General Prior Authorization Information

**The following pages 4-7 include information about prior authorization
taken from the DMAP Pharmaceutical Services
Supplemental Information document found at:**

<http://www.dhs.state.or.us/policy/healthplan/guides/pharmacy/main.html>

Overview

For drugs that require prior authorization (PA) on Point-of-Sale (POS) claims:

- A new evaluation feature of the Oregon DHS POS system, DUR Plus, reviews incoming POS claims and issues PA when the drug meets appropriate clinical criteria.
- For drugs that do not pass DUR Plus review, pharmacies must contact the prescribing provider, who then requests PA from the Oregon Pharmacy Call Center.

Drugs requiring PA

DHS may require PA for individual drugs and categories of drugs to ensure that the drugs prescribed are indicated for conditions funded by the Oregon Health Plan (OHP) and consistent with the Prioritized List of Health Services and its corresponding treatment guidelines (see OAR 410-141-0480 and 0520).

Administrative rule 410-121-0040 is related to drugs requiring prior authorization for Medically Appropriate Use.

For information regarding drugs requiring prior authorization, please refer to the Pharmacy Web site at: www.dhs.state.or.us/policy/healthplan/guides/pharmacy/main.html.

DUR Plus review

The Oregon DHS POS system initially evaluates incoming pharmacy claims for basic edits and audits. If the drug on the claim requires prior authorization (PA) and requires DUR Plus evaluation, the claim passes through a series of clinical criteria rules to determine whether DUR Plus can issue PA and allow dispensing the drug to the client.

DUR Plus checks the current drug claim as well as the client's medical and claims history for the appropriate criteria.

- If suitable criteria are found, a prior authorization will be systematically created, applied to the claim, and the claim will be paid. This interactive process occurs with no processing delays and no administrative work for the pharmacy or prescribing provider.
- If all criteria are not met, the claim will be denied and PA will be required. The prescriber will be responsible for requesting PA, using procedures outlined in OAR 410-121-0060.

Oregon Pharmacy Call Center review

The Oregon Pharmacy Call Center is available 24 hours per day, seven days a week, 365 days a year.

Phone: 888-202-2126

Fax: 888-346-0178

The Call Center receives calls and faxes related to PA requests for fee-for-service prescriptions (including Mental Health “carve-out” prescriptions for managed care clients), and processes PA requests within 24 hours.

Prescribers should use PA procedures outlined in OAR 410-121-0060. For more information, refer to the Pharmacy Web page at www.dhs.state.or.us/policy/healthplan/guides/pharmacy/main.html.

See the Pharmaceutical Services Program Supplemental Information Forms section for forms prescribers should use when submitting PA requests to the Call Center.

Emergency PA protocol

The Oregon Pharmacy Call Center may authorize up to a 96 hour emergency supply. Refer to 410-121-0060(4) Emergency Need:

The Pharmacist may request an emergent or urgent dispensing from the Pharmacy Call Center when the client is eligible for covered fee-for-service drug prescriptions.

- (a) Clients who do not have a PA pending may receive an emergency dispensing for a 96-hour supply.
- (b) Clients who do have a PA pending may receive an emergency dispensing up to a seven-day supply.

Client hearings and exception requests

For any PA requests that are denied due to DMAP criteria not being met, the right of a client to request a contested case hearing is otherwise provided by statute or rule, including OAR 410-141-0264(10).

This rule describes when a client may request a state hearing. Clients may request a hearing based upon information included in the PA denial notice.

Information on how to file an appeal is attached to all PA notices to clients and providers from the Oregon Pharmacy Call Center.

Providers may contact Provider Services at 800-336-6016 to file an exception request on a PA denial. For information regarding OAR 410-120-1860, refer to the General rules Rulebook at www.dhs.state.or.us/policy/healthplan/guides/genrules/main.html.

Analgesics, Non-Steroidal, Anti-Inflammatory Drugs

Goal(s):

- To ensure that non-preferred NSAIDs are used for above the line conditions and restrict ketorolac to short-term use (5 days every 60 days) per the FDA black boxed warning.

