

Health Care Cost Growth Trends in Oregon, 2022-2023

Addendum to 2025 Sustainable Health Care Cost Growth Target Annual Report
Provider Organization Cost Growth

October 2025

OREGON
HEALTH
AUTHORITY

HEALTH CARE
COST GROWTH
TARGET 

Introduction

Each year, Oregon’s Sustainable Health Care Cost Growth Target Program measures, analyzes, and publicly reports on total health care spending and spending growth.

In June 2025, the Oregon Health Authority published the [2025 Sustainable Health Care Cost Growth Target Annual Report](#), presenting data on health care spending and health care cost growth in Oregon between 2022 and 2023.

The 2025 Annual Report included statewide and insurance market level (e.g. Commercial, Medicare, Medicaid) cost growth, as well as cost growth for health plans subject to the cost growth target program.

The 2025 Annual Report did not include data for provider organizations subject to the cost growth target program, as complete provider organization data was delayed due to validation challenges.

This Addendum accompanies the 2025 Annual Report and presents 2022-2023 cost growth relative to the cost growth target for provider organizations.

Visit the [Cost Growth Target website](#) for more information.

Table of Contents

Introduction	2
Table of Contents	2
Key Findings	3
Background Information	6
Commercial Market, 2022-2023	9
Medicare Advantage Market, 2022-2023	13
Medicaid Market, 2022-2023	14
Appendix: Historical Cost Growth Performance	20

Key Findings

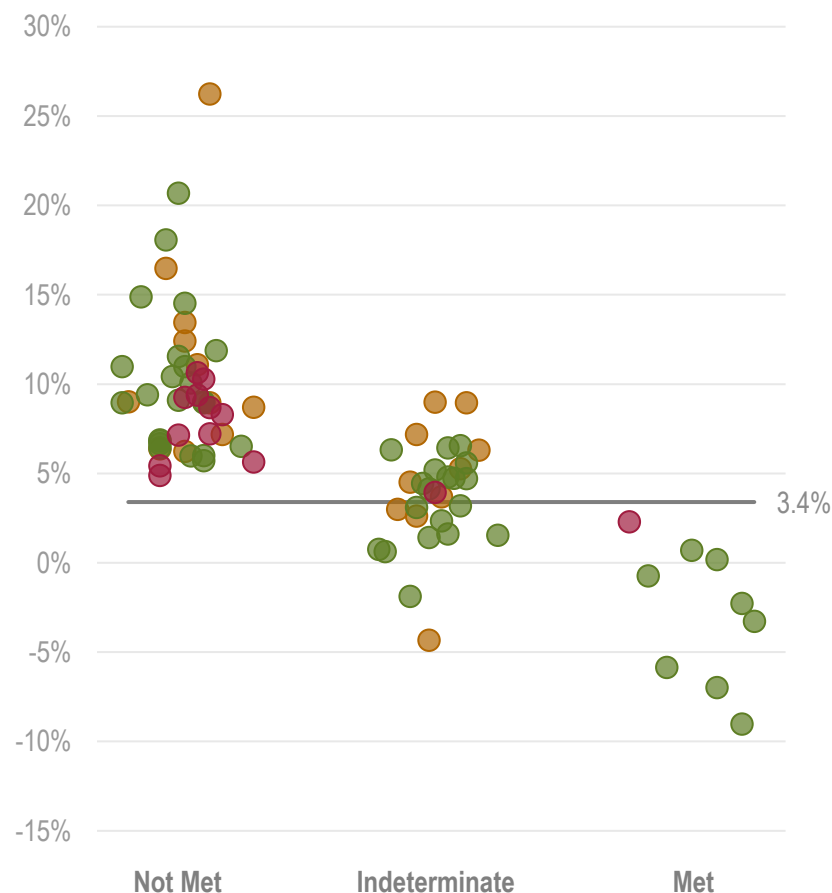

Fifty-three provider organizations are included in cost growth target reporting for 2022-2023. Of those:

- 21 are included for the Commercial market – none met the target. Commercial cost growth across all provider organizations was 6.3%.
- 13 are included for the Medicare Advantage market – one met the target. Medicare Advantage cost growth across all provider organizations was 5.4%.
- 50 are included for the Medicaid market – eight met the target. Medicaid cost growth across all provider organizations was 4.5%.

Indeterminate means that OHA could not determine, with statistical certainty, whether the provider organization had met the target.

Market	# of Provider Orgs	# of Provider Orgs Met Target	2022-2023 Cost Growth at Provider Org Level
Commercial	21	0	6.3%
Medicare Advantage	13	1	5.4%
Medicaid	50	8	4.5%

Distribution of provider organization performance relative to the cost growth target for **Commercial**, **Medicare Advantage**, and **Medicaid** markets, 2022-2023.

Which provider organizations met the cost growth target in 2022-2023?

Background Information

Which provider organizations are included in reporting?

Provider organizations are included in the Cost Growth Target Program if they meet the following criteria:

1. Include primary care providers who direct a patient's care (and can influence where a patient receives care)
2. Have sufficient patient volume to calculate accurate and reliable cost, defined as at least 10,000 attributed patients across all markets or at least 5,000 attributed patients in any one market.

Number of provider organizations meeting the threshold for inclusion in 2022-2023, by market

Note: provider organizations that include hospitals are identified by an icon next to their name on any charts.

