

Oregon Status Report & Next Steps

Stakeholder Engagement Event

July 23rd, 2009

The Road so far: HISPC

Health Information Security and Privacy Collaborative

- Multi-phase project to address privacy and security concerns related to the exchange of electronic health information
 - Phase I: Facilitated stakeholder engagement
 - Phase II: Produced documentary on privacy, security and the uses of health information
 - Phase III: Participated in multi-state Consumer Education and Engagement Collaborative to develop consumer education toolkit
 - Challenge Phase: Outreach to consumer and provider organizations to disseminate education toolkits

Road so Far: Multitude of Activity around the State

Early adopters

- Individual practices adopting Electronic Health Record systems
- Individual health systems connecting their facilities and providers
- Individual regions working together
- Oregon Health Information Network
- Accumetra & IPAs' project

Road so far: HIIAC

Health Information Infrastructure Advisory Council

- Executive Order by the Governor in 2008
- Developed initial recommendations for the Oregon Health Fund Board

Oregon Health Fund Board

“Triple Aim” towards a Healthy Oregon

- Healthy population
- Extraordinary patient care for everyone
- Reasonable costs shared equitably

Health information technology is a critical tool in achieving these goals

Implementing the Vision: HB 2009

Health Information Technology Oversight Council (HITOCH)

- Established within the Oregon Health Authority to achieve system transformation
- Set goals and shepherd Oregon's efforts for statewide health information exchange
- Maximize Federal ARRA (HITECH) dollars to come into the state
- Transitioning from the HIIAC

How far along the road are we?

Environmental Scan of Oregon's HIT readiness is underway:

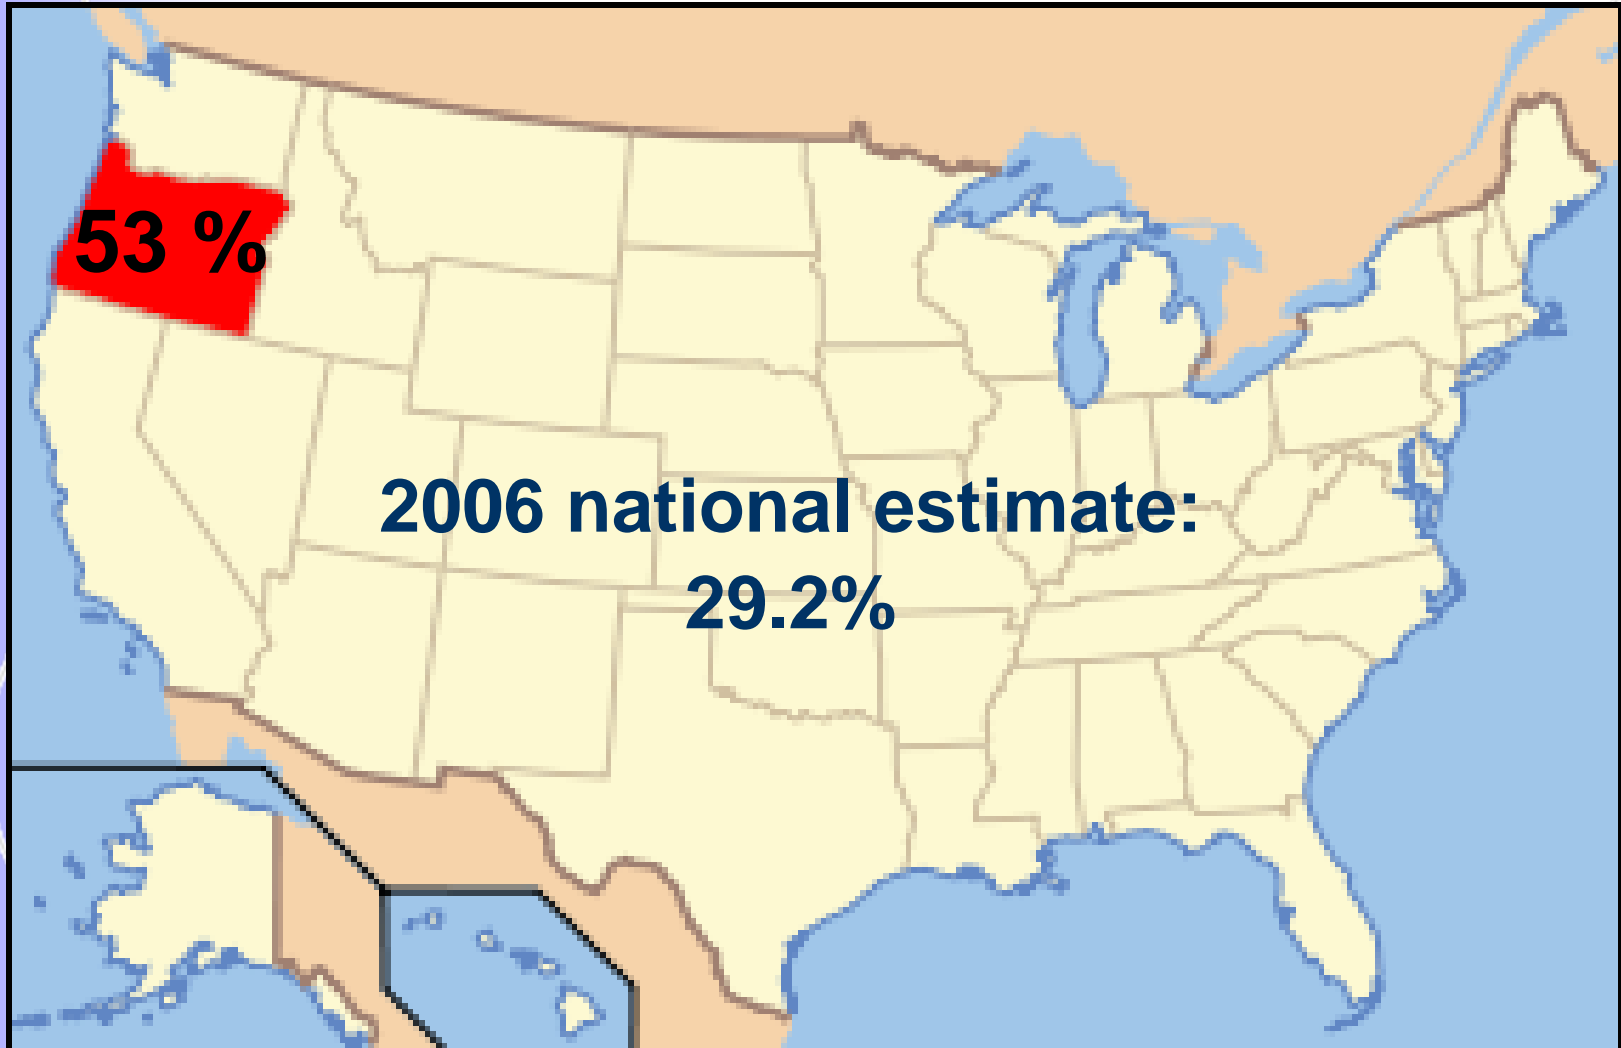

- EHR survey of clinics/providers
- Hospital HIT survey
- Health Plan and IPA surveys
- DHS internal scan of HIT
- Focused interviews to augment the surveys' information
- Division of Medical Assistance Programs Physician Workforce Survey 2009 (to estimate Medicare/Medicaid mix)