WARNING - Ketorolac is indicated for the short-term (up to 5 days) management of moderately severe acute pain that requires analgesia at the opioid level. It is not indicated for minor or chronic painful conditions. Ketorolac is a potent NSAID analgesic, and its administration carries many risks. The resulting NSAID-related adverse events can be serious in certain patients for whom ketorolac is indicated, especially when the drug is used inappropriately. Increasing the dose beyond the label recommendations will not provide better efficacy but will result in increasing the risk of developing serious adverse events.

Initiative: NSAID PDL & Ketorolac Quantity Limit

Length of Authorization: Up to 1 year.

Preferred Alternatives: Listed at: http://www.oregon.gov/DHS/healthplan/tools_prov/pdl.shtml

Requires PA: Non-preferred NSAIDs

Ketorolac: Maximum of one claim per 60 days. That claim can be a maximum of 20 tablets / 5 days, i.e. there is a 5 day maximum per 60 days.

Antiemetics, New

Goal(s):

- Promote preferred drugs.
- Reserve costly antiemetics for appropriate indications.
- Restrict chronic use (> 3 days per week).
- If chemotherapy is more frequent than once weekly, approve a quantity sufficient for three days beyond the duration of chemotherapy.

Initiative: Antiemetics (PDL and Quantity Limit) **Length of Authorization: 3 days to 6 months (criteria specific)**

Preferred Alternatives: Listed at; http://www.oregon.gov/DHS/healthplan/tools_prov/pdl.shtml or metoclopramide (Reglan), prochlorperazine (Compazine), promethazine (Phenergan)

Check the reason for the PA request:

- *Non-Preferred drugs will deny on initiation*
- *Preferred drugs will deny only when maximum dose exceeded (www.orpdl.org)*

Initiation:

Antimigraine - Triptans

Goal(s):

- Decrease potential for Medication Overuse Headache through quantity limits and therapeutic duplication denials.
- Promote PDL options. See DUR Board Newsletter:
http://pharmacy.oregonstate.edu/drug_policy/pages/dur_board/newsletter/articles/volume5/5_6.pdf

Initiative: Anti-migraine PDL, Quantity Limits & Duplicate Therapy.

Length of Authorization: up to 6 months

Preferred Alternatives: See PDL options: http://www.oregon.gov/DHS/healthplan/tools_prov/pdl.shtml

Check the reason for PA request:

- Non-Preferred drugs will deny on initiation
- Preferred drugs will deny only when maximum dose exceeded
- Both will deny for concurrent therapy (Concurrent triptans by different routes is allowed.i.e. oral + nasal, oral + injectable, nasal + Injectable)

3. Has the client tried and failed a 2-month trial of a covered alternative alpha blocker (terazosin, doxazosin, prazosin)?	Yes: Approve an Alpha Blocker only for 1 year	No: Deny until client has tried and failed a covered alternative
4. Does client have a diagnosis of BPH (Benign Prostatic Hypertrophy) or enlarged prostate with obstruction? (600.01, 600.11, 600.21, and 600.91; 788.2 + 600.xx see RPH notes)	Yes: Approve for 1 year	No: Go to #5.
5. Does client have a diagnosis of unspecified urinary obstruction or benign prostatic hyperplasia without obstruction? (599.6, 600.00, 600.10, 600.20, and 600.90)	Yes: Pass to RPH; Deny, (Not Covered by the OHP).	No: Pass to RPH; Go to #6.

- 6. RPH Notes only** - All other indications need to be evaluated to see if they are above or below the line:
- **Above the line** covered diagnoses related to prostate may be approved for 1 year
 - **Below the line** diagnoses (e.g. Hair growth) should be denied (Not Covered by the OHP).
 - Alpha Blockers and 5-alpha reductase inhibitors (ARI) may be used concurrently for BPH up to 1 year. Alpha-blockers may be discontinued once prostate is reduced to normal size.
 - 788.2 (retention of urine, obstructive); Ask for more specific diagnosis. If along with 600.01, 600.11, 600.21 or 600.91, then may approve.

Refer questions of coverage to DMAP.

Buprenorphine Sublingual

Goal(s):

- Expand access to opioid addiction treatment.
- Treatment of pain remains a priority, including e.g. addicts with injury & illness. Buprenorphine would need to be held during opioid treatment, esp. long-acting opioids.