Grouping Provider Organizations

To avoid inaccurate comparisons, provider organizations are grouped by insurance market, attributed patient volume, and organization type.

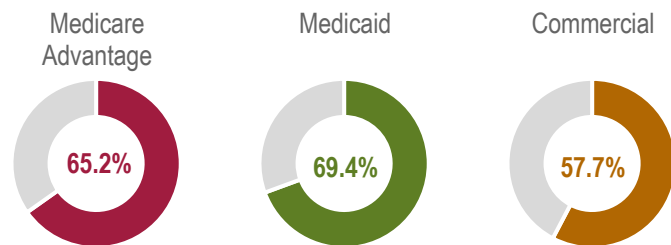

Market	Provider Organization Group	#
Commercial	Large health systems and group practices (>20,000 attributed patients)	7
	Mid-sized health systems & group practices (10,000 to 20,000 attributed patients)	7
	Smaller health systems & group practices (<10,000 attributed patients)	3
	Pediatric practices	4
Medicare Advantage	All	13
Medicaid	Federally qualified health centers (FQHCs)	15
	Large health systems & group practices (>20,000 attributed patients)	7
	Mid-sized health systems & group practices (10,000 to 20,000 attributed patients)	9
	Smaller health systems & group practices (<10,000 attributed patients)	11
	Pediatric practices	8

About the data

When payers submit data to the cost growth target program, they attribute their members to provider organizations based on where those members receive primary care. Payers use one of these three approaches to attribute members, listed in hierarchical order:

1. Member selection: Members who were required to select a primary care provider / home by plan design.
2. Contract arrangement: Members not included in #1 who were attributed to a primary care provider / home during the measurement period pursuant to a contract between the payer and provider.
3. Utilization: Members not included in #1 or #2 who can be attributed to a primary care provider / home based on the member's utilization, using the payer's own attribution methodology.

Not all members are attributed to provider organizations. In 2023, about 63% of all individuals were attributed to provider organizations; the graphs below show the percent of members attributed in each market.

Only provider organizations with at least 60,000 attributed member months (or 5,000 patients) in each measurement year are included in public cost growth target reporting.

Due to issues in provider attribution identified during the data validation process, provider organization cost growth does not reflect any Cigna members or Cigna payments to provider organizations for the 2022-2023 measurement period.

Provider organization cost growth is calculated with exclusions relative to calculations of Total Medical Expenses (TME) statewide.

- The Commercial market only includes full claims; partial claims have been excluded.
- Dual eligible members are excluded from the Medicaid and Medicare Advantage markets.

Pharmacy rebate data are not available at the provider organization level, so all data included in this report are gross of pharmacy rebates, whereas statewide TME is reported net of pharmacy rebates.

See Appendix A of the [2025 CGT Annual Report](#) for additional detail on the methodology of calculating cost growth.

How to read the charts in this report

This report presents information about individual provider organization cost growth in relation to the 3.4% cost growth target.

In the example chart, the y-axis lists provider organizations that are accountable for meeting the cost growth target. Dots represent 2022-2032 cost growth for the provider organizations listed. Bars represent confidence intervals. Positive percentages show how much health care spending increased, while negative cost growth percentages mean that health care spending went down.

Dots and bars that fall left of the target line have met the target. Dots and bars to the right of the line have not met the target. If bars cross the target line, performance is indeterminate (i.e., the provider organization did not meet or exceed the target with statistical confidence).

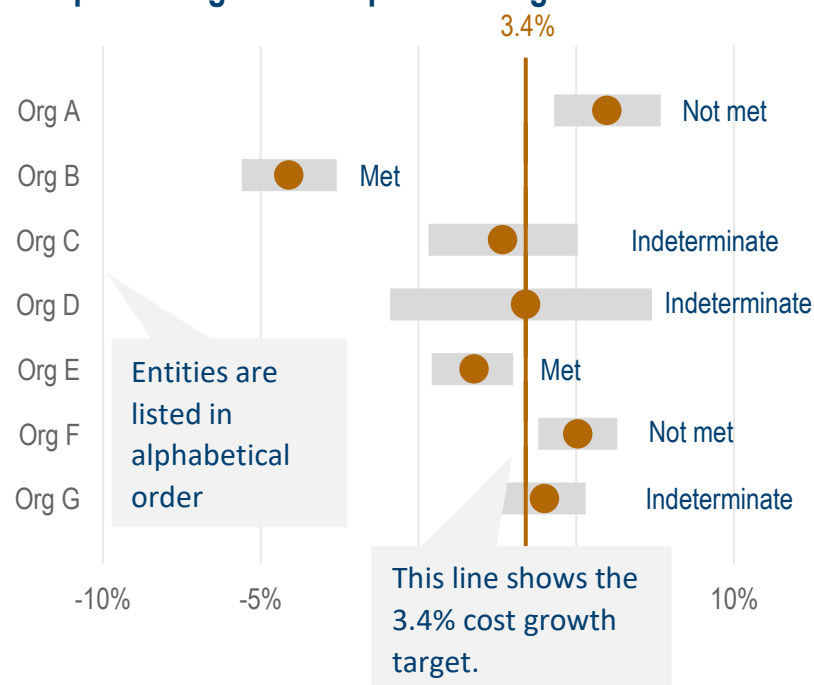

How to interpret confidence intervals

Confidence intervals help ensure that data are accurate and reliable by giving a range of plausible values. In calculating cost growth, OHA uses a 95% confidence interval, which means that we are 95% confident that an organization's cost growth value falls within that range.

