

Message to Oregon Health Authority :

As a voting Oregon resident, I'm writing to strongly urge you to make the closure of the Oregon National Primate Research Center a condition of Oregon Health & Science University's \$8 billion merger with Legacy Health.

The center, which imprisons more than 5,000 monkeys, has a record of serious animal welfare violations going back decades, including citations for inadequate veterinary care and improper handling of monkeys leading to death. It has not produced the advances in medical science it has promised and has failed to help humans. Records show that monkeys imprisoned at the center have carried zoonotic pathogens, including the bacteria that cause tuberculosis and a form of diphtheria, which are potentially dangerous to the entire community.

Please require the closure of this cruel and pointless primate center as a condition of the merger's approval.

Thank you for your time and attention.