Clinical Guidelines for the Use of Buprenorphine in the Treatment of Opioid Addiction, TIP 40, available at <http://www.samhsa.gov> or <http://www.ncbi.nlm.nih.gov/books/bv.fcgi?rid=hstat5>

Length of Authorization: up to 6 months; 2 months if MD prescribing for immediate need pending certification.

Requires PA:

Central Nervous System (CNS) Sedatives - Benzodiazepine Quantity Limit

Goal(s):

- Approve only for covered OHP diagnoses.
- Treatment of uncomplicated insomnia is not covered, but insomnia contributing to covered comorbid conditions is.
- Prevent adverse events associated with long-term sedative use.
- Clients coming onto the plan on chronic sedative therapy are grandfathered.(refer to criteria). Also see related Sedative Therapy Duplication edit. The safety and effectiveness of chronic sedative use is not established in the medical literature. There is a documented increased risk of serious adverse events in the elderly. Central Nervous System (CNS) – Stimulants

Goal(s):

- Cover stimulants only for OHP covered diagnoses (e.g. ADHD, narcolepsy).
- Restrict to doses supported by medical literature and promote preferred drugs in class.
- The long-term effects of stimulants are unknown. Adverse events are more frequently associated with high doses. However, effectiveness is not linearly associated with dose.

Initiative: CNS Stimulants (Non-PDL & Excessive Dose)

Length of Authorization: 1 month, 2 month or 1 year, (criteria specific)

Check the reason for PA request:

- Non-Preferred drugs will deny on initiation.
- Preferred drugs will deny only when maximum dose is exceeded.
- When a PA is entered, clients are locked into the per day quantity we enter in our PA. If the dose is increased, claims will reject for “plan limitations”. If that happens and the client is still meeting criteria, then end the old PA and enter a new one with the updated directions.

Preferred Alternatives: Listed at: http://www.oregon.gov/DHS/healthplan/tools_prov/pdl.shtml

PA does NOT concern drugs in STC 07 or 11, however, these drugs are not to be encouraged. The State is prohibited from prior authorizing Class 11 drugs by statute. These include:

- armodafinil (Nuvigil)
- atomoxetine (Strattera)
- modafanil (Provigil)

Approval Criteria		
1. What diagnosis is the stimulant being used to treat?	Record ICD9 code	
2. Is diagnosis one of the following?: ADHD (ICD9 314-314.01); Narcolepsy (ICD9 341) Drug-induced sedation (ICD9 292.89)?	Yes: Go to #4.	No: Go to #3.
3. Is the diagnosis above the line? Unspecified hypersomnia (ICD9 780.54) and Obesity treatment (278.0 - 278.1) are below the line.-	No: Pass to RPH; Deny, (Not Covered by the OHP)	Yes: Go to #4.
4. Is drug requested preferred?	Yes: Go to #7.	No: Go to #5.
5. Is this continuation of therapy (claim indicating prescription filled within prior 90 days)?	Yes: Document prior prescription drug & date in PA record. Go to #7.	No: Go to #6.
6. Will the prescriber consider a change to a preferred product? Message: <ul style="list-style-type: none"> • Preferred products do not require PA for FDA approved doses. • Preferred products are evidence-based reviewed for comparative effectiveness & safety by the Health Resources Commission (HRC). Reports are available at: http://www.oregon.gov/OHPPR/HRC/Evidence Based Reports.shtml	Yes: Inform provider of covered alternatives in class and dose limits. http://www.dhs.state.or.us/policy/healthplan/guides/Pharmacy/main.html	No: Go to #7.
7. Is dose greater than limits in table below?	Yes: Go to #8.	No. Approve for up to 1 year.

8. Is the prescriber a psychiatrist?	Yes: Approve for up to 1 year	No: Go to #9.
9. Is the patient < 18 years old?	Yes: Go to #10.	No: Pass to RPH; Deny, (Medical Appropriateness) Dose exceeds maximum recommended dose
10. How much does the patient weigh?	Document patient's weight and continue to #11.	
11. Is the patient receiving an accumulative dose that EXCEEDS 2mg/kg/day of methylphenidate products or EXCEEDS 0.5mg/kg/day of amphetamine products?	Yes: Pass to RPH; Deny. (Medical Appropriateness) - Dose exceeds maximum recommended dose. Consider switching to an alternative stimulant drug class or assessing compliance with the current therapy.	No: Approve for up to 1 year.

