Jason Daniels

OREGON HEALTH AUTHORITY

Maternity Code Update

3.10.2026

AMA policy summary

- The AMA is overhauling procedure codes used for reimbursement for maternity services.
- Effective 1/1/2027, AMA will
  - Delete the global maternity codes altogether,
  - Add new codes for labor and delivery, and
  - Replace antepartum and postpartum care codes with E&M codes.

AMA coding changes

- Most significant change to maternity coding in decades
- Global maternity codes end on 1/1/2027
- Changes
  - 12 new codes
  - 17 terminated
  - 7 revised

AMA maternity code structure

- Current state – Global code
  - Single global code simplifies billing
  - Obscures variation and complexity
- Future state – Unbundled
  - Global maternity codes end
  - More granular reporting
  - Structure identifies four phases of care

Phases of care billed separately

- Antepartum: Each visit billed using E&M codes
- Labor management: New category for billing
- Delivery: Services billed separately
- Postpartum: Each visit billed using E&M codes

Adopt CPT or HCPCS codes

- CMS is considering creating a set of g-codes that reconstitute the global code structure that AMA is retiring. This may not be clear until November.
- If CMS releases g-codes, OHA FFS and CCOs will need to decide whether to adopt CPT or HCPCS codes
- Recognize the preference for avoiding operating two code structures
- Decision will be based on the direction that CCOs, other Medicaid agencies, and commercial insurers are going
- Early indications favor CPT
- CCOs should share their preferences

Cases that span 1/1/2027

- Policy guidance will be required if the CPT codes are adopted
- Global codes terminate 1/1/2027
- Antepartum care before January, labor and delivery after 1/1/2027
- Need policy for maternity cases that span 1/1/2027 transition
- Evaluating using E/M or existing codes for antepartum care

Upcoming policy decisions

- Begin implementation planning for CPT codes
- Selection of CPT or HCPCS – CCO feedback
- Process for billing cases spanning 26/27
- Adoption of CMS rates

Preventive medicine codes in Integrated Primary Care

Codes 99401-9904

- **Code description: these codes are used to report services provided face-to-face by a physician or other qualified health care professional for the purpose of promoting health and preventing illness or injury.**
- AMA guidance states: behavioral-health-coding-resource (1).pdf
- These codes are intended to be preventive in nature/used prior to formal diagnosis in the hopes of addressing issues before they become larger health issues. They do not require a large team to implement.
- We are configuring MMIS to ensure reimbursement when these services are rendered by a licensed BH provider such as LCSW, Licensed Psychologists etc, in an integrated primary care setting.
- **Question for CCOs: are you currently restricting these codes for integrated primary care setting?**

Announcements

Deliverable Redesign Update

- Care Coordination
  - OHA is exploring LTSS MOU deliverables to determine a revised reporting approach.
- Grievance and Appeal System
  - OHA is working through its final review of the G&A Log reporting instructions and NOABD/NOAR Templates.
  - A few proposed changes will require additional input from CCOs. OHA will outreach via a poll to obtain CCO feedback.
  - OHA will disseminate revised G&A Log and NOABD/NOAR reporting instructions by no later than October 19, 2026.
- What is next for deliverable redesign?
  - The next topic will be subcontractor and delegation oversight. The CCO engagement session will be scheduled the first week of November 2026.
  - Network adequacy will follow in early December 2026 once OHA has made moved forward with transitioning to Quest Analytics.

Darren Coffman
