to access information from those locations and update information. This allows for the worker to save time once they are back in the office, as the updates will already be complete. They will no longer have to upload and update information upon return to the office.

While we expect these efficiencies and opportunities, the majority of these will not be seen for at least 18 months, post implementation. In order to automate eligibility and allow Oregonians to be able to provide information, additional questions and functionality is required. These additional fields, which don't exist today and therefore cannot be data converted into the ONE

DRAFT

system, along with change management have been correlated nationwide with longer eligibility determination times for the first year and a half.

3.2.10 Alignment with Strategic Technology Plan

The DHS/OHA Strategic Technology Plan (STP) includes many strategies that the ONE IE & ME Project will support. Strategy #1 in that plan is titled Business Automation and calls for the automation of workflows, decision-making, and business rules while reducing manual, paper-based processes. This project will automate workflows and the application of business rules in each of the programs within its scope. Strategy #2, Dynamic Needs Supported by Seamless Services, is evident in that this project includes many programs in its “one stop shop” for citizens. Similarly, an integrated eligibility system will provide advances in pursuit of Strategy #5, which calls for assembling a “comprehensive view of clients.” The STP also calls for enabling connectivity “anytime, anywhere,” encouraging the development of on-line self-service capabilities for clients and mobile virtual workplaces for agency staff. An integrated eligibility determination system will provide that functionality. More information related to Project alignment with the STP is attached as Appendix I.

DRAFT

4 Alternatives

In version 1.1 of this business case, which was utilized for Stage Gate 2 endorsement, four alternatives for the Project were identified and analyzed. They were:

- Implement Non-MAGI Medicaid Eligibility Determination into the ONE system
- Implement Integrated Eligibility Determination into the ONE system
- Acquire External Eligibility Services from Another State
- Do Nothing

The second option was selected, meaning the intent was to extend the functionality and derived benefits of the ONE system to include Non-MAGI Medicaid, SNAP, TANF, and ERDC. Business case v1.1 is included in this document for reference as Appendix D.

In version 2.0 of this business case, which was utilized for Stage Gate 3 endorsement, these same four alternatives were recognized but only options #2 and #4 above were compared further. Business case v2.0 is included for reference as Appendix E.

This version of the business case contains updated information about changes to scope, schedule, budget, and risks. Assumptions and constraints have been updated, validated, and utilized to determine the best course of action (Alternative) going forward.

4.1 Assumptions and Constraints

Below are assumptions considered in the Alternatives Analysis (Section 4.4).

- DHS and OHA leaders support a strategy of minimizing the amount of customization when transferring Kentucky's solution to Oregon. This requires a willingness to change policies and procedures rather than changing the system whenever practicable.
- The Project Team will sufficiently orchestrate the ONE operations and maintenance work, the ONE MAGI enhancement efforts, and the IE & ME system development such that none prevent the others from being successful.
- CMS and FNS will provide timely approval plans for the IE & ME system development throughout the duration of the Project. The approval process is at least 60 days, with the review cycle restarting if there are document revisions.
- The legislature will continue to financially support the IE & ME Project, including providing necessary funding for the maintenance and operations of the new system.
- Per the MOU between OHA and DHS signed in April 2017, OHA will delegate Medicaid eligibility determination to DHS. This transition will occur before the new system goes live.
- A separate open and competitive RFP will be issued for the long-term Maintenance and Operations (M & O) of the new system after Project completion. Deloitte Consulting will provide these services by way of a contract Amendment until a new contract is awarded.
- MAGI Medicaid-related enhancements to the ONE System will be performed by Deloitte Consulting.

DRAFT

- The Legacy systems documentation will be updated in a timely manner to support the design of the IE & ME system and its interfaces.
- Case management will still be performed in Legacy systems such as TRACS and ORACCESS and will be shared with the new system with interfaces, as appropriate.
- Deloitte will assist in documenting the design of key Legacy system changes and interfaces to support their use with the Integrated ONE System.
- Appropriate modifications to the existing service delivery model and business processes will enable Oregonians to access benefits via Storefronts, the Applicant Portal, or through Virtual Eligibility Centers (VECs).
- Training will be holistic. It will encompass enrollment, eligibility, and benefit issuances in both the new ONE system and the modified Legacy systems.
- The existing ONE system will be merged into the new IE & ME system.
- The roll-out will be conducted in a phased approach. There will be a five-month Pilot period, implementing the new system in both Jackson and Josephine Counties. Following the Pilot, implementation in the remainder of the State will be accomplished in three one-month waves with a one-month stabilization period following each wave.
- Key staff (business leaders, program and policy experts, field/operations representatives, technical experts, clients and potential clients, community partners, counties, and tribes) will be made available in sufficient numbers to the Project when they are needed.
- Changes to the MMIS system will be completed in a timeframe consistent with the IE & ME schedule.
- People readiness for field/operations representatives and other stakeholders will be achieved throughout the IE & ME Project, and will be completed prior to “go-live.”
- DHS and OHA will continue to receive authority to connect, and to utilize the Federal Marketplace.
- ETS will provide timely and consistent services throughout the life of the IE & ME Project and will provide necessary services for the implementation, operation, and maintenance of the new Integrated ONE system.
- There will be continued gubernatorial, OSCIO, and legislative support for the Project.
- All parties to the MOU will continue to abide by the agreement.

The project is subject to these constraints:

- CMS will not provide enhanced funding for a Non-MAGI Medicaid solution that is separate from ONE.
- The exception to the OMB Circular A-87 cost allocation requirements to support integration of other human service programs into the ONE system will expire at the end of December 2018.
- The IE & ME System Integration Testing #2 cannot be performed until ONE, Legacy, and MMIS development and testing is complete.

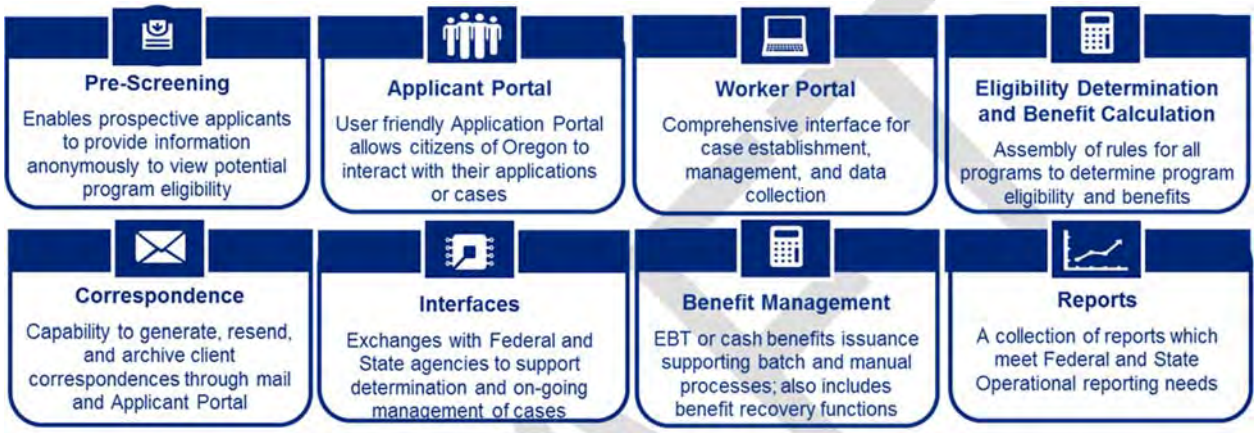
DRAFT

- State and Federal mandates that require changes will need to be implemented during the Project if they cannot be deferred.

4.2 Solution Requirements

4.2.1 High Level Functional Requirements

The following represents the IE & ME Project high-level business functionality:



Pre-Screening – The Pre-Screening module in the Applicant Portal enables prospective applicants to provide a minimal set of information to the system anonymously to see the programs for which they may qualify. The module will include assessment capabilities for all programs offered by Integrated ONE, including Medicaid (MAGI & Non-MAGI), SNAP, TANF, and ERDC. It is important to note that the pre-screening process is not an official eligibility determination and individuals must formally apply in the Applicant Portal or by contacting a DHS or an OHA office. The data collected during Pre-Screening will be saved.

Applicant Portal (AP) – The Applicant Portal enables the registered users' access to the system to apply for benefits as well as to enable them to take action on their ongoing benefits. The applicant portal allows users to apply for Medicaid (MAGI & Non-MAGI), SNAP, TANF, and ERDC as a part of an Integrated ONE application. The citizens will be able to take actions on their ongoing applications or cases including to report a change, to recertify, to withdraw an application, to discontinue an ongoing program, to upload documents, to view Request for Information (RFI) notices, and/or to start a new application. It will also include additional functionality such as the ability to request an appeal or hearing, to request an EBT or Medicaid Card, to view claims or facts regarding disqualification, to view a TANF summary, and/or to submit a SNAP application. The applicant portal will provide role-based dashboards and will incorporate the user account creation process that is currently established in the MAGI Medicaid ONE system Applicant Portal.

Worker Portal (WP) – Worker Portal allows case workers to manage the lifecycle of an application or case by providing functionality to perform intake on new applications, to determine eligibility and benefit amounts based on the data provided during intake, and/or to disburse benefits and process case changes. It also contains modules for support-functions like

appointments, task management, hearings and appeals, and complaints to help the workers perform daily activities.

Eligibility Determination and Benefit Calculation (EDBC) – As the central repository for business rules defined by policy and administrative procedure, EDBC is the module where the Integrated ONE system determines each person's eligibility and benefit level based on the information collected through the worker or applicant portal and verification status of key data elements that affect eligibility (income, resources, citizenship, etc.) For Medicaid programs, eligibility determination is limited to financial eligibility for Medicaid. Service eligibility determination and authorization for Medicaid and other SSP case management services are not in scope for the initial implementation. For the purposes of determining financial eligibility, the eligibility rules engine will evaluate individuals and households through multiple modules to confirm their compliance with both state and federal program rules. All eligible individuals will be included in the benefit group which will be used to determine the benefit amount or ERDC days of care the individual may receive.

Correspondence – The correspondence module generates the notices required to support a case life cycle. Integrated ONE system generates the notices, which are automatically forwarded to the State's centralized print center for printing and mailing. Case Workers will have the ability to review the notices and determine the accuracy before these notices are mailed out as part of the nightly batch processing cycle.

Interfaces – Interfaces are a critical component of the Integrated ONE system. Interfaces are required to share data with federal agencies, other State agencies and systems, and Trusted Data Sources (TDS) to support critical business processes such as verification, fraud detection, federal reporting, benefit issuance, and recovery. The system will use both batch and real-time interfaces to meet the business needs.

Benefit Management – The Benefit Management module supports two key functions – benefit issuance and benefit recovery. The benefit issuance function allows for automatic benefit issuance through Electronic Benefit Transfer (EBT) cards, checks and direct deposit through Electronic Fund Transfer (EFT). The function also allows authorized users to issue benefits manually outside the constraints of eligibility, if necessary.

The Benefit Recovery function determines overpayments against issued benefits because of case changes. Overpayments are referred to the ICM (Claims Management) System for establishing and maintaining claims. A certain portion of the benefit amount is recouped from future benefits based on the outstanding claims amount received from ICM.

Reports – This module focuses on generating Operational, federal and State reports necessary for the administration of the APD and SSP programs. The operational reports are generated from key business processes that include:

- New Applications
- Reporting a Change
- Redeterminations
- Task Management
- Reports required for audits and quality assurance
- Interface Activity Reports

DRAFT

The above functionality will be provided in the new system by integrating components of several disparate systems identified below.

- Modified Adjusted Gross Income (MAGI) Medicaid. This program helps low-income people in Oregon with health insurance. MAGI medical benefits can cover working families, children, pregnant women, single adults, and more. This functionality is currently in the ONE system.
- Non-MAGI Medicaid. This includes Oregon Supplemental Income Program (OSIP) Medical, also known as the Aged, Blind, Disabled Medical or SSI based Medical programs, Medicare Savings Programs, and Refugee Medical. These services are currently processed in ORAccess, CM, and MMIS. Scope does not include Hospital Presumptive, Extended Medical, and the Breast and Cervical Cancer Program.
- Supplemental Nutrition Assistance Program (SNAP). This is a federally funded program which offers nutrition assistance to millions of eligible, low-income individuals and families. SNAP is the largest program in the domestic hunger safety net. Scope includes all services provided by SNAP other than the Summer Meals program.
- Temporary Assistance for Needy Families (TANF). This program provides cash assistance to low-income families with children while they strive to become self-sufficient. Cash assistance is intended to meet a family's basic needs such as food, shelter and utilities. Most cash benefits in Oregon are issued via an Electronic Benefit Transfer (EBT) card. This is also known as an Oregon Trail card. Scope does not include case management.
- Employment Related Day Care (ERDC). This is a child care subsidy program for working families.
- Temporary Assistance to Domestic Violence Survivors (TA-DVS). This program provides temporary financial help to support families whose safety is at risk due to domestic violence. Most often, this is when the domestic violence survivor and the children are fleeing domestic violence or at risk of retuning to an abusive situation.

4.2.2 High Level Non-Functional Requirements

High level non-functional requirements include the following:

Security – Provisioning of a secure system with corresponding authority to connect to the federal market place.

Reliability and Availability – The system must meet service level requirements for accessibility and up-time. Maintenance windows must be clearly communicated and be strictly adhered to.

Scalability – The system must scale to meet demand. As demographics change, it is anticipated that the preferred method of accessing services will also change. The system must accommodate this shift.

Performance – The system must meet performance specifications such that the user experience is acceptable with any method of interaction with the system.

DRAFT

Capacity – System design must accommodate the anticipated volume of cases end-to-end, including interactions with Legacy systems case management functionality.

Recoverability – The system must be recoverable within a reasonable Recovery Time Objective (RTO) with tolerable data loss specified with a Recovery Point Objective (RPO). RTO and RPO will be articulated as part of the Disaster Recovery and Business Continuity business case.

Serviceability – The system must be developed utilizing industry best practices and standard tools and methodologies to be easily maintained, including the application of patches, upgrades, and enhancements.

4.3 Alternatives Identification

In each iteration of this business case, the Project Team explored four alternative courses of action. With more than two years of activity and approximately $57 million invested to date on this Project, it is now approximately 35% complete, including over 90% of design completion. As such, not all the previously developed Alternatives make sense or are even possible. Current state Alternatives are now identified as follows:

Alternative #1: Implement Non-MAGI Medicaid Eligibility Determination into the ONE System
This Alternative is unchanged from prior business case versions and extends the current ONE system to support Non-MAGI Medicaid eligibility determinations and service authorization to community-based care programs only. This approach limits the scope of DHS and OHA programs that would be affected. It requires transfer of the Kentucky system, removal or disabling of the functionality in that system supporting programs like SNAP, TANF, and ERDC, and customization for Oregon's Non-MAGI Medicaid program.

Alternative #2: Implement Integrated Eligibility Determination into the ONE System

This Alternative is also unchanged from prior business case versions and represents the current course of action on this Project. This Alternative extends the current ONE system to support Non-MAGI Medicaid eligibility and SNAP, TANF, and ERDC determinations, as well as providing service authorizations for community-based care programs. This approach involves a wider range of DHS and OHA programs. It avoids the risk and expense of removing functionality for these programs from the Kentucky system. It requires potential customization of a larger number of Oregon programs than Alternative #1.

Alternative #3: Acquire External Eligibility Determination Services from another State

This is not a viable Alternative as there are no service models across the nation that support Oregon acquiring services in this manner.

Alternative #4: Do Nothing

This Alternative requires no additional investment in further development of the ONE system. However, resources with skills needed to deal with contract issues and federal audits would be needed. Improvements to current processes would be limited to those that arise naturally through DHS's continuous improvement program.

DRAFT

4.4 Alternatives Analysis

In each prior version of this business case, Alternative #2 - Implement Integrated Eligibility Determination into the ONE system, was selected as the best go-forward option. In this business case, Alternatives #1 and #4 are revisited and reviewed against the foundational assumptions and constraints. Consideration is given to the work performed to date in the realization of expected outcomes and factors such as cost, benefit, and risk identified with each alternative.

Alternative #1: Implement Non-MAGI Medicaid Eligibility Determination and Service Automation Only

Cost – The estimated total cost of implementing this Alternative was $80.3 million. (See estimate details in Business Case v1.1, Appendix D.) Compared to the Integrated Eligibility Alternative #2, this Alternative would have minimized the overall costs of Fit-Gap analysis, design, configuration, customization, testing, and training by removing scope for all components other than Non-MAGI Medicaid. Savings would be reduced by the cost of removing or disabling SNAP, TANF, and ERDC from the Kentucky system code. Nearly $60 million invested to-date for enhanced eligibility determination functionality would produce little or no value.

Benefits – This Alternative will achieve the high-level requirements associated with the Medicaid program. Clients seeking Non-MAGI Medicaid eligibility will be able to apply online and they will receive faster eligibility determinations. Non-MAGI Medicaid eligibility workers in APD and AAA offices will be more productive and make fewer eligibility determination errors. Problems associated with the handoff of cases between DHS and OHA will be reduced, if not eliminated.

Risk – This Alternative has the risks associated with large information technology projects involving complex requirements and a lengthy schedule. This Alternative will impose substantial policy and procedure changes on Non-MAGI Medicaid eligibility workers. The need to remove substantial components from an existing application adds some technical risk that is not present in the other alternatives. DHS workers will need to use two or more systems to provide some clients with basic case management. There is also significant risk in splitting APD cases from SNAP cases.

Alternative #2: Implement Integrated Eligibility Determination

Cost – The five-year total cost of ownership between August 2015 and June 2020 is estimated to be $334 million. (See Appendix C, Project Budget). This alternative includes the full cost of Fit-Gap analysis, design, configuration, customization, testing, and training for the SNAP, TANF, and ERDC programs. Also Non-MAGI Medicaid all modifications to 35 Legacy systems, and disaster recovery.

Benefits -

- Clients seeking Medicaid eligibility (either MAGI or Non-MAGI) and/or SNAP, TANF, and ERDC eligibility will be able to apply on-line.
- Clients applying for medical assistance and for one or more of SNAP, TANF, and ERDC will make a single application regardless of programs they are applying for.
- There will be fewer eligibility determination errors in and between the programs due to the single shared data source and integration between systems.
- Problems associated with the handoff of cases between OHA and DHS will be reduced or eliminated, as will problems with handoffs among APD/AAA offices and SSP offices.

DRAFT

- This approach allows for the retirement of the Caseworker Application Processing Interface (CAPI), and the Food Stamp Management Information System (FSMIS).

Risk - This project has the risks associated with large information technology projects involving complex requirements and a lengthy schedule. There are many stakeholders involved or impacted. New business processes will impose substantial policy and procedure changes on Non-MAGI Medicaid eligibility workers in APD/AAA offices and on SNAP, TANF, and ERDC eligibility workers in SSP offices. By eliminating antiquated information systems and reducing the scope of others, this approach reduces long-term risks that system failures will interrupt the delivery of DHS programs.

Project leadership is tracking several high probability/impact risks. They are summarized here:

- Focus on preferring policy and process change before technology change reduces technical risk but substantially increases the amount of process change that must be undertaken.
- Legacy subproject that includes modifications to 35 subsystems is still in design so is not yet fully understood.
- Data conversion mock runs have not yet begun so data quality is not yet fully understood.
- Data quality in Legacy systems might make it difficult to cleanse and populate data from Legacy into the new system.
- The Office of Information Services (OIS), which supports many affected Legacy information systems, may not have capacity to simultaneously participate in this Project, and support on-going operations, maintenance, and enhancement of Legacy systems that will remain after the ONE IE & ME project.
- The project's Technology Management Plan would impose security requirements on DHS and OHA's directory services that may not yet be supportable.
- There may be a lack of capacity for business leaders, track leads, and other Project staff to accommodate the volume of action items, change requests, and decisions required for the Project.

Alternative #3: Acquire External Eligibility Determination Services from another State

Cost, benefit, and risk are difficult to quantify given there is no existing model for obtaining services in this manner.

Alternative #4: Do Nothing

Cost – Spending for additional system functionality would stop but additional costs to shut down the Project would continue until all vendor contracts were terminated and all audits were conducted. There would be no value derived from the investment of approximately $300 million already made.

Benefits – There is no beneficial by-product from this Alternative.

Risk – It is estimated federal audits would take years and that federal program subsidization would come to a stop until audit findings were satisfactorily addressed by the State. There would also likely be significant dissatisfaction from all Project stakeholders, potentially resulting in not having another opportunity to fix current state problems into the foreseeable future.

DRAFT

5 Conclusions and Recommendations

5.1 Conclusions

Development of an Integrated Eligibility Determination system continues to be the leadership vision for Oregonians, DHS, OHA, and for eligibility workers and the prudent course of action, given the investment of time and resources to date. With the continuation of the OMB Circular A-87 cost allocation exception and the active support of our CMS and FNS partners, any action contrary to continuing with the Project will have significant negative consequences, as identified below.

The State of Oregon has an opportunity to continue expansion of the MAGI Medicaid eligibility system (ONE) as a stable base, utilizing code from the State of Kentucky system called *benefind*.

Much of the design of the new system, including Legacy design is complete. Given new contract Amendments with our SI and QA vendors, there is a solid scope, schedule, and budget to manage the Project to. There is also current work with Gartner to validate this schedule and budget against anticipated Project outcomes, scheduled for completion in February 2018.

The efficiencies gained in the field offices in serving Oregonians enrollment and eligibility needs for Medicaid, SNAP, TANF, and ERDC is undetermined during the first year of deployment. Factors such as the quality of data conversion and the readiness of eligibility workers will impact operations. However, data will be more reliable and checks and balances are being built into the system for accuracy and error reduction. It is in the best interest of the State of Oregon to continue the ONE IE & ME Project on its current course on behalf of all Oregonians.

5.2 Consequences of Failure to Act

There has been ongoing effort to modernize enrollment and eligibility programs. Both agencies in cooperation are dedicated to removing obstacles, incorporating lessons learned, and finding success for this project. DHS and OHA signed an MOU to solidify that understanding and to provide a foundation for success. All parties clearly understand that there is significant negative impact in failure or in doing nothing. This section lists those consequences.

1. Oregonians lose. We have a current system that doesn't serve Oregonians well. Medicaid financial eligibility is divided in delivery methodologies and access for Oregonians, SNAP, TANF, and ERDC benefits are not coordinated with Medicaid benefits. Oregonians expect better service from their State government.
2. CMS is continuing to fund the majority of the DDI work through December 31, 2018 for the ONE IE & ME project because non-MAGI is being added to the system that contains MAGI eligibility. Without non-MAGI eligibility CMS will not pay for the shared components and the State's portion would increase for SNAP, TANF, and ERDC functionality.
3. It is possible that the State of Oregon would not risk another project to provide this functionality into the foreseeable future. Changes at the federal level, and differing priorities amongst agencies and programs provide substantial risk in the future.
4. Continued reliance on dated Legacy systems and manual processes. Currently eligibility outside of ONE requires the workers to access seven different subsystems.
5. Loss of CMS/FNS confidence in the State of Oregon (potential impact on future funding).

DRAFT

6. Further loss of Oregon's reputation for being able to implement successful IT projects.
7. Potential contractual termination issues with current contracted entities including Deloitte, and Public Knowledge.
8. Negative impact to service delivery to Oregonians who rely on DHS and OHA for services;
    a. Service delivery times;
    b. Redundant processing requirements for customers and state staff;
    c. No decline in error rates;
    d. Possibility of overpayments or not getting timely benefits;
    e. No enhanced checks and balances between programs.
9. Impacts on the One system. Without bringing in the additional programs, there will continue to be data for individuals that doesn't match. This could result in a worker not acting on the most recent information for an individual, and not performing appropriate due process.
10. Loss of employment to both state and vendor staff.
11. Possible increased DHS and OHA operational costs.
12. There would be a loss of the investment already made in system development.

DRAFT

6 Appendixes and References

6.1 Appendix A – Project Scope

6.1.1 Design sessions revealed additional scope for this Project, such as Non-Citizen, other income types, Real+D, Mass Update triggers, and task management. Scope also includes financial eligibility determination for the following DHS and OHA programs:

DHS Self-Sufficiency Programs	**Type of Assistance (TOA)**	**Description**
Supplemental Nutrition Assistance Program (SNAP)	CTCE	Categorical Eligibility
	EXCE	Expanded Categorical Eligibility
	BBCE	Broad Based Categorical Eligibility
	SNAP	Supplemental Nutrition Assistance Program
	ESNP	Expedited SNAP
	DSNP	Disaster SNAP
	ABAWD	Able Bodied Adults without Dependents Requirements
	OFSET	Oregon Food Stamp Employment Transition Program
Temporary Assistance for Needy Families (TANF)	TANF	TANF
	EPPT	Employment Payments
	TDVS	TANF Domestic Violence
	TJPI	Jobs Participation Incentive
	PSSI	State Family Pre-SSI
	JOBS	Jobs Opportunities and Basic Skills Note - Only determination of JOBS mandatory individuals and assessment status, not ongoing case management
Child Care Program (CCPG)	ERDC	Employment-Related Day Care
	CCTN	Child Care Supportive Service for TANF Recipients
REF	REFG	Refugee program for individuals seeking Assistance and otherwise ineligible
Summer Meals	SEBTC	Summer Electronic Benefit Transfer for Children

DHS Aging and People with Disabilities (APD) Programs	**Type of Assistance (TOA)**	**Program Description**
Non-Modified Adjusted Gross Income (Non-MAGI) Medicaid	QMB-BAS	Qualified Medicare Beneficiaries – Basic
	QMB-SMB	Qualified Medicare Beneficiaries - Special Limited Medicare Beneficiaries
	OSIPM-SSI	Oregon Supplemental Income Program Medical - Supplemental Security Income

DRAFT

	OSIPM-1619B	Oregon Supplemental Income Program Medical - 1619B
	OSIPM-Survivor Widows	Oregon Supplemental Income Program Medical - Survivor Widows
	DAC	Disabled Adult Children
	Pickle	Pickle Amendment Clients
	OSIPM-AB	Oregon Supplemental Income Program Medical - Aid to the Blind
	OSIPM-OAA	Oregon Supplemental Income Program Medical - Old Age Assistance
	OSIPM-AD	Oregon Supplemental Income Program Medical - Aid to the Disabled
	OSIPM-Acute Care	Oregon Supplemental Income Program Medical - Acute Care
	OSIPM-EPD without Services	Oregon Supplemental Income Program Medical - Employed Persons with Disabilities not receiving services
	OSIPM-EPD with Services	Oregon Supplemental Income Program Medical - Employed Persons with Disabilities receiving services
	QMB-DW	Qualified Medicare Beneficiaries - Disabled Worker
	Special Needs	Special Needs
	QMB-SMF	Qualified Medicare Beneficiaries - Qualified Individuals
	Services - LTC/Waiver	Services – Long Term Care or Waiver
	OSIPM-IC	Oregon Supplemental Income Program Medical - Independent Choices program
	REF	Refugee Medical Program

OHA Programs	**Type of Assistance (TOA)**	**Program Description**
Modified Adjusted Gross Income (MAGI) Medicaid	ADLT	Oregon Health Plan (OHP) Plus Adult
	CHIP	OHP Plus CHIP
	CHL1	OHP Plus Child under age 1, under 185%
	CHL4	OHP Plus Child, age 1 through 18, under 133%
	EMAD	Citizen Alien Waived Emergent Medical (CAWEM) Adult
	EMC1	CAWEM Child under age 1, under 185%
	EMC4	CAWEM Child age 1 through 18
	EMPC	CAWEM Parent or other Caretaker Relative

	EMPP	CAWEM Plus Pregnant Parent or other Caretaker Relative
	EMPR	CAWEM Plus Pregnant Woman
	EMPW	CAWEM Pregnant Woman
	FFCC	OHP Plus Former Foster Care Youth
	HIA1	Hospitalized Adult inmate
	HIA2	Hospitalized Pregnant Woman inmate
	PACA	OHP Plus Parent or Other Caretaker Relative
	PCPR	OHP Plus Pregnant Parent or Other Caretaker Relative
	PREG	OHP Plus Pregnant Woman
	TP45	OHP Plus Assumed Eligible Newborn

6.1.2 **Legacy Systems Scope**

There are 35 of the original 39 systems remaining as in scope for the Legacy subproject. 17 of these systems are now in scope for the SI to document the design, with the state to conduct all development, testing, and deployment. These 17 systems are identified in the following table.

1. Automated Jobs (AJ)
2. Community Based Payment (CBC)
3. Client Employed Provider (CEP)
4. Client Index (CI)
5. Client Maintenance System (CM)
6. Client Pay-in (CPI)
7. Check Reconcile/Acct. Interface (CR/AI)
8. Electronic Benefits (EB)
9. Food Stamps (FSMIS)
10. JV (New Payment Systems)
11. ORAccess (OA)
12. Provider Pay (PP)
13. Service Authorization (SA)
14. Service Eligibility System (SJC)
15. Special Cash Payment (SP)
16. Federal Reporting-TANF (FR/TANF)
17. Trans. Ref. & Client Self-Sufficiency (TRACS)

18 Systems are in-scope that the state is responsible for design documentation, development, testing, and deployment.

1. Bendex (BE)
2. Batch Scheduling (BS)
3. Client Notice Writer (CN/NW)
4. Dept. of Justice (DOJ) Child Support (ORIGINS)
5. Electronic Data Management System (EDMS)
6. Express Payment and Reporting System (eXPRS)
7. Integrated Collections Management (ICM)--INBOUND/OUTBOUND FROM IE (NON-JV)
8. Integrated Collections Management (ICM)--INBOUND FROM JV
9. Unearned Income Verification (IEVS/SX/SSA)
10. Client Eligibility (JM)
11. Month-End Statistics (MS/ME)
12. Pre ICM Processing System (PIPS)
13. Trust and Agency (WTA)
14. Reporting for APD (JR)
15. Performance Reporting Information System (PRISM)
16. Employment Tracking System (ET)
17. Automated Jobs (AJ)
18. New Payment System (JV)

Appendix B – Project Schedule

The project timeline has been updated from previous submissions. As Oregon explored work through the iterative design sessions, it became apparent that we needed a shift in our operational model. A decision was made to delegate all Medicaid eligibility determination work to DHS. As OHA and DHS further engaged with the design and explored opportunities and lessons learned from the initial ONE implementation and other States' experience, Oregon updated the schedule. Additional time for pilot, testing, and the wave roll-outs were added to the schedule. Oregon also procured Deloitte to assist with the Legacy Design work with the intent of insuring that Oregon's OIS understands the total scope of work needed and to avoid issues that other States experienced with their projects. As this work continues, Oregon may adjust our project schedule to ensure that we are accounting for all of the opportunities we need to consider in ensuring a quality product is delivered and ultimate accountability to our federal partners and Oregonians is met. As you can see, the Design phase will be followed by two iterative development phases, and then system implementation supporting a ONE System upgrade to an integrated ONE System, a DHS production pilot (Production Pilot) and three implementation waves.

The Project's two iterations will enable:

- Oregon's business needs to be met by changes to the application,
- Underlying COTS software components to be upgraded to State approved versions, and
- ONE functionality to be preserved to avoid service disruption to Oregonian's receiving services for MAGI Medicaid.

Each iteration will be followed by Contractor testing and validation testing by the State. At the completion of the development phase, the State will have at least six months dedicated to User Acceptance Testing (UAT) (increased from four months with Amendment #4).

Once DHS issues a notice-to-proceed the Project will then transition to the implementation phase which includes:

- Upgrading the current OHA MAGI Medicaid ONE System with integrated ONE System
- A minimum of five-month Production Pilot (increased from three months with Amendment #4), and
- Three geographically appropriate waves (for the 150 field offices)

DRAFT

The following chart lays out a high-level schedule for the project.

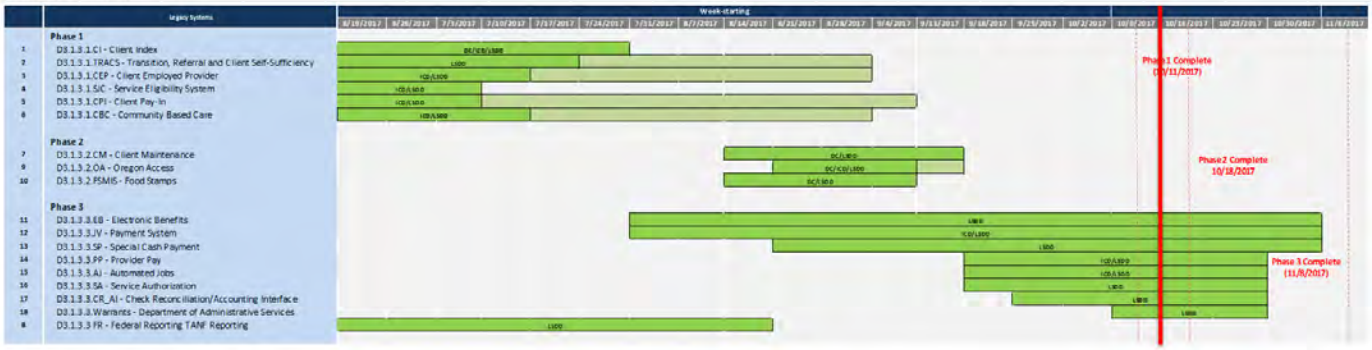
Legacy High Level Design Timeline



* Timeline is intended as high-level overview only. Schedule detail including specific start and end dates for each activity is in the Integrated Project Schedule (IPS).

DRAFT

6.2 Appendix C – Project Budget

This budget reflects changes to scope and schedule reflected in the SI and QA contract Amendments. Approximately 1 year was added to the schedule to provide a more realistic timeline for completion of activities such as data conversion, SIT and UAT testing, wave roll-outs with corresponding stabilization periods, design addendums, and Model Office simulation. Approximately one-half of the Legacy design work was shifted from internal State staff to the SI, increasing these costs by $66 million. The QA contract also increased approximately $4 million to accommodate the longer project duration and to incorporate ONE ESS and Legacy design and development into their QA work.

6.6 Appendix G – Kentucky System Components

Key application components in the *kynect/benefind* system for integrated eligibility determination are described in the following table.

Title	Description
Worker Portal	Module used by the State Agency workers to collect individual/family information to process SNAP, TANF, and/or Medicaid applications. Individuals can apply for one or more programs in a single application, and the module has a capability to interactively ask questions during the interview process based on the programs applied. Throughout the interview process, the modules call interfaces to verify information, as needed.
Eligibility Determination (Rules engine)	Rules base eligibility determination module to determine eligibility for main program and the sub programs to provide best possible benefits for the applicants. For example, when an individual applies for Medicaid, the rules engine cascade down through the Medicaid program hierarchy to provide best Medicaid coverage for the individual.
Benefit Issuance	This module manages daily or monthly issuances for SNAP/TANF/ERDC programs that are issued to individuals/vendors to support initial, monthly or supplemental payments.
Benefit Recovery	This module provides end to end management of SNAP, TANF, ERDC claims. It computes discrepancy, establish claim and start recoupment either through the benefit reduction process or other processes such as tax intercept.
Correspondence	This module manages generation of consolidated correspondences that are issued to the applicants and other stakeholders like vendors.
Task Management	A comprehensive task management module that supports key business processes. The module allows management of human services case management functions as a coordinated set of tasks.
Quality Assurance and Quality Control (QA/QC)	Module to create Random/Targeted sample universes for worker to review SNAP, TANF and Medicaid cases
Hearing/Appeals	Implements end-to-end work flows to support the hearings and appeal process. This module is also integrated with task management module.
Business Intelligence/Management Reports	This module implements operational reports, analytical reports and provides the framework and infrastructure required for several adhoc reporting needs.
Authentication and Identity proofing service	System for authorization and authentication services for users requesting access to various modules of the system.

DRAFT

Title	Description
Document Management Services	Implements electronic case files functionalities where all documents submitted to the agency are indexed and filed for easy access.
Mobile and Tablet Application	Mobile app with full application features for citizens, community partners (application assisters) to apply for health coverage
Self Service Portal for Human Service programs	Self Service Portal for citizens to apply for SNAP, TANF and Medicaid programs.
Medicaid Waiver Management Application (MWMA)	A complete waiver workflow management module to determine eligibility for Medicaid waiver programs and enrollment into waiver services.
Master Client Index module (MCI)	Master client index module which uniquely identifies citizens. It also provides a 360-degree view of citizen enrolled in public assistance program(s).
Interfaces	Implements all required State & Federal Interfaces. Interfaces module also implements an integration framework that supports several integration patterns.
Medicaid Managed Care Enrollment Management	Module for auto assignment and management of Medicaid enrollees in managed care plans (MCOs)

DRAFT

6.7 Appendix H – Kentucky to Oregon Functionality Comparison

As evident in the tables below, the programs are similar in their overall business requirements.

Supplemental Nutrition Assistance Program

Program Eligibility Comparison for Supplemental Nutrition Assistance Program

Eligibility Criterion	Kentucky Supplemental Nutrition Assistance Program	Oregon Supplemental Nutrition Assistance Program
Family Composition and Residency	• Recipients must live in Kentucky • Recipients must be U.S. citizens or certain legal foreign residents of the United States • A household is any person, family or group of people who live and buy and eat food together • The following people must be included in one household account, regardless of whether they purchase and prepare meals separately: o A spouse of any household member o Parents living with their natural, adopted or stepchildren who are age 21 or younger o Children younger than 18 who are dependents of an adult household member	• Recipients must live in Oregon; does not require intent to remain to establish residency • Recipients must be U.S. citizens or certain legal foreign residents of the United States • Filing group consists of members of a household group who choose to apply together or customarily purchase and prepare meals together • The following people must be included in one household account, regardless of whether they purchase and prepare meals separately: o A spouse of any household member o Parents living with their children who are under the age of 22 o Children younger than 18 who are financially dependent of an adult household member
Income	• Less than 130% of FPL for most households; 165% for elderly/disabled	• Less than 185% of 2015 FPL
Resources	• A household may have no more than $2,000 in assets OR $3,250 if a member of the household is 60 or older • Cash and bank accounts are counted; the dwelling, its contents and personal belongings, and vehicles are excluded	**Non-Categorically eligible households** • Have a resource limit of no more than $2,250 in resources OR $3,250 if a member of the household is 60 or older or disabled • Checking accounts, saving accounts, cash on hand, stocks and bonds, equity in vehicles, real property, etc., are counted. **Categorically eligible households** • Have a resource limit of $25,000 in liquid assets (checking accounts, savings accounts, cash on hand)
Employment	• Anyone in a household who is 16 to 60 years old and can work must register for, look for, and accept work. There are some exceptions to this requirement.	**OFSET (Employment and Training)** • Clients deemed mandatory because they do not meet an exemption must participate in a jobs activity for an eight week period every 12 months • Must accept bona fide offers of employment, even if it's part-time

DRAFT

Eligibility Criterion	Kentucky Supplemental Nutrition Assistance Program	Oregon Supplemental Nutrition Assistance Program
		ABAWDS (Abled Bodied Adults without Dependents) • Only applicable in Multnomah and Washington counties, as the rest of the state is under a waiver • Requires those aged 18-49 without a filing group member under the age of 18, who do not meet an exemption, to participate a minimum of 20 hours a week, an average of 80 hours a month of special work requirements
Benefits	• Benefits are issued on an Electronic Benefit Transfer (EBT) card • The benefit amount depends on income and household size. • Benefits may be used to purchase almost any food item, except ready-to-eat hot foods • Benefits may be used to buy seeds and plants to grow fruits and vegetables • Benefits may not be used to buy tobacco, alcohol, pet food, soap and other household products, medicines, and other non-food items	• Benefits are issued on an Electronic Benefit Transfer (EBT) card • The benefit amount depends on income, household size and minus any applicable deductions • Benefits may be used to purchase almost any food item with a nutrition label, except ready-to-eat hot foods • Benefits may be used to buy seeds and plants to grow fruits and vegetables • Benefits may not be used to buy tobacco, alcohol, pet food, soap and other household products, medicines, and other non-food items • There is a cash out program in Multnomah, Washington, Columbia and Clackamas Counties for seniors and people with disabilities
Certification Periods	• Varying lengths of certification periods depending on household characteristics • Periodic reports required at least once every six months, except for elderly or disabled (12 months)	• Varying lengths of certification periods depending on household characteristics • Periodic reports required at least once every six months, except for elderly or disabled (12 months)
Deductions	• Utilizes Standard Utility Allowance (SUA) instead of actual utility costs. • Students are ineligible unless working 20 or more hours per week or have a child under age 6 or are a single parent of a child under age 12 and going to school full time • Must meet with a worker or do interview over the phone. Must be able to provide identification, social security numbers for everyone applying, proof of who lives in your home (can be written statement), proof that you live in Kentucky, proof of child care costs or child support paid, proof of living expenses, and proof of money you have received in the past 60 days, including pay stubs.	• Utilizes Standard Utility Allowance (SUA) instead of actual utility costs • Students aged 18 to 49 attending a higher education program that requires a diploma or GED at least half time must meet additional special criteria • Must meet with a worker or do interview over the phone. Must be able to provide identification, social security numbers for everyone applying, verification of income for recent representative month, and for non-citizens proof of lawful immigrant status of each household member seeking benefits

DRAFT

Eligibility Criterion	Kentucky Supplemental Nutrition Assistance Program	Oregon Supplemental Nutrition Assistance Program
Other	• For ineligible non-citizens, income and deductions are prorated for both groups, which includes counting all income and deductions, or a prorated share. As well as, counting none of the income and deductions (with the allotment capped at the level that an all-eligible household would get), or a prorated share. • May disqualify applicants or recipients who fail to perform actions required by other means-tested program, primarily TANF.	• For ineligible non-citizens, income and deductions are prorated for both groups, which includes counting all income and deductions, or a prorated share. As well as, counting none of the income and deductions (with the allotment capped at the level that an all-eligible household would get), or a prorated share. • May disqualify applicants or recipients who fail to perform actions required by other means-tested program, primarily TANF.