The gray bars in the chart show the confidence interval range, with longer bars indicating a greater range and smaller bars indicating a smaller range. Generally, organizations with a larger number of members or patients will have a shorter confidence interval bar, while a company with a smaller number of members or patients will have a longer bar.

Payers and provider organizations must exceed the cost growth target with statistical confidence before they could potentially be held accountable. For any entities where cost growth is “indeterminate” – no accountability would apply.

Example: cost growth for provider organizations

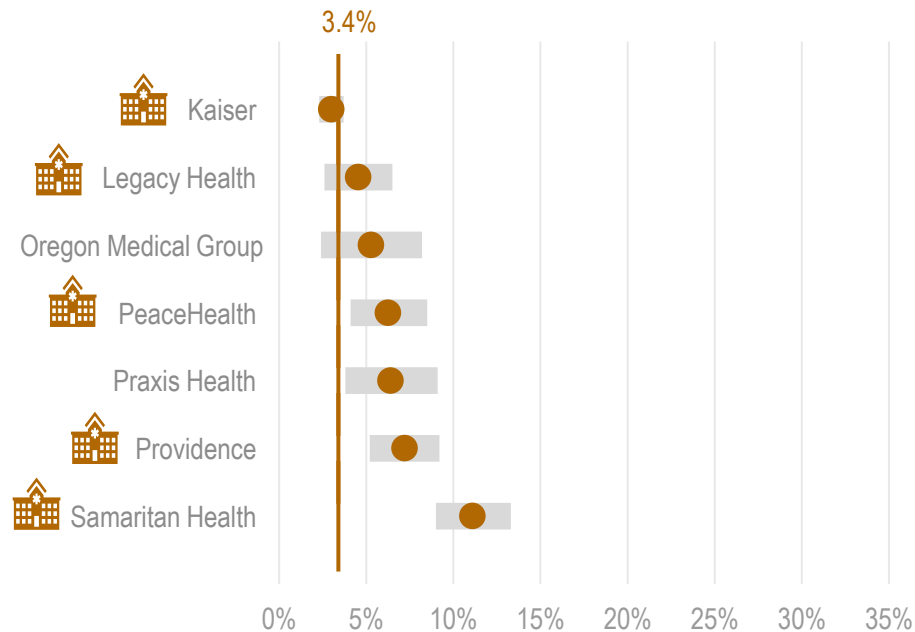

Commercial Market, 2022-2023

Large Provider Organizations

This group includes seven provider organizations, each with more than 20,000 attributed patients with Commercial health insurance coverage. Cost growth for this group ranged from 3.0% to 11.1%. No provider organizations met the target with statistical confidence.

2022-2023 Commercial cost growth for large provider organizations

More than 20,000 attributed patients in 2023

Provider Organization	Target Performance	2022-23 Commercial Cost Growth
Kaiser	Indeterminate	3.0%
Legacy Health	Indeterminate	4.5%
Oregon Medical Group	Indeterminate	5.3%
PeaceHealth	Not Met	6.2%
Praxis Health	Not Met	6.4%
Providence	Not Met	7.2%
Samaritan Health	Not Met	11.1%

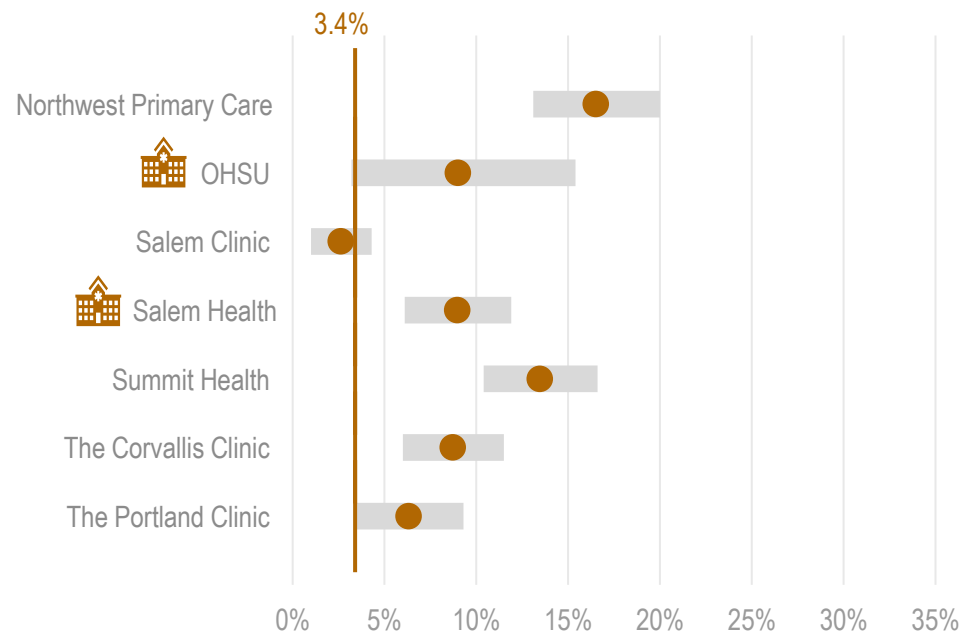

Commercial Market, 2022-2023

Mid-Sized Provider Organizations

This group includes seven provider organizations, each had between 10,000 and 20,000 attributed patients with Commercial coverage. Cost growth for this group ranged from 2.6% to 16.5%. No provider organizations met the target with statistical confidence.