Results to be finalized by end of summer

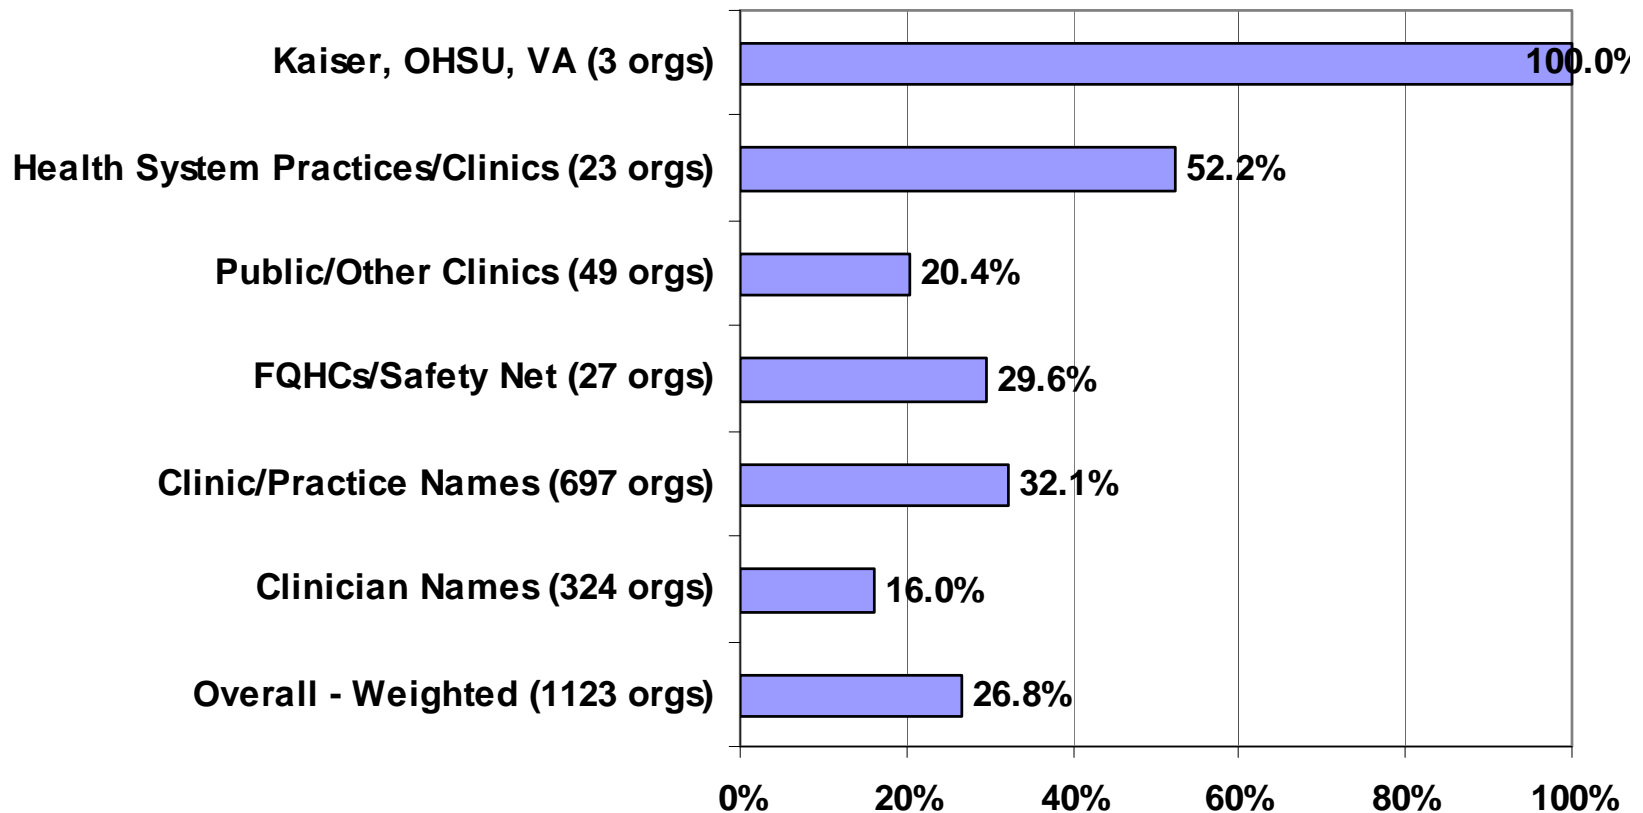

Electronic Health Record Survey, 2006

- Collaboration between the Office for Oregon Health Policy & Research and the Oregon Healthcare Quality Corporation
- Survey fielded in August 2006
- Sent to over 2,400 Oregon ambulatory clinics and physician practices
- 58.4% of clinics/practices responded

