Potential Operational Synergies

March 2026

PROJECT HAWK – STRICTLY CONFIDENTIAL

Potential Operational Synergies

Deepens combined entity's relationships with health systems as an integrated provider of critical infrastructural services (transportation, tech enabled staffing support, monitoring) and **diversifies call points within the health systems** to find avenues to other adjacent services

Ability to leverage SteadyMD's expansive network of clinical telemedicine providers on a fractional basis across Hicuity's Tele-ICU and Virtual Sitter teams, enabling margin improvement

Improve care coordination and operational efficiency by combining virtual nursing / monitoring with in-home paramedic services under one organization

Create a natural cross-sell along a broader range of patient acuity: Hicuity monitoring escalates patients to SteadyMD providers and DocGo in-home visits; SteadyMD providers and DocGo in-home visits place patients under Hicuity monitoring