DRAFT

Temporary Assistance for Needy Families

Program Eligibility Comparison for Temporary Assistance for Needy Families

Eligibility Criterion	Kentucky Temporary Assistance for Needy Families	Oregon Temporary Assistance for Needy Families
Family Composition and Residency	• Recipient must be a US citizen • Family must have a child under 18 living in the home OR Pregnant woman must be within one month of her due date • Children must be citizens or have eligible alien status • Children must be 18 years old or younger OR Children must be full time student with expected graduation date before age 20	• Recipient must be a US citizen or have qualified non-citizen status (may be waived temporarily if domestic violence is a factor) • Family must reside in Oregon • Family must have a caretaker relative and a child under 18 living in the home OR Pregnant woman must be within one month of her due date (may be earlier if domestic violence is a factor) • Caretaker relative must meet certain blood, adoption, marriage relationship requirements • Children must be citizens or have qualified non-citizen status • Children must be under 18 years old OR 18 years old and a full-time student in HS or GED • Until March 2016, a child must be deprived of parental support due to continued absence, incapacity, or under/unemployment
Income	• Your family must earn less than a certain amount of money per month	• To qualify for TANF, families must have very few assets and little or no income. • Your family must earn less than a certain amount of money per month
Resources	• Countable assets must be $2,000 or less and licensed vehicles needed for individual's subject to the work requirement may not exceed $8,500	• Countable assets must be $2,500 or less for applicants, for individuals in sanction status, and for families with no caretaker relative in the need group • Countable assets must be $10,000 or less for all other recipients • Exclude up to $10,000 equity value of all motor vehicles; remaining equity counts toward asset limit • Applicants and recipients must pursue alternative assets available to them • Applicants and recipients must assign their support rights to, and cooperate with, child support

DRAFT

Eligibility Criterion	Kentucky Temporary Assistance for Needy Families	Oregon Temporary Assistance for Needy Families
Employment	• Adults in families receiving cash assistance must work or participate in work related activities for a specified number of hours per week depending on the number of work-eligible adults in the family and the age of children	• Adults in families receiving cash assistance must work or participate in work-related activities for a specified number of hours per week depending on the number of work-eligible adults in the family, the age of children, and the family situation • Caretaker relatives must not be separated from their most recent employment due to discharge without good cause, or due to voluntarily quitting without good cause • Needy caretaker relatives must complete an employability screening
Benefits	• The current maximum monthly benefit for a family of 3 with a monthly gross income of $974, is $262	• The current maximum monthly benefit for a family of three is $506.
Certification Limits	• A family may receive benefits for no more than 60 total months. The 60 months needs not be consecutive	• Eligibility must be recertified every 6 months for families who have an open JOBS plan and are not participating or an active JOBS disqualification OR Eligibility must be recertified every 12 months • Recertification may be done earlier if deemed necessary by the case manager or to align with SNAP benefits • Heads of household may receive benefits for no more than 60 total months. The 60 months need not be consecutive. There are hardship exemptions that can stop the clock or extend benefits beyond 60 months. Children are not subject to the time limit.
Other	• Recipient must have a social security number	• Recipient must have a social security number

DRAFT

Employment-Related Day Care

Program Eligibility Comparison for Employment-Related Day Care

Eligibility Criterion	Kentucky Child Care Assistance Program	Oregon Employment-Related Day Care Program
Family Composition and Residency	• Recipient must be resident of KY • Child must be a U.S. citizen or a qualified alien • Child must be under 13 or be 13-19 and physically or mentally incapable of self-care • Recipient must be parent by blood, by marriage, or by adoption, or recipient must be the legal guardian or standing *in loco parentis* in relationship to child	• Recipient must be a resident of OR • Child must be a U.S. citizen or qualified non-citizen (includes non-citizens who are at risk for, or currently the victim of domestic violence, and victims of severe trafficking) • Child must be under 12 or be 12-17 and receiving care due to special circumstances and needs • Recipient must be a parent or caretaker who has care, control, and supervision of the dependent child (not required to be a relative)
Income	• Less than 150% of 2011 FPL (On-line calculator considers earned income, net child support, social security, TANF, and "other sources")	• (At initial certification) Less than 185% of 2015 FPL (Application asks for all sources) • (On-going and at recertification) Less than 250% of FPL and less than 85% of the state median income
Resources	• No requirement	• No requirement
Employment	• Must be employed and average at least 20 hours per week for a single parent or average 40 total hours per week for a couple OR A teen parent attending high school or pursuing a GED OR Participating in the Kentucky Works Program OR Have a child protective or preventive services authorization	• Must be employed (no minimum number of hours) and if a couple, both must work and schedules must overlap (unless one parent cannot provide care due to a verified medical condition) Oregon does not cover teen parents attending high school or pursuing a GED, participants in an Oregon employment program, or parents who have children in protective or preventive services authorizations.
Benefit	• The program pays the provider's bill—less a copay—up to a maximum rate that depends on the age(s) of the child and the provider type • Recipient pays a copay that depends on income plus any part of the provider's rate that exceeds the maximum rate	• The program pays the provider's bill—less a copay--up to a maximum rate that depends on the age(s) of the child, provider type, location, and special care needs • Recipient pays a copay that depends on family size and income plus any part of the provider's rate that exceeds the maximum rate
Other	• Must use a provider that is licensed, certified, and registered	• Must use a provider that meets DHS requirements (includes licensed and licensed exempt providers)

DRAFT

6.8 Appendix I – Alignment with Strategic Technology Plan

The table below summarizes the various components of the STP that an integrated eligibility system will satisfy.

Comprehensive View of Clients	o Supports use of a master client record o Single location for verified client data (e.g. financial, eligibility, benefit etc.) o Facilitate future view of an integrated case and payments through integration with legacy case management and payment systems
Trusted Sources for Health & Human Service Data	o Reduce data duplication and entry into multiple systems through single application for various programs. o Reduce data inconsistencies and inaccuracies through workflow automation o Trusted source for verified client data (e.g. financial, eligibility, benefit etc.) o Improve data access and data share across programs through integration with other DHS systems. o Role based data access and security improves data protection and compliance. o Consistent and accurate data reporting and analysis o Field-level audit and reporting capabilities
Business Automation	o Automated workflows using task queues inside the Worker Portal o Automated decision making and business rules using the business rules engine o Reduced manual and paper based processes o Real time determination of eligibility and benefit amount o Automated verification of client information o Interface with legacy systems
Connectivity Anytime, Anywhere, in Multiple Ways	o Applicant and worker portal allows real-time, 24/7 access to application, eligibility, and benefit information. o Clients can apply, update information, report change in circumstances, and communicate with their assigned case workers through multiple channels. o Multiple device and browser agnostic capability supports connectivity from anywhere
Dynamic Needs Supported by Seamless Services	o Industry best practices and standards based modular architecture and design (e.g., Service Oriented Architecture (SOA), Enterprise Service Bus (ESB) etc.) enables to leverage existing functionality and also expose functionality through web services

DRAFT

6.10 Appendix J – Responsibilities

Agency and Contractor responsibilities as identified in the SI SOW #2, Amendment #4, are grouped by category below.

Project Area	Agency Responsibilities	Contractor Responsibilities
Planning & Project Management	Participate in and support timely and satisfactory completion of all Contractor Tasks included in the scope described in Section 2.1 of this SOW #2 • State-designated Project Director, in consultation with DHS leadership and the Contractor's Engagement Manager, will have overall responsibility and authority for driving all Project decisions; reviewing and approving all Deliverables; facilitating discussion and communication among the parties as needed; and securing any required State or third-party resources • Manage Joint Agency Governance Structure for ONE/Integrated ONE system (including vendor management structure)	Perform timely and satisfactory completion of all Contractor Tasks included in the scope described in Section 2.1 of this SOW #2 • Engagement Manager, in consultation with Contractor leadership and State Project Director, will have overall responsibility and authority for driving all Contractor decisions; facilitating discussion and communication among the parties as needed; and securing any required Contractor resources. Meet on an agreed upon frequency with key stakeholders to review project performance and resolve issues between the Contractor and the State

Amendment 4
DASPS-1439-16

Page 95 of 122

Project Area	Agency Responsibilities	Contractor Responsibilities
	• Subject matter specialists assigned to the Project will have the necessary time commitments to attend meetings, workshops and other Tasks. DHS and OHA personnel will have the role and authority to represent their various functions, and they will also be responsible to speak for, approve on behalf of, and communicate to and from their respective business units for the Tasks defined in SOW #2 • Allocate State resources based on work streams, as defined in the IPS, to allow multiple concurrent sessions to occur during SOW#2. Based on the current high-level timeline outlined in Appendix A, up to three concurrent work streams may be actively engaged at a point in time during the SOW #2 • Contribute to development and management of the IPS: o Identify State-owned tasks and work with the PMO to finalize relevant attributes required for each task o Collaborate with Contractor on understanding Contractor tasks and their attributes in the IPS, integrate timing between State-owned and Contractor tasks o Report progress on State-owned tasks weekly per the processes and cadence in the IMPF o Work collaboratively to identify corrective actions for slippages while reducing impact upon go-live dates • Manage and share schedule for work with implementation dependencies (i.e. legacy design and development). • Complete assigned tasks in the approved IPS in accordance with the baseline finish dates • Analyze Project risks and issues and work with the Contractor to approve issue resolutions and risk mitigations. Communicate risk and issue status discussed at the Executive Steering Committee meetings in consultation with the Contractor • Review and approve the proposed Deliverable Expectation Documents (DEDs) and Deliverable documents, consistent with the Project Management Plan	• Participate as requested in Joint Agency Governance Structure for ONE/Integrated ONE system • Contractor personnel assigned to the Project will have the appropriate experience, availability and skills to perform their function(s) • Follow established onboarding and off boarding processes, complete required privacy and security training; comply with building and server access and use rules • Allocate Contractor resources based on work streams to allow multiple (up to three) concurrent sessions to occur during SOW#2. Propose meeting schedule that takes into consideration the number of concurrent meetings due to State resource availability during the preparation period of the SOW #2 • Develop the IPS by: o Identify Contractor-owned tasks and work with the PMO to finalize relevant attributes required for each task o Collaborate with State on understanding State tasks, managed by the State and their finalization in the IPS; integrate timing between Contractor and State-owned tasks o Reporting progress on Contractor-owned tasks weekly per the processes and cadence in the IMPF o Work collaboratively to identify corrective actions for slippages while reducing impact upon go-live dates • Complete assigned tasks in the approved IPS in accordance with the baseline finish dates • Identify and help mitigate risks and issues related to the Project (scope, schedule, resources), using the agreed-upon Project processes • Prepare a Deliverable Expectation Document (DED) and submit for

Amendment 4
DASPS-1439-16

Page 96 of 122

Project Area	Agency Responsibilities	Contractor Responsibilities
	• For each deliverable, participate in working sessions to provide input on deliverable content, provide direction, and vet content as it is being development • Analyze and approve proposed Project scope of work changes. Approve Change Orders and operational procedure changes • Coordinate the necessary State and federal reviews and assessments • If there is a conflict among the governing regulations regarding a specific standard, State will provide the statutory interpretation to resolve the perceived conflict to Contractor • Provide 24/7 access to facilities, servers, and environments for Contractor's Project team. This is subject to the planned maintenance and downtime necessary for servers and environments. Sufficient system and network access will be provided for a minimum number (##) Contractor resources • Maintain Project SharePoint as central document repository • Use PMC in accordance with processes documented in the approved PMFP • Follow Project management and quality management processes as defined in PMFP • Consult with the Contractor on quality improvement measures and determination of areas to be reviewed • Provide notice to the Contractor of inadequate performance; request, review, approve, and monitor proposed corrective actions taken by the Contractor • Protect any Confidential Information, including that of citizens and employees (e.g. limit the amount of data provided to Contractor, use secure channels or ways of sharing data, protect data that resides within the State's operating and IT environments). DHS/OHA will provide Contractor with access to conversion data on a State-provided network device. The State will not knowingly provide PHI, PII or FTI data, except as provided for data conversion activities at Contractor's request and as requested in writing by the Contractor's Project Manager	Acceptance from the State for the content and format of each Deliverable at least two weeks before beginning significant work on the Deliverable as per the dates in the approved IPS (or Section 3 until the IPS Acceptance occurs). • Prepare proposed Project scope of work changes, initiate Change Orders, and recommend operational procedure changes • Participate in State and federal reviews and assessments, as necessary • If there is a conflict among the governing regulations regarding a specific standard, Contractor shall identify perceived conflict and will seek guidance from Agency • Contractor is also responsible for ensuring that personnel use reasonable efforts to maintain property • Submit formal Project documentation to the State SharePoint domain, with access provided to Contractor and State staff. Access restrictions may apply to some documentation such as folders containing security, financial or contract information. All documentation restrictions shall be approved by the State Project Director prior to loading of documents on the SharePoint • Maintain PMC for Project • Implement and maintain Project management and quality management processes as defined in PMFP • Consult with the State on quality improvement measures and determination of areas to be reviewed • When provided notice by Agency of inadequate performance, Contractor will identify, submit for Acceptance, and implement proposed corrective actions to be taken by the Contractor • Handle any Confidential Information to which Contractor has access, in

Project Area	Agency Responsibilities	Contractor Responsibilities
		accordance with the terms of the Contract
Detailed Design Phase	Participate in and support timely and satisfactory completion of all Contractor Tasks included in the scope described in Section 2.2 of this SOW #2 • Actively participate in functional and technical design sessions based upon detailed schedules • Support development of design specifications with functional and technical SMEs that are familiar with legacy systems • Based upon approved design specifications, develop technical design for legacy side of interfaces, legacy application changes, and conversion extract routines	Perform timely and satisfactory completion of all Contractor Tasks included in the scope described in Section 2.2 of this SOW #2 • Schedule and lead functional and technical design sessions with State SMEs • Develop design specifications that describe interfaces (including file formats) and conversions (including file formats) • Support State technical resources in developing technical designs for legacy side of interfaces, legacy application changes, and conversion extract routines
Development	Participate in and support timely and satisfactory completion of all Contractor Tasks included in the scope described in Section 2.3 of this SOW #2 • Review and provide inputs to the Application Development Plan • Provide inputs to functional clarifications and decisions raised during the course of Application Development • Develop interface components per design specified in the Interface Design Control Document (ICD) associated with connecting legacy systems and coordinate with interfacing agencies as defined in Appendix B of this SOW #2. • Provide files generated per the specifications of the interface components in accordance with Accepted design, for integration during development phase. • Provide data extraction files based upon Accepted Data Conversion Plan. • State will provide sample legacy data extracts with confidential information removed or masked for data quality assessment purposes • State SMEs will confirm data models, data definitions and provide available data dictionary documentation for source systems • Perform purification/cleansing of data required for conversion in legacy systems	Perform timely and satisfactory completion of all Contractor Tasks included in the scope described in Section 2.3 of this SOW #2 • Develop the Application Development Plan • Develop the System in accordance with the Accepted Functional Design Document and proactively raise necessary clarifications to the State business and technology teams as applicable. • Recommend specifications for interfaces between the Integrated ONE system and in-scope legacy systems • Execute validation routines against conversion extracts and provide reports of data that fails validations • Advise State in defining data extract criteria for each legacy system • Assist with obfuscation protocols if needed • Advise State in conducting purification/cleansing of data in legacy systems required for conversion • Assist State by implementing Accepted conversion software (Deliverable 2.3.3) to support legacy data conversion and cleansing

Project Area	Agency Responsibilities	Contractor Responsibilities
	• Develop daily extracts to support interim conversion process based on the Accepted Data Conversion Design or addendum. • Process the flagging files generated post conversion to update information in the legacy source systems per the Accepted Legacy Data Conversion Design Deliverable or addendum.	• Generate flagging files post conversion run to indicate successful conversion • Develop conversion routines to support the interim conversion process • Perform calculations, modifications, or sorting required to further identify and extract data from the State-provided data files to support phased rollout, including 'other related individuals' tied to converted data.
Testing	Participate in and support timely and satisfactory completion of all Contractor Tasks included in the scope described in Section 2.4 of this SOW #2 • Participate in mock conversions by providing extracts, reviewing error reports, and validating converted data • Participate in security testing of IAM COTS products and support determination of recommendations and execution of corrective actions resulting from security tests • Coordinate with stakeholders that are participating in test activities to connect their system test and User Acceptance test environments with the Integrated ONE system test and User Acceptance Test Environments, respectively. • Document its test plan, including tests cases based upon the Accepted design and execute Pre- and User Acceptance Testing per the current Accepted schedule in IPS • Plan review sessions, conduct review of test plans SIT test plans, and test cases in accordance to the timeline defined in the current Accepted IPS • Participate in performance, stress/load, security, and end-to-end system integration test activities as defined in the applicable Accepted test plans • Review System Integration Test results and prioritize items for remediation or determine risk acceptance • Review in accordance with the Acceptance provisions the Test Plan(s) and other Testing Phase Deliverables • Schedule, coordinate, and manage IV&V independent testing to support alignment with	Perform timely and satisfactory completion of all Contractor Tasks included in the scope described in Section 2.4 of this SOW #2 • Conduct security testing of IAM COTS products • Provide Agency and Agency partners that are participating in System test activities with access to relevant Test Environment(s) and coordinate testing schedule in support of data exchange. Test Plan and Test Cases as documented in relevant Deliverables will also be made available as additional references • Conduct and complete, in accordance with Agency accepted Test Plans, the performance, stress/load, security, and end-to-end system Integration Tests • Conduct test plan review sessions and finalize the test cases • Conduct testing activities defined in the Accepted test plans and report Test results for QA review • Update the RTM Deliverable to reflect refinements identified during system integration Testing that are mutually determined by the parties to be necessary to exit system integration test • Provide Defect triage, reporting, and the necessary application development support to the State in Pre-UAT and User Acceptance Testing as specified in Section 2.4 of the SOW • Participate in IV&V independent testing by preparing the system, provisioning tester access, and reviewing test results

Project Area	Agency Responsibilities	Contractor Responsibilities
	the approved design and adherence to approved IPS go-live dates	
Security	Participate in and support timely and satisfactory completion of all Contractor Tasks included in the scope described in Section 2.5 of this SOW #2 • State, DHS and supporting agencies will participate in work sessions and review sessions for the system Security Plan (SSP), Privacy Impact Assessment (PIA), Plan of Action & Milestones (POA&M) and Information Security Risk Assessment (ISRA) documents and assign owners, develop work plans, and resource estimates to address gaps that are identified. DHS will review and approve final CMS SSP and POA&M to CMS • Obtain required training on the Security related COTS products (CA IAM suite, QRadar, DataPower and Optim) from product vendor or another Vendor • Hardening server and desktop operating systems and network devices for the Integrated ONE system including patch management and perform penetration testing of the hosted infrastructure according to standards that align with those listed in NIST Vulnerability Security Configuration Standards as required for CMS security requirements • Lead the communication with CMS related to the review of security artifacts as part of the ATC process • Obtain and configure Secure Socket Layer (SSL) certificates on the Integrated ONE system infrastructure • Provide input to the Application Configuration Management Plan and Technology Management Plan deliverables for infrastructure security components of the DHS solution (e.g. Firewalls, Intrusion Detection/Intrusion Prevention systems, Anti-Virus, etc.) • Develop agreements with Federal Data Services Hub (FDSH) including the Interconnection Security Agreement (ISA), Business Associate Agreements (BAA's), Memorandums of Understanding (MoU's), Data Exchange Agreement (DEA), and Computer Matching Agreement (CMA) • Create or modify security and privacy policies and/or procedures for the State, with the	Perform timely and satisfactory completion of all Contractor Tasks included in the scope described in Section 2.5 of this SOW #2 • Develop the system Security Plan, Plan of Action & Milestones), Privacy Impact Assessment, and Information Security Risk Assessment in accordance with CMS MARS-E 2.0 requirements. Prepare an initial SSP and a Final SSP and POA&M (which includes the input from SAR, ISRA, and PIA) in preparation of sending to State Acceptance for CMS submission • Provide suggestions for potential vendors, if required • Provide compliance requirements for operating systems and standards for infrastructure hardening components based upon CMS/NIST configuration standards • Provide security support for the artifacts as required • Provide server information for supporting the request for SSL certificates • Develop the Application Configuration Management Plan and Technology Management Plan • Provide input as required from the SSP documentation for the ISA and data agreements for the Integrated ONE system • Address questions related to the security requirements as required • Participate in the security sessions to review questions and direction from CMS and the State that impact the CMS SSP and security related artifacts as required for ATC • Collaborate with independent vendor hired to conduct independent security testing by preparing for and supporting test execution

Project Area	Agency Responsibilities	Contractor Responsibilities
	exception of operational procedures for security products installed by Contractor • Conduct review sessions with CMS and State Security Information Security Officer (CISO) • Hire an independent vendor to conduct independent security testing per relevant federal and State requirements • Hire an Independent third-party vendor to be responsible for completing the Security Assessment Report (SAR) • Maintain and operate DHS security products other than the CA IAM products and associated supporting components • Submit quarterly updates of the POAM, and annual updates of the ISRA and PIA, following obtainment of Authority to Connect for the Integrated ONE system	• Provide information needed to support the third party security assessments as required by CMS and FNS. • Maintain and operate CA IAM • Provide information for security gaps assigned to the Contractor for responsibility for remediation identified on the POAM • Perform design, configuration, testing and integration of security COTS products (e.g., CA IAM, QRadar, DataPower, Optim) with the Integrated ONE system components • Design, build test and deploy in-scope application security roles • Perform application vulnerability and application security code testing for the Integrated ONE system and provide support for tracking of open application vulnerabilities and support for remediation
Infrastructure	Participate in and support timely and satisfactory completion of all Contractor Tasks included in the scope described in Section 2.6 of this SOW #2 • State will be responsible for acquisition and configuration of servers and operating software needed to stand-up new environments for the Integrated ONE system based upon the approved Technology Management Plan and Contractor Specifications • The State will coordinate the timing of hardware acquisition and environment preparation with the Contractor • Provide access to Contractor in order to enable the hardware and software necessary to use the Integrated ONE systems environments • Implement firewall rules and network access control list modifications to accommodate the flow of network traffic for the security products to function to address business and regulatory requirements • Maintain the Hardware and Software at the SDC including OS-level, and software licensing, and patches for such as maintained by State (for example, Active Directory, DataPower, etc.) • Plan, install and verify OS patches, security system patches, and hardware related upgrades	Perform timely and satisfactory completion of all Contractor Tasks included in the scope described in Section 2.6 of this SOW #2 • Contractor will be responsible for installation and configuration of database, application, and COTS software into new environments • The contractor will participate with State in the coordination of the timing and availability of new environments • Contractor will send State requests for access to the Integrated ONE system environments with reasonable prior notice • Document infrastructure gaps to be addressed to support the flow of network traffic for the security products based upon business and regulatory requirements • Maintain the COTS products and patches in collaboration with State for products identified in the Accepted Technology Management Plan • Plan, install and verify COTS mutually agreed upon patches and upgrades

Amendment 4
DASPS-1439-16

Page 101 of 122

Project Area	Agency Responsibilities	Contractor Responsibilities
	required to maintain ETS standards including existing ONE system environments, VDI infrastructure, and end user desktops • Agency will work with Contractor to reasonably schedule downtime for system maintenance and will provide prompt notification of emergency unplanned maintenance • Provision compute and network capacity for development machines (VDI) as defined in the Accepted Technology Management Plan to enable onsite and offsite team members' daily activities with reasonable hardware/virtual machine performance • Collaborate with State ETS and Contractor to configure and monitor server backups and conduct server recovery tests	required to maintain vendor support without impacting the approved IPS • Work with Agency to reasonably accommodate requested downtime for scheduled maintenance • Create and submit Deliverables as per approved timeline and DEDs • Collaborate with State and provide inputs regarding performance of development machines (VDI) and document the finalized capacity requirements in Technology Management Plan. • Conduct application and COTS validation after successful recovery of servers
Business Operations Implementation	Participate in and support timely and satisfactory completion of all Contractor Tasks included in the scope described in Section 2.7.1 of this SOW #2 • Provide leadership direction, input and session participants necessary to support the development, execution, evaluation, and Acceptance of the Business Operations Implementation Services plans • Make cross-program operational and policy SMEs available for to-be process model working sessions. SMEs will have detailed knowledge of current business processes and preferences for the proposed business processes for the Integrated ONE system • State leadership will be closely involved to confirm key decisions made and help assess and accept their impact on the current system and business operations • Revise and publish policy changes as required to align with approved system and process designs • Leadership will communicate any modifications to future DHS vision, including timing and schedule modifications • Identify resources for business operations implementation services deliverables so that they align with the on-going work of the DHS Business Transition Team responsible for integration of OHA to DHS operations • Responsible for communicating in a timely manner any decisions regarding integration of	Perform timely and satisfactory completion of all Contractor Tasks included in the scope described in Section 2.7.1 of this SOW #2 • Lead business transition planning tasks • Discuss Integrated ONE program policies and operational practices, and help document key transition items • Review and notify the state of any inconsistencies on Policy draft alignment with System design • Coordinate with functional team to communicate potential design impacts as a result of business process redesign

Project Area	Agency Responsibilities	Contractor Responsibilities
	OHA operations into DHS operations including timing of activities • Responsible for integrating current OHA eligibility center operations to DHS operations • Provide operational performance data including baseline data for SSP, APD/AAA offices to support Business Operations Implementation services activities	
People Readiness	Participate in and support timely and satisfactory completion of all Contractor Tasks included in the scope described in Section 2.7.2 of this SOW #2 • Collaborate with the Contractor People Readiness team to plan the people transition to Integrated ONE by providing input into and approval of the People Readiness and Communications Support Plan (PR&CSP) deliverable. • Collaborate with the Contractor People Readiness team to provide input into the ongoing quarterly updates of the PR&CSP • Lead the people readiness activities, per the strategy defined in the People Readiness and Communications Support Plan • Identify stakeholders with knowledge and availability to execute the people readiness activities, per the strategy defined in the People Readiness and Communication Support Plan • Develop and maintain primary responsibility for executing an Integrated ONE system Communications Plan • Provide guidance and requested information (demographics, facilities, technical, current skills) as input to Training Plan • Support development of training material based upon the approved Training Plan and identify resources for any review or dry-runs of content under development • Provide support for determination of training data • Identify and staff sufficient trainers to receive train-the-trainer training • Conduct sufficient instructor lead training deliveries to support the approved IPS • Provide Learning Management System (LMS) or other training materials storage and delivery	Perform timely and satisfactory completion of all Contractor Tasks included in the scope described in Section 2.7.2 of this SOW #2 • Lead development of the People Readiness and Communications Support plan deliverable • Collaborate with the State People Readiness team to provide quarterly updates of the PR&CSP • Collaborate with the State by attending events and meetings where People Readiness activities are occurring • Collaborate with the State People Readiness Team on the execution of the people readiness activities, such as providing feedback on State People Readiness materials • Develop Training Plan, describing the approach, the curriculum (including description, durations, delivery method, audience, and learning objectives of each course); includes train-the-trainer approach and roles and responsibilities for training material development and training delivery; materials to be provided from the Integrated ONE perspective and designed to be incorporated into State's comprehensive training that combines information technology, policy, and practice • Develop training material based upon the approved Training Plan and schedule reviews or dry-runs of content under development o Coordinate the identification and population of training data • Leverage State designated storage and delivery mechanisms for training

Project Area	Agency Responsibilities	Contractor Responsibilities
	mechanism and any system requirements needed for coordinated development • Provide Train-the-trainer and End User Training scheduling tools; manage registration for TTT and End User Training class delivery; train Contractor resources on provided tools; and monitor and confirm WBT training compliance • Participate in a pilot of the Training program prior to Train-the-trainer launch • Provide the necessary facilities, network access, printed materials and tools to support Train-the-trainer and End User Training sessions • Deliver end user training based upon the approved IPS and communicate feedback on training results and issues • Provide and prepare 1 business process and policy SME for each class during Train-the-trainer and end user training sessions • Collaborate with the Contractor People Readiness team in the development of the Phased Rollout Support Plan deliverable • Provide access to accurate and timely data on headcount in each of the on-site support offices for planning and deployment • Deploy State resources to support the delivery of on-site support 4 weeks after Pilot and for each go-live, per Contractor and State agreed upon support resources and timeframes • Collaborate and Coordinate with the Contractor People Readiness Team to prepare resources to provide onsite support	materials and web-based training content • Leverage provided Train-the-trainer scheduling tool to schedule Train-the-trainer sessions • Deliver a pilot of the train-the-trainer program to designated State trainers, prior to UAT as per the Accepted Training Plan Deliverable. • Deliver Train-the-trainer training to designated State trainers, prior to Pilot go live as per the Accepted Training Plan Deliverable. • Provide feedback to the State regarding document training delivery logistics checklist, which defines requirements on facilities, printed materials, and tools • Collaborate with State to address issues related to the training environment and questions about the training materials during End User Training • Provide TTT reference materials and conduct a review session to prepare State business process and policy SMEs who will participate in training delivery • Lead the development of the Phased Rollout Support Plan deliverable. Collaborate with the State Business Transition Team to plan on-site support needs prior to, during and immediately after go-live • Deploy Contractor resources to support the delivery of on-site support for the duration of the Pilot and 4 weeks after go-live for each wave, per Contractor and State agreed upon support resources and timeframes. The following number of contractors will be deployed: o Pilot + ONE Upgrade: up to 11 o Wave 1: up to 31 o Wave 2: up to 33 o Wave 3: up to 26

Project Area	Agency Responsibilities	Contractor Responsibilities
		• Prepare State and Contractor resources in the activities to be performed at each site
System Implementation	Participate in and support timely and satisfactory completion of all Contractor Tasks included in the scope described in Section 2.7.3 of this SOW #2 • Establish criteria for go/no-go implementation decisions and make go/no-go implementation decisions as appropriate • Provide resources to support the development of cutover plan • Provide resource to support the approved cutover plan • Provide a Command Center Manager with the authority to make decision while the Command Center is effective	Perform timely and satisfactory completion of all Contractor Tasks included in the scope described in Section 2.7.3 of this SOW #2 • Participate in and make recommendations as input into go/no-go decisions • Develop cutover plan in collaboration with State • Lead execution of cutover based upon approved cutover plan • Provide leadership presence onsite for command center meetings.

Table 4: Responsibilities

Parking Lot

Integrated ONE System Functionality includes:

- Workflow automation inside the Worker Portal
- Automated business rules using Corticon Rules Engine – including real time eligibility determination to support the Applicant Portal
- Automated notice generation using HP ExStream
- Address validation service using Melissa Data
- Automated verification interfaces with the Federal Data Services Hub, the state Medicaid Enrollment System (MMIS), and the Oregon Employment Department
- Automated Bi-Directional Account Transfer with the FFM & Minimum Essential Coverage check for Medicaid benefits
- Integration with the existing document management service provided by DHS Imaging and Records Management System
- Integration of Computer Associates Identity & Access Management Solution to provide single sign-on integration with OHA's Active Directory

3.6.2 Key Performance Indicators: Measures of Business Success

The following Key Performance Measures are routinely collected by DHS's Performance Excellence Office. Implementation of a new Integrated Eligibility system is expected to "move the needle" on these indicators in the desirable direction:

- Customer Satisfaction: % of DHS Customers that rank the quality of DHS Service as good or excellent
- Employee Engagement: % of DHS staff that report medium-high or high level of engagement
- Accuracy:
    - % of SNAP PER QC reviews for SSP branch offices where accuracy measures 95% or better
    - % of TANF QC reviews for SSP branch offices where accuracy measures 95% or better
    - % of ERDC QC reviews for SSP branch offices where accuracy measures 95% or better
    - % of APD QC and QA reviews for APD branch offices where accuracy measures 95% or better
- Timeliness:
    - % of new SNAP Expedited and Non-Expedited applications meeting processing timelines
    - % of new SNAP Benefits issued within 0-1 days
    - % of APD cases with a redetermination date that is current or less than 1 month overdue compared to the total cases with a review date

3.6.3 Measures of Project Success and Completion

Project Success Measures:

•

• Project is completed on time in comparison to the latest approved baseline schedule.
• The last approved baseline schedule does not deviate by more than 10% from the schedule projected at Stage Gate 3.

DRAFT

• Project is completed within budget in comparison to the latest approved baseline budget.
• The latest approved baseline budget does not deviate by more than 10% from the budget projected at Stage Gate 3.
• The system satisfies all of the requirements in the Requirements Traceability Matrix at Stage Gate 3 as subsequently modified through the project's change management criteria.
• At the close of the warranty period, there are no Critical or Major defects remaining and the ratio of Minor defects remaining to the size of the system is below industry averages.

Project Completion Criteria
The project will be complete when all of the following are true:
• System has been in production through a six-month warranty period
• All contracted work has been completed and accepted, and final payments have been made to all vendors
• The Office of the State Chief Information Officer and the Legislative Fiscal Office have approved the project's Stage Gate 4 submission
• A steward for Operations and Maintenance is identified and has formally accepted handoff of the system
• The position responsible for post-project monitoring and reporting on measures of success has been identified and its occupant has formally accepted the handoff
• Final reports required by funders of the system, if any, have been delivered and accepted
• Project documentation has been assembled and archived consistent with agency and state records retention policies

PROBLEM STATEMENT ***(Identify problem, opportunity, or mandate [legislative, Federal, etc.]. Include summary statement of business process(es) and stakeholders affected.)***

Background

Oregonians do not currently have the ability to apply for Non-Modified Adjusted Gross Income (Non-MAGI) Medicaid through a self-service portal via an on-line application. Additionally, while individuals currently may utilize an on-line application for Oregon's Supplemental Nutritional Assistance Program (SNAP) or with manual process supplementation for Temporary Assistance to Needy Families (TANF) or Employment Related Day Care (ERDC), the systems supporting the application does not link to a benefit authorization system. Department of Human Services (DHS) eligibility workers must engage in manual application processing activities, with little to no automation. Changes to regulations from federal agencies present challenges for eligibility workers when applying those regulations to each applicant's unique situation.

Oregon Department of Human Services seeks to reduce manual processing and reduce the reliance on legacy systems in support of Non-MAGI Medicaid, SNAP,TANF and ERDC eligibility determinations. The purpose of this project is to assess possible alternatives for the automation of eligibility processing, determine and develop the legacy system interface requirements to reduce or eliminate manual input, and provide a web-based front-end applicant portal to support customer self-service for at-minimum, Non-MAGI Medicaid, and potentially other human service programs (i.e., SNAP, TANF, Employment Related Day Care).

Opportunity Definition

The Oregon Health Authority (OHA), the state's designated Medicaid agency, has recently implemented a new system for MAGI Medicaid eligibility determinations. That system is called Oreg**one**ligibility, or ONE, and is the result of transferring the State of Kentucky's Affordable Care Act compliant state-based marketplace solution (*kynect*) for use in Oregon.

In late 2015, Kentucky rolled out an extension to the system that OHA has transferred to Oregon. That extension supports eligibility determinations for the following programs:

- Supplemental Nutrition Assistance Program (SNAP)
- Temporary Assistance to Need Families (TANF)
- Medicaid Waiver Management Applications
- Child Care

Given CMS direction that it will only provide enhanced funding match for extending the ONE system, the time is clearly right to consider extending ONE to support Non-MAGI Medicaid eligibility determinations and eligibility determinations for other DHS Human Service programs too.

The high-level business objectives driving this effort are:

- Allowing applicants to apply for benefits on-line, reducing the need to travel to local offices and reducing the need to provide duplicate information when applying for benefits from more than one program
- Automating manual processes in order to:
    - Reduce the amount of time that elapses between completing an application and making an eligibility determination
    - Reduce the amount of time that staff must spend creating, reviewing, and acting on each application
    - Reduce the rates of errors in making eligibility determinations
- Allowing for seamless sharing of information and transfer of cases among program staff

On August 10, 2011, three federal agencies (Centers for Medicare and Medicaid Services (CMS), Food and Nutrition Services (FNS) and the Administration for Children & Families (ACF)) announced a time-limited, specific exception to the cost allocation requirements set forth in Office of Management and Budget (OMB) Circular A-87. These provisions generally require the costs associated with building shared state-based information technology systems to be allocated across all benefitting programs. The exception reflected a federal focus on streamlining enrollment in health and human services programs while leveraging funding efficiencies at the state-level. On July 20, 2015, the three agencies extended the exception for an additional 3 years, through December 31, 2018, and provided additional guidance on how states may take advantage of it to leverage these investments to better serve consumers' multiple programs and needs.

AGENCY ANALYSIS ***(Identify alternatives considered and significant reasons for the alternative chosen. Include summary of agency analysis related to cost/benefit, feasibility, risk assessment, impacts on current environment, and other relevant business factors.)***

The CMS policy to fund only a single financial eligibility system per state and the fact that Medicaid Title XIX will provide 90 percent of the funds needed for the system means that Oregon's only viable alternative to the status quo must include enhancement of the ONE system to support Non-MAGI Medicaid eligibility determinations. DHS has explored four possible courses of action, including continuing in the current state. These are the alternatives:

Alternative #1: Implement Non-MAGI Medicaid Eligibility Determination into the ONE System
Under this alternative, the ONE system would be extended to support Non-MAGI Medicaid eligibility determinations and service authorization to community-based care programs only. This approach limits the scope of DHS programs that would be affected. It requires transfer of the Kentucky system, removal or disabling of the functionality in that system supporting

programs like SNAP and TANF, and customization for Oregon's Non-MAGI Medicaid program. This approach would use 90/10 federal funding.

Alternative #2: Implement Integrated Eligibility Determination into the ONE System
Under this alternative, the ONE system would be extended to support Non-MAGI Medicaid eligibility determinations and SNAP, TANF, and ERDC determinations, as well as service authorizations for community-based care programs. This approach involves a wider range of DHS programs. It avoids the risk and expense of removing functionality for these programs from the Kentucky system. It requires potential customization for a larger number of Oregon programs. This alternative could be rolled out all at once or it could be phased-in program-by-program. This approach would use Medicaid 90/10 federal funding to the benefit of other programs, which would only have to fund parts of the solution that were benefitting those programs exclusively.

Alternative #3: Acquire External Eligibility Determination Services from another State
Just like Alternative #1, this alternative would extend ONE to support Non-MAGI Medicaid eligibility determinations only. Like Alternative #2, it would support eligibility determinations for the SNAP, TANF, and ERDC programs. However unlike Alternative #2, that support would be outside of ONE. In this alternative, DHS would contract with another state to support SNAP, TANF, and ERDC eligibility decisions. At a minimum, that would involve modifying the partner state's system for those programs to accept applications from Oregonians and make eligibility determinations based on Oregon's rules. Limiting factors include lack of integration of Non-MAGI Medicaid program eligibility with MAGI program eligibility and recording of Oregon-specific MAGI, CHIP, and CAWEM rules. The project team was unable to identify a state where this approach is being used. Therefore, cost estimates for this alternative were unattainable.

Alternative #4: Do Nothing
Under this alternative, there would be no additional investment in the ONE system and no acquisition of eligibility services from another state. Improvements to current processes would be limited to those that arise naturally through the DHS's continuous improvement program. This alternative means losing the opportunity for enhanced federal funding to improve IT systems and thus results in greater cost in state funding for future enhancements.