Oregon's clinician EHR adoption rate was well above the national rate in 2006

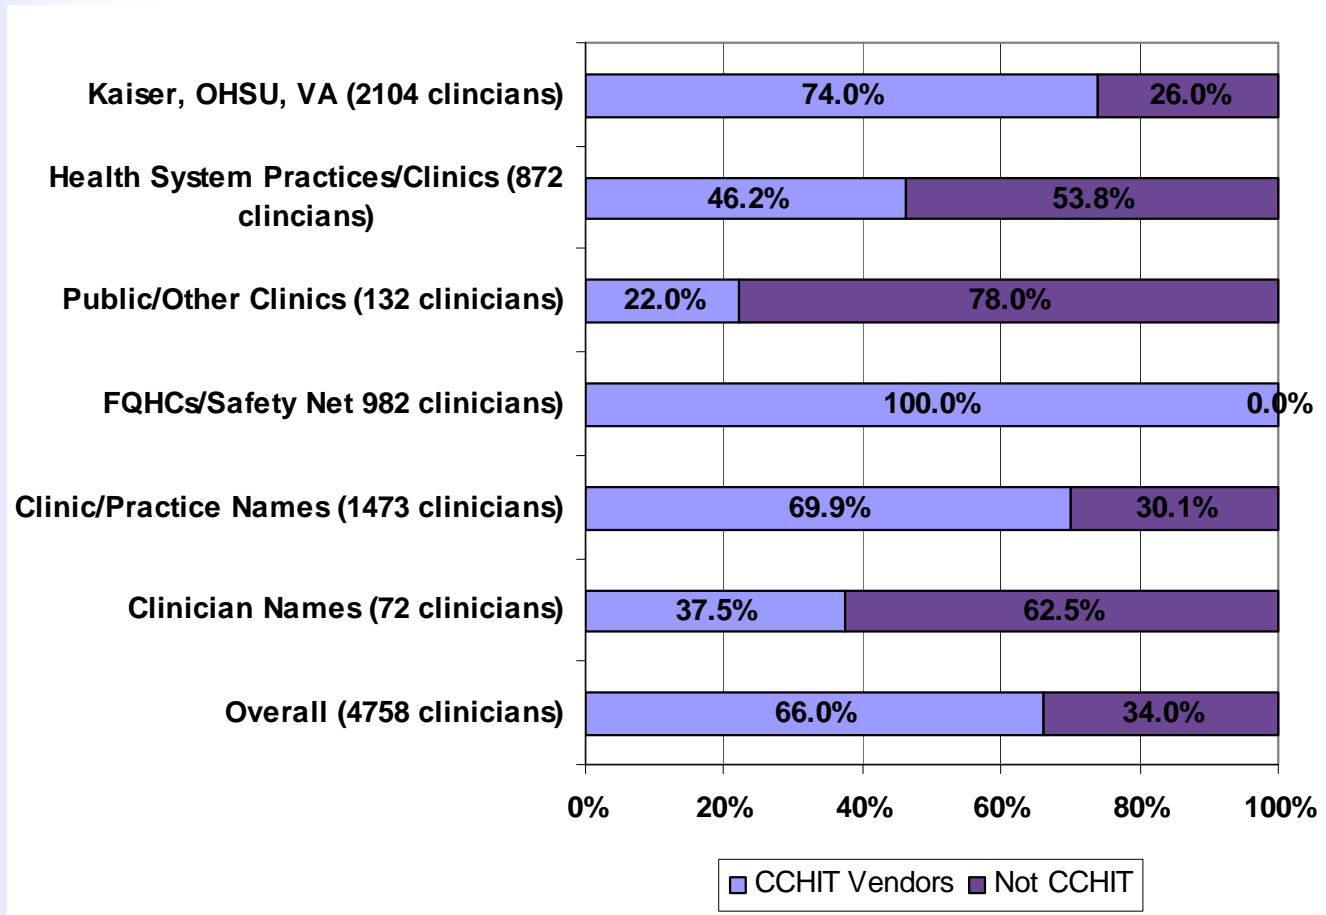

EHR Adoption by Practice Type-Organizations, 2006

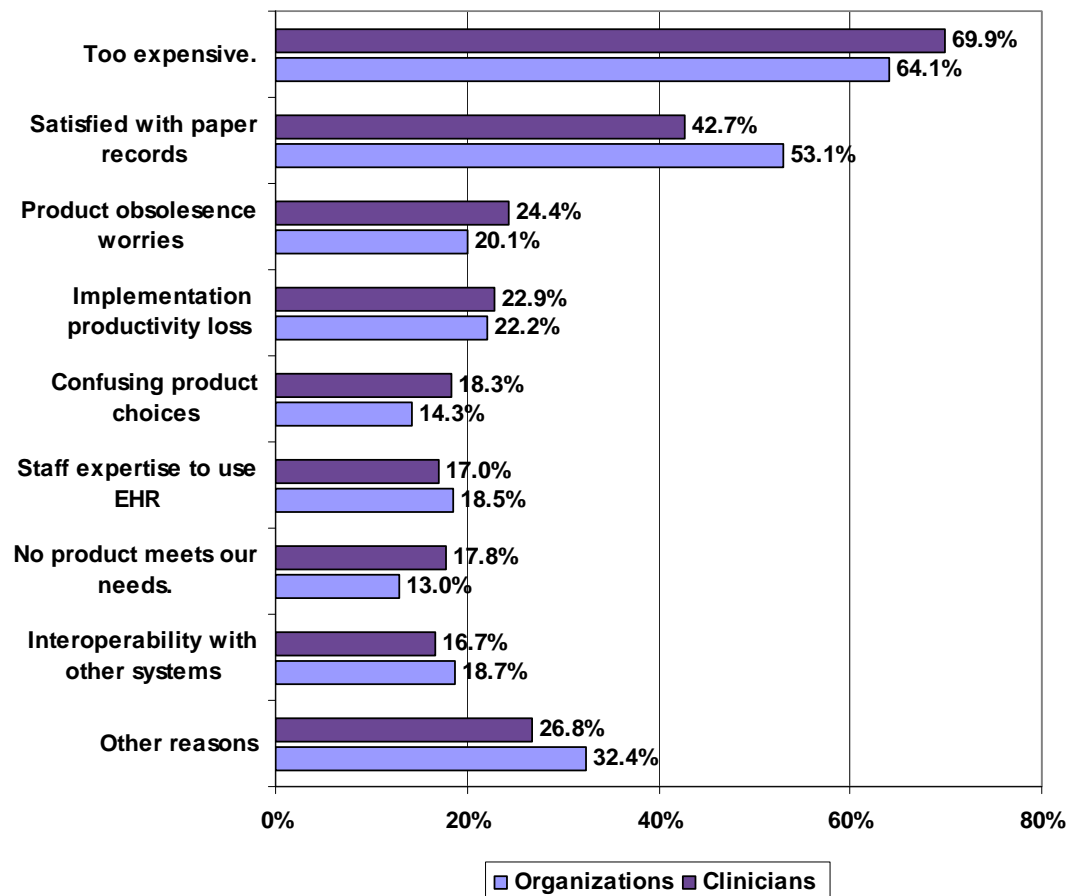

