Early Childhood Mental Health Assessment, Diagnosis and Reimbursement

Presented by:
Laurie Theodorou, LCSW
Early Childhood Mental Health Policy Specialist
February, 2020
My Role

• Support Children’s System of Care Development (CSAC)

• Promote expansion of, and increased access to Evidence-based Practice to children, specialize in birth to 8 years

• Coordinate with other OHA Divisions

• Provide Technical Assistance to Stakeholders regarding Infant and Early Childhood Mental Health services and program development
Guiding Principles of Early Childhood Mental Health

- **Relationships** - key to emotional, social, cognitive, and physical health

- **Specialized** training needed to assess and treat children younger than 5 years of age.

- **Dyadic** therapies should be prioritized over individual work

- **Cultural, socioeconomic and environmental** family factors are essential to understanding how to assist the family
Golden Thread

- Information
- Relationship
- Diagnosis
- Clinical Formulation
- Recommendations

Treatment Planning
- Family Input
- Based on Diagnosis, Symptoms Research
- Measurable

Fidelity
- Measure Progress
- End or Change

Assessment

Treatment
Assessment by an Early Childhood Trained Provider Very Important

- Engagement
- Accurate Diagnosis

- Choose Treatment
- Prognosis

- Outcomes
- Efficiency
When does Assessment occur?

- First phone call
- Intake Assessment
- Waiting room, halls, other
- Ongoing

Safety, Follow-through
Diagnosis, Needs and Strengths
Symptoms, Progress, Circumstances
Generalization
What are we Assessing?

**Child**
- Symptoms
- Effect on Daily functioning
- Precipitating events
- Diagnosis, if any
- Prognosis
- Treatment Recommendations

**The Parent-child Relationship**
- Strengths and Challenges
- Duration
- Quality of Reciprocity
- Developmental Appropriateness
- Parent response to therapist
How is Information Gathered?

- Parent(s) & Other report
- Observation Parent-Child
- Interaction with child
- Records & Standardized Tools
Information Gathered

- Safety
- Physical
- Eating, Sleeping, Toileting
- Development
- Cognition
- Communication
- Social Emotional
- Self Regulation
- Attachment
- Supervision
- Parental Attunement

- Parenting knowledge
- Parenting knowledge
- Prior interventions
- Cultural Factors
- Parental relationships
- Siblings, extended supports, social and economic strengths
- Non custodial parents (each dyad unique)

- Plus more
Observations of Relatedness

Zone of Proximal Development

- Track child’s safety, behavior, needs
- Comfort/encourage child when appropriate
- Set limits – enough, too little, too much?
- Appear to enjoy child’s presence?

Responsive Interactions

- Make eye contact?
- Check with caregiver verbally or non-verbally about behavior, safety, permission?
- Look to caregiver for comfort?
General Play observations

- Exploration- within developmental expectations?
- Utilize the toys in typical ways or unusual ways
- Demonstrate symbolic play?
- Trauma reenactment?
- Focused? Or Easily distracted or bored (for age)
- Drawn to certain types of toys?
Interacting with the child

- Be at the Child’s Level
- Remind Parent not to interrupt MSE
- Parallel play
- Use play therapy skills
- Give parent a chance to clarify at end
# Familiar Mental Status Exam Items

*from Anne L. Benham, MD, AACP 1997*

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Appearance</td>
<td>Size, apparent health dress and hygiene, maturity compared to age, dysmorphic features</td>
</tr>
<tr>
<td>Motor</td>
<td>Mobility, tics, gaze, drooling, fine and gross coordination</td>
</tr>
<tr>
<td>Speech and Language</td>
<td>Vocalization, quality, rate, rhythm, intonation, articulate volume, apparent comprehension, <em>does caregiver understand him or her?</em></td>
</tr>
<tr>
<td>Thought</td>
<td>Fears, worry, dreams, nightmares, perseveration, echolalia, apparent dissociation</td>
</tr>
<tr>
<td>Affect and Mood</td>
<td>Range of expression, predominant mood, lability of affect, intensity of expressed affect, frustration tolerance, ability to calm</td>
</tr>
<tr>
<td>Cognition</td>
<td>Problem solving ability, general knowledge for age</td>
</tr>
</tbody>
</table>
# Additional Mental Status Items for Early Childhood