Additional Criteria for Pharmacists:

If a client does not meet criteria and has been established on high doses (long term use), then:

1. A 1-month PA may be entered to allow time for the provider to collect the necessary information (i.e. patient's weight).
2. A 2-month PA may be entered to allow the physician to taper the patient down to acceptable doses.
3. If neither #1 nor #2 is acceptable to the prescriber, a 1-month PA may be entered; refer them for provider reconsideration and Medical Director review.

See Maximum Recommended Dose Limits for Stimulants next page.

Dispense As Written-1 (DAW-1) Reimbursement Rate

Brand Name and Multi-source

Goal(s):

- State compliance with US CFR 42 Ch.IV §447.512
- Encourage use of generics.
- Cover multi-source brand drugs at the higher reimbursement rate (DAW-1) only when diagnosis is covered by OHP and medically necessary.

Length of Authorization: 1 year

Covered Alternatives: Prior Authorization is NOT required when multi-source brands are dispensed with DAW codes other than DAW-1 and thus pay at State Maximum Allowable Cost (SMAC) or Federal Upper Limits (FUL) reimbursement rates.

SMAC and/or FUL are applied only when two or more A-rated generics are available from a manufacturer that participates in the Federal rebate program. SMAC and FUL prices and dispute forms are listed at: <http://www.dhs.state.or.us/policy/healthplan/guides/pharmacy/billing.html>

Requires PA: All multi-source drugs dispensed with a DAW-1 code (**except** narrow therapeutic index drugs listed below) as defined in ORS 414.325.

NO PA Required:

Fentanyl Transmucosal and Buccal

The purpose of this prior authorization policy is to ensure that Actiq/Fentora/Onsolis is appropriately prescribed in accordance to FDA black box warning:

- *“Actiq/Fentora/Onsolis is indicated only for the management of breakthrough cancer pain in clients with malignancies who are already receiving and who are tolerant to opioid therapy for their underlying persistent cancer pain.*
- *Clients considered opioid tolerant are those who are taking at least 60 mg morphine/day, 50 mcg transdermal fentanyl/hour, or an equianalgesic dose of another opioid for a week or longer.*
- *Because life-threatening hypoventilation could occur at any dose in clients not taking chronic opiates, Actiq/Fentora/Onsolis is contraindicated in the management of acute or postoperative pain.*
- *This product must not be used in opioid non-tolerant clients. Actiq/Fentora/Onsolis is intended to be used only in the care of cancer clients and only by oncologists and pain specialists who are knowledgeable of and skilled in the use of Schedule II opioids to treat cancer pain.*
- *When prescribing do not convert patients from other fentanyl products on a mcg per mcg basis. Pharmacokinetic differences between products could cause fatal over dose.*
- *Caution should be used when combining Actiq/Fentora/Onsolis with CYP3A4 inhibitors. Increases in fentanyl concentrations could cause fatal respiratory depression.*
- *Patients and their caregivers must be instructed that Actiq/Fentora/Onsolis contains a medicine in an amount which can be fatal to a child. Patients and their caregivers must be instructed to keep all units out of the reach of children and to discard opened units properly.”*

Initiative: MAP: Actiq/Fentora

Length of Authorization: Up to 6 months (w/qty limit)

Covered Alternatives: Generic morphine solutions and hydromorphone, morphine or oxycodone tablets **DO NOT** require PA.

Lyrica (Pregabalin)

Goal(s):

- Cover pregabalin only for above-the-line diagnoses that are supported by the medical literature (e.g. Epilepsy, diabetic neuropathy, post-herpetic neuralgia).
- Pregabalin has not demonstrated superiority to other first-line treatments for neuropathic pain and its use should be reserved for treatment failure.