2022-2023 Commercial cost growth for mid-sized provider organizations

10,000 to 20,000 attributed patients in 2023

Provider Organization	Target Performance	2022-23 Commercial Cost Growth
Northwest Primary Care	Not Met	16.5%
OHSU	Indeterminate	9.0%
Salem Clinic	Indeterminate	2.6%
Salem Health	Not Met	9.0%
Summit Health	Not Met	13.5%
The Corvallis Clinic	Not Met	8.7%
The Portland Clinic	Indeterminate	6.3%

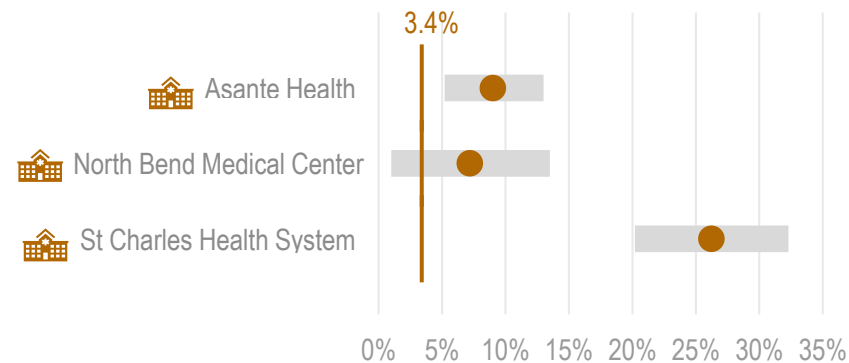

Commercial Market, 2022-2023

Smaller Provider Organizations

This group includes three provider organizations, each with fewer than 10,000 attributed patients with Commercial coverage. Cost growth for this group ranged from 7.2% to 26.3%. No provider organizations met the target with statistical confidence.

2022-2023 Commercial cost growth for smaller provider organizations

Fewer than 10,000 attributed patients in 2023

Provider Organization	Target Performance	2022-23 Commercial Cost Growth
Asante	Not Met	9.0%
North Bend Medical Center	Indeterminate	7.2%
St Charles Health System	Not Met	26.3%

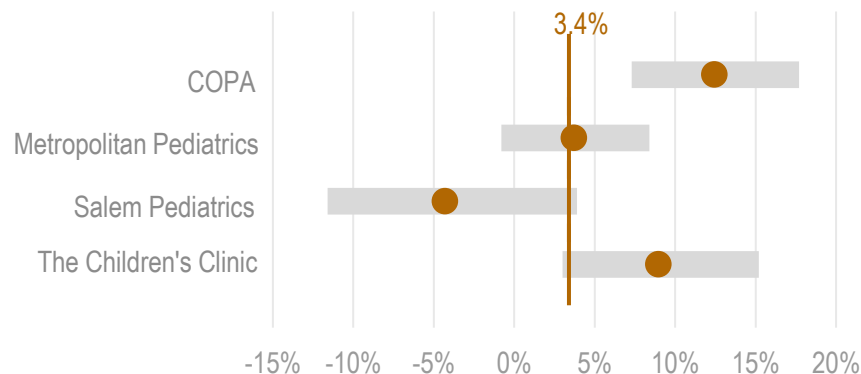

Commercial Market, 2022-2023

Pediatric Provider Organizations

This group includes four pediatric practices. Cost growth for this group ranged from -4.3% to 12.4%. No pediatric provider organizations met the target with statistical confidence.

OHA understands that pediatric providers play a critical role in managing health care costs by focusing on preventative care and early intervention. By addressing health issues in children before they escalate, pediatric providers help mitigate the need for costly treatments later in life. The emphasis on family-centered care may ultimately reduce health care expenditures.