EHR Adoption by Practice Size- Organizations, 2006

EHR Products with CCHIT Certified Vendors-Clinicians, 2006

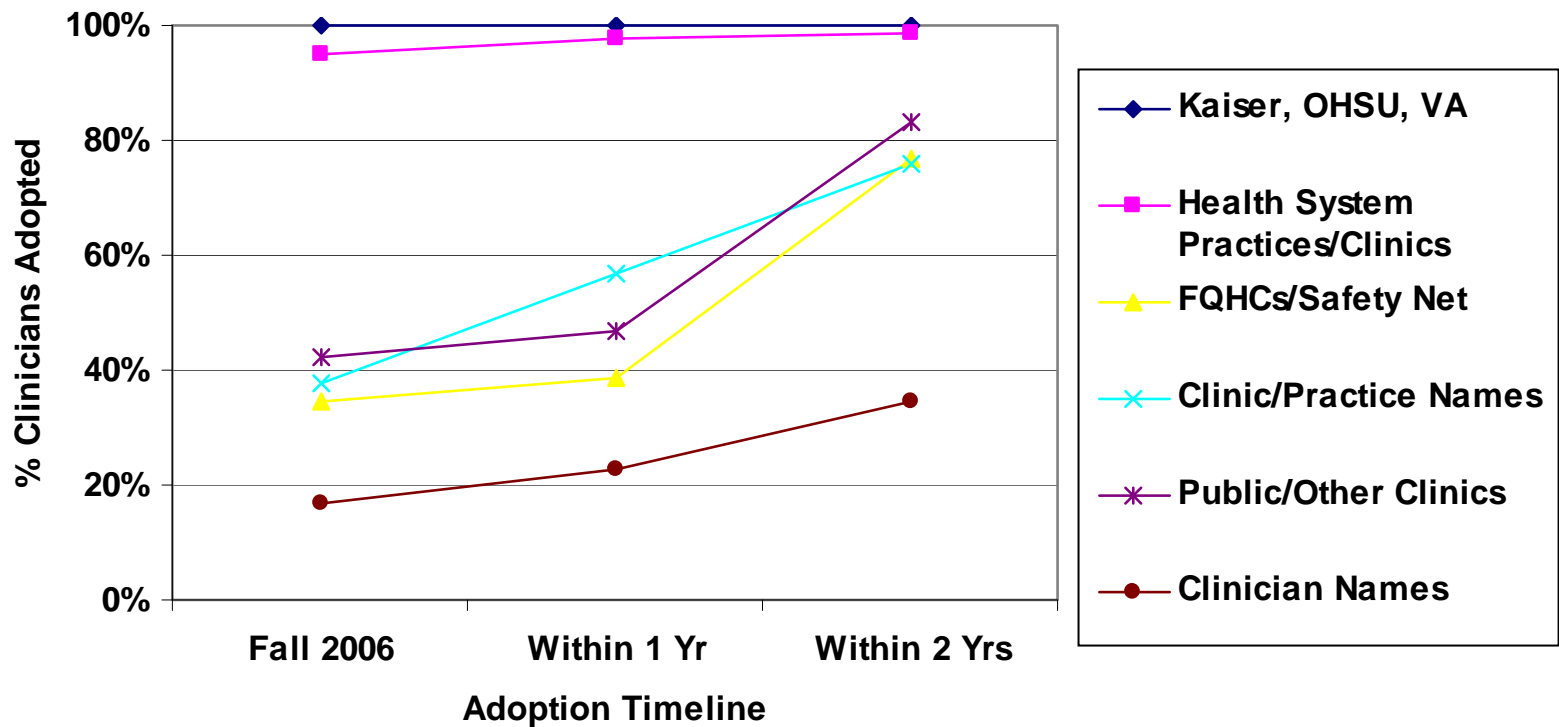

Reasons for Not Investing in Foreseeable Future by Practice Types, 2006

EHR Adoption Trajectory- Clinicians, 2006

EHR Adoption Trajectory: Clinicians by Organization, 2006

Where are Oregon ambulatory clinics and practices in 2009?

