- **Asset map discussion, continued - *Small group discussions***
  - Looking at the summary on the slides, what is missing from your perspective? What additional input would you like to share (especially if you weren't at the September meeting)?
  - What questions do you have for other CCOs?
  - Given what you heard from the clinicians today, are there any approaches you might alter in your asset map process now or in the future?
  - Are there statewide challenges that go beyond individual CCOs/regions for which we should be seeking solutions?
  - Additional questions for discussion (if time and if the group wants to discuss)
    - How are you determining the list or set of providers to include in the asset map who serve children birth to five? How are you determining that these providers have the applicable skill set to serve children birth to five?
    - Discuss what you're finding in terms of provider race/ethnicity and also how you are able to or are challenged to identify languages that providers use for services to children birth to five.
- **Future meetings**
