- **Monkeypox (hMPXV) transmission social card**
[English](#), [Spanish](#), [Arabic](#), [Chuukese](#), [Hmong](#), [Korean](#), [Marshallese](#), [Portuguese](#), [Russian](#), [Simplified Chinese](#), [Somali](#), [Traditional Chinese](#), [Vietnamese](#).

Talking points

Talking points for [new Tableau dashboards on monkeypox data](#):

- OHA rolled out two Tableau dashboards for monkeypox on Wednesday, Oct. 5, 2022 (one on the epi curve and one with a cases by county map).
- The dashboards contain no data that hasn't been reported, but now the data include visualizations to help display trends and geography.
- The two dashboards will be updated weekly on Wednesdays, as these data were before.
- Race, ethnicity, sexual orientation, and gender identity data will remain in tables on our home page for now and will be updated monthly on the first Wednesday.
- Additional dashboards are currently in development for demographics and vaccine uptake.
- [CDC talking points](#)

Additional new resources

- [CDC's monkeypox communication resources](#)
- [Children and youth guidance](#)
- [Guidance for vaccine eligibility screening](#)
- Vaccine eligibility screening card (two-sided, 4x6 printable)
