General information

This document outlines the Oregon Health Authority's (OHA) recommended language for hospital notifications related to hospital financial assistance in accordance with HB 3320 (2023) codified as ORS 442.615.

All hospital communications must comply with Oregon Administrative Rules 409-023-0120-0125. Notifications must be delivered by letter, email, message or notification on an online patient portal (if the patient is a registered user), a distinct notice on the billing statement, an insert accompanying a billing statement, or an in-person acknowledgement signed by the patient.

In addition, the communication must be written in plain language. To be plain language, a communication should substantially align to the following:

1. Uses short sentences and paragraphs.
2. Uses everyday commonly understood words.
3. Uses simple and active verb forms.
4. Uses readable fonts at least 12 points in size.
5. Written and organized in a clear and coherent manner.
6. Is designed to facilitate ease of reading and comprehension.

All notifications should contain four pieces of information:

1. What the notice is for (to share the results of the prescreening or financial assistance application).
2. The results of the prescreening or financial assistance application and impact on the patient's bill.
3. How the patient may apply for financial assistance, ask for an appeal, or get more information if needed.
4. The department or individual the patient may contact, as well as direct contact information (email addresses and phone numbers), for further questions. Do not include generic email addresses or phone numbers.

OHA recommends that hospitals use bold font or underline font to draw attention to the most important details of the notice. Do not use italics to draw attention; italicized words may be hard for some people to read.

The notice should include any relevant web links, email addresses or other means by which a patient may find more information or access a financial assistance application.

Recommended language for presumptive eligibility screenings