Section 4 of the attached business case describes the costs, benefits, and risks of each of the alternatives. They are summarized here:

Cost, Benefits, and Risks Summary

Alternative	Project Cost	Program Benefits from Project	Overall Risk
1. Implement Non-MAGI Medicaid Eligibility Determinations	~$80.3M	Medicaid	Low
2. Implement Integrated Eligibility Determinations	~$126.1M	Medicaid, SNAP, TANF, ERDC	Medium
3. Acquire Eligibility Determination Services from Another State	Unknown	Medicaid, SNAP, TANF, ERDC	High
4. Do nothing	~$4.0M		High

Based on that analysis, DHS intends to pursue Alternative #2, Implement Integrated Eligibility Determination. This means extending the ONE system by transferring, configuring, and customizing Kentucky's Non-MAGI Medicaid, SNAP, TANF, and ERDC eligibility system to Oregon.

PROJECT SUMMARY ***(Provide summary narrative of the current project. Include summary statement of work, community/stakeholder impact, enterprise implications and opportunities, and alignment with the*** **State of Oregon Enterprise Information Technology Strategy** ***and published enterprise architecture and standards.)***

Section 5 of the business case sets out a tentative schedule that would implement the expanded, integrated eligibility determination system in mid-2018. These are the key project milestones.

Schedule Milestone v1.2	**Expected Date**
Stage Gate 2 Approval	December 2015
Independent Quality Assurance Vendor Under Contract	December 2015
Stage Gate 3 Approval	February 2016
System Integrator Under Contract/Fit-Gap Analysis Begins	March 2016
Fit-Gap Analysis Complete; Design/Development Begins	July 2016
Re-Baseline Based on Fit-Gap Findings	August 2016
Design and Development Iteration #1 Complete	April 2017
Design and Development Iteration #2 Complete	July 2017
Design and Development Iteration #3 Complete	November 2017
End-to-End User Acceptance and Regression Testing Complete	May 2018
Pilot Implementation Begins	July 2018
Roll Out Begins	September 2018
Stage Gate 4 Approval	June 2019
Project Complete	June 2019

Schedule Milestone v2.0 Re-Baseline	Expected Date
Project Planning Begins	July 2015
Stage Gate 1 & 2 Submission	December 2015
Stage Gates 1 & 2 Approval; Federal Advance Planning Document Approval	February 2016
System Integrator under Contract; Fit-Gap Analysis Begins	April 2016
Stage Gate 3 Submission	July 2016
Stage Gate 3 Approval, LFO Approval, Federal Approval of DDI SOW	September, 2016
Design Phase (Core)	September 2016 - March 2018
Iteration #1 Development & SIT Phase	April 2017 – September 2018
Iteration #2 Development & SIT Phase	April 2018- March 2019
End-to-End User Acceptance Testing Prep & Execution	October 2018- August 2019
OHA Upgrade & Production Pilot Period	September 2019-December 2019
Phase Implementation (3 waves)	February 2020 - July 2020
Roll Out Complete	August 2020
Stage Gate 4 Approval; Project Complete	January 2021
Warranty Complete	August 2022

These are the principal stakeholders:

- ***Oregonians applying for Non-MAGI Medicaid, SNAP, TANF and ERDC benefits***
- ***DHS Aging and People with Disabilities (APD) Field Offices*** statewide & ***Area Agencies on Aging (AAA)*** which are typically county-chartered organizations and under contract with the department. Collectively they deliver DHS's Non-MAGI Medicaid program including making initial and ongoing financial eligibility determinations for people over the age of 65 and people with disabilities who need assistance.
- ***DHS Self-Sufficiency Program (SSP) Field Offices*** which deliver DHS' SNAP/TANF/ERDC eligibility determinations
- ***Federal Partners, including Centers for Medicare and Medicaid Services, Food and Nutrition Services, Administration for Children and Families***

The proposed solution will be fully consistent with state and department IT architecture and standards.

Does this project conform to program and information technology related statutes, administrative rules, executive orders, and statewide policies? ✓ Yes ☐ No ☐ Don't Know
If not, please provide justification: _____

BUDGET IMPACT ***(Provide summary narrative of the budget and resource implications of this project, as well as its relevance to the core mission of the agency.)***

The preliminary estimate of the cost to implement the system in mid-2018 and operate it through June of 2019 is $126.1 million. Details and assumptions behind that estimate can be found in the attached business case.

Most of the cost will be eligible for a 90 percent federal match. Other portions will be eligible for a 50 percent match. The total state share will not exceed 20 percent.

A more detailed budget estimate will be developed as part of preparing for Stage Gate 3 review. That work will include establishing a precise expectation about the state share of the total cost.

Update February, 2018 v2.0 Re-Baseline:
The total Project one-time costs are estimated to be $344.3 million (July 2015-July 2020). This estimate includes the design, development, and implementation of the ONE IE & ME systems, the legacy systems work, the disaster recovery sub-project, all personal services (salary and benefits), IT professional services, hardware and software costs, hosting services, and training. Stage Gate 3 foundational documents have been updated and uploaded to OSCIO's enterprise Project and Portfolio Management (PPM) system such as an updated Business Case, v 3.0.

IRR COMPLETION PROCESS

At the commencement of an information technology-related project, agency prepares form, business case and any supporting documentation required.

Agency obtains Agency Business Owner and Agency Technology Manager signatures or e-mail approvals.

Agency sends IRR, business case and any supporting documentation to:

Department of Administrative Services
Chief Information Office
155 Cottage Street NE (4th Floor)
Salem, OR 97301

or by e-mail to: **IT_Investment.Review@das.state.or.us**

DAS will review and provide analysis related to completeness of the IRR and business case based on the context of the Information Technology Review/Approval Policy and potential enterprise applications and impact on enterprise programs.

If form is complete, IRR and accompanying analysis is forwarded to the State CIO for approval

OR

If form is not complete, documentation is returned to Agency with explanation.

After documentation is approved, the IRR is returned to the Agency with DAS Control Number.

Agency forwards approved IRR with procurement documents to Dept. of Justice and DAS State Procurement Office

Total Project Cost or Purchase Price:	Agency-Provided Supporting Documentation	Approval required
≥ $150,000	**Conform with Information Technology Investment Review/Approval Policy** **Information Resource Request** **Business Case** **Any additional supporting documentation**	State CIO
NOTE:	**Some projects may require Independent Quality Assurance Reviews as per the Technology Investment Strategy Development And Quality Assurance Reviews Policy Circumstances may include the following:** **Those projects that are required by legislative action or executive mandate to have independent reviews, and information technology projects that meet three of the following criteria, shall provide for an independent quality assurance review.** **The system, application or infrastructure affected by the project is considered mission critical by the affected agency or DAS.** **The project schedule exceeds one year in duration.** **The project scope includes changes or enhancements to systems, applications or infrastructure managed or maintained by more than one state agency or government entity.** **The complexity of the project is deemed medium or higher using the Department of Human Services, Business and Technical Assessment (Exhibit A) or similar tool that has been approved by DAS.** **The total project costs are estimated to be greater than $1,000,000.**	State CIO

Executive Summary

The OHA Office of Information Services (OIS) is a shared-service information technology organization supporting Oregon's two largest state agencies: the Oregon Health Authority (OHA) and the Department of Human Services (DHS). OHA is Oregon's single State Medicaid agency responsible for ensuring access to health services is available to Oregonians, while DHS is the agency responsible for providing access to all other public assistance benefits. The partnership between OHA and DHS and their alignment with business operations and technology services unites these two agencies in their common goal to establish streamlined Medicaid eligibility, improve access to care and service delivery, and expand coverage to more Oregonians.

Current Oregon MMIS is a monolithic system implemented in 2008. CMS has indicated that eligibility for continued federal funding is dependent on compliance with CMS mandates and evidence that states are committed to a thorough planning effort supporting a modular future state. The goal of the Oregon Medicaid modularity program is to move from a monolithic system to a modular Medicaid environment that facilitates efficient administration of Oregon's Medicaid program. Since Oregon does not need to replace its current MMIS in the immediate (near term) future, the focus of the Oregon Medicaid modularity program is to evaluate Oregon Medicaid enterprise architecture for possible improvements; and develop a strategy and plan for the Medicaid modularity activities. The Modularity program planning effort provides a long term roadmap for modernization of Medicaid related systems.

The goal of the proposed program is to support DHS and OHA in crucial planning activities to achieve compliance with CMS requirements and improve interoperability and sustainability of the technology solutions supporting Medicaid service delivery. Federal government will support funding of modularity planning activities at an enhanced 90/10 match rate. This level of federal support translates into substantial financial savings for Oregon to transform its existing Medicaid system to provide sustainable foundation into the future. Access to enhanced funding will allow Oregon to incrementally implement modular solutions over the next 5-7 years while shouldering only 10% of the primary costs.

Purpose and Background

Oregon's current MMIS is based on the DXC Technology Services LLC interChange Healthcare platform implemented in 2008. The MMIS was designed to support a fee-for-service model; there were extensive modifications implemented later to support Oregon's Coordinated Care Organization (CCO) capitation-based model. OHA intends to create an enterprise vision for transforming the way services and programs are delivered to Oregon citizens, going beyond technology. This encompasses a re-evaluation of processes and organization structures used to manage and deliver program services, efforts to work across organizational boundaries to more effectively manage and deliver health and human services (HHS) in Oregon, and transition from current operating models to an outcomes-based focus. This program supports core value of Innovation for both OHA (https://www.oregon.gov/oha/Pages/Portal-About-OHA.aspx) & DHS (https://www.oregon.gov/DHS/ABOUTDHS/Pages/index.aspx)

In 2016, the federal Centers for Medicare & Medicaid Services (CMS) issued regulations which represent a fundamental shift in the approach states must use to procure, implement, and obtain certification for their MMIS. The new modular approach championed by CMS involves packaging a business process or group of processes into a distinct "module" with open interfaces which can easily be integrated with other modules to

create a flexible, service-oriented architecture. Because the modules are independent components, they can be replaced in the future more easily and with lower risk and duration than a traditional "big-bang" MMIS replacement or the modernization overhaul.

The underlying rationale for Medicaid Modularity planning effort supports the fundamental principles of the OHA & DHS Strategic Plan to: 1) "*provide the agencies with tools & capabilities to automate workflows, decision making & business rules, while reducing manual, paper-based processes & increasing efficiency & effectiveness*" (https://teams.dhsoha.state.or.us/sites/ois/SiteCollectionDocuments/DHS_OHA%20Strategic%20Technology%20Plan%202013.pdf p 15) : 2) "*provide modular, common services & capabilities which promote agility, re-use, & capitalize on best practices leveraging enterprise capabilities*" https://teams.dhsoha.state.or.us/sites/ois/SiteCollectionDocuments/DHS_OHA%20Strategic%20Technology%20Plan%202013.pdf, p 15).

The modular approach also enables Agency to design and conduct a sequenced procurement and deployment of an end-to-end MMIS solution, prioritizing the implementation of modules based on business needs. Modularity offers many benefits to Agency, such as the ability to adapt to changes in state and federal policy, new programs and initiatives, and technological advancements in a timely and cost-effective manner and to increase innovation and potentially lower costs through new market entrants and greater competition. It allows Agency to focus on "best-of-breed", interoperable solutions.

Problem or Opportunity Definition

Oregon made numerous enhancements to its current MMIS. These changes impact 1,800 state users, 17,000 provider users, and over 1 million Oregonians receiving healthcare services. Despite various improvements, large sections of Medicaid enterprise system are from legacy technologies. In order to continue supporting its business mission, OHA needs to transform its business operations and modernize its IT ecosystem to align to rapid changes in healthcare delivery system.

Medicaid Modularity planning is highlighted in Healthy People IRM 2019-2021 (Sec 4.3.1, p 29) as this program responds to several key drivers of the Strategic Information Management Framework, identified in the Healthy People IRM 2019-2021. These drivers include: Federal mandates (sec 2.1.3 p 12), Modernization (Sec 2.1.5 p 13), Health System Transformation (Sec 2.1.7 p 14) and the Overall Driver of Aligning Strategy, Priorities & Plans (Sec 2.2 pp 14-15). The program aligns with the overall Agency vision of investing for sustainability & agility (Sec 2.4 p 17). Planning effort will comply with all relevant federal, state, and agency requirements, including OHA 2019-21 Affirmative Action Plan, DHS office of Equity & Multiculturalism Policy & Processes and DHS-OHA Reasonable Accommodation policy.

OHA completed its first MITA SS-A in 2013 to review existing capabilities and determine future needs. In the early stages of the MITA SS-A, it was determined that even the current MMIS implemented in 2008 is unlikely to meet future business needs of OHA. An update to MITA SS-A will identify the current level of maturity of a broad range of organizational processes and include organizational change management recommendations to improve its level of maturity across a broad spectrum of Organizational Change Management practices.

The move to modularize Oregon Medicaid Enterprise Systems (MES) is federally mandated through a letter issued to State Medicaid Directors on Aug 16, 2016. CMS requires all states to plan for and implement modular technology solutions in support of Medicaid programs. Oregon MES needs to be updated with modular functionality to eliminate redundancy, duplication of effort and waste of IT assets. Modularity planning effort will be led by vendor resources and agency FTEs that will be dedicated to this effort. The planning activities have been scheduled considering other large agency-wide strategic initiatives to ensure critical business resources will be available to support the planning effort. Agency has an established appropriate governance structures to adequately oversee this investment, as outlined here: https://dhsoha.sharepoint.com/teams/Hub-SS-OIS/SitePages/IT-Governance.aspx Additional processes will include the following elements: engaged executive sponsorship, steering committee, vendor and contract management, change control and stakeholder representation processes.

OHA is soliciting for planning consulting services around Medicaid modularity. Consultant will be tasked with several critical activities: 1) update of the current MITA State Self-Assessment (SS-A), 2) create of the strategic modernization roadmap and 3) prepare for procurement activities to solicit for and acquire services of SI & PMO vendors for Medicaid Modularity along with individual module acquisition strategy that meets Agency needs.

Medicaid Modularity planning will take a holistic approach, looking at a broad range of technological, budgetary and business process challenges OHA will face as it moves from a single MMIS into the modular environment to address the wide variety of business needs. The consultant will produce a roadmap of modernization projects that span multiple biennia, which will allow for long term budget planning, using the approach that considers:

- Agency's short- and long-term goals and priority initiatives and the vision and expected outcomes of the Medicaid modularity.
- The ability of the market to support Agency's vision for the Medicaid modularity with modular offerings versus custom development.
- The grouping and sequencing of modules for federal funding requests, procurement, and implementation to support the Medicaid modularity.

Alternatives Analysis

Two other (*less desirable*) alternatives include:

Do Nothing – continue to extend the existing support contract with DXC (that, per CMS guidelines, cannot be continued *indefinitely*). The current MMIS was implemented 12 years ago with optional M&O contract that will expire in 2022. Maintaining the current state will cause Oregon to miss a unique opportunity to streamline Medicaid related systems while taking advantage of enhanced FFP. CMS expects Oregon to demonstrate a strong commitment to plan and execute a modular Medicaid Enterprise environment in compliance with CMS mandates. Non-compliance with CMS mandates will lead to significant negative financial ramifications for Oregon – loss of enhanced funding for enhancements or renewal of the system and doubling of state fund requirements for M&O expenditures.

Implement another State's planning approach

Oregon could choose to bypass its own planning efforts and implement the planning approach of another state, leveraging its planning outcomes and RFPs to procure new modular solutions. This approach will likely result in a lack of a cohesive roadmap and executable plan to meet Oregon-specific needs and increase the overall risk of this crucial program. It is also likely, that the solutions adopted by another state either would require significant modifications to address Oregon-specfic requirements or would require significant business process and operational workflow reengineering.

Consequences of Failure to Act

- Lost opportunity to develop a modern, sustainable and scalable solution environment supporting Oregon Medicaid service delivery.
- Lost opportunity to leverage CMS enhanced 90% funding for future replacement of existing aging Medicaid supporting technology. In just 5 more years, the current MMIS solution will be 17 years old and will be approaching its end of life. The typical cost to replace MMIS systems is over $150 million. Without enhanced funding, the general fund share of a replacement would be over $75 million, compared to $15 million.
- Lost opportunity to negotiate competitive maintenance and operations vendor support as a result of increased competition. The current contract with DXC for maintenance and operations increases by 2% annually.
- Potential significant financial impact due to loss of CMS enhanced funding support for maintenance and operations. The current annual maintenance and operations cost is approximately $20 million per year. CMS funds 75% or approximately $15 million. If Oregon lost CMS enhanced funding, the federal funding level will drop from 75% to 50%. This will increase Oregon's need for GF for annual maintenance and operations from $5 million to $10 million per year.
- Potential significant financial impact due to loss of CMS enhanced funding support for system change requests and for major enhancement projects. System change requests average $10 million annually. Major enhancement projects range between $5-20 million. CMS currently pays 75% of the cost of system change requests and 90% of the cost of major enhancements. If Oregon lost CMS enhanced funding, the federal funding level will drop to

50%. This will increase Oregon's typical annual general fund change request and enhancement projects cost from under $4 million to over $11 million.

Conclusions and Recommendations

It is essential for OIS to engage in this federally funded effort to transform business and technical architecture of the Medicaid Enterprise Systems. The Strategic Advisor consultant is expected to provide experience and technical expertise and successfully develop Medicaid modularity roadmap for OHA. The underlying rationale for this planning effort supports the fundamental principles of the OHA & DHS Strategic Plan to: 1) "provide the agencies with tools & capabilities to automate workflows, decision making & business rules, while reducing manual, paper-based processes & increasing efficiency & effectiveness" (https://teams.dhsoha.state.or.us/sites/ois/SiteCollectionDocuments/DHS_OHA%20Strategic%20Technology%20Plan%202013.pdf, p 15) : 2) "provide modular, common services & capabilities which promote agility, re-use, & capitalize on best practices leveraging enterprise capabilities" https://teams.dhsoha.state.or.us/sites/ois/SiteCollectionDocuments/DHS_OHA%20Strategic%20Technology%20Plan%202013.pdf, p 15).

Medicaid Modularity planning will facilitate search for solutions that leverage investments to avoid silos and redundant expenditures and maximize the return on investment, while improving interoperability and sustainability of technology solutions that support Medicaid service delivery.

Appendix A – POP Overview

Appendix B – Enrolled Senate Bill 1067

Executive Summary

The Oregon Educators Benefit Board (OEBB) and Public Employees' Benefit Board (PEBB) are the divisions of the Oregon Health Authority (OHA) charged with providing certain employee benefits to educators, state, and local government employees, respectively[1]. Over 283,000 Oregonians annually use the OEBB and PEBB Benefit Management Systems (BMS) to access benefit selections and enroll in benefits during their respective open enrollment periods. Members also use the BMSs throughout the year to select benefit plans and coverage levels upon hire, or update selections in response to qualifying events.

OEBB and PEBB's current BMS were developed ten (10) and fifteen (15) years ago respectively, and have undergone continuous development and enhancements over those periods. Maintenance and operational support, as well as annual updates to support benefit enrollment is currently provided by Perspecta (formerly DXC). Due to the number of changes made to the systems since their implementation, as well as custom written code, the systems have become costly to continuously update and maintain to provide the needed functionality.

The extension through June 30, 2021 of the existing Maintenance and Operation (M&O)/enhancements contract with Perspecta secured continued stability and support of the systems while alternatives could be assessed. OEBB and PEBB can now turn their focus to the long-term goal of replacing the existing systems with a robust, centralized, sustainable, and scalable benefits management solution, supporting the unified PEBB and OEBB business practice.

OEBB and PEBB are evaluating a longer-term strategy for a BMS replacement solution through the following objectives:

- Conduct preliminary market research – identify potential Benefits Management Solutions options and assess whether COTS, SaaS, Transfer System, or other alternatives provide the capabilities needed by OEBB and PEBB in administration of benefits.
- Evaluate the impact of State legislation – in the 2017 legislative session, Senate Bill 1067 directed OEBB and PEBB to merge administrative functions effective immediately; OEBB and PEBB are determining how the merger will inform future OEBB and PEBB benefits management contracts, and potential Request for Proposals (RFPs).
- Determine funding needs – the agency must assess the budget required to support planning and implementation of a new solution supporting benefits management and enrollment for PEBB and OEBB (including resources required), determine the source of funding, and secure such funding for the duration of the project.
- Issue a competitive solicitation (RFP) – the solicitation will be inclusive of fully detailed technical documentation of the solution (including any enhancements over the life of the contract), comprehensive Business Continuity/Disaster Recovery planning and services, and will consider the capabilities available in best-of-breed benefits management solutions. The outcome of this process will provide a secure foundation to procure and implement a new BMS solution, and resources to support implementation and ongoing maintenance and operations.

[1] See ORS 243.135 and 243.866

Purpose and Background

Purpose

OHA's Health Policy and Analytics (HP&A) Division is submitting this Business Case on behalf of its OEBB and PEBB programs in support of comprehensive planning analysis, for the purpose of developing a request for proposal (RFP) for a benefit management system replacement project. The system project would be jointly administered by both programs.

Background

OEBB and PEBB are the divisions of OHA charged with providing certain employee benefits to educators, state, and local government employees, and handle benefits administration for these members through separate benefits management solutions. OEBB and PEBB incorporate utility-like fees for members and entities/agencies in rates charged for benefits administration, including use of these systems - see ORS 243.061-243.302, and OAR Chapter 101 and Chapter 111. In August 2002, PEBB contracted with Saber Software, Inc. (Saber) to design, develop, and implement an integrated BMS called pebb.benefits (or PDB) for the Public Employees Benefit Board. In April 2008, OEBB contracted with Saber to design, develop, and implement an equivalent BMS called MyOEBB based upon the PBD system. These systems provide benefits selection and management for more than 283,000 Oregonians representing most state agencies and education districts. After several acquisitions and company mergers, Perspecta is now the contracted service provider of maintenance, support, and enhancements for both OEBB and PEBB's Benefit Management Systems.

OEBB and PEBB benefit management systems have been in service over ten years and are highly customized with nearly all code tailored for each program's customer based needs. Over the years, the systems have become more and more complex, resulting in an increased likelihood for security vulnerabilities, further reliance on contracted developers who are familiar with these specific systems, and increasing costs for ongoing operations and maintenance.

An analysis of the two systems and a resulting "Technical Assessment Report of the Benefit Management System" was produced in early 2015. The report notes that both systems are supported with obsolete technologies lacking significant historical documentation, and candidates for transitioning to a more modern and stable solution. The continued reliance upon the older base code and architecture of these systems further constrains OEBB/PEBB to dependence on Perspecta for technical expertise, while remaining responsible for managing the tendency for accruing technical debt inherent to a custom solution. Other recommendations were followed, including implementing hardware and software system upgrades to remedy issues identified in the report, and to allow OEBB and PEBB to continue meeting their statutory responsibilities until the replacement solution would be implemented.

To ensure system support stability and enable OEBB/PEBB to focus on planning for the necessary and eventual replacement of their systems, OHA has extended its existing contracts with DXC for 3.5 years until 2021, which will also end the special procurement period granted by DAS. In the 2017 legislative session, Senate Bill 1067[2] directed OEBB and PEBB to merge administrative functions and operations of the programs. The "pebb.benefits" and "MyOEBB" legacy Benefit Management Systems (BMS) are

[2] See Appendix B – Enrolled SB 1067

becoming increasingly costly and challenging to support, additional gains in efficiency which would be supported through technology automation would be difficult at best to realize. The primary goals of this business case and supporting Policy Option Package are the same: provide a modernized, centralized, standardized, supportable, and scalable solution to replace both benefit management systems for educators and public employees, with the ability to accommodate the administrative and organizational changes subsequent to SB 1067, while implementing and maintaining more rigorous security best practices.

The near and longer-term plans set forth in this Business Case align with the DHS/OHA Strategic Technology Plan (STP) Initiatives:

- **Business Automation**
  While the current BMS solutions have provided significant efficiency gains, the multitude of options now available provide greater functionality and capability to further automate and streamline essential business processes, including support of dependent eligibility verification

- **Dynamic Needs Supported by Seamless Technology Services**
  OEBB and PEBB's existing systems have been continuously enhanced to meet the needs of the member populations served, and the program staff responsible for overseeing benefits administration; replacement solutions will be reviewed and assessed for additional capabilities including modularity, agility, reusability, and incorporation of best practices in benefit administration

- **Enables Connectivity Anytime, Anywhere, in Multiple Ways**
  The current solutions provide connection capability via multiple interfaces, but alternatives solutions offer expand capabilities to better meet member, staff, and partner needs through inclusion of mobile devices

- **Trusted Source for Health & Human Service Data**
  The member information collected in the existing systems is organized in such a way as to allow searching and reporting capabilities, but lacks the capacity to provide predictive analytics, which may be available with more modern solutions

Problem or Opportunity Definition

Problems

Several issues currently exist with the OEBB and PEBB BMS solutions:

Technology and Integration Issues

- Dated software code and architecture lacking proper documentation
- Lack of integration of business functions, such as financial management and dependent eligibility verification, into a single system has resulted in multiple one-off systems; this has resulted in maintaining sensitive data across multiple systems
- Contact Management System in BMS doesn't link with all OEBB and PEBB processes
- Lack of user notification capabilities

- Communications based on exports from criteria in BMS, then OEBB / PEBB staff send to OHA communications for printing and mailing (e.g. 12-month wait letters, Health Assessment reminders, etc.)
- Maintenance and enhancements performed on BMS' often result in new bugs or errors
- Applications developed using older, more difficult to support coding language

Vendor Issues

- Lack of complete, current system and technical documentation
- High rate of turnover for vendor developers and technical staff, as well as project management and account staff due to frequent organizational changes
- No provisions or enforcement mechanisms in existing vendor contracts to enforce regulations, standards, best practices, or methodologies
- Service Level Obligations do not specify penalties for vendor's failure to perform
- Business continuity and disaster recovery services not included in current contracts

Processes done outside of both OEBB and PEBB BMS

- Financial management including invoicing to entity-customers, individual subscribers, Consolidated Omnibus Budget Reconciliation Act (COBRA) benefits administrators, and other third parties, which then OEBB and PEBB must reconcile back to carrier payments (currently handled in Microsoft Access)
- COBRA is managed by a 3rd party vendor (currently Benefit Help Solutions for OEBB and PEBB)
- Open Enrollment Plan comparisons, training and reference pricing handled in other tools
- Notifications (e.g. COBRA, reminders for those who haven't enrolled during open enrollment, and other required notices)
- Dependent eligibility verifications (e.g. birth certificates, marriage certificates, etc.); validation of eligibility currently documented in Microsoft Access
- Wellness programs owned and managed by carriers (e.g. Health Assessments, Tobacco, Diabetes, Weight Watchers, etc.)
- Appeals Process (managed using Word, Excel, Outlook, faxes, and shared drive)
- Manual entry of plans / carriers (2 OEBB), Qualified Status Changes (QSCs), rates (5 OEBB), member changes, and corrections (700+ plans entered for OEBB in 2016; PEBB 3-4 staff perform manual data entry)
- Reporting is currently performed using Business Objects which uses Crystal Reports, which must be maintained separately

Opportunities

OEBB and PEBB share the goal of implementing a centralized, standardized, supportable, and scalable solution to replace both OEBB and PEBB's systems, which will provide easier enrollment, better coordination of benefits management, improved access to plan information, and enhanced integration with other tools that improve the overall experience for all customers and users. Additionally, this presents the opportunity to accommodate the administrative and organizational changes subsequent to SB 1067, while implementing and maintaining more rigorous security best practices. The Manadatory and Value Added solution requirements identified in the Alternatives Analysis section below further detail potential gains anticipated through implementing a replacement solution.

The objective of this initial phase will be to outline a plan for system replacement including:

- Conduct preliminary market research to identify potential Benefits Management Solutions options
- Identify HP&As strategy for procuring a unified system supporting OEBB and PEBB
- Determine funding options and procurement approaches
- Issuance of an RFP to procure a replacement solution, and if needed, secure the services of a systems integrator
- Develop a written Transition Plan through partnership between OEBB/PEBB, OHA's Office of Information Services (OIS), ETS, and Perspecta

Alternatives Analysis

OEBB, PEBB, and OIS are committed to moving forward with the initiation and planning process for a new system, including prioritizing resources, documenting detailed requirements, and performing a full alternatives analysis. As the replacement of the OEBB and PEBB BMS solutions will require significant OIS and business resources, the estimates provided herein cover a significant workload in preparation of the expected project to implement the yet to be determined solution. To lay the groundwork for such a project, OIS intends to aid OEBB and PEBB at this point of the project's concept origination phase with fully identifying functional and non-functional requirements, and detailing a comparative analysis of the alternatives. This effort will include the development of a high-level business case (this document), preliminary risk assessment, an overall project plan, and potentially initiating a Request For Information (RFI) process to support both internal and external (DAS OSCIO) approval.

Assumptions

- OEBB and PEBB resources will be dedicated for requirements gathering, initiation, and planning phases
- Funding will be available to cover the cost of continued vendor support of the systems
- OHA and DAS agree that aggressively pursuing transition to a new, sustainable replacement benefits management solution is preferable to continued reliance on the existing solutions with the current system vendor, or transitioning the maintenance and support work to a new vendor

Solution Requirements

Viable solutions should include, but are not limited to the following requirements:

Mandatory

- Role-based access for internal OEBB and PEBB access, as well as for external groups including:
    - Plan carriers
    - Members
    - Entity admins
    - Wellness vendors
    - Other state and local government agencies
- Compliance with federal and state security and privacy requirements

- Reporting (e.g. canned, ad hoc, and self-service for carriers, entities, school districts, and other state agencies)
- Contact management (e.g. comments, chat, integration with phone system, member profile, appeals, dependent eligibility verification, tracking of communications, help desk ticketing, etc.)
- Online Help for OEBB and PEBB staff, members, carriers, and other vendors
- Self-service administrative capabilities (e.g. OEBB and PEBB would have the ability to manage history of changes to qualifying events, etc.)
- Expanded automated error checking / data validation
- Compatibility with commonly used browsers, devices, mobile applications, and operating systems
- Ability to import data into, and export data from solution, in multiple formats
- Financial management including invoicing to entity-customers, individual subscribers, COBRA benefits administrator, and other third parties
    - Solution allows OEBB and PEBB to reconcile back to carrier payments
- Notifications (e.g. COBRA, reminders for those who haven't enrolled during open enrollment, and other required notices, etc.)
- Dependent eligibility verifications among, and between OEBB and PEBB member groups
- Integrated appeals process

Value Added

- Single sign-on for members to access carrier accounts
- COBRA managed as part of the integrated solution for OEBB and PEBB instead of in a third-party vendor's solution
- Wellness programs managed in integrated solution for OEBB and PEBB (e.g. Health Assessments, Tobacco, Diabetes, Weight Watchers, etc.)
- Open Enrollment support tools
    - Plan comparison tool integrated into solution for OEBB and PEBB to show premium amounts, plan benefits, and other items required for Open Enrollment
    - Provider searches
    - Medical home searches
    - Health assessments
    - Premium quotes
- Trainings and webinars integrated into solution for OEBB and PEBB
- Integrated reference pricing (information based on plan for services)

Alternatives

For this high-level business case, a detailed view of alternative solutions has not been prepared. During the planning phase, the RFI and/or RFP will uncover requirements, as well as performing a formal alternatives analysis, and initiation/planning preparations for commencing with a major project initiative.

Note: Analysis, planning, and initiation will require dedicated OEBB and PEBB staff time to aid with documenting and validating requirements.

Cost

OIS estimates a duration of 8 to 12 months to adequately cover this initial phase of project preparation prior to vendor solicitation, solution identification, implementation and transition. Detailed estimates will need to be developed to forecast the time and budget required for project execution, solution implementation, close out, and transitioning to operations & maintenance. The following high-level cost estimates have been gathered for Phase 1 Planning:

OEBB / PEBB Positions	**Duration**	**Cost**
Operations & Policy Analyst 3 position "Program Business Analyst"	12 months	$140,028
Operations & Policy Analyst 4 position "Program Project Manager"	12 months	$173,465
Estimate:		$313,493
OHA OIS Positions		
Information Services Specialist 8 "Technical Project Manager"	12 months	$157,533
Information Services Specialist 7 "Business Systems Analyst"	12 months	$147,679
Estimate:		$305,212
Professional Services		
"IT Strategic Advisor"	12 months	$375,000
Total 1st year package estimate (4 FTE + 1 Contracted Resource)		**$993,705**

This information is identified in a Policy Option Package, currently under development[3]. Funding would be through Other Funds category, provided by OEBB and PEBB Administrative Fees attached to plan premiums.

Benefits

OEBB and PEBB will expect to realize cost efficiencies with lower maintenance and operations costs for a new combined system. Program efficiencies anticipate full integration with finance and budgeting, COBRA administration, wellness program administration, and other business functions that are not currently integrated. A new system will also reduce duplication between programs and the use of "one-off" systems. Soliciting for a new, consolidated system will enable OEBB and PEBB to establish a strong on-going support contract with terms favorable to the State, and position the agency to better manage the technical debt associated with a benefits solution.

As stated in the Background section above, this initiative also aligns with the following DHS / OHA Strategic Technology Plan (STP) Initiatives:

- Business Automation
- Dynamic Needs Supported by Seamless Technology Services
- Enable Connectivity Anytime, Anywhere, in Multiple Ways
- Trusted Source for Health & Human Service Data

Risk

The current OEBB and PEBB benefit management systems were built on antiquated legacy technology that now presents significant risks to properly maintain. The systems are costly and cumbersome to support due to the age and custom nature of the code upon which they were built. High turnover with contractor and account management staff compounds this problem, as it takes new staff a much longer period of time to understand the systems well enough to address identified issues.

[3] See anticipated costs in Appendix A (POP overview)

Though it has undergone a series of acquisitions and mergers, OEBB and PEBB have continued contracting with the same vendor from initial build to current maintenance and operations. This continued contractual relationship results in increased dependence on the contractor due to the age, high degree of customization, and complexity of the systems, without sufficient technical or architectural documentation. It is also cumbersome and costly to transition to a new vendor to support its maintenance and operations. Special procurement authority for the current contract ends in 2021.

Conclusions and Recommendations

Conclusions

Once DAS approval is achieved, OIS resources will work in partnership with OEBB/PEBB staff to create the detailed business case, project charter, detailed risk assessment, and fully developed project plans communicating how the project's intended scope, schedule, and budget will be managed. Business, functional, technical, security, and other requirements will need to be documented, that will establish the foundation for a Request for Proposals (RFP) to solicit potential solution providers. Project management resources will also be identified and assigned in this timeframe, as well as other necessary project team members to support initiation.

Recommendations

The project to replace OEBB and PEBB's BMS is expected to exceed $1 million. As a result, the initiation and planning processes need to begin as soon as possible. OEBB and PEBB need prioritization of OIS resources to support the effort required for commencing with a major project initiative. Additionally, OEBB, PEBB, and OIS will continue supporting development of the POP for consideration by the 2019 legislature, which will authorize additional funding of positions to support planning, coordination, project management, and implementation.

Consequences of Failure to Act

Not prioritizing the necessary resources supporting a replacement effort means OEBB and PEBB will continue using technology that is fragmented, non-standard, difficult to support, and is not scalable. OEBB and PEBB members would be at risk for benefits interruption if a replacement system is not implemented prior to existing vendor support expiration in 2021. OEBB and PEBB's BMS are not meeting all current business needs, which have grown since their original implementations in 2008 and 2003 respectively. OEBB and PEBB both seek to have more processes integrated into a new solution that improves communication and care for all member and user experiences.

OSCIO IT Investment Form

IT Investment Name:	OEBB-PEBB BMS Replacement System	Date:	07/03/2019
Agency:	Oregon Health Authority	Division:	Health Policy & Analytics, OEBB/PEBB
Agency Contact:	Jay Torres, Sr. Project Manager, OHA/OIS	Phone Number:	503-378-2798
Approving Business Owner:	Damian Brayko, OEBB/PEBB Deputy Director	Phone Number:	503-373-0800
Approving Technology Mgr.:	Kristen Duus, Chief Information Officer, DHS/OHA	Phone Number:	503-947-5378

Approving Business Owner — Date: 8/27/19

Approving Technology Manager — Date: 8/27/2019

Information Technology Investment Type(s):

☒ New Investment ☐ Renew/Life Cycle Replacement ☐ Other:

Information Technology Investment Description (What is being proposed and why):

Background:

OEBB and PEBB are the divisions of OHA charged with providing certain employee benefits to educators, state, and local government employees, and handle benefits administration for these members through separate benefits management solutions. Over 283,000 Oregonians annually use the OEBB and PEBB Benefit Management Systems (BMS) to access benefit selections and enroll in benefits during their respective open enrollment periods. Members also use the BMSs throughout the year to select benefit plans and coverage levels upon hire, or update selections in response to qualifying events.

OEBB and PEBB's current BMS were developed ten (10) and fifteen (15) years ago respectively, and have undergone continuous development and enhancements, with almost all of the software code custom tailored for each program's customer-based needs. Consequently, the systems have become increasingly complex, resulting in an increased likelihood for security vulnerabilities, further reliance on contracted developers who are familiar with these specific systems, and increasing costs for ongoing operations and maintenance.

Systems maintenance and operational support, as well as annual updates to support benefit enrollment, are currently being provided by Perspecta (formerly DXC) under an existing Maintenance and Operation (M&O)/enhancements contract now extended through June 30, 2021.

A technical assessment conducted in 2015 notes both systems are supported with obsolete technologies, lack significant historical documentation (some of which was addressed in the subsequent 2018 study requested by OSCIO) and are therefore candidates for transitioning to a more

modern and stable solution. The continued reliance upon the older base code and architecture of these systems further constrains OEBB/PEBB to dependence on Perspecta for technical expertise, while remaining responsible for managing the tendency for accruing technical debt inherent to a custom solution.

Finally, State of Oregon procurement standards require all vendors to periodically re-bid their services in order to ensure the best possible support and pricing. Given the current system technologies and business processes are outdated/unsupported, thereby restricting the addition of new, desirable functions and processes, this opportunity to better serve our fellow Oregonians comes well timed.

Problem Identification:

Several significant issues exist with the current OEBB and PEBB BMS solutions:

Technology and Integration Issues

- Dated software code and architecture lacking proper documentation.
- Lack of integration of business functions into a single system has resulted in maintaining sensitive data across multiple one-off systems.
- Contact Management System in BMS does not link with all OEBB and PEBB processes and also lacks user notification capabilities.
- OEBB/PEBB BMS staff must first manually create and export communications material before sending it to OHA communications for printing and mailing (e.g. 12-month wait letters, Health Assessment reminders, etc.)
- Maintenance and enhancements performed on BMS' often result in new bugs or errors.
- Applications developed using older, more difficult to support coding language.

Vendor Issues

- High rate of turnover for vendor developers and technical staff, as well as project management and account staff, due to frequent organizational changes.
- Existing vendor contracts have no provisions or mechanisms to enforce regulations, standards, best practices, or methodologies.
- Service Level Agreement Obligations do not specify penalties for vendor's failure to perform.
- Current contracts do not include business continuity and disaster recovery services.

Processes done outside of both OEBB and PEBB BMS

- Financial management including invoicing to entity-customers, individual subscribers, Consolidated Omnibus Budget Reconciliation Act (COBRA) benefits administrators, and other third parties, which then OEBB and PEBB must reconcile back to carrier payments (currently handled in Microsoft Access)
- COBRA is managed by a 3rd party vendor (currently Benefit Help Solutions for OEBB and PEBB)
- Open Enrollment Plan comparisons, training and reference pricing handled in other tools.
- Notifications (e.g. COBRA, reminders for those who haven't enrolled during open enrollment, and other required notices).
- Dependent eligibility verifications (e.g. birth certificates, marriage certificates, etc.); validation of eligibility currently documented in Microsoft Access.

- Wellness programs owned and managed by carriers (e.g. Health Assessments, Tobacco, Diabetes, Weight Watchers, etc.)
- Appeals Process (managed using Word, Excel, Outlook, faxes, and shared drive)
- Manual entry of plans / carriers (2 OEBB), Qualified Status Changes (QSCs), rates (5 OEBB), member changes, and corrections (700+ plans entered for OEBB in 2016; PEBB 3-4 staff perform manual data entry)
- Reporting (both customer-based and regulatory – i.e. ACA, IRS, etc.) is currently performed using Business Objects which uses Crystal Reports, which must be maintained separately

High-Level Business Opportunity:

OEBB and PEBB share the goal of implementing a centralized, standardized, supportable, and scalable solution to replace both OEBB and PEBB's systems. It is anticipated this shall provide easier enrollment, better coordination of benefits management, improved access to plan information, and enhanced integration with other tools that improve the overall experience for all customers and users. Additionally, this presents the opportunity to accommodate the administrative and organizational changes subsequent to SB 1067, while implementing and maintaining more rigorous security best practices.