Length of Authorization: 90 days to Lifetime (criteria specific)

Covered Alternatives: Anxiety: SSRIs, TCAs, Benodiazepines, Buspirone
Neuropathic pain: TCAs, Tramadol, Carbamazepine, Gabapentin

Requires PA: Pregabalin (Lyrica) HSN=026470

Approval Criteria		
1. What is the diagnosis being treated?	Record the ICD9 code.	
2. Does client have diagnosis of epilepsy? (ICD-9 code 345.0-345.9, 780.39, or 907.0)	Yes: Approve for lifetime (until 12-31-2036)	No: Go to #3.
3. Does the client have rheumatism, unspecified or fibrositis, fibromyalgia/ myalgia or myositis or below the line neuralgia/neuritis? (729.0, 729.1 or 729.2)	Yes: Pass to RPH; Go to #7	No: Go to #4.
4. Does client have diagnosis of one the following? <ul style="list-style-type: none"> • Diabetic neuropathy (ICD9: 250.6 & subsets) – Document diabetic therapy (supporting meds) • Post-herpetic neuralgia (ICD9: 053 & subsets) • Trigeminal and other above the line neuralgias (ICD9 350, 352) 	Yes: Go to #5.	No: Go to #6.
5. Has the client tried or are they contraindicated to gabapentin AND one of the following? <ul style="list-style-type: none"> • Tcas • Carbamazepine Document drugs tried or contraindications.	Yes: Approve for 90 days with subsequent approvals dependent on documented* positive response for lifetime (12-31-2036) <i>* Documented response means that follow-up and response is noted in client's chart per clinic staff</i>	No: Pass to RPH; Deny, (Medical Appropriateness) and recommend trial of covered alternative.
6. Does the client have an anxiety disorder (ICD9 300xx)	Yes: Go to #7.	No: Go to #8.

Marinol (Dronabinol)

Goal:

Cover drugs only when used for covered OHP diagnoses, and restrict use to instances where medical evidence supports use (e.g. Nausea associated with chemotherapy). There is limited medical evidence supporting the use of dronabinol for many conditions.

http://pharmacy.oregonstate.edu/drug_policy/pages/dur_board/reviews/articles/dronabinol.html

Length of Authorization: 6 months to lifetime (criteria specific)

Covered Alternatives: Metoclopramide (Reglan),
 Prochlorperazine (Compazine)
 Promethazine (Phenergan)
 5 HT3 antagonists (Zofran, Anzemet, or Kytril) – PA'D for >3 days.

Requires PA: HSN = 001955 dronabinol (MARINOL)
 No quantity limits for Oncology (cancer) related antiemetic use.

Quantity Limits: 2.5mg & 5mg - - 3 units / day
 10mg - - 2 units / day
 Apply **only** to AIDS/HIV related anorexia and Non-Oncology related antiemetic use

Approval Criteria

1. What is the diagnosis being treated?	Record the ICD9 code being treated.									
2. Does client have diagnosis of anorexia associated with AIDS? HIV?	Yes: Approve for lifetime (until 12-31-2036) Apply quantity limit (Anorexia associated with AIDS/HIV)	No: Go to #3.

Nutritional Supplements (Oral Administration Only)

- Restrict use to clients unable to take food orally in sufficient quantity to maintain adequate weight.
- Requires ANNUAL nutritional assessment for continued use.
- Use restriction consistent with DMAP EP/IV rules at:
<http://www.dhs.state.or.us/policy/healthplan/guides/homeiv/main.html>

These products are NOT Federally rebate-able; Oregon waives the rebate requirement for this class.

PLEASE NOTE:

- ✓ **Nutritional formulas, when administered enterally (g-tube), are no longer available through the point of sale system.**
- ✓ **Service providers should use the CMS 1500 form and mail to DMAP, P.O. Box 14955, Salem, Oregon, 97309 or the 837P electronic claim form, and not bill through POS.**
- ✓ **When billed correctly with HCPCS codes for enterally given supplements, enterally administered nutritional formulas do not require a prior authorization. However, the equipment does require a PA (i.e., pump).**
- ✓ **Providers can be referred to 800-642-8635 or 503-945-6821 for enteral equipment PAs**

Opioids - Methadone – High Dose Limit

Goal(s):

- Ensure safe use of methadone.
- Approval for >100mg/day only after assessment of QTc risk factors by prescriber.
- Methadone has been associated with adverse cardiac effects as stated below in an excerpt of the FDA Black Box Warning:

Cases of QT interval prolongation and serious arrhythmia (torsades de pointes) have been observed during treatment with methadone. Most cases involve patients being treated for pain with large, multiple daily doses of methadone, although cases have been reported in patients receiving doses commonly used for maintenance treatment of opioid addiction.

