State HIT/HIE Efforts and Telehealth Pilots

December 5, 2013

Susan Otter, State Coordinator for HIT, Oregon Health Authority
susan.otter@state.or.us
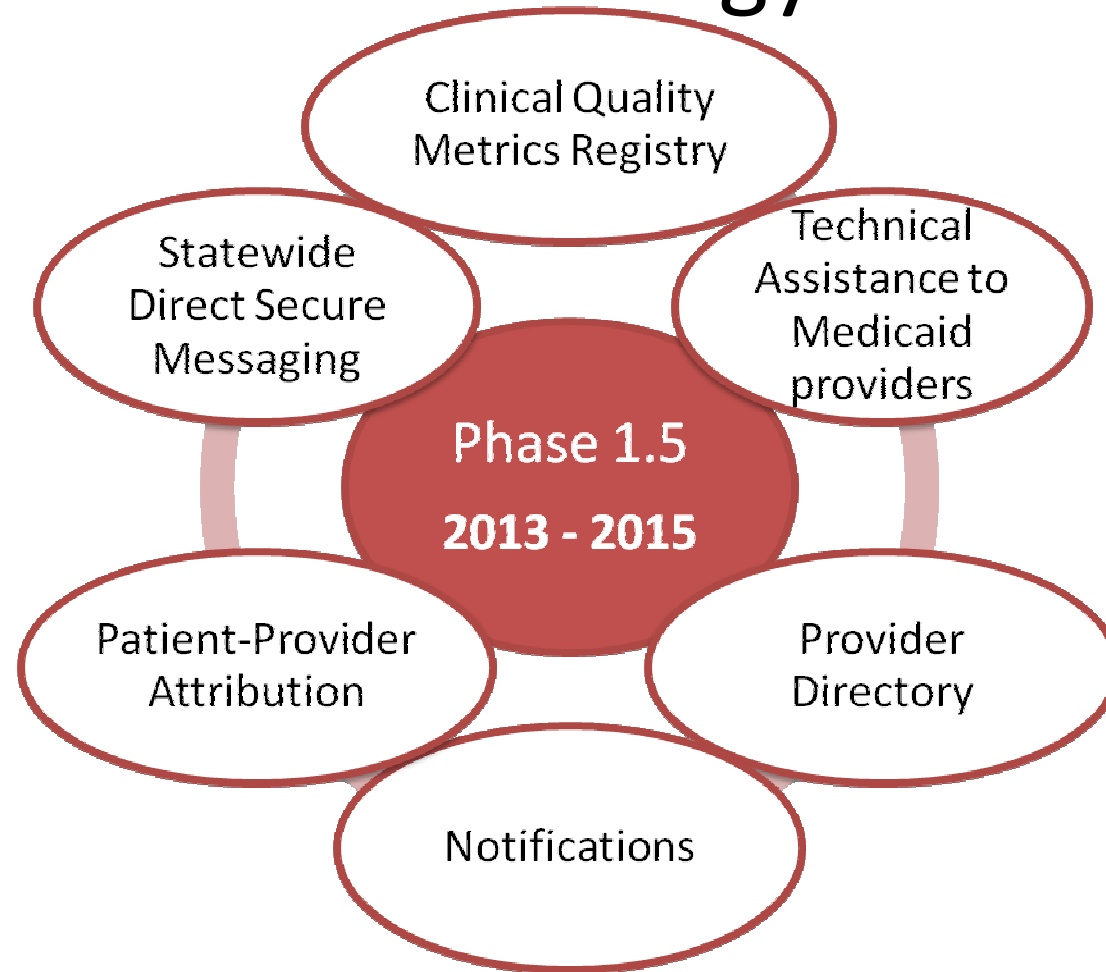

Oregon Health Authority

OHA: Office of Health IT

Work underway: Two Objectives

1.Multi-year framework for the critical HIE/HIT infrastructure that ensures Oregonians have access to "HIT-optimized" health care

2.Implementation of foundational/high value near-term HIT/HIE statewide services

Office of Health Information Technology

Longer-term vision for Oregon HIT/HIE

- New models of care coordination and population management are supported by reliable, actionable, meaningful information
- All Oregon providers have access to key information needed to provide care for the whole person
  - Statewide infrastructure wraps around services that exist and enabling access to information where services do not exist

Oregon's Telehealth Pilots

- Funded by Oregon's CMMI SIM grant:
  - Consultant to provide subject matter expertise, develop options and implement selected pilots
  - Some equipment/software to implement pilots

- Two or three rounds of pilots before SIM funding wraps up in 2016

- More to come in second half of 2014