Alternatives to be considered:

The assessment and recommendation of a solution will be based on current and projected operational requirements, business and technical process management, long-term support, and security, with a focus on customer services, commonality of functions, communications, training, security and overall product sustainability.

At this still early point of the project a detailed analysis of alternative solutions has not been developed. An initial baseline analysis of the present system will be conducted to properly identify areas which may lend themselves to improvement or replacement including, but not necessarily limited to, the following replacement alternatives:

- Upgrade/enhance current OEBB/PEBB systems (including consolidation of core processes and reporting methods) by current support vendor.
- Incorporation of BMS reporting and management into the current WorkDay HR platform.
- Outsourcing of operations and support to a third-party entity (e.g., IaaS, SaaS, Business Processes as a Service (BPaaS), External Service Provider/Integrator (ESP, ESI).
- Internal custom development and support of a state-funded, self-maintained software package and hardware platform (an "in-house" product).
- Development and release of a Request for Proposal (RFP) for competitive bidding by third party entities able to fulfill business, technical and sustainability requirements of the State.
- Transfer/leverage solution already being used by another public sector organization in Oregon or another state

OSCIO IT Investment Form

	Yes	No
1) Is the investment a project?	☒	☐
2) Will the investment have a Project Manager?	☒	☐
3) Will the investment include other agencies?	☒	☐
4) Will the investment include Information Asset Classification Level 3 or 4 data? (see DAS Policy 107-004-050)	☒	☐
5) Will the investment be for Cloud Services (as defined in Policy #107-004-150)	☒	☐

IT Investment Estimated Cost Summary

Hardware:	**$0**	**Software:**	**$6,300,000**
Services/Maintenance (projected over five years):	**$14,500,000**	**Personnel (Project) Adjusted for five years:**	**$4,500,000**
Source of Funding:	Other Funds	**Deadline for fund use:**	07/2021
Anticipated Start Date:	07/2019	**Anticipated End Date:**	07/2024
		TOTAL:	**$25,300,000**

NOTES:

1 - The initially approved POP amount of $1,993,396 by the legislature allows for work to be completed through the project planning phase. An added POP request will be made in CY2020 to obtain funding for the 21-23 biennium to enable final delivery.

2 – Personnel costs are based on 5 FTE project resources (2 each Project Managers and Business Analysts) from OIS and the business) plus a Strategic Advisor. Additionally, another 7 SMEs will be assigned as project resources with 10% each of their work time allocated to the project.

3 - Maintenance costs reflect anticipated 20% reduced expenses for the five-year period following implementation and delivery of the new system, on the assumption that the new system will replace some manual processes, newer technology is less expensive to maintain, and one system is cheaper to maintain than two. (Cost estimates based on costs for O&M related activity for the current systems).

Purpose

The primary need for the Provider Time Capture (PTC) Project is to meet the Electronic Visit Verification (EVV) requirements of the 21st Century CURES Act. The CURES act was designed to improve the quality of care provided to individuals through furthered research, enhanced quality control, and strengthened mental health parity. The following data elements are required to be captured electronically at the time of service: Date of Service, Person Providing the Service, Person Receiving the Service, Time the Service Begins and Ends, Location of Service, and Type of Service Performed.

This document will help establish the scope of the project and contains an analysis of available options including the associated benefits and risks to identify a viable solution for a successful outcome. In addition, the solution will ensure continuity of care for critical community services provided to individuals and their families by Homecare Workers (HCWs) and Personal Support Workers (PSWs).

***See Appendix A for Acronym List.*

Background

The Department of Human Services (DHS) and the Oregon Health Authority (OHA) programs utilize approximately 24,000 HCWs and PSWs to provide in-home care for approximately 19,000 individuals across Oregon. DHS and OHA have documentation requirements which apply to HCWs/PSWs who provide personal care assistance to older adults and people with disabilities. As of October 2013, the Fair Labor Standards Act (FLSA) required the records to include certain identifying information about the HCW/PSW and data about the hours worked. The law requires individuals and service providers attest services rendered are accurate. Due to the compliance deadline of January 2016 set by the Department of Labor (DOL), the State completed the implementation of a short-term solution to pay providers for time worked for Aging and People with Disabilities (APD) and Health Systems Division (HSD) in the Client Employed Provider (CEP) system using a paper process for services beginning October 2015. The Office of Developmental Disabilities Services (ODDS) instituted upgrades to their current Express Payroll Reporting System (eXPRS) platform to meet their needs. The State then completed the cross-system payroll components (overtime and travel time) by the end of October 2016.

For APD and HSD, these records are being captured through manual processes. Paper timesheets are completed by HCWs/PSWs, and the data is entered manually into State systems by employees at State field offices and Type A and Type B Area Agency on Aging (AAA) offices. These manual processes are time intensive. In June 2015, the PTC Project was authorized to continue with the Request for Proposal (RFP) process for the long-term solution for APD, ODDS, and HSD. In November 2015, the RFP was posted for responses due by January 2016. Public Partnerships, LLC (PPL) was selected as the solution vendor for the project. In November 2016, stakeholders from across DHS and OHA gathered with PPL to discuss the possibility of combining the Financial Management Agent Services (FMAS) component with time capture. It was thought at the time the work to align the programs and modernize the approach taken would be more readily achievable. In conjunction with this, ODDS began using PPL for their FMAS needs in January 2017. The RFP outlined the desire for a provider payment option as an added value to the State. This was a direct need identified as a component of moving the State forward in the maturity models as defined by Centers for Medicare and Medicaid Services (CMS). The goal is to provide data that is timely, accurate, usable, and easily accessible to support analysis and decision making for healthcare management and program administration.

In mid-2017, ODDS officially withdrew participation in the design efforts of the PTC Project and have begun work on an enhancement for eXPRS to meet the EVV requirements. One of the key drivers for ODDS joining the project initially was the mobile application offered by PPL. Over time as the required system, policy, and

resourcing concerns were uncovered, using the same solution proved to be too significant a hurdle for ODDS. In November 2017, Stage Gate 3 was rescinded due to significant scope change and the continued struggles with PPL. Amendment 2 was executed in June 2018, to bring the State and PPL to an agreement to move forward based on the changes to the project scope from November 2017.

Due to delays, previously allocated technical resources from the Office of Information Services Solution Development and Delivery (OIS SDD) had been reassigned to the higher-priority Integrated Eligibility (IE) Project. In February 2018, OIS management notified Mike McCormick, the PTC Project Sponsor, that technical resources would not be available to the PTC Project until April 2019. This timing was contingent on the IE Project remaining on schedule, which has been extended by multiple months. The lack of dedicated technical resources caused a delay in progress on development tasks. This caused an additional complication with PTC Project scope, cost, and schedule.

The PTC Project reached a stage in which a re-evaluation of the project scope was necessary. The PTC Project Team worked closely with APD and HSD business and leadership, as well as OIS Project Solutions and OIS SDD, to create options to continue work on the project. Many options were considered, and it was decided to pursue an expanded scope to include FMAS with PPL in April 2018.

As the FMAS option was explored, PPL was presented with updated requirements to review for a cost proposal. PPL's cost proposal to include FMAS amounted to a 236% increase in the five-year cost. The PPL leadership changes and PPL's lack of knowledge of the out of box solution made it difficult for the PTC Project to understand configuration verses customization, which increased the risk in continuing the contract further. In January 2019, it was determined the cost increase was not in alignment with our responsibility around fiscal stewardship and it was decided to expire the contract via Amendment 3 with PPL and explore other options. As the Project continues to explore other options as it relates to EVV, Mike McCormick remains the PTC Project Sponsor supporting APD and HSD programs.

Estimated Project Expenditures

In the third quarter of 2016, the PTC Project began contracted work with the Design, Development, and Implementation (DDI) vendor. As of the Advanced Planning Document Update (APDU) in October 2018, the total CMS approved budget for the PTC Project was $9,569,050. As of May 2019, the cumulative budget spent for the PTC Project was $7,048,075. This included $3,407,622 for State staffing costs plus $3,640,453 for IT Vendor Services, which includes PPL and NTT DATA State Health Consulting, LLC (formerly Cognosante Consulting, LLC). Below are the breakdown tables for reference.

The below projections were compiled by federal fiscal year, based on a SaaS solution, and a completion date of September 30, 2021.

Project Expenditures	Total FFY19*	Total FFY20	Total FFY21	Total
State Staffing / Personal Services 90/10	226,909	1,755,101	2,894,015	**4,876,025**
Cost Allocation on Personal Services 90/10	6,123	263,265	421,862	**691,250**
IT Contractors - Professional Services 90/10	57,475	3,449,061	3,449,064	**6,955,600**
HW/SW Initial Purchase 90/10	0	548,208	548,208	**1,096,416**
Projected Yearly Spend	**290,507**	**6,015,635**	**7,313,149**	**13,619,291**

*This accounts for the remainder of FFY 2019, June – September

The total projected cost for Operations and Maintenance staffing and licensing for three years is $4,684,349. The breakdown of these costs is located in the Alternative Analysis section, under Option 6 – SaaS.
Below is the table for the total projected project expenditures:

Total Cost of Ownership for Five Years	
Cumulative Budget Spent to Date	$ 7,048,075.00
Budget Forecast through September 2021	$ 13,619,291.00
Three Year Operations and Maintenance Costs	$ 4,684,349.00
Total	**$ 25,351,715.00**

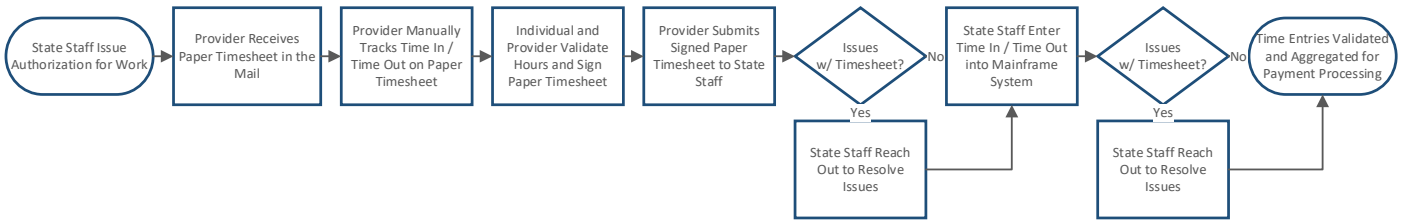
CMS has advised only one EVV solution will be funded per state, which has potential cost impacts and requires an inclusive solution. The Project is aware the APDU will need to go to CMS for review and approval for any updated costs. CMS will also be required to review any RFP or DDI contract.

**See Appendix B for the May 2019 Budget Update for more detailed information.

Current State Process

Currently, State Staff issue an authorization for the Provider to work for a specified Individual. HCWs/PSWs are then mailed a paper timesheet for a two-week service period. As they work, they are required to physically write the date, their time in, and their time out for each shift on the timesheet. A signature from the Individual or their representative is necessary when work has been completed to validate services were performed for the two-week period. The signed timesheet is then submitted to State Staff for additional verification to identify any issues i.e., start and end dates are filled out and legible, the timesheet is signed by the HCW and individual, etc. If there are no issues identified, State Staff enter the date, the time in, and the time out into the mainframe system for each shift the Provider reports. If State Staff identify any issues, they contact the Case Manager, Individual, or Provider to resolve the issues prior to entering the data. The time entries entered into the mainframe are run through additional system validations and aggregated for payment processing. If any issues are identified with the additional system validations, State Staff resolve these issues prior to the system aggregating the data for payment processing. The mainframe captures the Date of Service, Person Providing the Service, Person Receiving the Service, Time the Service Begins and Ends, and Type of Service Performed, but doesn't capture the Location of the Service. The mainframe system currently does not have the ability to capture these data elements in a real-time manner which is required for EVV.

See below for high-level current state process flow:

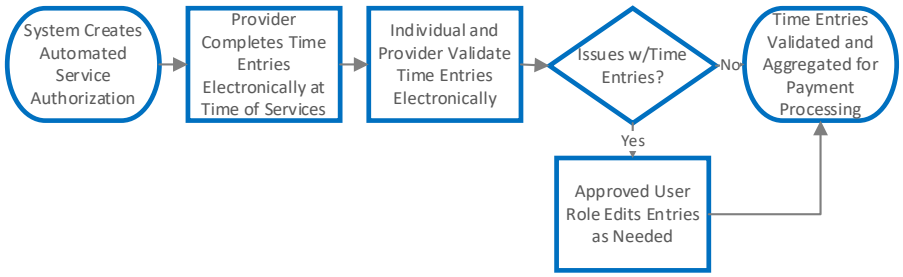


**See Appendix C for comprehensive Current State Process Flows.*

Future State Process

In the ideal future state, HCWs/PSWs will complete the enrollment process to receive an automated service authorization. HCWs/PSWs will electronically capture the required EVV data elements at time of service (Date of Service, Person Providing the Service, Person Receiving the Service, Time the Service Begins and Ends, Location of Service, and Type of Service Performed). If HCWs/PSWs are traveling directly from one individual to another to perform applicable services, departure and arrival time between individuals will be captured electronically. HCWs/PSWs will validate time entries and fix any issues they identify. The Individual or their representative will then validate entries to ensure services were performed as indicated on the timesheet. Specific user roles will have the ability to edit time entries as needed. Once time entries are validated, they will be aggregated for payment processing.

See below for high-level future state process flow:



***See Appendix D for comprehensive Future State Process Flow.*

EVV Solutions in Other States

After researching other state solutions, it was determined the most commonly used solution is Santrax by Sandata. According to the available data, 19 states are still in process of determining the solution or the information was unavailable. Based on the data compiled, most states with solutions identified have selected single vendor solutions. With many states already EVV compliant and more states in the implementation phase, the State has a lot of accessible information to draw from to make our solution work for our stakeholders.

***See Appendix E for detailed information on Alternative Analysis Out of State Solutions.*

Problem Examples

The implementation of the short-term solution to meet the FLSA requirements created a workload which was not accounted for in any workload model by DHS. The current manual process of State Staff keying information into the system from a paper timesheet is very time intensive and causes replication of existing data. Timesheets are stored locally, often in paper and electronic format, as well as being stored in the mainframe system. Additionally, this increases the risk of data entry errors which can result in inaccurate payments to providers. State Staff spend a significant amount of time communicating back and forth with providers due to timesheets being filled out incorrectly or time entries not being legible. This can potentially delay payments to providers. An estimated 70 full-time employees (FTEs) spend their time dedicated to manually entering provider time in and time out from a paper timesheet submitted by the HCWs/PSWs.

FMAS has been a topic throughout the life of the project and reflects the long-term vision of APD and HSD. The decision was made not to include FMAS in the initial phase of the project. With the exclusion of FMAS in the initial phase, there will still be a need to process payroll and claims through legacy systems. The Office of Financial Services (OFS) recommends claims processing stay in legacy systems to interface with Accounting Interface (AI) and State Financial Management Application (SFMA) for funding and reporting to CMS.

Opportunity Examples

Section 1903(l)(5)(A) of the 21st Century CURES Act provides that the system must be able to electronically verify, with respect to visits conducted as part of personal care services, the following:

1) the type of service performed;
2) the individual receiving the service;
3) the date of the service;
4) the location of service delivery;
5) the individual providing the service; and
6) the time the service begins and ends

Section 1903(l)(2) also requires states to provide a stakeholder process to allow input into the state's implementation of the EVV requirement from providers of Personal Care Services (PCS) and home health services, beneficiaries, family caregivers, and other stakeholders.

An EVV solution must be in place for personal care services starting January 1, 2020. If a state demonstrates to the Secretary that: (1) that the state has made a good faith effort to comply with the EVV requirements (including taking steps to adopt the technology used for an electronic visit verification system); and (2) that the state, in implementing such a system, has encountered unavoidable system delays, then the FMAP reductions shall not apply for calendar quarters in 2020 (for personal care services).

Compliance with the 21st Century CURES Act within the required implementation timeline will allow the State to avoid penalties. The good faith effort exception will allow for a January 1, 2021 implementation due date. The resulting penalties for non-compliance include a reduction of Federal Medical Assistance Percentages (FMAP) for Consumer-Based Care and In-Home Care expenditures beginning with a 0.25% on January 1, 2021. The percentage will increase to 0.50% by 2022, 0.75% by 2023, and 1% from 2024 going forward. See *'Option 10 - Cost of Doing Nothing'* in the *'Alternative Analysis'* section for cost estimates.

Being compliant with the 21st Century CURES act gives the State the opportunity to remove a significant burden from Providers, Field Staff, and System Teams. The savings in staff time will allow those staff to take on other responsibilities and allow case managers more time for person-centered planning and engagement.
It will also help improve the safety and security of vulnerable Oregonians by ensuring services are actually provided to the individual through monitoring location and real-time activity. By moving away from a manual process, it will save staff time and decrease the risk of data entry errors and erroneous payments to providers.

Lessons Learned Evaluation

The State requested the Quality Assurance (QA) vendor, Cognosante, prepare a Lessons Learned report to document project successes, challenges, and recommendations through collaborative information gathering sessions. This information will be used to identify areas of reinforcement and areas where mitigations are needed as the project reboots. The results of these sessions are comprehensive of the early stages of the project until the contract was expired with PPL.

***See Appendix F for Lessons Learned Report with mitigations added addressing recommendations.*

Goals, Objectives, and Measurements

Below is the list of Goals, Objectives, and Measurements (GOM) for the PTC Project, formulated utilizing the PTC Project Guiding Principles. The PTC Project Guiding Principles were drafted collaboratively and approved by APD and HSD program leadership, OIS management, and other impacted stakeholders.

Goals	Objectives	Baseline Measurements	Post Go-Live Measurement	Means and Frequency of Measurement (Report, Survey, Time Study, Process Mapping)
Goal #1: Comply with Federal requirements, including 21st Century Cures Act.	1.1 **Objective:** Establish use of Electronic Visit Verification (EVV) compliant recording mechanism(s).	N/A	Percentage of provider compliance.	Report – 30- and 90-days post pilot and statewide.
	1.2 **Objective:** Establish electronic approval of time entries by individuals.	N/A	Percentage of electronic approvals.	Report – 30- and 90-days post pilot and statewide.
	1.3 **Objective:** Capture the six required data elements for Electronic Visit Verification (EVV).	N/A	Percentage of data elements captured electronically.	Report – 30- and 90-days post pilot and statewide.
Goal #2: Improve program integrity.	2.1 **Objective:** Decrease number of time entry/reporting errors.	Total number of adjustments to paid claims both positive and negative 30 days prior to pilot for two pay cycles.	Compare total number of adjustments in the adjustments queue for reduction in errors.	Report – 30 days prior to pilot, and 45 days post pilot and statewide (adjustment reason codes used in post go-live reports).
	2.2 **Objective:** Decrease number of over/under payments.	Total number of over/under payments reported 30 days prior to pilot for two pay cycles.	Total number of timesheet adjustments in the adjustments queue that result in a change in pay.	Report – 30 days prior to pilot, and 45 days post pilot and statewide out of legacy system.

Goals	Objectives	Baseline Measurements	Post Go-Live Measurement	Means and Frequency of Measurement (Report, Survey, Time Study, Process Mapping)
	2.3 **Objective:** Decrease number of incidents of potential fraud.	Total number of potential incidents of fraud reported 30 days prior to pilot for the previous 6 months.	Total number of potential incidents of fraud reported post pilot and statewide.	Report – via Fraud Unit every 30 days prior and post pilot, through 90 days post statewide.
	2.4 **Objective:** Decrease number of errors in reporting travel time.	Total number of adjustments to paid claims positive or negative 30 days prior to pilot for two pay cycles.	Total number of adjustments in the adjustments queue post pilot and statewide.	Report – 30 days prior to pilot, and 45 days post pilot and statewide (adjustment reason codes used in post go-live reports).
	2.5 **Objective:** Increase reporting traceability processes and capabilities.	Record time between process steps pre-pilot.	Record time between process steps post-pilot.	Process Mapping – compare baseline durations with those 30 days post pilot.
Goal #3: Decrease workload on identified impacted groups.	3.1 **Objective:** Decrease workload for Voucher Clerks (Field Offices) and Provider Relations Unit (PRU) (Central Office) in voucher issuance and reprint processes.	Determine current workload for Voucher Clerks (Survey), and for PRU Staff (Time Study).	Establish workload for Voucher Clerks and PRU Staff 90 days post pilot and statewide.	Survey – send 90 days prior to pilot with 60-day deadline. Time Study – conduct visits 60 days prior to pilot, and 90 days post pilot and statewide.
	3.2 **Objective:** Decrease workload for Travel Time Clerks (Field Offices) and PRU staff in processing travel time.	Determine current workload for Travel Time Clerks (Survey), and for PRU Staff (Time Study).	Establish workload for Travel Time Clerks and PRU Staff 90 days post pilot and statewide.	Survey – send 90 days prior to pilot with 60-day deadline. Time Study – conduct visits 60 days prior to pilot, and 90 days post pilot and statewide.

Goals	Objectives	Baseline Measurements	Post Go-Live Measurement	Means and Frequency of Measurement (Report, Survey, Time Study, Process Mapping)
	3.3 **Objective:** Decrease workload for field staff in time entry and correction processes (time entry corrections and over/under adjustments).	Determine current workload for Field Staff (Survey), and PRU Staff (Time Study).	Establish workload for Field and PRU Staff post pilot and statewide.	Survey – send 90 days prior to pilot with 60-day deadline. Time Study – conduct visits 60 days prior to pilot, and 90 days post pilot and statewide.
	3.4 **Objective:** Decrease workload for staff in the payment correction processes (adjustments, exceptions, and corrections). (PRU and ITBS)	Determine current workload for staff to process all payment corrections via baseline from Objectives 2.1, 2.2, and 2.4.	Establish workload for staff post pilot and statewide via measurement from Objectives 2.1, 2.2, and 2.4.	Report – 30 days prior to pilot, and 45 days post pilot and statewide. Survey – send 90 days prior to pilot with 60-day deadline. Time Study – conduct visits 60 days prior to pilot, and 90 days post pilot and statewide.
	3.5 **Objective:** Decrease workload for providers in submitting time worked.	Determine current workload for providers.	Establish workload for providers post pilot.	Survey – send 90 days prior to pilot with 60-day deadline, and 30 days post pilot.
	3.6 **Objective:** Decrease workload for individuals in approving time entries.	Determine current workload for individuals.	Establish workload for individuals post pilot.	Survey – send 90 days prior to pilot with 60-day deadline, and 30 days post pilot.

Goals	Objectives	Baseline Measurements	Post Go-Live Measurement	Means and Frequency of Measurement (Report, Survey, Time Study, Process Mapping)
	*3.7 **Objective:** Decrease workload for staff in collecting, updating, and issuing payroll related documentation (W-2, W-4, DD, etc.).	Determine current workload for State Staff.	Establish workload for State Staff post pilot.	Time Study – conduct visits 60 days prior to pilot, and 90 days post pilot and statewide.
	*3.8 **Objective:** Decrease workload for staff in garnishment and recoupment processes.	Determine current workload for State Staff.	Establish workload for State Staff post pilot.	Time Study – conduct visits 60 days prior to pilot, and 90 days post pilot and statewide.
Goal #4: Decrease processes within legacy systems functions and/or data.	4.1 **Objective:** Decrease number of functions performed by the existing state systems in the time entry, calculation, and payment processes.	Determine current workload 30 days prior to pilot.	Establish workload post pilot.	Survey – send 90 days prior to pilot with 60-day deadline, and 30 days post pilot.
	4.2 **Objective:** Decrease number of validations performed by the existing state systems in the time entry, calculation, and payment processes.	Determine current workload 30 days prior to pilot.	Determine workload post pilot.	Survey – send 90 days prior to pilot with 60-day deadline, and 30 days post pilot.
	4.3 **Objective:** Decrease number of business processes that require legacy systems.	Determine current workload 30 days prior to pilot.	Determine workload post pilot.	Survey – send 90 days prior to pilot with 60-day deadline, and 30 days post pilot.
Goal #5: Reduce costs associated with manual processes.	5.1 **Objective:** Decrease paper voucher storage costs and physical location needs.	Determine storage costs and location needs at pre-determined go-live locations 30 days prior to pilot.	Establish storage costs and location needs at pre-determined go-live locations 30 post pilot.	Survey – send 90 days prior to pilot with 60-day deadline, and 30 days post pilot.

Goals	Objectives	Baseline Measurements	Post Go-Live Measurement	Means and Frequency of Measurement (Report, Survey, Time Study, Process Mapping)
	5.2 **Objective:** Decrease number of time entry claims that are paid solely out of the General Fund.	Determine provider payments that are paid out of General Fund 30 days prior to pilot for 90 days data timeframes.	Establish provider payments that are paid out of the general fund post pilot.	Report – 30 days prior to pilot, and 90 days post pilot and statewide (determine average for 90-day data timeframes).
	5.3 **Objective:** Decrease printing and mailing costs for printed paper vouchers.	Determine printing and mailing costs for vouchers 30 days prior to pilot.	Establish printing and mailing costs for vouchers post pilot.	Report – 30 days prior to pilot, and 90 days post statewide (compare previous voucher costs and mailing of Welcome packets and paper timesheets).
	5.4 **Objective:** Decrease Mainframe processing and storage costs.	Determine processing and storage costs.	Establish processing and storage costs post pilot.	Report – 30 days prior to pilot, and 90 days post pilot and statewide.
Goal #6: Maximize user adoption through identified, organized, and prioritized change management, communications, and trainings.	6.1 **Objective:** Decrease stakeholder barriers to adoption.	Gather barriers as well as communication or training needs to tailor outreach efforts to best meet the stakeholders' needs.	User experience survey results.	Survey – Collect barriers to adoption 90 days prior to pilot; satisfaction survey 90 days post pilot and statewide.
	6.2 **Objective:** Increased accessibility for successful time entry and approval.	N/A	User experience survey results.	Survey – send 90 days prior to pilot with 60-day deadline, and 30 days post pilot.
	6.3 **Objective:** Ensure stakeholders rely on appropriate resources for project information updates.	N/A	User experience survey results.	Survey – send 90 days prior to pilot with 60-day deadline, and 30 days post pilot.

Goals	Objectives	Baseline Measurements	Post Go-Live Measurement	Means and Frequency of Measurement (Report, Survey, Time Study, Process Mapping)
	6.4 **Objective:** Increase user satisfaction for all impacted groups.	N/A	User experience survey results.	Survey – send 90 days prior to pilot with 60-day deadline, and 30 days post pilot.
Goal #7: Ensure system and processes are clear and understandable for identified impact groups (Individuals, Providers, and Staff)	7.1 **Objective:** Increase number of readily accessible training materials and online documentation.	Determine current training materials available.	User experience survey results.	Survey – send 90 days prior to pilot with 60-day deadline, and 30 days post pilot.
	7.2 **Objective:** Decrease time for staff in describing/explaining the time entry and approval processes.	Determine time needs for staff in describing /explaining the time entry and approval process.	Establish time needs for staff in describing /explaining the time entry and approval process.	Survey – send 90 days prior to pilot with 60-day deadline, and 30 days post pilot.

**These objectives are related to payroll and may be considered in the future projects.*

Functional Alignment and Scope Information

The Project conducted research to determine what would be involved for functional alignment, as some of the programs have the same need to meet EVV requirements. The aging technology systems and the business processes they support have been siloed and customized within programs and counties, limiting access to and preventing the sharing of key data. Processes have evolved from exclusively paper-based processes to a mix of paper and technology, enhanced occasionally as technology changes have been available and policy requirements have dictated. Research included the solutions APD in-home agencies are utilizing for EVV requirements and whether they are meeting the requirements. The results of this research are outlined below.

1. **Functional Alignment -** The Project met with APD, HSD, ODDS, SSP, and OHA to see where there could be alignment between all the programs for appropriate Medicaid populations.

    a. APD In-Home Agencies are required to become EVV compliant by January 1, 2020. The Project did research and determined that 61% of in-home agencies in Oregon reported being EVV compliant, with the most commonly applied solutions to meet requirements being ClearCare and Generations (which support the needs of larger agencies). Both ClearCare and Generations have EVV compliant options via a mobile application and telephony system, with extensive training, self-help features, and tutorials available on their website. End users have reported positive experiences and the systems include nice to have features like care notes and real-time messages and notifications to users. Needs of in-home agencies may be different than the needs of the State but the State has a responsibility to aggregate this data for reporting.

***See Appendix G for more detailed In-Home Agency EVV Information.*

b. Office of Developmental Disabilities Services (ODDS) is currently planning a redesign of eXPRS with their stakeholder groups to align with their strategic vision. ODDS provides services to the developmental disabilities population and shares the same needs as APD and HSD for meeting EVV requirements. Currently ODDS issues yearly authorizations for the individuals/authorized representatives to manage the hours the providers can work. ODDS serves approximately 12,000 individuals (which includes both children and adults) in their homes with PSWs providing the care. The PSWs are enrolled in the eXPRS system. They also enter their time in and time out in the eXPRS system and once time is entered for the pay period, they print the timesheet and the individuals sign for approval. ODDS issues hours and rate to an FMAS vendor for payment and tax calculations for their PSWs. APD, HSD, and ODDS programs are not in alignment for policy/program and ODDS is in the process of separating out Oregon Administrative Rules (OAR) which could potentially divide the programs even more. In the early planning of the project, the goal was to align policy/program between the programs, but it was determined this was not achievable due differing policies/programs.

c. Self Sufficiency Program (SSP) may have time capture needs for their Temporary Assistance for Needy Families (TANF) and Employment-Related Day Care (ERDC) programs. The Project gathered information on the SSP population to identify if these programs have time capture needs. The SSP programs TANF and ERDC may be interested in integrating with an EVV solution in the long-term. TANF is interested in tracking the attendance of participants in the Job Opportunity and Basic Skills (JOBS) program receiving funding through the TANF block grant. SSP is interested in the tracking of day care recipients paid by SSP on behalf of the Individual enrolled in the ERDC program. SSP is working on the IE Project and will be maintaining legacy systems upon the completion of IE to support these populations.

   ERDC previously attempted a project called Child Care Billing and Attendance Tracking (CCBAT) which was designed around capturing attendance and authorizations. This project did not successfully roll out, and SSP may be interested in rolling the EVV project into this. In 2017, ERDC funding was reduced by $9.3 million due to a reduction in federal funds while serving 16,323 children across 8,658 cases. As of October 2017, there were 1,691 licensed child care providers actively providing child care across the state for DHS families.

   TANF works with recipients to identify a path to self-reliance. TANF has tools that may need to be integrated into the system, including a data tracking tool used to track family progression. TANF, combined with Pre-Supplemental Security Income (Pre-SSI) and Social Security Disability Insurance (SSDI) programs, served 21,664 families, including 38,821 children and 18,571 adults in 2018. Most parents/caretakers in TANF are required to participate in the JOBS program, which requires them to attend education and training opportunities. Currently, there are no active efforts to automate the attendance on either the TANF, JOBS, or ERDC programs.

d. OHA 1915i and Home Health Services (HHS) programs are currently outside of scope for PTC. OHA is interested in integrating into an EVV solution with APD and HSD. Currently, the 1915i program serves 400 individuals and the providers that serve these individuals are a variety of mental health and peer support specialists. They are currently enrolled and managed in the

Medicaid Management Information System (MMIS). Billing is through Prior Authorizations (PA) and has a set rate per hourly unit authorized. The providers submit units through MMIS for reimbursement. There are validations in place that check all eligibility and won't allow billing over the PA. These providers are 1099 contractors.

There are 40 provider agencies (nursing, physical therapy, occupational therapy, medical supplies, durable medical equipment, etc.) for Home Health Services (HHS). These providers are prior authorized through plan of care (fee-for-service). They bill at an agency level through revenue codes. The revenue codes used to bill home health services can be found at the following link: https://www.oregon.gov/oha/HSD/OHP/Tools/Home%20Health%20Rates%20-%20January%201,%202019.pdf. Time in and time out is captured by the agencies but not provided to OHA. The location is assumed as the Individual's home but is not actively captured.

e. IE (Deloitte) was in review for a potential EVV solution. There was consideration and research done into the option of either pursuing integration/enhancement to IE or utilizing the master services agreement with Deloitte. Deloitte does offer a module for time capture, but it was determined to be out of scope of the special procurement for IE. Department of Administrative Services (DAS) Procurement Services advised the type and level of work required to complete the project was not supported under the master services agreement. At this time, any procurement that might benefit the State to align with existing technologies and vendors would have to be managed through a separate procurement process.

f. Workday has experienced ongoing delays with the implementation including work on phase two. Workday is continuing to clarify what will be in/out of scope for the time capture and payroll solution and how/what options exist for differing needs. Based on the information received, planning efforts are still being researched for the scope, and the goal is to do the State payroll system before involving other partners.

g. MMIS Modularity Project is in the process of hiring a planning vendor to assist with modularization of MMIS. This may suggest any EVV related module would be later in the 10-year plan of modularization of MMIS.

2. **COTS Basic + COTS Plus Customization (Galaxux) -** There is not a COTS specific solution for scoring. The Project has updated the COTS information from Galaxux.

   ***See Appendix H for more detailed information on COTS Basic + COTS Plus Customization.*

Solution Requirements

The solution requirements are organized into the following categories:

- **Business Rules** - Describes the specifics about each rule for validating time entries, authorizations (service matrix), and relationships for Individual/Provider.

- **Data Management** - Describes EVV components such as how time and location are captured including travel time.

- **Data Processing** - Describes the specifics about how time entries and adjustments are processed (what triggers are for adjustments) and determines what will happen with failed validations.

- **Security and Privacy** – Describes user role-based security (detail on each role and what access they have), user profiles, and any privacy rules.

- **User Experience** - Describes what users (Individuals, Providers, State Staff, etc.) will see and related functionality. Also, describes performance, languages, accessibility, etc.

- **Reporting** - Describes basic and detailed reporting functionality including custom reports.

- ****Payroll** - Describes the payroll process i.e., taxes, union dues, garnishments, quarterly and yearly reporting, etc. Also describes the rules and flow for calculating overtime.

The requirements are prioritized by Critical, High, Medium, and Low. The goal of the critical requirements is to set the minimally viable product for initial release. High, medium, and low requirements will be used for planning future releases depending on the status of the project. Please see below for the definitions.

- **Critical** - "Shall"- Critical Impact - required to achieve strategic outcomes.
- **High** - "Should"- Considerable Impact - highly recommended but not required.
- **Medium** - "Could"- Some Impact - preferred but not required.
- **Low**- "Would" - Low Impact - considered for future enhancement.

***See Appendix I for comprehensive Project Requirements.*

***See Appendix J for Payroll Requirements (for reference for future projects)*

Project Assumptions

The following are project assumptions:

- The agreed upon option will continue to support the final rule set forth by DOL in the FSLA to Domestic Service, 78 FR 60454 (Oct. 1, 2013).
- The agreed upon option will ensure compliance with the 21st Century CURES Act.
- Federal and State funding will be made available as needed for the life of the project.
- Key project members will possess the skills needed to complete project tasks as assigned.
- Planning activities will be based on the availability of expected resources (Technical, Business, SME's and Stakeholders)
- There will be an increase in required resources for security administration and management for internal and external users.
- The level of risk between alternatives is not equal, but an average risk score was the most objective way to compare alternatives.
- Through real-time tracking, it will help improve the safety and security of vulnerable individuals by ensuring services are being provided and give the State a better understanding of individuals who may be at risk of not receiving their services.
- Claims processing will remain in existing legacy system to ensure correct funding allocation.
- Through the life of the project there will continue to be IE related policy and code freeze processes the project will need to accommodate in schedule planning.

- The IE Project will continue to be the priority project above PTC.

Alternative Analysis Options

Below are the alternative options the Project Team researched for mobile application and web functionality to determine which would be viable options for the project to move forward. See below for high level summary of each option:

1. **In-House Build**
    - A front end to CEP for time capture capability meeting EVV requirements.

2. **eXPRS Time Entry option**
    - APD and HSD to transition to eXPRS for all time capture related needs and pass the information to the mainframe for processing.

3. **All in-eXPRS Mobile-EVV with Mainframe**
    - APD and HSD to transition to eXPRS for all time capture related needs as well as inclusion of FMAS.

4. **All in-eXPRS Mobile-EVV without Mainframe**
    - APD and HSD to transition to eXPRS for all (policy/rules/business process/system) needs.

5. **MMIS Current Contract**
    - Utilizing the current MMIS vendor and contract to support an EVV solution.

6. **SaaS**
    - Utilizing SaaS would eliminate the need to install new servers and software at the State Data Center and data would be stored with the vendor solution.

7. **Other Agency Solutions-Oregon Department of Transportation (ODOT)**
    - Integrating into the State instance of KRONOS, a time keeping software being piloted by ODOT.

8. **Free and Open Source Software (FOSS)**
    - FOSS that may be utilized for EVV with our current systems.

9. **Salesforce**
    - A cloud-based platform solution that would require a separate procurement for system integration services.
    - Given the State's licensing contract for Salesforce, the State could independently develop on the Salesforce platform.

10. **Cost of Doing Nothing**
    - The cost the Agency would incur if an EVV option is not implemented.

Alternative Analysis

Below are the alternatives the Project analyzed which describe the option with the associated benefits, risks, and estimated cost for each alternative. For more information regarding the methodology used to calculate "Staffing Costs/Professional Services Costs" for each of the alternatives, see the 'Selection Criteria and Ranking' section.

Option 1 – In-House Build

This option proposes a mobile application and a web front-end user interface that allows HCWs and PSWs to enter time electronically. HCWs and PSWs will use the online web interface and mobile application to record their service time and mileage entries. The scope of work for this option will only include the system modifications to the Mainframe systems, new development for a web front-end UI (user interface), and new development for a mobile application. Ongoing maintenance and enhancement work will remain in house.

Benefits to implementing In-House Build:

- Providers have access to both mobile application (with offline capability) and online functionality
- Individuals and their Authorized Representatives (AREPs) have access to electronic approval of time entries
- Least impact to mainframe applications and mainframe development resources by utilizing existing mainframe functionality for authorizations and payments
- Real-time provider eligibility validation
- Real-time individual eligibility validation
- Individual and provider demographic information is accurate/up to date
- Continue to allow last day worked and emergency payments/off cycles processing
- EVV compliant

Risks or negative outcomes associated with implementing In-House Build:

- Resourcing issues may still be a risk with prioritization of OIS resources
- Additional resourcing needed for ongoing Operations and Maintenance for the online/web application

Estimated Cost:

In-House Approach – 12-18 Months	**Total**
State Data Center Costs	$158,270
Software Costs	$0
Hardware Costs	$0
State Staffing Costs / Professional Services Cost	$3,803,800
Implementation Total	**$3,962,070**
Ongoing Maintenance Costs	
Post Implementation adjustments – for 12 months: 1 OPA2 at FTE ($109,670) 1 OPA3 at FTE ($120,397) 2 0.5 ISS7s FTE ($142,123)	$372,190

Software Licensing, Hosting or User/Transaction Based Fees	$0
State Data Center	$324,870
Maintenance Total	**$697,060**
TOTAL	**$4,659,130**

Option 2 – eXPRS – Providers enter time via eXPRS System

This option will utilize the existing technology, with eXPRS desktop and eXPRS Mobile-EVV, for time entry currently done by ODDS PSWs. This option will require modifications to both eXPRS and Mainframe to allow HCWs and PSWs to log into eXPRS and enter time entries via an online web interface. This will allow for a consolidated environment across all applications, individual populations, and provider populations. Time entries will be sent to CEP to process payroll. Ongoing maintenance and enhancement work will remain in house.

