Buckets of Work

- Changes in work now
  - Lock headers and scroll bars
  - Mark required fields
  - Adding numbers to rows for reference
  - Switches in defaults/ other cosmetic enhancements

- Changes being assessed
  - Options to decrease risk of error in process to match files
  - Options to decrease re-entering repeated elements of data proposals
  - Options to decrease risk that user will fail to save data (prevent loss of data)

Demo: Potential Change in Look-up

Internet Explorer 11 and CQMR

- Issues with IE 11 and CQMR
  - Data Importer does not function
  - Reports (generally) do not function as expected
  - Absentee Save (and possibly other controls) buttons

- Does your organization or others you know of require the use of IE 11?

- Do you have access to other browsers?

Internet Explorer 11 and CQMR

- Internet Explorer 11 was released on October 17th, 2013

- It's a compatibility driven solution, not a security driven one
  - Is the most common browser to have your data stolen from and to have a vulnerability discovered for

- It has bad support
  - Only supported until Windows 10 reaches "end of life"
  - Only receives minimal bare essential technical updates
  - Microsoft actually recommends that you don't use it

- It's the slowest of the available browsers

- Due its compatibility driven nature, many secure controls just don't work with it

Training Materials

Training Materials

- What we heard during testing
  - Add visual depiction of data proposal and data submission processes
  - Incorporate test case materials into training materials

- Other feedback?
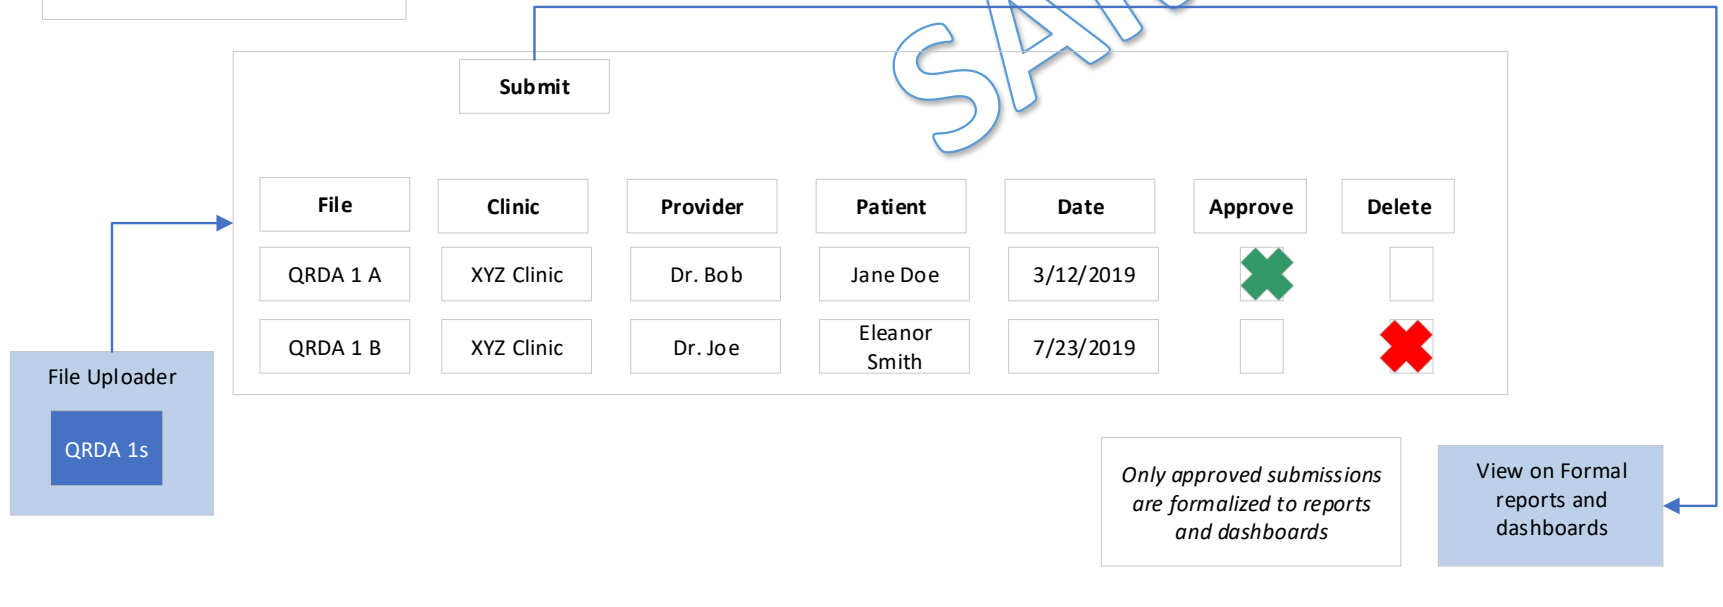

QRDA I Inspection Dashboards (Part 1)

QRDA I Inspection Dashboards

- Why are we looking at dashboards?
  - Some clinics lack options to review and validate QRDA I files
  - Current CQMR test submission allows file conformance check before formal submission
  - Adding inspection dashboards for test submission would allow content review before formal submission

- What's the goal for today?
  - Introduction and input to inform dashboard design

- What's next?
  - Follow-up webinar for deeper dive (request)
  - Testing of inspection dashboard – dates TBD

QRDA 1 Inspection Data Workflow (End User)

(Inspection data can be fitted to what would be most valuable to determining approval of QRDA 1)