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Apparent Reaction to situation</td>
<td>Initial reaction to setting and to strangers, Reactions to transitions</td>
</tr>
<tr>
<td>Self Regulation</td>
<td>State, Sensory, Activity level, Attention Span, Aggression, Unusual Behaviors</td>
</tr>
<tr>
<td>Play</td>
<td>Developmental appropriateness, Content, with Whom?</td>
</tr>
<tr>
<td>Relatedness</td>
<td>To caregiver, Observed Attachment Behaviors, to Therapist</td>
</tr>
</tbody>
</table>
The importance of knowing developmental “norms”
Medical Necessity - A covered service is considered medically necessary if it will do, or is reasonably expected to do, one or more of the following:

- Arrive at a correct diagnosis
- Reduce, correct, or ameliorate the physical, substance, mental, developmental, or behavioral effects of a covered condition
- Assist the individual to achieve or maintain functional capacity to perform age-appropriate or developmentally appropriate daily activities, and/or maintain or increase the functional level of the individual

- Flexible wraparound services should be considered medically necessary when they are part of a treatment plan
- Ameliorating effects of abuse or neglect, and/or when there is a need to repair or build attunement and attachment with a caregiver after a significant disruption. (child does not need to be verbal)
Oregon Early Childhood Diagnostic Crosswalk

Guidance Document

Bridging the Diagnostic Classification of Mental Health and Developmental Disorders of Infancy and Early Childhood diagnosis in Oregon and the Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition (DSM 5) and the International Statistical Classification of Diseases and Related Health Problems, tenth revision (ICD 10) to aid behavioral health providers with developmentally appropriate and Oregon Health Plan reimbursable diagnoses.

NEW Link: https://sharedsystems.dhsoha.state.or.us/DHSForms/Served/le8939.docx
DC:0-5 | DSM-5 | ICD-10 | Prioritized List

Translates symptom clusters between systems
DC:0–5™ — Released December 2016

Diagnostic Classification of Mental Health and Developmental Disorders of Infancy and Early Childhood

https://www.zerotothree.org/resources/series/the-bookstore
What is the Oregon Prioritized List?

- The Health Evidence Review Commission (HERC)
- Review of medical evidence
- Sets priorities for health spending in the Oregon Health Plan
- Pairs Diagnoses with appropriate health services
- Promotes evidence-based medical practice statewide

- Oregon’s legislature approved funding for lines 1-471 of the prioritized list for January 1, 2020.
## Crosswalk Organization

<table>
<thead>
<tr>
<th>DC: 0-5 Diagnosis</th>
<th>DSM-5 Description</th>
<th>DSM-5 code</th>
<th>ICD-10 Description</th>
<th>ICD-10 code</th>
<th>Line on Prioritized List</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Early Childhood Mental Health Providers</td>
<td>Majority of Mental Health Providers familiar</td>
<td></td>
<td>Physicians most familiar</td>
<td></td>
<td></td>
<td></td>

<tr>
<td>Not directly billable in Oregon</td>
<td>Behavioral Health EHR software shows these codes</td>
<td></td>
<td>Codes needed for Medicaid and insurance billing</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>EHR software translates into these codes for billing</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Information re: Medicaid reimbursement

Diagnosis must fall between lines 1-471

Diagnosis codes on the list are ICD: 10

Additional helpful guidance
Caucasian male, age 30 months, referred for evaluation for ADHD.