2022-2023 Commercial cost growth for pediatric provider organizations

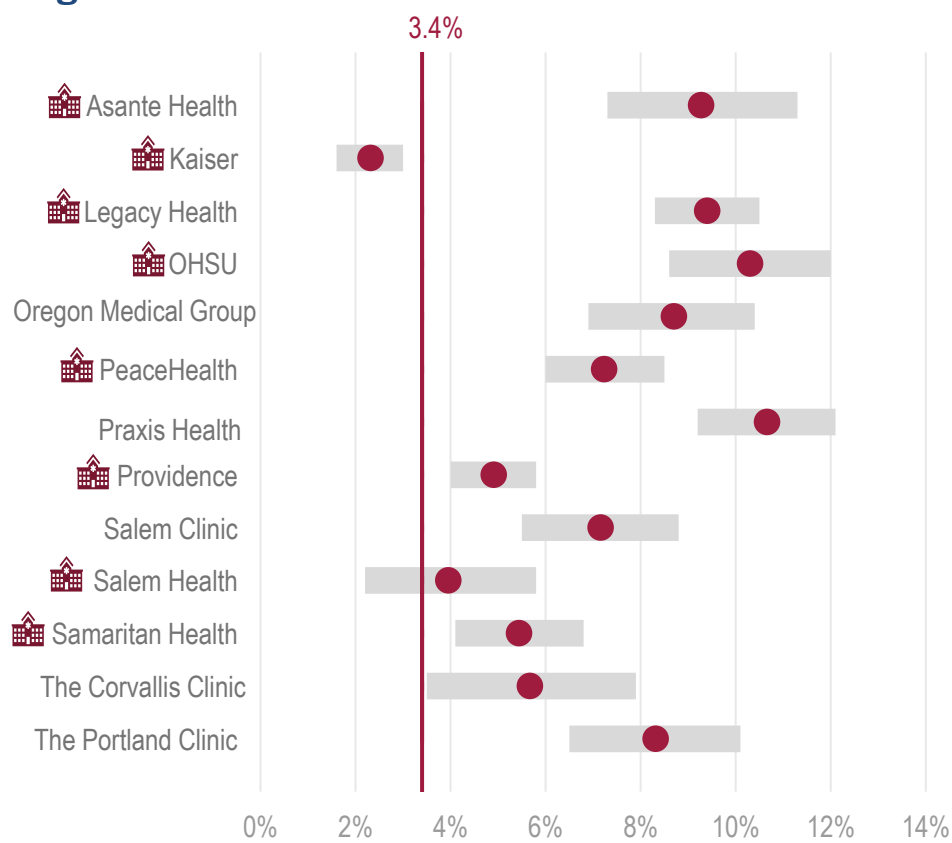

Provider Organization	Target Performance	2022-23 Commercial Cost Growth
COPA	Not Met	12.4%
Metropolitan Pediatrics	Indeterminate	3.7%
Salem Pediatrics	Indeterminate	-4.3%
The Children's Clinic	Indeterminate	9.0%

Medicare Advantage Market, 2022-2023

All Provider Organizations

This group includes all 13 provider organizations that had attributed patients with Medicare Advantage insurance coverage in the measurement period. Cost growth for this group ranged from 2.3% to 10.7%. One provider organization met the target with statistical confidence.

2022-2023 Medicare Advantage cost growth for provider organizations

Provider Organization	Target Performance	2022-23 Medicare Advantage Cost Growth
Asante	Not Met	9.3%
Kaiser	Met	2.3%
Legacy	Not Met	9.4%

Oregon Medical Group	Not Met	8.7%
PeaceHealth	Not Met	7.2%
Praxis Health	Not Met	10.7%
Providence	Not Met	4.9%
Salem Clinic	Not Met	7.2%
Salem Health	Indeterminate	4.0%
Samaritan Health	Not Met	5.4%
The Corvallis Clinic	Not Met	5.7%
The Portland Clinic	Not Met	8.3%

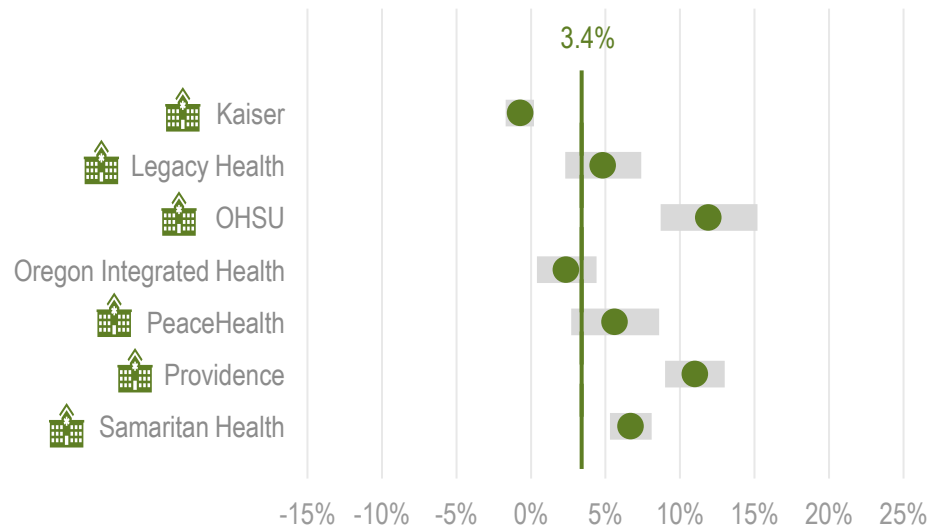

Medicaid Market, 2022-2023

Large Provider Organizations

This group includes 7 provider organizations, each with more than 20,000 attributed patients with Medicaid coverage. Cost growth for this group ranged from -0.7% to 11.9%. One provider organization met the target with statistical confidence.

