

Oregon Medicaid EHR Incentive Program
 (aka Promoting Interoperability Program)
Attestation Walk-Through Webinar Q & A

Topic	Questions	Answers
General Attestation	If we are attesting for multiple providers, do we need to upload certain documents only once (rather than for each provider), like the SRA and CEHRT documentation?	Yes. If you are attesting for multiple providers from the same clinic, and the SRA and CEHRT documentation are the same for each provider, please feel free to upload these documents into one attestation. However, to avoid confusion, please upload these into the first attestation you submit, so that we don't miss them and reach out to you about a provider's missing documentation.
Certified EHR Technology (CEHRT)	Do we still have to go into the CMS R&A system to update the providers' CEHRT ID# so it will flow into the provider information you need to reconcile at the beginning of the attestation?	No, that is no longer required to be updated. We are looking at the CEHRT ID that you enter into MAPIR when you begin the attestation.
Electronic Clinical Quality Measures (eQMs)	Is OneHealth Port able to accept multiple QRDA III files per provider?	<p>Yes, there is a CQMR process to support this. The information below is provided in the Medicaid EHR Incentive Program eCQM Submission – Step-By-Step Guide</p> <p>CMS program rules require a single eCQM submission per EP; however, if your EHR generates multiple QRDA 3 files for a single EP (this many happen if the EP provided services at more than one clinic during 2019), you have two options:</p> <ol style="list-style-type: none"> 1. Use the Medicaid EHR Incentive Program (MEHRIP) Excel template to attest to the eQMs. 2. Work with the Velatura team to have the QRDA 3 files for the EP aggregated into a single file. This functionality is being piloted for 2019 reporting. Although the Velatura team has tested files from many EHRs, not all EHRs have been tested at this time. If you would like to be an early adopter, we want to make sure you have plenty of time to work with the Velatura team to troubleshoot any

		<p>issues. If you want to use this option, you will need to do these steps and submit your QRDA 3 files by February 28, 2020.</p> <p>a. Contact the Velatura CQMR help desk to begin the process, either in the CQMR portal or by email.</p> <p>i. In the <u>CQMR portal</u>, go to the Support tab and select Contact Support to complete a help desk ticket. Please include <u>“QRDA 3 aggregation request”</u> in the subject line of your ticket. As a time-saving step, you can attach the QRDA 3 files to the help desk ticket. Click Submit when you are done.</p> <p>ii. Alternatively, you can email your request to the help desk at help@oregon-cqmr.mihin.org. To help us process your request quickly, please include <u>“QRDA 3 aggregation request”</u> in the subject line of your email. If you are attaching QRDA 3 files to your email, please zip them by provider and name accordingly – for example, one zip file for Jane Doe’s files named “Jane Doe” or by her NPI and a separate zip file for Bob Roe’s files named “Bob Roe” or by his NPI.</p>
<p>Public Health Reporting</p>	<p>I hadn't heard that the immunization registry is required to be bi-directional. When was that change made? Would you provide more information on that?</p>	<p>This requirement was part of the Stage 3 requirements that were announced in the 2015 Edition Final Rule. Please see page. 64 on the .pdf version of the Final Rule.</p> <p>You can also find some information about this in the 2019 Stage 3 Specification Sheets, as well as previous years' Stage 3 Specification Sheets.</p> <p>If you are unsure whether you meet this requirement, please verify with your organization or with the Public Health Agency.</p>