Benefits to implementing eXPRS - Providers enter time via eXPRS System:

- eXPRS can access the authorization information in real-time
- Basic time entry validations exist in eXPRS
- eXPRS, in the upcoming release, will have the ability to capture last day worked and emergency payments/off-cycles in an automated manner (manual functionality is currently available)
- Pended time entries: Queue already exists in eXPRS to work pends (by Field Office and Central Office – depending on the reason for the pend)
- Real-time provider eligibility validations
- Real-time individual eligibility validations
- Would allow for individual notifications to be sent
- Individual and provider demographic information is accurate/up to date

Risks or negative outcomes associated with implementing eXPRS - Providers enter time via eXPRS System:

- Estimated number of OIS hours would likely exceed 3,000 actual effort hours (could be more during design sessions) (OIS performs estimation based on the combination of size/risk/complexity along with the expert judgement of their system developers.)
- Expected risk of change to existing legacy application would be medium to high
- Policy and business processes are not in alignment
- Potentially not EVV compliant due to limited current CMS guidance (lack of offline functionality would be non-compliant) (Offline functionality is being pursued by ODDS)
- Resourcing issues may still be a risk for ODDS and APD with prioritization of OIS resources.
- Limitations to include OHA Home Health program
- Limitations to include OHA 1915i program

Estimated Cost:

eXPRS Time Entry End Approach – 18-24 Months	**Total**
State Data Center Costs	$158,270
Software Costs	$0

Hardware Costs	$0
State Staffing Costs / Professional Services Cost	$6,738,959
Implementation Total	**$6,897,229**
Ongoing Maintenance Costs	
Post Implementation adjustments – for 12 months: 1 OPA2 at FTE ($109,670) 1 OPA3 at FTE ($120,397) 2 0.5 ISS7s FTE ($142,123)	$372,190
Software Licensing, Hosting or User/Transaction Based Fees	$0
State Data Center	$324,870
Maintenance Total	**$697,060**
TOTAL	**$7,594,289**

Option 3 – All in-eXPRS Mobile-EVV with Mainframe – Provider Time Capture and FMAS in eXPRS

This option will utilize the existing technology with eXPRS desktop and eXPRS Mobile-EVV for time entry currently done by ODDS PSWs, including FMAS for payroll processing. This option will require modifications to both eXPRS and Mainframe to allow HCWs and PSWs to log into eXPRS and enter time entries via an online web interface. This will allow for a consolidated environment across all applications, individual populations, and provider populations. This option would require some policy and business process alignment. Ongoing maintenance and enhancement work will remain in house.

Benefits to implementing All in-eXPRS Mobile-EVV with Mainframe:

- Basic time entry validations already exist in eXPRS
- Would have the ability to capture last day worked and emergency payments/off cycles in an automated manner
- Pend queue already exists in eXPRS to work pends (by Field Office and Central Office depending on the reason for the pend)
- Real-time provider eligibility validations
- Real-time individual eligibility validations
- Individual and provider demographic information is accurate/up to date
- OT and Travel time would be calculated accurately with cross program providers in the same solution (same payment system for programs)
- Would allow for individual notifications to be sent
- Single source payment system

Risks or negative outcomes associated with implementing the All in-eXPRS Mobile-EVV with Mainframe:

- Expected risk of change to existing legacy application would be medium to high
- Additional development on the mainframe for claim financing for funding sources
- Policy and business processes are not in alignment
- Pay cycles are not in alignment

- Resourcing issues may still be a risk for ODDS and APD with prioritization of OIS resources
- Updating/changing coding could cause some unforeseen system issues
- Potentially not EVV compliant due to limited current CMS guidance (lack of offline functionality would be non-compliant) (Offline functionality is being pursued by ODDS)
- Limitations to include OHA Home Health program
- Limitations to include OHA 1915i program

Estimated Cost:

eXPRS All-in w/MF Approach – 24 Months	**Total**
State Data Center Costs	$158,270
Software Costs	$0
Hardware Costs	$0
State Staffing Costs / Professional Services Cost	$7,701,667
Implementation Total	**$7,859,937**
Ongoing Maintenance Costs	
Post Implementation adjustments – for 12 months: 1 OPA2 at FTE ($109,670) 1 OPA3 at FTE ($120,397) 2 0.5 ISS7s FTE ($142,123)	$372,190
Software Licensing, Hosting or User/Transaction Based Fees (This includes payroll services through existing contract held by ODDS)	$47,684,712
State Data Center	$324,870
Maintenance Total	**$48,381,772**
TOTAL	**$56,241,709**

Option 4 - All in eXPRS Mobile-EVV without Mainframe

This option will utilize the existing technology and bring APD, HSD, and ODDS into alignment for rules/policy/business process/system. This option will require modifications to eXPRS to allow HCWs and PSWs to log into eXPRS and enter time entries via an online web interface. This will allow for a consolidated system application across individual and provider populations. Ongoing maintenance and enhancement work will remain in house.

Benefits to implementing All in eXPRS Mobile-EVV without Mainframe:

- Utilization of existing technology
- Basic time entry validations already exist in eXPRS
- Would have the ability to capture last day worked and emergency payments/off cycles in an automated manner
- Pend queue already exists in eXPRS to work pends (by Field Office and Central Office depending on the reason for the pend)
- Real-time provider eligibility validations
- Real-time individual eligibility validations

- Individual and provider demographic information is accurate/up to date
- OT and Travel time would be calculated accurately with cross program providers in the same solution (same payment system for programs)
- Would allow for individual notifications to be sent
- Single source payment system

Risks or negative outcomes associated with implementing the All in eXPRS Mobile-EVV without Mainframe:

- Expected risk of change to existing legacy application would be high
- Policy and business processes are not in alignment
- Pay cycles are not in alignment
- Resourcing issues may still be a risk for ODDS and APD with prioritization of OIS resources
- By updating/changing coding could cause some unforeseen system issues
- Potentially not EVV compliant due to limited current CMS guidance (lack of offline functionality would be non-compliant) (Offline functionality is being pursued by ODDS)
- Additional resources may be needed for Operations and Maintenance
- MMIS resourcing needs for modifications to the eligibility interface with eXPRS to include APD and HSD eligibility
    - *Note: Oregon Project Independence (OPI) and Extended Waiver Eligible (EWE) individuals are not in MMIS and/or Oregon ACCESS*
- Limitations to include OHA Home Health program
- Limitations to include OHA 1915i program

Estimated Cost:

eXPRS All-in w/out MF Approach – 24 Months	**Total**
State Data Center Costs	$158,270
Software Costs	$0
Hardware Costs	$0
State Staffing Costs / Professional Services Cost	$7,701,667
Implementation Total	**$7,859,937**
Ongoing Maintenance Costs	
Post Implementation adjustments – for 12 months: 1 OPA2 at FTE ($109,670) 1 OPA3 at FTE ($120,397) 2 0.5 ISS7s FTE ($142,123)	$372,190
Software Licensing, Hosting or User/Transaction Based Fees (This includes payroll services through existing contract held by ODDS)	$47,684,712
State Data Center	$324,870
Maintenance Total	**$**48,381,772
TOTAL	**$56,241,709**

Option 5 – MMIS Current Contract

This option would entail using current MMIS vendor and contract to support an EVV solution. If the timeline for modularity is far enough in the future, it would be equivalent to the "Do Nothing" option.

Benefits to implementing MMIS Current Contract:

- Potential to coordinate efforts with OHA and utilization of existing resources, contract and technology
- DXC is aware EVV compliance requirements and is the vendor for MMIS for Oregon
- Some staff are already familiar with using the MMIS system
- In-Home Agency and Home Health providers currently use the system for the MMIS Web portal
- HSD providers are currently stored and maintained in MMIS system
- Alignment on enterprise solution for MMIS

Risks or negative outcomes associated with implementing MMIS Current Contract:

- Potential risk if need to change legacy/mainframe
- Prioritization of other MMIS work including IE interfacing
- System and/or vendor limitations that prevented CEP inclusion in initial MMIS implementation
- Cross program travel time hours/OT hours calculation
- Movement of information into MMIS could have downstream impacts to other systems
- New mainframe interface needed for non-financial eligible OPI and EWE not stored in MMIS and IE ONE
- MMIS does not always apply Service Eligibility date ranges (segments) in Recipient module
- Long-term Operations and Maintenance are unclear past the 2-year contract extension option
- Sub-contracting with Sandata via MMIS would add an additional vendor to the project
- An amendment for the special procurement would be required due to added cost
- Sub-contracting could also mean a separate license agreement could be required when transitioning away from DXC
- If we include PTC in the MMIS scope, DAS Procurement Services would have to be involved at some level and it's possible there is risk of losing delegation for MMIS in trying to force this body of work under the MMIS RFP from 2004
- CMS will only pay for one EVV solution for the State
- Additional resources may be needed for Operations and Maintenance

Estimated Cost:

- For cost comparison purposes the Montana modularity pricing for a provider module is claims based and includes some degree of provider management. The cost is around $50 million total. DDI is $13 million and Operations and Maintenance is $37 million for 4 years.

Below is the estimated cost breakdown:

MMIS Approach – 18-24 Months	**Total**
State Data Center Costs	$0
Software Costs	$662,450
Hardware Costs	$0
State Staffing Costs / Professional Services Cost	$5,843,514
Implementation Total	**$6,505,964**
Ongoing Maintenance Costs	
Post Implementation adjustments – for 12 months: 1 OPA2 at FTE ($109,670) 1 OPA3 at FTE ($120,397) 2 0.5 ISS7s FTE ($142,123)	$372,190
Software Licensing, Hosting or User/Transaction Based Fees	$7,000,000
State Data Center	$0
Maintenance Total	**$7,372,190**
TOTAL	**$13,878,154**

Option 6 – SaaS

The SaaS approach involves implementing new software but does not require installing new servers and software at the State Data Center. Data for this approach is stored by the solution vendor in an environment that meets the agency security and privacy requirements.

Benefits to implementing a SaaS solution:

- With multiple EVV solutions having been implemented, the market place for vendor solutions is much larger than previously identified
- Since SaaS solution vendors have implemented solutions in other States for EVV, they are familiar with the EVV requirements
- Offers robust functionality with automated workflows, a variety of time capture methods, and electronic or telephonic notifications
- Several vendors in this space have deep experience providing time capture solutions to Direct Care Workers under the Medicaid program
- Most of the desired functionality is already existing; project efforts to implement are focused on configuration, integration, and training
- Requires fewer technical resources from the state
- Shorter implementation timeframe
- No hardware/software to install/maintain
- Provides necessary output to solve the business problem
- Many SaaS solutions are extensible to meet future business goals, such as payroll
- Most of the responses to the original PTC RFI proposed a SaaS solution, which is consistent with the direction of the software industry and market research into time capture solutions

- No dependency on State Data Center
- The solution will automate the time capture process and eliminate or greatly reduce manual processes associated with time capture

Risks or negative outcomes associated with implementing a SaaS solution:

- Lack of direct access to State owned data can result in the inability to analyze and report on the data and may preclude ad-hoc queries
- May be limited in the ability to incorporate agency requirements into a Service Level Agreement with the solution vendor, therefore changes in business process, policy, and potential workarounds will need to be considered.
- Agency specific customizations may be difficult or unattainable depending on the solution
- Solution may consist of technology involving unique hardware that must be in place at all service locations (Fixed Visit Verification/Electronic Visit Verification devices)
- Not all SaaS solutions can scale into additional case management and provider payment (payroll) functions that are envisioned in the long-term future state
- Additional resources may be needed for Operations and Maintenance

Estimated Cost:

This approach assumes an 18-24-month DDI period with the commencement of licensing or fees after implementation. It is assumed that the solution and all data is hosted by the SaaS vendor. Some vendors may require an up-front payment of a portion of the implementation and integration services.

SaaS Approach – 18-24 Months	**Total**
State Data Center Costs	$0
System Integration/Software Costs**	$7,542,540
Hardware Costs	$18,375
State Staffing Costs / Professional Services Cost	$5,026,884
Implementation Total	**$12,587,799**
Ongoing Maintenance Costs	
Post Implementation adjustments – for 12 months: 1 OPA2 at FTE ($109,670) 1 OPA3 at FTE ($120,397) 2 0.5 ISS7s FTE ($142,123)	$372,190
Software Licensing, Hosting or User/Transaction Based Fees	$4,312,159
State Data Center	$0
Maintenance Total	**$4,684,349**
TOTAL	**$17,272,148**

** All associated cost Information is provided as captured in the Galaxux Alternative Analysis document, compiled in 2015, with updates made to account for inflation and an extended implementation timeline. Inflation costs were calculated at 2% for software licensing and impacted costs per Galaxux, and staffing costs were calculated at ~6% per COLA (2016 – 1.48%, 2017 – 2.75%, 2018 – 1.85%, 2019 – 0).*

**System Integration/Software Cost Breakdown:

System integration costs were calculated by compiling five current/recently executed State of Oregon SaaS solutions similar in size, scope, and complexity, and averaging the associated contracted system integration costs. Project information has been deidentified for confidentiality. See below for individual costs used for calculations.

Project A	$ 9,000,000.00
Project B	$ 6,543,300.00
Project C	$ 4,196,300.00
Project D	$ 6,286,900.00
Project E	$ 6,296,000.00
Average (System Integration)	**$ 6,464,500.00**

Software costs were calculated as 25% of the licensing costs (per Galaxux). See below for calculations.

$4,312,159 (Software Licensing) *25% = **$1,078,040 Software Costs**

These costs were then added together for a comprehensive system integration/software cost estimation.

$6,464,500 (System Integration)
+$1,078,040 (Software Costs)
= **$7,542,540 System Integration/Software Costs**

Note: These costs are for estimation purposes only - actual costs may vary.

Option 7 - Other Agency Solutions – ODOT

This option would require collaboration with DAS to integrate into the State instance of Kronos, a time keeping software currently in the process of being rolled out to replace multiple time and attendance systems. The key limitation is the completed implementation for currently prioritized agencies before expansion can occur. The Workday implementation delays have pushed back implementation dates for ODOT.

Benefits to implementing Kronos:

- Kronos is a highly-regarded and well-proven system for the tracking of time and attendance
- APD utilizing the ODOT contract could potentially lower the overall cost of integration
- Since ODOT's project is in the pilot phase, there are experienced state resources

Risks or negative outcomes associated with implementing Kronos:

- The Workday implementation delays have pushed back implementation dates for ODOT
- Would need to identify an additional component for cross program travel time and OT calculations

- Would need to identify an additional component for integration of data for reporting and payroll
- Additional conversations with the vendor to confirm EVV compliance scenarios
- Additional resources may be needed for Operations and Maintenance

Estimated Cost:

ODOT provided the Project with a fee schedule which outlines the annual fees and hosting costs plus per employee per month (PEPM) costs. With 24,000 providers, a rough estimate puts costs at $1.2 million per year. This number does not include costs for professional services, training, or hardware. Professional services and training are estimated to cost roughly $1.5 million for ODOT's project. Hardware costs could be optional.

The estimated cost breakdown below does not account for the optional hardware:

Kronos Approach – 18-24 Months	**Total**
State Data Center Costs	$0
Software Costs	$0
Hardware Costs	$0
State Staffing Costs / Professional Services Cost	$5,446,884
Implementation Total	**$5,446,884**
Ongoing Maintenance Costs	
Post Implementation adjustments – for 12 months: 1 OPA2 at FTE ($109,670) 1 OPA3 at FTE ($120,397) 2 0.5 ISS7s FTE ($142,123)	$372,190
Software Licensing, Hosting or User/Transaction Based Fees	$6,000,000
State Data Center	$0
Maintenance Total	**$6,372,190**
TOTAL	**11,819,074**

Option 8 – FOSS

This option would allow us to meet the minimum requirements for EVV Compliance, with less of a financial burden than procuring a vendor solution. The selection of open source software would provide the State with the opportunity to improve functionality and adapt the software to fit our needs. If this solution is chosen, an RFP will be required if the license fees exceed $150,000.

There are several FOSS solutions available to help meet the EVV data collection items. The solutions that were explored for the sake of this analysis are as follows:

- Axxess
- Alora
- AlayaCare
- MyGeoTracking – Solution offers Geofence Based visit verification, mobile time clock apps, and phone call and text-based visit recording

- Vesta EVV – Mainly used in Texas, currently serving Aetna, Accenture, Anthem, Blue Cross Blue Shield, Cigna-Healthspring, and United HealthGroup

Benefits to implementing FOSS:

- Decreased or free software costs
- Agency would have full control of using and customizing source code (also facilitates in discovering and fixing security/privacy vulnerabilities proactively)
- Agency could test against the OSS without committing to the solution
- No contracts required to secure the solution
- There are many FOSS vendors that the state could explore as options

Risks or negative outcomes associated with implementing FOSS:

- There is less guarantee of development with free software systems
- Support services generally rely on communities of other users as opposed to vendor support
- If vendor support exists, we will be limited to their support hours which are likely not 24/7
- Shifting project priorities may require OIS resource re-allocation that would be needed for this solution
- With open source code, potential security vulnerabilities are quantifiable and accessible for remediation vs closed source solutions where you have no tangible way to verify if the security meets our need

Estimated Cost:

Alora – Cost is based on either unlimited users or unlimited individuals. Pricing is tiered by size of Agency (tier details are not included). Medium sized agencies pay between $600-$1,200 a month, while large agencies may range from $1,200 to $6,000 per month. More specific pricing is available upon request.

AlayaCare – Cost is determined by the number of modules selected and the total number of service hours each month. More specific pricing is available upon request.

MyGeoTracking – Cost is based on modules selected per user/per month. At a non-enterprise level, Tracking costs $5/month/user, Manual Time Clock with GPS or IVR/SMS Time Clock costs $5/month/user, and Automatic Time clock with Geofencing costs $10/month/user. Field Data also starts at $5/month/user for mobile forms and includes notes/pictures and electronic signature. Each module includes add-ons for a fee.

State of Oregon Estimates:

Vendor	Number of Users (Role)	Cost / Provider	Total / Month	Total / Year	Total / 5 Year
Alora	N/A	N/A (flat rate)	$1,200 - $6,000	$14,400 - $72,000	$72,000 - $360,000
MyGeoTracking	24,000 (Provider) 1,000 (State Staff)	$5.00/month - $10.00/month $5.00/month	$120,000 - $240,000 $5,000	$1,440,000 - $2,880,000 $60,000	$7,200,000 - $14,400,000 $300,000 **Combined Total** $7,500,000 - $14,700,000

FOSS Approach – 12-18 Months	Total
State Data Center Costs	$158,270
Software Costs	$0
Hardware Costs	$0
State Staffing Costs / Professional Services Cost	$3,232,172
Implementation Total	**$3,390,442**
Ongoing Maintenance Costs	
Post Implementation adjustments – for 12 months: 1 OPA2 at FTE ($109,670) 1 OPA3 at FTE ($120,397) 2 0.5 ISS7s FTE ($142,123)	$372,190
Software Licensing, Hosting or User/Transaction Based Fees	$14,700,000
State Data Center	$324,870
Maintenance Total	**$15,397,060**
TOTAL	**$18,787,502**

Option 9 – Salesforce

This option is a cloud-based Customer Relationship Management (CRM) system - data for this approach is stored by Salesforce in an environment that meets the agency security and privacy requirements. *Note: Because the State will need to hire a system integrator to perform the work, an RFP will be required along with additional DDI costs, as the State lacks skilled Salesforce developers.*

Benefits to implementing Salesforce:

- Confirmed ability to work with Carahsoft to purchase licenses (without seeking competitive quotes for other CRM tools)

- Offers robust functionality with automated workflows, a variety of time capture methods, and automated notifications
- Most of the desired functionality is already existing; project efforts to implement are focused on configuration, integration, and training (faster deployment)
- Solution may allow State to utilize the Deliverables from PTC 1.0
- Requires fewer technical resources from the state
- Shorter implementation timeframe
- No hardware/software to install/maintain (automatic updates)
- Provides necessary output to solve the business problem
- Flexible and scalable to meet potential future needs
- Most of the responses to the original PTC RFI proposed a SaaS solution, which is consistent with the direction of the software industry and market research into time capture solutions
- Cloud-based system - no dependency on State Data Center
- Centralized data that is instantly accessible, including customized dashboards and notifications

Risks or negative outcomes associated with implementing Salesforce:

- May be limited in the ability to incorporate agency requirements into a Service Level Agreement (SLA) with Salesforce
- Agency specific customizations may be difficult or unattainable
- Additional resources will be needed for Operations and Maintenance

Estimated Cost:

Salesforce Approach – 12-18 Months	**Total**
State Data Center Costs	$0
System Integration*	$6,464,500
Software/Hardware Costs	$0
State Staffing Costs / Professional Services Cost	$3,639,658
Implementation Total	**$10,104,158**
Ongoing Maintenance Costs	
Post Implementation adjustments – for 12 months: 1 OPA2 at FTE ($109,670) 1 OPA3 at FTE ($120,397) 2 0.5 ISS7s FTE ($142,123)	$372,190
Software Licensing, Hosting or User/Transaction Based Fees**	$21,663,450
State Data Center	$0
Maintenance Total	**$22,035,640**
TOTAL	**$32,139,798**

*System Integration/Software Cost Breakdown:

System integration costs were calculated by compiling five current/recently executed State of Oregon SaaS solutions similar in size, scope, and complexity, and averaging the associated contracted system integration costs. Project information has been deidentified for confidentiality.

Project A	$ 9,000,000.00
Project B	$ 6,543,300.00
Project C	$ 4,196,300.00
Project D	$ 6,286,900.00
Project E	$ 6,296,000.00
Average	**$ 6,464,500.00**

Note: this cost is for estimation purposes only - actual cost may vary.

**License Cost Breakdown:

State Staff/Provider Licenses:

25,500 licenses (24,000 Providers + 1,500 State Staff users) x $125* = $3,187,500

**Actual current cost is $125 per year per license (this cost could be reduced based on volume)*

Individual Licenses:

20k logins a year for $60 x 365 = $21,900**

***Calculated using community licenses (No access to mobile app – access to website for approvals, etc.)*

*$3,187,500 + $21,900 = $3,209,400 x 1.35*** = 4,332,690 a year for licenses x 5 years =* ***$21,663,450***

****This number represents the associated support costs as quoted by Salesforce.*

Option 10 - Cost of Doing Nothing

This option would continue current process.

Benefits to Doing Nothing:

- The team would be dissolved, and no additional money or time would be invested in the project
- No time or money would be spent on procuring a product nor a vendor for the project

Risks or negative outcomes associated with Doing Nothing:

- Failure to comply with federal regulations will result in a loss of funds matched by the federal government
- Continued reliance upon an outdated computer system (Mainframe) means limited resources could be a problem further down the line

Estimated Cost:

- If the state fails to incorporate an EVV solution, it is subject to incremental reduction in Federal Medical Assistance Percentages (FMAP) up to 1%. The penalties enforced on the State and APD for non-compliance for the first year alone amounts to $874,314. When penalties reach 1%, penalties are to be nearly $6.7 million annually.
- This lack of a solution means the state continues to pay an estimated 70 Full-Time employees at APD offices to enter time (typical classification for this role is an Office Specialist 2), at an estimated current annual cost of $4.2 million. This annual cost is likely to increase over time.
- Doing nothing will also mean that the state continues with printing vouchers, a cost which annually is nearly $1.4 million. This number is likely to grow with the population.
- Total costs are shown below and assume the unlikely scenario that employment and printing/postage costs will stay stagnant. It is very likely these numbers will increase over time; however, it is not possible to accurately depict those numbers.

Fiscal Year	Penalties	Employment	Printing / Postage	Total
2020	$874,314	$4,200,000	$1,387,815	$6,462,129
2021	$3,202,812	$4,284,000	$1,415,571	$8,902,383
2022	$5,007,680	$4,369,680	$1,443,883	$10,821,243
2023	$6,676,906	$4,457,074	$1,472,760	$12,606,740
2024	$6,676,906	$4,546,215	$1,502,216	$12,725,337
5-year total	$22,438,618	$21,856,969	$7,222,245	$51,517,832

Alternative Scoring Guide

Each alternative was scored using the below criteria. Note: The percentage next to the ranking criteria represents the weighted score for each category totaling 100%.

Alternative Scoring Guide		
Ranking Criteria (100%)	**Definitions**	**Scoring Key (1 – 5)**
Requirements (30%)	The estimated requirements met by the solution.	1- 0-92% Requirement Alignment 2- 93-94% Requirement Alignment 3- 95-96% Requirement Alignment 4- 97-98% Requirement Alignment 5- 99-100% Requirement Alignment
Estimated Cost* (25%)	Comparative estimated cost for the solution.	1- Comparative High Cost 2- Comparative Middle-High Cost 3- Comparative Middle Cost 4- Comparative Low-Middle Cost 5- Comparative Lowest Cost
Resources (15%)	Estimated amount of resources identified to implement the solution on schedule.	1- 41+ FTE 2- 31-40 FTE 3- 21-30 FTE 4- 11-20 FTE 5- 0-10 FTE

Schedule (10%)	Estimated implementation timeline for the solution.	1- > 2 years 2- 1 ½ years – 2 years 3- 1 year – 1 ½ years 4- 6 months – 1 year 5- < 6 months
Risk (10%)	Likelihood and impact of associated risks.	1- Overall Risk Score = 4.1- 5 2- Overall Risk Score = 3.1- 4 3- Overall Risk Score = 2.1- 3 4- Overall Risk Score = 1.1- 2 5- Overall Risk Score = 0-1
Mission (5%)	Alignment with State and APD goals and objectives.	1- 0-19% Mission Alignment 2- 20-39% Mission Alignment 3- 40-59% Mission Alignment 4- 60-79% Mission Alignment 5- 80-100% Mission Alignment
Reusable Artifacts (5%)	Previous documentation utilization.	1- 0-19% Reusable Content 2- 20-39% Reusable Content 3- 40-59% Reusable Content 4- 60-79% Reusable Content 5- 80-100% Reusable Content

* These criteria will be a comparison with the other options, as opposed to evaluating as stand-alone elements.

Selection Criteria and Alternatives Ranking

The following criteria for scoring identify quantitative and qualitative project areas to evaluate the most viable alternatives. The criteria were selected based on prior project analysis and research into industry standards evaluating alternatives for the implementation of the best solution. See *'Alternative Scoring Guide'* section for scoring key.

Requirements: Requirements the solution must support are in the Hewlett Packard Application Lifecycle Management (HP ALM) requirements documentation. The Project Team recently reviewed, revised, and vetted the requirements with impacted stakeholders. The requirements were then prioritized as Critical, High, Medium, and Low and were evaluated to ensure the solution meets the critical business needs.

Out of the total number of business requirements scored (42), 31 were identified as Critical, six were identified as High, and five were identified as Medium. For the purposes of scoring, all business requirements determined to be Low were not included as they are all low impact and considered "nice to have" features. In addition, functional requirements were not scored as they directly support the identified business requirements. The selection of critical requirements will be essential for the viable product for the initial release. High and Medium will be considered during the RFP process for scoring purposes. Low requirements will be used for future planning.

Each requirement was scored for alignment individually against each alternative using the key below:

KEY	
0	**Does NOT Meet Requirement**
0.5	**Partially Meets Requirement**
1	**Meets Requirement**

These scores were then totaled for each alternative option, for a total percentage of alignment by priority. This alignment percentage was then used to calculate the weighted percentages as follows (for a total of 100% requirement alignment): Critical – 60%; High – 30%; Medium – 10%; Low – 0%

Below is a summary table outlining requirement alignment scoring results based on the weighted percentages. An overall score was assigned using the alignment criteria for the Total Percentage as defined in the '*Alternative Scoring Guide*.'

Alternative Options	Critical	High	Medium	Total Percentage	Overall Requirements Score
In-House Build	60%	30%	10%	100%	5.00
eXPRS Time Entry	57%	30%	10%	97%	5.00
eXPRS with Mainframe	57%	30%	10%	97%	5.00
eXPRS w/o Mainframe	57%	30%	10%	97%	5.00
MMIS	56%	30%	10%	96%	5.00
SaaS	60%	30%	10%	100%	5.00
Kronos	55%	30%	9%	94%	5.00
FOSS	58%	30%	10%	98%	5.00
Salesforce	58%	30%	10%	98%	5.00
Do Nothing	47%	25%	0%	72%	4.00

***See Appendix K for the Project Requirements Detailed Scoring*

Estimated Cost: An estimated cost has been collected in the Alternative Analysis, when available. The full life-cycle costs including Design, Development, Testing, Training, Migration, Implementation, and Operations and Maintenance (total and by fiscal year) will be used for comparison; see example below:

**Given the following estimated costs: $10 MM, $15 MM, $8 MM, $12 MM, $20 MM, $4 MM, $13 MM, $22 MM, $6 MM, $25 MM, $30 MM, $7 MM

The alternatives would be ranked in order of high to low: 4, 6, 7, 8, 10, 12, 13, 15, 20, 22, 25, 30
The median value would be determined (High-Low/2=Average): (30-4)/2=**13** – this value would be assigned a ranking of 3.

The median value of the high-middle would be determined [(High-Middle)/2] + Middle]: (30-13)/2=8.5 + 13 = **21.5** – this value would be assigned a ranking of 4.

The median value of the low-middle would be determined [(Middle-Low)/2] + Low]: (13-4)/2=4.5 + 4 = **8.5** – this value would be assigned a value of 2.

Once this is complete, the values would be assigned a ranking: 1 (4), 2 (8.5), 3 (13), 4 (21.5), 5 (30)
The example above would be ranked as follows: **1**- (4, 6), **2**- (7, 8, 10), **3**- (12, 13, 15), **4**- (20, 22), **5**- (25, 30)

Below is a summary table outlining the estimated cost scoring results.

Alternative Options	Total Estimated Cost	Overall Estimated Cost Score
In-House Build	$4,659,130	5.00
eXPRS - Time Entry	$7,594,289	4.75
eXPRS - All-in with MF	$56,241,709	1.00
eXPRS - All-in without MF	$56,241,709	1.00
MMIS	$13,878,154	4.25
SaaS	$17,272,148	4.00
Kronos	$11,819,074	4.50
FOSS	$18,787,502	4.00
Salesforce	$32,139,798	3.00
Do Nothing	$51,517,832	1.50

***See Appendix L Alternative Analysis Cost Comparison*

Mission: The mission includes an evaluation of qualitative factors important to the selection of a path forward. Factors include but are not limited to: project goals including the effects on business processes and functions; the effects on the organization such as culture and end user benefits; and other non-quantifiable aspects of the business environment.

The following elements were extracted directly from the APD Strategic Plan:

DHS Mission: To help Oregonians in their own communities achieve wellbeing and independence through opportunities that protect, empower, respect choice and preserve dignity.

APD Vision: Oregon's older adults, people with disabilities and their families experience person-centered services, supports and early interventions that are innovative and help maintain independence, promote safety, well-being, honor choice, respect cultural preferences and uphold dignity.

The following APD Goals will be assessed for alignment with each alternative:

- **Accessibility**: Oregonians can readily and consistently access services and supports to meet their needs.

  Actions - Design improvements to increase individual knowledge of access to services and case management. Continue developing platforms (such as Aging and Disability Resource Centers (ADRC) and IE platforms) and best practices for individuals who are technologically savvy, such as web sites, hotlines, and other self-serve mechanisms where individuals can access information and services while retaining the option for individuals to get information in one-on-one, in person contact with staff. Implement ongoing, sustainable supports for the direct care workforce in partnership with stakeholders.

- **Quality outcomes**: Oregonians engage in services and supports that are preventive, evidence-informed, and lead to quality outcomes.

  Actions - Continue modernizing data and information technology systems (CAM, IE, ADRC) to develop greater capacity for data collection and analysis. Work with DHS and other agencies to develop strategic data sharing agreements for policy planning in the areas of health, housing, transportation, and other services under other state agencies' purview, as well as potential partnerships with universities and community colleges.

Each identified element was scored for alignment individually against each alternative using the key below:

KEY	
0	**Does Not Align with Mission**
0.5	**Partially Aligns with Mission**
1	**Fully Aligns with Mission**

These scores were then totaled for each alternative option, for a total percentage of alignment.

Below is a summary table outlining the mission scoring results. An overall score was assigned using the alignment criteria for the Total Percentage as defined in the '*Alternative Scoring Guide*.' Please note: These overall mission scores are based on qualitative measures and are subjective. The team evaluated each option and assigned an overall score of how well it aligned to the Agency's mission, vision, and goals.

Alternative Options	Total Mission Alignment	Overall Mission Score
In-House Build	91%	5.00
eXPRS - Time Entry	82%	5.00
eXPRS - All-in with MF	73%	4.00
eXPRS - All-in without MF	77%	4.00
MMIS	86%	5.00
SaaS	95%	5.00
Kronos	86%	5.00
FOSS	95%	5.00
Salesforce	95%	5.00
Do Nothing	14%	1.00

See *'Goals, Objectives, and Measurements'* for more information on the project goals.

***See Appendix M for the Mission Detailed Scoring*

Estimated Schedule: An estimate for how long each option will take to implement was determined for each alternative based on the type of solution. Estimates were based on a combination of previously suggested timelines and expert judgement from experienced team members.

Below is a summary table outlining the estimated schedule scoring results In-house and eXPRS options were based on estimates from OIS as referenced in the *'Alternative Analysis'* section. The project team divided out what would be the longest effort and then broke it out into 6-month increments.

Alternative Options	5 (<6 mo)	4 (6 mo – 1 yr)	3 (1 yr – 1 ½ yrs)	2 (1 ½ yrs - 2 yrs)	1 (>2 yrs)	Overall Estimated Schedule Score
In-House Build			X			3.00
eXPRS Time Entry				X		2.00
eXPRS with Mainframe					X	1.00
eXPRS without Mainframe					X	1.00

MMIS				X		2.00
SaaS				X		2.00
Kronos				X		2.00
FOSS			X			3.00
Salesforce			X			3.00
Do Nothing	X					5.00

Risk: Risk items were captured for each alternative utilizing the Probability and Impact Matrix (included in appendix O). The Project used the methodology and tools defined in the PMP. The overall risk assessment includes the following factors: capability of the agency to manage the investment, overall risk of investment failure, organizational and change management, technology, strategic plan, and project resources.

Below is a summary table outlining the risk scoring results.

Alternative Options	Total Average Risk Score	Overall Risk Score
In-House Build	4.1	2.00
eXPRS - Time Entry	2.9	3.00
eXPRS - All-in with MF	3.0	3.00
eXPRS - All-in without MF	3.1	3.00
MMIS	3.4	2.00
SaaS	2.0	4.00
Kronos	3.9	2.00
FOSS	3.8	2.00
Salesforce	2.7	3.00
Do Nothing	4.3	1.00

***See Appendix N for complete Alternative Analysis Risk Log for each alternative.*

***See Appendix O Project Risk Narrative for the definitions of probability and impact by objective.*

Resources: The solution needs to have the required resources to be successful. Each solution was compared to the estimated resources needed to implement each option.

Staffing costs were estimated using existing policy option package data for personnel costs. Total number of staff needed is based on the staffing model developed to support the project approach.

Below is a summary table outlining the resources scoring results.

Alternative Options	Project Director	Project Mgrs.	Tech. Resources	Business Analysts	Org. Change Mgmt.	Training	Total Resources	Overall Resources Score
In-House Build	1	2	3	6	6	6	24	3.00
eXPRS Time Entry	1	2	6	8	6	6	29	3.00
eXPRS with Mainframe	1	2	6	8	6	6	29	3.00

eXPRS w/o Mainframe	1	2	6	8	6	6	29	3.00
MMIS	1	3	3	8	6	6	27	3.00
SaaS	1	3	2	6	6	6	24	3.00
Kronos	1	3	3	6	6	6	25	3.00
FOSS	1	1	2	6	6	6	22	3.00
Salesforce	1	3	2	6	6	6	24	3.00
Do Nothing	0	0	0	0	0	0	0	5.00

***See Appendix L Alternative Analysis Cost Comparison*

Reusable Artifacts: The Project completed an assessment of project artifacts to determine how much existing documentation could be leveraged based on each alternative option. The Project scored each alternative against each deliverable and associated state supporting documentation to determine an estimated percentage of reusable content for the future effort. There were deliverables not used in the scoring such as the Project Management Plan, PMP Monthly Reports, Development Checkpoints, System Testing, Test Cases Part 2, Test Results, and Implementation Plan as these were relevant to PPL's core system and would not be applicable for any other solutions. The Project was able to use the Requirements Traceability Matrix (RTM) as an input for re-baselining the reboot of the project.

Below is the summary table with the estimated percentages of reusable documentation for each alternative option. Please note these percentages are based on qualitative measures and are subjective.

Alternative Options	Total Percentage	Overall Reusable Artifacts Score
In-House Build	34%	2.00
eXPRS - Time Entry	28%	2.00
eXPRS - All-in with MF	28%	2.00
eXPRS - All-in without MF	38%	2.00
MMIS	30%	2.00
SaaS	44%	3.00
Kronos	40%	3.00
FOSS	44%	3.00
Salesforce	44%	3.00
Do Nothing	0%	1.00

***See Appendix P Approved PPL Deliverables for more information regarding scoring details.*

Alternative Option Comparison

Below are the Alternative Option Comparison final scores based on the scoring criteria using the Scoring Guide.

Alternative Options	Final Score
In-House Build	**4.05**
eXPRS - Time Entry	**3.99**
SaaS	**3.95**
Kronos	**3.88**
FOSS	**3.85**
MMIS	**3.76**
Salesforce	**3.70**
Do Nothing	**3.03**
eXPRS - All-in without MF	**2.90**
eXPRS - All-in with MF	**2.90**

There are some important points to keep in mind when looking at this list where no clear way existed to include specific factors into the scoring model. Much of the impact to resource availability and schedule duration depend greatly on when project reinitiating occurs and how long it would take to obtain the appropriate resources (internal or external). Should the project receive immediate approval to move forward key resources from DHS and OHA remain committed to other projects (IE and CAM) and the schedule will be adjusted to reflect the constraints. This greatly decreases the feasibility of success of the options that would rely more heavily on internal development options (In-House Build, eXPRS- all options, & FOSS).

The scores do represent we have the most ability to control outcomes, cost, and delivery of items that are managed in-house.

These scores are not representative of both DHS and OHA's desires to move to more modern technologies and begin to reduce the support workload of existing resources that are already overburdened in supporting more and more systems. The team who developed this Business Case has also engaged repeatedly with the OIS leadership who are working on a variety of strategic initiatives to help move the Agencies forward from a technology perspective.

***See Appendix Q for full Alternative Analysis Scoring Matrix for comparison details.*

Conclusions & Recommendation

The PTC Project is intended to capture the following required data elements electronically at the time of service: Date of Service, Person Providing the Service, Person Receiving the Service, Time the Service Begins and Ends, Location of Service, and Type of Service Performed. This planned workflow involves the transition from a paper-based data gathering method to a more modern, electronic time capture solution.

As part of this new process, the Provider will record EVV data elements in real-time via a mobile app/web portal interface. The processing of the data will involve data-integrity validations to ensure accuracy of services performed, the date/time of service, and the location of the service delivered to the Individual.

The Software as a Service (SaaS) option is the most realistic available option that balances the needs of the organization in the short to medium term for compliance with the longer-term goals of more modular systems. Through the RFP process we can prioritize those vendors able to deliver a compliant solution through a phased delivery model to support quicker time to value with a projected estimated cost total of $25,351,715.

Because Salesforce, Kronos, MMIS (Sandata), FOSS would require outside support from an integrator and an RFP would be required there is no recommendation for a specific SaaS solution. Any selection during the RFP process will reflect the appropriate criteria for scoring between any proposers, which could include any of the above mentioned.

SaaS Option:
The recommended approach for the PTC Project is to utilize a SaaS solution for the following reasons:

- Ability for advanced configuration, integration with other applications, and possible customization
- Aligns with the direction the software industry is going
- Possibility to expand to other solutions in the future for FMAS, Case Management, Provider Management, etc.
- Fewer technical resources would be required from the State and there would be no dependency on the State Data center
- Possibility of faster implementation
- Workload reduction in the State field offices and Type A and Type B AAA offices
- Moves the Agency away from having sole responsibility for supporting an increasing number of systems
- Ability to access data for reporting
- Several vendors are now offering EVV solutions that are incorporated into their system

To best support incremental delivery of this effort the following prioritization are put forth in conjunction with the recommendation for a SaaS solution:

<u>Iterative Phases which would include ongoing Operations and Maintenance once implemented:</u>

1) Required data element capture through EVV compliant tool which may require manual entry of initial provider demographic information, individual demographic information, and service authorization details such as service period, authorized hours, type of service, etc.
2) Interfaces
    a) Implementation of inbound interfaces for provider demographic information, individual demographic information, and service authorization details such as service period, authorized hours, type of service, etc.;
    b) Implementation of outbound interface by extracting data from new solution to map to existing tables for payment processing via CEP.
3) OHA inclusion & Data Aggregation
    a) Phasing in other programs (OHA 1915i) over a longer timeframe
    b) Phasing in data aggregation as CMS delivers updated guidance

<u>Future Phases or Efforts:</u>

1) Payroll processing and interface with accounting and/or system
2) Potential opening to other program/agency participants

See below for a high-level proposed timeline for the solution implementation (Phases 1 minimally, Phase 2 potentially):

8/23/18

Approving Business Owner Date

Approving Technology Manager Date

Information Technology Investment Type(s):

☒ New Investment ☐ Renew/Life Cycle Replacement ☐ Other:

Information Technology Investment Description (What is being proposed and why):

In Oregon, the Department of Human Services (DHS) and Oregon Health Authority (OHA) are considered joint employers. Their Home Care Workers (HCW) /Personal Service Workers (PSW) programs must be modified to comply with the federal mandates under 21st Century CURES Act for an Electronic Visit Verification (EVV) system and U.S. Department of Labor's (U.S. DOL) Fair Labor Standards Act (FLSA). DHS and OHA must keep certain records for each HCW/PSW. The requirements apply to HCW/PSW's who provide personal and home care assistance to older adults and people with disabilities. Both federal mandates require that records include certain identifying information about the HCW/PSW and data about the hours worked. The law requires this information to be accurate and attested to by both clients and providers. DHS and OHA do not have shared technology in place necessary to meet the regulations.