2022-2023 Medicaid cost growth for large provider organizations

More than 20,000 attributed patients in 2023

Provider Organization	Target Performance	2022-23 Medicaid Cost Growth
Kaiser	Met	-0.7%
Legacy Health	Indeterminate	4.8%
OHSU	Not Met	11.9%
Oregon Integrated Health	Indeterminate	2.4%
PeaceHealth	Indeterminate	5.6%
Providence	Not Met	11.0%
Samaritan Health	Not Met	6.7%

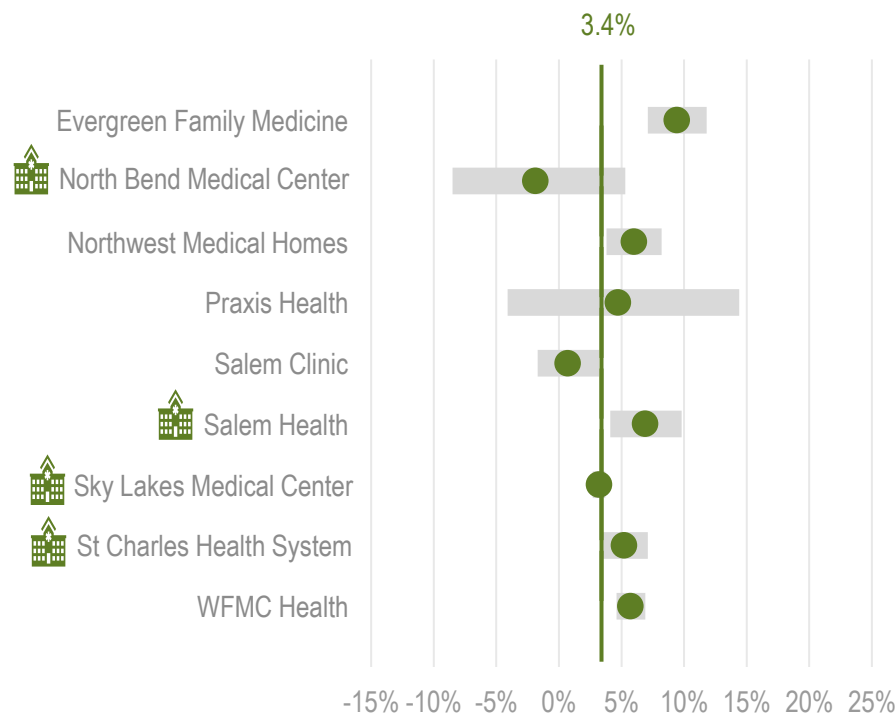

Medicaid Market, 2022-2023

Mid-Sized Provider Organizations

This group includes 9 provider organizations, each with 10,000 to 20,000 attributed patients with Medicaid coverage. Cost growth for this group ranged from -1.9% to 9.4%. One provider organization met the target with statistical confidence.

2022-2023 Medicaid cost growth for mid-sized provider organizations

10,000 to 20,000 attributed patients in 2023

Provider Organization	Target Performance	2022-23 Medicaid Cost Growth
Evergreen Family Medicine	Not Met	9.4%
North Bend Medical Center	Indeterminate	-1.9%
Northwest Medical Homes	Not Met	6.0%
Praxis Health	Indeterminate	4.7%
Salem Clinic	Met	0.7%
Salem Health	Not Met	6.9%
Sky Lakes Medical Center	Indeterminate	3.2%
St Charles Health System	Indeterminate	5.2%
WFMC Health	Not Met	5.7%

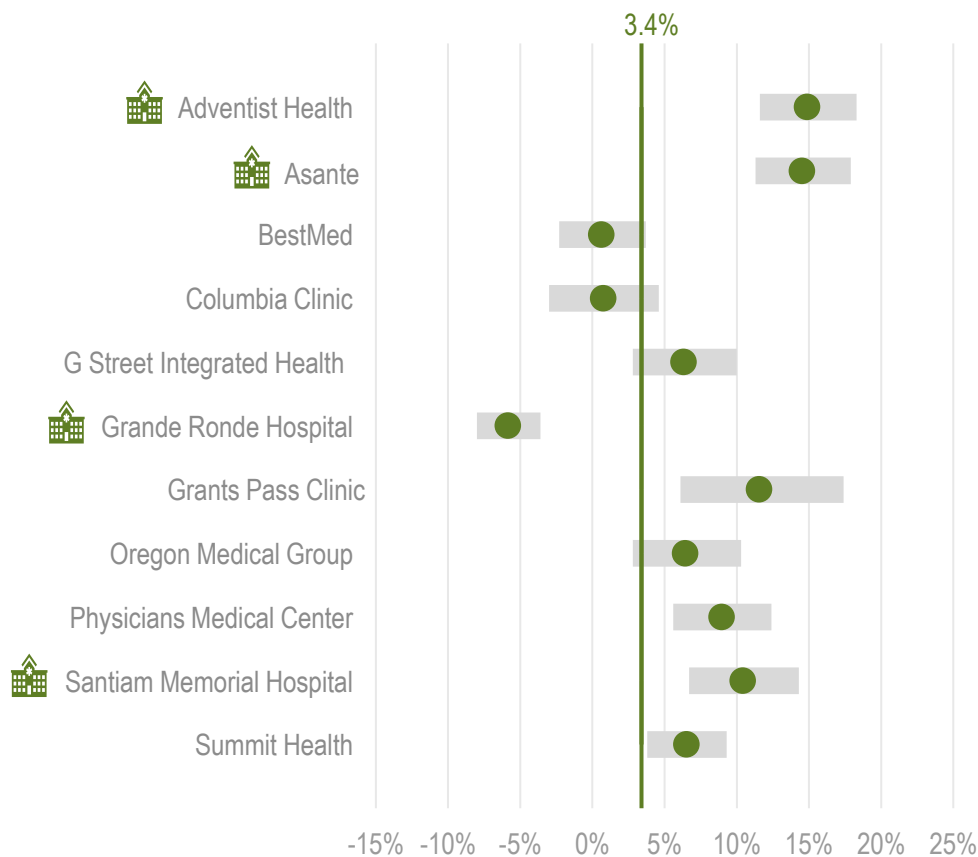

Medicaid Market, 2022-2023

Smaller Provider Organizations

This group includes 11 provider organizations, each with fewer than 10,000 attributed patients with Medicaid coverage. Cost growth for this group ranged from -5.8% to 14.9%. One provider organization met the target with statistical confidence.