After developmentally appropriate, thorough biopsychosocial assessment of child you might determine a diagnosis of:

<table>
<thead>
<tr>
<th>DC: 0-5 Diagnosis</th>
<th>DSM-5 Description</th>
<th>DSM-5 code</th>
<th>ICD-10 Description</th>
<th>ICD-10 code</th>
<th>Line on Prioritized List</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Overactivity Disorder of Toddlerhood (Only between 24-36 months of age)</td>
<td>Unspecified Attention Deficit/Hyperactivity Disorder</td>
<td>314.01</td>
<td>Attention Deficit/Hyperactivity Disorder, Unspecified type</td>
<td>F90.9</td>
<td>121 – Guideline 20 See full details in guideline for children under 5 yrs.</td>
<td>First line therapy is evidence-based, structured “parent-behavior training.”</td>
</tr>
</tbody>
</table>

Overactivity Disorder of Toddlerhood (Only between 24-36 months of age)

Unspecified Attention Deficit/Hyperactivity Disorder

314.01

Attention Deficit/Hyperactivity Disorder, Unspecified type

F90.9

121 – Guideline 20 See full details in guideline for children under 5 yrs.

First line therapy is evidence-based, structured “parent-behavior training.”
Clinical formulation would include:

*(not all inclusive list)*

- **Name of DC: 0-5 diagnosis and equivalent in DSM 5.**
- **All information required for other ages**
  - Symptoms meeting criteria, such as
  - Frequency, intensity, duration and impact on child, and family functioning.
  - Sources of your information
  - Rule-outs and/or more information/evaluation needed.
  - Prognosis, recommended treatment and expected duration of services.
## Lesser Known Reimbursable Codes
### Primary Diagnoses:

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
<th>HERC</th>
<th>Age Limit</th>
</tr>
</thead>
<tbody>
<tr>
<td>ICD-10: Z69.010</td>
<td>Victim of child neglect or abuse by parent</td>
<td>Line 120</td>
<td>None</td>
</tr>
<tr>
<td>(DSM 5-V61.21)</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>ICD-10: Z69.020</td>
<td>Victim of non-parental child abuse child</td>
<td>Line 120</td>
<td>None</td>
</tr>
<tr>
<td>(DSM 5-V61.21)</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>ICD-10: Z62.820</td>
<td>Parent Child Relational Problem</td>
<td>Line 120</td>
<td>None</td>
</tr>
<tr>
<td>(DSM 5-V61.20)</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>ICD-10: Z63.8</td>
<td>Other Specified Problems Related to the Primary Support Group</td>
<td>Line 444</td>
<td>None</td>
</tr>
<tr>
<td>(DSM 5-V61.8)</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>ICD-10: F43.8</td>
<td>Other Specified Trauma and Stressor-Related Disorder/Other Reactions to Severe Stress</td>
<td>Line 444</td>
<td>None</td>
</tr>
<tr>
<td>(DSM 5-309.89)</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Other Specified Problems Related to Primary Support Group  
(DSM 5- V61.8, ICD 10- Z63.8)

Circumstances which influence a child’s health risk, but not a current illness or injury.

- a) Family discord  
- b) Family estrangement  
- c) high expressed emotional level within family  
- d) inadequate family supports and/or resources  
- e) inadequate or distorted communication within family.

- The child does not meet another mental health diagnosis.  
- Interventions focus on preventing or managing the child’s symptoms, enhancing safety and stability in the child’s environment, and therapeutic support for the caregiver.

- *Individual therapy and medication management are not appropriate services for this problem in this age group.*
## DC 0-5 New Diagnoses
(use the Crosswalk)

<table>
<thead>
<tr>
<th>Medicaid Reimbursable</th>
</tr>
</thead>
<tbody>
<tr>
<td>- Overactivity Disorder</td>
</tr>
<tr>
<td>- Inhibition to Novelty Disorder</td>
</tr>
<tr>
<td>- Disorder of Dysregulated Anger and Aggression</td>
</tr>
<tr>
<td>- Overeating Disorder</td>
</tr>
<tr>
<td>- Atypical Eating Disorder (Hoardng)</td>
</tr>
<tr>
<td>- Relationship Specific Disorder of Infancy/Early Childhood</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Not Medicaid Reimbursable</th>
</tr>
</thead>
<tbody>
<tr>
<td>- Sleep Disorders w/out Apnea</td>
</tr>
<tr>
<td>- Crying Disorders</td>
</tr>
<tr>
<td>- Enuresis</td>
</tr>
</tbody>
</table>

