

Patient-Centered Primary Care Home Program Update

November 2021

Join us this Friday for a virtual learning collaborative on Standard 3.D: Comprehensive Health Assessment & Intervention

The Patient-Centered Primary Care Home Program is hosting a learning collaborative to help you learn from other peer practices how to meet **PCPCH Standard 3.D – Comprehensive Health Assessment & Intervention**. The intent of this standard is for PCPCHs to assess and intervene in patients' Health-Related Social Needs (HRSN) as part of routine wellness care. Health-related social needs such as housing instability, food insecurity, and exposure to interpersonal violence directly impact health outcomes.

In this learning collaborative we will hear from PCPCHs about their strategies for routine HRSN assessment, tracking HRSN referrals, as well addressing specific patient population needs with HRSN interventions.

Each session (information below) will focus on one of the three measures in Standard 3.D. Time will be reserved for your questions. We hope you will join us!

Friday November 19th (12-1pm): PCPCH Measure 3.D.1: This session will focus on the differences and similarities between HRSN and Social Determinants of Health (SDOH). We will also discuss the different HRSN assessment tools and strategies used by organizations such as *Winding Waters Medical Clinic* and *Oregon Primary Care Association*. [Click here to register](#)

Friday December 3rd (12-1pm): PCPCH Measure 3.D.2: This session will focus on the difference between PCPCH measures 3.D.2 (HRSN referrals & coordination) and 5.E.3 (community service provider referrals & coordination). We will also discuss how PCPCHs such as *Evergreen Family Medicine* and *Lincoln Health Center (CHCBL)* assess and track HRSN. [Click here to register](#).

Friday December 17th (12-1pm): PCPCH Measure 3.D.3: This session will focus on strategies for how PCPCHs can analyze HRSN data and identify interventions based on patient need. Participating practices include *Winding Waters Medical Clinic*, *Childhood Health Associates of Salem*, and *La Pine Community Health Center*. [Click here to register](#).

Accommodation requests related to a disability should be made by the Monday preceding each session to Bernadette Lauer at Bernadette.Lauer@dhsoha.state.or.us. Every effort will be made to provide services to requests received closer to the session dates, however submitting your request as early as possible is greatly appreciated.

Questions about pediatric COVID immunizations?

Virtual Learning Sessions for clinics (Nov- Dec, 12 -1 pm)

The Oregon Health Authority (OHA) Transformation Center, in partnership with the OHA Vaccine Planning Unit, is hosting a learning session focused on pediatric COVID immunizations. This opportunity is for all vaccinators including FQHC staff, clinical pediatric staff, family medicine staff, and pharmacists. As a participant, you will hear from subject matter experts and from peers on key topics such as pediatric COVID vaccine updates, how to build vaccine confidence in parents, and using equity in all planning and delivery of vaccine. Time will be reserved to answer questions from clinical staff. This is an ongoing learning series with new topics covered each session. Space will be limited to the first 500 participants for each session. Please register for each date below and join us via Zoom. **Contact:** Alissa Robbins (Alissa.Robbins@dhsoha.state.or.us)

Recorded Video: Pediatric Vaccine Q&A

Earlier this month, OHA hosted a Facebook Live in which state leaders and providers answered questions on the recent authorization to extend COVID-19 vaccinations for youth between 5 and 11 years old. [Click here to visit the Q&A page and recorded video.](#)

Free clinical technical assistance for clinics addressing the increasing prevalence of unhealthy alcohol (SBIRT) and opioid use

Recruiting through November

The OHA Transformation Center is partnering with the Oregon Rural Practice-based Research Network (ORPRN) to support clinic technical assistance related to SBIRT for unhealthy alcohol and drug use. SBIRT is a “must-pass” incentive measure for CCOs in 2021.

This collaborative project, ANTECEDENT, can provide primary care clinics with 15 months of tailored support to implement changes to address unhealthy alcohol use at no-cost to the participating clinics. Additionally, ORPRN is offering a technical assistance opportunity regarding chronic pain management and opioid prescribing (aka PINPOINT).

Free resilience workshop for healthcare workers

Compassion Resilience in the Workplace
A peer-supported, interactive workshop series hosted by Lines for Life.

lines for life

November - December, Mondays at 10-11:30 am

Lines for Life is hosting a peer-supported, interactive workshop series focused on *Compassion resilience*: the practice of caring for ourselves so that we can continue to meet the challenges of working in public service roles. This series is offered at no cost to healthcare and frontline workers, and others who work in fields that require caring for others. Learn and employ evidence-based skills to cope, restore, and safeguard your passion for this work.

When registering for the workshop series, please attend all sessions that you are available. Each session in the series is designed to build on previous session content. We understand that due to scheduling difficulties, participants may not be able to attend all six sessions. Topics Include:

- What is Compassion Resilience and why is it important?
- Compassion Fatigue: Connection to trauma, stages and assessments
- Compassionate Boundary Setting to build Compassion Resilience
- Wellness and Resilience: Explore the Wheel of Wellness – Mind, Spirit, Strength, and Heart

Hosting this event series is Stacey Bergland, the Oregon Helpers Bilingual and Bicultural Group Facilitator. She brings over 20 years of frontline experience in the fields of Suicide Prevention, services for survivors of Domestic Violence & Sexual Assault, co-occurring DV and Substance Use, plus advocacy and activism in anti-racism, LGBTQIA+ justice, and environmentalism.

Free upcoming MAT waiver training (CME available)

December 7th, 8:00am - 12:30pm

PCPCH Measure 3.C.2 encourages practices to provide on-site medication treatment (pharmacotherapy) to patients with substance use disorders and refer patients that receive pharmacotherapy treatment to recovery supports. The Providers Clinical Support System (PCSS) Half and Half Medications for Addiction Treatment (MAT) waiver training course provides an overview of buprenorphine, one of three medications approved by the FDA for the treatment of opioid use disorder (OUD). This course fulfills the eight-hour requirement for providers who are eligible to prescribe buprenorphine in office-based settings for the treatment of OUD. The course also provides an overview of prevention, identification, and treatment of substance use disorders emphasizing OUD. Residents may take the course and apply for their waiver once they obtain their DEA license. This training is offered at no cost and provides no-cost CME credits.

About the Patient-Centered Primary Care Home Program

Patient-Centered Primary Care Homes (PCPCH) are health care clinics that have been recognized by the Oregon Health Authority (OHA) for their commitment to providing high quality, patient-centered care. The PCPCH Program administers the application, recognition, and verification process for practices applying to become Patient-Centered Primary Care Homes. The program is also working with stakeholders across Oregon to support adoption of the primary care home model. For more information visit www.PrimaryCareHome.oregon.gov.

The mission of the PCPCH Program is to be a trusted partner in primary care, collaborating with stakeholders to set the standard for transformative, whole-person, and evidence-based care.