2022-2023 Medicaid cost growth for small provider organizations

Fewer than 10,000 attributed patients in 2023

Provider Organization	Target Performance	2022-23 Medicaid Cost Growth
Adventist Health	Not Met	14.9%
Asante	Not Met	14.5%
BestMed	Indeterminate	0.6%
Columbia Clinic	Indeterminate	0.8%
G Street Integrated Health	Indeterminate	6.3%
Grande Ronde Hospital	Met	-5.8%
Grants Pass Clinic	Not Met	11.6%
Oregon Medical Group	Indeterminate	6.4%
Physicians Medical Center	Not Met	9.0%
Santiam Memorial Hospital	Not Met	10.4%
Summit Health	Not Met	6.5%

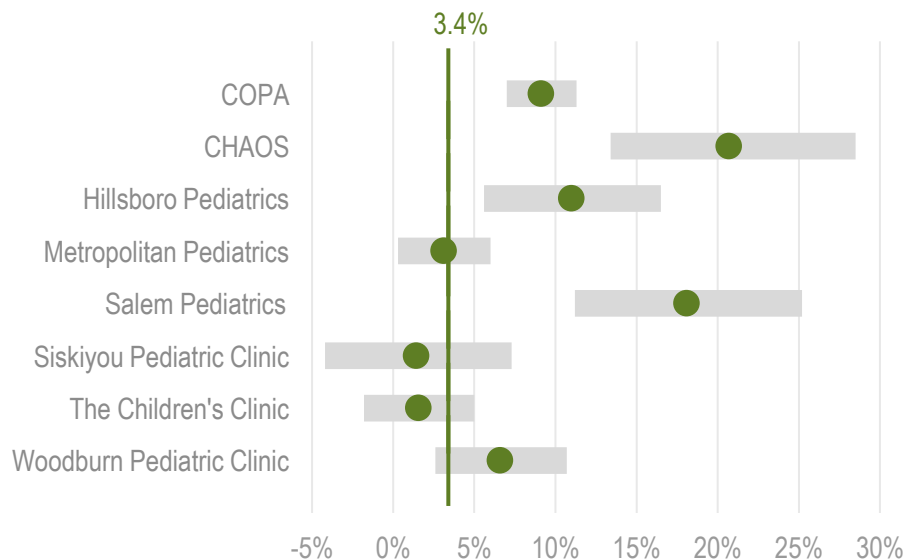

Medicaid Market, 2022-2023

Pediatric Provider Organizations

Eight pediatric provider organizations had attributed patients with Medicaid coverage. Cost growth for this group ranged from 1.4% to 20.7%. No provider organizations met the target with statistical confidence.

OHA understands that pediatric providers play a critical role in managing health care costs by focusing on preventative care and early intervention. By addressing health issues in children before they escalate, pediatric providers help mitigate the need for costly treatments later in life. Medicaid pediatric provider organizations play a crucial role in providing health care access and services to traditionally underserved youth and this critical function is key to understanding and interpreting cost growth.

2022-2023 Medicaid cost growth for pediatric provider organizations

Provider Organization	Target Performance	2022-23 Medicaid Cost Growth

Salem Pediatrics	Not Met	18.1%
Siskiyou Pediatric Clinic	Indeterminate	1.4%
The Children's Clinic	Indeterminate	1.6%
Woodburn Pediatrics	Indeterminate	6.6%

Medicaid Market, 2022-2023

Federally Qualified Health Centers

A Federally Qualified Health Center (FQHC), also known as a Community Health Center, is a primary care center that is community-based and patient-directed. By mission and design, FQHCs exist to serve those who have limited access to healthcare and welcome low-income individuals, the uninsured, and the underinsured.