**Currently below the line:**
- Selective Mutism
- Excoriation
OHP Reimbursable Diagnoses
(not included in DC: 0-5)

- Encopresis
- Victim of Child Abuse by Parent or Non-Parent
- Personal Past History of Abuse
- Other Specified Problems related to the Primary Support Group
- Oppositional Defiant Disorder
- Unspecified Disruptive Impulse Control and Conduct Disorder
Learning and Developmental Diagnoses

May be reimbursable

- Autism Spectrum
  - Requires specialized training
  - May be out of scope of practice for QMHP

Not reimbursable as a Behavioral Health Diagnosis

- Speech and Language, Coordination and other Neurodevelopmental disorders

May be reimbursed as rehabilitative service
**Situation:**
Provider contacts OHA saying a code on the Crosswalk is “not billable”

<table>
<thead>
<tr>
<th>Problem</th>
<th>Solution</th>
</tr>
</thead>
</table>
| • Electronic Health Record System is not preloaded with developmentally appropriate diagnostic codes | 1. Provide Agency IT dept. with Oregon Early Childhood Crosswalk  
2. Agency IT dept. adds codes to local EHR that are missing |
**Situation:**
Provider contacts OHA saying a code on the Crosswalk is “not billable”

<table>
<thead>
<tr>
<th>Problem</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Diagnosis is not reimbursable on the Prioritized List or • Not considered Behavioral Health diagnosis in Oregon</td>
<td>1. Is the secondary diagnosis the focus of treatment and is it reimbursable?</td>
</tr>
<tr>
<td></td>
<td>2. Refer to other services such as Early Intervention</td>
</tr>
</tbody>
</table>
A Diagnosis is in the Crosswalk as Reimbursable, but Your Claim is Denied

1. Double check that the claim has been submitted correctly
2. Identify as much detail as you can about what is the stated problem with the claim.
3. Obtain a copy of the denial if possible.
4. Call (or have someone in your office call) your CCO. Take notes.
5. Your office can also call OHP provider assistance. https://www.oregon.gov/oha/HSD/OHP/Pages/Contact-Us.aspx

6. If not resolved, send the claim and denial to me (via secure email) with as much detail as possible about what you have already tried to get it resolved. Include names and positions.
Dyadic Therapy
Procedure codes (CPT)

• Family Therapy with client present (90847)

• Psychotherapy with or without family member present (90832, 90834, 90837) Client must be present for all or the majority of the session

• Interactive Complexity (90785- Add on code)
  – Documentation each session of factors that complicate delivery of the EBP, such as high reactivity among participants, undeveloped or regressed language ability, use of additional equipment or devices to facilitate the therapeutic intervention.
  – Not available for Fee for Service Clients receiving services from QMHP

Less frequently, clearly directed toward the treatment of client:
• Family Therapy without client present (90846)
Reauthorization of services after a set number of sessions or

Use of one or more standardized tools

**Examples** *(not an all-inclusive list)*
- Eyberg Child Behavior Inventory (ECBI)
- Devereux Early Childhood Assessment (DECA)
- Child Behavior Check List (CBCL)
- Strengths and Difficulties Questionnaire (SDQ)
- Trauma Symptom Checklist for Young Children (TSCYC)
- Parent-Infant Relationship Global Assessment Scale (PIR-GAS)
- Other
Things to remember.....

• Providers must always work within their scope of training and expertise

• Clear documentation of how you came to a diagnosis, and of your interventions is always important. Check with your local CCO regarding their requirements

• Obtain consultation when needed (and document it) or refer to another qualified provider

• As you know, not every family that needs our help will have a child who meets a mental health diagnosis.

• Supporting families in accessing non-behavioral health services is always important.
