

# WILLAMETTE DENTAL GROUP: A PROVIDER OF INVISALIGN®

Willamette Dental Group, P.C. offers Invisalign® treatment as an option for its patients at an additional cost. This treatment option is only available through licensed Willamette Dental Group orthodontists in dental office locations that offer orthodontic services.

## HOW DOES INVISALIGN® TREATMENT WORK?

Invisalign treatment involves the use of a custom-made series of aligners created for each individual patient to reposition teeth. Wearing the aligners gradually shifts teeth into place, based on the movements planned by the orthodontist. Aligners are worn 20-22 hours each day and are removed for eating, brushing and flossing. Aligner trays are changed every two weeks through the duration of treatment. Each case is unique so the treatment duration will vary with each specific treatment plan.

The suitability of Invisalign treatment for each patient is determined by their Willamette Dental Group orthodontist based on several factors including alignment goals, patient cooperation and current oral health.

## INVISALIGN® TREATMENT COST

The cost of treatment is dependent on the treatment plan of your individual case. As an orthodontia patient, you will be responsible for payment of the pre-orthodontia service copayments, a comprehensive orthodontia treatment copayment plus Invisalign® charge and office visit copayments.