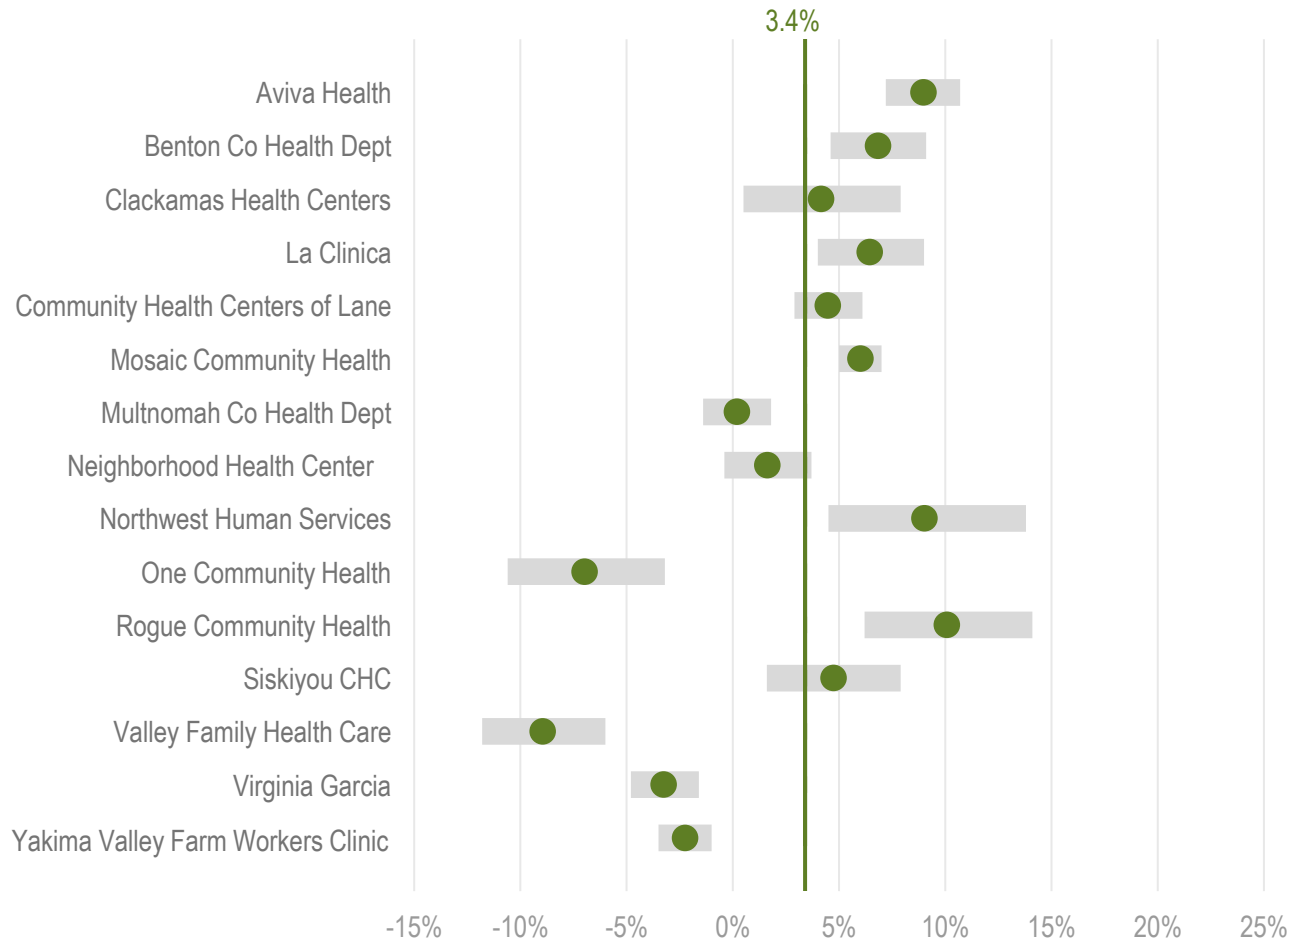

FQHCs play a crucial role in providing health care access and services to the most vulnerable populations across the state and this critical function is key to understanding and interpreting their cost growth.

While FQHCs may exceed the cost growth target with statistical certainty in some years, their cost growth is almost certainly for an acceptable reason.

The FQHC group includes 15 provider organizations with attributed patients with Medicaid coverage. Cost growth ranged from -8.9% to 10.1%. Five FQHCs met the cost growth target with statistical confidence.

Provider Organization	Target Performance	2021-22 Medicaid Cost Growth

2022-2023 Medicaid cost growth for Federally Qualified Health Centers

Appendix: Historical Cost Growth Performance

Since implementing the Cost Growth Target Program, payers and provider organizations have encouraged OHA to consider cost growth in the context of a wider historical trend. OHA acknowledges the value of multi-year analysis; a payer or provider organization may have cost growth below the target in one measurement period and exceed the target in the next period. The relationship of annual growth from one period to another was especially clear during the COVID-19 pandemic, which saw steep drops in spending from 2019 to 2020 and rebounding growth from 2020 to 2021 and to a certain extent from 2021 to 2022.

The Cost Growth Target Program has flexibility to consider multi-year trends when determining accountability. Before putting a payer or provider organization on a Performance Improvement Plan (PIP) when their cost growth exceeds the target, OHA and the entity discuss whether cost growth was due to an acceptable reason. If growth was low one year and above the target the next year for an acceptable reason, OHA will determine the cost growth reasonable, and the payer or provider organization would not be subject to a PIP. In designing the program, the Cost Growth Target Implementation Committee also recommended that financial penalties would only be applicable if a payer or provider organization exceeded the cost growth target in three out of five years without an acceptable reason, leaving room for some variation in growth from period to period.

Although cost growth during 2022-2023 is the focus of this report, OHA is committed to explaining and contextualizing payer and provider organization cost growth trends. The tables in this appendix provide an easy reference for each provider organization's cost growth over the most recent two years of reporting. Note some provider organizations did not have sufficient attributed members to be included in both the 2021-2022 and 2022-2023 measurement periods