In addition, Electronic Visit Verification (EVV) was created to help cut down on fraud and ensure that people receive the documented care they need. EVV was designed to help verify that services billed for home healthcare are for actual visits made.

A final component of this project is to enable payment services to the care workers through a Financial Management Agent Services (FMAS) option. The inclusion of a payment services option allows for an "end-to-end" process of capturing time and services through to payment.

An Information Technology (IT) solution will help minimize the long-term costs associated with increased workload, increased dependency on manual paper process and fraudulent reporting of services being provided to Medicaid recipients.

This project offers an opportunity for the State to develop and implement technology that will assist case managers in meeting the workload associated with HCW/PSW management. The solution should also assist

OSCIO IT Investment form

HCW/PSW and the consumers they serve in streamlining the service management portion of their relationship. The solution will do this with the following solution enhancements:

- Worker Portal – a secure web-based portal which allows Agency staff and partners to view and edit information pertaining to service planning and provider management.
- Provider Portal – a secure web-based portal which allows providers to enter time, view information about the service recipient(s) they serve, manage voucher/payment information, and update personal contact information.
- Service Recipient Portal – a web-based portal which allows service recipients (or their authorized representatives) to view necessary information about their cases and service plans. Service recipients will be able to validate reported hours and services, send requests, and update personal contact information through the portal.
- Database – a single, well-designed database to support all three portals listed above.
- Optimized Reporting – optimized reporting functionality providing access to current and historical service recipient and provider data in real time.
- Document Management – track, manage and store documents. The Solution will auto-populate and generate specified paper and electronic notices.
- System and Data Integration – ability to integrate and interface with a variety of systems real-time and batch including, but not limited to Medicaid Management Information Systems (MMIS).
- Role-based Security – the Solution will utilize role-based security allowing usage of internal and external partners as determined by the business.
- Multiple Access Channels - real time accessibility and data entry through web, and mobile technology. The Agency will be able to capture location using geospatial data accessible online or offline.
- Automated Workflow - automatic routing, processing, and integration between different functional software applications. Including validations, alerts, and notifications.
- Secure Payment Processing – ability to process provider payments directly through Financial Management Agent Services.

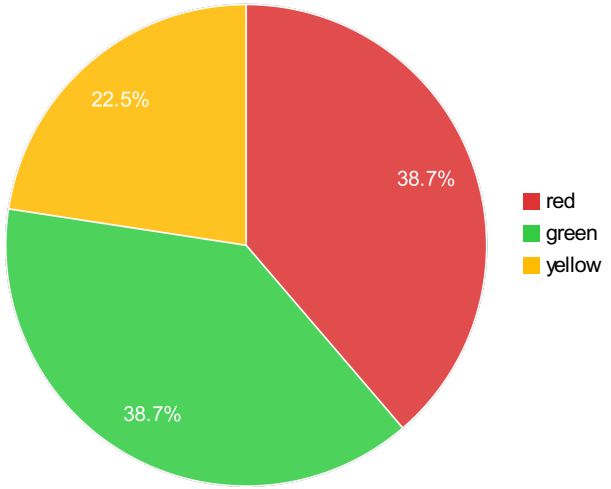
Annual Performance Progress Report

Reporting Year 2019

Published: 2/24/2020 11:16:55 AM

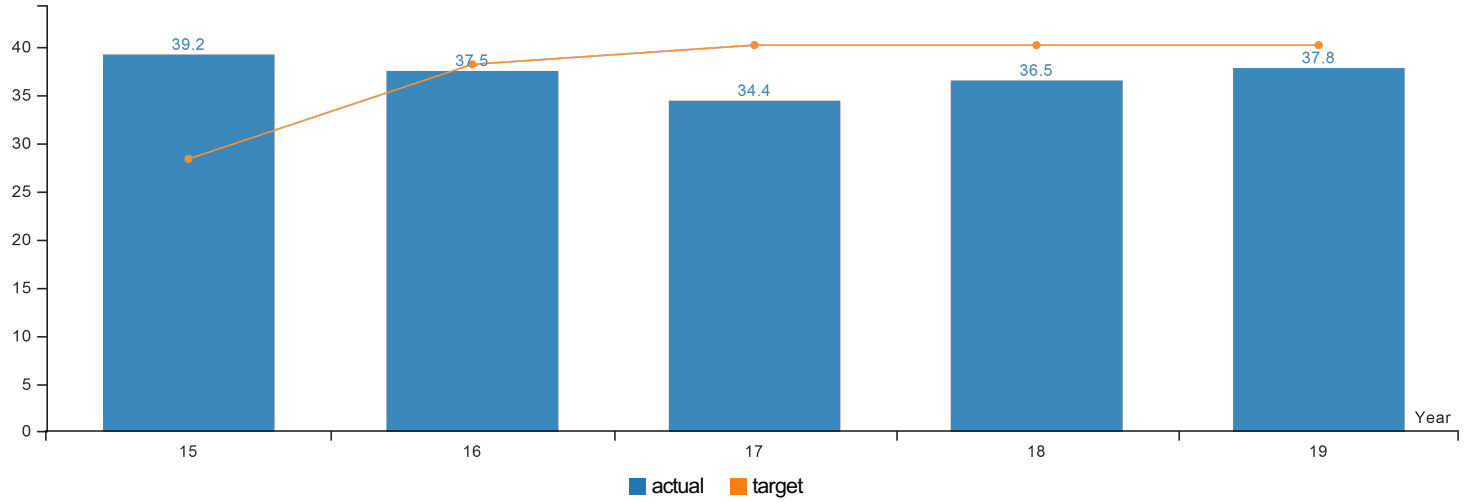
KPM #	Approved Key Performance Measures (KPMs)
1	INITIATION OF ALCOHOL AND OTHER DRUG DEPENDENCE TREATMENT - Percentage of members with a new episode of alcohol or other drug dependence who received initiation of AOD treatment within 14 days of diagnosis.
2	ENGAGEMENT OF ALCOHOL AND OTHER DRUG DEPENDENCE TREATMENT - Percentage of members with a new episode of alcohol or other drug dependence who received two or more services within 30 days of initiation visit.
3	FOLLOW-UP AFTER HOSPITALIZATION FOR MENTAL ILLNESS - Percentage of enrollees 6 years of age and older who were hospitalized for treatment of mental health disorders and who were seen on an outpatient basis or were in intermediate treatment within seven days of discharge.
4	MENTAL, PHYSICAL, AND DENTAL HEALTH ASSESSMENTS FOR CHILDREN IN DHS CUSTODY - Percentage of children in DHS custody who receive a mental, physical, and dental health assessment within 60 days of the state notifying CCOs that the children were placed into custody with DHS (foster care).
5	FOLLOW-UP CARE FOR CHILDREN PRESCRIBED WITH ADHD MEDICATION (INITIATION) - Percentage of children newly prescribed attention-deficit/hyperactivity disorder (ADHD) medication who had at least three follow-up care visits within a 10-month period, one of which was within 30 days of when the first ADHD medication was dispensed
6	FOLLOW-UP CARE FOR CHILDREN PRESCRIBED WITH ADHD MEDICATION (CONTINUATION AND MAINTENANCE) - Percentage of children newly prescribed attention-deficit/hyperactivity disorder (ADHD) medication who had at least three follow-up care visits within a 10-month period, one of which was within 30 days of when the first ADHD medication was dispensed
7	30 DAY ILLICIT DRUG USE AMONG 6TH GRADERS - Percentage of 6th graders who have used illicit drugs in the past 30 days.
8	30 DAY ALCOHOL USE AMONG 6TH GRADERS - Percentage of 6th graders who have used alcohol in the past 30 days.
9	30 DAY ILLICIT DRUG USE AMONG 8TH GRADERS - Percentage of 8th graders who have used illicit drugs in the past 30 days.
10	30 DAY ALCOHOL USE AMONG 8TH GRADERS - Percentage of 8th graders who have used alcohol in the past 30 days.
11	30 DAY ILLICIT DRUG USE AMONG 11TH GRADERS - Percentage of 11th graders who have used illicit drugs in the past 30 days.
12	30 DAY ALCOHOL USE AMONG 11TH GRADERS - Percentage of 11th graders who have used alcohol in the past 30 days.
13	PRENATAL CARE (POPULATION) - Percentage of women who initiated prenatal care in the first 3 months of pregnancy.
14	PRENATAL CARE (MEDICAID) - Percentage of women who initiated prenatal care within 42 days of enrollment.
15	PATIENT CENTERED PRIMARY CARE HOME (PCPCH) ENROLLMENT - Number of members enrolled in patient-centered primary care homes by tier.
16	PQI 01: Diabetes Short-Term Complication Admission Rate -
17	PQI 05: COPD or Asthma in Older Adults Admission Rate -
18	PQI 08: Congestive Heart Failure Admission Rate -
19	PQI 15: Asthma in Younger Adults Admission Rate -
20	ACCESS TO CARE - Percentage of members who responded "always" or "usually" too getting care quickly (composite for adult and child).
21	MEMBER EXPERIENCE OF CARE - Composite measurement: how well doctors communicate; health plan information and customer service (Medicaid population).
22	MEMBER HEALTH STATUS - Percentage of CAHPS survey respondents with a positive self-reported rating of overall health (excellent, very good, or good).
23	RATE OF TOBACCO USE (POPULATION) - Rate of tobacco use among adults.
24	RATE OF TOBACCO USE (MEDICAID) - Percentage of CCO enrollees who currently smoke cigarettes or use tobacco every day or some days.
25	RATE OF OBESITY (POPULATION) - Percentage of adults who are obese among Oregonians.
26	EFFECTIVE CONTRACEPTIVE USE (POPULATION) - Percentage of reproductive age women who are at risk of unintended pregnancy using an effective method of contraception.
27	EFFECTIVE CONTRACEPTIVE USE (MEDICAID) - Percentage of reproductive age women who are at risk of unintended pregnancy using an effective method of contraception.
28	FLU SHOTS (POPULATION) - Percentage of adults ages 50-64 who receive a flu vaccine.
29	CHILD IMMUNIZATION RATES (POPULATION) - Percentage of children who are adequately immunized (immunization series 4:3:1:3:3:1:4).
30	CHILD IMMUNIZATION RATES (MEDICAID) - Percentage of children who are adequately immunized (immunization series 4:3:1:3:3:1:4).
31	PLAN ALL CAUSE READMISSIONS - Percentage of acute inpatient stays that were followed by an acute readmission for any diagnosis within 30 days and the predicted probability of an acute readmission for members 18 years and older.
32	ELIGIBILITY PROCESSING TIME - Median number of days processing time from date of request to eligibility determination.
33	OHP MEMBERS IN CCOs - Percent of Oregon Health Plan members enrolled in Coordinated Care Organizations.
34	CUSTOMER SERVICE - Percentage of OHA customers rating their satisfaction with the agency's customer service as "good" or "excellent" overall, timeliness, accuracy, helpfulness, expertise, availability of information.



Performance Summary	Green	Yellow	Red
	= Target to -5%	= Target -5% to -15%	= Target > -15%
Summary Stats:	38.71%	22.58%	38.71%

KPM #1	INITIATION OF ALCOHOL AND OTHER DRUG DEPENDENCE TREATMENT - Percentage of members with a new episode of alcohol or other drug dependence who received initiation of AOD treatment within 14 days of diagnosis.
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = positive result*



Report Year	2015	2016	2017	2018	2019
Initiation of alcohol and other drug dependence treatment					
Actual	39.20%	37.50%	34.40%	36.50%	37.80%
Target	28.35%	38.20%	40.20%	40.20%	40.20%

How Are We Doing

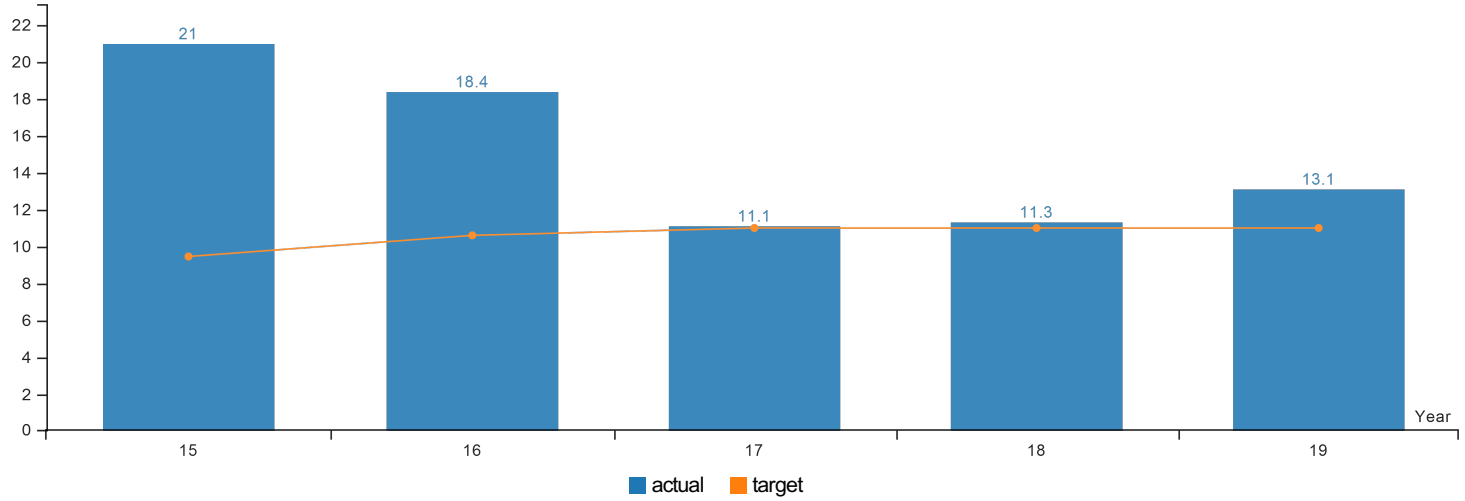
After declining from 2014 to 2016, the percentage of members newly diagnosed with alcohol or other drug dependencies who initiated treatment within 14 days increased in the following three years (34.4% in 2016; 36.5% in 2017; and increasing to 37.8% in 2018).

Factors Affecting Results

It is possible that the increased statewide emphasis on alcohol and drug use screening (SBIRT) due to the CCO incentive measure resulted in an increase in initiation of alcohol and drug treatment, as more individuals with risky or problematic substance use are identified and referred to treatment services.

KPM #2	ENGAGEMENT OF ALCOHOL AND OTHER DRUG DEPENDENCE TREATMENT - Percentage of members with a new episode of alcohol or other drug dependence who received two or more services within 30 days of initiation visit.
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = positive result*



Report Year	2015	2016	2017	2018	2019
Engagement of alcohol and other drug dependence treatment					
Actual	21%	18.40%	11.10%	11.30%	13.10%
Target	9.45%	10.60%	11%	11%	11%

How Are We Doing

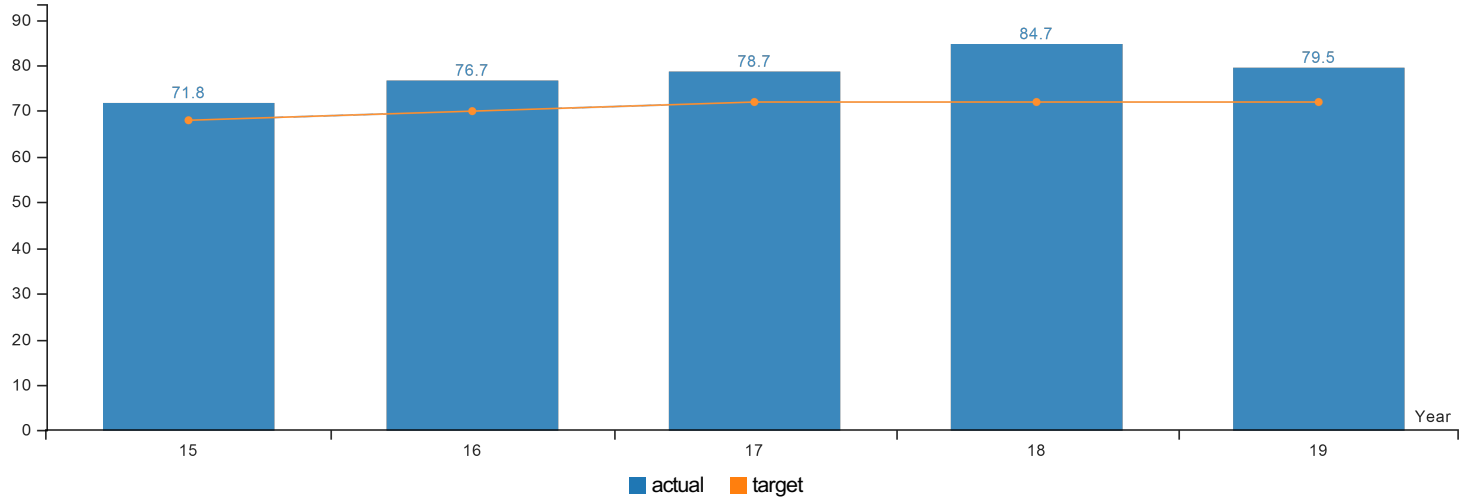
After a precipitous fall from 2013 to 2016 (from 18.9% to 11.1%), the percentage of members who continued their treatment improved from 2017 to 2018 (11.3% to 13.1%). However, this still represents a 39% decrease in statewide performance since 2013. We may see improvement from 2020 on, as this was selected to be an incentive measure beginning in 2020, which will bring additional focus to this work.

Factors Affecting Results

Nationally, performance on this measure is low, with a 2018 national Medicaid median of only 12.4%.

KPM #3	FOLLOW-UP AFTER HOSPITALIZATION FOR MENTAL ILLNESS - Percentage of enrollees 6 years of age and older who were hospitalized for treatment of mental health disorders and who were seen on an outpatient basis or were in intermediate treatment within seven days of discharge.
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = positive result*



Report Year	2015	2016	2017	2018	2019
Follow-up after hospitalization for mental illness					
Actual	71.80%	76.70%	78.70%	84.70%	79.50%
Target	68%	70%	72%	72%	72%

How Are We Doing

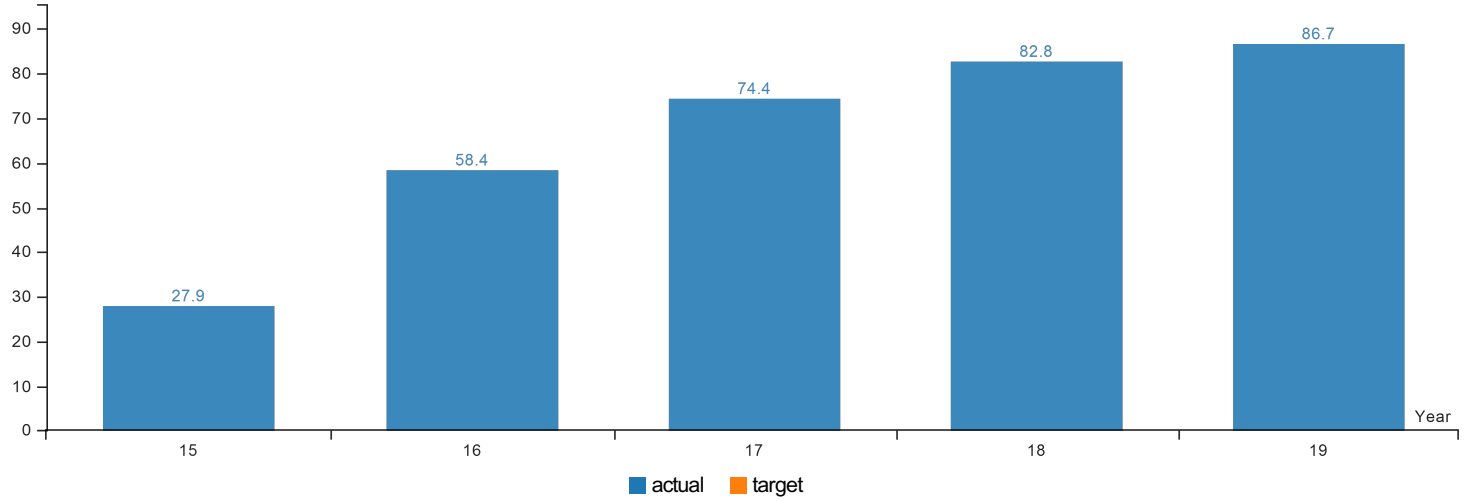
In 2018, 79.5% of CCO members (ages 6 and older) who were admitted to the hospital for mental illness received follow-up with a health care provider within seven days of discharge. This is a decline of 6.1 percentage points from 2017, when the rate was 84.7%.

Factors Affecting Results

This measure used to be a CCO incentive measure; however, in 2018 it was no longer included in the incentive measure set. This measure should be monitored to determine if this decrease reflects a real decline in care, or if other factors account for this change.

KPM #4	MENTAL, PHYSICAL, AND DENTAL HEALTH ASSESSMENTS FOR CHILDREN IN DHS CUSTODY - Percentage of children in DHS custody who receive a mental, physical, and dental health assessment within 60 days of the state notifying CCOs that the children were placed into custody with DHS (foster care).
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = positive result*



Report Year	2015	2016	2017	2018	2019
MENTAL, PHYSICAL, AND DENTAL HEALTH ASSESSMENTS FOR CHILDREN IN DHS CUSTODY					
Actual	27.90%	58.40%	74.40%	82.80%	86.70%
Target	TBD	TBD	TBD	TBD	TBD

How Are We Doing

The percentage of children in foster care who received mental, physical, and dental health assessments continues to increase. CCO performance on this measure has improved by over 200% since the measure was first included in the CCO Quality Incentive Program, increasing from 27.9% in 2014 to 86.7% in 2018.

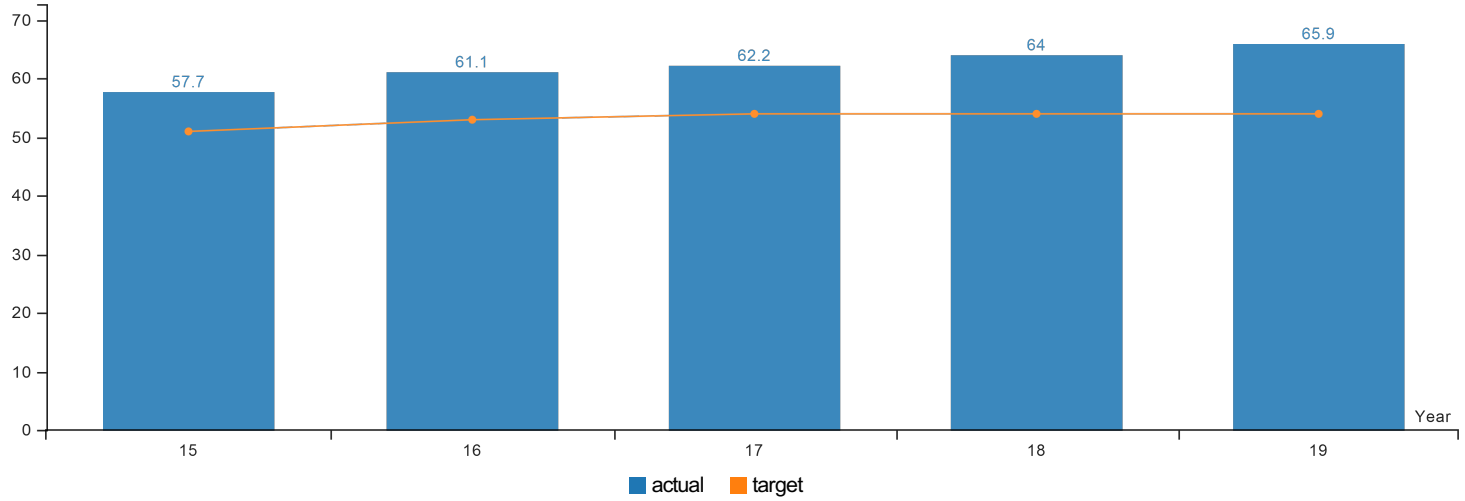
Factors Affecting Results

Because this is a CCO incentive measure, CCOs across the state are making concerted efforts to improve performance. One factor driving improvement has been increased coordination between CCOs and local DHS branch offices.

NOTE: 2013 not comparable to later years due to methodology change. In addition, dental assessments added in 2014.

KPM #5	FOLLOW-UP CARE FOR CHILDREN PRESCRIBED WITH ADHD MEDICATION (INITIATION) - Percentage of children newly prescribed attention-deficit/hyperactivity disorder (ADHD) medication who had at least three follow-up care visits within a 10-month period, one of which was within 30 days of when the first ADHD medication was dispensed
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = positive result*



Report Year	2015	2016	2017	2018	2019
Follow-up care for children prescribed with ADHD medication (initiation)					
Actual	57.70%	61.10%	62.20%	64%	65.90%
Target	51%	53%	54%	54%	54%

How Are We Doing

In 2011, 52.3% of children ages 6-12 had at least one follow up visit with a health care provider during the 30 days after receiving a new prescription for Attention Deficit Hyperactivity Disorder (ADHD) medication. In 2013, the rate had increased just slightly to 53.3%, above the KPM target, and above the 90th percentile nationally. The rate has continued to improve since then, with 65.9% of patients newly prescribed ADHD medication receiving follow up in 2018. Oregon is above the national 90th percentile for Medicaid.

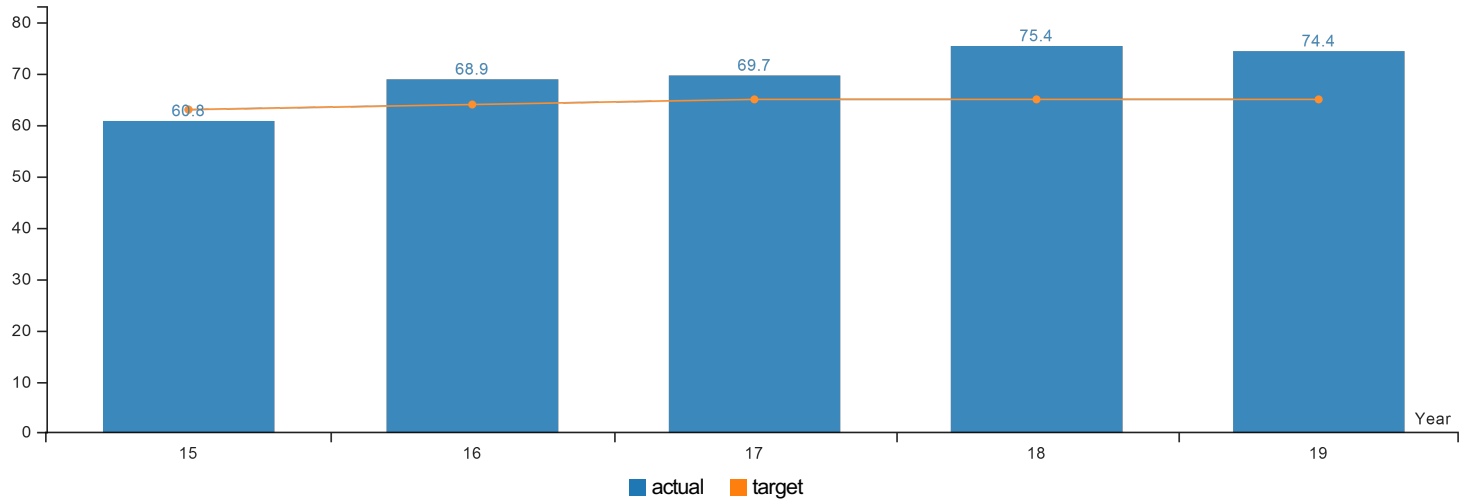
NOTE: This measure was incentivized in 2013 and 2014.

Factors Affecting Results

We have heard from providers that limiting the follow up visit to within the first 30 days is not well aligned with some of the current ADHD medications, which may require a 45 day initial prescription. Children with these longer initial prescriptions would fall outside of the 30-day window for this measure.

KPM #6	FOLLOW-UP CARE FOR CHILDREN PRESCRIBED WITH ADHD MEDICATION (CONTINUATION AND MAINTENANCE) - Percentage of children newly prescribed attention-deficit/hyperactivity disorder (ADHD) medication who had at least three follow-up care visits within a 10-month period, one of which was within 30 days of when the first ADHD medication was dispensed
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = positive result*



Report Year	2015	2016	2017	2018	2019
Follow-up care for children prescribed with ADHD medication (continuation and maintenance)					
Actual	60.80%	68.90%	69.70%	75.40%	74.40%
Target	63%	64%	65%	65%	65%

How Are We Doing

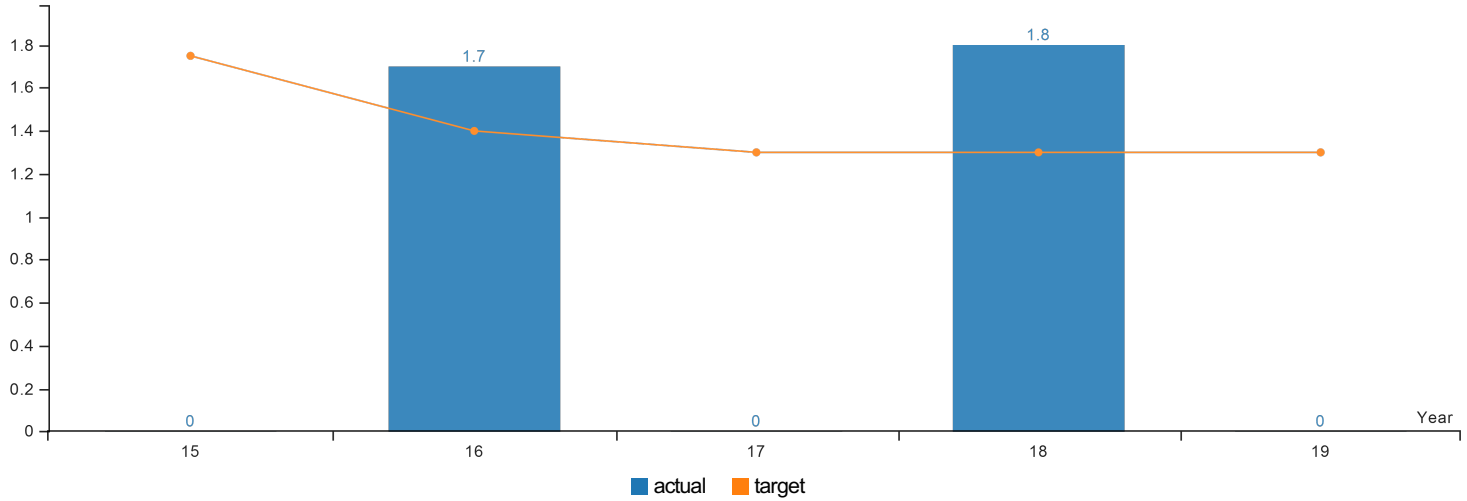
Calendar year 2011 is the baseline for this measure. In 2011, 61.0% of children who remained on ADHD medication for 210 days after receiving a new prescription also had at least two follow up visits with a provider. This rate remained fairly steady in CY's 2013 and 2014, and increased notably in CY2015, with 68.9% of children receiving continued follow-up with a provider. In CY2018, the rate was 74.4%; this is a decline in performance from CY2017, when performance was 75.4%.

Factors Affecting Results

A number of CCO incentive measures as well as initiatives including the patient-centered primary care home model put greater emphasis on preventive care and well child visits. These efforts may result in children being more likely to engage with their primary care providers, leading to greater follow-up care for children prescribed medications for their ADHD. This measure is also notable for small denominators across the CCOs (with some having fewer than 30 children that meet these criteria); data shifts are more likely given these small numbers.

KPM #7	30 DAY ILLICIT DRUG USE AMONG 6TH GRADERS - Percentage of 6th graders who have used illicit drugs in the past 30 days.
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = negative result*



Report Year	2015	2016	2017	2018	2019
30 day illicit drug use among 6th graders					
Actual	No Data	1.70%	No Data	1.80%	No Data
Target	1.75%	1.40%	1.30%	1.30%	1.30%

How Are We Doing

Illicit drug use among Oregon 6th graders has remained relatively unchanged in recent years. In 2012, the percentage of 6th graders who used any illicit drug in the past 30 days was 1.8%; 1.4% in 2014; 1.7% in 2016 and 1.8% in 2018. These estimates include marijuana use.

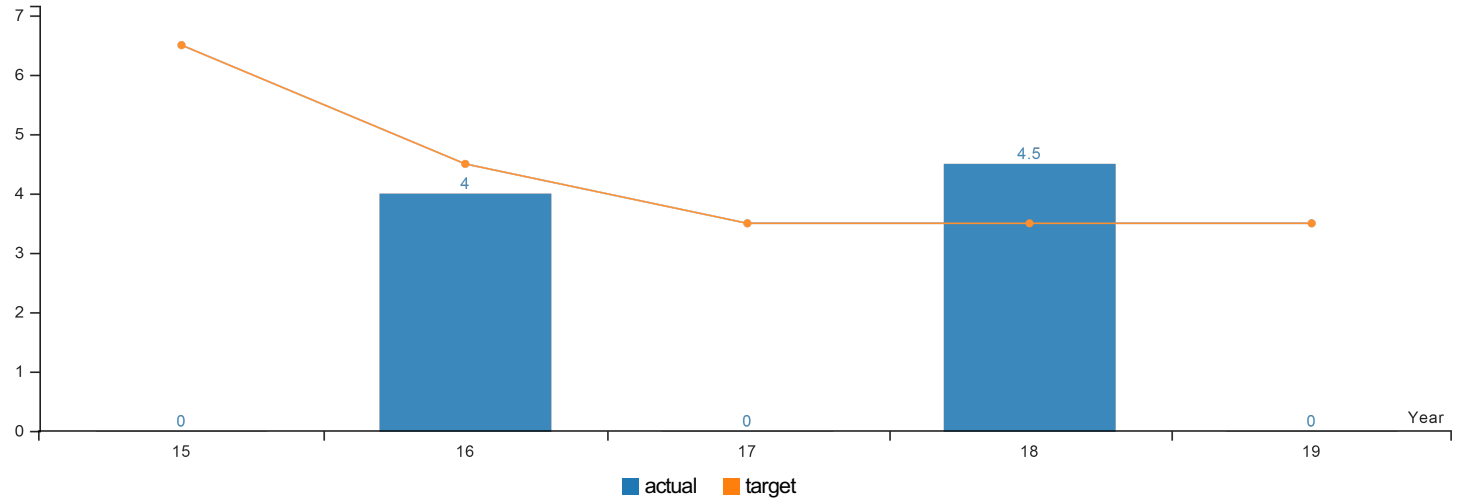
This data is only collected in the even numbered years and published here: https://oregon.pridesurveys.com/dl.php?pdf=Oregon_SWS_Statewide_Report_2018.pdf&type=region Beginning in 2020, the Oregon Health Authority Public Health Division will launch the Student Health Survey, which will replace the previous Oregon Healthy Teens and Student Wellness Surveys.

Factors Affecting Results

Oregon legalized recreational marijuana with the passage of Measure 91 in 2014. In 2015, retail marijuana stores began to open in many Oregon communities. As of September 2019, there were over 650 approved retail marijuana licenses in Oregon. The presence of a legal retail market has changed community environments with increased advertising and access to marijuana products.

KPM #8	30 DAY ALCOHOL USE AMONG 6TH GRADERS - Percentage of 6th graders who have used alcohol in the past 30 days.
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = negative result*



Report Year	2015	2016	2017	2018	2019
30 day alcohol use among 6th graders					
Actual	No Data	4%	No Data	4.50%	No Data
Target	6.50%	4.50%	3.50%	3.50%	3.50%

How Are We Doing

Alcohol use among Oregon 6th graders has remained relatively unchanged in recent years. In 2012, the percentage of 6th graders who used alcohol in the past 30 days was 6.7%; 4.5% in 2014; 4% in 2016 and 4.5% in 2018.

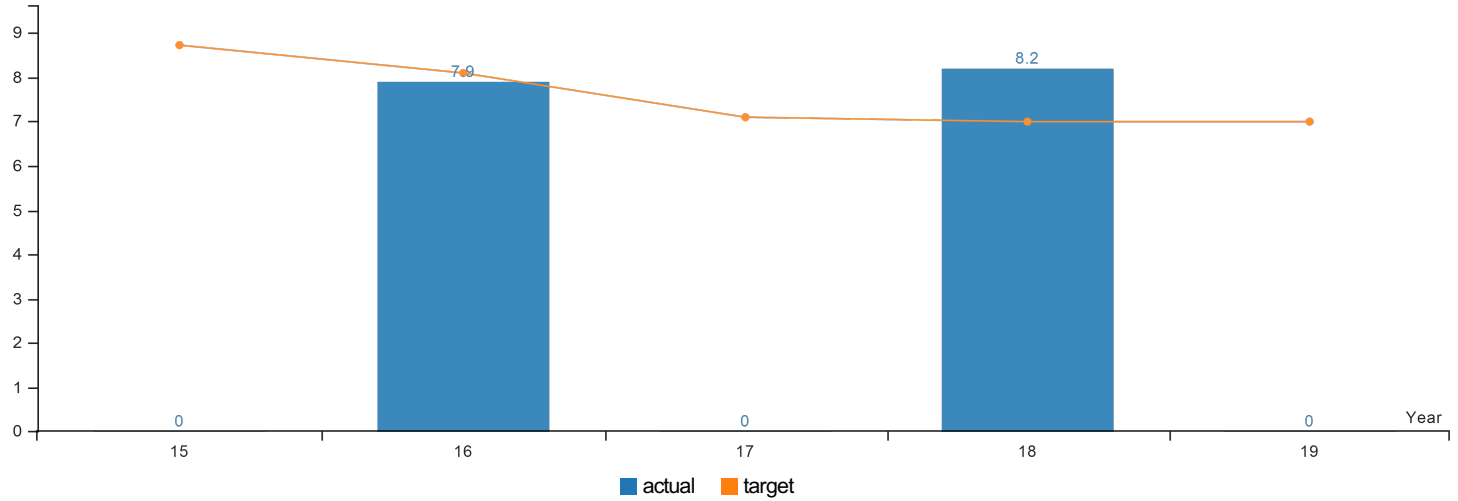
This data is only collected in the even numbered years and published here: https://oregon.pridesurveys.com/dl.php?pdf=Oregon_SWS_Statewide_Report_2018.pdf&type=regionBeginning in 2020, the Oregon Health Authority Public Health Division will launch the Student Health Survey, which will replace the previous Oregon Healthy Teens and Student Wellness Surveys.

Factors Affecting Results

Community environment norms that promote alcohol by making it cheap and easy to get affects youth use. These favorable norms also shape parental attitudes and use, which also affects youth alcohol use.

KPM #9	30 DAY ILLICIT DRUG USE AMONG 8TH GRADERS - Percentage of 8th graders who have used illicit drugs in the past 30 days.
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = negative result*



Report Year	2015	2016	2017	2018	2019
30 day illicit drug use among 8th graders					
Actual	No Data	7.90%	No Data	8.20%	No Data
Target	8.73%	8.10%	7.10%	7%	7%

How Are We Doing

Illicit drug use among Oregon 8th graders has remained relatively unchanged in recent years. In 2012, the percentage of 8th graders who used any illicit drug in the past 30 days was 9%; 8.1% in 2014; 7.9% in 2016 and 8.2% in 2018. These estimates include marijuana use.