Opioids - Narcotic Combination – Excessive dose limits

Goal(s):

- Avoid adverse effects due to high dose of combined ingredient by enforcing FDA maximum dose labeling.
- Pay only for treatment of covered OHP diagnoses

Length of Authorization: None

Covered Alternatives:

Pharmacy may need to adjust days supply entry.
 Prescriber may choose a product with a higher ratio of narcotic to keep APAP or ASA within maximum limits or use a single-ingredient opioid.

Requires PA:

Limits by the maximum dose of the non-narcotic ingredient(s).
 Acetaminophen is not to exceed 4 gms/day.
 Aspirin is not to exceed 8 gms/day.

Approval Criteria

1. What is the diagnosis being treated with the opioid combination? (See tables)	Record ICD9 code being treated with the opioid combination.	
2. Does daily dose exceed the maximum for combination ingredient?	Yes: Go to #3.	No: Instruct pharmacy to correct days supply entry
3. All indications need to be evaluated as to whether they are above the line or below the line.	Above: Pass to RPH, DENY, (Medical Appropriateness) Review FDA maximum dose and provide alternatives.	Below: Pass to RPH, DENY, (Not Covered by the OHP) Review FDA maximum dose and provide alternatives

Continuation of Therapy- HCV

1. Does the client have undetectable HCV RNA or at least a 2-log reduction (+/- one standard deviation) in HCV RNA measured at 12 weeks?

Yes: Approve as follows:

Genotype	Approve for	Apply
1 or 4	An additional 36 weeks or for up to a total of 48 weeks of therapy (whichever is the lesser of the two).	Ribavirin quantity limit of 200 mg tablets QS# 180 / 25 days (for max daily dose =1200 mg).
2 or 3	An additional 12 weeks or for up to a total of 24 weeks of therapy (whichever is the lesser of the two).	Ribavirin quantity limit of 200 mg tab QS# 120 / 25 days (for max daily dose = 800 mg).
For all genotypes and HIV co-infection	An additional 36 weeks or for up to a total of 48 weeks of therapy (whichever is the lesser of the two)	Ribavirin quantity limit of 200 mg tablets QS# 180 / 25 days (for max daily dose = 1200 mg).

Note: Approval for beyond quantity and duration limits requires approval from the medical director.

No: Deny; (Medical Appropriateness)

Treatment with pegylated interferon-ribavirin does not meet medical necessity criteria because there is poor chance of achieving an SVR.

Clinical Notes:

- Serum transaminases: Up to 40 percent of clients with chronic hepatitis C have normal serum alanine aminotransferase (ALT) levels, even when tested on multiple occasions.
- RNA: Most clients with chronic hepatitis C have levels of HCV RNA (viral load) between 100,000 (10⁵) and 10,000,000 (10⁷) copies per ml. Expressed as IU, these averages are 50,000 to 5 million IU. Rates of response to a course of peginterferon-ribavirin are higher in clients with low levels of HCV RNA. There are several definitions of a "low level" of HCV RNA, but the usual definition is below 800,000 IU (~ 2 million copies) per ml.(5)
- Liver biopsy: Not necessary for diagnosis but helpful for grading the severity of disease and staging the degree of fibrosis and permanent architectural damage and for ruling out other causes of liver disease, such as alcoholic liver injury, nonalcoholic fatty liver disease, or iron overload.

