

Covered and non-covered visual services for non-pregnant adults covered by OHP Plus - Effective October 1, 2015

This fact sheet describes the visual services limitations for non-pregnant adults (age 21 and older) who receive OHP Plus (BMD, BMH or BMM) benefits.

Children (age 20 and younger) and pregnant women are not subject to these limitations.

Covered services

Medical eye exams and treatment for any eye condition except for “disorders of refraction and accommodation” (*e.g.*, nearsightedness, farsightedness, astigmatism)

Urgent/emergent treatment (*e.g.*, for injuries to the eye)

Refraction and accommodation and hardware services (*e.g.*, glasses, contacts and eye exams to prescribe glasses or contacts) only when related to aphakia or keratoconus. One of the following diagnoses must be listed as the primary diagnosis on the claim for these services:

- Keratoconus, unspecified
- Keratoconus, stable condition
- Keratoconus, acute hydrops
- Aphakia
- Congenital Aphakia (congenital absence of lens)
- Absence of eye lens(es), such as following cataract extraction

Non-covered services

Refraction and accommodation or hardware services for diagnoses **not** related to aphakia or keratoconus.

DMAP will deny all claims for services to non-pregnant adults that are billed with a 367.XXX or H52.XXX diagnosis.

Questions?

For billing questions, contact Provider Services at 1-800-336-6016 or dmap.providerservices@state.or.us.
