

A new behavioral health tool for Emergency Support Function 8: Public Health and Medical Services, sponsored by the Oregon Health Authority

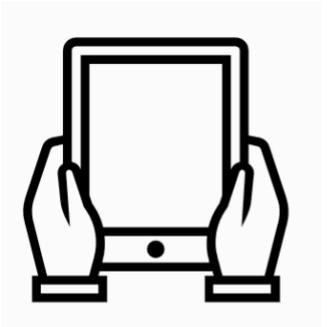

What is PsySTART?

- ▶ **A real-time triage and case management system** to assess needs during a behavioral health crisis or traumatic event
- ▶ **Survivor triage** for use by all community partners engaged in an emergency: Emergency management partners and responders, health care providers, schools, and more
- ▶ **Self-triage** for all emergency management partners and responders to support resiliency during and after an event

PsySTART features:

- ▶ Cloud-based access from computer, laptop or tablet
- ▶ Population-based Incident Command System and Incident Action Plan
- ▶ Metrics, reporting and planning tools
- ▶ Transferable case management to support continuity of care

Exposure-based triage reviews all factors needed for immediate response at the point of care, including:

- ▶ New, ongoing or persistent stressors
- ▶ Level of exposure to the crisis or event
- ▶ Traumatic loss
- ▶ Injury and illness
- ▶ Severe panic or prior history of PTSD