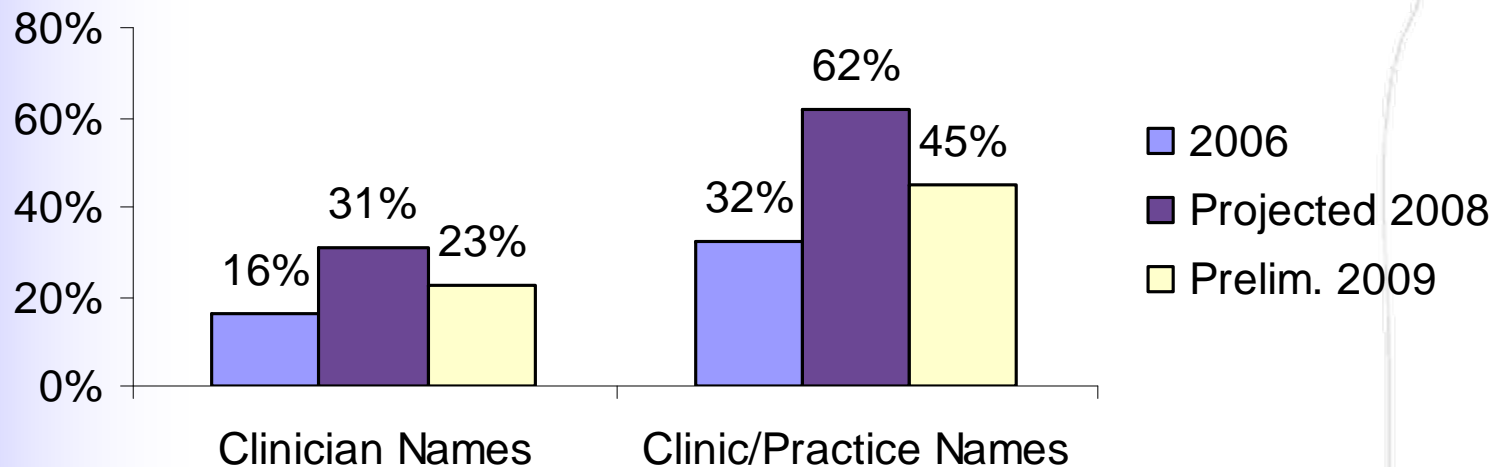

- OHPR fielded a EHR survey in the mid-late spring 2009
 - Targeted over 2,200 ambulatory clinics and practices
- Currently in the analysis phase
- Projected completion and report by end of summer 2009

What can be expected from the 2009 EHR survey?

- Updates to the 2006 information
- Adds new information:
 - Functionality (i.e. e-prescribing, lab orders, etc)
 - Decision support tools (i.e. drug interactions, etc)
 - Electronic health information exchange
- Additional information critical to understanding “meaningful use” in ambulatory clinics