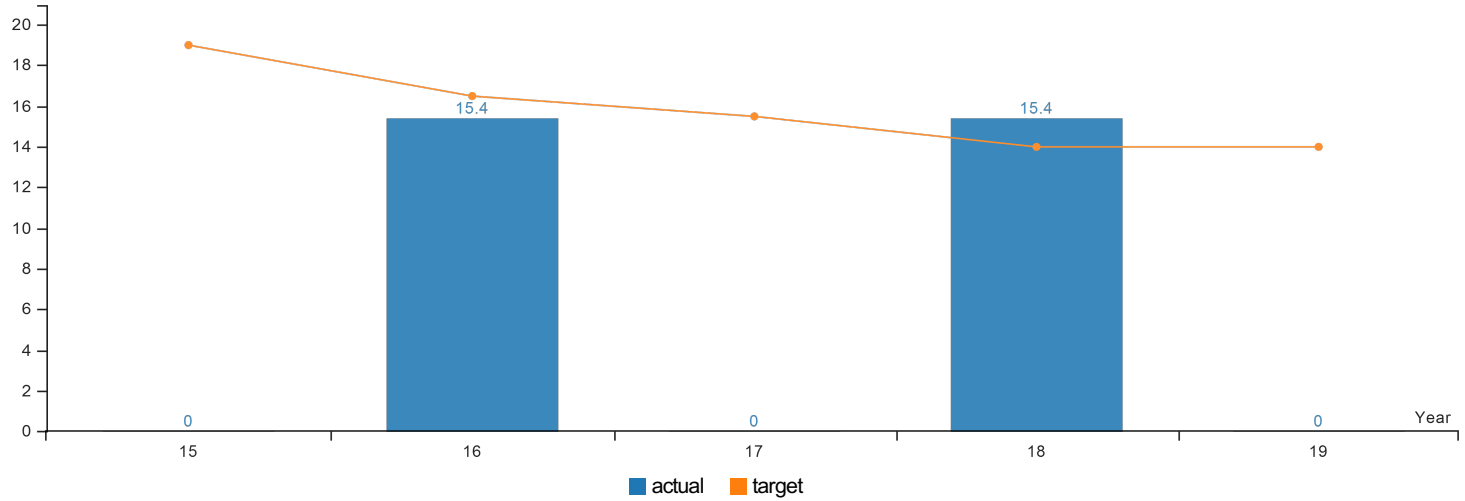
This data is only collected in the even numbered years and published here: https://oregon.pridesurveys.com/dl.php?pdf=Oregon_SWS_Statewide_Report_2018.pdf&type=regionBeginning in 2020, the Oregon Health Authority Public Health Division will launch the Student Health Survey, which will replace the previous Oregon Healthy Teens and Student Wellness Surveys.

Factors Affecting Results

Oregon legalized recreational marijuana with the passage of Measure 91 in 2014. In 2015, retail marijuana stores began to open in many Oregon communities. As of September 2019, there were over 650 approved retail marijuana licenses in Oregon. The presence of a legal retail market has changed community environments with increased advertising and access to marijuana products.

KPM #10	30 DAY ALCOHOL USE AMONG 8TH GRADERS - Percentage of 8th graders who have used alcohol in the past 30 days.
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = negative result*



Report Year	2015	2016	2017	2018	2019
30 day alcohol use among 8th graders					
Actual	No Data	15.40%	No Data	15.40%	No Data
Target	19.01%	16.50%	15.50%	14%	14%

How Are We Doing

Alcohol use among Oregon 8th graders has slightly decreased in recent years. In 2012, the percentage of 8th graders who used alcohol in the past 30 days was 19.6%; 16.9% in 2014; 15.4% in 2016 and 15.4% in 2018.

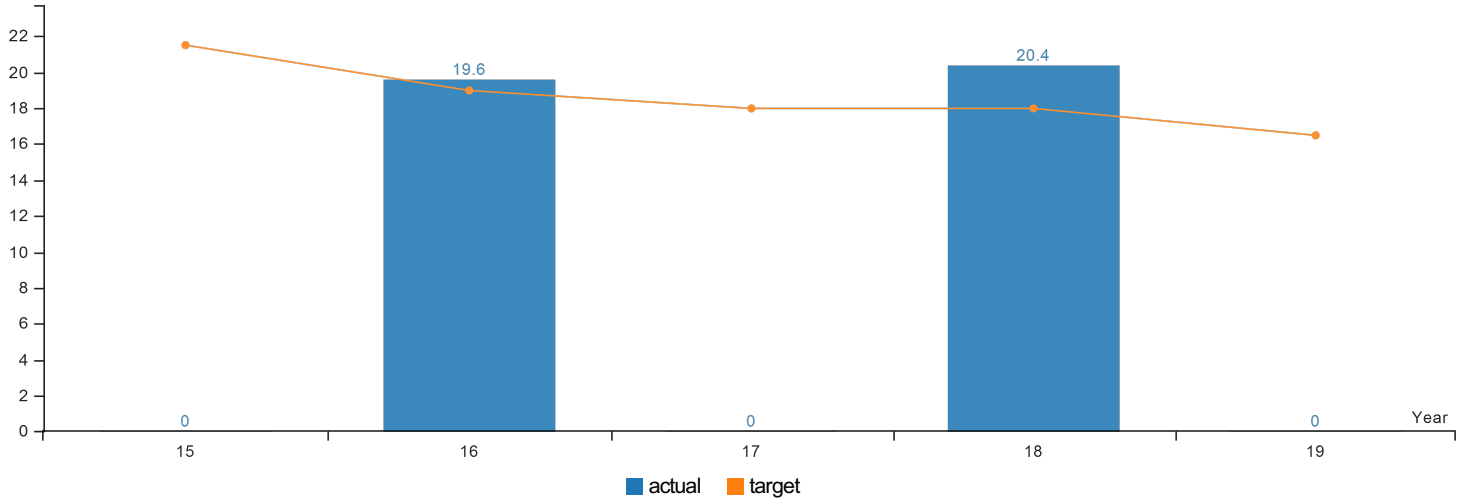
This data is only collected in the even numbered years and published here: https://oregon.pridesurveys.com/dl.php?pdf=Oregon_SWS_Statewide_Report_2018.pdf&type=region

Factors Affecting Results

Community environment norms that promote alcohol by making it cheap and easy to get affects youth use. These favorable norms also shape parental attitudes and use, which also affects youth alcohol use.

KPM #11	30 DAY ILLICIT DRUG USE AMONG 11TH GRADERS - Percentage of 11th graders who have used illicit drugs in the past 30 days.
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = negative result*



Report Year	2015	2016	2017	2018	2019
30 day illicit drug use among 11th graders					
Actual	No Data	19.60%	No Data	20.40%	No Data
Target	21.53%	19%	18%	18%	16.50%

How Are We Doing

Illicit drug use among Oregon 11th graders has slightly increased in recent years. In 2012, the percentage of 11th graders who used any illicit drug in the past 30 days was 22.2%; 19.1% in 2014; 19.6% in 2016 and 20.4% in 2018. These estimates include marijuana use.

This data is only collected in the even numbered years and published here: https://oregon.pridesurveys.com/dl.php?pdf=Oregon_SWS_Statewide_Report_2018.pdf&type=region

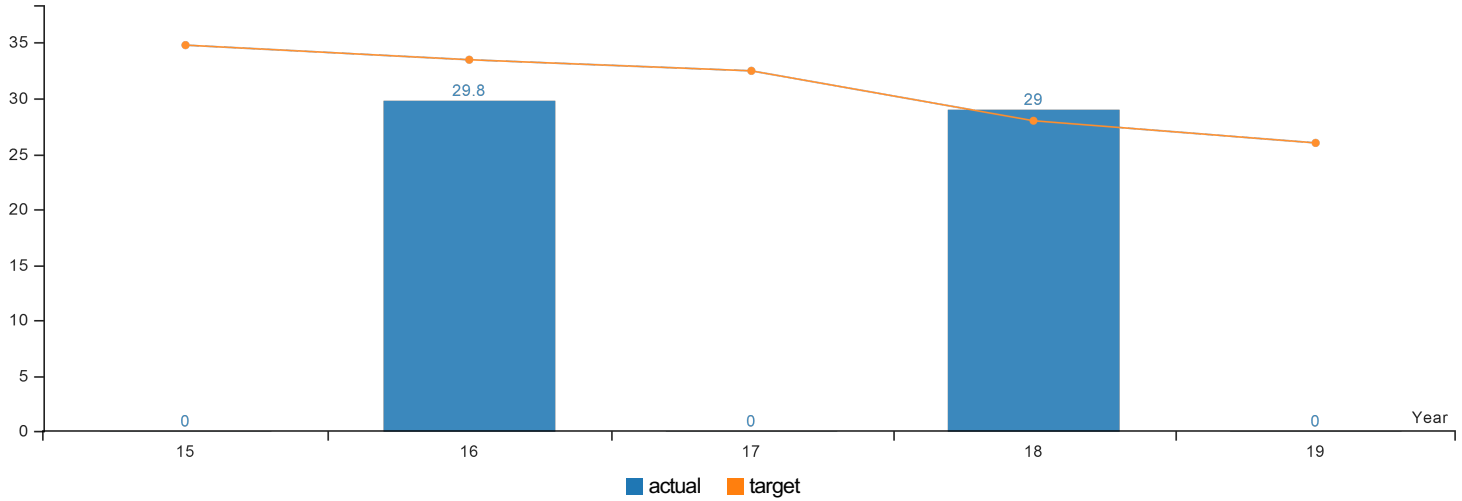
Beginning in 2020, the Oregon Health Authority Public Health Division will launch the Student Health Survey, which will replace the previous Oregon Healthy Teens and Student Wellness Surveys.

Factors Affecting Results

Oregon legalized recreational marijuana with the passage of Measure 91 in 2014. In 2015, retail marijuana stores began to open in many Oregon communities. As of September 2019, there were over 650 approved retail marijuana licenses in Oregon. The presence of a legal retail market has changed community environments with increased advertising and access to marijuana products.

KPM #12	30 DAY ALCOHOL USE AMONG 11TH GRADERS - Percentage of 11th graders who have used alcohol in the past 30 days.
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = negative result*



Report Year	2015	2016	2017	2018	2019
30 day alcohol use among 11th graders					
Actual	No Data	29.80%	No Data	29%	No Data
Target	34.82%	33.50%	32.50%	28%	26%

How Are We Doing

Alcohol use among Oregon 11th graders has decreased in recent years. In 2012, the percentage of 11th graders who used alcohol in the past 30 days was 35.9%; 33.5% in 2014; 29.8% in 2016 and 29% in 2018.

This data is only collected in the even numbered years and published here: https://oregon.pridesurveys.com/dl.php?pdf=Oregon_SWS_Statewide_Report_2018.pdf&type=region

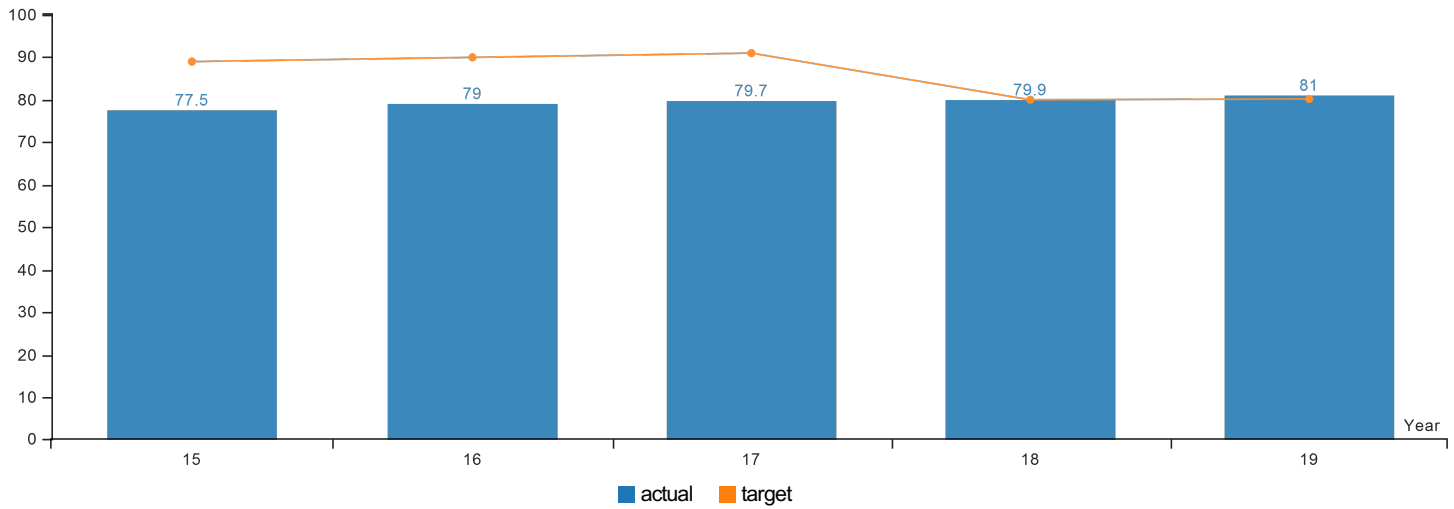
Beginning in 2020, the Oregon Health Authority Public Health Division will launch the Student Health Survey, which will replace the previous Oregon Healthy Teens and Student Wellness Surveys.

Factors Affecting Results

Community environment norms that promote alcohol by making it cheap and easy to get affects youth use. These favorable norms also shape parental attitudes and use, which also affects youth alcohol use.

KPM #13	PRENATAL CARE (POPULATION) - Percentage of women who initiated prenatal care in the first 3 months of pregnancy.
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = positive result*



Report Year	2015	2016	2017	2018	2019
Prenatal care - population					
Actual	77.50%	79%	79.70%	79.90%	81%
Target	89%	90%	91%	80%	80.20%

How Are We Doing

The percentage of women initiating prenatal care during the first trimester is a marker for access to maternal health care services. This percentage has remained relatively stable in Oregon from 2015 to 2018. Early prenatal care is important to identify and treat babies or mothers at risk for health conditions that can affect the pregnancy, such as hypertension and diabetes. It is also important because health care providers can educate and assist mothers with health issues related to pregnancy including nutrition, alcohol use, smoking, exercise, and preparing for childbirth and infant care. Prenatal care is an important screening point for behavioral and social risks such as perinatal depression, intimate partner violence, and food insecurity. Babies born to women who receive prenatal care early and throughout the pregnancy are less likely to have low birth weight or to be born prematurely. Psychosocial, financial, logistical, health care provider, and many other issues can create barriers for women in obtaining early prenatal care.

This indicator is used by states and at the national level, as the data is from vital statistics (birth certificates), therefore making it widely available and representative of the population. While this indicator has been traditionally used, and is widely understood, it is also valuable to examine the Adequacy of Prenatal Care Utilization Index (https://www.mchlibrary.org/databases/HSNRCPDFs/Overview_APCUIndex.pdf), which examines the number of prenatal care visits a woman has received throughout pregnancy in addition to the timing of initiation. This allows for a more thorough examination of woman's access to care. It is worth noting that the data for prenatal care used in both indicators is only available for live births, and therefore does not include information on the prenatal care of women who had a miscarriage or a still birth.

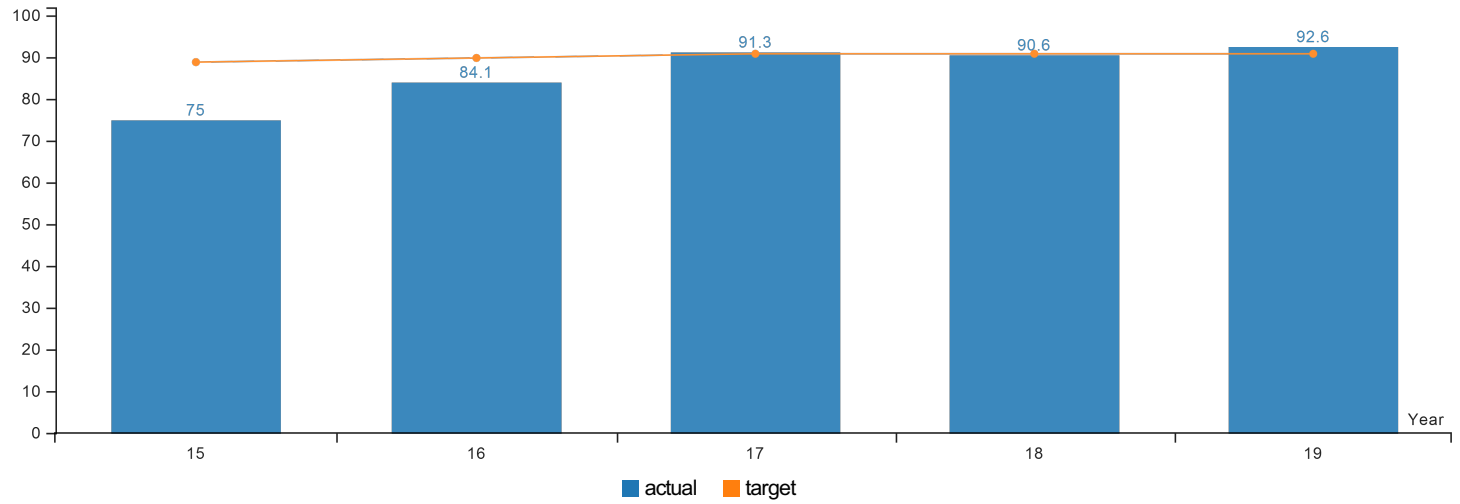
The data on first trimester initiation of prenatal care is publicly released by the Oregon Center for Health Statistics in their Annual Vital Statistic Report. These reports can be found at https://www.oregon.gov/oha/PH/BIRTHDEATHCERTIFICATES/VITALSTATISTICS/ANNUALREPORTS/VOLUME1/Pages/index.aspx. Finalized data for 2019 will be available in December 2020.

Factors Affecting Results

Women give a variety of reasons for not accessing early prenatal care. Women may not feel that early care is important, may not know they are pregnant, or may be experiencing barriers such as lack of insurance coverage, inability to get an appointment or unreliable transportation.

KPM #14	PRENATAL CARE (MEDICAID) - Percentage of women who initiated prenatal care within 42 days of enrollment.
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = positive result*



Report Year	2015	2016	2017	2018	2019
Prenatal care - Medicaid					
Actual	75%	84.10%	91.30%	90.60%	92.60%
Target	89%	90%	91%	91%	91%

How Are We Doing

Performance on timeliness of prenatal care increased slightly from 90.6% in 2017 to 92.6% in 2018.

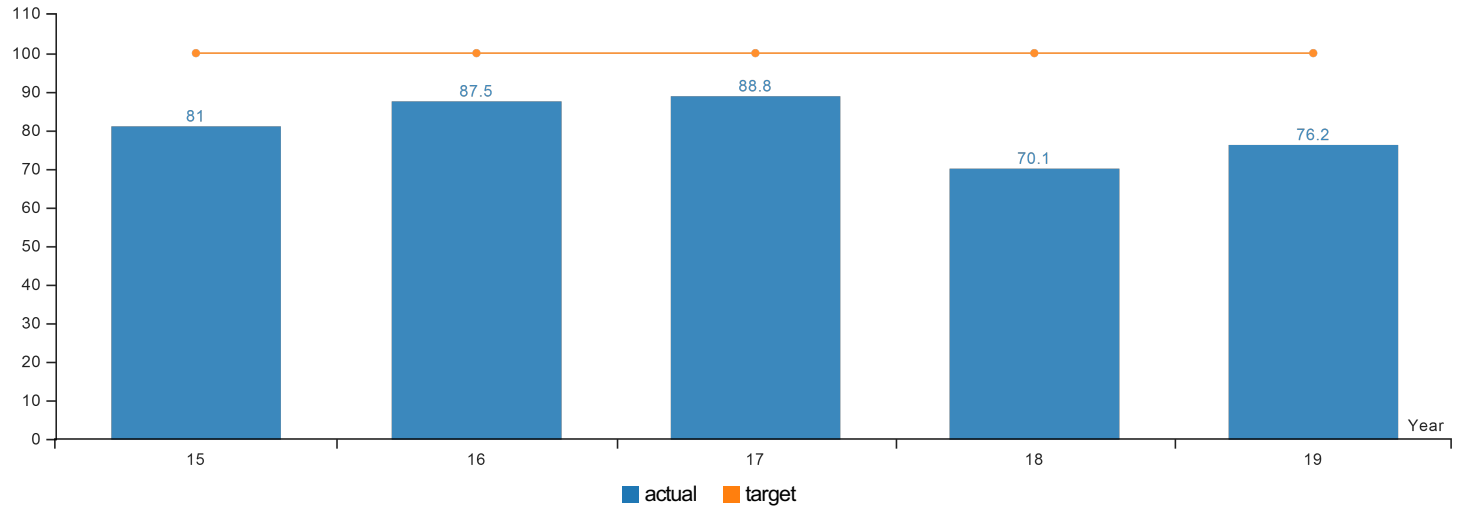
Factors Affecting Results

While this measure was an incentive measure for CY2018, in CY2019 it is no longer pay-for-performance. However, it is a state quality measure which OHA will continue to monitor and report.

NOTE: Results prior to 2014 are not directly comparable to later years due to change in methodology.

KPM #15	PATIENT CENTERED PRIMARY CARE HOME (PCPCH) ENROLLMENT - Number of members enrolled in patient-centered primary care homes by tier.
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = positive result*



Report Year	2015	2016	2017	2018	2019
Patient centered primary care home (PCPCH) enrollment					
Actual	81%	87.50%	88.80%	70.10%	76.20%
Target	100%	100%	100%	100%	100%

How Are We Doing

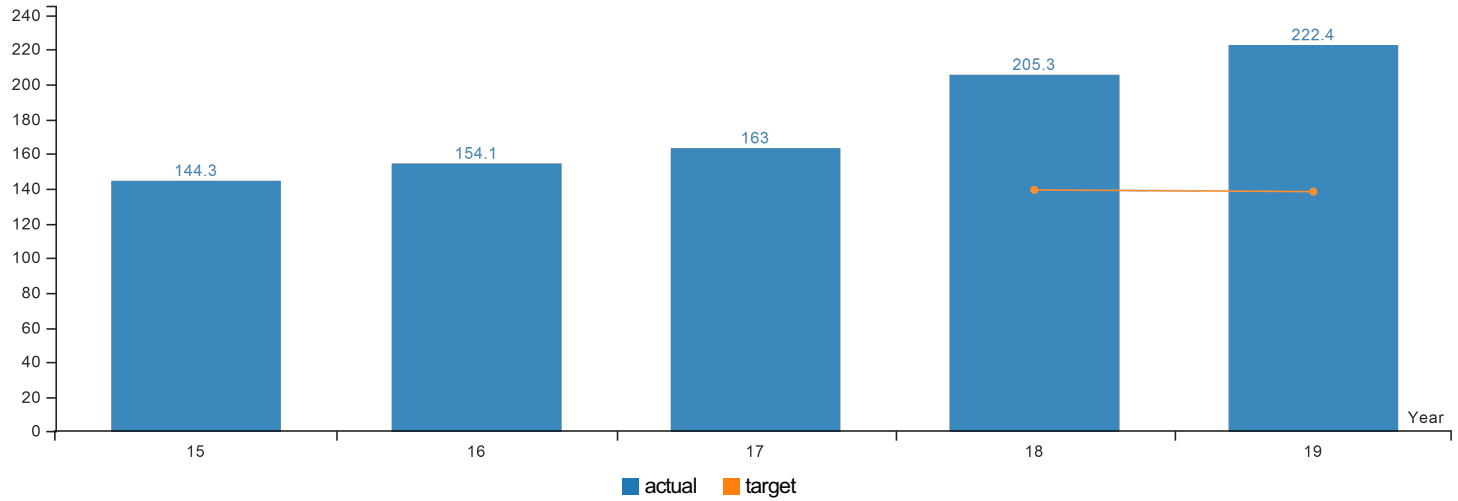
This measure uses a weighted methodology to ensure members are not just enrolled in a PCPCH, but are enrolled in the higher PCPCH tiers. Statewide in 2018, 96 percent of CCO members were enrolled in a PCPCH, resulting in a weighted score of 76.2. Beginning in 2017, the PCPCH program launched 5 STAR recognition. This new level of recognition was incorporated into the weighting formula for PCPCH score. Thus, scores are not comparable to previous years.

Factors Affecting Results

Coordinated care organizations are driving improvement on this measure through two main efforts: (1) working with contracted providers to go through the PCPCH recognition process, and (2) preferentially assigning members to certified PCPCHs.

KPM #16	PQI 01: Diabetes Short-Term Complication Admission Rate -
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = positive result*



Report Year	2015	2016	2017	2018	2019
PQI 01: Diabetes Short-Term Complication Admission Rate

How Are We Doing

This measure is calculated using proprietary software from AHRQ, which was updated in 2018. Because of the changes that AHRQ made to the way this measure is calculated, 2019 data should not be compared to prior years.

Factors Affecting Results

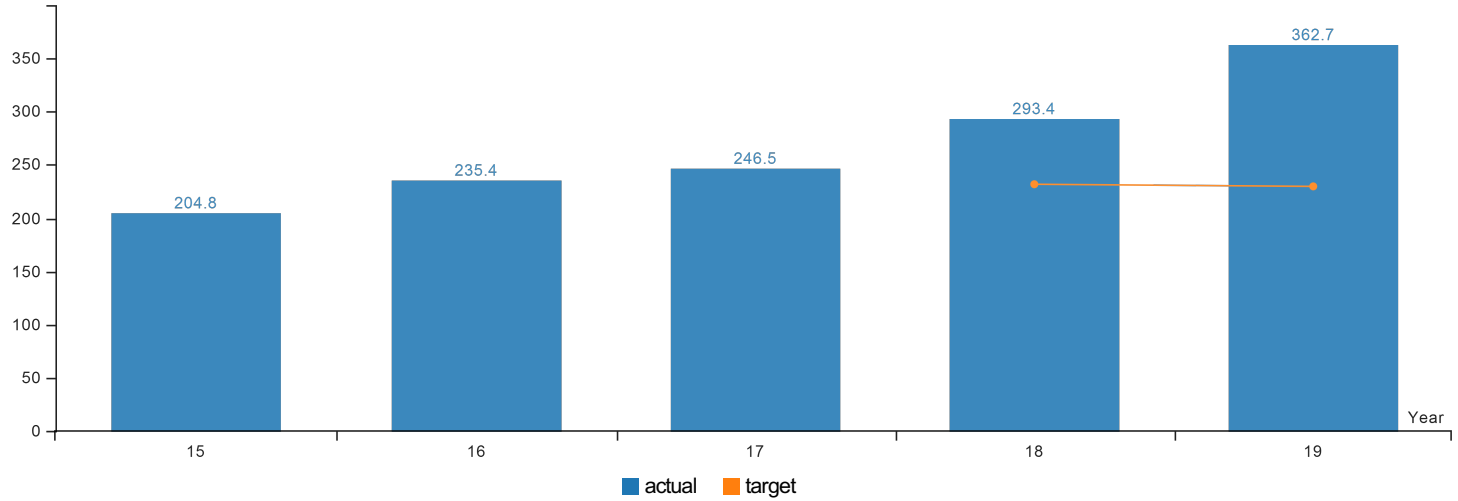
KPM #18	PQI 08: Congestive Heart Failure Admission Rate -
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = positive result*



Report Year	2015	2016	2017	2018	2019
PQI 08: Congestive Heart Failure Admission Rate					
Actual	204.80	235.40	246.50	293.40	362.70
Target	TBD	TBD	TBD	232	230

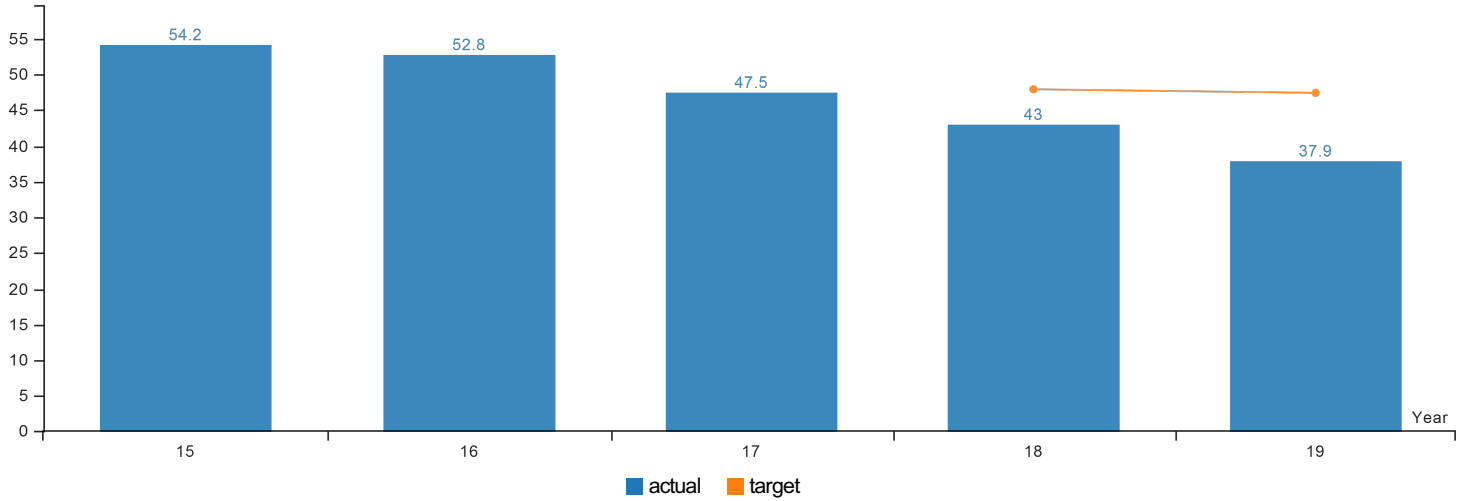
How Are We Doing

This measure is calculated using proprietary software from AHRQ, which was updated in 2018. Because of the changes that AHRQ made to the way this measure is calculated, 2019 data should not be compared to prior years.

Factors Affecting Results

KPM #19	PQI 15: Asthma in Younger Adults Admission Rate -
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = positive result*



Report Year	2015	2016	2017	2018	2019
PQI 15: Asthma in Younger Adults Admission Rate					
Actual	54.20	52.80	47.50	43	37.90
Target	TBD	TBD	TBD	48	47.50

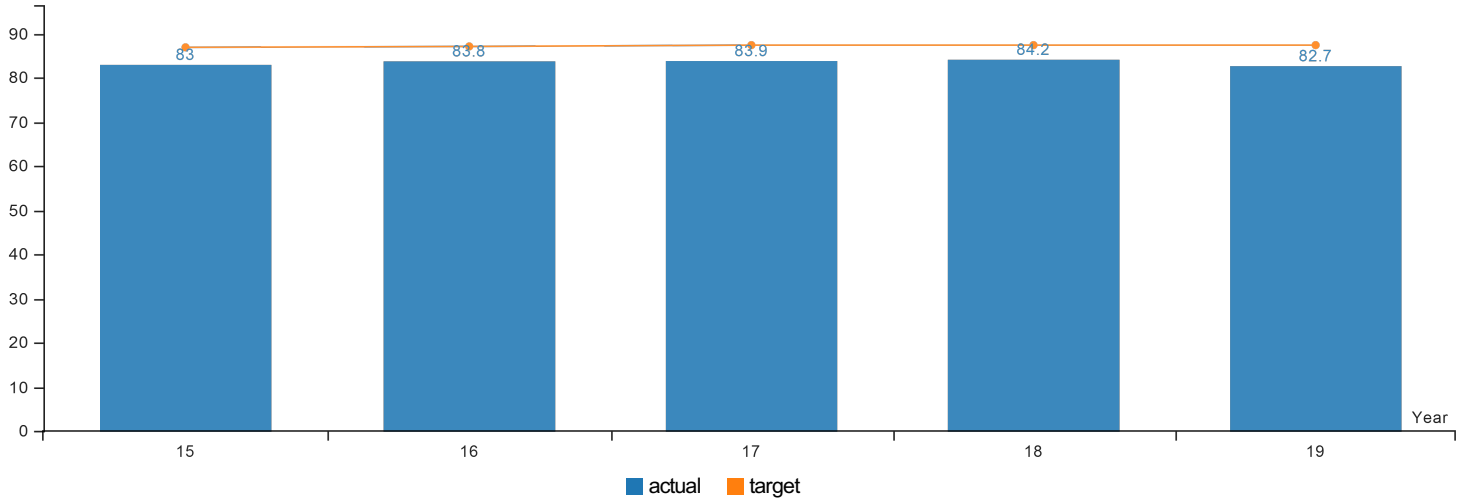
How Are We Doing

This measure is calculated using proprietary software from AHRQ, which was updated in 2018. Because of the changes that AHRQ made to the way this measure is calculated, 2019 data should not be compared to prior years.

Factors Affecting Results

KPM #20	ACCESS TO CARE - Percentage of members who responded "always" or "usually" too getting care quickly (composite for adult and child).
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = positive result*



Report Year	2015	2016	2017	2018	2019
Access to care					
Actual	83%	83.80%	83.90%	84.20%	82.70%
Target	87%	87.20%	87.50%	87.50%	87.50%

How Are We Doing

Prior to 2018, this measure was a weighted score across children and adults. From 2018 on, however, these data are now disaggregated and reported separately for children and adults. This ensures that performance across the different age groups can be monitored appropriately and is based upon a decision from the Metrics and Scoring Committee. KPM data from prior years should not be compared to that from 2019.

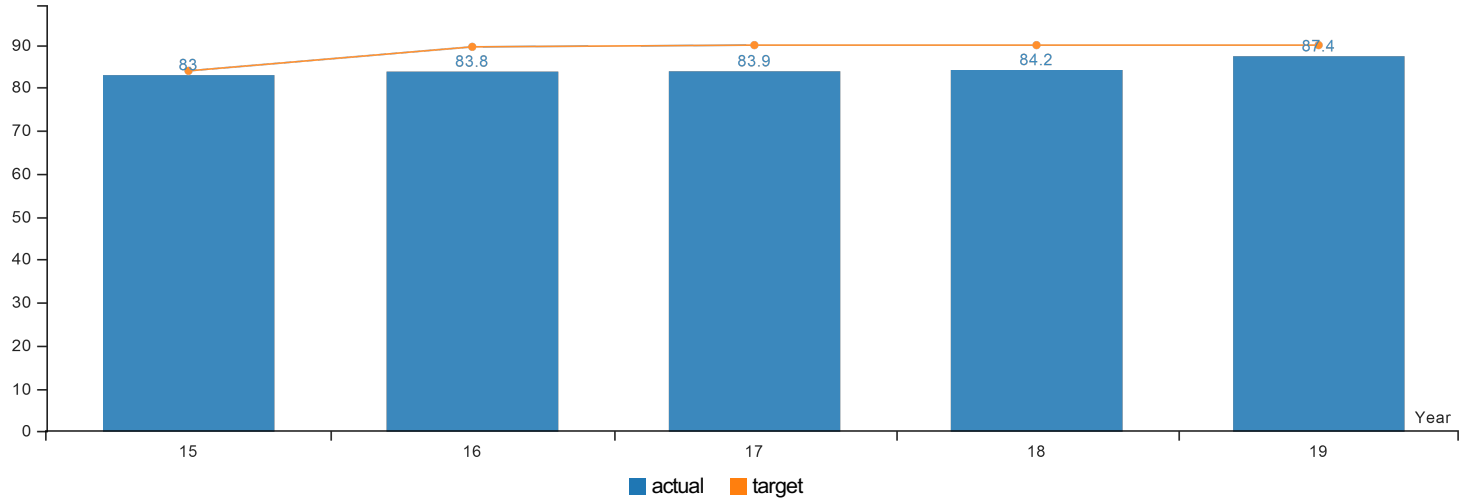
The reported number of 82.7 is for Adults, for Children it is 89.

Factors Affecting Results

The number of Oregonians enrolled in Medicaid increased by more than 60 percent in 2014, predictably increasing demand for care. Access also declined slightly at the national level from 2013 to 2014 (the 75-percentile declined from 88.0% in 2013 to 87.2%). This measure is included in the state's Medicaid demonstration agreement with CMS.

KPM #21	MEMBER EXPERIENCE OF CARE - Composite measurement: how well doctors communicate; health plan information and customer service (Medicaid population).
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = positive result*



Report Year	2015	2016	2017	2018	2019
Member experience of care					
Actual	83%	83.80%	83.90%	84.20%	87.40%
Target	84%	89.60%	90%	90%	90%

How Are We Doing

Prior to 2018, this measure was a weighted score across children and adults. From 2018 on, however, these data are now disaggregated and reported separately for children and adults. This ensures that performance across the different age groups can be monitored appropriately and is based upon a decision from the Metrics and Scoring Committee. KPM data from prior years should not be compared to that from 2019.

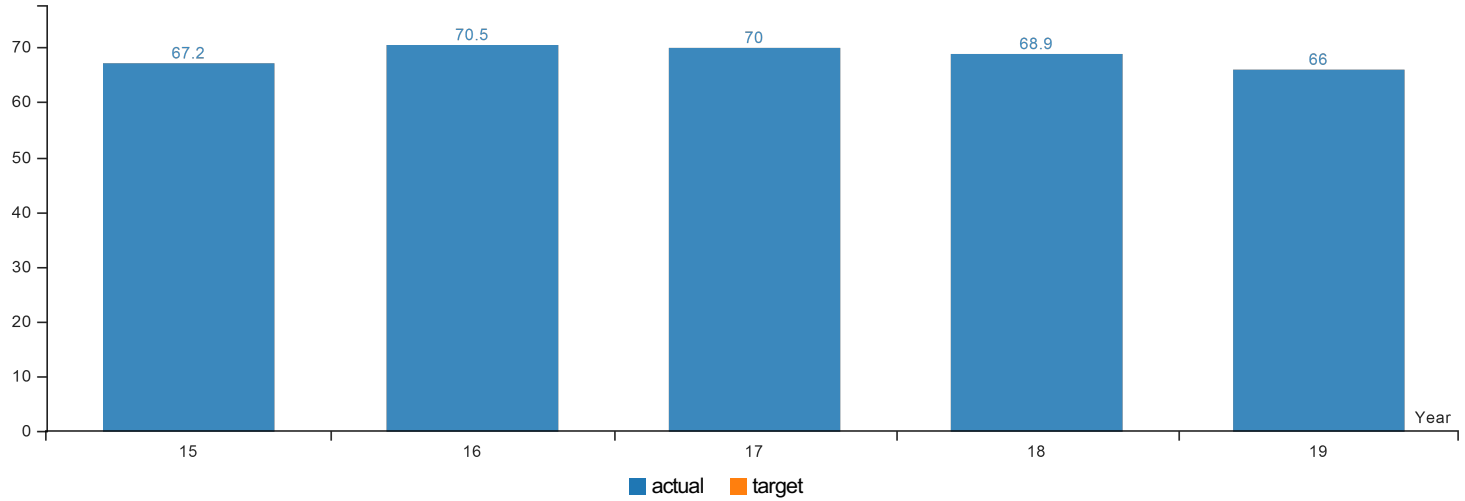
The reported number of 87.4 is for Adults, for Children it is 87.5

Factors Affecting Results

NOTE: This was retired from the incentive measure set in 2017.

KPM #22	MEMBER HEALTH STATUS - Percentage of CAHPS survey respondents with a positive self-reported rating of overall health (excellent, very good, or good).
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = positive result*



Report Year	2015	2016	2017	2018	2019
MEMBER HEALTH STATUS					
Actual	67.20%	70.50%	70%	68.90%	66%
Target	TBD	TBD	TBD	TBD	TBD

How Are We Doing

Prior to 2018, this measure was a weighted score across children and adults. From 2018 on, however, these data are now disaggregated and reported separately for children and adults. This ensures that performance across the different age groups can be monitored appropriately and is based upon a decision from the Metrics and Scoring Committee. KPM data from prior years should not be compared to that from 2019.

