

2026 Lane County Transition of Care for New Trillium Members

Through Jan. 31

Starting Feb. 1

If you are now getting approved care through PacificSource, you may still get it for a short time when you move to Trillium, even if it is not in Trillium's network.

This period is called "Transition of Care."

Transition of Care Period

For most OHP members:

- Physical health: 30 days
- Dental: 30 days
- Behavioral health: 60 days

For members with OHP (Medicaid) and Medicare:

- Physical health: 90 days
- Dental: 90 days
- Behavioral health: 90 days

Care for certain high-risk conditions

You can finish treatment you started while you were a PacificSource member. If your provider decides you no longer need this care, the treatment may stop earlier.

After the Transition of Care Period

For in-network providers:

- Talk with your provider about your care plan.
- Your provider may need to ask Trillium to approve some services.

For out-of-network providers:

- Trillium can help you find a new in-network provider.
- If you want to continue with out-of-network providers, talk with them about your care plan. They will need to ask Trillium to approve covered services.