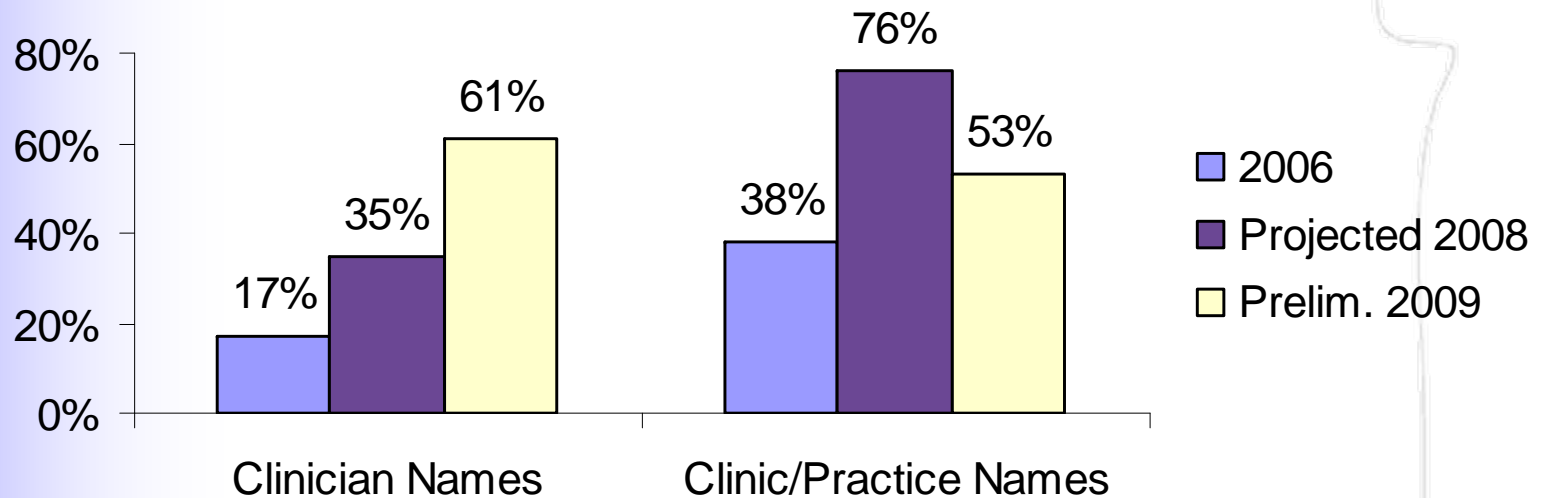

Increased clinician organization EHR adoption from 2006 but below projected

Comparison of EHR adoption of clinician organizations: 2006, Projected 2008 and Preliminary 2009

Significant EHR adoption of clinicians in clinician organizations

Comparison of EHR adoption of clinicians at clinician organizations: 2006, Projected 2008, and Preliminary 2009

Similar to 2006 results, larger clinician organizations may be more likely to have an EHR

Comparison of EHR adoption of clinician organizations

Available at <http://www.oregon.gov/OHPPR/docs/OR2006EHRsurvey.pdf>. Office for Oregon Health Policy and Research. Preliminary analysis of the Oregon Electronic Health Record Survey of Ambulatory Practices and Clinics Spring 2009. Data as of July 21, 2009.

Next Steps

- Today: We will begin the conversation

Also:

- Final meeting of HIIAC - August 20th
- Health Information Technology Oversight Council appointed by Governor by early September
- Preparation for federal planning grant dollars to assist strategic and implementation planning
- Close monitoring of federal guidance and details as they are rolled out on ARRA funding
- Close collaboration with new Health Authority and its Health Policy Board

Let's start talking today...

State Level Health Information Exchange Functions

- Balance the rights and needs of all statewide residents
- Facilitate a strategic roadmap for implementing statewide HIE
- Bridge nationwide, regional & local HIE
- Promote consensus and adoption of standards
- Facilitate compliance with HIE privacy and confidentiality requirements
- Stewardship promoting cost-effective public-private investments in HIE
- Facilitate availability of data across diverse sources and users to achieve benefits of interoperability

Developing a Statewide Plan for HIE

- **Components.** Strategic plan will define vision, priorities, objectives, sequencing, measures, risk mitigation strategies.
- **Content.** Strategic plan will address the foundational threshold issues of establishing governance, interoperable policies and practices for ensuring privacy and security, technical approach and HIE implementation priorities, financing, and outreach.
- **Creation.** Strategic plan will be developed and vetted with stakeholders through an inclusive and transparent public process.

Framework for HIE Sustainability

Requisites

- Leadership
- Strategic Vision
- Social Capital
- Human Capital
- Business Case
- Accountability

Environmental Influences
Government Policy, Rules and Regulations
Public & Private Payment Policy
Competition
Stakeholder Interests
Health System Challenges

Components

- Governance and Accountability Structure
- Internal Organizational Policy
- Business Plan/Start-up Capital
- Technical Infrastructure
- Information Assets Necessary for Service
- HIE Services
- Public Policy to Support Business Case and Consumer Protections

Results

- Value of HIE Demonstrated as a Public Good
- Stakeholder Trust
- Effective and Appropriate Data Use for Patient Care, Population Health, Health System Improvement, Clinical Research, Treatment Design, etc.
- Full Interoperability of Health Information Across All Stakeholders
- Sound Data Management Established with Proper Safeguards

Outcomes

- Health Information Access and Use for Higher Quality and More Efficient Health Care including Individual and Population Health

Let's Get To Work