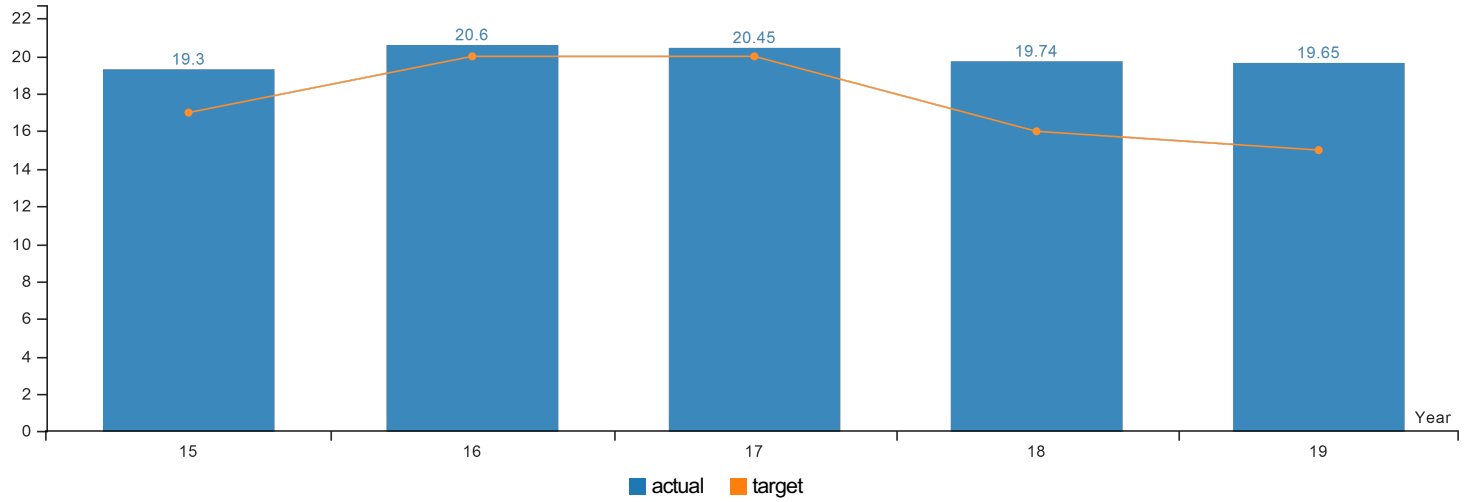
The reported number of 66 is for Adults, for Children it is 94.9

Factors Affecting Results

Prior to 2014, a higher percentage of adult members were eligible for Medicaid due to disability. With the influx of new, previously ineligible members in 2014, the proportion of members who feel healthier may have increased. However, there has been a decrease among adults since 2016.

KPM #23	RATE OF TOBACCO USE (POPULATION) - Rate of tobacco use among adults.
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = negative result*



Report Year	2015	2016	2017	2018	2019
Rate of tobacco use - adult population					
Actual	19.30%	20.60%	20.45%	19.74%	19.65%
Target	17%	20%	20%	16%	15%

How Are We Doing

Tobacco use (cigarette smoking or chewing tobacco) among adults has slowly declined from CY2015 to CY2018. In CY2015, the percent of adults who used tobacco was 20.6% and in CY2018 tobacco use was 19.65%. The decline in use of these products, however, is offset somewhat by the increased use of alternative tobacco products such as inhalant delivery systems (IDS) (e.g. e-cigarettes), hookah and other tobacco products. Beginning in CY2015 the Public Health Division started reporting rates which reflect population tobacco use and includes cigarettes, little cigars, large cigars, hookah, IDS and smokeless tobacco use.

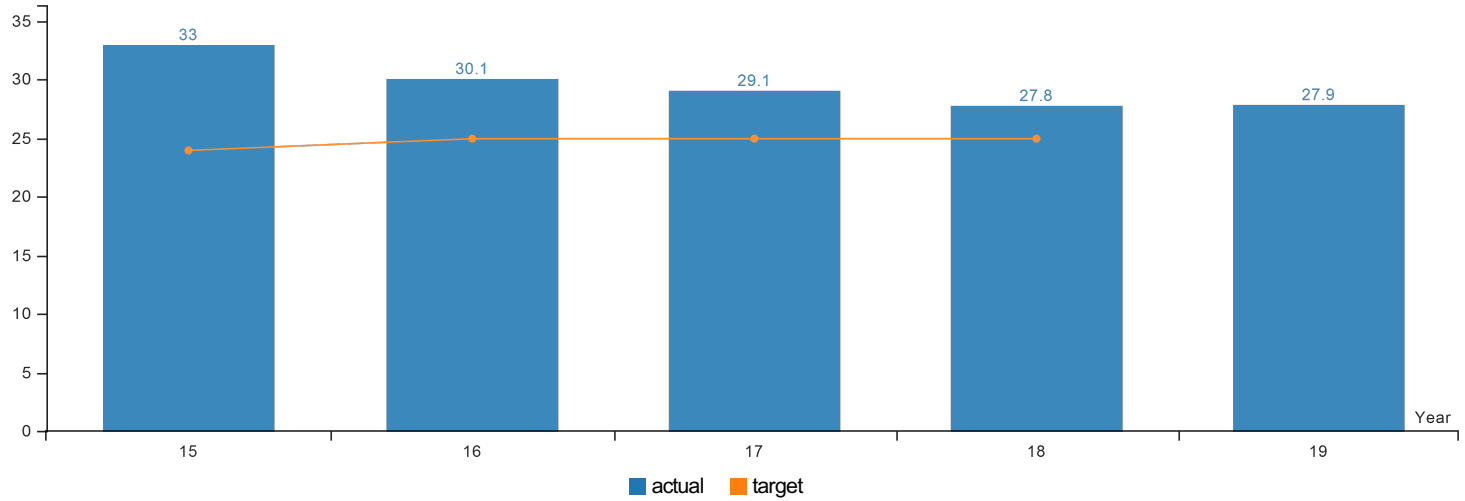
This data is collected yearly and can be found published here:
https://www.oregon.gov/oha/PH/DISEASESCONDITIONS/CHRONICDISEASE/DATAREPORTS/Documents/datatables/ORAnnualBRFSS_tobacco.pdf

Factors Affecting Results

A limitation of these data is that they include only cigarette smoking and chewing tobacco. IDS and other tobacco products are not included.

KPM #24	RATE OF TOBACCO USE (MEDICAID) - Percentage of CCO enrollees who currently smoke cigarettes or use tobacco every day or some days.
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = negative result*



Report Year	2015	2016	2017	2018	2019
Rate of tobacco use - Medicaid population					
Actual	33%	30.10%	29.10%	27.80%	27.90%
Target	24%	25%	25%	25%	TBD

How Are We Doing

The percent of Medicaid members who use tobacco has decreased each year since 2013, the baseline for this measure. Compared to the non-Medicaid adult population (see KPM #19), adults on Medicaid are fifty percent more likely than the general population to use tobacco.

Factors Affecting Results

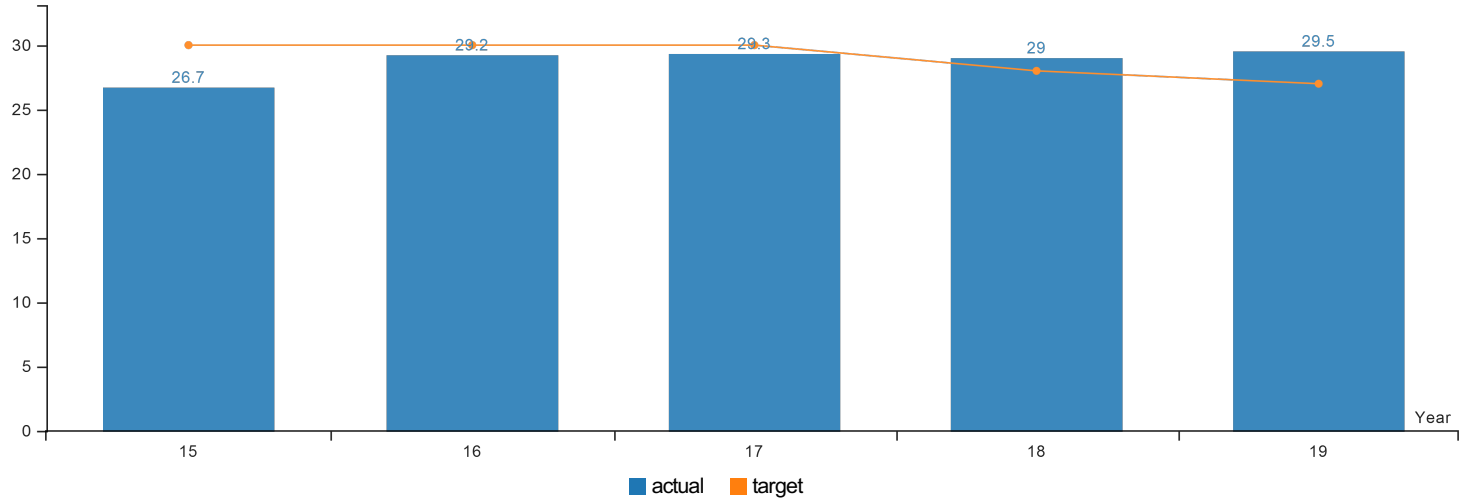
The Centers for Disease Control and Prevention Office of Smoking and Health has developed an evidence-based funding model for countering the health and economic destruction of tobacco use. The recommended model funds programs to prevent initiation of tobacco use among young people, to promote quitting among adults and young people, to eliminate exposure to secondhand smoke, and to identify and eliminate tobacco related disparities. For Oregon, the recommended funding is $10.09 per capita, which equates to $39.3 million annually. This recommendation represents just a fraction of the cost of tobacco use, with more than $2.5 billion lost to medical care and lost productivity annually in Oregon.

Beginning in 2016, cigarette smoking prevalence is a CCO incentive measure. During the 2015 - 2017 biennium Oregon received about $2.77 per capita for tobacco prevention from all funding sources, which is 27% of CDC's recommended funding for tobacco prevention. This is comparable with what was allotted to Oregon tobacco prevention a dozen years ago; however, funding levels have been much lower in the years in between. TPEP received approximately $2.87 per capita during the 2001 2003 biennium but was temporarily shuttered when the Legislature directed the allocated revenues elsewhere. After this interruption, smoking among pregnant women and adolescents stopped decreasing, and per capita consumption of cigarettes increased for the first time

since the program was first implemented. Since funding was reinstated to TPEP, per capita cigarette consumption has steadily declined.

KPM #25	RATE OF OBESITY (POPULATION) - Percentage of adults who are obese among Oregonians.
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = negative result*



Report Year	2015	2016	2017	2018	2019
Rate of obesity - adult population					
Actual	26.70%	29.20%	29.30%	29%	29.50%
Target	30%	30%	30%	28%	27%

How Are We Doing

Obesity among adults has remained relatively unchanged in recent years. In CY2015, the percent of adults who had obesity was 29.2% and in CY2018 obesity was 29.5%. The Public Health Division does not have funding dedicated to a comprehensive obesity prevention program. There are currently no state or federal dollars directed to obesity prevention in Oregon. However, the Public Health Division leverages existing federal funds to address nutrition and physical activity, the primary drivers of obesity and related chronic diseases.

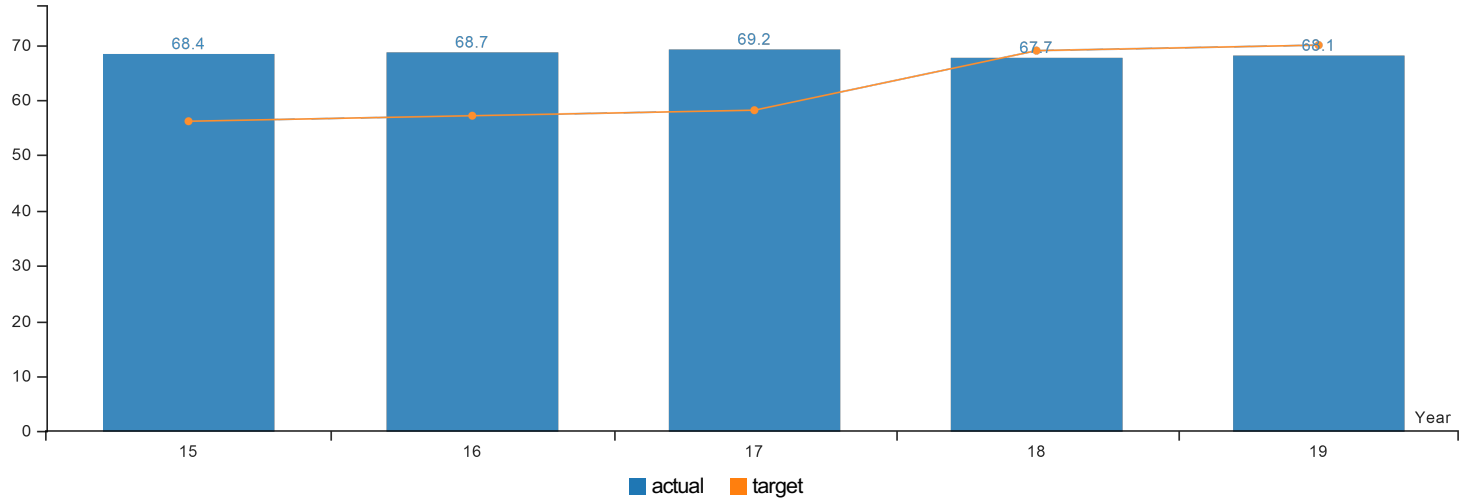
This data is collected yearly and can be found published here:
https://www.oregon.gov/oha/PH/DISEASESCONDITIONS/CHRONICDISEASE/DATAREPORTS/Documents/datatables/ORAnnualBRFSS_riskfactors.pdf

Factors Affecting Results

Obesity is measured using self-reported height and weight from survey data.

KPM #26	EFFECTIVE CONTRACEPTIVE USE (POPULATION) - Percentage of reproductive age women who are at risk of unintended pregnancy using an effective method of contraception.
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = positive result*



Report Year	2015	2016	2017	2018	2019
Effective contraceptive use - population					
Actual	68.40%	68.70%	69.20%	67.70%	68.10%
Target	56.20%	57.20%	58.20%	69%	70%

How Are We Doing

In 2014, the structure of the BRFSS questions used for this measure changed significantly, and results cannot be compared to previous years.

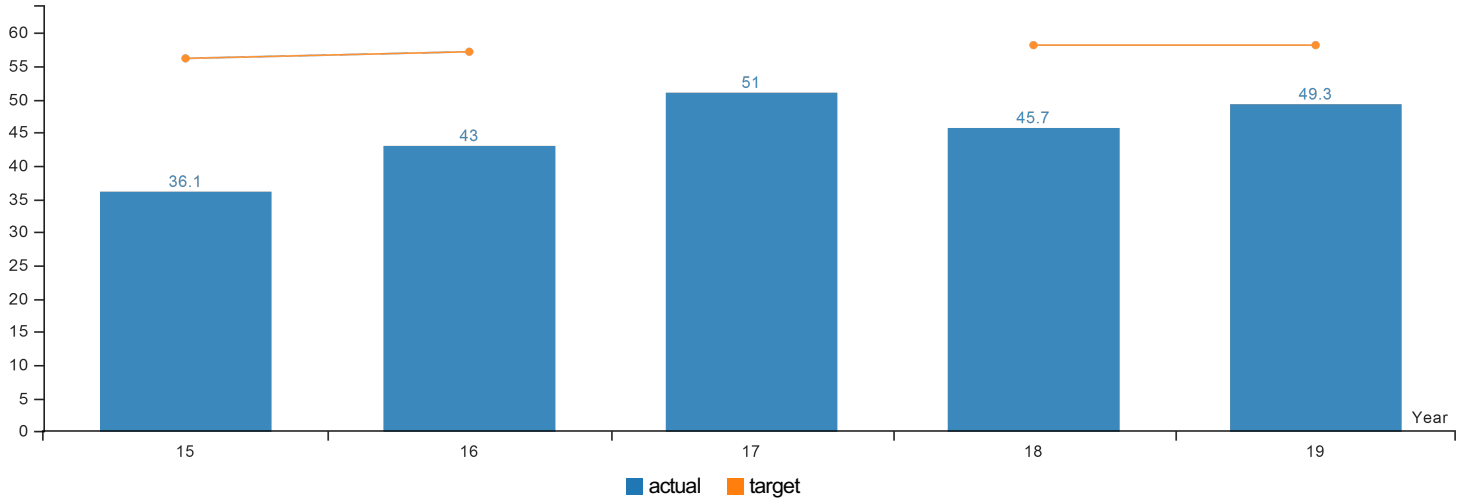
The proportion of women at risk of unintended pregnancy who are using an effective contraceptive method has remained steady for several years.

Factors Affecting Results

It should be noted that this measure is based on survey data whereas KPM #26 uses administrative claims data. Thus, KPM #25 is more likely to accurately capture individuals who are using permanent and long-acting contraceptive methods, resulting in higher overall rates of effective contraceptive use compared to KPM #26. In recent years the Oregon legislature has passed several bills intended to increase access to contraception, including enhanced confidentiality provisions and insurance coverage for a full year's worth of contraceptive methods. In addition, the passage of the Reproductive Health Equity Act in the Oregon legislature in 2017 will both ensure that private insurance plans continue to cover preventive services, including contraception, without cost sharing, and also will help to support funding for Oregon's family planning clinics starting in 2018, which may impact results in future years.

KPM #27	EFFECTIVE CONTRACEPTIVE USE (MEDICAID) - Percentage of reproductive age women who are at risk of unintended pregnancy using an effective method of contraception.
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = positive result*



Report Year	2015	2016	2017	2018	2019
Effective contraceptive use - Medicaid population					
Actual	36.10%	43%	51%	45.70%	49.30%
Target	56.20%	57.20%	TBD	58.20%	58.20%

How Are We Doing

Because of changes to the specifications for this measure from 2017 to 2018, prior years are not directly comparable to 2018. However, the rate of effective contraceptive use has increased since this measure was first included in the CCO Quality Incentive Program.

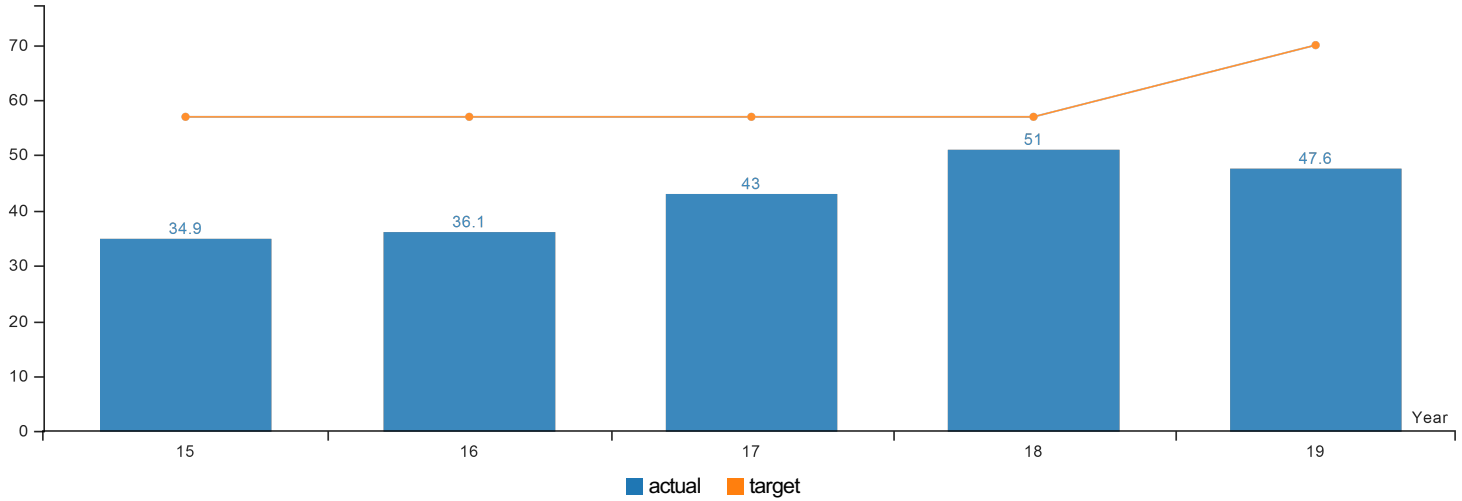
NOTE: data represents women ages 18-50

Factors Affecting Results

This was a CCO incentive measure in 2018 (the incentive measure also included young women ages 15-17).

KPM #28	FLU SHOTS (POPULATION) - Percentage of adults ages 50-64 who receive a flu vaccine.
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = positive result*



Report Year	2015	2016	2017	2018	2019
Flu shots - population					
Actual	34.90%	36.10%	43%	51%	47.60%
Target	57%	57%	57%	57%	70%

How Are We Doing

Individuals within this age range of 50 to 64 are progressively more likely to seek influenza immunization as they age. This is the transition period between lower influenza immunization rates among younger adults and higher rates among seniors. Seniors are at greater risk of adverse outcomes from influenza disease, including hospitalization and mortality.

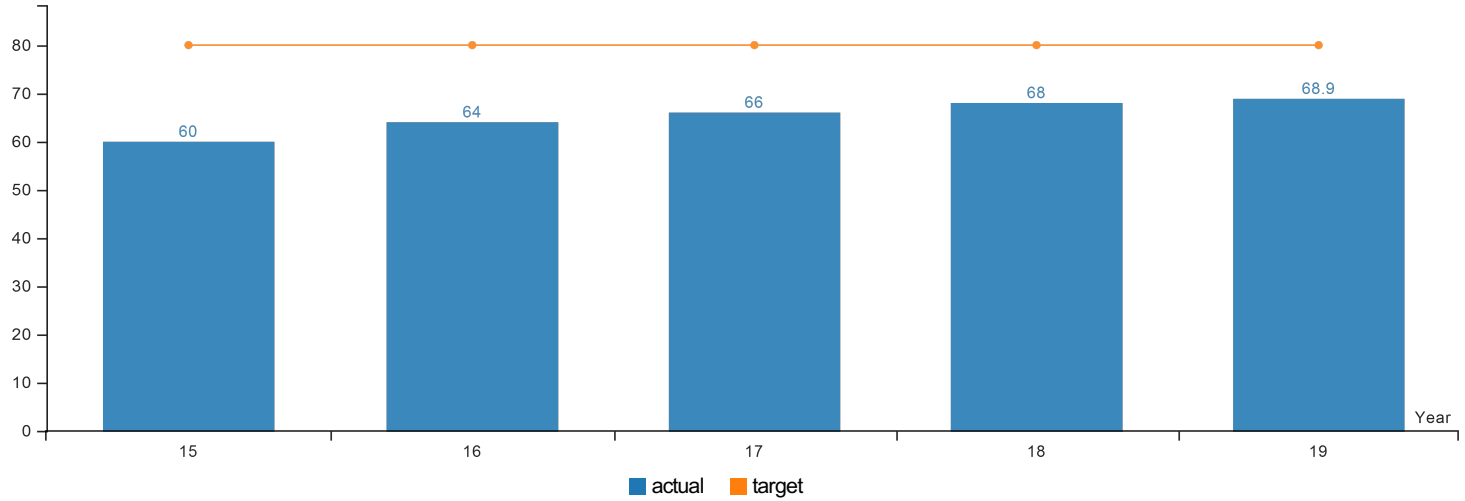
Within Oregon, those in the Portland and Willamette Valley are most likely to seek influenza immunization each season, while Oregonians in the Southern tier of the state are least likely. Regardless of regional differences in Oregon, no area has immunization rates that are high enough to protect vulnerable individuals, or to build a strong community resistance to the spread of influenza disease.

This rate is for the 2018-19 influenza season, with immunizations given starting in August of each season. The source of data is the Oregon ALERT Immunization Information System.

Factors Affecting Results

KPM #29	CHILD IMMUNIZATION RATES (POPULATION) - Percentage of children who are adequately immunized (immunization series 4:3:1:3:3:1:4).
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = positive result*



Report Year	2015	2016	2017	2018	2019
Child immunization rates - population					
Actual	60%	64%	66%	68%	68.90%
Target	80%	80%	80%	80%	80%

How Are We Doing

This measure is based on a combination of seven separate immunization series that are recommended between birth and 18 months of age. For each series, between 1 to 4 doses of vaccine are required, all given at appropriate intervals, with specified time gaps between each dose. All of the seven series of this measure can be given by 18months of age, but it is common to infants to fall behind. There are many reasons why infants fall behind, including parental reluctance to give their baby multiple injections per doctor visit, to trouble getting timely appointments, or missing immunization appointments due to having a sick baby.

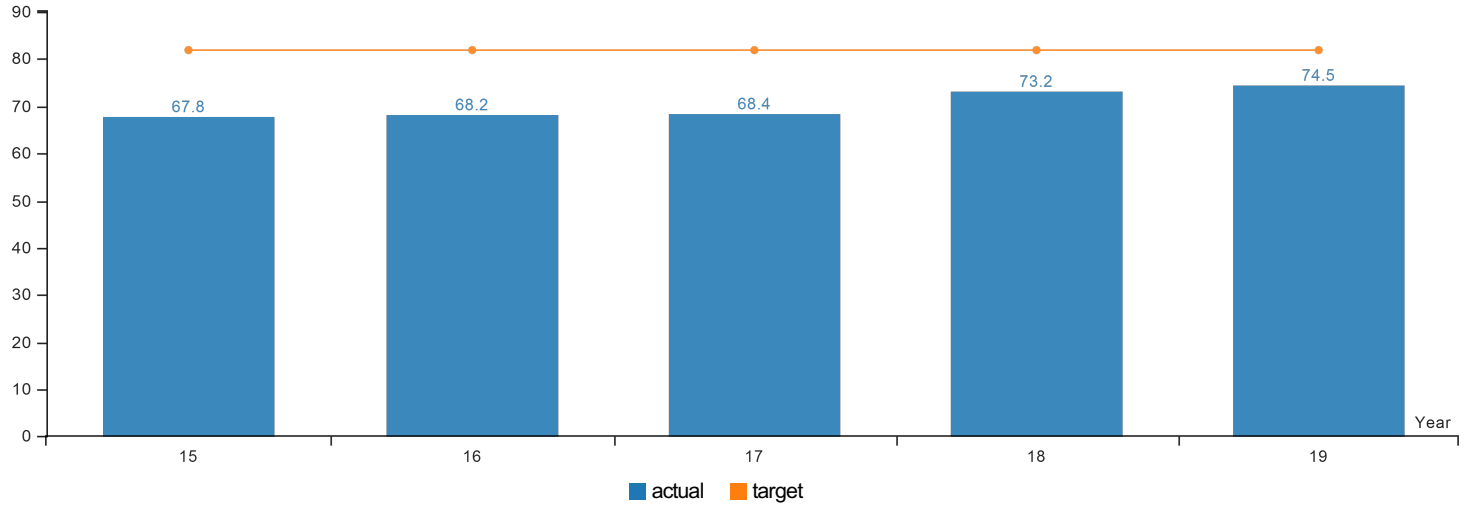
The seven series and doses are: DTaP(diphtheria-tetanus-pertussis), 4 doses; IPV (inactivated polio), 3 doses; MMR (measles-mumps-rubella), 1 dose; Hib (Hemophilus influenzae), 3 doses; Hepatitis B, 3 doses; Varicella, 1 dose, and PCV (pneumococcal conjugate), 4 doses.

Overall Oregon's rates are slightly below national averages. However, Oregon rates are gradually increasing. Generally, Oregon rates are limited by two components of the seven series- DTaP (diphtheria-tetanus-pertussis), and PCV (pneumococcal conjugate vaccine). Both of these require 4 doses of vaccine by 18 months of age, and it is the 4th dose of one or both of these which typically is missing from children who are not up to date for the entire measure. As an example, while the rate for 4 DTaP is 79.9%, the rate for 1 MMR (measles-mumps-rubella) is 88.1%

The source of the data for this measure is the ALERT Immunization Information System, Oregon's all age immunization registry.

KPM #30	CHILD IMMUNIZATION RATES (MEDICAID) - Percentage of children who are adequately immunized (immunization series 4:3:1:3:3:1:4).
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = positive result*



Report Year	2015	2016	2017	2018	2019
Child immunization rates - Medicaid population					
Actual	67.80%	68.20%	68.40%	73.20%	74.50%
Target	82%	82%	82%	82%	82%

How Are We Doing

In CY2015, 68.2% of CCO members received recommended vaccines before their second birthday. Positively, this increased to 73.2% in CY2017, and continued to increase to 74.5% in CY2018.

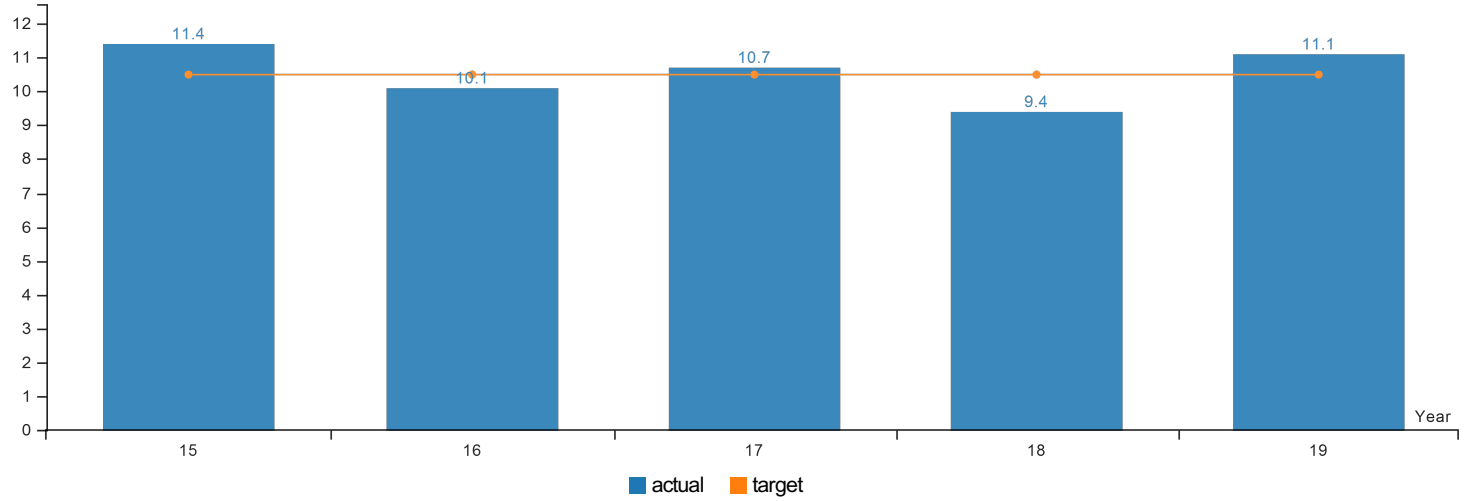
Factors Affecting Results

The Immunization Program oversees the Vaccines for Children (VFC) program, a federally funded entitlement that provides vaccines at no cost to children who might not otherwise be vaccinated because of inability to pay. The success of VFC is based upon partnership between the Oregon Immunization Program and public and private providers. Ninety five percent of Oregon's childhood immunizations are captured in the ALERT IIS, which is used to estimate immunization rates, while also providing a clinical record for providers to accurately assess the vaccine needs of individual children. Other influences include parent and provider knowledge, attitudes, and practices. Beginning 2016, childhood immunization status is a CCO incentive metric which will likely drive improved outreach and workflows.

This measure is also available online here: http://www.oregon.gov/oha/Metrics/Pages/HST-Reports.aspx Data are available statewide and stratified by race/ethnicity and by CCO. Results are published twice per year (January and June). This is also a CCO incentive measure.

KPM #31	PLAN ALL CAUSE READMISSIONS - Percentage of acute inpatient stays that were followed by an acute readmission for any diagnosis within 30 days and the predicted probability of an acute readmission for members 18 years and older.
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = negative result*



Report Year	2015	2016	2017	2018	2019
Plan all cause readmissions					
Actual	11.40%	10.10%	10.70%	9.40%	11.10%
Target	10.50%	10.50%	10.50%	10.50%	10.50%

How Are We Doing

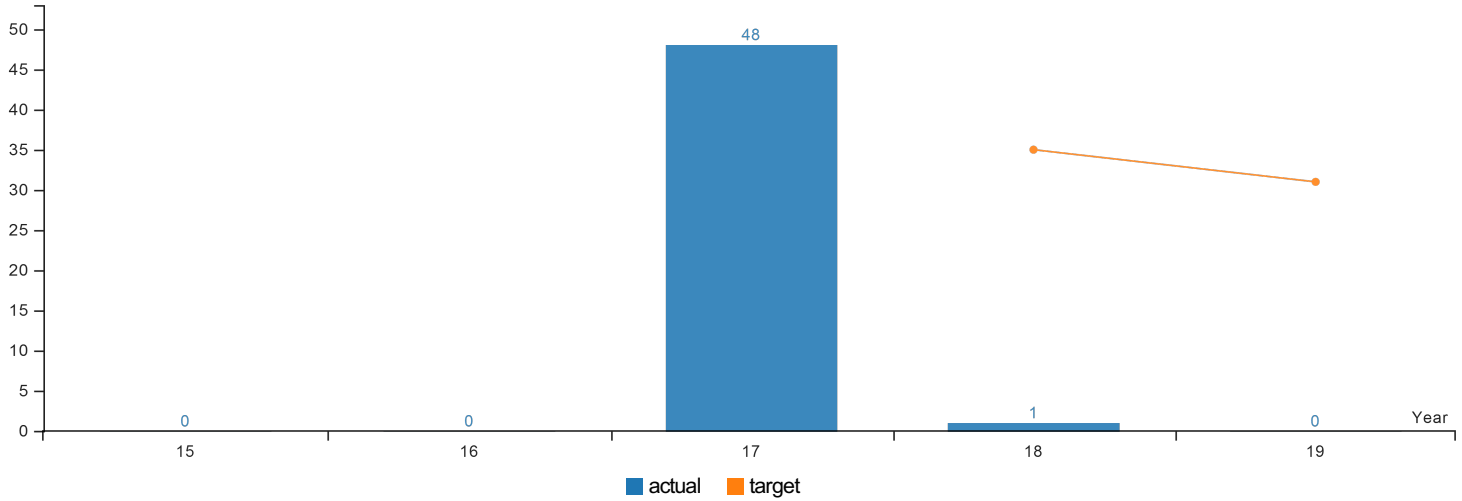
Results prior to 2016 are not directly comparable to later years due to methodological changes. Hospital readmissions continue to decline in Oregon (lower is better) and in CY2016 achieved the KPM target; this trend continued in CY2017. However, there was an increase in readmissions from 2017 to 2018.

Factors Affecting Results

As CCOs continue to focus on ensuring their members receive the appropriate care at the appropriate time in the appropriate place, many performance indicators are affected. As enrollment in patient-centered primary care homes continue to increase (see KPM #15), and CCOs and providers continue to emphasize the importance of coordinated, preventive care, post-discharge care is likely to be more appropriately addressed, resulting in a reduction in this readmission rate. We will need to continue to watch the change from 2017 to 2018 to see if this trend continues.

KPM #32	ELIGIBILITY PROCESSING TIME - Median number of days processing time from date of request to eligibility determination.
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = positive result*



Report Year	2015	2016	2017	2018	2019
ELIGIBILITY PROCESSING TIME					
Actual	No Data	No Data	48	1	0
Target	TBD	TBD	TBD	35	31

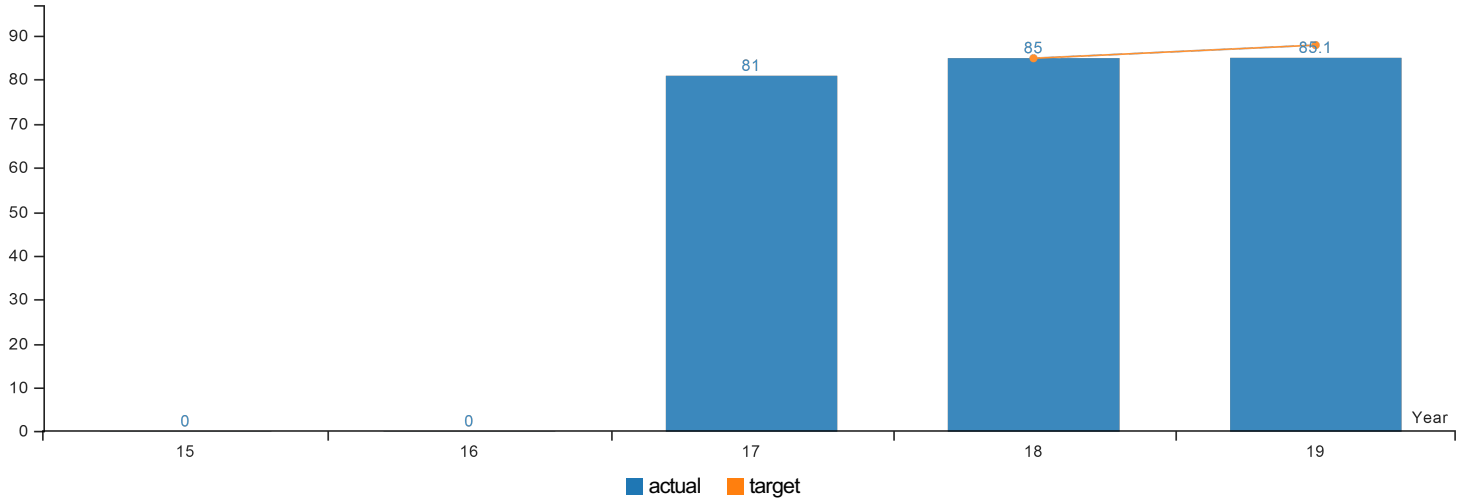
How Are We Doing

Data reflects the median processing time of each monthly median processing time from Oct 18 - Sept 19. The processing time is low because we have an automated eligibility process.

Factors Affecting Results

KPM #33	OHP MEMBERS IN CCOs - Percent of Oregon Health Plan members enrolled in Coordinated Care Organizations.
	Data Collection Period: Jan 01 - Dec 31

** Upward Trend = positive result*



Report Year	2015	2016	2017	2018	2019
OHP MEMBERS IN CCOs					
Actual	No Data	No Data	81%	85%	85.10%
Target	TBD	TBD	TBD	85%	88%

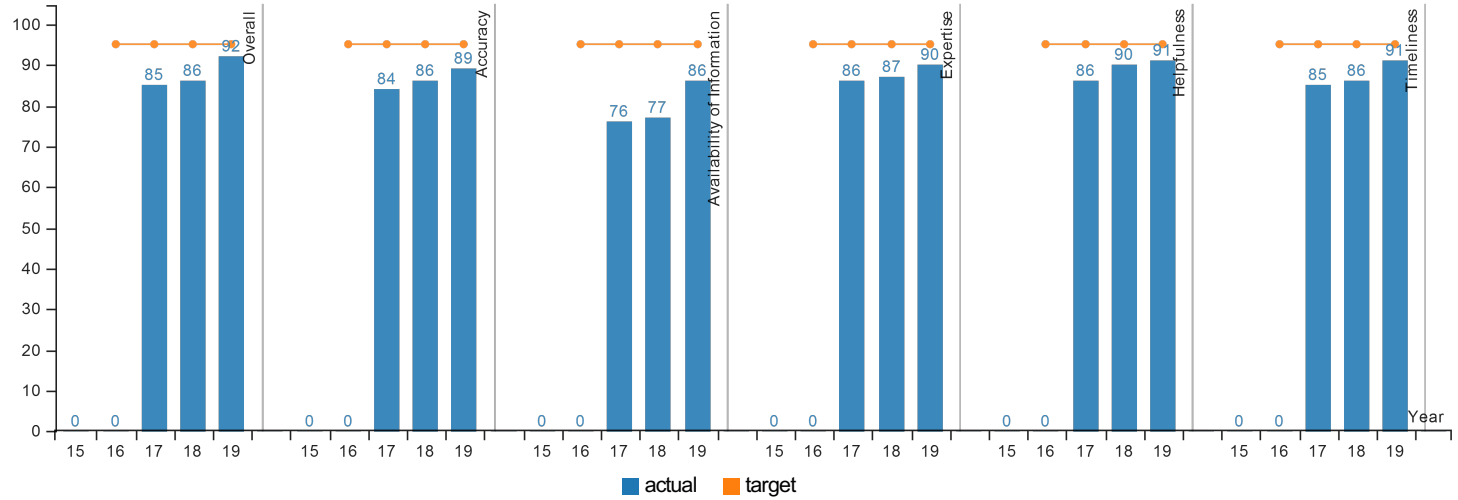
How Are We Doing

In 2018, efforts were put in place to ensure enrollment in CCOs in the shortest timeframe possible. Oregon Health Authority (OHA) updated the eligibility renewal process for Oregon Health Plan (OHP) members to begin federally-mandated automated eligibility verification, in appropriate cases. This streamlined and accurate verification method 1) improved the renewal process for OHP members and 2) reduced the risk members will experience unwarranted disruptions in coverage, care or CCO enrollment.

Factors Affecting Results

Starting in 2019, OHA is implementing program changes that will increase the number of Medicaid eligibles enrolled in CCOs. For example, OHA will automatically enroll duals into CCOs for their physical health care. This process will happen as a regional roll-out, including two pilot regions in January and April of 2019. Duals will have the option, at any time, to opt-out of the CCO for physical health care.

KPM #34	CUSTOMER SERVICE - Percentage of OHA customers rating their satisfaction with the agency's customer service as "good" or "excellent" overall, timeliness, accuracy, helpfulness, expertise, availability of information.
	Data Collection Period: Jan 01 - Dec 31



Report Year	2015	2016	2017	2018	2019
