

Yamhill Community Care

CAHPS® 5.0 Adult Medicaid Summary Report

June 2018

Yamhill Community Care

CAHPS® 5.0 Adult Medicaid Summary Report

June 2018

Introduction. Results from fielding the CAHPS® 5.0 Survey for Yamhill Community Care (YCCO) provide a comprehensive tool for assessing consumers' experiences with the Coordinated Care Organization (CCO). This report is designed to allow the CCO to look at summaries of members' experiences, using two types of presentation. First, this executive summary presents a brief description of the survey methodology; a graphic presentation of key results for rating questions, composites, and Effectiveness of Care Measures; and a sample disposition. Second, member responses are presented by question, including information about the response options used for scoring achievements. Appendices at the end of the report include a copy of the questionnaire and member responses to custom questions.

Assessing consumers' experience in this report is accomplished with the use of achievement scores and composite scores. Member responses to survey questions are summarized as achievement scores. Responses indicating a positive experience are labeled as achievements, and an achievement score is computed equal to the proportion of responses qualifying as achievements. The lower the achievement score, the greater the need for the CCO to improve. Composite scores are built from achievements for groups of survey items that make up broad domains of members' experience: Getting Needed Care, Getting Care Quickly, How Well Doctors Communicate, Customer Service, and Shared Decision Making.

Results. This report summarizes the findings of the adult Medicaid 5.0 CAHPS survey conducted for YCCO. Attempts were made to survey 1,000 member households by mail and telephone during the period January 9, 2018 through April 9, 2018, using a mixed-mode procedure and standard questionnaire with custom questions. The survey procedure and questionnaire were developed jointly by the Agency for Healthcare Research and Quality and the National Committee for Quality Assurance (NCQA).

The survey drew as potential respondents the adult members (aged 18 and over) of YCCO who were continuously enrolled in the CCO for at least 6 months as of November 30, 2017, with no more than one enrollment gap of 45 days or less. From this sample frame, a random sample of 1,000 cases was drawn. The survey was offered in English and Spanish.

Questionnaires were considered complete if respondents did not answer "No" to Q1 and provided valid responses to at least three out of five key questions throughout the questionnaire, as per NCQA's completeness requirements. The questions required for completeness are Q3, Q15, Q24, Q28, and Q35. Complete interviews were obtained from 285 YCCO members, and the response rate was 29.3%.

SUMMARY OF OVERALL RATING QUESTIONS

Four rating questions assess overall consumer satisfaction with health care, personal doctor, specialist seen most often, and health plan. Response options for overall rating questions range from 0 (worst) to 10 (best). In the table below, ratings of "8," "9," or "10" are considered achievements, and the achievement score is presented as the proportion of members whose response was an achievement. Alternate achievement scores are presented as hollow bars, showing only the response options "9" and "10" as achievements.

Note: Hollow portion of bar represents proportions giving a response of 9 or 10.

SUMMARY OF COMPOSITES

A composite score is calculated for each of five domains of member experience: Getting Needed Care, Getting Care Quickly, How Well Doctors Communicate, Customer Service, and Shared Decision Making. The composite scores provide a summary assessment of how the CCO performed across the domain. In the table below, proportions of positive responses are reported as achievement scores. A response of "Yes" is considered an achievement for the Shared Decision Making composite. For all other composites, responses of "Usually" or "Always" are considered achievements.

SUMMARY OF EFFECTIVENESS OF CARE MEASURES

Two Effectiveness of Care Measures are presented below. The Medical Assistance with Smoking and Tobacco Use Cessation measure typically uses a rolling-average methodology, where scores are computed using two years of response data. For the purpose of this report, the measure is presented as a single-year score, rather than rolling averages.

The Medical Assistance with Smoking Cessation and Tobacco Use Cessation measure is composed of three questions. Scores represent the proportion of adult members whose provider advised them to (1) quit smoking or using tobacco; (2) recommended or discussed medication to assist with quitting smoking or using tobacco; (3) discussed or provided methods and strategies other than medication to assist with quitting smoking or using tobacco. For each question, a response of "Sometimes", "Usually", or "Always" is considered an achievement.

The Flu Vaccinations for Adults Ages 18-64 measure is based on a single question about getting a flu shot or flu spray. The score represents the proportion of members age 18-64 who received an influenza vaccination since July 1 of the measurement year.

Sample Disposition

	YCCO 2018
First mailing - sent	1000
*First mailing - usable survey returned	161
Second mailing - sent	843
*Second mailing - usable survey returned	67