Stage is indicative of fibrosis:		Grade is indicative of necrosis:	
Stage 0	No fibrosis		
Stage 1	Enlargement of the portal areas by fibrosis	Stage 1	None
Stage 2	Fibrosis extending out from the portal areas with rare bridges between portal areas	Stage 2	Mild
Stage 3	Fibrosis that link up portal and central areas of the liver	Stage 3	Moderate
Stage 4	Cirrhosis	Stage 4	Marked

The following are considered investigational and/or do not meet medical necessity criteria:

- ✓ Treatment of HBV or HCV in clinically decompensated cirrhosis
- ✓ Treatment of HCV or HBV in liver transplant recipients
- ✓ Re-treatment of HCV or HBV previous non-responders or relapsers
- ✓ Treatment of HCV or HBV > 48 weeks
- ✓ Treatment of advanced renal cell carcinoma
- ✓ Treatment of thrombocytopenia
- ✓ Treatment of human papilloma virus
- ✓ Treatment of multiple myeloma

Goal(s):

- Promote PDL options.
- Restrict chronic use (>eight weeks) to patients who failed H2-antagonist, omeprazole, Aciphex, or Prilosec OTC therapy or who have severe disease, e.g. Barrett's, or Zollinger Ellison syndrome.
- Restrict BID use to patients with severe disease, H.pylori or pediatric patients.

Initiative: PPI Clinical Edit & PDL

Length of Authorization: 2 weeks to lifetime (criteria specific)

Notes:

- This is a "global" PA.
- If an active PA for a PPI already exists, then **any** PPI will pay.
- A new PA is required if the dosing schedule changes, e.g., an active PA for once daily dosing restricts the PPI to once a day.
- BID dosing requires a new PA, however, the strength of the dose could be increased without an additional PA, e.g, a change from 20 mg daily could be increased to 40 mg ONCE a day without an additional PA.

Covered Alternatives without PA:

- ✓ Aciphex (HSN = 018847)
- ✓ Prilosec OTC (HSN= 011115)
- ✓ Omeprazole (HSN=004673)
- ✓ H2-antagonists, sucralfate and antacids

Preferred PPIs: Listed at: http://www.oregon.gov/DHS/healthplan/tools_prov/pdl.shtml

Check the reason for the PA request: *Non-Preferred drugs will deny on initiation.*

Risperdal Consta – Quantity Edit

Goal(s): To insure the use of the appropriate billing quantity.

Length of Authorization – Date of service OR 1 year, depending on criteria

PA Required: Risperdal Consta

This is a quantity initiative, **not a clinical initiative**. The syringe is 2 ml size . The pharmacy must submit the dispensing quantity as 1 syringe not 2 ml.

Approval Criteria		
1. Is the quantity being submitted by the pharmacy expressed correctly as # syringes?	Yes: Go to #2.	No: Have pharmacy correct to the number of syringes instead of ml's.
2. Is the amount requested above 2 syringes per 18 days for one of the following reasons? <ul style="list-style-type: none"> Medication lost Medication dose contaminated Increase in dose or decrease in dose Medication stolen Admission to a long term care facility Any other reasonable explanation? Skeletal Muscle Relaxants

Goal(s):

- Cover non-preferred drugs only for above-line-line diagnosis.
- Restrict carisoprodol to short-term use per medical evidence.
- There are no long-term studies of efficacy or safety for carisoprodol.
- Case reports suggest it is often abused and can be fatal when used in association with opioids, benzodiazepines, alcohol or illicit drugs.
- Carisoprodol is metabolized to meprobamate.
- See DUR Board Newsletter for more information at:

[Http://pharmacy.oregonstate.edu/drug_policy/pages/dur_board/newsletter/articles/volume4/4_8.html](http://pharmacy.oregonstate.edu/drug_policy/pages/dur_board/newsletter/articles/volume4/4_8.html)

Initiative: Skeletal Muscle Relaxant PDL & Carisoprodol Quantity Limit

Length of Authorization: Up to 6 months

Preferred Alternatives: See PDL options: http://www.oregon.gov/DHS/healthplan/tools_prov/pdl.shtml

Cyclobenzaprine (similar to tricyclic antidepressants – TCAs) has the largest body of evidence supporting long-term use and is the preferred product in the muscle relaxant class. For patients that have contraindications to TCAs, NSAIDs, benzodiazepines or opioids are other alternatives. OHP does not cover pain clinic treatment.

Check the reason for the request:

- Non-Preferred drugs will deny on initiation
- Carisoprodol will deny only when maximum dose exceeded
