

September 2020

Office of Health Information Technology

The Oregon Health Authority's (OHA) Office of Health Information Technology (OHIT) serves as a partner and resource for both state programs and other public and private users of HIT. OHIT provides effective HIT policies, programs and partnerships that support improved health for all Oregonians.

Interoperability Final Rules Webinar

We are excited to announce that OHA's Office of Health IT is hosting a Federal Interoperability Final Rules Webinar on **October 1st from 2:00 – 3:30 pm**. The [ONC](#) and [CMS](#) final rules implement interoperability and patient access provisions of the 21st Century Cures Act, requiring the implementation of new policies that will give patients unprecedented safe, secure access to their health data. National health IT subject matter expert, Rim Cothren, will present the requirements of both final rules, which have implications for payers, providers, health IT vendors/developers, and health information exchanges/networks. The webinar will review:

- The individual requirements
- Upcoming deadlines
- Federal plans for enforcement
- Challenges organizations may face in meeting the requirements

Who should attend? Anyone can attend. This free webinar is intended to provide an overview of the final rule requirements for all those affected including payers, providers, health IT vendors/developers, and health information exchanges/networks.

We encourage attendees to bring their questions as there will be a question and answer session following the presentation. An FAQ document will be made available on our [website](#). This webinar will be recorded and will also be made available our [website](#).
